

## A God 601

### [Chapter 601: Look for](#)

In the Qingfeng realm, a purple palace is flying outwards at high speed.

Sitting in the palace, Wang Yi was very calm.

"In fact, some information can be inferred from the time and location of entering the waters in Luo Feng's original work."

In the original history, Luo Feng entered the water from a human gathering point and found the wing space in a cave in the water.

In such a short time and distance, there are not many that match the target information based on the location of the human gathering point.

This alone can eliminate many useless routes.

"The luckiest thing is that my one percent of the broken image seems to include that area." A smile appeared on Wang Yi's face.

Very lucky.

"There is an obvious landmark in the original work, that is the flame slurry cave, where Luo Feng entered the stone pillar space and obtained the token and the drawing silk picture left by the strongest man in the universe "Jie Fanzi" before the reincarnation era, but the flame The area of the slurry cave is already the core area. In this range, even the strongest in the universe may be lost." Wang Yi said softly, "If there was no Jie Fanzi's token and map, Luo Feng would not be so fast. Entering the spacecraft for adventure, without knowing the route of the map, it is also very difficult to navigate the interior, and perhaps you will not encounter the birth of the tomb boat...It is really one link after another." Wang Yi smiled strangely.

Only with wings can you discover the wing space, and with the star tower can you safely pass through another concealed passage in the wing space, and then you can enter the core area of the Qingfeng realm that was impossible to enter, and you can logically get the tokens and maps left by the predecessors in the reincarnation era. .

This cannot be described by luck alone.

It's like Luo Feng was born on the earth, and the great power of sitting on the mountain invisibly gave him the biggest hangout.

"Secret Code of Nine Tribulations", "Jia Jia", "Star Tower"... and even in the world of Jin, "Lie Yuan Shu"... all arranged for you clearly.

It is understandable that he is a son after all.

Worship a teacher, Chaos City Lord, and bestow the most treasure, which is Wu Yuyi with the golden sky attribute that matches his attributes.

As for why it wasn't Huo Kong, Mu Kong, Feng Shi... or something, I can only say that "destiny" is arranged like this.

Killing Wu Yuyi is related to the spacecraft, and Wu Guo cuts off the East River to inherit this line.

Zuoshanke is a truly rising existence.

With the mountain guest, I successfully entered the hidden space of an abyss in the spacecraft, and discovered the secret pattern left by the ancient civilization of the "Wu" country, because the genre of my own secret pattern can be understood, which is regarded as a broken east. The inheritance of He Wu lays the foundation for cracking the Rhinoceros Game.

The chances are one after another, just like a game to pass a level. If the previous level does not meet the corresponding conditions, you will never be able to pass the level.

Some things are so destined, no matter how hard you work, no matter how tyrannical you are, you can't fight it.

Wang Yi sighed and laughed.

I just don't know whether the "supreme rule" is working in the dark behind all this, or the cosmic origin will perceive the crisis and make arrangements in advance?

But none of this matters anymore, because he has already arrived.

In the world of a certain great god, there is not a strong enough link, and I am embarrassed to come out and mix.

Withdrawing his thoughts, Wang Yi looked at the map again and fell into thinking.

It is impossible for the map to be specific to the level of information in the wing space, nor to explain what treasures there are there, so Wang Yi had to explore and find it by himself.

Although Wang Yi doesn't care much about Jie Fanzi's precious treasures, it is a huge wealth for any ethnic group in the primitive universe.

In contrast, Wang Yi is even more interested in the "water and fire origin" that Jie Fanzi has painstakingly researched.

"According to the description of the original book, Jie Fanzi just realized the foundation of this "Water and Fire Origin", and even the foundation has just been built. If the foundation is 10%, I am afraid that I will be able to transcend reincarnation. If the whole faculty is truly trivial, then It's even more terrifying. To be successful..." Wang Yi couldn't help but sigh, this is a powerful and unique school that points directly to the origin.

It's a pity that Jie Fanzi's path is still crooked, and the steps are too large, and there is not so much time for him to enlighten, otherwise there should be a chance to become the true \*\*\*\* of the void.

And now that Cosmic Sea does not have his small cosmic holy land, it goes without saying that he has failed.

A tenth-tier top powerhouse comparable to the original ancestor was just lost in the long river of time.

...

About a few decades later, Wang Yi entered the 103rd year of the Universe Sea.

Over the waters of Qingfengjie, huge celestial rocks flew at high speed at several times the speed of light and turned into streamers.

A purple palace flew out from a gap in the Qingfengjie mountain.

Looking at the boundless waters, Wang Yi also sighed with emotion.

The waters of the Qingfeng Realm are too large, and there are a large number of instinctive creatures in the depths, even if they are nearly a hundred forces...So far, I dare not say that they have explored the entire waters, and as time goes by, the structure of the waters will be gradually Changes.

The map obtained by Wang Yi was also generated based on existing information. In the future, some terrain will change over time, and this map cannot be trusted.

"Wow!"

Endless darkness is permeated, and there is faint water flowing in the darkness, covering an area of ten light-years in radius.

This pinnacle domain class treasure can explore ten light-year areas at once!

Of course, although this kind of investigation is fast, some real treasures are affected by the entire Qingfeng Realm, and they cannot be discovered by the realm.

However, it is very convenient for driving. If it is confirmed that there is no danger in the area ahead, it can be teleported directly, which is much faster than flying.

Wang Yi was still very afraid of Qingfeng world.

A purple palace is suspended above a vast expanse of water.

"It's really big. Fortunately, I have a certain area to explore. If I fumble without a goal, I don't know how long it will take." Wang Yi shook his head.

"And for safety reasons, I can only choose waters to move forward."

If you are groping slowly, don't talk about other things, just walk light-years, and walk slowly, one by one, how long? How long is an area one light-year long and one light-year wide and one light-year high?

Exploration is not flying.

Generally, the Lord of the Universe carefully explores some places and then exits after no treasures are found~[www.mtlnovel.com](http://www.mtlnovel.com)~Continue to the next canyon, cave, mountain, vegetation, grass, etc..... a straight line with a very slow speed of one light-year The distance is probably not enough for ten thousand epochs.

And one light-year long, wide and high? Even the 100 million era is far from enough!

The purple palace flew out, and the field of the black night river continued to flow around, along the established route.

In the primitive universe, except for the shock of all forces caused by the true strength of the giant axe, the whole is still running quietly. The parties in the primitive star that have only been opened for 10,000 years are still fighting for treasures, and the ancient and vast universe is like The past is as calm as ever, and the strong are rushing and adventurous everywhere.

In the virtual universe, Wang Yi occasionally appeared to meet with acquaintances and friends.

And his divine body in the universe sea is also constantly rushing towards the destination.

#### [Chapter 602: cave](#)

brush! A black-haired man in red armor with a pair of gray wings behind it appeared at the main mountain of Qingfeng Realm. Above his head was the main mountain of Qingfeng Realm that seemed to cover the endless universe. He overlooked the vast waters below and nodded slightly.

"Well, my exit is very close to the route target. At this teleporting speed, about half a month is enough to reach the destination."

Whoosh! Wang Yi began to teleport, and each teleport was ten light-years away. Some places were slightly dangerous, or the area was blocked, and it would be a little slower, but overall the speed was still very fast.

The main mountain of Qingfeng Territory is about 98.02 million light-years high. Although Wang Yi did not follow his original route, it would take some time to drive on his way.

Wow... Wow... The huge, almost endless rocks were flying at high speed, and Wang Yi kept weaving among them.

There are countless celestial rocks in the outer domain of Qingfeng, which maintains super-high-speed flight at all times.

But on the celestial rocks, you will find...other rocks are relatively static.

The rocks near the main peak fly slowly, and those far away fly faster. The distance between countless rubbles relative to each other is eternal.

Every time you teleport to a location, you first spread out the area and make sure there is no problem with your footing before you continue teleporting forward.

brush! brush! brush! Keep teleporting! Occasionally, some places are avoided.

"The spatial fluctuations in that area are still and go around."

"The realm of that place can't extend too far, and it's going around."

Boom... Finally, Wang Yi got into the shallow waters of endless waters.

Wang Yi teleported another distance, slowing down.

Because it has entered a dangerous zone, it can't be teleported so wantonly. Long-distance teleportation in "waters" generally means daring to teleport to shallow waters. In deep waters, even with field assistance, it is only a very short and small-scale teleportation. The distance of each teleport is extremely short, only hundreds of millions. Kilometers only.

"The route is okay, just ahead." Wang Yi squinted his eyes, with a hint of excitement in his eyes.

And millions of light-years away from Wang Yi's path forward, a humanoid creature filled with white light was advancing.

