

## A God 691

### [Chapter 691: Lei Yi Devil: Surprised or not?](#)

In the dark ancient hall, only the nine crystal \*\*\*\* inlaid above the hall emit a faint light, illuminating the entire hall.

When the mighty 302 powerful men flew into the hall, Duan Donghe was already sitting on the throne on the hall, looking down below with a smile: "Since you have passed through the front corridor and arrived here, you can begin to contact the real Inheritance."

The 302 strong men who passed the screening of the Rhinoceros Bureau of the Corridor of Life and Death underneath all have different thoughts and are a little impatient. They are here for inheritance.

Even those strong with the first bottleneck and almost hopeless competition still think that once they come into contact with the inheritance information and find a way to transcend reincarnation, they will immediately explode, without giving Duan Donghe a chance to kill. Similar to Wang Yi's plan.

But Donghe on the throne didn't seem to see it, and continued: "Don't worry, it stands to reason that you can contact the inheritance, but... I still need to ask."

"Here," Wang Yi said inwardly.

He wasn't worried, because it had nothing to do with people like them.

Sure enough, Duan Donghe pointed at the seven strongest people in the universe.

That is, the structure of their small universe.

Confused the seven strongest in the universe.

But under Duandonghe's persecution, they couldn't do anything. They all tried their best, either making up or talking about trying to get through. Of course, in front of Dudonghe, these methods were not successful...Finally The strongest in the seven universes are all tragedy. Obviously Duan Donghe doesn't think they have the potential to accept their inheritance.

Even if it is eliminated, everyone can face it calmly. After all, this is not aimed at one party... but all the strongest in the universe are not qualified to enter.

But I never expected that the next words from Duan Donghe--

"You are not eligible to enter the seven of you." Duan Donghe sat on the throne and looked down.

"Except for the seven of you...All the candidates of the God Eye Clan are also not qualified to enter, and the God Eye Clan is also eligible to enter. It's all dying."

Suddenly there was a shock and an uproar.

"God Eye Clan?" Many strong people were shocked by mistakes.

What? "

"God Eye Race is not qualified to enter?"

"this....."

"Impossible!" The face of the master of the witches who belonged to the God Eye tribe changed drastically.

The line of God Eyes present includes the two strongest in the universe, a total of 28 candidates!

You are not even qualified to enter?

"Boom!" The Seventh God couldn't care about it, and immediately turned over and took out the Xeon's Supreme Treasure-Ice Cliff Castle. He himself immediately entered the Ice Cliff Castle, and at the same time let the other members of the God Eyes come in and questioned angrily. .

"Master Duandonghe, why is my God Eye Clan not qualified to enter, and even all of them are dying? Why are they treated differently?"

The other candidates were also uneasy and puzzled.

Yes, why did you specifically target the God Eye Race?

Wang Yi looked on coldly, but he knew in his heart that this was the unlucky luck of the Shenyan clan who had left behind the siege of Kong Luo.

Duan Donghe sat on the throne, overlooking below: "This... is a request of a friend of mine. I owe him, so I naturally agreed to him."

The second God's voice also sounded: "Duandonghe, who is your friend? Who is going to destroy my God-Eye clan?" They really want to know which \*\*\*\* made their God-Eye clan fall into such a terrible place.

"Don't worry." Duandong River looked down below, "I will let you know."

Then he pointed away.

Wow! One side wall of the hall suddenly split to both sides, revealing a passage.

All the strong guys on the scene looked around and were very curious about who it was that caused the God Eye Race to fall into such a situation.

From that passage, I saw a vague figure slowly coming out. He had golden scale armor... Standing upright, resembling a human form, with a pair of golden wings on the back, and nine pairs of eyes shooting over. No one dared to fight him. Look straight.

"Is it him?" The candidate who recognized the strong man who appeared has already exclaimed, "Thundercloth Demon God?"

Leiyi Demon God, the strongest person in the lonely universe in the second reincarnation era, can only be regarded as ordinary among the strongest in the universe...because he does not have the strongest treasure at all, and his fame and fame "Leiyi" is similar to the mad demon's slayer armor This kind of treasure is nothing. He is a very low-key person in the universe.

The subsequent development is just like the original history. In order to win the strongest treasure, the seven Allahs joined forces to besiege the Thunder Demon God and Kong Luo. Kong Luo finally fell, and the Thunder Demon God escaped, and has since become very low-key. , Did not dare to provoke the God Eye Clan, but the hatred of the fallen friend was buried deep in my heart.

Until one day the Thunder Demon God discovered the tomb boat that had just appeared in the core of the cosmic boat, but he couldn't accept the inheritance. That's why I made a deal with Duan Donghe. The two hit it off.

The Leiyi Demon wants to avenge the God Eyes, and Duandonghe needs to attract other powerhouses from the Universe Sea to select a descendant, and each has his own needs.

Thus, the scene of killing the God Eyes at the moment appeared.

The God Eye tribe who learned the whole story was so bitter that their teeth were crushed.

They didn't expect that the only big plan of the God Eye Clan to detach from reincarnation would be destroyed by such a strong man who didn't care about it before.

Of course, this plan is not foolproof. The Demon God of Thunder is also betting. In case the God Eyes are ranked first in the contention, Duan Donghe definitely will not allow the loss of such a potential candidate, and he will die at that time, too. To drag them on the road together.

However, fortunately, everything is proceeding as expected by the Thunder Demon God!

"This God Eye Clan has offended the Demon God of Thunder Clothes, and it is considered \*\*\*\* bad for eight lifetimes." Many powerful people secretly said. There are sympathetic, gloating, joking... But no matter what, they are very happy to see the god-eye tribe being eliminated~[www.mtlnovel.com](http://www.mtlnovel.com)~ the god-eye tribe is eliminated, and there are few people competing with them for inheritance. .

In the hall.

"Master Duandonghe, I hold this grudge in my heart for too long, and finally speak it out." Leiyi Demon smiled, and smiled relaxedly, "Master Duandonghe, you can do it against them."

The other strong guys felt tight. Kill? The God Eyes have already hid in the supreme treasure palace, what will Dudonghe do?

"It's dying to struggle." Duan Donghe shook his head.

In the gaze of other strong men, the Donghe River pointed at a distance. Numerous golden threads in the main hall condensed in mid-air and bound the ice cliff, and then the ground suddenly split, dividing a deep abyss, and there was a faint in the abyss. The terrible breath of stocks escaped outward.

Despite the frenzied struggle of the Ice Cliff Castle and the roar of the Second and Seventh God inside, it was still dragged directly by countless golden threads and plunged into the terrible abyss.

Snapped! The separated ground instantly closed and closed, and everything returned to tranquility.

"Xeon Treasure?" Duan Donghe sneered, "Funny! In my hometown, there is no such thing as Xeon Treasure."

The strong on the scene watched with trembling, and the scene was silent.

#### [Chapter 692: quit](#)

Seeing the abyss into which the Ice Cliff Fort was dragged, Wang Yi knew that everyone in the God Eye tribe would undoubtedly die.

Since the God Eyes were eliminated, there were only 274 candidates left, which made them feel a little heavy. Some rabbits feel sad.

"The God Eye Race is in danger."

"Hiding in the Supreme Palace, there should be nothing wrong with it, right?"

"You haven't heard what Donghe said, that the ancient civilization didn't have the strongest treasure?"

"This time the God Eye Race is afraid that they will have a big somersault."

When they guessed the strength of the ancient civilization, "Wow..." The ground in the hall cracked again, and it was the location where it had cracked before that exudes a terrifying aura.

call out! call out! call out! Three streamers flew out and hovered in front of the Thunder Clothes Demon God. They were all the treasures left by the strong God Eye tribe who fell in the abyss. Among them were the two God's supreme treasures and a special soul supreme treasure.

More than two hundred powerhouses watched with breathlessness, and their hearts trembled. Since these three treasures appeared, it meant that the God Eye Clan was finished.

"Mrs....."

"This, this is simply..."

"That ancient civilization is terrible."

The horror of the Broken East River frightened them.

Afterwards, Duan Donghe gave these three treasures to the Demon God of Thunder in the envious eyes of other people in the hall, which was regarded as a reward for him for helping him.

Leiyi Demon God immediately recognized two of the lord, and his strength greatly increased. The last "True God Realm" did not meet the conditions, so he still needed some training before he could recognize the lord.

"The God Eye Race will suffer."

"The hatred is so deep, how can Leiyi Demon God's strength let go of the Divine Eye Race." The other 200 strong people all sighed secretly.

But this is not what they care about.

When the Leiyi Demon God's matter was over, Duan Donghe said to the other candidates: "You are about to start contacting the inheritance. Once you contact the inheritance, the loser will die, and the

soul will be annihilated, and many clones will perish. One of my lines , You must have a soul to cultivate, so the ones I choose are souls...Naturally, there are also means to deal with souls."

