

A God 631

[Chapter 631: Perfect genetic analysis](#)

The primordial universe is still in a relatively peaceful state. The super beings of the billions of races in the universe are either fighting on the primordial star or going out to explore the universe. The immortal gods are leisurely, and the primordial star is open and the higher level knows it. Those who are below the venerable are not eligible to touch.

As for the universe, the Venerables know very little.

Therefore, what happened in the universe is generally known to the Lord of the universe and a few cosmopolitan masters.

Enter the four hundredth year of the spaceship.

Milky Way.

Now this is the home of the "Master of Chaotic Origin" that is well-known to hundreds of millions of ethnic groups in the universe.

In the solar system, a magnificent palace stands in the void. The defense of the entire solar system has been built to be extremely strong, and it has even formed an independent time and space like the "primitive secret realm." Unless permission is obtained, the cosmos will not be able to enter, and he is the Lord of the universe. You have to spend a little bit of money if you want to break in.

In the starry sky, a group of realm master patrols are patrolling routinely.

In the palace, immortal guards can be seen everywhere.

In the main hall of the palace, there are many Cosmos Venerables stationed for a long time, waiting for instructions at any time.

Occasionally, wherever Wang Yixing comes, he will give them some pointers here.

Being able to come here to serve the Lord of Chaotic Source is a beautiful task in the eyes of the race group and many cosmos venerables of the Hongmeng.

It's a pity that when the Lord of Chaotic Source selected his subordinates, he only selected a few of the Lords of the Dry Witch, and no longer recruited them, which made many cosmic lords sigh with sigh.

In fact, the Lord of Chaotic Source now has more than a hundred Universe Venerables under his command.

In a side hall in the main hall, there is a light curtain, which is a fixed passage to the kingdom of God.

Wang Yi's vast kingdom of God, the endless secluded sea.

The endless secluded sea is vast and boundless, and it can rise thousands of feet without wind.

"create!"

"Wow~~~"

In the next moment, a majestic giant nearly 100,000 kilometers high was condensed directly from the sea.

"Successful!" There was joy in the eyes of the towering giant.

Over the years, Wang Yi has studied the structure of life many times by using the endless secret method of "creation", and finally took the lead in analyzing the simplest flesh and blood life to 10081 times the genetic level, which has made all the clones have reached the perfect limit bottleneck.

Originally 1,000 times the genetic level, the new Youhai clone, which is nearly 10,000 kilometers high, changes the genetic structure of the divine body. After reorganizing the divine body, it can also reach the point where it is 10,000 times the perfect genetic level, which is more than 90,000 kilometers high.

You know, the divine power route, the higher the genetic breakthrough, the more difficult it is. He was originally 10081 times the life gene, and it is not difficult to analyze this level as long as it takes enough time and energy.

Now he has indeed completely analyzed this level, and can make the "New Youhai clone" quickly internally assemble from a thousand times the gene, just like a piece of charcoal quickly turns into a diamond, making the internal change of the new Youhai clone into perfection. Gene's powerful **** body with a height of 100,000 kilometers.

It is much harder to break the "limit" of 10081 times and become even higher.

Now, it is stuck at the 10081 times genetic level bottleneck.

If you want to follow the line of divine power to become a true god, you only need to break through this bottleneck, and you can naturally achieve it.

Then the original universe will usher in the youngest and strongest in the universe.

However, breaking the limit of perfection is only the first hurdle of the divine power route, and the strength is only comparable to those weak true gods who are achieved by ordinary rule-based routes.

It should be noted that there are several major hurdles on this road.

The first level is to break the limit of perfection.

The second stage, breaking through 30,000 times the gene.

The third hurdle exceeded 60,000 times.

The fourth level exceeded 90,000 times.

In the end, it was one hundred thousand times, and it was also the realm in the legend of Origin Continent.

With Wang Yi's idea, of course, he would break through with one hundred thousand times of divine power to achieve the true god.

It's just that this road is very difficult, and the more difficult it goes further, it takes a very long time. Wang Yi now has no reference to it and can only explore it independently.

At the same time, Wang Yi's three divine bodies are still adventuring in the universe, and the human deity rushes towards the destination "Black Stone Pillar".

For Wang Yi's safety, the giant axe continued to stay in the spacecraft. As long as Wang Yi asked for help, he would be able to arrive in time.

time flies.

Time continues to move forward, and will not stop because of anyone. The vast universe, primitive universe, many small universes, countless creatures are born, countless lives are destroyed, for the strong, it is just a time for meditation, perhaps the lifetime of other beings.

For the strong, thousands of years are just a matter of seconds.

Wang Yi entered the Cosmic Sea for the first thousand and three hundred years, in the 507th year of the spacecraft journey.

The sky was dark clouds rolling, and there were blood-colored thunder and lightning dancing like snakes and dragons.

Any lightning strike can reach a hundred times the speed of light, and the power is even more terrifying. Even if the Lord of the Universe with the Supreme Treasure Armor is smashed, the divine body will be severely damaged. If the Lord of the universe with a weaker divine body is more likely to fall directly .

If the top flying palace breaks into the thunder sea, it will be broken quickly, and the peak palace treasure can withstand such terrorist attacks.

This is a more famous and dangerous "Blood Thunder Rock" in the depths of the universe ship.

[Ding, congratulations to the host for signing in successfully, and rewards the spaceship map and the broken map.]

【Spaceship Map (3.5%)】 .

Wang Yi, who spread three pairs of wings and flew on the boundless red earth, glanced at the panel prompt.

It is not that he has gained nothing in venturing on the spacecraft over the years.

The spacecraft map information obtained by the panel sign-in reward alone reached 3.5%.

Don't underestimate the 3.5%, you must know that it is the human race, and they don't necessarily know so much about the space ark.

It's a pity that there are many outer areas of the universe ark, few inner areas, and no core area at all.

Wang Yi also discovered that this sign-in reward map has a lot to do with his current location.

If the map obtained by checking in the core area of the spacecraft~www.mtlnovel.com~, then there is a high probability that a map of the core area will appear.

In addition, the sign-in reward is that there are more treasures, some peak treasures, and many top treasures. Higher and ordinary treasures are rare.

Wang Yi's treasure point has slowly risen to 200,000.

However, there is still a long way to go to redeem an original Xeon Xeon (at least 1 million) and a restrained Xeon (at least 600,000).

In recent years, because the founder of the Great Axe came to the space ark and Wang Yi suddenly provided new map information, the focus of human race exploration began to shift to the space ark. Many Hongmeng universe masters are very interested in the new map. The new map may represent new opportunities, and more treasures can be discovered, that is, the powerful masters of the universe, such as the Lord of Chaos and the Lord of Penggong, rush over.

And Wang Yi, as the famous sixth-order cosmic master of the universe sea, went all the way into the inner domain, and now he has almost reached the edge of the inner domain and the core area, where the "black stone pillars" are located.

[Chapter 632: Black stone pillar](#)

Of course, the entire universe sea is not just a "black stone pillar" as a place to sharpen the will, such as "wing space" and "soul soul sea" are actually considered, but if it is efficiency and safety, naturally the "black stone pillar" is the best.

Wang Yi has thoroughly understood the information on the black stone pillars.

The space of the black stone pillars is one of the few large areas in the entire universe that is not dangerous in terms of environment.

The entire space is supported by 16 black stone pillars that are thousands of light-years high. Except for the condensed space close to the black stone pillars that cannot be teleported, other areas of the entire space can be teleported.

And... the black stone pillars are natural monuments! These 16 stone pillars that are thousands of light-years high have extremely profound black secret patterns, and the levels of secret patterns are so high...Even the strongest in the universe can't understand it.

Each stone pillar with black veins is powerful and powerful, and it is more powerful than the Xeon, and it can be manifested in the length of thousands of light years.

And so far, no strong person can really touch the black stone pillar with his hands, because the closer to the "black stone pillar", the more terrifying the impact of will, even the strongest in the universe, can't get to the black stone pillar. .

Safety, teleportation, fast time flow, historical sites... Many factors have made this a place for the strong to rest and practice in the depths of the spacecraft.

...

The mist is full, and there is no end to it.

"Wow!"

Wang Yi's figure appeared in a teleportation.

"Well, that's it."

In the space of the black stone pillars, there is dense fog at the bottom of the highest point and the outermost edge of the surrounding area, but there is no mist around the 16 black stone pillars scattered in the center. There is another saying that the fog in the boundary area between teleportation and incapability of teleportation has been thinned.

