

## Almighty D 1631

“Chapter 1631: 344: the aircraft carrier lifts off, blood boiling! 5”

“[ F \* ck! This YC can’t really have run away, right? ] ”

“[ I don’t think so. After all, this matter is no longer solely YC’s business! If she runs away, the international department will not let her off either. ] ”

“[ when a dog is anxious, it jumps over the wall. When a rabbit is anxious, It Bites! If YC has run out of tricks, won’t she run? If she doesn’t run and stays here, will she be ridiculed? ] ”

“Professor Cara looked at the time while watching the live broadcast. He then whispered to professor William beside him, “Go and call that Chinese man over.” ”

William nodded. “Yes.”

“A moment later, professor Cara walked over with Tang Xue. “Professor Cara, this is Miss Tang, who has been working for us all this while.” ”

“”Hello, Professor Cara.”Tang Xue walked in front of Professor Cara and bowed. ”

Dr. Cara looked up. “Where’s Miss Ye?”

“Tang Xue lowered her voice. “I haven’t seen her since this morning. If I’m not wrong, she must have run away.” ”

Run Away?

Dr. Cara frowned. He had seen the comments on the live broadcast that ye Zao had run away. He had thought it was nonsense. He had thought that ye Zao was not the kind of person who would run away at the last minute. He had not expected ye Zao to really run away!

He did not expect that ye Zao was such a person.

“However, it was normal when he thought about it.”

This bet was betting on the future of the entire Chinese scientific research community.

“After today, the Chinese scientific research community would be in darkness, and Ye Zao would also become the sinner of the entire China.”

It was understandable that she would be afraid.

““Since YC has already run away, there is no need to hold the Ascension ceremony today.”Dr. Cara held the microphone and turned to look at the man sitting in the first seat. “Mr. Cen Wu Ye, what do you think?” ”

Dr. Cara did not deliberately lower his voice. His voice traveled through the microphone and reached the ears of everyone present.

The live broadcast was also very exciting.

“Cen Shaoqing sat there with no expression on his face. He held the Buddha beads in his hands. “Dr. Cara, who told you that Dr. YC has run away? There are still 18 minutes before the launch ceremony. What’s The Hurry?” ”

““Miss Tang, tell him whether or not Dr. YC ran away.”Dr. Cara then looked at Cen Shaoqing. “Miss Tang is Chinese. She Won’t speak for US Chinese.” ”

Tang Xue was still Chinese.

“However, William had promised her that after the launch ceremony, he would help her change her nationality and settle down in C country. She would officially become the representative of Cen’s base in China! ”

“At that time, she would be a citizen of country C, and she would no longer have to look at anyone’s expression. ”

“Therefore, Tang Xue did not have to be afraid of anyone at this time. ”

“”Fifth master, I know that you and Dr. YC are boyfriend and girlfriend. You Don’t believe that Dr. YC would betray you, but that’s the truth!”Tang Xue continued, “The so-called aircraft carrier is just an empty shell. It can’t fly at all. You Don’t have to waste everyone’s time. Just declare it a failure.” ”

Cen Shaoqing narrowed his eyes.

He suddenly thought of Old Master Tang.

Old Master Tang was a truly talented person. He didn’t expect to have such a descendant.

“Dr. Cara chased after him step by step, “CEN fifth master, do you still think that Dr. YC didn’t run away? Everyone’s time is precious. I advise you to sign the document as soon as possible so that you don’t embarrass yourself. You have to know that you are facing the people of the World Now!” ”

“”It’s not certain who will embarrass themselves.”Cen Shaoqing twirled the Buddha beads and said slowly, “Dr. Cara, please remember what you said now. Don’t go back on your words later.” ”

“Dr. Cara narrowed his eyes. At this time, Cen Shaoqing was still being stubborn. ”

No wonder China’s technology was so backward.

“Dr. Cara smiled. “Okay, then I’ll wait for another 18 minutes. I’ll Make You Chinese admit defeat!” ”

Some of the audience could not sit still anymore. They wanted to come up to the stage and give professor Cara a beating.

“However, it was not entirely professor Cara’s fault. ”

“If ye Zao had not humiliated himself, professor Cara would not have been able to find an excuse to humiliate them even if he wanted to. ”

But now...

Ye Zao had come up to them to be humiliated.

[ it’s so embarrassing! I Can’t watch anymore! ]

“You should have shot that YC! She ran away and left a group of people to clean up her mess!”

“I’m so angry!”

Time passed quickly.

10:17.

Ye Zao was still nowhere to be seen.

“Kara turned to CEN Shaoqing and said, “CEN fifth master, it’s time. Do you have anything else to say?” ”

“Cen Shaoqing looked up slightly and was about to say something when a voice suddenly appeared in the air, “There are still 30 seconds left before the launch ceremony. Dr. Kara, why are you so aggressive? I’m here, aren’t I?” ”

“Chapter 1632: 344: aircraft carrier lifts off, blood boiling! 6”

“As soon as these words were said, all the cameras focused on the figure that was slowly walking towards them.”

The young girl wore a black uniform and wore long boots as she walked towards them step by step.

“Her figure was graceful, exuding a valiant and valiant aura that could topple countries and cities.”

Every step she took was filled with wind!

“Miss Ye!”

“Burn Father!”

“Zha Zha!”

“Ye Zao nodded at Cen Shaoqing and Professor Hua en. Then, he walked up to the stage, dialed the microphone, and slightly bent his body. Although it was an unintentional action, he exuded a powerful aura, “Everyone, I’m sorry that I’m late because of some things! Today is the 18th of May, year 21. Mankind will enter Neptune for the first time, leaving behind the first footprint, the first flag...””

“Looking at the figure on the stage, Tang Xue narrowed her eyes.”

Didn’t Ye Zhuo run away? Why would he suddenly appear here?

Could it be that she could really make the aircraft carrier fly?

No.

Impossible!

On the live broadcast bullet screen:

“[ Ah Ah Ah! Daddy is so handsome! SOB SOB SOB, I even cried. I knew Daddy wouldn’t run away. ]”

“[ Hehe, what time is it? You’re still bragging! ]”

“[ go, burning daddy! ]”

[ is this YC dreaming? Stepping into Neptune? Does she know what’s on Neptune? I’m afraid she’ll turn into space trash before she reaches Neptune! ]

[ YC must have been captured by the International Department! ]

Dr. Cara and the leaders of the other countries didn’t expect ye Zao to suddenly appear.

