

## **A God 771**

### [Chapter 771: Plan of the Holy Land](#)

In the boundless cosmic sea, on a huge conical island "Ice Crystal Island" covered by ice, surrounded by glaciers like silver belts, majestic figures appeared one after another, and the mighty aura filled the four directions.

They also look strange.

Some are covered in pitch-black metal armor, their breath is majestic, and there is a huge shadow of flames rising between their eyes. Others are a woman with silver metallic skin, no hair, wearing a silver hoop with many colored gems on the silver hoop. Some are tall and burly, their whole bodies seem to be made of rock, some are covered in black robes and hold a scepter, and some are full of scales and huge tails. They have different breaths, and they emit overwhelming fluctuations...

More than two hundred cosmic seas, tens of thousands of the strongest in the universe, gathered here.

Although there are many strong people, because they come from different universes, there are many factions, and there is no absolute leader.

And the reason why they can be twisted into a rope is completely the threat of reincarnation and the temptation of the inheritance of ancient civilizations!

But... all of them are the strongest in the universe, and they are the absolute overlords of their respective universes. All of them are arrogant and arrogant, and no one is really willing to obey the command of others.

However, there is something special about it.

The silver armor is simple and simple, with a face like a man carved with a knife and axe. He has a sword on his back. He is indifferent and sharp-edged, but there are not many strongest people in the universe around.

A bare-footed, dark-skinned young man sat cross-legged and wrapped in a white cloth. His eyes were clear sea blue, like a newborn baby. He stared at him, and the surrounding world, time and space were stagnant. His smile had a strange charm. The whole world seemed to be quiet because of his smile.

Beside him, he gathered a large group of the strongest people in the universe, and he vaguely followed his lead.

There is also an alien beast covered with snow-white fluff but with black secret patterns. Its eyes and mouth cannot be seen under the thick fluff, just like a huge ball of fluff, but beside it, there are more than a dozen small animals. No. of fluff balls...

There is also an invisible figure, an existence between the real and the illusory...

A man in blue armor with a domineering gaze, a strong aura, and a calm face that makes it difficult to look directly at him...

Among the tens of thousands of the strongest in the universe gathered by hundreds of universes, there are always high and low, and there are always some super existences that are particularly powerful and overwhelm other people.

But even they, among the tens of thousands of the strongest in the universe, are nothing but special.

"It's amazing." In the seat, a yellow-robed, twenty-four-armed old man looked at the mighty figures around him that were as imposing as mountains and forests, and sighed infinitely in his heart. "So many of the strongest people in the universe are gathered together. I have lived in the Purple Moon Holy Land for a long time, and this is the first time I see it." This is the strongest person in the universe in the Purple Moon Holy Land. I don't know when I will join this alliance. The league provides a lot of news.

Their purpose is only one, to attack the primitive human beings.

For this action, Ziyue Holy Land also spent a lot of effort and made a lot of preparations.

In addition to the Purple Moon Holy Land, there are other holy places present.

The most powerful one is the 'Minghong Holy Land'. There are more than fifty strongest men in the universe coming out of this Holy Land alone, almost comparable to half of the strongest men in the universe in an era of reincarnation, which is a bit appalling.

It is also because of the 'Minghong Holy Land' that spared no effort to promote support and unite with many factions, this time the plan to put pressure on mankind went so smoothly.

"The messenger of the human race has arrived."

With this sound, the powerhouses who were laughing and chatting suddenly became quiet.

Several figures appeared in the distance and swept over quickly.

"A lot of people." From a distance, the city master of Chaos, who felt the terrifying and undulating aura of the ocean on the island, was startled.

Wang Yi, Luo Feng, and the founder of the giant axe also had solemn expressions.

This negotiation is of great importance, and the strong people who can make decisions in the human race will send a divine incarnation to participate.

The incarnation of divine power can dissipate at any time, and the loss is fine.

The one who brought them over was a bird-headed man with a simple and simple armor and smiled at them: "Several, the front is the venue for our meeting."

Although he was a little dissatisfied that humans only sent a few divine incarnations to the party this time, he didn't say anything.

Huh, a few streamers flew to the center of the ice cone island, where a large number of powerhouses have gathered.

Thrones are distributed like stars on the cold Iceland.

Looking at each other,

The pressure is also surging, so that peerless powerhouses like the founder of the giant axe can't help but feel chills.

Too much!

There are thousands of the strongest in the universe, and many eyes are pouring over together, even the strongest in the universe will be shocked.

"Huh, human beings, this negotiation is so important, you actually only send supernatural powers to incarnate, don't you look down on us too much?" A yin and yang voice in the crowd sounded.

The founder of the giant axe said in a low voice: "It's you who want to negotiate the transaction, not us."

"Giant axe, you are so arrogant. I heard that the most powerful one in your original universe was the original ancestor. Because he provoked the original will of the original universe, he was permanently suppressed. After that, you human race will count you as the most powerful, right?" A unicorn man Evil road. "It's a pity that you are only here today as an incarnation, otherwise I can play with you."

The founder of the giant axe was expressionless, "What the \*\*\*\* do you want to talk about? Don't waste your time."

"Okay, let's get down to business first." A gorgeous plant in the field made a voice that was indistinguishable between men and women. "Humans, we let you come here this time to trade information about the inheritance of ancient civilizations with you."

The others also quieted down and looked at the four humans.

The cultivation information of ancient civilizations is what most of them care about most.

As for dealing with humans? who cares.

The founder of the giant axe looked at the plant, "How do you want to trade?"

In fact... the human race had a conclusion long before it came.

However, you have to see the situation of this alliance in person in order to better deal with it.

This is also one of the reasons why the four of them sent their divine power avatars to attend the meeting.

The bare-footed, dark-skinned youth wrapped in white cloth smiled and said, "It's very simple, you humans give us cultivation information, the more detailed and precious, the more treasures we can exchange with you, even if it is Xeon treasure, strange objects, ancient civilization information, cosmic sea Secrets... wait, it's not a problem."

The bare-footed, dark-skinned youth wrapped in a white cloth paused, "Of course... our bottom line is that we can at least cultivate to the limit of the strongest person in the universe, and even transcend reincarnation."

The limit of the strongest in the universe! It is only one step away from a breakthrough.

This is also the result of their discussion. They directly asked for the most important information. I am afraid that the human race will not agree. They would rather die than hand over it.

And in their alliance, the vast majority... or ninety-nine percent of the strongest in the universe have not reached the limit of the strongest in the universe, and the experience and information of cultivating to the limit is what they need most.

As for the information about the cultivation experience from the master of the universe to break through the strongest in the universe, some of the strongest in the universe care about it, and some don't.

This is just the subsection.

What they care most about is themselves.

The barefooted, dark-skinned youth wrapped in a white cloth smiled.

The other strongest men in the universe also looked at the four people in the arena.

The founder of the giant axe, the Chaos City Lord, Wang Yi, and Luo Feng were all silent.

Experience information of cultivating to the limit of the strongest person in the universe?

Of course there are human races! However, how could they be willing to take it out and share it with others.

But at the moment, this alliance is too powerful. Tens of thousands of the strongest people in the universe are coming and aggressive. At a glance, you know that they will never give up.

"Specific?" Chaos City Lord said. "It's impossible for you to come up with something casually. Let's agree. You know, our inheritance is very precious."

"We have already discussed it." The gorgeous plant said, "If you give us the experience information of the master of the universe breaking through to the strongest in the universe, we can exchange ten pieces of treasures worth of the most powerful treasures with you. According to the inheritance The value of information is constantly improving... If you humans are willing to give us enough experience information to cultivate to the limit of the strongest person in the universe, then we are willing to pay a hundred pieces of treasures worth a hundred Xeon treasures!"

Hearing this condition, the founder of the giant axe, the chaotic city master, Wang Yi, and Luo Feng were all shocked for a moment.

One hundred Xeon treasures?

The powerhouses in the venue were also slightly noisy, but they were generally calm.

It's just that some of the strongest people in the universe can't help but have red eyes.

No wonder they were jealous.

A hundred pieces of Xeon and Supreme Treasure, even a holy place can't afford it.

And many of them don't even have a single Xeon.

However, the forces placed in the more than 200 Cosmic Sea Alliance are nothing.

You must know that more than 200 cosmos seas and more than 10,000 strongest people in the cosmos have joined this alliance this time.

Among them, more than 80% of the first reincarnation era, 70% of the second reincarnation era, and half of the powerhouses in the third reincarnation era.

Their participation is also conditional and obligatory, and it is impossible for everyone to enjoy the success.

Those Xeon treasures are also provided by some forces, and then everyone pays a price to compensate.

Spreading it out like this... it is equivalent to two or three cosmic seas producing a Xeon Supreme Treasure, which is not difficult at all.

But they can get a way to cultivate to the limit of the strongest person in the universe... and even rely on this alliance to continue to force humans to hand over more information in the future! Don't make too much money!

It would be naive for humans to think that it is all right after just one transaction!

However, the most members of the alliance are the strongest in the ordinary universe. What they want most is the information that they have cultivated to the limit. So many people yearn for... Even some of the strongest in the universe cannot go against this collective will!

That's why they put forward the cultivation message asking for the limit of the strongest person in the universe.

The founder of the giant axe and others are not stupid, of course they understand that the enemy's heart can be punished!

"Humans, I advise you to agree, you are not at a loss, a hundred pieces of Xeon treasures, your inheritance information is not lost after trading, so many Xeon treasures, we don't even want them. "

"Yeah, if it were me, I would change it directly."

"I advise you not to be ignorant of flattery."

The strongest people in the universe also spoke up in the venue, some full of murderous intent, and some looked on indifferently.

That is to say, the human race is hiding in the primitive universe. They have nothing to do. Otherwise, how could it be possible to take out so many Xeons and supreme treasures and human races, and it would be better to grab it directly.

But the founder of the giant axe and others were very aggrieved.

"What should I do, giant axe?" Chaos City Lord asked.

"What can I do? Inheriting information is absolutely not allowed." The eyes of the founder of the giant axe flickered coldly.

He had been holding back for too long, but this time he couldn't help but get angry.

Wang Yi and Luo Feng also nodded in their hearts, exchange is impossible, but the alliance is not so easy to deceive, just take out some inheritance information and fool it, this is not the Holy Land of the Eastern Emperor.

Chaos City Lord looked around, "Even if we don't exchange, they can't do anything about us."

The alliance is also concerned about this point, and it is not easy to directly force it, so it will ask for the inheritance of the ancient civilization in the name of exchange and the human race. Also give a "high price" for one hundred Xeon treasures!

But the human race is not short of this treasure, and they are not willing to share their inheritance with others.

There is just one point... If you don't exchange it, it means you will hate the alliance. There are more than 10,000 strongest people in the universe... In the future, the human race will not want to mix in the sea of cosmos.

Even the founder of the giant axe and the city lord of Chaos faced so many strongest men in the universe, as long as they were blocked a little, they would also be besieged and suppressed!

The power gap is too great.

The bare-footed, dark-skinned youth wrapped in white cloth seemed to have a high status in the crowd, and there were many strong people surrounding him, smiling with a seemingly gentle, but actually high-level attitude: "Human, think about it carefully, our alliance is very strong. Sincerely, I don't want things to go in a direction we don't want to see."

"The experience and information of cultivating to the limit of the strongest person in the universe is not the most important in the inheritance of ancient civilizations, and it should not be too valuable to your human race. If you hand it over, we will not continue to embarrass you."

The founder of the giant axe can only say: "One hundred Xeons and treasures are too few."

"Then how much do you want?" Seeing that the human seemed to let go, a beautiful woman in red said.

"One thousand pieces." said the founder of the giant axe.

The scene was quiet for a moment.

The smile on the face of the bare-footed, dark-skinned youth wrapped in white cloth also disappeared.

Many people were dumbfounded.

A thousand pieces?

You human race really speak lions!

"Too many." The bare-footed, dark-skinned youth wrapped in a white cloth said in a low voice.

It's not that there are not so many Xeon treasures in the alliance, but they belong to each force, each strong, and Xeon treasures are also very important to them. It is easy to collect one hundred pieces, but one thousand pieces? This is cutting their flesh.

"Too greedy!"

"One thousand pieces is too much. UU reading [www.uukanshu.com](http://www.uukanshu.com)"

The strongest in the universe are dissatisfied.

"Humans, I advise you not to go too far. It's better to trade according to the previous conditions, otherwise... hum." The man in black armor with a violent breath snorted coldly.

The founder of the giant axe said indifferently: "You want to exchange with us, not us humans asking you to make a deal. If you don't want to, you can leave it alone!"

"And, that's just the first condition."

Many tens of thousands of the strongest in the universe frowned.

Are there other conditions?

The founder of the giant axe looked at the strongest people in the universe in front of him. Even if his momentum fell, he was still very tough and strong. "In addition to the previous condition, you still have to make a treaty with us."

#### [Chapter 772: talk broke](#)

Unsurprisingly, the first negotiation between the two sides ended without any results.

The conditions put forward by the Cosmic Sea Alliance are unacceptable to the human race. Similarly, the founder of the giant axe also put forward very harsh requirements, which made the alliance directly feel humiliated.

"Since you don't have the sincerity to negotiate, then don't even think about the exchange." The founder of the giant axe left a message, which made the alliance angry and helpless.

On the surface, the alliance is only taking advantage of the situation to intimidate human beings, "strengthening the outside world and doing it in the middle". In fact, there is really not much they can do.

At most, humans can only be forced to hide in the primordial universe, unable to enter the universe for training, and naturally fewer strong people will be born.

However, this kind of threat is not enough for a force, otherwise the alliance will not come up with treasures to tempt humans.

It's just that human beings are more determined than imagined, and there is no fear of compromise.

...

"This alliance looks crowded and terrifying, but it's actually nothing more than a paper tiger." The founder of the virtual universe, the giant axe, said to the lords of the human universe. "We don't agree to the exchange, and they can't do anything about us."

The Lord of Darkness said angrily: "There are so many cosmos seas, so many holy places and universes, I don't believe that only we humans have the information to cultivate to the strongest in the universe, but those alliances have come to persecute us, and there must be ghosts among them."

Other high-level human beings nodded, yes, this alliance is too weird, and it always seems to be aimed at humans.

Chaos City Lord shook his head, "Other primitive cosmic forces have no inheritance, those holy places are not like us, we need to cultivate a large number of strong, and there will not even be a new cosmic strongest, and the cosmos sea is optional for them. , and only we human beings, who have been inherited from ancient civilizations, need to do this."

The Great Axe founder glanced around. "This time the negotiations with the alliance broke down. The alliance will definitely not be reconciled. It will definitely target us humans and try to force us to trade. However, we are hiding in the universe and don't have to pay attention to them. Let's take a look at the situation temporarily."

Everyone present nodded lightly, and that's all there is to it now.

There are tens of thousands of the strongest people in the universe, and human beings can't compete. Even if the reincarnation era of human beings ends, the best expected result is only one or two hundred strongest in the universe. Compared with the alliance, it is not at the same level.

Wang Yi's face was calm in his seat, looking at his panel information.

[The True God of the Universe Sea has been killed: 379/3000. ]

"The speed of killing is still a little slow." Wang Yi secretly thought.

During these years, Wang Yi has been traveling through the universe, searching for and killing the strongest person in the universe.

But the efficiency is not constant, and there are always some unexpected things, such as the previous Chaos Star inheritance, and sometimes they are involved in some dangerous places, or a certain strongest person in the universe has never been found, forcing Wang Yi to change his goal... So It took hundreds of thousands of years to kill such a small number.

It is equivalent to killing one in a thousand years on average.

And because of Wang Yi's secretive actions, no one has found anyone hunting the strongest in the universe so far. After all, every cosmic sea has fallen into a cosmic strongest. Although there is a lot of movement, the connection between the cosmic seas is now almost the same. Blocked, and occasionally one falls, no one will notice.

Until now, most cosmic seas have not been discovered.

Because the cosmic sea is so big, if the cosmic channel appears in a remote place, it is normal that it will not be discovered for hundreds of millions of years. This is why Wang Yi's hometown of the cosmic sea has only gathered more than 200 cosmic sea alliances. , because other cosmic seas are still living their lives leisurely, and they don't even know that there is a channel on their own site to go to other cosmic seas.

Only Wang Yi can grasp the location of all wormhole passages.

However, he naturally wouldn't tell others, even if it was a human being, he wouldn't tell it, and it would be meaningless to say it.

"However, as time goes by, more and more passages will definitely be discovered. At that time, there will be more powerhouses gathered in the sea of cosmos." Wang Yi thought silently in his heart. "I also have to figure out a way to speed up."

