

## **Alternate 1011**

### [Chapter 1011](#)

#### 1011 The native youth (1)

As the mighty convoy disappeared at the end of the road, a swaying figure slowly climbed up from a pile of corpses that had been casually abandoned by the side of the road.

It was a young native man, wearing old leather armor, his leather boots were damaged, and his body was covered with minced meat and blood.

He clutched his bleeding abdomen and struggled out of the corpses of his companions, sitting on a stone by the side of the road.

He took a deep breath and took off the leather armor with great effort. Then, a terrifying wound was revealed.

The injury was very serious. The bullet had already pierced through his abdomen and came out from the side of his body, tearing apart his intestines and tearing off a large piece of flesh.

If the wound was not treated in time, The Native Young man would not be able to hold on for long and would become one of the corpses.

He took the clothes and fumbled around in his pocket. Then, he took out a small, ancient-looking bottle.

He opened the bottle and looked at the squirming liquid inside. The man hesitated for a moment, but in the end, he gritted his teeth and swallowed.

As soon as the liquid entered his mouth, a pained expression immediately appeared on the man's face. His body fell to the ground and kept struggling and rolling, as if he was suffering great pain.

The strange thing was that even though his expression was pained, he did not let out a single groan from the beginning to the end.

After struggling for about a minute, the man finally lay flat on the messy grass, as if he were dead. Even his breathing was extremely weak.

However, a series of strange and complicated bloodline patterns appeared on the surface of his body, making him look extremely terrifying.

After a few more minutes, the indigenous youth's tightly shut eyes slowly opened. However, his eyes had become pure black, which looked quite strange.

He stood up from the ground and looked at his wound. He realized that it was already covered by black tentacles and the bleeding had stopped.

His exhausted physical strength was also rapidly recovering at this moment!

"Hehe, Yingluo."

A hoarse laughter came from the man's mouth, which made people's scalps numb.

is this the weapon of the extraterrestrial demon race? it's indeed powerful!

The man muttered to himself. He glanced at his companions who had died a tragic death and shook his head slightly.

In his mind, the scenes of those self-running cars, strange weapons that spewed fire, and his companions being knocked down and torn apart appeared again!

In just a few breaths, the ambush had failed completely. The only one from the otherworldly demons who participated in the defense and attack was a car that could move on its own.

And these strange vehicles were lined up for a long distance in the Army of the extraterrestrial demon race!

"There's no chance of winning against such a terrifying enemy. If I didn't have a fortuitous encounter and obtain this ancient special potion, I'm afraid I wouldn't have been able to escape death this time!

But from now on, I'll become a monster that's neither human nor ghost. I don't know if it's worth it."

The young man sighed with emotion as his pitch-black eyes revealed a trace of a complicated expression.

He wasn't a special person. He was just an ordinary believer of God, and not a fanatic.

He had no choice but to participate in this operation, and in the end, he ended up like this.

Faced with the terrifying otherworldly demons and the process of escaping from death, the man became disheartened. He wanted to avoid the world.

Thinking of this, he picked up the clothes and the saber on the ground, ready to find a mountain forest to hide.

Perhaps he would only come out of the mountain after the otherworldly demons had left.

However, the indigenous youth had only taken a few steps when he suddenly felt something above his head. He looked up subconsciously and was immediately shocked.

He didn't know when, but a strangely shaped aircraft had appeared above his head. It was suspended in the air and seemed to be observing his every move.

The appearance of this aircraft was very similar to the weapons and equipment of the otherworldly demons!

The young man was shocked and started to run without hesitation.

He had just escaped from death, and he had become neither human nor ghost because of the special potion he had taken. If he fell into the hands of the extraterrestrial demonic race, he would be really unlucky!

Perhaps it was because he had taken the special potion, but the young man's speed and perception had been greatly improved, so he was able to escape extremely quickly.

However, the aircraft floating above his head was even faster than him. It seemed to have its eyes on him and was following him closely.

The young man groaned in his heart, but he did not dare to hesitate in his movements. He ran for his life towards the forest in front of him.

Perhaps as long as he entered the forest, he would be able to get rid of this strange aircraft.

However, in less than a minute, the young man lost all hope.

In his path, another two identical flying devices appeared and surrounded him.

At the same time, a black metal pipe poked out from the belly of the aircraft and was pointing at him.

The young man had an instinctive fear of this black tube-like object, because it was this thing that had killed more than 100 of his companions in an extremely short time!

He didn't dare to act rashly, for fear that he would incur the other party's wrath. Then, he would use the spurting flames to turn himself into a pile of minced meat!

"Who are you? what do you want?"

The young man glared at the aircraft in the sky with his dark eyes and roared unwillingly.

Unfortunately, after waiting for a long time, there was no response.

The young man tried to move his feet, and a bullet shot out from the aircraft and hit a rock in front of him.

A round hole was punched through the rock, causing the young man to shiver in fear!

He was just an ordinary person, and his cultivation was only equivalent to that of a level 1 cultivator. Other than a few limited adventures, this was his first time participating in a bloody battle.

Therefore, in the face of this situation, other than fear, he was also at a loss!

Fortunately, as long as he didn't move, the flying devices wouldn't attack him. This also eased his tension a little.

Soon, the young man realized that the extraterrestrial demon race's aircraft seemed to be guarding him and waiting for someone to arrive!

...

after realizing this, the young man became nervous again and began to rack his brain to find a way to escape.

However, after trying a few times, he helplessly gave up on the idea and sat on the ground in resignation.

After a long and torturous wait, the man finally saw a larger aircraft in the distant sky, flying quickly toward his location.

The young man immediately stood up nervously and watched the aircraft slowly land in a panic.

Two Holy Dragon City cultivators in black battle armor walked out of the door of the aircraft and came to the indigenous youth.

After sizing him up, the two Holy Dragon City cultivators nodded and raised their fingers to point at him.

“Yingluo, you guys want to f \* ck Yingluo?”

ah! the young man immediately cried out in alarm and tried to escape.

However, as soon as he turned around, he felt his body go numb, and then he lost consciousness.

“Falling into the hands of the heavenly demonic race, I’m afraid we’re finished this time, hehe.”

The last thought in the young man’s mind was filled with despair.

...

## [Chapter 1012](#)

### 1012 Before the battle (1)

The atmosphere in the tavern suddenly became a little depressing.

The burly man’s words made everyone’s expression turn ugly, and they began to drink.

Ever since the appearance of the otherworldly demons, the nobles of Snow City had been extremely nervous and had tried their best to gather information about them.

As they obtained more and more information, they became more and more afraid of the otherworldly demons!

This group of people was said to be from the world beyond the heavens, and they indeed had many powerful means. Whether it was their cultivation or their weapons, they were enough to crush the natives of this world.

If it were not for the fact that they had an unstable foundation, limited numbers, and had been entrenched in River View Village for a generation, the influential people in Snow City would have left with their family property long ago.

Even though this would cause huge losses, it was nothing compared to the destruction of their Foundation.

However, with the formation of Demon Slayer legions in various places, and the various native forces treating the otherworldly demons as their killing targets, the nobles in Snow City suddenly saw a glimmer of hope. They believed that Holy Dragon City would not be able to resist such a slaughter!

Since that was the case, there was no need for them to take the risk and withdraw their assets from Snow City.

However, the series of events that happened later made these influential people’s hearts rise again.

First, spies and adventurers kept disappearing near River View Village. Then, bargof led his troops to attack the otherworldly demons, but he was intimidated by the other party’s powerful means.

Bargof, who had always been known for his tough methods, could only set up camp outside the boundaries set by the otherworldly demons, not daring to cross the line at all!

When the news reached Snow City, the nobles who were waiting for the news were greatly disappointed.

In the end, a few days later, the defenseless Snow City was completely turned upside down.

Even the castle of balguv had been burned to the ground. It could be said to be a heavy loss!

In fact, anyone with a discerning eye could tell that although this matter appeared to be the doing of the native cultivators, it was in fact related to the otherworldly demons.

Perhaps the otherworldly demons were using this method to take revenge on bargof.

However, the rich and powerful were also out of luck. The chaos in Snow City had caused their businesses to suffer a lot of losses.

All these losses were naturally pushed onto the otherworldly demons. Thus, to a certain extent, the nobles of Snow City had a grudge against the otherworldly demons!

However, it was not worth it to fight to the death with the otherworldly demons because of such a small loss. It might even cause more losses.

Watching the fire from across the river was an action that was in line with their interests.

The nobles and influential people were participating in the battle to defend the city. Part of the reason was that Holy Dragon City had descended too suddenly and deployed its troops too quickly. The nobles and influential people of Snow City did not have time to react.

