

Alternate 1091

[Chapter 1091](#)

1091 The burning street

After Lou Cheng's cultivators attacked the cyborg headquarters, they carried out a purge operation. The king-level cultivators, who never showed mercy to the enemy, killed almost all the higher-ups of the cyborgs!

Almost all of the high-level combat personnel of the half-mechs had been killed in this battle.

As for the rest of the cyborg Warriors, they were no longer a threat to the cultivators of Lou Cheng, so they were let go.

However, as the energy absorption device was activated and the cultivators in Lou Cheng were restricted, the cyborgs immediately began to fight back, which was also unexpected.

The leaders of these cyborgs were the district inspectors who were stationed in various districts and were returning to provide support!

As long as the half-machine inspectors in charge of the command were killed, they would definitely panic and no longer pose a serious threat to the cultivators of the building.

Tang Zhen had long made up his mind that he would never let these cyborg inspectors leave alive!

Just as the enemies were fleeing in all directions, several cultivators from Lou Cheng who had been waiting for a long time suddenly appeared. They sneered and tore the skill cards in their hands.

With a flash of light, a set of Ice Armor appeared on the cultivators' bodies. Under the fearful gazes of the cyborg inspectors, they pounced on them.

These cultivators had been through hundreds of battles, and their combat experience was not something the cyborg inspectors could compare to. The moment they blocked the cyborg inspectors, their opponent's fate was sealed!

Tang Zhen coldly swept his gaze in the direction of the battle before turning his attention back to the street in front of him. A cold glint flickered in his eyes as he watched the cyborg soldiers continuously swarming over.

This was a battle to the death. The outcome of the loser was destined to be incomparably miserable. How could Tang Zhen show mercy in such a situation?

He operated the device on his wrist a few times, and the drones that had been hovering above him immediately rushed to the enemy and fired a series of powerful bombs.

The entire Street was immediately covered in flames, and the indiscriminate fuel air explosive shot out countless terrifying metal balls, blasting the buildings within the area of effect into smithereens.

The cyborgs that were within the range of the attack had finger-sized holes all over their bodies, and even their bodies were torn beyond recognition!

The aggressive cyborg Warriors were severely injured, and their momentum was slowed down. Before they could recover from the chaos, there was a commotion behind them.

Members of the resistance appeared one by one and launched a surprise attack in the ruins of the building, causing the cyborg Warriors to be flustered for a while. They kept attacking the surrounding buildings.

In this chaotic environment, there would be a figure as fast as the wind appearing from time to time. They were either using cold weapons or carrying firearms, reaping the lives of the cyborg Warriors with high efficiency.

These figures were the cultivators of loucheng who had rushed over after discovering the abnormality. As the battle became more and more intense, more and more cultivators of loucheng gathered.

There were hundreds of cultivators in loucheng who participated in this operation. After their cultivation was restricted, some unlucky cultivators were captured and rescued by Tang Zhen.

There were also some who lost their lives in the process of hiding from the pursuit because of bad luck. Of course, this was only a small number. Most of the remaining people had already gone into hiding.

Just like Tang Zhen, while these cultivators were hiding from the cyborgs, they were also actively looking for a solution to the problem.

Tang Zhen had been paying attention to the movements in the surroundings for a long time. When he noticed the cultivators of loucheng appear, he immediately commanded the resistance organization and cultivators who were fighting on their own through the speaker on the armed robot.

“I’m tang Zhen from the Holy Dragon City, and I’m in charge of commanding this team. Now, all cultivators in the building city, please listen to the command and follow the ninth Avenue straight to the location of the information tower!

Our target is that building. The energy absorption device is hidden there, and we must destroy it as soon as possible.

You’re in charge of clearing the way, and any enemies who block your way will be eliminated!”

He spoke in the language of the world of loucheng. The natives couldn’t understand him, but the cultivators of the world of loucheng could.

When he repeated this for the second time, the cultivators hiding in the streets, alleys, or on the roofs of buildings had already begun to move.

They moved quickly along the street, constantly clearing the enemies they encountered along the way. Bullets, darts, and stone arrows were shot continuously, hitting the cyborgs so hard that they couldn’t even lift their heads.

At the top of a half-collapsed building, situ Yunxi was wearing a black leather coat and holding a compound bow and arrow in her hand. She was shooting at a cyborg that had not appeared.

Her archery was extremely accurate, and every arrow she shot would hit a vital part of the cyborg.

Even though the cyborgs 'bodies had been modified, their bodies were not made of pure steel. They would still lose their lives if they were shot by the arrows!

Beside her were a few other female cultivators, including the silver Wing Emperor.

“My Lord, should we go meet up with the manhuang Lord?”

A female cultivator holding a steel bar connected to a concrete block was constantly scanning the sky, as if she was on guard against something.

Sweeping a glance at Tang Zhen who was standing on the armed robot, the well built female cultivator looked towards the silver Wing Emperor and casually asked.

there's no need for us to stick together. We'll be attacked by the cyborgs if we do that. We only need to help them in the dark!

The silver Wing Emperor shook his head, at the same time he turned to look at the top of another building, a cold smile appearing on his lips.

Bone Emperor and blood River Emperor, the two law Kings, led dozens of cultivators and looked down at the war-torn Street.

It was obvious that they had no intention of showing their faces before they had complete control of the situation.

Although they wouldn't participate in the team under Tang Zhen's command, they didn't intend to stand by and watch. After all, the cultivators in loucheng could only restore their original cultivation after turning off the energy absorption device.

With the full cooperation of these cultivators, the number of casualties of the cyborgs continued to increase. The speed of Tang Zhen and the others 'advancement also became faster!

Seeing that their comrades were being shot one after another, the cyborg Warriors were terrified and kept shooting. Any moving target that appeared in the infrared night vision device would be attacked immediately as long as they did not have the of an ally.

At the same time, the cyborg also controlled the drone to search for the cultivators hiding on top of the buildings. Fire snakes appeared in the night sky and smashed the buildings into pieces!

Seeing this, the female cultivator next to situ Yunxi immediately waved the concrete block in her hand and threw it at the low-flying cyborg.

The concrete block flew into the sky and smashed into one of the drones. In the midst of the fire, the drone crashed into a building and set the residential building on fire!

The other cultivators in loucheng also took action. They either threw javelins, rocks, or used guns to attack, blowing up the drones one after another!

When the members of the resistance saw this, they also joined in. The three groups of people rushed straight to their destination like a hot knife through butter!

[Chapter 1092](#)

1092 The defeated half-robot

As time passed, the battle became more and more intense.

With the straight main road in front of them as the center, the cyborgs all over the city were surging forward continuously. They were like surging waves, trying to devour the resisters!

The cyborg hated and feared the cultivators of loucheng who had shaken their rule.

Many years ago, the teroboros had suddenly appeared and taught the natives the ability to modify their bodies. They had tried to use their power to watch over this world and ensure that the transit station was operating normally.

After obtaining this ability, the higher-ups of the cyborgs immediately regarded it as the ultimate power to control the world. In order to ensure that the power could be controlled to the maximum extent, the higher-ups of the cyborgs did not modify the cyborgs in batches. Instead, they strictly controlled the number of cyborgs.

The resources were not endless. If they were to enjoy, the less the power they had to share, the better.

In the end, relying on the small number of powerful cyborg Warriors, the upper echelons of the cyborgs firmly ruled the world, and their position had not wavered for many years.

In this native world, the cyborgs were the only overlords!

However, the higher-ups of the cyborgs and the teroboros people did not expect that one day, enemies from other worlds would invade. The cyborg Warriors, which were always sufficient for their use, were suddenly outnumbered when faced with the cultivators in the city.

For example, the city in front of them had gathered cyborg Warriors from all over the world, accounting for more than 60% of the total number!

However, with most of the half-android higher-ups killed, even the total number of half-android soldiers, which was close to 5000, could not effectively suppress the cultivators of Lou Cheng.

Moreover, due to the city's terrain, they were unable to display their full combat power, so they were restricted in urban combat.

The resistance and the cultivators of loucheng city had turned the city into a mill of flesh and blood, gradually grinding the half-robot warriors who were trapped in the cage!

