

A God 781

[Chapter 781: 4th Jedi](#)

This behemoth gradually stopped in the chaotic airflow, and all parties first sent the avatar Lord of the universe to explore.

Wang Yi also sent a avatar of a **** to go in with the strong human beings from the Hongmeng, and Luo Feng also went in.

What they carry on them are only ordinary treasures, even if they fall, it doesn't matter.

And the powerhouses who didn't go in are also exploring outside, looking for all the extraordinary places, but they still have nothing to gain, and in the end they have to look at the people who go in and explore.

Just like this exploration... Fallen people keep appearing.

As a result, the forces of all parties were terrified. No matter where they entered, whoever went in to explore, all the clones of the master of the universe perished! There are no exceptions!

"Sure enough, it still failed." Wang Yi, who was staying outside, shook his head. This result was not unexpected.

And the masters of the universe of the human alliance have all failed! So are other forces! Even the Xeon Supreme Treasure Palace could not resist the danger of the endless abyss, and all fell!

The probability of such a fall far exceeds that of the three major Jedi in the universe.

However, with the exploration, some strong people soon entered the natural wormhole of the endless abyss, teleported to a secret place full of chaotic airflow, and found a seemingly ordinary small universe there. However, all their exploration methods were turned into fly ash and annihilated when they touched the membrane wall of the small universe.

And Wang Yi's clone also stayed there, but had no intention of going in.

He knows that before the time comes, the past must die!

As time passed, all the forces of the Universe Sea tried their best to explore, but no matter how they searched, they all perished, without a single exception. The result of this absolute death frightened all the forces.

At this time, the three ancestral gods finally got the order of the original will of the original universe.

The inside information of the Fourth Jedi "World of Jin" and "Beast Crisis" also came out from the three ancestral gods, which shocked the universe sea.

Even the cosmic seas of other latitudes feel the crisis, because the future world beasts are likely to go to their universe through the cosmic channel.

So... this time, it may bring disaster to the entire endless universe sea, who knows?

However, the world of Jin also represents an opportunity to 'transcend reincarnation', and it is enough for those forces to be crazy.

...

The world of Jin contains endless crises and endless opportunities.

It is more special than the other three Jedi... That behemoth is not beneficial to the entire universe, and the 'world of Jin' in its body is the real important place.

If you want to enter the world of Jin, you must wait for the opportunity.

The power of the cosmic membrane wall of Jinzhi World changes periodically. When it turns black, it is the strongest, and when it turns white, it is the weakest. Ordinary masters of the universe can easily pass through.

Each cycle...is about an epoch.

The entire sea of cosmos is waiting for the wall of the 'world of Jin' to turn white.

"I heard that there are still beings in the world of Jin." In a group of palaces suspended outside the behemoth, the powerful human beings from the Hongmeng gathered to chat and discuss, and a cosmos master said with emotion. "The three major Jedi, such as the universe boat, do not contain living beings. There are still living beings in this world of Jin, which is enough to see that the world of Jin is not simple. At the same time, the world of Jin also contains the secret of transcending reincarnation. How difficult, if you want to escape from reincarnation, you may have to rely on this world of Jin."

The other Lords of the Universe nodded in agreement.

The arrival of Jinzhi World represents both a crisis and an opportunity.

That is, many strong people in the human race are gearing up and want to enter when the time comes.

Another place where cosmic sea forces gather, is also talking loudly. "This world of Jin is also peculiar." Another cosmos master with a pointed mouth and monkey cheeks said, "According to the three ancestor gods, the creatures in the world of Jin can only live in the world of Jin. They can't come out, and as soon as they come out, they will Death. And the secrets of the world of Jin cannot be leaked. I am afraid it is related to detachment from reincarnation. This time is our opportunity and we must seize it well."

The lords of the universe also showed their expectations.

The world of Jin, at this moment, affects the hearts of the three thousand latitude cosmic sea forces.

Of course, after the news came back, there were forces to investigate the origin of this behemoth.

After all, the huge humanoid creatures hundreds of millions of light years were drawn from the primitive universe. Even in ancient civilizations, they were not ordinary.

...

Time flies.

Although the three ancestral gods personally came to explain the origin of the 'world of Jin', all parties would not fully believe it. They still sent people to investigate, and found that there is no danger on the route from entering the natural wormhole. With a natural wormhole, you can reach the hidden space and see the small universe - the world of Jin.

The powerhouses of some forces are trying their best to explore the small universe. They arrange their own mechanical puppets, arrange other means, and even enter in person, but when they touch the membrane wall of the small universe, they all turn into ash and annihilate.

As a result, those forces gradually believed and gave up, waiting for the membrane wall to change.

...

Wang Yi and Luo Feng were also waiting. They were the first people in the human race to enter the world of Jin.

Not only are they powerful, they have clones, and even if they fail, they can still turn over. And there are many treasures. It is the most suitable object to explore the world of Jin.

Only when they first go to explore and understand the internal situation, the human race will enter on a large scale.

...

Wang Yi sat alone in his palace, stroking the dark and **** ancient sword in his hand, and there was a table in front of him with a pot of wine and a cup on the table.

"The world of Jin..."

In the distance outside is a small universe. It is a small universe with a dark blue body. Obviously, it is not the time to enter.

"The world of Jin has arrived, and to solve the world beast crisis, maybe it's time for me to leave the sea of cosmos and enter the continent of origin."

Wang Yi waited silently, waiting for the moment when he entered the world of Jin.

And Luo Feng was also waiting.

"According to the ancestors, this world of Jin is much more dangerous than Qingfengjie, Liuzhongshan, and cosmic boats." Luo Feng had expectations in his eyes. "The more dangerous, the greater the opportunity, the more the harvest. According to the words of the ancestors, the stronger the strength, the better."

The existence of the world beast makes the universe sea feel the crisis, but for Luo Feng, the arrival of the world beast crisis is still far away, and improving his strength is the most important thing right now.

...

Of course, there are also those who are restless, such as those holy land universes, such as the first ancestor of Ziyue and the first ancestor of the Eastern Emperor.

However, although they escaped the cycle of reincarnation and faced the crisis of the beast, there was no good way to do it, and there were some special ones. For example, the ancestors of the 'Minghong Holy Land' were not very worried, and the ancestors of other holy places were very worried.

If the beast is just a cosmic sea disaster, that's all.

If the world beasts come from the cosmic channel at that time, the fun will be great.

They all have a bad feeling about it.

Right now, they can only order the powerhouses of their own universe to enter the world of Jin, and try their best to find a way to solve the crisis of the beasts, and see if they can escape at that time.

...

Time passed quietly while waiting, and in a blink of an eye, more than three thousand years had passed.

Inside the behemoth.

In that small dark blue universe, the diameter of the entire small universe is only about 10 million light-years from the outside. But its power is a small universe that is stronger than the strongest in the universe, I don't know how many times stronger.

Around it, there are palace treasures suspended, and all the forces in the entire universe are waiting for the strong... Of course, as a dangerous place that has never been explored by the strong, few forces dare to enter the whole army, most of them They just sent a very small number of strong people to explore first.

However, the three thousand latitude cosmic sea forces add up to a lot. Although Wang Yi has already killed it once, there are thousands of holy land universes alone, and there are many other forces. The first batch of powerhouses who entered, There are also thousands of them, which can be seen from the palace waiting outside.

And the human race...is the most special among them. There is not a single force in the surrounding, and they are all far away. Only the forces of the original universe are a little closer to them, which seems to stand out from the crowd.

A universe master is looking at the small universe "Jin World" in the distance. The color of the small universe "Jin World" is changing all the time, from dark blue to light blue, constantly changing.

Suddenly, he inadvertently saw that the small cosmic membrane wall turned white.

The lord of the universe suddenly shuddered.

"Discolored!"

"It's white."

"Time is up?"

"You can enter."

Thousands of powerhouses stationed outside the small universe discovered it at the first time.

The news spread quickly, and more powerhouses rushed over.

Wang Yi and Luo Feng's palace also stayed together.

"Wang Yi, the world of Jin can enter." Luo Feng said through a voice transmission.

"Let's go then." Wang Yi nodded. This time, his flaming star giant beast clone entered the world of Jin together with the human body.

Luo Feng is similar.

"go!"

The palace of the two flew towards the small universe that had turned white.

The other palaces around also acted and flew towards the world of Jin.

...

Although the membrane wall still has powerful power, the lord of the universe can easily break through even if the divine body passes through.

After the first palace treasures flew in, the other palace treasures also flew in one after another.

Wang Yi and Luo Feng's tomb boat also flew directly into it.

From the outside, the entire Jin World is about 10 million light-years in diameter. The major powerhouses also enter from different regions, and naturally they will not gather together.

"boom!"

After the black boat and the silver boat penetrated the membrane wall of the Jin world, they rushed directly into the other world - the Jin world.

"arrive?"

"Is this the world of Jin?"

Both of them looked around, and Divine Power immediately sensed the incomparable aura that filled the outside world. It was an involuntary pleasant atmosphere... The whole soul was cheering, as if the fish had finally entered the lake from the desert, that wonderful feeling made both of them tremble.

It's so comfortable, without the slightest restraint or suppression.

"Wang Yi, do you feel it?" Luo Feng's surprise voice transmission.

"Well." Wang Yi nodded and said, "In this world of Jin, there is not even a single bit of restraint, and the divine power can be fully exerted." Like Wang Yi, the genetic level of the divine body is now 70,000 times, and he can fully feel the bounds of the primitive universe all the time. suppress.

Because in the sea of cosmos, the power of the level of "the lord of the universe ten thousand times divine power" is displayed at most.

Whether it is the strongest person in the universe or the master of the universe at the level of tens of thousands of genes, the power at the level of "the master of the universe 10,000 times divine power" can be exerted at most in the sea of cosmos.

In the "world of Jin", all the shackles are gone. This is a free and great world, and it is fully capable of bursting out the true ten percent of the combat power.

Like the strongest in the universe, the strength of the divine body is a hundred times that of the Lord of the universe! It is only because of the limitations of the original universe rules that he can only display the "million times divine power of the Lord of the universe"!

The strongest person in the universe in Jinzhi World is much more terrifying than the outside world!

Wang Yi sensed that a fresh but powerful energy quickly poured into his body, and then turned into divine power.

In the primitive universe, one must sense the ocean of law in order to absorb divine power. And this "world of Jin" can transform divine power by absorbing external energy.

And the spatial stability of this world is terrifying, far beyond imagination.

Wang Yi and Luo Feng had already made an appointment to travel together this time. The two of them were driving their own tomb boat, quickly falling downward, flying and teleporting, and they soon fell into this land.

This is an ancient and boundless land, surrounded by majestic rolling mountains, lush ancient forests that cannot be seen in the distance, and a huge lake that can be seen in the distance. Comfortable for aliens from the universe.

"No one seems to be there?" Luo Feng wondered. The place they entered seemed to be a wilderness. "I don't mean, why didn't you see the living creatures in Jin's world?"

"Be careful, look for it first." Wang Yi said, he knew that the world of Jin is a small universe with a diameter of 10 million light-years from the outside, but it is actually many times larger than that seen from the outside. The diameter of the world of Jin is , definitely more than a trillion light years! Although looking from the outside from the world of Jin, the small universe Jin World is very small, but it is much bigger inside. In such a vast area, there are countless indigenous powerhouses.

Here are the true gods of the void who are more powerful than the true gods of the universe, and the true gods of eternity who are stronger than the true gods of the void!

And if you want to infiltrate the world of Jin to explore its secrets, the best thing to do is to join the army of the world of Jin!

The world of Jin is mainly divided into two forces, one is the tribe force, and the other is the alien beast force. Both sides submit to military rule!

The army is really high, but in order to hone the soldiers, the army will still send some ordinary soldiers to attack some alien beasts and tribal forces.

However, this kind of "attack" is low-intensity, and the Void True God will not easily intervene.

"I just don't know if this is a tribal force or a foreign beast force." Wang Yi muttered in his heart.

The world of Jin is extremely dangerous, UU reading www.uukanshu.com clash of clans, beast fighting is a common thing.

Tribes fight against tribes, tribes fight against alien beasts, alien beasts fight against alien beasts... It's a common occurrence in the world of Jin.

And all of this is for the sake of tempering powerful warriors for the great god-king of the Jin world.

Of course, the **** king of the Jin world had already died and was reincarnated as an old man who was watching from the outside.

"The kings of the gods are dead, and the small universe of Jin Zhi World still exists. What is the principle?" Wang Yi was very puzzled. Although he received the inheritance of the Duandong River, he cannot see the message of transcending reincarnation now, so he does not understand why the small universe inside the God King does not collapse with his death, because the small universes of the strongest in the universe are all harmonious related to each other's lives.

"Could it be that this small universe was specially arranged before the fall of the King of Jin, and made some changes?" Wang Yi could only guess.

[Chapter 782: Dragon Tribe](#)

In the chaos of the Jin world, there are clear rules, everything is under the control of the army, endless treasures, supreme inheritance, a large number of strong... are all in the army.

In addition to the army, the world of Jin is roughly divided into two camps: alien forces and tribal forces.

The war in the world of Jin is also dominated by the conflict between the two camps.

Wang Yi and the others soon saw how fierce the fighting in the world of Jin was.

On a vast expanse of plain.

Two mighty torrents are rushing towards each other, and the sound of killing is shocking.

"kill!"

"kill!"

"Kill these **** of the wild dragon tribe!"

"Kill those **** in Blackhorn Mountain!"

Wang Yi and Luo Feng hid in the distance, watching from a distance that a tribal force was at war with the alien beast force. Thousands of soldiers from the two legions were slaughtering, and among them, true gods abounded.

It was Wang Yi and Luo Feng, and it was the first time they saw with their own eyes the magnificent scene of so many armies of the Lord of the Universe and the True God fighting together in groups.

As far as the eye can see, it is everywhere.

The Lord of the Universe is like rain! God is like a cloud!

Even Luo Feng was shocked. Although he knew that the creatures in the 'World of Jin' were very powerful and contained the secret of transcending reincarnation, he still felt incredible when he saw so many masters of the universe and true gods.

Wang Yi was much calmer, "The World of Jin", there are even eternal true gods, there are a lot of void true gods, true gods, the Lord of the universe are nothing.

The language of their roaring roars is exactly the same as the language used by the large number of memory stones in the Duandong River vein to record messages. This language is a common language in ancient civilizations. Wang Yi and Luo Feng naturally learned this language easily because of the inheritance of ancient civilizations.

They also vaguely understood that the warring savage dragon tribe and the alien beast force "Black Horn Mountain" are the two largest forces in the surrounding area. They are adjacent to each other and have been at war for a long time.

Although the war between tribal forces and alien beast forces is not endless, the losers often have to give up a lot of territory, which is related to the face of the forces and the scope of survival and reproduction. Therefore, once a border war breaks out between the two sides, they usually gather a large army, resulting in a lot of casualties. very cruel.

However, in general, before life and death, the leaders of the two sides will not easily take action at the level of the Void True God. This kind of war scene of mobilizing people has happened once in a long time. It is more like sharpening each other's power warriors and giving birth to more powerhouses.

The two were observing from a distance, and on the battlefield, some people noticed that there were two strangers appearing on the edge, but Wang Yi and Luo Feng tribe warriors, and their breath was the master of the law, appeared alone, those strong They don't care at all, and no one cares about them.

...

In the world of Jin, there are many tribes, except for countless ancient tribes. In the wilderness, there are many kinds of special life beasts entrenched.

The Barbarian Dragon Tribe and the Black Horn Mountain are the two most powerful forces in this area. After all, with so many cosmos masters and true gods, ordinary tribe forces and alien beast forces are probably difficult to come up with. The Barbarian Dragon Tribe and Heijiao Mountain are both the overlords of the neighborhood, and the two forces are often at war with each other.

In this vast world of Jin, countless tribes in the world of Jin also call this world "World of Jin". The Venerable Universe of the outside world is called the Venerable Law here. The Lord of the Universe is the Lord of Laws. The strongest person in the universe is the true God.