““Since Dr. YC is here, please show us your work,”Dr. Cara continued, “But let me be clear. If your aircraft carrier can not reach the speed of light and land on Neptune within four hours, please sign the agreement immediately!””

Anyone could build a spacecraft.

But it was almost impossible to reach the speed of light.

“Because humans did not have the technology at the moment, Dr. Cara had been emphasizing the problem of the speed of light.”

Ye Zao nodded slightly. “I’ll give you the same thing.”

“Dr. Cara smiled and said, “Don’t worry. China always keeps its word, unlike some countries that don’t keep their promises.””

“”That’s good.”Ye Zao pressed the communication device beside his ear and said, “Tang Mi, you can come over now!””

“Got it!”Tang Mi’s voice came from the other side.

“Dr. Cara looked at ye Zao and said, “Dr. YC, didn’t you say that you want to show us your aircraft carrier? Where’s your aircraft carrier?””

“At this moment, there was an uproar in the venue.”

“At the same time, a shadow covered the top of everyone’s head. It was so dark that it was as if the sky had suddenly turned dark. When everyone looked up, they saw a huge object flying over from the horizon.”

That kind of shock could not be described with words!

“The aircraft was obviously very big, but no one could feel the slightest bit of noise.”

Ye Zao smiled slightly and pointed at the sky. “Isn’t it already here?”

Professor Cara looked up.

His eyes were filled with shock.

It was unbelievable.

“The flying object in front of them could not be seen at all. If they had not seen it with their own eyes, no one would have believed that such a huge object would appear in the Sky?”

What kind of theory did ye Zao use to make the aircraft carrier fly into the sky?

A nuclear reactor and protons?

No!

Impossible!

These two things could not be turned into power materials at all.

What was going on?

““Dr. Kala.” Gado mi patted Dr. Kala’s hand and said in a low voice, “Just wait and see. Soon, China will make a joke.””

It was not difficult to build an aircraft carrier that could fly.

“Let alone China, any country with slightly advanced technology could build it.”

“However, an aircraft carrier could be called an aircraft carrier not only because it could fly.”

“It had to have a defense system, an attack system, and a hidden system.”

“Otherwise, before the combat aircraft carrier could reach the territory of a certain country, it would be blown down by a missile.”

Therefore.

The aircraft carrier made by Ye Zao was just an ordinary aircraft in the eyes of Gadomi. It was still far from a real aircraft carrier!

Dr. Kara also calmed down.

Gadomi was right.

It was not the end yet.

What did the speed of light represent? The speed of light represented the blink of an eye.

“With the current level of human civilization, how could it reach the speed of light?”

It was simply a pipe dream.

Tang Xue crossed her arms and looked at the aircraft carrier in the sky with a mocking look in her eyes.

She was thinking the same thing as Gadomi.

“The thing that ye Zao had built was not an aircraft carrier at all. At most, it was a flying machine. Therefore, she was not worried at all that this thing could land on Neptune.”

She just had to wait for ye Zao to embarrass himself.

“Ten minutes later, the aircraft carrier could not reach the speed of light. She wanted to see how ye Zao would end up.”

The aircraft carrier did not fly high. Tang mi held onto the railing and waved at ye Zao. “Miss Ye!”

Ye Zao also waved at her.

“A moment later, ye Zao turned to look at the people present, “Let me introduce to everyone. This is China’s first aircraft carrier! “Ten minutes later, I will fly to Neptune on this aircraft carrier. Five hours later, I will meet everyone here again. The entire process will be recorded by the cameras.””

“F \* ck! F \* ck! F \* ck! This aircraft carrier is really huge!”

“”It can’t really reach the speed of light, right?””

“”Oh my God, I’m going to cry!””

“”Pretentious, this size is impossible to reach the speed of light. It’s even landing on Neptune! Dream On!””

“I feel like the scene of the aircraft carrier hovering in the sky is similar to the one I dreamed about.”

[ is the Great China going to Pout? ]

[ waiting to be slapped in the face. ]

“[ it’s just an aircraft that looks like an aircraft carrier. What’s so great about it? If our country C is willing to make such an aircraft, let alone one, we can even make 10 or 100 of them. ]”

[ exactly. Look at the Chinese People’s unworldly faces. Barbarians are barbarians! ]

“Dr. Cara looked at Ye Zhuo, “Dr. YC, I believe that the audience here can’t wait for you to fly the aircraft carrier to Neptune. Don’t keep them waiting. Hurry up and fulfill their wishes. Fly the aircraft carrier and set off for Neptune.””

“As you wish.”Ye Zhuo raised his eyes slightly. “Tang Mi!”

“Yes!”Tang mi immediately called a meeting. She pressed the switch and a flight of stairs immediately appeared from the aircraft carrier and connected to the ground.

“Under the sunlight, the silver stairs emitted a dazzling light.”

“Ye Zao was about to walk up when Dr. Warne, the four brothers, Yu Zifei, and the others caught up with him. “Miss Ye, Wait! We want to go with you!””

“Let’s go.”Ye Zao nodded slightly and the few of them walked up to the aircraft carrier.

The audience could only see their backs.

“At this moment, a low voice came from ye Zao’s communicator. “Zao Zao, I’ll wait for you here.””

“”Okay, remember to prepare the desserts that I like.””

“Okay.”

“Looking at the backs of Ye Zao and the others, Dr. Cara waved to his assistant beside him.”

The assistant immediately went over.

Dr. Cara lowered his voice and whispered a few words into the assistant’s ear.

“The assistant nodded. “Okay, doctor, don’t worry! I’ll arrange for someone to handle it right away.””

Country C was a nation of weapons.

“The aircraft carrier had a huge target. As long as they fired a nuclear weapon at random, the aircraft carrier would self-destruct in the air!”

“When that time came, the scene would definitely be very exciting.”

“Dr. Cara’s assistant, David, walked to Tang Xue’s side. “Miss Tang, our doctor has something for you.””

“Please go ahead.”Tang Xue looked at David.

David lowered his head and whispered a few words into Tang Xue’s ear.

“Hearing this, the corners of Tang Xue’s mouth curled up proudly. She then said, “Okay, please rest assured, Dr. Cara. I will definitely not disappoint his expectations!””

“Chapter 1633: 333: successfully landing on Neptune, face slapping! 1”

“David nodded and said with satisfaction, “Miss Tang, as long as you successfully complete this task, Dr. Cara will definitely treat you well.” ”

“Tang Xue looked at David and said with a smile, “Assistant David, don’t worry. Just give me five minutes.” ”

Wasn’t it just bringing a bomb in?

