

## Alternate 1071

### [Chapter 1071](#)

1071 Closing the teleportation array (1)

Tang Zhen did not have the slightest regret in killing the red Horn King.

Even if the strength of the black prison tower City was above that of the Holy Dragon City, they would definitely take revenge on the Holy Dragon City because of this matter.

This black prison tower was like a hungry wolf hiding beside the Holy Dragon City. It always wanted to tear the Holy Dragon City to pieces and devour it. Moreover, they had already bared their fangs and used despicable means to plot against the Holy Dragon City.

Back then, if Tang Zhen had not travelled thousands of miles and destroyed two of the spirit fall battle zone's buildings, who knew what Holy Dragon City would be like now?

If Tang Zhen was able to endure under such circumstances, it would not be his character.

Killing the red Horn King was only the beginning of Tang Zhen's revenge. After the Holy Dragon City completed this invasion mission, the first thing Tang Zhen would do was to destroy the black prison tower!

Even though the black prison tower was currently carrying out the mission of invading the other world, Tang Zhen still had a way to make them stay in the other world completely!

Of course, this matter could not be rushed. At the very least, it had to wait until the completion of this mission!

Following Tang Zhen's attack, the final resistance of those half-mechs also directly collapsed.

Other than the broken corpses on the ground, there were only cultivators from Lou Cheng left in the square.

all cultivators in loucheng, stay where you are and wait for the enemy to arrive. Then, we'll give them a fatal blow!

Tang Zhen's voice slowly spread across the square. It carried a trace of unquestionable aura, causing everyone to subconsciously choose to obey.

Of course, this also had to do with his status as a nomological King and his battle record of killing the red-Horned King. Otherwise, these rebellious cultivators of loucheng might not have been willing to bow to him.

When he saw the cultivators in the city starting to rest in the square or take the opportunity to search for spoils of war, Tang Zhen's figure slowly approached the four teleportation arrays.

Bone Emperor and the other two also followed after him. They wanted to see what Tang Zhen was up to.

Tang Zhen's eyes continued to search as his feet stepped on the solid ground. He wanted to find out what was special about this teleportation formation.

It was different from the runic teleportation circle he had come into contact with before. The teleportation circle guarded by the half-robot had no traces of a runic magic circle at all. It looked like a pure technological item.

However, this kind of teleportation array could achieve inter-world teleportation. This was the thing that Tang Zhen was most interested in.

If he could master this technology, then Holy Dragon City could freely teleport between Holy Dragon City and the original world, as well as the invaded foreign world.

The greatest limitation to Holy Dragon city's development would also be completely broken.

It was different from other buildings. The residents of the original world did not need to worry about turning into monsters after entering Holy Dragon City. Tang Zhen had already noticed this abnormality.

As for the reason, Tang Zhen had thought about it for a long time and thought that there were only two possibilities.

Either the humans in the original world had some kind of relationship with the world of loucheng, or they were the descendants left behind by loucheng, so they did not turn into monsters.

Or, it could be his phone. It was because of its interference that the restriction of outsiders becoming monsters did not happen to the humans in the original world.

It was easy to verify. As long as he brought the Aborigines from the other world to the loucheng world, he would know what was going on.

It was a pity that both Lou Cheng's teleportation and his mobile phone's teleportation couldn't bring the natives along for a normal teleportation. If he were to teleport by force, it wouldn't have any experimental effect at all.

Therefore, the best way to test it was to build a portal.

This matter was very important to the Holy Dragon City. Tang Zhen had already ordered people to do it, and it would probably be effective soon.

Bone Emperor and the other two thought Tang Zhen was thinking about how to close the teleportation formation, so they gave him suggestions.

"We have to shut down this teleportation formation. Otherwise, once the enemy teleports here and discovers our existence, they might immediately teleport away again."

Bone Emperor looked at the four teleportation pillars and said with certainty.

but do you know that the enemy is coming through that teleportation light pillar? if we turn it off wrongly, the enemy will not be able to teleport over, and all our efforts will be in vain!

The silver Wing Emperor immediately retorted.

Hearing this, bone Emperor turned to Blood River Emperor.

“Can’t you control the blood slaves and read their memories? can you find any information about this teleportation formation?”

When Blood River King heard this, he immediately turned to the silent Blood River King and asked with a hint of anticipation.

Blood River King shook his head and explained, “The existence of the half-mechs is to guard this transfer station. They are only responsible for the Guard’s work. The operation of the entire transfer array has nothing to do with them!

Therefore, it’s better to rely on ourselves than on the cyborg to shut down the teleportation array.”

Everyone looked disappointed when they heard Blood River King’s words. It was clear that the risk of the mission had increased by quite a bit.

However, if they were to fiddle with these high-tech items, the entire teleportation array would be completely destroyed if they were not careful!

Thinking of this, bone Emperor and the other two were at a loss.

At this moment, Tang Zhen, who had been silent the entire time but was observing and researching unceasingly, attracted their attention.

“Manhuang King, do you have any ideas?”

After hearing the silver Wing Emperor’s question, Tang Zhen turned his head and lightly nodded.

“This tang can try. Even if I can’t succeed, I won’t destroy this transfer array!”

The bone Emperor and the other two were pleasantly surprised when they heard this. Although they didn’t understand why Tang Zhen was able to operate the teleportation array, they still had a trace of hope.

After all, he had already said that even if he could not succeed, he would not destroy it.

Under everyone’s anticipating gazes, Tang Zhen slowly walked to a spot on the ground near the teleportation formation. After which, he extended his hand and gently pressed.

A platform rose up from the ground. It looked like a crystal-clear jade platform with a pattern flashing on it.

Tang Zhen’s brows slightly shrunk after seeing this pattern. However, it quickly returned to normal and he walked to the front of the platform.

As he got closer, the [ universal electronic kit ] was activated and began to crack the code to obtain access to the operating platform.

From an outsider’s point of view, Tang Zhen was just standing in front of the operating platform with a pondering expression. He just didn’t make a move.

Bone Emperor and the others could not help but feel a little suspicious when they saw this. They secretly guessed that Tang Zhen was just boasting.

...

The king level cultivators in the distance were also discussing in private. They didn't know what Tang Zhen was doing.

"Do you think he really knows how to operate this thing?"

I don't know. I don't understand it anyway. My head is bigger than before.

the king of the wilderness wouldn't do something he's not confident in. Just wait and see!

"Let's hope it works, otherwise all our efforts will be in vain!"

Just as everyone was discussing, Tang Zhen suddenly stretched out his hand and started to operate on the platform.

Rays of light continuously appeared on the platform as he operated. At the same time, complicated geometric patterns also appeared and disappeared under everyone's gaze.

At the same time, groups of characters that no one could recognize appeared on the platform. Tang Zhen then randomly selected them.

It wasn't the first time Tang Zhen had seen these three dimensional words before his eyes. This caused his expression to become even gloomier.

## [Chapter 1072](#)

### 1072 A familiar enemy (1)

In fact, Tang Zhen's heart was also a little uneasy.

From the moment he received the special recruitment order, Tang Zhen had a premonition in his heart that the mission this time was definitely not simple!

Gathering hundreds of King level cultivators just for one energy core was a first for him.

Therefore, ever since he descended into this world, Tang Zhen had been constantly searching for information related to the mission. His actions were not particularly high-profile.

Of course, other than killing the red Horn King, this fellow was a huge threat to the Holy Dragon City. Tang Zhen would definitely not let him off.

In the end, Tang Zhen still discovered some clues. After a final confirmation, he knew that his premonition was indeed correct.

The enemy this time around did indeed have a great background. Moreover, Tang Zhen was not unfamiliar with them.

Moreover, the Holy Dragon city's main city Tower was inextricably linked to the enemy.

They were the people who controlled many planets, had powerful armed battleships, and powerful warriors!