"It took more than five hundred years to finally arrive at the Black Stone Pillar. It is really not easy to drive on this spacecraft." Wang Yi sighed.

Wang Yi raised his eyes and looked around. The fog around him was thin and close to nothing, and he could feel that the fog-free space in front of him had completely solidified.

The place without fog cannot be teleported, it can only be moved by flying.

"Wow!"

A red streamer broke through the air, reaching a hundred times the speed of light.

"Even if you can't teleport, a hundred times the speed of light, and pass through a black stone pillar from top to bottom, it will not be too long for ten years." The time spent in the universe sea is long, and it will be hundreds of years without moving, Wang Yi is also used to it.

"However, in the space of the black stone pillars, it is extremely safe and has ancient relics and secret patterns, and is extremely high and deep. Therefore, there has always been a group of strong people here. Especially the existence of the three strongest ones may hinder me." Wang Yi His eyes narrowed.

The black stone pillar is not dangerous in the environment, but the danger from the strong is not counted.

The black stone pillars have three strongest in the universe entrenched for a long time!

They are the Star Lord Bei Zhi, the ancestor of the blood orchid in the first reincarnation era, and the rampant demon **** in the second reincarnation era.

The three strongest men in the universe have different temperaments and different styles.

Star Master Bei Zhi has a very good personality, as long as you respect him, he is generally fine.

The ancestor of the blood orchid is a plant life. It is spread all over the area and must not be close to it within a million kilometers, otherwise there is a danger of death. The threat is not big.

The most troublesome thing is the rampant demon god. It's a special being. In terms of his own strength, he can only be regarded as an ordinary level among the strongest in the universe. But there is a supreme treasure. That armor is a very special armor called "Blood Sea Demon Armor". In addition to its normal defensive capabilities, the Blood Sea Demon Armor will make the surrounding area seem to be trapped in "Blood Sea Hell". With endless crazy will impact.

The strongest in the universe is not afraid, but the Lord of the universe has almost no ability to resist in the face of this crazy will impact.

Moreover, he is moody and lonely. He is not afraid of getting into trouble at all, so he has to walk around when he encounters a rampant demon!

The most hateful thing is...Rampaging Demon God likes to change appearances, especially newcomers, who have never seen him before, and don't even know his breath of life. Seeing the rampant demon **** after seeing the changing appearance, I am afraid that I don't know it yet, and I don't have the slightest vigilance... once the rampant demon **** is slightly offended, I am afraid that it will be perished.

He was not afraid of the others at the Black Stone Pillar, and only the three strongest in the universe could threaten him.

"Well, according to the original plan, go to the black stone pillar where Star Master Bei Zhi is located, to reduce the chance of meeting with other cosmic cosmos."

According to the data, Star Lord Bei Chi is the mildest tempered among the strongest in the universe. He is a good old man. He often speaks openly to the Lord of the Universe near the black stone pillars. He is willing to selflessly teach the Lord of the Universe who has never known him. His character can be seen. Spotlight.

Even the Rampage Demon God will give face to the Star Master Bei Chi, where he is, the Rampage Demon God will generally not take the initiative to cause trouble.

Wang Yi also couldn't figure out the reaction of the three strongest men in the universe after they discovered him, and he has not encountered any strongest man in the universe over the years. He also doesn't know the attitude of the strongest people in the universe towards him.

However, he still flew towards the black stone pillar, regarded as a master of art and bold.

...

There are 16 black-patterned stone pillars in the black-patterned stone pillar space. Among them, the "ancestor of the blood orchid" has long been on the 9th black-patterned stone pillar, and the "Bei Chi star master" has been on the 2nd black-patterned stone pillar for a long time. So, he likes to run around, disguise his identity, if he recognizes his breath, if he doesn't, it's dangerous.

Wang Yi flew straight towards No. 2 black stone pillar, which is also the place where the most powerful people gather in the entire black stone pillar space.

The reason for this is because of the star master Bei Zhi.

Wang Yi could already see the majestic and endless black stone pillars extending directly to the limit of the field of vision, penetrating into the mist. The bottom of the black stone pillars also penetrated into the endless mist at the bottom.

There are also huge amounts of huge rocks flying around the black stone pillars, just like the earth is flying around the sun, and these huge rocks will never tire of flying around the black stone pillars.

And among the dense and endless huge rocks, there are some of the most conspicuous and exquisitely carved black spire buildings.

That is the space secret room!

When Wang Yi flew at high speed to the densely packed huge rocks and approached the buildings with black spires.

[Ding, congratulations to the host for signing in successfully, and reward black tokens (quantity: 1).]

Wang Yi smiled slightly, not surprisingly.

Although it is a black token, it is generally not of much value~www.mtlnovel.com~ Some black tokens have past masters, and they will leave some messages in the secret room space, even treasures.

Of course, it may be "empty".

The black token can be obtained by the powerful master of the universe, and the harvest depends on luck.

Cyan tokens can only be obtained by the strongest in the universe, which is considered precious.

Silver tokens are the most advanced, it seems that only the strong people of the two holy places have it before.

Now Wang Yi has all these three tokens.

I just don't know where this black token corresponds to the space secret room.

There are 16 black stone pillars here, and around each black stone pillar, there are some space secret rooms. Only when you are close to the secret room belonging to the black token, can you feel a little bit.

[Chapter 633: who is it?](#)

There was an extra palace beside Wang Yi, he flew into the palace, and then manipulated the palace into a tiny dusty, flying low-key towards the black stone pillar.

Since I plan to cultivate with peace of mind, of course, the lower-key the better.

In the palace, it is not easy for others to detect his identity.

In the huge rock group hundreds of light years away from Wang Yi, a strong alien with golden light radiating from his entire body was flying.

"It's boring, it's boring."

"The days of the black stone pillars are getting boring."

Wherever he went, some of the masters of the universe saw him evasive for fear.

"Ha, these little guys are afraid of me."

Seeing this scene of rampant Demon God was a little happy.

Rampant Demon has a weird temper, because he naturally likes to swallow rock and metal, so his shell has too much rock and metal essence, which is golden. And he also has the strongest treasure armor "Blood Sea Demon Armor". The Blood Sea Demon Armor should be endless blood light, but the

Rampage Demon God makes the blood sea demon armor change to golden color. Generally, wherever he goes, it is A piece of golden light... dazzling.

To put it simply, it means to show off and show off.

"Go, go and talk to Star Master Bei Zhi." The Rampage Devil flew towards the black stone pillar No. 2, but he was the strongest in the universe, and his speed easily surpassed the limit of the Universe Sea by a hundred and thousand times, far more than Wang Yi is much faster.

The three strongest people in the universe are very familiar with the black stone pillars for a long time. The Rampage Demon God and the Star Lord Bei Zhi are even old friends. Those who are happy by nature and don't speak, go to the Star Lord Bei Zhi, as for the blood. Lan ancestor? The life of this plant is too boring, quiet and not fun at all.

On the other side, Wang Yi's palace turned into a black streamer flying at high speed, but he still released the most precious realm.

After the First Battle of Primordial Star, considering the inconvenience of the **** lord's identity, Wang Yi quickly exchanged the domain-type Xeon Treasure for another one.

In this way, it doesn't matter if you use the Xeon Arcana field when you need it.

As the No. 2 black-patterned stone pillar gets closer, the powerful will impact is getting stronger and stronger, "Kill!" "Kill!" "Kill!" It is like the roar of hundreds of millions of troops fighting against each other. The Lord of the universe needs to resist the impact of will with all his strength.

But to Wang Yi, who has the will of the strongest in the universe, it is like a breeze.

And he could also see that on some of the rocks flying around the black stone pillars in the distance, there were some strong lives entrenched, all of whom were the masters of the universe.

These powerhouses are at different distances from the black stone pillars, some are far away, and some are near. It all depends on each strong person's own will... the stronger the will, the natural choice for the boulder closer to the black stone pillar to take a break. The deepest one is Star Master Bei Zhi.

The closer you are, the stronger the impact of your will, and if you get close to the limit, the stronger the will of the stronger will be sharpened.

Wang Yi also found that the flow of time was constantly changing as he approached.

100 times.....200 times.....300 times.....500 times.....

The strong who can enter the black stone pillars alone are generally not weak, and the flow rate of the time they stay is hundreds to thousands of times.

