

Alternate 1061

[Chapter 1061](#)

1061 Competition and infighting in the war zone (1)

“What, is it strange that I don’t know about this?”

Tang Zhen coldly looked at the leather-clothed lady. His tone was clearly a little unfriendly.

Those old towers with thousands of years of history more or less knew some of the secrets of the tower world. In this aspect, the Holy Dragon City could not be compared to them.

Even though Tang Zhen had been working hard to grasp more secrets and allow Holy Dragon City to develop more steadily, this kind of thing would not be effective in a short time.

Therefore, this woman’s words made Tang Zhen feel very uncomfortable.

A faint smile once again surfaced on the corner of the woman’s mouth when she saw Tang Zhen’s Black face. After which, she softly explained.

“In fact, the law of the jungle has always existed in the world of loucheng. Not only do the loucheng compete with each other, but even the major battlefields are in a state of competition.

The stronger the battle zone, the higher the level of the cornerstone platform, and the richer the resources available for exchange. At the same time, there would be more coordinates of the other world!

As for the Warzone we’re in, due to the lower level of the cornerstone platform, the level of the exchanged materials is not very high. Therefore, among all the warzones in the tower world, our ranking is neither high nor low.

In this case, it’s normal to be bullied by Lou Cheng from other battlefields.”

When the woman in leather said this, there was an obvious trace of helplessness in her tone.

“Because new worlds are not so easy to find, cultivators from different battlefields will often fight for a new world.

The richer the resources in the foreign world, the more intense the competition would be!

The cornerstone platform was very supportive of this kind of competition. Once they successfully seized an alternate world that belonged to another battle zone and changed their teleportation coordinates, they would receive a generous reward from the cornerstone platform.

we were very unlucky to be randomly assigned to such a foreign world. When we had just made some progress in the mission, we were interrupted by a level 9 city from a powerful battle zone.

The strength of the other party is not inferior to heaven battling city, and in some aspects, they are even Stronger Than Heaven battling city. If it wasn’t for the fact that this foreign world doesn’t belong to their battlefield, and Lou Cheng couldn’t descend, we would have been defeated a long time ago!”

Tang Zhen's brows were tightly knitted together as he listened to the woman's explanation. His face revealed a pondering expression.

you said that the different battlefields can compete for the ownership of the foreign world. Then, are the loucheng from different battlefields allowed to attack each other in the world of loucheng? "

there's no limit to that. Didn't you destroy two towers in other battle zones without any punishment? "

When the woman in leather said this, a strange light flashed in her beautiful eyes, but it was blocked by the sunglasses.

it's definitely not an easy task to cross the Warzone in the world of towers. Ordinary towers can't support such consumption at all. They'll even be wanted by the cornerstone platforms of other warzones.

Additionally, those insurmountable barriers in the war zone are actually to prevent similar things from happening!"

When Tang Zhen heard this, he suddenly recalled that there were some secrets on his phone that he had yet to figure out.

One of them was that all the towers, except Holy Dragon City, were marked with different numbers.

Tang Zhen had always thought that the phone was encouraging him to destroy those buildings, but after thinking about it carefully, he felt that something was wrong.

These buildings had no enmity with the mobile phone, so why did they guide Tang Zhen to destroy them?

At that time, Tang Zhen didn't know that war zones could snatch other worlds from each other. He thought that the entire tower world would only launch an invasion war.

However, now that he thought about it, the tower world wasn't a piece of iron. The cornerstone platform that Tang Zhen originally thought was one was actually an independent existence and had different levels.

In addition to Lou Cheng, the cornerstone platform was also working hard to increase its level!

At present, these battlefields were only fighting for their own foreign worlds. Would there be a day when all the battlefields in loucheng battlefields would start fighting with each other?

Thinking about it carefully, this situation was not impossible.

A thread of inspiration suddenly flashed through Tang Zhen's mind. This caused his heart to be slightly startled.

He suddenly realized that the phone he owned was actually like a cornerstone platform that had changed its form. Other than being unable to purchase and trade items, it did not lack anything, be it skill exchange or teleportation!

The more he thought about it, the more Tang Zhen felt that the functions of the phone were extremely similar to the cornerstone platform. Moreover, it was an extremely high-level cornerstone platform!

And this miniature "cornerstone platform" in front of him was constantly instigating him to destroy the buildings in other battlefields!

A trace of fear flashed across Tang Zhen's heart. He inhaled a deep breath of air, but his expression did not change.

back then, I told situ Yuanzhi that I could help you solve Lou Cheng's promotion mission. It seems like I was a little too full of myself.

Tang Zhen shook his head. He recalled his promise to situ Yuanzhi and could not help but blush.

At that time, he had thought that this was a very simple matter. Now that he knew the specific situation, he realized how troublesome the matter was.

Of course, there was a way to solve this problem, but in this way, heaven battling city's final spoils of war would only be a wasteland world!

"My grandfather once told me about this. To be honest, he didn't expect city Lord Tang to be of any help. He only hoped that after befriending you, he could purchase some weapons and equipment from Holy Dragon City."

The woman in the leather jacket immediately explained with a smile after hearing Tang Zhen's words.

Tang Zhen nodded and no longer bothered about this matter. Instead, they started to talk about other matters.

Speaking of which, your cultivation has improved very quickly. It's only been a few years, and you've already become a King level cultivator!

A trace of surprise flashed across Tang Zhen's eyes as he sensed the woman's cultivation aura.

The advancement of Lou Cheng's cultivators became slower and slower as they advanced. In addition to Lou Cheng's attributes and the consumption of a large number of cultivation resources, one's own aptitude was also extremely important.

However, even if he was talented, his cultivation should not have improved so quickly in just a few years. There must be some special reason that he did not know about.

The woman in leather glanced at Tang Zhen with hidden bitterness. She still remembered the days when she was locked up in the Holy Dragon city's underground prison. At the same time, she said in a disapproving tone, "City Lord must be joking. I don't dare to say that I'm fast in front of you. You should know that you're now a dignified law King and the famous manhuang King.

How long did this process take?"

"Am I that famous? why didn't I know about it?" Tang Zhen laughed involuntarily when he heard this.

"Of course, it's just that you're not clear about it!"

The woman rolled her eyes at Tang Zhen. She turned her head and looked out of the car window. No one knew what she was thinking about.

...

[Chapter 1062](#)

1062 Cyborg headquarters.1

No matter how long a journey was, there would always be an end. After more than ten hours of travel, the train finally arrived at its destination.

In front of them was the Cyborg's headquarters. It was the political center of this world. It was a huge city called "Star City." It was also the place where Tang Zhen and the others had gathered.

Unlike the other places in this world, which were in a backward and primitive state, many of the items here had a trace of technological aura, making people mistakenly think that they had entered another technological world.

According to the identity card, the enemy would arrive with the energy core in a few dozen hours.

The train's speed began to slow down as the entire city appeared in Tang Zhen's sight.

The first building that entered Tang Zhen's eyes was a Super Fortress made of steel. It occupied an extremely large area and stood tall on the plains in an incomparably powerful manner!

A single glance was enough to tell that this fortress had an extremely strong defense. Just the thick metal walls were enough to make all enemies despair.

Around this steel fortress, there were also countless weapons for defense and attack. Anyone who wanted to break through this defensive circle would have to pay an extremely heavy price!

This was the strongest fortress in the world, and there were things that ordinary people couldn't imagine inside. It was like a sleeping beast that inadvertently revealed its sharp fangs, enough to make people tremble in fear.

With the protection of this Super Fortress, the cyborg could be said to have no worries and did not need to fear any enemy attacks.

In fact, there was no lack of armed forces in this world that resisted the rule of the cyborgs. However, in the face of the pursuit and suppression of the powerful cyborgs, they could only hide all day like rats living in the sewers.

Furthermore, in this world, the ordinary people were under the deliberate control of the androids. There was no way to organize a powerful armed force. Even if they fought with the androids, they would only end up in defeat.