Everyone in the base was thinking about how to curry favor with Tang Xue.

It was simply too easy for Tang Xue to do something!

““Okay,” David said with satisfaction. “Then I’ll wait for Miss Tang here.” ”

“Okay.”

Tang Xue turned around and walked out.

David looked at Tang Xue’s back with a sarcastic look in his eyes.

Chinese people were all idiots.

They didn’t even know that they were being used.

Especially this Tang Xue.

“For the sake of a C nation, she would even betray her own countrymen. ”

How pathetic!

“With the existence of someone like Tang Xue, it was inevitable that China’s technology industry would be destroyed.”

On the other side.

On the aircraft carrier.

“After ye Zhuo and the others entered the aircraft carrier cabin, the silver staircase automatically retracted. ”

The nearly 120-meter staircase disappeared into the air in less than three minutes.

It was as if nothing had ever happened.

The people on the ground watched the changes in the aircraft carrier in the air with shock in their eyes.

This kind of shock could only be understood by those who had experienced it firsthand.

The shock could not be seen through the screen at all.

[ why does it look like a special effect to me? ]

[ it looks like a special effect plus one! ]

[ does anyone in the audience want to explain? ]

“[ I’ve seen it. Although it’s not special effects, it doesn’t have any high-tech content. It’s just a gimmick used to impress the audience! ] ”

“[ does YC really think that the aircraft carrier project will be announced as a success just like that? An ignorant fool. She’s stupid herself, yet she still wants to treat others as idiots. ] ”

“[ the Chinese love this! Putting on an Act! It’s so fake! Especially this YC. At a time like this, I really don’t know how she can put on an act. Doesn’t she feel embarrassed in front of so many heads of State? ] ”

“[ YC, get out of the technology world! Don’t embarrass yourself! I feel awkward just looking at you. ] ”

“[ if this trash aircraft carrier self-destructs in the air later, it’ll be hilarious! ] ”

“[ what the person above said makes a lot of sense. If a missile or something came at this time, it would be able to teach YC how to behave. ] ”

“[ sigh, although I’m also Chinese, I also feel quite embarrassed. ]. I clearly know that this aircraft carrier is impossible to exceed the speed of light, but I don’t know what I’m expecting. ]. Actually, it wouldn’t be a big deal if YC announced the failure of the aircraft carrier plan openly. After all, no country has yet developed an aircraft that can surpass the speed of light... .. ”

“[ the person above is right. In fact, this matter was nothing in the beginning. If YC didn’t seek death herself, she wouldn’t have died. She was the one who bragged, and she signed the betting agreement herself. Who can she blame? ] ”

[ don’t be so pessimistic. What if Dr. YC succeeds? At least Dr. YC didn’t run away. She really built an aircraft carrier! Have you ever seen such an aircraft carrier before? ]

[ the person above is crazy! He actually believes that YC’s aircraft carrier can exceed the speed of light. ]

“[ Haha, I’m Dying of Laughter! ] ”

“At the same time, on the other side. ”

“Ye Sen was sitting in front of his computer, watching the aircraft carrier launch ceremony. ”

“Because he believed in ye Zao, he was not nervous at all. ”

“He was not nervous, but when he saw so many people scolding ye Zao on the bullet screen, Ye Sen was very angry and immediately started scolding people on the internet. ”

“Although ye Zao had many fans and the protection of the NIU Hulu family, this live broadcast was an international live broadcast. He was facing a global audience. ”

“Even though ye Sen had the help of the Niu Hulu family, he was still outnumbered when facing a global audience. ”

“At this moment, Ye Sen seemed to have thought of something. He immediately put down the keyboard, took out his cell phone, and made a call. ”

“”Hello, is this old Xu?” ”

“”It’s me.”Old Xu’s voice came from the other side. “Director Ye, is there something you need me for?” ”

“Ye Sen continued, “Old Xu, I remember you saved a batch of diamonds before, right?” ”

“Yes.”

“Ye Sen said, “Old Xu, listen to me. Dr. YC’s aircraft carrier will be launching today. The first stop of the aircraft carrier will be Neptune. There are large quantities of diamonds on Neptune. Dr. YC will bring back a bunch of diamonds soon and realize the freedom of all diamonds! “Hurry up and sell the diamonds in your storage. Otherwise, you will suffer a huge loss!” ”

“Lao Xu laughed out loud. “Ye, do you really think that the aircraft carrier plan will work?” ”

“Chapter 1634: 333: successfully landing on Neptune, face slapping! 2”

Landing on Neptune?

Implementing the freedom of diamonds for all?

Oh My God!

What kind of daydream was Yesen having.

It was simply ridiculous.

""What are you laughing at?"Yesen continued, "Old Xu, I'm not joking with you! I'm very serious! If you don't get rid of those diamonds, you'll definitely regret it! "Once everyone is free with diamonds, the price of the diamonds will definitely be lowered! "You have so many diamonds in your inventory, don't lose so much that you can't even afford to wear pants!""

""In the future, diamonds will no longer be a luxury item, but a decorative item. When that time comes, the price of diamonds will definitely suffer a Waterloo!"

""At present, all the diamonds in China are imported from abroad. Once China realizes the freedom of diamonds for all, those diamond mountains abroad will also suffer a devastating blow!"

There were still more than five hours before ye Zao's return. Old Xu could still get rid of those diamonds in time!

"Old Xu did not take this matter to heart and continued to ask, "President Ye, I heard that Dr. YC is your niece?"

""Yes. That's right,"ye Sen said."

"Old Xu smiled and said, "President Ye, I can understand your feelings of protecting your niece. If I were in your shoes, if my niece was Dr. YC, I would definitely believe her! Unfortunately, I'm not."He was just an outsider, therefore, he would not make any sacrifices for ye Zhuo, and he would not sell the diamonds in his inventory."

“Old Xu had sold the diamonds too early last year and had lost tens of millions of dollars. Today, he had double the amount of diamonds from last year. He was waiting for the price of the diamonds to rise so that he could make a huge profit from it.”

Xu had done some research when he was stockpiling diamonds. The market this year would definitely not be worse than last year!

“Hearing Xu’s words, Ye Sen was very anxious. After all, he was Xu’s best friend, “Xu, trust me. Quickly sell all your diamonds! Otherwise, after a few hours, you won’t have such an opportunity!””

“”In short, I Won’t lie to You!””

“Old Xu smiled and said, “President Ye, I Know You Won’t lie to me. You just trust your big niece too much!””

