

A God 701

[Chapter 701: The treasure of mechanical flow "8 sages"](#)

From the point of view of the value of the item, it takes a huge price to create a piece with unlimited growth potential and even the pinnacle of ancient civilization, which undoubtedly far exceeds 100 million treasure points.

Even the weapons dominated by Chaos might be incomparable.

If you change it like this, you will definitely be at a loss!

But from the point of view of use value, it is undoubtedly a big profit to exchange Yuan embryos that are of no use to Wang Yi for the most important point for him!

Only the things that can be used are valuable, otherwise it will only add some special collections.

Wang Yi certainly knew what to do.

"Exchange!" Wang Yi's voice was cold.

There was a "ding".

The Yuan embryo that was placed on the panel by Wang Yi disappeared.

After that, Wang Yi's panel exchanged the amount of the most precious points suddenly increased by 100 million.

Look at the huge number of 100 million treasure points.

The corners of Wang Yi's mouth couldn't help but turn up frantically.

One hundred million treasures!

What a wealth!

Even the most common Xeon can be exchanged for one thousand pieces!

There are nearly a hundred forces in the entire universe, even if you add the two oldest sacred grounds, and hollow out their background, they will not be able to come up with so many strongest treasures!

There is no doubt that Wang Yi is now the richest man in the universe!

With these billions of treasures, Wang Yi can do many things.

For example, you can equip your own four great divine bodies with a complete set of Xeon treasures.

For example, let the master of the human universe hand a supreme treasure.

For example, the resurrection plan of the lord of the human universe, which has been stranded for a long time.

for example.....

At this moment, Wang Yi couldn't help but sigh from the heart--

"It's nice to have money!"

Now, please respectfully call him Wang. Rich. Yi.

What should I do if I have money? Of course it was spent.

Wang Yi calmly opened the redemption list and found the True God-level Mechanical Stream Arcana redemption list.

The 10 million treasure point that was unattainable to him, now seems to him to be that way.

However, 10 million arrogant points is only the lowest price of the true god-level mechanical arsenal, and there are even more outrageous!

Whether these mechanical treasures are really worth so much, I don't think about it. Anyway, there is only this one, and Wang Yi has no choice.

There are many kinds of mechanical flow treasures, and they are good at different uses. Some are good at saving their lives, some are good at constantly changing directions and dodge, some are improving attack power, some are increasing defense ability, some are obstructing and restraining the enemy... and there are even puppets. ! But the price is terrible! Wang Yi looked and shook his head.

Wang Yi's request is simpler, as long as the defense, attack, and speed are comprehensive. Although everything is strong, it means that everything is not against the sky, but there is no shortcoming. It fits Wang Yi's temperament very well.

Based on this characteristic, Wang Yi began to search.

The main thing is to look at the single mechanical flow treasures. There are no mechanical flow treasures that can be used by groups. They are infinitely powerful, but he can't use them alone.

Each of the light curtains that appeared in front of Wang Yi had pictures and information introductions.

Beacon Slashing Iron Ring: A True God-level machine, which can be exchanged for 10 million treasure points.

Advantages: strong attack, defense, speed, etc.

The disadvantage of course is that everything is not particularly powerful.

...

Sword Demon Armor: True God level machinery, it needs 10 million treasure points to exchange for.

Advantages: It can form a strong will impact and enhance combat power.

Disadvantages: Those who are not determined are easily disturbed and fall into an unstable state.

...

Heron's outfit: A true god-level machine, which requires 12 million treasure points to be exchanged.

There are some notes: suitable for winged avian creatures.

...

Chihu Armed Forces: True God level machinery, which can be exchanged for 20 million treasure points.

Advantages: You can flexibly switch multiple forms in battle. Can adapt to more battlefields.

Disadvantages: consumes supernatural power too fast.

...

Liuli Huoji: True God level machinery, which requires 26 million treasure points to be exchanged.

Advantages: In addition to attack, speed, and strong material defense, it is also very good at soul defense.

...

20 million utmost treasure points... 30 million utmost treasure points... 40 million utmost treasure points... 100 million utmost treasure points... 1 billion utmost treasure points... 10 billion utmost treasure points...

The more you go down, the more exaggerated the number of points required for mechanical flow treasures soars.

Wang Yi was dumbfounded.

Look at it one by one.

The later mechanical treasures become more special and precious.

Thousands of mechanical treasures in total!

"The last one." Wang Yi swallowed, holding his breath.

The last one is also the most expensive True God level machinery.

"Eight Difference Saints": True God level machinery, which requires 100 billion treasure points to exchange for.

Advantages: perfection in perfection, has reached the extreme of a single true **** level machine! Everything is perfect. The defense is super strong, even the eternal true **** can't destroy it. The attack power is extremely strong, with unparalleled attack power. The dodge is extremely fast, and the instantaneous burst speed is astonishing...

Disadvantages: The power is so powerful, and the required divine power is extremely amazing. The divine body of a normal true **** will be consumed in a moment.

Requirements: It is necessary to reach a certain level of the eight fusion laws, and it is quite difficult to control such a powerful machine.

"100 billion treasures..." Wang Yi was really dumbfounded.

He looked at the hundreds of Yuan embryos around him.

Even if one yuan embryo can be exchanged for 100 million utmost treasures, all the rest is filled in, it is only 32 billion utmost treasures!

An astronomical number away from 100 billion treasures. It's too far.

"Outrageous! Outrageous!" Wang Yi couldn't help shaking his head.

Originally he thought he had gotten rid of the "poverty" hat, but now it seems that he is still a poor man.

"One hundred billion treasures..." Wang Yi's teeth started to hurt.

actually.....

If the ratio of the value of the ordinary heavy treasure to the most precious treasure in the primitive universe is calculated, it is 3000 to 1.

True God-level Supreme Treasures and Ordinary Supreme Treasures (Treasures are divided into Normal Supreme Treasures, Highest Treasures, Top Treasures, and Peak Treasures), which are about 10,000 to 1.

So how much are the Void True God-level and True God-level?

How much are the Eternal True God Level and the Void True God Level?

However, the "Eight Difference Saints" cannot even destroy the Eternal True God. From this point of view, it is very unusual, stronger than many Void True God-level treasures.

Thinking about it this way, this number is not too exaggerated, it is only one million times more expensive than ordinary True God weapons...

But for Wang Yi, the price is still heavy and unbearable.

"It's too expensive..." Wang Yi sighed from the bottom of his heart.

Well, he is now king. Poor. Yi.

"These eight sages are at least comparable to the strongest true **** machine "Wu Qishen" built by the King of Jin in the world of Jin, right? Maybe even more." Wang Yi looked greedy.

But it's useless to be greedy, he doesn't have so many treasures, even if he sells all the yuan embryos, it is not enough.

"A profiteer!" Wang Yi couldn't help but complain. "The Yuan embryo, which is obviously far more than 100 million treasure points, actually gave me the lowest price of 100 million. You can't see your big eyebrows and you are so treacherous."

Of course, the panel will not pay attention to Wang Yi's thoughts.

Although he was very greedy for the so-called perfect single true god-level mechanical "Eight Difference Saints" ~www.mtlnovel.com~, but he was so embarrassed that Wang Yi finally had to look away reluctantly and put his eyes on the unit of "100 million". Of mechanical treasures.

Selected again and again, "charged" a few yuan embryos, and bought a True God level mechanical treasure for each **** body.

Then, I bought some resurrection crystals to resurrect the Lord of the universe.

Of course, the resurrection crystal is only a quota. When it is actually used, the corresponding treasure points will be deducted according to the resurrected object. If the treasure points are not enough to resurrect, it cannot be used.

Immediately afterwards, he proudly bought a bunch of True God's Supreme Treasures (Xeon's Supreme Treasures), and prepared to equip the master of the universe of the human race. Although it does not require one set of human resources, it can still be done with one hand, considering the upcoming resurrection. The Lord of the Universe, Wang Yi bought some more, and after looking at it, it was only ten million in total. To Wang Yi today, it's a drop in the bucket!

purchase!

purchase!

purchase!

...

Wang Yi was playing happily here, while the human race still didn't know what had happened, and was still waiting nervously for the results of the Duan Donghe inheritance, but didn't know that Wang Yi had sneaked out.