This celebrity creature, his whole body exudes a hazy white light, and there are circles of white light behind his head, and there is a huge one-eyed phantom in the white light.

There is a one-eyed phantom in the light circle behind his head-this is the strong characteristic of the God Eye Clan.

The God Eye Race is one of the peak races in the First Universe Era, and can be called the strongest pinnacle race in the First Universe Era. There are seven strongest in the universe in their race group!

This is a very mysterious and terrifying ethnic group. It should be regarded as such an unbelievable ethnic group when some special accidents occurred during the evolution of the original universe in the original universe.

Judging from the intelligence data of various forces in the universe and sea that Wang Yi has learned, the God Eye tribe's limelight is now faintly overwhelming the two sacred places of the universe. Except for the humans of the original ancestors, it belongs to the God Eye tribe with the most beautiful scenery.

Of course, the God Eye Race, facing the limit of reincarnation, will inevitably fall into a circle of crazy behavior.

Lord Jiayu looked at the surroundings calmly, he was relatively lonely in Qingfeng Realm, and he had long been accustomed to such days of lonely exploration.

As the master of the universe of the God Eye Clan in the First Reincarnation Era, the master of Jiayu is considered the master of the fourth-order universe. It is a bit too risky to venture into the inner realm of Qingfeng Realm, and he dare not. He still rushes slowly in the waters, and the danger is small.

Occasionally, you can get treasures, maybe you can kill them when you encounter some weak masters of the universe.

"Some of the masters of the universe who have just entered the Universe Sea generally have many weak points, but the "Master of Chaotic Source" that has been circulating in the primitive universe a while ago is said to have Tier 5 combat power." The Master of Jia Yu sighed, and again Some are not reconciled.

"The little guy who is only in the Third Universe Age can have such a great strength. There must be a chance against the sky. The human race in the primitive universe can only be regarded as average. He is a newly promoted little guy who has no chance against the sky. How could it be possible? Have such a strong strength."

"If I had such a chance..." The Master of Jia Yu thought about it, while flying slowly at the bottom of the waters.

He explored all the peaks (the bulges on the natural rocks) and the gorges at the bottom of the water area...without a trace of impatience. As a super strong man with an endless life span, even if he explores the Ten Thousand Era, he will still be very calm.

The Lord of Jia Yu has been here for not knowing how long he has been exploring.

At this moment, the Master of Jiayu who opened the Supreme Treasure Domain felt that his domain crashed into another domain, and that domain was very powerful, and suddenly squeezed the domain of Master Jiayu's own.

"Huh? Who is it?" The Master of Jia Yu was taken aback.

Lord Jiayu controls and "sees" the endless black river through the time and space of the domain.

"The black river?"

Very familiar feeling.

"Is that the Lord of the Human Chaotic Source of the Primitive Universe?" The Lord Jiayu was a little surprised. "You will actually let me run into him. The Lord of Chaotic Source has Tier 5 strength and many clones. I'm not his opponent. Run."

The Master of Jia Yu felt tight, and he teleported away from this area with a swipe.

Ten light-years away, Wang Yi also looked at the place where the Lord of Jiayu was originally located.

"God Eye Race?"

"However, he ran when he saw me, so his strength should not be very good."

"Forget it, it has nothing to do with me, let's find the wing space first."

Wang Yi also didn't bother to pay attention to this God Eye Clan, mainly because the God Eye Clan was crazy, the strong of the group fell, and they would definitely come to find trouble. The God Eye Clan has seven strongest people in the universe, and it is not a good thing to be stared at by them.

Although the strength of the giant axe is exposed, all parties in the universe know that the giant axe is terrible, and the God Eye race should be a little more afraid, but it is better to have less trouble or less trouble.

The current Wang Yi and the Shenyan clan have no grudges, nor do they want to confront them for no reason.

And in the distant waters, with a handsome face, hazy white light all over, a light circle behind his head, and a one-eyed phantom in the light circle, the Lord Jiayu appeared here, frowning and looking behind him.

"Does the Lord of Chaotic Source appear here accidentally or is it another plan?"

"No matter what, please pass the news back first, and let the nearby clansmen be more careful."

There are more than one or two powerhouses of the God Eye Race in Qingfeng Realm. After all, the God Eye Race has seven small universes. The Lord of the God Eye Race is less than the two holy land and more than other forces. Many.

"The Lord of Chaotic Source is in the depths of the water?"

"I heard that he is very strong, and his strength is comparable to that of Chaos City Lord."

"It's a pity that I can't get there on Liu Zhongshan~[www.mtlnovel.com](http://www.mtlnovel.com)~, otherwise I can compete with him."

The strong people of the God Eye clan reacted differently.

Like the Lord of the ordinary Tier 4 universe, he felt that the Lord of Chaotic Source was a bit dangerous, and would choose to give in when he was afraid.

But powerful masters of the universe like the "Lord of the Five Chaotic Systems" and "The Lord of Jin Zang" are eager to try and full of fighting spirit.

...

In the depths of the waters of Qingfeng Boundary.

Wang Yi didn't fly like that anymore, and started looking carefully along the route as the Lord of Jiayu did before.

I just don't know when I can find it.

"The cave...too many, I don't know which one is." Wang Yi muttered.

#### [Chapter 603: 800 years](#)

Time passed quietly like flowing water.

In a blink of an eye, Wang Yi has been in the Universe Sea for nearly 800 years.

The huge and incomparable celestial rocks in the depths of the water are like towering mountains. The peaks and valleys formed by the celestial rocks are undulating, and you can't see the head at a glance.

There are white people floating in it, or white human figures, or white beasts. The strangely shaped "water flow spirits" are pure instinctive attraction of the same kind, playing with each other and occasionally making high-frequency piercing calls, deep in the waters. Wandering wantonly.

A red shadow was advancing in the water, and a black torrent was permeated around it.

"Really, I have been exploring for 700 years, and I haven't found the cave in the wing space yet." Wang Yi muttered.

Because of the influence of Qingfeng Realm, the domain alone could not detect the wing space, otherwise the secret would have been discovered by other strong people.

You have to get close in person to find it.

"However, I have not been a waste of time in the eight hundred years of Cosmic Sea. I finally understood the fifth secret pattern of the Tongtian Tower and created the strongest fusion method... Moreover, it is the perfect fusion of the strongest secret method, but, I want to go further, but it's difficult and difficult." Wang Yi thought to himself as he searched his surroundings.

It is said to be eight hundred years, but in fact eight million years have been spent in the cultivation space.

For example, Wang Yi mastered the Tongtian Pagoda and the genre of secret patterns, but it was actually more convenient to create secrets.

Although the Lord of the Galaxy is powerful, his so-called fusion secret 'river under the night' is really too rigid.

First, the scope of the microcosm is like a secret method to assist the attack. Although the combination is very good, it can be regarded as a shortcut.

The truly perfect fusion refers to the most perfect fusion of the mystical artistic conception itself without the help of any auxiliary means.

Over the years, Wang Yi first created one of the most powerful secrets of the Lord of the Universe in the golden sky, the wood sky, the fire sky, the water sky, and the earth sky.

Then try to choose one of these five secret methods to make a breakthrough.

After five million years of research, he used the strongest secret technique of Huo Kong to perfect a flawless combination of the strongest secret technique-"Yanxing".

"Scorching Star", the extreme limit of fire and sky, the truly perfect trick, in Wang Yi's view, this is the true theoretical limit of the Secret Method of the Master of the Universe, which cannot be surpassed.

At this point, even if there is no Xeon Supreme Treasure, any divine body of Wang Yi possesses the top combat power of Tier 5.

And with the Xeon Supreme Treasure, you can play the top combat power of Tier VI!

Moreover, all four bodies have reached the top of Tier 6.

Of course, Wang Yi is impossible to satisfy. His goal is to thoroughly understand the sixth level of Tongtian Tower, and then see if he can create the secret method of the strongest in the universe.

However, the principle of the master of the universe determines that it is difficult to create secret methods of that level.

If it is not the strongest in the universe, but to create the "secret method of the strongest in the universe", this can be said to be impossible in the universe! If you don't break through, you won't be able to appreciate that level of mystery.

If Wang Yi didn't have the tower of the sky and the genre of mystery patterns, he would not have done it at all.

In addition to the secret method, it is to study and analyze the nature of life genes. But the progress is not big.

And the sign-in in the waters of Qingfeng Realm is also lackluster, and there is no big gain.

"My current will has reached the limit of the Lord of the Universe, and it's only one line from the strongest in the Universe." Wang Yi said with emotion.

The time for Wang Yi's will to reach the limit of the Lord of the Universe is not short, but he has been stuck here and cannot break through.

The will seems emptiness, but it is very important, because it involves the soul and the nature of the mind.