To this day, the wreckage of the terobo warship that had mistakenly entered the world of loucheng was still docked in the wilderness outside Holy Dragon City, dismantled and in a mess.

It was also because of this reason that Tang Zhen had a deeper understanding of the powerful technological power of the terobo people.

They only needed one star-destroying bomb to completely wipe out an entire country!

It would be a nightmare to fight against such an enemy.

However, Tang Zhen also knew that the world of loucheng and the star region controlled by the terobo people were separated by an unknown distance. The chances of both parties crossing paths were extremely low.

However, he did not expect that after such a long time, he would come into contact with the tribesmen, and even start a war with them!

This bizarre fate really made Tang Zhen not know whether to laugh or cry.

However, Tang Zhen could not understand why the cornerstone platform would be involved with the tribesmen and even claim that the tribesmen had stolen the energy transmission core!

For such a situation to occur, it was either the world of loucheng had invaded the tribesmen's Starfield, or the tribesmen had tracked it down and killed their way to the place of invasion!

No matter what the truth was, it meant that the world of loucheng would no longer be peaceful in the future.

Perhaps one day, the tribesmen would invade the world of loucheng on a large scale, or perhaps countless loucheng would fall from the sky and wreak havoc on the tribesmen's star field!

If the war really happened, many buildings would be completely destroyed!

While he was thinking about these things, Tang Zhen had already completed the operation and finally pressed the "confirm" button.

Under everyone's gaze, the three pillars of light from the teleportation arrays suddenly disappeared, leaving only one pillar of light that was still flashing with a dazzling white light.

"This is it, can it work?"

"The manhuang King wouldn't do something he's not confident in, right?"

"Who knows? if there's a mistake, all of our efforts would have been in vain."

"Look at what you're saying. Try it with your ability. I'm afraid that you'll only open your eyes wide!"

Blood River King and the others watched as the three light pillars disappeared. They couldn't help but reveal a happy expression. They smiled at Tang Zhen and said, I didn't expect the manhuang King to have such a method. This has really opened our eyes.

I know, right? every time I invade a world like this, I get a headache.

looking at the manhuang King, he's obviously very confident. We can rest assured now!

The three law Kings laughed and talked with relaxed expressions. They were clearly more confident about the upcoming battle.

Unfortunately, they didn't know how terrifying the enemy they were about to face was!

Since the teleportation formation had been shut down, the next thing to do was to wait for the enemy to arrive and launch the final attack.

Tang Zhen chose to rest at the same spot. Blood River King and the others were also at the side. They would exchange a few words with each other from time to time.

Tang Zhen would never miss such an opportunity. This was because he could obtain a lot of secret information about the loucheng world through this opportunity.

For example, this was the first time Tang Zhen had participated in the special recruitment order. However, Blood River King and the others were not unfamiliar with it.

In other words, this wasn't the first time the cornerstone platform had issued such a special recruitment order.

Bone Emperor told them about their past while Tang Zhen listened attentively with an interested expression.

Seeing the manhuang King so interested in his own experiences, the three law monarchs were also interested. They also began to share their experiences in the other world.

After both parties conversed for a period of time, Tang Zhen got up and began to wander around the cyborg headquarters in search of items that interested him.

To ensure the safety of the transit station, the teroboros had put in a lot of effort. Not only did they control the natives and modify them, but they also deployed many defensive weapons.

Unfortunately, for King level cultivators, even though this weapon was powerful, it couldn't stop them.

Perhaps the original intention of the tribesmen was to use these weapons to intimidate the natives and not to defend against the king-level cultivators!

Although the place had been reduced to ruins by the king level cultivator, there were still many good things left.

The cultivators in the tower City might not know what was good, but Tang Zhen would definitely not miss it. After he brought it back to the Holy Dragon City to study and crack it carefully, it would definitely increase the Holy Dragon city's combat strength once again.

After making a huge detour, Tang Zhen, who had obtained quite a bountiful harvest, returned to his original spot and waited with a grave expression.

.....

In a distant unknown world, a group of Warriors in full-metal armor were cleaning up the battlefield.

The surroundings were covered in corpses and the scene was extremely tragic. A huge city was surrounded by fire and was collapsing in the midst of rumbles.

Looking at the clothes of the dead, they were clearly cultivators of loucheng city!

On the blood-soaked ground, the soldiers held huge firearms and pulled the trigger from time to time, killing the cultivators who had not died yet.

In the process of cleaning up, there would also be cultivators of loucheng who were covered in blood. They would jump up from the corpses and die after a round of fighting.

the battle is over. Seal the cornerstone platform and we'll return immediately!

...

A man with a damaged armor and two metal balls floating above his head said to his companion in a low voice.

Following the order, the bodies of their fallen comrades were gathered and sent to the distant warship.

At the same time, dozens of soldiers were loading metal boxes onto the transport trucks. From their careful expressions, one could tell that the items in these boxes were quite valuable.

When all the work was done, the huge warship slowly rose into the air and headed straight for the sky.

### [Chapter 1073](#)

#### 1073 Scheme (1)

The cyborg headquarters, which had just experienced a bloody battle, was very quiet.

Beams of sunlight shone in from the broken hole in the dome. The dust flew in the air, making the messy environment visible.

Broken items, incomplete corpses, and traces of blood splattered everywhere made the atmosphere even more depressing.

Chi Chi Chi Chi

At the edge of a shallow pit filled with blood, a few rats sneaked in. After looking around for a while, they surrounded the remains of a cyborg and tore at the muscles attached to the metal.

“Whoosh!”

A sharp sound rang out, and one of the rats suddenly disappeared, scaring the other rats into fleeing in all directions.

“Crack!”

Behind a collapsed pillar not far away, a cultivator with a cat head and a human body was chewing on a mouse. A part of the tail was still hanging from the corner of his mouth.

“The taste is not bad, it’s chewy!”

The non-human King with a mouth full of blood complimented. He waved his hand at a corner in the distance, and a few mice squeaked and flew toward the Cat-Man king.

The cat-person king’s mouth opened wide, and he swallowed the rats in one gulp with an expression of enjoyment.

There were four to five other King level cultivators sitting beside this Cat-Man king. They all had different appearances, but they ignored the Cat-Man King’s actions.

It’s just eating a few rats, what’s the big deal? some of them have even eaten their own kind!

However, everyone’s mood was clearly a little anxious.

It was rare for a King level cultivator to experience such a situation. The reason for this was because of Tang Zhen’s words.

Half a day ago, after a discussion with bone Emperor and the other two, Tang Zhen had gathered all the cultivators of loucheng who had participated in the mission and told them something.

The cornerstone platform had not announced the enemy’s information for a long time, but Tang Zhen already had a rough idea. In order to prevent the Lou Cheng cultivators from underestimating the enemy, he revealed some information related to the enemy.

This matter had indeed piqued the interest of the cultivators in loucheng. After all, no one wanted to fight an enemy they didn’t know about, as they would definitely be at a disadvantage.

Tang Zhen’s actions immediately won the favor of many King rank cultivators.

However, as Tang Zhen continued to narrate, the cultivators’ expressions turned solemn. The trace of arrogance in their hearts was also restrained.

It was because the enemy’s strength seemed to be much stronger than theirs.

“Our enemy has very powerful technological weapons. They control at least one planet and can pilot a warship to travel in the universe. They can perform long-distance teleportation and can destroy a country with a bomb.

Even if a King level cultivator could teleport, they wouldn’t be able to teleport out of the explosion’s range. They might just be turned into dust!

Their soldiers had near-perfect bodies, and with special modifications, their strength was at least above the Lord level. With all kinds of high-tech weapons, they could definitely pose a fatal threat to King level cultivators!

Although King level cultivators were above ordinary life forms, they weren’t immortal. Once they were hit by an enemy’s weapon, they would die instantly!

Thus, once we attack, we can’t give them any chance to counterattack. We have to end this battle as quickly as possible!”