At this moment, Wang Yi's heart was full of killing intent.

...

Eastern Holy Land.

The negotiation of transactions between human beings and many Cosmic Sea Alliances is not a secret matter, and it was quickly spread that the Eastern Emperor Holy Land did not send anyone to join the alliance, but also learned the news.

"Exchange inheritance information with Xeon Supreme Treasure?" The expression of the ancestor of the Eastern Emperor was subtle.

He thought about the loss he suffered from Luo Feng.

Shake your head.

"How can it be so easy to get inheritance from humans."

...

Purple Moon Holy Land.

The old man in yellow robe with four sides and eighteen arms told Ziyue Ancestor the details of the negotiation at that time, and Ziyue Ancestor nodded with satisfaction and his eyes were cold.

"I knew that this human would not hand over the inheritance information so honestly, and I am afraid that the alliance will take action in the future."

The human beings in the primitive universe of this era were regarded by him as a potential threat, so the ancestor of Ziyue was very willing to see human beings face a crisis.

"Ancestor, what should we do next?" the old man in yellow robe asked.

The ancestor of Ziyue said softly: "Then we will continue to wait. It is still difficult to threaten the human race with the strength of the current alliance alone. If human beings are determined not to hand over the inheritance, the alliance will not be able to do anything. Wait, continue to wait for others. many..."

The East Emperor and the first ancestor of Ziyue naturally knew about the 3,000-latitude cosmic sea. At present, there are more than 200 cosmic seas, which are only a small part of the entire cosmic sea. The strongest of the tens of thousands of cosmic seas seems to be many, but the same as the 3,000-latitude cosmic sea. All the numbers are insignificant in comparison.

...

Minghong Holy Land Universe.

In the boundless white fog, a majestic black jade humanoid sculpture with a height of trillions of kilometers stands on the endless land.

The barefooted, dark-skinned youth wrapped in white cloth walked into the mist-filled world and respectfully saluted the stalwart carving.

"Ancestor, our negotiation with the human has broken down."

The human-shaped sculpture's eyes moved, and he looked down at the person below.

Make a thunderous rumbling sound.

"Brand, you did a good job. I have already reported to the Lord about the opening of the Cosmic Sea Passage, which has alerted many great people. It is about the Wu State's cosmic boat. This time, we must exterminate the human beings who have received the inheritance of the Duandong River. ."

"When things are done, I will give you a big reward. Don't let me down, Brand, you are the one who has the most hope of detaching from reincarnation in this era. If you can complete the task and satisfy those big men, it will be easy for you to detach from reincarnation. ."

"Yes, the ancestor, I will do my best." The dark-skinned young Brand said seriously.

...

Afterwards, the unwilling alliance sent people to continue negotiating with the human beings, and the human beings also quarreled with the alliance.

It seems that there is no fear, and the price is raised, and the conditions are getting higher and higher.

Alliance: "One thousand Xeon treasures, we agreed, and the treaty is easy to negotiate."

Human: "Now there are 2,000 pieces, and the treaty has to be revised. What if you violate it."

The league was furious.

Again unhappy.

The alliance finally understood that humans probably wouldn't trade their inheritance information with them. Many strong people were angry, but they couldn't do anything about humans for a while, just like a tiger biting a turtle, with nowhere to go.

And human beings are also blocked in the primitive universe, unable to enter the universe sea, the two sides are deadlocked.

Wang Yi's Cosmic Sea originally had nearly 100 forces, and almost all of them joined this alliance, and even the Primordial Universe must have strong powers to join.

One of Wang Yi's avatars also disguised his identity, joined this so-called alliance, and met some strong people, and of course he was very clear about the situation.

He smiled when he learned that the strongest in the original universe had joined this alliance.

At that moment, the murderous intent in my heart could not be stopped.

Really looking for death.

However, these strongest people in the universe also seem to know that joining this alliance will offend the human race, but they already have their own small universe, it doesn't matter if they don't return to the original universe, and secondly, the human race has been blocked in the original universe and cannot enter. Cosmic Sea, even if you can enter the Cosmic Sea, I am afraid that you will not dare to enter, so you will have no scruples to join the alliance.

They didn't know that Wang Yi had several clones that were active in the sea of cosmos, and he was proud of himself, but they didn't know that his death was approaching, and he didn't even pay much attention to keeping his traces secret.

In the sea of cosmos, a vague figure in the endless void gradually solidified. It was a dark black armor. The armor was formed by a vague human-like shape of golden flame. This golden flame giant was wearing black armor, and the void behind it was There is a huge phantom, and there are countless stars rising and falling in the phantom, like a universe.

This is the 'Founder of the Dark Universe', one of the strongest in the lone universe in the original universe!

The founder of the Black Universe was originally a flame life. Looking at the golden flame, one could feel the endless heat and brightness, but the huge phantom behind the golden flame figure brought endless blackness and coldness! This is the exact opposite of the golden flame.

"The good days of mankind are coming to an end." The founder of Hei Zhou was in a good mood.

The golden flame giant wears black armor, which is the most powerful and most precious Heizhou God armor. The golden flame body looks like ordinary black armor. This black armor is sometimes counted into the golden flame like a liquid, and sometimes it is visible.

"What if the giant axe is strong? What if the Lord of Chaotic Origin killed several strongest people in the universe and is known as the second ancestor of the original ancestor. Now he can only hide in the original universe and dare not come out." The founder of Hei Zhou This time, he aimed at the opportunity to join the alliance, and it was also for himself. He had no friendship with humans.

"There are so many cosmic strongest in the alliance distributed in the cosmic sea, and there are people watching outside all the time. If the human race dares to come out, they will be caught immediately." The founder of the black universe is very clear about the current situation in the cosmic sea. .

There are too many powerhouses in the Cosmic Sea Alliance, not only the strongest in the universe, but also the masters of the universe. The number of masters of the universe is much more than the strongest in the universe. It is easy to find the traces of the original universe powerhouse.

As a result, other forces in the primordial universe have been affected and involved, and they dare not enter the sea of cosmos. Those alliance powerhouses can be caught regardless of whether you are a human force or not, as long as you are in the same universe as human beings.

The founder of the Black Universe is flying in the sea of cosmos, and he is thinking about when the alliance can make humans bow their heads.

The league's first reincarnation era is the most anxious, because they only have one reincarnation era time, and they all have to die if they are not detached.

This is the most powerful person in the universe facing the limit of thousands, facing death, it is conceivable how much they long for the inheritance of human beings, this is the only opportunity they can seize at present.

So the human race refused to trade, making them extremely angry.

The founder of the Black Universe is from the original universe, but it is easier.

"Those poor fellows, if the human race resists to the end and doesn't trade the inheritance information, they will all die." The founder of the Black Universe shook his head. "Even if they get the information, they may not be able to break through in an era of reincarnation."

To get the inheritance information, you have to practice and comprehend, right? It has to take time, right?

Not everyone is a monster like Yuanzu, Wang Yi, and Luo Feng.

Even in ancient civilizations, very few can break through the true gods, let alone the latitude cosmic sea.

Many powerhouses in the alliance are very eager to get the inheritance information, but human beings are too domineering, and the proposed trading conditions have no meaning of trading at all.

Several negotiations have failed.

"Om~~"

The endless void suddenly solidified with space fluctuations.

The founder of Hei Zhou was shocked.

"what?"

A black streamer flew out from the chaotic airflow in the distance.

It was a shadow like a black hole in the abyss, and the specific situation inside could not be seen, but the terrifying pressure that made the void tremble proved that this was a peerless powerhouse.

The overwhelming murderous aura filled the air.

"Block the space as soon as it comes." The founder of Hei Zhou was a little shocked. This is a bad comer.

"However, when did I offend such a strong man?"

There are too many powerhouses in the universe sea, and the founder of the black universe has seen many, but he can't recognize the identity of the black hole shadow in front of him.

The founder of Hei Zhou glanced at the powerful man in front of him, turned around and ran away without hesitation.

"Really cautious." Wang Yi sneered. "But can you run?"

boom!

At the same time, with him as the center, an endless dark field with a radius of about a hundred light-years appeared out of thin air. The deep black light made everything extremely heavy and sticky, and the power contained in the dark light could be felt inside.

"The realm of Xeon and Treasure." The founder of Hei Zhou felt the astonishing restraint and was taken aback. "not good."

At this time, the black hole abyss-like existence behind him has already flown over at an astonishing speed.

"Donghua", one of the three core skills of breaking the Donghe, has already reached an appalling speed.

The streamer flashed like a dream in the void, which is an incomparably far distance.

space, seems to be ineffective for this speed.

"Stay!"

boom! The invisible soul power instantly attacked the founder of Hei Zhou. He was wearing Hei Zhou Divine Armor, but it was armor, not a soul treasure. Although it had some soul protection effects, how could it withstand Wang Yi? This is comparable to the original ancestor. soul attack.

In an instant, the founder of Hei Zhou fell into an illusion, and the speed slowed down.

In the fantasy world, the founder of the Black Universe was extremely frightened.

"No, no, I've fallen into an illusion, such a terrifying illusion..."

Then he felt a tearing sensation in his body and quickly lost consciousness.

...

In the chaotic airflow, the founder of the Black Universe has disappeared, leaving behind a black armor and some treasures.

"This is the fate of being an enemy of us humans." Wang Yi said indifferently.

"Don't worry, you're only the first one, and there will be others with you soon."

And Cosmic Sea soon discovered that the founder of Heizhou had fallen! His mini-universe also collapsed.

Then, the ancestor of the monster!

The third one is Euzou!

The strongest of the loneliness universe in the primordial universe finally found out that something was wrong, panicked, and someone was targeting them.

Is it human?

And the alliance was also alerted, UU reading [www.uukanshu.com](http://www.uukanshu.com) vigorously search.

Of course, they didn't find anything. Wang Yi acted too fast, killing him with one hit, leaving no trace at all.

And Wang Yi also stopped temporarily.

...

time day by day. January, year after year.

For the universe, hundreds of millions of years are just a blink of an eye, and the opening of the cosmic channel has exceeded a million years.

In the cosmic sea of the original universe, there have been more than a thousand cosmic seas, and the number of known strongest men in the universe has reached an astonishing 100,000!

Most of them join the Cosmic Sea Alliance.

[Chapter 773: 100,000 strongest in the universe](#)

virtual universe.

"Now some alien universe masters in Hongmeng have a lot of complaints against us."

On the top of Thunder Island, the palace of the Chaos City Lord, the Chaos City Lord and his junior brother, the Lord of Darkness, walk together.

When the lords of the universe in the original universe joined the Hongmeng, they just wanted to enjoy the shade under the big tree.

Who would have thought it would become like this.

The increasingly huge Cosmic Sea Alliance has blocked the original universe, and no one can get out. Once out, they will face the siege of countless strong men.

Even if it's not from the Human Alliance, those Cosmic Sea Alliances don't have the time to tell whether you are a human race or not. As long as you belong to the primitive universe, they all belong to the human side, and there is no mistake in killing them.

Therefore, it is natural for those alien universe masters to have some dissatisfaction.

It's just that I got on the boat of human beings, and it's too late to think about it.

"I suspect that some of them secretly defected to the Alliance to inform them." The Lord of Darkness said coldly.

In the past, the human race was powerful and had a promising future. It seemed that it would become the overlord of the universe. Of course, many people took refuge in the human race.

But now the human race has to shrink in the primitive universe under the cosmic sea alliance, and many alien races are not guaranteed to have some ideas in their hearts.

They can rely on humans for their benefits, and naturally they will also secretly match up with the Cosmic Sea Alliance for greater interests, and because there is no evidence, humans can't investigate.

The human race has no good way to deal with this situation now, and can only take a step by step.

High-level human beings are also very troubled.

...

The floating Iceland, where the alliance and human negotiated originally, was full of voices.

On the island, there are huge thrones scattered in a ring. On each throne are either alien creatures, or strong people who can stand. They also belong to flesh and blood, energy, metal, rock, and plants. Species... and other life groups, each exudes a powerful and vast breath.

All are the strongest in the universe, densely packed and frightening.

It is ten times more than when humans negotiated before!

With the conscious search of the alliance, the cosmic passages of various cosmos seas are constantly being discovered. Even those who are strong in the cosmos sea will not come, and the alliance will take the initiative to invite them.

There are so many powerhouses in the alliance. Once launched, the passages of the 3,000-latitude cosmic sea were quickly found. The powerhouses of the cosmic sea learned about the inheritance of ancient civilizations. Driven by their interests, most of them agreed to join this alliance. .

So now... The Three Thousand Latitude Cosmic Sea Alliance is gathered here!

Including Wang Yi's hometown of the universe, most of the forces have joined this alliance to persecute mankind together!

"Everyone."

On the black throne, a towering human figure was sitting, and his voice echoed in every inch of the surrounding space and time, "From today, the Cosmic Sea Alliance will officially stand in this cosmic sea!"

"Our Cosmic Sea Alliance has a total of 3,000 cosmic sea companions!"

"So far, not counting the Lord of the Universe, the number of members who have joined is... 279,958!"

"The purpose of our alliance's existence is to survive, to escape from reincarnation!"

The mighty voice echoed over the floating Iceland, and it also echoed in people's hearts.

Desires appear in the eyes of many of the strongest in the universe. Especially the strongest in the universe in the first reincarnation era, the desire is the most.

Without transcending reincarnation, their reincarnation era has passed, and they will all be finished.

So the whole league, the most positive is them.

And the desires of the strongest in other universes are not much worse than theirs.

Transcendence from reincarnation, who does not desire, the sooner they get the guidance of ancient civilization cultivation, the more hope they have.

Therefore, they actively follow the orders of the alliance, just want to get the method to cultivate to the limit of the strongest person in the universe.

However, there are still some strong people who are very calm, and most of those strong people are Holy Land Universe.

Beyond reincarnation? They have ancestors, and they have no lifespan, so the threat of reincarnation is useless to them.

And they also understand that it is not that easy to escape from reincarnation.

The reason why many people participated in this alliance this time is because of the orders of the ancestors of the Holy Land and curiosity about the inheritance of ancient civilizations.

Since it is impossible for the alliance to lose anyway, you might as well join in with the attitude.

Of course, there are also people who want to put human beings to death.

Such as the Purple Moon Holy Land, the Minghong Holy Land...

"The human beings in the original universe are really hateful. Our alliance has kindly used treasures to trade with them, but they have repeatedly refused!" The voice of the strongest man in the universe was cold. "This is to sever our hope of detachment."

"I ask everyone, can this be tolerated?"

"can not!"

Many of the strongest in the universe roared.

The ignorance of the human race really makes them angry.

"From now on, humanity is our common enemy!"

"Dare to cut off our hope of breaking through and block our way. It is intolerable!"

"Exterminate them! Kill them all!"

"Destroy Humanity!!"

...

The crowd is surging!

And the False True Demon God, the Alliance Leader of the Northern Xinjiang Alliance, and the Master of Shihua Island, who were also sitting among the most powerful people in the universe, watched this scene, and were also secretly shocked and excited.

They joined this alliance because of their own interests, and they originally wanted to make a profit.

After all, no matter what, it is impossible for the human race to tell them how to cultivate to the limit of the strongest person in the universe.

This is not in the interest of mankind!

Therefore, they can only get what they want by joining this alliance.

It's just that the death of Ezhou, the founder of Hei Zhou who also joined the alliance not long ago, the ancestor of the monster, sounded a warning bell in their hearts.

Let them understand that the relationship with human beings is already endless, and this time they have completely offended human beings.

So, what they are looking forward to most is to see human beings disappear.

In the primordial universe, almost all the strongest people in the universe stand opposite humans, except for the ancestors of the mountain and the star beast.

"Humans are hiding in the primordial universe, thinking that we have nothing to do with them, they are too naive!" The towering humanoid life sneered. "This time, with the help of our friends from the Purple Moon Holy Land, we have found a way to truly threaten humanity. As long as they want to escape from reincarnation, they must compromise with us!"

"what?"

"There is such a way?"

The strongest people in the universe are talking a lot.

"Huh?" Wang Yi, who was among the strongest in the universe as the Lord of the Void, frowned and became vigilant. "What the \*\*\*\* is Purple Moon Holy Land doing?"

Over the years, his four divine bodies have been active in the universe sea, and because of the blockade and monitoring of the original universe by the universe sea alliance, it is difficult for him to go back, and it will be difficult to come out when he goes back.

And the old man with eighteen arms on all sides in the Purple Moon Holy Land also smiled.

"God Ma Ya, please tell me what the method is."