In addition, balguv was using both hard and soft tactics, so they had no choice but to bite the bullet and agree to help defend the city.

As for whether these nobles would truly protect Snow City at the risk of their lives when the battle broke out, that would depend on the situation!

.....

It was noon and the sun was high in the sky. A long convoy was slowly advancing. It was the Holy Dragon city's First Legion that was going to attack Snow City.

To be precise, this Army belonged to the first Army of the 1st Legion, the Holy Dragon city's trump card Army!

The weakest warrior in this Army was a level 3 cultivator. In an ordinary low-level city, they were qualified to join a cultivator battle team.

However, in the Holy Dragon City, a level-three monk could only become an ordinary warrior of the first Army!

As for the current cultivator battle team, it was completely made up of Lord-level cultivators and could be called the elite of the elite!

It was also because of this that the number of cultivators in the Holy Dragon city's cultivator battle team had greatly shrunk, but they had become more powerful!

Currently, the 1st Legion also had a cultivator battle team of dozens of people. Once they joined the battlefield, they would definitely become the enemy's nightmare!

Relying on these strong residents and all kinds of excellent equipment, the outcome of the battle was almost certain.

However, this powerful Army was now having a headache from the terrible road at their feet.

The roads in this world were only suitable for the use of primitive vehicles such as horse carriages. They were rugged and had limited width, which greatly reduced the speed of the Holy Dragon City Army.

If Holy Dragon city's chariots had not been specially designed to adapt to harsh terrain, their speed would have been much slower.

However, if that was the case, it would be impossible to reach Snow City in time.

Tai Seng didn't put this matter to heart. After all, Tang Zhen didn't set a time limit, and he only needed to take down Snow City as soon as possible.

"General, I heard that our loucheng is researching a type of space carrier that can transport troops over long distances. I wonder when it will be put into use?"

"It's more comfortable to fly in the sky. Marching on such a road is simply too tiring!"

A young Holy Dragon City officer turned around and asked Tai Seng.

that kind of thing won't be useful in the short term. You don't need to think about it. Just sit in the car!

"I'm fine," Tyson replied casually, but his eyes were fixed on the holographic screen in front of him. He was reading the collected military intelligence and drawing something on the map.

As the commander of the army, he had to know all this information.

Just by looking at the contents of this map, he could understand the Holy Dragon city's battle plan. They were obviously not satisfied with just a small area like the xueman territory.

In truth, Tang Zhen's goal was to directly control the entire Tianji province and make it easier for the following plundering operation.

As for controlling the entire continent, although Tang Zhen had the ability to do so, he simply couldn't manage it. Therefore, he didn't have any plans in this area for the time being.

Moreover, for the current Holy Dragon City, the resources of a province were enough to fill their appetites!

His gaze swept across the map before finally landing on Snow City.

Through the real-time surveillance video sent back by the high-altitude drone, Tai Seng could clearly see that Snow City had been heavily guarded and the city walls were filled with soldiers.

However, using this method to defend the city against the Holy Dragon City was simply courting death!

If balguv was smart enough to split up all his soldiers and launch a surprise attack in the city buildings and forests, it might bring him some trouble.

But now?

...

It was estimated that after this wave of attack, the walls of Snow City would turn blood red!

Just as Tai Seng was deep in thought, a series of rapid gunshots suddenly came from the front, causing him to frown slightly.

why are there gunshots? what happened? ”

Following Tai Seng’s inquiry, a soldier quickly reported back that the team that was clearing the way had been ambushed by native cultivators. There were about a hundred of them, and they had been wiped out!

“What’s the background of this native cultivator?”

Tai Seng’s brows raised as he asked in a deep voice.

according to the items collected from the corpses, these ambushers should be believers of some native God. They were very crazy in battle!

alright! Tai Seng nodded and his face returned to its usual cold and indifferent look.

The followers of these indigenous gods were the primary targets of the Holy Dragon city’s vigilance. Compared to the indigenous forces, they were more stubborn and difficult to deal with. With the support and instigation of the gods behind them, they could do anything crazy.

The Holy Dragon city’s goal was to collect the world’s origin and hunt down the indigenous gods. In the future, they would have to deal with these believers, and it would be the kind that would see blood!

stay alert and speed up. I’ll reach Snow City by tomorrow morning!

...

Following Tai Seng’s orders, the speed of the Army increased once more as they approached their destination!

### [Chapter 1013](#)

1013 The Army arrives at the city gates (1)

After picking up the bottle that the Aboriginal youth had thrown away, the two Holy Dragon City cultivators lifted him up and returned to the flying device.

A strong gust of air shot out as the aircraft quickly left the ground and headed in the direction of hewang village.

The flying device was extremely fast. It did not take long for it to approach the Holy Dragon City, which was suspended in the air.

As it neared Holy Dragon City, the aircraft began to slow down. It turned around and flew towards a huge spiral arm.

As the aircraft approached, a passage slowly appeared on the metal arm. The aircraft directly entered it and parked in a spacious space.

The space inside the spiral arms was brightly lit, with many similar flying devices parked there. From time to time, the figures of Holy Dragon City soldiers would appear.

These Holy Dragon City warriors working inside the warship tower did not wear standard battle armor. Instead, they wore the same black battle suit, looking sharp and alert.

As the aircraft's hatch opened, a group of Holy Dragon City Warriors walked out, including the two Holy Dragon City cultivators who had captured the indigenous youth.

That Aboriginal youth was currently being held in the hands of a Holy Dragon City cultivator.

"How is it? how does it feel to fly in the sky of another world?"

The Holy Dragon city's soldiers waiting outside greeted the Holy Dragon city's residents who had come down from the aircraft.

"Not bad, but it's a pity that I didn't have enough fun!"

The pilots in charge of operating the aircraft were two young Holy Dragon City residents. After hearing their comrade's question, they smiled and replied.

"Don't worry, you'll have plenty of chances to fly in the future. I'm sure you'll feel like puking from all the flying!"

After everyone exchanged a few words with each other, they got busy.

The two Holy Dragon City cultivators jumped onto a small cart and began to follow the path in the spiral arms, heading towards the center of the warship tower.

Along the way, there were many sci-fi objects, but most of them were just decorations.

Thanks to the magical ability of the world of loucheng, Tang Zhen didn't have to spend too much effort to obtain a super warship and make major changes to it.

However, due to the lack of energy and technology, what he had was actually just the empty shell of a super warship. So far, he could only use some of the basic functions of the Super warship.

As for the terobo people's superweapons and the energy source for these energy weapons, the tower would not appear on its own. Tang Zhen would have to find it himself!

In other words, although Tang Zhen possessed a super warship, he was unable to unleash its true power. At best, it could only be considered a means of transportation or a living space!

But even so, the value of this warship tower was still immeasurable!

The two Holy Dragon City cultivators driving the small cart finally arrived at the central area of the warship city after passing through several areas.

Picking up the unconscious Aboriginal youth, the two of them walked towards an arched door not far away. Very quickly, they encountered two Holy Dragon City residents in white coats.

“This is the guy you wanted. I’ll hand him over to you now!”

As he spoke, the Holy Dragon City cultivator handed over the Aboriginal youth in his hands, then turned around and left with his companions.

Two Holy Dragon City residents who looked like researchers immediately brought the young man to a room. They first injected him with a type of medicine, then stripped him clean and sent him to a room filled with various instruments.

Dozens of Holy Dragon City residents, who were dressed similarly, were already waiting in the room, their eyes shining as they looked at the unconscious Indigenous youth.

Most of these Holy Dragon City residents were experts and scholars from the original world, and some of them were even top-notch existences.

However, they were all attracted by the charm of the other world and took the initiative to apply to become residents of the Holy Dragon City. They took advantage of the unique conditions of the tower world to engage in the research work that they were most passionate about.

All kinds of monsters, otherworldly creatures, and many other strange creatures were the subjects of these residents’ research!

They had come with the invasion of the Otherworld.

The drone in charge of patrolling earlier accidentally discovered The Native Young man who had escaped death and witnessed the whole process of his rescue.

A researcher happened to see the image that was sent back. The method of rapidly repairing the damaged body and recovering physical strength immediately aroused his interest.

The Holy Dragon city’s researchers really wanted to figure out the strange liquid that the indigenous youth had swallowed and the strange changes that had happened to his body. That was why they had entrusted the cultivator team to help bring him back.

In the following time, these researchers who were usually studying the Dragon monsters began to focus their attention on The Native Young man.

In the face of a group of crazy researchers, this native young man would be played by these researchers if he was not careful!

.....

The area in front of Snow City had completely lost all traces of human activity.

In order to avoid being affected by the war that was about to happen, the indigenous residents living outside the city had long hidden far away in the mountains, or directly entered the city.