[Chapter 702: King 0 billion](#)

The others are nothing. In fact, the most important thing is the four mechanical treasures that Wang Yi exchanged for his own use. These four mechanical treasures alone are more than one billion treasure points.

"There are two Yuan embryos, one is a battle sword, and the other is a soul nest."

Wang Yi was extremely happy.

Wang Yi named his blade embryo "Pluto Sword", as for the soul embryo, the "soul nest" remained unchanged.

In addition to the four mechanical treasures used in combat, Wang Yi is also preparing to purchase mechanical treasures for other purposes, such as flying, such as binding the enemy... But it is not in a hurry, take your time.

It took a long time for these four mechanical treasures worth more than 100 million yuan to study thoroughly and completely urge them to exert their might.

Wang Yi now has more than 300 yuan embryos, all of which are exchanged, worth tens of billions of treasures.

A veritable "Billionaire".

In addition to his own mechanical treasure, Wang Yi also exchanged a mechanical treasure for Great Axe, Chaos City Lord, and even Luo Feng.

Of course, it is not as precious as Wang Yi, but it is enough to raise their current attack power by two levels.

That is to say, the creator of the great axe can probably increase the attack power to the eleventh order, and the Chaos City Lord may have the attack level of the eighth to the ninth order.

The other masters of the universe are gone. Even if they are given mechanical treasures, they will not be able to improve their combat power to meet Wang Yi's requirements, and they can easily be taken away by the most jealous and coveted universe's strongest man in the universe.

Not to mention, their relationship with Wang Yi is not as good as that.

Even if his teacher does not have the Master of Star Prison. However, he also carefully equipped the teacher with a set of Xeon treasures. It can be considered a special treatment. It would be nice for others to have a Xeon.

I am definitely different.

The Lord of Chaos City has always been very helpful to Wang Yi. The founder of the giant axe has worked hard several times to protect him. Both are the strongest in the universe of the human race. Luo Feng is also Wang Yi's life and death friend, and he has a deep relationship. There is also that qualification.

As for the other masters of the universe, the Xeon Supreme Treasure is already very good, enough to make them grateful to Wang Yi.

Wang Yi wouldn't be polite if there were such white-eyed wolves that exalt mien and fight their enemies.

"Try it first." Wang Yi thought. A black sculpture in the form of an upright creature appeared in front of him. It had a ferocious head and a **** unicorn that was sharp as a sword. The surface of the sculpture also had a series of exquisite purple-gold patterns, a pair of **** colors. The diamond-like cold pupils looked very noble and magnificent.

This is one of the mechanical treasures that Wang Yi exchanged, named "Dark Blood Vault".

Wang Yi has never understood how these treasures were named. Perhaps it has something to do with the creators of these machines, but it does not hinder Wang Yi's love for them.

In fact, Wang Yi can exchange higher-value mechanical treasures, such as the tens of billions. Anyway, he has so many embryos, it is enough to exchange.

However, the higher the mechanical treasures, the higher the requirements, and the more difficult it is to use. Wang Yi's current foundation is still too low. It is impossible to urge it to the extreme. Taking this into account, Wang Yi ended up with a relatively good selective price. kind.

The black sculpture flew on Wang Yi, wow~~ The black light was flowing, covering Wang Yi's body in an instant. In an instant, Wang Yi became a tall black monster wearing a visor. The dragon-like head exudes

endless cruel and hideous aura. It has sharp claws, strong and thick claws on its legs, and a long tail behind it.

Somewhat vaguely like the "flaming star behemoth". It just doesn't have wings. This is why Wang Yi subconsciously chose it.

Because the 'Dark Blood Vault' was worn on the body, it forced the Xeon Treasure Armor to temporarily retreat, and the two could not coexist.

Wang Yi just felt like he had replaced a Xeon Supreme Armor.

"Push!" Wang Yi began to burn divine power, but because he had not successfully practiced the first volume of "Breakdown" and mastered the secret technique of burning divine power, he just burned divine power normally.

Boom~~ Wang Yi's breath soared instantly.

The burning divine power quickly merged into the Dark Blood Vault armor on the surface, and the powerful energy immediately penetrated through the secret patterns in the 'Dark Blood Vault', but the result was...uncontrollable!

Obviously the internal secret patterns are too difficult, and Wang Yi can only temporarily stop the burning of divine power, first carefully understand the secret patterns.

With the level of Wang Yi's secret technique plus the time to accelerate, it took more than three days to figure out the control of the entire Dark Blood Dome, and soon accompanied by the instillation of a large amount of burning divine power, along the lines of countless secret patterns, precision The union of, finally converged at one point (one horn) on the head of the entire Dark Blood Vault armor, one point on the chest, two points on the shoulders, and two points on the knees.

There are 6 hubs in total.

Energy conversion!

Kaka~~~

After being transformed, the black and tough filamentous energy quickly transmitted to every part of the entire 'Dark Blood Vault'. The black filamentous energy and the 'Dark Blood Vault' fit incomparably, and the power immediately began to skyrocket.

Wang Yi frowned.

"No, the divine power provided is not enough."

"Attack power is probably only an increase of one level?"

"It seems that you have to learn the secret technique of burning divine power in order to urge the real power of Dark Blood Vault."

After all, it is a true god-level mechanical treasure. Wang Yi is the lord of the universe. He hasn't learned the secret technique of burning divine power. Normally burning divine power is a real power that is difficult to stimulate the Dark Blood Vault.

If Wang Yi can use the first volume of "Diemie", it can make up for the divine power gap with the strongest man in the universe who has not learned the secret of divine power burning, and the second volume of "Diemie" can make Wang Yi surpass it. God!

This is the difference between whether there is a secret technique of burning divine power!

"I am currently at the top of the sixth-order sword technique, but I have already realized the seventh floor of the Tongtian Pagoda~www.mtlnovel.com~ and I must concentrate on studying it, and I will soon be able to study the seventh-order sword technique!"

"The first layer of the Secret Destruction Technique shouldn't be difficult, I can quickly master it!"

"The seventh-order secret method instills the secret pattern on the blade of the dark **** sword, which can exert the power of a higher order! That is the eighth step!"

"It is still possible to use the first stage of breaking and destroying, although it can't completely urge this dark blood dome, but it can still be done to increase the attack power of two levels, that is the tenth level!"

Wang Yi took a deep breath and looked very bright.

Soon, Wang Yi's combat power will truly stand at the pinnacle of the universe, comparable to or even surpassing the original ancestor!

As time passed, Wang Yi mastered more secret techniques, researched and created higher-level secret techniques, and his strength would become stronger and stronger.

"Now, it's time to tell the human race." Wang Yi groaned for a while and laughed.

"I hope they won't be too surprised by that time."

The things that Wang Yi brought back this time will far exceed the imagination of the upper echelons of the human race.

Duandonghe inherits information, a variety of incomparably powerful jerks, many Xeons, true god-level mechanical treasures, resurrection crystals...everything is incredible, unheard of in the universe, and it is estimated that the high level of human race will collectively doubt life at that time.

[Chapter 702: King 0 billion](#)

The others are nothing. In fact, the most important thing is the four mechanical treasures that Wang Yi exchanged for his own use. These four mechanical treasures alone are more than one billion treasure points.

"There are two Yuan embryos, one is a battle sword, and the other is a soul nest."

"I hope they won't be too surprised by that time."

The things that Wang Yi brought back this time will far exceed the imagination of the upper echelons of the human race.

Duandonghe inherits information, a variety of incomparably powerful jerks, many Xeons, true god-level mechanical treasures, resurrection crystals...everything is incredible, unheard of in the universe, and it is estimated that the high level of human race will collectively doubt life at that time.

[Chapter 704: Incredible](#)

High-level human experts all know that Wang Yi's Tower of Sky Tower comes from a certain super existence. That super existence is very mysterious and powerful and unimaginable. Only the slightest bit of it that emerges from it shocks the high-level human beings.

In fact, what they knew was what Wang Yi wanted them to know.

It is also because there is little knowledge, so there is no way to compare with the inheritance of Dongdong River. The human race has always guessed that the teacher of Wang Yi is the great power of ancient civilization.

Actually, of course not.

It was not that Wang Yi deliberately deceived, but that he couldn't explain it at all.

Wang Yi did many things under the pretext of Tongtian Tower.

For example, when doing missions on the Primordial Star, such as this time.