Of course, the area where ordinary people lived was not within the protection of this steel fortress. Instead, it spread out in all directions with it as the center.

Perhaps due to the influence of the body transformation, these half-robots' thinking patterns were different from ordinary people. This was reflected in the planning of the city.

It was simple, unified, and even a little rigid, giving off a feeling of lethargy.

As far as the eye could see, the Super City in front of them started from the Super Fortress, and a total of 28 main roads radiated out in all directions. Then, along with the other horizontal streets, they formed a ring shape, which continued to extend around.

From the sky, one could see that the overall appearance of the entire city was basically an irregular circle.

Once a battle broke out, the originally flat and wide roads would change. Metal walls would suddenly rise from the ground and completely seal off these streets.

Then, these super strong metal walls, together with the buildings on both sides of the road, would form a huge protective wall, completely isolating the enemy!

Tang Zhen felt a little bored as he looked at those identical buildings. He then shifted his attention back from the map interface.

At present, the city was still in a safe and stable state. However, Tang Zhen knew in his heart that the cultivators who had received the order were rushing over.

Perhaps there were already a large number of cultivators hiding in the city, waiting for the final moment to come.

However, this group of restless guys would probably not hide obediently. For many cultivators in the building, there were many things in this world that were worth fighting for.

Once these King level cultivators made a ruckus, the city with a population of over a million would immediately fall into chaos.

Perhaps the cyborgs had realized this, so there were uniformed cyborgs patrolling the city. The entire city's surveillance system was also constantly searching for suspicious targets.

There were also aircraft appearing from time to time in the sky above, making the atmosphere of the entire city a little depressing.

However, with the strength and means of the king level cultivators, if they didn't want to be discovered, the cyborgs wouldn't be able to find them even if they dug three feet deep into the ground.

For example, who would know the identity of Tang Zhen and the leather-clad woman beside him? they were two powerful King level cultivators.

With the sound of a whistle, the train slowly entered the station. Tang Zhen also stood up from his seat.

"Since we're here, let's part ways."

Tang Zhen said to the woman in leather before turning around and walking toward the car.

"Hey! Are you going to leave me like this? we've known each other for so long, after all."

The woman in leather stood up and called out to Tang Zhen in a somewhat depressed manner.

"You're a living person, how can you just go missing? Besides, with your strength, how many people can bully you?"

Tang Zhen gently curled his mouth and spoke without turning his head.

“Yingluo, don’t you plan on knowing my name?”

The woman in leather was a little unwilling to give up and asked again.

“Aren’t you the granddaughter of situ Yuanzhi, the city Lord of Centaurea Valley? I already knew about this!

As for the name, it’s just a code name. I’m not interested in knowing!”

Tang Zhen had already alighted from the train as he spoke. He was slowly walking out of the train station.

“Remember, my name is situ Yunxi!”

tang zhen’s figure had already disappeared into the crowd when he shouted these words.

Situ Yunxi stomped her foot in anger.

When the male passengers saw the turn, they were stunned.

Seeing this, situ Yunxi glared at them and released the aura of a King level cultivator. These guys immediately woke up from their lecherous state and quickly left.

stinky man, when I have the chance, I’ll definitely lock you up in the underground prison and let you experience what it’s like.

Situ Yunxi cursed and followed the crowd off the train.

.....

Tang Zhen, who had walked to the entrance of the train station, immediately saw a group of uniformed cyborgs. They were guarding the place as if they were facing a great enemy. They scanned their surroundings with cold eyes, and everyone who entered and exited the station was sized up by them.

Cold weapons were also set up on the metal sentries on both sides of the exit, pointing at the people entering and leaving the station.

With Tang Zhen’s methods, he was naturally able to easily pass through the inspection. After which, he swaggered out of the train station under the gazes of those half-mechs.

The next thing he had to do was to figure out the specific situation of the cyborg headquarters to facilitate his next action.

...

[Chapter 1063](#)

1063 The chaotic city (1)

Tang Zhen slowly walked toward the cyborg headquarters as he strolled on the streets of the city.

If he wanted to enter this heavily guarded Super Fortress, he would definitely need some special means. Tang Zhen did not think that the cyborg headquarters would be like the backyard of an ordinary house, where he could enter and exit as he pleased.

Of course, with his means, it was not difficult to sneak in. At most, it would take a little time.

However, just as he was about to take action, the originally calm Street suddenly became chaotic.

The people on both sides of the road suddenly screamed in fear. They ran with all their might, trying to avoid something terrifying.

At the back of the crowd, screams could be heard. At the same time, broken limbs were thrown into the air, and blood spurted out like a fountain.

Tang Zhen quickly switched to the map view to see what had happened.

Then, he was surprised to find that behind the fleeing crowd, there was a group of huge strange creatures chasing after the panicked crowd.

Rats the size of leopards, beetles that were not much smaller than boars, mantises that were more than three meters tall, and other creatures were slaughtering wantonly on the streets, devouring the citizens as food.

Tang Zhen was very clear that Lou Cheng's cultivators had started to cause trouble.

Just as he had expected, they had no patience at all and couldn't wait to start making a scene.

Besides, if a King level expert were to make a move, it would definitely cause an earth-shattering scene!

Tang Zhen did not know what kind of method the other party had used to make these ordinary creatures so huge. At the same time, why were they so bloodthirsty and brutal?

With the ability of a King level cultivator and the various secret techniques he had obtained from invading a foreign world, it wasn't difficult to do this.

With the appearance of the terrifying monster, the city was in a great panic. In just a few minutes, the entire Street was covered in blood and minced meat, and the whole place was stained with blood.

Wherever these giant monsters passed, there were no signs of any citizens. Only the timely appearance of aircraft was constantly attacking these monsters.

Body fluids of various colors splattered out of the monsters. The bullet attacks made them howl in pain. From time to time, there would be huge monsters that fell to the ground while running.

The frightened monsters scattered in all directions, and some of them launched attacks on the aircraft in the sky.

A monster that looked like a lizard quickly climbed onto the wall of a building on the side of the road. It then stuck out its tongue and stuck it onto the aircraft that was attacking at a low altitude.

"BOOM!"

As the monster's tongue pulled, one of the aircraft accidentally crashed into a building and immediately turned into a pile of scrap metal!

Washbasin-sized fleas and locusts that were more than a meter long also jumped up from high places one after another, launching attacks at the aircraft.

In the blink of an eye, the aircrafts in the sky fell one after another, and some monsters were blown to pieces.

However, compared to the monsters that filled the entire Street, these casualties were nothing!

The sudden change attracted the attention of the cyborg. As a piercing alarm sounded, metal walls immediately rose up around the street where the monster was.

In less than a dozen seconds, the area was completely sealed off!

There was a whistling sound, and then a large number of flying machines whizzed out from the cyborg headquarters in the distance, speeding toward this area.

A cyborg agent stood on each aircraft, holding a weapon with a murderous look.

When they arrived at the area where the giant creature was, they attacked the monsters on the ground without hesitation, and a barrage of bullets poured down.

At the same time, some of the cyborg agents jumped off the aircraft and quickly landed on the metal wall. Then, they controlled the large-caliber weapons and continued to kill the monsters.

The monsters that were trapped in the streets were running around as if there were no flies. They kept attacking the buildings that were sealed by the iron gates and protective nets, trying to break in to avoid the attacks.

In the process, more and more monsters were shot to death, and broken corpses could be seen everywhere.

However, the cyborgs responsible for blocking the attack also began to suffer casualties.

Although the monster had grown in size, its intelligence had not increased much.

Moreover, after they grew in size, their courage also increased a lot. When they saw that their food, which was about the same size as them, dared to attack them, they began to fight back in anger.

They swarmed toward the cyborgs in groups, leaving traces of destruction on the buildings and metal walls. Even though they were covered by the bullets of the cyborgs, they still charged forward without fear of death.

