

Alternate 1101

[Chapter 1101](#)

1101 The gold horn King's fear (1)

The heavenly Fire poured down on the ground like the Milky Way, creating a sea of fire that devoured everything.

The moment the sea of fire covered the ground, black smoke rose up. Even the hard rocks were quickly melted, turning into flowing lava!

The Golden Horn King's connection with the earth was forcefully cut off, no longer able to pose a threat to Tang Zhen!

The gold horn King, who had always had a sinister smile and a confident expression, had a slight change of expression. He looked at Tang Zhen with a trace of suspicion.

At this time, the magma ground was a land of death. It could be said that whoever touched it would die!

Looking at the surging fire waves on the ground, the cultivators of the abyss prison tower were frightened and hurriedly flew higher, afraid that they would be swallowed by the rolling red liquid.

Right at this moment, a change suddenly occurred. Another shrill scream was heard.

From the surging lava, there was actually a vivid Fire Dragon rolling out. Its agile eyes flashed with an ominous light and it swallowed the nearest Lord of the black prison tower cultivator in one bite.

This fire Dragon wasn't a Golden Earth Dragon formed from the Golden Horned king's law energy, but was filled with life, looking extremely lifelike!

Not far away, when the Golden Horn King saw this scene, the shock in his eyes grew even more intense. He stared unblinkingly at the fire Dragon, and the attack he was about to launch was also stopped.

After the fire Dragon swallowed the cultivators of the abyss prison tower, it raised its head and let out a desolate roar. Then, it turned back and swam in the magma with an extremely excited and happy expression.

At the same time, another fire Dragon also poked its head out of the sea of fire. It rode the lava and flew up dozens of meters high, then opened its mouth and sprayed a large rain of fire.

The rain of fire almost covered the entire sky, burning the cultivators of the black prison gate and making them scream in pain. The few cultivators with the lowest cultivation had to bite their teeth and cut off their skin and flesh that were stained with the fire.

The moment the skin and flesh fell off, they were immediately devoured by the flames and turned into a pile of ashes!

The cultivators who saw this scene rejoiced. Although their limbs were crippled, it was still better than being burned to ashes by the inextinguishable flames!

But even so, there was still a cultivator from the black prison tower who was covered in burns. He was caught up by the fire Dragon and swallowed into his stomach!

In the blink of an eye, three of their companions were killed and several cultivators of the black prison tower were seriously injured.

The remaining cultivators of the prison cell tower roared in grief and indignation. However, they had no choice but to flee for their lives under the pursuit of the two fire dragons!

After what had just happened, they knew the power of the fire rain. Even if they were King level cultivators, they would be severely injured or die if they were touched by the fire rain!

A trace of despair and grief appeared on their faces. In this environment full of murderous intent, they were powerful cultivators, but they could only hide in all directions like stray dogs.

At this moment, they finally realized how terrifying the suppression of a nomological King on low-level cultivators was. Being within the range of the power of nomological laws, they were almost in a race with death. The slightest carelessness would cost them their lives!

In fact, they should not have participated in this battle, but it was too late to regret it now.

They could only blame themselves for underestimating their enemy back then. They always thought that Tang Zhen had just advanced to become a law King not long ago and could only grasp some rough use of the power of law.

In comparison, the gold horn King had been a law Emperor for many years, and he was extremely familiar with the earth element. He had rarely met a worthy opponent in the past hundred years.

Under such a situation, the cultivators of the black prison tower would naturally think that Tang Zhen was not the Golden Horn King's opponent and might even be killed!

Their role might just be to cheer!

However, only after Tang Zhen and the Golden Horn King exchanged blows did they realize that they had made a huge mistake. Because the other wasn't as weak as they had thought, but was instead extremely ferocious!

Even with the Golden Horn King's methods, he was actually unable to do anything to the other. After exchanging a few blows, even they had become the target of the attacks.

The cultivators of the black prison tower had already realized that this young sacred Dragon City Master had not just grasped the power of law, but had used it to perfection. Even compared to the Golden Horn King, he was not much weaker.

In just a few years, he had such terrifying strength. This damn guy was simply a monster!

Although he was cursing in his heart, in this life-and-death situation, there was no use complaining or regretting. The only thing he could do was to escape this terrifying attack and save his own life!

The cultivators of the prison cell city who were dodging didn't see it. Not far away, the gold horn King was gritting his teeth as he looked at this scene. The killing intent and jealousy in his eyes almost materialized.