However, some of them are strong, but their combat effectiveness is strong, but that doesn't mean how terrifying their will is. After all, among the nearly a hundred masters of the universe, only some have been honing their will for a long time, and most of them are just taking a break here. This is just a safe transfer station.

Like Star Master Bei Zhi, among the strongest in the universe, the will is extremely terrifying. He has cultivated here for more than one era of reincarnation, and the flow of time there is more than 130,000 times.

Some of the masters of the universe around the black stone pillars also found an unfamiliar palace flying over.

"Huh? Another person is here?"

"It looks strange."

"He has reached the area of 1,000 times the time flow rate, right? It doesn't stop."

"This will be very strong, which one is it?"

Although there are nearly a hundred masters of the universe gathered here, more than half are temporarily stopped here, not deliberately honing their will here.

And those who really deliberately sharpen their will here, in terms of will, generally reach a higher level among the Lords of the Universe, and some have reached the pinnacle of the Lord's Will. Some even break through the bottleneck... in terms of will, it can be comparable to the strongest in the universe!

Of course, that is not knowing how many years it has been honed.

At a deeper level, at a distance similar to the black stone pillars, Wang Yi discovered that 19 Cosmos Lords were sitting on the rocks, all of which had reached a limit of the Cosmos Lord's will. If we go further, we must break through the bottleneck and cause qualitative changes. The change has reached a point where the will of the strongest in the universe is comparable.

The masters of the universe opened their eyes and were shocked to see a black palace flying past them.

"What a strong will!"

"who is it?"

They were also curious, but they didn't take the initiative to probe the interior of the palace.

It's not that they don't know the existence of the Lord of Chaotic Source. The reason why they can hide their identity is actually normal. After all, the vitality of the strong does not change, but the appearance can easily change. The so-called breath is generally remembered only when you see it with your own eyes! Or there is a "virtual universe" to simulate that breath and make you feel it, but other forces obviously don't have a virtual universe. In other times of reincarnation, even if a virtual world is constructed, the life breath of the Lord of the universe and the strongest person in the universe cannot be completely virtualized.

Wang Yi was hiding in the palace. They couldn't see it, and they had never seen the breath of life. It's not surprising that they couldn't recognize it.

They watched the palace fly farther and farther, faster and faster (although it was a hundred times the speed of light, but the closer to the black stone pillar, the faster the flow of time, and the flight speed

was naturally far more than one hundred times the speed of light), and the astonishment on their faces grew. The more obvious.

They have been here for many years, and the strong have seen a lot of them, but there are not many who can reach here by the Lord of the Universe, and they are basically familiar.

But the one in front of him seems to have never seen it before, so it should be the first time.

You can rush here the first time you come here, with such a strong will, why doesn't it make people curious?

"He flew inside."

"It's almost a distance from those three."

In the depths of the black stone pillars ~www.mtlnovel.com~, there are three who are closer to the black stone pillars than the 19 masters of the universe, except for the star master Bei Zhi! The three masters of the universe... are comparable to the strongest in the universe in terms of will.

These three belong to the Holy Land Universe and the First Reincarnation Era respectively.

One of the three is from the God Eye Race.

They were also alarmed and turned to look at a black streamer flying over.

I was also slightly surprised.

The three of them are the masters of the universe who are comparable in will to the strongest in the universe, and those who can reach here at least prove that the will is not lower than them.

"This breath of life is very strange."

"I haven't seen it before, who is it?"

I don't know how many years sitting in the black stone pillars boringly, and they are also curious to encounter this kind of freshness.

[Chapter 634: Rampage Demon](#)

Although Wang Yi released the domain, the domain did not cover much area. It was just that his surroundings did not spread to the area where other strong men were located... If he invaded, he would be considered a deliberate provocation!

This will cause conflicts!

With the realm covered and hiding in the palace, for a while, other universe masters could not discover Wang Yi's true identity.

But since we can reach here, the will is at least the will of the strongest in the universe, at least the strength cannot be too weak. Although the other strong are paying attention, they did not want to provoke, and did not deliberately use means to explore, so they did not find that there is the universe. The lord of the chaotic source who has recently become well-known.

The closer to the black stone pillar, the more exaggerated the flow of time.

8000 times...9000 times...10000 times...

Wang Yi's palace continued to move forward, flying towards the black stone pillars, constantly approaching the new limit of challenging himself, and the flow rate continued to explode as time approached, getting faster and faster!

"12000 times!"

Wang Yi felt as if there was an invisible barrier in front of him, and he was already unable to move forward. Even if he could hold on to fly up, his will would not be able to withstand the impact, and he might faint.

"Estimated 12,000 times, is this my limit now?"

Wang Yi looked at the side. The three masters of the universe were about the same distance from him.

Maybe a little stronger than myself, but it's only 13,000 to 14,000 times, the will is not much different.

Wang Yi stepped back slightly, and at the 10,000 times the time flow rate area, it felt like it was almost the same, not as strenuous as before.

"You have to sharpen your will slowly, let's get used to this distance first."

Hardening always stays at the limit, which can easily affect cultivation.

Only with a moderate tempering of will can you practice better.

At this moment, a golden light flew over and stopped at a distance.

"It's almost at the site of those little guys. I don't know if there are any newcomers, I'll change my appearance first." The Rune Demon gave a weird smile.

Then the dazzling golden light disappeared, the appearance also changed, and it changed into another appearance...Of course, the life breath is very different, it is difficult to change, and it can only be concealed a little. Those who have seen the rampant devil can easily recognize it. But they absolutely dare not provoke the Rampage Demon God, and will not take the initiative to break the identity of the Rampage Demon God, otherwise they will seek their own death.

Rampant Demon God is grateful if they don't bother them. How dare they take the initiative to provoke this moody monster?

"Let's go. Go and have fun." The rampant demon **** changed into another appearance, his armor also turned white with spots, and he enthusiastically flew toward the No. 2 black stone pillar, but kept the speed at a hundred times the speed of light.

That is, the limit flight speed of the master of the universe in the universe.

"It's a rampant demon god."

"It's a rampant demon god."

"That old guy is here again."

A strong being sitting cross-legged in the rocky sea of black stone pillars trembled slightly when seeing the rampant demon **** appearing.

It was not the first time that they had seen the Demon God of Rampage, and they all remembered his life aura firmly, even if the Demon God of Rampage changed his appearance, he could still recognize it at a glance.

"This rampant demon is here again, be careful not to offend him."

As we all know, the rampant demon **** likes to change appearances and wander around. If there is a newcomer who doesn't know him, the rampant demon **** is a little offended for fear that it will be perished.

Some strong people curse secretly in their hearts, but they can only treat them as ignorance and turn a blind eye.

Rampant demon gods generally don't bother to care about them. After all, these guys know him, and each one is respectful and respectful, lest one wrong will provoke him and lead to murder. It is not as fun as newcomers.

"Well, there doesn't seem to be a newcomer." The Rampage Demon God is so boring.

He glanced away, but he didn't see the new face, and he was a little disappointed.

No newcomer, not fun.

Rampaging Demon God just regarded his behavior as a game. He liked seeing those little guys offending him and his face turned into horror when he learned his true identity.

The rampant demon **** will also punish according to his own mood.

If he really wants to upset him, it's normal to fall.

"Hey, there is a palace there."

The rampant demon who continued to fly inside saw the four masters of the universe sharply in the depths. He often wandered around. Of course, he was very familiar with the situation here. Among them, the three masters of the universe belonged to the Holy Land Universe and the First Reincarnation Era. There is nothing to say. of.

But the fourth place seems to have just appeared here.

Rampant Devil remembers that when he came here tens of thousands of years ago, he didn't seem to see this palace.

"Very unfamiliar, newcomer?" Ramming Demon quickly searched in his memory, but did not find a similar memory, and a trace of interest rose in his heart.

"Whoo!" He turned into a streamer and flew towards the palace.

And Wang Yi was also getting acquainted with the environment here, he was slightly startled when he saw a figure flying from behind before he even signed in.

From the perspective of the flight direction, it is easy to see that the opposite side is coming towards me.

"Come for me?" Wang Yi suddenly became vigilant, thinking of a possibility. "Couldn't I be so unlucky and met the rampant demon god, right?"

There are not many masters of the universe who can enter here.

It may also be a rampant demon.

Rampant Demon God, the strongest in the universe, is not easy to provoke.

How to do?

Do you want to hide first and test the attitude of the other party?