After hearing Tang Zhen's introduction, those King level experts became silent. Although they were very confident in their own methods, it didn't mean that they were conceited.

They had grown up in blood and fire, so they naturally knew that when facing an enemy with almost the same strength, they would be the ones to die if they were not careful!

It was precisely because of Tang Zhen's words that all the cultivators in Lou city felt a trace of pressure. As time passed and the enemy was about to arrive, the pressure became greater and greater.

Fortunately, other than the king-level cultivators who did not enter the cyborg headquarters, all the cultivators who had participated in the siege did not choose to withdraw because of Tang Zhen's words.

No matter what these cultivators were thinking, it wasn't easy for them to do this.

After seeing that everyone already knew the specific situation, Tang Zhen and the other three law Kings began to discuss how to deal with the enemy.

The enemy's firepower was strong, and it was obviously not suitable to fight head-on, so it was best to adopt some strategies.

Therefore, Lou Cheng, who was used to fighting with his enemies head-on, also began to rack his brain and plan.

Everyone put their heads together and quickly came up with a plan. After a few rounds of deliberation, they confirmed that there should not be any major problems.

Since the participants of this mission were all King level cultivators, they naturally had their own unique skills, so they had to make use of them.

The first thing he had to do was to create an illusion for the teroboros, that there was nothing wrong with the transit station, and that it was not under attack.

Thus, everyone acted at the same time and completely cleaned up the surroundings of the teleportation array. The damaged areas were also quickly repaired and replaced, looking as good as new.

Then, a Holy master skilled in illusions would make a false illusion to make the enemy think that the place had always been operating normally.

However, due to some accidents, the teleportation array had a problem. Therefore, Tang Zhen and the other human and demi-human cultivators disguised as the higher-ups of the cyborgs would ask the terobo people for help in repairing it.

Once the torobo people opened the cabin door and walked out, cultivators who were proficient in stealth would sneak into the warship and quickly control and kill the people inside!

After that, Tang Zhen and the others would take action and kill the enemies outside the warship. At the same time, they would seize the energy core!

This was the plan that Tang Zhen and the others had formulated. It wasn't too complicated. However, they had to be careful when executing it. No mistakes could be made.

After all, with the other three teleportation formations shut down, the tribesmen had no chance of leaving. However, they could still use their warship weapons to launch a terrifying attack on the cultivators in loucheng.

If the teroboros people wanted to leave, they would have to help check the teleportation formation's faults. This way, the cultivators of the building could take advantage of the opening and destroy it from the inside.

Even if the torobo people were strong, without their warships, they were just a bunch of lambs waiting to be slaughtered!

After the operation plan was formulated, they began to select the personnel to execute the plan. The most important ones were the Holy Masters who would set up the illusion and the people who would sneak into the warship.

Normally, it would be almost impossible to find so many good hands.

However, there were many talented cultivators participating in this mission, so it didn't take much effort to gather the relevant manpower.

When all the troops were in position, the cultivators in the other buildings would hide and wait for orders while they waited for the torobo people to come!

#### [Chapter 1074](#)

##### 1074 The enemy's arrival \_1

In the underground space of the cyborg headquarters, the only remaining light pillar made a soft sound and then changed color.

The originally invisible light began to squeeze and twist as if it were a solid entity. Then, a majestic power erupted, as if it was going to tear the space apart.

However, if one were to sense it carefully, they would discover that this was not a violent tearing. Instead, a strange power was used to guide the stable spatial power to an unknown area, building a passage composed of light between the two sides!

This passage was built on a higher dimension, so it would not be hindered by any obstacles, unless it was destroyed by the creatures of this dimension.

Of course, the probability of such an accident happening was very low.

After that, the object traveling in this special passage would continue to accelerate and cross the passage in an extremely short time to reach the destination of the teleportation!

The light pillar at the transit station was the end of the passage, and something was being transported from the other end.

The already extremely quiet atmosphere suddenly became even more deathly silent at this moment. Even the sound of breathing completely disappeared.

"Swish!"

There seemed to be some kind of sound, and a huge light screen immediately appeared around the teleportation array, directly wrapping it up.

Its function was to offset the energy tide that would erupt instantly after the transmission ended, so as to prevent the entire transmission transit station from being destroyed.

This was a very crucial step. If they couldn't do this, it wasn't impossible for half of the planet to be blown up!

Just as the strange sound was heard, a 300-meter-long warship suddenly emerged from the pillar of light. It was quietly suspended about two meters above the ground.

Streams of colorful liquid energy retreated from the outer shell of the warship like a tide and then disappeared.

“Huala”

After the appearance of the battleship, the deathly silent teleportation transit station seemed to come to life. There was a burst of conversation, and busy figures suddenly appeared in this underground space.

Not far away from the teleportation array, there were also muscular figures in black uniforms. They looked at the warship that had just appeared with fanatical and nervous expressions.

After nearly five minutes, the destructive energy from the teleportation dissipated, and the surrounding light curtain closed.

Everyone's eyes fell on the warship, as if waiting for the other party's order.

A cold and emotionless voice suddenly sounded in the underground space. There was a hint of dissatisfaction in the voice.

“What's going on? Why have the other three teleportation formations been shut down?”

At the same time, a one-meter-wide cannon at the front of the warship had begun to charge and was ready to fire at any time!

After seeing this scene, the faces of the cyborgs' upper echelons turned ashen in fear.

“I'm sorry, Yingluo, I'm sorry, Sir. The teleportation array has suffered a major malfunction. We can't do anything about it!”

The leader of the cyborgs was nearly three meters tall and looked extremely majestic. However, at this moment, it was as if he had no bones. His face was full of helplessness and fear.

The cyborgs behind him were also terrified as they looked at the charging cannon.

The cyborgs in the distance knelt on the ground and trembled.

After hearing the cyborg leader's explanation, the same voice sounded again, but it seemed to be more angry.

the teleportation arrays boast regular inspection and automatic repair functions. Even if they have been running for a thousand years, they will never have any faults. But three of them have been shut down at the same time. How can there be such a coincidence?

Or do you have evil intentions and want to harm us?"

As soon as he said that, the light from the muzzle became more and more dazzling, as if it was about to be fully charged.

Once the muzzle of the cannon shot out flames, the entire underground space would be completely turned into ruins!

It seemed that everyone was frightened. Their cries for mercy were endless, and some people had even begun to escape.

The people inside the warship seemed to have seen this scene, and the charging muzzles finally dimmed.

Hmph, I don't think you have the guts. However, I won't let this matter rest!

The voice rang out again, and a hatch suddenly opened on the warship. Then, a strong figure slowly walked out of the blue light.

His body was filled with an aura of Iron Blood and cruelty. A pressure that made people tremble in fear spread as he approached.

After the blinding light faded away, the crowd discovered that this person was wearing a set of seemingly extremely heavy battle armor, which was full of marks left behind by blades and axes.

It was as if just a moment ago, he was still killing enemies on the battlefield, with the smell of gunpowder and blood still lingering.

Behind him was a group of Warriors in armor. They were all murderous and were staring at the half-robot higher-ups through their masks.

The cold muzzles were also pointed at the upper echelons of the cyborgs, ready to fire at any moment.

Their eyes seemed to be filled with mockery and disdain, as if they did not care about these cyborgs at all.

tell me, what happened? why did the teleportation array suddenly close? "

The man in the lead said in a calm tone. His sharp eyes fell on the cyborg leader with a strong killing intent.

The cyborg leader wiped the non-existent sweat on his forehead and took a step forward carefully. He then said in a flattering tone, " Sir, please listen to me. This was definitely an accident. We don't know what happened either. The teleportation array suddenly closed!

The man in the lead seemed to be thinking about something when he heard this. He turned to look at the attendant beside him.