However, in the blink of an eye, that malevolence disappeared and was replaced by a calm expression.

Slowly turning his head around, looking at Tang Zhen whose pupils had disappeared, with only the seven colored flame left, the Golden Horn King used a calm tone to say: "I admit that I've underestimated you. I didn't think that your control of laws had already reached such a level.

Those two fire dragons just now should be the magical elemental creatures you created after you completely mastered the power of laws, right?"

Tang Zhen, who was wrapped in flames, tilted his head, as he revealed a malevolent smile towards the Golden Horn King, before gently nodding his head.

When the gold horn King saw this, he only thought that Tang Zhen had tacitly agreed to his guess. However, he didn't know that this method of creating an elemental fire Dragon was actually a high level fire law application he had exchanged for after spending all the fire origin stones he had collected.

[magical elemental creature, a high-level application of fire elemental laws. Under the right environment, two powerful magical elemental creatures can be born. This creature's strength is equivalent to a King level cultivator. It can only last for one minute! [Note: This elemental creature can only survive in the area covered by the power of laws. Once it leaves, it will immediately disappear!]

After receiving the cornerstone platform's order and knowing that all Lou Cheng's participating in the special operation would send reinforcements, Tang Zhen had already expected this scene to happen.

With the style of the abyss prison tower, how could it sit back and watch a nomological cultivator be killed? it would definitely pursue this matter.

With his current strength, he was still unable to fight against an old city. The only power he could rely on was the powerful mobile application!

Therefore, Tang Zhen didn't hesitate. He directly took out all his fire origin stones and exchanged them for a few law applications with extremely powerful destructive power. Among them was this high-level law application that almost consumed 80% of his origin stones.

From the gold horn King's current expression, the high level law usage effect was not bad, this fellow was indeed scared stiff!

After all, from the start of the battle until now, the earth Law energy that the gold horn King had used had only reached the middle level. Even though it was only a single word away from the high level, the killing power was still miles apart!

Especially these law elemental creatures, they were born with the strength of a King level cultivator. If dozens of them attacked at the same time, even the gold horn King would not be able to escape death!

The more experienced one was in the pugilistic world, the less daring one would be. The gold horn King was probably already afraid of this, and in order to avoid his life being threatened, he would definitely choose to stop the battle!

This expected battle had basically come to an end!

[Chapter 1102](#)

1102 The dilemma of material shortage (1)

Actually, Tang Zhen had some regrets in his heart. That was that he didn't take this chance to kill the Golden Horn King, as it would leave behind future problems!

This was a hungry wolf. As long as it did not die, it would be a fatal threat to Holy Dragon City!

It was a pity that he had only been a law King for a short time, and his current strength was indeed slightly inferior to the Golden Horn King. He could only rely on his law usage to gain the upper hand in battle.

What caused Tang Zhen to feel a little regretful was that the exchanged law application also had a time limit. It was definitely not the case that one could create law elemental creatures without a time limit or a limit after truly grasping the power of a high-level law!

Under such a situation, the gold horn Emperor was destined to die!

Tang Zhen had also planned to activate another law star and master a new kind of law power. This way, he would have an additional surprise killing technique when he fought with his enemies.

However, just as he was about to activate it, he was notified that his comprehension of the fire-elemental nomological power was insufficient, and he could not activate a new nomological star.

In other words, it was impossible for Tang Zhen to activate a new law star before he completely mastered the fire-elemental laws. He could only do it step by step.

Of course, if he could download and activate all the fire-elemental laws, then the insights he gained each time he downloaded and activated them would be enough to piece together all his insights into the fire-elemental laws!

However, the amount of fire attribute origin stones required for this method was undoubtedly an astronomical figure. Tang Zhen was simply unable to take it out right now!

Although it cost a lot of money, this was an extremely stable way. It was also one of the manifestations of the phone's heaven-defying functions, which other cultivators of the laws could only dream of!

If this kind of opportunity to completely comprehend the power of laws after spending origin stones was presented in front of other law Kings, they would probably do everything they could to collect enough origin stones!

Just as these thoughts were flashing through Tang Zhen's mind, the Golden Horn King spoke again, "manhuang Wang is indeed a new legendary figure. I am truly impressed!"