Tribal forces vary from big to small. Generally, powerful tribes have billions of followers. Those who can become the masters of the law are all great warriors.

In the world of Jin, there are countless tribal beasts!

The tribal beasts are madly fighting for the living space, and their warriors are also exceptionally powerful, and once the creatures in the "World of Jin" are born, they will be immortal as long as they reach adulthood!

They breathe the energy of the "world of Jin" at birth, and they will naturally master a law over time. Become immortal, do it all, and after some polishing, you can become the Venerable Law (the Venerable Universe).

However, it is very difficult to become the lord of the law (the lord of the universe). Generally, only one powerful warrior (the lord of the law) will appear among hundreds of ordinary warriors (the lord of the law).

True God is even rarer. Of course, the existence of a true **** is already considered a strong man, and he can occupy a small piece of territory.

Beyond the existence of true God? It is extremely rare, and the status of tribes that surpass the existence of true gods is extremely stable, and they belong to extremely powerful tribes. Every existence beyond the true God can easily establish a party's power and become a party's hegemon.

In the world of Jin, whether it is immortality, the venerable law, the master of the law, or the stronger true god, the void true god. Their "God Kingdom" and "Small Universe" are all in the core space of the entire "Jin World".

In the core of Jin World, there is an incomparably vast space, which should be regarded as the "Original Space" of Jin World, where there are a large number of Divine Kingdoms and a large number of small universes. However, the powerhouses of the Jin world cannot enter the source space at all, so naturally they cannot enter their own kingdom of gods, nor can they enter their own small universe.

They can't use the "mini-universe" to kill the enemy! Not only that! There are still many differences between the Jin world and the universe sea. For example... in the world of Jin, no one has a clone! Those immortals, law venerables, law masters, all have only one divine body! In fact, the so-called "availability of avatars" is originally bestowed by the primordial universe. The creatures in the Jin world have not been bestowed by the primordial universe, and naturally none of them have avatars.

Wang Yi and Luo Feng hid in the distance to observe the dimly lit battlefield. The strangely-shaped beasts roared and fought against the burly warriors with weapons. Those burly warriors are humanoid, most of them have a dragon-like scaly tail on their backs, with scales on their bodies, all of them wearing armor, insane, holding weapons and roaring. The killing was full of flesh and blood, and when the killing was fierce, they all died in pieces, which shocked both of them.

"A lot of those lords of the universe died!"

"Those who are stronger than the Lord of the Universe are also dead!"

The two sighed.

The two major forces did not seem to have any intention of covering up the battlefield, so they fought a decisive battle in such an upright manner. Wang Yi and Luo Feng hid in the distance, watching the collision between the two superpowers. For a time, a large amount of divine body was consumed in the

sky. In the face of some terrible collective attacks, some of the law masters were even killed by sweeping, and the weapons and armor fell.

The true gods are gathered on the other side. They are few in number, and they all mix and kill each other. This one-on-one or two-on-one killing will not cause large-scale attacks. It won't be too heavy. After all, the true **** is not easy to be born, and any superpower is reluctant to waste the true **** power.

When the two sighed, in another place thousands of light-years away in the sky, not affected by the battlefield, there was a vague void.

Four majestic figures are suspended in mid-air, and their auras are extremely tyrannical, all affecting the void, and the figures are facing each other.

One of them is the silhouette of three tribal warriors, all of them exuding infinite power, the surrounding void is like a solidification, completely isolated from the outside world, the master of this void is the middle of the three silhouettes. bit.

"Black Horn, you will lose this war." One of the three tribal forces, the Void True God, said coldly.

Heijiaoshan is a foreign beast force led by a void true god, while the wild dragon tribe is a tribal alliance led by three void true gods. Dragon', the other two Void True Gods are headed by him, and there are many large and small tribes that are not attached to the Void True God.

And Heijiaoshan can fight for many years with the forces of the barbarian dragon tribe with three true gods of the void, and the owner of Heijiaoshan is also very scary.

Heijiao is a circling alien beast with dense spikes on its body. Its huge head has only one eye. The strange thing is that the one eye seems to have a one eye in it. Its eyes can cause the true **** to be affected involuntarily. It aimed at the three powerhouses on the opposite side and sneered. "Karen, the war is not over yet, you are too early to say, and the war has been going on so far, the most dead are your tribe forces, if you continue to fight like this, I am afraid it will be you who will lose. According to the agreement, the losers this time, You have to give up 10% of the territory, and I look forward to seeing you leave in embarrassment."

"Humph!" The three tribal forces of the Void True God all glared angrily, and the alien beast 'Black Horn' didn't care. The combined strength of the three Void True Gods was only comparable to it. In a real fight, it was not certain who would win or lose.

For a long time, the two major forces fought, and there were winners and losers. Of course, there were times when the fighting was too crazy, the casualties were heavy, and the two sides ended without a winner.

And the current scene is nothing but pediatrics for both sides.

And they will not join the battlefield. Once they join the battlefield, it will be a complete slaughter. No matter how many masters of laws and true gods are not enough for the slaughter of the void and the true god, they can slaughter arbitrarily with the help of 'a thought of the void'.

As the unique ability of the True God of Void, 'One Thought of Void' is different from the True God of the Universe Ocean's 'according to the law'.

Speaking out of the law, it is not the ability of the true God to comprehend some laws after really comprehending them, but just some kind of gift!

Just like many innate secrets such as "Clone Power", they are all bestowed by the Primordial Universe. Once the Primordial Universe withdraws the gift, they will not be able to do it at all.

But from the true **** to the void true god, it is a huge leap.

Once you become the true **** of the void, it means you have a deeper understanding of the entire universe. According to the law, you will finally have absolute control over "a piece of void". This is not a gift, but absolute control.

Even the original will of the original universe cannot deprive this ability of self-comprehension and control.

Void True God! With a single thought, it becomes empty!

In a vast void, it can exert an extremely terrifying combat power. True God cannot slaughter the Lord of the universe with the help of "speaking and following the law", but the True God of Void can arbitrarily slaughter the True God and the Lord of the universe with "a single thought of the void".

With the power of "One Mind Void" alone, any Void True God can instantly sweep a large group of True Gods, and can become an overlord in the world of Jin.

...

Several Void True Gods confronted each other in the sky, and did not shoot. On the vast plain below, countless warriors from both sides fought into a group. The Lord of Laws fought against each other in groups. True God also has his own battlefield and will not break into the area of the Lord of Law at will. These are all unspoken rules of the battlefield...

Time passed, day by day, and the whole battle situation gradually came to the later stage.

The war lasted nearly three months.

"boom!"

Three towering figures appeared high in the sky, and a mighty voice resounded in all directions.

"All the warriors of the wild dragon tribe retreat!"

In the other direction, a black-horned beast with a huge and sinuous body appeared.

"Black Horn Mountain, retreat!"

With the appearance of the four Void True Gods one by one, the armies on both sides soon stopped fighting and retreated, and the messy plain quickly returned to calm.

"Huh?" Wang Yi and Luo Feng, who were on the edge of the plain, saw several silhouettes flying towards the side of the departing tribal army like lightning.

However, Wang Yi and Luo Feng were not panicked, because they felt that the person who came was just the master of the law.

Even in the face of a group of true gods, they are sure to retreat.

"Haha... I noticed it on the battlefield before, you are all travelers here, right?" A burst of hearty laughter came, and a group of gray armors carrying battle axes and long knives flew in front of Wang Yi and Wang Yi. The burly humanoid tribal warriors waiting for weapons were led by a young man with white scales on his head, purple vertical pupils, and a dragon tail behind him.

He took the people to fly near and stopped, looked at the two of them, and smiled, "Two, let me introduce myself, I'm a warrior from the nearby Wild Dragon Tribe, Wu Er, I am surrounded by warriors from the Wild Dragon Tribe Alliance. "

Luo Feng and Wang Yi looked at each other.

"Wang Yi, It seems that this world of Jin treats us as some kind of traveller. This is a good opportunity for us to infiltrate the forces of the world of Jin to understand their internal situation." Luo Feng said through a voice transmission.

Wang Yi nodded and said with a smile. "Yes, we are travelers." Luo Feng nodded and smiled, and said the common language of ancient civilizations. "I saw that the warriors of your wild dragon tribe are very brave and powerful."

"Haha..." A bright smile appeared on the face of the tribal youth, and a hint of pride appeared on the faces of the other tribal warriors.

"Our Wild Dragon Tribe Alliance is the most powerful force in the surrounding area. You are welcome to visit our territory." Wu Er said enthusiastically. In the world of Jin, there are many travelers who have traveled all over the world, but at least they have become the Venerable Law before they can go out to travel. For these travelers, most tribes are friendly. Because it takes a lot of courage to travel the vast and dangerous world of Jin, there are often super strong people among the travelers.

At the warm invitation of the young tribal warrior "Wu Er", Wang Yi and Luo Feng disguised as travelers and followed them to the territory of the most powerful tribal force in the area, the "Wild Dragon Tribe".

[Chapter 783: join the army](#)

Wang Yi and Luo Feng followed Wu Er and the others back to the Manlong Tribe. After communicating, they showed their strength a little, and they convinced many members of the Manlong Tribe and received more warm hospitality.

Strength is valued wherever it is. This is a truth that has not changed since ancient times.

And after learning that the 'world of Jin' is ruled by the army, and the inheritance of countless treasures is there, Luo Feng and Wang Yi decided to join the army after discussing it.

For their decision, Wu Er and other tribal warriors are also very supportive.

There is no inheritance in the tribe. If you want to become a strong person, you must enter the army! This is the "iron law" in the entire Jin world. Only the army is allowed to have profound inheritance, and even if they get some guidance, the returning strong people dare not teach it in the tribe.

The world of Jin is mainly to train the army and train the super strong. Therefore, countless tribes, but all warriors at the level of "Lord of Laws", will take a proportion of them into the army every time after a period of time! Only after a long period of time in the military can you retire and be free. If you dare to avoid the army, you will be hunted down by the entire Jin world. army. It is the strongest force in the entire Jin world.

There are a large number of armored weapons there. The so-called "Xeon and Supreme Treasures" are just standard equipment that exists at the "true **** level" in the army. At the same time, there are a lot of cultivation guidelines and inheritance... But the elimination rate in the army is extremely high, and if you are eliminated in the army, you will perish! One hundred into the army! I am afraid that less than five retired alive! Incredibly cruel!

Therefore, there are many benefits in the army, but it is the most terrifying place in the world of Jin, because 99% of the super-powerful people in the world of Jin, beyond the existence of true gods, are gathered in the army! Only in the secret natural army of the true core.

The bottom line of joining the military is the master of the law of success. Luo Feng wanted to join the army, and Wang Yi also wanted to join for his own goals.

The Barbarian Dragon Tribe will also regularly send a group of tribal warriors to the army, and Wang Yi and Luo Feng will set out with them to enter the army at that time.

...

virtual universe.

"The army of the world of Jin?" Chaos City Lord, the founder of the giant axe and other high-level human beings who have not entered the world of Jin are amazed when they hear the secrets of the army.

The power of Jin's world is far beyond their imagination. But also very dangerous.

If it wasn't to deal with the beast crisis, the human race would not want Wang Yi and Luo Feng to take risks easily.

"You have to pay attention to safety." Chaos City Lord and others urged.

...

time flies.

In the world of Jin, the tribe of barbarian dragons. "Go, Yinhe, Jiujiang, go, we're about to go." Wuer and a group of warriors from the tribe gathered together happily. It doesn't seem like going to join the army that knocks out the cruelty of death.

"Have you finished saying goodbye, then let's go." A barbarian tribal goddess wearing purple armor with a sullen face walked out of an ancient purple warship with a dragon tail. This is a true **** of the Barbarian Dragon Tribe who once participated in the army and returned. This time, he is responsible for

sending tribal warriors to join the army. She was full of suffocation, as if she had experienced countless battles, and it gave Wang Yi the feeling that it was more terrifying than a giant axe without mechanical treasures.

"gone."

"You must come back alive."

"Gonwa, don't embarrass our tribe."

"come on!"

Amid the cries of the clan gathering to send off the crowd, a group of powerful tribal warriors entered the warship with high fighting spirit.

Soon, the ancient purple warship rose into the air, flew out of the wild dragon tribe's territory, and flew in the direction of the army.

...

"Little fellows." Inside the warship, in a huge cabin, the goddess Ji Wei in purple armor looked coldly at the tribe's juniors who were kept at a height of 10,000 kilometers. This time, the Manlong tribe went to participate. There are 2,002 soldiers in the army, and the extra two are foreigners Wang Yi and Luo Feng. "This time, there are 2,000 warriors in my Barbarian Dragon tribe. Let's join the Southern Army! There are also two brave warriors who have traveled, Jiujiang and Yinhe. In my opinion, their strength is stronger than any of you!"

The 2,000 tribal warriors were a little disturbed, and many of them looked at Wang Yi and Luo Feng, who were relatively unfamiliar in the crowd.

Although Wang Yi and Luo Feng stayed in the Manlong Tribe for a period of time and emerged, not everyone knew them, and more people did not know their strength. So there are a lot of people who are not convinced for a while.

But in front of the tribe's well-known true **** powerhouse 'True God Ji Wei', they didn't dare to show it right away.

Ji Wei doesn't care about the thoughts of these little guys. In her opinion, these little guys are too immature and need to be beaten well. If they can keep their mentality a little more positive before entering the cruel army, that's not bad.

"Don't be unconvinced." 'True God Ji Wei' shouted, "Except for Wu Er and Mina who have caught up with the two of you, the others are far worse than Jiujiang and Yinhe. Normally, among you, There are three or four achievements who can successfully join the army assessment this time, but Jiujiang and Yinhe are qualified to join the special army in the army."

"Special Legion?"

Those tribal warriors who were not convinced were taken aback.

The Jinzhi World army is divided into many legions, and it is the ordinary army that occupies 99%. Like the 2,000 Barbarian Dragon Tribes being screened this time... not one of them will be able to enter the special legion.

Even if the barbarian dragon tribe warriors who have joined the army all the time, few can be selected into the special army.

Only the very special and outstanding among the Lord of Laws may be selected for the special legion.

True God Ji Wei was not selected at the beginning.

The sergeant of the special legion can be called one in ten thousand, and is the real elite among the masters of law.

After understanding the difference between them, the tribal warriors looked at Wang Yi and Luo Feng differently.

"Haha... Jiujiang and Yinhe are friends I met when I went back to the battlefield..." Wu Er in the crowd was quite proud. He had two friends who joined the special army, and he had a bright face when he said it.

Another tribal female warrior 'Mina' in the crowd also looked over curiously.

This Mina is not from the 'Barbarian Dragon Tribe', but from another large tribe, the 'Soul Goose Tribe', without scales and tails, but with a pair of beautiful wings.

"Joining the special army is not so easy, and Jiujiang and Yinhe are only very possible." Ji Wei Zhenshen said coldly, "However, their strength, at least it is easy to pass the army screening, but you are dangerous, many people may fail."

Those tribal warriors quieted down. They all knew that army screening was also life-threatening, and failure meant death, but they were still fearless.

For them, joining the army, honing into a strong man, and fighting for His Majesty the King of God is the dream of this life.

On the other hand, Wang Yi and Luo Feng had calm expressions. They were different from these aboriginals. Aboriginal life did not have clones. They had clones, so they were naturally different.

Moreover, they have the best inheritance, and they consider themselves to be the first-class among the masters of the law. Ordinary tribal warriors can pass, and they naturally won't worry about the army assessment.

Luo Feng still had his thoughts and Wang Yi's voice transmission, "Wang Yi, this special army sounds like it is the core existence of the army. We have a chance, we must join..."

Wang Yi smiled and nodded.

...

In the vast world of Jin, ancient warships turned into streamers and flew through the vast world.