However, in the process of the battle, the resistance also suffered heavy losses. Compared to the powerful cultivators of Lou Cheng, they were only ordinary people and could only be crushed by the cyborg Warriors.

In the process of the battle, the members of the resistance gradually discovered one thing. When they fought the cyborgs alone, they were quickly beaten to the point where they could not even lift their heads. The casualty rate was extremely high.

However, when they followed Lou Cheng's cultivators and attacked while the cyborgs' firepower was attracted by them, they often received quite exciting results!

The leaders of the resistance organizations who had gathered from all over the world and tried to occupy the cyborg headquarters changed their tactics tacitly and began to follow the cultivators from Lou Cheng.

Although the other party was strange in shape and was the main culprit who destroyed the city, at least at this moment, both sides were facing the same enemy!

When the cultivators in loucheng noticed this, they didn't reject or oppose it. In addition, they were used to fighting as a group, so they formed a tacit understanding with each other.

With this tactic, although the cultivators and the resistance were fewer in number than the cyborg Warriors, they had the upper hand!

In addition, there was another reason. Because the half-mechs were invincible in the local world, their weapons and equipment had almost never been updated.

It was normal for such a situation to occur. After all, this world had deliberately restricted the development of technology. The restrictions on weapons were also extremely strict. In the face of the almost "unarmed" indigenous people, the cyborgs did not need to upgrade their weapons and equipment at all.

As a result, the half-mech controlled robots and the unmanned drones were obviously not as lethal. They could not even compare to the products made by the Holy Dragon City!

The Holy Dragon city's high-tech weapons originated from the technology of the terobo people, and the cyborg, as a servant of the terobo people, was actually suppressed in this aspect. It was a bit ironic.

Perhaps the cyborgs did not know how to make progress, or perhaps the tribesmen were intentionally restricting them. Regardless of the reason, the situation of the cyborgs would inevitably become more and more disadvantageous!

Unknowingly, the half-robot team began to lock up. Finally, with Tang Zhen's group as the center, they began to enter a defensive stage.

The cultivators of loucheng city and the members of the resistance who came from all directions also launched their final attack!

As Tang Zhen once again tore two storage cards apart, a row of armed robots appeared out of thin air. The team that originally had a few destroyed in the battle once again formed a terrifying assault firepower.

The members of the resistance who witnessed this scene couldn't help but cheer, and their morale rose again!

Other than the armed robots, Tang Zhen also released a batch of unmanned aircraft and also joined the attacking camp.

As the drones flew across the sky, sparks of death were set off in the cyborgs' camp. On the ground, the cultivators of loucheng and the members of the resistance who had received the weapons of the cyborgs continued to devour the cyborgs' position at an extremely fast speed.

There were bullets flying everywhere, and explosions rang out one after another. Broken cyborg bodies were lying in the ruins, trampled by heavy armed robots.

At this moment, the cultivators of loucheng no longer held back. They shuttled through the waves of death like soul-Reapers in the human world. They kept waving the weapons in their hands and harvesting the lives of the cyborgs.

As the blades danced and blood splashed, the cultivators in Lou Cheng returned to their original appearance when they were conquering the other world, turning into the otherworldly demons that terrified the native enemies!

Even though the cultivators in loucheng city had their cultivation restricted, they were still invincible on the battlefield!

The cyborg Warriors began to panic in the face of the cultivators of Lou Cheng, who seemed to have entered a no-man's land. The chaotic scene became more and more obvious, especially after the officers among them were paid special attention to by the cultivators of Lou Cheng and were killed one by one.

In fact, the combat mode of the half-robots was very similar to the combat mode of the nanomachines. The leader would give the command, and the subordinate members would follow it with all their might.

Their advantage was in group combat, while the cyborg agents and inspectors were good at fighting alone.

Therefore, after the officers were killed one after another, the cyborg Warriors immediately fought for themselves like headless flies. Such behavior on the battlefield was definitely digging their own graves!

The attacking cultivators and the commanders of the rebellion Army quickly discovered the enemy's abnormality and successfully seized the fleeting opportunity to quickly divide the defensive area of the cyborgs!

A few giant bombs fell from the sky and landed in the center of the cyborg camp, setting off a terrifying wave of death.

This was the last straw that broke the camel's back. The cyborg warrior, who had lost his fighting spirit, completely collapsed and began to flee in all directions!

[Chapter 1093](#)

1093 Energy absorption device _1

Tang Zhen jumped down from the armed robot's back and his feet heavily stepped on the ground.

He was surrounded by scattered objects. There were the bodies of cyborgs and the remains of the resistance. They were covered by building fragments and became embellishments on the battlefield.

Death and blood were the eternal themes of the battlefield. The losers would be trampled under the feet, while the victors would look down proudly in the smoke!

Behind Tang Zhen, the blood-covered cultivators of Lou Cheng city carried their weapons and followed closely behind him. They were constantly scanning the surroundings with cold eyes.

Although there were only a few dozen of them, they exuded a frightening aura, as if they were Lions who had defeated their enemies and were swaggering in their territory!

As Tang Zhen and the others walked towards the building in front of them, the silver Wing Emperor, bone Emperor, and blood River Emperor appeared from the ruins. They looked at Tang Zhen, who was walking in front, and followed after a moment of hesitation.

In the blink of an eye, the number of cultivators in Lou Cheng had reached several hundred, and they had regathered here.

Tang Zhen ignored Blood River King and the others. This was because their earlier performance had made him feel somewhat annoyed.

Of course, Tang Zhen understood their choice very well.

In fact, before the situation was clear, their choice was not wrong. After all, in the situation where their cultivation was restricted, the cultivators of Lou Cheng could lose their lives at any time!

To the cultivators of Lou Cheng, death was not scary. They had been through countless life and death struggles to become King level cultivators.

They were afraid that their towers would be affected after their deaths. After all, they were the stabilizing pillars of their towers. If they were to die, the future of their towers would be unpredictable.

The lives of all the residents of the city were on their shoulders, so sometimes they didn't live for themselves!

At the other corners of the battlefield, the resistance members were also watching this scene silently, their expressions conflicted.

They were actually more worried about the cultivators from Lou Cheng who had just fought side by side. From their previous performance, they could see that this group of outsiders with different forms obviously had more powerful strength than the cyborgs.

Many members of the resistance Army had witnessed the cultivators of Lou Cheng destroy the city while talking and laughing. In the process of fighting with them, they had also witnessed the powerful combat skills of these cultivators even after they had lost their cultivation.

There were only a few hundred cultivators in the city, but they were enough to strike fear into the hearts of the resistance.

They knew very well that if such an existence were to try to rule the world, it would be even more difficult to overturn than the cyborgs!

The leaders of the resistance had already started to get in touch with each other, hiding together and secretly discussing.

The battle of interests on the battlefield would never stop. Even if two forces were cooperating with each other a second ago, they would secretly stab each other in the back when they were about to share the fruits of victory.

Tang Zhen was currently unaware of the small actions of the resistance Army. However, he did not mind using the most cautious attitude to guess these potential enemies. Even if he did not have the intention to conquer this world, it did not mean that others would have bad intentions.

At this moment, everyone had already arrived at the front of the building. Tang Zhen glanced at the wall that had become riddled with holes due to the battle and took the lead to walk in.

In fact, before Tang Zhen and the rest arrived, this building had already been damaged by the cultivators of the city building. There was a huge hole in the middle of the building, causing the building to be on the verge of collapse.

Because it could collapse at any time after being damaged, the building had long been empty, and there were debris scattered everywhere.

According to the information he had obtained from the cyborg experimental base, Tang Zhen directly walked to a room on the first floor. He walked around a few times before opening a door.

The exterior of the room was very ordinary, and it was only used as a storage room, but that was only the surface.

In the underground space below the room, there was an energy absorption device. The higher-ups of the cyborgs knew of its existence, but no one was interested in it.

Perhaps even they didn't know what the use of this thing was?

Even before Tang Zhen and the rest arrived, this thing had been sealed here for many years. During this period, no one had maintained it.

Even the teroboros people seemed to have forgotten about this item, or perhaps they had deliberately made people forget about its existence. Before it was used, it was just an unknown machine in hibernation.

However, when this thing was activated, hundreds of powerful King level cultivators almost lost their lives here!