"Ma-ya old ghost, don't hang your appetite, make it clear."

Many of the strongest in the universe urged.

"Haha, since everyone is so anxious to know, then ask Star Master Ran Shi of the Purple Moon Holy Land to explain it to everyone." The majestic figure laughed loudly.

The old man with eighteen arms on all sides stood up, and the eyes of hundreds of thousands of the strongest people in the universe converged on him at the same time.

The old man with eighteen arms and four sides, Star Lord Ran Shi, was very excited. As the strongest man in the ordinary universe, he was only one of the most powerful men in the universe. When did he get such a moment of attention? .

"Everyone." Star Lord Ran Shi had a reserved smile, "Our Purple Moon Holy Land was originally one of the two Holy Land Universes in this cosmos sea. It was already beyond reincarnation and has always been in no contest with the world, but the humans of this primitive universe have repeatedly challenged us. Purple Moon Holy Land, our Purple Moon Holy Land is not so easy to bully, if that's the case, then fight back fiercely, otherwise others will think that our Holy Land is easy to bully."

Many of the strongest people in the universe disagreed, and some laughed. Who cares about the disputes between you and humans, we just want to know what you will use to deal with humans.

Seeing everyone's reaction, Master Ran Shi followed up and said, "Everyone knows that it's not that easy to threaten humans, because they are hiding in the primordial universe. Those of us who do not belong to the primordial universe are instinctively repelled by the primordial universe. At most, it can only be active in the cosmic sea, and there is no way to enter the original universe."

Everyone in the arena nodded. If it weren't for this, they would not have been unable to take a mere human race with so many of the strongest people in the universe.

"However, the human race has a fatal weakness, a weakness that cannot be hidden!" Star Lord Ran Shi smiled and threw out a sentence.

"That's their mini-universe."

Floating Iceland was quiet for a moment, and the strongest men in the universe who were still whispering stopped discussing, and looked at Star Lord Ran Shi together.

Small universe?

However, it seems that some forces know the news in advance, or know more, such as some holy places, which are still very calm.

"Star Lord Ran Shi, make it clear, how did the small universe become the weakness of human beings?" a white insect-like life hissed.

The other strongest men in the universe are also full of doubts.

The small universe is the evolution of the kingdom of God when the strongest in each universe breaks through. It is separated from the original universe and independent of the universe sea. It is also the source of the strength of the strongest in the universe.

Without the small universe, the strongest person in the universe would not die and his vitality would be severely damaged, and he would be weaker than the strongest person in other universes.

More importantly, their path to promotion must rely on a small universe.

Without the mini-universe, transcendence of reincarnation would not be possible.

This shows the importance of the small universe.

The small universe is so important, but it has been floating in the sea of cosmos without any cover, but no one has ever worried about it.

Why?

Just because it's so hard to destroy!

It is currently known that, apart from the three Jedi, there is no power that can threaten the small universe. The small universe with a diameter of 100 million light-years contains an incomparably huge power. The strongest in the universe itself cannot match this power. Because this is the product of the evolution of the universe!

The small universe itself has unparalleled protection, and no one of the strongest in the universe can shake it, but if they dare to break into the small universe of any of the strongest in the universe, the strong in the small universe with the help of the origin of the universe can easily suppress them. ! Even, as long as the owner of the small universe is willing, they can completely stop them from entering the universe.

"Under normal circumstances, of course, there is no way to threaten a small universe." Star Master Ran Shi didn't give a shit, "But this is just an ordinary situation, but it doesn't mean it's impossible."

"Our ancestors of the Holy Land have a great opportunity to transcend reincarnation and find a way to deal with the small universe of mankind."

"Some forces should also know that the small universe is not indestructible."

"Of course, because of the limitations of the original will of the original universe, I can't say much."

Some Holy Land forces in the throne nodded.

They come from the Holy Land Universe, and of course they also know some secrets that are difficult to know about the Universe Sea.

For example... Destroying the small universe of the True God requires the Void True God to break out the peak combat power.

Destroying the small universe of the Void True God requires... Eternal True God erupts in peak combat power.

Of course, they may not know the latter, but they absolutely know that the small universe is not indestructible and unshakable.

"Humans are hiding in the primordial universe, and we can't do anything about the primordial universe." Lord Ran Shixing sneered: "In the primordial universe, they are indeed safe, but so what? If they want to escape from reincarnation, they must rely on the small universe, no more. In a small universe, what do they use to escape the reincarnation and get the inheritance of the ancient civilization? The three

reincarnation eras have passed, and when the time limit arrives, the same will be annihilated in the years."

Many of the strongest in the universe are anxious. "Master Ran Shixing, please tell me what the method is."

Wang Yi also looked at it with cold eyes, and the killing intent towards Ziyue Holy Land became stronger and stronger in his heart.

Star Master Ran Shi said: "Actually, it's nothing special. Like the seven gods of the Divine Eye Clan here, they have also obtained some heritage heritages, carefully studied them, and even have some joint attacks. Like some Holy Land universes, their The way of fighting and training is very unique."

Lord Ran Shixing's voice was enthusiastic, "Our Purple Moon Holy Land has a joint attack method, which allows a large number of the strongest in the universe to unite, condense their strength together, and exert stronger attacks."

"Everyone knows that when some powerhouses jointly attack, the power is generally far beyond the individual."

"Ten seventh-order powerhouses attacked together, exceeding the eighth-order."

"Eighth-order, more than ninth-order."

"Ninth order, more than ten orders."

"Quantitative change leads to qualitative change!"

"Our alliance has hundreds of thousands of the strongest people in the universe. The entire universe sea, without that universe sea, once gathered so many numbers and such powerful forces!" Star Lord Ran Shi's eyes were frantic.

It was quiet on the floating iceland, and everyone was moved by the words of Lord Ran Shixing.

Yes, hundreds of thousands of the strongest in the universe, bursting together, how terrifying the attack power will be?

"Thousands of the strongest people in the universe are united, but there is no way to make a small universe. That's 10,000. If 10,000 won't work, then 100,000!" Star Lord Ran Shi said loudly, "We have nearly 300,000 cosmos experts. Powerhouse, plus we have a joint attack method, hundreds of thousands of the strongest in the universe will attack together, how powerful will it be? Even a small universe can't bear it!"

"Humans, can they keep their mini-universe?"

"If we can't keep it, they have to compromise. We can ask for everything from human beings, let them hand over the ancient civilization's cultivation guidelines, and let them bow their heads!" Lord Ran Shixing sneered. "If you don't bow your head, their small universe will be destroyed by our alliance army! Without the small universe, they are doomed to perish!"

At the moment in Iceland, there is only the sound of the wind whistling, and the eyes of every strongest person in the universe are fiery.

Wang Yi's eyes were also extremely cold.

Master Ran Shixing's sonorous and powerful voice sounded high.

"This time our alliance will win!"

#### [Chapter 774: threat!](#)

Wang Yi immediately sent the news back, and the high-level human beings were shocked when they learned of it.

"Nearly 300,000 strongest in the universe?"

"The method of joint attack?"

"Destroy the small universe?"

The human powerhouses were frightened, anxious and angry. Especially knowing that this joint attack method was provided by the Purple Moon Holy Land, and even hated the Purple Moon Holy Land to the core.

However, the most important thing now is how to solve the current predicament.

"Giant axe, Chaos City Lord, can your small universe stop this attack?" Peng Gongzhi's face was solemn.

This has never happened in the universe sea, and someone can directly destroy the small universe.

After all, there has never been such a powerful force in the sea of cosmos.

Hundreds of thousands of the strongest in the universe, who would have thought of this before?

The founder of the giant axe and the Lord of Chaos looked at each other, and their faces were not very good-looking.

Seeing their expressions, the other Lords of the Universe in the palace also felt heavy in their hearts.

The small universe is the foundation of the strongest in the universe. If the small universe is destroyed, their way forward will be cut off.

More importantly, human beings will give birth to the new strongest in the universe in the future, and I am afraid that the small universe will not be able to keep it. Without a small universe, there will be no breakthrough, and in the future, there will be no way to escape from reincarnation, and human beings will perish. This is unbearable for human beings.

"The alliance really wants to force us to death." The Lord of Darkness's voice was low and cold.

"For the sake of the inheritance of ancient civilizations, they can't do anything." The Lord of Desolate Mirror said angrily.

Wang Yi was also in a heavy mood. He didn't expect that this alliance would be so cruel. All of a sudden, he caught the key of human beings.

In fact, it is very difficult to destroy a small universe. Even if hundreds of thousands of the strongest in the universe are united, how to guide the attacks together to exert the greatest power is not a simple matter. If it is not provided by the Purple Moon Holy Land, it is estimated that the alliance will still A way to threaten humanity has not been found so quickly.

"Purple Moon Holy Land, \*\*\*\* it!"

"Ziyue Holy Land is damn, but what can we do now?"

"Is it really like what the alliance said, handing over the inheritance information to others?"

"What if you don't hand it over? Do you want to watch the giant axe and their small universe be destroyed? The giant axe and their small universe are destroyed, and we humans are completely hopeless."

"Calm down, I don't think the alliance's words are credible. I haven't seen the truth yet. Who knows if the alliance is deceitful."

In the palace, the high-level human beings quarreled, unable to do anything.

It is really too far apart from each other, hundreds of thousands of the strongest in the universe, this is a desperate number.

Humans now count the original ancestors who were permanently suppressed, plus the founder of the giant axe and the city lord of Chaos, and they are only the three strongest in the universe.

How to fight?

Wang Yi is also thinking about ways to break the situation.

"If it doesn't work, then that's the only way to do it." Wang Yi's eyes were cold and ruthless. He glanced at Luo Feng next to him. Luo Feng was also angry, and his eyes flashed with icy light. He seemed to sense Wang Yi's gaze. Come over, nod.

It is estimated that both of them thought of going together.

...

Somewhere in the sea of cosmos, a dark red armored humanoid creature stood in the void, five pairs of wings spread out behind it, and the aura was boundless.

At his feet, lay a broken corpse of a true god.

"Cosmic Sea Alliance, I hope you don't force me to use the 'source' of my wings. That price is unbearable for you." Wang Yi's heart was filled with murderous intent.

[The True God of the Universe has been killed: 2879/3000. ]

In recent years, as the universes of all parties have targeted the human race, Wang Yi's killing has become more wanton.

He has not deliberately chosen a target, as long as he is the strongest in the universe in the sea of cosmos, he can kill if he can.

Good and evil? never mind.

The wings that Wang Yi got by signing in were the same as Luo Feng's "Golden Wings of Chaos", both mechanical treasures used by the Eternal True God.

The divine power belonging to the powerhouses of ancient civilizations is transformed into extremely terrifying energy through the "source", and then sent out through the attacking wings of the six pairs of wings! Of the six pairs of wings, the most important "source" wings are the sharpest and strongest.

source, unique.

The rules of operation of the Universal Law are limiting.

Like Xeon, not many were born.

Like "Murder Wu Yuyi", it belongs to the glimmer of life in the dark, and it is also scattered, whether it can be obtained depends on luck.

The eternal gods in ancient civilizations store the divine power through mechanical treasures, and the divine power of the true gods in the universe cannot be supplemented. Obviously, the supreme rule in the dark is affecting everything, and the 'source' of killing Wu Yuyi in the original book Obviously, it appeared here in a way that complies with the supreme rules, so that Luo Feng could use it.

The source is the complete body of the 'Golden Wings of Chaos' provoked by the Eternal True God. I am afraid it is the energy stored under the ultimate power of the highest level. , even the small universe of the Void True God can't hold it.

In the original book, eight million world beasts gathered together, and they were all killed by Luo Feng with the help of the power of "Yuan"!

Hundreds of thousands of true gods in the universe sea? Afraid to die!

However, the source can only be cast once!

Wang Yi didn't really want to use this kind of big killer on the Cosmic Sea Alliance.

However, if there is no way out in the end, Wang Yi or Luo Feng will have to use "source".

...

"The Cosmic Sea Alliance has sent a message. Let us give a reply within a hundred years. If we do not hand over the inheritance information of the ancient civilization, we will destroy a small universe of us."

In the virtual universe, in front of the Giant Axe Temple, all the human powerhouses gathered, and the face of the Chaos City Lord was cold.

The strong human beings are all angry.

"The alliance is really deceiving!"

But a sense of powerlessness came to their hearts. In the face of such a powerful alliance, who could resist?

cosmic sea.

The mist-like chaotic airflow pervades the surroundings. Not far away, there is a huge celestial body in the void in front of it. It's just that the cosmic membrane wall is too broken. At a glance, I can see hundreds of broken irregular holes and cracks, which make the chaotic airflow completely shuttle through the cosmic sea and the cosmic membrane wall. With that crack, the edge of the crack in the cosmic membrane wall is shaking.

Looking from a distance, the broken space debris, there are continental fragments in the space debris. Huge mountains are floating. Some huge broken corpses are also floating. "Wow..." A piece of the cosmic membrane wall fell off at a high place in the distance. The entire universe is in the process of collapsing. Sometimes the cosmic membrane wall falls off. The space debris occasionally collides with each other and splits again, causing some continents to shatter. The cracks are smaller.

This is a small universe that has long since fallen into disrepair.

The strongest in the universe perished, and his small universe naturally fell into disrepair.

And there are a large number of towering figures scattered around, all of them exuding monstrous weather.

"Everyone." The barefooted, dark-skinned youth wrapped in white cloth, the leader of the 'Minghong Holy Land', 'Brand', smiled. "The human race will definitely not easily believe us, so we have to give them a warning, otherwise they will not easily hand over the inheritance that is regarded as life."

He looked around and said with a chuckle, "Everyone, shouldn't you only satisfy some of the inheritance information that you have cultivated to the limit of the strongest person in the universe? Don't you want to get more?"

"So, we have to show the strength that can destroy the human race and let them understand their situation!"

The strongest people in the universe are densely packed and overwhelming, and their hearts are hot.

Yeah, their alliance is so strong that they can crush everything...and of course have to get more.

Humanity? It's just an ant, and the Alliance can run over it at will.

If you want him to inherit, will he dare to give it?

Now the entire league is mobilized by the prospect of a lucrative future.

The barefoot, dark-skinned youth wrapped in white cloth saw this scene with satisfaction.

Obtaining the inheritance of Duandonghe is just the first step.

The people behind him are more concerned about whether the "Wu State" force that has perished has continued power... But it doesn't matter, if the human race is wiped out, everything can be solved.

Even if human beings hand over their inheritance, he will not let it go easily.

Joke, you say hand over the inheritance? Who knows if you are secretly hiding the most important things?

He has already made arrangements. Regardless of whether humans compromise or bow their heads, the Alliance will not let them go.

The small universe of the human race must be destroyed in the end.

Once this era of reincarnation has passed, human beings will not have a small universe, and they will all be destroyed along with the original universe.

After the task is completed, he can also get the award of the ancestor. In the future, he will be free from reincarnation and go to the ancestor, and he will have a promising future.

The bare-footed, dark-skinned young man wrapped in a white cloth had a burning heart.

Nearly 300,000 of the strongest people in the universe are arranged in battle formations. Everyone has their own position, and the divine body of each strong person is controlled at a height of 100,000 kilometers.

By this time, it doesn't matter whether the seventh-order universe is the strongest or the eighth-order, ninth-order, or tenth-order universe's strongest.

Because they only need to use their own attacks according to the battle formation, there is no treasure secret method, and the power of the Divine Body of the strongest person in each universe is actually almost the same.

Speculation based on the information received by the Holy Land cosmic forces.

Thousands of the strongest men in the universe can attack together according to the battle formation, and they can reach the threshold of the Void True God!

The combined attack of 10,000 strongest men in the universe can reach the level of the Void True God!

The combined attack of one hundred thousand strongest men in the universe can reach the pinnacle of the Void True God!

It should be noted that, because of the limitations of the original universe rules, in the universe sea, the strongest person in the universe only shows the divine power of the universe's master ten thousand times gene.

Therefore, the power of their gods has actually been weakened a hundred times, so the strongest people in the 1000s of universes use the battle formation to perform a joint attack to reach the threshold of the true \*\*\*\* of the void.

In fact, this battle formation is even more powerful on the battlefield of ancient civilizations!

As long as a hundred elite true \*\*\*\* warriors can play perfectly with the help of the battle formation, they can almost match the weakest true \*\*\*\* of the void.

Of course, the true gods of ancient civilizations are absolutely powerful, whether they are treasures or secret techniques, they are all first-class, and even some secret techniques of ancient civilizations, such

as divine power burning, can easily reach the ninth-order or even tenth-order combat power. That is incomparable to the poor and backward cosmic strongest in the universe.