But if it is really rampant, this behavior may offend the opponent.

Wang Yi's thoughts turned swiftly, and then he didn't hesitate to drive the palace and flew in the other direction quickly.

Of course, before leaving, he did not forget to sign in.

[Ding, congratulations to the host for signing in successfully, and rewarding the black pattern inheritance crystal.]

Wang Yi ignored this sign-in reward and controlled the black palace to fly at high speed.

The rampant demon suddenly became angry when he saw Wang Yi's appearance.

You run as soon as I come?

"Did you recognize it?" The Rune Demon snorted coldly.

Of course, the other party may also be vigilant, not wanting to contact a stranger, not necessarily recognizing him... But no matter what, the Rampage Demon God is a little unhappy.

If I come here, just leave, don't you put me in your eyes?

Many of these ancient powerhouses have weird tempers~www.mtlnovel.com~ They are unpredictable, and one action may offend them.

Just like the "Blood Cloud Palace Master" of the Primitive Universe, others tried to compliment him and solicit him, only to be teased and killed by him at will.

Some did not provoke, but were killed by him, offending countless forces for no reason, it is simply unreasonable.

So when you see these ancient powerhouses, it's best to avoid them, otherwise you don't know how to die.

But sometimes you can't avoid it if you want to.

Misfortune comes from the sky is such a thing.

Rampant Demon God did not hide it at all, directly exposed his figure, the speed skyrocketed to thousands of times the speed of light, and chased towards the black palace.

"Boy, stop for me!"

[Chapter 635: Identity exposure](#)

"Really a rampant demon." Wang Yi frowned.

Wang Yi was only speculation before, but now that the rampant demon **** is exposed, it immediately becomes a fact.

According to the character of the rampant devil, being caught up by him would be a big trouble.

But in fact, staying in place and being entangled by the rampant demon may not necessarily escape in the past.

In particular, his identity was exposed, and with the strange temperament of the Rampage Demon God, he was very likely to make a move.

"It's really unlucky to meet the rampant demon so quickly." Wang Yi secretly said.

Originally, he just planned to stay here for a while, leave an avatar and leave.

Who knows, by coincidence, the Rampage Demon God just came here.

"Boy, don't stop?" The demon **** who had become the main body, turned into a brilliant golden light and hurried at a terrifying speed, saw the palace in the distance in front of him still flying, and couldn't help but feel angry.

He has already exposed his identity, and the other party is still ignoring his words. Isn't this provoking his majesty?

The lord of a small universe dare not give him the face of the uncle who runs rampantly?

What a courage.

As for whether the opponent is the strongest man in the universe, the demon **** who runs rampant has never thought, how could the strongest man in the universe hide his head and tail like this.

And by looking at the other party's palace flying speed no more than a hundred times the speed of light, you can know that the other party is the lord of the universe.

"It's stupid, do you think you can escape?"

And many masters of the universe around the black stone pillars also found that dazzling boundless golden light and tyrannical aura.

"It's a rampant demon god."

"He is chasing that palace."

"It looks like someone has offended him again."

These masters of the universe are surprised and sympathetic.

Provoked the rampant demon to want to run here on the black stone pillar? almost impossible.

Because the spatial fluctuations around the black stone pillars are completely static, they cannot be teleported at all, and there is no complicated environment for escapers to avoid and use. Once the strongest in the universe is staring at them, catching up is just a matter of blinking an eye.

"It seems that the ignorant newcomer has angered the rampant demon god."

"What a poor, unlucky guy, who has offended the rampant demon god, afraid that he will fall."

And Wang Yi, who was flying fast, frowned slightly.

He didn't mean to turn his head and entangled with the Rampage Demon God. The strength of the Rampage Demon God can only be regarded as ordinary among the strongest in the universe.

And the black stone pillars and the other two strongest in the universe, if their identity is not exposed, and their identity is now exposed, Wang Yi dare not stay here, who knows if the other two strongest in the universe will compete with the Rampage Demon God Deal with yourself together?

The three strongest men in the universe were absolutely invincible, so Wang Yi immediately fled without paying attention.

It's just that his flight speed is far lower than that of the strongest in the universe, and in a blink of an eye, the distance between the two sides has narrowed to tens of billions of kilometers.

"boom!"

The mighty black river emerged out of thin air, pervading the area within a light-year.

But the rampant demon gods were unmoved, the mightiest power of the universe was overwhelming, and once it broke out, it would be difficult for them to restrain their actions even in the Peak Treasure Domain.

The golden light shuttled directly in the black river, and its speed was not affected at all.

"Haha, the pinnacle domain is a treasure, but do you think it's useful for me? Let me see who you are, a little guy who is new to the universe or is it?" Ramming Demon laughed. Suddenly his eyes moved, the black river, the peak domain category treasure, this form is a bit familiar, it seems that I have heard it somewhere...

"Rampaging Demon God, I haven't offended you, so why do you bother me as the lord of the universe."

A low voice sounded.

Subsequently.

"Om!"

The dim and thin endless gray light descends directly, mixing with the black river, and instantly its power soars!

The "gray kingdom" formed by the wings of chaos is fundamentally different from the realm-class treasure.

The two realm-type treasures...Once they are deployed, the two will collide with each other, etc. For example, in the previous battles, Wang Yi's black river and other realm-type treasures collide with each other.

But if it was a completely different power... it wouldn't happen.

For example, by using methods similar to "microcosms", the opponent's precious realm can exist.

Similarly, it can also be blessed in its own treasure field.

The "gray kingdom" urged by Wang Yi's chaos wings is actually a kind of control over time and space, similar to the master of the universe's ability to "master a time and space", but it is more powerful through the secret method of chaos wings! Makes other cosmic masters unable to control one side of time and space.

Because, the second form of Chaos Wings, this is equivalent to a simplified version of the strongest man in the universe "speak out the law"!

Today, the intact and undamaged wings display the second form of "Time and Space Control". This wing time and space domain is stronger than the general peak and treasure domain, and can be comparable to strange things.

If it overlaps with the pinnacle treasure domain again, power will soar again! It can be comparable to the Xeon Zhibao field!

The rampant demon, whose speed was soaring wildly, seemed to crash into an unfathomable quagmire, and its speed slowed down visible to the naked eye.

"This is..." The Ramming Demon's eyes widened, looking at the black river that was filled with endless coercion and dim gray light.

"It's such a powerful power that even me can be restrained. Is this the overlap of the two fields?"

"Black river, the space-time realm of the most precious wings?"

"Are you the lord of the human chaotic source?" The rampant devil stared at the palace in the distance, "It's really unexpected that you came here."

The strong beings beside the black stone pillars were also taken aback, and immediately recognized them.

"Wings are the treasure?"

"It's the master of the human chaotic source of the primitive universe."

"It's him, it should be correct."

"Why did he come here? I heard that he has two Xeon treasures."

"Two pieces of the strongest treasures, the entire universe, only he, the master of the universe, can own it."

The masters of the universe were jealous.

The Xeon is so precious ~www.mtlnovel.com~ that the strongest in the universe must fight desperately. The master of the universe like them wants to get one, almost dreaming.

But the Lord of Chaotic Source had two things, and more importantly, the rumors came out, but the human race did not refute the rumors. The Lord of Chaotic Source also did not come forward to clarify.

Obviously, they acquiesced to this rumor.

In fact, the human race and Wang Yi have no way to deny it, because there are more than two Xeon treasures in him...If they are not, unless they are hidden, they will be exposed in the future and will only be laughed at by other cosmic forces.

Can only not admit nor deny. As for what other people like to say and say.

"The Lord of the Human Chaotic Source? The human being who made the Lord of the Five Chaotic Powers the strongest master battle deity and the Lord of the Arrows to fall?" Among the many powerful men, one of the masters of the universe frowned, and his eyes showed evil spirits.

He is the Lord of Purifying Eyes of the God Eye Race, and one of the three Lords of the Universe who can match the will of the strongest in the universe.

[Chapter 636: envy, jealousy, hate](#)

The Lord of Purifying Eyes and the Lord of Five Chaotic Groups exist, and if they are divided according to the sixth order, they can also be divided into the fifth order.

The Lord of Purifying Eyes is a disciple of the first God of the God Eyes. He is especially good at soul attacks, illusions, and other methods. There is a special treasure of illusion, "Light Purifying Mirror". Very few, at least he created a prestigious name in the hands of the Lord of Clean Eyes.