In fact, everyone knows well. There are more than two hundred strong players present. Luo Feng and Bi Xue, who broke through the third bottleneck, have the highest hopes, followed by the 6 who broke through the second bottleneck...As for the first bottleneck, hope is too slim to be counted on. They just make up the number.

That is to say, there is no choice now, if it is placed in the past, there will be no chance for people to connect and touch the real inheritance.

"Now Lei Yi, and the other five strongest people in the universe...I will let them go."

"If you decide to give up, make a quick decision."

"This is your last chance!"

The sound of Duandong River echoed in the hall, and there was silence in the hall.

"I quit!"

"I quit!"

"I quit!"

Some strong people finally chose to quit.

Among them is the master of Peng Gong.

He looked at Wang Yi, Wang Yi understood what he meant, and said, "Don't worry... if things can't be violated, I will choose to explode this divine body before the last moment."

Wang Yi has a clone, even if one loses one, it doesn't matter.

The master of Peng Gong was relieved now.

But of course Wang Yi would not bring the Xeon Arc to come in. Instead, he would let the Yan Xing Giant Beast clone out and leave with the Xeon Arc.

All parties are swiftly making arrangements.

Basically, it is to let the strong who hope greater to take risks and bring back the precious treasures. In short, there are constantly strong people withdrawing from the hall.

In the end, there were 238 strong people left in the hall.

Virtual universe.

"We human beings have all withdrawn, and only Luo Feng and Wang Yi are left," said the giant axe.

"Wang Yi said that if there is no hope, he will blow himself up in advance."

"This time, it's up to them."

Other Lords of the human universe, such as the Lord of the Blue East, the Lord of Dragon Walk, and the Lord of Desolate Jian, all fell into silence.

The inheritance of Broken East River is a great opportunity for every force in the universe, and it is an opportunity to transcend reincarnation. No force is willing to give up, and it will definitely fight to the end.

It's a pity that their strength is limited and they can't help much. Now they can only count on Luo Feng and Wang Yi, the two rising stars.

The inheritance of the Tomb Ship of the Universe Sea from breaking the East River has already been spread among the top leaders of all parties. After all, the selection is not only the Lords and Venerables of the universe, but also a large number of immortals, plus there is no confidentiality, many strong people know.

Of course Puti, the big disciple who is acting as a "Tipu" in the human race, also knows it.

So Zuoshanke also knew.

In the cosmic sea, in the depths of the endless chaotic air currents, and in the depths of the "Northern China Snow and Lantern Domain", the dangerous place, a lonely palace exuding bursts of blue light is suspended by the endless air currents.

"Inheritance of Broken East River..."

On the throne, a majestic old man with a height of more than 90,000 kilometers was sitting, mumbling. Suddenly smiled.

"Duandonghe... Wu..." He sighed a little. "Wu... how long hasn't heard it?"

"Duandonghe can be regarded as a powerful inheritance of ancient civilization. There have been strong men who stood at the peak of ancient civilization. Unfortunately, bad luck, and destroyed together with ancient civilization Wu..."

"My little apprentice, the luck is pretty good, and he can actually encounter the line of Duandonghe." The mountain guest became interested, "I am still breaking through the third bottleneck in the Rhinoceros Bureau, which is a bit unexpected. It seems This time I have a good chance to win this inheritance."

"Congratulations, teacher, teacher Hexi." A strong human "snake man" with a snake-tailed human body was waiting in the hall, and he said at this moment.

Sitting on the mountain, the guest smiled, glanced at the apprentice, and shook his head.

"Congratulations? Even if the inheritance is obtained, it will belong to your junior brother. What does it have to do with me."

Putilian said: "With his junior brother as a person, how can he hide the teacher if he has inherited it?"

"You don't understand." Sitting Mountain Kee stood up and walked down the Throne Staircase. "Then the East River is broken, but it is also considered powerful in ancient civilization~[www.mtlnovel.com](http://www.mtlnovel.com)~ is

extremely old. How can such a force not have the means to prevent the leakage of inherited information?"

"So even if Luo Feng wants to pass on the message to me, I'm afraid he can't do it."

Puti was stunned. I also feel that the words of a mountain guest are justified.

The forces of ancient civilizations could indeed do this, or perhaps they must do so.

But looking at the expression on the mountain guest, he was very happy, not disappointed at all.

The mountain guest is indeed very happy at the moment.

"Luo Feng, it's up to you." There was expectation in the eyes of Zuo Shan Ke. "Whether you can get the inheritance of the Broken East River is related to your future achievements. Work hard, little guy, don't let me down."

...

The hatch of the ship of the tomb has been closed.

In the hall, six of the strongest in the universe (including Leiyi), all the masters of the universe, a very small number of cosmic elders, and immortal gods have all left, and 238 strong are left, all of them have made up their minds.

Would rather die! Be sure to return part of the message back!

"You wait, there is no way back." Duan Donghe stood up, "It is destined that only one can accept my Duan Donghe inheritance, and follow me."

The corner of Wang Yi's mouth is not easily noticed, is it finally coming?

[Chapter 693: Duandonghe 1 line of inheritance space](#)

"boom....."

The Throne of the Broken East River and the rock wall behind the throne suddenly split, and the sound of countless waterfalls and fragrances of flowers passed, and there were even some faintly singing birds and roaring sounds of strange animals.

It is a vast independent space.

The eyes of the 238 powerhouses who stayed on the scene became fierce.

Broken East River heritage!

Wang Yi was also embarrassed.

In fact, there are 238 people present, and 237 are destined to die!

And the ones with the greatest hope of alive are Luo Feng and Venerable Jade Blood. As for the other powerhouses, they all come to take risks, especially those who break through the first bottleneck are almost equal to die.

Each ethnic group can rise and gain a foothold in its own reincarnation era.

It's all because the strong ethnic group is willing to stand up at the critical moment!

In fact, the strong have climbed up from the bottom step by step, and after countless lives and deaths, they have long regarded death very lightly, just to know whether death is worthwhile.

For the race...For the race to surpass the eternal existence of reincarnation, death is also worth it!

"I would rather die than find a way to surpass reincarnation and give my clan a hope."

"The last hope, don't cut off the last hope of our clan."

Now all the external forces are looking forward to it, and the burden of the ethnic groups is weighing on the candidates. Since they have decided to contact the inheritance, it is tantamount to "almost no life".

After all, the people who hope the most are Luo Feng and Venerable Jade Blood. Almost all the other strong men will die. All they need to do is to send messages back as much as possible before they die.

This also makes each candidate very crazy. They are like people who are about to drown, knowing that there is little hope ahead, and they firmly grasp the only straw because this is their last hope.

No one is willing to annihilate themselves and their ethnic group in the long river of time.

But... only one person can inherit the inheritance, which means that others will inevitably die.

It's sad, but also cruel, and this is reality.

"This is my inheritance space from the East River."

Duan Donghe looked at the space, his eyes faint, and said slowly.

"Almost all the strong people in the past have accepted the inheritance in the inheritance space, and I am the same."

"Now, it's your turn."

"follow me."

As the Duandonghe walked forward, the other strong men also followed with excitement.

The singing of birds and the roar of foreign animals, this is a world like a paradise of birds and flowers. From a distance, you can see some birds flying with their wings spreading like they show off their feathers, leaving some flaming rainbow light everywhere. Or some brilliant colored lights... and some strange beasts faintly appeared in some weeds in the distance, or the tip of an iceberg of strange beasts occasionally appeared in the lake farther away.

The Duandong River and the powerhouses are all suspended in the air, looking at the scenery here.

"This is where Duandonghe has accepted the inheritance of the past dynasties?" Wang Yi glanced away, and light flashed across his eyes.

Now that it's all here, what are you waiting for.

Wang Yi quietly put out a few more cards in his hand, and then they shattered silently and disappeared into light and dust.

Duan Donghe suddenly turned his head and glanced at him, his eyes seemed a little suspicious, but he didn't seem to notice anything, then turned his head, and continued to introduce the situation of Duan Donghe's inheritance space to those newcomers.

Said it is an introduction, it is better to say that it is nostalgia, nostalgia for the glory of breaking the Donghe line when the "predecessor" was still alive.

And Wang Yi quietly breathed a sigh of relief in his heart. This is the space of Duan Donghe's inheritance, and it is absolutely controlled by Duan Donghe, and his little actions are absolutely impossible to hide under Duan Donghe's nose. Wang Yi could only bet that Donghe would not care about it.

In fact, although Duan Donghe discovered Wang Yi's small movements, he found nothing... Since it didn't cause any impact, he ignored it.

And Wang Yi also had an additional reminder before his eyes.

[You have used a normal chance card, a bronze chance card, a silver chance card, a gold chance card, and the next 92% chance to sign in here is the highest reward. ]

Wang Yi couldn't help getting excited.