From the limit of the master of the universe to the will of the strongest in the universe, it seems that there is only a short distance, but in fact it is a qualitative leap.

In many cases, it is necessary for a strong person to have a very high will. For example, to recognize the lord of the treasure, it often requires a will higher than its own realm.

In Wang Yi's view, the Lord of the universe can only be qualified if he possesses the will of the strongest in the universe.

"After finding the wing space, you have to go to the black stone pillars of the space boat to sharpen your will."

Of course, the blood-stained "source" wings in the wing space also contain the impact of will, and can also sharpen the will, but the effect is definitely not as good as that on the black stone pillar, after all, there is still time to accelerate on the black stone pillar.

"Where is the winged cave?" Wang Yi looked around. Of course, this is only his deity. The Void Zerg and the Yanxing Giant Beasts have also dispatched and scattered to find other places together. It is impossible to find them alone.

And over the past seven hundred years, Wang Yi has also constantly fought against other powerhouses in Cosmic Sea during the search process, because he is a Tier 5 top combat power, in fact, not many dare to fight him actively, plus this is the outer waters. , It was not the inner region of Qingfeng Realm, and the Lord of the universe who was destined to be active here would not be too strong, so Wang Yi didn't encounter any trouble.

Often, other powerful cosmic and ocean forces found him and took the initiative to avoid him.

The occasional provocation was easily defeated by Wang Yi.

Another ten years passed in a blink of an eye.

"Wow!"

When Wang Yi saw an ordinary cave on a mountain peak, he would fly directly into it, but with no results, he would fly out again.

Keep repeating this process.

In these seven hundred years, I don't know how many times it has been carried out.

It's boring, but Wang Yi is still very calm.

In fact, practicing and researching secret methods is generally much more boring than this, at least you can move around and see the scenery.

"Not here."

"Neither here."

"I have explored 69% of the route. I still haven't found out where it is." Although Wang Yi was still calm, he was not in a good mood.

After all, it's just a broken map plus one's own derivation, and the wing space is not 100% that can be found.

Wang Yi can only search patiently. If he can't find it this time, I guess he will have to come with Luo Feng in the future and use his wings to search for it.

"Wow!" Wang Yi flew out of a water plant and flew into a seemingly ordinary cave. The diameter of the cave is about tens of thousands of kilometers, and the depth is tens of thousands of kilometers.

But Wang Yi has seen more of this kind of places over the years, and there is no volatility in his heart.

"Huh?" Wang Yi felt a very weak energy fluctuation.

The whole person suddenly agitated and stopped.

"Energy fluctuations!"

Wang Yi's eyes suddenly brightened ~www.mtlnovel.com~ His mood was a little excited, and the whole momentum changed. His eyes swept across every area in front of him, and he also swept away with divine power, and the most treasured realm also spread vastly.

"Wing Space? No, I can't draw a conclusion yet, it's just a possibility!" Wang Yi resisted his excitement, and his figure rushed out. The cave was deep and tortuous, but Wang Yi's speed was as fast as lightning.

Go slowly, search? Impossible, he just wanted to find the wing space, he didn't care about other treasures at all.

Soon, Wang Yi stopped, and a scene of light suddenly appeared at the far end.

Wang Yi was slightly excited. He flew to the front, looked up, and saw that there was a light curtain blocking the path forward. The light curtain itself exuded extremely weak energy fluctuations. The strange thing is that... Did not find this light curtain at all.

Wang Yi had an intuition in his heart, he found it!

[Chapter 604: Wing space](#)

In the depths of the waters of Qingfeng Boundary.

Inside the cave.

Wang Yi stood in front of the light curtain and looked up.

Light curtain...Only some extremely powerful treasures in Qingfeng realm will have special scenarios. For example, there are dangerous places around, such as this kind of light curtain that cannot be detected and so on.

According to historical experience, the light curtain itself is not threatening.

"Wow!"

"Wow!"

Two figures appeared out of thin air at the entrance of the mountain cave. Wang Yi's clone of the Void Zerg race and the clone of the Yanxing Giant Beast looked at each other and flew towards the entrance of the cave at the same time.

At this time, Wang Yi had already separated a trace of consciousness and formed a divine power incarnation, allowing the divine power incarnation to control a top palace treasure to fly into the light curtain.

"First, let the divine power incarnate control the palace to fly in and explore the way." At this point, Wang Yi didn't rush.

It was just a divine power incarnation and a top palace treasure, Wang Yi didn't feel distressed at all when he lost.

Wow-the white palace is slowly flying ahead. When you touch the light curtain, it feels like breaking through a layer of water, without any hindrance.

The light curtain itself can't hinder the intruder at all... but it can make all field exploration and divine power exploration invalid.

And behind the light curtain is another light curtain.

Wang Yi's eyes brightened.

The two layers of light curtains, the Three Jedi, are the most terrifying places in the universe, and only some extremely special areas will have special scenes.

Like ordinary treasures, high-level treasures, and top-level treasures, they are usually at a certain hour. Only some powerful treasures, even strange things, etc., will have special scenes.

They are-the pinnacle of one-layer light curtain, the pinnacle of two-layer light curtain, and the pinnacle of three-layer light curtain.

Wow!

The palace penetrated one floor again.

A new light curtain appeared in front of him, the third layer!

The fourth floor!

Fifth floor!

Sixth floor!

...

Nine floors!

The White Palace didn't stop at this time, and rushed in without hesitation.

Wow... the palace easily penetrated into the ninth light curtain.

As soon as the divine power incarnation penetrated the ninth light curtain, he realized that there was already a huge and dazzling space around him. Before he had time to observe carefully, several huge blade-like dazzling lights swept directly on the palace.

This top flying palace treasure that can withstand the attacks of the strongest in the universe is comparable to the defense of peak armor, but when it is directly swept by this huge blade-like dazzling light, it is easily cut apart like paper. , Shattered instantly.

"boom....."

The incarnation of the divine power hiding in the palace also instantly annihilated.

Outside the first light curtain in the depths of the cave, Wang Yi's three divine bodies stood here, with shocked expressions on their faces.

"What a terrible power!"

"However, I have been able to confirm that this is where the Wing Space is located, and that matter will be easy to handle."

Wang Yi's eyes showed determination, "I and the Void Zerg clone took the Tongtian Pagoda and entered, and the Yanxing Giant Beast was guarding outside."

Wang Yi didn't mean to recognize the wing of the Lord. The Venerable Universe needs the will of the strongest in the universe. He is already the Lord of the Universe. The conditions are absolutely harsher.

He just needs a chance to sign in.

A 10,000-kilometer-tall black quaint iron tower appeared out of thin air. Wang Yi and a pair of Void Zerg clones with silver wings on the back of the silver-white armor flew in together, while the Flame Star Giant Beast clone with dark red scale armor was silently watching.

"go."

Wow... the black palace has penetrated into the ninth light curtain in an instant.

That is a vast space.

"Boom..." Countless blade-like rays of light swept through everything, and the "cosmic space" in this vast space had already turned into an endless stream of particles.

Destroy the world!

Destroy everything in the universe!

Power has been strong enough to destroy time and space!

However, Wang Yi was full of confidence that no one of the three major Jedi could damage the Xeon Treasure.

What's more, although Wang Yi has always called the Tongtian Tower the "Xeon Treasure", it is not the "Xeon Treasure" in essence, but a treasure far surpassing the Xeon Treasure.

Even the \*\*\*\* king of Origin Continent could not destroy it in person.

In an instant, Tongtian Tower was swept and strangled by an endless storm of blades.

Wang Yi only felt an extremely terrifying shock sweeping the entire Tongtian Pagoda.

"boom....."

However, the Tongtian Pagoda can withstand the sweep of the dazzling light like a huge blade, and it can be swept away from a distance like a toy, but Wang Yi has had the opportunity to see the surrounding environment clearly.

This is an incomparably vast space. There are countless rolling streams of chaotic particles in the dark space, and the dazzling endless blade-like endless storm is sweeping everything... it is so wide that just a glance is light years away. count!

In this endless space, the most dazzling thing is the distance-that huge! It's totally stunned...Wings!

The height seems infinite, the wings dazzling hundreds of millions of times more dazzling than the sun, the two wings of wings are infinite...The coercion spread by the dazzling white wing light, the absolute terrifying coercion above the king makes the king. Yi's consciousness stagnated for an instant.

Countless blades of light were raging and violent, sweeping and hitting the Tongtian Tower time and time again.

"Those blades of light are outrageous." Wang Yi couldn't feel it himself, but he was the master of Tongtian Tower, and his divine energy was instilled in every part of Tongtian Tower. Therefore, those shocks can be clearly sensed. Every blade of light, mighty power... is far more than one's strongest blow! Hundreds of times stronger!

