

Read The Almighty Dragon General Chapter 2885

The Almighty Dragon General Chapter 2885-With his explanation, James immediately understood the situation.

To enter the Boundless Holy Realm, he would have to seize the opportunity of the Elixir Pavilion's recruitment.

However, he was clueless about alchemy.

Although he had superb medical skills before becoming a cultivator, alchemy was a different skill.

'Thanks for the information.

I hope we meet again." James stood up and cupped his hands.

Just as he was about to leave, the sound of horses came from outside the tavern.

Then, a large number of guards rushed over and surrounded the tavern.

James walked out and saw the young man that blocked his path a while ago.

Seeing the situation outside, James immediately realized he had gotten into a troublesome situation.

However, James was not afraid.

The guards surrounding him were weak, and the strongest was only a Sage.

He looked at the young man he had beaten up before and said nonchalantly, "You again? What do you want?" 'You're doomed! I don't care who you are.

No one can save you after you've crossed me!" 'Take him down!" Following his order, the guards immediately drew their swords.

As soon as they drew their weapons, James made a move.

The next moment, James had already appeared on the street outside.

The guards' swords were broken, and they fell to the ground, making crisp sounds.

The guards immediately turned pale in fear.

'You overestimate yourself." James smiled lightly and did not pay much attention to them.

With his hands behind him, he strode away.

James left Inferno City and entered a primeval forest.

When he reached a mountaintop, he sat on a boulder and stared at the mountains ahead in a daze.

He would have to participate in the Alchemy Tournament and win to earn the opportunity to enter the Boundless Holy Realm.

It was his only chance.

However, James did not know anything about alchemy.

James became anxious.

“What should I do? It would be great if Thea was here to help me find a solution.” James gently touched his temples.

After a while, he contacted Nova inside the Celestial Abode, asking, “Nova, do you know anything about alchemy? Can you make me an alchemist within three years?” After speaking, James entered the Celestial Abode.

Nova stood in the backyard of the City Lord’s Mansion and said troubledly, “It won’t be difficult to become an alchemist within three years, but it’s going to be hard to become an alchemist master.

“Alchemy is similar to cultivation and requires time and experience.

No one can become an outstanding alchemist in such a short time.” “Then, what else can I do?” James said helplessly, “I don’t have much time left.” Novas thought awhile and said, “We can enter the Time Formation and try to practice.

Emperor Jabari was also an alchemist and had passed down many alchemy skills.

“Besides, you have Crucifier and the Heavenly Art.

If I remember correctly, the Heavenly Art should have records of very proficient alchemy skills.” James was clueless about this.

Although he had obtained the Heavenly Art, he had only viewed a portion of it and learned to fuse Crucifier with Exalter.

He did not go through the rest as time was limited.

The Almighty Dragon General Chapter 2886-Many Supernatural Powers and Secret Arts had been passed down from the Primeval Age and the Primordial Age.

Although no one could obtain them, a few powerhouses were capable of understanding the records.

Since Nova followed Emperor Jabari for a long time, he learned a lot.

Nova brought James into the Time Chamber.

Since James had three years, he had relatively sufficient time if he were to practice within the Time Chamber.

James sat in a lotus position in the courtyard of the Time Chamber.

Boom! A whole bunch of stuff fell to the ground.

James took a look and saw a mountain of books.

He asked, "What are these for, Nova?" Nova explained, "These are some books I found from the library.

They're all related to alchemy.

Emperor Jabari wrote some, and he obtained some from other alchemists." "There are so many of them." James was stunned.

How long would it take him to finish all these books? Nova explained, "The most important thing in alchemy is experience and formulas.

An alchemist refines elixirs with formulas.

These formulas are every alchemist's secret and aren't easily passed to outsiders.

"As for alchemy experience, every alchemist will develop a unique set of alchemy skills.

"You won't have to worry about formulas since Emperor Jabari was also an outstanding alchemist and has left behind countless formulas.

Emperor Jabari was well-known in the Primordial Age and had wide connections.

He befriended many alchemists and often exchanged experiences and formulas with them." Nova stood before James and began explaining how to become an alchemist.

“To become an alchemist, the first step is to learn about various Empyrean herbs. You’ll have to know their medicinal properties.

“Since the universe is vast and boundless, there are countless Empyrean herbs.

Even an Emperor Rank alchemist won’t be able to recognize every Empyrean herb that exists in the universe.

“Fortunately, Emperor Jarbari left behind books recording various types of Empyrean herbs, with grades from the lowest to the highest.

As long as you familiarize yourself with them, you’ll become an outstanding alchemist.

“Secondly, flames are essential to an alchemist.

“The higher the quality of your flame, the higher your alchemy success rate.” James asked, “I have Flame Energy.

What quality is my Flame Energy?” Nova looked at James, stroked his beard, and said smilingly, “You have the Fire Genesis in your body.

The flames from the Fire Genesis are the highest grade in the universe.

Throughout the entire universe, no other alchemist will have a higher-grade flame than yours.

“However, your current strength is too low, and it’s impossible for you to exert the Fire Genesis’ strength.” “Is that so?” James was pleased.

The highest grade of flames in the universe sounded good.

Nova continued, “When you have sufficient knowledge and high-grade flames, the next thing for you to do is keep practicing, refining your skills, and making elixirs.

As the saying goes, practice makes perfect.

“When you have enough experience in alchemy, you’ll naturally become an outstanding alchemist.” James listened carefully as he needed to enter the Elixir Pavilion in the Boundless Holy Realm.