He got the chance card for so long, and finally got it into practice and came in handy.

When Wang Yi's strength gets stronger and stronger, the rewards for him to be able to play a major role are getting less and less. Of course, good steel has to be used on the knife edge, so the chance card has never been useful.

But now, at the right time, the inheritance of the Donghe River still has this value.

In fact, the highest rewards of the Three Jedi were not low, but he couldn't enter the core place, just as he couldn't enter the original universe. I'm afraid I can't even say that the existence of the holy.

Therefore, Wang Yi has been waiting for the opportunity.

Moreover, Wang Yi also has a 100% diamond chance card, which can be kept for future use.

"92% chance..." Wang Yi took a deep breath. "Hope not to let me down."

Wang Yi was slightly nervous.

The 92% chance... does not mean foolproof. If he fails, he must be depressed to death.

"It must be successful."

Wang Yi secretly looked forward to it.

At this time, everyone was immersed in the excitement of coming to the space of the Duan Donghe inheritance and Du Donghe's narration. No one noticed Wang Yi's performance, even Luo Feng did not.

Duandonghe may have noticed something abnormal, but he is too confident in the inheritance space of Duandonghe. Since Wang Yi hasn't caused any impact, he doesn't care.

"Son, it's up to you."

Wang Yi shouted in his heart.

"Sign in!"

[Ding, congratulations to the host for signing in successfully, and rewarding 'Dangdonghe Inheritance Space'. ]

[The inheritance space of the Duandong River is carried in the tomb boat. ]

[This reward is the highest reward for the current location, and you can no longer get any rewards here. ]

['The Tomb of the Tomb' has been placed in the panel space. ]

【Number of check-ins available for this place: 0】

A series of prompts appeared on the interface of the front panel of Wang Yi's eyes, causing Wang Yi's blood to almost freeze.

Then...

"Ha ha!"

Wang Yi became excited.

It really succeeded!

And the excited Wang Yi's breath oscillated slightly ~[www.mtlnovel.com](http://www.mtlnovel.com)~ to let the powerful people floating around in the air discover.

"The Lord of Chaotic Source is too excited, right?"

"Who can be here, who is not excited, but seems to be so gaffe..."

"Really convinced."

The strong sneered in their hearts.

In fact, they were also very excited, but no one was like Wang Yi, whose breath couldn't be controlled, and they were ashamed in front of Duan Donghe.

Duan Donghe didn't care. When he wanted to come, how great his family inheritance was. It was normal for these little guys from the Universe Sea to be shocked.

He didn't expect that the inheritance of his family had been "stolen" by others.

Wang Yi didn't care about other people's opinions at all. Especially the view of the dead.

If you let them know, Wang Yi has got the complete inheritance of Duan Donghe...I don't know how.

Wang Yi breathed a sigh of relief. What he was most worried about before was not being able to get the highest reward for signing in. After all, this is not a 100% thing, but now the stone in his heart has finally fallen and is at ease.

Looking at the tomb boat lying quietly in the panel space, Wang Yi's mouth twitched, revealing a dragon king's smile.

With the panel in hand, I have the world.

#### [Chapter 694: 1 sign to get rich](#)

Now that he checked in and went out of Duandonghe inheritance, Wang Yi was relieved.

Even if Wang Yi falls here, as long as the human deity is recondensed in the outside world, the panel is attached to the human deity. The tomb boat is in the panel space, even if the divine body of Wang Yi explodes here, it will not be lost.

It can be said that it is foolproof.

"I'm taking my salary from the bottom of the pot, right? No, the true Donghe inheritance is still there. I just copied a copy." Wang Yi was in a happy mood. There is no such kind of person, and there are so many happy ordinary people. Arrived.

Other strong men are still working hard, gritted their teeth and fighting for the inheritance of the Donghe River, but he has already moved home secretly, and most importantly, no one has noticed.

Like being a thief, thieves are exciting!

"I don't know what is the difference between the Broken Donghe Inheritance and the real Broken Donghe Inheritance with panel rewards." Wang Yi was itchy in his heart. If it weren't for Broken Donghe, he couldn't help taking out the tomb boat. .

"It also comes with a tomb boat, which is not bad. It will be much more convenient to navigate the universe in the future."

Wang Yi felt happy, as if he had eaten a popsicle during the dog days.

This is a great treasure of the Broken East River heritage. It is like an ordinary person who gets the wealth of a planet and humiliates him by saying that he is rich and enemies.

This is the force that once stood at the pinnacle of the ancient civilization, and has appeared as a powerhouse at the level of the \*\*\*\* king, and it is of infinite value.

Although Wang Yi has the Tongtian Pagoda, the Tongtian Pagoda and the Duandong River have different inheritance meanings!

Just like the chaotic stele of the original universe and the secret methods like "The Secret of the Blood" and "The Seven Kills of the Gods"... One is the avenue of cultivation, which leads directly to the highest avenue, but there are many general ones, just pointing out Different roads, different powerhouses, can practice different secret methods, the most important thing is the talent and understanding!

And one is a detailed practice guide! Just practice step by step!

Of course, the Tongtian Pagoda is much less restricted. Unlike the Donghe heritage, the heritage information is obscured by the original universe, and some information beyond the level of the strongest in the universe cannot be transmitted at all!

In terms of value and future, Tongtian Pagoda is higher than the inheritance of Dongdong River, but the inheritance of Dongdong River is more effective for the present!

But no matter what, both of them can reach the peak of ancient civilization directly, it just depends on personal achievements.

Thinking of the secrets and treasures of the Duandong River Inheritance Space, Wang Yi almost couldn't hold back his saliva.

Luo Feng couldn't help touching Wang Yi, and asked him what's wrong with his eyes.

Wang Yi wiped the corners of his mouth subconsciously, and then looked back and said that he was fine.

Luo Feng, my goal has been achieved, and it's up to you next.

Luo Feng didn't understand the look in Wang Yi's eyes, he just thought this partner was weird.

Wang Yi's mood slowly calmed down.

The inheritance of the Broken East River is a huge and incomparable wealth, which can quickly improve Wang Yi's strength.

Among other things, the fascination that cuts off the East River, even in the continent of origin, is a terrifying secret method of burning divine power, which can increase Wang Yi by one or two levels, and the treasure of Yuan embryo can increase Wang Yi by another level. Wang Yi again created the seventh-order secret method, the eighth-order secret method... his strength will immediately stand at the pinnacle of the universe!

However, Wang Yi's current law perception can already create the sixth-order top secret method, which is very close to the seventh-order.

It's more than that!

For example, Wang Yi's secret method is at the top of Tier 6, as long as he learns to cut off the East River and knows the secret technique of first burning divine power... Normally, the top combat power of Tier 7 can be exploded!

Well, even in ancient civilizations, the Secret Art of Burning Divine Power is a very strong existence to create.

Before Wang Yi created the sixth-order top secret method, inspiring the Xeon's most treasured weapons, and also allowed the attack to reach the seventh-order top level! Coupled with a strongest treasure, it is barely comparable to the eighth rank.

Although it is very incredible that a master of the universe can reach the eighth rank, it is even more than some of the strongest in the universe. It is necessary to know that some of the strongest in the universe who do not have the strongest treasures have only the seventh rank!

But it's not the same to get the inheritance of the Broken East River!

Except for the secret technique and the original embryo! Don't forget that Wang Yi also has a panel!

This is Wang Yi's greatest support!

"The panel, but it has an exchange function!" Wang Yi felt excited and trembling uncontrollably.

"The random treasures in the Duandonghe Inheritance Space are probably far more than the Xeon Treasures..."

How powerful is the Broken East River? Far beyond the imagination of the universe and sea forces.

Even in ancient civilizations, they are extremely powerful.

And Wang Yi remembers that there is no treasure in the inheritance space of Duandonghe, because it is useless to Duandonghe, but there are hundreds of special treasures!

These treasures...have a special name in ancient civilization-Yuan embryo!

Yuan, has a very respectable meaning in ancient civilizations, but all treasures with this word are the most top-notch.

Embryo means embryo.

It is not easy to make any piece of Yuan embryo, and the little bit of material that is used to make is far more valuable than Xeon Zhibao.

How many treasure points can be exchanged for a piece of Yuan embryo to the panel?

That is a number that Wang Yi can't imagine.

Astronomical wealth!

No wonder Wang Yi was excited.

Of course, Wang Yi faintly guessed that the panel might have some restrictions on this.

It's like the master level of his universe can only redeem the true god's treasure.

And can such a tall treasure of Yuanpi be accepted by the panel? Before the actual operation, Wang Yi was not sure.

He can only bet that Yuanpi is special!

Because it is really different, the Yuan embryo is a special treasure that is not completely formed... even Immortality can start to be used!

If it can be exchanged, Wang Yi will make a lot of money!