From this, it could be seen that the world of loucheng and the tribesmen must have come into contact with each other a long time ago, which was why the tribesmen had created this energy-absorbing device specifically to deal with the cultivators of loucheng.

Of course, it could also be used to deal with other enemies who relied on heaven and earth energy to fight, and as a result, the Lou Cheng cultivators were careless and fell for it!

However, judging from the information he had, it was very likely that the world of loucheng and the tribesmen had long been like fire and water, which was why there was a special call for recruitment.

Now that the transit station had been destroyed, would the teroboros people take action against the cultivators of loucheng?

A trace of worry faintly rose in Tang Zhen's heart when he thought of this.

The cultivators of Lou Cheng were indeed powerful, but if the tribesmen really came and activated the energy absorption device, would they be a match for them?

Or did the cornerstone platform already have a targeted solution to this unfavorable situation?

As this thought continued to flash in his heart, Tang Zhen had already started to search the room. Very quickly, he discovered that behind this ordinary wall, there was actually a special alloy with extremely high strength.

If he still had his cultivation, he could have easily destroyed it. However, he could only enter through normal means.

The other cultivators of Lou Cheng also came forward to help. Under the search of everyone, the house that was dozens of square meters in size was soon unrecognizable.

A hidden control panel appeared, but everyone was helpless in the face of the flashing characters on it.

Tang Zhen, who had once operated a similar item in public, naturally had high hopes for everyone.

Tang Zhen did not hesitate. He immediately walked to the front of the platform and began to operate it at a speed that dazzled everyone's eyes.

Tang Zhen, who didn't know much about the terobo people, wasn't messing around. Instead, he turned on his phone and used the remaining energy to start the [universal electronic kit].

As the application was rapidly cracked, Tang Zhen also operated according to the answer and very quickly completed the activation command.

"Crack!"

A crisp sound was transmitted over as the surrounding walls of the room began to move backward. At the same time, a huge underground space that was brightly lit slowly appeared before Tang Zhen's eyes.

The ground that Tang Zhen and the others were standing on had turned into a metal platform that was suspended high in the air. Below their feet was a tower that was made of various crystals and special alloys. It was rhythmically flashing with a dazzling seven-colored light.

He tore the card in his hand and a pair of gorgeous wings appeared behind Tang Zhen. After flapping a few times, he jumped down.

After flying around the energy absorption device, Tang Zhen hovered in the air and his gaze fell on the central area of the energy absorption device.

A seven-colored crystal was floating inside the device. The inside of the crystal was glowing, and it seemed to contain a terrifying power.

Tang Zhen's eyes were attracted and could not move away for a long time.

...

[Chapter 1094](#)

1094 Energy rain (1)

Tang Zhen only needed a single glance to confirm that this seven colored crystal was definitely not an ordinary item.

Even if he couldn't figure out the operating principle of the device in a short time, he could be sure of one thing, and that was that the rainbow crystal was definitely the core component of the energy absorption device. It had an irreplaceable role.

Although Tang Zhen really wanted to directly take away the seven-colored crystal, he was more concerned about the energy absorbing device. He was afraid that it would be destroyed.

After personally experiencing it, Tang Zhen was very clear about how strong the effect of this energy absorbing device was. Moreover, its operating principle was also worthy of in-depth research.

Although he didn't know how large the energy absorption range was, it could absorb any form of energy. It was designed specifically for the world Energy used by cultivators.

For example, in the original world, electricity could be used in almost every corner.

If this could really be done, then once it was activated, it would be no different from a terrible disaster!

In the absence of electricity, the entire modern society would be completely paralyzed. It would not be an exaggeration to say that it would return to the primitive era overnight.

The cultivators of loucheng had conquered thousands of worlds, and there was a high chance that they would encounter a technological world. When the time came, as long as this device was activated, the resistance of the indigenous people would collapse without being attacked.

Without modern weapons to rely on, the native forces would be vulnerable in the face of the cultivators in loucheng who were proficient in cold weapons and accurate in using firearms!

Therefore, after Tang Zhen found out about the existence of this energy absorbing device, he had already begun to pay attention to it and tried to replicate and move it to Holy Dragon City.

The seven-colored crystal before him was undoubtedly the energy-storing core. Only the heavens knew what material it was made of to be able to store such a terrifying amount of energy.

If it were to explode at this moment, Tang Zhen would not doubt that the entire city would be razed to the ground in an instant!

Just as he was observing the entire device, a gust of wind blew past him, and a human figure appeared beside him. It was the silver Wing Emperor with his wings spread out.

Although his cultivation was restricted, the silver Wing Emperor's flying ability wasn't affected at all. After Tang Zhen entered the underground space, she followed closely behind.

Following Tang Zhen's line of sight, the silver Wing Emperor also saw the seven colored crystal. After sizing it up, his face revealed a trace of shock.

It was obvious that she had sensed the terrifying energy stored within the rainbow crystal!

manhuang King, what is this thing? it shouldn't explode, right? "

Another two sounds rang out. It was Blood River Emperor and bone Emperor. However, compared to Tang Zhen and silver Wing Emperor, they had to rely on a rope to fall.

One of their feet stepped on the rope while their other hand pulled the rope. The two of them glanced at the seven-colored crystal and asked Tang Zhen.

Tang Zhen's eyes swept over the three of them when he heard this and gently nodded.

These three fellows had come down at this moment. It was obvious that they did not want to miss out on the good stuff that might possibly exist. Or perhaps, they were afraid that Tang Zhen would use some method to recover their cultivation.

They could not be considered to be familiar with Tang Zhen. When dealing with this kind of important matter that concerned life and death, they would definitely have to personally handle it in order to be at ease!

"This Tang will be turning off the energy absorption device next. There may be danger during this period. Do the three of you still want to continue watching from the side?"

Tang Zhen retracted his gaze from the seven-colored crystal and turned to look at the three law Kings beside him. The corner of his mouth carried a trace of a mocking smile.

Tang Zhen did not dare to guarantee that no "unexpected" situation would occur if these three fellows were to continue to stay tactfully.

When the Blood River King and the other two law monarchs heard this, they looked at each other and expressed that they would not delay Tang Zhen's matter. They would just wait at the side.

In just a few minutes, the three of them had already checked their surroundings and confirmed that the rainbow crystal was the only valuable thing in this underground space apart from the energy absorption device that they couldn't understand.

However, this thing was a hot potato. If it wasn't handled properly, it might be blown to smithereens. Therefore, the three of them maintained a respectful distance from this seven-colored crystal.

There was another point. The three of them could already see that Tang Zhen was extremely concerned about the energy absorbing device. He even revealed a trace of intention to keep it for himself.

Although Tang Zhen's actions were a little overbearing, the three law Kings surprisingly didn't have any thoughts of fighting over it.

Firstly, it was because Tang Zhen had contributed the most in this matter, so he should have the right to choose the spoils first.

In addition, most of the cultivators in loucheng city were very averse to technological items. They were not used to them and did not know how to maintain them. If there was a problem at a critical moment, they might lose their lives!

Therefore, even if many technological weapons were powerful, the cultivators of Loucheng would still insist on using their original cold weapons.

Not to mention, the swords and sabers forged by secret techniques, as well as the strong bows and crossbows with abnormal range, might not be much worse than firearms in terms of lethality. Moreover, they were more adaptable!

Therefore, it was better to give this seven-colored crystal to Tang Zhen as a favor!

Tang Zhen nodded in satisfaction when he saw the three Law Kings Retreat to the side. He slowly descended to the bottom of the underground space.

Turning off the energy absorption device also required a special password and identity authorization. Using the mobile phone application that was about to be turned off, Tang Zhen quickly launched the hack.

When the cracking was completed, the mobile phone interface fell into darkness again. It was clearly completely shut down!

He fiddled with the translucent control panel for a while, and the energy absorption tower, which was tens of meters tall, began to emit a buzzing sound. Then, it began to shut down from both ends, and finally, it fell into complete darkness.

The originally brightly lit underground space instantly became dark and quiet.

The instant the energy absorbing device was shut down, Tang Zhen immediately felt traces of energy appearing out of thin air and gradually filling the surrounding sky and earth.

However, the process of energy recovery was very slow. If Lou Cheng wanted to recover his original strength, he would have to wait at least a few days!