The killing intent on his face instantly disappeared, as if the life and death battle earlier didn't exist. He looked at Tang Zhen and said with a calm tone, "Since ancient times, the cultivators of Lou city have respected strength. Since the red-Horned King is not your opponent, then he can only blame his inferior skills!"

Now that a powerful enemy is approaching, the cultivators in the entire wilderness should cooperate with each other, not fight among themselves!

Since that's the case, we can put the matter of the red Horn King aside for the time being, and wait until this mission is over, then we'll settle it, how about it?"

When the Golden Horn King said these words, he didn't have any shame on his face. He was indeed worthy of being an experienced law King. He was so slippery that after realizing that he might not be Tang Zhen's opponent, he immediately chose to hide and retreat.

Even if it was such a great enmity, he could still pretend that he did not care at all!

Tang Zhen was naturally extremely clear in his heart that this fellow was a poisonous snake. Although he was unable to bite him this time around, he would definitely not let go of any thoughts of revenge.

As long as he got the chance, the Golden Horn King would definitely reveal his sharpest fangs and bite down on Tang Zhen!

As for Tang Zhen himself, how could he not have similar thoughts?

Ever since the black prison tower City schemed against the Holy Dragon City, the enmity between the two sides could no longer be resolved. Tang Zhen did not have the slightest intention of holding back.

This time, the two sides had unexpectedly met during the special mission. This was definitely an excellent opportunity to make a move. With Tang Zhen's style of doing things, even if he didn't die, he would at least skin the black prison tower alive!

Both sides had their own thoughts and the battle ended hastily. Even if the black prison tower suffered a small loss, they were not in the mood to care about it.

The Golden Horn King was also a decisive person. After seeing Tang Zhen agree to his suggestion, he immediately retreated, grabbing the remaining cultivators of the black prison tower and disappearing into the night.

Tang Zhen heaved a sigh of relief when he saw that his enemy had disappeared. The flames on his body disappeared and a trace of exhaustion appeared on his face.

He slowly sat on the top of the ruins, took out a bottle of wine from his storage space, raised his head, and poured it into his mouth.

Under the nourishment of the rich wine, his throat, which was on fire, also felt much more comfortable.

His cultivation was not high enough. Once he forcefully used a high-level nomological law application, it would leave behind obvious aftereffects. Therefore, unless it was an urgent situation, it was best not to use it.

Tang Zhen threw the empty wine bottle to the side. He turned his head and glanced at the building in the distance before softly saying, "Elder situ, have you seen enough?"

As soon as he finished speaking, situ Yuanzhi appeared from behind a ruined building and walked over while laughing.

Just as he was about to approach Tang Zhen, situ Yuanzhi's expression turned serious as he bowed to Tang Zhen.

This was the etiquette for a low-level cultivator to face a high-level cultivator. Even if situ Yuanzhi was much older than Tang Zhen, he couldn't neglect this aspect.

the scene of me exploring the giant tower with the wilderness King is still vivid in my mind. The only difference is that I still haven't made any progress, but your name has already shaken the entire war zone. Congratulations!

Because of heaven battling city's inheritance, situ Yuanzhi's words and actions were rather old-fashioned, and Tang Zhen was already used to it.

"You're too polite, elder situ. I didn't think that you'd be participating in this mission as well. It's really surprising."

Tang Zhen said indifferently. He stood up from the ground and swept his gaze around him. The corner of his mouth faintly revealed a trace of a cold smile.

When situ Yuanzhi saw this, he laughed and said, "After tonight's battle, I think your reputation will rise to another level. After all, there are only a few cultivators in the entire wilderness who can force the Golden Horn King to retreat!

The battle just now had attracted a lot of King level cultivators. This was a great opportunity to watch. How could they miss it?

Coming to watch the battle without permission was equivalent to prying into a cultivator's privacy, which was absolutely a taboo.

Those guys who were secretly watching probably couldn't wait to hide, so why would they take the initiative to jump out?"

Tang Zhen nodded and looked at situ Yuanzhi. then why did you come out, elder situ? aren't you afraid that I'll vent my anger on you? "

Situ Yuanzhi shook his head. based on my understanding of you, you wouldn't do such a thing. What's there to be afraid of? "

"Is that so? you know me well."

After the two of them chatted for a while, they finally got down to business.

"The mission this time was too rushed, and we were unable to make sufficient preparations. We were slightly lacking in both weapons and supplies.