Moreover, what the ancestors of the Purple Moon Holy Land gave was only an incomplete joint attack method. It could only be used to guide the power of the true gods in all battle formations together to attack together. As for other changes? Not at all.

But that's enough.

The alliance just wants to destroy the human small universe, and it doesn't really want to fight, of course, it doesn't need such a perfect battle formation.

Besides, in the sea of cosmos, where did they come from the enemy.

The ancestor of Ziyue just wanted to destroy human beings, but he would not do superfluous things.

If it weren't for the existence of the alliance, this joint attack method would be useless.

After all, it is the Purple Moon Holy Land, and there are only hundreds of cosmos masters and a few cosmos strongest people, what can they do?

Only when the alliance gathers a large number of the strongest in the universe can this move exert a terrifying lethality, and it can even destroy a small universe.

Of course, the ancestor of the Purple Moon Holy Land is not worried about threatening his own small universe, because the number of powerhouses in the alliance has not yet reached the level of the eternal true god.

The members of the alliance are all from the 3,000-latitude cosmic sea. There are countless factions, and no one can dominate. Now they are united because of common interests. If they get the inheritance of ancient civilizations, who would be willing to listen to others?

Therefore, it is the human beings in the primitive universe who are really in desperate situation. Their small universe will face the threat of the alliance army next.

"Burning Divine Power!"

With a voice transmission from the strongest person in the universe who is in charge of leading the command.

Nearly 300,000 of the strongest people in the universe in the battle formation began to burn their divine bodies one after another!

"boom!"

The entire sea of cosmos seemed to vibrate, and hundreds of thousands of the strongest in the universe gathered together to explode, burning divine power. How huge should this power be?

The chaotic airflow was emptied in an instant, and the laws of the universe lost their effect.

Only the burning divine power is left, which is so dazzling in the void.

Hundreds of thousands of the strongest people in the universe are each 100,000 kilometers high, up and down, left and right, maintaining a certain distance, but they still cover a range of more than one light-year, like a huge sphere.

The entire one light-year range is full of boiling divine power.

and spread far away.

That monstrous power.

Across hundreds of billions, trillions of light-years away, you can feel the vast breath.

And in the distance, there are countless cosmos masters from other cosmos seas watching this scene, and they feel that their souls are trembling, as small as ants facing the flood disaster.

This is a force far beyond their imagination.

"Attack!" With an order, all the strongest in the universe in the battle array launched their own attacks on the dilapidated small universe in the distance at the same time.

The so-called destroying the small universe is actually bombarding the "source" of the small universe. The source of a small universe must be at the very center, and it cannot move at all. As long as the source can be annihilated, the small universe will naturally be destroyed.

However, now the alliance is just a demonstration of power, and the goal is a small universe with no vitality at all, used to deter the human race.

"boom!"

"boom!"

"boom!"

...

One by one, the strongest people in the universe, UU Reading [www.uukanshu.com](http://www.uukanshu.com), all launched their attacks according to the position of the battle formation, and huge beams of divine power blasted out one after another, and everyone launched their own attacks at the same time perfectly.

Nearly 300,000 huge beams of divine power streak across the space, like droplets of water condensing into a river, and in the next moment they condense into an unimaginably huge beam of light.

It is so huge and so dazzling.

The whole world was eclipsed in front of this beam of light.

Wherever it goes, the space is annihilated into true nothingness.

Then, it instantly slammed into the collapsed and dilapidated small universe.

#### [Chapter 775: ultimatum](#)

The membrane wall of the small universe was directly broken down, the beam of light kept flying, and the space debris, continents, and corpses of gods along the way were all destroyed as long as they were

involved... Disappeared at the end of the small universe at a speed far exceeding the speed of light billions of times.

Finally, the small universe with a diameter of 100 million light-years was completely broken down!

...

This scene was seen by countless creatures in the entire universe.

"Small universe! It's all broken down!"

Everyone was shocked.

...

The entire process of the Cosmic Sea Alliance attacking the small universe was also transmitted back to the human race.

When they saw that the dazzling beam of light pierced through the entire small universe and disappeared in an unknown place, the faces of the higher-ups of the human race were extremely ugly, and the atmosphere fell into deathly silence.

They understand that this is the Cosmic Sea Alliance showing off its force to them.

Prove that they are capable of destroying the human mini-universe.

Human populations are the fish on their chopping block, and they can kill whatever they want.

Originally, the human race still had a fluke mentality, thinking that the Cosmic Sea Alliance might just scare themselves, but the scene before them let them know that the Cosmic Sea Alliance really has the ability to bring mankind into a desperate situation.

Once the small universe is destroyed, human beings can only survive this era. Once the original universe is destroyed, all human beings must die unless they seek refuge in other small universes, but is this possible?

The human race would rather perish than take refuge in other forces.

And the Cosmic Sea Alliance sent an ultimatum: "In a hundred years, if you humans don't hand over your inheritance, you will destroy all your small universes!"

In the face of such a threat, human beings are aggrieved and angry, but they cannot resist.

The strength gap is too large, and it is impossible to do it if you want to struggle hard.

Hundreds of thousands of the strongest in the universe... It is equivalent to the human race fighting against 3,000 cosmos seas alone. This gap is really too big.

Not counting a freak like Wang Yi, any Cosmic Sea is actually much stronger than the current human beings. What is more important for human beings is their potential for development. As long as they continue to develop, it is normal for hundreds of the strongest in the universe to grow in the future. thing.

But if you don't get over the difficulties before you... I'm afraid the human race will have no future.

When human beings encountered difficulties, all parties in the primitive universe also had other thoughts.

In the beginning, when the Cosmic Sea Alliance surrounded and blocked the original universe, the masters of the Hongmeng universe just complained and complained, but they were still very obedient.

But now, as soon as the Cosmic Sea Alliance shows the strength that can destroy human beings, new changes have appeared within the Hongmeng.

There are members who quit Hongmeng!

There are also various rumors.

"Humanity is over!"

"It's really bad luck. I thought it would be beneficial to join human beings at first, but now there is no benefit, and I can't even enter the sea of cosmos."

"Let's go, there's no future for staying here."

"Humanity is over."

...

Originally, there were more than 400 universe masters who joined the Hongmeng in the universe over the years, which is close to one-third of the entire universe.

But as the situation changed, half of the lords of the universe suddenly withdrew!

And as time goes on, more and more members quit.

For those who quit, humans do not stop it, and stand on the sidelines.

Seeing that mankind was in a desperate situation, some forces also gloated at the misfortune. After all, mankind was very arrogant before. For example, the original peak races such as the demon race, the machine race, and the Zerg race, who were forced to leave their homes by humans, were even more happy to see the unfortunate human beings, and at the same time secretly raised expectations in their hearts.

As soon as humans are finished... Maybe they still have hope of returning to the peak.

But they are just thinking.

No matter what, the human race is now the strongest force in the primordial universe! The Cosmic Sea Alliance can bully human beings. That is because they have strength. No one in the primitive universe dares to provoke humans at this time, even if withdrawing from the Hongmeng Alliance is the limit of what those forces can do.

The powerhouses of the original universe are also worried that if they don't draw a clear line with humans now, what should they do when someone breaks through the powerhouses of the universe?

And there are also words from the sea of cosmos, as long as the primitive universe and the human race are separated from the human camp to draw a clear line, they can forget about the past.

In this way, more and more people are separated from the human race.

They are afraid of offending humans, but they are even more afraid of being targeted by the Cosmic Sea Alliance!

Besides, a lot of joining human beings is for the purpose of passing on information. If passing on information is not exclusive to the human family, then adding or not joining human beings is unnecessary.

"Let's go, I don't have the same heart as human beings, it's okay to go."

Luo Feng stood at the height of the temple in the starry sky of the original secret realm, watching the alien universe masters leave, and said silently in his heart.

The human race has never cared about the masters of the universe.

With them or without them, it will not help the current situation of the human race.

Humans also guessed that there may be cosmic sea forces behind this, and they fell into trouble, put more pressure on them, and created a feeling of being an enemy inside and outside the human race, isolated... But they don't care anymore.

"Cosmic Sea Alliance!" Luo Feng's eyes were cold, as sharp as a knife.

He actually only had three pairs of wings now, but the pair of wings that contained "Origin" had already been obtained, but "Origin" could only be used once, Luo Feng would not use it until the last resort.

And the Cosmic Sea Alliance, as if trying to die, is constantly challenging his bottom line.

Regardless of Luo Feng or Wang Yi, they are now full of killing intent towards the Cosmic Sea Alliance.

...

The Cosmic Sea Alliance still doesn't know that there is a knife held high above the head, death is imminent, and it is still related with the results of the previous battle formation.

Many members of the Cosmic Sea Alliance feel that the human race will immediately bow to the Cosmic Sea Alliance when they see this result.

Inheritance at your fingertips!

"The human race can only compromise! Or watch itself go extinct!" They were very sure.

As long as humans are not stupid, they will definitely make the right choice.

Handing over the inheritance can continue, if not handing over, it will definitely perish.

How to do it, do you still need to think about it?

...

The ancestral gods, the seniors of the ancestral gods, gathered in the ancestral temple.

"Humanity is in big trouble now." The ancient ancestor sighed.

Lord Cold Whale, one of the guardian beast gods, sneered: "Who let human beings inherit the ancient civilization, who is not jealous? Before the human race dominated the primordial universe, no one was their opponent, but now the universe channel suddenly appeared, so many When the Universe Sea comes, everyone wants to get this inheritance, and it is inevitable that human beings will suffer."

For this inheritance, who did not envy the Universe Sea at the time.

The ancestral religion is no exception.

The ancestral gods seem to be powerful now, and they are supported by the origin of the universe. But once this reincarnation era ends...you have to leave the original universe! At that time, without the support of the original universe, the strength of the Ancestral God Religion will definitely be greatly reduced. The masters of the universe and the three Ancestral Gods of the Ancestral God Religion must not consider the matter of transcending reincarnation?

It is a pity that although they are not the enemies of the human race, the human race will not pass it on to them for no reason, and they are in the ancestral religion, so they cannot impress human beings.

Can only look envious.

Now that mankind is in a difficult situation, these ancestral gods are also more gloating.

The double-faced ancestral \*\*\*\* sighed: "The opening of the cosmic channel is too sudden."

Even the ancestral religion has not been instructed by the original will of the original universe.

Logically speaking, the original will of the original universe will usually have instructions to change the situation of the universe sea like this, but this time, the original will of the original universe seems to be suddenly blinded, and there is no instruction.

"The Cosmic Sea Alliance is so powerful that it can destroy even a small universe. The human race has no ability to resist at all," said the young ancestral god. "In my opinion, if the human race has no other way, it should compromise."

"It's time to compromise." Everyone else nodded.

Hundreds of thousands of the strongest people in the universe are too scary.

...

The Holy Land of the Starry Beast Alliance, the Beast God Realm, is vast and vast.

In one of the continuous mountain ranges, on the top of one of the mountain peaks, the ancestor old man in white robe was sitting on the side, and sitting opposite him was an old man in green robe with crystal horns, and the two old men sat opposite each other. .

Whether it is the ancestor or the mountain guest, both of them are clones here.

"Sit on the mountain, it seems that your apprentice is in trouble." The ancestor smiled.

"This Cosmic Sea Alliance is really surprising." The mountain guest shook his head. "However, until the last moment, the results have not been revealed yet, who knows what will happen."

"Oh?" Ancestor looked at him in surprise, "Do you think humans can fight against the Alliance?"

That was hundreds of thousands of the strongest in the universe, a number that made him feel chills just thinking about it.

In his opinion, this power is invincible in the sea of cosmos!

Even if the original ancestor came out, he would still be helpless.

"The universe is huge." Sitting Mountain Guest glanced at the ancestor and said slowly: "Maybe human beings have some way to fight against the Cosmic Sea Alliance."

The ancestor raised his brows, "You are very confident in human beings, do you get any news from human beings, tell me about it."

The mountaineer laughed, "How come, I'm just guessing. I'm a loner, and the human race doesn't believe me. How could I know such an important thing."

The ancestors were full of doubts. "Your apprentice is Luo Feng. He got the inheritance of the Duandong River. You old guy, shouldn't he have benefited a long time ago!"

The First Ancestor was very jealous of those who sat on the mountain.

He believes that the teacher who is sitting on the mountain must have benefited! After all, in the vast universe, the most important relationship is between master and apprentice! How can you not be jealous of the mountain guest... the first ancestor of the starry sky?

However, the ancestor did not show it. After all, from the bottom of his heart, the deeper the communication between the ancestor of the starry sky and the mountaineer, the more afraid of the mountaineer.

The mountain guest glanced at him, "I said, the old beast god, the other strongest lone walkers in the universe have joined the alliance and want to gain benefits, why don't you go?"

The Star Ancestor smiled lightly and said: "It's very simple, if humans are unwilling to hand over their inheritance, then it's useless for me to join the alliance. If humans can't bear the pressure and are forced to hand over their inheritance, then the inheritance will be everywhere. Yes, the human race doesn't think inheritance is so important, so based on my friendship with Luo Feng, I think it's easy to get from him how to cultivate to the limit of the strongest person in the universe. What's more, human beings The ethnic group is the overlord of the primordial universe in this era, and my starry beast still has a group, and it is not the strongest in the universe who are truly alone, so why take the risk to offend mankind."

The ancestor of the starry sky stroked his beard proudly, "Look, how many of the strongest in the universe who rushed to join the alliance's original universe, how many survived? The Star Alliance is not involved in anything, nothing at all."

The mountain passer nodded, "You are a cunning and cunning man, and you think very clearly."

"Haha, they were confused by the forces of the alliance, and they were too impatient." The ancestor shook his head. "It's just that I didn't expect that human beings are so powerful. At that time, the Alliance sealed off the sea of the universe, and human beings could actually kill the three of them. The only one who can have this strength is the incredible legendary man. The Lord of Chaotic Source, it is said that he has several clones."

The mountain guest looked at the ancestor of the starry sky and said, "Speaking of which, a clone of the master of the chaotic source is the flame star of your starry sky beast."

The ancestor of the starry sky had a strong smile on his face. "That couldn't be better."

...

The topic of the human race is brought up everywhere in the various forces of the universe.

They all believed that the human race would soon compromise under the threat of the Cosmic Sea Alliance.

If the human race didn't compromise...that would be stupid.

The ethnic groups have all perished, so what's the use of guarding the inheritance?

And handing over the inheritance does not mean that the human race will lose the inheritance. After all, some of the inheritance information can still be preserved.

It is nothing more than spreading the inheritance of human beings. There are losses, but they have not yet reached the point where they need to resist to the end.

...

The entire sea of cosmos, the primordial universe is discussing when human beings will surrender, and the news is spreading everywhere, and there are also constant discussions within the human race, and countless people are worried.

"Dad, I heard that the Cosmic Sea Alliance is forcing us humans to hand over our inheritance, right?"

Several of Wang Yi's sons and daughters came to question him.

Wang Yi smiled slightly, "Don't worry, nothing will happen. In any case, our human race will not become extinct."

In the eyes of his children, Wang Yi has always been the existence that supports the sky. Seeing his father's indifferent appearance, Wang Yi's children are also at ease.

Indeed, the human race is now the strongest party in the primordial universe. Besides, as long as the inheritance is handed over, it should be fine, right?

Many people in human beings also think the same, but Wang Yi knows that things will not be so simple.

He has a clone to sneak into the alliance, and naturally he sees more.

Some forces, especially the Purple Moon Holy Land, are very hostile to humans. Even if humans hand over the inheritance information, I am afraid that they will not give up.

But many high-level human beings do not realize this, UU reading [www.uukanshu.com](http://www.uukanshu.com) Even the Chaos City Lord and the founder of the Great Axe probably thought that the Alliance wanted to inherit.

They do not know that human beings are really facing a real crisis of extinction.

And Wang Yi wants to change all that.

"Um?"

Wang Yi, who was in his palace, suddenly felt something, looked up, and saw Luo Feng in a white robe walking out of the starry sky outside the earth.

"Wang Yi."

"Luo Feng."

The two greeted each other and then found a place to sit.

Luo Feng sat down and looked at Wang Yi. "Wang Yi, what do you think of this ultimatum from the Cosmic Sea Alliance?"

#### [Chapter 776: reply!](#)

In the backyard of the palace, a red-robed long-haired man and a white-robed short-haired young man sat opposite each other.

Wang Yi glanced at Luo Feng, "You should have your own ideas when you come to me."