“Go and check. If they did something, Hmph!”

for him to say such words in front of the cyborg leader, it was obvious that he did not take them seriously. Perhaps in the eyes of the teroboros, the cyborgs were just their servants.

After hearing the commander’s order, an attendant stepped out of the crowd and went straight to the control platform.

After seeing this, the cyborgs ‘higher-ups seemed to be looking forward to it.

After witnessing the performance of the higher-ups of the cyborgs, the teroborans seemed to believe that this was all an accident.

However, no one noticed that while the crowd was focused on the terobo man who was walking toward the control platform, a dozen tiny shadows were sneaking into the cabin door.

a cold light flashed in the cyborg leader’s eyes when he saw this, but it disappeared in the blink of an eye.

...

## [Chapter 1075](#)

### 1075 Attacking the interior of the warship

Under everyone’s gaze, the terobo man in charge of the maintenance was lifting the operating platform with ease.

Next, he was seen operating on the platform continuously, groups of dense characters were continuously inputted.

At the same time, a series of images appeared in the sky above the platform. They were the three-dimensional images of the four teleportation arrays, showing all the details and operation records.

When his eyes swept across one of the sets of data, his expression suddenly changed. He turned to look at his companion not far away without hesitation.

something’s not right. There’s something wrong with the data here. The three teleportation arrays were shut down by someone!

However, just as he said this, he suddenly stopped and his face was filled with fear.

A sharp white bone spur had pierced through his armor, and blood was dripping from the back of his heart.

The terobo warrior struggled for a moment, and his raised arm fell limply.

It all happened so suddenly that the teroboros people were all stunned and could not react in time.

“Huala”

Like a broken mirror, the half-mechs that were busy in the distance disappeared without a trace, replaced by a pile of ruins.

At the same time, cultivators of loucheng city with swords and sabers in their hands and ferocious killing intent on their faces also appeared!

“Not good, quickly attack!”

This sudden change shocked the teroboros people even more. They raised their weapons without hesitation and fired out a barrage of bullets.

Just as the terobo leader cried out in alarm, the obsequious cyborg leader suddenly took a step forward and launched an attack with a sinister smile.

“Pfft!”

A battle sword that was spitting out black flames pierced through his body. The heavy armor didn't stop it at all.

At the same time, a terrifying flame burst out and engulfed the few terobo Warriors who had just raised their guns.

The terrifying flames instantly melted their armors. They didn't even have time to scream before they were turned to ashes.

Terrifying figures charged at the torobo Warriors with lightning speed, killing them all with a swing of their blades!

in the blink of an eye, the torobo Warriors that had stepped off the warship were all killed. At the same time, the sounds of fighting could be heard from within the warship.

“Hey, hey, you guys!”

The terobo leader let out an unwilling roar as he watched the cyborg leader in front of him transform into a young man in purple gold armor.

Who else could it be other than Tang Zhen?

“Bang Bang Bang”

A ball of fire burst out from the inside of the torobo leader's armor. Fire snakes danced out and burned his body into ashes!

Bone Emperor and silver Wing Emperor also appeared behind Tang Zhen. They looked at each other and then flew toward the door.

In the blink of an eye, the group had already charged into the warship and began to fight with the torobo Warriors.

The torobo Warriors, who were wearing heavy armor, relied on the objects inside the battleships to fire at the cultivators in the loucheng area, causing sparks to fly in all directions.

Even the cultivators in the building couldn't resist such dense firepower. They could only think of ways to counterattack while slowly advancing.

But king class cultivators weren't that simple. It didn't take long for them to break through the outer blockade and enter the interior of the battleship.

It was also at this moment that they encountered even more intense resistance. The figures of the terobo Warriors almost filled the entire warship's corridor.

A few King level cultivators were hit by the barrage of bullets in the middle of the battle, and their bodies were covered in bloody holes.

From the looks of it, even if they were lucky enough to survive, they would need a lot of time to recover!

"Quickly finish them off, or else there will be changes!"

One of the king level cultivators shouted, and a protective shield appeared out of thin air. He rushed into the bullet screen and threw an item at it.

After this fist-sized object landed on the ground, it suddenly released a terrifying power, as if it had frozen the surrounding air.

the attacking torobo Warriors all felt their movements freeze, unable to move.

Before they could figure out what had happened, the small ball suddenly shrank to the size of a sesame seed. The surrounding air seemed to collapse at the same time. Under the pull of this force, a series of flesh-tearing sounds rang out.

The bodies of the terobo Warriors, who had been frozen in their movements, were torn into pieces like shattered paintings!

Even though their bodies had been shattered, they were strangely suspended in the air. Not even the blood that gushed out dripped down.

"Collect!"

The king class cultivator who had launched the attack growled. The sesame-sized object quickly flew back into his hand and he carefully put it into his pocket.

"Huala"

As this strange item was taken back, the broken corpses that were floating in the air all fell to the ground, filling the ground.

"Everyone, hurry up and charge! If we're slow, we won't get a share of the quest item!"

With a loud roar, the figures of the king level cultivators quickly rushed through the bloody passage and into the battleship.

The interior of the battleship wasn't very big. A group of cultivators from loucheng city, who were as fierce as wolves and tigers, had already approached the core area.

Compared to the outer area of the battleship, the battle here was even more brutal, with blood and traces of damage everywhere.

Tang Zhen and the other four great law Kings were currently surrounding a tall man. Their eyes were filled with ice-cold killing intent.

The man's armor had completely shattered and he was covered in blood. Even the mask on his head had completely shattered, revealing a determined face that was coldly looking at Tang Zhen and the others.

White bone chains pierced through his body, and there were still clusters of flames burning on them.

As the white bone chains shook, the man's body kept twitching, as if he was enduring great pain.

...

However, from the beginning to the end, he did not let out a single groan of pain. It was clear that he was a person with extremely strong willpower.

"Tell me, How do I open the secret room where the energy core is placed?"

Bone Emperor's voice rang out as he stared at the man, and the bone chains shook again.

The other cultivators of Lou city also stared at the man with a trace of passion in their eyes.

They had already confirmed the location of the mission items, but the secret room was heavily guarded. If they broke it open with force, the items inside would immediately be destroyed.

Helplessly, they could only leave the highest-ranking officer of this battleship behind and try to force the way to open the secret room.

Unfortunately, the brawny man's mouth was surprisingly tight. Even though bone Emperor had tortured him, he still refused to speak.

Tang Zhen coldly looked at this scene. His mind was already controlling the [ all-purpose electronic kit ] to try and crack the way to open the secret room.

However, the difficulty of this password was beyond Tang Zhen's expectations. The mobile phone application had already been cracking for more than ten minutes, but it still couldn't be cracked!

This was the first time Tang Zhen had encountered such a special situation. A dense curiosity suddenly rose in his heart.

The secret room was so heavily guarded, so what exactly was inside?

...

## [Chapter 1076](#)

### 1076 The vexed bone Emperor (1)

While Tang Zhen was secretly breaking into the secret room, the interrogation in the central area of the battleship was still ongoing.

Bone Emperor's face was gloomy. He was an interrogator, but he didn't get any information in front of Tang Zhen, the other two, and hundreds of King level cultivators.

'This damn torobo man's bones are so hard.'

Bone Emperor felt as if his face had been slapped, and it even felt a little hot.

He was even feeling a little regretful now. He should not have jumped out to interrogate this terobo man just because he was in a hurry to get information about the mission item.

There were so many cultivators in Lou city, why did they jump out to be the big boss? why didn't they observe more?

Bone Emperor thought gloomily. The cold light in his eyes grew even colder. When he looked at Captain torobo, it was like he was looking at a corpse.

He really wanted to give up on the interrogation and then cut this guy who made him unhappy.

However, if he gave up now, he would become a laughingstock. For bone Emperor, who always valued his status, this was worse than being cut by a knife.

The more he thought about it, the more he felt stifled!