Since the Donghe heritage is to be brought out, Wang Yi of course has to prepare in advance.

Human high-level powerhouses are curious and look forward to it.

The founder of the giant axe couldn't help asking: "What test is it?"

"Did you pass?" Chaos City Lord asked even more.

Relying on Wang Yi, the human race has gained many benefits. For example, a large number of supreme treasures, including the great axe founder and the supreme supreme treasure of Chaos City Lord, are almost all from Wang Yi.

This has also increased the overall strength of the human race, I don't know how much.

And all this is because of Wang Yi's existence and dedication.

Therefore, Wang Yi's importance to the human race can be imagined. His business is not only about himself, but is related to the interests of the entire human race.

The other Lords of the human universe, the Lord of Dragon Walk, the Lord of Desolation, the Lord of Qingdong, the Lord of Peng Gong, the Lord of Desolate Jian... all cared very much.

"You should all know that I am only a registered disciple accepted by the teacher. The teacher only met with me at the beginning and did not leave much information. I don't know much about the teacher's origin..." Wang Yi said with a light smile.

The founder of the giant axe nodded.

Not surprisingly.

They also knew what was going on with the named disciples.

Like the great existence of Chaos City Lord standing on the pinnacle of the universe, the human race doesn't know how many people want to worship him and it is not available. The Chaos City Lord's

requirements for accepting apprentices are very demanding, and non-true peerless geniuses cannot be seen by him.

In the original work, the peerless genius who was born in the tens of thousands of epochs like Luo Feng was only accepted as a named disciple by the Chaos City Lord at the beginning. After careful testing, he was officially admitted to the school.

And Wang Yi's mysterious and terrifying teacher wanted to come, and the routine should be similar.

In Wang Yi's previous explanation, what a lofty and powerful teacher the teacher was, naturally there was no time to take care of him as a named disciple. All the tests came from the Tongtian Pagoda, a spirit-like existence.

"The inheritance of Broken East River is the test that Tongtian Pagoda gave me." Wang Yi said the answer.

"No wonder, you have been obsessed with breaking the Donghe inheritance, it turns out that's the case." The creator of the giant axe suddenly said.

"Then have you passed the test?" A female master of the universe in the Giant Axe Fighting Arena, "the Lord of Yun Suo asked with concern."

"If it is Chaotic Source, there should be no problem. He has never let us down." Another female universe lord, "Lord of Nine Lis", said with nine white tails swaying behind her, full of flattery and soft voice.

The human race is now such two female masters of the universe, and their status is a bit special.

"I guess it's the Rhinoceros Bureau, right?" She looked at Wang Yi with wonderful eyes.

The cold-faced "Master of Yunluo" said: "Not necessarily, I guess it is the secret of creation in the last level."

The Lord of Jiuli seems to be at odds with the "Master of Yunluo", and he sneered after hearing the sound: "Due Donghe has said that, directly solve the 6000 rounds, you can directly get the inheritance..."

"Cough cough." Wang Yi couldn't help coughing. You are too dear to me.

"Ha ha..."

The other strong people on the scene all laughed, and the "Lord of Yunluo" and "Lord of Jiuli" also laughed.

Wang Yi didn't sell Guanzi either, and smiled slightly. "I did pass."

"Rhinoceros game, I didn't solve the game to 6000, but it was 5000."

After all, time is limited, and in fact, even if the master of the universe solves 5000 rounds, even if it breaks through the fourth bottleneck, he can directly get the inheritance of Broken East River.

Everyone exclaimed, and the look in Wang Yi's eyes also changed.

"This..." The Lord of Longxing widened his eyes.

"5000 rounds?" The Lord of Qingdong was also shocked.

"Be good." The lord of the nine raccoons subconsciously stuck out his tongue.

Other people's performance is not much better.

"Is Chaotic Source so powerful?"

"I only had a little more than 2000 rounds."

"The gap is too big!"

The faces of the Lords of the universe were wonderful, both shocked by Wang Yi's achievements, and somewhat unbelievable.

They have all studied the Rhinoceros Game, and they know how mysterious the Rhinoceros Game is.

None of the masters of the universe can break through the second bottleneck in 30,000 years.

In fact, they are all very good to become the masters of the universe, but the Rhinoceros Bureau pays attention to understanding and deduction ability, and not everyone is suitable.

For example, the strongest giant axe has only reached the first bottleneck.

It is much worse than the Chaos City Lord who just broke through.

"The test was successful because you passed the Rhinoceros Game?" The Lord of Darkness asked impatiently.

"Of course not." Wang Yi said calmly, "Although the Rhinoceros Game is profound, it is not the most difficult. Then in the place of inheritance, I created the seventh-order secret method, which successfully passed the test."

All the people present were stupid. Including the founder of the Great Axe and the Chaos City Lord, their eyes also showed strong shock.

"Seven..." The chubby Lord Peng Gong said with some difficulty.

"The seventh-order secret method?"

"real or fake?"

"The seventh-order secret method!?"

"Hunyuan, you really created a seventh-order secret technique!?"

The masters of the universe couldn't sit still, and suddenly got up, looking at Wang Yi with shocked eyes.

Although the Rhinoceros Game is so profound and mysterious, it is always a game and means to improve the comprehension of the test.

But the secret method is the real realm strength of a strong person.

Like the founder of the giant axe, he created the eighth-order secret method.

The Chaos City Lord has just broken through the strongest in the universe, and the secret method is at most the first level of the strongest in the sixth-order universe. Not as good as Wang Yi now.

As for the other masters of the universe, most of stays at the fourth, fifth, and even third-order levels!

New cosmos masters like Palace Lord of Eclipse and Lord of Star Prison, even the Master of the Cosmos Ultimate (third-order) has not even created.

They all looked at the flat black-haired man in shock, as if they didn't know him.

In the past, although they all knew that Wang Yi was extremely powerful, they subconsciously thought that Wang Yi relied more on the treasure!

And now I found out, fart! People are really awesome!

"Unbelievable..." the creator of the giant axe murmured.

He also came all the way from the Lord of the Universe, and of course he knew how difficult it was.

Even a miracle is not an exaggeration.

Facing everyone's shocked eyes, Wang Yi said to himself: "So, I passed the test and received the reward from the Tongtian Tower. One of them is another copy of the Donghe inheritance."

[Chapter 705: The human race is stunned](#)

"Another copy of Broken Donghe Inheritance?"

The human high-level powerhouses looked at each other, a little at a loss, not knowing why.

Can we divide Donghe inheritance into two parts?

The Lord of Longxing hesitated and asked, "Hunyuan, what you said is that you got the inheritance of the Broken East River?"

"Yes." Wang Yi nodded.

In fact, he will only show the tomb boat and inheritance information. As for Yuan embryo, there is no need. Otherwise, as soon as Luo Feng comes out, he will doubt his life when he sees it. , The inheritance information is also, you can fool the past...After all, there is more than one tomb boat, and even the foolproof inheritance information may leak out, but there is really no way to explain why there are exactly the same yuan embryos.

Sure enough, upon hearing what Wang Yi said, the eyes of the human experts who understood what was going on lit up.

The master of Yunluo is a woman, so she was more careful and noticed the problem in Wang Yi's words.

"Hunyuan, you said that one of the rewards is the Broken East River Inheritance... Is there any other reward besides Broken East River Inheritance?"

Wang Yi cast a gaze of approval, and said loudly, "Yes, the Donghe Heritage is only one of the rewards for passing the test, and there are other rewards, but it's a little weird to say, let me explain it to you slowly."

"No way!"

"Really Broken East River inheritance!?"

"Chaotic Source shouldn't deceive people on such a major matter..."

"Is that true?"

The high-level human beings have been overwhelmed by this sudden surprise.

"Does the master who created the Tongtian Pagoda have something to do with the ancient civilization breaking the East River?" While the founder of the Great Axe and the Lord of Chaos City, who believed in Wang Yi as a person, were delighted, they were also a little puzzled.

It is also that they do not know the line of the East River and the ancient civilization, otherwise they would not easily believe Wang Yi's explanation.

However, because of the control of the original will of the primitive universe, their understanding of ancient civilization is almost a blank, just like ancient people have seen modern civilization technology...It is like a mobile phone photo. Who can think of it, it can be made exactly the same. The existence of photos? It is also incredible in the eyes of ancient people.