“Old Xu!”Ye Sen was extremely anxious.

“Old Xu continued, “Alright, Alright. I still have something to do. I Won’t talk to you anymore. Let’s have tea together another day.””

“”It’s not Old Xu,”ye sen continued, “I’m very serious! Don’t not listen to me...””

“”I understand how you feel. Alright, I’m hanging up now.””

“Before ye Sen could finish his sentence, Old Xu hung up the phone.”

“Seeing Old Xu hang up the phone, Pan Tao, his good friend next to him, asked with a smile, “Who called?””

“”The CEO of Shengdong Express,”old XU said.”

“Ye Sen?” Pan Tao continued to ask.

“”Yes.” Old Xu nodded. “Speaking of this CEO Ye, he’s a good person, but it’s a pity that his fate isn’t too good. He met a prodigal niece, and this time, he’s going to suffer!””

“What do you mean?” Pan Tao asked curiously.

“Old Xu continued to explain the purpose of Ye Sen’s call. “Do you think this Ye Sen is muddle-headed? He actually asked me to sell all the diamonds in my inventory! He even said that in the future, diamonds will no longer be luxury goods, but decorative items!””

“Hearing this, Pan Tao said with some surprise, “You’re saying that Dr. YC is Ye Sen’s eldest niece?””

“Yes.” Old Xu nodded.

“Pan Tao said, “Oh my God! I didn’t expect Ye Sen and Dr. YC to be related!””

“Old Xu continued, “Actually, when I first found out about this, I was also quite surprised!””

Old Xu originally thought that ye Zao would make a great achievement.

“After all, Ye Zao was indeed powerful before, and he was even praised as the dark horse of the scientific and technological world.”

Who knew that ye Zao would come up with an aircraft carrier plan in the end!

“At this time, Old Xu knew that Ye Sen’s niece was finished.”

Self-destruction of her future!

“Although he was not in the scientific and technological world, and did not know much about things in the scientific and technological world, he knew that it was not so easy for humans to surpass the speed of light.”

“Pan Tao continued, “Then do you want to sell those diamonds in your hands?””

“Old Xu said speechlessly, “Am I crazy? I sell diamonds? Do you really think that Ye Sen’s niece can land on Neptune? Do you know how far Neptune is from Earth? 4.5 billion kilometers! And she can land on Neptune in four hours. I think she might not be able to land on Neptune even after 40 years!””

““That’s true.”Pan Tao nodded. “If YC can really land on Neptune, won’t those foreign diamond merchants cry to death?””

“Chapter 1635: 333: successfully landing on Neptune, a slap in the face! 3”

Landing on Neptune was easier said than done!

“Old Xu smiled and said, “That’s why it’s good to hear it! It’s not right to be serious!” ”

““What if Dr. YC really landed on Neptune?”Pan Tao continued to ask, “Even country C can land on the Moon, why can’t China Land on Neptune?” ”

““The Moon is only 400,000 kilometers away from Earth, and Neptune is 4.5 billion kilometers away from Earth. Do you think this can be compared?”Lao Xu asked. ”

“Pan Tao calculated with his fingers and was shocked. “According to the speed of humans flying to the moon, it will take at least 200 years for humans to go to Neptune?” ”

“Yes.”Lao Xu nodded. “Do you still think that YC can land on Neptune Now?”

Pan Tao immediately shook his head.

Over here.

Ye Sen looked at the phone that was hung up and frowned slightly. He picked up his phone again and replayed the call.

“Old Xu saw Ye Sen’s number and looked at Pan Tao with a smile. “Look, it’s calling again!” ”

“Pan Tao also smiled. “It seems that CEO Ye really cares about you. Otherwise, he wouldn’t have called again and again!” ”

Old Xu picked up the call. “CEO Ye.”

“Ye Sen’s voice came from the other end of the phone again, “Old Xu! Don’t ignore what I said. If you miss today, it’ll be too late for you to get rid of it tomorrow! Old Xu, you must make good use of this opportunity!” ”

“As a good friend, Ye Sen really did not want to see Old Xu’s investment fail. ”

“Old Xu smiled and said, “President Ye, I won’t play dumb with you. To tell you the truth, your niece will never land on Neptune. Mankind will never realize the freedom of diamonds! President Ye, don’t blame me for not believing you. It’s just that such a statement is too funny. Don’t talk about me. Go outside and ASK. How many people will believe that your niece can land on Neptune?” ”

“”My eldest niece told me very clearly that she will definitely land on Neptune! I believe in my niece. Old Xu, please believe in me too!” ”

“Old Xu continued, “President Ye, I appreciate your kindness! Don’t worry, even if your niece really lands on Neptune and realizes the diamond freedom of the people, I will not blame you! I will only blame myself for not seizing the opportunity!” ”

“Since he had already said this much, there was no point in saying anything else. Ye Sen continued, “Alright, Old Xu, in that case, I’ll hang up first. You think about it carefully.” ”

“”Okay, I’ll hang up!”Old Xu hung up the phone. ”

“Pan Tao smiled and said, “This president ye is really funny. He actually has a phone on the left and a phone on the right. Tell me, does he like your batch of goods?” ”

“Hearing this, Old Xu narrowed his eyes, “If you didn’t say it, I wouldn’t have thought of it. Now that you mention it, I do remember! “It must be so. It’s not easy to find a source of diamonds these days. He’s in a hurry to get me to sell. Perhaps he wants to find someone to buy my diamonds at a low price! “I really didn’t expect ye Sen to be such a person! “To think that I have always treated him as a good friend. I didn’t expect him to treat me like this!” ”

Old Xu was a little angry!

He and Ye Sen were the kind of people who wouldn’t know each other unless they fought. He didn’t expect ye Sen to actually want to scheme against him.

“Fortunately, he was smart! ”

“Otherwise, he would have been schemed against by Ye Sen! ”

“Pan Tao continued, “I think you’d better not deal with such people in the future! Otherwise, you won’t even know when you’ve been schemed against!” ”

Old Xu nodded. “You’re right.”

“After hanging up, Ye Sen turned on his computer and continued to argue with others. ”

At the same time.

At the scene of the aircraft carrier's lift-off ceremony.

"Five minutes later, Tang Xue came back with something. "

"David saw Tang Xue and asked impatiently, "How is it? Did you get the Thing?" "

"Tang Xue nodded and handed the thing to David. "Look, is this it?" "

"David took the box from Tang Xue and opened it. In the middle of the box, there was a round pellet the size of a pill. "

"Although it did not look big, its power could not be ignored. "

Such a small nuclear bomb could destroy a small island in an instant.