The group of 2,000 warriors from the Barbarian Dragon Tribal Alliance, as well as Wang Yi and Luo Feng, sometimes teleported and sometimes flew forward at high speed under the leadership of the true **** "Ji Wei". On the way alone, there are many dangers discovered... but these dangers are either avoided or forced through.

The most dangerous thing is to be besieged by a group of true gods of alien beasts in the wilderness, but they are all rushed over by true **** Ji Wei, who is driving the most powerful warship.

And there are some territories occupied by the Void True God, but Ji Wei True God is not so worried, because there are unspoken rules in the world of Jin, like her, who sends tribal warriors to join the army, the Void True God such a one-sided overlord will not block it for no reason. .

Of course, it is still necessary to avoid it. After all, they haven't actually joined the military yet.

After going forward for about four months.

"We are about to arrive at the Southern Army barracks." Ji Wei, who had a cold expression, shouted while looking at the distant horizon.

"Southern Army Barracks?"

The warriors of the Master of Law, who were sitting in the cabins to rest and chat, all stood up one after another and looked forward. Wang Yi and Luo Feng also looked up. The distant horizon... There was a faint spread of endless pressure. As the warship continued to advance at a high speed, it gradually became clear, and the endless rolling barracks could already be seen.

"Is this the Southern Army Barracks?"

"I feel the breath of countless strong men."

"I heard that there are countless strong people in our Jin world gathered in the army, as well as endless treasures and inheritance."

"Join the army, survive, become a true god, even a true **** of the void!"

Those tribal warriors all looked at the direction of the barracks with excitement.

The armies in the world of Jin are divided into four armies, east, west, northwest, and even though they are all loyal to His Majesty the King of God, but these four armies have always been competing with each other.

As the warships approached, Wang Yi and the others watched more carefully, and they were all shocked.

The rolling barracks can't be seen at a glance. There are dense warriors everywhere in the barracks. The most common one is naturally the "Lord of the Universe". In addition to the countless warriors, there are also some "alien beasts" who have joined the army. The various forms of alien beasts amaze the group of warriors in the warship.

And Wang Yi immediately noticed the strange objects in the depths of the military camp. Each strange object was hundreds of millions of kilometers high, and the soldiers next to it were much smaller than one of them.

Not only Wang Yi noticed it, but the tribal warriors in the warship also quickly noticed it.

"What?"

"What is that? So tall?"

"I've never seen anything like this in the tribe."

The strange objects that are hundreds of millions of kilometers high are similar to "giant spherical fortresses". At a glance, there are thousands of spherical fortresses. In addition to these spherical fortresses... there are also massive fortresses around the fortress. a strange thing like a bird.

"That's a machine!" Ji Wei Zhenshen said, "That's a powerful machine made by the mechanical sergeants. It can be used by a large number of soldiers to explode a powerful combat force... The one you just saw, the highest ball-shaped machine. , called 'Jin Luo Tiandi', at least one million true gods are needed to fully control it. The limit can accommodate up to 10 million true gods in it... Only a collective bombardment can kill a group of void true gods. "

"One bombardment can kill a group of Void True Gods?" Those tribal warriors were stunned.

Their dream is to become a great Void True God, a character like a patriarch, but this 'Jin Luo Tiandi' can accommodate tens of thousands of True Gods, and with a single bombardment, the Void True God can't resist.

Wang Yi nodded inwardly when he heard it. Such a machine is top-notch even in the records of the inheritance of ancient civilizations. Those who can surpass them are probably only the ultimate war machines such as the 'Cosmic Boat' and the 'Chaos Star', which can be painstakingly built by a force like Wu, who is very good at mechanical treasures. That is a powerful strange object that even the king of gods is difficult to destroy and the master of chaos has to avoid. A cosmic boat, if all the combat power can explode... True God? Even hundreds of millions of true gods are just ants.

Ji Wei continued to introduce them to them: "The small bird-like machinery next to Jinluo Tiandi is the famous 'Jiu Yan', and it is also one of the proudest machinery in the Jin world."

"Dove-painted, at least a hundred true gods are needed to motivate it. At most, a thousand true gods can be accommodated."

"The dove is famous for its speed and flexibility! The defense is extremely strong, although there is only one attack method. But it is an extremely effective machine in large-scale wars."

With the introduction of True God Ji Wei, Wang Yi and the others have a better understanding of the army.

...

The southern army camp is endlessly vast. About a quarter of the tribes and alien beast forces in the entire Jin World will join the Southern Army, so it can be said that "warriors" come to join every day...

and the screening assessment is strictly strict, which makes waiting for the screening assessment. The warriors of the fighters have long been lined up in a long line, and at a glance, there is no end in sight.

"boom!"

The purple warship landed on the surrounding plain. Two thousand tribal warriors plus Wang Yi and Luo Feng filed out under the urging of True God Ji Wei. When they walked outside the warship, they could see the palace battle in the distance. The ship flew over, apparently also to send the soldiers.

"You all go over there, line up, and wait for the army to be screened quietly." Ji Wei Zhenshen returned from the army before, and he has sent tribal warriors to join the army more than once or twice. Naturally, he is familiar with everything here and makes arrangements soon.

The 2,000 tribal warriors, including Wang Yi and Luo Feng, quickly came to the end of the long line, and quickly followed.

Wang Yi was in the line, looking at the long snake line in front of him that couldn't see the edge at a glance. Even he couldn't see how many people were in the line. It was conceivable that there were so many people participating in the army.

"This is just a screening. The world of Jin is too big. I don't know how many strong people there are." Wang Yi was amazed.

The people in line in front of them are the masters of the law! In a primitive universe ~www.mtlnovel.com~ there are only more than a thousand masters of laws, but here, Chinese cabbage is everywhere!

Moreover, military screening is fatal! Still very high!

Sure enough, Ji Wei Zhenshen said: "Don't worry, there are still a million people in line in front of you, you wait, according to the normal speed, it should be your turn in half a month."

Luo Feng was speechless. One million Universe Lords were queuing up, which was unheard of.

"Also." True God Ji Wei's eyes contained a warning, "Be prepared, keep calm during the battle, only the most basic screening for joining the army, only one-third of the normal ones who can join the army, and the other two-thirds are all He died. Joining the army is just the beginning. There were more than 2,000 of my comrades who went to join the army, and only 49 of them came back alive, and only the four of us became true gods."

The faces of the warriors of the Wild Dragon Tribe became solemn, and they obviously felt the pressure. That's why Wang Yi and Luo Feng are more relaxed.

[Chapter 784: army screening](#)

The plains are crowded with people, in addition to humanoid creatures, there are also a large number of alien beasts.

Wang Yi and other Barbarian Dragon tribe warriors were still waiting, and Ji Wei had already gone to communicate with the true **** she knew.

And Wang Yi and others who were waiting for the assessment and screening also heard roars and screams of pain coming from the front.

Clearly the screening for entry into the military was brutal.

The tribal warriors are also chatting in private, and they have actively communicated with Wang Yi and the others. Obviously, everyone thinks that with Wang Yi and his strength, it is very easy to pass the army screening. Help, and your chances of survival will definitely increase.

As time passed, Wang Yi kept advancing with the team. After more than half a month, it was Wang Yi, Luo Feng, and the warriors of the Manlong tribe.

"The next batch, three thousand, all come in."

As a true **** of alien beasts with twelve wings covered with spiky fur swept and roared, 3,000 warriors (including alien beasts), including Wang Yi Luofeng and the Manlong Tribe, were all led to join the army. The **** screened out.

"Only one-third of our tribe's 2,000 people were taken away?" Wu Er whispered.

This is also a good thing for the wild dragon tribe, so as not to kill each other.

The bustling 3,000 warriors and alien beasts walked directly towards the huge stone arch ahead under the guidance of several true gods.

Wang Yi and Luo Feng directly entered the stone arch with the tide.

boom...

After entering the stone arch, the time and space suddenly changed, entering a vast and desolate land, and the ground was full of ice and snow. You can vaguely see the range of hundreds of millions of kilometers around, and there is darkness in the distance. This is a cold and windy snow field.

"Where is this place?"

"Come closer everyone. Be careful."

Wang Yi and Luo Feng were next to each other, and many other warriors from the Manlong Tribe were also around. They gathered around each other and watched the surroundings vigilantly. About seven or eight hundred people from the Manlong Tribe came in this time, and the other beasts and warriors also went their separate ways. Form a camp to look around.

"boom!"

Suddenly, an invisible coercion descended, covering the entire ice field.

All the warriors and alien beasts looked up.

Above is a bird with open wings wearing red armor condensed by raging fire, star-like red pupils overlooking the people below.

Invisible coercion shrouded. Everyone was horrified. The coercion is not strong... But the natural aloofness and the trembling of his own divine power make everyone understand that this existence in the sky should not be a true god, but a higher level... Void true god!

"What a strong coercion."

"It feels much stronger than my tribe's true god."

"It should be a Void True God."

At this time, the flaming flames on the bodies of the birds and beasts suddenly descended and split into two flames, but they fell on the ice field in an instant, and then curved up, circling randomly among the 3,000 warriors and beasts... The two flames, respectively 1500 warriors and alien beasts were enclosed. The group of warrior alien beasts that were encircled on the left had a hazy red light on their surface, while the group of warrior alien beasts enclosed on the right had a layer of blue light.

And Wang Yi and the others and the Manlong tribe warriors were almost all assigned to Blu-ray.

"Wait, there are two camps."

The flame beast made a crisp and soft but cold and indifferent voice.

The masters of the many laws below listened with bated breath. Luo Feng and Wang Yi also raised their heads.

"In the army, the weak are eliminated, and the strong survive!"

"Next, you two camps kill each other, kill each other, and when I tell you to stop, the ones alive can enter the army. If you have the strength, do your best to play! If you have special talents, maybe you can Selected into the special army!"

"let's start!"

After finishing speaking, the flames of the flame beast's body expanded, then instantly contracted and condensed into a little, and then disappeared.

"Whoo~"

"Whoo~"

In the dark ice field with a range of hundreds of millions of kilometers, there are only 3,000 alien warriors divided into two camps in the whistling cold wind.

The two camps of warriors and alien beasts were shrouded in a layer of red light and blue light respectively.

Although they were in the icy world, these alien beast warriors had a scorching killing intent in their hearts.

"kill!"

"Roar..."

"Kill it!"

"Haha, I, Wofang, like this kind of killing!"

The warriors and alien beasts of the two camps roared in an instant, turning into streaks of light and lightning. The tribal warriors of the same camp naturally had a tacit understanding and would not fight with their own warriors. Instead, they selected some other tribes or alien beasts, and they all tried their best to use their methods to kill each other.

Luo Feng and Wang Yi looked at each other.

"Wang Yi, if you want to enter the special army, you should look at your strength. Therefore, the more you kill, the better." Luo Feng's killing intent was cold. "Would you like to kill more than any of us?"

"Then let's try it out." Wang Yi smiled slightly.

better than? Among the Lords of Laws, he has never been afraid of anyone.

Being able to create an eighth-order secret technique by himself, and having deduced it to the top eighth-order level over the years, Wang Yi is the top peerless genius even in the ancient civilization, and it is more than enough to be accepted as an apprentice by the god-king.

One of the special legions of the forces under the King of God? Pediatrics only!

"boom!"

"boom!"

The two started at the same time, burning divine power, their figures turned into lightning, and they killed the enemy of the opposite camp.

Of course, they didn't use the "Destruction" burning magic secret technique, because there is no such secret technique outside the army, only the army has it. They have never joined the army before, and they must have a record.

"kill!"

"Kill!"

"what!"

"Roar!"

The two powerhouses are fighting frantically. Alien beasts and warriors all slaughtered together.

As long as it's not from your own faction, kill it!

All kinds of attacks appeared, and the divine power oscillated. If the sky and the earth had already been shattered in the sea of cosmos, the time and space of this side was extremely stable. Even if so many masters of the universe were fighting, they did not cause any space ripples.

Holding a sword, Wang Yi charged towards a black-armored beast shrouded in red light that was spitting out blood from a barbarian tribal warrior, his eyes filled with murderous intent.

"Death!" The black-armored beast also found Wang Yi, his mouth opened wide, and he roared.

"Boom!" An invisible attack descended.

The surrounding air was faintly distorted, and the faces of some approaching alien beasts and warriors also showed dazed expressions.

"Soul attack?" Wang Yi smiled.

As soon as the virtual power entered Wang Yi's body, it was swallowed up by an invisible force, and no ripples were raised.

"Huh?" The black armored beast, who was full of confidence in attacking his own soul, looked a little dignified.

The masters of those laws were almost all affected by the attack on their souls. Only the man in red armor in front of him could easily decipher its secrets.

The Lord of the Law in front of him is not simple.

The black armored beast's eyes flickered for a moment, then turned around and left.

"Huh? You left without fighting?" Wang Yi was slightly surprised, but then he understood.

This time, the army screening is killing, and the killing will stop when a certain number of people are killed.

In this case, some vigilant people will naturally choose to avoid some powerful characters, and will not rashly fight with them.

In its eyes, Wang Yi is not easy to be provoked, and the depth of it is unknown. It is not willing to fight Wang Yi rashly at this time.

If it is one-on-one, there are so many enemies around, even the strongest Lord of the Laws may accidentally fall over.

"Unfortunately, I won't let you go." Wang Yi's eyes narrowed.

"Boom!" An even bigger and more bizarre soul attack erupted from Wang Yi, like a surging ocean wave, sweeping away mightily.

You must know that Wang Yi has studied the secret technique of the soul over the years, and he has also researched the secret technique of the soul to the top level of the seventh order!

This already belongs to the normal level of the strongest person in the universe in the sea of cosmos.

Even in the world of Jin, what the Lord of the Laws of the Army can do is an absolute genius! It will be focused on training!

You must know that the Duandonghe lineage is also a top-level force, but most of the Duandonghe in the past dynasties only reached this level in the master of the law, surpassing only two.

This time, in order to hide people's eyes and ears, Wang Yi did not explode with all his strength, but only a part of his strength, but it was extremely astonishing.

"Boom!" A powerful ethereal power radiated out in a fan shape, avoiding his own people and sweeping across a large number of enemies in the front area.

The world of Jin is a world that has been fighting for a long time. In addition, the ancient civilization has not been cut off. The strength of the strong here is generally stronger than that of the universe.

The fourth-order top level should be regarded as the worst, and most of them can reach the fifth-order or even the fifth-order top.

Even the most outstanding Wuer and Mina of the Barbarian Dragon tribe have reached the sixth-order combat power. As the core of the tribe this time, the two have a Xeon Supreme Battle Armor.

Of course, it can't compare to Wang Yi. Even if Wang Yi uses the sixth-order soul-level secret technique, he also brings the soul-class Xeon treasure, and with assistance, he can exert the seventh-order power!

Using divine power to burn secret techniques, Wang Yi dare not! Because it can't stand the verification of the army, but the secret law of the soul created by itself doesn't care!

How can the Lords of Laws who are mostly fourth- and fifth-order in strength resist?

Many red-light alien warriors fell into this area and were affected by the soul attack, and most of them were immediately blinded.

This Meng, to give the opponent a chance.

"what!"

"what!"

"Ow!"

...

The screams continued one after another, and many alien warriors from the red light camp were poisoned.

The black-armored beast was also startled. Although it could resist Wang Yi's soul attack, it was quite laborious and its strength had also dropped a part.

"Such a large-scale soul attack is actually stronger than my soul attack?" The black armored beast felt a chill in his heart. It also saw the fate of its own people around it, and it did not dare to stay and fight with Wang Yi.

Wang Yi was also a little surprised when he saw the target black-armored beast going away quickly. "The Lord of the One Rule, can actually block my attack?"

Although the origins of the black armored beasts are not ordinary, they have a soul-class Xeon treasure on their body, so that they can easily block the influence of Wang Yi's soul secret technique. But the strength is also greatly reduced! That's why I didn't dare to fight against Wang Yi. Too dangerous.

The alien beast warriors in the area around Wang Yi shrouded in red light all looked at the man with red armor and black hair in horror.

"This, such a terrible soul attack?"