"Seventh order?"

"Eighth order?"

Wang Yi was shocked.

"It's just that the light of the blades emitted by the wings itself is so terrifying. It is worthy of being the top super treasure among the eternal true gods. No wonder the top palace treasures are not able to withstand a single blow. Even the peak palace treasures may also be difficult to bear. The palace can be kept under such an attack."

"Too violent."

"No! I can't control it at all!"

Every blade storm has that power, and there is a large number of intensive blade storms hitting every moment. No matter how strong Wang Yi is in control, he can't control the movement of the Tongtian Tower. The Tongtian Tower can only be thrown away by the impact.

Of course, the Tongtian Pagoda had recovered thousands of light-years in size, and this endless blade storm couldn't do anything about it, but Wang Yi's current strength couldn't move such a huge one.

"small!"

"small!"

Wang Yi quickly controlled the palace to shrink ~www.mtlnovel.com~ to be as small as dust, reducing the space to be attacked.

Even if the Tongtian Pagoda itself shrinks, the inner space is not affected at all. This is originally the mystery of the Supreme Treasure Space.

Small in size, and only occasionally attacked by a blade of light, Wang Yi can also control the Tongtian Pagoda.

"It's much simpler now."

Under the endless storm outside, the tower is as small as dust particles.

Wang Yi also saw the endless dazzling light wings in the distance, and then immediately controlled the Tongtian Tower to fly towards it.

"Yiyi, here I am."

[Chapter 605: The true will of God!](#)

In the incomparably vast space, in the endless storm of dazzling blades, the palace as small as dust particles flew towards the dazzling wings of light that seemed to be infinite in the distance.

However, the entire mysterious space is probably more than 10 light-years in diameter. It is also a few light-years away from Wang Yi to Guangyi.

And this space was swept by that endless blade storm, time and space were completely shattered, and they couldn't be teleported.

Without a trace of spatial fluctuations, to reach the light wing, one can only rely on flight!

In the cosmic sea, the maximum speed of the cosmic sea is far exceeding the limit speed of the original universe, reaching a hundred times the speed of light.

Even under the influence of the blade storm, the Tongtian Pagoda cannot maintain the highest speed, but it can accelerate and decelerate from time to time.

At this speed, if it goes well, it will take more than a month to reach Light Wing.

But Wang Yi knew it was not that easy.

In addition to the endless storm of blades, once they approach, they will also face the impact of the will of the wings.

but.....

"By the way, I can sharpen my will, and maybe it can break through my bottleneck." Wang Yi grinned.

Looking at the majestic wings of light that seemed to be near because infinity was in fact extremely far away. "Get close to it first, sign in and talk."

Wang Yi controlled the flight of the Tongtian Tower. The Tongtian Tower, which was so small that it was almost negligible, turned into a tiny stream of light, continuously flying in the endless blade storm space.

Time passed, and soon a month passed, Wang Yi also flew more than 5 light-years away, and was very close to the majestic light wing.

He also saw the edge of the incomparably huge dazzling light wing, which released endless blade light at all times, and countless blade light swept through the mysterious space. When some blade storms touch the light wing, they are silently absorbed.

Erupting Blade Storm!

Absorb the blade storm!

It's like a loop.

Like the conservation of energy, it seems that endless power erupts at all times, but in fact the energy loss is very small.

A few days later, when Wang Yi got closer, he discovered the true face of that huge light wing.

Where is the huge light wing, it is simply the super huge light wing formed by the continuous superposition of countless densely packed "blade rays"!

Countless blades are stacked one on top of the other, the sparsest edge of the entire "Huge Light Wing", the countless blade storms spread directly to the surroundings, sweeping the entire space. However, the closer the entire light wing toward the bottom of the core, the more exaggerated the concentration of the blades, even completely superimposed.

"Any blade of light can surpass the attack of the strongest in the universe, this, this endless blade of light..." Wang Yi was also shocked when he witnessed it with his own eyes.

"The real wing should be inside."

As Wang Yi continued to move forward, he soon saw...

At the core of the entire huge light wing, there is a white wing in the lower part of the center. There is a vacuum-like void around the white wing, which naturally resembles the shape of a wing.

As the distance gets closer and closer, the speed of Tongtian Tower naturally gradually slows down.

One hundred million kilometers, ten million kilometers, one million kilometers...

Wang Yi's eyes condensed, he saw the source suddenly, a pair of white wings about a hundred meters high were unfolding. The reason they were called "white" was because the wings themselves had a layer of white light, and the material of the wings was mainly white. But it was faintly gray and dirty, and there were faint blood stains.

"Yuan's wings!" Wang Yi's breathing was stagnant. "But it's not in a hurry, get closer."

Wang Yi continued to approach cautiously, 100,000 kilometers, 80,000 kilometers, 60,000 kilometers...30,000 kilometers...

Unexpected--

"Go away, go away, go away!!"

An endless will suddenly crushed.

The crushed will contains absolute loftiness and craziness. In front of this will... Wang Yi felt like a little ant shivering in front of a tiger, but he remained sober.

"Huh." Wang Yi sneered inwardly. "Sure enough, this source has given birth to a real spirit, but it can only use that divine blood will impact to scare people, it's just a paper tiger."

"Don't bother about it."

Wang Yi had already seen through the true face of the "source" winged spirit, naturally he would not be frightened, and continued to advance calmly.

20,000 kilometers, 15,000 kilometers, 10,000 kilometers...

"Get out, get out, get out of me, get out of me!"

That incomparably lofty crazy will rushed over again and again with roars, which seemed terrifying, but it felt "virtual" for Wang Yi.

Wang Yi has the Tongtian Pagoda. To be honest, he is not worried about encountering danger at all. He is just worried about being trapped in some Jedi and unable to get out. Now that he has made his mind well, he naturally won't have the slightest fear.

As for the crushing of the will, it is actually similar to the shock of evil spirits... Once it cannot be resisted, the will will collapse temporarily at most, and as long as it is quickly removed, it will soon recover. No one can die!

It's near.

Getting closer and closer.

Although the crazily crushed will kept roaring and impacting in Wang Yi's mind, there was nothing left.

It's just that the impact of will is getting stronger and stronger, so Wang Yi must do his best to resist it.

When the Tongtian Pagoda reached 20 kilometers away from the wings, the will force on Wang Yi became stronger, every drop of sweat permeated his forehead, and his eyes became fiercer and crazier.

"Go on! I can bear it!"

10 kilometers...6 kilometers...4 kilometers...

Wang Yi could already clearly see the white wings hundreds of meters high tens of kilometers away. The exquisite white wings were dirty with three blood stains and three hideous scratches!

Wang Yi is very clear that the impact of will is emitted from above, because it is not controlled by human wisdom, and there is no blind spot in all directions. As long as it is close to the white wings, it will inevitably be impacted by will, and it is impossible to avoid it.

Wang Yi was amazed in his heart, feeling the terrifying and mysterious of this will impact.

For example, material attacks and soul attacks can be resisted by the Arcane Secret Technique.

Then the impact of the will can only be carried with one's own will, no treasure is of no use, nor can the Tongtian Tower, otherwise Wang Yi will not become what it is now.

If the real will is strong to an extremely terrifying point, such as the eternal will of the true god, directly impacts the true god, even the true \*\*\*\* will be deceived.

Of course, without the guidance of the secret technique of will, the power of the general will impact is limited, and many true gods' will can reach the void true god.

The Tongtian Pagoda keeps approaching the white wings and has reached 1 km...The impact of the will is getting more and more terrifying. Under the pressure of this will, Wang Yi's will has been sharpened, like a piece of steel that is constantly being tempered and beaten. , Gradually changing...

Wang Yi's will is already the limit of the Lord of the Universe, and it only takes one push to break through.

But it is a fundamental leap from the Lord of the Universe to the strongest in the Universe! And there will be an essential leap in will.

Therefore, although Wang Yi has been sharpening his will~[www.mtlnovel.com](http://www.mtlnovel.com)~, he has never made a breakthrough.

But now, under the terrifying impact of the will, he finally reached the last step.

boom! ! !

Like a bolt of thunder and lightning!

It also seems that the endless chaotic world has instantly evolved into billions of stars in the universe, countless creatures...

this moment!

Wang Yi's will was cheering, as if welcoming a new life, entering a new world.

An extremely strong will radiated from Wang Yi!

True God level will!

### [Chapter 606: 3 pairs of wings](#)

When Wang Yi's volition broke through to the strongest level in the universe, facing the crazy volition once again, he felt that the pressure was greatly reduced, just like a person returning from the deep sea to the shallow water, and his whole body relaxed.

Those crazy waves of wills are crushing, and the high crazy wills are still roaring: "Go away! Miscellaneous, get away from me, otherwise I will kill you, kill you!"