Because they don't understand, they see incredible things. They only think that they have little knowledge and don't know the strength of ancient civilization, so they are more receptive to the reasons given by Wang Yi.

There is a sky outside the sky, and there are people outside the world.

If it were Luo Feng, it would not be so easy to believe. After all, he knew the status of the Duandong River line in the ancient civilization, and he also knew how tightly Duandonghe controlled the inheritance, and there was almost no possibility of leaking it out.

For Wang Yi, Luo Fengxiang didn't believe it, but it didn't really matter.

Even Luo Feng would definitely be delighted to see that the human race has gained the core fascination of the Donghe River, and strengthened instead of blocking it.

If it weren't for Luo Feng to be bound by the Dongdong River's inheritance mark and oath, he would have done it himself.

"Hunyuan, are you getting the complete Dongdong River inheritance?" Some universe masters asked with concern. "Is there a way to get out of reincarnation?"

All other high-level ears are raised, this is the most important thing.

In fact, how the inheritance was obtained, whether it was the original Diandonghe inheritance, is actually not important, and the human race is not concerned about this, after all, the Diandonghe line has nothing to do with them.

The important thing is to get beyond reincarnation.

This is the most important thing.

Under the fiery gaze of many high-level human beings, Wang Yi laughed and said: "The way to go beyond reincarnation... Of course there is."

"Wow!"

The founder of the Great Axe, the Lord of Chaos City, the Lord of Peng Gong, the Lord of Darkness, the Lord of Qingdong, the Lord of Yunluo... and other powerful people can't help but get excited.

In fact, Wang Yi had already let a clone begin to sort out the inheritance of the Duandonghe line under the acceleration of time, summarized it well, and had a general understanding of the entire inheritance message.

The accumulation of countless years of inheritance of the Dongdong River can be said to be vast, but only part of it can benefit the human race a lot.

However, the biggest problem... is that the message that exceeds the stage of the strongest in the universe cannot be transmitted, even Wang Yi can't do it.

However, the content of the three heaven-defying geniuses, such as "Defense", "Donghua", and "Undead River", can still be taught in the true **** stage.

Think about it, there is already a ninth-tier great axe with the top combat power. After learning the unique knowledge of Donghe, and having mechanical treasures, how far will it be improved?

The peak power of the human race will also increase several steps, and the overall strength will be greatly expanded.

These are things that Luo Feng in the original book could not do.

Wang Yi doesn't have the idea of cherishing himself. He has regarded himself as a member of the human race and will naturally do his best to help the human race become stronger.

In fact, it is normal to think about it. How many years did he live on the earth and how many years did he live in the human race? As long as it is not heartless or too selfish, everything you see and hear will be affected by the human race.

This is the appeal of an ethnic group.

In Wang Yi's eyes, the position of the human race and the terrestrial people is almost important. After all, the human race on the earth has multiplied for so many years and has expanded to a vast star field and mixed with the human race.

It's just that he, who was born as an earthling, sometimes subconsciously considers the interests of some earthlings.

Standing at the highest level of the human race, he will take care of the interests of the entire human race.

This is also normal. The **** decides the head. Who makes him one of the leaders of the human race now?

When his strength reached his level, in addition to cultivation, relatives and friends, he didn't pay much attention to it, and ethnic group was one of them.

"How exactly is it?" the founder of the giant axe asked. He is the strongest in the universe, and he can break through with only one step. Of course, that step is also difficult. Even he is not sure about it. Of course, he attaches great importance to Wang Yi's words.

"From the immortal stage to the limit of the strongest in the universe, there is a detailed training system." Wang Yi said.

Those strong humans also listened carefully.

"But... the line of Duandonghe is very extensive, but under the influence of the will of the original universe, I can only know the countless information of inheritance up to the limit of the strongest in the universe! If you go further, you must go through the cycle of reincarnation to avoid the original universe. Will influence." Wang Yi said helplessly.

This cannot be avoided.

"Original Will?" The high-level human beings were all startled.

"Original Will?" Giant Axe and Chaos looked at each other. Others were not clear, but they were the ones who had the most contact with the original ancestors. After being suppressed, the original ancestors generally contacted the human race, and they were more connected to the two of them. Therefore, I have also heard of the original will from the original ancestor.

"But I know how the strongest in the universe continue to practice and how to reach the limit of the strongest in the universe." Wang Yi continued, "On the basis of this limit, if we break through, reach a new level..."

"When you reach a new level, you will definitely be able to break through the cycle of reincarnation~www.mtlnovel.com~ the founder of the giant axe said directly.

The others turned to look at the giant axe, surprised in their eyes.

The Chaos City Lord sitting with the giant axe was smiling.

The giant axe glanced at the people: "It's very simple. When you break through and become the strongest in the universe, you will understand why I know. In one word...If you completely break through the strongest in the universe and reach a higher level, you will surely pass the cycle of reincarnation. If you can't reach it and you take a gamble, you might get beyond reincarnation. As for the probability? Look at the strongest person in the universe who perished in countless reincarnation times, and you know how low the probability is."

The strong people present all stood up silently. That being said, even if it is inherited from the Broken East River, it is impossible to see the message of surpassing the strongest in the universe and transcending reincarnation?

"But..." Giant Axe looked at Wang Yi with joy, "Being able to reach the limit of the strongest in the universe, it has helped me a lot."

After all, the giant axe is far from reaching the limit of the strongest in the universe! That was the realm of the original ancestor!

But they didn't know that Wang Yi brought more than that.

[Chapter 706: Unbelievable](#)

In fact, from this point of view, the inheritance of Dongdong River is not as good as the high-end Tongtian Tower.

The inheritance of Dongdong River is strong in the cultivation of the limit from immortality to the strongest in the universe.

And above the strongest in the universe? Yes, but I can't see it!

The sea of laws of the Tongtian Tower, and even the secret patterns can guide it.

The secret pattern cannot be studied by outsiders, but the sea of laws can be opened once for outsiders to understand.

As for whether you can comprehend something, it depends on the individual.

But it's better than a black eye!

With the guidance of the sea of Tongtian Tower Law, the probability of the strongest in the universe breaking above the strongest in the universe will undoubtedly be greatly increased!

And below the strongest in the universe...

"Then the Lord of the universe, how can he become the strongest in the universe?"

"If you want to break through, every cosmic lord can't take the same path, so is there a guideline for the inheritance of the Donghe River?"

The strong human race inquired one after another.

"Yes!" Wang Yi smiled and nodded, and then began to explain.

In ancient civilizations, there were countless strong people. Although it was a huge threshold to become the strongest in the universe, it was because there were so many breakthroughs.

Naturally, there is a systematic understanding, and there is also a lot of experience to follow, which can maximize the probability of breakthrough.

Originally developing normally, the human race waited until the end of this reincarnation era, and there might be four or five strongest in the universe. But if there is a guide, I am afraid it would have to be doubled several times.

With the help of Tongtian Pagoda and Wang Yi, it is normal to turn another somersault.

The God Eye tribe was born with seven! There are only three human beings so far (and the original ancestors have been suppressed), and four or five were born.

And the high-level human races who got the answer from Wang Yi were also excited.

With the message of Dongdong River's inheritance, that is, never immortality-the strongest in the universe, the entire cultivation system.

In the original book, under a more complete system, the human race will have more than one hundred thousand cosmic masters! There have been thousands of masters of the universe!

Of course, this kind of cultivation method makes some talents slightly worse, originally at most mere cosmos elders, they have also become the masters of the universe.

Hundreds of thousands of masters of the universe can give birth to dozens of the strongest in the universe.

As the strength of the human race grows stronger and the occupation of the primitive universe expands, there will be more and more talented people. With good luck, it is possible for nearly a hundred of the strongest in the universe.

If Tongtian Tower is added, the number is still unknown.

Wang Yi has a hunch, it is certain that it is more than the three current reincarnation times combined.

After receiving Wang Yi's explanation, the Great Axe Temple fell into absolute silence.

The upper echelons of the human race were shocked.

Even if the founder of the Great Axe and the Chaos City Lord did not speak.

It's too bad!

How many strongest people in the universe are there in an age of reincarnation?

Like the first reincarnation era and the second reincarnation era, each was only around 30.

Will the human race be stronger than a reincarnation era in the future?

Next, Wang Yi will tell the high-level powerhouses of the human race how to break through from the Lord of the Universe to the strongest in the Universe.