Of course, there are two prerequisites for this. One is that he can take the Yuan embryo from the inheritance space at will, not restricted like Luo Feng, but Wang Yi is confident about this. After all, this is rewarded by the panel and should be completely under your control!

Of course, certain information higher than the strongest person in the original universe still cannot be leaked.

But like the secret technique of divine power burning, it should be able to be taught.

And Luo Feng couldn't do this. After all, his soul was constrained by the Broken East River! He cannot pass on these core knowledge to others!

But Wang Yi is different~[www.mtlnovel.com](http://www.mtlnovel.com)~ he can pass it on to others at will, which is much cooler! Of course, Luo Feng would also doubt it! Why would Wang Yi also cut off Donghe's inheritance?

But when Wang Yi finds any reason to block him, even if Luo Feng suspects it, this is a great thing for the entire human race!

Even if Luo Feng doubted it, it wouldn't be a problem. He was the only descendant in the line of Duan Donghe.

Why is Wang Yi so persistent to exchange the extremely precious Yuan Embryo?

He stared at the exchange list on the panel.

The machinery of the True God level above is the treasure of the flow.

At least tens of millions of treasure points!

There are various types, there are flying, defense, assistance, dodge improvement, attack enhancement... and so on.

For example, a mechanical flow treasure is a boxing set, which mainly has a very strong attack, which can completely increase the attack by three levels! In other words, Wang Yi, who was originally a Tier 7 attack power, could rely on it to erupt to a Tier 10 attack level.

Coupled with the secret technique of burning divine power, Wang Yi's combat power directly broke through the ceiling of the universe! This is why Wang Yi wants to exchange treasures for the most precious points.

#### [Chapter 695: Can't let human beings inherit!](#)

"Wang Yi clearly broke through the fourth bottleneck, but did not say!"

The original ancestor is still thinking about the virtual universe.

"Duandonghe inheritance, obviously he can get it at his fingertips, but don't want it, why did he hide it?"

The original ancestor was puzzled.

"No wonder it's because of Tongtian Tower?"

The original ancestor can only guess like this.

Even if it was discovered, the original ancestor did not say anything. It's useless to say it at this time.

"Wang Yi is so hiding, there must be his reason."

"Pity....."

The original ancestor did not expect that Wang Yi's potential was so great, which shocked him.

"If Wang Yi had chosen to hide his strength before the Rhinoceros Bureau, would he also deliberately give up on breaking the Donghe inheritance?" the original ancestor thought.

The virtual universe covers the entire primitive universe, and there are very few things that the original ancestors did not know.

But Tongtian Tower is one.

There are also many secrets in Wang Yi, which the original ancestors can't see through.

"Wang Yi, what are your plans?" The original ancestor was in a complicated mood.

Obviously, the emergence of a peerless figure in the ethnic group can revitalize the future of the ethnic group, but it is not so worrying.

In this regard, the Lord of the Star Prison expressed that there is a common language.

...

The three great reincarnation eras of the universe and the two holy places all pin their hopes on the candidates of their forces.

It is up to them to win the Duan Donghe heritage.

And the loss of the inheritance qualification, the loss of the two gods of the race, the two most powerful and precious God Eye races are heartbroken at this moment.

They have no hatred for Duandonghe, but they hate the Thunder Demon God who caused all this.

This loss was too heavy, and the God Eyes couldn't bear it.

"Boom!"

An earth-shattering roar erupted from the hatch of the Tomb Ship.

As soon as the Leiyi Demon God came out, he was besieged by the five Allahs of the God Eye Clan.

They want revenge!

But the current Thunder Demon God, but with Ice Cliff Castle, it is too difficult to kill him.

What's more, the Seven Allahs of the God Eye Clan originally had a joint battle method. Now there are two missing...Then even if the remaining five combined attacks, the power is greatly reduced.

"Damn it!" The eyes of each God were cold and red, desperately attacking the Demon God of Thunder Clothes.

The majestic eternal true \*\*\*\* appeared, but his eyes were larger than the boat of the tomb tens of billions of kilometers long, and the mighty breath swept the entire Black Marsh.

"The Demon God of Thunder Cloak, the hateful Demon God of Thunder Cloak! To destroy the hope of my God Eyes, I should kill you at all costs in the first place!"

The roar of God Eye Race God shook the void, and the hatred in it could be heard clearly by other cosmic sea experts in the distance.

The God Eyes were too arrogant and domineering before, and they were happily watching the show.

"The poor God Eye Clan, who had a chance to win the inheritance and transcend the reincarnation, is gone now."

"If it's me, hate it too."

"But Leiyi Demon God does such a thing, it's strange that the God Eyes don't die with him."

"Hahaha....."

From the eternal true god, the thundercloth demon god's cheerful laughter resounded through the wild.

"God Eye Race! Deserve it!"

"You killed my best friend, humiliated me, chased me, and made me so embarrassed... In those days, I thought that you must make your God Eyes pay the price! A miserable price!"

The grievances are avenged, and hundreds of millions of years of stubbornness are finally exasperated today. How happy the Thunder Demon God is at this moment!

"What I want is what you hate. The more you hate me, the happier and happier I will be." Leiyi Demon snorted, "I have no ethnic group in this life. Regret for what you have done makes you miserable and even annihilated!"

"Come on, kill me, you can't kill me, you are my grandson!"

The madness of the Leiyi Demon made the strong men around him look at each other and secretly startled.

The enmity between the two has reached the point where they cannot coexist.

The Leiyi Demon God is crazy, and the five Allahs of the God Eyes are also crazy.

The world was broken near the ship of the tomb.

Leiyi Demon God is obviously not the enemy of the five Allahs united, being crushed and beaten, but with Ice Cliff Castle, it is impossible for the Five Allahs to kill him.

What the god-eye clan powerhouse wants to do now is to intercept the Thundercloth Demon God, then suppress him and seal him! As long as he is brought back to the small universe, there is still a solution.

But Leiyi Demon God is not stupid, how could it be possible for the God Eyes to do their best.

One party ran away from the other party, and soon moved away from the boat of the tomb and disappeared at the end of the sky.

"God Eye Clan, there will be no peace in the future."

The Great Axe stood with the Lord of Chaos City and the Lord of Peng Gong, and said with emotion.

"The God Eye Clan is also self-sufficient, if it weren't for them to think that they are like the two holy places, and act too arrogantly, how can they come to this." Chaos City Lord said indifferently. "It doesn't matter if you seize the Xeon Supreme Treasure. At the beginning, Kong Luo and them had no grudges, but just to promote the reputation of the God Eye Clan, he pained the killer and besieged Kong Luo, which is considered to be blamed."

The most terrifying person in the universe who has no bottom line, no ethnic burden, and no scruples about how terrifying is, just look at today's Leiyi Demon God.

Except for the five Allahs of the God Eye Clan, other universe lords should be careful when they come out and make troubles, and don't be found by the Thunder Demon God.

The worst thing is that the God Eye Race Gods don't necessarily have any way to take the Thunder Demon God.

Other forces in the Universe Sea also discovered that the Chaos City Lord broke through to the strongest in the universe.

"The human race in the primitive universe has one more cosmic strongest."

The most shocking thing is the many forces in the primitive universe!

"Chaos City Lord has become the strongest in the universe!"

"Damn it! The human race is strong again!"

"The giant axe is terrible enough, how long will it be for a Chaos City Lord now..."

"Don't forget, the human race and the two peerless geniuses, Luo Feng and Wang Yi, are fighting for the inheritance of the East River in the Tomb Boat. If they win the inheritance, mankind will become the number one power in the primitive universe! Maybe the future It has become the third holy land in the universe!"

Many forces in the universe are shocked.

This is not impossible.

The most uncomfortable is the five pinnacle races of the primitive universe.

Especially the Zerg, Monster, and Machine races, who have always had a deep hatred with the human race, are even more unacceptable.

"What to do? If humans really win the inheritance, there are Great Axe and Chaos City Lord at ~[www.mtlnovel.com](http://www.mtlnovel.com)~ We can't do anything with humans!"

"Human beings are too powerful, we must find a way, we can't go on like this, otherwise we will just wait and die!"

"Yes! Even if mankind wins the inheritance, so many forces in the universe are watching, it's not our business."

"Everything we can do, even if we can't get the inheritance, we won't let humans get it!"

The five peak races of the primitive universe, and the six strongest in the universe, quickly reached a common voice.

They even secretly unite with the strongest players in other universes in the original universe, such as the ancestor of the star behemoth of the Star Behemoth Alliance, the ancestor of the monster beast of the Demon Race, the general leader of the Northern Frontier Alliance, etc...

In short, human beings must not be inherited and brought back!

They couldn't imagine what the human race inherited from the ancient civilization of the East River would continue to be strong.

Does their race still have room for survival in the primitive universe?

And more than one thought with them.