It was his only chance to check whether it was the Elixir Pavilion he needed to find.

The Almighty Dragon General Chapter 2887-He would save a lot of time if it were the right place.

“Go through them yourself, and ask me if you have any questions.” After Nova briefed James, he stopped talking.

Nova had already sorted out the alchemy books and classified them for James.

James picked up the first book and began to read.

The first book recorded some ordinary herb materials from Earth that did not contain any Empyrean Spiritual Energy or power.

However, James had never come across many of the herbs recorded in the book.

James seriously reviewed the book.

Since James had reached the Sage Rank, his brain was very developed and close to achieving photographic memory.

He could easily remember things after going through them once.

It was like he had a camera in his mind that could snap a picture and store them away.

James continued going through the books and expanded his knowledge with the books.

He went through every book and learned about the grades of Empyrean herbs, from the lowest without any Empyrean Spiritual Energy to the Sage- Ranked Empyrean herbs and Divine-Ranked herbs.

After spending many years in the Time Chamber, James was almost familiar with all the elixirs in the universe.

Of course, this was only limited to the ones known to Emperor Jabari.

As for the herbs Emperor Jabari did not know about, they were naturally not recorded in the books.

Therefore, James was also clueless about them.

“Nova, I’m already familiar with all kinds of Empyrean herbs and their properties.” James looked at Nova, who was standing aside.

Nova nodded lightly and said, “Alright, good.

The next step is to try it out.

If you want to refine elixirs, you'll first need to have an alchemy furnace.

Emperor Jabari was an alchemist, so of course, he left one behind.

"Wait here.

I'll go fetch it for you." Nova disappeared from his sight.

Then, he quickly reappeared.

Nova casually waved his hand, and an alchemy furnace appeared before James.

The alchemy furnace was huge, with a diameter of one hundred meters and a height of more than thirty meters.

It was bronze in color, and some mysterious words were carved onto it.

The inside of the furnace also had many complex and mysterious characters engraved to form a formation.

"This is a big alchemy furnace." James was slightly surprised to see the alchemy furnace.

Read The Almighty Dragon General Chapter 2888

The Almighty Dragon General Chapter 2888-The Emperor-Ranked alchemy furnace was fascinating and could even automatically refine elixirs and pills.

Although it only automatically refined low-graded pills and elixirs, it was still impressive.

Nova said, "Since you've obtained Emperor Jabari's Celestial Abode, everything here belongs to you.

However, the alchemy furnace can't be given to you yet.

Since you've only started learning alchemy, you need an ordinary alchemy furnace to practice." After speaking, Nova casually waved his hand, and an ordinary alchemy furnace appeared before James.

Although it was just an ordinary alchemy furnace, the things Nova gave James were never average.

It was only ordinary because Nova had seen many things before.

To James, even an ordinary alchemy furnace was extraordinary.

Nova wanted James to use an ordinary alchemy furnace to extract the medicinal ingredients within the Emyrean herbs.

James had read many alchemy books and learned about the extraction process.

However, he simply had the knowledge but not the experience.

“Go ahead and try.” Nova opened his mouth and said, “Generally speaking, it’ll require a lot of effort for you to become a qualified alchemist since it involves a lot of experimentation and experience.

Moreover, Emyrean herbs are costly.

It’s impossible for an average family to train an alchemist.

“However, we’re in Emperor Jabari’s Celestial Abode.

Emperor Jabari’s entire wealth is within this Celestial Abode.

There are countless Emyrean herbs here carefully grown by Emperor Jabari.

There should be more than enough for you to train to become an alchemist.” After speaking, Nova casually waved his hand, and many herbs appeared before James.

The herbs Nova brought over were ordinary.

Nova said, “Now try to extract them.” “Okay.” James nodded.

He looked at the alchemy furnace before him, took a deep breath, and summoned the Fire Sage Energy within his body.

A white flame formed in his palm.

James glanced at the herbs aside and casually waved his hand.

One of the herbs appeared inside the alchemy furnace, and he used the flame to burn off the impurities on the herb.

Then, he extracted the herb’s essence.

Usually, Emyrean herbs contain a lot of Essence Energy.

Alchemists had to extract the components needed to refine the elixir of choice.

Elixirs were made by fusing these extracted components.

James knew how to refine pills.

However, he had never done it before.

Since it was his first try, he could not control the flame's temperature and burned the Emypyren herb, failing to extract anything.

James looked at the scorched Emypyren herb within the alchemy furnace with an embarrassed look.

Nova encouraged him, "Don't rush it.

Take your time.

It's only your first try.

After you get used to it, you'll be able to control the temperature of your flames well." James immediately gained confidence after Nova cheered him up.

Since there were a lot of Emypyren herbs in the Celestial Aboide, he could squander them.

James took another Emypyren herb and placed it inside the alchemy furnace.

This time, he carefully controlled the temperature of his flames.

However, it was still too hot, and he burned the herb without being able to extract its components.

"Don't be discouraged.

Keep trying," said Nova.

"Alright." James nodded.

With Nova guiding him, James kept trying and burned many herbs.

After burning a bunch of herbs, James finally knew how to control his flames.

However, he could only control his flames at a suitable temperature and not burn the herbs.

As for extracting the herbs, he would have to understand the herbs well and have absolute control over the burning process.

James finally understood why Nova said an average family was incapable of training alchemists.

The learning process required a lot of materials.

Since Emphyrean herbs were valuable, learning to be an alchemist would cost a lot of spiritual crystals.

However, James did not have these worries.