"I can't stop it at all!"

"Kill! Kill him first!"

Some alien beasts and warriors want to work together to kill this dangerous person, and some are afraid to stay away.

The Blu-ray camp also looked at this scene in astonishment.

"impressive!"

"That red armor is actually so powerful?"

Luo Feng, who was chasing down a Red Light faction soldier, was helpless.

"Run away, don't go to death, you are not his opponents." He wanted to persuade him.

Seeing those alien beast warriors taking the initiative to join Wang Yi, he knew that this time he lost the game.

However, Luo Feng didn't think too much about it. To make a more ruthless shot, he had to join the special army.

It would be embarrassing if Wang Yi joined him but didn't.

...

But Wang Yi still smiled when he saw those warriors and beasts coming towards him.

"boom!"

The powerful soul attack erupted, just like a gust of wind hitting a dead leaf, and the masters of the law who came over in a violent manner immediately stumbled.

On the other hand, Wang Yi flew past them lightly, and the sword slashed sharply on their armored bodies, causing them huge damage.

Those alien beast warriors have armored treasures on their bodies. But they couldn't stand it, they didn't resist, they couldn't parry Wang Yi's sword.

The war sword swishes in the air.

How fast can the strong attack? It exploded in an instant without knowing how many attacks.

A momentary trance is the result of death.

The sword light danced, and death came.

All of a sudden, the masters of more than ten laws were annihilated and fell under Wang Yi's sword.

And the alien warriors nearby were stunned.

too terrifying!

This Lord of Laws, relying solely on soul attacks, are extremely terrifying existences among the Lords of Laws!

Can't provoke!

Realizing this, those alien beast warriors from the red light camp quickly moved away from this battlefield.

Wherever Wang Yi went, it was emptied. Those alien beast warriors did not dare to stay, otherwise, even if they blocked Wang Yi's soul attack, they would be affected and their strength would be weakened, which would be very dangerous.

"Oh? This little guy has a good grasp of the secrets of the soul. He can do this step in the master of the law and join the army to temper. If he doesn't fall, he will definitely become a true god." The true **** of the flames and beasts hidden in the darkness nodded slightly. "It seems that this little guy can join the special army, and the one with the knife can also join the special army."

"This batch has been screened well, and there are actually two seedlings who joined the special army." The flame alien showed a smile.

"Jiujiang is actually so strong." Wu Er and other Barbarian Dragon tribe warriors were also shocked. Wang Yi fought with them, but he had never used the soul secret technique. After all, it was too bullying.

But now, sweep! No alien warrior dared to appear in front of Wang Yi.

Seeing Wuer and the others, their blood is boiling and they are very excited!

"Kill!"

There are Wang Yi and Luo Feng, UU reading [www.uukanshu](http://www.uukanshu.com). Especially Wang Yi's soul attack was sweeping away a large area. Those alien beast warriors were completely crushed and beaten, and they quickly collapsed and suffered heavy casualties. The death ratio of the two sides is not at the same level at all.

The slaughter was fierce, and as time passed, a famous warrior and a strange beast perished.

"Stop!" A powerful coercion came instantly.

It was as if an endless mountain was pressed down, booming, and all the fighting law master warriors were pressed down, and Wang Yi and Luo Feng also fell down, without the power to resist.

The flaming beast emerged from the darkness and was extremely dazzling.

"You, and you!" The flame beast looked at Wang Yi and Luo Feng, "You two, enter the Yusu Army."

[Chapter 785: Special Corps "Yishu Army"](#)

The battle finally stopped, and the Red Light camp still had lingering fears. In the brutal fight just now, the Red Light side suffered heavy casualties, almost ten to one casualty ratio.

The reason for such a big gap is the man in red armor.

Compared with the large piece on the blue light side, the red light side looks sparse and miserable.

The warriors of the wild dragon tribe didn't lose much, so they were happy too.

However, this is just the beginning. On the road of the strong, the vast majority are destined to fall! If you enter an army alone, two-thirds of them will die, and you can imagine the future. There are definitely not many who can retire alive and return to the Horde. But they were already mentally prepared.

There is such a legend in the whole world of Jin... death means reincarnation. They are used to seeing life and death. The creatures in the world of Jin are naturally used to it, and they will not be too sad.

"call."

A huge arch appeared out of thin air in the icy and desolate snowfield, and the three true gods came out and shouted at the surviving tribal warriors and alien beasts.

"You all come here."

"Don't linger, let's go."

"Come with me, you two who have entered the army." One of the female true gods wearing ice blue armor with two horns on her head looked at Wang Yi and Luo Feng.

Wang Yi and Luo Feng glanced at each other, and after saying goodbye to Wu Er and the others in a hurry, he followed the True God and walked out along the arch with the envious gazes of those alien beast warriors.

After leaving the selection space, he appeared outside the barracks.

"Follow me." The female true **** flew up now.

Wang Yi and Luo Feng followed her obediently, and secretly discussed it through voice transmission.

"It's actually going to fly slowly, and the space is completely blocked. It seems that in the military camp, it is impossible to teleport at all." Luo Feng watched from side to side.

"This woman has a good figure." Wang Yi sighed.

Luo Feng stared at him with wide eyes.

"just kidding."

"You just skin it."

"I won the previous game."

"If you win, you will win, and there is no lottery."

"Ah, I forgot to add it, it's a mistake..."

The female God who flew in front did not know that the two were criticizing her figure in private, and she flew the two recruits in the vast military camp with an indifferent expression. Their speed was about the speed of light.

There are many special corps in the Southern Army, and the Yusu Army is just one of the many special corps.

The Southern Army barracks are so large that they can be called infinitely vast. Wang Yi and Luo Feng followed the female true **** through flight and "wormhole teleportation". It took about half a day to arrive at an incomparably tall hall with shadows of people and beasts everywhere.

The three of them landed here, "You two are waiting outside the armament point." The female true **** shouted and entered the hall, while Wang Yi and Luo Feng waited outside bored.

"Armament point?" Luo Feng said to Wang Yi, watching some warriors and alien beasts go in and out, "It seems that this should be the place where the army exchanges armaments, but it's a pity that the goddess who led the way didn't explain it to us."

Wang Yi smiled. Although they were selected to enter the special army, they haven't become true gods yet, and people don't care.

Besides, you are a sergeant, someone is really a god, do you need to befriend you on purpose?

Only the kind of peerless genius who can become the true **** of the void may have a different attitude.

The Void True God, even in the army, can be in a high position, and ordinary True God cannot afford to offend.

"I heard that the military treasures in the world of Jin are endless, so I guess it's not easy to get them." On the way to the army, Luo Feng also inquired some information from the warriors of the Barbarian Dragon tribe. Although it was not very detailed, he also understood the situation of the army.

In the world of Jin, the army is used to hone warriors.

All fighters are trained by fighting again and again! A large number of sergeants have been killed in the trials of life and death... Similarly, those who did not fall can get military merit, and the trophies of the soldiers... can be exchanged for military merit, and military merit can be exchanged for military equipment!

The more military merit, the better the performance, the more benefits that can be exchanged!

As long as the military merit is enough, almost anything can be exchanged, such as the treasured weapons of the true gods, armor, warships, strange objects of various uses, the private guards composed of true gods, and powerful mechanical treasures that can leapfrog challenges. Some powerful inheritances, the guidance of the powerhouses of the Void True God, territories, military positions... can all be exchanged for military merit!

In the world of Jin, the army is the ruler, and military merit is almost omnipotent!

However, the higher the benefits, the higher the military merit required. Even a true **** needs a long time to accumulate military merit, just like the master of the law, the accumulation of military merit is slower and takes a long, long time.

Wang Yi murmured in his heart, how long? The treasure points on his body are almost exhausted now, and he doesn't care about this armament at all.

He has the Xeon Supreme Treasure, and he also has the mechanical flow treasure, that is, some group flow mechanical treasures that need to be controlled by multiple people, maybe they need to be exchanged.

But how many true gods are there in the human race?

Not too much even in the future!

Therefore, small machines such as 'Dove Tuo' require hundreds of true gods, not just a few.

That is to say, some secrets and inheritances of Jinzhi's world are somewhat attractive to him. As for treasures? Don't really care.

Not long after, the female True God walked out of the armament point hall, and with a wave of her hand, two rays of light descended and landed in front of Wang Yi and Luo Feng.

"Although you are only the masters of the law, but you are in the Yusu army, so you can get a true god-level battle armor - 'a set of true god-level Yusu armor', and you are just a fish armor." The female true **** glanced at Wang Yi He Luo Feng's attitude was completely business-like, and his voice was flat, "It can make you live longer in the battle of life and death, especially in the age of recruits, you can survive and survive. Well, follow me to Yusu jun. "

The special army is different from the ordinary army. They are the elites of the Lord of Laws and naturally face more dangerous battles! Ordinary sergeants have a high probability of dying. If Yusu Army sergeants are at the same level of danger, I am afraid that few will die, so the experience of special corps such as Yusu Army will be more dangerous than ordinary sergeants!

Giving True God Armor and nothing else is just to increase their chances of survival.

It can also be seen from the side that the test of the special legion is not ordinary.

Wang Yi and Luo Feng held a set of True God armor and looked at each other.

A true god-level armor?

In the sea of cosmos, this is the Xeon Supreme Treasure Armor! In the world of Jin, it is only the standard battle armor of the true god. Sergeants like the Lord of General Laws are not eligible, and special legions are special. However, there are strong and weak points. Just like some Xeon and Supreme Treasures have seven secret patterns, and some don't even have seven. This fish locust is estimated to be the most common Xeon treasure, but it is a free gift, don't give it for nothing.

It's just that the armors on Wang Yi and Luo Feng are much better than the Yusu armor, and they probably won't be used.

"Come on, everyone recognizes the Lord and puts them on! All the sergeants of the Yusu Army must put them on." The female goddess looked at the two of them motionless, and frowned and shouted.

The two had no choice, and immediately recognized the master.

Wow... The original armor was quickly put away, but the fish armor quickly appeared on the body surface. I saw a layer of ice blue exquisite armor quickly appeared on the two of them. The armor was composed of countless beautiful scales. It has a head shape like a dragon and a fish, and there is a layer of beautiful silver lines on the ice blue armor.

"It's really pretty, like a work of art." Luo Feng couldn't help but complain to Wang Yi. "It's just not as good as the armor I used before. I don't know if I can go back and sell it at this armament point."

Wang Yi didn't think too much about it, he just thought it was good if it wasn't green.

...

Afterwards, Wang Yi, Luo Feng and the others spent nearly four days in the barracks with this female true **** speechless, and finally came to a huge and majestic tree with leaves on it, I am afraid it is thousands of dollars. , as if endless, each leaf is comparable in size to a planet, and the diameter of the entire tree canopy can be measured in light years, and at a glance, you can see blue figures one after another.

"What a big tree." Luo Feng and Wang Yi were amazed and looked at the majestic and endless giant tree in front of them. To be honest, it was the first time they had seen such a big tree. "Also, all I see inside seem to be sergeants wearing Yusu armor. This should be where Yusu is?"

The female goddess looked in one direction and moved her lips, but Wang Yi and Luo Feng didn't hear any sound, it was probably sound transmission.

Afterwards, the female true **** turned to Wang Yi and Luo Feng behind him and said, "Someone will come to pick you up soon. You are all divided into four teams and seven teams."

"Thank you sir." Wang Yi and Luo Feng were very polite.

The female true **** nodded, then turned into a streamer and left quickly.

Wang Yi sighed as he looked at the back of her leaving. "This woman is so cold, and I don't know if she has a man."

Luo Feng: "..."

Not long after the female true **** spread the word, Wang Yi and Luo Feng soon saw silhouettes flickering in the distance, obviously teleporting. There were more than 20 figures that teleported over, followed by flying and hovering beside Wang Yi and Luo Feng. These more than 20 figures are humanoid creatures and alien beasts.

They were all looking at Wang Yi and Luo Feng with scrutiny eyes.

"There are new recruits here."

"I made a bet with Baixiong about when the new recruits would arrive, but I didn't expect it to be so soon."

"I hope these two recruits are better. The last time I died was too fast."

These newly-appeared members of the Yusujun team didn't care about the two of them, and they talked directly.

However, Wang Yi noticed that among the twenty or so figures hanging in the air in front of him, a blue-haired woman looked at him a few times with a slightly strange look.

"Okay, you two newcomers, report your names and tell us what you are good at." A tall and sturdy man with braids and dark skin said.

"I, Jiujiang, am good at soul secret arts." Wang Yi said.

"I, Yinhe, is weaker than Jiujiang, and I can dodge melee combat." Luo Feng also said.

Seemingly feeling the confidence of the two, everyone else laughed.

"It seems that these two recruits are very confident."

"It's all like this for the newcomers, and soon they will know the pain."

"It has to be well tempered and tempered."

"Fortunately, there have been no disaster-level missions recently, otherwise they would have to cry."

"What are you kidding me, they want to get through the catastrophic mission too? It's hard for us all."

The twenty or so figures looked at Wang Yi and Luo Feng with interest.

Those who can join the special legion are all elites and have both hands. They will not despise this newcomer, but they will not pay too much attention to it, unless they show special strength, then it will be different.

It was the first time we met, so that's it.

The tall black-skinned man with braids was about to say something when the blue-haired woman next to him said, "Jiujiang, right? Join my team."

There was a slight silence around, and the dark-skinned man frowned and said, "Xue Ling, we haven't started discussing it yet..."

"What's there to discuss, you and me are the only two teams in the seventh team, do you still want to fight with me as a real captain?" The blue-haired woman was very rude.

"No, I'm just..." The dark-skinned burly man hurriedly laughed, "I just think that the team's affairs still need to be discussed carefully. After all, I have to ask the newcomer's opinion." He was also sensitively aware of the blue-haired woman Wang Yi's attitude seemed to be a little different, and he looked at him again with a hint of malice in his eyes.

Wang Yi and Luo Feng also noticed that the seventh team of the ninth brigade did not seem to be peaceful.

"It's intrigue." Luo Feng joked to Wang Yi's voice transmission, "However, why did this woman ask you to join me? Could it be that she took a fancy to you?"

Wang Yi blinked, looked at the tall, slender and beautiful blue-haired woman with a cool breath, and nodded earnestly. "I think so."

Luo Feng: "..."

Did you admit it so shamelessly?

And the members of the Yusu Army team were also muttering, watching the two captains and deputy captains compete for two recruits.

Usually they also fight, but not so fiercely this time.

Mainly because the vice-captain 'Xue Ling' seemed to have an unusual attitude towards the black-haired boy.

So many eyes looking at Wang Yi gloated.

Everyone knows that the leader of the seventh team, Mogu, has been pursuing the vice-captain, Xue Ling, but because of some things, Xue Ling has always hated this "Mogu" and never gave her a good face. Therefore, the captain 'Mogu' has always hated the man who was close to Xue Ling.

"This kid, he offended Captain Mogu as soon as he came. The captain is not easy to get along with. I don't know if he can survive the next mission..." Some of the old team members looked at each other clearly. They all felt that this recruit would soon be out of luck. UU reading www.uukanshu.com

"I'll join Captain Xue Ling." Wang Yi also saw the situation at the scene and said without hesitation. By the way, the 'deputy' of 'deputy captain' was removed.

"I'll also join Captain Xue Ling's side." Luo Feng followed closely.

The blue-haired woman 'Xue Ling' laughed, and her smile was amazing.

The dark-skinned braided man 'Mogu' looked ugly for a moment, and then returned to normal. He took a deep look at Wang Yi and the two of them, "Since that's the case, I hope you can live longer."

"Let's go." He turned around and flew away, taking away most of the team members, leaving only about ten people to follow Xue Ling, as well as Wang Yi and Luo Feng.

"Okay, that annoying guy has left, it's time to discuss you guys." The blue-haired woman looked at the two of them, mainly Wang Yi, and said.