The Holy Land of the East Emperor, the Holy Land of the Purple Moon, the first and second reincarnation times may have different ideas, but the goals are the same, and they are all inherited from the East River.

A pack of wolves are waiting.

Storm is coming.

[Chapter 696: choose](#)

In the inheritance space of Broken East River, in the vast wasteland, light gates have risen, and each light gate has some pictures and shadows. If you look at that picture and shadow carefully... you can vaguely see a strong man is controlling it. With thousands of golden lights, attacking the distant scene.

While watching other images, you can see other pictures.

Duan Donghe said to the 238 strong men who entered the space of inheritance: "I am a descendant of Donghe from generations to generations. There are close combat, long-range attacks, weapons refining, and machinery control... almost tolerant of my hometown. Almost all categories."

"There are 820 entrances in the distance, and you can get different basic inheritance after entering."

"According to the performance of the Rhinoceros Bureau, Yinhe will choose first, and Bixue will choose second... in turn."

Seeing the turmoil of those candidates, Duan Donghe sneered: "This is just a basic inheritance to verify whether you are suitable for me to break the Donghe line. When the last inheritor is determined, the last inheritor, Qualifying for the true core inheritance is also the inheritance that each generation of Donghe is qualified to know."

Those strong men were slightly disappointed, but they also understood that Duan Donghe couldn't let them come into contact with the profound inheritance so easily.

"Let's choose." Duan Donghe directly ordered, looking at Luo Feng, "Yinhe, you choose."

"Yes, Lord Duandonghe."

Luo Feng bowed slightly, then turned into a bright streamer, across the sky, and approached 820 spaces in the distance.

Soon, Luo Feng had already chosen and stood at the entrance of the inheritance of the sword.

The second place is the blood of the East Emperor Holy Land.

The third is the Lord of Water Song.

...

Among the candidates this time, 2 Rhinoceros Games broke through the third bottleneck, 6 broke through the second bottleneck, and Wang Yi ranked 8th, which is the last of the second batch.

"The inheritance of the sword was chosen by Luo Feng." Wang Yi started to choose the one that suits him at the entrance of those suspended spaces, and kept thinking in his heart.

In fact, he has been inherited from the Donghe River. It is not important what category you choose to complete the goal this time.

After all, he is about to "blow up" soon.

But Wang Yi looked at one of the space entrances that emitted light. There were some pictures and shadows on that space entrance. Wang Yi couldn't help but move when he saw it.

"It seems to be... the soul illusion type?"

Originally, Wang Yi wanted to choose a remote attack at random, but when he saw the entrance to this soul foundation inheritance space, he couldn't help thinking.

Wang Yi was originally good at close combat, and then he was also proficient in mind weapons in his early years... But because of the rapid advancement of his soul and will, he became stronger and stronger. He also studied the soul kei of Mo Ji, the strongest man in the universe in the ancient times, and unknowingly his soul secrets. Ascending to new heights, they have created their own sixth-order soul secrets, which are more powerful than any cosmic master of the universe, even the Zerg mother emperor of the cosmic master can't compare to him.

From this point of view, Wang Yi is also considered a master of soul.

"Anyway, I have to stay for a while, just try it." Wang Yi smiled. "That's it."

Fortunately, like Wang Yi, the farther behind, the fewer space entrances to choose from. Some people have no choice but to grit their teeth and choose what they are not good at.

In a moment, everyone has chosen their own space entrance.

"All go in and start accepting the basic inheritance." Duan Donghe indifferently ordered, "until the inheritor decides... all other candidates are lost."

"Yes."

More than 200 powerful men were very respectful, and then turned their heads and flew into the door of the radiant space.

...

Wang Yi flew into the gate of space, and time and space changed suddenly.

This is a chaotic world, surrounded by chaotic air currents below, and above it is a darkness, with only one star hanging, emitting light shining below.

"This is the place of inheritance? The basic inheritance lies in..."

Wang Yi stood floating above the endless chaotic air current, looking up at the only star in the dark.

"Wow!"

The stars in the center of the endless darkness in the high sky suddenly shot down a beam of light visible to the naked eye and directly enveloped them.

When the beam of light enveloped Wang Yi, a cold mechanical voice sounded.

"Core permissions-open the basic inheritance of core permissions."

boom.....

Suddenly a large amount of information flooded Wang Yi's mind frantically.

here we go.

Wang Yi closed his eyes and accepted the inherited knowledge.

A lot of very detailed soul illusion secrets are coming, starting from about the level of the sages of the universe and then gradually deepening the mystery of the soul illusion, to the level of the strongest in the universe!

The content is extremely mysterious and profound, and any one of them is comparable to or even surpassing the strongest secret method of Mo Ji, who once stood on the pinnacle of the universe.

A full 36 kinds of soul illusion canons were delivered to Wang Yi's mind in one go, and the amount of information in each canon was massive.

Even with Wang Yi's divine power and will, it took more than an hour to complete the transmission.

Wang Yi opened his eyes, shocked in his eyes.

"Great....."

"boom!"

At this moment, the bright stars in the dark sky suddenly shot out a brilliance, and there was a huge iceberg in that brilliance. Only a towering iceberg fell from the stars and then fell into the chaotic air current.

This iceberg is hundreds of millions of kilometers high, and it is crystal clear like a transparent crystal, and there are faint rays of light that look like meteors flying by again and again in the iceberg. Countless meteor rays intertwined with each other, naturally forming a beautiful picture.

"You have the core authority, so you can get 36 secret books left by the strong in the past for reference... You are the 8th candidate for this inheritance screening, so you can watch a magic mountain, which contains the 'spiritual magical law'. The pattern'...the pattern of law contains the ultimate power~www.mtlnovel.com~ reveals all the ultimate mysteries, you look at the iceberg, and use 36 secrets of soul illusion as a reference to create a new set of Secret method... When your secret method meets the requirements, you will be a new inheritor of the Duandonghe line."

After the cold mechanical voice finished speaking, he fell into silence.

Wang Yi looked at the majestic and magnificent crystal iceberg in front of him, thinking in his heart.

If he was not mistaken, the person who broke through the second bottleneck should have 36 sets of secret codes for reference, which can be watched by an iceberg.

And the first candidate like Luo Feng is 360 sets of Secrets, and three icebergs to watch.

The worst thing is to break through the first bottleneck, there is no set of secret codes, just an iceberg!

"Duan Donghe, he clearly selected the most outstanding descendants, but with such a big difference in treatment, it clearly does not give the latecomers a chance." Wang Yi shook his head. Looking at the iceberg in front of him, he smiled.

"I will play with you while I have some time now."

"After 10 years of comprehension, you can get away."

Wang Yi sat down slowly, preparing to comprehend this so-called soul illusion iceberg containing the ultimate mystery.

And the candidates in other inheritance places in the inheritance space also began to race against time to comprehend.

#### [Chapter 697: Soul illusion, 7th-order secret](#)

When Wang Yi began to comprehend the pattern of laws in the iceberg and was ready to study it, in other places of inheritance in the inheritance space, each candidate also began to understand.

It's just that, as Wang Yi expected, the conditions are very different.

Another place of inheritance. Chaos air currents. Luo Feng is still receiving inheritance information, because he broke through the third bottleneck and was rated as the first candidate...So the treatment he gave is 360 secret inheritance information, and the mass inheritance information will not be received in a short time. It can be over.

As for the candidates who broke through the second bottleneck, as well as those who did not provide a reference to the secret code, they all began to comprehend the iceberg in front of them bitterly.

"I am the Lord of the universe, and Luo Feng is recognized as the strongest secret method in the universe created by the Venerable. I don't know whether I created the strongest secret method in the universe or the seventh-order secret method?" Wang Yi secretly asked.

It is already difficult for the Lord of the universe to create the secret method of the strongest in the universe, and it is a miracle to create the seventh-order secret method.

In terms of basic rules, from the top of the fifth to the sixth is a threshold, to the seventh is a super threshold, and to the eighth is a threshold that is against the sky. Those who can create the eighth rank, in the ancient civilization, as long as they are alive, all of them are at least saintly existences.

Wang Yi is now able to create a sixth-order top secret method.

The sixth-order top secret method can only be regarded as the primary level of the true god.

The seventh-tier top is considered the middle of the true god.

The eighth-level top is considered the true \*\*\*\* high.

The original axe created by the creator of the giant axe is this state, and then relying on the strongest treasure to be able to perform the ninth-level top attack.

The ninth-level top secret method is considered the limit of true god!

Of course, with Xeon Supreme Treasure, it can also exert a higher level of power, like Jie Fanzi.

Ten-level top... Super figures in the true gods can generally be achieved with the help of Xeons. Of course, some existences against the sky are not counted, they are like the original ancestors! Mo Ji is at this level! As long as they don't turn a corner, they are very likely to pass through reincarnation and become the true gods of the void.