Under everyone's watchful eyes, bone Emperor's eyes flickered with killing intent. Sharp bone spikes jutted out of the bone chains that extended from the bone armor.

The bone chain had pierced into Captain torobo's body and kept on vibrating. It was a painful thing to do.

However, as the bone spikes on the chains appeared, the pain intensified. Captain torobo's face convulsed and his body trembled as if he had been electrocuted.

The bone spikes pierced through his skin and revealed themselves. At the same time, they were constantly vibrating, causing his blood to gush out like a fountain.

Captain torobo was instantly covered in blood!

"Creak creak creak creak creak creak"

A series of teeth grinding sounds came out of Captain torobo's mouth. It sounded quite horrifying.

Even so, the captain of torobo still did not speak. He only stared with his blood-red eyes and chuckled hoarsely.

His cold and cruel eyes were filled with contempt and contempt for low-level species.

After seeing this scene, the onlookers were moved. Their originally cold and playful eyes also had a trace of respect.

The cultivators of loucheng had been fighting in the sea of blood all their lives. They valued heroes more than life and death. They would give a man of iron and steel enough respect even if he was an enemy.

However, bone Emperor wasn't among them. He was so angry that the bone armor he was wearing was glowing red.

Some cultivators who were familiar with bone Emperor were shocked and took a few steps back.

Unlike the other cultivators in the city, the armor worn by bone Emperor was actually refined by his own bone armor and forced out of his body after devouring the bone armor of many King-tier monsters!

Not only was this battle armor extremely strong in defense, but it also had many special effects. Moreover, it could recover in an extremely short time after being damaged.

At the same time, the cultivator's perception ability would also be greatly enhanced, making the cultivator like a tiger with wings!

However, although this armor was strangely powerful, it was like another layer of skin for cultivators. When they suffered a heavy blow, the pain from the reflection could almost drive them crazy!

Only those who were masochistic and did not care about their own lives, or those who were battle maniacs who would do anything to improve their combat power, would choose this kind of armor.

Most of the cultivators in Lou city knew a thing or two about this famous special armor and its characteristics.

Once bone Emperor's armor changed, it meant that he was ready to kill.

Blood River King had been nonchalant about it, but when he saw bone Emperor turn red, he immediately shouted, " Blood River King!

bone Emperor, don't let your emotions get the better of you. This man will determine the success or failure of this mission. Do you think everyone will let you go if you kill him? "

Blood River King had brought up the cultivators from the other loucheng to make Bone King wary and not dare to kill Captain torobo.

Of course, he also wanted to warn the cultivators in Lou Cheng that Bone King was about to kill them!

If it hadn't been for this warning, the bone Emperor would've been too fast for them to stop it.

Sure enough, as soon as Blood River King shouted this, the cultivators of loucheng city who had been watching immediately looked at Bone King with vigilance, fearing that he would suddenly attack.

Tang Zhen and the others also took a step forward, using their actions to express their attitude. Once the bone Emperor really made a move, they would definitely let the bone Emperor know what it meant to not offend the anger of the masses!

As Tang Zhen and the other two law Kings expressed their opinions, some of the other law Kings present also stood up and looked like they were at their beck and call.

In order to not let their own interests suffer, these unruly King level cultivators stood up without any hesitation.

The Furious bone Emperor was stunned for a moment. He glanced at the crowd with a cold look and suddenly chuckled.

"What do you mean? when did I say that I was going to kill this man?"

Hearing bone Emperor's words, everyone sneered in their hearts, but their worries were somewhat alleviated.

The fact that the bone Emperor had said such a thing meant that it would not make a move, or at least not kill Captain torobo before it could force an answer out of him.

However, just as the cultivators' nervous mood eased a little and they were about to switch to another person to continue the interrogation, Captain torobo, who was already covered in blood, suddenly spoke.

After hearing the weak voice, all the cultivators turned to look at Captain torobo, who was still holding himself up and half-kneeling on the ground.

The other party had finally spoken, but why couldn't he understand a single word he was saying?

Everyone looked at each other with a trace of inquiry in their eyes. The meaning was very obvious.

Brother, my foreign language is not up to standard. Can you understand what this stinky and hard guy is saying?

The answer was obvious. It would be weird if these guys could understand the language of the terobo people.

The silver Wing Emperor's beautiful eyebrows were almost twisted together. She glanced at Captain torobo, who was sneering, and said to Blood River Emperor, "Blood River King, aren't you able to control the blood slave? why don't you give it a try?"

Lord Blood River smiled wryly and shook his head at the cultivators who were looking forward to it. He said reluctantly, "Everyone, to be honest, my secret technique actually has a lot of restrictions. The weaker the willpower, the better the effect!

Many of you have seen me torture the blood slaves, So You Think I'm cruel and perverted. But that's not the case.

Only enemies whose willpower has been greatly weakened after being tortured will be more likely to be enslaved by me!"

...

After saying that, Blood River King glanced at Captain torobo and said in a helpless tone, "Even if I don't say it, you guys know how hard this guy's bones are. Using a secret technique on him is just a waste of energy."

Everyone looked disappointed when they heard this.

If that's the case, I'm afraid this mission is going to be ruined.

## [Chapter 1077](#)

1077 The teroboros people's contempt (1)

After hearing Blood River King's explanation, all the cultivators were slightly taken aback. They looked at him with a strange look.

Blood River King's name was well-known in the wilderness Warzone. Almost 80% of the cultivators in Loucheng had heard of his name.

It was said that this fellow's Secret technique was extremely terrifying. Once he controlled the blood slave, there was no longer any secrets to speak of. As long as Blood River King asked, the controlled blood slave would even spill everything about how it wet its bed when it was young.

Leaking his privacy was secondary. The most important thing was that once he was controlled by Blood River King to become a blood slave, his blood essence would be continuously absorbed by him. He would die within a year!

It was said that once, a King level cultivator had offended Blood River King and had to hide his name and travel far away. He even changed his appearance on a daily basis for fear that his identity would be recognized and he would be hunted down by Blood River King.

However, he had never dreamed that Blood River King would turn all of his relatives into blood slaves. Then, according to the information he had obtained, he had finally determined the direction in which he had escaped.

Blood River King followed the path and controlled a large number of blood slaves to search for the king level cultivator.

In the end, the king-level cultivator disguised as a Wanderer was found in a Wanderer market about 100,000 miles away from the starting point. After being tortured by the Blood River King, he was transformed into a new blood slave.

A year after the incident, someone happened to meet Blood River King and the king-level cultivator who had become a blood slave.

However, the king level cultivator no longer looked down on all living things. Instead, he looked haggard, as if a gust of wind could blow him away.

After a while, someone found the king level cultivator's body abandoned in the wilderness and eaten by a group of carrion-eating birds.

Ever since the incident, Blood River King's reputation had spread far and wide, causing many cultivators in Loucheng to turn pale.

The most important thing was that Blood River King had not yet become a Law King!

Therefore, when the cultivators heard that even Blood River King was helpless, the last glimmer of hope in their hearts was completely destroyed.

damn it! At most, I'll just break it open. Even if I destroy the task item, it's better than just staring at it!

One of the king level cultivators cursed, but it represented the thoughts of most of the cultivators in Lou city.

At this moment, they were all ready to break the secret room with force.

Even bone Emperor was moved. He glanced at Tang Zhen and the others before turning around and moving.

However, at this moment, a faint voice was heard by all the cultivators present.

“Don’t worry, there might be other ways!”

Hearing this, the cultivators subconsciously wanted to reprimand him. After all, even the Blood River King had said that he was helpless. Who would dare to say that they had a way?

However, when they saw the person who spoke, they immediately swallowed back their foul language.

This was because the person who had spoken earlier was Tang Zhen, who had remained silent from the beginning.

Although they had some doubts in their hearts, the prestige of a high-level cultivator was still there. Moreover, he had killed an old law King with a strong force. The remaining power was enough to intimidate everyone.