The soldiers standing on top of the city wall were staring at the movements outside the city, afraid that they would not notice the enemy when they appeared.

Some kind of oppressive aura lingered in the hearts of the city guards, making them look unusually serious.

The soldiers of Snow City felt an inexplicable sense of panic when they thought about the battle with the ten-thousand-man army of the otherworldly demons. They had already seen the powerful war puppets of Holy Dragon City some time ago.

The thought of that terrifying killing scene back then made people feel despair.

However, the number of enemies they were about to face today was countless times more than before!

However, at this moment, the soldiers of Snow City had no way out. Behind them were the battle supervision team, who were full of killing intent. They were on high alert, looking for any possible deserters.

Of course, the most important reason was that their family and friends lived in this city, and they needed to protect them with their lives!

In an area on the city wall, barguv was wearing armor and squinting at the rising sun.

He had been sitting there the entire night, on guard against the Holy Dragon city's surprise attack. Fortunately, the night had passed peacefully, and the Holy Dragon city's Army did not appear.

However, bargof did not let his guard down, because he had already received news that the Holy Dragon Army was less than twenty miles away.

The other party's speed had far exceeded his expectations.

Of course, whether it was one day earlier or one day later, it didn't make any difference to bargof, because he was already prepared for battle!

Before they knew it, the sun had already risen to the top of their heads. A dull roar suddenly came from the road leading to hewang village, echoing in everyone's ears like muffled Thunder.

...

The originally quiet city wall suddenly became restless, and all the soldiers on guard looked nervous.

Bargof's body suddenly rose, and a glimmer of light flashed in his eyes. He stared at the path that disappeared into the valley.

A surge of battle intent also continuously erupted from his body, infecting the surrounding city guards, making their expressions become determined.

"BOOM!"

A series of machine roars erupted as a series of monster-like war chariots suddenly appeared before the eyes of the people from Snow City.

The Army of the otherworldly demons had arrived!

## [Chapter 1014](#)

### 1014 Toying with him (1)

With a roar, the Holy Dragon city's Army finally arrived.

At this moment, the snow-covered city walls were so quiet that one could even hear a pin drop. Everyone's gazes were focused on the Army of otherworldly demons that was gradually revealing their true appearance!

Their hearts trembled, their legs trembled, and their eyes flashed with fear.

Looking at the steel War chariots, roaring war beasts, and the silent black-armored warriors on the plain in front of Snow City, these natives felt like they were being crushed by a mountain.

Even his breathing became irregular.

With just a glance, one could tell that this was definitely a terrifying Army. The killing intent that soared to the sky almost changed the weather!

Seeing the enemy forming a square formation on the plains in front of the city, everyone knew that a battle would break out soon.

In the face of such a powerful opponent, bargov's fighting spirit was boiling. At this moment, it was only a matter of who was more courageous and fearless. Who could finally stand among the corpses and welcome victory with a smile!

With the presence of these 20000 soldiers, the otherworldly demons would not be able to reach the top of the city wall in a short time. Even if they were lucky enough to reach the top, they would have to be covered in corpses!

With a trace of confidence and pride, bargov loudly ordered.

"All troops, get ready to engage in battle!"

As the order was given, all kinds of defensive materials were immediately placed within reach. The archers responsible for long-range attacks and suppression of the enemy also all had sharp arrows in their hands, ready to fire at any time.

The rolling logs and rocks were lifted up with great force and placed tightly on the top of the wall, ready to be pushed down at any time.

The cultivators in armor also looked at the enemies in black armor with serious expressions. After vaguely judging the strength of these Holy Dragon City Warriors, they were terrified and their eyes were extremely serious.

Looking at this tense scene, it seemed like a bloody battle was about to break out!

However, just as the defending troops of the city were prepared to fight to the death, the Holy Dragon Army below the city did not attack the city directly. Instead, they sent a chariot to approach the city walls.

A Holy Dragon City cultivator stood proudly at the front of the carriage, scanning the guards on the city wall with a scrutinizing gaze. A disdainful smile appeared on the corner of his mouth.

you want to resist Holy Dragon City with this kind of defensive method? what a joke!

When they were less than an Arrow's distance away from the city wall, the chariot slowly came to a stop. Then, the Holy Dragon City cultivator's feet stepped on the air, and his body actually rose directly into the air!

Seeing this, the soldiers of Snow City turned pale with fright, while the cultivators who were guarding the city looked gloomy.

The fact that the other party was able to do this proved that his cultivation level was enough to crush all the cultivators in Snow City.

This was because he had clearly surpassed the realm of ordinary cultivators and had entered a powerful existence on another level!

It was extremely difficult to overcome this cultivation shackle. Without a heaven-defying native cultivator like Lou Cheng, very few people could reach this level!

There were only a handful of such experts on the continent of timriel, and most of them were in seclusion!

some native cultivators even called some of the high-level native lord cultivators 'saints'!

Looking at the Holy Dragon City cultivators floating in the air, many cultivators 'eyes were filled with fear. They secretly guessed how many such experts there were in the alien demon race.

If there were eight or ten of them, there would not be much meaning in the battle to defend the city, because these feudal lord experts alone would be able to break open the city gate!

Just as these natives were secretly guessing the Holy Dragon city's high-end combat power, the Holy Dragon City Lord also slowly spoke.

"I'm a feudal lord cultivator from the Holy Dragon city's 1st Army's 1st Army. On behalf of our general Tai Seng, I'm here to pass on a message to Lord balguv.

I'm sure you know the Holy Dragon city's strength better than anyone else, so it's best that you don't make any unnecessary struggles and obediently surrender with your soldiers, so that they don't lose their lives in vain.

My Holy Dragon City can also guarantee that we won't seek revenge on you. It's up to you to choose whether you want to stay or leave!"

At this point, the Holy Dragon City Lord looked at the native soldiers on the city wall with a complicated expression and said in a cold tone, "However, if you insist on going the wrong way and plan to fight to the end, don't blame Holy Dragon City for being merciless!"

"Lord balguv, please tell me your answer now!"

Bargof, who was protected by the native cultivators on the city wall, sneered and said in a straightforward tone, "Listen up, you otherworldly demons. Snow City is my home, and it is also the place that all the soldiers of Snow City have sworn to protect with their lives. If you want to occupy this place, you will have to step over our dead bodies.

Enough nonsense, let's fight to the death!"

Bargof did not want to hand over Snow City to anyone, and he had reinforcements to rely on. Naturally, he would not choose to surrender at this time!

"There is no coward in Snow City. We will never bow to the demon race!"

As soon as Bargof's words fell, a guard beside him immediately encouraged loudly, "Protect the city of snow and fight to the death with the otherworldly demons!"

When the soldiers of Snow City heard this, they all echoed, and their roars became more and more uniform.

In the orderly and majestic roars, the fear in the eyes of the city guards gradually disappeared, and at the same time, it was replaced by determination and a will to die.

"Fight to the death with the otherworldly demons!"

"A battle to the death!"

"A battle to the death!"

People were all blindly obedient. At this time, with the shouts all day long, those originally hesitant city guards were also infected, and the idea of fighting to the death was born.

Seeing that the morale of the defending troops of the city of snow had been successfully ignited, Bargof laughed smugly and looked coldly at the Lord of the Holy Dragon City.

In the end, the other party scoffed and turned back to the Holy Dragon city's camp.

We've already done enough to save face, and since Snow City is looking for death, don't blame us for being ruthless!

As the Holy Dragon City Lord turned around, everyone knew that the battle was about to begin, and they began to feel nervous.

Their eyes were fixed on the Holy Dragon city's camp, waiting for the enemy to approach. Then, they would use the weapons in their hands to kill these otherworldly demons who dared to offend Snow City!

However, under the anticipating gazes of the soldiers from Snow City, no soldiers appeared to attack the city. Instead, a dozen fierce-looking metal chariots slowly drove out from the enemy's camp.

He aimed the city wall at the section of the city wall where Bargof had stopped. Then, the Holy Dragon City soldiers pressed the buttons on the chariots at the same time, their faces filled with ridicule.

"Bang Bang Bang!"

A series of muffled sounds rang out, followed by a series of cannonballs being fired from the cannons on the chariots, heading straight for the city walls.

...

Looking at the objects flying towards them with faint green smoke trailing behind them, the guards of Snow City were suspicious. Could they be some kind of catapults?

However, if they were to rely on such crude weapons to attack the city, they would be looking down on Snow City. After all, the city walls were made of huge stones. What could a dozen metal balls do?

Or perhaps this wasn't a catapult, but a special weapon of the otherworldly demons?