Although the cyborgs' combat power was far beyond that of ordinary people after their bodies were modified, they were still not at ease in the face of the densely packed giant monsters.

Screams of pain could be heard as the half-mech's body, which was surrounded by the monsters, was torn to pieces and then quickly devoured.

A few locations had already been attacked by monsters, and they were constantly surging toward other areas along the breach.

The citizens who were watching from a distance immediately shouted and fled. At the same time, teams of cyborg agents also quickly rushed forward with weapons in hand.

Fighting alongside the cyborg agents were tanks that were constantly spewing out terrifying flames.

The monsters that had just rushed out were immediately beaten into a mess of flesh and blood. They fell to the ground in groups and soon piled up into small mountains of blood.

At this rate, it wouldn't take long for the cyborgs to clear out all the monsters!

Tang Zhen coldly looked at this scene. He was very clear in his heart that the cultivators in Loucheng definitely didn't only have this little trick. The exciting part was yet to come.

Sure enough, as soon as he had this thought, there were screams of panic coming from the street behind him. The citizens who had fled ran back like crazy.

At the same time, a blood-red mist was wriggling in the air like mollusks.

In the smoke-covered area, there were townsfolk lying on the ground, unable to get up. They were constantly twisting their bodies, as if they were in great pain.

Blood gushed out of their seven orifices, and the pain caused their faces to twist. Then, as if they were spasming, they stood up with twisted bodies and raised their heads to roar.

However, at this time, there were constantly moving tentacles in their mouths, just like the tentacles of an octopus. It looked extremely strange.

Their blood-red eyes were wide open as they greedily looked at the citizens who were running for their lives. Then, they pounced on them in unison.

[Chapter 1064](#)

1064 Catastrophe (1)

After the mutated residents rushed into the crowd, they immediately started biting and tearing. The sharp teeth hidden behind the tentacles bit the residents until they were bloody.

The flesh and blood that had been bitten off were directly devoured by them. The scene was like hell had descended!

They looked at the tragic scene on the street and were all pale with fear. They closed the windows in a panic and then closed the door tightly.

Hiding in their homes and waiting for the disaster to pass had become their only choice.

However, what they didn't know was that this chaos wasn't simple. Even hiding at home couldn't guarantee their safety. Instead, they took the opportunity to escape from the city, which might give them a chance of survival.

The thin door couldn't stop the crazy monsters, and the seemingly solid house couldn't be preserved under the bombardment of the king level cultivators and the enemies!

At a certain moment in the future, this place was destined to become the ruins of a Dead City!

Following the appearance of the blood-colored smoke, chaotic scenes appeared in other areas of the city.

A group of citizens with red eyes and crazy expressions were waving all kinds of weapons and rushing toward the cyborgs.

The cyborg agents patrolling the streets began to shoot without any hesitation, killing the citizens.

However, the citizens who had been successfully controlled by Lou Cheng's cultivators were not afraid of such casualties at all. Even if their bodies were hit by bullets, they continued to crawl forward, leaving a shocking trail of blood on the street.

Among these crazy citizens, a man in a black robe was holding a black staff and slowly advancing in the dense and crazy crowd.

His whole body exuded a strange and gloomy temperament, which was out of place with the surrounding scene and was extremely eye-catching.

Around the black-robed man, there were dozens of tall and strong men with fierce expressions. They were holding all kinds of weapons and acting as guards.

The surface of these brawny men was already covered with blood-colored meridians, looking as if they were about to explode at any moment!

"You can't escape, you'll never be able to escape!"

The black-robed cultivator spoke in a low voice, his voice cold and emotionless.

As the crowd of controlled citizens continued to push forward, the residents on the surrounding streets who could not escape in time began to convulse violently as if they had been electrocuted. After a few moments, they began to join the ranks of the attack with a crazed look on their faces.

The small number of cyborg agents were quickly swallowed by the crowd and torn to pieces by the crazy citizens.

This crazy stream of people continued to advance and soon arrived at Tang Zhen's location.

At this moment, Tang Zhen was standing alone in the middle of the street. His personal belongings were scattered all over the ground. There were also mottled blood stains. It looked like the end of the world.

What caused people to feel strange was that when those crazy Human Flow that filled the streets met Tang Zhen, they were like a wave that had hit a reef, directly split into two.

Their expressions were still crazy. However, there was an intense fear in their eyes. It was as if Tang Zhen was some terrifying monster that caused them to subconsciously avoid him.

The black-robed man had also noticed this strange situation. He raised his head slightly and his two pairs of dark green eyes looked at Tang Zhen at the same time.

It turned out that this black-robed cultivator had four eyes. Other than the two normal eyes, there were two more eyes that protruded from his forehead, wriggling like feelers.

Waves of strange spiritual energy were spreading out from the pair of eyes that were like tentacles, firmly controlling the crazy citizens!

This was obviously another strange method of controlling mental power, but it could only be used on ordinary people. If it was a cultivator, the effect would be greatly reduced.

The black-robed cultivator looked at Tang Zhen who was standing in front of him. After sizing him up, his body seemed to tremble slightly. Then, he walked in front of Tang Zhen and bowed slightly.

“I’m the king level cultivator of the four eye Tower City, flintt. May I ask who you are?”

The black-robed man used a hoarse voice to ask Tang Zhen.

Tang Zhen swept his eyes over the black-robed man before he opened his mouth and replied, “Tang Zhen from Holy Dragon City!”

When the black-robed man heard this, he subconsciously lowered his body and said in a fawning tone, “so the manhuang King has arrived personally. This mission should be foolproof!”

Tang Zhen looked at the black-robed man opposite him and spoke in a faint tone, “From your tone, you seem to know me very well?”

The black-robed man quickly replied, “manhuang king’s name has already spread throughout the entire Battlefront. We are all very impressed by your amazing battle results!”

Tang Zhen involuntarily laughed when he heard this. The fawning manner of this black-robed man really did not match the cold and mysterious image he had earlier.

He didn’t have time to waste with the other party. The thing that Tang Zhen wanted to know the most was how many King level cultivators had come for this mission and the specific situation of the enemy.

After hearing Tang Zhen’s question, the black-robed man replied, according to the information I’ve gathered, at least two hundred King level cultivators took part in this mission after the special call was issued. As for the law Kings like you, five of them came, including you!

Tang Zhen frowned slightly when he heard this number.

With so many King level entities gathered together, they could easily destroy a world. How powerful was the enemy that the cornerstone platform would send out such a large force?

Tang Zhen’s expression became increasingly gloomy when he thought of the hidden danger behind this.

have you obtained any information on the enemy? ”

Tang Zhen thought for a moment before asking.

The black-robed cultivator shook his head, indicating that he had not obtained any useful information. Just like Tang Zhen, he was also waiting for the cornerstone platform's instructions.

From the looks of it, the enemy was quite mysterious!

one last question. What's the purpose of your current operation? aren't you afraid of alerting the enemy? "

This was what Tang Zhen was most puzzled about. If the enemy temporarily canceled their arrival plan because of the change here, wouldn't they be unable to complete their mission?

When the black-robed man heard this, he immediately smiled and said, " manhuang Wang, you don't have to worry. According to the information we received, the cyborgs in this world are actually the vassals of the enemy.

After they were modified, their main responsibility was to look after the teleportation device here.

According to our deductions, the enemy must have arrived through some sort of teleportation method. In just a few days, even if the cyborgs sent out a warning of danger, their master wouldn't be able to receive it through space.

When we have control of this cyborg headquarters, we can wait for the enemy to appear and attack.

The enemies will be caught off guard and suffer great losses. We'll also get the energy core!"

Looking at the confident black-robed cultivator, Tang Zhen nodded his head and did not ask any more questions.

The situation was clear. Lou Cheng didn't plan to wait until the time limit. Instead, he was going to strike first and take down the cyborg headquarters!

...

Since that was the case, he should do something to prevent himself from not being able to gain much battle credits when the mission was finally completed.

After thinking up to this point, Tang Zhen's figure suddenly flashed as he headed straight for the Cyborg's headquarters.