Luo Feng nodded and said, "I do have an idea, maybe it can solve the Cosmic Sea Alliance."

"Oh?" Wang Yi raised his brows and showed a smile. "It just so happens that I have an idea too."

Luo Feng was thoughtful and said, "It seems that we have come up with a plan."

The two looked at each other and laughed immediately.

At the beginning of the universe, there was news that Wang Yi's wings could control time and space. At that time, Luo Feng doubted whether Wang Yi had obtained the same treasure as 'Murder Wu's wings'.

Looking at Wang Yi's expression now, he felt that his guess was correct.

Luo Feng said sternly: "I got three pairs of wings, which contain the 'source' transformed by the superpowers of ancient civilizations with their own divine power. Once activated, the power is infinite, even the most powerful weapons can be destroyed, and it may be able to solve the universe. Sea Alliance."

Wang Yi nodded, "Exactly, I also got five pairs of wings. Likewise, I also have a 'source'. However, it can only be stimulated once, and the energy inside will be released all at once, and it is difficult for me to control it."

Luo Feng said clearly: "Me too, it seems that your wings should come from the same place as mine."

Wang Yi thought to himself, then you are wrong.

Luo Feng said, "How about it, did you do it or I did it? Or to be safe, we two come together?"

Luo Feng still didn't know how powerful 'Yuan' was.

But Wang Yi is very clear.

Eight million world beasts have all vanished into ashes, and hundreds of thousands of true gods are naturally no problem.

"I'll come, you watch from behind." Wang Yi said, "If there is any accident, you will take another shot."

Luo Feng nodded, "Alright, we are all masters of the universe, we all have clones, even if we lose one, it won't get in the way."

Don't miss out on this shot.

The high-level people of the human race don't know this secret weapon, and they have to tell them before doing it.

After all, this is the battle that will determine the future destiny of mankind.

...

virtual universe.

"A hundred years is about to pass, and we should make a decision."

The Chaos City Lord looked at the many strong human beings in front of him, and his heart was heavy.

The atmosphere in front of the temple was also very heavy, and every human powerhouse had a solemn expression.

Because of the coercion of the Cosmic Sea Alliance, the human race can only hand over the inheritance. For the human race, this is a great humiliation.

However, the situation forced the human race to do so, after all, this is not the time to act with anger.

They have to think about the continuation of the group.

The Chaos City Lord looked at the powerhouses of the same family, his voice was low, "During this time, I also sent people to communicate with the Cosmic Sea Alliance. They are very tough. Except for threatening us to hand over the inheritance information, other conditions are not discussed. That is to say, the alliance claims our inheritance for nothing, but it doesn't have to pay anything, and it doesn't promise us any conditions."

Anger appeared on the faces of the strong human beings present.

"It's not surprising. From time to time, the Alliance admits to taking the lifeblood of our human beings, and of course it won't negotiate with us." Chaos City Lord laughed at himself.

The lord of Peng Gong, the lord of darkness, the lord of Bingfeng, the lord of Qingdong... Each and every human powerhouse is a little sad in their hearts.

When were their human race forced to such a level?

But now people are the knife and I am the fish and meat, no matter how angry they are, the human race has to agree to the conditions of the alliance.

The weak have no right to speak.

Head down.

Just bow your head.

Everyone has hatred in their hearts, but what can they do?

The vast majority here, not even the strongest in the universe, have no ability to change the situation at all.

He doesn't even have the ability to fight to the death and break the net.

"Everyone." At this moment, a voice sounded.

The human powerhouses present all looked at the sound.

Seeing the calm-faced Chaotic Origin Lord.

When the Lord of Chaos saw the Lord of Chaos speak, there was a glimmer of hope in Haze's heart inexplicably.

"Hunyuan, what are your thoughts?"

When the Lords of the Universe saw that it was the Lord of Chaotic Origin, who had always brought miracles, their hearts could not help but raise expectations.

Maybe, what can the Lord of Chaotic Source do?

Wang Yi said, "I have a way to solve the entire Cosmic Sea Alliance."

The eyes of the higher-ups of the human race lit up one by one, but some couldn't believe it.

"Hunyuan, do you really have a way? That's the strongest of hundreds of thousands of universes, and it can destroy even small universes." The founder of the giant axe couldn't help but said.

"At least 90% sure." Wang Yi said.

The powerhouses all took a deep breath.

Ninety percent?

Looking at the calm and confident appearance of the Lord of Chaotic Origin, it should not be a lie.

They also felt that the Lord of Chaotic Origin would not make jokes about such a major matter of human existence.

But to solve the Cosmic Sea Alliance, is it possible?

The powerhouses of the human race were both pleasantly surprised and full of uneasy doubts.

Luo Feng watched from the side, and was amazed when he saw Wang Yi's confident appearance.

He has seen the endless blade of light that destroys the sky and destroys the earth in the wing space. That is the power that the wings emit at will in the state of not recognizing the master. It far exceeds the limit of the strongest person in the universe. Of course, he knows that the terrifying power of the wings .

However, he is not as confident as Wang Yi after all.

"Nine percent? I hope Wang Yi can really do it." Luo Feng said in his heart.

Facing the excited and expectant gazes of the high-level human beings, Wang Yi smiled slightly and said, "Luo Feng and I have obtained the treasure of the ancient civilization's mechanical wings..."

With Wang Yi's remarks, the eyes of the surrounding high-level human races are getting brighter, but some are still full of worries.

"Really?"

If it is unsuccessful, it will only anger the Cosmic Sea Alliance, and the small universe of the human race will be completely destroyed.

For the human race, this is an unbearable consequence.

"Let Hunyuan try, I believe him." The founder of the giant axe and the Chaos City Lord looked at each other and smiled at the same time.

Although other human powerhouses are worried, the founder of the giant axe and the Chaos City Lord have said so, and they no longer object.

"Hunyuan, please."

A human powerhouse looked at the red-robed black-haired man.

Wang Yi's face was solemn, "Don't worry, everyone, we will definitely succeed."

Humans cannot afford to fail!

Once it fails, it not only means that the three small universes owned by the human race will be destroyed by the Cosmic Sea Alliance, but also in the future, I am afraid there is no place to turn around!

After all, an era of reincarnation has passed, and the human race without the sustenance of the small universe can only usher in destruction.

But if Wang Yi can succeed... the entire universe sea will change into a different appearance.

...

As the date of the Cosmic Sea Alliance ultimatum looms, the entire Cosmic Sea is paying attention to humanity.

"The time is almost up, and there is still no answer from humans."

"Do they agree or not?"

"Do they dare to disagree? If they disagree, the small universe of mankind will be destroyed."

Today, there are almost 300,000 of the strongest people in the universe who joined the alliance in the cosmos sea of 3,000 latitudes. They are all anxious to know the reaction of human beings.

After all, most of their real goals are for the inheritance of ancient civilizations, to escape from reincarnation, not to destroy human beings... What does the life and death of human beings have to do with them? If human beings really fight to the end and would rather die together than hand over their inheritance, then the alliance will have to sit on wax.

The biggest strength of the alliance is that they can destroy the small universe of the human race, so that the human race cannot survive this reincarnation era.

But don't forget, if human beings don't hand over the inheritance information, many of them will not be able to survive this era.

In the first reincarnation era, it must be finished first!

The second era of reincarnation, the third era of reincarnation...not much better.

Because it is too difficult to break free from reincarnation by yourself, and almost all forces do not have this confidence.

Like a cycle of times, there are generally 30 to 40 strongest people in the universe! With help, maybe about 100 will be born.

But in history, there have been generations of reincarnation eras, tens of thousands of reincarnation eras, and each reincarnation era has a group of the strongest in the universe... How many are the strongest in the universe? But how many are transcendental reincarnations?

The alliance is also afraid that human beings are really stubbornly resisting, and they are really desperate to burn the jade with the Cosmic Sea Alliance!

The situation now depends on who is tougher... The only difference is that the alliance can destroy the small universe of the human race, but the human race can't do anything about them. This is the alliance's greatest advantage to mankind!

The Cosmic Sea Alliance is currently taking the initiative!

Therefore, although some people's hearts in the alliance are fluctuating, they are still waiting for the reply of the human race a hundred years later.

Yes? Or refuse?

...

And the various forces in the primitive universe that are hostile to the human race are also very complicated.

On the one hand, they hope that the small universe of the human race will be destroyed, and their arrogance will be severely suppressed. At the same time, if they want to spread the message of inheritance, then they also have the opportunity to get a powerful inheritance.

None of them is the strongest in the universe, not even a small universe. In the future, the original universe will be destroyed. The strong people of their ethnic group may be able to take refuge in other universes, but the ethnic group will be destroyed, which they do not want to see.

Moreover, the burden of each small universe is limited, and those forces may not be willing to accept them.

Therefore, it is best to become the strongest in the universe by yourself.

Their aspirations are lower, and what they want most is the cultivation method to become the strongest in the universe, and this human being is not willing to satisfy them.

Compared with the continuation of the ethnic group and the transcendence of reincarnation, the previous grievances are nothing.

Therefore, all parties are paying attention to human beings and watching their responses.

In their opinion, human beings have no ability to resist under the oppression of the Cosmic Sea Alliance, and the Cosmic Sea Alliance will not negotiate with them. The next thing to do is nothing more than two choices.

To survive, or to destroy?

...

Purple Moon Holy Land Universe.

"Oh?" The vague purple-robed phantom stood there, "Haven't the humans answered yet?"

"Yes, the first ancestor." One of the two strongest men in the universe in the Purple Moon Holy Land, the 'True God Jue Hua', stood respectfully under the steps. "Although the human race and the Cosmic Sea Alliance have been communicating and negotiating in private, there is no clear answer yet."

The Purple Moon Holy Land has been secretly promoting the alliance to target the human race, and it has also found that it is not only their holy land universe that wants to target the human race... It's just that the ancestors of the Purple Moon are more eager to see the human race destroyed.

Therefore, he spared no effort, and even took out the method of joint attack of the battle formation, so that the alliance has the power to destroy the small universe of the human race.

The ancestor of Ziyue is very ambitious, and regards this cosmic sea as his own territory, the original universe, and even his forbidden area. Therefore, the human race with unlimited future potential that has risen from the original universe has become a thorn in his eyes.

Even if he established the Eastern Emperor Holy Land of the Holy Land Universe earlier than him, he would not take it seriously. His goal was bigger than anyone thought.

"The original universe...is mine." The ancestor of Ziyue murmured, "Even if the 3,000-latitude cosmic sea channel is opened, it is still too far away. My small universe is in this cosmic sea, and the original universe is my best goal. ."

The ancestor of Ziyue said to the divine incarnations of the two strongest people in the universe standing respectfully in front of him: "You continue to stay in the alliance, pay close attention to human trends, report to me as soon as possible if you have any news, and make friends with those Holy Land forces and other universes. The strongest, let us have more influence in the league."

Without seeing the destruction of the human race for one day, the ancestor of Ziyue could not be completely relieved for one day.

True God Juehua and Star Lord Ran Shi left.

"Fight me?" In the palace, the ancestor of Ziyue, who was alone, looked at the scenery outside and sneered. "The old guy in the East Emperor is not a threat at all. You are my real opponent who is destined to be."

...

The ancestor of the Eastern Emperor has also been paying attention to the human situation. In the Eastern Emperor Holy Land Universe, there are also the strongest people in the universe who joined the Cosmic Sea Alliance and learned a lot of information.

"The human race is estimated to have reached its limit. Next, they have to agree to the conditions of the alliance." The first ancestor of the Eastern Emperor secretly said.

He actually has no hostility to the human race, but Duandonghe inherited it from humans, so he tried every means to get some inheritance from humans.

He also doesn't care about the fate of human beings, he only cares about how much useful inheritance information he can get from human beings.

Even if the first ancestor of the Eastern Emperor Holy Land did not care about the experience and method of cultivating to the limit of the strongest person in the universe, what he cared about was that the experience method that surpassed the limit of the strongest person in the universe was really helpful to him.

The first ancestor of the Eastern Emperor secretly looked forward to it.

"I was still having a headache how to get inheritance from humans."

"It's time for this Cosmic Sea Alliance to be established."

The Eastern Emperor Sacred Land had traded with Luo Feng before, but the result was that the meat buns beat the dog without going back, and suffered a small loss.

The loss of the two Xeon Supreme Treasures is nothing more than the failure to get the inheritance information that he wants is what really makes the first ancestor of the Eastern Emperor dissatisfied.

Can the Cosmic Sea Alliance destroy the small universe?

The first ancestor of the Eastern Emperor did not care.

Being able to destroy the True God Small Universe does not mean that it can destroy his Void True God Universe.

There is no power in this cosmic sea that can directly threaten his small universe. UU reading  
www.uukanshu.com

...

Qingfeng Realm, the dark place, the beast's lair.

An ugly two-headed world beast with a black body was chewing on the corpse of another world beast.

"Cosmic Sea Alliance? Humph." The two one-eyed eyes of the two-headed beast flickered fiercely. "If the time hadn't come, I'd let you know how awesome it is."

Wang Yi's world beast incarnation is still too weak, and it is not yet at the third rank.

This kind of strength went to the universe sea, and it was also to send food to the universe sea alliance.

A few powerful cosmos powerhouses join forces, and they can beat him to the core.

Not to mention that in the face of the army of hundreds of thousands of Cosmic Sea True Gods, nothing can be changed.

And as the beast grows, the original will of the original universe of the universe sea will also pay attention here.

He also needs to strengthen himself as soon as possible.

#### [Chapter 777: blooming death](#)

Time passed, and in a blink of an eye, it was time for the Cosmic Sea Alliance to give humanity an ultimatum.

"It's all about this time..."

"Humans haven't answered yet!"

On the huge floating iceland, the towering human figure's voice was low and full of anger!

"This is contempt for our alliance!"

Surrounded by the thrones, the faces of many of the strongest people in the universe are not very good-looking.

They originally thought that human beings would obediently hand over their inheritance, but who knew that human beings did not do as they wished, and for a while, many strong people felt annoyed.

This inheritance is related to their breakthrough path.

"This human being really doesn't know what to do!"

"It seems that humans haven't understood the situation, so let's let them understand!" The evil being with a humanoid upper body and a wriggling tentacles on the lower body made a whistling sound that shocked the soul.

"Go to the sea of cosmos, destroy the small universe of mankind, and let them know the consequences of disobeying us!"

"It is indeed time to teach humanity a good lesson."

"Let them die!"

The strongest men in the universe nodded slightly.

They don't care about human beings.

"However, which target do we choose?" asked some of the strongest in the universe.

"Choose the Lord of Chaos? Or the founder of the giant axe? Or the original ancestor?"

"Choose the original ancestor." The dark-skinned young man wrapped in white cloth smiled and said, "The original ancestor is the earliest and greatest leader of the human race, and has extraordinary significance to the human race, destroying the earliest and greatest leader of the human race. The universe, it is estimated that the human race can only be heartbroken."

Some of the strongest people in the universe think it makes sense.

"Lord Brand is right."

"I think it's a good proposal."

"Well, I agree too."

"Then choose the original ancestor."

After some quick talk, the Alliance decided to choose the first goal of destroying the original mini-universe.

After making a decision, the powerhouses of the Cosmic Sea Alliance set off, and they flew in the direction of the original ancestral small universe like locusts crossing the border.

And this news quickly spread all over the world, and mankind also learned from Wang Yi for the first time. After all, Wang Yi has always sneaked into the alliance in disguise.

in a virtual universe.

"The alliance has already begun to act. Their first goal is the original ancestor's small universe." Wang Yi said, looking at the large group of strong human beings in front of him.

"what?"

"How dare they!"

"Those \*\*\*\* dare to attack the original ancestor's universe!"

The powerhouses of the human race were angry.

The original ancestor was an existence that rose when the human race was weak. Back then, it was the number one powerhouse in the sea of cosmos. Even if it was suppressed, it still displayed the 'virtual

universe' to benefit mankind. He also led a group of strong men, such as the giant axe, chaos, darkness, and ice peaks, all of them were led by him. Without him, there would be no Chaos, Giant Axe, Darkness, and the others, like Luo Feng, it would be difficult for them to achieve what they are today. The great contribution to human beings and the high status can be imagined.

You must know that the holy land of human beings "Chaos City" is in the original universe of the original ancestor, and its importance can be imagined.

"Hunyuan, Luo Feng, please." Although the Chaos City Lord and the others were angry and anxious, they had no choice but to rely on Wang Yi and the others to save the world.

"Don't worry." Wang Yi and Luo Feng looked at each other, their eyes full of killing intent.