Thinking of this, everyone's heart trembled, and bargov roared as he dodged.

However, the dozen or so objects had already landed on the city wall in the blink of an eye.

"BOOM!"

Suddenly, a series of explosions rang out, and those objects instantly exploded into countless fragments. Countless tiny steel balls shot out in all directions.

A series of screams rang out at the same time. The originally dense snow-covered city wall immediately fell with the bombs as the center.

The bodies of the soldiers of Snow City who were hit by the attack were filled with bloody holes. It was a ghastly sight!

With just one wave of attacks, wails could be heard from the walls of the city as the entire area was cleared!

Seeing this scene, balguv's heart suddenly beat wildly!

...

## [Chapter 1015](#)

1015 Breaking through the city

"Come and save me, I'm going to die!"

"My eyes, oh, oh"

help me stop the bleeding. I beg you, I don't want to die yet!

After the explosion, snow covered the top of the city wall. Wails of pain rose one after another. Those who were lucky enough to survive were all rolling and struggling on the ground, blood constantly oozing out of the fine wounds on their bodies.

There were not many unlucky people who died directly from the explosion, but a large number of injured people were lying everywhere.

Their miserable state and wails completely disturbed the mood of the soldiers guarding the city. Panic flashed on their faces from time to time!

damn it, what are you waiting for? immediately carry them down and treat them!

An officer of Snow City saw this and immediately ordered people to carry the injured away. This was to prevent the city guards from being affected and avoiding the battle.

Upon hearing the order from the commander, a group of soldiers immediately rushed forward, stepped on the blood-stained ground, and brought the wailing soldiers into the city.

The city guards at the side all watched this scene in silence, swallowing their saliva with difficulty from time to time.

From the beginning to the end, bargov did not speak, only coldly looking at the Holy Dragon City Army below the city wall.

After firing a dozen strange bombs, the enemy did not continue to attack. Instead, they observed the scene on the city wall as if they were watching a show.

From the other party's eyes and actions, bargov saw a kind of teasing and contempt.

It was obvious that the otherworldly demon Army didn't take him seriously at all. Otherwise, they wouldn't have used such a child's play attitude to deal with a war that was destined to be a bloody one!

Perhaps in the hearts of these otherworldly demons, Snow City was the one who was bleeding?

A hint of understanding flashed in bargov's heart, but it was soon drowned by a sense of humiliation. He looked at the Holy Dragon city's camp with killing intent.

It's impolite not to reciprocate. Since you treat this war like child's play, I'll let you know my methods and make you regret it!

After coldly harrumphing and giving the order, the soldiers of Snow City began to Nock the ten or so defensive weapons on the city walls. At the same time, sealed ceramic containers were carefully placed on top of them.

don't think that I can't do anything to you just because you don't attack the city. Let's see how you can resist this poisonous smoke potion!

Balgov sneered in his heart. He imagined the terrible state of the bone-corroding poisonous smoke when it spread through the Holy Dragon City Camp, and a cold smile appeared on his face.

"Fire!"

Following the command of the commander of the city, the city's defensive weapons were activated at the same time. A huge force shot out the earthen jars and they flew into the air.

However, just as the soldiers of the city of snow were staring at the jars and containers, waiting for them to land on the enemy's side, a dozen blinding rays of light suddenly shot out from the Holy Dragon city's camp, accurately landing on the containers.

Seeing this, all the soldiers of Snow City were shocked.

"Pa pa pa!"

A series of crisp sounds rang out, and under the horrified gazes of the guards on the city wall, the jars that had just been shot out exploded. The dark green liquid splashed down on the city wall, leaving a trail of smoke.

The soldiers of Snow City nearby wailed and fled in all directions. The people on the city wall were immediately thrown off their feet and the city was in complete chaos.

“Quick, block this poison!”

With a series of angry roars, the mages on the city wall quickly cast spells to burn or blow away the venom to prevent it from falling on the city wall.

He also used all kinds of defensive methods to prevent the poison from touching his body.

Even so, more than half of the poison still landed on the ground and on the bodies of the snow city’s soldiers. As the poison corroded them rapidly, a large amount of terrifying green poisonous smoke rose and spread above the city walls like smoke from a war.

Anyone who accidentally breathed in the poisonous smoke or had their skin touched by it immediately started frothing at the mouth. They kept letting out tragic howls and soon stopped breathing!

This scene was extremely miserable, and the wailing sounds made people’s faces change!

Tai Seng, who was sitting in the car, also saw this scene, and a trace of shock appeared on his originally cold face.

what a powerful poison! It’s comparable to a biological weapon!

Tai Seng shook his head and sighed. At the same time, a trace of disdain flashed across his eyes.

If they really wanted to compete with this kind of weapon, the Holy Dragon city’s reserves would make bargof regret to the point of turning green in his intestines. It was just that he was afraid of losing control, so he would not use it easily.

Moreover, with Tai Seng’s personality, he would not even bother to use such a sinister weapon.

Looking at the chaotic snow-covered city wall, Tai Seng no longer had any interest in teasing these natives. He waved his hand at the officer beside him.

Seeing this, the other party immediately nodded and decisively gave the order to attack.

aim the cannons at the city wall in front of us and fire!

Several tanks that had been silent all this time suddenly raised their carriages at the back, revealing a dense number of gun barrels. They were actually weapons similar to rocket cannons.

With a series of explosions, smoke-filled bombs were quickly thrown at the snow-covered city wall, causing a series of loud explosions.

Under the despairing eyes of the soldiers of Snow City, this section of the city wall had become a hell of death. Other than the broken pieces of flesh and blood, there was not a single living thing left!

“Attack!”

With another command, the 50 huge armed robots began to advance rapidly, heading straight for the gates of Snow City.

A series of bullets were fired from the robot's gun, directly killing the soldiers of Snow City who tried to fight back. They were so crushed that they could not even lift their heads.

Behind the armed robots were the Holy Dragon city's chariots, as well as the Holy Dragon city's soldiers, who followed closely with their guns raised.

One by one, the warbeasts roared and growled as they slowly advanced under the control of their Masters.

Above the ground forces, a number of unmanned attack aircraft rose directly from the transport vehicles, circling in the air and shooting at the enemies who were still resisting.

The Holy Dragon city's attack range covered both the sky and the ground. It was like a Black Tide of death, constantly approaching Snow City!

Seeing this shocking scene, balgub was about to go crazy. He waved the sword in his hand and shouted for the soldiers to rush forward to stop him.

However, under the Holy Dragon city's precise and concentrated attacks, no matter how many people charged forward, be it soldiers or cultivators, they were quickly drowned in the rain of bullets.

...

The corpses on the city wall were piled up like mountains, and the blood had already formed a rolling stream that was flowing down the drain on the city wall!

Under such a brutal and Swift attack, the soldiers of Snow City could only hold on for a short while before they completely collapsed.

They wailed and threw down their weapons, swarming down from the city walls and began to flee in all directions!

"BOOM!"

With a muffled sound, the city gate of the city collapsed. The figure of an armed robot stepped into the city from the dust.

Two Holy Dragon City soldiers squatted on the shoulders of the armed robots, coldly looking at the soldiers of the city of snow who were trying to use their bows to launch a sneak attack. Without hesitation, they pulled the trigger.

Following a series of gunshots, the guards at the city gate were cleared out.

The Holy Dragon city's soldiers were like a tide, quickly swarming into the ancient city, and began to search for the enemy who refused to surrender!

Seeing this from a distance, balgub let out a long sigh with an unwilling face and entered the alley.

Snow City, broken!

...

## [Chapter 1016](#)

### 1016 The ransom

The sound of gunfire gradually became sparse until it could no longer be heard.

Smoke rose from the snow-covered city, and the smell of blood lingered for a long time. A large number of corpses were piled up here.

A rough count showed that at least 3000 soldiers of Snow City had lost their lives on the city wall!

This siege battle was very short. From the launch of the attack to the charge into the city, it only took a few minutes.

In the face of such backward cold weapon fortifications, the Holy Dragon city's high-tech weapons were completely overwhelming. They broke through the enemy's line of defense in an instant and scared them out of their wits. They no longer dared to resist!

With bargof's escape, the remaining 10000 or so soldiers of Snow City immediately fell into chaos. They either hid in the city, their hearts filled with fear.

They could either continue to put up a stubborn resistance and be killed by the Holy Dragon city's soldiers, or be captured.

As for the soldiers of Snow City who threw away their weapons and surrendered, or took off their clothes to disguise themselves as civilians, there were countless of them.

However, as long as they were well-behaved and did not cause trouble, the Holy Dragon City would not pay attention to them for the time being. At most, they would be subdued immediately after encountering them and would not be shot to death easily.