[Chapter 786: I'm a brother now?](#)

After Wang Yi and Luo Feng clearly joined the 'Xue Ling' team, the sergeants of Xue Ling's team immediately became enthusiastic.

"welcome green hands."

"You two, it's the right choice for you to join us."

"Follow Lord Xue Ling, you won't regret it, it's better than when the little guy in the captain sold you."

"Anos, you still call him captain."

"Didn't I forget it for a while?"

"That guy doesn't deserve to be the captain of our Seventh Squad. If it wasn't for him, how could Lord Xue Ling's younger brother die, because he still has the face to pursue Lord Xue Ling."

"Okay." The blue-haired woman 'Xue Ling' frowned slightly and let out a light snort. Those sergeants immediately quieted down. Both Wang Yi and Luo Feng were a little surprised. It seemed that this woman named 'Xue Ling' was among these sergeants. They are very prestigious and capable, otherwise it would be impossible to subdue these arrogant elites.

'Xue Ling' looked at Wang Yi and Luo Feng, her expression softened. "Since you joined my Xueling team, then everyone is a comrade-in-arms who fight side by side and share life and death. As long as you don't do things that harm the collective interests, we will not leave you alone."

"You just joined, there must be many things you don't understand." Xue Ling threw two crystals. "There are many introductions about the army here. You can read it carefully. If you don't understand, you can ask other team members, or you can ask me."

Wang Yi and Luo Feng took the crystal, "Thank you, Captain."

Xue Ling shook her head, "Mogu is the captain of the fourth team and the seventh team, I'm not." Then she smiled. The smile is a little cold. "But he doesn't have a good relationship with our faction, so be careful, don't follow their way."

Wang Yi and Luo Feng didn't say a word, and they could see it.

"You first go to the place where you live. Each sergeant of the Yusu Army has his own place to live, that is, the leaf, and each leaf can live for one person." Xue Ling said. "When you settle down, we'll clean up the dust for you."

"Don't worry, our team is still a long way from the next disaster-level mission of the army. You still have a lot of time to understand the situation and cultivate." Another white-eyed girl said with a smile.

Under normal circumstances, this team still welcomes newcomers. Because the more sergeants, the stronger the team, and the more likely it is to survive the mission. Of course it has to work together.

"Military mission?" Both Wang Yi and Luo Feng were moved.

Immediately, their divine power penetrated into the crystal. Although the information in the crystal ball was complicated, there was not much information. General rules and common sense were all introduced, and they were all grasped by divine power exploration in an instant.

Immediately understand the many situations and tasks of Yusu jun.

The so-called army... are all honed in life and death again and again, and they are all going out in the first era to carry out a mission assigned by the army. Either attack this, or attack that, once in an epoch,

and once every 10,000 epochs, there will be a very high degree of danger, which is called a 'disaster level'. And every 100 million epochs, there is a more terrifying one, which is called 'Samsara Level'.

The ordinary tasks of the special army are equivalent to the reincarnation level of the ordinary army.

Disaster level... is a disaster for these geniuses, reincarnation level? That was even more of a nightmare. It means... encountering that task is equivalent to going to reincarnation. Even an old sergeant, when he encounters a reincarnation-level mission... is more than half dead!

Ordinary army, 100 to join the army, three or five retired alive is not bad.

Like Yusujun, this kind of special army that gathers geniuses has a lower survival rate, which shows how crazy the screening mechanism set by the army is.

However, Wang Yi and Luo Feng have confidence and trump cards, so they are not too worried.

Anyway, the teammates have said that the 'disaster-level mission' is far away, let alone the 'reincarnation level', at that time, it is not certain that they are still in the world of Jin.

...

Among the lush foliage.

One of the branches and leaves of the towering giant tree is the camp of Yusujun. The Yusu Army is divided into four brigades. The four brigades occupied the four major areas of this branch respectively. The fourth team has a total of twelve teams, and each team has an area... In this area, you can choose an unowned leaf as your cultivation place.

Wang Yi and Luo Feng went together to choose their own place to live, while the other teammates dispersed on their own, and waited until the appointed time to gather to help them hold a welcome banquet.

Luo Feng and Wang Yi chose two huge leaves next to each other. Each leaf was oval in shape and more than 100,000 kilometers long. The sergeant of the special regiment could monopolize one giant leaf, and other strong people were not allowed to break in.

Wang Yi's divine power drilled directly into the depths of the leaf's hinterland, touching an emerald spar below, and the divine power penetrated, and the color of the spar changed. Since then, this place has an owner!

Then, Wang Yi started to build buildings in the style he liked. The original giant leaf building was very simple and simple, not the style he liked.

When everything was done, Luo Feng's preparations were almost done. The two flew towards Xueling's residence together. It was time to go to the party.

"Jiujiang, Yinhe." A streamer flew over halfway, and a familiar voice came.

Wang Yi and Luo Feng glanced at the flying figure and recognized him as one of the sergeants 'Tai'a' in the Xueling team.

'Tai'a is like a lion beast with fluffy hair and six hooves, behind which there are a pair of bat-like cyan scaled wings and a long tail with a barb hanging down, flapping its wings and flying over, seeing Wang Yi and Luo Feng made deep voices. "Just right, let's go together."

"Okay."

The three streamers flew together among the leaves.

Wang Yi and the others also chatted with this 'Tai A'. Wang Yi thought of Xue Ling's strange attitude towards him before, and his heart moved, and he couldn't help but ask: "Tai'a, it seemed a little strange to me when I saw Captain Xue Ling looking at me. I don't know why?"

"Hehe, you're asking the right person... In fact, many people in the team don't understand, but I have known Master Xue Ling earlier, but I know a little bit." Tai'a said his guess directly, "Maybe it's because of you and Xue Ling. The elder brother's deceased brother is very similar."

"Brother?" Wang Yi looked at the alien beast in the shape of a lion and was a little puzzled.

Tai sighed softly, "Lord Xue Ling and her brother joined the special army together at the beginning. They fought for many years and had deep feelings for each other, but her brother died in a disaster-level mission. Lord Xue Ling has been brooding. Seeing you, Maybe thinking of your own brother, it's normal to take care of you."

Love the house and Uganda? Wang Yi understood.

Luo Feng secretly joked with a smile on his face: "Tsk, Wang Yi, you have become a younger brother."

Wang Yi's expression remained unchanged: "This is her wishful thinking, I don't think so."

Does he need to rely on a woman to stand in the army? joke.

The alien beast 'Tai'a is somewhat envious of Wang Yi's special treatment, because the first recruits have a difficult time when they first come in, and the difference between someone and no one is really big.

Of course, if you are very strong and can complete the task without pressure, that's another story.

In the eyes of the alien beast 'Tai'a, the talents of the two recruits in front of him should be considered normal for the Yusu Army.

...

During the gathering, Wang Yi and Luo Feng also knew through communication that the next mission of the seventh team would be three thousand years later.

"When the time comes, we will have a mission, and ordinary missions are not too difficult for our sergeant Yusu." Xue Ling said, "Even so, you can't waste time, you hurry up and accept my Yusu. The basic inheritance of the army, how much can be learned, how much strength can be increased!"

In the army, there is not enough strength. If you are lazy, you will be finished when you wait for the 'Samsara Level' mission.

There is an extremely strong presence in the Lord of Laws. That kind of extremely strong existence can generally survive the 'reincarnation level task'.

However, the higher the strength, the more difficult it is to increase. It is also the master level of the law. No matter how strong it is, it is limited! Even if you can get through it once, what about the second and third time? There's always one time you can't get over it! Therefore, the sergeant of each special regiment will work hard to improve his strength. Become a true **** early.

After becoming a true god, even if you can't get rid of the army, life will be easier.

Until you retire, you are free.

...

There is a splendid palace at the highest point of the giant tree, which has the basic inheritance of Yusu jun.

Whoosh!

Wang Yi and Luo Feng descended and saw that there were stone pillars on the palace square, and each stone pillar had a crystal ball. These are where the Yusu Army accepts the basic inheritance, just like an ordinary army... Every inheritance requires military merit. to change. It is also a special legion that will be taught for free as soon as they come in. But to be more difficult, you need military merit to replace.

There are about a hundred crystal **** on the square. Wang Yi and Luo Feng each choose one.

"Look first."

Wang Yi's divine power spread out, directly infiltrating every crystal ball, and a large amount of information suddenly poured in.

All kinds of cultivation inheritance, there are "melee", "illusion", "joint art", "burning supernatural power", "refining treasure", "refining machine"... a total of hundreds of kinds, each All are precious and useful. Although it's like a lot of cultivation... but it's just a breakthrough to the true god, and it's gone after that. The secret technique of burning divine power is only one level. It is equivalent to the first volume of "Broken Extermination". According to the introduction of the Mystery of Burning Divine Power, the Lord of Laws can learn the first level at most, and the True God can learn the second level. Of course, all the inheritances in the future... will need military merit to be exchanged.

"The Lord of Laws can only learn the first level at most?" Wang Yi shook his head, and he was almost at the third level of "Destruction". Luo Feng also succeeded in the second stage of cultivation.

However, in the 'World of Jin', everything is under the control of the army. If it is not exchanged from the army, but is found to use a secret technique that exceeds its own level, the consequences will be very serious.

"Wang Yi, have you discovered it?" Luo Feng said in a voice transmission, "The world of Jin is very strict with regard to inheritance management. If we directly use the burning power of "Duanxie", we will not be able to explain the 'secret magic of burning power'. Learning...that would be punishable by death."

Both of them understood. Silently began to pretend to learn the basic inheritance at the crystal.

...

Primitive universe, human territory, galactic holy land.

As a world-shattering means of World War I to kill hundreds of thousands of true gods in the 3,000-latitude cosmic sea, this place is indeed the holy land of the entire human race. Of course, in the eyes of many races, this place is A terrifying giant cave.

"Huh?" Luo Feng, who was stationed in the towering temple outside the solar system, opened his eyes and looked into the distance. Three streams of light flew over, which were the three ancestors of the Ancestral God Sect.

"The three ancestor gods came together?" Luo Feng was surprised.

"I don't know what the three ancestral gods are doing to me?" Luo Feng stepped out, appeared in the starry sky, and greeted him with a smile.

"We took the liberty to visit, naturally because the Lord of the Galaxy and the Lord of Chaotic Origin have gained a lot in the world of Jin." The ancient ancestor of the three ancestral gods smiled and said: "I don't know where the Lord of Chaotic Origin is? We have something to talk to him, Represents the original will of the original universe."

"Oh?" Luo Feng's heart moved, and many thoughts appeared in his mind in an instant. "Wait a minute, I'll call him right now."

...

After a while, Wang Yi and Luo Feng watched the three ancestor gods leave.

"Wang Yi, what do you think?" Luo Feng said.

"What do you think?" Wang Yi shook his head and said indifferently: "The original will of the original universe is probably really panicked this time, otherwise why would a Fourth Jedi be created, and three Ancestral Gods would not be sent over to discuss with us in detail, wanting to put the We have won over it, hehe... no matter what the original will of the original universe wants to do, we just need to strengthen our own strength."

He sneered, "The original will of the original universe also has its own position. But it cannot represent our position."

He paused, "The original will of the original universe is not invincible!"

Luo Feng nodded thoughtfully.

The primordial universe is indeed powerful, but it has its own rules of operation.

You can't even kill a universe master yourself, and you have to rely on the entire universe to deal with the beasts. It can be seen that the original universe itself has its own limitations.

There is no need to be too awe-inspiring about the original will of the primitive universe, because it is not an intelligent life at all, but more like a primary consciousness that relies on instinct.

Thinking of what Ancestral God said before, Luo Feng couldn't help but glance at Wang Yi again, "The original will of the original universe believes that it is me and Wang Yi who are most likely to become the strongest in the universe in the future to prevent the world beast crisis."

But for a long time, Wang Yi had an unfathomable feeling in Luo Feng's eyes.

It seems that Wang Yi doesn't care much about the beast crisis, Luo Feng can feel it.

Even with regard to the primordial will of the primordial universe, Wang Yi's tone was also indifferent and not very eye-catching. Where did he get this confidence?

"Wang Yi, do you have enough confidence to deal with the world beast crisis? What trump card does he have?" Luo Feng wondered in his heart.

...

At this moment ~www.mtlnovel.com~ the den of the world beast in the dark place, a black and tall world beast flew over the desolate plain. The world beasts that sensed its appearance nearby scattered as birds and beasts.

"It's it!"

"Burning prison!"

"It's here!"

Burning Prison is the best among the world beasts in this period of time. It is ferocious and terrifying. It hunts and kills everywhere, and some world beasts have already died in its hands.

Ordinary world beasts dare not approach the area around it at all.

"Hmph, it was a quick escape." The incarnation of the beast didn't care, but thought about his own business.

"Mossaro, this unstable factor that may leave the world beast's lair in the future, do you want to find an opportunity to solve it in advance?" The world beast 'Burning Prison' fell into deep thought.

[Chapter 787: Armament Point Exchange](#)

Jin World, Southern Army, Yusu Army "Lord of Laws" barracks, martial arts training ground.

The so-called martial arts field is actually a space for sergeants to practice fighting.

"Nisek, come on!"

"Galaxy, don't lose to Nisek!"

In a vast valley, the members of Xue Ling's team from the seventh squad of the fourth brigade of the Yusu Army were gathering together, watching the two figures in the valley fighting.

"The Milky Way is very powerful."

"This melee dodge is also very powerful."

"Knives are also terrible."

"It feels like he's better than most of us."

The soldiers were amazed.

"Stop!" He drank with Xue Ling's voice. The two people who were fighting on the field also separated at the same time.

The skinny man who fought with Luo Feng and held a long spear was full of admiration.

"Galaxy, you won."

"Your swordsmanship is really terrifying, the sword strength is extremely condensed, and it still does not disperse through my armor, which consumes a lot of my divine body. Moreover, your melee dodge changes too fast, I can't stop it, and you use it as a target. , I have cut so many knives, and my body has been consumed by more than half. Even if I continue to fight, I will lose." The thin man laughed at himself. "I didn't expect that I would lose to a recruit so soon."

Luo Feng floated in the sky and smiled, "Nisek, your marksmanship is also good."

"Nisek lost."

"Haha, according to the previous gambling agreement, I have to treat you."

"The strength of the galaxy is very strong. It is so strong just after joining the army, and it will soon surpass us in the future."

Those sergeants were enthusiastically surrounding them.

"With Jiujiang, who is good at melee dodging, Galaxy and Soul Illusion, our team's survivability will be greatly improved in the future, and it will be easier to pass military missions in the future." The blue-haired woman 'Xue Ling' also showed a smile. Because of some personal reasons, I wanted to bring Wang Yi into the team. Whoever wanted to find two powerful helpers for themselves.

The potential of the two recruits 'Galaxy' and 'Jiujiang' is indeed outstanding among the sergeants of the Lord of Laws! It's normal for those sergeants to be enthusiastic. Who doesn't like strong teammates?

"By the way, why didn't you see Jiujiang?" said the white-eyed girl.

"He seems to have gone to the military station." Luo Feng said.

"He just came, does he have military skills?" The white-eyed girl was a little puzzled, but she looked at the blue-haired woman, the blue-haired woman 'Xue Ling' was stunned, Luo Feng said at this time, "He should have some treasures on him, It can be exchanged for military merit."

"So it is." The white-eyed girl stuck out her tongue. "I thought the eldest sister gave it to him."

"How is that possible." Xue Ling was helpless. She did have a good impression of Jiujiang, but after all, she didn't have any friendship since she met, so how could she be able to give military merit.

"Go and have a look. Maybe you can find some help."

Generally, before going out for a mission, they will use military power to exchange for some treasures, such as treasures that can quickly restore the body, such as buying some escape treasures or mechanical treasures.

Luo Feng has already learned that there are currently 36 sergeants in the seventh squad of the fourth brigade of the Yusu Army, and they are divided into two small groups. Among them, there are 14 sergeants on the side of Xue Ling plus the recruit Wang Yi and Luo Feng, and the captain Mo Guna. There are 22 on the side. That is, when they usually go out to do military tasks, the two sides are separated. Unless it is particularly difficult and cannot be overcome by one side alone, the two sides will work together.