In terms of divine power, the Lord of Purifying Eyes is close to the limit of perfection.

In terms of will, it is comparable to the strongest in the universe.

There is another light filter in hand!

Even if compared with the strongest in the universe, it lacks at most the secret technique.

"It's actually the Lord of Chaotic Source." The Lord of Clean Eyes couldn't help but murderous intent. "He actually came here and provokes the Rampage Demon God. It's better to let the Rampage Demon God take care of him."

The Lord of Purifying Eyes is extremely hostile to the Lord of Chaotic Source. There is no other reason. The Lord of Arrows is a friend of the Lord of Purifying Eyes, and the Lord of Arrows has fallen because of the Lord of Human Chaotic Origin. How could the Lord of Purifying Eyes not want to take revenge.

It's just that he also knows that he is probably not an opponent of the Lord of Human Chaotic Source, and can only hope for the strongest in other universes.

"The Lord of the Primordial Human Chaotic Source appeared in the spacecraft's "Black Stone Pillar Space No. 2 Black Stone Pillar"."

"The Lord of Chaotic Source appeared, right in the space of the black stone pillar, being chased by the rampant demon god."

"It's the Lord of Chaotic Source, he is there, and I saw him with my own eyes."

There were nearly a hundred masters of the universe around, and they all noticed the situation here, and the news of nature spread quickly.

They are also paying attention to the situation and want to know whether the rampant demon... can take this humanity.

The reason why many masters of the universe can save their lives under the hands of the strongest in the universe is because the palace is the treasure, and the other is the limitation of the primitive universe.

But no matter how limited and weakened, the strongest of the universe is much stronger than the master of the universe. Even the master of the sixth-order universe can only escape under the hands of the strongest of the universe, and there is no chance of victory in battle.

"Damn the rules of the original universe." The rampant demon felt the suppression from the entire space, a certain kind of faint warning, and he was a little angry when he said the law disappeared with his ability.

Coupled with being bound by the winged time and space and the black river's treasure realm, his speed was even slower.

Wang Yi can fly at a speed of a hundred times the speed of light, but the rampant demon is not even a hundred times faster.

Looking at the black palace in the distance, the rampant demon **** was envious and jealous.

"What a strong treasure, a lucky little guy, why don't I have such a treasure."

The rampant demon's eyes rolled.

"Little human guy."

A voice was transmitted to Wang Yi's palace through special fluctuations.

"Don't rush away, I have no malice against you. You are a great winged treasure. I am willing to exchange five top treasures, no, ten, ten top treasures. What do you think?"

Rampant Demon God is really greedy.

If this winged treasure falls into his hands, even if he encounters other strongest players in the universe, he will be able to use the treasure's power to fight and leave as he wants. I don't know how comfortable it is.

But he could not do anything with Wang Yi. He lost his ability to speak and follow the law. He was constrained by Wang Yi's domain, and his flying speed could not keep up with the opponent. Wang Yi wanted to go, but he couldn't stop him at all, so he could only use other means.

If hard is not good, then come soft.

"Rampaging Demon God, I'm sorry, this is the treasure bestowed by my human race. I don't have the power to trade." Wang Yi opened his eyes and said nonsense.

I sneered in my heart, wanting to change the Chaos Divine Wing for the ten peak treasures? It's too whimsical.

Ordinary Xeon Supreme Treasure may be possible, but Chaos Divine Wing is of infinite value, even 10,000 Xeon Supreme Treasures are incomparable, let alone ten Peak Supreme Treasures.

"Don't rush to refuse, we can discuss it again." The Rampage Demon God was also a little anxious.

How many treasures can a strong man use?

Like the strongest alone, whether it was the original Jie Fanzi, or the current sitting mountain guest, rampant demon god, etc., they are all alone, and don't need to work for the group. The treasures obtained were all put away casually, but their treasures are no less than that of a group of people!

However, except for a few treasures, other treasures are of little use to them, so they are also thrown into the treasure house or bestowed on the master of the universe.

For the Rampage Demon God, this winged treasure is absolutely comparable to the Xeon treasure, second only to the "Blood Sea Demon Armor" on his body. He is willing to exchange this treasure with other treasures except the "Blood Sea Demon Armor". .

After all, other treasures are of no use to his strength improvement, and more are useless.

But this Wing Treasure is different. To get it, the Rampage Demon God dares to break the wrist with the strongest people in the universe who are stronger than him.

He wanted to seduce Wang Yi, because according to his speculation, this treasure should belong to Wang Yi. Otherwise, the founder of the giant axe is the only strongest in the universe. There is no giant axe. How could it fall on Wang Yi?

But he didn't expect this human being to ignore the temptation of ten peak treasures and refuse so simply.

"Twenty peak treasures!" The rampant devil gritted his teeth and offered a "high price" that he thought he thought. The pinnacle can be exchanged with the Xeon, but the pinnacle cannot be exchanged for the Xeon. "There are ten of them with value comparable to the peak palace category. I'm already very sincere, Lord of Chaotic Source, think about it, how much your human strength will improve if you get so many peak treasures."

The rampant demon began to "make justice with Wang Yi" painstakingly.

You can't just take care of you, you have to consider your ethnic group. I am very sincere about running the devil.

Wang Yi really moved for a while, wondering if he could deceive the twenty peak treasures of the Rampage Demon God, but found that there was no room for manipulation.

"Rampaging Demon God, I'm sorry, I really don't have any plans to exchange, you don't chase me anymore, or I will call the giant axe over." Wang Yi firmly refused.

The Lord of Human Chaotic Source is so helpless that he can't get in, the rampant Demon God is very helpless, but he can't catch up with him, he can only watch the human palace go away eagerly.

The Lords of the universe around them saw that the Rampage Demon God could not catch up with the Lord of Chaotic Source~www.mtlnovel.com~, which was also shocked.

"The lord of the chaotic origin of mankind is really extraordinary. With this winged treasure, he can simply walk sideways in the universe, and most of the strongest in the universe may not be able to hold him."

"More than that, I heard that in addition to this winged treasure, he also has the Xeon Supreme Treasure Palace. There are these two treasures, and it is difficult to fall in the universe."

Other strong people are extremely envious.

The Master of Eye Purification of the God Eye Race is even more envious and jealous, gritted his teeth.

"This abominable human being, why I didn't have such good luck, obviously I was in the first reincarnation era, I don't know how much longer I practiced and wandered than him." The Lord of Eyes could hardly vent his anger.

One is the anger that cannot avenge the friend, and the other is the naked jealousy.

The Lord of Chaotic Source is simply too annoying.

[Chapter 637: Black pattern heritage crystal](#)

"Finally get rid of this rampant demon god, this rampant, I actually want to exchange the peak treasure for my wing treasure."

In the dense rocky sea, a black streamer is moving at high speed, flying towards the periphery.

Sitting on the palace throne, Wang Yi frowned slightly. "However, the news that I have the Xeon Supreme Treasure has spread throughout the universe. I don't know how many people will make my mind in private. I can't take it lightly."

Treasures are touching, even if there is a giant axe to deter people, there are still people who may take risks for the treasures.

But Wang Yi was not afraid. Soldiers came to cover up the water and earth.

"Let's take a look at what you just signed in." Wang Yi finally had time to check the rewards that he signed in at the black stone pillar.

Before being chased by the rampant demon god, he couldn't be distracted to watch, but now he finally has time.

"Um?"

There is an extra white triangle crystal in the panel space with a black secret pattern on it. It is very mysterious, far more mysterious than the Xeon Supreme. It is very similar to the extremely profound black secret pattern on the black stone pillar. It should be the same kind, and there is another one. The golden and purple streamers flowed between the secret patterns, and a faint breath revealed a palpitating coercion, which looked very extraordinary.

Wang Yi branded his own mark to complete the recognition of the Lord, the consciousness was connected, and a large amount of information poured in frantically.

"Um?"

Wang Yi's eyes widened in astonishment, and there was a hint of shock in his eyes.

"This this....."

"This is actually a training inheritance of ancient civilization?" Wang Yi made a huge wave in his heart.

"And it's about the systematic training method of the will?"

Wang Yi was very surprised. He didn't expect that he would actually get an incomparably profound secret method of will training, specifically explaining how to speed up the level of will.

Wang Yi immediately realized its value.

Prior to this, the universe, including the primitive universe, had no special method of will training, and could only use time and environment to sharpen the will in the simplest and most crude way.