As the Holy Dragon city's soldiers swept through the streets, from time to time, there would be soldiers from Snow City, whose hands and feet were tied up with specially made straps, being thrown on the side of the road, and let them roll and struggle on the ground.

However, in the face of the calls for help from the soldiers of Snow City, the residents of Snow City only hid behind the door and looked on coldly. No one dared to come forward to help.

Because in the sky above them, the unmanned attack aircraft were constantly circling. From time to time, Holy Dragon city's chariots would roar past.

After a while, the soldiers of Snow City were thrown onto the chariots and sent directly to the temporary prisoner of war camp in the city.

Other than the ordinary soldiers, the nobles of Snow City who had participated in the battle were all hiding in their own homes, as if the end of the world had arrived.

Men, women, old, and young, all of them took out their weapons, preparing for the worst to happen and making a final struggle.

Even if they weren't a match for the professional soldiers, they still had to fight to the death!

Although they were prepared to die, their faces were still filled with despair and grief. Their hands and feet were constantly trembling.

Death could come at any time, how many people could face it calmly?

The brawny man, who had once gone to the tavern to drink and was very dissatisfied with bargov, was now wearing a battle armor stained with blood and minced meat, standing in the courtyard with a serious expression.

"Everyone, get ready. If the otherworldly demons want to kill us, we can't let them kill us!

Even if we die, the Zhan Kuang clan will definitely die in battle!"

Hearing the brawny man's low growl, everyone nodded their heads, their faces showing determination.

"Bang!"

With a muffled sound, the main door of Zhan Kuang clan was kicked open, and broken wood flew in all directions.

One after another, muscular figures appeared, and black muzzles were pointed at the panicked crowd. Although their faces were blocked by black helmets, the crowd could still feel the cold gazes on the weapons in their hands.

The moment there was any abnormality, the other party would launch an attack without hesitation!

Looking at the Holy Dragon city's soldiers in black armor, carrying sabers and rifles, some women and children began to cry, and sat limply on the ground.

As the head of the family, the brawny man stood up and looked at the Holy Dragon City soldier in front of him. "Among these people, only me and a dozen clansmen participated in the battle to defend the city.

We're willing to accept the punishment, but please let the women and children go!"

Glancing at the armed robot standing outside the door, the brawny man dropped the weapon in his hand and half-knelt on the ground with his head lowered. This was an action of letting the other party do whatever they wanted.

The family Warriors behind him also threw down their weapons and half-knelt behind the family head!

A series of footsteps could be heard, and a Holy Dragon City cultivator walked in.

He looked at the scene in the courtyard and snorted coldly, "clan leader of the battle fanatic clan, you have been convicted for assisting bargov in the battle!

The battle fanatic tribe leader, who was half-kneeling on the ground, trembled a little when he heard this, but he did not argue.

The rules were set by the winner, and he knew that no matter how he tried to explain, it would be useless. If the otherworldly demons wanted to kill him, they didn't need any excuse!

The Holy Dragon City cultivator nodded and continued, " however, because you did not cause any damage to Holy Dragon City, we decided to give you a lighter sentence. You can pay a ransom to atone for your crimes and the crimes of your clansmen!

When the battle fanatic tribe leader heard this, his eyes flashed with a hint of surprise. He raised his head and asked, " Then please tell me, how many gold coins do I need to pay?"

At this moment, the battle fanatic tribe leader was already prepared to bleed.

"We don't want gold coins, we only want soul stones. You have to pay 200 soul stones within the stipulated time limit, and your sin will be erased.

If you don't pay on time, you should know the consequences!"

After saying this, the Holy Dragon City cultivator turned around and walked out of the courtyard, heading to the next house of a noble in Snow City.

He still had a lot of work to do in the following days!

Seeing the Holy Dragon city's soldiers leave with their imposing auras, all the battle fanatics looked at each other, feeling pleasantly surprised as if they had just escaped death.

The battle maniac clan leader stood up from the ground and lowered his head in deep thought for a moment. He then turned to look at an old man beside him.

"How many soul stones do we have left in our treasure vault?"

When the old man heard this, he immediately replied, " soul stones of various sizes, a total of more than 300!

The battle fanatic nodded his head lightly.

take out all the soul stones and give them to the heavenly demonic tribe. Don't leave a single one!

Since the heavenly demonic tribe wanted this kind of Soul Stone, he might as well hand over all of his collection and maybe they would look up to him.

Perhaps the heavenly demonic clan didn't lack soul stones, but it was enough for them to know the attitude of Zhan Kuang's clan!

The battle fanatic tribe leader, who had witnessed the terrifying strength of the Holy Dragon City, no longer had any expectations for the reinforcements and Demon Slayer Army. He even had thoughts of joining the Holy Dragon City.

Following such a powerful master, the Zhan Kuang clan would definitely gain huge benefits.

However, this matter was related to the life and death of Zhan Kuang's clan, and he definitely couldn't make a rash decision. He still had to look at the situation first!

...

Just as the battle maniac tribe leader was secretly rejoicing over his escape to death and pondering how he could gain benefits from Holy Dragon City, a mixture of sadness and joy was playing out in the noble families of Snow City.

They originally thought that they would not be able to escape death and torture, but who would have thought that the Holy Dragon City would propose such a way of atonement, which made the dignitaries overjoyed.

In the end, after the Holy Dragon City cultivators left, these dignitaries immediately rummaged through their boxes and cabinets and began to collect the soul stones needed for the ransom.

If they did not have any at home or did not have enough reserves, they would immediately take a large amount of gold coins and start to buy things in private after being allowed to go on the streets in Holy Dragon City.

In just one night, the price of soul stones in Snow City had increased by several times, and there was still a demand but no supply!

This was because all the soul stones had been taken away by the otherworldly demons. They had even taken out carts of shiny gold coins to purchase all kinds of soul stones at a high price!

The Holy Dragon City had also issued an ultimatum to the nobles of Snow City who had not paid the ransom. If they did not pay the ransom in time, it was not impossible for their families to be exterminated!

The nobles of the city had no choice but to use messenger birds to ask their friends and relatives from other territories to help them collect soul stones and send them to the city.

It didn't take long for the news of the exorbitant price of soul stones in Snow City to spread, attracting the attention of countless people.

Some of the more daring adventurers, driven by profit, did not care whether the place was occupied by the otherworldly demons or not. They all took the soul stones they had collected and headed to Snow City.

In the end, when they returned, every adventurer had made a fortune!

...

This situation of getting rich overnight also caused more and more adventurers to take action quickly and participate in the ranks of collecting soul stones.

All sorts of ruins, caves, and secret realms were filled with adventurers searching for soul stones.

Of course, these things would happen in the future.

The current Snow City was not much different from before, other than the destruction of many places and the change of ruler.

Because of the Holy Dragon city's generosity, this city that had experienced chaos and war quickly regained its original vitality, and even became more lively!

## [Chapter 1017](#)

### 1017 Hesitating\_1

Just as the Holy Dragon city's Army had easily taken down Snow City, the entire process of the battle was quickly collected and organized, and sent to the various native forces on the continent.

The Holy Dragon city's first battle was too amazing. That kind of close-range crushing process and unparalleled strength would definitely give these native forces great pressure!

Whether to be enemies with the Holy Dragon City or not to invade each other, these native forces had to make a choice.

After all, with such strength, the Holy Dragon City would definitely not defend a small area. Who knew when they would wake up one day, the Holy Dragon City would already be at their doorstep!

About three days' journey from Snow City, there was a plain in the valley, and a large number of tents were set up.

There were so many tents that it was as if they could not be seen at the end. They completely occupied the plain between the valleys.

Warriors and cultivators of different races were moving back and forth in this camp. Because they were subordinates of different Lords, the boundaries between camps were very obvious.

Even if they were facing the same enemy, these generals from various cities in the Tianji province would never hand over their soldiers to someone else to command and then turn themselves into mere decorations!

The feudal lords of the Tianji province had different attitudes toward how to deal with the matter of the otherworldly demons. Their opinions also directly affected the generals under them, which caused internal disputes to arise in the feudal Lord's Allied army.

At this moment, in a huge tent, the generals from various native forces were gathered together to discuss military intelligence.

As soon as Snow city was captured by the otherworldly demons, a messenger bird had sent the news here, which immediately caused a great uproar.

The generals of the native forces felt a headache coming on when they saw the otherworldly demons taking down Snow City so quickly. Their expressions turned extremely ugly.

After receiving bargov's request for help, they had already made preparations to send reinforcements. After all, Snow City was the first fortress to face the otherworldly demons, and they couldn't afford to lose it in the short term!

The native forces would also use this as a barrier to fight against the otherworldly demons.