[Chapter 1065](#)

1065 The Kings of the four great laws (1)

After seeing Tang Zhen disappear, the black-robed cultivator stood on the spot and thought for a moment. Then, he continued to control the crazy citizens and continued to rush toward the cyborg headquarters.

On the 28 main roads, Lou Cheng's figure could be seen from time to time. They were using all kinds of strange means to kill groups of cyborg agents.

Even the tall defensive walls were unable to stop their attacks. Amidst the violent rumbles, tall buildings and defensive walls were destroyed and collapsed from time to time.

Looking down from the sky, the entire city was in complete chaos. Explosions and flames were spreading all the way to the cyborg headquarters.

At this moment, the cyborg headquarters had been surrounded by King level cultivators.

They all had different appearances, but all of them exuded a terrifying aura. They flashed around the cyborg Castle like lightning and launched an attack on the castle.

The ground around the castle was filled with the broken bodies of the cyborgs. They had firmly controlled this world, but they were as weak as ants in front of the cultivators in the tower!

The cyborg had already noticed that something was wrong and had completely closed all the entrances and exits of the castle. He was ready to rely on the castle's strong defense to stop the enemy.

However, the fortress that was indestructible in the eyes of the cyborg could not provide them with enough security at this time.

Facing the powerful cultivators of Lou Cheng, even if the cyborg castle was like a turtle shell, it would still be broken one day!

When the cultivators of Lou Cheng charged in, the cyborg hiding inside would be doomed.

In order to avoid such a tragic end, the cyborgs had already launched attacks with all their might. Countless cannons fired beams of light, chasing the figures of the cultivators in the loucheng.

However, for King level cultivators, these defensive weapons, which could threaten the life of ordinary people, couldn't do any effective damage to them.

As figures broke through the fire blockade one after another, the cultivators of loucheng city had already leaned directly on the outer shell of the fortress and began to bombard the metal shell of the fortress one after another.

Because the castle was completely sealed, if they wanted to enter, they would have to break through the outer defense.

The swords and sabers in their hands kept slashing at the castle's outer shell. The metal walls that could withstand the impact of the cannons were left with terrifying wounds.

Under the fierce attacks of these King level cultivators, the surface of the castle was covered in scars.

At this moment, at the top of the castle, a strong man with two horns on his head, wearing heavy armor, was constantly roaring. The war hammer in his hand was also repeatedly hitting the metal shell of the castle.

With his fierce attacks, the metal shell had begun to crack. Even though it was quickly filled and solidified by the liquid flowing inside, the speed of repair was still not as fast as the speed of destruction.

The king-level cultivator laughed smugly. He raised his war hammer and smashed it down on the metal shell with blinding light.

"BOOM!"

With a deafening sound, a huge hole was created in the metal shell. The king-class cultivator laughed and jumped into it.

About 20 meters away, a King level cultivator who looked like a dried corpse with chains all over his body and green symbols flashing on them snorted and pulled off a tag from the chain.

He threw the sign at the metal shell, and the entire sign quickly shattered, a cloud of green smoke rising into the air.

At the same time, a green liquid spread on the metal shell. With a sizzling sound of corrosion, a large hole was quickly broken through the metal shell, enough for a cultivator to enter.

He glanced at the king level cultivators around him, laughed, and jumped down.

Seeing this, the king level cultivators increased the speed of their attacks. Soon, the metal shell of the castle was filled with holes.

From the looks of it, these King level cultivators were clearly competing with each other.

There was no first place in literature and no second place in martial arts. The performance of these cultivators in loucheng was actually very normal.

The area of the wilderness was quite vast, and these King level cultivators rarely had the opportunity to come into contact with it. Now that they had gathered together because of the special recruitment order, it was natural for them to compete with each other.

They were all King level cultivators, and none of them wanted to be looked down upon by others. Naturally, they had to do their best to show off.

Of course, this was just the thought of ordinary King level cultivators. For those who had real strength, this kind of contest was meaningless and disdainful.

As hundreds of King-level cultivators swarmed into the cyborg headquarters, four men and women of different sizes were watching the battle coldly from the top of a building in the distance.

There was a strong fluctuation of nomological aura around the four of them. The space seemed to be unable to withstand the huge pressure, and there were signs of tearing.

There was no doubt that they were the four law Kings who had participated in this operation!

Blood River King, are you sure that your information is correct? will the enemy not receive the news of our attack? ”

The cultivator from loucheng who asked the question was a tall cultivator who was wearing white bone armor. His back was covered with bone spikes like a Peacock spreading its tail. Even his face was covered by a protruding bone armor.

The person he was asking was a pale-faced, seductive man with pointed ears. He was wearing a blood-red robe that looked like blood that was constantly flowing, and he exuded a strong bloody aura.

Lord Blood River glanced at the Skeleton Man and sneered. His demonic face, which was covered with exquisite tattoos, showed a trace of confidence.

don't worry, bone Emperor. There's no problem with my source of information!

After saying that, he licked his blood-red lips and said in a reminiscing tone, " "This information came from a high-level cyborg, so it can't be wrong.

And that guy's blood is also very special, it has a strange fragrance, it's really memorable!"

Hearing Blood River King's answer, Bone King nodded expressionlessly. He crossed his arms and continued to watch the battlefield.

There was a man and a woman standing next to him. The woman had silver-white skin and a pair of silver-white wings on her back. There were scale-like embellishments around her eyes, and a cluster of bright feathers grew between her eyebrows.

She looked at Blood River King's intoxicated expression with disgust. She snorted softly, but did not speak.

The tall man next to her, who was covered in black scales and had a head full of blood-red horns, turned to look at Blood River King.

I've long heard that Blood River King possesses a powerful secret technique. His means of obtaining information in the entire war zone are unparalleled. I wonder if you can answer my next question? "

King Blood River turned around and glanced at the non-human King, whose face was covered in black scales and whose eyes were blood-red, and said, " "Red Horn King, if you have any questions, just ask. If I know, I will definitely tell you!"

Answering a question in exchange for a favor was not a bad deal.

Red-horn King nodded and asked Blood River King, " then, may I ask if you know where the Holy Dragon City Master, Tang Zhen, is now? "

When the other three heard this name, they immediately frowned and looked at Red Horn King.

you're talking about the king of the wilderness, Tang Zhen. Why is he here? "

The silver winged Emperor with his Silver Wings asked with a surprised tone.

...

Blood River Emperor and bone Emperor were also surprised and contemplative. It seemed that the name Tang Zhen had a special meaning to them.

The originally somewhat leisurely atmosphere had also become somewhat solemn because of the name Tang Zhen.

Blood River King had originally planned to use this opportunity to sell information so that the red-horn King would owe him a favor. However, when he heard that the red-horn King was asking for information on Tang Zhen, his eyes flickered slightly.

He looked at the red Horn King with eyes that seemed to be searching.

[Chapter 1066](#)

1066_1!

After thinking for a while, Blood River King looked at Red Horn King, who was staring at him and waiting for an answer.

“Actually, I’m very curious. I don’t know why the red Horn King is asking about this Tang Zhen. Could it be that there is some enmity between the two of you?”

As cultivators of laws, their strength could almost run amuck in the savage war zone. The only people they were afraid of were cultivators of laws of the same level.

And Tang Zhen just so happened to be a law King. Although it had not been long since he had advanced, his past battle results had been known by many people. His reputation was not inferior to those veteran law Kings.

Things about him were also gradually known by people one by one.

His cultivation rose extremely quickly. In just a few short years, he had become a law King. This speed made countless people’s jaws drop.

His methods were strange and mysterious, and his combat power was extremely strong. Cultivators of the same level as him had almost never met a match!

He would never let go of his enemies easily. In the past, he even crossed the barrier of the war zone and faced the pursuit order from the cornerstone platform in the spirit fall war zone. He almost entered no one’s land and destroyed two National towers in a row!