Very passive.

It's like a person who does exercise without knowing how to do it scientifically and systematically, so he can only practice blindly with the help of ordinary tools, and the efficiency is naturally very low.

But with this secret method, the grinding effect can be improved hundreds of times.

Even in ancient civilizations, this secret method is not simple, generally only the top superpowers have it, ordinary true gods, and the true gods of the void have no access at all.

Wang Yi was a little excited. Although it was only the will to practice the secret method, this secret method was by no means simple, and it was of infinite value.

After understanding all the information quickly, Wang Yi opened his eyes, somewhat regretful.

"Unfortunately, this secret method inheritance only tells how to raise the level of will. But there is no will to use the secret method."

It's like "Magic Sound God Will Inheritance".

Accepting inheritance step by step can increase the amplitude of mental power, reaching levels of 2000, 3000, etc.... There are also corresponding secret methods for the use of mental power.

Even by accepting the entire inheritance, you can get a set of extremely powerful and super secret.

And this black pattern inheritance crystal, even though it was so profound and mysterious that even Wang Yi couldn't understand it, it was simply raising the level of will, nothing else.

"Forget it, I should be content to be able to obtain this incomparably precious secret method. It is very difficult for the strongest in the universe to get it." Wang Yi showed a faint smile on his face. Then there was some regret. "It's a pity that this secret method is cultivated through the inheritance of crystals. It cannot be passed down. Otherwise, it can be practiced by other strong people in my human race. Now I can only enjoy it."

Without inheriting crystals, even if those secret methods were portrayed, it would be difficult for other strong people to understand.

In the three major Jedi, like some core places, there will be some monuments. Some do not know how many super-existences left before the reincarnation era, some monuments are very useful, some monuments are useless.

The God Eyes of the first reincarnation era obtained some ancient secrets from some ancient relics and researched them out to have such a strong strength.

And more, they are like black stone pillars. They are too esoteric and put there for you to see, but because they are not treasures for people to pass on cultivation, there is no detailed guidance from low to high, and latecomers simply cannot Pondering research.

Although it is against the sky, even the strongest in the universe can't cultivate. Who can practice?

The God Eye tribe was lucky and found a set of complete heritage sites left over from ancient existence.

And now, through the panel, Wang Yi has also obtained a powerful inheritance crystal from the black stone pillar.

This inheritance is specifically aimed at will, and it should also belong to the core inheritance of that superpower in ancient civilization, and it is by no means passed down.

The secret method of inheriting crystals is divided into nine layers in total.

The first level is that only the will of the true **** can be cultivated, which is considered an introductory one.

The second and third levels are all true god-level wills, and the third level is the peak of the true gods.

The fourth level is the will of the true **** of the void, and the sixth level is the peak of the true **** of the void.

The seventh level is the will of the eternal true God, and the ninth level is the peak of the eternal true God.

The sharpening of the will is not a simple matter. It is common for the true **** to have the will of the true god, but it is very difficult for the true **** to have the will of the empty true god.

The more difficult it is as you go further, it is extremely rare for the true **** to possess the eternal true god's will, even in ancient civilizations, and every bottleneck is extremely difficult, and it is not simply a matter of stacking time.

And this set of will-enhancing secrets can be regarded as a shortcut, which can help the strong to break the bottleneck, so that the true **** has the eternal will of the peak of the true god!

Although the strong people in the universe attach great importance to will, they do not value the will as much as the ancient civilization. In the ancient civilization, the will is an important criterion to measure the strength of a strong person, and there is even the saying that "will is sacred."

Many terrible secrets of will are born, and a strong will can completely sweep other strong at the same level with the secret of will.

However, in the Universe Sea, the secret technique of the will has never appeared, and the role of the will is limited to cultivation, recognizing the master, and improving the strength of the soul. It can only be used for defense in battle. I have never heard of it being used to attack the enemy. Without the secret technique of the will, the will is too vain~www.mtlnovel.com~ Even the strongest in the universe don't know how to use it.

Wang Yi is now a true god-level will, and he can naturally practice this secret method of will.

"With this secret method of volition practice, then the speed of my volition will increase even faster."
Wang Yi was very happy.

He is well aware of the importance of will.

Not to mention other things, like Yuan's "Lie Yuan Shu" needs to be called the Holy Will to begin cultivation.

The will also plays a huge role in accepting the test of the inheritance of "Lie Yuan Shu".

Although "Lie Yuan Shu" still has nothing to do with it, Wang Yi still has some confidence in getting "Lie Yuan Shu".

"Starting from the first entry level, you need True God-level will to get started. It's really extraordinary."
After Wang Yi finished feeling, he was about to immerse his consciousness in the inheritance crystal and was about to start contacting inheritance knowledge, suddenly his heart moved.

"Um?"

[Chapter 638: Black token secret room space](#)

Wang Yi signed in on the Black Stone Pillar to obtain the "Black Pattern Crystal Inheritance". This special secret method for improving the will allows the True God to reach the peak will of the Eternal True God in much less time than before. It requires the True God-level will to cultivate.

The first exercise is the true god-level will. The third pinnacle of forging true god. The fourth forging the true **** of void, the sixth forging the pinnacle of the void, the seventh forging the eternal true god, and the ninth forging the pinnacle of the eternal true god.

The levels are clear, but they are not easy to achieve.

If there is no talent and no effort, most true gods actually stay at the pinnacle of the void true gods. According to Wang Yi's speculation, this should have been practiced for the true gods and even the Lord of the Universe, specifically to improve their will.

The ancient civilization has obviously much higher requirements on the will of the strong.

Just when Wang Yi was about to try his cultivation, he suddenly sensed the fluctuations from the black token that he hadn't moved since he got it.

The space of black stone pillars is vast and strange, with 16 black stone pillars endlessly high.

Among the countless huge rocks, there are buildings with black spires.

Through the black token, Wang Yi can feel that it is being sensed in a certain direction.

The black token can only sense the corresponding secret room space at close range, which means that the secret room space is not far away.

"Go and see."

Wang Yi turned around without hesitation.

Whoosh!

It turned into a streamer and flew quickly in the direction of induction.

Soon, Wang Yi came to a black spire building. This space secret room was huge, and it was almost the same as the huge rocks flying around the black stone pillars. When he flew in front of it, he could feel himself more directly. Wang Yi flew out of the palace, touched the wall with his hand, but easily penetrated through it.

"Good luck, I ran into it without me looking for it. I don't know what is in this secret room?"

With a hint of anticipation, Wang Yi walked directly through the wall of the building and entered inside in the next moment.

The space secret room contains an independent majestic and endless vast space.

Only the owner with a black token can come in. No matter how strong other people are in the universe, they don't want to break in... For a long time, no one has been able to destroy the space secret room. Even the black token space secret room on the lowest level among the three big token secret rooms.

Wang Yi appeared in midair, overlooking the endless land.

He soon saw that there was a huge palace on the distant mountains.

"The palace? Go take a look."

Wang Yi turned into a stream of light and soon descended to the palace.

The palace is hundreds of millions of kilometers high. The towering walls are endless like a sky, with almost no end in sight. A breath of ancient vicissitudes radiates from the palace, and the outer walls are carved with countless strange things that Wang Yi has never seen before. Life, and some Wang Yi is a little familiar, similar to the eight natural beasts and gods of the original universe, various strange scenes, as if to tell Wang Yi a certain memory buried in ancient history...

There are also pictures and texts. Although the text has not been seen before, you can understand the meaning naturally when you see it. It is very wonderful.

Wang Yi walked into the palace while watching and admiring.

In the palace, there is only one statue.

It is a humanoid life, but I don't know if it's a human being. It has a pair of eyes, two ears, a nose, and a mouth. He wears a gray robe and looks directly at the entrance of the palace. The eyes are more vast and deep than the starry sky, but they seem to be With a trace of sadness that cannot be erased.

There were still words engraved on the base of the statue, Wang Yi looked at it.

"I, Mo Ji! This black token was obtained for me from the five-illusion holy land Ami in the Liuzhong Mountain. Before that, I don't know how many generations of masters have been there. There are no traces left and it is difficult to find. I Just treat me as the first owner of this space..."

Wang Yi's eyes condensed, Five Magic Holy Land?

In the Universe Sea, there are only two holy places, the Purple Moon Holy Land and the East Emperor Holy Land. The two holy places do not know how much history exists, and the East Emperor Holy Land is the oldest.