Although some information about the extraterrestrial demon race had fallen into the hands of these native forces during this period of time, the Lords' Alliance Army still did not pay enough attention to them while they were amazed by their strength and methods.

Their Allied forces were only unable to refuse the orders of the Empire and the requests of a large number of influential believers of God, so they had no choice but to send troops.

In the eyes of some native generals, even though the alien demons had attracted the oracles of the native gods, they were still no match for the entire continent. They would probably be killed and driven away soon!

However, up until now, no one had ever engaged in a large-scale battle with the otherworldly demons, so they were still unclear about their true strength.

In that case, the battlefield in Snow City, which was facing the otherworldly demons, was the best opportunity to understand the situation.

Therefore, this Army, which was composed of troops dispatched by various feudal lords of Tianji province, did not set off immediately after receiving the letter for help. Instead, they deliberately slowed down their pace and waited for Snow City to fight with the otherworldly demons.

The Alliance Army's thoughts were simple. They wanted to let bargov and the otherworldly demons fight first. After understanding the other party's trump cards and tactics, the Lords' Alliance Army would promptly intervene in the battle.

This way, not only would they have a better understanding of their enemies, but they could also launch a pincer attack on the otherworldly demons!

After the siege crisis was resolved, the Allied forces could easily control bargov, or even imprison him directly, and completely control Snow City!

After all, Lord xueman, who had gone through a brutal battle to defend the city, would definitely lose a lot of soldiers and her strength would be greatly reduced. By then, she would no longer be a threat to the Alliance Army and could only obediently submit.

The Alliance generals' calculations were very accurate, but things developed far beyond their expectations. Bargov didn't even last a day and was completely defeated!

Was the enemy too powerful, or was bargov too incompetent?

The Alliance Army's generals had gloomy expressions. They scolded bargov for being useless while reading the latest information. However, the more they read, the gloomier their expressions became.

The Holy Dragon city's soldiers' powerful individual strength, excellent weapons, and powerful war puppets all made the Allied Army's generals shudder with fear.

With such a luxurious setup and over ten thousand people, it wasn't surprising that Snow City had fallen in such a short time.

No one felt sorry for bargov. Even the Lords behind some of the Allied generals had always regarded bargov as a thorn in their side and hoped that he would be killed as soon as possible!

However, to the Lords' Allied army, the defeat of bargov would add a lot of variables to the next battle.

If the otherworldly demons, who were already very powerful, relied on Snow City to resist the Alliance Army, then they, who had traveled all the way here, would most likely encounter an extremely awkward situation.

After all, this Alliance Army had a large number of people, and supplies were definitely a big problem. And Snow City happened to be the place they planned to replenish their supplies.

Now, this supply point had become the enemy's lair.

As long as the otherworldly demonic tribe could defend the city, the feudal lords' Allied army would not be able to reach River View Village and launch an attack on that damned floating island!

What seemed like an easy battle had become complicated.

For a moment, the entire camp was filled with the Alliance generals frowning as they thought about their next move.

In fact, there were only two paths in front of them. The first was to continue moving forward and fight to the death with the otherworldly demons who had taken over Snow City without any reinforcements or supplies!

However, according to the information they had at hand, if they fought with the otherworldly demons, they might not gain any advantage. They might even suffer huge losses.

This kind of battle result was naturally not the result that the Tianji province Lords, who had been ordered to suppress the otherworldly demons but had decided not to put in any effort, wanted.

The generals who were leading the troops also did not want to suffer defeat.

Therefore, no one present would agree to this decision. Even though the Empire's special envoy was jumping up and down, forcing them to send troops immediately, no one paid any attention.

As for the second option, they could stay put and wait for the Empire's Army and the demon Slayer Army to arrive. Then, they could all attack Snow City together!

According to the intelligence, the Empire had sent a total of nearly 100000 soldiers, all of which were elites that had been recruited in a short time. Their combat power was naturally higher than that of the Lords' Allied forces.

They were the main force in the battle against the otherworldly demons, while the other troops were only assisting in the battle!

It was said that the total number of Demon Slayer legions had exceeded 500000, and the number was still increasing like a rolling snowball.

Because of the appearance of the indigenous gods, countless fanatical believers responded to the call and abandoned all others to participate in the ranks of the demon slaying. Their morale was terrifyingly high!

It was just that although these believers were a mix of good and bad, they expanded the number of Demon Slayer Legion, but their combat power did not dare to let people have too much expectations.

No one expected these demon slayers, made up of farmers, merchants, and people from all walks of life, to be the main force on the battlefield.

&Nbsp; but then again, even if 500000 pigs charged together, it would be enough to trample the otherworldly demons to death!

It was precisely because of this powerful reinforcement that the generals of the Tianji province's Allied army were not too afraid of the otherworldly demons, even though they were afraid of their strength.

In the tent, the discussion was still ongoing.

After discussing for a long time, no one could come up with a clear plan to decide if they should continue to advance towards Snow City.

...

After all, no one would be stupid enough to do such a thankless thing. Even if it was an order from the Empire and there were special envoys from the Empire in the Army, they couldn't change the decisions of these Lords and generals.

The Empire's special envoy was fuming with anger, but he was helpless. He could only leave the tent in hatred and try to put pressure on these Lords and generals through other means.

The generals of the Lords 'Alliance Army looked at the back of the envoy with a cold smile.

Ever since they had lost to the high Elves and signed the Platinum treaty, the Empire's influence had weakened. Even the generals of the Tianji province Lords no longer took the Empire's orders seriously.

Of course, he still had to put on a show on the surface!

However, just as everyone was rejoicing over the fact that they had angered the Empire's special envoy and did not have to take the lead in fighting the otherworldly demons, a wave of exclamations suddenly came from outside.

This was an explosion!

All the generals 'expressions changed. They quickly rushed out of their tents and came to the open space outside.

Then, they opened their mouths wide and stared at the sky with bewilderment in their eyes!

## [Chapter 1018](#)

### 1018 Air strike (1)

The sky above the Lord's Alliance Army was quickly covered by a shadow.

As far as the eye could see, a large number of strangely shaped flying objects, reflecting the cold light of metal, were rapidly flying toward the Alliance camp.

There were so many of them that when they gathered together, they looked like dark clouds, covering the sky and earth!

No one had ever seen such a flying object, nor did they know its exact origin, but everyone knew that its appearance was definitely not a good thing.

Subconsciously, all the Allied soldiers were on guard.

However, the Alliance generals who had just read the intelligence immediately thought of something, and their faces turned pale.

damn it! That's the flying battle puppet of the heavenly demon race!

The entire camp immediately became chaotic following the angry roars of these generals. The soldiers of the Allied army who had long heard of the heavenly demon race were at a loss.

In the face of the sudden appearance of an enemy in the sky, they did not know what to do for a moment.

Some of the soldiers took out their bows and arrows in a panic and shot at the drones that flew past them. However, the arrows could not touch the drones that were more than a thousand meters in the air.

On the other hand, the short Spears thrown by the cultivators successfully flew to this height, but they were easily dodged by the drones.

Faced with the attack drones that had completely covered the sky, everyone felt a sense of powerlessness from the bottom of their hearts.

"Why are you in a daze? hurry up and Dodge!"

Although they didn't know the combat methods of these drones, they had a great advantage from the high ground. Throwing rocks from this height was enough to kill many people.

Therefore, the first thing the generals of the Alliance Army thought of was not to fight back in vain, but to find a place to hide from the possible attacks.

However, in such a chaotic situation, the order couldn't be conveyed effectively because almost all the soldiers of the Alliance Army were looking up at the sky.

It was also at this moment that the unmanned attack aircraft that passed by in the air suddenly began to turn back and dive like a ribbon.

They dragged a long line and roared as they charged towards the Allied camp on the ground, getting closer and closer to the ground.

A red light began to flash on the head of the attack aircraft, which was the precursor to the attack.

In just an instant, the entire camp on the ground was divided into areas for bombardment. Then, one after another, miniature missiles were detached from the attack aircraft and shot toward the ground with a trail of flames.

In the entire sky, white lines immediately flew across like a dense meteor shower, covering the entire Alliance camp.

Before the Allied forces soldiers could recover from their shock, a series of shocking explosions rang out. Balls of flames rose into the air, carrying broken limbs that flew up and then fell heavily.

The bodies of countless Allied soldiers were blown into the sky by the shock waves of the explosion. When they fell, they had already become lifeless corpses.

Under the effects of the high temperature and shock waves, the clothes of the corpses were torn to pieces. Their bodies were completely naked, covered in pitch-black traces of smoke and fire, looking extremely miserable.