"Duandonghe in the past, there were only two eighth-order attacking secrets created at the master stage of the universe, and most of the others were at the top level of the seventh. Just create an eighth-order secret method!" Wang Yi secretly said in his heart.

"I give myself 10 years. Even if I have tens of thousands of times to accelerate, it will be 10 epochs. Can I create a seventh-order secret technique in such a short period of time with 36 secret tones and an iceberg in front of me?" Wang Yi also felt. A trace of pressure and long-lost excitement.

If it can be done, it proves that he is now on a par with Duan Donghe in the past. Even more than most of them.

Those Duandonghe have plenty of time and the innumerable precious resources provided by the powerful Duandonghe inheritance to study the secrets, not as embarrassed as Wang Yi.

The strong have a heart not to admit defeat, and Wang Yi is no exception.

The more difficult and full of challenges, the greater Wang Yi's energy.

Wang Yi looked at the iceberg in front of him. In this majestic crystal clear iceberg, there are countless dazzling lights that look like meteor rays. Any Xeon's secret pattern will be eclipsed in front of it. It

seems that every beam of that meteor is as beautiful as the rays of light. To the enchanting pattern of the law... all contain endless mysteries.

"It's very similar to the secret pattern of the Tongtian Tower...that kind of charm..." Wang Yi was gradually attracted.

The secret pattern of the Tongtian Pagoda contains the ultimate power, which makes people feel that it surpasses any kind of law and contains any kind of law. It is somewhat similar to the iceberg in front of him. Because I am familiar with the secret pattern of the Tongtian Pagoda, it has been engraved into the soul, so see When he came to the iceberg in front of him, Wang Yi suddenly discovered that the two have something in common. Perhaps studying the iceberg is not as difficult as he imagined.

His Tongtian Pagoda secret pattern has been comprehended to the sixth level, and the law has accumulated profound insights, and he is only one step away from breaking through.

In the training space of the Tongtian Pagoda, while comprehending the secret pattern of the Tongtian Pagoda and the sea of law, the place of inheritance, while studying the iceberg "law pattern", the two borrowed from each other and combined, so that Wang Yi's insight into the soul illusion art way advanced by leaps and bounds ,constantly improving.

"Haha, it turned out to be like this."

"This soul secret method can still be done like this."

"amazing."

Wang Yi was completely addicted to it.

Constantly researching 36 precious soul secrets, studying the patterns of law contained in the iceberg, and comprehending the secret patterns of the Tongtian Pagoda, the sea of laws, Wang Yi's high efficiency is terrifying, countless inspirations and insights collide and interweave in his mind, and discover new ones. the way.

The speed of progress is unimaginable.

In reality, only a year has passed, and Wang Yi, who originally created the sixth-order soul secret method, can already create the sixth-order top soul secret method.

However, Wang Yi was not in a hurry. He was not like the other candidates. He was completely isolated. If he couldn't become an inheritor, he would have to die. He had a retreat, so he was not afraid at all.

Let go of your hands and feet, and enjoy your comprehension.

This is just a challenge for him, even if it fails, it doesn't matter.

"Ten years...Can I break the limit again and create a seventh-order secret method in the way of soul?" Wang Yi's eyes were frantic.

Breaking the limit, breaking through the bottleneck, that kind of pleasure is addictive.

Luo Feng is struggling to comprehend! Other candidates are also doing their best and trying their best to comprehend!

No one wants to lose! That means failure and death!

On the vast wasteland, the Duandong River was suspended in the air, looking at the 238 closed gates, indicating that the 238 candidates are working hard in the inheritance. He murmured: "I don't know if I can choose one that suits me. A descendant of the Donghe line."

Time passed day by day.

In the Yanbing Region, outside the Tomb Ship, more and more powerful people gathered.

The five Allahs of the God Eye Clan returned here after failing to chase and kill the Thunder Demon God ~www.mtlnovel.com~. They were still unwilling to give up the inheritance of the Donghe River, and wanted to look for opportunities.

It is foreseeable that it is not easy to get away from the inheritance of the Broken East River, regardless of who it is.

And now, just wait for the results to come out.

Representing the opportunity of transcendence and reincarnation, the powerful Dongdong River inheritance, who will end up in the end?

Time passed quietly like flowing water.

Ten years will come in a blink of an eye.

Under the endless dark starry sky, on a chaotic air current, a red-armored black-haired man sitting awkwardly in front of a towering crystal iceberg, thinking in a trance, in his eyes faintly the birth of the universe, the scene of evolving all things emerges, and it seems that there are endless meteors flying in the light. , Compose a very profound mystery pattern.

The vast aura exuding around the man would be affected unknowingly even if the Lord of the universe approaches, and he would fall into an illusion without knowing it.

When everything evolves to the limit, a certain change occurs naturally.

A complete joy emerged from his heart.

"call....."

Wang Yi let out a sigh of relief, showing a bright smile.

The seventh floor of Tongtian Tower is completed.

The seventh-order 'universe illusion' of the soul secret method is successful.

[Chapter 698: boom! 1 sound is gone](#)

Although Wang Yi has successfully created the seventh-order soul secret method. But because he didn't take the initiative to show it, the place of inheritance did not find this freak.

"Ten years of success, the universe will be imaginary." Wang Yi was satisfied.

Although it has just entered the seventh-order secret method, it may be inferior to the most terrifying illusion flow in the primitive universe, the most powerful person in the universe... But for Wang Yi, it is a transcendence.

The achievement of his soul secret technique unexpectedly surpassed the sword technique that he had been majoring in all the time, which was a bit weird.

"Life is full of infinite possibilities." Wang Yi was a little sorrowful when he recalled his experience along the way.

"Well, this cosmic magical secret method, combined with the use of the Soul Xeon Supreme Treasure 'Mirage Bead', can increase its power again. It should be able to exert the power of Tier 8. It is not weak anymore."

The eighth order is not weak anymore.

This evaluation comes from Wang Yi, the master of the universe, but it is so natural.

The current Wang Yi has unknowingly grown to the point where he is truly the top power in the universe, and no one in the universe can move him.

The strongest people in the original universe who were originally aloof encountered him, and most of them were fleeing.

After all, Wang Yi has too many treasures on his body, armed to the extreme, perfect, without any weakness, smashing can make the strongest in the universe cry.

Not to mention, Wang Yi will also receive the wealth inherited from the entire Duandonghe after signing in. His strength will once again take a huge leap!

Wang Yi looked around and smiled lightly.

"The ten-year period has come, I should leave."

"boom!"

Without warning, Wang Yi's entire divine body suddenly exploded.

"Um!?"

Duan Donghe, who is always in control of this space, frowned suddenly.

"A candidate blew himself up?"

"Is that the source of human chaos in the primitive universe?"

A trace of puzzlement passed through Duan Donghe's eyes.

"why?"

"I actually chose to explode because I realized that the difficulty of comprehension is too high to create a secret method, complete the requirements, and worry about being killed by me, so I exploded in advance?"

Duan Donghe was dissatisfied in his heart, but he was helpless.

Although he controls the entire tomb boat, including the inheritance space, where he has vast magical powers, he can't ban candidates and prevent them from exploding.

And Duan Donghe never thought that someone would blow himself up, because in his estimation, the temptation of his family inheritance is so great, these little guys should have worked hard until the end, but he did not expect that there was such a strange thing as Wang Yi in the crowd. .

"Fortunately, it's just a candidate who breaks through the second bottleneck..." Duan Donghe was barely acceptable.

Like Luo Feng and Venerable Jade Blood, whom he valued most, they were there quietly comprehending the iceberg secrets, completely ignorant of what was happening outside.

In the flame ice region, in the black swamp ten thousand light-years from the ship of the tomb.

A black palace is rising and falling.

Wang Yi's two clones, the Yanxing Giant Beast clone and the Void Zerg clone are all here.

"Wow."

In just a short moment, the Yanxing Giant Beast split up a part of its divine power to form Wang Yi's human deity.

The divine body of Yanxing Giant Beast clone is tens of thousands of kilometers high, which is more than a thousand times the size of Wang Yi's divine body! Randomly separated some, allowing Wang Yi's human divine body to fully recover, and the original type of Xeon Supreme Treasure's divine power storage carried by the Yanxing Behemoth allowed the Yanxing Behemoth divine body to replenish as before.

Although the original Xeon Supreme Treasure can't directly improve the combat effectiveness, but the energy continues to provide divine power, so that the combat effectiveness is always maintained at the peak.

Some secret methods that require serious consumption of divine power can also be used without burden.

It can be said that with the original Xeon Treasure, Wang Yi's divine body is almost not worried about loss in the Universe Sea and will not be able to replenish it.

Xeon treasures like this kind of origin are very precious and rare.

"Haha, I'm back finally." Wang Yi's human body stood in the palace of Tongtian Tower, his expression flying high.