Even blood River King and the other two were looking at Tang Zhen with a glimmer of hope in their eyes.

After a short period of contact, they had already realized that Tang Zhen definitely possessed many methods that they were unable to compare with.

If Tang Zhen really had a method to break out of the secret room, it would definitely be something worth rejoicing over.

However, they did not know that Tang Zhen had only stepped forward to prevent this group of people from messing around and causing their previous cracking work to be in vain.

As long as he successfully obtained the item in the secret room, Tang Zhen would still be the biggest winner even if he failed the mission.

Tang Zhen ignored the gazes from the surroundings and slowly walked to Captain torobo, looking down at him.

On the blood-stained ground, the terobo man was already on the verge of death. However, when he saw Tang Zhen’s eyes, he still managed to squeeze out some words with great difficulty.

The cultivators didn’t understand what he meant, but Tang Zhen understood it clearly.

“Despicable animals, let’s see how long you can be so arrogant!”

Just as the cultivators were going crazy because of this ‘foreign language’, they were shocked to hear similar words coming from Tang Zhen’s mouth.

“Look at you now, don’t you look more like a dead dog?”

Tang Zhen didn’t care about the dazed expressions of the other cultivators and the shock that flashed in Captain terobo’s eyes. He continued to speak in an icy cold tone, there’s a saying in my hometown that

goes, 'the winner is king, and the loser is a Bandit'. This saying shows that some people only care about the results and can not distinguish right from wrong.

As a loser, even if you have ten thousand reasons to look down on the winner, you can't change the fact that you're inferior to the winner in some way!"

Tang Zhen squatted down and gently knocked on Captain torobo's armor, which was riddled with holes, as he stared at him coldly with a cold and contemptuous look in his eyes.

"You only have one choice now. Tell me how to open the secret room, or else ..."

Tang Zhen had just said up to this point when a set of words suddenly flashed in front of his eyes, indicating that he had successfully broken through the secret room.

Without any hesitation, Tang Zhen immediately ordered the hidden robots to take action and crack the secret room. After which, they entered it without making a sound.

Fortunately, everyone's attention was focused on Tang Zhen. Otherwise, the robot would not be able to easily slip in.

As for what was inside the secret room, Tang Zhen didn't have the time to carefully distinguish it. He only ordered the robot to keep it all.

Tang Zhen's expression did not change throughout the entire process. The others also did not discover any abnormalities.

However, when Captain torobo saw that Tang Zhen had suddenly stopped talking, he couldn't help but sneer, "Say something, why aren't you saying anything? did you suddenly realize that death can't pose a threat to me, and you're at your wit's end?"

Hehe, you're indeed a beast, an inferior species that hasn't fully evolved. Even your thoughts are so simple!"

These words were not spoken in the terobo language, but the native language of this world. After a few days of learning, cultivator Lou Cheng could understand the general meaning.

However, the content of his words disappointed everyone.

As expected, Tang Zhen wasn't boasting. The terobo man finally opened his mouth to speak. However, it was clear that he had already made up his mind. No matter what, he would not reveal the method to open the secret room.

In that case, the cultivators' only option was to break open the secret chamber with brute force!

## [Chapter 1078](#)

1078 All martial arts crippled?

Tang Zhen looked at Captain torobo in silence as an undetectable glint flashed in his eyes.

He always had a feeling that this terobo man's behavior was a little abnormal. He seemed to be fearless?

However, his life was completely in the hands of Lou Cheng and it was very likely that he would be beheaded in the next second. Moreover, with his injuries, there was almost no possibility of recovery.

Of course, Tang Zhen did not dare to guarantee that the teroboros people did not have any powerful medical techniques that could save a dying person whose body was filled with bloody holes!

If he had already thought that he would definitely die, which was why he would act in such a manner, it would be understandable. However, Tang Zhen had a feeling that things were definitely not that simple.

This terobo man must be hiding some secret, which was why he was looking at him with such a strange expression.

This kind of feeling made Tang Zhen feel uneasy. Therefore, he had to figure it out before he could truly feel at ease.

When he thought of this, Tang Zhen looked at Captain torobo, who was still sneering, as a string of cryptic words slowly flowed out from his mouth.

It was the terobo language. The cultivators of Lou Cheng could not understand it, but the terobo Captain could.

When he heard this, his eyes, which were about to close, suddenly widened. He stared at Tang Zhen with a trace of fear and unwillingness.

“Damn it, how did you know?”

damn it! Captain Trebor roared as blood spurted out of his mouth, but he ignored it.

He merely glared at Tang Zhen with all his might. If looks could kill, Tang Zhen would have already been torn into pieces!

Tang Zhen looked at Captain torobo expressionlessly. He ignored the captain’s angry roar and continued to speak.

“Bastard, damn it, you think you’ve won like this?”

Hahaha, even if you get those things in the secret chamber, you won’t be able to escape death!”

After hearing this sentence, Tang Zhen no longer spoke. Instead, he looked coldly at Captain torobo, who was a little out of control, with a cold glint in his eyes.

‘Looks like I was right. The torobo people did have a backup plan!’

The captain of torobo calmed down after his roar, but he no longer tried to hold himself back from falling. Instead, he laid down on the ground covered in blood and flesh in a seemingly comfortable position.

When he looked at Tang Zhen again, there was an additional trace of pity and ridicule in his eyes.

I didn’t expect you to be able to speak the language of terobo. However, it’s not strange if you think about it. After all, many of us have fallen into your hands. It’s not strange for you to be able to learn the language of terobo.

Swallowing the fresh blood, the terobo Captain looked at the metal dome and continued to mumble, "If that's the case, I'll tell you a big secret!

Do you know why we chose to build a transfer station here? because the core of this world has long been modified by us. We only need to activate a device, and it will absorb all the energy of the entire world!

At that time, this planet would completely become a dead land without any energy, and teleportation would be impossible!

Even cultivators like you won't be able to escape. You'll just be a group of ordinary people with slightly stronger physiques, but how can you be a match for the cyborgs?"

When he said this, he looked at Tang Zhen and sneered. His tone was filled with an ice-cold killing intent.

"Also, I'm sorry to inform you that after I realized that something was wrong, I activated the energy absorption device. It should take effect soon!

Don't worry, none of you will be able to escape. All the cultivators in Loucheng deserve to die. You're only the first batch, and soon, there will be a second and a third batch.

One day, the entire world of Loucheng will be destroyed by us, the terobo people. All the cultivators in the world of Loucheng will be killed!"

At this point, Captain Torobo's eyes dimmed, and a weak voice slowly came out of his mouth.

"Little sister, big brother has avenged you. Not only did I destroy that invading tower, but I also killed many of their Masters. We didn't lose out."

Before he could finish, he had already died.

Tang Zhen looked at Captain Torobo, who had died with his eyes wide open. He slowly stood up and turned to look at the cultivators of the tower City.

Their faces were filled with curiosity. They did not know what Tang Zhen had said to make this stubborn torobo man shout so loudly.

There were even people who guessed that Tang Zhen might have obtained the method to open the secret room from the other party!

Everyone really wanted to know what the truth was. However, no one dared to force Tang Zhen to give an explanation because of such a guess.

Once Tang Zhen was angered, apart from the Bone Emperor and the other two Law Kings, almost no one present could withstand his anger!

Tang Zhen did know the way to open the secret room, but he didn't learn it from Captain Torobo. Instead, he learned it through a mobile phone application.

And just now, after he told Captain Torobo the method to activate it, the other party was shocked and angry. In the end, under the stimulation, he revealed the secret that he had never intended to reveal even if he died.

this tribesman said that it won't be long before the energy on this planet completely disappears. Even the energy stored in our bodies will be completely drained.

When that time comes, an Army of androids will appear and take our lives!"