The title of Country C's country of weapons was not for nothing.

"David looked at Tang Xue and said, "Miss Tang, don't worry. Dr. Cara will definitely not mistreat you!" "

"Thank you."Tang Xue bowed to David.

"If it were any other time, she might have avoided it. "

"After all, this was the CEN base in China. "

"But now, Tang Xue did not need to avoid it at all. "

"After all, the CEN base was about to change its name. In the future, C country and the other six countries would be the owners of the CEN base. Everyone in the CEN base had to listen to Dr. Cara. "

“Chapter 1636: 333: successfully landing on Neptune, face slapping! 4”

What were Cen Shaoqing and Ye Zhuo?

They didn’t even have the right to pour water for Dr. Cara!

“David smiled and said, “You deserve all this.””

“Tang Xue was very excited, but she was also glad that she didn’t make the wrong choice.”

“She, Dr. Cara, had done so much with country C. in the future, Dr. Cara would help her become half the owner of Cen’s base no matter what.”

David took the nuclear bomb and walked quickly to Dr. Cara. He bent down slightly and whispered a few words into Dr. Cara’s ear.

“Hearing this, Dr. Cara’s lips curled into a proud smile.”

He knew that the Chinese would not let him down!

“Where’s The Thing?”Dr. Cara looked at David.

David handed the thing to Dr. Cara.

Dr. Cara opened the lid and saw the thing inside. The smile on his face became more obvious.

Good.

Very good.

"In a moment, Dr. Cara pressed the communicator beside his ear. "Dr. YC.""

"Speak."

"It was a very simple word, but it was loud and clear. It was transmitted to everyone's ears through the loudspeaker."

"The next second, ye Zao switched to the screen. On the big screen at the scene, the internal video of the aircraft carrier appeared."

"Everyone stared at the big screen, afraid that they would miss something."

"Professor Cara looked up at the big screen and asked, "Dr. YC, when will it take off?""

"Look at the timer at the back."Ye Zao lowered his head to set the trajectory and the time to land on Neptune.

"After he said that, professor Cara and the others noticed that the numbers were rolling on the big screen behind ye Zao."

"35,34,33,32..."

""Even though I know that it's impossible for an aircraft carrier to reach the speed of light, I'm still looking forward to it. I don't know what I'm looking forward to!""

""20 seconds left! Go, China! Go, Professor YC!""

“10 seconds!”

“Let’s Witness YC’s face-smacking moment together.”

“Ah Ah Ah! I’m so excited! I believe in YC’s father! She’ll definitely be able to realize her plan to land on Neptune.”

“”I think these Chinese people are crazy. They actually believe in YC. They don’t even know that they’re about to die. Just Wait, YC will lose face soon.””

“However, when the number on the timer changed to ‘8’, the bodyguard next to Dr. Cara waved his hand.”

“The bodyguard immediately walked to his side and asked, “Dr. Cara, what are your orders?””

Dr. Cara said a few words in a low voice before handing the box containing the nuclear bomb to the bodyguard.

“The bodyguard immediately took the box. “Alright, I’ll do it right away!””

Dr. Cara looked at the huge object in the air with a mocking expression on his face.

Just you wait.

“Soon, YC and that group of trash from the Chinese scientific and technological world would be buried in the abnormal explosion!”

“The shooter loaded the nuclear bomb into the gun barrel, aimed at the aircraft carrier, and fired.”

Whoosh —

The sophisticated nuclear bomb seemed to be covered with a biting cold deterrent force.

Fast!

Too Fast!

“In the defense cabin, when Tang Mi saw the nuclear bomb on the screen, the corners of her mouth curled up. “This group of Chinese people are really sneaky! They actually used this trick!””

“Cen Jiang walked over with a smile. “Unfortunately, Kara and miss ye are not at the same height at all. Let alone such a small nuclear bomb, even if an asteroid flew over from outer space, we would be able to digest it directly!””

The defense level of an aircraft carrier was SSS!

It could deal with all kinds of unexpected dangers in space.

“For example, an asteroid, a meteorite, or an alien attack!”

“After all, they were in outer space. No one knew what dangers would happen.”

“Therefore, a small nuclear bomb was like a joke in Cen Jiang and Tang Mi’s eyes. They did not have to worry at all.”

“Under normal circumstances, the naked eye could not observe the trajectory of the nuclear bomb flying towards the aircraft carrier, but Dr. Cara’s eyes were installed with advanced chips, he quickly locked onto the location of the nuclear bomb.”

“3,2,1 —”

Now.

The nuclear bomb directly shot into the interior of the aircraft carrier!

Dr. Cara's lips curled slightly.

"The next second, the curvature of Dr. Cara's lips froze."

Because there was no explosion in the air.

It was as if nothing had happened.

It shouldn't be.

It shouldn't be!

The power of this nuclear bomb was enough to destroy an island. How could it be so calm?

Could it be that the nuclear bomb had been changed?

He had checked it carefully just now. There was nothing wrong with the nuclear bomb.

Dr. Cara simply swallowed his throat.

Could it be...

Could it be that the aircraft carrier's defense system had taken effect?

Dr. Cara had never expected that the aircraft carrier's defense system would be so advanced.

"At this moment, ye Zao's voice came from the microphone, "Dr. Cara, a wise man does not do evil deeds. I will treat the nuclear bomb that you asked your men to deliver as a salute to me!"

"Chapter 1637: 333: successfully landed on Neptune, face-smacking! 5"

Just as ye Zao finished his sentence.

Bang!

"A loud sound suddenly came from 10,000 meters high in the sky, and a monstrous red light dyed half of the sky. "

"Dr. Cara looked up at the sky, his face full of disbelief. "

How did he do it?

How did ye Zao do it?

Could it be that ye Zao could really create an aircraft carrier that surpassed the speed of light?

The others did not understand what was happening and were all confused.

"Professor Cara tried his best to calm himself down and avoided this topic. He continued, "Professor YC, when will you let us see what is the speed of Light?" "

He did not believe that ye Zao could really surpass the speed of light!

““Okay, then I will let you see it for yourself.”Ye Zao pressed the Start button on the screen. ”

Beep —

“[ the aircraft carrier has activated its light speed mode. The destination is Neptune. The entire journey is 4.5 billion kilometers. Estimated time of landing, 14:28 p.m. on May 18, year 21! ] ”

“As soon as the electronic voice faded, the behemoth that was still in midair turned into a beam of light and disappeared in an instant. ”

“Where’s the aircraft carrier?”