The masters of the universe were all overwhelmed. Even the founder of the Great Axe and the Lord of Chaos City are no exception.

From the master of the universe to the strongest in the universe, there is no trace to follow. Everyone must take a different path. This has long troubled the master of the universe, and the breakthrough must be in the "primitive universe age." Breakthrough, once this reincarnation era is over and enter the small universe, then they have no chance to break through, how can they not be in a hurry?

Looking forward to countless years, now they have the opportunity to see the hope of a breakthrough, why don't they try to grasp it? The look in Wang Yi's eyes was extremely hot.

As for Luo Feng, who was still struggling in the tomb boat, he had been forgotten subconsciously.

"From the Lord of the Universe to the Strongest in the Universe!"

"Everyone has to take a different path, but in fact they can be summarized into two categories!" Wang Yi said in various ways.

"The first category, starting from divine power!"

"The second category, starting from the law!"

"Like starting from the law, it is a breakthrough in the law, so that the kingdom of God breaks through the bottleneck. Once the kingdom of God breaks through the bottleneck, it naturally begins to evolve into a small universe."

"Starting from divine power, the perfect gene of the Lord of the Universe is 10081 times! This is a limit. Starting from divine power is to break this limit! Let the divine power evolve to a new level!"

"Once the divine power evolves, the body and soul evolve, this is to break the law with force! Absolute power forcibly break the shackles!"

"As soon as I break through... the kingdom of God that can be carried is naturally larger, and the kingdom of God can break through the bottleneck and begin to evolve into a small universe."

All the strong on the scene listened obediently like primary school students without making a sound. The many doubts in my mind have been solved, and there is a feeling that I suddenly realized that it was like this.

So, whether there is guidance or not, the difference is really big!

In the original primitive universe, the master of the universe basically crossed the river by touching the stones, because the number was too scarce to be systematically studied at all. In many cases, they knew it and didn't know why.

But now, following what Wang Yi said, it allowed them to see a new world and gain a deeper understanding of their own cultivation.

There is no order in learning, and the master is the teacher, and now Wang Yi is their teacher.

Even the founder of the Great Axe and the Lord of Chaos City must listen to them honestly.

"Break the shackles! Only when you can control your own destiny, since then, the law has evaded, and the words are followed!" Wang Yi continued.

Speaking from the legal basis of the immortal stage, when it comes to the venerable, the lord of the universe, it comes to the stage of the strongest in the universe...

Those strong human beings listened quietly.

Opposite the founder of the Great Axe and the Lord of Chaos City, a white robe figure came quietly, but was not discovered by anyone.

"It turns out that this is the case. The ten most basic laws, one must be a plenary session, and the other must be integrated into the 'Law of Chaos'..." The white-robed man listened, his eyes glowing like never before. "Everything is transformed by the law of chaos, and the ultimate goal is to return to the source and realize the ultimate law of chaos. This is the real way..."

Chao Wen Daoxi can die.

The original ancestor realm was originally the highest and the farthest among the people. He is also a wizard of heaven and has a very high understanding. He is also a secret method such as creating a "virtual universe" without a teacher. What Wang Yi said to him Touch the most. The original ancestor, who has always been at a loss as to how to advance, knows that he should follow this path to march toward the law of chaos!

The original ancestor listened carefully afterwards.

This is a turning point in the destiny of mankind.

...

Lord of the universe, to the strongest in the universe. Only theoretical guidance, Wang Yi talked about it for more than three months before it ended. In fact, theoretical guidance, secret method reference... These external aids are second, and everything ultimately depends on the individual. After all, knowing and being able to do it are two different things.

Fortunately, the human masters of the universe present have good talents. They can cultivate to the master of the universe without any guidance. With detailed and sophisticated cultivation methods, the chances of breakthroughs will be greater.

And Wang Yi also stated that there are a huge variety of complete secrets ~ www.mtlnovel.com ~ all kinds of combat secrets will be brought back, put on the human race for everyone to study and understand, and it also makes the human race powerful people excited and looking forward to it.

The most important thing is the three great geniuses!

When the human powerhouses heard the powers of "Duan", "East", and "River", they were all stunned.

What level of strength will be improved if you can cultivate to this kind of heaven-defying genius? Why not let them go crazy.

It also made Wang Yi more grateful and supported by them.

Even the original ancestor felt that the three great masters of "Broken East River" were scary, not to mention the other strong people of the human race.

At the same time, they also decided that this kind of fascinating knowledge should be listed as the highest secret of mankind, and to prevent it from leaking out, only the core peak power of mankind can learn it.

Of course, these excited high-level human beings don't know that Wang Yi brings more surprises to them, and more exciting things are yet to come.

[Chapter 707: Happy to faint](#)

Regarding these inheritances, they were all made by Luo Feng in the original history, but Wang Yi advanced them.

And Wang Yi did what Luo Feng couldn't do.

At this moment, there was a joyous and festive atmosphere in front of the Great Axe Temple, and everyone's faces were smiling.

For the human race, obtaining these inheritances is indeed a great joy, and it will have an immeasurable impact on the promotion of the human race.

In the future, the human race may even become the largest force in the universe! More than the Holy Land of the East Emperor and the Holy Land of Purple Moon!

How can these human powerhouses not get excited?

"and also."

Wang Yi's clear voice sounded again, making the high-level humans who had fallen into ecstasy startled, and collectively looked over.

and also?

Wang Yi's tone was relaxed, "Didn't I say it before, I have received more than one reward..."

The eyes of the founder of the Great Axe, the Lord of Chaos City, the Lord of Void Gold, the Lord of Bingfeng... and many other human beings are lit up.

Since Wang Yi specifically mentioned it at this time, it is obvious that the reward is extraordinary, and it will even have a huge impact on the human race.

"This time I passed the test, and among the rewards I received, in addition to the inheritance of the Broken East River, there were also a lot of treasures." Wang Yi said.

"A lot?"

"how many?"

"What is the treasure?"

The lord of the universe asked one after another.

Since Wang Yi said a large number, there must be a lot of it. Some people think that perhaps it is comparable to the wealth of a peak ethnic group. Although it is just icing on the cake for the human ethnic group that is rich now and has a heritage of the East River, it is also a good thing. .

However, Wang Yi's next words made the faces of these human super beings who have always been as stable as a mountain uneasy.

"Quality... is the ultimate treasure of Xeon."

"The quantity? One piece is more than enough for the current master of the universe of our human race."

"Wow!"

There was an uproar in front of the Great Axe Temple.

Everyone was shocked, and even a little could not sit still, and stood up again in shock.

The creator of the giant axe was also shocked, and couldn't help but said: "Chaotic Origin, is this true? You have got so many strongest treasures?"

If someone were to change it and say that he could allow every cosmic lord of the human race to have a supreme treasure, the creator of the giant axe would not believe it, and would only think it was a fantasy, ridiculous, and regarded it as a joke.

But Wang Yi had used Xeon Treasure more than once before, proving that he was indeed capable of doing it.

So the high-level humans believed it for the first time.

"Of course." Wang Yi still smiled in the face of the shocking and fiery gazes of the high-level human beings and the excited faces.

They didn't know that Wang Yi now has a balance of tens of billions of treasure points, not to mention dozens of Xeon treasures, there are hundreds, thousands, and they are all pediatrics, no problem.

Of course, telling the truth is too exaggerated. There is a suspicion of showing off. What a low-key Wang Yi would not do such a thing.

"How much is it?" Every human super powerhouse is itchy at the moment.

Wang Yi didn't say it directly, but said: "The Lord of the universe of every human race, I can provide one."

There was silence in front of the temple again, and everyone was frightened.

The human race now has 19 masters of the universe and 2 of the strongest in the universe.

Looking at Wang Yi's self-confident and indifferent appearance, it was obvious that the number of treasures exceeded the number of human race powers he said, so he didn't care at all, because he provided it.

"It is estimated that at least 20 pieces." Chaos City Lord murmured.

Some feeling of dizziness.

20 Xeon treasures!

Before the rise of the human race, Wang Yi didn't have a single piece of supreme treasure, and his belongings were shabby.

If it were not for the legacy of the original ancestors, the human race would not be in a good situation facing other peak races.

At least it is adjacent to the border of the human race, and the other three peak races that kill you to death, the monster race, the zerg race, and the machine race, all have the strongest treasures.