"That Duan Donghe probably wondered why I blew myself up?" Wang Yi smiled lightly.

The inheritance of the Donghe River is so powerful. It is also urgently needed for Wang Yi today.

If he didn't sign in through the panel to get the inheritance of Broken East River, Wang Yi would not be so open-minded to give up the opportunity to Luo Feng.

After all, the opportunity is everyone's. He and Luo Feng are good friends, but they are not good enough to give away such a huge benefit. At best, they will compensate some when the time comes.

And now that he has received another complete copy of the Broken East River Heritage, Wang Yi naturally doesn't have to grab Luo Feng's copy.

This was also Wang Yi's original plan.

"Um...Broken Donghe inheritance, it is estimated that when I take it out, Luo Feng will be dumbfounded." Wang Yi smiled as he looked at the black ancient ship in the panel space that was exactly the same as it appeared on the outside of the Flame Ice Territory.

Wang Yi was no longer polite, and his direct consciousness extended to the boat of the tomb and began to receive relevant information.

Generally, the panel will give a message for the items that are rewarded by signing in.

A large amount of information poured into his mind, and Wang Yi soon became clear about the situation of the Tomb Ship.

"That's it." Wang Yi raised his eyebrows slightly. "You can completely control the tomb boat by directly refining the tomb boat, and then enter the inheritance space to recognize the master inheritance space, and you can complete these two steps."

more importantly!

The message clearly mentions that in the East River Broken River heritage, messages that exceed the level of the strongest in the universe will be shielded by the original universe and cannot be displayed and passed to others, but secret methods such as the "Divine Power Burning Secret Art" can be taught.

Wang Yi can also use those treasures that break the East River at will!

This is Wang Yi's happiest thing.

"Sure enough! The panel rewards don't have the restrictions of actually breaking the East River!" Wang Yi frowned.

If it is a true Broken East River lineage, in order to prevent the core heritage from leaking out, the heirs who inherit the Diandong River lineage must swear an oath with the mark of inheritance integrated with the soul source before they recognize the space of the Lord's inheritance. This kind of oath is like A constraint, if the descendants want to reveal the core inheritance of the Duandonghe line, they will be dissipated.

"Soon, Luo Feng will be the heir of the Duandong River line. It should be called Duandonghe. Luofeng." Wang Yi said with emotion: "If I can inherit the Duandong River, then I should be called Duandonghe. Wang Yi?" He shook his head, "It doesn't sound good."

He only inherited the Duandong River, not inheriting the Duandong River, and did not have the responsibility to carry forward the Duandong River~www.mtlnovel.com~ Wang Yi immediately refined the tomb boat and then entered the tomb boat. , And then enter the inheritance space from the passage, recognize the master inheritance space, and the entire inheritance space is immediately owned by him.

Because this space of inheritance does not have the consciousness and restrictions left by "Duandonghe Wu", Wang Yi easily controls the entire space. The entire space has no secrets in his consciousness, and everything is clear.

"It turns out that this is the greatest secret and foundation of Duan Donghe in the past."

Standing on the top of an endlessly high mountain, Wang Yi overlooks the bottom, and can only see endless clouds and mist flowing around the mountain. This is the highest peak of the main space of inheritance space.

And Wang Yi could see that on the top of this mountain, a towering sculpture of a human figure stood not far away. It was also an existence in human form, with long hair scattered, a battle robe, and his eyes far away.

A seemingly ordinary sculpture, but when Wang Yi watched it for a few seconds, he faintly felt the "power" inherent in the sculpture. It was a kind of transcendence and uniqueness, even far more than Wang Yi understood. Vaillant.

"The third-generation Patriarch of Duandonghe." There was a trace of emotion in Wang Yi's eyes, "Duandonghe-Jueyi-Holy King."

#### [Chapter 699: Wealth of Broken East River](#)

Even in the entire ancient civilization, the line of Duandonghe is one of the strongest.

It was because of the emergence of a third-generation patriarch of Duandonghe who stood at the top.

To become the king of Origin Continent and to stand on the pinnacle of Origin Continent is also Wang Yi's goal now.

He still remembered the words of the cheap teacher.

If you stand at the pinnacle of the Origin Continent and break through the cage, you will still have a chance to meet your teacher, otherwise it may be difficult to see forever.

It is estimated that his cheap apprentice will be forgotten by then.

After all, such a superior powerhouse does what he wants, and accepts a named disciple at will. It is impossible to take it too seriously.

He doesn't even have the qualifications to break through the cage, this kind of disciple, "Ming" can't care too much.

Wang Yi doesn't mind, he is also in a high position now, and he also understands those super-existent ideas.

"The teacher said that he left me a gift at the top of the Tongtian Pagoda. I must stand on the top of the Origin Continent to get it. Maybe it has something to do with my breaking through the cage." Wang Yi had some expectations in his heart.

But don't think too far now, the most important thing at the moment is to turn the wealth inherited by the Donghe River into its own strength.

Strength is the most important thing.

Wang Yi didn't feel for long, and immediately became excited and couldn't wait to count the wealth of the inheritance space.

The inheritance space, with many functions, is a treasure created by the third generation patriarch of Duandonghe specifically for inheritance.

When Wang Yi thought, a door of space appeared directly in the void, and Wang Yi flew directly into the door of space. Appears in a small island, surrounded by endless lakes. On the island is an ordinary wooden house with a curved pond in front of the wooden house.

Wang Yi fixed his eyes and walked to the pond.

Considering himself the master space of inheritance, Wang Yi understood that this independent space is the most important one among the many spaces of inheritance space.

The pond area is not large, but three crystal-clear and smooth black stones have been floating above it.

As soon as Wang Yi grabbed it, the three black stones floating on the surface of the pond flew over and were caught by Wang Yi.

These three black stones are called the stone of memory and the stone of inheritance.

A large amount of memory information can be stored, even if a super strong person's large amount of memory information is all stored, it is very easy.

These three stones... can be called the root of the line of breaking the East River! It records the three most important faculties in the Duandonghe line. It is also the root of the strength of the Broken East River. Only in the past dynasties can learn.

Wang Yi also knew that there were tens of thousands of black stones at the bottom of the pond, and there were hundreds of millions of stones of memory distributed in the endless ocean around the island, all of which were collected by the Duandong River for countless years.

The three black pebbles in Wang Yi's hand are the foundation and the essence of the core heritage! It is the greatest contribution left by the three generations of Patriarch Duandonghe. Jueyi. Holy King to Duandonghe.

There are 1,202 stones of memory in the pond, which also belong to the core heritage.

However, it represents many genres, such as close combat, or long-range attack, illusion, treasure making, or machinery, etc.... The skills and cultivation methods contained therein are enough to make the universe crazy.

In the endless ocean, hundreds of millions of stones of memory are scattered randomly. The records are simple and basic, just like the basic inheritance that Wang Yi had previously accepted.

It's a super library!

In other words, it is simply a "template" left by the ancient civilization!

Wang Yi sighed with endless emotion. It can be seen that the strength of the Duandonghe line is indeed a superpower that once stood at the pinnacle of ancient civilization.

After feeling, Wang Yi directly wrapped the three memory stones with divine power. Wang Yi also has a heritage mark, but this heritage mark has been changed by the panel, and there is no need to be restrained by the Broken East River. There is much freedom. There is a mark of inheritance, the three memory stones will identify with Wang Yi, and then all the inheritance contained therein will be passed on to him.

I saw three black stones faintly shining, and ancient and complicated lines appeared on the surface, and then the surging information directly rushed into Wang Yi's mind.

A huge amount of information flooded into Wang Yi's mind. It took more than an hour before Wang Yi had accepted all of it. He opened his eyes and expressed satisfaction.

Three stones of memory, only three jerks!

The true essence of the core of the entire Duandonghe line is the three geniuses!

They are called "Broken", "East", and "River".

"Duan", whose full name is "Duan Mie", is a very special set of genocides, which can cause all the energy of the \*\*\*\* or the flesh to explode in a short period of time!

It also enables the strength to be hundreds of times, a thousand times, or even ten thousand times stronger in a short period of time...This set of unique skills, if simplified, is a bit similar to self-destruction, self-detonation is to make the whole body power burst in an instant.

But self-detonation, on the one hand, the energy attacks in all directions, and on the other hand, once the self-detonation, oneself will die.

And "Missing Off" is the core inheritance created by the third-generation patriarch of Duan Donghe, but it is completely different, allowing the strong to control the burning speed!

For example, burn the entire divine body in three seconds!

This power burst is stronger than normal, and it may be over after only one second of fighting, or it can stop the burning immediately!

And in battle, it can control the power to attack the opponent accurately.

So this is a set of heaven-defying geniuses that can completely kill the enemy by going beyond the ranks.

"East", whose full name is "Donghua", is a set of escape skills, once it is displayed, it can be transformed into a brilliance... It's so fast that it can easily penetrate the layers of space. Escape and learn.

