

## A Killer 108

Chapter 108: Really can't understand

Three days later, the black market boxing match will be held again.

In these three days, apart from staying with Shen Feng, Li Tian was studying the book in Shen Feng's broken house.

In the first three pages, Li Tian has basically mastered a grasping technique, a boxing technique, and a massage technique.

But when he was ready to continue reading the fourth page, he found the problem.

There is no pattern on the fourth page. There are only a few ancient seal characters on it: Dao Chong, and use it or not, it is deep, like the family of all things; defeats its sharpness, solves its disputes, and its light, with its Chen Dai Yingtao's seal carving, Zhanxi, seems to exist!

Looking at these ancient seal characters with profound meanings, Li Tian seemed to be stunned by the general study.

To tell the truth, Li Tian, who graduated from high school, can understand a little bit of the plain meaning of these characters: the meaning is nothing more than the invisible road, everything has a beginning and an end, the meaning of the next few sentences is the meaning of nothing, usually understood as an impossible thing. But it is possible.

Li Tian studied these few sentences for a whole day, but didn't understand.

So he turned the fourth page and stopped looking at him, but when he turned the fourth page, Li Tian couldn't practice the pattern tricks on the fifth page at all. Although the figure above is still a human figure, But there was only a small person holding a uniform posture, nothing else.

Li Tian assumed the same posture as the villain, but when he read the forehead tadpole in front of him, his body did not react at all.

Can't practice?

This made Li Tian depressed.

Could it be said that the above things can't be practiced by jumping? Can only practice step by step? If Li Tian couldn't understand the words of Chapter 4, the rest of them could not be practiced.

Li Tian had no choice but to return to the fourth page, looking at the weird seal characters on me.

"Dao Chong, but use it or not, it is deep, like the family of all things."

Li Tian muttered silently in his mouth over and over again, and suddenly a bright light flashed in his mind: "The sum of all things, since it is the sect of all things, can't all things be summarized together? If you understand it in this way, then Doesn't it mean that the three previous moves, one grasping, one punch, and the massage, the original three different moves can be grouped together?"

Li Tian suddenly enlightened.

Then slowly according to the insights in my heart, I began to slowly try to mix the tricks in my mind, and I couldn't help raising my hands, and started practicing according to the posture in my mind.

At the beginning, he could only make the same move with both hands. For example, with a grasping move, both hands could only make a grasping move, but not at the same time.

Slowly after getting more and more proficient, he began to become familiar.

His own hands can actually become one hand using grabbing, and the other hand using fists?

Faced with such an incredible change, Li Tian started to practice like crazy.

This exercise is an afternoon.

So when Shen Feng came back from Xia Xue's restaurant with a cane, he saw Li Tian practicing there.

Standing at the door, Shen Feng looked at Li Tian in disbelief.

What kind of boxing is this kid playing? Shen Feng, who has liked fighting since he was a child, was familiar with Taekwondo, Sanda, and Karate because there was still money in his family.

But what trick is Li Tian playing now?

To be honest, Shen Feng couldn't see it. He frowned tightly and looked at Li Tian's move just now.

I was shocked, can such a move be made? Very strange.

If Shen Feng hadn't seen Li Tian kill the Muay Thai fighter with his own eyes, he wouldn't believe that Li Tian was practicing boxing?

I was surprised to see that Shen Feng, who was practicing Li Tian, was surprised to see that every move of Li Tian seemed to contain great strength. Of course, Shen Feng, who practiced frequently, could see every punch of Li Tian. Every grasp seems to contain tremendous strength.

Fist fist engenders wind, grasping to death.

When Shen Feng was taking a closer look, Li Tian caught a glimpse of Shen Feng.

So he stopped and walked over with a smile.

"Is your health better?" Li Tian asked as he walked over.

Shen Feng nodded: "It's almost there."

"Brother Tian, what kind of kung fu did you practice just now?" Shen Feng asked in confusion.

Li Tian smiled and said, "I did it blindly."

"No, absolutely not, is it inconvenient to tell me? It's okay." Shen Feng said.

Li Tian thought for a while and said, "Actually you don't believe it."

"why?"

"Because I learned these things from a book."

As Li Tian said this, he suddenly and generously took out the (Sky Book Pill Scroll) from his body and handed it to Shen Feng in front of him.

Shen Feng was taken aback, frowning and looking at the broken book in front of him.

"Really?" Shen Feng took it with his unbelievable hands, and opened it to see the dense tadpole text inside.

After taking a look at Shen Feng, he closed it up: "Brother Tian, you are too good at joking."

"I'm not kidding." Li Tian said seriously.

Shen Feng looked at Li Tian's serious expression, and was slightly taken aback: "Really? Did you really learn from this?"

Having said that, Shen Feng opened the broken book again, and then looked at it intently. Except for the dense tadpole text, there is nothing else in it, and the rest is the pattern of the second chapter later.

After watching for a while, Shen Feng still couldn't understand.

"I really can't tell, this can teach people something." Shen Feng said.

"You are like this, you read the first article on tadpoles, you concentrate on reading, calm down, can you feel tadpoles walking in your body? It seems to be hitting your body acupuncture points?" Li Tianjiang all Everything was told to Shen Feng in front of him, and he didn't hide the good things for himself.

But where is Shen Feng? When he saw those weird tadpole characters, he was dizzy.

Nima, I can't understand or feel the tadpoles wandering in my body, doesn't it? After watching for a while, Shen Feng's head began to dizzy.

Close it quickly.

"Big brother, I really don't understand." Shen Feng said.

Looking at Shen Feng like that, Li Tian was shocked. When he was a security guard at the Tang family last time, Li Tian also let Xiao Zhao, who worked with him as a security guard, see him. At that time Xiao Zhao also said that he could not understand. At the time, Li Tian always thought it was Xiao Zhao who didn't look carefully.

But now that after he personally told Shen Feng, when Shen Feng couldn't understand it, Li Tian was completely stunned.

Could it be that they can't understand? They can't feel the weird feeling of tadpoles walking inside their bodies? And only you can understand?

What is going on?