I have never heard of the Five Magic Holy Land.

"Hahaha... Now the three holy places of the universe sea, the five gods of the five magic holy places, are not my opponents, even if I take the treasure from them, they can't help me. Unfortunately, I have reached the pinnacle of the universe sea and created my own The tenth-order secret method has almost no opponents, but I have never seen the legendary ancestor of the Five Magic Holy Land. It is a pity that beyond the realm of reincarnation, what is it like, I really want to see..."

"Later, when you see the message I left, you don't know which era of reincarnation. I am the strongest alone. Before the last fight, my inheritance, my countless efforts, I don't want to Waste. So on the way to reincarnation, I donated the treasures I accumulated to other friends of mine, leaving my life's learning, experience, and secret information here, to go to reincarnation. If you don't fall, the limit is approaching, you can only fight for the last time. If you can get through... it will be able to exist forever, and it will be able to establish a holy land universe..."

Wang Yi shook his head.

The three holy places?

Five Magic Holy Land?

There are only two sacred places now, and the Five Fantasy has never even heard of it. It is probably finished.

Looking at this, I don't know how many messages from the powerhouses in the reincarnation era, it is estimated that he himself is not sure.

Moreover, even if it rushed past, what about the establishment of the Holy Land Universe, it is estimated that it will be the result of destruction.

Wang Yi already had a faint guess in his heart.

This Mo Ji, should be the top tenth combat power, in that era, it also swept the entire universe.

However, the ancestors of the three holy places at that time were the same as the ancestors of the two holy places now ~ www.mtlnovel.com~, none of them appeared in the universe. They are all legends. The top ten is the strongest combat power.

"I was born as a special life, and then I got a great opportunity to practice all the way until I became the strongest in the universe. What I am best at is the soul secret method. The soul secret method I created is known as one of the strongest attack methods of my time. If there is no soul Xeon Supreme Treasure Body Protector, I can kill any strongest in the universe!" The tone of the words left by Mo Ji reveals absolute confidence.

Wang Yi moved in his heart, relying on the secret method of the soul to be invincible in the universe. Isn't this the same as the original ancestor?

This ancient super existence can be invincible to the universe. The value of this secret method is naturally very huge, but Wang Yi is not on the path of the soul secret method. I don't know if this secret method is of no use to him.

"Later, you are destined to be here. In my statue, there is a crystal treasure, which records the low to high-detailed inheritance of my fascinating knowledge, and the information of my life and all the map data of the universe collected. I hope that the younger generation will not let my hard work, and my inheritance will be cut off."

Wang Yi looked at the text and stood there speechless for a long time.

[Chapter 639: "Soul Knife"](#)

Wang Yi looked at the round and round jade beads glowing with fluorescence in his hand. This is the treasure left by the ancient strong Mo Ji. It stores a large amount of information. It is Mo Ji's greatest pride, far beyond the genius of the strongest in the ordinary universe——" Soul Knife.

Wang Yi just looked at it roughly and found it extremely profound, most of which surpassed his cognition.

It's normal. After all, Wang Yi is now only the Lord of the universe. His cultivation time is short, and his realm has not even been created by the sixth-order secret method. Seeing this episode of the greatest achievement of a super strong man in his life, it is comparable to the super-knowledge of the tenth-order secret method. It is normal not to understand.

It would be strange if I understood it all at once.

"The soul of the knife, observe the mysterious operation of the universe, condensing the soul into a sword, and the will as the handle, cutting out all spiritual things." Wang Yi watched in silence, sighing inwardly.

Sure enough, he is a peerless figure, and his combat power is comparable to the peerless powerhouse at the level of the original ancestor.

I just don't know if he went through the reincarnation, entered the Origin Continent, or died.

If it is on the origin continent, even if the small universe is destroyed in the universe, there may not be anything wrong with the deity, and it may be seen in the future.

"Soul Knife..." Wang Yi thought silently, feeling that this soul secret technique was a great trigger for him, and the secret techniques after the fourth level were faintly related to the strongest talent secret technique "Mirage World", and he might be able to practice it.

"It is actually imitating the cultivation path of the strong, using secret methods to condense the domain, the world, the kingdom of God, and then to the small universe. Although it is only a virtual small universe, it is terrible and powerful."

"The last tenth-order secret method is even more inspired by Senior Mo Ji after watching the destruction of the primitive universe twice, and created the strongest soul attack method-the end of the soul universe."

The Soul Knife has been the strongest secret method in the universe since the sixth order.

The universe was born, multiplied, prospered, weakened, and destroyed. It also symbolizes the five levels of secret methods from the sixth to the tenth level of the Soul Knife.

At the tenth level, with the help of the instantaneous destruction of the soul and the universe, the endless power is condensed into a knife. Under a single knife, the mighty power is overwhelming. The strongest person in the universe does not have the strongest soul, and the will is not so against the sky. The possibility of falling is very high. .

"Soul Knife" is the result of the painstaking effort of the Moji Three Reincarnation era whose combat power is comparable to that of the original ancestor. With detailed guidance from low to high, he has been practicing to the strongest in the universe. The lowest immortality can be practiced. Wang Yi is now the lord of the universe, as well as the strongest person in the universe with unparalleled will and talent. The initial training went smoothly.

"I have the mirage orb of the strongest treasure, but the mirage orb is the soul treasure of the phantom technique, and this secret method is a soul attack type, but it is better than nothing." Wang Yi put away the jade beads left by Mo Ji, "If With success in cultivation, this "Soul Knife" may be another method for me."

Wang Yi will never have too many methods.

...

Virtual universe.

"Huh?" The Chaos City Lord who was in the palace on the top of Thunder Island was notified of the virtual universe, and he opened it, revealing a look of surprise.

"Wang Yi has added the map of the Universe Sea again, and is there a large number of other secret records of information?" After watching it, the Lord of Chaos City showed a look of surprise.

"It turns out that I got a black token, and got the legacy of the super existence of the ancient times?" City Lord Chaos was surprised after reading it carefully.

"It has only been a few years since I entered the universe, and Wang Yi has received so much information. The depth of this opportunity is really elusive."

Wang Yi's rise is full of so many secrets, and he seems to be covered in a mist. If he were not for being a human being, he had shown goodwill to the human race and made many indelible contributions. Chaos City Lord could not imagine this kind of existence. Stay at ease with the human race.

"I am so lucky to have Wang Yi in the human race." City Lord Chaos sighed.

The Lord of Chaotic Source is now recognized as the Lord of the Sixth-Order Universe in the Universe Sea, and his strength can rank among the top 100 in the Universe Sea.

Has already surpassed the Chaos City Lord.

In the Primitive Universe, his reputation is even greater, and various deeds are spread among the super beings.

On the contrary, there is very little circulated below immortality.

"I just don't know when Wang Yi will be able to break through to the strongest in the universe." Chaos City Lord sighed leisurely when he thought of something.

Although he saw the path of the strongest in the universe, it was not so easy to step into the breakthrough.

And he cares more about the fate of mankind than his own improvement.

"If I can see with my own eyes that my human race transcends reincarnation and becomes the Holy Land Universe, the day when I will live forever, I will be willing to die, and I will be worthy of the teacher's entrustment."

And a white figure was watching silently beside him, but the Chaos City Lord didn't notice his existence at all, as if he was the ghost of the virtual universe.

"Transcendence of reincarnation..." The figure looked at the sky of the virtual universe with a deep gaze, as if he could see through the entire universe.

...

The original star.

It has been more than 10,000 years since the Primordial Star opened, and many super beings have entered, fighting fiercely for the most precious treasure.

On a primordial star, the coercion of the vast laws undulates like ocean waves, time and space are chaotic, and many lords of the universe are smashed into a ball.

"Star Prison! Do you insist on having trouble with me?" Yandi yelled coldly.

Since Luo Feng went to the door to take away the "Jijia" ten thousand years ago, only the "Primitive Soul" and the "Yan Shen Halberd" are left. Emperor Yan, who is the supreme treasure, has fallen sharply and only has a top-level armor on his body. .

In order to get a better treasure, he has been in the original star for these years.

Today he got the news of the birth of a top treasure, and he hurried over excitedly, but he did not expect to encounter the Star Prison.

"Haha, you don't agree to come to the fight!" The Lord of the Star Prison controlled the peak domain type treasure mainly to suppress Emperor Yan, laughing.