"River", the full name is "Undead River", the purpose of this set of unique skills is to immortality! Like flesh and blood beings, becoming an immortal, cosmic sage, and master of the universe has begun to energize. can once break through and become the strongest in the universe...but it's back to the source!

Many clones are in one!

The divine body is also completely flesh and blood, and the true flesh and blood life, although it can still burn part of the flesh and blood into energy, it is still flesh and blood in essence.

Against the Lord of the Universe and even the strongest in the Universe, ordinary soul attacks can make the opponent die and can no longer die, but with the help of "Undead River", once you have cultivated to a certain level, part of your body can be completely separated.

For example, if you hide a drop of blood, even if all the clones of the deity are annihilated... But this drop of blood after special refining is safe and sound, and can even quickly absorb energy and spend some time to become the deity again!

This is immortality!

Three super geniuses!

"Broken Out" can break out super combat power in frontal fierce battles.

"Donghua" is incomparably against the sky when trying to escape.

Even if there is really no way to escape, with "Undead River" can rise again!

With these three faculties, although there is only one in any generation of Donghe, almost all of them have risen to become terrifying figures.

But now that these fascinating studies have all fallen into Wang Yi's hands, it can be foreseen that Wang Yi's future will become extremely terrifying.

[Chapter 700: Lose yourself! 100 million treasure points](#)

However, just as Wang Yi thought, "Duan", "East", and "River" are only the limits of what can be cultivated in the true \*\*\*\* stage. The content behind it is clearly felt in memory, but it is impossible to read.

Wang Yi knows that this is the limitation of the original universe.

Even if all the information is stored in the memory, you can only watch the peak of the true \*\*\*\* stage at most, and all the higher levels and many other information can not be viewed.

Because there is no place in the entire universe that is under the control of the original will of the original universe. The only way to be detached is to break into reincarnation. As long as you become the true \*\*\*\* of the void, everything can be known naturally, but once the true \*\*\*\* of the void is reached, you must enter within a year. Reincarnation.

Inheritance space is a perfect training place for the strong.

Similar to a small universe, divided into many independent spaces.

Similar to the super library, the information contained in the massive memory stone.

There is a space similar to a special trial battle, a small virtual space, there are opponents, a total of 282 opponents.

There are similar places dedicated to the creation of secrets... there are places dedicated to cultivating their own weapons... there are places dedicated to retreat... there are special places...

In short, the entire inheritance space is a place where the inheritors of all generations continue to add perfection to the extreme and cultivate the strong.

This is an inheritance space that can be described as extravagant to the extreme, and it is also a guarantee that Duan Donghe can grow into a super power through the ages.

Wang Yi was not in a hurry to sort out the inheritance information, but went through the door of space and arrived at the "treasure space" among the many planes in the inheritance space.

"That's it." A touch of excitement appeared in Wang Yi's eyes.

The so-called treasure space is surrounded by void, and in front of him is a towering mountain. The entire mountain peaks dazzling brilliance burst into the sky, exuding endless power, and each brilliance is strong and makes Wang Yi's heart tremble.

"There are a total of 322 treasures on Baoshan. They are all primitive embryos. Through the history of the East River, endless years of accumulation, we finally accumulated these 322 treasures, and now they are all mine." Wang Yi became excited.

If you inherit the position of the Donghe River through normal channels, you can only take one piece, and you have to put one back when you are alive.

But Wang Yi is no longer so troublesome. The entire Duandonghe space belongs to him, and he can dispose of it whatever he wants, extremely free.

Yuan embryo is a special treasure that is not completely formed... even Immortality can be used! And you can integrate the secret method you have felt into it, so that the treasure has more secret patterns... For example, Xeon Zhibao has one layer of secret pattern, while the original embryo has no one layer, empty, and only relying on its own basic power. Has been extremely strong.

The user can continuously instill secret patterns into it, just like refining the most precious treasure, and can easily instill secret patterns on the metamorphosis!

For example, Wang Yi previously created the sixth-order top secret method "The Universe of the Knife" and the seventh-order soul secret method "Universal Fantasy". You must concentrate all your energy in order to instantly outline an extremely large secret pattern and perform this trick.

And once these secret patterns are integrated into the original embryo. Then, all you need is the driver! It can be completely distracted and then control other treasure battles, etc., and the secret method can use the power of the original embryo itself to display more powerful strength.

This is Yuan Embryo... it can keep growing! As the strength becomes stronger, more important secrets can be incorporated into it!

Even the Yuan embryo can accompany a strong person to grow to the highest level of the entire ancient civilization. At that time, a Yuan embryo will also grow into the most terrifying treasure of the entire ancient civilization.

Wang Yi walked on this treasure mountain, watching as he walked.

One after another, they soared into the sky, and they were powerful. Once their power erupts, I am afraid that the strongest in the universe will be instantly annihilated. However, because of the special restrictions on Baoshan, every elementary embryo is controlled and suppressed.

"Nianli Weapon!"

"Melee weapons!"

"Many strange weapons!"

"The 'Jiemu Egg' similar to a worm's nest!"

"And machinery!"

"This is the flow of soul illusion!"

The dazzling array of sights caught Wang Yi's eyes and opened his eyes.

"There are so many genres and so many development paths, I am moved by seeing it." Wang Yi sighed.

In ancient civilizations, it was mainly divided into close combat, long-range attack, machinery, treasure making, and miscellaneous flow. The first four belonged to the mainstream, and the miscellaneous flow was a confluence of various peculiar means. And each category can be divided into many kinds.

It's a pity that cultivation skills are expensive and not too expensive. Even Wang Yi can only choose one or two at most. Otherwise, research and creation of secret methods will have to spend endless energy, and it is not as good as a single aspect to reach the peak.

Wang Yi accidentally discovered that there were 72 kinds of meta-embryos of mechanical flow on this Baoshan alone. It seems that the mechanical flow in ancient civilization is not a general prosperity.

This is not without reason, because the power of the mechanical flow Zhibao is too great, even if it is inferior in many aspects such as the law, the secret method, etc., it can rely on the mechanical... to completely kill the enemy by leapfrogging.

Of course, Wang Yi is not interested in researching.

Wang Yi looked at the giant embryos in front of him, and began to touch his chin to think about which one to choose.

"It is necessary to choose a blade embryo first." Wang Yi is good at melee knives, and knives are also one of the most common weapons for melee strong men.

At this level, there is no such thing as a "light and heavy weapon", it all depends on the strength of the strong and the power of the weapon.

As long as it is suitable for play, it is a good weapon.

The "knife" is undoubtedly one of the most suitable weapons for combat. That's why it spreads so widely. Many people want to use their swords to slant forward, and they like to use strange weapons.

Of course, as long as they are on the battlefield, the strong who have gone through the fight will not have such naive and ridiculous ideas.

In the Yuan embryo, there are 3 knife embryos. There are machetes with wide blades, those thin as cicada wings, and one that is very similar to the blood shadow war knife, and the proportions are very balanced. It is also the type that Wang Yi likes. .

Luo Feng can only choose one. As for Wang Yi... of course he has to wow. Although he felt that a stone knife was the most suitable for him, it could also be used by other divine bodies. Wang Yi said that he did not dislike it.

"Then, choose another soul element embryo." After Wang Yi recognized the master blade embryo, he chose another strange sphere that looked like a "black agate" and resembled a honeycomb. It looked like countless dark eyes, which made people feel chilling.

It has a name, "Soul Nest". It can carry out a variety of soul attacks, cast illusions, and form an illusion world, and can also constitute a soul defense. It is an incomparably perfect soul treasure. Of course ~www.mtlnovel.com~ mainly depends on the user's direction and how to cultivate it.

It's like now, Wang Yi is using it as an illusion to attack treasures.

Recognize the master one by one, and you will get two primitive embryos.

The other Wang Yi ignored them.

"As long as the secret method is integrated into the original embryo to form the secret pattern, once activated, it can exert a greater power than the normal Xeon Zhibao." Wang Yi nodded with satisfaction.

The blade embryo can be integrated into the sixth-order top knife technique, and the soul nest can be integrated into the seventh-order soul secret technique.

"Next are the rest..." Wang Yi glanced at the shining Yuan embryos around him, revealing a hint of a smile.

The remaining yuan embryos are very precious, and they will be jealous for the eternal true \*\*\*\* in the ancient civilization, but it is useless for Wang Yi now.

"Redeem!"

Wang Yi did not hesitate.

First recognize an unimportant meta embryo, and then put it into the panel for identification.

[After identification, the item is a high-level material, which exceeds the host's current exchange level upper limit. The bottom line is judged to be the lowest 100 million treasure points. Will it be exchanged for 100 million treasure points? 】

Wang Yi took a deep breath.

One hundred million treasures!

The question is, is this a loss or a gain?