“Miss Ye!”

“Oh my God! The aircraft carrier has disappeared!”

Almost all the audience members stood up and looked at the scene in disbelief.

“If they had not seen it with their own eyes, no one would believe that it was real! ”

“Including Dr. Cara, everyone stood up with shocked expressions on their faces. ”

Dr. Cara turned to look at David. “Quick! Go and investigate! The Chinese are the best at playing tricks! YC must have arranged it in advance and hidden the aircraft carrier!”

“Cara had been in the research field for more than 30 years and had only studied the speed of light for more than 10 years. He had never believed that humans had the power to surpass the speed of light, nor did he believe that a young girl in her 20s had such terrifying power. ”

It was fake.

It must be fake.

The live bullet screen was also stunned.

“Holy shit! Where’s the aircraft carrier? What is this YC doing?”

“Did she really exceed the speed of light and fly to Neptune?”

“”The speed of light was only an instant. If YC really created an aircraft carrier that surpassed the speed of light, she would have already flown out of Earth by now.” ”

“”Exceed the speed of light? Impossible! If she could really exceed the speed of light, then she would be able to travel through time and space.” ”

“”Yes, it must be fake. Maybe this is just a diversion.” ”

[ Chinese people love to do this kind of trickery. It’s normal to use a diversion. ]

“[ if it’s a diversion, then go and make a diversion for us to see! Sour grapes when you can’t eat grapes! You Chinese people are disgusting! ] ”

“[ if it’s not a diversion, then it can only mean one thing! YC has really created the world’s first aircraft carrier that can go faster than the speed of light! ] ”

“[ ha! That’s easy to say, how is that possible! ] ”

“[ whether it’s true or not, we’ll know when the aircraft carrier lands. Didn’t YC claim to be bringing back a diamond from Neptune? ] ”

“[ if it’s true, why is the big screen black? Didn’t YC say to record the entire broadcast? Why didn’t she let us see what the universe was like and what outer space was like? Liar! Disgusting! ] ”

[ the person above is right! What happened to recording? Why is there no follow-up? ]

[ because she just found a place to hide. There’s no speed of light at all. Where can she film outer space and the Universe for you guys? ]

“[ I looked around. If you want to go to Neptune, you have to go through Mars first, then Jupiter, Saturn, Uranus, and finally Neptune. If you have the ability, quickly send all these videos over! ] ”

At this moment.

The loudspeaker in the square suddenly rang.

“”Master Five, can you hear me?”It was Cen Jiang’s voice. ”

“Hearing Cen Jiang’s voice, CEN Shaoqing immediately dialed the microphone in front of the table. “I can hear you. How are things on Your Side?” ”

“”We’re fine. Miss Ye is also fine. You Don’t have to worry,”Cen Jiang continued. “Master five, we’ve already flown out of earth and are about to reach Mars. Now, I’ll show you the situation on our side.” ”

“As he finished speaking, Cen Jiang switched the camera. ”

“In the next second, the big screen displayed the scenery of outer space! ”

The dark and boundless universe was filled with mystery.

“Mars, which was just a short distance away, was emitting an orange glow. It was extremely similar to an orange giant ball. From the camera, one could even see the desolate surface of Mars. ”

“Whether it was the audience before the live broadcast or the audience sitting in the square, this was the first time they had seen such a scene. ”

“Chapter 1638: 333: successfully landed on Neptune, face smacking! 6”

“Oh my God! This is amazing!”

“Miss Ye is so amazing!”

“”That’s not right. Logically speaking, people in outer space should have lost gravity long ago. Why is Cen Jiang still walking around?””

“Could he really be a liar?”

“Cen Jiang held a special camera and walked out of the cabin. He seemed to have predicted everyone’s doubts, as he walked, he said, “Everyone must be very curious now. Why have we left Earth and not lost gravity? This is because Miss Ye has installed a special chip on the aircraft carrier! “Oh right, look, that Blue Planet is our earth!””

“When they saw Earth, everyone’s expression changed.”

“Cen Jiang installed the camera on the railing of the aircraft carrier, he then said, “The aircraft carrier is about to return to the speed of light. During the speed of light, the camera may not be able to capture as clearly as it is now. Everyone, just wait and see. In four hours, we will meet on Neptune.””

“Seeing this scene, Tang Xue took a few steps back.”

No.

It couldn't be.

It was impossible!

It was impossible for ye Zhuo to create an aircraft carrier that was faster than the speed of light.

"If all of this was true, then what should she do?"

"Tang Xue clutched her hair tightly, her face pale."

"Even in her dreams, Tang Xue would never have thought that the aircraft carrier that ye Zao had created would actually be able to soar into the sky."

What was going on?

What was going on?

"Miss Tang, don't be anxious." At this moment, Xiao Lu appeared beside Tang Xue.

Tang Xue lowered her head and looked at Xiao Lu.

"Xiaolu continued, "No one knows where the aircraft carrier and ye Zao are right now. Even if they are really in space, what can they do if they fly to Neptune? Even if they were lucky enough to land on Neptune within four hours, they might not be able to return safely. "Neptune is a gaseous planet with no landing point. Its atmosphere is made up of 80% hydrogen, 19% helium, and 1% methane. In addition, not only is there no oxygen on Neptune, but there is also the strongest storm in the solar system. The average wind speed is as high as 2100 km/h.""

“Xiao Lu paused and smiled. “Do you think it’s possible to survive on such a harsh planet? If ye Zhuo doesn’t make it back alive, the bet will be lost, and you will be the one to win.””

Ye Zhuo was dreaming of landing on a gaseous planet without a landing point. Wasn’t that a dream?

She was afraid that her life would be over before she reached Neptune!

“After hearing Xiao Lu’s words, Tang Xue’s mood improved a lot.”

Xiao Lu was right.

“The universe was unpredictable, and Neptune was extremely cruel. It was the first time humans had set foot on Neptune, so they did not have any experience. Whether ye Zao could come back or not was a question. Why should she worry about things that would never happen?”

“On the big screen, although the camera was high-tech and could not capture the environment of the universe at the speed of light, it could roughly see the situation.”

“Ye Zhuo sat in the main control cabin with a calm expression. At this moment, she felt as if she had returned to the world she lived in.”

The familiar universe.

The familiar environment.

Except for the lack of flying vehicles and space junk.

“One had to know that in her era, human footprints could be seen everywhere in the universe.”