When this explosive news was sent back to the wilderness Warzone, almost all the cultivators in loucheng city were shocked. They also had a deeper understanding of Tang Zhen’s ruthlessness and powerful means.

It was also at that moment that Tang Zhen officially entered the sights of these law Kings and began to pay attention to any information related to Holy Dragon City.

Since they were all from the same Battlefield, it was inevitable that they would come into contact in the future. They naturally had to pay more attention to this Holy Dragon City Lord who had appeared out of nowhere.

However, it didn’t take long for news of Tang Zhen’s advancement to a law King to spread. It was reported by the entire battle zone of the cornerstone platform!

The entire boorish desolate war zone was in an uproar.

The cultivators in loucheng city were not only shocked by this, but they were also on high alert.

In the face of such an abnormal guy, everyone suddenly felt a sense of crisis. They were afraid that one day in the future, they would hear even more shocking news about this guy!

Most of the cultivators in loucheng stayed away from Tang Zhen, who was a dangerous person. They tried not to have any interaction with him.

However, now that Red Horn King was asking him about Tang Zhen, Blood River King naturally had to find out the reason to avoid unnecessary trouble.

After hearing Blood River King's question, Red Horn King's eyes flashed with a cold light. He said in an icy tone, "this b * stard is too much. He actually used some unknown means to make our underground world stinky when we were going to the other world to carry out a mission. We can't live in it anymore!

Speaking up to this point, the red Horn King once again thought of the underground world's war beasts that had gone berserk from the stench, charging towards the surface in groups. His expression was incomparably gloomy, and his teeth were clenched so tightly that "Ge Ge" sounds could be heard!

Even when he went back to investigate, he was so smelly that he almost vomited. He hurriedly escaped back to the surface.

If it wasn't for the cornerstone platform's rule that national-level towers in the same Warzone couldn't easily attack low-level towers, he would have rushed to Holy Dragon City and massacred it!

Hearing this, the other three law Kings all had strange looks on their faces. It was as if they wanted to laugh, but they were holding it in.

This Holy Dragon City Master had actually used such a method. It was truly sinister.

Blood River King rolled his eyes and looked at red-horn King, "Sir, why are you so sure that this matter was done by Tang Zhen? why would he do such a thing?"

Bone Emperor and silver Wing Emperor both sneered.

This matter wasn't that simple. According to their understanding of Tang Zhen, this person would definitely not take the initiative to provoke other powerful loucheng. Instead, he would focus on developing his own loucheng.

That was why the Holy Dragon City had been promoted to a level 9 city in such a short time. Even those cities with the backing of a country could not be compared to it!

Once they thought of the fact that the Holy Dragon City and the black prison tower were not too far away, and the Holy Dragon city's potential growth value was quite high, everyone could vaguely guess the truth of the matter.

The black prison tower definitely did not want to watch the Holy Dragon City develop and become a threat to their status in the future. Therefore, they used some secret means to try to destroy the Holy Dragon City!

Unfortunately, the other party came to their door and set them up, making the black prison tower suffer a loss in silence.

At the thought of this, Blood River King immediately made up his mind. It was best not to interfere in this matter. Otherwise, he would get himself into trouble and suffer a great loss.

hehe, I'm sorry, Red Horn King. My blood slaves didn't find any traces of the manhuang King.

After saying this, Blood River King immediately closed his eyes, as if he had fallen into a deep sleep.

Seeing this, white bone Emperor and silver Wing Emperor both smiled mysteriously, while Red Horn Emperor snorted coldly. His blood-red eyes kept rolling, as if he was planning something.

The atmosphere fell into silence again. Only the semi-android Castle in front of them kept exploding. On the eggshell-like surface, smoke kept pouring out of the holes.

At this moment, from the void behind the red Horn King, an extremely condensed Sword of Fire suddenly shot out, heading straight for his back.

The red Horn King, who was deep in thought, suddenly let out a loud roar. He charged forward without any hesitation, trying to avoid this sudden attack.

However, there was no warning before this sneak attack. The red Horn King dodged in a hurry, so how could he have completely avoided it?

In the blink of an eye, the Sword of Fire had pierced through Red Horn King's left shoulder and went straight through.

A furious roar resounded as one of Red Horn King's Arms was forcefully cut off. The wound was filled with black burn marks, and the flames on the wound seemed to be alive, quickly spreading and covering his body.

The red Horn King, who had lost an arm, roared in anger. His entire body was immediately covered by a thick layer of stone. At the same time, a large amount of dust rose into the air in the surrounding area.

Under the red Horn King's control, the dust actually began to fly rapidly, like metal constantly colliding with sparks!

The ground beneath his feet also started to surge like waves. At the same time, the soil protruded from the ground and quickly solidified into sharp stone Spears, shooting into the sky.

This law King from the abyss prison tower had comprehended a branch of the earth Law. He could control the soil to become extremely rigid rocks and launch violent attacks on his enemies.

This kind of law seemed very weak, but when used in actual combat, it had extremely strong destructive power.

The power of the law itself had the ability to seal space and prevent the enemy from teleporting. Under the control of the power of the law, the soil would become harder than steel.

Not many people could easily Dodge the overwhelming attack of this kind of hard stone spear!

Not to mention that these stone Spears contained the power of laws. Once hit, the destructive effect of the power of laws was something even a law King couldn't withstand!

In his rage, the red Horn King directly used his most powerful law attack. Within a thousand meter radius, countless stone Spears pierced into the sky, not leaving a single blind spot!

The expressions of the three nearby law monarchs immediately changed drastically when they saw this. They began to Dodge the dense stone Spears in exasperation.

They didn't dare to underestimate the power of this stone spear, so they all mobilized the power of law to resist and offset it.

As they defended against the attacks, they were also constantly retreating in an attempt to escape the area enveloped by the power of the law.

"Damn Red Horn King, are you f * cking crazy?"

...

The three law Kings cursed as they dodged, their expressions ugly.

Even though they could understand the red Horn King's current feelings, the fact that the other party had included them in the attack range made them somewhat annoyed.

However, the red-Horned King did not care about the curses of the three law Kings. Instead, he stared with his blood-red eyes, constantly searching for traces of the attacker.

"Tang Zhen, I know it was you who launched a sneak attack!

You shameless villain, if you have the ability, come out and let's have a face to face fight!"

After hearing Red Horn King's roar, the expressions of the three law Kings who were hiding changed, and they also began to search the surroundings.

However, after searching the surrounding area, there was not a trace of Tang Zhen's existence.

[Chapter 1067](#)

1067 Intense battle (1)

The injured Red Horn King didn't even care about his own injuries, and instead launched another attack in his rage.

His eyes were filled with madness, and he let out a hoarse roar. Facing the hidden powerful enemy, the red-Horned King felt his blood begin to boil.

He was infatuated with this feeling. The more life-and-death danger he was in, the more excited he felt!

Under the effect of the power of law, the stone Spears that had already covered the surrounding area burst out from the ground again and turned into a large amount of dust as they rushed into the sky.

The dust covered the sky above their heads, then quickly condensed into one, stabbing down like a stone slab, directly smashing into the ground.

The terrifying feeling was as if the sky had collapsed!

If the enemies within the attack range were unable to escape before the stone slab fell, they would definitely be smashed into meat paste!

When Blood River King and the others saw this, they sped up their escape to avoid being affected by the indiscriminate attack.

The red Horn King, who was in the center of the attack, had been sensing the movements around him, trying to find the hidden attacker.

All of a sudden, a cold glint flashed in his eyes. He waved his hand at an area not far away, and an Earth Dragon surged out of the ground and smashed into an empty area!

“Let’s see where you can run to this time!”

Just as the Earth Dragon was about to approach, a cold light suddenly appeared in the void and cut the Earth Dragon in two.

A figure in purple-gold armor also appeared in front of the red-Horned King.

“Red Horn King, may I know why you are looking for me?”

That person chuckled and looked at the red Horn King coldly.