Wang Yi was a little funny.

However, he is not Luo Feng, and he is too lazy to interact with this winged spirit.

"Well, this distance is almost the same, just sign in."

"Sign in!"

[Ding, congratulations to the host for signing in successfully, and reward the second and sixth pairs of 'Chaotic Wings' (Genzhiyi). ]

"Um?"

"The second pair and the sixth pair?" Wang Yi was slightly surprised, and then smiled slightly, "Not bad."

Unlike Luo Feng's incomplete and damaged wings, Wang Yi got natural and complete wings.

With a second pair of wings, you can use the second "domain time and space".

And the sixth pair of wings contains "source", which actually corresponds to the pair of "white wings" in front of him.

The source is the core of the entire six pairs of wings. According to Wang Yi's memory of previous lives, the source should be similar to a car engine! And it has the function of "energy storage". The former owner of this wing is powerful, and many divine powers are stored through the source transformation. It is precisely because of the existence of the source...that the pair of wings is extremely powerful.

To put it bluntly, Wang Yi's Chaos Wings is an enhanced version of Killing Wu Yuyi, but it has changed from two attributes of Jinkong to ten attributes.

There are six pairs of complete Wu Yu Yu Wings, the other five pairs resemble the backs and blades of a blade, while the white wings resemble blades. Visible its sharpness!

The sixth pair of wings is actually used for attack.

"The combination of the three pairs of wings is comparable to the Xeon, especially the sharpness of the wings, the cutting space is extremely easy, and it can be used as a weapon." Wang Yi smiled. "Also, that Yuan can also be a peerless assassin!"

"Eternal True God-level divine power, I still don't know how huge the divine power is, all of it erupts, and even millions of world beasts will be wiped out." Wang Yi sighed.

Even the Xeon Supreme Treasure might have to be broken! The strongest in the universe must die and cannot die again!

Of course this trick can only be used once! Because Wang Yi couldn't control it perfectly, once it broke out, he would have no reservations.

Just like a switch, he can only control whether it is used or not. As for how much it is used, there is no precise control at all.

Source, similar to an engine, and contains energy storage. When the strong use the full six pairs of wings, the divine power should be instilled into the "source", and the source is transformed into a sharper and more offensive energy-blade storm energy!

This energy can be stored in the "source"...In a real battle, the reserve can be used first, and then the divine power can be used for transformation.

It's just that the energy reserve in this "source" does not belong to Wang Yi.

Wang Yi's use of divine power to enter the "source" can also be transformed into a "blade storm" energy, but the level is obviously much worse! And once he uses it, then the energy in it must be driven out! Because two different levels of energy cannot be stored in one place.

If you don't use the "source" now, you can only use divine power to urge this "Chaos Divine Wing", making the chaos divine wing just like a normal Xeon.

Generally speaking, Wang Yi is very satisfied with his gain this time.

Will break through to the strongest in the universe.

Also got the second and sixth pairs of Chaos Divine Wings!

"It's just... I'm still a little regretful that I didn't get the blood of God." Wang Yi was a little bit regretful.

Speaking of it, this blood of the gods can be regarded as a good thing, although it is difficult to find a carrier, and it is difficult to use it, but it is definitely a weapon of war when used well!

Can sweep the master of the universe!

Even Wang Yi can only resist, what can they do?

Shaking his head, Wang Yi stopped thinking about it.

This thing is not of much use to him, even if it is used, it is at most useful below the strongest in the universe, and the enemies that Wang Yi will really face in the future have long surpassed this level.

Leave it to Luo Feng.

Only he can conquer the wings, force the blood of the gods, and then make the mountain guest become a treasure.

Wang Yi glanced at the white wings that were almost at hand, and chuckled lightly.

This winged spirit is still pretending to be a ghost. In fact, the will impact is naturally emitted by the blood, and it has nothing to do with it, and it can't control it.

If it can control the wings, I'm afraid it won't stay here for countless years, and has already figured out a way to leave.

"Venerable Universe has the will of the strongest in the universe?" Wang Yi sighed.

"It is almost impossible for the Cosmos Venerable to appear in the Universe Sea. Even if there is a certain chance to come here by chance against the sky, it is difficult to pass the terrible blade storm. Without the powerful palace treasure, he would fall accidentally... Even if Ling waits for hundreds of reincarnations, I am afraid that he will not be able to wait for a suitable master."

"It's a rare master who is almost suitable. Luo Feng came here, but he was still not satisfied.

Wang Yi didn't understand what this winged spirit thought. He stayed here for too long and his mind was broken. Or is it affected by staying with God Blood Will for too long, and it becomes abnormal?

Even if you are not satisfied, but if you go out and want to repair your wings, you have to have a master.

However, the Winged Spirit is not a normal life in the first place, and it is normal that Wang Yi cannot understand it.

"Just let it stay here and continue to die, I'm leaving." Wang Yi also didn't bother to communicate with the winged spirit who hadn't shown up.

Nothing to say.

"Go, go to the second passage." Wang Yi controlled the tiny dusty Tongtian Pagoda, and flew in the other direction through the white wings leisurely.

Roaring white wings: "..."

Wait for Wang Yi to go away.

Suddenly a low voice sounded.

"Strange, the Lord of the universe, just left?"

The winged spirit is very puzzled. It is reasonable to say that the master of the universe should be crazy when seeing such a powerful treasure?

Just left?

Look down on me?

Gan!

"Never mind, an ordinary and weak cosmos lord is not qualified to be my master. Only the real strong can control me. It doesn't matter if he leaves, so as not to harass me."

"Hey, I don't know when will I find a suitable owner and leave this ghost place..."

...

"Try the second form..." Wang Yi was full of expectation, and began to comprehend the secret patterns of wings.

There are six pairs of wings in Chaos Wings, all of which have different effects.

The first pair of wings can use time and space to accelerate the escape.

The second pair of wings can control time and space! It is a simplification of the True God's "Speaking out the Law", and it can be used by the general master of the universe.

And the sixth pair of wings is the wings of attack! It is invincible and extremely powerful. Also has "source"! Because it is convenient to transform energy to attack ~www.mtlnovel.com~ it is naturally placed on the sixth pair of wings.

You must know that the most treasured areas are in conflict with each other and cannot be superimposed. Generally, if you use one most treasured area, you cannot use the other.

But the space-time realm of Wings can!

The winged space-time domain and the treasure domain are superimposed, and the natural power is greatly increased!

"If the Pinnacle Arcana Realm and the Winged Space-Time Realm are superimposed, I'm afraid they can be comparable to the Xeon Arcana Realm." Wang Yi sighed, "I have a realm-class Xeon Arcana, and superimposed with this space-time realm, the mighty power is overwhelming. I am afraid that the strongest in other universes will be suppressed by me when they use the Xeon Treasure Domain..."

Not to mention that as the third, fourth, and fifth pairs are obtained, there are powerful forms such as "One Thought Void" and "One Thought Universe" behind them.

"This wave of great profits!"

#### [Chapter 607: Dark country](#)

Primitive universe.

Virtual universe, the top of Thunder Island.

"Apprentice, are you still roaming Qingfeng Realm?" Star Prison stroked his beard. "There is no danger, right?"

"No." Wang Yi smiled.

"Yeah." Star Prison nodded, poured himself a glass of wine, poured another glass to the apprentice opposite, took a sip from the wine glass, and said with emotion: "You have a great reputation in the primitive universe and the universe. Since the head of the Dove Crocodile of the Skeleton Race has reported that you are the master of the fifth-order universe, all forces have been alarmed, and many active spies have been caught in the hinterland of my human race."

"Your progress is too fast, it's too eye-catching." Star Prison looked at the proud disciple in front of him, "The tree attracts the wind, you have to be careful. Although you are already strong, the stronger you are, the easier it is to attract fear. The Lord can't help you, the strongest in the universe is not necessarily the case. In the universe, the strongest in the universe is not suppressed by the original universe, and the strength that can be exerted is terrible. When you encounter them... you must be careful."

"Well, I see, teacher." Wang Yi nodded. He has been vigilant and confident. Except for some Jedi in the universe, even the strongest in the universe can't help him.

...

Qingfeng world.

Wang Yi pondered for a few days, based on Wang Yi's ability to create a secret pattern that perfectly integrates the strongest secret method, his knowledge and understanding of the law, coupled with the tens of thousands of times faster in his cultivation space, he has actually studied for a hundred years, this is the second secret of the wings. Wen naturally understood quickly and thoroughly.

"So that's it." Wang Yi opened his eyes in the palace and smiled slightly.

"This wing secret pattern is really profound, and its essence is that it is difficult for me to comprehend it." Wang Yi exclaimed.

