

Chapter 0012

Looking at the screen, I see that there are a couple of new videos that have recently been recorded. I left the cameras in my office on a motion detector so I can see if anyone tried to access anything in my office. They don't know that I kept all my files on my secured laptop.

"Oh, someone has been going into my office and going through my things. The cameras are set to detect motion in my office. The recordings go to my personal server, which is connected to this laptop." I explained.

I pulled up the videos. There were three. The first video showed Kosta going through my files and getting frustrated. Sorry booh. I keep electronic records of my finances. There is nothing for you to find. I softly laugh as Kosta stomps out of my office. Did he really think I would make it that easy for him? He really didn't know me at all. I look over at Tima and see a vein jumping in the center of his forehead. He is seeing his alpha for the snake that he is. I keep quiet and move to the next video. I wish I would have skipped that one. It was of Khalis and one of the warriors. Watching it made me throw up in my mouth. Khalis used her body to convince the warrior to spy on me and report back to her. She really just wasted her talents. I have my own elite warriors that accompany me everywhere. That warrior will never be able to get close to me. My warriors are from my

dad's pack. Kosta had to agree to them coming with me or my dad would have made me stay at his pack until I was of age. We did not tell anyone else about my guard.

"Zell, that was just gross. She really will do anything and anybody to get what she wants. Now I need to investigate all of the unmated warriors. I do not want warriors guarding us who are that easily swayed." Tima said.

"I completely agree. Although, she really wasted her time on that one. He would never get close enough to me to get any valuable information anyway. My personal guards are 100% loyal to me and would never allow him within a certain radius of me." I tell Tima.

The third video start. We see Khalis sitting at my desk using my phone. Khalis is talking with Alpha Richard. She was bold enough to put the call on speakerphone. Overconfidence will be her downfall.

Tima and I get closer to the laptop to make sure we don't miss anything.

"Alpha Richard, it's go time," Khalis says.

"I'm just waiting for you to do your part Khalis. I am just waiting for the opportunity to claim my luna. I can't believe Alpha Kosta would be foolish enough to let a prize like Zell go for something like you. Seriously, every unmated alpha in the kingdom would give anything to be mated to Luna Zelayah and he is just throwing her away. Well, his loss is my

gain. Does he know she is one of the few pure alpha females in the kingdom?" Alpha Richard said.

You can see Khalis getting angrier and angrier as Alpha Richard sings my praises.

"Look, I did not call you to her you rant on about how great Zell is. I am much better, that's why I am taking her fated mate from her. I am the better she-wolf." Khalis says.

"Dream on. You are nothing but a means to an end. Any male would be foolish to have you as a mate. You bring nothing to the table but empty tricks. That's why I have never slept with you although you've offered many times. The only reason you are not a walking STD is because werewolves can't catch them." Alpha Richard said. 1

I could help but laugh. I looked over at Tima and he was laughing as well. Alpha Richard may be a pervert, but even he has higher standards than my mate. That's just sad.

"Whatever. You just be ready to do your part when I bring him to you tomorrow. I've already doctored the pictures of you and me in bed together and put Zell's face on my body. As long as he doesn't examine the pictures closely, it should ser him off. For insurance, be sure to mention the crescent moon birthmark Zell has on her left hip. It's in a location that you would only know about if you have seen her naked. Even when she shifts with the pack, she stays covered, so no one outside of the family knows about it."