After seeing this person’s appearance, the red Horn King was instantly filled with rage. He let out a loud roar and charged over.

“Tang Zhen, go to hell!”

The charging Red Horn King’s body had suddenly expanded by a size, his pitch black claws flashing with a cold glint. Even a high level demonic armor could not withstand the power of his claws.

The red Horn King, who was filled with anger, wanted to tear Tang Zhen to pieces. Only then would he be able to ease the frustration in his heart.

After all, it was this guy in front of him who caused him to lose an arm. This was definitely a great enmity that would not end until one of them died!

To the abyss prison demon race, their bodies were their strongest weapon. Once they were damaged, their combat power would be greatly reduced.

Even a law King didn’t have the ability to regrow limbs. At most, his recovery ability was a bit abnormal. It was also because of this that the red Horn King hated Tang Zhen so much.

In addition to the past grudges, the new and old grudges stacked together. At this moment, the red Horn King even had thoughts of swallowing Tang Zhen alive.

Looking at the red Horn king who was aggressively charging towards him, a cold glint appeared in Tang Zhen’s eyes. The soul devouring blade in his hand dragged a long flame whip as it ruthlessly slashed towards the red Horn King.

At the same time, the flames suddenly burst out, dyeing the surrounding sky red. Under the burning of the law flames, the falling slates were forcibly held up and quickly turned into lava.

Billowing black smoke drifted up from outside the area enveloped by the power of law. It looked like an upside-down volcano, and the position above Tang Zhen and the others was the crater that was about to erupt!

From a distance, this was a hellish scene. If ordinary cultivators were caught in it, they would probably die in an instant.

The battle within the domain was actually a clash between law Kings. However, because Tang Zhen controlled the law of fire, his own strength was much stronger than Red Horn King's.

However, the red Horn King had already become a law King for over a hundred years, and his familiarity with controlling the power of law was much stronger than Tang Zhen's. Therefore, when the two's law powers collided, they were almost equal.

Then, the next battle would be a head-on clash with real swords and Spears!

At this moment, Tang Zhen's figure was like lightning as he instantly collided with the red Horn King. At the same time, a violent explosion was continuously emitted.

The onlookers could only see a series of afterimages flashing by. They were unable to see the exact situation of the battle. However, one thing was certain. Because the red Horn King's physical defense was extremely strong, he was more adept at close combat. As for Tang Zhen, because he had many methods, it was impossible to guard against him!

In the distance, the three great law Kings watched without blinking, afraid to miss any detail of the battle.

On the battlefield, the fierce fighting continued.

Even Tang Zhen himself had to admit that this Red Horn King was definitely the strongest opponent he had ever encountered. This fellow's strength was extremely great, and his defense was even more outrageous. That pair of sharp claws were even more powerful than divine weapons.

Tang Zhen had already suffered a few near-fatal attacks during the fight. Even his purple-gold battle armor was full of scars and terrifying scars.

If he didn't have the protection of the purple-gold armor, he would have been torn to pieces even if he had the body of a law King.

The situation was critical. Tang Zhen had no choice but to raise his spirit and throw himself into the battle with all his might.

However, Red Horn King did not gain any advantage either. From the start of the fight until now, his body was already covered in blade marks, all the scales on his body had fallen off, and the wounds were so deep that the bones could be seen.

One of the wounds had pierced through his abdomen, and the nomological flames were still burning. The pain was indescribable.

However, the red Horn King did not seem to be affected in the slightest. Instead, he became more and more courageous as the battle progressed, and the stimulation of blood made him even crazier!

One could tell from his performance that he would definitely not give up if he did not kill and severely injure Tang Zhen today!

It had to be said that the cultivators of the black prison tower were battle maniacs through and through. Because of their physical advantage, they liked close combat and would not show any mercy once they fought.

Every world that was invaded by the abyss prison tower would eventually become a true ruin, and the world's origin would be plundered!

Tang Zhen also clearly knew that if he did not kill the red Horn King today, then with this fellow's character, it was extremely likely that he would do something crazy.

Even if he returned to the world of loucheng, it was not impossible for him to massacre the Holy Dragon City!

After realizing this point, killing intent surged in Tang Zhen's eyes. As he attacked with all his might, flying swords descended from the sky, rapidly shooting towards the red Horn King!

These flying swords alone were not enough to deal with the red Horn King. However, Tang Zhen's methods were not limited to these.

After obtaining sufficient origin stones, he had already exchanged for a few applications of fire-type maxims. Now, he finally had the opportunity to use them!

After forcefully blocking a sharp attack from the red Horn King, Tang Zhen's body directly took a step back as he pointed his finger at the red Horn King.

A seven-colored fire snake appeared, carrying an indescribably terrifying aura, directly charging towards Red Horn King's body!

[Chapter 1068](#)

1068 Killing the red Horn King

The moment the seven-colored fire snake appeared, the red Horn King felt his soul tremble.

After a cultivator had mastered the power of law, it was a process of gradually familiarizing himself with it. The longer the time, the higher the level of comprehension and proficiency.

The originally rough use of laws would also gradually improve and become more powerful. The difference in power between the two was definitely not something that could be clearly distinguished by levels.

The collision of the laws between Tang Zhen and the red Horn King earlier was at most the most superficial application. Although the power was similarly not small, neither of them could do anything to the other.

However, as Tang Zhen released this seven-colored fire snake, the equilibrium between the two was immediately broken. This foot-long little fire snake seemed to possess the power to destroy the heavens and earth, causing the red Horn King's expression to change.

Without any hesitation, he quickly dodged, afraid that the fire snake would land on him.

However, how could Tang Zhen allow him to easily Dodge? the flying sword he had summoned had already arrived, sealing off the red Horn King's path of retreat.

Tang Zhen's soul devouring blade followed closely behind, completely sealing off the red Horn King's last escape route!

Under the interference of the power of law, the red Horn King was unable to teleport and escape. There was practically no way to escape.

Sensing the incoming seven colored fire snake and the soul devouring blade in Tang Zhen's hand, the red Horn King's entire body was immediately covered in a cloud of dust, as he directly collided with the flying sword behind him.

Compared to the terrifying fire snakes and the sharp blades, Red Horn King chose to face the flying sword behind him, trying to find a way to survive.

This Red Horn King's decision had exceeded Tang Zhen's expectations.

In the blink of an eye, the red Horn King had already collided with the flying sword. The armor formed from dust was unable to withstand the sharp summoning of the flying sword, and was easily pierced through.

A muffled groan came out of Red Horn king's mouth, but his expression remained unchanged. He allowed the three flying swords to pass through his body, but his entire body was sent flying backward at high speed.

At the same time as he retreated, earth walls appeared in front of him in an attempt to stop Tang Zhen's pursuit.

"You can't escape!"

Tang Zhen roared out as his flying sword and fire snake pierced through the earth walls one after another, chasing after the red Horn King.

He himself was like a huge Sword of Fire, using the soul devouring saber as the blade to shatter all the earth walls!

Faced with Tang Zhen's aggressive pursuit, the anger in the red Horn King's eyes became even more intense. However, he could not care much at the moment. He only hoped that he could escape from Tang Zhen's pursuit as soon as possible.

However, the anger in his heart almost drove him crazy.

"Tang Zhen, just you wait. I will not rest until you die!"

When Red Horn King shouted this, he was about to leave the battlefield and teleport away.

Tang Zhen's heart tightened when he saw this. If this Red Horn King really escaped from this place, he would definitely wait for an opportunity to take revenge. This would be a huge hidden danger to him and the Holy Dragon City.

No matter what, he must not let her leave. This was the intention that Tang Zhen had decided before he attacked.

But looking at the situation, this Red Horn King might really not be able to stay!

Tang Zhen's gaze suddenly landed on the three law Kings at the edge of the battlefield. He suddenly opened his mouth and roared, "Please help me stop the red Horn King, I will definitely reward you greatly!"

Blood River King and the others hesitated, not knowing if they should help.