Under the concentrated attacks, the loud explosions seemed to be everywhere, making it impossible to distinguish North, South, East, and West.

The panicking soldiers could only run and flee in a disorderly manner, but they felt that there was a dead end everywhere. This feeling was really hopeless.

During this period, the number of Allied soldiers who were accidentally trampled was not much less than the number of soldiers who died in the bombing!

However, the disaster was not over yet, because the unmanned attack aircraft that had fired the missiles began to fire again!

Under the remote control of the Holy Dragon City soldiers, they quickly arranged themselves in a V-shaped formation. As they whizzed past, they continuously fired dense metal cannonballs at the living targets on the ground.

Compared to the intimidating effect of the explosion, this kind of bullet screen shooting was obviously faster and crueler!

As these drones flew past, the ground was immediately covered with broken bodies. The tide of death was like dominoes that were pushed forward, constantly pushing forward.

A thick layer of blood mist rose rapidly from the ground as the drone advanced.

The area of the plains was not small, and the unmanned attack aircraft could not cover the entire camp. Therefore, only the central area where the most people were gathered was plowed out like a hurricane, creating an extremely tragic bloody tunnel!

This hellish scene scared all the survivors. They screamed in fear and ran in the smoke, cursing and screaming!

Even the generals of the Allied forces didn't have the time to restrain the panicking soldiers at this moment because they were also attacked by missiles and barrage!

By the time they dodged the attack, covered in dust, and looked at the surrounding camp, their hearts suddenly turned cold.

The culprit had already gone far away after the attack, leaving only a reflective afterimage in the air. However, after being ravaged, the Allied camp was now in complete chaos!

The originally neat camp was now full of traces of fire. Broken limbs could be seen everywhere, and there were not many intact tents left.

The soldiers who had yet to recover from the shock were scattered all over the camp, either standing or sitting. They looked extremely disheveled, and no one knew where their weapons had been thrown!

The ground was covered in blood and corpses. There was a passage made of corpses. No one was approaching it at the moment. Countless corpses were spread on the grass and extended far away!

Such a tragic scene was truly unprecedented!

The Alliance army generals looked at each other, their gazes becoming extremely heavy.

The current situation was extremely dangerous. If they didn't take immediate measures to stabilize the crumbling morale of the Army, a large number of deserters would soon appear, and the entire Alliance Army would be crippled!

Temporarily suppressing their fear of the otherworldly demons, the generals of the Allied army quickly dispersed and headed to their respective troops to reorganize the camp and stabilize the morale of the Army.

After seeing their respective generals, the panicked soldiers seemed to have found their backbone and quickly recovered.

According to the orders of the officer, the Allied soldiers cleaned up the bodies and arranged the debris in the camp. They were very busy.

The originally low morale also began to gradually recover.

All the soldiers and generals felt extremely depressed when they saw the corpses being thrown into the pit.

They hadn't even met the otherworldly demons yet, and they had already used such a method to give them a taste of their strength.

The other party's plan had succeeded, and they were truly frightened!

The same thought lingered in everyone's mind. If the battle puppets were already so powerful, how long could they last in a real battle with the otherworldly demons?

The generals of the Allied forces, who had been laughing at bargof's waste, now completely felt bargof's powerlessness. In the face of such a terrifying war machine, they were simply helpless!

If the otherworldly demons launched another similar attack, the entire Alliance Army would collapse. At that time, even the generals of the Alliance Army might not be able to keep their lives!

...

Just as the generals were feeling pained over their losses and gritting their teeth at the otherworldly demons, the soldiers in the distance suddenly began to panic again, and low roars rang out.

damn it! Could it be that the otherworldly demons are attacking again? "

The hearts of the generals of the Allied forces jumped wildly. They quickly looked up at the sky, but they did not see the figures of those flying battle puppets.

What's going on? why are the soldiers panicking?

However, they soon got the answer. A group of cultivators in black armor riding strange warhorses suddenly appeared in front of the camp that had just been attacked!

When they heard the words "black-armored cultivators," all the Alliance generals "eyes burned with anger.

The damned otherworldly demons had actually delivered themselves to his door!

### [Chapter 1019](#)

#### 1019 Warning (1)

The atmosphere in front of the Alliance army camp was extremely heavy.

Looking at the black-armored cultivators who stopped in front of the camp in an orderly manner, they didn't make a single sound, but they gave off a sense of oppression. All the soldiers of the Alliance Army's breathing became heavier.

They put down the bodies of their comrades and pulled out the swords at their waists, ready to fight.

Although the air raid just now had caused heavy losses to the Allied forces, it didn't mean that the soldiers didn't dare to attack the enemies on the ground, even if these black-armored cultivators had extraordinary cultivation.

After all, there were only a few hundred of them, while the Allied forces still had tens of thousands of people even after being attacked by air!

However, what made the soldiers of the Allied forces feel uneasy was that these hundreds of Knights didn't have a trace of fear when facing tens of thousands of people. Under the raised masks, there were only cold and serious faces.

It was as if they were only facing a herd of lambs, and they were bloodthirsty Tigers in the mountains!

The experienced veterans only needed a glance to know that these hundreds of black-armored knights were not to be trifled with. Each of them had hands full of blood!

These were the elites who had gone through hundreds of battles, each of them a killing God who had climbed out of a pile of corpses!

They reminded their comrades not to act rashly. The Alliance soldiers just stared at the other party coldly, waiting for the general to deal with the next matter.

After all, no one wanted to provoke the other party and suffer another hellish attack!

Just as the two sides were in a silent confrontation, the various generals of the Alliance Army rushed over after hearing the news. Their faces were filled with suppressed anger.

This group of damned otherworldly demons had actually delivered themselves to his door at this time. He had to teach them a lesson!

However, when they saw the black-armored knights, a trace of shock flashed in their eyes, and their original thoughts disappeared.

Taking in a deep breath, the generals of the Alliance Army had complicated expressions on their faces, each of them having a headache.

“Why have you come, Sir? please speak!”

A general of the Alliance Army from the city of Riverdale in the Tianji province stood up as a temporary representative and asked the Holy Dragon City cultivators in front of him in a clear voice.

He had no choice but to stand up because the Empire’s special envoy had been blown up in the air raid just now. Even his body was not intact!

After hearing his question, the leading Holy Dragon City cultivator jumped off his warhorse and strode towards the Alliance army camp under the gaze of tens of thousands of people.

It was a middle-aged man with a tall and strong figure. His eyes were as cold as knives, and he exuded a terrifying aura as if he was a demon who had just crawled out of hell!

The black armor he wore made him look even more powerful. The weapons and equipment he had on him also gave people a chill.

“Crack!”

His combat boots broke a branch. The two of them were about ten meters apart when the Holy Dragon City cultivator stopped.

let me introduce myself. My name is Tang nineteen and I am from the Holy Dragon City cavalry. The purpose of my visit is to ask you to withdraw your troops immediately!

The Holy Dragon City cultivator who called himself Tang nineteen said to the general of the Allied forces.

When the general of the Alliance Army heard this, a trace of anger appeared on his face. He sneered, “You launched a sneak attack without declaring war. After letting us experience Holy Dragon city’s strength, you used your power to pressure us and force us to agree to retreat!

You’ve killed so many of our brothers, are you going to just let it go like this?”

Tang nineteen nodded her head lightly. “If you’re not convinced, that’s fine!

If you think that there are not enough dead people, we have other means to ensure that your place will be piled up with corpses like a mountain!”

When the general of the Alliance Army heard this, the anger in his heart grew even more. He laughed in anger, “Your Holy Dragon City sure talks big, but do you think we’ll be afraid?

A warrior’s fate is to die on the battlefield. So, although your means are powerful, you can’t scare everyone!

I have to remind you that Snow City is the territory of our Empire, and we are soldiers of the Empire. If you dare to forcefully occupy the Empire's land, you will definitely suffer the Empire's wrath!"

After a pause, the general seemed to have thought of something and snorted at the Holy Dragon City cultivators. "Your air raid can only show off in an open area. What can you do to me if I enter the forest?"

A look of disdain appeared on Tang nineteen's cold face. She pointed at a forest in the distance.

The general of the Allied forces, as well as the generals and soldiers behind him, all looked at the dense forest subconsciously.

An even larger aircraft suddenly appeared in their line of sight. Under everyone's watchful eyes, it flew over the dense forest and dropped something.

Then, a huge fire Dragon that was a hundred meters long suddenly rose from the dense forest. The flames were even taller than the trees!

Looking at the terrifying flames, everyone subconsciously swallowed a mouthful of saliva. Imagining the scene of being surrounded by fire, they all felt a chill.

so even if you hide in the forest, you still can't escape our attack!

Tang nineteen said in a cold voice as she looked at the shocked general.