It's just that the two small groups are not in harmony because of the relationship between the two leading leaders, and they often collide.

"Jiujiang will come back in a while, let him practice the secret joint attack technique with us, and strengthen the team cooperation." Xue Ling said.

...

Inside the Southern Army barracks, outside the main hall of one of the armament points.

A streamer descended.

"Armament point." Wang Yi smiled and walked in.

According to the rules, before accepting the task and after completing the task, you are eligible to exchange treasures at the armament point. But once you accept the task and not complete it...you can't go in.

Inside the Armament Point Hall.

"Om..." As soon as you enter, it seems that time and space change, entering another world.

"It feels similar to the virtual universe, but it is more magical than the virtual universe. The virtual universe is just conscious, and even the body comes in."

Wang Yi murmured in his heart, looking at everything in front of him, he saw a very prosperous space and time, with a large number of sergeants, and each sergeant was greeted by a golden figure.

Whoosh! A golden figure condensed and descended in front of Wang Yi out of thin air. Wang Yi carefully looked at the golden figure in front of him... but couldn't see his face at all. This figure was completely shrouded in golden light.

"Sergeant Yusu, state your request." The golden figure looked at Wang Yi.

"I want to exchange these treasures for military merit." Wang Yi said, with a wave of his hand, some treasures with a powerful breath appeared in front of him.

Wang Yi has been in the universe for many years, killing countless people, and he has collected countless treasures. If you take out some of them, you can exchange them for a lot of military merit,

because they are just ordinary treasures, and there is no worry that the Jinzhi World military system will track them down.

"Om—" The golden figure's eyes shone with golden light, and he glanced at the many treasures suspended in front of Wang Yi, and paused slightly, "These treasures are worth a total of 1.73 million military merit! Do you want to exchange for military merit?"

"In exchange." Wang Yi nodded.

"Whoosh!" As soon as the golden figure stretched out his hand, those treasures were taken away, and then he said: "You can exchange military merit for weapons, machinery, inheritance, etc. Everything in the list, this is the list, you can choose at will." I saw A large light curtain immediately appeared in front of Wang Yi's eyes. On the light curtain were many detailed lists, and under each list there were a lot of introductions.

Wang Yi glanced over.

In terms of military merit exchange treatment, there is a big difference between ordinary legions and special legions. Many special weapons and machines, precious treasures, powerful inheritance... Ordinary legions cannot exchange for military merit! Even if some can be exchanged, the price paid is much greater than that of the special legion.

"I want to see some inheritance." Wang Yi said. The treasure is not looked at first, just skip it.

"Yes." The golden figure said directly, "This is a list of many inheritances."

Whoa! When the light curtain changed, the previous list disappeared, and it became a huge detailed inheritance list. Divided into treasure, machinery, melee and many other categories.

Wang Yi looked at them one by one. The military merits required for inheritance are indeed high, and there are some special inheritances that ordinary sergeants cannot exchange for military merits.

Wang Yi quickly saw what he wanted.

The second level of the burning supernatural power secret technique, the master of the law can perform it, requiring millions of military merits.

"Change to the second level of the burning magic power secret technique." Wang Yi said without hesitation.

As for the third level of the burning magic secret technique, the first is that the military power required for the third level is very high. It is easy to attract attention that a law master who has just joined the army can take out so many treasures in exchange for military power. Second, Wang Yi has not yet successfully cultivated. The third level of the burning supernatural power is very difficult, and the first three volumes of "Destruction" can be practiced before the true god. The latter has exceeded the scope of the true god.

"I have to find a way to reasonably get more military merit in the world of Jin, at least to cover it up."

Otherwise, there is a lot of military merit in a law master, which may arouse suspicion.

Although the military system of the World Army of Jin does not necessarily care about a master of law, Wang Yi does not want to take risks easily.

"It takes 1 million military merit, whether to exchange it." The golden figure said.

"exchange."

"Military merit 1,000,000 is deducted!" The golden figure said, "Sergeant Yusu, you have 730,000 military merit left, and you can only watch this information here."

Whoa! A large amount of text immediately appeared on the light curtain in front of Wang Yi, and Wang Yi could see this light curtain, but the other sergeants who were also at the armament point could not see it. Details of the sergeant's transaction at the armament point.

There is a lot of text, and the content is very profound, but Wang Yi read it quickly. After all, he has successfully cultivated the second level, and now the exchange is just to be able to reasonably show it to outsiders.

"The third level requires more military merit." Wang Yi shook his head secretly.

"Look at the mechanical treasure again." Wang Yi raised his head and said to the golden figure.

Some mechanical treasures also need to be exchanged, after all, they need to be used in army missions.

Wang Yi is keeping a solid foundation in the military.

"This is the list." The light curtain in front of the golden figure changed again. The list on the light curtain is very sparse. There are only 86 kinds of them alone, but these dozens of kinds are all 'true god-level machines'. Obviously, the higher-level mechanical flow treasures are not displayed at all. It is estimated that their own strength is not enough.

Wang Yi read it carefully.

"Mechanical flow treasures require more military power, but they are much cheaper than panels." Wang Yi muttered.

"Fortunately, I have a lot of treasures, but I can't exchange too much for military merit, otherwise the mechanical treasures above can be exchanged."

Wang Yi quickly exchanged some needed mechanical treasures.

Black Cloud Wing: A true god-level machine (ordinary), which can be exchanged for 150,000 military merit (Sergeant Yusu has this permission). Advantages: good at escape, strong defense, good at restraining trapped enemies. Disadvantage: The attack power is weak.

Fog Knife: A true god-level machine (ordinary), which requires 320,000 military merits in exchange (Sgt. Yusu Jun has this permission) Advantages: The divine power is transformed by the core of the 'Mist Knife', which will generate super attack power. Disadvantage: consumes a lot of divine power.

Golden Claw God: True God-level machinery (ordinary), requires 400,000 military merits in exchange (Sgt. Yusu Jun has this authority) Advantages: defense, attack, and speed are all strong. No obvious shortcomings. Disadvantage: consumes a lot of divine power.

The total of these three pieces together exceeds Wang Yi's remaining military exploits, and Wang Yi has to take out some more treasures to make up enough.

However, being able to use these mechanical treasures in an open and honest manner has also greatly improved Wang Yi's strength. Even the most terrifying "reincarnation-level mission" of the army is not difficult for Wang Yi.

Like the sergeant who is the master of the law of those special legions, I am afraid that many long years have passed through life and death army missions. If you are lucky, you can accumulate so much military merit, and Wang Yi, a new recruit, can have it as soon as he arrives.

Of course, Wang Yi didn't forget more important things. Wang Yi looked at the golden figure in front of him: "I want to know about the seal."

"It takes 500 military merit." The golden figure said.

"500 military merit?" Wang Yi nodded. "I'll change."

Whoa! The light curtain in front of him changed and turned into a detailed text introduction.

Wang Yi also looked carefully.

Sealing... is the incomparable excellence of a strong person. After being excellent to the extreme, he is eligible to be sealed with the word "Jin". This is a supreme honor!

Every powerhouse who has been sealed has a super high status. In the world of Jin, the status of powerhouses who have been sealed is second only to the four generals and above all the true gods of the void.

The conditions for being sealed are very harsh. Of course, once you become an aloof and eternal God, you will be sealed immediately!

As for the Void True God, if you want to get a seal, there is no one in a million!

As for the true God?

In the entire Jin world, no true **** has been sealed for a long time.

As for the seal of the master of the more difficult law... Naturally, no one has ever achieved it.

Once you become a title powerhouse, it is not ordinary.

First of all, the status is similar to that of the four generals. Secondly, there are also many benefits, such as getting 30 million military exploits or the mechanical treasure 'Wu Qishen' made by His Majesty the God King of equal value! It's just...difficult! The harsh requirements for seals have stopped countless geniuses in the world of Jin. Even so, in every era, there will be many geniuses in the Eastern Army, the Western Army, the Southern Army, and the Northern Army to try to get a seal.

If you are the master of the law, if you want to get the seal, there are two ways.

There are two major conditions for the first path. First, if you want to become a true god, you must follow the path of divine power, and the level of life genes must reach 90,000 times! When it's done,

don't rush to break through to become a true god, first come to check and verify the four generals together. Second, there are a total of 10,081 basic bureaus in the Rhinoceros Bureau. As long as 10,081 bureaus can be cleared in one go, the requirements will be met.

If you meet these two points, you will be sealed immediately, and you will have many privileges, and the status is higher than that of the general titled strong. It will be equal to the status of the four generals!

Both conditions are very harsh and extremely difficult, and no one has been able to do it so far, but this was personally formulated by His Majesty, the great God King of the Jin world! If someone in the Lord of Laws can do it... It can be said that, once such a peerless person appears, I am afraid that it will not be difficult to become the 'new His Majesty the King of God' in the future.

The second way, any law master can apply for a 'title task'. When the task period begins, you can know the content of the task and complete the task. Once the task is completed, you can be sealed.

Every epoch, there is an army mission. and in the first era, there is only such a mission. If you want to take on the task again, you must wait for the next era to start!

That is to say, if Wang Yi does the military task of this era, he will not be able to start the title task until the next era.

And the difficulty and death rate of title missions... Let's just say, title missions, there will be sergeant applications every epoch.

The sergeants of the Eastern Army, the Western Army, the Southern Army and the Northern Army will carry out the title task together. The death rate of the title task is about 90%. The remaining 10% barely survived, so far... no one has ever completed the title task.

The content of the title task, you have to apply for the task, and you will not know it until the next task period.

The golden figure looked at Wang Yi and said, "Sergeant, I would like to remind you that you have just joined the army, you can go through a lot of hard work. It's best to go through several reincarnation tasks before taking the title task."

Wang Yi nodded. As for what he was thinking, only he knew.

[Chapter 788: 'Blood River Battlefield'](#)

"Okay, Jiujiang, Yinhe, you cooperated well with this set of joint combat secrets." The blue-haired woman 'Xue Ling' encouraged. "In another thousand years, it is estimated that you will be as tacit as us old sergeants."

Today, two thousand years have passed since Wang Yi and Luo Feng joined the Yusu Army.

Wang Yi and Luo Feng are practicing the secret joint attack technique with Xueling team members.

Although the individual strength is strong, teamwork is also very important, and it can also cultivate tacit understanding.

Of course, because of the hidden strengths of Wang Yi and Luo Feng, after two thousand years, the Seventh Squad Sergeant did not know how powerful the two were.

"Okay, the drill is almost done, we're here today, everyone, let's go back and rest." Xue Ling said with a smile.

Everyone walked out of the martial arts space, talking and laughing, and flew towards their camp.

A few sergeants in the 'Desert Valley' team in the distance looked at it.

"Hmph, those two recruits seem to be having a good time joining the Xueling small group."

"It's really frustrating to see them so proud."

"I really don't understand what the captain is thinking. According to me, this Xueling team should not continue to exist. Has the captain not given up after so many years?"

"How about you go and tell the captain to let him give up?"

"Oh, I don't dare."

...

The sergeants of the Xueling team also saw the sergeants of the Mogu group and were too lazy to pay attention.

Although the army has military regulations, the requirements of the ordinary army are not so strict. Sergeants often fight each other. Although the special army is not allowed to kill each other in the barracks, it is not necessarily outside the barracks, and they will also kill each other.

Mogu's small group and Xueling's small group are relatively restrained.

...

In the sky above the four major military camps, four figures filled with endless power and eternal vastness gathered together. The time and space around them were already self-contained, and even the Void True God could not see through.

The four figures are the powerhouses of the two tribes and the powerhouses of the two alien beasts... All of them restrained their coercion. Even if the four of them restrained their coercion, the invisible aura could still make the Void True God feel the pressure.

"It's time again." A fair-skinned person with green patterns around his ears looked graceful and noble, wearing silver-white armor, and the presence of vertical pupils between the eyebrows of his eyes sighed with emotion.

"Yeah, it's time to open the battlefield again." Another tall alien with six ugly heads said in a low voice.

"Indeed, the sergeant's sergeant's reincarnation mission of the Special Legion is still one time in the 100 million era. I don't know how many times the reincarnation mission has been opened on this battlefield. It is indeed a long time." The beautiful female voice is full of emotion.

"This time the battlefield is opened, and the four armies are fighting each other. I don't know which army will win."

"I don't care which side wins, I just hope that there will be seedlings who can see it." In the end, the girl with short black hair and black robe, two thick black corners on her forehead, and all black eyes without pupils said indifferently. "Over the years, the elite geniuses that have appeared are too bad. If we go on like this, when will we be able to complete the task that His Majesty has entrusted to us."

"Haha, let's wait and see."

...

In the world of Jin, the vast and boundless military camp suddenly heard an earth-shattering sound from above.

"Boom~~"

The four major military camps of the Eastern Army, Western Army, Southern Army and Northern Army, no matter which barracks they are, the sergeants who have been practicing in the barracks, making friends, discussing and resting, no matter what they are doing, they hear a huge roar above their heads. , all raised their heads.

The Void True God leaders sitting in the military camp were also alerted! Instantly appeared above the barracks.

They see!

A 'door' with a width of 50 billion kilometers and a height of 100 billion kilometers. This door just appeared out of thin air at the top of the military camp. The scene of fighting with the soldiers, and the whole body exudes blood-colored brilliance, a majestic ancient strange breath, emanating from it.

"This, this is!" All the Void True God commanders widened their eyes and became excited.

"This is the gate of battlefield space!"

"This is the space door to the Blood River Battlefield!"

"Blood River Battlefield? When I opened it last time, I hadn't become a true **** of the void, and I haven't become a commander yet!"

"Is it time for our four armies to compete again?"

Countless sergeants below also watched this scene in shock and amazement.

After all, the Blood River Battlefield does not know how many times the reincarnation level mission is opened once. Ordinary sergeants can't make it through that time. Either they died and broke through, or they retired. Therefore, few of the sergeants present were able to recognize this legend. The door, but it can cause such a big movement, you don't need to think about it to know that it is not ordinary.

"This...this is..." The Xue Ling team, who was in their own camp, was also startled by the vision above, showing a shocked expression.

"All the four armies obey orders!"

A majestic voice spread out in the void, hitting the souls of those sergeants like a whip.

"After an infinite epoch, the Blood River Battlefield is about to open!"

"The four armies participate together!"

"Whether it is the Eastern Army, the Western Army, the Southern Army or the Northern Army, whether it is an ordinary army or a special army, as long as it is the Lord of Laws, it can enter the Blood River Battlefield through the gate of space!"

"After a thousand years, the four major armies will be divided into four camps, and they will fight the most brutal battle on the Blood River Battlefield for ten thousand years to decide the strongest party!"

"Are you a genius among the Lords of Law? You are unmatched among your peers? Then prove your strength through the battlefield!"

"The victor will receive supreme glory and rich military exploits!"

"Every sergeant can check the relevant details at the armament point."

...

Over the barracks, this huge blood-colored gate suddenly appeared out of thin air, with a height of 100 billion kilometers and a width of 50 billion kilometers. Looking up on this military camp, you can clearly see the blood gate!

"Blood River Battlefield?"

"The Lord of the Billions of Laws in all the armies fight?"

"A grand event for the entire army!"

"Blood River Battlefield is about to begin? Wow, haha, going crazy!"

"I just read the introduction of the army information. I don't know how many years this battlefield of the Blood River only occurs once. There will be amazing rewards for doing well in the entire battlefield."

"Well, I heard that when the Blood River battlefield opens, the generals of the four armies will pay attention, and the rewards will be extremely high."

"General of the Fourth Army, that is beyond the existence of the Void True God, even greater than the greatest patriarch of our tribe!"

"Go and see."

At this moment, the Fourth Army was plunged into boundless boiling.

Even the news quickly spread throughout the entire Jin world.

...

Everyone in the Xueling team was also crazy and excited.