The three of them did not have any friendship with Tang Zhen. There was really no reason for them to help either side in a life and death battle like this.

It would be unwise to form a grudge because of this.

Tang Zhen immediately thought of the thoughts in their hearts when he saw the expressions of the three law Kings. He did not hesitate and casually threw out three items.

Throwing them with all his might, the three items actually passed Red Horn King in an instant, flying in front of the three law Warriors.

"Here are three storage rings as a token of my gratitude!"

Blood River King and the other two, who originally intended to stay out of the matter, immediately had a change in expression when they heard Tang Zhen's words. They took the items in front of them without the slightest hesitation.

Spatial storage equipment was naturally not unfamiliar to the law Kings. However, even if they were extremely powerful and had no lack of resources, they had no chance of obtaining such items.

Now that Tang Zhen had actually thrown out a storage equipment as thanks, how could they not be moved?

When the storage ring landed in his hand, Blood River King and the others checked it and were pleasantly surprised.

Although the space wasn't big, only a few cubic meters, it was still a big surprise for them. After all, they didn't have any storage equipment yet.

The value of this reward was enough for them to make a move.

The three of them looked at each other. Without any hesitation, they blocked the red Horn King's path.

"Red Horn King, it's better if you don't leave."

The red Horn King was both shocked and furious. He dragged his body covered in injuries and glared at the three law Kings blocking his way.

Blood River King, you three bastards! I'm going to kill you!

As soon as his voice fell, countless mud rose from the ground, forming countless tentacles that swept in all directions.

Blood River King and the others did not show any weakness. Since they had accepted Tang Zhen's storage ring, they no longer had any scruples. Moreover, the enmity with the red Horn King had already been formed. Once he escaped, it was inevitable that he would seek revenge in the future.

In an instant, a river of blood, a ray of Starlight, and a forest of bones appeared, clashing with the tentacles.

The red Horn King had used the power of law, so they naturally had to use the same power of law to resist. This caused the red Horn King, who had originally been prepared to teleport away, to completely lose the best opportunity to escape.

Surrounded and blocked by four law Kings, the red-Horned King, covered in injuries, was no match at all. This also made him go completely crazy in his despair.

"All of you, go to hell!"

At the same time as he roared, Red Horn King punched the ground hard. As the power of law spread, a circular earth wall immediately rose around him, surrounding the entire battlefield.

Under the red Horn King's control, this thick earth wall rose rapidly, and when it reached a height of almost a hundred meters, it directly crashed down towards the group!

Once they were hit by this 10000-ton earth wall, even if they were law Kings, they would be either dead or injured!

Blood River King and the other two did not dare to be careless. They immediately used defensive techniques to resist.

...

A Blood River protected Blood River King, and a translucent winged giant protected silver Wing Emperor. Hundreds of bone claws emerged from the ground, holding the sky above bone Emperor.

The earth wall that fell on their heads was blocked and suspended in mid-air.

In this split second, Tang Zhen had already closed in on the red Horn King. The fire snake flying sword and the soul devouring blade in his hand had simultaneously pierced into the red Horn King's body.

The severely injured Red Horn King glared at Tang Zhen as he let out an unwilling roar, his eyes staring at Tang Zhen.

However, his roar had just been released when Tang Zhen waved his soul devouring saber and directly chopped off his head!

In the abyss prison tower, the law King Red Horn King had died!

[Chapter 1069](#)

1069 Intelligence (1)

Following the death of the red Horn King, the earth wall that was like a collapsing mountain suddenly crumbled into countless dust particles, scattering onto the ground.

As the dust settled, the battle stopped.

Blood River King and the others looked at red-horn King's Head rolling in the dust. They were expressionless, as if his death had nothing to do with them.

However, in their hearts, they were still filled with shock. They never thought that Tang Zhen would actually kill the red Horn King.

This was a law King. How many of them were there in the entire Savage wildland?

Although he didn't know much about the red Horn King, he knew that he was an old-school law King like him, and had been famous for more than a hundred years.

Even though he rarely appeared in the sights of the cultivators in other buildings, his powerful strength was definitely not fake.

If any one of them were to fight against the red Horn King, they might not be able to guarantee that they could kill him. At most, they would end up in a draw.

However, this Tang Zhen had killed the second horn King in front of them without any hesitation. This caused them to be shocked from the bottom of their hearts.

Although Tang Zhen had launched a sneak attack first, his sharp methods could not be faked. Even during the final pursuit, they had only provided assistance.

This was especially so for the entire battle process earlier. They had all witnessed it without missing a single detail. Even now, they still felt fear in their hearts when they saw the seven-colored fire snake that Tang Zhen had released at the end.

As law cultivators, they were naturally aware of the great power contained within this fire snake. They knew that the red Horn king's death at the end was almost 90% due to the seven-colored fire snake.

With their comprehension of laws, they could naturally see some clues. They knew that this seven-colored fire snake was definitely born from a higher comprehension of laws.

If they were to be distinguished by levels, the magic skills they mastered were beginner, and this fire snake was an intermediate skill.

Just by looking at Red Horn King's headless corpse, one could tell that the inside of his body had already been burnt to a crisp, and only his outer shell was left!

If this attack had landed on his body, the consequences would have been unimaginable!

However, didn't this mean that Tang Zhen's strength was a level higher than theirs?

At the thought of this, Blood River King and the other two's hearts trembled, and their eyes instantly became solemn.

Shifting their gazes away from the red Horn King's corpse, the three law Kings looked at Tang Zhen at the same time. A smile quickly appeared on their originally cold faces.

the manhuang King's skills are extraordinary. It's truly admirable!

Bone Emperor spoke first and saluted Tang Zhen as a greeting.

He had always respected the strong. After seeing the scene of Tang Zhen killing the red Horn King, he had the intention to befriend Tang Zhen.

He also had some other thoughts, but now was not the time to speak.

Blood River and silver Wing Emperor also greeted Tang Zhen. Neither of them mentioned anything about the red Horn Emperor, as if he didn't exist.

Now that the red Horn King was dead, and they were considered as accomplices, no one would be insensible enough to mention a dead guy.

Tang Zhen put away the soul devouring saber in his hand and let out a long sigh of relief. He then cupped his hands and bowed to the three law Kings.

"Thank you for your help. If you need this Tang's help in the future, please don't be polite!"

Although he had used three storage rings as a reward for the help of Blood River King and the other two, he still had to make a show of it.

Not to mention that the storage ring he had given them was a rare treasure even in the Wildlands Warzone. If these three people wanted to ask him for help, they would have to pay an item of equal value.

manhuang Wang, you're too kind. With you joining us this time, our chances of success have increased by quite a bit!

Blood River King's voice carried a hint of femininity. After his eyes carefully swept over Tang Zhen, he spoke in a faint tone.

"With the three of you present, this Tang will only be able to help a little,"

Tang Zhen politely replied. Then, he turned his gaze to the cyborg headquarters in front of him. He discovered that thick smoke was already rising from the inside. It was obvious that the king-ranked cultivators had turned the inside upside down!

"This Tang has just arrived, so I don't know the specific situation. I wonder if I can tell you?"

Bone Emperor turned to Tang Zhen and said, after we were teleported here, we quickly gathered together according to the convention of similar missions.

When Tang Zhen heard this, he curiously asked, "I wonder, what is everyone's agreement and Convention?"

Bone Emperor was taken aback, but he quickly explained, "Due to the uncertainty of the cornerstone platform's teleportation location, we will all be sent to different places after we descend.

In order to prevent the mission from failing due to the division of strength, we will deliberately create some noise to inform our companions of the existence.

Although the method is a little simple, the effect is not bad. Especially for this kind of short-term mission, this method of communication is the most direct and straightforward!”