"We will never let the guys from the Cosmic Sea Alliance succeed."

The situation has developed to this point, this time, the human race and the Cosmic Sea Alliance have been immortal!

"Whoosh!" A figure suddenly condensed in front of them. "Teacher!" Chaos City Lord and the Lord of Darkness all showed joy, and even shouted respectfully, it is usually difficult to see the original ancestor once.

"The original ancestor." Wang Yi bowed slightly.

Yuanzu looked at Wang Yi and Luo Feng. "Are you sure this time?"

Wang Yi said calmly: "If there is no accident this time, the Cosmic Sea Alliance will be destroyed."

"Oh?" Yuanzu didn't expect Wang Yi's answer to be so confident and decisive, and his heart shook slightly. He nodded slightly. "I have been suppressed, I can't do anything, and the future of mankind is up to you."

"Don't worry, the original ancestor." Wang Yi said, "The Cosmic Sea Alliance will soon disappear."

...

The original small universe naturally had a 'cosmic channel' connected to the original universe, and Wang Yi and Luo Feng had actually arrived in the original universe.

Of course, human beings are ready to temporarily transfer Chaos City and personnel out, and now the initial universe is almost empty.

Behind him were five pairs of dark red armored men with open wings and three pairs of short-haired youths with silver wings standing in the void filled with chaotic airflow, looking up at the cosmic membrane wall with a cold face.

Outside the original universe, there are small universes one after another. These small universes are floating around. Because they are all small universes of the original universe's true gods, they are very close to the original universe.

Of course, there used to be more than a dozen small universes, but now there are nearly half of them. Like the true gods of the five pinnacle races, and the most powerful lone walkers in the universe... most of them were slaughtered by Wang Yi.

"Wow!" The chaotic airflow vibrated, and towering figures appeared in the void, staring at the small universe in the distance.

"This is the small universe of human ancestors?"

"Similar to other small universes, I don't see anything special."

"This mini-universe will soon be gone."

"If humans dare to refuse our request, they will regret it immediately."

Wow, wow, there are constantly teleportation of the strongest people in the universe, and this area is quickly filled with figures with powerful breaths, and the number continues to increase.

"The original ancestor's small universe." A black mist figure was also in it, his gloomy eyes stared at the small universe in the distance, "I didn't expect that my virtual real devil would one day destroy the original ancestor's small universe, really happy. "

The False True Demon God, the strongest in the lone cosmos, is also the one who offends humans more ruthlessly. He once accepted the invitation of the Mechanical Father to assassinate Luo Feng, but he was unsuccessful.

After the rise of the human race, the days of the false gods began to be difficult.

He was also worried that the human race would settle accounts in the autumn, so when the Cosmic Sea Alliance appeared, he joined without hesitation.

At the same time, there are also Ezhou, the founder of Heizhou, the ancestor of monsters, the leader of Northern Xinjiang, the master of Shihua Island, etc. The strongest soloists in the original universe, the fall of Ezhou and the others shocked the false gods. It made the False True Demon God feel even more that the human race must be destroyed.

"Humph, if you don't hand over the inheritance, the small universe of mankind will be destroyed, so I don't have to worry about anything."

He glanced at a few companions who were in similar situations. After joining the alliance, these strongest lone warriors in the primitive universe were destined to be enemies with humans, and wished that humans would fall out of luck as soon as possible.

Soon nearly 300,000 of the strongest in the universe arrived, and they were arranged in a formation, densely packed and overwhelming, as many as the stars in the sky.

And one of Wang Yi's divine bodies also changed his appearance, disguised his breath and mixed in it.

"It's almost time for people to arrive." A cold light flashed in Wang Yi's eyes. "The fun is about to begin."

He waited for so long, just waiting for everyone in the Cosmic Sea Alliance to gather together.

Since we have to do it, of course, we will kill them all, and there will be no future troubles!

...

In the distance, there are also a large number of Lords of the universe rushing over to watch.

They watched with excitement and excitement as hundreds of thousands of the strongest in the universe gathered outside the small universe of mankind. The masters of these universes came from the 3,000-latitude cosmic sea, and the number was dozens of times more than the strongest in the universe, adding up to thousands. The Lord of the Universe seems to be endless at first glance.

Of course, in order to prevent accidental injuries, they were all far away from the scene, and they dared not stand behind the small universe, after all, the Cosmic Sea Alliance army was on the opposite side.

"A lot of the strongest in the universe!"

"I didn't expect that Fu Zhang would see such a grand event one day."

"The small universe of mankind is about to be destroyed."

"Who told them not to agree to the conditions of the alliance, according to me, they are asking for their own death."

"I don't know what humans think. If they continue to resist, they will really die."

The Purple Moon Holy Land and the Eastern Emperor Holy Land are also paying attention to this action.

In Ziyue Holy Land, the ancestor of Ziyue sneered: "Humans are really stupid, and they really think inheritance is more important than life. If they continue to be stupid, it will save me a lot of effort."

...

On the other side, the first ancestor of the Eastern Emperor frowned. He didn't understand how human beings thought, and his life was gone. What's the use of inheritance?

...

Sitting Mountain Guest and the ancestor of the star beast also came to the universe sea in person, watching the movement over there from a distance.

"The cosmic sea alliance army is about to start. I don't know what human beings can do." The ancestor of the star beast looked at the old man in green robe next to him. "Sit on the mountain, do you know?"

Sitting Mountain Guest frowned and did not speak, staring at the small universe in the distance.

I kept muttering in my heart.

...

Endless chaotic void.

One after another towering figures stand here like mountains, arranged in formations to form a sphere with a diameter of about one light-year, so that every strong person in the battle formation can launch

his own attack at the same time, causing hundreds of thousands of people to attack. The attacks of the strong come together.

And the temporary commander in the center is the strongest person in the universe who is good at soul connection and command, similar to the Zerg mother emperor.

"Everyone is ready, then... eh?"

Hundreds of thousands of the strongest in the universe saw a figure flying out of the cosmic membrane at the same time.

"Someone came out."

"Is it a human messenger?"

These cosmos powerhouses all looked at the figure with five pairs of wings behind it, and searched for information on the powerhouses of the human race in their minds.

"It is the Lord of Chaotic Sources of mankind."

"Is that the Lord of Chaotic Origin, who is suspected of being the ancient civilization heritage treasure, the Tower of Heaven, who has killed several of the strongest people in the universe as the Lord of the Universe?"

Countless the strongest in the universe looked sideways.

They care about the inheritance of ancient civilizations, and naturally collect human data. They know that there are two evil geniuses in this era of the human race. One is the Galaxy Lord Luo Feng who received the inheritance of the Duandong River, and the other is the more perverted Chaotic Origin Lord Wang Yi.

And the Lord of Chaotic Source is a legend of the universe sea, with many incredible deeds.

However, they either scoffed at or dubiously scoffed at some of these overly exaggerated descriptions.

A master of the universe, how strong can he be?

To say that the lord of the universe can match or even defeat the strongest in the universe with some sky-defying means, they may believe it, but if it is said that the lord of the universe can kill the strongest in the universe with one move, they think it is absurd!

Some Holy Land universes have learned more about the ancient civilizations, and they are still skeptical about it, because the ancient civilizations do have many genius perverts like the masters of the universe who can easily crush and kill the strongest in the universe, but want to appear in the sea of cosmos, it is a very difficult thing.

In any case, the Lord of Chaotic Source did indeed enter their eyes.

...

"It is the Lord of Human Chaotic Origin." Sitting mountain guest and the ancestor of the starry sky giant beast who were hiding in the dark all stared at him.

...

"It's that human." The ancestor of Ziyue, who was looking at the image in the Holy Land universe, frowned. I felt a little unhappy.

Besides Luo Feng, what he hates most is this Wang Yi.

To him, these are potential threats out of control.

...

"Human." The ancestor of the Eastern Emperor also looked curiously at this young powerhouse who was well-known in the universe.

...

Countless outer universe Lords also looked at this lonely figure.

At this moment, Wang Yi attracted much attention.

...

It was Wang Yi who flew out.

He stood outside the small universe, looking at the mighty, boundless cosmic sea army in front of him, his eyes deep and calm.

"Humans!" A voice came from the army, "Are you guys here to surrender and beg us not to destroy your small universe?"

The cosmic sea alliance army is approaching, and the human race sends people out at this time, other than bowing to the alliance to compromise?

Many powerhouses in the Cosmic Sea Alliance are relieved.

It is said that humans can't be so hard-headed, you see, aren't they compromising?

Wang Yi looked at these strongest men in the universe and said calmly, "I'm here to send you on your way."

Wang Yi's voice spread deep in the endless void, and even in the distance, many lords of the universe could hear it.

Wang Yi's heart lake was calm and unwavering.

The Cosmic Sea Alliance in front of him wants to force mankind to a desperate situation, and wants to make mankind extinct, then there is only one thing he has to do...kill them all! Not one left!

Regarding the life and death of ethnic groups and the future destiny of countless human beings, there is no mercy or morality. Do it, do it! Let the sea of cosmos, from then on, there will be no things that can threaten human beings.

"What?" Many people in the Cosmic Sea Alliance suspected that they had heard it wrong.

"He's courting death, kill him! Even the lord of the universe dares to utter nonsense in front of us!"  
Some of the strongest people in the universe reacted and shouted angrily.

"kill!"

"kill him!"

"Since human beings do not repent, let their small universe disappear together!"

Other cosmic sea alliance powerhouses also responded.

And this time-

"call!"

Wang Yi, who was hundreds of millions of kilometers high, suddenly spread out his huge, dazzling beautiful wings, his eyes were cold, and his voice was full of absolute indifference. UU reading [www.uukanshu.com](http://www.uukanshu.com)

"Go to hell!"

...

At the moment when the black armored giant with a height of hundreds of millions of kilometers fanned the five pairs of dazzling wings behind him, the army of hundreds of thousands of the strongest in the universe was still preparing for a joint attack. The edge of the uppermost wing of the five pairs of wings suddenly flew out an incomparably beautiful light.

Countless blade lights!

It was as if a gust of wind was blowing from behind Wang Yi, and a piece of petals fell. Its speed reached an unbelievable extreme, and it flew over the endless area ahead in an instant.

Cover the void.

At this moment, the void seemed to rain a shower of petals, falling on every strongest person in the universe.

like blooming death.

### [Chapter 778: This man has gone crazy](#)

Wings, as the ultimate treasure of a single mechanical flow used by the Eternal True God, Wang Yi can only control it in the roughest way.

The only thing he can do is to release the 'source' of the wings and control them to cover the past.

The source is the energy that the Eternal True God urges with the help of the complete chaotic wings. I'm afraid that some of the combat power of "Saint" will be lost, but unfortunately it can only be used once, and it will be gone after one time. Wang Yi naturally had to use it carefully.

And this time, if it wasn't for the cosmic sea alliance's persecution, Wang Yi would not have erupted.

And the hundreds of thousands of the strongest men in the universe distributed in an area with a diameter of one light-year in front of them also saw that the endless winged light blades that destroyed everything flew over the sky and covered the earth, feeling the terrifying power beyond imagination, and their souls were trembling. , they immediately realized that the attack must not be allowed to fall on them.

"Do not!"

"Attack quickly!"

"attack!"

Under the threat of death, all the strongest in the universe went crazy.

The space fluctuation has been blocked, and it is impossible to teleport at all. Seeing the speed of the wings and light blades, it is too late to run. They are not as stupid as the strongest in the universe. withstand. There's still a chance.

The powerhouses of the Cosmic Sea Alliance are like drowning people grabbing the last straw and preparing to attack immediately—

At this moment, no one noticed that a figure in the crowd showed a strange smile.

"Explode!" The figure exploded with a bang.

"Boom!!" There was a loud noise that destroyed the sky, and the endless energy waves rushed in all directions in an instant. The influence range was extremely wide, and almost half of the entire sphere formation was covered.

"what!"

The entire space was shattering and collapsing, and the surrounding Cosmic Sea Alliance powerhouses were caught off guard. Countless powerhouses were involved, and the impacted ones rolled and flew away, and the entire formation was disrupted.

Once the formation is disrupted, it is impossible to make a combined attack.

And even if these hundreds of thousands of the strongest people in the universe jointly attack, they will only reach the peak of the Void True God. Compared with the power of the "source" of the wings, it is completely different and incomparable.

No matter how hard you struggle, the Cosmic Sea Alliance is doomed to fail.

"what!"

"not good!"

The panic-stricken powerhouses watched in horror as countless blades filled their field of vision until—

Countless feathered light blades are like a rain of petals in the sky and the sky, beautiful and dreamy.

But the results were horrific.

"what..."

"Do not."

"kill."

All the strongest in the universe are struggling, some are attacking, some are trying to cast special secrets, and some are trying to escape...

"Hey!" In front of these beautiful petals, the body of the strongest man in the universe was easily cut open, swept across by petals, and smashed directly, and the heart of the true \*\*\*\* in the body was also shattered...

beauty. silence. This vast void seems to have fallen into an unprecedented silence. There is no sound.

Hundreds of thousands of the strongest in the universe, distributed within a light-year range. He was instantly enveloped by this endlessly beautiful blade light. This blade light was extremely beautiful and possessed a supreme and perfect beauty. Pieces of blade light petals reflected in the eyes of every strongest person in the universe. In the face of this endless terrifying blow, everything became void, and the sound was also annihilated.

Wang Yi, who was hundreds of millions of kilometers high, gently flapped his wings, and the area of several light-years in front of him was like a beautiful picture, which was instantly shattered, and everything on this beautiful picture of several light-years was annihilated. , all annihilated, turned into nothingness.

...

The endless blade petals continued to move forward after sweeping through the area of several light years, and finally rushed out of millions of light years, tens of millions of light years, rushing out in a fan shape, annihilating everything that devoured the space, and I don't know how much it rushed out. far, and eventually dissipated.

Countless other cosmos masters of the cosmos were watching the fun from behind, but now they are also affecting Chiyu.

The endless light blade petals also impacted many of them.

The massive universe masters in it were also wiped out, like flying insects swallowed by a sea of fire, and they disappeared when a wave hit them.

Wang Yi stood alone in the void, with a small universe in the distance behind him.

Hundreds of thousands of the strongest in the universe of the Cosmic Sea Alliance, who was originally unrivaled in front of him, have been directly erased in front of that beautiful and soul-stirring blow!

As if wiped with a rag, just wipe it off without leaving a single one! The power of this power, even if he already knew about the power of wings, but Wang Yi was still shocked when he saw it with his own eyes.

"It's over." Wang Yi said silently.

...

The panel's info prompts cascade down.

**【Ding! Kill a strongest person in the universe and get 65 million killing points】**

**【The True God of the Universe has been killed: 2915/3000. 】**

...

**【Ding! Kill a strongest person in the universe and get 78 million killing points】**

**【The True God of the Universe has been killed: 2925/3000. 】**

...

**【Ding! Kill a strongest person in the universe and get 95 million killing points】**

**【The True God of the Universe Sea has been killed: 2989/3000. 】**

...

**【Ding! Kill a strongest person in the universe and get 82 million killing points】**

**【The True God of the Universe has been killed: 3056/3000. 】**

...

**【Ding! Kill a strongest person in the universe and get 79 million killing points】**

**【The True God of the Universe has been killed: 156809/3000. 】**

...

**【Ding! Kill a strongest person in the universe and get 88 million killing points】**

**【The true God of the universe has been killed: 295518/3000. 】**

...

**【Ding! Kill a lord of the universe and get 680,000 killing points】**

**【Ding! Kill a lord of the universe and get 870,000 kill points】**

**【Ding! Kill a lord of the universe and get 950,000 kill points】**

...

Densely packed, it fell like a waterfall, and the prompts on the panel soon added millions of lines, which directly exploded.

And Wang Yi's kill value also flew like a rocket, reaching a new height.

Wang Yi mobilized the Wing Source to attack and directly destroyed the entire Cosmic Sea Alliance. Nearly 300,000 strongest players in the universe were wiped out in one go.

Afterwards, it also spread to an incomparably wide range. At least Wang Yi couldn't estimate the specific range of Feather Wing's previous attack. Anyway, looking around, it was completely empty.

In this range, there are unknown how many masters of the universe are involved.

In fact, many masters of the universe are small universes from the strongest in the universe. Those who are the strongest in the universe die, and the small universes die, and they will also die.

But maybe the winged light blade was flying too fast, and countless universe masters were strangled by the light blade. This time, the panel counted the deaths of those dead universe masters on Wang Yi's head. In short, Wang Yi got a lot of kill points this time.