Tang Zhen repeated Captain torobo's words. Whether the others believed him or not had nothing to do with him.

At the very least, Tang Zhen himself had already believed half of this statement!

After hearing Tang Zhen's words, all the cultivators had different expressions. Some were disdainful, some were shocked, and there were even some who had faces of doubt.

Originally, because of Tang Zhen's words, they were filled with wariness and respect towards the terobo tribe. They were even prepared to fight to the death.

However, after a round of battle, he realized that the terobo people were nothing special.

Therefore, some cultivators began to think that Tang Zhen was just boasting and deliberately flattering the tribesmen. In fact, after hearing Tang Zhen's words, they subconsciously guessed that the manhuang Lord was just trying to scare them again.

regardless of whether the other party is telling the truth or not, the most important thing for us now is to obtain the mission item!

The silver Wing Emperor glanced at the dead Captain torobo and said to everyone, then headed straight for the secret room.

Seeing this, the other King level cultivators also followed, their eyes filled with anticipation.

Bone Emperor and blood River Emperor looked at each other before turning to Tang Zhen. "Manhuang King, did that terobo man really say that?"

Tang Zhen coldly laughed when he heard this. He indifferently said, "Why Would I Lie to You? what good would I get?"

Good advice can't persuade a damned ghost. Since you don't take it seriously, this Tang has no choice. Everyone, please pray for your own blessings!"

...

After saying that, Tang Zhen didn't say anything else. He directly walked past the bone Emperor duo and headed out of the transit station.

A huge crisis was about to arrive, so it was better for him to make early preparations.

This group of people still had thoughts about the secret room. However, they did not know that Tang Zhen had already ordered the robot to drop a bomb when it left.

Regardless of whether they broke through the secret chamber or not, they would end up in ruins, and if they were not careful, they might be turned into dust along with this Starship.

He had snatched the mission item that the cornerstone platform had asked for. If he didn't clean up the traces, he might attract some trouble. Why would Tang Zhen do something that would leave behind future trouble?

Just as Tang Zhen walked out of the terobo battleship, a muffled sound came from the inside of the battleship. Then, flames soared into the sky.

One after another, figures shot out rapidly. All of them were covered in dust, their faces full of frustration and unwillingness.

Looking back at the torobo warship that was engulfed in flames, some cultivators suggested going in to take a look. After all, flames were not a big problem for some of them.

If he was lucky, he might be able to find the mission item from the remains!

Everyone was moved by his words. Just as they were about to give it a try, they suddenly felt the ground under their feet shake, and then the entire underground space trembled.

At the same time, the energy accumulated in their bodies began to drain away at a rapid speed, like water in a bucket that had been emptied!

...

## [Chapter 1079](#)

### 1079 The impending crisis \_1

The sudden change caught the cultivators off guard and they panicked.

They were all very clear that once they lost the energy to support their cultivation skills, they were at most ordinary people with strong bodies and good fighting skills.

To ordinary people, they were still very powerful, and it was not a problem for them to fight against ten people.

However, this kind of thing did not have any obvious advantage against high-tech weapons such as firearms. It was not even a match for them!

It could be said that they had lost their greatest reliance, and they were just a group of lambs waiting to be slaughtered!

The thought of a group of King level cultivators being turned into a hornet's nest by guns and weapons made the cultivators' faces turn gloomy.

"Damn it, what's going on?"

One of the king level cultivators felt the energy in his body run out. He was terrified and lost.

the energy in my body is all gone. I can't even hold my weapon now, let alone teleport!

Another King level cultivator looked at the heavy weapon on the ground and said with a bitter smile.

what should we do? if we encounter the cyborg now, I don't think we can escape!

Compared to the Warriors, the Holy Masters, who were more reliant on energy, looked like they were about to cry.

The flames they released were not even the size of a fingernail, and they looked like they were about to collapse. It was depressing to look at.

A gust of wind blew past, and the flame was actually extinguished!

Everyone sighed when they saw this. Under normal circumstances, these flames would be several meters in diameter and could easily burn through steel.

But now, it seemed like he couldn't even kill a rat!

Blood River King and the other three law monarchs looked gloomy. Compared to the other King-class cultivators, their energy was flowing out much slower, but they couldn't last much longer either.

For cultivators, this situation was undoubtedly the worst desperate situation!

It was only at this moment that they finally realized that Tang Zhen's words were not deceiving them.

"Your Excellency manhuang King, I wonder if you have any way to solve this problem?"

The cultivators of Loucheng city who were present had experienced many storms and waves. Although they were at a loss for what to do with this sudden situation, they quickly calmed down and asked Tang Zhen for advice.

After all, it was a warning from Tang Zhen. Perhaps, he would be able to find a solution to the problem.

Tang Zhen swept his gaze over everyone in the surroundings. Not a trace of expression could be seen on his similarly gloomy face.

"I've estimated the rate of energy loss. It's obviously abnormally fast. No matter how powerful the energy absorption device of the Terobo people is, it can't be so efficient.

"Thus, I'm guessing that the location of this device isn't too far away from us. It's even very likely that it's right under our feet. That's why it absorbed all of our energy in such a short time!

As long as we can find the exact location of this device and destroy it, our energy will probably be restored, and we can also be teleported out of this world!

You can either find the highest point in this world or fly high up in the sky. That way, you'll still have a chance."

After saying that, Tang Zhen looked at the cultivators of Lou Cheng, who had a hopeful look on their faces, and coldly said, "But don't be too happy yet. If you really want to solve the problem, the best way is to destroy the energy absorbing device.

The success rate of the other two methods should not be high.

However, I estimate that the energy absorption device must be installed in an extremely hidden location. It will take some effort to find it.

If we had enough time, this wouldn't be a problem, but the problem is that we don't have much time left.

my guess is that after the energy absorption device is activated, the cyborgs supported by the teroboros will also come after us. They are our biggest enemy right now!

Without the energy to use our cultivation techniques, we are no match for these numerous cyborgs. We could lose our lives at any time!"

Tang Zhen did not continue after saying this. After all, this information was already sufficient.

As for some of the speculations in his heart, he didn't need to say it out in public at all. It was enough as long as he was clear about it.

Terobo's arrangements were very targeted. Could it be that they had been on guard against the cultivators from Lou Cheng's attack, so they had specially prepared this energy isolation and absorption device?

If that was the case, the cultivators of loucheng must have been on the torobo people's list of precautions, which was why the current situation had occurred.

Could it be that the conflict between the two sides had been so serious before this?

Tang Zhen realized that his understanding of the tower world and the terobo people was still too little.

After the cultivators at the side heard Tang Zhen's words, they were silent for a moment before they began to spread out in all directions.

They rummaged through the garbage wreckage and picked up the weapons that originally belonged to the cyborgs. At the same time, they tried to collect as many items as possible that might be useful.

Just as Tang Zhen had said, if they were unable to destroy the energy absorbing device and resist the Cyborg's counterattack, the only outcome would be death.

Therefore, they, who had lost their energy and become ordinary people, naturally had to arm themselves as much as possible to deal with the upcoming battle!

From this point, it could be seen that the reason why the cultivators of Lou Cheng were so strong and difficult to deal with had a lot to do with their style of doing things.

Tang Zhen was not idle either. After a round of hard work, he found a weapon similar to a sniper rifle on the remains of a cyborg.

Other than that, there were also a few miscellaneous items that he had packed up and taken away.

It was different from the past. The energy in his body had been depleted, and even his mental power was greatly suppressed. The mobile app even prompted that it was temporarily unavailable.

Obviously, the operation of this mobile application was also inseparable from the various energies in the world.

Tang Zhen also felt extremely helpless in the face of such a situation. However, he similarly did not have the slightest solution.

Whether he lived or died, he could only leave it to fate!

After simply packing up, Tang Zhen swept a glance at the cultivators in the loucheng building beside him and took the lead to walk out.