Strictly speaking, it is the ancestors, monsters, machine races, zerg races, and starry behemoth alliance, all of which are the most powerful! There are none for humans, prisoners, crystals, and Northern Xinjiang Alliance.

At that time, there was no strongest treasure, and the hearts of the human race were not at ease.

Everything changed until Wang Yi turned out.

The surprises brought to them continued, wave after wave.

The high-level powerhouses of the human race have also benefited, and the overall strength has been continuously improved, and it can be said that the situation is thriving.

As the founder of the great axe of the human race Optimus Prime, he first got a supreme treasure from Wang Yi!

It is impossible to describe the shock and joy of the human race at that time.

At that time, the Chaos City Lord felt that the fate of the human race would be greatly changed in Wang Yi's hands.

And now...The Lord of Chaos City looked at the expressions of excitement, joy and shock on the surrounding universe Lords, and couldn't help sighing in his heart.

"Fortunately, my human race gave birth to a Wang Yi."

The scene has already caused a stir because of Wang Yi's astonishing remarks.

"Hunyuan, are you serious?"

"Hunyuan, you mean, each of us can get a Xeon Treasure?"

Some masters of the universe still can't believe that they are so lucky.

When people sit at home, the Xeons will descend from the sky?

This is too happy, right?

Look at the primitive universe, including the universe sea. Which force is the master of the universe so good? You don't have to do almost anything, just as a member of the power, can you get a Xeon Treasure?

Even the Lord of Darkness, the Lord of Peng Gong, had never thought that he could easily obtain a supreme treasure.

Xeon Zhibao is the treasure of the town clan, how precious? Even the strongest in the universe does not necessarily exist. Every time it appears, it can make the forces of the whole universe go wild.

"Of course, all of you here are the pillars of my human race, and you deserve to be given a supreme treasure." Wang Yi seemed to be telling something plain and watery.

"this..."

The high-level human beings were so excited that they couldn't speak.

In fact, it is not a big deal for Wang Yi to take out these Xeon treasures, and the Lords of the universe in front of him have all made great contributions to the human race. Not to mention that everyone is of good character, but at least he has always been loyal to the ethnic group, and the **** battle continues. Wang Yi won't feel bad about giving the supreme treasure.

As for the Lord of the universe who will rise in the future, if there is no major contribution, there will be no such good things.

Of course, UU reading [www.uukanshu](http://www.uukanshu.com). It doesn't count as a personal gift from Wang Yi. It is his business how to deal with Wang Yi's own treasures.

It is already amazing to be able to give so many treasures to the race.

"I'm still in the Flame Ice Region of the Universe Ark, but I will send a clone to bring the treasure back." Wang Yi said, "You tell me the treasure you need, and I will select it for you. I will bring it back to you in time."

The Lord of the universe looked at each other, and the Lord of Star Prison and Palace Lord of Eclipse stared at each other.

They seem to have the two newly-promoted universe masters at the bottom of their strength?

The Eclipse Palace Master was full of envy: "Pang Bo, your apprentice is so amazing, Pang Bo, you hide so deep..."

Lord of the Star Hell: It's my bird's business! Maybe you don't believe it, but I don't know that my apprentice is so awesome.

[Chapter 708: What do you think of people with rank 6 and above?](#)

The human race, in addition to the two strongest in the universe, the founder of the Great Axe and the Lord of Chaos City, including Wang Yi and Luo Feng, they are precisely the 21 Lords of the universe. And Luo Feng's realm is actually the Venerable Universe.

Except for the founder of the Great Axe, the Chaos City Lord, Luo Feng, and Wang Yi, no one else has the most powerful treasure.

Of course, Wang Yi's teacher, "The Lord of the Star Prison", received the Soul Xeon Treasure given by Wang Yi, but now it is on the founder of the Great Axe, and with Wang Yi's large gift, the situation will change, and there is no need to Care about this.

The masters of the universe who were bestowed the treasure by Wang Yi will also be grateful to him.

The atmosphere in front of the temple became more heated.

Wang Yi was surrounded by the masters of the universe who were usually high above them. Of course, the founder of the Great Axe and the Lord of Chaos City would not move in.

"Chaotic Source...It's really amazing." The founder of the giant axe sighed with emotion, "That's how the Donghe heritage was obtained, and there are so many strongest treasures... I can't even think of it, I can't even dream of it. My human race has this day." It came out that the giant axe was very happy, and his mouth was grinning.

"Yes." The Chaos City Lord next to him smiled, "Wang Yi is really a little guy full of miracles, don't forget, he has only cultivated for more than 100,000 years, what a short time, it may be just a thought for me. But Wang Yi created the seventh-order secret technique, how incredible it is."

Chaos City Lord shook his head and revealed a smile. He was only at the level of creating the sixth-order secret technique, but Wang Yi created the seventh-order secret technique, and he was only the master of the universe. What a terrible talent is this? There is simply unlimited potential.

"I was worried before, but now I really believe that Wang Yi can really transcend reincarnation and lead our human race to become the strongest force in the universe."

The giant axe was startled, and then he also sighed. "Yes, such a powerful Donghe heritage, so many strongest treasures..."

The creator of the Great Axe was fierce. Although Wang Yi's recounting of the cultivation experience of the strongest man in the universe has not been elaborated yet, it has already touched him tremendously. Moreover, the amazing three faculties of "Dongdonghe" are even more impressive. He was salivating. The creators of the Great Axe couldn't imagine that after obtaining the three quintessences, what level of their own strength would be improved, even if they surpassed the teacher, it is unknown, right? No, or take it for granted.

And these are all because of Wang Yi.

"Fortunately, my human race has Wang Yi." Both the founder of the Great Axe and the Lord of Chaos City sighed.

Wang Yi is indeed extremely lucky for the human race to appear.

"That's right." Chaos City Lord thought of something, "Luo Feng is still fighting for the inheritance of the East River..."

Ju Axe thought for a while, and said: "Although Wang Yi said to bring it back, it is not certain whether the two are really the same. Moreover, it is a good thing that Luo Feng can become the heir of the Broken East River. He continues to fight."

Chaos City Lord felt reasonable.

The Lords of the universe surrounded Wang Yi with enthusiasm, wanting to ask for a supreme treasure that fits their minds. This is a matter of their own personal interests, and everyone's heart is fierce and anxious.

"Hunyuan, look, my treasure..." Peng Gongzhi's chubby face was full of flattery.

Wang Yi glanced. "no problem."

"Hunyuan, me..." The cold and cold Lord of Darkness couldn't hold back.

"Is it the supreme treasure of the soul class? Yes." Wang Yi fully agreed.

"Hunyuan, my..."

"OK, no problem."

"Chaotic source..." The other universe masters became more enthusiastic. The only two female universe masters took advantage of their gender and squeezed strongly beside Wang Yi. Feeling the clear physical touch, Wang Yi couldn't sit still. The two elder sisters don't make trouble, there are so many people watching them.

Obviously the masters of the universe won't care, how long they live, little things, and they won't make a fuss.

Wang Yi still underestimated the allure of Xeon Supreme for these masters of the universe.

Before Wang Yi appeared, there was no master of the universe in the original universe, and the master of the universe who generally possessed the most powerful could reach the sixth rank. However, the existence of the real fifth-order, such as the Lord of Chaos City and the Lord of Galaxy, are already standing at the pinnacle of the universe.

But now, each of them has the opportunity to get a supreme treasure, become the master of the sixth-order universe, and stand on the peak of the universe. How can these universe masters be able to calm down?

And the highest-level powerhouse of the human race will achieve an unprecedented feat-everyone has the strongest treasure, and everyone reaches the sixth level or above!

Not to mention, they still have the cultivation methods of ancient civilizations, and the three masterpieces of "Broken East River". What terrible level will their strength rise to?

It can be said that when the time comes, the human race will go out to the master of the universe, and it will be able to sweep a large group of masters of the universe from other forces.

If you are a little bit abnormal, you might be able to break your wrists in the universe and the strongest in the universe.

This is not impossible. With the inheritance of the Broken East River, these universe masters can improve their own secrets and even have the opportunity to create the sixth-order secrets. With the addition of the strongest treasures and the unique knowledge of "Broken East River", the strength is comparable. Some of the strongest people in the ordinary universe who don't have Xeons.