Killing a master of the universe is 100,000 to 1,000,000 kills. Kill the strongest person in the universe and start with 10 million kills! And 1 kill value is roughly equal to 0.1 treasure point.

The 300,000 strongest players in the universe alone, and most of them with 40 to 60 million kill points, provided Wang Yi with about 15 trillion kill points.

The Lord of the Universe, although the kill value provided by the strongest in the universe is less, but the number of their fallen is more, so it also provides about 20 trillion kill value.

Therefore, Wang Yi got a total of about 35 trillion killing points, which is 3.5 trillion treasure points.

What is even more terrifying is that even if the Lord of the Universe, who was not affected by the attack before, died because of the death of the small universe, countless Lords of the Universe also died. These accounted for about 80% of the total number of Lords of the Universe, and only those from the Holy Land Universe. The Lord of the universe can be safe and sound.

However, the fact that hundreds of thousands of the strongest in the universe and the masters of tens of millions of universes instantly fell at the same time, this scene is terrifying enough.

The entire universe is quiet.

...

The primordial universe False True Demon God, the Northern Border Alliance Lord, the Shihua Island Lord... They fell, and the small universe began to collapse. Because the original universe has not been destroyed, some of the lives living in it can still be rescued by the strong inside and return. The original universe continued to live.

But other universe seas, small universes are all dead!

Three thousand latitudes of the universe sea, hundreds of thousands of small universes, died at the same time! collapse! With the death of countless lives!

The entire universe has also fallen into an unprecedented silence.

...

In the chaotic void of the cosmos sea, the mountain guest and the ancestor of the starry sky also saw the endlessly beautiful light blade rushing into the endless distance like the ocean in the distance. They were also shocked and speechless for a long time.

And many forces in the original universe came to watch, and they all felt the trembling from their souls. In the face of this endless terrifying stalwart power, all they felt was despair and fear.

...

Purple Moon Holy Land.

The figure of the ancestor of Ziyue trembled slightly, and his face was extremely difficult to see.

Just now, the divine incarnations of the two strongest in the universe and some of the universe masters in his universe dissipated, and he also sensed the disappearance of their traces of life.

But this was not what shocked him the most. He looked at the chaotic void image with only one figure left, and his fists clenched unconsciously.

...

Eastern Holy Land.

There was also a lingering shock in the eyes of the first ancestor of the Eastern Emperor.

Although he is detached from reincarnation, he is still the true \*\*\*\* of the void, and the endless beautiful knife light that erupted from the wing fan gave him a strong sense of threat.

He can feel that the terrifying winged light blade is enough to threaten his small universe!

Even he himself was unable to resist that terrifying attack!

"How is it possible..." The first ancestor of the Eastern Emperor lost his temper. "Cosmic Sea, how could such power exist..."

fear! At this moment, the ancestor of the Eastern Emperor was full of fear in his heart. In the face of a blow that is far from being able to deal with, in the face of a blow that even the Eternal True God can only rely on with the top mechanical treasures, and it is really desperate to be willing A blow that consumes so much energy at one time... Even the ancestors who escaped the cycle of reincarnation would be afraid and despair!

The Void True God small universe can only be destroyed by the Eternal True God's full explosion, and the winged light blade is obviously enough to do this.

After all, this is a powerful eternal \*\*\*\* of ancient civilization, who can be bestowed by a powerhouse who can be called the top single-piece mechanical treasure of ancient civilization. This power is so powerful that it already has the power of a blow that is called a holy existence.

Even if the Eternal True God faced this terrifying blow, he might have to be killed!

...

Through some channels, the powerhouses of the human race in the original universe also saw this shocking scene, and they all lost their voices collectively.

However, unlike the original cosmic forces of the cosmos sea who felt despair and fear for the power of this winged light blade, they then fell into infinite ecstasy!

"Haha, we won!"

"Won!"

"The Lord of Chaotic Source, killed the entire Cosmic Sea Alliance!"

Although the powerhouses of the human race were still extremely shocked, they were also full of joy.

And the unbelievable power of the Lord of Chaotic Origin was deeply engraved in their minds.

Hundreds of thousands of the strongest people in the universe are all destroyed in one blow, who else can resist the Lord of Chaotic Origin?

...

In a faraway place, the chaotic airflow is turbulent like an ocean, and it is full of infinite dangers. Even the strongest in the universe must act carefully. A huge universe floats in the chaotic ocean.

In the boundless white fog, a majestic black jade humanoid sculpture with a height of trillions of kilometers stands on the endless land.

Suddenly, the whole world shook.

The eyes of the towering black jade humanoid sculpture suddenly opened, bursting out with angry flames.

He sensed before that many of the strongest people in the universe died in his own universe, and at the same time, there was also the Lord of the universe.

And his esteemed junior 'Brand' also died.

Under his anger, countless spaces in the entire universe are changing, the heavens and the earth are shaking, and there are lightning and thunder.

Many strong people were shocked.

"Who! Who! Killed so many strong men in my universe!" The ancestor of Minghong Holy Land made an angry voice.

Although he is very concerned about dealing with the human beings in the universe boat, he is really in the origin continent and will not always pay attention to the progress of things. As the situation becomes clear, he also believes that the younger generation of his universe can complete the tasks given by him.

But he didn't expect that it was bad news.

"Check! Check it out for me immediately! What happened to Brand and the others!"

The icy voice of the ancestors sounded in the ears of the Holy Land powerhouses, making them stunned.

...

At this time, Wang Yi sent a message back to the human race. Get them out for a big sweep.

After all, in his previous blow, he killed countless powerhouses, not to mention those who were killed by the winged light blade. There are not many Xeon Supreme Treasures that can be saved, but there will always be some.

Three thousand latitudes of the universe sea, it is estimated that 80% of the strongest in the universe fell in the previous hit.

As for the tens of millions of universe masters, most of them died because of the death of the small universe, and the corpses and treasures were still floating in the void, and the number was astonishing.

Now those cosmic sea forces are frightened and stupid, and it is estimated that no one dares to appear in front of the Lord of Chaotic Origin for a while, and some are so frightened that they leave this cosmic sea directly.

After all, the three-thousand-latitude universe sea is, in a sense, the enemy of mankind, and it is completely reasonable for mankind to kill them.

Seeing the incomparable power of the Lord of Chaotic Origin, who would dare to appear in front of him?

And the corpses and treasures of the tens of millions of the Lord of the Universe are left in this void, that is a huge treasure!

Human beings are so strong, it is estimated that it will take a long time to clean up, and it will take a long time to pick up treasures.

And this void has also become a famous battlefield in the universe sea in the future, which has been passed down from generation to generation.

### [Chapter 779: the dust settles](#)

"Haha, so many treasures!"

"Wow, there is actually a Xeon treasure here, it belongs to me."

"This corpse is also very useful and can't be let go."

"Take it away, take it away, hahaha, take it all away!"

In the vast area covered by the field, a stream of light figures scattered in the void and kept moving, collecting the corpses of the masters of the universe and the treasures one by one.

At this moment, in the sea of cosmos, the powerhouses of the human race came out in full force, happily cleaning the battlefield in the chaotic airflow.

There are still many strong people watching from a distance, but they dare not approach.

Because the Lord of Chaotic Source is here.

Those who are the strongest in the universe and their treasures have vanished into nothing, even some of the Lords of the universe who have been affected by the winged light blades are also not spared. The treasures on their bodies have disappeared from the universe sea with them forever.

However, there are still countless Lords of the universe who died because of the collapse of the universe, and their divine bodies are floating deadly in the chaotic airflow like dust.

And their treasures have also become the wealth of the human race.

The treasures of these Lords of the Universe alone add up to an incomparably astonishing number, far exceeding the accumulation of any force, enough to make any force envious.

It is a pity that no one dares to fight with the human race, and can only watch the human race make a fortune in war.

...

In this battle, more than 80% of the powerhouses in the 3,000-latitude universe will be wiped out!

In addition to the Holy Land universe, there are only two or three small universes with big cats and kittens that survived because they did not participate.

The entire cosmic sea ushered in an unprecedented moment of withering.

The universe sea where Wang Yi is located, nearly a hundred small universes have been destroyed, and the once famous ethnic powerhouses, such as the Divine Eye Clan, the Skeleton Clan, the Shadow Bell Clan, the Dream Eclipse Clan... and those who are the strongest alone, run rampant with demons and blood. The ancestors of Lan and others also fell because they were in the battle formation of the Allied forces.

If the Divine Eye Clan died, they were wronged, after all, they were just making up the number of people.

Who would have thought that humans would actually have such a powerful weapon, which would wipe out the entire alliance in an instant. Many of the God-Eyed Clan and Skeleton Clan were planted like this.

Just like in ancient times, hundreds of thousands of troops surrounded and beat up a few people. Originally, the odds were in their hands. One person could win with a spit. Who knows that the other party will take out an atomic bomb...

Now in the entire universe sea, the remaining strongest people in the universe are estimated to be counted in one slap.

And in this battle, human beings have also killed other forces completely horrified! Even those Holy Land universes are silent.

In the primitive universe, many forces are also afraid of the power of human beings. This time, more forces are relying on human beings, but their luck is not so good.

And the Lord of Chaotic Source also used this battle to become the number one powerhouse in the 3,000-latitude cosmos sea. Many speculated that he was able to launch that kind of terrifying attack

with the help of ancient civilization treasures, but no one knew whether he would be able to attack again. With one display, the invincible prestige of the Lord of Chaotic Origin spread in the 3,000-latitude cosmos sea, and even through some holy land universes, some places in the origin continent heard that a great young guy appeared in the latitude cosmos sea, with a powerful treasure. Kill hundreds of thousands of true gods!

Even in ancient civilizations, this kind of thing happened very rarely.

...

The pattern of the universe has changed dramatically again, and it is more drastic than before.

Because... the strongest people in the universe who originally had an impact on the pattern of the universe are almost dead.

In the primordial universe, there are currently only four strongest people in the universe still active, one is the founder of the giant axe of the human race, the chaotic city master, and the other is the sitting mountain guest, the ancestor of the star beast. The latter has a good relationship with the human race.

In addition, the still alive Zerg Queen, Mechanic Father, Demon Clan Zhen Yao Ancestor, were also imprisoned in the Tongtian Tower, the Lord of Chaotic Origin. They were also very shocked when they learned of the fate of the Cosmic Sea Alliance.

Originally, the original universe had nine peak forces and twelve top forces.

And now, six of the nine peak forces have collapsed, and they have all lost their strongest in the universe, that is, the five peak groups and the Northern Xinjiang Alliance.

The Northern Xinjiang Alliance has long existed in name only. The Northern Xinjiang Alliance leader joined the allied forces and fell into the sea of cosmos. The Northern Xinjiang Alliance disintegrated in an instant, and most of the alliance members joined the human race.

The only ones that are still intact are the Ancestral God Religion and the Starry Beast Alliance, but they have no possibility of fighting with humans.

Become the only human beings of the peak race in the primitive universe, occupying an extremely vast and fertile territory, and they are truly dominant, and no one can check and balance them.

...

Earth.

Wang Yi, dressed in casual clothes, sat on the grass, looking at the blue sky with white clouds floating in the sky, drinking leisurely.

"It has been three million years since the opening of the cosmic channel to the cosmic sea alliance intimidating us humans, and it is finally over."

Wang Yi looked at his panel.

[The host has triggered the quest [Death of the True God], slaying a True God in each cosmos sea, and after completing the quest, you can exchange with the panel for any treasure below the True God level. ]

[The true God of the universe has been killed: 297647/3000. ]

Wang Yi murmured: "The entire Cosmic Sea Alliance has achieved me."

"Before, I wanted to exchange this quest for the Eight Discord Saints." Wang Yi shook his head, "But now, I can exchange my slaughter points for treasure points, which are more than enough for dozens of items."

Wang Yi submitted the task.

【Ding! [True God's Sorrow] Mission completed! Please choose the treasure you exchanged for. 】

Wang Yi chose the mechanical treasure 'The Eight Discords'.

However, although he successfully exchanged for this treasure, Wang Yi really wanted to use it, and he had to wait until he became a 'true god', and he had to reach the limit of the true \*\*\*\* to force this mechanical treasure.

This 'Eight Disagreement Sage', even at the level of being called a saint, can still be used improvised, but, of course, the lower the level, the greater the strength. When it comes to being called a saint, it doesn't have much effect.

...

The crisis of the Cosmic Sea Alliance has been lifted. Although the human race still has many potential enemies in the Cosmic Sea, and other Holy Land universes are distressed for their losses, they will have no way to take human beings for a while, even if they still have the strongest in the universe, they can't threaten humanity as before.

Moreover, the Lord of Chaotic Source is too terrifying, and no cosmos strongest person dares to appear in this cosmos sea easily.

The cosmic sea has returned to calm again, and this cosmic sea has also become a forbidden place in the eyes of many other cosmic seas.

Time goes by slowly...

...

Primal Star.

On the vast land, the continuous mountains stretched to the end of the field of vision, and there was a space vortex above a lake, and several powerful figures flew in from the vortex channel.

Some nearby or hordes of Venerable-level alien squads or cosmic overlords acting alone saw these figures and silently avoided them.

Human race, can't be offended.

Primordial Star has been opened for more than eight million years, but the entire opening process of Primordial Star will last for a thousand epochs. In order to obtain treasures, many strong people will come here to take risks.

The human race has surpassed 10,000 cosmic lords over the years, and relying on the cultivation of the race, a large number of cosmic lords have emerged.

Let's put it this way, the human race that has no shortage of secrets and treasures can almost become the overlord of the universe as long as it is a venerable one.

Therefore, as long as the human race runs outside, almost all of them have the strength of the overlord of the universe. They don't have a few treasures on them, so they are embarrassed to say that they are from the human race.

no way! The human race is so rich now! The harvest of the previous Cosmic Sea battle has allowed mankind to obtain countless treasures. How many treasures should there be on the tens of millions of the Lord of the Universe? How great should wealth be? Even if the human race desperately bestows it, or even scatters it at any cost, it is possible for the cosmos to have a set of peak treasures. Being prosperous to this level, coupled with vigorously cultivating latecomers, every Venerable Universe has gained a lot of benefits.

However, the benefits that ordinary cosmos sages get are limited after all. The limit is the cosmic overlord, and the top cosmic overlords who can rival the cosmos lord are really powerful.

And the ethnic group also has rules, it will not give too much, and the overlord of the universe wants to get more resources. You have to fight on your own.

And these cosmic overlords of the human race are planning to go to Primordial Star to try their luck.

The cosmic overlords of other ethnic groups act alone on the primordial star, and only the human ethnic group will appear in groups.

"Haha, Venerable Tianyu, the Lord of Star Prison gave you a lot of treasures this time, right?"

"Everywhere, it's all the teacher's love. It's nothing to give me a treasure of the pinnacle field 'Fanxing Lake'." Venerable Tianyu, who was originally the King of Tianyu, is now the overlord of the universe, with a humble face.

Other human cosmic overlords are envious.

Peak domain treasures, if it were changed to the past, there would be very few masters of the universe, only the top ones could hold them, and even the human race today, it is very rare to hold the masters of the universe.

With this kind of treasure in the peak field, it is not easy for the fifth-order peak universe master to kill Venerable Tianyu.

What's more, Venerable Tianyu still has a lot of treasures on his body! Relying on these treasures, you can fight against some masters of the universe.

But there is no way, who made me the apprentice of the human giant 'The Lord of Star Prison', and their fellow disciples are the largest mountain of the human race, the 'Master of Chaotic Origin', this finger leaked a little, all It's enough for them, the Venerables of the Universe, to endure.

"Venerable Tianyu, you are too modest. In my opinion, there are very few people who can compare with you, Venerable Tianyu."

"This trip to the original star, Venerable Tianyu, you must have gained a lot."

The other universe overlords laughed.

"I'm nothing, compared to the 'Master of Haotian', it's too far behind." Venerable Tianyu thought of something, his face full of envy.

The other overlords of the human universe are Yijing.

The lord of Haotian is the new lord of the universe of the human race, and the achievement of the lord of the universe is only a million years.

In the Lord of the Universe, this cultivation time is fast.

The human race has given birth to several universe masters over the years. Although the master of Haotian is a latecomer, his strength and reputation are stronger!

Because he is the eldest disciple of the greatest powerhouse of mankind, the Lord of Chaotic Origin!

Of course, the Lord of Chaotic Source has no interest in accepting apprentices. Currently, there is only one apprentice, and he has become the Lord of the Universe!

It is said that it is very likely that this 'Lord of Haotian' will become the strongest in the universe in the future.