But it's like an article manual, you don't need to know how it works, just know how to use it.

"Try it!"

"The wings are the second!" Wang Yi instantly burned and spurred his divine power.

"Chichichichi..." countless burning divine power rushed into the back of the gray wings quickly extended along a large number of secret pattern carvings, precise urging to engrave everywhere, and the entire second layer of gray wings was carved in an instant. It was completely urged, and the gray wings immediately changed.

The wings became sharper, and colored silk threads were entangled, making the entire wings more colorful patterns, and a luxurious and powerful aura permeated.

This coercion alone makes the wings stronger than the average peak treasure.

Silent...The dim and thin gray light was born instantly, covering the entire wing space, and even intruding into some rock walls at the edge of the wing space. The maximum radius of this gray country can reach 80 light years, which can far exceed the size of this wing space... of course it can be completely enveloped.

It's just that the endless blade storm is still raging, making time and space extremely shattered long ago, and even the gray realm can't control the time and space here.

The stable space before and after the white wings, as well as some space in the edge rocks, is completely controlled.

The vast and mighty, with Wang Yi as the center, a full 80 light-year radius is shrouded in invisible gray light! This gray light shrouded all areas under Wang Yi's control. It was a kind of complete control in his heart.

Wang Yi raised his eyebrows, and he already felt that the "gray light field" displayed by the two pairs of wings, which was already in the peak and perfect state, was already comparable to the best of the pinnacle best field.

In other words, it was even stronger than the "dark night river" he had before.

"It is so strong that this is probably the most precious level comparable to strange things." Wang Yi admired and was very satisfied.

The space-time domain of Wings alone is stronger than this, isn't it even more heaven-defying if it overlaps with the Xeon Supreme Realm?

"The second form of the Chaos Divine Wing is called..." Wang Yi, who was covered by the endless gray light with the red armor and gray wings, said softly, "Dark country!"

The second form of Chaos Wings—Grey Kingdom, belongs to the auxiliary power.

However, superimposed with the Xeon Supreme Treasure Domain, and mastering the power of the universe, even the strongest in the universe can't match it.

"I now have another hole card, and..." Wang Yi looked in one direction. Because the gray kingdom enveloped the entire wing space, all permeated the edge rocks. So I also discovered that in this wing space, in addition to the cave passage that I entered before, there is also a cave passage in the other direction.

"I found it, go in and take a look." A smile appeared on Wang Yi's face, and he drove the Tongtian Tower into a streamer and flew towards the cave passage quickly.

It took more than a month for the Tongtian Pagoda to finally reach the cave passage.

This is a dark red cave passage, which is shrouded by a layer of light curtain. The Tongtian Pagoda directly drilled through that layer of light curtain and entered a dark red passageway.

The Tongtian Pagoda continues to fly, one, two, two...Continuously drilled through nine layers of light curtains... and then there is no light curtain. The Tongtian Pagoda maintains its display area and maintains a warning range, carefully in this million kilometers high, endless Advance in the deep dark red channel.

Sometimes flying, sometimes short distance teleportation.

"Yeah. My map has this route." Wang Yi looked at the map of the consciousness space and knew it in his heart. "However, it didn't go deep into the core area of Qingfeng Realm, but it was disconnected in the marginal area."

In Qingfeng world, the main mountain is majestic and mysterious, and there are caves leading to the outside world. There are often treasures drifting into the waters through those passages... Generally,

many strong people don't dare to drill into the mountain belly against the cave, after all, it is too dangerous.

However, Wang Yi has the Tower of Heaven, he also knows the plot, and there are some route maps, so he dare to take a risk.

"keep going."

This cave channel sometimes has forks, and Wang Yi naturally chooses the largest fork according to Luo Feng's original choice and the route on the map.

It took more than 30 light years of flying to finally see the end of the distance. At this moment, the Tongtian Pagoda has flown to a vast and huge flame-like cave. The main roads of flame slurry flow criss-crossed, passing through this huge flame cave, extending to an unknown end one by one.

Those slurry flows are surrounded by red, cyan, and gray halos.

And there are endless flames permeating the surrounding space~www.mtlnovel.com~ but the surrounding space is very strangely condensed, without the slightest broken, and there is no slightest spatial fluctuation. Here...the teleportation is no longer possible.

"It's here." Wang Yi's eyes lit up and he understood that he had arrived at his destination.

"Find the stone pillars first."

Wang Yi took the Tongtian Pagoda and flew slowly forward in this flame cave. Occasionally, the rushing flame slurry splashed out, "Hmm..." The flame burned the Tongtian Pagoda, but nothing happened in the Tongtian Pagoda, that is, there was no internal temperature. Variety.

"found it."

In the flame cave in front of Wang Yi, stone pillars stand there. At first glance they are very ordinary. Upon closer inspection, it seems that every gravel of the stone pillars can refract light, as if there are many spaces faintly.

[Chapter 608: Silver token](#)

The flame cave filled with endless flames, white flame slurry streams rumbling and rolling, and the flame slurry streams criss-crossing to an unknown distance, the high temperature in the air has reached an incomprehensible level.

"The ancients once said that one flower has one world, and one leaf has one bodhi."

Wang Yi stared at the stone pillars in front of him. The flames were the gods of the Lord of the Universe and had to be burned clean without armor protection. The cave stone pillars that could survive the flames and the flow of slurry were also very peculiar.

"This is one piece of gravel, one space." Wang Yi sighed softly.

There is no record of such stone pillars in the human race.

Each stone pillar is made up of countless gravel, and each gravel has a space. The space of the sand of the Ganges River forms this stone pillar. It is difficult to imagine what happened here before ancient times, and what brilliant achievements have been left behind.

It's just that those are all sealed in history, and it's hard to find anymore.

"Everything may disappear in eternal time!"

"But I will do my best to make me human... everlasting!" Wang Yi's eyes were filled with incomparably determined will.

"Find where Jie Fanzi stayed first."

Since Wang Yi has come, he has taken the treasure away naturally.

The treasures left by Jie Fanzi are of no use to Luo Feng, but it turns out that the treasures obtained by Luo Feng in history have all been inherited by the Donghe River. The great battle of the primitive universe has passed. The highest treasures are the peak treasures, but it is also equivalent to the wealth of a peak ethnic group, and Wang Yi doesn't take it for nothing.

The map information Wang Yi would naturally add to the human race, there is no need to wait for Luo Feng to do anything.

Wang Yi quickly found the stone pillar with a claw mark not far away.

Look carefully, that claw print is equivalent to the palm of a normal earth person, with four fingers, deeply imprinted on the stone pillar, but the gravel in the center of the claw print is full of scents, unusual aura.

"That's it." Wang Yi controlled the Tongtian Tower to touch the gravel.

Huh! Then the whole was absorbed directly into the space contained in the gravel.

...

After a while, Tongtian Pagoda came out of the gravel space again, Wang Yi smiled in the palace, and two more objects were in his hands.

One of them is a cyan pendant with a strange beast carving on it.

This is one of the three Jedi's tokens, the "cyan token".

As for the other one, it is the Yansi Tu. I don't know how many map materials left by Jie Fanzi before the reincarnation era.

"Well, Jie Fanzi's treasure has been found." Wang Yi was in a good mood.

With Wang Yi's eyesight, he was playing with the carved pendant of the cyan alien animal. He couldn't understand the material and how it was made. "It is rumored that if you have this token, you will have some privileges in that cosmic boat, the danger level will be reduced a lot, and there will be a special room for cultivation."

There is also another strongest person in the universe, Zhen Lin, who has also left a legacy. As for the tokens and maps, they are about 300 light years away. They are already in the core of Qingfeng Realm, and Wang Yi has no confidence to look for them.

Take a look around.

Some of the strongest in the universe...will leave tokens around, but it is luck to get tokens. It is too dangerous to search for them.

"I almost forgot. I haven't signed in yet." Wang Yi smiled lightly. In fact, he came to this place mainly for this.

"Sign in."

[Ding, congratulations to the host for signing in successfully, and reward the spacecraft "silver token" (quantity: 1). ]

In the panel space, a silver alien beast carving pendant was surprisingly added.

In addition to the appearance of the cyan alien animal carving pendant, it is full of a touch of coercion, and there are endless and complicated secret patterns carved on the back. The countless secret patterns gather into an ancient civilization text. Although I don't understand, I understand at a glance. What it means-

"Wu?"

"It's actually a silver token, I'm pretty lucky." Wang Yi laughed.

The "space boat" of the three major Jedi, so-called tokens, can also be divided into high and low.

From low to high, there are three levels: black token, cyan token, and silver token.