The reason I'm here is to purchase another batch of weapons from Your Excellency, the kind that your loucheng soldiers use. The price is negotiable!"

Situ Yuanzhi stated his intention and waited for Tang Zhen's reply.

Before he came to look for Tang Zhen, he had already learned about the entire process of the mission from his granddaughter. He was also clear that it would be impossible to fight against the enemy that was about to arrive with just cold weapons.

However, heaven battling city, which was used to using cold weapons in battle, didn't have much in reserve, and because it wasn't teleported through a tower, it couldn't be brought over.

They were not like the Holy Dragon City, who had sufficient storage equipment and could carry large amounts of supplies without any worries!

In this aspect, situ Yuanzhi was really envious.

Because in the entire wilderness Warzone, only Holy Dragon City could do this!

...

[Chapter 1103](#)

1103 The survivors in the ruins (1)

The teleportation of loucheng required the construction of a teleportation channel. In a state of emergency, this process might take three or five days. Before it was teleported over, the cultivators of loucheng had to figure out all the expenses themselves.

After realizing this problem, the cultivators in loucheng immediately took action and began to collect materials with the city as the center.

Millions of cultivators were eating and chewing, which was definitely a terrifying consumption. It was impossible to solve the problem by collecting them alone.

The food was not a problem as Lou Cheng's cultivators had brought along dry food before they were teleported. It should be enough to last them for a few days. However, the biggest problem was the weapons and equipment.

If the enemy was just an ordinary person, it would not be a big problem for them to fight with cold weapons. However, if the enemy was also strong and equipped with powerful technological weapons, the cultivators in Lou Cheng would undoubtedly be at a great disadvantage.

This was especially true for the first few hundred cultivators of loucheng who had entered this world. After their cultivation was restricted and they were chased by the cyborg, they felt this even more deeply.

It was also under the persistence of these powerful King level cultivators that the various towers began to attach great importance to weapons such as guns.

However, this kind of Lethal weapon of war was not easy to find, especially since the half-Cyborg's weapon reserve was not large and could not meet the needs of the cultivators in Lou Cheng.

Even though they had collected some weapons left behind by the cyborgs, most of them were damaged. Without any repair or spare parts, the cultivators in loucheng could only throw them away as scrap iron.

Although some resources could be exchanged from the war tower, they would require precious battle merits. Who would be willing to waste them if they could collect them?

Therefore, when situ Yuanzhi, who was in a similar predicament, thought of Tang Zhen immediately.

Looking at the helpless situ Yuanzhi, Tang Zhen was in a good mood.

This situation was also within his expectations. Therefore, before the arrival of the Holy Dragon city's reinforcements, Tang Zhen had already sent a message to the cultivators in the tower City to pack up and bring over the overstocked weapons in the Holy Dragon city's inventory.

Those weapons had been piled up for a long time. Although they were not as lethal as the weapons of the cyborgs, they were still real killing weapons!

In order to store these items, almost all the caves in the Holy Dragon City were occupied. Now, he could finally make some space for other things.

Because of the storage card, it was not difficult to carry these weapons. All he needed to do was to put them in his pocket.

As long as the war did not end in a short period of time, the weapons and equipment that Tang Zhen had brought would definitely be easily sold and he would earn a huge sum of money!

In the end, in less than a day, there was business at his door.

It was also because he had expected such a situation to happen that Tang Zhen especially allowed some merchants to follow the teleportation and let them handle the business matters.

As for the Holy Dragon city's cultivators, they should just focus on fighting the war!

After chatting with situ Yuanzhi for a while, they said goodbye to each other. Tang Zhen also turned around to check on the progress of the dismantling of the energy absorption device.

Tang Zhen was extremely interested in this special device. Therefore, he could not afford to lose it!

.....

In the midst of the Indigenous People's uneasy mood, the long night finally passed. The sun once again shone on the earth, illuminating the city that had almost become a tropical rainforest.

The once prosperous land had turned into scorched earth, leaving behind only a land of Wolf lodges that were then covered by wild grass.

The hungry citizens carefully walked out of their homes and carefully explored the vicinity of their homes, looking for food to fill their stomachs.

Due to the mutation of animals and plants, the size of the fruit had grown crazily, so the fruits of many plants had become abnormally large. From time to time, giant fruits could be seen lying in the grass, being gnawed on by animals.

With this food, the townsfolk didn't have to worry about going hungry for a while.