"You became the overlord of the universe earlier than me. When I became the lord of the universe, you were still the overlord of the universe. Now you have just stepped into the level of the lord of the universe. The lord of the universe hasn't created the ultimate knowledge, so you dare to be an enemy of me!" Emperor Yan said coldly, a little aggrieved in his heart.

If it weren't for this pinnacle realm-like treasure to suppress it too hard, how could he have no choice but to take this star prison?

At the same time, he was secretly surprised that the human race didn't know what had happened in recent years. The Lord of the Universe had a lot more peak treasures, and even this star prison had a set of peak treasures, which made Emperor Yan jealous and shocked.

There are a few Xeon treasures on the giant axe~www.mtnovel.com~ and the Lord of Chaotic Origin. He is obviously a newly promoted Lord of the Universe. After more than 100,000 years of cultivation, he has become the Lord of the sixth-order universe. Far above him, the strength of the human race is the last thing he wants to see.

"What the **** happened? Why did it become like this?" Emperor Yan roared in his heart as he looked at the triumphant Star Prison opposite.

Emperor Yan is hostile to the human race, and the human race hates Emperor Yan even more as a traitor.

It was because of the fight for the most precious treasure to kill the master of the same race of the universe, and then led the Yan God race to rebel against the race, which shocked the universe at that time and also disgraced the human race.

The Lord of Star Prison was also a witness to the history of the year, but he was only the top cosmic overlord back then, powerless against Emperor Yan, but his heart was already full of anger.

Now that I see Emperor Yan, I would rather not fight for the treasure to let Emperor Yan not be satisfied.

Amid the angry roar of Emperor Yan, the battle on Primordial Star continued.

[Chapter 640: Eclipse Glacier](#)

The depths of the spacecraft.

After leaving the space of the black stone pillars, Wang Yi continued to move towards the depths of the spacecraft, and the environment was naturally worse and more dangerous!

Compared with the death of the strong due to the fight, the natural danger of the three Jedi itself... is the biggest killer that caused the Lords of the universe to fall, even if some dangerous places have been verified for a long time to confirm some dangers, but occasionally There will be some unexpected situations.

The "black stone pillar space" is actually a limit. Before the black stone pillar space, the danger is slightly less, and the black stone pillar space is obviously more terrifying in the future.

The yellow sandstorm was overwhelming in the distance, and everything he went by was submerged.

Here endless time and space have long been condensed without a trace of fluctuation. Even if the Lord of the Universe is caught in a sandstorm, it will soon be wiped out. Sand storms can easily destroy top palace treasures.

The top palace treasure, this is hard to destroy by the strongest in the universe with a full blow.

But the natural environment deep within the spacecraft can achieve this step.

Sitting in a chair in the palace of the black iron tower, Wang Yi seemed to close his eyes and rest his mind.

"The route to the cyan token space is dangerous. To be honest, it is not impossible for the strongest in the universe to fall. They are all close to the core area." Wang Yi closed his eyes and stroked the smooth surface of the jade handrail with delicate patterns. "But I have the Sky Tower and many methods, plus I have a map route, so I still have a good grasp. It's not impossible to break through."

"Moreover, the "flaming ice domain" is also on this route..."

The Yanbing Region, the original place where the "Tomb Boat" was born in history.

It's just that there should be nearly ten thousand years before the original birth time, and it's useless to go to the Yanbing Region at this time.

"Go to the cyan token space first and get Jie Fanzi's treasures." Wang Yi secretly said in his heart, "Those treasures, plus the accumulation of my signings over the years, should be able to exchange for a restraint-type supreme treasure."

"It's not too late to wait for the tomb boat to be born while wandering in the interior."

Wang Yi was sure of his heart, and the black iron tower turned into a stream of light, and quickly disappeared into the yellow sand in the sky.

...

In the ice and snow about a few hundred light-years away from Wang Yi, there is a huge silver river light-years wide on the vast ice crystal land, rushing to unknown places.

Snow is floating in the sky, it is cold to the bone, but there is no wind, and the spatial fluctuations are completely frozen.

A palace resembling a red worm is flying fast above the river. The core of the palace has a purple skull with silver stripes. The neck is very long. The four hooves of strange life like a dragon are lying on the ground, and the eight skulls are on the ground. The green eyes exude a wicked light.

Around it, there are several universe masters standing respectfully.

If anyone in the universe sees it, they will know that the alien life is the "eight-eyed demon god", the strongest lonely universe in the first reincarnation era.

The "Eight Eye Demon God" is the strongest person in the lonely universe, born as a special life, and, like Intuo, is also a unique special life in the first reincarnation era. And the talent is much more powerful than Intuo, especially it is good at soul means, similar to the Zerg queen and imaginary demon **** of the primitive universe.

The eight-eyed demon **** is very evil. Before the end of the primitive universe in the first reincarnation era, it was already an existence that everyone shouted and beat, similar to the "Blood Cloud Palace Master."

In fact, the "God Eye Race" and the "Skeleton Race" are more or less feuds with him.

But the "Eight Eyed Demon God" can become the strongest in the universe, and living to this day, it has proved its intractability.

The "Eight Eye Demon God" was very lucky and got two Xeon Supreme Treasures, one Xeon Supreme Long Range Weapon "Eight Eye Pillar", one Xeon Supreme Armor "Eight Eye Armor", plus it is good at soul secrets... other strong people want to encircle It's hard to kill it.

So although it has many enemies, it has always been at ease.

"Woo, the primitive cosmic humans appeared in the space of the black stone pillars." Half of the eyes of the eight-eyed demon **** were opened and half closed, emitting a breathtaking light, and his voice was hoarse and low as if coming from a bottomless abyss. "I got the news and rushed over from the core area immediately, hoping to make it in time."

The eight-eyed demon god, the strength is considered strong among the strongest in the universe, even if there is no ninth tier, there is an eighth-tier top combat power.

In addition, he is proficient in all kinds of weird soul secrets, causing many of the strongest in the universe to be unwilling to confront him.

The masters of the universe in front of him are actually slaves controlled by his soul during the long years.

Being able to control so many masters of the universe, it can be seen that the Eight Eyed Demon God's soul is powerful.

"I heard that the Lord of the Chaotic Source of the Primitive Universe has two strongest treasures." The eyes of the eight-eyed demon **** were greedy. "A winged treasure can control time and space, and overlap with other domains. The power can be as powerful as the Xeon. The palace is even more precious and rare. If it falls into my hands, then my life-saving ability will be strengthened. Now, even if the Great Axe and the Seven Allahs of the God Eye Race, I am not afraid..."

"What's more, although the material shock is almost ineffective, the soul defense is not that powerful. What I am good at is the soul attack. When the time comes, I will find the opportunity to get close to the human being and attack him suddenly.

"Even if he wants to run, I can stop him with the eight-eye pillar. Constantly draining the soul, there is a great chance to kill him and get the treasure on his body."

"However, you have to find the human being." The eight-eyed demon god's eyes flickered. "According to the news, the human being has left the black stone pillar space and is coming in this direction. I will wait here first to see where he shows up."

The Demon God of Eight Eyes is very patient. Said to the respectful masters and servants of the universe: "Continue to inquire, find that human being, and report to me immediately."

"Yes, master!"

...

"The front is the glacier of Eclipse."

Wang Yi looked at the white world ahead.

Mtlnovel Glacier ~www.mtlnovel.com~ is also a dangerous area deep in the inner space of the spacecraft. You must have the peak palace treasure to make a breakthrough here. The most dangerous thing in the Glacier is the silver river, which is extremely corrosive. Strong, even if the Supreme Treasure Palace falls in, it will erode away in a few minutes at most. The Lord of the universe can only hold on for a few breaths in armor, and the strongest in the universe dare not rush in directly.

And it's even more dangerous under the Erosion Glacier. There are dark vortexes. Only the Xeon Supreme Palace can be safe and sound. Wearing the strongest armor may be able to walk on the Erosion Glacier, but it is sucked in by the dark vortex, even the strongest in the universe. Got to fall.

"Wow!" A black streamer flew by at a hundred times the speed of light.

Only around the Eclipse Glacier can it teleport, and the spatial fluctuations here are completely static, so once he comes here, Wang Yi can only fly through.

"Huh?" Wang Yi in the palace suddenly turned his head and looked in one direction.

His wing domain is always unfolding, and at this time it is discovered that there is another domain in Glacier Erosion.