The whole process of closing was calm. After the cultivators of Loucheng saw the underground space darken, they immediately felt the trace of heaven and earth energy, and the invisible shackles on their bodies disappeared completely.

On the contrary, a shocking phenomenon appeared outside the building.

The instant Tang Zhen turned off the energy absorbing device, the sky above the building suddenly trembled. After that, it was as if a stone had been thrown into a calm water surface, causing ripples to continuously spread in all directions.

As the waves surged, they constantly changed color. At the same time, wisps of cloud-like energy were constantly sprinkling down to the ground like a misty rain.

When the energy mist rain fell on a person, it immediately melted and disappeared, giving them a boost in spirit.

As for the albino plants, after coming into contact with the energy mist, they immediately began to turn green at a speed visible to the naked eye. Then, they began to grow crazily. The grass that was originally an inch tall actually grew to the height of an adult.

After the ruins and houses were moistened by the energy Mist rain, they began to change from a gray color to green. That was the crazily growing moss and all kinds of plants, which completely covered the walls and ruins in the blink of an eye.

It was estimated that it would not take long for this city made of reinforced concrete to immediately become a green ocean!

The citizens hiding in their homes and the members of the resistance outside were all stunned by the change in front of them. They looked at the center of the change in unison, their eyes full of complex emotions and fear.

[Chapter 1095](#)

1095 The cornerstone platform's big move

haha, it's finally back to normal. I've been suffocating for the past few days!

although the energy is thin, it is gradually increasing. It should be enough for now!

"Hey, my Resident Identity Card is reacting!"

me too. It turns out that the cornerstone platform has released new mission information!

"Quickly take a look, what does it say?"

Feeling the energy in their bodies beginning to accumulate again, Lou Cheng's cultivators were all happy. At the same time, they also found that after the heaven and earth energy reappeared, the cornerstone platform also sent a message.

However, the content of the message was very surprising.

[the teroboros have already dispatched several large warships and are rapidly approaching through other teleportation transit stations. They will probably arrive in this world in ten days!]

[please prepare for battle immediately. You must defeat the enemy completely!]

all the king level cultivators participating in this mission will receive a chance to teleport to Lou city. The number of people is limited to 10000. Please use it as soon as possible!

[at the same time, the cornerstone platform will teleport the war tower to provide logistical support for the cultivators in the tower. All cultivators in the tower must do their best to ensure their safety. Once the war tower is destroyed, all cultivators will not be able to receive support from the cornerstone platform!]

?.....!?

However, on the three-fingers-wide Resident Identity Card, the words kept flashing one after another. The cultivators of loucheng looked at the contents of the messages and their faces turned very ugly.

"Damn it, what's going on?"

sending out the war towers and at the same time providing 10000 teleportation slots for each tower, what is the cornerstone platform trying to do? "

we have a few hundred cultivators in loucheng who participated in this operation. This way, the total number of residents in loucheng who will be teleported here will reach several million!

Oh my God, this is the first time I've seen such a big movement!

All the cultivators immediately started discussing and guessing the purpose of the cornerstone platform's move. When they thought of the battle that might happen in ten days, their hearts became heavy.

Through the cyborgs and the energy-absorbing devices, the cultivators had a taste of the teroboros 'methods.

For the cornerstone platform to mobilize so many people and send millions of loucheng residents to participate in the battle, the terobo people were clearly not simple opponents.

In a battle with such a powerful enemy, the slightest carelessness would lead to a tragic defeat.

However, things had already been set in stone. The orders of the cornerstone platform could not be defied. Even if the cultivators were unwilling, they could only grit their teeth and carry out the order.

As for how this battle would be carried out, whether they were united or fighting on their own, that would depend on the situation.

Tang Zhen had also seen the information released by the cornerstone platform. Just like the cultivators from Lou Cheng, his brows were tightly knitted together as he pondered.

Compared to the other cultivators of Lou Cheng, Tang Zhen was more aware of how powerful the terobo people were. Originally, he had intended to avoid contact with them as much as possible to prevent Lou Cheng's strength from being damaged.

However, he had never expected that the cornerstone platform would actually issue such a f * cking mission, teleporting millions of residents in the city all at once to prepare for a battle with the teroboros!

In fact, when fighting against an enemy of this level, the number of people would not affect the final outcome. It was just like a group of strong ants, it was impossible to fight against a strong human.

The other party only needed a light kick to crush the ants on the ground into powder!

Of course, nothing was absolute. If they were faced with a colony of over a million terrifying marching ants, even the strongest human would have to flee.

If he was not careful, he would be killed by this weak and terrifying ant!

With the strength of the cultivators in loucheng, they would not be reduced to the level of ants. However, the terobo people were definitely not unarmed ordinary people.

The moment a collision occurred between the two sides, it was destined to be a terrifying war that would destroy the world!

The Holy Dragon City was currently in the midst of a war in timriel, but the cornerstone platform's orders were more important than anything else. Therefore, even though they were still in the middle of

the mission of invading another world, they still needed to mobilize the cultivators in the city to participate in the battle.

This matter could not be delayed. After all, the cultivators did not have much time left!

With the recovery of the heaven and earth energy, his phone could be used normally again. Tang Zhen stored the information he had collected about the energy absorbing device and then quickly flew toward the ground.

He could ignore the other things, but he had to take the absorption device away. However, he had to teleport the residents of his building over first.

Such a large device would require many people to dismantle and carefully preserve records. The Holy Dragon City was not lacking in such professionals.

Just as the cultivators in Lou Cheng received the message from the cornerstone platform, the leaders of the resistance organizations gathered outside finally reached a consensus.

With the cyborgs fleeing, the hundreds of cultivators from Lou Cheng were their biggest enemy!

The resistance would never allow such a dangerous element to exist in their territory. After some discussion, they decided to take advantage of the God-given opportunity when the cultivators in the building gathered together and bury them all in the building.

To be on the safe side, the resistance had completely sealed off the surrounding area of the building. In the grass that was enough to block an adult, dark muzzles were pointed in their direction.

The ammunition left behind by the cyborgs had been modified into powerful bombs. After they were detonated, they could easily blow up an entire building.

If the plan was successfully carried out, these weird-looking guys would be completely buried in the ruins!

Of course, they could not let the Lou Cheng cultivators find out about this. Otherwise, with their powerful strength, they would definitely be able to break out of the encirclement of the resistance Army before the plan was implemented.

A group of members of the resistance were carrying modified bombs. They were using the wildly growing plants as cover as they quickly approached the building that Tang Zhen and the others had entered in an attempt to detonate it directly!

However, just as they approached the building and before they could place the bomb, they saw some cultivators coming out of the building.

The fearsomeness of the Lou Cheng cultivators had long left a deep impression on the members of the resistance. Now that they saw them appear, they immediately became nervous.

“Move quickly. If they discover us, we’ll immediately lose our lives!”

retreat! a member of the resistance warned his companion, then immediately activated the timed detonation device and quickly retreated under the cover of the grass.

When they had retreated far enough, the bomb would be remotely detonated and completely destroy the building!

However, the commanders of the resistance who were waiting anxiously in the distance did not give their companions enough time to retreat. When they found that more and more cultivators were walking out of the buildings, they could not wait to detonate the bomb!

“BOOM!”

A loud sound rang out, and the entire ground shook. Even the tall buildings began to shake.

...

Seeing this, the leaders of the resistance were overjoyed. In their eyes, the cultivators in Loucheng were doomed to die!

However, at this moment, a deafening roar suddenly came from the area enveloped by the explosion.

“You’re looking for death!”

Following the roar, a figure soared into the sky and actually rushed directly to the center of the explosion.

No one knew what the figure did, but the terrifying explosion was actually suppressed in a fixed area, and then disappeared in a short few seconds.

This strange scene left the resistance commanders in the distance dumbfounded.

They really couldn’t imagine what method the other party had used to offset the terrifying shock wave of the explosion!

Just as the leaders of the resistance were panicking and confused, the figure in the air slowly turned around, his cold gaze landing on where they were.

When they met this cold gaze and felt the killing intent within, the leaders of the resistance felt a chill in their hearts!