But black tokens... generally require a very powerful master of the universe to get it by chance;

Cyan tokens are generally in the hands of the strongest in the universe;

Silver token, it seems that only the strong of the two holy places have it.

The cosmic ark, long, long ago... To be precise, before the two holy land universes were born, when this cosmic ark was not the three major Jedi, there should be users. Because black tokens, cyan tokens, and silver tokens correspond to separate spaces in the secret room. That is actually a special space for rest and cultivation.

Black tokens, cyan tokens, silver tokens, the triple tokens represent three independent spaces of secret rooms.

The black token, the 16 black stone pillars in the inner space of the cosmic boat propped up a strange space. In that strange space, there are huge secret rooms, and the secret rooms have independent spaces. Each secret room space corresponds to a black token, and you must have a black token to enter that secret room space.

The cyan token... the independent space represented by the secret room is already in the depths of the inner space of the cosmic boat, which can be regarded as the boundary of the core area. It is already extremely dangerous, and it is generally the strongest person in the universe who can bear the cyan token.

The silver token is even more dangerous in the core area of the cosmic boat. Even if the strongest in the universe wants to obtain it, it is difficult and difficult. If you are not careful, it may fall, even more difficult than obtaining a Xeon.

For countless years, only the two holy places with profound and eternal existence have silver tokens.

Wang Yi recognized the silver token, felt the information in it, and exhaled a deep thought.

"Sure enough, it's in the core area of the cosmic boat, and it's close to the depths of the core area... Although the dangerous places that pass by are not as dark as the dim places where there are no entrances, but they are also extremely dangerous. Even the strongest in the universe may fall. "Wang Yi shook his head. "Moreover, I don't even have an accurate route. It's just a place. If I want to go there, I have to figure out my own way. It's not something I can do now."

"This silver token is extremely precious and rare, and may even be comparable to a Xeon, perhaps even more precious... the opportunities inside may be beyond imagination."

"But, I can't go." Wang Yi smiled bitterly.

The treasures left by Jie Fanzi are placed in the blue token space. It was on the border of the core area of the cosmic ark. Although it was extremely dangerous there, Wang Yi was still a little confident of taking risks. And this silver token, let alone him, was a giant axe, I am afraid that he was not sure about it.

Be aware that it is only the inner domain! The natural environment surpassed the strongest in the universe to attack with all his strength.

How terrible is it if it is the core place ~[www.mtlnovel.com](http://www.mtlnovel.com)? A little bit of power is far beyond the strongest in the universe itself.

So going now is just a waste of energy.

I can only put it aside and wait for a chance in the future.

However, this silver token is the highest token that has been discovered, and it should be able to avoid many terrible dangers when taking risks in the space ark.

"This pull silk drawing left by Jie Fanzi is very valuable, and I will pass it back to the original universe to the race later." Wang Yi secretly said in his heart.

The map of Qingfengjie signed by Wang Yi through the panel has already been passed back to the ethnic group. Even if one percent is very precious, it is mainly the outer and inner regions, but it is much richer and more comprehensive than the human ethnic group in these years. Very happy.

With these map data, you have a greater grasp of adventures in the Jedi, and naturally more opportunities to obtain treasures.

## [Chapter 609: Split action](#)

"Haha, it's just good luck. Fortunately, I found a hidden space in the depths of Qingfeng Realm and got this map..."

For a moment, Wang Yi's consciousness came from the virtual universe, sitting on the throne at the core of the palace, looking at the huge dark red passage outside, and now the Tongtian Pagoda has begun to return along the way.

"Turning in two maps in a row is indeed enough to surprise the ethnic group." Wang Yi lowered his head and smiled softly.

However, the map left by Jie Fanzi includes three major Jedi, while the panel map only has the Qingfeng Realm. The latter is more detailed and rich, covering an entire area. Like some powerful explorers, many of them are relatively fragmented.

The three major Jedi, since they are Jedi. In those endless years, no one can really have a complete map of the Jedi, and no one has the ability to explore every place in the Jedi clearly.

A new useful map is indeed precious.

The Jedi map is the secret of an ethnic group and can be shared by the highest level of the ethnic group.

For example, the creator of the Great Axe will get it and give it to other universe masters free of charge. After Wang Yi got it, he dedicated it to the ethnic group, and everyone would share it free of charge.

The free sharing here is shared within the ethnic group. However, no matter how high the price is paid by external forces, the human race will not easily trade, even if the transaction... it will only be done after the high-level discussion of the race, or only the founder of the Great Axe alone is qualified to conduct the transaction.

"There is reincarnation in the depths of Qingfeng Realm."

Wang Yi thought, "The world beast was also born in the core of Qingfeng world. Perhaps the secret of Qingfeng world is bigger than I thought..."

The spacecraft can already be confirmed as a legacy of the ancient civilization "Wu".

Liu Zhongshan is unknown, and there are few descriptions in the original work, but it can be as famous as the other two Jedi, and it must have a great origin.

The Qingfeng world is the most mysterious, the place of reincarnation is in the deepest part of the Qingfeng world, and the world beast is also conceived and born here.

"The universe is really mysterious. Fortunately, I still have time to explore it slowly."

Wang Yi then considered the next action plan.

Acting alone, the efficiency of exploration is the slowest.

"Qingfeng Realm, Cosmic Boat, Liuzhong Mountain... Then three Jedi will roam together, one Jedi for each divine body." Wang Yi said softly.

Wang Yi actually has nothing to do in a hurry, and it doesn't matter if the three divine bodies explore separately.

As for the treasure that Jie Fanzi left in the depths of the spacecraft? You can pick it up while exploring. It can be considered a goal.

The three major Jedi have a place to sharpen their will. But it seems that only the black stone pillars of the universe ship have the effect of accelerating time. In order to maximize efficiency, a divine body incarnation can be left there to sharpen the will.

The only trouble is that only the place where the human deity arrives can sign in.

This \*\*\*\* panel did not change the rules, which made Wang Yi a little passive.

Fortunately, the exploration map task is considered as a whole, and the places explored by the clone are also counted.

Wang Yi has a feeling that the ultimate reward for this exploration mission should be very useful to him in the future.

It seems that the task rewards posted on the panel are useless.

There are only two tasks that Wang Yi has yet to complete.

One is the [hunting mission] in the outer battlefield, and there is still the last one to hunt down the strongest in the universe.

Another one is this mission to explore the map.

There is no time limit for the two tasks, and Wang Yi is not in a hurry.

But it won't just leave it alone.

Killing the strongest in the universe is because the strength and conditions are not enough, so I can only put it aside and wait for the opportunity.

And to explore the map, you can now proceed.

"Human deity...go to the space boat."

"The Yanxing Giant Beast continues to be in Qingfeng Realm."

"Void Zerg clone, go to Liuzhong Mountain."

Nowadays, every divine body has the top combat power of Tier 6, and it has the most powerful treasure.

Most of the danger actually comes from the Jedi itself.

Wang Yi allocated his own treasures again. The human deity carries the Tower of Heaven, Chaos Wings, Golden Armor God and many Xeons... it is the strongest way.

The Yanxing Giant Beast and the Void Zerg Clan clones carry a supreme supreme weapon and other peak supreme treasures.

The reason for doing this is also because the human deity takes the task of signing in, and must often go deep into some extremely dangerous places, and also bring the tower of the sky, safety is definitely the most important.

...

It took a very easy ride all the way to the Tongtian Tower and quickly returned to the "wing space", followed by flying for more than two months, passing through the entire wing space... and finally returned to the earliest cave.

Waters outside Qingfengjie.

Three figures appeared out of thin air.

The human deity, the behemoth of the flame star, and the Void Zerg. All of them were so angry and violent, just standing there would make the Lord of the universe feel dangerous and not easy to provoke.

"Okay, let's separate here." The human deity Wang Yi, in a simple dark red battle armor, with three pairs of gray wings and a faint blue sword on his back, smiled slightly, and then left here with a teleportation.

The other two avatars looked at each other, one flew toward the entrance of the main mountain section of Qingfeng Realm, and the other also moved away in the direction of Liu Zhongshan.

The three clones act separately.

...

After half a month.

The vast universe is filled with endless chaotic air currents.

"brush!"

A dark red figure is teleporting again and again in this endless universe...It is the real Wang Yi who left Qingfeng realm and headed for the universe ark alone.

It's too boring to travel in the cosmic sea. There are chaotic airflows everywhere. Sometimes it teleports continuously for one or two days at a time, and it continues to be close to the limit of high-frequency teleports. That eternal flow of chaos... is indeed boring.

The main way to travel in the universe is either teleportation or natural wormholes. But most of the time is spent teleporting, after all, natural wormholes are not everywhere, and they just go where they want to go.

Wang Yi kept his high-frequency and ultra-long teleportation while thinking in his heart.