Like the founder of the Great Axe and the Chaos City Lord, the strength will stand directly on the pinnacle of the universe!

Even if the inheritance and the secret method, it takes time to digest and absorb, but the promotion of the treasure is within reach, and it is real!

All this was brought by Wang Yi.

His prestige in the human race has once again increased!

"Haha..." The Lord of the Star Prison, a tall and burly bear man in a gold silk robe, squeezed in and looked at the two female universe lords who were almost attached to his apprentice. They smacked the bear's mouth, winked at the apprentice, and spoke. Said: "Apprentice, it seems that these two women are interested in you, you have a good chance..."

Wang Yi's face turned dark, and he felt that the teacher was gloating. Whether the two aunts really liked him or not, he couldn't afford to offend him.

He said irritably.

"Teacher, your treasure is gone."

"Don't." The bear face of the lord of the star prison became funny. Everyone has it, but he doesn't. Isn't it too shameful?

"Great Axe, Lord of Chaos City." Wang Yi ignored this teacher who was always an old and disrespectful teacher, and directly said to the two strongest human beings who were sitting on the main seat and watching this scene with a smile: "I have treasures to give. you."

"Oh, UU reading www.uukanshu.com, do we also have it?" The founder of the Great Axe and the Lord of Chaos City were a little surprised.

"Actually, this is not necessary..." Chaos City Lord felt that he had two pieces of Xeon Supreme, and he didn't need to give it away.

Mainly, he was embarrassed to always accept gifts from a junior like Wang Yi for nothing. Ordinary things are not good, but is Wang Yi sending ordinary goods?

"This is not an ordinary supreme treasure." Wang Yi explained, "Ordinary supreme supreme treasure may be able to increase your strength to a level, but what I want to give can increase your strength by two or even three tiers."

The founder of the Great Axe and the Lord of Chaos City were shocked.

"What kind of treasure on earth?" Chaos City Lord asked again and again.

"It's a mechanical treasure..." Wang Yi explained with a smile.

[Chapter 709: Resurrection Crystal](#)

Mechanical flow treasures are very popular in ancient civilizations! Because it has a wide range of uses, and is very good at playing battles at higher levels!

If it is clear that the seventh-order attack power, relying on the mechanical flow treasure, may directly reach the tenth-order attack power. This is something that no secret method of research and creation can achieve, and this is where the charm of mechanical flow lies. Of course, everyone uses mechanical flow treasures, and those who were stronger before will naturally be able to exert stronger combat effectiveness.

But the more you go up, the weaker the mechanical flow treasure. The Lord of the Universe can rival the true gods with the help of mechanical flow treasures. With the help of mechanical flow treasures, the true **** can rival the true **** of the void, which is rare in ancient civilizations.

After hearing Wang Yi's explanation, the Lord of Chaos City and the founder of Great Axe were also very surprised.

"Such a powerful treasure, it must be very precious." Chaos City Lord said.

"It's really precious." Wang Yi nodded in favor, "A True God-level mechanical treasure like this is comparable to 100 ordinary Xeon treasures."

"A hundred pieces of Xeon?" The founder of the giant axe and the Lord of Chaos City all lost their voices.

In fact, the exchange price of the True God level mechanical treasures on the panel is indeed a starting point of 10 million Arcana Points, which is equivalent to 100 Xeon Arcana with 100,000 Arcana Points.

And Wang Yi also talked to Shaoli. Don't forget that "Eight Divine Sage" worth 100 billion treasure points, even now the rich Wang 10 billion can not be exchanged, can only look greedy.

Before the Chaos City Lord and the founder of the Great Axe did not know the value of this mechanical treasure, and did not have a clear concept. At this time, after hearing Wang Yi's explanation, he truly understood the preciousness of such a treasure.

"This treasure is so precious, how did we collect it." Neither the founder of the Great Axe nor the Lord of Chaos City didn't want to accept Wang Yi's favor in vain.

Although they helped Wang Yi a bit, Wang Yi also repaid them.

They are also not the kind of people who can accept gifts from others with peace of mind, especially this kind of treasure that is extremely precious, perhaps ten times more precious than the Xeon Treasure.

Wang Yi also understood the thoughts of the founder of the Great Axe and the Lord of Chaos City, and said: "This time I have received a lot of rewards. I still have treasures like this."

With Wang Yi's persuasion, the founder of the Great Axe and the Lord of Chaos City reluctantly agreed to accept Wang Yi's gift.

It's not the first time anyway, one owe favor is owed, and owe twice is also owed.

At the same time, they secretly determined in their hearts that if Wang Yi needs it in the future, as long as it does not violate the fundamental interests of the human race, they will help at all costs.

Such kind of affection and heart are worthy of their lives to repay.

Of course Wang Yi doesn't know yet.

He just feels to do what he should do.

Although it is not a benevolent righteousness, he will reciprocate those around him, especially those close to him and those who have helped him.

But it is impossible to treat them equally.

Like his teacher, the Lord of the Star Prison, he is clearly only the newly promoted Lord of the Universe, and his strength status is almost at the bottom of the highest level of mankind. But because he is Wang Yi's teacher, everyone else can only get a supreme treasure, the Lord of the Star Prison. It's a whole set.

Of course, the Lord of Star Prison didn't know that the apprentice had prepared a big gift and was still blowing water with the Lords of the Universe.

Although his strength is not very good, his apprentice is awesome.

The Lords of the Universe also admired the relationship between the Lord of Star Prison and Wang Yi.

The relationship between master and apprentice is almost the strongest relationship in the universe except for parents and relatives. Everyone knows that with Wang Yi, the care of the Lord of Star Prison is absolutely indispensable.

That's what Wang Yi thought. When the teacher's strength becomes stronger, he will send mechanical treasures to the teacher.

Now the teacher hasn't even created the ultimate knowledge. To be honest, even if he is given a powerful treasure, he can't comprehend it and can't display it.

In fact, even if Wang Yi now creates the realm of the seventh-order secret technique, even if he successfully cultivates the "destroy" burning divine power secret technique, he will not be able to completely induce all the powers of the mechanical treasure "Dark Blood Vault". It is certain that one is more difficult than the other.

And a set of Xeon Zhibao is enough for teachers to use for a long time.

The masters of the universe finally told Wang Yi the supreme treasure they wanted, and then returned to their seats contentedly.

On both sides of the long table in front of the Great Axe Temple, a famous universe lord sat down again, all smiling, and the atmosphere was festive.

This time, they owed Wang Yi a great favor. Although Wang Yi contributed to the ethnic group, they also knew that Wang Yi gave the treasure. This favor was tangibly owed, but no one cared. Instead, all look forward to it.

The masters of the universe like other forces want the Xeon to be afraid of dreaming, but as a member of the human race, they can easily get a Xeon.

It also makes them feel more of the benefits of being a part of the human race.

"Hahaha..." The founder of the savage brawny giant axe sitting on the main seat smiled and looked at the relaxed and active people at the scene, and said: "Today is a day worth remembering for our human race. Let us thank Hunyuan for making it. all of these."

Human high-level powerhouses responded and agreed. At this time, it can be said that everyone is one mind, and everyone is full of gratitude and admiration for Wang Yi.

All the contributions made by Wang Yi are tangible contributions, and the credit is huge. Who can refuse?

Even the merits surpassed the Great Axe and the Chaos City Lord, and were only inferior to the original ancestor of the previous leader of the human race.

The founder of the Great Axe and the Lord of Chaos City looked at each other. Stand up at the same time.

His face was serious.

"Hunyuan, thank you very much."

They leaned slightly towards Wang Yi at the same time.

"This..." Wang Yi was startled.

Chaos City Lord smiled and said: "This gratitude is to thank you for the entire human race. Your contribution is great, and it is unimaginable, but we have nothing to give you. We can only thank you in this way."

The two strongest people of the human race, the supreme leader expressed his gratitude to Wang Yi in this way.

Wang Yi's blood boiled over.

"Hula."

The other masters of the universe also stood up at the same time.

The Lord of Longxing, Lord of Qingdong, Lord of Wild Jian, Lord of Peng Gong, Lord of Bingfeng, Lord of Jiu Li...19 masters of the universe all looked at Wang Yi enthusiastically, watching young people come from behind, but The little guy who made all kinds of great achievements.

Of course, they look up to Wang Yi now whether it is strength, contribution, or status.