"Blood River Battlefield?" The dark-haired young man 'Luo Feng' shrank his pupils and his eyes flashed.

"Blood River Battlefield?" Wang Yi looked at the boiling barracks thoughtfully.

"The masters of all the laws of the four armies are fighting on the same battlefield?" Wang Yi recalled the content of the majestic voice before, and couldn't help taking a deep breath, crazy, so crazy, how big is the world of Jin, there are countless tribal beasts, strong There are countless of them, including the mechanical treasures 'Jinluo Tiandi' controlled by thousands of true gods, not to mention the masters of laws, the masters of laws in the army alone, all seem to be endless.

Not to mention the ordinary armies of the Fourth Army, even the masters of the elite laws of those special armies add up, I don't know how many.

Even if only a part of them went to the battlefield, that was a terrible number.

"Interesting, I didn't expect to join the Jin World Army and encounter such interesting things." Luo Feng narrowed his eyes and felt a strong desire in his heart.

He wants to enter this blood river battlefield and fight against the masters of countless genius laws in the Jin world!

Both Wang Yi and Luo Feng also went to see the army's introduction to the "Blood River Battlefield".

...

In the ancient world of Jin, when His Majesty the Great God King was still in his personal rule, a space was created... named 'Blood River Battlefield'!

The Battle of the Blood River will only be opened once after a long time. It is a war of the four armies of the Jin Dynasty World Army. It is a very tragic war with many deaths.

The four armies of the south, south, north and west will all actively participate in order to prove that they are the strongest army in front of His Majesty the King! So every time it was tragic!

At that time, there were true gods participating!

Later, after His Majesty the God King disappeared, because the true God had fallen too many times, only the Lord of Laws participated!

But even so, it's still terrible!

Each **** river battlefield will last for ten thousand years! Once you have participated in the Blood River War, you will not be able to return until this war is over.

The Battlefield of Blood River is divided into four islands distributed in four directions and the largest island in the middle. Each island has an army. The rules of war are divided into four sides, and each of the warriors has a badge of a different color.

Killing people on your own side is no credit.

Only by killing the enemy and obtaining the badge of the other party can be exchanged for military merit.

A badge is equal to 100 military merits!

The whole camp wins! The whole army will be rewarded!

One badge is 100 military merits, kill 100, 100 badges is 10,000 military merits, comparable to a disaster-level mission of a special legion!

And disaster-level tasks often require facing death threats, or even true god-level enemies!

The blood river battlefield is the enemy of the Lord of Laws!

It looks easy, but military merit is not so easy to get.

Like some masters of anti-sky laws or masters of laws with mechanical treasures, killing ordinary soldiers is slaughter! A master of the law of the strong can confidently kill when he encounters ten or dozens of ordinary soldiers. You can meet thousands or even thousands of soldiers. If you kill it, you will die at all.

And if the ordinary soldiers are all gathered together, if it is a large army fighting, do you want to kill a hundred? I am afraid that he will be besieged by tens of thousands of soldiers. Even Wang Yi, who is carrying mechanical treasures, would not dare to easily face the collective attack of the Lord of Ten Thousand Laws!

...

When the Southern Army, Yusu Army Camp, and Xueling Squad returned to their own station and were still discussing, suddenly an order came down.

"All the sergeants of the Yusu Army who did not go out for missions, all joined the Blood River Battlefield."

The command came from the commander of the 'Yishu Army', 'Yishu'.

The Yusu Army is divided into two parts, the masters of the law are one part, and the true gods are the other part, and the two sides are completely separated.

The Yusu Army was created by this 'yusu'. Among the many special legions, the one who can create the special legion must be the Void True God, but in a long time, some Void True God may break through to the Eternal True God, and naturally the next Void True God will take their place. But it is too difficult to break through, and more Void True Gods have been sitting in the commanding position. Such as this fish house, it is like this.

And this time, the commander of the Yusu Army directly issued an order to let all the law masters of the special legions under his command participate in the battle! Unless they disobey the order, they have no choice but to join the battlefield!

In fact, not only the Yusu Army, but the entire Southern Army... All the law masters of the special legions received orders from their own leaders at almost the same time. As long as they were not doing military missions, they all had to enter the Blood River Battlefield!

Eastern Army! Western Army! North Army! The same thing happens!

Obviously, the only one who can make all the commanders of the Fourth Army issue this order is the General of the Fourth Army!

It can be seen that the generals attach great importance to this blood river battlefield, the generals above attach importance to it, and the commanders below naturally dare not neglect it!

As soon as the order was issued, all members of the seventh team of the fourth brigade of the Yusu Army received it, some were happy and some were worried.

After all, the battlefield of Blood River is said to be cruel. There are many sergeants who have fallen, and some sergeants are reluctant to join the battlefield.

But they can't escape!

They can also use military merit to offset the punishment of failure if they did not complete the military task before. This is called 'compensation of merits and demerits'!

However, the Blood River Battlefield was a direct order from the military commander above, and there was no room for rejection. If you didn't go, you would resist the order. Naturally, there is no need to say more about the end.

There is no mandatory requirement for the ordinary army, but those who dare to enter are the masters of very powerful laws that have been tempered in the army, and they cannot be underestimated.

As soon as the order is issued, since there is no escape, everyone has gone to prepare, to prepare for the 'Blood River Battlefield' that will come in a thousand years. If it's bad, it's even scarier than the 'Reincarnation Quest'! No matter how strong the Lord of Laws may be, he may fall!

"Blood River Battlefield, maybe it's an opportunity for me to gain a lot of military merit." At his Juye residence, Wang Yi and Luo Feng gathered, their eyes glowing. "Killing one enemy soldier is 100 military credits, and 10,000 enemy soldiers is one million military credits. And there are trophies. The spoils left after the soldiers die are the big ones!"

Like the sergeants of the special army, many of them have mechanical treasures on their bodies, all of which are worth 100,000 military merits! And usually in the military camp can not kill each other. But in Blood River Battlefield, there is no such restriction!

To kill a special corps sergeant, the treasure alone is a huge fortune!

However, in the Blood River Battlefield, you cannot exchange treasures for military merit, you can only exchange them after you come out!

Luo Feng also had high fighting spirit, "This time, it's our chance! If you and I join forces, it's not a problem to cross the **** battlefield!" Luo Feng was also very envious of his military achievements. Especially when he learned that Wang Yi had exchanged treasures for military merit and obtained the second-level burning magic power secret technique in the army, he wanted to obtain military merit even more.

Although Luo Feng successfully practiced the second stage of "Destruction". But because he did not exchange the second level of the burning magic power secret technique from the army, he could only use the first level, so military merit was really important to him.

[Chapter 789: Battlefield opens](#)

"Only alive can you become a strong man!"

Thousands of years later, the Southern Army, the camp of the Yusu Army, commanded the sergeant in front of him with a grim expression, and shouted: "So, everyone, work hard! I look forward to seeing you make a name for my Yusu Army!"

Many Yusujun sergeants are full of enthusiasm!

"Yes!"

"This is the badge that represents your identity!" The commander of the Yusu Army waved his hand, and red rays of light instantly flew to each sergeant, turning into a red diamond badge with a beautiful pattern of white feathers on their chests. Can feel a strange breath. "In the Blood River Battlefield, everyone must wear a badge, and you can't take it off. The badge will automatically record your military exploits! Only when you leave the battlefield will the badge be taken back."

In the Bloody River battlefield, there is more than one way to obtain military merits. The easiest way is to kill enemy sergeants to get badges. One badge counts as 100 military merits, but there are also military merits for cooperating with the army in collective actions or doing tasks issued by the army!

"Go! Fight for glory for our Southern Army!"

...

At the same moment, the Eastern Army...Western Army...Southern Army...Northern Army...Countless sergeants all took action.

"Boom..." The blood-colored door in the sky slowly opened.

At the bottom of the major military camps, dense figures flew up, and they couldn't see the edge at a glance.

Wang Yi, Luo Feng, and the sergeants of the Xueling team were among them.

Once you participate in the Battle of Blood River, you cannot return until this war is over. This is the rule, you can enter at any time, but everyone... must wait until the end of the war to come out. It is not possible to come out in the middle, and it is impossible to come out. So many sergeants are reluctant to enter the battlefield. Because even if you get the military merit you need. But you have to stay until the last moment. Even if you don't attack others, others will attack you.

As a special army, Wang Yi and the others were the elites in it. They were directly ordered to participate in the war, but they had no choice.

"so many people."

Wang Yi glanced around, "So many people, there must be a lot of special troops, and I don't know how many will survive in the end."

The blood river battlefield is very tragic, and there are many sergeants who have fallen. For example, the special legion has some certainty to save their lives in disaster-level missions. Some of them have

been tempered to the extreme law masters. But the blood river battlefield is different. The battlefield situation is very complicated. If you are not careful, no matter how powerful the master of the law may fall!

"Jiujiang, Yinhe." Xue Ling said next to him, "You are new recruits, this is your first time participating in a battle, pay attention to the orders, don't act without authorization, if it affects everyone... I will have to kick you out of the team, understand? ?" Xue Ling's expression was very stern. This is no joke, it's about everyone's life.

The other sergeants watched and did not speak. Although they have gotten along well with Luo Feng and Wang Yi in the past three thousand years, they have never experienced life and death, so naturally they have no relationship. Luo Feng and the others are strong, but they are inexperienced recruits after all. If they make mistakes in battle, they will drag others down.

So their attitude towards Luo Feng and the others changed.

It's actually quite normal, because it's a matter of life and death.

It's good that Xueling just warned them instead of kicking them out of the team immediately.

In fact, some sergeants hoped that Xue Ling would kick the two out of the group.

Wang Yi and Luo Feng looked at each other.

"Captain Xue Ling." Wang Yi said. "This time on the battlefield of Blood River, I will act alone with Galaxy, and will not be with you."

"What?" The blue-haired woman Xue Ling stared at Wang Yi with wide eyes, and the other sergeants were also surprised.

"Do you know what you're talking about?" Xue Ling's face sank. "How dangerous is the Blood River Battlefield, with so many law masters participating. If you act together with the team, it is possible to save your life. Are you two law masters courting death?"

Wang Yi and Luo Feng smiled. "We've made up our minds."

"You..." Xue Ling frowned.

At this time, the sergeant next to him spoke up.

"Lord Xue Ling, since they have decided to act alone, let them go."

"Yes, Captain, why bother."

Xue Ling looked at these teammates. It was good for them that Jiujiang and Yinhe left the team. She also understood, but she felt a little uncomfortable.

"Captain Xue Ling, thank you for your care during this time. If we have fate, we will meet again." Wang Yi said to Xue Ling, and turned around and flew away with Luo Feng.

Xue Ling did not stay silent, and the sergeants also quietly watched the two leave.

...

"Haha, Captain, look at it."

In the distance, there was a squad of sergeants, and one of them, a four-hoofed black-haired beast, saw two familiar figures, and could not help but transmit to other teammates. "Isn't that the two recruits who joined Xue Ling's team?"

"There are only two of them alone?"

"very pitiful."

"Looks like they were kicked out."

Those sergeants were gloating.

The dark-muscle tall man's 'Mogu' also had a faint smile on his face.

"The two recruits were kicked out by the team, and no other team will accept them... They are finished."

"It's stupid to believe that woman Xue Ling!"

Among the many sergeants around, Wang Yi and Luo Feng, who were alone, were indeed a bit conspicuous.

...

Wang Yi and Luo Feng didn't care about other people's eyes at all.

This time, because he wanted to enter the Blood River battlefield, Luo Feng borrowed some treasures from Wang Yi, exchanged them for military merit, and then exchanged the military merit for the secret techniques and treasures he needed, and then returned to the battlefield.

In terms of the number of treasures, no one in the entire universe can compare to Wang Yi.

Even in the world of Jin, no one can compare with him.

"Go! Join the battlefield!"

Wang Yi and Luo Feng, one in red and one in black, flew towards the blood-colored gate in high spirits amid the mighty crowd.

The huge blood gate with a width of 50 billion kilometers and a height of hundreds of billions of kilometers is like a bottomless abyss. One by one, the small soldiers flew into it, as if they were submerged in the water, and disappeared without entering.

"Wow!"

Wang Yi and Luo Feng also flew inside and disappeared.

...

There is an incomparably wide blood-colored river running through the entire space in this plane space. The river is turbulent. There are islands floating on this wide river with no end in sight. There are five islands in total, four of which are small islands. Surrounding the largest island in the middle.

Wang Yi and Luo Feng passed through the gate of space and came to a vast square. There were already many sergeants around. Like him, they all wore red badges. According to the badges, they were all sergeants of the Southern Army.

In the center of the square, there is an endlessly tall and majestic red stone pillar, on which there are streams of light, which are so dazzling and beautiful.

When Wang Yi and the others appeared, two beams of light fell from the stone pillar and instantly shone on Wang Yi and the two of them. At the same time, there was a lot of information in their minds.

Wang Yi and Luo Feng couldn't help but look at each other, "So the battlefield of Blood River is like this."

Wang Yi also felt the battlefield space carefully. After a little sense, he was a little surprised: "The stability of this battlefield space is actually much larger than the outside! It is the most stable space I have ever seen. Moreover, the sensing range seems to be limited. Better."

Wang Yi noticed that his sensing range was limited to only about 10 million kilometers. For a master of the universe, this was an incredible thing!

Luo Feng was also amazed: "According to the description of the message, the legend of the Blood River Battlefield was created by His Majesty the God King himself. In terms of stability, it far exceeds the space outside the Jin world. Here, it is the true God, and it is very difficult to tear the space apart. ."

Wang Yi glanced above. There are no stars in the sky above the Blood River Battlefield, and at a very high place, there is only a gray chaotic airflow. There are only five vast islands in the entire blood river battlefield, surrounded by endless blood rivers, so it is called the blood river battlefield.

There are two things that must be paid attention to in the battlefield of the blood river. One is not to fly too high, the chaotic airflow seems ordinary, but it is difficult to move even if the true **** of the void is trapped. The second is not to burrow too deep, especially not to fall into the blood river. There are many vortexes in the blood river. Anyone who falls into the blood river, whether it is the Lord of Laws or the True God, brings any treasures that are involved in the vortex and will be annihilated directly.

According to the geographic information and map that the beam just gave to introduce the battlefield, the two quickly found their own military camp.

Like the special army has its own position, the ordinary army also has its own position, which is separate.

Of course, this does not mean that the sergeant of the special regiment is necessarily better than the sergeant of the ordinary army.

Each sergeant has his own separate residence. From the outside, it looks like a pre-divided territory of 100,000 kilometers in length and width. You can freely build residences. Although it looks 100,000 kilometers in length and width from the outside, the interior space is very large. Large, obviously this uses special space means.

And here, each sergeant can maintain a 10,000-kilometer-high divine body at most. You can be smaller than this, but it cannot exceed this.

The entire Blood River battlefield space is completely blocked and cannot be teleported.

In the vast military camp, the two quickly built their respective residences, and then Wang Yi and Luo Feng met again and sat together to drink tea.

"The battlefield of the Blood River is not big, only five islands. However... it is divided into five parts based on the 'Blood River'. Our southern army is all on the blood river side, while the other three armies, It is in other directions of the Blood River. The four sides are separated by the middle island. If you want to fight, you must go to the middle island." Wang Yi said while holding the teacup while looking at the green leaves floating in the teacup.

"The most dangerous thing is not the high altitude, but the deep underground, but the blood river!" Luo Feng also said solemnly.

Wang Yi nodded slightly.

Like high altitude, it can still fly to a certain height. When you fly to a certain height, you will occasionally encounter chaotic airflow, and the higher you go, the more dangerous it is. It's like a person walking into the sea, the deeper the water goes, the deeper the water level goes, because there is a dangerous and orderly progression process, so everyone is prepared. Be careful not to exceed that height.

But the river of blood is different. Except for a few areas that are safe in this blood river, most places are extremely dangerous.