However, the monsters and cultivators that appeared from time to time still made them feel as if they were walking on thin ice. They didn't dare to go too far, for fear that they would never return.

In a dilapidated building covered by vines, a dozen men and women were gathered in a room. They were surrounding a tomato the size of a basin and were swallowing it.

The mutated fruit did not taste good. It was sour and bitter. If they were not so hungry, they would not eat this at all!

After wiping the red juice from the corner of his mouth, bin Zi slowly walked to the concealed window and carefully observed the situation outside.

The long Street was still quiet and didn't seem to be in any danger, but bin Zi knew that there were quite terrifying monsters hidden in the weeds on both sides of the road.

Sure enough, as he observed carefully, he soon found a huge snake-shaped creature more than ten meters long. It was slowly swimming under the wreckage of a car, and then it sprang out at lightning speed and entangled a monster that looked like a mutant rat.

After fighting for a while, the snake-like creature won. After swallowing the rat monster in one bite, it lay on the top of the ruins and lazily basked in the sun.

After swallowing his saliva, bin Zi returned to the crowd worriedly and looked at the woman beside him.

"Big sister, when are we leaving this place? if we stay here any longer, we might be eaten by the monsters!"

The woman who had once led the way for Tang Zhen and was called big sister by bin Zi thought for a moment and said softly, it's impossible to leave now that the monsters on the ground are running rampant. It's the same for the underground sewers, which are even more dangerous than the ground!

Bin Zi nodded when he heard this. He seemed to have recalled the scene of encountering the monster underground yesterday and couldn't help but shiver.

If he hadn't run fast enough, he would have been like the other unlucky guys and turned into the monster's excrement.

this won't do, that won't do. What should we do? are we just going to wait for death here? "

A beautiful woman in men's clothes couldn't help but roar, her voice full of resentment.

Bin Zi glanced at the woman and snorted, " "If you're not satisfied, then get out of here immediately. No one is begging you to stay!"

The woman's eyes widened as if she was about to get angry, but in the end, she just snorted and turned her head away.

alright, we have to rely on each other to get through this difficult time. Don't start an internal conflict!

A white-haired old man sighed and tried to persuade them. When he saw that bin Zi and the woman were ignoring him, he shook his head with a bitter smile.

The big sister ignored the others and kept looking at the map in her hand, as if she was studying the route to leave the city.

With the arrival of millions of cultivators, the city had become even more unsafe. In addition to facing all kinds of animals and plants, the survivors also had to be careful of alien invaders of all shapes and sizes.

Compared to the brutal monsters, the powerful cultivators were the biggest enemies of the survivors. They were intelligent life forms and knew how to think and analyze.

Once these cultivators locked onto the survivors, they would probably all die!

Just as big sister was trying to figure out an escape route and everyone was silent, the crisp sound of a gunshot suddenly rang out from outside, causing everyone's expression to change.

Bin Zi nimbly picked up a gun and rushed to the window in a few steps, nervously searching the streets below.

A figure scuttled out of the wild grass at a frightening speed. After running on the street for a distance, he actually entered the building where everyone was hiding.

...

After seeing this scene, bin Zi's heart instantly turned cold!

[Chapter 1104](#)

1104 A confrontation _1

A few seconds after the figure entered the building, more than a dozen strong figures in armor suddenly appeared. They were carrying guns and swords, constantly searching every corner.

The snake-shaped monster that made bin Zi extremely apprehensive tried to attack one of the pursuers, but in the blink of an eye, it was cut into a dozen pieces and fell on the road, writhing continuously.

Bin Zi, who had witnessed the entire process, actually didn't see how the other party struck with his saber. He only saw a flash of light, which showed how terrifying the other party's speed was!

Looking at the vigorous movements of those pursuers and their murderous eyes, bin Zi knew that things were going to be troublesome.

Once the pursuers followed the trail and entered the building, their hiding place would be exposed. Who knew if those fierce guys would kill him?

Just as he was about to turn around and tell his companions about his discovery, he was surprised to find that the door of the room he was hiding in had quietly opened a gap.

Before bin Zi could give a warning, he saw that the big sister had already raised the rifle in her hand and was aiming at the open door.

"Who is it? come out!"

As soon as the big sister finished speaking, a black shadow rushed in quickly. However, he fell to the ground after taking two steps into the house.