[Chapter 1096](#)

1096 The tower of war

damn it, what the hell happened? why did the explosion suddenly disappear? ”

On the ruins of a building in the distance, a leader of the rebel organization looked at this scene in a daze and couldn’t help but shout in a low voice.

This was especially so when he saw Tang Zhen, who was suspended in the air and looking at him with a face filled with killing intent. His body could not help but tremble.

The explosion had already happened, and the whole building had begun to shake. It looked like it was about to collapse, and this process was already unstoppable.

However, the leaders of the resistance had never dreamed that someone would be able to reverse the process and dissipate the explosion.

Such a terrifying method had already exceeded their scope of knowledge!

This group of strange people from unknown places all had terrifying power. Although they had disappeared a few days ago for unknown reasons and had to hide everywhere after being chased by the cyborgs, that was all in the past.

Now that they were able to float in the sky, it proved that their powers had been completely restored!

What they had done earlier had obviously angered this group of terrifying monsters. When they thought of their terrifying ability to destroy the world, all the leaders of the resistance felt despair.

“What are you waiting for? retreat!”

One of the leaders of the resistance shouted out without any backbone, but it represented the true thoughts of the people.

The crowd, who had been smug just a moment ago, immediately fled into the ruins like stray dogs, trying to avoid the pursuit of the cultivators of the building.

However, their actions were destined to be in vain!

“Whoosh, whoosh, Whoosh!”

The sound of air being torn could be heard continuously as cultivators from Lou Cheng appeared in the sky. They were floating near Tang Zhen, and their faces were also filled with anger.

If Tang Zhen had not turned off the energy absorption device, allowing them to finally absorb a trace of energy, the explosion would have buried them under the ruins.

A King level cultivator with his cultivation restricted was just a strong ordinary person. If he was hit by a building that weighed thousands of tons, he would definitely die!

Although the manhuang Lord managed to suppress the explosion with his powerful mental energy and carried the debris to support the damaged wall, the natives who tried to plot against him had to pay the price!

“Kill them!”

Bone Emperor growled, and the dozen King level cultivators behind him immediately flew forward, raising their sabers with sinister smiles.

Streaks of blood flashed, and the leaders of the resistance who were fleeing in all directions screamed in pain. All of them died without an intact corpse!

The members who followed the leader of the resistance also couldn't escape the pursuit of the cultivators in Lou Cheng. Of course, the reason they were killed was that they shouldn't have been with the leaders.

There was a debtor for every grievance. Although the cultivators in Loucheng were angry, they would not kill the innocent. This had nothing to do with kindness. They just didn't want to waste their time.

As for the other rats, the cultivators in Lou Cheng didn't even bother to care about them.

Moreover, the cultivators in Lou city had not fully recovered their strength and could not use their terrifying large-scale killing skills. Otherwise, all it would take was a King-level cultivator to kill all the members of the resistance organization!

However, in the process of the pursuit, it could not be ruled out that there were members of the rebellion Army who shot at them. In the end, those who did so were eventually killed by the cultivators floating in the sky.

Alright, let's not waste any more time. Let's quickly discuss this and then teleport the residents of our towers over!

Blood River King glanced at the members of the resistance who were running around in the ruins. His eyes showed a hint of disdain, then he said in a calm tone, "

All the cultivators nodded. They had the same thought.

Tang Zhen turned around and operated his wrist a few times. Soon after, a holographic map appeared in front of the cultivators. It was extremely clear.

"This thing seems pretty good. If Manhuang King is free, can you give me two to play with?"

Blood River King glanced at the wrist-guard computer and asked casually.

"If you want it, I'll have someone send it to you later."

Tang Zhen nodded. After which, he pointed at the holographic map and said to everyone, "This is the map of the city beneath our feet. It is also the location of the cyborg headquarters. I estimate that after the tribesmen arrive, they will also arrive here first.

"We can either gather together and launch an attack when the Teroboros arrive to decide the outcome of the battle in one go, or we can prepare for a long battle. We can choose a suitable camp and slowly deal with the enemy!"

Tang Zhen raised his head and looked at the hundreds of cultivators gathered around him, waiting for their decision.

"This operation will mobilize millions of residents in the city. It's obvious that the other party is a tough nut to crack. I don't think we can defeat the Terobo tribe so easily!

Blood River King was the first to speak, and his words were agreed by many cultivators.

"It's good that they are scattered. After all, millions of people are gathered together. The enemy only needs one wave of fierce attacks to cause heavy casualties to us!

However, don't forget that we still have a mission, which is to protect the war tower and make sure that it won't be destroyed by the tribesmen. So, we can't go too far away!"

The silver Wing Emperor's voice resounded, her words also made the cultivators feel slightly awkward.

It was just as she had said. The towers had to be spread out to avoid the concentrated fire of the torobo people, but the war towers that they had to protect had tied their hands down.

Whenever a large-scale war like this happened, the war tower was an indispensable thing. It was equivalent to a super cornerstone platform that provided various war supplies to the cultivators who participated in the war.

Once the Battle Tower was destroyed, the cultivators who participated in the battle would be in a situation where they would have no support and would be in chaos soon.

In fact, all the cultivators were curious and looking forward to the war tower.

Because the probability of the appearance of the war tower was extremely low, only two or three cultivators who had participated in this operation had seen it with their own eyes.

Compared to the foundation stone platform in the tower, the trading platform in the war tower was more advanced. Not only did it have an uncountable number of precious items, but it also provided advanced cultivator skills. As long as the cultivators in the tower had enough battle merits, they could exchange for them at any time.

To the cultivators of the City of War, the appearance of the City of War was definitely a rare opportunity.

This was because even some King level cultivators could only use ordinary cultivation techniques. Even if they wanted to upgrade their techniques, they couldn't find a suitable way.

Even if it was a national-level building, before it was upgraded to a certain level, it was also not qualified to exchange for advanced cultivator skills.

Therefore, many of the king level cultivators were looking forward to this battle.

[Chapter 1097](#)

1097 Building an underground space

War was not child's play, so every step had to be planned in detail and not allowed for carelessness.

However, although the cultivators of the City Tower were good at group battles, they were all centered around the city they belonged to. The war that was currently being fought by hundreds of cities was not suitable for them.

There might even be some uncontrollable changes on the battlefield due to the large number of people.

Under such circumstances, a strong leader should have been elected to command and mobilize the cultivators who seemed to have gathered together but were actually a pile of loose sand to fight.

It wasn't easy to achieve this.

Although the cultivators of loucheng didn't reject cooperation, they would never put the fate of their loucheng into the hands of others. Even if there were four powerful law Kings present, they still couldn't make these cultivators compromise.

Furthermore, with the activation of the teleportation array, there would be a large number of high-level cultivators among the millions of residents who would arrive here. The number of King level cultivators would also increase.

As their confidence and strength increased, these cultivators would probably be more unwilling to be controlled by others, and might even subconsciously stay away from other buildings.

However, if that was the case, the future war would be filled with the unknown.

Tang Zhen had already anticipated such a situation. Therefore, he remained silent at this moment and waited for the cultivators to make a decision. This was because the final result would definitely not be satisfactory.

After half an hour of discussion, the cultivators came up with a preliminary plan.

In order to ensure that the war tower would not be destroyed, they had to find a hidden and safe place for it, and the most suitable place at the moment was the ground under their feet.

To the cultivators of loucheng, it was not a difficult task to open up a large underground space to prevent the weapons of the terobo people from destroying it.

Of course, to be on the safe side, the underground space had to be deep enough and strong enough!

After the war tower was settled, the other towers would use it as the center and choose their own encampment.

After the discussion, the cultivators immediately began to move.

With the city as the center, they began to open up a space underground. Due to the existence of the underground headquarters of the cyborgs, this process was greatly reduced.

Due to time constraints, the cultivators didn't have enough time to make sufficient preparations, so they could only make do with it.

In fact, with the depth and sturdiness of this place, it could be used as a storage place for the war tower after some slight modifications.

Moreover, the city's ruins had a dense underground sewer system, which could also provide enough hiding space for the cultivators in the building.

Of course, there were risks involved in doing so. If the tribesmen launched a violent attack on the ground or blasted the entire city into a deep pit, the war tower could still be destroyed!

However, this was how war was, and the cultivators of loucheng city didn't have much choice. They had to bear the risk.