"If you want to kill the enemy, you have to cross the blood river and go to the middle island." Wang Yi was drinking tea. "The final large-scale decisive battle also broke out on the middle island. Before, it was a small-scale battle between sergeants."

"However, the army also gave us a choice." Luo Feng smiled. "If you can accumulate 100 badges before the final army's large-scale decisive battle, you can act alone without participating in the army battle!"

Legion battles are very dangerous. A large-scale bombardment by thousands of law masters may even lead to the fall of true gods, because in the legion, one cannot escape even if they want to.

It's like lining up to be shot. In the overwhelming attack, you can't even run. If you are unlucky, the master of the law that defies the sky will fall.

Nor can the military allow you to escape retreat.

It would be much safer if you avoided the Legion to fight.

However, there must be a hundred badges!

Wang Yi nodded and said: "Although the blood river battlefield cannot be exchanged for military merit and treasures, but there are 100 badges, you can also exchange for a teleportation token in the army, in case of danger, you can directly activate the token, and you can instantly teleport away from the battlefield. ."

This should be used by the masters of excellent laws. After all, it is very difficult to obtain a hundred badges in the blood river battlefield. It is definitely the most outstanding ability among the masters of laws.

Such elite sergeants, the military doesn't want them to die any time soon.

Of course, the premise is to get a hundred badges.

It's not easy.

If you want to get the badge, you have to hunt and kill the sergeant, but those who dare to go to the middle island to fight before the big battle are very confident in their own strength, such as the sergeant of the special legion.

It's not easy to kill them. In particular, these sergeants act together in groups, and those who dare to act alone are mostly super strong among the masters of law, and they are not easy to provoke.

But will they cringe?

Wang Yi and Luo Feng just flew out of their station, and when they passed by the square, they saw many sergeants wandering around.

"Team up! Go to the middle island! There are still two people missing!"

"Those who want to be with each other need special legions, not new recruits!"

"Those who are good at exploration can join our team, even recruits, but they must obey the command!"

"Our special legion's 'Grey Dragon Army' recruits new members and needs to be assessed. The strongest will be given priority, and the distribution of spoils will be discussed in advance!"

...

Wang Yi and Luo Feng looked at each other and laughed.

Some sergeants also saw Wang Yi and Luo Feng, both of them were still wearing 'Yu Su Jun' armor, which was the armor of the True God. Those sergeants ignored the two and thought they had a team. I don't know that they have all left their team.

The two flew out of the square and left the Southern Army barracks.

In the Blood River Battlefield, except for some very lively military camps, other places are very quiet~www.mtlnovel.com~ They soon saw the mighty and broad blood color, and they could vaguely see the shadow of a behemoth floating on the opposite side.

Wang Yi and the others are now on the Southern Army Island. If they want to go to the middle island, they must fly over the Blood River.

"Wow~Wow~"

Two figures flew over the turbulent river of blood.

They weren't too worried about flying over the river of blood, because it was almost impossible to hide the enemy in the river of blood.

The blood river battlefield, the middle island, you can enter here after crossing the blood river. There are various terrain environments such as mountains, lakes, forest plains, etc. on the island, which are

vast and vast. There are no stars in this battlefield. To identify the direction, you can only judge the location through some characteristic mountains and rivers.

On the cliff on the southern edge of the island, at a certain moment, two figures quietly emerged from the southern river on the edge of the island.

Chapter 790: 1st kill

On the edge of a lush forest, in the swamp filled with white mist, Wang Yi and Luo Feng walked carefully.

They also did not dare to release the Treasure Domain, which was undoubtedly a firefly in the dark night.

"En?" Wang Yi and Luo Feng suddenly turned their heads and looked into the distance.

And in the swamp tens of millions of kilometers away, a blurry black figure is also quietly moving forward.

He seemed to have found something, and turned his head to look here.

"Huh? I can't feel the breath of his identity badge." Luo Feng said through voice transmission.

Wang Yi also nodded. "It's the enemy!"

The same camp can feel each other's badge aura, if you can't feel it...that's the enemy!

In the blood river battlefield, there are four camps.

"However, actually acting alone? Could it be that the other party is very strong?" Luo Feng was a little puzzled. "It always felt like something wasn't quite right."

"What about him." Wang Yi smiled, "Is it better than the original ancestor?"

Luo Feng also laughed.

Yes!

After all, the lord of the law has the ultimate, even the lord of the law who has undergone countless tempering in the world of Jin.

Because a real genius, when tempered to a certain extent, will break through, how can it stay forever.

"boom!"

"boom!"

In the black swamp filled with white mist, two streams of light suddenly flew up.

The figure in the distance also seemed to realize that it had encountered the enemy, and turned around and fled immediately.

During the flight, Wang Yi said to Luo Feng: "There is indeed a problem."

"It doesn't matter." Luo Feng's eyes were sharp and full of confidence, "Let his conspiracy and tricks go, I will break it down by myself!"

In the face of absolute strength, all conspiracies and tricks are in vain!

The distance between the two sides was tens of millions of kilometers, but Wang Yi and the two were much faster than the figure, and they quickly narrowed the distance.

"Om!" Wang Yi's soul attack was unceremonious and came immediately.

But strangely, the figure did not fall down, but turned to look at Wang Yi.

"No soul? Is it an energy life?" Wang Yi was a little surprised.

"No, he doesn't have the aura of life either!" Luo Feng also found out at this time.

Just then-

"boom!"

The black swamp floor with a radius of one million kilometers was bulging, and black thick vines burst out from the ground below, forming a net, covering Luo Feng and Wang Yi in the air at lightning speed.

At the same time, there are dozens of powerful breaths nearby.

"Trap!" Wang Yi's face changed greatly! Turn around and leave.

"It's a trap!" Luo Feng also "scared" and ran away.

"Haha... You guys are chasing after my mechanical puppet, isn't it!" A proud voice sounded, and figures surrounded him in all directions. "You can't run anymore. As the first prey of our team, contribute to us military exploits!"

"It's really cunning, actually hiding under the swamp." Wang Yi and Luo Feng couldn't escape, and looked back.

In the blood river battlefield, the sensing range is limited, far less than the outside.

And if it is affected by the interference of soil, rocks, and running water, the sensing range will naturally be smaller, which is why Wang Yi and the others did not quickly find out that someone was ambushing, because they were hiding in the swamp, and an active mechanical puppet came to them. Attract people to come.

"Hand over your badges and treasures, and we can spare you!" A lean man in blood-colored armor carried a crimson sword on his back, glanced at Wang Yi and Luo Feng, and shouted.

Others were also eyeing it, and did not act immediately.

"They are very vigilant." Luo Feng said to Wang Yi.

Wang Yi also agreed.

They are indeed very cautious. When they have surrounded them and still have an "advantage", they still want to "subdue the soldiers without fighting" and let them surrender to avoid possible casualties in the team, and at the same time, they can get the military merit they want. and treasures.

In the **** river battlefield, some people train themselves for killing and fighting, and more are actually for survival and military treasures.

It is not necessary to kill Wang Yi and Luo Feng, it is enough to get badges and treasures.

But without the badge, you have to leave the battlefield. Even if you don't die, there will be serious consequences. You must participate in three reincarnation-level tasks to be exempted from guilt.

So until the last minute, no one is willing to hand over their badges.

"It's you who should hand over the treasure." Wang Yi and Luo Feng rushed over at the same time.

"Stubborn! Kill!" The skinny man wearing blood-colored armor and carrying a crimson sword didn't seem to be surprised. He shouted coldly, and the surrounding sergeants shot with him.

This is not a team of a special army, but a team temporarily organized by the sergeant, the master of the law of the ordinary army, but this does not mean that they are not strong.

You must know that the ordinary army does not have the requirement to be forced to join the battlefield of the blood river. If you dare to join the battlefield of the blood river with confidence, you have at least two hands. The weaker than the special army may only have inheritance and some treasures, but in battle, they have experienced countless trials and slaughter. old-fashioned.

Among them were alien beasts and tribal warriors. At this time, they all used their own means, and attacked Wang Yi and the two men with hideous faces.

"Boom!" Endless sandstorms suddenly appeared around them. They were real god-level treasures in the realm. The oppression and restraint enveloped Wang Yi and Luo Feng.

A thunderbolt full of destructive aura swept directly towards Wang Yi's head.

An imperceptible fluctuation hidden in the chaotic energy space fluctuations secretly attacked...

"Kill them! They are sergeants of the special legion, and there may be mechanical treasures on them!" The sergeant at the head was still ordering.

The sergeant in the team heard it, and his eyes were full of desire and greed.

A sergeant in an ordinary army, even if he has military merit, cannot exchange for mechanical treasures, only special legions are eligible to obtain them.

Likewise, the higher lineages too.

But here you can kill the sergeants of the special legion to get their treasures.

The mechanical treasures are very attractive to them. Even if so many people divide it, they can get a lot of benefits, which may be more than the average army can earn from a single reincarnation level mission.

"Luo Feng, it seems that we have become a favorite in their eyes." Wang Yi was still in the mood to joke with Luo Feng at this time.

"It's too much." Luo Feng's eyes were cold and full of murderous intent.

"boom!"

Divine double burning! The breath of the two people instantly surged!

Divine power is burning again! Already comparable to a true god! Divine double burning! Has surpassed the true God!

Of course, this only refers to the true gods who do not have the power to burn the secret technique.

And the sergeants who rushed over in front of them had very few masters of the first-level divine power burning secret technique, and the second-level divine power burning secret technique was only qualified to be exchanged by the sergeants in the special legion.

"Not good! It's a tough guy!" Feeling the incomparably powerful aura of divine power coming from Luo Feng and Wang Yi, the complexion of the slender man in the blood-colored armor suddenly changed drastically. It's not that he has never seen the sergeant of the special legion, but it is possible to burst out such a terrible atmosphere, but only the best in the special legion are possible.

After all, the double-burning supernatural power requires millions of military merits to be exchanged, and few sergeants of the special corps can do it.

Wow~~~ Wang Yi and Luo Feng burned with divine power, and layers of dazzling golden light appeared on their whole bodies. They soon turned into a human-shaped golden beast. Their hands and feet became huge golden lights. claw.

Mechanical Flow Treasure—Golden Claw God!

As the burning divine power instantly penetrated through the center of the Golden Claw God and transformed, the powerful Golden Claw God exudes an endless madness.

"Mechanical flow treasure!" The besieged sergeants all had solemn expressions.

"Encircle and kill them according to the plan!" The lean man drank, and now that he is unable to ride a tiger, he can only continue to fight.

The masters of these laws are all elites, most of them are Tier 6, they have at least True God treasures on them, and they all have their own means of being good at. A few are the top Tier 6, like the leader of the lean man, it is even more than Tier 7! This kind of strength is not much worse than the sergeant of a special army!

But when they fought against Wang Yi and the others, they were one-sided and suppressed!

"Pong!"

"Pong!"

"Pong!"

...

The dozens of sergeants who rushed over were just a confrontation, and most of them were blasted out, and only a few sergeants who stayed behind with long-range attack support watched in stunned silence.

It's like two invincible lions rushing into the flock!

Irresistible!

"Kill!" The slender man in blood-colored armor with a crimson sword on his back also joined the battlefield, but as soon as he fought against Luo Feng, he felt the pain. Fierce golden claws, like the blade of a blade, slashed brutally on his True God Supreme Treasure armor again and again, and the fierce force continuously damaged his divine body.

"How is that possible!" The lean man was shocked! His secret technique level is sixth-order. As a law master, it is not bad to be able to create sixth-order secret methods. I also know the first-level burning magic power secret technique... Usually, the seventh-order combat power can be exploded! Coupled with the true **** treasure on his body, his strength is actually comparable to the sergeant of the general special army!

As a Lord of Laws, he is already very powerful, and only the world of Jin can cultivate many such superior Law Lords.

But compared with the fierce and violent figure in front of him, the gap is obvious!

He could only reluctantly use various means to resist Luo Feng's attack, but was unable to counterattack.

He is so difficult, and the situation of other Lords of Laws worse than him will only be worse.

"hiss!"

"what!"

A law master without the armor of a true **** was smashed by Wang Yi, who rushed forward like a meteor, and the golden claw **** held a fog lingering sword in his hand. The divine body of the Lord of Laws made his divine body tremble violently.

Faced with this level of attack, the Lord of the Law without the armor of the true God cannot parry, and cannot bear that kind of damage at all.

"Damn it!" The lean man not far away was shocked and angry. He didn't expect that the two law masters who were casually besieged and killed would be so strong. You must know that even if the master of the law reaches the extreme, it generally refers to a certain aspect that is abnormal, and the others are very ordinary. Like the master of the law in front of him, the Golden Claw God is not strong in attack. Be strong like this!

Needless to say, Wang Yi is holding a true god-level mechanical "fog knife" in his hand. The divine power is transformed by the core of the "fog knife", which will generate super attack power.

Even if he only uses the sixth-order secret method, the divine power burns twice, and with the fog knife, it can explode more than the eighth-order attack power! The Golden Claw God blesses all aspects, but the attack amplitude is nothing.

It is better to cut off one of his ten fingers than to cut off one. He is dedicated to staring at a law master to kill, constantly attacking his divine body, so that his divine body is quickly consumed, even if there are many companions around, but there is no rescue effect.

"Save me!" The stared Lord of Law made a terrified voice and called for help from his companions around him, but although those companions wanted to help him and tried their best to attack, they couldn't have any effect on Wang Yi at all.

You must know that the "Golden Claw God" is a mechanical treasure that is strong in defense, attack, speed, and has no shortcomings.

With the blessing of the "Golden Claw God" and the mysterious burning magic technique, Wang Yi's combat power far surpassed those of ordinary sergeants.

"Why is he so fast?"

"No, I can't stop it!"

"Cracked sand, don't come towards me, **** it!"

Those sergeants were frightened, angry, and frightened. Some melee sergeants could only follow the golden figure in vain, but couldn't touch his side, and their hearts were full of powerlessness.

This sergeant is horrible!

Wang Yi surrounded the sergeant of the Lord of Laws like a maggot attached to his bones, and slashed out a mad knife. The dazzling golden light and shadow lingered in the hazy mist and condensed into a knife light, like a raging and endless wave. The impact, the sharp knife light continuously cut through the sergeant's divine body again and again, causing him to continue to weaken.

"Peng!" As the last knife fell, in the unwilling roar of the sergeant, the master of the law, his divine body completely dissipated, leaving only armored weapons and treasures in place.

The sergeants around stopped and felt a chill in their hearts. They tried their best, but in the end they could only watch their companions' divine bodies continue to weaken until they were annihilated. There was no other way.

Their previous confidence was gone at this moment, their morale fell to the bottom, and there was only one thought in their hearts - they couldn't win!

The lean man headed also saw this scene, and his mouth roared angrily. If his team was not formed temporarily, most of the team members were recruited temporarily, and they could not use the powerful joint combat secret technique. It won't turn into this scene.

Seeing Wang Yi continue to chase and kill other sergeants, the lean man felt enormous pressure, Peng! He was once again caught by Luo Feng's golden claw shadow like a beast in the shape of a human, and fell into the swamp ruthlessly, without the ability to resist at all.

"withdraw!"

"retreat!"

Lean man voice transmission!

Those sergeants who were terrified who were killed are like an amnesty!

Huge black vines in the sky entangled in them to stop Wang Yi and Luo Feng. It's just that the speed and movement of the two are so amazing that they can't be trapped at all.

As long as the sergeant was entangled by Wang Yi and Luo Feng, there was no way to escape. His teammates couldn't save it. Even if they wanted to bring the treasures into the palace, Wang Yi and Luo Feng would not give them a chance.

Throwing away armor and armor along the way.

This team could only flee in a panic, and lost a few sergeants, and even relied on a True God-level warship to escape frantically, and finally got rid of the two killing stars.

Not long after, in a valley somewhere on the island, in the regrouped team, the lean man looked at the teammates who had suffered heavy losses and was furious, but there was nothing to do.

Meanwhile, Wang Yi and Luo Feng were also distributing the spoils.