Once he became the lord of the universe, he was bestowed by his teacher with the supreme treasure!

I don't know how many people died of envy.

The universe does not know how many strong people are eager to worship the 'Lord of Chaotic Source'.

However, the status of the 'Master of Chaotic Origin' is so high, and his vision is said to be very high. Even one of his children has become the lord of the universe, but he has not accepted a second apprentice. harsh.

"The Lord of Haotian is indeed powerful."

"However, Venerable Tianyu, it is not hopeless for you to become the master of the universe."

"Yes, we all have to become the masters of the universe, even the strongest in the universe!"

These overlords of the human universe have been inspired by their ambitions.

If it was changed before, they would not dare to think about it.

But now?

The human race has said that as long as they practice hard, everyone has the opportunity to become the strongest in the universe.

These cosmos sages, who have been able to cultivate without the guidance of ancient civilizations, are not extremely talented, but there is still a great hope of becoming the lord of the universe.

Of course, the strongest person in the universe has to rely on personal talent and chance.

However, there are more and more powerful people in the human race. It is a stage of rapid development. With accumulation, it is not impossible for hundreds of true gods to be born in the future.

...

And what is the greatest Chaotic Origin Lord of the human race doing?

"Luo Feng, as I said, with the same strength, you can't beat me."

In a dark starry sky in the primordial universe, two radiant figures are fighting.

The mighty power caused the vast starry sky to shatter and collapse, and then reassemble and condense.

And the most central battlefield is even more marked into a boiling ocean of particle flow.

One of the figures in dark red armor only showed a pair of deep and calm eyes, and there was a hint of a smile.

And he was holding a black sword in his hand, and the time and space were frozen and shattered wherever the sword passed.

Knife light tore through the starry sky.

"boom!"

The sturdy young man with three pairs of silver wings behind him was beaten out and said dejectedly: "If you have the ability, don't attack with your soul."

Wang Yi flew over and said slowly: "Your will is so strong, it doesn't affect you much."

Luo Feng gritted his teeth, "Why don't you try it instead."

"Yes." Wang Yi shook his head, "But even if you don't use the soul secret technique, you can't beat me."

"You try this sword technique that I have created over the years." Luo Feng was too lazy to argue.

The sparring between the two will take place every few years.

After all, now in the Universe Sea, only Wang Yi can be Luo Feng's opponent.

Because the other strongest people in the universe are almost dead, UU reading [www.uukanshu.com](http://www.uukanshu.com) masters of the universe, there is no such rapid progress as Luo Feng.

Moreover, the paths the two have walked are similar, and they have both been inherited from the Duandong River.

Of course, Wang Yi is currently ahead of Luo Feng.

"Wang Yi, you are amazing. I think I have improved a lot over the years, but I still can't compare to you." Luo Feng said helplessly. "I feel that there are few opponents in the Duandonghe inheritance space who are more powerful than you in the same level."

Wang Yi nodded. In the inheritance space of the Duandong River, there is a space similar to the special trial and battle, a small virtual space, there are opponents in it, there are a total of 282 opponents, including the ancient Duandonghe, the consciousness in the virtual space can enter, you can play against them, those virtual opponents can display the power of those super powerhouses, and the most powerful opponents are naturally the three generations of ancestors.

Of course, there were only two people who created the eighth-order secret method in the master stage of the universe in the Duandong River in the past dynasties. Wang Yi can also create the eighth-order secret method now. Naturally, the same level is much stronger than most of them.

### [Chapter 780: The Arrival of Jin's World](#)

Chaos knows no age.

The two who have become venerables and have the strength of the top cosmic overlords, the illusory world venerable 'Hong' and the thunder sword venerable 'Tei Shen', are going on adventures in the sea of cosmos together.

"Brother Hong, those juniors have become the masters of the universe. If they surpass us, we have to work harder." The bald-headed and white-robed youth said.

The cold-hearted youth in black armor, who seemed to be much calmer, said indifferently, "Accumulate slowly, and when the time comes, you will naturally be able to break through."

Thor murmured: "No matter how slow you are, you won't be able to see the shadow of others."

"You can do it, you can break through now," Hong said.

Thor was silent.

Hong and Lei Shen were the powerhouses standing on the top of the earth on earth, but when they came to the universe, they were thrown away by Wang Yi and Luo Feng successively, and they couldn't catch up. The evildoer, but even the juniors on Earth continue to surpass them, which makes Thor a little uncomfortable.

In their bones, Thor and Hong are both arrogant and arrogant, and have their own arrogance.

It's just that the strength of the two is to cultivate the mind. Although the law perception talent is constantly improving, just like Hong, except for the will and illusion, the others are really average. Compared with those real geniuses, there is still some essential gap. The speed of progress is of course slow.

But this kind of road, although the progress is not fast at first, it is very special. Generally, the stronger the progress, the slower the progress, but they are different. They are not fast in their cultivation at the beginning, but they still continue to break through later.

"I also want to be the strongest in the universe, walk out of my own path, and see more beautiful scenery." Thor's eyes flashed with electric light, his domineering faintly faint, and his voice was full of desire.

"I believe we can do it." Hong Shen said.

The two brothers who have been side by side since the age of Earth looked at each other and smiled.

"No matter how powerful a super existence is, it will come step by step." Hong thought secretly. He has confidence in himself.

As long as you keep making progress, keep making progress, and your lifespan is infinite... then it's not impossible to become the greatest being in the universe.

In the state of mind of Brother Hong and Thor, they will not be easily frustrated. As long as they do not fall, it is normal to become a super strong in the future.

Wang Yi also supports Thor and Hong's decision to venture into the sea of cosmos. Even if they fall, they can be resurrected.

Therefore, Thor and Hong also feel at ease and boldly venture into the sea of cosmos.

...

Time passed. On this day, Wang Yi, who was traveling in a certain universe, received a message.

"A giant monster appeared in the sea of cosmos?" Wang Yi turned his head.

"Sure enough, the primordial universe still sent the world of Jin."

...

And in Wang Yi's hometown of the universe, with the appearance of a behemoth that resembles a human body, which is slightly larger than a small universe, the entire universe is attracted.

However, the withering of the powerhouses in the universe is too serious now, and the death of the strongest man in the universe has caused most of the masters of the universe to die, so this behemoth was not discovered by a passing master of the universe until a long time ago.

The Lord of the Universe was also exploring an ordinary and dangerous place. The whole dangerous place was smashed into pieces by the behemoth in flight, and his divine body was instantly shattered. Fortunately, he had a clone to save his life.

And soon, the news of a humanoid creature with a height of more than 100 million light-years that suddenly appeared in the sea of cosmos spread.

Of course, the human race knew quickly, and many strong people went to investigate.

However, they are seriously short of manpower, and it is difficult to change the flight direction of the huge humanoid creatures by collective attacks like the original.

...

cosmic sea.

The human-like body, which is a little bigger than the small universe, is flying, far exceeding the speed of light by a million times or ten million times, and even causes the surrounding chaotic airflow to directly rub against the super-high-speed impact to form an incomparably dazzling light. , leaving a long streamer in a long void. It is constantly moving in the direction of the original universe.

At the moment, a large group of powerhouses in the cosmos are following behind this huge humanoid creature by teleporting, but the number is very small, only a few hundred people, and neither the Purple Moon Holy Land nor the Eastern Emperor Holy Land are present. They joined the alliance before, and human beings naturally also You are not polite, plus they have lost almost all the strongest in the universe before. These years and the human race have clashed several times in the sea of cosmos, but they have not achieved any benefits.

After all, the human race, the Hongmeng, is now almost unified in the original universe. There are a large number of universe masters, as well as the founder of the giant axe, the city master of Chaos, Wang Yi, Luo Feng... plus a large number of treasures and secret methods, the two holy places that have just lost heavy losses do not care. The high-end combat power and the number of people can't compare with the original universe, and they are suppressed very strongly.

The masters of the universe of the two holy places are now roaming outside, and they do not dare to emerge easily, for fear of being besieged by humans.

The Lord of the Universe of the human race can be easily resurrected, but they can't... At least I have never heard of the two Holy Lands going to resurrect the Lord of the Universe, but the Venerable Universe can.

At this moment, Wang Yi also rushed to the sea of cosmos, teleported over according to the coordinates given by Hongmeng, and said hello to those members of Hongmeng and chatted a few words. In the crowd, he soon saw that there was a behemoth in the back. At an astonishing speed, it rushed forward in the sea of cosmos.

Wang Yi vaguely remembered that the corpse of the King of Jin seemed to be about 160 million light-years tall, and its speed was about 120 million times the speed of light.

And other powerhouses, such as the founder of the giant axe, are not able to make accurate judgments.

When the behemoth left behind a stream of light, it disappeared at the end of everyone's field of vision in an instant at a still terrifying speed.

"This speed is too fast. Maintaining such a terrifying speed is almost comparable to uninterrupted teleportation."

The strongest person in the universe can break through the speed limit, but as the speed increases, the consumption of divine power and the pressure on the body continue to increase, so no one of the

strongest person in the universe can reach this level in terms of speed. As for the volume becoming super large, the speed is even slower.

"In terms of size, it's a little bigger than a small universe, a behemoth that's a little bigger than a cosmic boat. It turns out to be a humanoid creature." The powerhouse who just came over to witness this scene was stunned.

Even the strongest people in the universe can try their best to make their gods bigger, and it is very difficult to reach the size of one light-year.

Bigger than a small universe! The speed is beyond imagination!

"Unbelievable, I don't know what exists."

"It can't be a living being, it can't be a strong person. There is no such terrifying strong person."

"I think it must be a strange thing, something like a cosmic boat. It's just that the cosmic boat is in the shape of a boat, it's just like a human."

When the endlessly tall behemoth left at a terrifying speed beyond imagination, many powerhouses discussed and expressed their opinions.

The primordial universe accounts for the majority of these powerhouses, because other cosmos sea forces dissipated almost the same, and even fewer did not offend the human race, such as the Purple Moon Holy Land and the Eastern Emperor Holy Land, they simply did not dare to appear here. Other cosmic seas have heard the news and dared to come, and humans did not deliberately drive them away.

Those powerhouses looked at the terrifyingly fast behemoth, their eyes glowing.

"opportunity!"

That unimaginable existence definitely contains great opportunities.

"There is no hope of getting the inheritance of ancient civilizations from the human race. This unknown opportunity... I am afraid it is the only opportunity for my family to escape from reincarnation." Some strong people thought excitedly. This time, it must be an opportunity against the sky, and I am afraid that it is possible to escape from reincarnation by taking this opportunity.

but.....

Looking at the direction in which the behemoth disappeared, they were also worried.

According to the direction it is flying now, I am afraid it will hit the original universe and enter the original universe.

With the power of the original universe... it can naturally suppress its speed and leave it behind.

However, then they can't get the benefit. If they collide with the original universe, once they fall into the original universe, their cosmic sea forces will have no part at all.

The human race is also discussed internally.

"Giant axe, it seems that this sudden huge humanoid creature will probably hit the original universe." Chaos City Lord said.

"It's okay to hit the primordial universe. The primordial universe has infinite power and can naturally be easily resisted." The founder of the giant axe said, "I'm afraid of other problems, flying at its terrifying speed, if it does not change direction to impact the primordial universe... ..Maybe it will affect our small universe. Although the small universe is large, it is not as strong as some dangerous places in terms of resistance. If it hits, it will be shattered."

Chaos City Lord nodded, his face dignified.

After all, "Small Yushen" is just a small universe of True God. Although it is large, other True Gods cannot shake it. But what if it exceeds the existence of the true God? The impact force of that behemoth is already beyond the level of true god... It is difficult to destroy the small universe, but as long as the impact force is enough, it is enough to collapse the "source" of the small universe, causing the entire small universe to collapse and shatter. That humanoid creature can easily crush some dangerous places that have been indestructible for an extremely long period of time... crushing a small universe is naturally very easy.

"It shouldn't be so unlucky." After being said by the founder of the giant axe, the Chaos City Lord was also a little worried.

The founder of the giant axe glanced in the distance, "The old fellow, the ancestor of the star behemoth, also came with his star beast alliance."

"Giant axe, Chaos City Lord." The ancestor of the star beast flew over.

He also nodded to Wang Yi and Luo Feng aside. "Lord of Chaotic Source, Lord of Galaxy."

Wang Yi also looked around. There were only more than 1,000 strong men gathered in front of him, less than ten strong men in the universe, and more than 1,200 masters of the universe. There were not too many people, and there were many primitive universes.

And that behemoth is still flying towards the original universe. But those strong people are not too anxious. Really want to change the direction of the behemoth, they still have time and opportunity.

After all, the sea of cosmos is very large. Generally, strong people rely on "natural wormholes" to advance in the sea of cosmos. And this kind of continuous teleportation... According to the direction of the behemoth, it may take millions of years to fly up to the "primitive universe".

As time passed, many of the cosmic sea powerhouses received the news and couldn't help rushing over, and the human race didn't have the heart to care about them at this time, and all focused on the huge humanoid creature.

They are also crazy about this incredible existence.

"It must be a mechanical treasure of ancient civilizations!"

"Maybe there is a great opportunity!"

The opportunities of ancient civilizations, not one is not envious, that is, many Holy Land universes are also attracted.

As the news spreads in the 3,000-latitude cosmic sea, thousands of years have passed, and tens of thousands of strong people have gathered here! far more than before. Far beyond the cosmic sea here.

However, they did not dare to be arrogant, because there is a Lord of Chaotic Origin who slaughtered hundreds of thousands of the strongest people in the universe.

They can only negotiate with humans to get a common opinion.

And the human race did not want to miss this opportunity, and such a huge humanoid creature, the primitive universe may not be able to swallow it alone, and the two sides quickly reached a consensus.

Just in case, keep this behemoth out of the original universe.

As a result, the mighty cosmic sea army began teleportation and collective attacks again and again, attacking the huge humanoid creature that was flying at an extremely terrifying speed over 100 million light-years, and wanted to change its flight angle.

The tens of thousands of powerhouses in the cosmos sea have collectively bombarded for more than three hundred years! Just to modify the direction of the angle of about 13 degrees - to change the direction of the humanoid creature and make it hit the "space ship"!

"The direction is correct."

"It is estimated that the spaceship will be reached in nearly 25,000 years!"

"Hahaha....."

"It took so long, but it finally succeeded."

"Now we just have to wait for the huge humanoid to hit the spaceship."

"I don't know if the spaceship can stop it."

"If you can't stop..."

"Even if you can't stop it, you can greatly reduce its flight speed."

After confirming that the huge humanoids were flying in the correct direction, all the strongest men in the universe and the masters of the universe were very happy, but also a little worried.

It's not easy. It's not easy to keep up with the huge humanoid creature, keep teleporting, accurately determine the position and angle, and bombard it for more than 300 years.

The outer domain of the "cosmic boat" of the three Jedi in the universe.

Figures appeared here one after another, looking at the huge cosmic boat from a distance, all of them secretly looking forward to it.

They dare not get too close, otherwise they will be killed by the terrible shock wave generated by the impact.

"Hope it works."

"If you fail, you can only try to change direction."

"It must be successful."

However, Wang Yi, who was acting with the Human Alliance, was in a much more relaxed mood.

He looked at the spaceship, and he knew that the spaceship could stop huge humanoid creatures, but other people didn't know.

While everyone was waiting quietly, time passed...

In their induction, in a distant place, a type of humanoid creature is flying over at super high speed...

Ahead of it, a damaged ship of the same size remained motionless.

"boom!!!"

Humanoids finally hit!

Under the tense gaze of thousands of cosmic sea powerhouses, those humanoid creatures whose blurred silhouettes were over 100 million light-years tall crashed into the equally huge and broken cosmic ship.

The power of this collision is unparalleled!

This kind of humanoid collided directly with the ancient ship~[www.mtlnovel.com](http://www.mtlnovel.com)~ The first moment of the terrifying impact squeezed and shattered time and space, squeezing away in all directions, forming terrifying shock waves and shock waves.

"Attention!" The powerhouses on the periphery have already hid in the palace.

"Boom..."

The shock wave radiates in all directions, radiating over tens of thousands of light-years, millions of light-years, and tens of millions of light-years, and its power naturally decreases gradually. They flew away one by one, but no one was seriously injured.

"Bang! Bang..."

Including the Xeon Supreme Treasure Palace flew upside down, only the boat of the tomb was extremely stable in the shock wave.

"Well...stop." Wang Yi, who was in the boat of the tomb, looked at the space boat and the humanoid creatures that rolled slowly and slowed down in the distance, and showed a smile.