Everyone was shocked by the unexpected situation. The woman in the man's clothes screamed and ran to another room.

"Damn it, what are you shouting for?"

When bin Zi saw this, he cursed angrily and quickly turned the gun to point at the black shadow lying on the ground.

Only then did he realize that the black shadow was actually a cyborg. However, it looked extremely miserable, and its body was covered in wounds.

Although the cyborg was lying on the ground, he was still conscious. He raised his hand with difficulty and looked up at bin Zi and the others.

"Help me! Don't let those intruders catch me!"

When bin Zi heard this, he didn't know whether to laugh or cry as he looked at the big sister. He didn't know what to do. After all, as members of the resistance, they were the arch-enemies of these cyborgs.

However, the cyborg organization only existed in name now. The remaining cyborgs in the city were gradually cleaned up by cultivators in Lou Cheng.

His former enemy had asked him for help. Should he help or not?

Big sister's expression was grave as she slowly walked to the cyborg and asked in a cold tone, "why did the people outside capture you? is it because you're a cyborg?"

The cyborg nodded with difficulty. This action seemed to have exhausted all his strength, so his head soon drooped down.

When the big sister saw this, she gave bin Zi a look and then slowly raised the gun in her hand.

Bin Zi's body began to move backward and he was getting closer and closer to the window. Just as he was about to reach the window, the woman in the other room suddenly rushed out.

Before anyone could react, she walked up to the cyborg and asked in a voice full of anticipation, "If we help you, will you be able to take us out of here?"

After seeing this scene, big sister and bin Zi both secretly cursed "idiot" and then quickly retreated.

The cyborg, who was lying on the ground in a weak state, suddenly grabbed the woman and strangled her neck. With the strength of the Cyborg's arm, it could break her neck with a slight twist.

Then, the cyborg got up from the ground and swung his arm, which was half metal and half flesh. The woman immediately showed a painful expression and looked in the direction of the big sister with a pleading look.

help me leave this city, or find a hidden place. Otherwise, I'll kill her!

A cold and emotionless voice came out of the Cyborg's mouth. When he looked at the guns in the big sister's and big sister's hands, there was a hint of fear.

Unlike the Undying King Kong, cyborgs would die immediately after being hit by heavy firearms!

When bin Zi heard this, he smiled disdainfully. He glanced at the woman who was constantly struggling and said coldly, "What does her life or death have to do with us? if you want to kill her, just kill her. Why are you talking so much?"

When the woman whose neck was being strangled heard this, a look of despair immediately appeared on her face, and she looked at bin Zi with eyes full of resentment.

Big sister did not say a word. She held her gun steadily and locked her eyes on the cyborg who was using the woman's body to shield herself.

It was obvious that the cyborg was afraid of the weapon in his hand. Otherwise, he would not have put on an act after entering the room. Instead, he would have controlled everyone directly.

As long as the weapon was in his hands, the cyborg would not dare to act rashly!

After hearing bin Zi's answer, the half-robot was slightly stunned and asked with some doubt, "This is your companion. Don't you care about her life?"

"You're wrong. She's not our companion, but a burden who only knows how to complain. We just happened to meet by chance!

So, if you want to use her to threaten us, you've definitely made a mistake!"

Bin Zi's merciless answer made the woman completely despair. Her heart was also filled with regret and resentment.

She didn't expect that the cyborg she had been protecting and placing high hopes on would use her life as a bargaining chip. The two men who usually flattered her were hiding in the corner, not daring to make a sound.

However, the woman did not think of the possibility that the cyborg would let her go after she lost her value and find other ways to solve the problem.

The cyborg did not expect this to happen. Since the hostage in his hand was useless, he had lost the right to negotiate.

After thinking for a moment, the half-robot said, "As long as you help me, not only can I release your companions and take you out of this city, but I can also guarantee that I will give you unimaginable benefits after defeating these invaders!"

Seeing that a few survivors were tempted, the cyborg continued to tempt them. "My request is actually very simple. I just need you to help me get a few energy batteries.

As long as you're careful, it'll be easy to do, right?"

After hearing the Cyborg's request, a few of them were already tempted. They kept looking at big sister, as if signaling her to quickly agree.

The big sister sneered and said in a disdainful tone, "If any of you are willing to help him, I will not stop you. However, we will not participate in this matter.

Bin Zi, let's go!"

After throwing out this sentence, bin Zi and big sister slowly moved towards the door.