After Tang Zhen checked the map, he finally chose a mountain peak at the edge of the city and made it the Holy Dragon city's base.

He would open up a space under the mountain and then build another passage underground to connect with the war tower in the city, providing a way for the cultivators in the tower to go back and forth.

With the magical application of the terrain transformation plug-in, Tang Zhen only needed a short time to complete this task.

After completing these tasks, the Holy Dragon city's cultivators would be able to make sufficient preparations and wait for the arrival of the teroboros!

As the discussion ended, the cultivators immediately scattered and moved. Tang Zhen also flew toward the chosen location.

As he flew past the sky of the city, Tang Zhen saw many frightened citizens trying to escape from this terrifying city with their families. However, the dense vegetation and the monsters that had already begun to mutate made it difficult for them to move.

There were even some cultivators who used special methods to speed up the mutation process of plants and animals, causing monsters to run amuck in the city!

The purpose of the Lou Cheng cultivators' actions was only to create some trouble for the tribesmen when they arrived.

However, to the residents of the city, this was no different from a disaster. Although the disaster had already happened, it had only worsened!

In fact, the cultivators of Loucheng city couldn't be bothered with the plight of the ordinary citizens. They wouldn't stop them from escaping, nor would they provide them with any help.

Whether they would live or die in the future would depend on the luck of the citizens.

In the end, the frightened citizens had to retreat to their homes and pray for the disaster to pass quickly. At the same time, they kept cursing the cultivators in Loucheng city.

However, the citizens didn't know that an even more terrifying disaster was coming. If they didn't escape now, they would probably have no chance of escaping.

.....

It did not take long for Tang Zhen to arrive in the sky above the mountain peak. He slowly landed on an empty ground at the foot of the mountain.

More than a dozen townsfolk who were digging for wild vegetables nearby saw this and their faces were filled with fear. They quickly fled into the forest in the distance.

Tang Zhen ignored these people. Instead, he sized up his surroundings. Finally, his gaze landed on the middle of a forest.

The grass on the ground instantly shattered into powder, and a deep pit quickly appeared on the originally flat ground.

By relying on his powerful mental energy, the soil and rocks in front of him were quickly pushed to the sides. Tang Zhen followed this tunnel and continued to advance underground.

Unknowingly, Tang Zhen had already arrived at the foot of the mountain. He was four to five hundred meters above the ground.

It was dark all around him, and the soil completely wrapped him up. The thick soil almost isolated all sound. If someone with claustrophobia were in this place, they would probably immediately become agitated and restless.

However, Tang Zhen unexpectedly felt a sense of security. This was because the thick and heavy ground around him could provide sufficient protection for the residents of his building. Even if the terobo people had powerful weapons, they would probably not be able to reach this depth!

Of course, if the other party had a weapon that targeted him, it would be a different story.

He familiarly activated the [terrain transformation plug-in] and soon after, he saw the soil around Tang Zhen rapidly expand and a huge underground space appeared in front of him.

In the process of space expansion, huge pillars were preserved, making the underground space very neat.

After the usage time of the application was over, the expansion of the space had been completed, and the next step was the reinforcement process.

With the guidance of his thoughts, an indescribable and terrifying flame exploded, filling the entire underground space.

Even without sufficient air, this special law of fire was still burning fiercely. The soil that was burned by the fire quickly turned red and gradually developed in the direction of ceramic.

The entire process didn't take much time. When the flames under Tang Zhen's control disappeared, the entire underground space was already red and filled with a terrifying heat wave.

High temperatures were also a branch of the fire laws. Therefore, there was no need for a long cooling process. Tang Zhen only needed to circulate the power of the laws to return the temperature of this space to normal.

When everything was over, the underground space in front of Tang Zhen had completely taken shape and turned into a solid underground fortress!

...

[Chapter 1098](#)

1098 Another journey (1)

It was midnight on the continent of timlad.

At the forbidden area near Snow City, people were moving about. The lighting device floating in the air illuminated the ground.

The roar of the engine was endless. Military vehicles were speeding over from the distance and stopped below the Holy Dragon City high in the sky.

The carriage doors were violently pushed open, and one after another, Holy Dragon City cultivators covered in dust, exuding a faint murderous aura, jumped down from the chariots, then quickly gathered in the designated area.

From time to time, there would be aircraft landing slowly in the sky. There were even cultivators flying in the air, returning as fast as lightning.

The contract cultivators who were in charge of supporting work were already stunned by the scene in front of them. This was the first time they had seen such a magnificent scene since they joined the Holy Dragon City.

Among the Holy Dragon City cultivators who invaded the continent of timriel, more than half of their experts had already gathered here!

With so many cultivators gathered together, they could definitely start a terrifying war. At present, no Lord on the continent of timriel could resist this group of Wolf-like cultivators.

Fortunately, other than taking over Snow City, Holy Dragon City had no intention of invading other territories. This allowed the various factions on the continents to heave a sigh of relief.

After all, with their strength, they couldn't compare with the cultivators of loucheng who killed gods with ease. Once they really fought on the battlefield, they would definitely end up in a miserable state.

The fearsome reputation of the Holy Dragon city's cultivators had already spread throughout the entire Otherworld continent in a short period of time!

As they silently muttered the names of the Holy Dragon City cultivators who had already made a name for themselves and were well known to the native cultivators, the few contract cultivators were already dumbfounded.

Oh my God, what is Holy Dragon City planning to do? are they going to kill a God again? "

what's going on? " one of the native cultivators asked as he suppressed the shock in his heart.

When the contract cultivator heard this, he shook his head slightly and said in a doubtful tone, " "So far, the Holy Dragon City has already killed five Aboriginal deities and supported three Saint-level cultivators to obtain godhood. It can be said that there is no power in the entire continent that can resist them.

I've heard that the gods were afraid that Holy Dragon City would target them and had long since sealed off their divine kingdoms, cutting off all contact with the outside world. Even the most devout believers could no longer sense any aura of the gods.

It was estimated that it would take at least a hundred years for the passage to be restored before these gods would appear in front of the people.

Under such circumstances, no matter how capable the Holy Dragon City was, it would be impossible for them to lock onto the entrance to the divine Kingdom in the void. Thus, the slaughter of gods would not happen for a long time.

Therefore, I believe that although Holy Dragon City is definitely going to do something big, it's definitely not to kill a God!"

The contract cultivators beside him felt that it made sense and nodded in unison.

However, they became even more curious. Why did the Holy Dragon City mobilize so many people?

.....

The world of loucheng, Holy Dragon City.

Ever since the Holy Dragon City launched an invasion on the world of timriel, the original location of the main tower had been completely sealed off, and no one was allowed to approach it.

Even if the Holy Dragon city's residents wanted to go over, they would be stopped by the Holy Dragon city's soldiers on duty. There was no possibility of them making an exception.

However, this morning, many Holy Dragon City residents and foreign merchants were surprised to find that there were vehicles continuously entering the heavily guarded main tower.

In addition to the vehicles that were fully loaded with supplies, there were also many scientific researchers mixed in, discussing something with excitement.

At the same time, terrifying tamed war beasts followed in groups under the control of the Holy Dragon City cultivators.

This unusual scene immediately attracted the attention of many people, and they all privately inquired about what exactly had happened.

Before they could figure out what was going on, they saw a group of foreign merchants rushing out of the crowd, shouting and shouting at their guards, and running toward the main city.

The foreign merchants, who had been anxious for a long time, immediately stopped the familiar merchants and asked what happened.

The foreign merchant who was stopped had an impatient look on his face. However, under the flattery of his peers, he still proudly explained the reason.

"You guys don't know yet, but all the high-level towers in the entire wilderness Warzone have received a conscription order. Each tower has mobilized 10000 cultivators to the other world, ready to fight against an enemy called wave!

City Lord Tang Zhen has given the order to specially approve twenty merchant slots, allowing us to follow the teleportation to the other world to do business!"

All the merchants gasped when they heard this. After all, this was the first time they had heard of such a shocking thing.

However, after the initial shock, the foreign merchants looked at the other party in surprise and asked in a puzzled tone, " is there something wrong with your brain? the other world is about to go to war, and there's no time to hide. Why do you still want to go there? "

When the foreign merchant heard this, he immediately laughed in disdain. Then, he looked at his peers with disdain and said indifferently, " What do you guys know? the more you go to places like this, the more opportunities you have to make a fortune!