"This time, go to the black stone pillar first, sign it, and leave a divine power incarnation there to sharpen your will." However, the divine power incarnation has no combat power and may be easily interfered by other strong people.

"If you can sign directly to a black stone pillar~[www.mtlnovel.com](http://www.mtlnovel.com)~, it won't be so troublesome." Wang Yi muttered.

It's just that the black stone pillars are mysterious and powerful. They are the mysterious things of the cosmic ark. The impact of the will that contains the strongest person in the universe can't be completely approached. It is definitely something that is more against the sky than the strongest treasure. Wang Yi did not sign in. Be 100% sure.

"Huh? Here, there is a natural wormhole in front." Wang Yi, who was thinking about it, brightened his eyes and brushed! Suddenly appeared in front of a huge natural wormhole, looking at this natural wormhole, a smile appeared on his face.

In this world of endless chaotic air currents, this natural wormhole is like a touch of green in white paper, which is pleasing to the eye.

"With this natural wormhole, you can save a lot of time. It is a pity that even the strongest person in the universe can't make a natural wormhole that spans a long distance in the universe." Wang Yi shook his head and stepped into the huge twisted space. Within the vortex, it was quickly teleported to a very long distance.

#### [Chapter 610: Space boat](#)

"Right now, I still have a Xeon Extreme Treasure-level restraint treasure and Origin Treasure."

Wang Yi pondered.

The so-called restraints are actually trapped humans. Used to assist in combat.

The restriction of the domain alone is actually difficult to completely restrain and suppress the opponent in a battle of similar level.

But there is a treasure of restraint that is different, the other party just can't run if they want to run.

Wang Yi had hardly used it before, either because it was not necessary, or he didn't want to kill him.

In the temple space, killing the Lord of Yihun was enough to use the domain, but later encountered the other two universe masters because the distance was too far, and the domain could not be reached, let alone restraint treasures.

Like facing dozens of masters of the universe on the Primordial Star, even the sacred treasures cannot trap so many masters of the universe, especially the Lord of the Golden Horn and the Lord of the Galaxy can break through desperately.

And Wang Yi couldn't waste time, and he didn't use it because he had the soul attack method of "mirage world".

To deal with the "Master of Yuan'ao" is to directly besiege and kill a group of masters of the universe.

When confronting the "Master of Dove Crocodile", I didn't want to rush against the Skeleton Race, adding that the "Master of Dove Crocodile" was just a clone, and he didn't have any treasures to make his heart beat, so he let him go.

The Primordial Treasure is used to supplement divine power.

Wang Yi is adventurous in the universe, unable to replenish his divine power in time. Once the loss is too large, he must replenish it in other parts, or he can slowly recover with the existing treasures, otherwise he can only wait to return to the kingdom of the gods in the original universe and use endless seclusion. Sea supplement.

If in battle, the loss of divine power is too large and cannot be quickly replenished, it is very fatal.

You must know that the strong are desperate to burn divine power, and once they perform a powerful trick, they will burn a lot of divine power, sometimes even more damage than the opponent's damage to you.

And when the crisis is really reached, it won't work if it doesn't burn.

The Primordial Treasure is used to allow the strong to sway the sea of the laws of the origin of the universe to speed up the recovery of divine power. Some of the more precious ones can accumulate a huge amount of divine power in it, which can be used as a divine energy supplement in a critical moment.

"There is no clone, and other recovery treasures are just normal. If there is a powerful source of treasure, it would be much more convenient." Wang Yi muttered. "It is even possible to pack a huge amount of divine power from the Endless Sea into the Primordial Treasure and bring it out. Then I can let go of my hands and feet a bit during the battle and have more protection."

Divine power cannot be separated at will. Without sufficient conscious control, it will easily dissipate out of control and return to the universe, even if it is put in the world ring.

The divine power of the strong is either a clone or an incarnation of divine power. The former depends on talent, while the latter is too weak, because the incarnation of divine power is just a fusion of consciousness of the strong. He divine power is not strong enough, only the Venerable and above can use divine power incarnation.

And the primordial treasures that can be used by the Lord of the universe are at least the top primordial treasures.

"I was negligent before and actually forgot about this." Wang Yi sighed.

Even if he exchanges a Peak Origin Supreme Treasure now, he has no place to absorb the divine power. Generally, the divine power is absorbed and transformed from the sea of the laws of the universe, the origin of the earth.

Moreover, there are endless secluded seas, in fact, there is no need to absorb, just help storage is enough.

"Forget it, I'll make preparations when I go back next time."

brush!

After Wang Yi teleported another long distance, the scenery changed, the chaotic air flow suddenly became thinner, and an extremely shocking scene appeared in the distance.

Hundreds of millions of light-years away, the endless and majestic spacecraft suddenly appeared in his sight.

The spaceship is an extremely large, damaged ship, tens of millions of light-years high and hundreds of millions of light-years long. The whole body is deep black and charming purple, and the ship hull... even if it is counted by Wang Yi Hundreds of thousands of cracks and holes can be seen densely packed in hundreds of millions of light-years away.

"Boom..." A monstrous attraction was released from the cosmic boat, frantically swallowing the surrounding chaotic airflow, making the chaotic airflow around it always thin.

Swallowing endless chaotic air currents allows the entire spacecraft to unleash endless power at all times.

Flame, cold, wind, thunder and lightning, vines, light...

At the outermost periphery, there are still a large number of "fragments" flying around the spacecraft at high speed at all times. It should be the fragments from the hull of the spacecraft, and the countless fragments keep flying at high speed at all times.

Wang Yi's pupils shrank, and he saw that there was a huge broken small universe in the chaotic air flow below the cosmic boat! And the upper part of the small universe is no longer visible!

"Swallowing the small universe..." Wang Yi witnessed this spectacular and magical scene with his own eyes, and his heart was full of shock.

No other powerful person can directly swallow the chaotic airflow, only a small universe can absorb the chaotic airflow and transform it into the original energy of the universe.

But the spacecraft can do it.

In addition to being able to swallow chaotic airflow all the time, it can also swallow small universes.

And convert all absorbed energy into various energy such as gold, wood, water, fire, earth, wind, thunder and lightning, light, time, space and so on.

In addition, there are many magical things in the universe ark, and its existence is even more ancient. There are records about it in any cosmic age, even far before the two holy land universes, as if it exists forever. .

"The universe ship is the creation of the Wu Kingdom. The Wu Kingdom was destroyed before endless years, even before the Jin Kingdom. The remaining strong men organized a battle-like expedition, and countless strong men went on the road, and finally went to the end. The whole army was wiped out." Wang Yi looked at the broken spaceship in silence.

It's like a ship, shot through by a large number of lasers, and then chopped by a large number of giant knives...wrecked! covered in wounds!

Can imagine what hardships it went through before ancient times.

"Even the \*\*\*\* king of Jin is so strong, thinking about it, he was forced to go to a dead end and had to give up his life and reincarnated into the primitive universe." Wang Yi thought silently, "the leader among them is the so-called general... ..Then it must not be the King of Gods. Even with the help of the incomparable mechanical flow of the Universe Ark, it cannot be compared with a living King of Gods. How can it be possible to break through the blockade of the primitive universe? After nine deaths, failure is a matter of course."

Cosmic sea.

Three thousand latitudes of the universe.

Origin continent.

"The sea of universe alone gives me the feeling that it is unattainable. The three-thousand-latitude universe, and the origin continent that is the center of the three-thousand-latitude universe, don't know what kind of scenery it is." Wang Yi said softly.

Fighting spirit ignited in my heart.

"Then, let me break in."

"Swish!" Wang Yi teleported and landed on a fragment of a cosmic boat. This fragment has a maximum diameter of about 1.5 light-years. The whole body is deep black with mixed purple patterns. The entire fragment exudes a coercion that makes Wang Yi's heart trembling. .

Moreover, this fragment is faintly connected with the distant space ship.

In the endless years ~[www.mtlnovel.com](http://www.mtlnovel.com)~ countless strong people have tried, no one can take away a piece of "space boat fragment", and even attacks cannot change its flight trajectory.

There seems to be an invisible rope that binds it to the spaceship.

"My human race also has a gathering place on the space ark, but I don't have to go there, go directly to the space ark." Wang Yi secretly said, he knows that the human race Hongmeng and the master of the universe will gather together in advance in general adventures. Do communication.

After all, the spaceship will always encounter some troubles and dangers, and it is impossible to say that the master of the universe of the same camp should help.

Some masters of the universe will also take risks together.

But Wang Yi's strength has reached the sixth rank, and he is already the top existence of the Lord of the Universe... He is in crisis, so except for the great axe of the strongest man in the universe, even if the Chaos City Lord comes, it is useless.