“No, we can’t let them leave. What if they tell on us?”

The woman, who was previously controlled by the cyborg, had finally escaped. She ignored the pain in her throat and immediately stood in front of the two.

“You can leave, but you must hand over your weapons. Otherwise, don’t even think about leaving!”

The woman’s eyes flashed with a trace of pride and killing intent. She looked at the survivors who had raised their weapons and narrowed her eyes.

in your dreams! Do you believe that I won’t kill you right now? ”

...

Bin Zi sneered and directly pointed the gun at the woman’s forehead.

Feeling the coldness of the gun barrel, the woman was so scared that her legs went weak, but she still stood in place.

“Kill me if you have the guts, but don’t even think about living!”

The woman didn’t know where she got the courage from, but she actually ignored the threat of death and sneered at bin Zi in disdain.

[Chapter 1105](#)

1105 Big sister’s request

The hatred in her heart continued to surge, and even though the gun was pointed at her, the woman still did not choose to Dodge.

“Put down your guns, or I won’t be polite!”

A man holding a weapon suddenly roared at big sister in a deep voice. At the same time, he subconsciously moved closer to the cyborg.

There were four or five other survivors who did the same thing. They had all decided to work with the cyborg to help him find power batteries.

However, they didn’t know that doing so was no different from asking a Tiger for its skin!

Bin Zi was so angry that he laughed instead. He looked coldly at his companions who were chatting just now and chuckled, “You idiots, shoot if you have the guts. Let’s see who dies first.”

let me remind you, there are intruders everywhere down there. If they hear the gunshot, none of you will survive!

Upon hearing bin Zi’s words, the survivors were all stunned, and panic appeared on their faces.

Seeing this, the cyborg waved his hand at bin Zi and big sister. “You can leave, but please don’t sell us out!”

At this moment, the cyborg was suppressing the killing intent in his heart. If not for the fact that the energy in his body was about to be exhausted, he would not have to go through so much trouble and would have killed both of them.

However, as long as he used the energy batteries collected by the residents in front of him, his weapon system and various auxiliary functions could be reused. At that time, as long as he was careful, he could definitely escape from this city controlled by the cultivators of Lou Cheng.

As for his previous promise to lead the survivors out of this place, hehe, it didn't matter where the dead were buried.

Seeing that the cyborg had agreed to let Big Sis and the others leave, the survivors did not force them to stay any longer. They all silently watched the two of them retreat to the door.

no, they can't leave. Kill them!

The woman beside him suddenly shouted, grabbed a gun from a survivor's hand, and pulled the trigger in the direction of the door.

"Bang!"

A gunshot rang out. Bin Zi blocked in front of the lady boss and slowly fell to the ground.

"Idiot!"

The cyborg roared and rushed to the woman, punching her in the head.

"Pfft!"

Like a shattered watermelon, half of the woman's head disappeared in an instant, leaving only her lower jaw on her neck, and blood kept spurting out.

When the survivors saw this, they all cried out in shock and looked at the cyborg in horror.

Never in their dreams did they expect that the other party would suddenly turn hostile and kill the woman so casually!

After killing the woman, the cyborg picked up the gun in her hand and quickly rushed toward the door.

The gunshots just now had definitely attracted the attention of the cultivators in Lou Cheng. It wouldn't take long for them to come here, so they had to escape as soon as possible.

However, the big sister who was guarding the door had already raised her gun and aimed it at the cyborg.

"Dammit, get out of my way!"

The cyborg roared, and the alloy arm holding the gun was trembling slightly!

"No one can leave. If we die, we'll die together!"

Big sister's eyes were bloodshot, and there was a hint of madness in her eyes. Her companion, who had accompanied her through life and death, had fallen in front of her, and this made her almost completely break down.

His hysterical appearance immediately frightened the cyborg and the survivors, making them at a loss.

don't be rash. I'm just leaving. I won't hurt you!

The cyborg explained, but big sister remained unmoved. She was still staring at him with her blood-red eyes filled with tears.

A hint of killing intent appeared in the Cyborg's eyes. He placed his finger on the trigger and began to exert force.

"Don't worry, none of you will be able to leave!"

At this moment of daggers drawn, a cold voice suddenly rang out, causing everyone's hearts to tremble slightly.

At the window, a cultivator in black armor was standing quietly, coldly looking at the people in the room.