City Lord Tang Zhen said that not only will our teleportation be free, but we will also be protected by the Holy Dragon City cultivators.

As for what we need to do, that is to do business with those participating loucheng. The city Lord has already promised that for every business deal, he will give us a 1% commission!

Don't underestimate this 1%. The weapons and special goods sold in Holy Dragon City are all in high demand. As long as you take them out, you won't have to worry about selling them, and there will definitely be a lot of them!

The Holy Dragon City cultivators had to go to war, so they didn't have time to deal with these things. In the end, this good thing fell into our hands.

Don't the merchants in the Holy Dragon City have a saying, "wealth comes from danger?" this brother is going all out this time. As long as I come back alive, I'll definitely make a fortune!"

After saying this, the foreign merchant revealed a solemn expression and cupped his hands in salute to his peers.

"My friends, please take care. I'll be leaving first!"

As soon as he finished speaking, the fat foreign merchant, who was wearing four to five layers of armor, nimbly turned around and jumped into the Holy Dragon city's military vehicle, leaving a trail of dust behind.

As they watched the other party's figure disappear into the distance, the merchants had complicated expressions on their faces. Some were disdainful, some were suspicious, but most of them were envious.

As long as these twenty people completed this mission, they would definitely be able to ride on the Holy Dragon city's coattails and soar to great heights!

Time passed without them realizing it. More and more Holy Dragon City residents and foreign races gathered. They formed a magnificent sea of people, waiting for the time to teleport.

The Holy Dragon City Warriors, who had been through this kind of situation before, were holding their weapons to maintain order. Lingxu Zi, leading dozens of newborn children of the spirit clan, stood with the cultivators who had stayed behind in the Holy Dragon City to see off the residents of the tower City who were preparing to teleport.

"Grandpa, what are the uncles doing?"

what's going on?" a spirit child who had just learned how to speak asked curiously while sitting in lingxu Zi's arms.

As a King realm cultivator, lingxu Zi looked at the child in his arms with a smile like an old man playing with his grandson.

The Holy Dragon city's technology allowed him to see his blood-related kin again after only a few years. It was also for this reason that lingxu Zi took the initiative to take on the heavy responsibility of guarding the Holy Dragon City to ensure that it would not be attacked by the enemy.

...

After hearing the child's question, Lingxu Zi hesitated for a while and then said with a smile, "The uncles are going to a very far place to do something very important, even related to life and death."

"Grandpa, I don't understand. What is a matter of life and death?"

Spirit race children were born with extraordinary intelligence, so they could not be treated as simple and ignorant children.

In a world where the strong preyed on the weak, only by constantly improving one's strength can one ensure that one will not be eliminated. This was the case in the past, and it will still be the case in the future!

"Grandpa, will the uncles come back?"

"They will, because no matter what happens, the City Lord will bring them back because this is their home, Yingluo."

[Chapter 1099](#)

1099 Millions of cultivators fall from the sky

It was late at night. The once prosperous city was now covered in wild grass.

The lights of the past had disappeared and were replaced by fist-sized mutated fireflies. They were like balls of dancing flames, constantly dancing in the grass.

Huge mutated monsters were entrenched near the messy ruins. They were looking up at the sky and letting out uneasy roars.

This was because they had already sensed that something strange was about to happen to the land.

As for the residents trapped in the city, they were all trembling in the dark, and the despair on their faces grew stronger.

At this moment, hundreds of cultivators in the city were looking up at the sky with anticipation.

As the time neared midnight, hundreds of lights suddenly shot into the sky around the Dark City. They flew higher and higher and finally gathered together.

The clear night sky suddenly turned gloomy. At the same time, an extremely huge black vortex of clouds suddenly appeared in the sky. It blocked all the stars and made the night sky even darker.

The monster's roars became more intense, but there was a hint of submission and despair in its voice.

The townsfolk who were secretly hiding behind the windows soon saw a scene that left them dumbfounded and unforgettable.

In the boundless sky, countless bright stars were slowly appearing from the black hole-like vortex. Then, they fell to the vast land under their feet in reverse like lit lanterns!

The entire sky was filled with this ball of light, and the originally dark night sky became much brighter.

This scene was extremely spectacular and beautiful. It was suffocating and made people forget about the disaster around them. They were simply intoxicated in it.

There were even many citizens who took out their cameras and took pictures of this moment that was destined to be remembered in the history of this world!

However, they didn't realize that the appearance of this beautiful scene actually represented the official beginning of the catastrophe!

As the balls of light continued to fall, people finally saw the scene inside the balls of light. Their originally intoxicated expressions were gradually replaced by fear and unease.

This was because everyone could clearly see that the objects shrouded in the light were actually creatures of various shapes and sizes. They were sizing up the world with greedy eyes!

Some of the monsters were even taller than trees and larger than trucks. One look was enough to make one tremble in fear.

After seeing this scene, how could the people not know that these balls of light were the companions of the murderers who destroyed the city?

However, when the city was destroyed, there were only a few hundred murderers. Now, the number had increased by more than 10000 times!

Endless despair and fear rose in their hearts. The citizens were no longer in the mood to watch the show. Instead, they gathered together, trembling. They were either thinking about how to save themselves or waiting for death in despair.

At this time, the balls of light in the night sky were still falling. When they were about a thousand meters above the ground, these balls of light seemed to be pulled by some invisible force and flew toward different areas.

The king level cultivators smiled as they watched the residents of the city land beside them.

At this moment, Tang Zhen was also standing at the peak of the mountain. His brows relaxed as he watched da Xiong and the rich Captain dance in the ball of light. They landed on the ground with a pleasantly surprised expression.

In an instant, the entire mountain peak was filled with balls of light of different sizes, and excited shouts and roars of war beasts rose and fell.

the cornerstone platform is indeed not simple. It actually has such a gorgeous large-scale teleportation method!

Tang Zhen muttered to himself. Just as he was about to welcome Qian Long, little Rui and the rest, the smile on his face froze.

It was also at this moment that a ball of light descended from the sky and directly collided into Tang Zhen's chest.

"Brother-in-law, are you surprised?"

A clear voice sounded out. Soon after, a beautiful girl in black battle armor with a heroic spirit hugged Tang Zhen and shouted in an excited tone.

Tang Zhen's expression was as black as the bottom of a pot. He coldly looked at the coquettish girl in his embrace and softly questioned, "You little brat, who asked you to come over?"

After he finished speaking, he glanced at the Holy Dragon city's Lords who were in charge of guarding the place, only to see the other party's bitter smile and helpless expression.

Tang Zhen naturally understood what she meant, so he rudely rubbed Murong Ziyue's head and pushed her aside.

I don't care how you got here, but from now on, you must always be by my side. If you dare to take a step away, I'll break your legs!

Tang Zhen's tone was extremely stern. Those who were not familiar with him would definitely be frightened to the point that their legs turned soft. However, Qian Long and the others by the side acted as though they did not see it and continued to chat.

This was the city Lord's family matter, they would not interfere and ask about anything.

Murong Ziyue pouted and said in a dissatisfied tone, " "Why? I'm a Lord cultivator now. How many people can bully me?"

not even Lord cultivators. If you want to go out and cause trouble, you have to defeat me first!

brother-in-law, you're such a bully. I hate you!

"Shut up and go to the side!"

Tang Zhen ignored the little girl who had run to the big bear's side and sulked. He turned his head to look at Qian Long and the others before gently nodding his head.

The dozens of Lord-level cultivators in front of him were all the core figures of the Holy Dragon city's cultivators. Because the scale of the battle this time was extremely large and the enemy was quite strong, Tang Zhen had mobilized them all.

As for the world of Lou Cheng and Timrell, there were two King level cultivators, Lingxu Zi and Fatty, guarding them, so Tang Zhen didn't have to worry about anything.

Tang Zhen had already sorted out the entire process of the incident and sent it to everyone through the wrist guard computer.

While the Lords were looking at the information, Tang Zhen pointed at the entrance of the underground space, indicating for everyone to enter and wait for further instructions.