Seeing the other party's bitter smile, Tang nineteen added, " "Our existence will not pose a threat to your Overlord's rule. In fact, our city Lord would very much like to cooperate with your Overlord!"

The general of the Alliance Army looked troubled when he heard Tang nineteen's words. After all, he couldn't make the decision to cooperate with the otherworldly demons.

He couldn't even make the decision to withdraw his troops. Even though he had already thought of retreating, he still didn't dare to make a decision on his own.

Tang nineteen knew that the other party could not make the decision, so she waved her hand and a pile of exquisite boxes appeared on the ground.

Seeing the Holy Dragon City cultivators conjuring items out of thin air, all the Alliance army generals were shocked and began to guess the origin of this magical ability.

Tang nineteen ignored the other's probing gaze and pointed at the boxes. "Inside these boxes are gifts from our city Lord to the various Lords. Please help to deliver them!"

The general of the Allied forces glanced at the boxes and slightly nodded.

"Don't worry, I'll definitely deliver it!"

Hearing this, Tang nineteen knocked on his chest armor and saluted the general of the Allied forces. A sinister smile appeared on his face.

"My mission has been completed. Please leave as soon as possible, so that we don't have to fight!

I'll give you a word of advice, don't treat the Holy Dragon city's warning as a joke. Otherwise, I can guarantee that tens of thousands of you will lose your lives here!"

At this point, a cold smile appeared on Tang nineteen's face.

Tang nineteen looked at the general's ugly expression and said in a cold voice, "actually, I hope that you won't listen to my advice. In that case, my men and I can have a good fight!"

...

As soon as she finished speaking, Tang nineteen's body suddenly rose into the air like a big Bird. She let out a series of wild laughter that echoed across the plain.

Seeing this shocking scene, the cultivators in the Alliance Army were all shocked and clenched their fists subconsciously.

As cultivators, they naturally understood what this meant!

The Holy Dragon City was using this method to display their powerful strength and make their opponents fear them, causing them to withdraw from this battle!

However, the other party did indeed have such strength. Otherwise, how could words alone scare these soldiers of the Alliance Army?

Tang nineteen flew back to her horse under the watchful eyes of the crowd.

With an order, all the Holy Dragon City Knights turned their horses around at the same time. Under the gaze of countless people, they galloped quickly into the distance.

## [Chapter 1020](#)

### 1020 The battle situation (1)

The warhorses that the Holy Dragon city's Knights were equipped with were a kind of tamed monster. They were fast and had amazing endurance. They could not be compared to the warhorses of the natives.

After the Knight of the Holy Dragon City turned around and left, it was only a few minutes before he had already left!

Looking at the back of the Holy Dragon city's Knights, the generals of the Lords 'Allied army all had gloomy expressions and did not speak for a long time.

The atmosphere of the entire Allied camp fell into a strange state of silence, as if everyone had become mute in an instant.

Their hearts were filled with confusion, grief, and intense fear and anger!

As the hosts, they were first ambushed and killed by countless companions, and then threatened by the invader face to face. It was easy to imagine how angry they were!

However, they didn't dare to fight back directly, for fear of encountering another terrifying attack like the one before!

A sense of humiliation rose in everyone's hearts. They clenched their fists, their sabers trembled, and their eyes were burning with flames.

However, until the Holy Dragon City cultivators left, no one jumped out to avenge their dead comrades. Instead, they all chose to remain silent.

His anger accumulated to the end, but in the end, it only turned into a helpless sigh.

Looking at the disappointed and fearful faces of the soldiers, the group of Alliance generals were also helpless.

As a general, he couldn't let his emotions affect his decisions and treat the lives of his soldiers as child's play.

Since the Holy Dragon City Knight dared to come to their door directly, he must have something to rely on. This was something that all the generals present were very clear about.

The previous air raid and the demonstration of releasing the fire Dragon had clearly told the generals of the Allied army that the otherworldly demons had long since made sufficient preparations.

Although soldiers were proud of dying on the battlefield, it didn't mean that they were reckless and reckless. In a situation where they knew that they would lose, they still blindly rushed to their deaths!

Those who had such thoughts could not be the general.

Therefore, even if they had a large number of people, in the face of these hundreds of Holy Dragon City Knights, they did not have the courage to pursue them.

If they did that, the consequences would be unpredictable. Who knew if the otherworldly demons would do what they said and launch another terrifying air raid on the entire Alliance army camp?

If they continued to advance, the Holy Dragon City would really massacre the Lords' Allied army!

No one dared to take this risk!

After a while, a general of the Alliance Army finally broke the silence. It was the cultivator who had negotiated with the cultivators of the Holy Dragon City.

He pointed at the metal box on the ground and said to the people with complicated expressions, "These are the items entrusted to you by the otherworldly demons. Please keep them and handle them properly!"

I believe that even if I don't say it, everyone should know that the otherworldly demons are waiting for us with a fierce method. Whether or not they use it will depend on our attitude.

Now that the Alliance Army's morale has collapsed, and the Empire's special envoy has died, the entire Army has lost their leader. Even if we want to continue advancing, we can't effectively command these tens of thousands of troops.

For the sake of the soldiers' safety, I've decided to retreat for the time being. I'll also hand over the items that the otherworldly demon race has sent to the Lord and wait for his opinion on how to deal with them!"

“Everyone, I’ll be taking my leave first!”

As soon as he finished speaking, the general of the Allied forces ordered his men to step forward and lift the metal box marked with the name of the city of torn Valley. He then quickly walked towards the camp he led.

It did not take long for the soldiers from the city of torn Valley to quickly assemble and begin to retreat slowly in the direction they had come from.

The Allied army soldiers under the other Lords all looked at this scene with complicated expressions. It was unknown whether the emotions in their eyes were disdain or envy.

“Damn it, my soldiers are all scared out of their wits. There’s no way we can fight this battle!”

One of the commanders from helm city cursed out, before turning to his own guards and shouting, “what the f \* ck are you waiting for? hurry up and carry the box home!”

Looking at the back of the general, the remaining people looked at each other and shook their heads in unison.

Now that things had come to this, even if they wanted to continue moving forward, the soldiers under them would probably refuse to carry out the order to avoid losing their lives in vain.

Since that was the case, they could only choose to retreat temporarily and wait for the situation to develop!

.....

In the Holy Dragon City, Tang Zhen was standing in a Hall that was filled with a sci-fi atmosphere. He was looking at six huge images that appeared in front of him.

The contents of the real-time image captured by the heavenly eye system were the six enemy forces that could pose a threat to the Holy Dragon City.

At the very front was the Empire’s Army, which numbered close to 100000. They were travelling day and night, heading straight for Snow City.

The members of this Army were basically the Empire’s regular army. They were well-equipped and well-equipped, with a large number of native cultivators.

Although they had lost to the high Elves, it did not mean that the Empire’s military power was weak. Thus, from the current situation, the Empire’s Army posed the greatest threat to the Holy Dragon City.

Tang Zhen would naturally not allow the other party to advance without any resistance. Hence, the plan to stop the Empire’s Army had officially begun. It was estimated that it would not take long for these aggressive Empire’s soldiers to experience the Holy Dragon city’s methods.

Other than the Empire’s Army, there were also the four armies made up of the demon slayers that needed to be paid attention to.

Although they were a mix of good and bad, the total number of them had exceeded 500000, among which were a large number of native cultivators and even believers who had been possessed by the souls of the native gods.

This kind of believer possessed by the divine soul was equivalent to a doppelganger of the indigenous God, and naturally could also use the power of their main body.

In addition, these Aboriginal deities must have some special means, so they could not be underestimated.

The power of faith could make people crazy, but it was also extremely easy to collapse after being hit. Therefore, Tang Zhen would not be polite when he attacked these four Demon Slayer legions. He strived to beat these Motley crowd into a pulp and scare them!

This was destined to be a tragic battle. After all, even 500000 livestock would not be so easy to kill, let alone these fanatical believers of the indigenous gods.

As for the remaining enemy forces, which were the coalition forces put together by the Lords of Tianji province, they were no longer a concern.

After being bombarded by the drones and intimidated by the Holy Dragon City cultivators, even though the Lords 'Alliance Army did not suffer heavy losses, their fighting spirit was on the verge of collapse. They did not dare to fight against the Holy Dragon City for a while.

Moreover, the gifts that Tang Zhen had given to the Tianji province's Lords would also make them seriously consider whether it was wise to make an enemy of the Holy Dragon City!

After this war was over, Holy Dragon city's strength would be known to the world, and no enemy would dare to openly oppose Holy Dragon City.

Then, the next God-slaying plan could be carried out smoothly!

...