“It’s not safe here. If you don’t want to die, then leave quickly!”

When they heard the words left behind by Tang Zhen, the cultivators looked at each other and followed after him one after another.

...

In truth, they did not need Tang Zhen’s reminder to know that this place was the cyborg headquarters. It would definitely be the primary target of attack. With their current situation, staying here was no different from waiting for death!

Walking out of the cyborg headquarters along the damaged area, the cultivators realized that the world in front of them had become extremely strange.

The world that had been filled with all sorts of colors had become extremely pale after all the energy had been absorbed. Even the leaves had turned snow-white.

Walking on the path filled with white trees and looking at the clusters of white flowers in the flower beds, it was a strange sight.

On the contrary, the sky above them was blue. A large number of stars appeared during the day, making it look like an abstract oil painting.

Lou Cheng had seen a lot of strange worlds and was used to this kind of change. After looking around, they spread out and tried to find the entrance to the underground and the energy absorption device.

It was just that finding the entrance in such a large city was like looking for a needle in a haystack. Not to mention that their energy had been sucked dry. It was certainly not an easy task to accomplish this goal.

Not long after the cultivators dispersed, the sound of a flying device could be heard as it flew across the sky above the city.

Then, dozens of flying devices stopped near the cyborg headquarters. Teams of fully armed cyborgs walked out with murderous looks on their faces.

## [Chapter 1080](#)

### 1080 The entire city’s pursuit

After Tang Zhen saw this scene, he did not hesitate as his body directly charged into the building beside the street.

With his current strength, he had no chance of winning against a large group of cyborg Warriors.

“Pa pa pa!”

A series of rapid firing sounds rang out, and at the same time, the curses of the cultivators in loucheng city, the roar of bombs, and the sound of buildings collapsing could be heard.

Tang Zhen observed from a distance and discovered that less than 500 meters away, several aircraft were besieging a cultivator from loucheng city. The dense barrage of bullets caused the dust on the ground to fly.

The king-class cultivator covered his head and tried to run away, but he was locked down by the aircraft and had no chance of escaping.

In just a few seconds, this King level cultivator, who used to be so powerful, was hit by bullets. His body was soaked in blood.

The king-level cultivator cursed, but it was useless. Under the accurate shooting of the drone, all his limbs were broken, and he struggled on the ground.

Tang Zhen coldly watched this scene. However, he did not have any intention of helping. This was because he could hardly even protect himself at this moment. If he were to help, he would definitely be implicated.

He wasn't confident that he could escape the pursuit of the drone in this situation!

It didn't take long for Tang Zhen to see a group of fully armed cyborgs arrive in a car. They fiercely rushed to the front of the Lou Cheng cultivator and used a special kind of shackles to restrain his body.

The cultivator from Lou Cheng tried to resist, but he was punched and kicked. Soon, his face was covered in blood.

The Lou Cheng cultivator, whose face was covered in blood, saw that his struggle was useless. He could only laugh bitterly and give up completely.

As if the cyborg was taking revenge on purpose, the cultivator's body suddenly stiffened and twitched from time to time after being shackled.

Looking at cultivator Lou Cheng's expression, he knew that he must be in great pain.

These special instruments of torture obviously had the function of electrocution and could continuously torture the imprisoned cultivators of loucheng, making them obedient.

Only the exhausted cultivators of loucheng city could make the enemy feel a little at ease.

Lou Cheng was thrown into the car and left. The rest of the cyborg soldiers split into small groups and started searching the streets.

The city was very large and had suffered serious damage. It would take a lot of time for the half-robots to capture hundreds of cultivators in the city.

However, they had the advantage and time. As time passed, the cultivators in loucheng city would suffer the most.

From time to time, the sound of gunfire came from the sky above the city, which also proved that the situation of the cultivators was not good. God knew how many people had been killed and how many had become captives.

Tang Zhen quietly hid in a dark corner. He watched a few cyborgs walk past him. He hesitated for a moment but did not make a move.

The most important thing at the moment was not to kill these cyborg Warriors, but to find a way to find the location of the energy absorption device, or to temporarily escape from this dangerous city.

Of course, no matter which task it was, it would be quite difficult for Tang Zhen. If he was not careful, he might fall into the hands of the cyborg.

The consequences of being captured were simply unimaginable.

However, at this moment, a cry of surprise suddenly came from the corridor behind Tang Zhen.

A middle-aged woman was currently sitting on the stairs. Her face revealed a frightened expression as she looked at Tang Zhen. Her body was also trembling non-stop.

To the residents of this city, today was a day of disaster. A group of weirdos in strange clothes had turned the entire city into ruins!

Therefore, the citizens were filled with fear for people who dressed like this.

Because this middle-aged woman's house lacked water, she felt thirsty and thirsty. Therefore, she had no choice but to go downstairs to look for water. In the end, she had just walked to the door when she saw the hidden tang Zhen.

The middle-aged woman was so shocked that she immediately screamed and fell to the ground.

Tang Zhen was also startled. He looked at the middle-aged woman who was paralyzed on the ground and was secretly furious at his own carelessness.

After being unable to use all his skills, his vigilance had dropped so much that he didn't even notice that someone was approaching him from behind!

In such a state, how could he survive in this dangerous city?

The worst thing was that the cyborg Warriors who had just passed by had quickly returned because of the sudden scream.

Tang Zhen cursed in his heart. Without any hesitation, he raised his gun and directly opened fire at the cyborg that was closest to him.

After a gunshot, the cyborg warrior at the front fell to the ground, half of his head blown off!

The other cyborg soldiers immediately opened fire. The concentrated bullets hit the walls around Tang Zhen. For a time, dust flew up, and holes were everywhere.

Tang Zhen hurriedly hid in the corridor. At the same time, he raised his gun and killed another cyborg soldier.

When they saw Tang Zhen hiding in the corridor, the cyborg soldiers called for help while following him in.

However, as soon as they entered the entrance, they saw a bomb roll down. BOOM! After a muffled sound, all of them flew backward and fell onto the street.

Tang Zhen's figure appeared once again. He killed a few cyborg soldiers that were lying on the ground. After that, he took some weapons and equipment and quickly rushed to another street.

This place had already been exposed, and reinforcements would arrive soon. It was better to retreat as soon as possible.

As expected, Tang Zhen had only run a short distance when he heard a whistling sound being transmitted from above his head. Two flying devices that were nearly ten meters long had appeared at the location of the battle earlier. They were currently circling and searching.

A few majestic-looking war chariots drove over, and a group of cyborg Warriors quickly jumped off the chariots and began to search the surroundings with the battle as the center.

Tang Zhen glanced at a few of the tall and burly cyborg special agents whose bodies had been modified. A trace of fear flashed in his eyes.

Before his strength was restricted, he could crush such a cyborg agent into powder with a single thought. But now, his life would be in danger if he was not careful!

Tang Zhen inhaled a deep breath of air. He used the cover of the obstacles and carefully hid in the messy Street.

This Street had obviously been destroyed by Lou Cheng's cultivators. It was a scene of rattle-filled with the bodies of some citizens lying among the debris, and no one paid any attention to them.

When Tang Zhen passed by a car, he discovered that there were two luggage bags inside. They were already opened, revealing the items inside.

The car owner was of a similar build to him, but he had already died.

Tang Zhen gently opened the car door and directly got in. After rummaging through the car, he found a set of fitting clothes.

After taking off the purple gold armor and the windbreaker, he changed into a black coat that looked like a Chinese tunic suit. Tang Zhen's entire image immediately changed.

...

Keeping the two pistols and the military knife close to his body, Tang Zhen gently snapped his fingers and a small flame appeared out of thin air.

"Hu!"

The flame came into contact with the car seat and immediately burst into flames, swallowing the car.

Tang Zhen used the last trace of energy in his body and stored the purple-gold armor into his storage space. After that, he fled to another area without turning his head back.