Soon after, a batch of defensive weapons was also installed. They were cleverly hidden between the rocks and trees, and they would not be discovered if one did not look carefully.

Immediately after, Tang Zhen led dozens of scientific research experts and nearly a hundred cultivators from Lou Cheng to the city not far away.

There was still an energy absorption device there, waiting for him to dismantle and transport it back.

With a series of rumbling sounds, more than a dozen tanks began to move forward on the grass-covered road. Along the way, the figures of monsters could be seen flashing from time to time.

After sensing the terrifying aura of Lou Cheng's cultivators, these mutated, brutal, and bloodthirsty monsters quickly ran away with their tails between their legs, wailing in sorrow as they ran.

In the eyes of ordinary citizens, they were extremely terrifying, but in the eyes of the cultivators in Loucheng, they were as weak as chickens and ducks, not even worth mentioning.

The road was smooth, and the Holy Dragon city's convoy arrived directly at their destination. They stopped in unison.

this is the place. You guys go and dismantle the energy-absorbing device underground, then put it in the storage ring and bring it back.

...

Tang Zhen suddenly turned his head to look at the ruins in the distance after giving his instructions. A cold glint was revealed in his eyes.

"I still have things to deal with, so I'll leave the safety here to you!"

Tang Zhen had already soared into the sky when his voice had just sounded. He flew straight towards a building that was several tens of stories high!

[Chapter 1100](#)

1100 One versus many! 1!

The night wind gently caressed the wild grass, making a rustling sound. The top of the building under his feet was now covered with vines, winding down the wall.

More than a dozen tall foreign cultivators were standing on the top of the building, coldly looking at Tang Zhen who was standing opposite.

The ice-cold blade was reflecting rays of cold light and exuding a bloody aura.

An unconcealed killing intent was revealed from the eyes of these foreign race cultivators. If their gazes could be transformed into blades, Tang Zhen would have long been cut into countless pieces.

From the auras of these foreign cultivators, he could determine that there were three king level cultivators among them. The rest were peak Lord level experts. In some other worlds, they could become overlords.

The cultivator in the lead was covered in dark golden scales. He was surging with a thick nomological aura, and countless dust flew around him. However, they quickly turned into translucent crystals and then disintegrated into powder.

This was a law King, and he should also have grasped earth-type law power. As for what branch it was, he couldn't be sure for now.

No matter what, this was a strong enemy that could not be underestimated!

At this moment, this law King was coldly looking at Tang Zhen. There was no expression on his ferocious face, only a pair of blood-red eyes that were turning from time to time.

The other party's appearance was so obvious that Tang Zhen only needed a single glance to confirm that they were all cultivators from the black prison tower!

manhuang King Tang Zhen, you're really bold!

One of the king level cultivators was the first to speak. He roared at Tang Zhen as the horn on his head began to flash. This was clearly a rare cultivation technique that could be used at any time.

Tang Zhen glanced at the king level cultivator and sneered. Then, he ignored him and looked at the law King.

According to the information he had, there were two law Kings in the abyss prison tower. One of them was the red Horn King, who had been killed by him.

The other law King was the city Lord of the black prison tower, titled gold horn King. It was said that he had been a law King for many years and rarely appeared in front of outsiders.

He didn't expect that the special mission this time would actually attract him.

However, it wasn't strange when he thought about it. After all, this mission was extremely rare. Moreover, with the fall of the red Horn King, the Resident Identity Card he had stored in the tower would also be erased.

The abyss prison tower naturally placed great importance on the death of a law King. They had to figure out the cause and effect.

Many cultivators in Lou city had witnessed Tang Zhen killing the red Horn King. Therefore, the other party only needed to ask a little to know the details of the matter.

Looking at the attitude of the Golden Horn King, it was obvious that he wanted to take revenge for Red Horn!

Seeing Tang Zhen looking at him, one of the city Lord's horns broke. The law King Golden Horn King, who had the other Golden Horn, let out a cold snort.

Your Excellency manhuang King, Red Horn King was killed by you, right? "

"You're mistaken. He was the one who first prepared to plot against me. That's why I took action." Tang Zhen shook his head and softly said.

"So you admit it?"

so what if I admit it? so What if I don't? is there a difference? "

Tang Zhen sneered as he looked at the Golden Horn King, using a disdainful tone.

The gold horn Emperor laughed coldly, " that's right. Whether you admit it or not, you will have to pay with your life today. And all the residents of your tower will be buried with you!

“Oh, is that so? I’d like to see how you’re going to kill me.”

A wisp of flame appeared in Tang Zhen’s eyes, causing his eyes to become extremely strange. Even when he opened his mouth to speak, spiritual fire snakes continuously gushed out from his mouth.

The surrounding air seemed to have become extremely hot, and the moisture in the vines quickly withered, as if they could be set on fire at any time.

The most shocking thing was that the night sky above them was rapidly changing color. Lava-like flames were constantly flowing down and burning violently around the tall building.

If one were to look at it from the sky, these burning flames would actually form a huge runic magic circle, as if it was accumulating a terrifying power that could destroy the world.

Feeling the power of this flame, other than Golden Horn King, the other cultivators of black prison tower City were all shocked.

The Golden Horn King looked at Tang Zhen who was already covered in flames. He gently raised both his hands and with a loud boom, two huge Golden Earth dragons rose up from the ground. They looked extremely realistic, one on the left and one on the right, standing around the building.

“It’s rumored that the Holy Dragon City Master is a legend. Today, I’ve seen it for myself, and it’s indeed true. In just a few years, he’s cultivated to such a level.

Even those God’s favored sons in the Super battlefields might not be able to compare with you!”

As he said this, the killing intent within the Golden Horn King’s body boiled as he charged towards Tang Zhen’s position.

“Unfortunately, everything will become a thing of the past. You will die today!”

At the same time he roared, the Golden Horn King had already charged in front of Tang Zhen. At the same time, countless huge earth Spears formed from the earth, their tips shining with golden light, shot straight at Tang Zhen’s position.

The two Golden Earth dragons swiftly entwined over. They broke through the fiery barrier in front of them and attempted to swallow Tang Zhen in one bite!

The other cultivators of the black prison tower also used their own techniques, trying to find an opportunity to kill Tang Zhen in the collision of the two law Kings’ domains!

Facing the aggressive enemy, Tang Zhen didn’t Dodge at all. He turned into a fire Dragon and charged towards the Golden Horn King.

“BOOM!”

With a loud bang, the two earth dragons shattered into countless pieces, wrapped in eternal flames, and flew in all directions.

gold horn King, if that’s all you’ve got, you should get the hell back to your smelly old home!

Tang Zhen's figure flashed out from the flames. The surrounding flame barrier blocked the stone spear. After which, he extended his hand and pointed at the cultivators of the abyss prison tower.

"These guys are too much of an eyesore. How about I help you get rid of them first?"

His voice had just sounded when dozens of rays of light descended from the sky. They were the summoning flying swords that Tang Zhen frequently used!

The cultivators of the prison cell tower changed their expressions and dodged in all directions, trying to avoid this destructive attack.

The Golden Horn King's pupils shrank, a golden wall shot up into the sky, attempting to stop the flying sword's pursuit.

"Ding ding ding!"

A series of collision sounds were heard. The summoning flying sword that had once helped Tang Zhen kill countless enemies was actually blocked by this Golden Earth wall. It let out a crisp wail and dissipated into the air in the blink of an eye.

"This is a flying sword, right? I'm surprised that you know the cultivation methods of those cultivators from the other world!

...

This thing's destructive power is pretty good, but it's useless in front of me!"

The Golden Horn King laughed coldly, his face filled with pride. At the same time, his hands danced and countless Golden Earth balls floated up from the ground, smashing towards Tang Zhen.

"It's useless. How about this?"

As his voice fell, a runic magic circle formed by fire snakes suddenly appeared in front of Tang Zhen. It echoed with the flames around the building.

"Heaven and earth smelt, incinerate all things!"

The flames above his head immediately became like a huge pot, completely covering the area covered by the power of the law. At the same time, a waterfall of flames poured down, as if to fill the entire area!

A Lord cultivator of the black prison tower couldn't Dodge in time and was drenched in the flames. He let out a shrill scream and turned into ashes in an instant!
