

Chapter 0011

Gamma Tima was completely shocked. No one knew how bad it really was or how dirty Kosta tried to do me after everything I did for him and this pack.

"Do you have any proof for any of this?" Tima asked.

"Of course I do. Don't be like Kosta and Khalis and forget who I am. To start, I recorded my conversation with Khalis and had the recording sent to my private server. Only me and Zach have access to that server. I also have a record of Kosta attempting to lock me out of our accounts and attempting to access my personal accounts."

"Wow, I never would have thought our alpha would do such a thing. I am not surprised at Khalis. She has always been a viper. You have always been good to her. If she would do this to you, nothing or no one is off limits for her. She needs to be stopped." Tima said.

"Oh trust me Tima, she will get everything that is coming to her in the end. I'm going to let her play this out, and after I have my pup, I will see her in the council chambers. Her days were numbered the moment she crossed me." I said. "Here, let me show you the recordings."

I opened my laptop and played the video for him. I explained that Zach insisted that I have more security around and had several hidden cameras placed around me. These cameras

are monitored by the elite warriors and technicians at my dad's pack. After all, I am a princess from the royal family. My brother had heard that someone was plotting against me since I came to this pack. There is less security here than in my family's pack. My brother wanted to make sure that I would be protected at all times. There are always elite warriors near our pack who can respond very quickly if needed.

As the video played, I can see Tima getting angrier and angrier. I lived it once, so it does not bother me anymore. Since Kosta made it easy for her, she can have him.

"What a cold hard bitch she is," Tima says. "How can she calmly sit in your face and tell you she is planning to take your goddess-given mate from you?"

"But Tima, look how confident she looks. She already had him in her pocket. I just didn't know it. She made sure I knew by the end of that night. While my mate was letting his whore take care of him, I closed a multimillion-dollar deal that would have made this pack completely independent, with residual income for generations to come. I have since made that a private deal. As much as I want to see this pack do well, I will not let those two assholes benefit from my hard work. But don't worry Tima, I have transferred the assets of the pack back to Kosta's father. If they manage what I left correctly, the pack should be better than it was when I came."

 +15 BONUS

"Zell, we cannot blame you for protecting yourself and our future alpha. Especially since Khalis mentioned her child being the alpha of our pack in the future. We cannot let that happen. We must protect you and the pup. If she knew you were pregnant, she would definitely try to make you lose it." Tima said. "Umm, Zell, why is this light blinking?"