“At present, the technological civilization was still developing. Human footprints were only on the Moon for the time being, and they had never set foot on other planets.”

Time passed very quickly.

“In the blink of an eye, four hours had passed.”

“Cen Jiang and the others had already put on special spacesuits and came to the main control cabin.  
“Miss Ye, we’ll be landing in 20 minutes.””

“Ye Zhuo nodded slightly and continued, “The conditions on Neptune are very harsh, and danger can happen at any time. You must pay attention to your safety. After collecting the samples, return to the cabin!””

“I understand.”The few of them nodded.

“Ye Zao then gave everyone a laser gun and an economic communicator, “Bring this. Before landing on Neptune, try out the spacesuit first! Then, keep in touch at all times. Remember, you only have one hour on Neptune! No matter what happens, you must return to the cabin after one hour!””

Chen Hao looked at ye Zao with admiration. “Father Zao! You Look So Cool Now! Have you been to Neptune before?”

““Yes, a few times,”ye Zao continued, “But at that time, there was nothing left to mine on Neptune.””

There were pros and cons to the rapid development of human civilization.

“Chapter 1639: 333: successfully landing on Neptune, a slap in the face! 7”

“The advantage was that they could use the resources of the various planets to promote the development of science and Technology. The disadvantage was that they were overexploited, resulting in the overexploitation of a few planets closer to the Solar System. People had no choice but to go

further away in search of new sources of energy, however, the further away they were from the Solar System, the greater the danger. In the universe, no one knew what would happen in the next second! ”

“Therefore, it was common for aircraft to go missing. ”

“Chen Hao looked at ye Zao and suddenly laughed. “Father Zao, you look so serious. I’m taking you seriously!” ”

“Ye Zao smiled and continued, “In short, pay attention to your safety. If you find anything wrong, contact me immediately.” ”

“”Okay.”Chen Hao nodded. “Don’t worry, Father Zao!” ”

“Tang mi continued, “Miss Ye, is Neptune really that scary?” ”

“Ye Zao said, “The pressure on Neptune is about five times that on Earth. At the same time, the temperature is still very low, close to minus 200 degrees Celsius! The visibility is also very low. However, you don’t have to worry about that. As long as you put on the spacesuits, these will not be a problem. The most important thing for you to pay attention to is that when you collect the samples, don’t be hit by the diamonds that fall from the sky! “At the bottom of the water ice cloud layer, there are more than 10,000 atmospheric pressures. Your movements may not be as light as they are now. You must pay attention to the time. If you miss the time of the anti-ship, you may have to stay on Neptune Forever!” ”

Tang mi nodded very seriously.

Ye Zao repeated many questions.

“Cen Jiang walked to the outside of the aircraft carrier and picked up the camera, he then said, “We have arrived at Neptune. We are now heading towards the interior of Neptune. “Although Neptune is a gaseous planet, the surface mass of the core of Neptune is similar to that of Earth. It is a solid land made of a large number of rocks and ice crystals. The ground is filled with diamonds. After we reach Neptune, we will activate the aircraft carrier’s collection system. In six hours, you will be able to see the diamonds that have returned from Neptune!” ”

“As they spoke, the aircraft carrier had already stopped on the land of Neptune. ”

“Just as Cen Jiang had said, there were sparkling diamonds everywhere, and it was raining diamonds outside! ”

“Cen Jiang raised the camera. “Look, this is Neptune!” ”

Ye Zhuo and Dr. Warne took out the national flag from the cabin.

They saw the national flag.

Everyone’s emotions were ignited once again. They stood up from their seats and listened to the national anthem coming from the distant Neptune.

Ye Zhuo and Dr. Warne planted the national flag on the ice crystal not far from the landing point.

The bright red national flag fluttered in the wind.

“At this moment, the big screen suddenly turned black. ”

“At the same time, a miserable cry came from the other side: ”

Ah!

The image coming from Neptune came to an abrupt stop.

“Team leader Cen! Team leader Cen!”Feiyu team member Sun Tian asked anxiously.

“However, there was no response from the other side. ”

“Miss Ye! Dr. Warne!” Dr. Millet turned on the emergency communication device.

There was still no response.

“Seeing this scene, everyone’s hearts were in a mess. ”

On the other side was the distant planet Neptune.

“Without a light-speed aircraft, it would take at least two hundred years to fly to Neptune. ”

What should they do now?

The live bullet screen:

[ where’s Miss Ye? ]

[ did something happen? ]

“[ maybe this is what happens when people go crazy! YC relied on luck to create an aircraft carrier that exceeds the speed of light, but they didn’t expect the dangers on Neptune! ] ”

[ how do we calculate this bet? Did We lose or did China Lose? ]

“[ nonsense! Of course it was China! The bet bet was that YC had to create an aircraft carrier that could land on Neptune faster than the speed of light. Now, what about the aircraft carrier? ] ”

“Retribution!”

“At the scene, Dr. Cara, Camilla, Tina, and the other international doctors looked at each other and saw satisfaction in each other’s eyes.”

The light-speed aircraft carrier crashed on Neptune.

China had lost the gamble in the end!

“Now, they just had to wait for six hours.”

At the same time.

Xiao Qing fainted when he saw the connection between the aircraft carrier and the surface was cut off.

“Tang Mi was her only daughter. Now that Tang Mi was in trouble, not even a corpse could be seen. As a mother, how could she not be anxious and sad?”

The atmosphere at the Lin family’s side was also very tense.

“Lin Ze kept comforting his parents. “Dad, Mom, don’t worry. Sealing will be fine. They only temporarily lost contact with the surface.” ”

“Zhongrao!” Ye Shu lay on Lin Jincheng’s body and cried loudly.

“Lin Jincheng was also very anxious, but he could not cry. Ye Shu was already like this. As the head of the family, if he were to cry, it would really be over!”

Shengdong express delivery.

“But the moment he saw that the aircraft carrier lost contact with the ground, Ye Sen was stunned. His face was pale. Then, he directly knelt on the ground and put his hands together, “I beg Buddha to bless

me and bless my niece, Ye Zao, to return safely. If she can return safely, I am willing to reduce my lifespan by 10 years, 20 years, 30 years!" "

Time passed by minute by minute.

"In the blink of an eye, six hours had passed. "

"During this period, there was no news from the aircraft carrier. Countless people were praying for ye Zao. "

They hoped that a miracle would happen.