"Hunyuan, thank you very much!"

The 19 masters of the universe also saluted Wang Yi together.

Wang Yi couldn't stop it, he could only suffer.

I sigh with emotion ~www.mtlnovel.com~ The human race has such cohesion, so why not be strong.

It's not without reason that each pinnacle race can stand on top of the primitive universe.

The human race can become one of the most powerful races in the universe if they are not afraid of sacrifices and continue to make contributions. They can provide shelter for countless humans and allow them to thrive. Most people can live and work in peace.

Perhaps some of them are not good, but there is no denying the existence of more brilliance.

The human race is indeed great in some respects.

"This is also my ethnic group..." Wang Yi said silently.

"Everyone..."

Wang Yi took a deep breath and looked around.

Chapter 710: Who said that the Lord of the universe cannot be resurrected?

Once Wang Yi broke through to the Lord of the Universe, the bottom of the panel exchange function was a new function that did not exist before.

【Resurrection Crystal】

[It can be used to resurrect a dead creature in the history of the universe]

[Lord of the Law: Start with a minimum of 100,000 treasure points]

[True God: Start with a minimum of 10 million treasure points]

...

At that time, Wang Yi fell in love.

Everyone knows that the Lord of the universe cannot be resurrected.

In the primitive universe, even the strongest in the universe can only resurrect the top universe overlord, and it must pay a lot of price.

To resurrect the Lord of the universe, the space-time backlash received is enough to cause the strongest person in the universe to fall.

Therefore, as we all know, in the primitive universe and the universe, the Lord of the fallen universe has really fallen and cannot be resurrected.

No one can do it.

This is also everyone's stereotyped thinking.

Wang Yi also once speculated whether the true **** of the void could resurrect the Lord of the universe.

The inability of the strongest in the universe does not mean that the Void God cannot do it.

But he later understood that reversing time and space and resurrecting the dead in the past is the authority that the original universe bestows on the Lord of the universe and the powerful above.

That is to say, the laws of the primitive universe allow you to be resurrected before you can be resurrected.

The strong themselves do not have this ability, they are all bestowed by the original will of the primitive universe!

After all, these creatures were all conceived in the primitive universe, and the primitive universe had this kind of power, and why did those strong people do such things against the sky?

To be more precise, why are they the master of the universe and the strongest in the universe, how can they fight against a primitive universe that is comparable to the **** king, and even more terrifying in true might?

Isn't the original will of the primitive universe giving face? In other words, it is a rule.

So...Void True God, this powerful existence that will be driven to reincarnation within a year after a breakthrough can really resurrect the Lord of the universe with the permission of the original will of the original universe?

There is no explanation in the original work, and Wang Yi can only guess at present.

Maybe it can, maybe not. After all, the laws of the universe's operation are very profound, and no one can tell if it is not that level.

But Wang Yi doesn't need to worry now, because he has resurrection crystals for sale on the front panel.

...

The original universe, Chaos City.

The dim world is occasionally drifting with some chaotic air currents.

In the distance, one can faintly see the sky and the earth cracking occasionally, and even a large number of strange secret patterns can be seen flowing and floating on the edge of the cracked space. That is the manifestation of the original operation of the universe.

An ancient and majestic city stands quietly in the chaotic air currents, as a city built in the original universe, it gives people a sense of weight.

A streamer flew from a distance and stopped above the Chaos City. It was a dark black spacecraft with the appearance of a meteorite. The belly door was opened, and a large number of geniuses flew out of it, looking at the surrounding scenery strangely.

"This is Chaos City? Is this the place where we will live for more than 30 years?"

"It's amazing, I feel so comfortable."

"Yes, I heard that in Chaos City, the law of enlightenment has miraculous effects, and it is not easy for many immortals to come in. It is not bad to come in through the qualifications of geniuses like us."

"I heard that there are 54 Chaos Tablets in Chaos City. The elders in the family told me that they are the real treasures of Chaos City. Each of the Chaos Tablets is left by the greatest existence of our human race, and can guide us all the way to the universe. The level of the country master!" Some geniuses with extraordinary tolerance are full of longing.

"The Lord of the Universe? Is that powerful?" Some of the indigenous geniuses, who were obviously from small places, were ignorant and exclaimed.

At the same time, more young people are looking forward to the next practice career.

This is just a scene that has been continuously performed in Chaos City for countless years.

There are many geniuses here, but how many will be able to stay after tens of thousands of years?

The big waves are scouring the sand, and the strong are always there.

Immortal, not eternal.

Batches of geniuses are selected, and after continuous training and elimination, life and death tempering, one in a thousand can become a talent in the end, which is considered a success.

The countless immortality of the human race has been accumulated in countless years.

In the massive immortality, more venerables will be born.

Then to the Lord of the Universe.

Immortality is the cornerstone, the venerable is the backbone, the Lord of the universe is the pillar, and the strongest in the universe can fully support a peak race and become one of the most powerful forces in the universe.

A black streamer flew in the distance.

"Everyone, I am the reception messenger of Chaos City, and I am responsible for getting you." A pleasant voice sounded, and the black robe woman with colorful feathers on her head had flown over with a smile on her face. "Follow me."

The genius young people selected by the genius battle followed the black-robed woman to leave.

Suddenly, a group of figures appeared silently above the Chaos City.

Every figure is majestic and extraordinary, and the law's breath is vast, like the incarnation of the law.

Headed by a burly barefoot savage man, a majestic middle-aged man in a golden robe, and a young man in a black and red robe, any aura and power overwhelmed the collection of dozens of universe masters around him.

Obviously, they are the center of this peerless existence.

"Hunyuan, we are in Chaos City." The Lord of Chaos City said, his voice contained excitement.

"No problem, right?" He stopped talking.

"Don't worry, leave it to me next." Wang Yi said calmly.

Because of the anxious anticipation of these human powers, Wang Yi simply disbanded the human divine bodies in the Flame Ice Territory, allowing the human divine bodies to recondense in the endless secluded sea of the kingdom of God in the primitive universe, and then appear here with the human powers.

Of course, those "treasures" have to continue to be brought back by the clone, although in fact, as long as Wang Yi exchanges them directly from the panel, it is fine.

In fact, the Tongtian Pagoda still stayed in the Flame Ice Domain with the Yanxing Giant Beast clone, and the Void Zerg clone came back pretending to be.

Seeing Wang Yi so calm and calm, the hearts of the Chaos City Lord, the creator of the Great Axe, and those of the cosmic masters who were agitated and broken, felt a little settled.

God knows how excited they were when they first learned that Wang Yi could resurrect the Lord of the human universe.

It is said that excitement is mild, and they behaved like gaffes at the time.

The strong human races are basically in the same line. For example, the Chaos City Lord and the Great Axe founder are the disciples of the original ancestors, while the Dark Lord and Bingfeng Lord of the Virtual Universe Company are the juniors of Chaos City Lord, and Youhou Lord is the Lord of Darkness. 'S apprentice, the Lord of Longxing has also received the favor of the original ancestor...

Like the master of virtual gold in the battlefield of the giant axe, he can also be regarded as the apprentice of the founder of the giant axe.

And those human powers who have fallen in the past are more or less related to some of them.

Or the elders of the master and apprentice, or brothers and friends, or acquaintances of comrades-in-arms... In short, no one can sit back and watch the news and remain indifferent.

Even if this is not the case, being able to resurrect the lord of the human race and universe is also a very important event.

Upon hearing that Wang Yi had a way to resurrect the dead Lord of the universe, the strong men of the human race experienced a brainstorm again.

Fortunately, they saw the miracles brought about by Wang Yi one after another, and they did not question it. UU reading www.uukanshu.com

But the mood is still uneasy, up and down.

The resurrection of the Lord of the universe is an unprecedented feat in the history of the primitive universe. I have never heard of anyone who has done it, even the strongest in the universe.

Although Wang Yi had the help of the mysterious Tongtian Pagoda, he was still the lord of the universe after all. Whether he could succeed or not is still unknown.

Wang Yi's confident and calm demeanor also made these human powerhouses who look forward to excitement and worry about gains and losses feel a little settled.

It seems that Wang Yi is very confident that he will be successful this time.

But he didn't know that Wang Yi didn't have faith in himself, but in the way of resurrection provided by the panel.

Who said that the Lord of the universe cannot be resurrected?