After explaining the method of contact, bone Emperor continued, ” “When we received the cornerstone platform’s orders, we immediately gathered here. During this time, Blood River King controlled a high-level personnel of the cyborg and obtained a large amount of detailed information!

from this information, we can conclude that even if the Cyborg’s headquarters is captured, the enemy will still not be able to find out about this place in a short time.

the enemy’s teleportation device is in the cyborg headquarters. As long as we control this place, we can prevent the enemy from leaving in a short time!

With enough time, we’ll be able to easily seize the energy core and complete our mission.”

Tang Zhen nodded after listening to bone Emperor’s explanation. No wonder they dared to attack the cyborg headquarters without fear. It turned out that they knew the specific information.

However, this was also good. After destroying the teleportation device, it could indeed slow down the enemy’s teleportation speed. It was even possible to leave all the enemies here!

Wait, teleportation device!

However, just as he thought of this, Tang Zhen’s brows twitched as he revealed a trace of heartache.

“This Tang has something to attend to, so I’ll take my leave first. We’ll talk later!”

As soon as his voice fell, Tang Zhen had already headed straight for the cyborg headquarters like lightning.

“What is he doing? why is he in such a hurry?”

“Could it be that there’s something good in the cyborg headquarters?”

now that you mention it, I remember that the teleportation technology mastered by these cyborgs would definitely be a great weapon if low-level cultivators could use it!

The bone Emperor and the other two were a little confused when they saw this. They looked at Tang Zhen’s back and exchanged a few words before quickly flying toward the cyborg headquarters.

...

[Chapter 1070](#)

1070 Transfer hub _1

Looking from the outside, the cyborg headquarters was already riddled with holes. The black smoke was like black dragons dancing wildly, twisting and rushing into the sky.

The entire sky above the city was now covered in thick smoke, which was spreading in all directions.

Tang Zhen’s figure flashed. He followed a damaged area that had been violently torn apart and directly entered the inner area of the cyborg headquarters.

As soon as he landed, he ran into a few 2.5-meter tall cyborgs who were shooting at him with rifles.

It was obvious that they had been guarding this place, waiting for someone to enter before launching an attack.

Although the firearms in their hands were spurting out flames wildly, a trace of panic and worry could be seen on the faces of these cyborgs. The way they looked at Tang Zhen was as if they were looking at a monster.

It was obvious that the cultivators who had entered the tower City first had left a deep impression on the cyborg.

Tang Zhen, who was attacked, coldly snorted. The few cyborgs let out miserable cries as their heads instantly exploded.

change the map and determine the location of the teleportation device immediately!

After Tang Zhen's order was issued, a 3D image immediately appeared in front of him. Numerous red lines crisscrossed and continued to flash past.

In just a few seconds, a red-colored area was marked on the image. It was the transmission device that Tang Zhen was looking for.

immediately crack the code and search for information here. Download and store all the information related to teleportation and weapons!

At the same time he gave the order, Tang Zhen had already quickly chosen the best route to advance and his entire person moved forward like the wind.

Along the way, Tang Zhen didn't even ask about anyone who was blocking his way. He directly used his spiritual force to crush them.

Along the way, there were countless corpses!

When some King level cultivators saw how overbearing Tang Zhen was, they immediately felt dissatisfaction in their hearts. They wanted to stop Tang Zhen and teach him a lesson. However, after sensing the terrifying aura that Tang Zhen emitted, they immediately quieted down.

Rather than provoking a law King, they might as well commit suicide.

However, everyone was also filled with confusion. They had already seen the four law Kings participating in this operation. When had another one appeared?

This meant that there were a total of five origin law Kings participating in this operation?

Thinking about it carefully, this was a good thing!

Although the enemy's situation was unknown, they definitely wouldn't be too weak. Now that there was an additional law King, the success rate would naturally increase by a lot.

These cultivators rejoiced secretly, but they didn't know that one of the law Kings had already been killed by Tang Zhen!

Lou Cheng's side still had four kings of laws!

Tang Zhen did not bother with anyone. He merely continued forward and finally arrived at the area marked on the map.

It was a huge square built underground. It was tens of hectares in area and nearly 100 meters in height. It looked extremely vast.

The steel Sky above his head was filled with all sorts of metal decorations. The style was a little weird, but it also gave Tang Zhen a familiar feeling.

Tang Zhen frowned after taking a few careful glances. Soon after, he turned his gaze back to the center of the square.

In the center of the square, there were four huge craters on the ground, like volcanic craters. However, white light was spewing from the inside, and spots of Starlight were constantly swimming in the milky-white light pillars.

This was the core area of the cyborg headquarters, with four huge teleportation arrays.

According to the quest's hint, it could be concluded that the function of this place was similar to a transit station. At that time, the enemy would appear from one of the teleportation arrays and then enter another teleportation array to leave.

After seeing this scene, Tang Zhen couldn't help but secretly feel that he was lucky. Fortunately, Lou Cheng's cultivators had attacked. Otherwise, if he just waited for the cornerstone platform's order, he wouldn't even be able to see the enemy's shadow.

This was because the process of descending and leaving would be completed in the underground transfer station here, and the outside world could not come into contact with it!

A group of cyborgs were currently making their final resistance around the teleportation array. Compared to the cyborgs that Tang Zhen had come into contact with earlier, the cyborgs before him had been modified even more thoroughly.

Tang Zhen suspected that other than their brains, their entire bodies had been replaced by machines!

&Nbsp; however, the price for this was that these cyborg agents all had the strength of a 2-star Lord.

Relying on their powerful weapons, these cyborg agents were actually evenly matched with Lou Cheng!

Of course, as more and more King-level cultivators arrived and joined in the killing of these cyborg agents, their destruction was only a matter of time.

“BOOM!”

A loud sound was heard as Tang Zhen's figure suddenly appeared on the battlefield. At the same time, a sea of fire directly covered the cyborgs that were putting up a desperate resistance under his control.

The terrifying flames were extremely powerful. Even though the cyborg agents were not afraid of high temperatures, they began to melt in an instant.

Unwilling roars came from their mouths, but they quickly disappeared.

When the cultivators of loucheng city who were attacking saw this, they all stopped their attacks and looked at Tang Zhen's figure floating in the air.

"Who is this person?"

he looks a little familiar. I remember now. He's the Holy Dragon City Master, Tang Zhen!

"Tang Zhen? Could it be the manhuang King?"

"Why is he here?"

The cultivators of loucheng who had already recognized Tang Zhen looked at him with a complicated expression. They had heard many rumors about this human city Lord.

However, this was the first time he had seen Tang Zhen.

Who would have thought that as a city Lord, he would personally take part in the mission? was he the only King level cultivator in the entire Holy Dragon City?

After thinking about it carefully, it was really possible. After all, the Holy Dragon City had only been established for a short time, and it was all thanks to Tang Zhen's strength that it was able to support the current situation.

At the thought of this, everyone's fear of the Holy Dragon City lessened a little. After all, in the world of loucheng, an individual's bravery could never compare to the strength of the entire loucheng.

In the end, the cultivators of loucheng were only a part of it!

Just as the cultivators of the city were discussing among themselves, bone Emperor and the other two had already rushed in and stopped in all four directions of the square.

...

The auras of the four law Kings made the cultivators in the building city feel heavy. They looked up at the sky, waiting for the next development.

However, there were also some who were secretly puzzled. Why had only four law Kings appeared? where had the red Horn King gone?

This suspicion did not last for a long time. Very quickly, there were people who privately spread the news of Tang Zhen killing the red Horn King.

After all, the scene of the battle just now was so shocking that it was not strange for the cultivators of loucheng to notice it. In fact, at least twenty cultivators of loucheng had witnessed the whole process.

When they found out that Tang Zhen had killed the red Horn King, all the cultivators in the tower trembled. When they looked at Tang Zhen again, their eyes were filled with fear and respect.

He had actually killed a law King in public. This Tang Zhen's courage had really pierced through the heavens!

As the city Lord of a level 9 city, wasn't he afraid of the black prison tower's revenge?

Perhaps, it would not take long for a life-and-death battle to occur between the Holy Dragon City and the black prison tower!