"Dr. Cara stood up from his chair and looked at Cen Shaoqing. "CEN fifth master, it's time. You can announce the results now." "

"Cen Shaoqing's tone was indifferent, "The betting agreement said that the launch ceremony will be held on May 18th. As long as it's not past 12 o'clock at night, today will still be may 18th. As long as today is may 18th, the agreement will not exceed the time limit. Since it didn't exceed the time limit, Dr. Cara, why are you in such a hurry?" "

""Do you mean that you still want us to waste seven hours here with you?" Jamila stood up from the chair, "Fifth Master Cen, the time of each of us is very precious. It is already a foregone conclusion. Let alone seven hours, even if we give you seven years, you can not change anything!" "

""It is written in black and white. Don't tell me that fifth master Cen wants to renege on his debt?" Dr. Cara directly took out the betting agreement. "I know that you are the one who founded the CEN base. You are very reluctant to part with it. However, there is a saying in your country that only a man who is willing to part with something will have something to gain. "A loss is a loss. Even if you don't want to admit it, it still lost!" "

"He ziteng stood up from his chair. "What do you mean? Who said we lost? Have we passed the 18th? As long as we haven't passed the 18th, we haven't lost!" "

“Dr. Tina continued, “We just feel that there’s no point in wasting time like this! A loss is a loss!” ”

The comments on the bullet screen were almost flooded by the C Nation People: [ Chinese people are Shameless! ]

[ is it that difficult for Chinese people to admit defeat? Is it interesting to waste another seven hours? ]

“[ from the beginning, I knew that China would definitely act shamelessly. They are too shameless. They didn’t even admit defeat. ] ”

“At this moment, a bright light shot down from the sky. ”

“The sudden bright light made it hard for people to open their eyes. Then, the flying object of the huge object appeared in the sky. ”

“Following that, there were cries of surprise and cheers — ”

“Look! It’s Miss Ye Who’s Back!”

“Aircraft carrier! It’s our aircraft carrier!”

“Chapter 1640: 345: Trash, Tang Xue is expelled from the base. 1”

“Miss Ye!”

The audience stood up from their chairs and cheered.

Some even cried with joy.

The blood in the audience was boiling.

No one expected the aircraft carrier to suddenly appear in the sky.

“Dr. Cara, Dr. Tina, and the others were especially stunned when they saw the aircraft carrier in front of them.”

“How, how could this be?”

Didn't Ye Zao and the Others Die on Neptune?

Why would they suddenly appear here?

An illusion!

It must be an illusion!

“Neptune was not only a gaseous planet, but its conditions were also very harsh. Apart from the diamond rain, the strongest hurricane in the solar system was already unbearable. How could ye Zao and the others have a chance of survival?”

“Furthermore, ye Zao had clearly been attacked on Neptune previously.”

“Neptune was different from Earth. Even if a diamond were to hit it, it was possible for it to die immediately!”

Dr. Cara pinched his thigh hard.

It was a heart-wrenching pain.

It was real.

It was not an illusion!

“Dr. Cara turned to look at Tina. Tina also looked at Dr. Cara in disbelief. “Dr. Cara, what do we do now?”  
”

“Wait and see!”Dr. Cara narrowed her eyes.

“In this situation, there was no other way except to wait and see. ”

What if it was not ye Zao who came back?

“As long as ye Zao was not here, everything would be easy. ”

“Okay.”Tina nodded.

“In a flash, a flight of stairs hundreds of meters long appeared from the aircraft carrier and connected to the ground. ”

A slender figure walked out of the cabin.

“Against the light, although it was hard to see her face clearly, her aura was so strong that people couldn’t even catch up to her. The boundless light behind her became her background. ”

The camera captured this scene accurately.

It was different from the stage camera.

“The live broadcast camera was full HD without any image or filter. This kind of camera was also used as a death camera by industry insiders. However, under this kind of camera, no one could see any flaws in her. ”

[ Dad! ]

[ y dad V587! ]

“[ Ahhh! ! ! I’m so excited, I’m Crying! ] ”

[ YC dad is so handsome! ]

“Then, the screen was filled with [ y dad V587! ] ”

“Then, Dr. Warne, the river, Lake, and sea brothers, as well as Tang Mi and Yu Zifei, walked out and followed behind her. ”

“When they landed on the aircraft carrier, there were eight people, and when they returned to Earth, there were still eight people! ”

Cen Shaoqing just looked ahead with a faint smile on his face.

A moment later.

Cen Shaoqing stood up from his seat and walked forward.

“”Brother Five, here.”He ziteng stuffed a bouquet of flowers to Cen Shaoqing, his eyes slightly red. ”

“After losing contact with the ground from the aircraft carrier for a few hours, he ziteng’s heart started to race, afraid that something might happen to ye Zao. ”

Fortunately.

“Fortunately, everything was safe and sound.”

Cen Shaoqing took the flowers and continued to walk forward.

Everyone’s eyes followed his steps and moved forward bit by bit.

In a moment.

Cen Shaoqing stopped in front of ye Zao.

Ye Zao also stopped.

The two of them just stood there and looked at each other.

“Cen Shaoqing handed the flowers to her and opened his thin lips. His deep voice sounded in the air,  
“Miss Ye, welcome back.” ”

“Ye Zao took the flowers with both hands and smiled. “Mr. Cen, How Have You Been?” ”

CEN Shaoqing’s fingers brushed across ye Zao’s palm. They were numb and numb as if they had been electrocuted.

“At this moment, silence prevailed.”

“After a moment, Cen Shaoqing turned to look at the others behind ye Zao. “Dr. Hua En, you’ve worked hard!” ”

Everyone gave Cen Shaoqing a big smile.

“Dr. Hua en took a step forward and said, “It’s not hard at all. It’s our honor to follow Miss Ye to Neptune.” ”

“If it were not for ye Zao, they might never have been able to set foot on Neptune in their entire lives. ”

“After all, the fastest speed of an aircraft was only 54,000 kilometers per hour. ”

“At this speed, humans would have to wait at least two hundred years before they could reach Neptune.  
”

This was also the reason why no one believed that ye Zao could create a flying machine that could surpass the speed of light.

Surpass the speed of light.

“These four words sounded simple, but in reality, it was even more difficult than ascending to the heavens. ”

“However, not only did ye Zao achieve it, he even completed it beautifully. ”

It was a huge slap to the faces of all the countries!

“Even without looking, one could tell that the expressions of professor Cara and the other five countries’ leaders were definitely very interesting. ”

“They originally wanted to see China become a joke, but they didn’t expect to lose so much face in front of the global audience. Before this, country C had always been a technological power, but after tonight., they might not be able to keep the title of technological power. ”