When did he enter the room? no one had noticed him at all!

Despair appeared in the Cyborg's eyes. After this period of interaction, he knew better than anyone else how terrifying Lou Cheng's cultivators were.

Now that the power battery in his body had been depleted, and he was trapped in this narrow room by the other party, he was afraid that there was no possibility of escape.

The half-robot threw away the gun in its hand and turned around. It showed a miserable smile and asked the cultivator from loucheng.

"Tell me, what do you want?"

The Lou Cheng cultivator looked at the cyborg, stretched out his left arm, and tapped a few times. Then he said loudly, " Luo Changfeng, a brain mutant. He was absorbed and modified by the cyborg organization twenty years ago.

I'm currently a cyborg special-grade engineer, mainly responsible for cyborg body modification work. My security level is SSS, am I right?"

The cyborg chuckled and nodded at cultivator Lou Cheng. He sighed and said, " I didn't expect you to have such a level of information. Obviously, the core database has been hacked by you. There are no more secrets left!

After a pause, he looked at the computer on cultivator Lou Cheng's wrist, seemingly very interested.

This was a habit. If he was given enough time, he would even want to own one and research it.

“At first, I thought you intruders only knew violence and destruction, but ever since the energy absorption device was shut down, I guessed that you must have mastered quite a powerful technological means.

This was because if there was even the slightest mistake in the process of shutting down the energy absorption device, it would completely explode, razing everything within a radius of a thousand miles to the ground!

At that time, I thought that I would not be able to escape death, but it turned out to be a false alarm.

However, our advantage was also completely lost in this way. The battle that happened later proved this point!”

The cyborg named Luo Changfeng seemed to know that he was doomed, so he completely relaxed and talked to the cultivator Lou Cheng.

The other survivors looked at the scene in front of them in a daze. They were all at a loss, especially when they found out that this terrifying invader was actually a handsome young man who looked exactly the same as them. A strange feeling rose in their hearts.

...

The Lou Cheng cultivator laughed lightly and glanced coldly at the nervous survivors. He turned to the cyborg and said, “our city Lord is very interested in you, so he would like to invite you over. Please do not refuse!

Luo Changfeng chuckled and said to the cultivator from Lou Cheng, “Do I still have the right to refuse at this point?”

“Alright, then please come with me!”

Lou Cheng reached out his hand and motioned for Luo Changfeng to follow him downstairs.

As for the survivors standing aside, the Lou Cheng cultivators didn’t pay any attention to them at all during the whole process.

To the cultivators of Lou city, they didn’t need to pay attention to these weak natives at all. They could even ignore their existence.

When they passed by the door, the dazed big sister suddenly jumped up and blocked the path of the Lou Cheng cultivator.

The Lou Cheng cultivator who was blocked didn’t change his expression. He stared at the big sister and said, “Make way, or you’ll regret it!”

Big sister looked at the cultivator and shook her head. Then, she said firmly, “some of you owe me a promise, so I hope you can help me and save my companions!

Everyone was stunned when they heard this.

...

[Chapter 1106](#)

1106 Items in the secret room and uneasiness

Ignoring the curious and surprised looks of the others, big sister just stared at the Lou Cheng cultivator in a daze, her eyes full of desire and expectation.

When the cultivator from Lou Cheng heard this, he immediately showed a trace of curiosity and asked, "Oh, there's such a thing. Tell me, who owes you a favor?"

As a cultivator of Lou city, it was rare for him to lose a favor from an ordinary native.

So, he wanted to know who this person was.

"That person is about the same age as you, but his eyes are very sharp. The style of his armor is similar to yours, but it is a purple-gold Kasaya."

After listening to the big sister's description, a strange expression gradually appeared on the cultivator's face. The corner of his mouth twitched, and he couldn't help but look at her a few more times.

He was all too familiar with this image, so his first reaction was disbelief. After all, that person had always given people the impression of being powerful and mysterious. How could he owe a favor to an ordinary native?

However, if what this woman said was true, then this favor would be too big!

Since the other party was related to the one he thought of, he had to deal with this matter carefully. Therefore, cultivator Lou Cheng asked again.

"I'll ask you again, are you sure this person owes you a favor?"

Cultivator Lou Cheng stared at the big sister and asked in a very serious tone.

"I'm sure!"

alright then. Take a look at this picture. Is this the person in it? "

As he spoke, the cultivator operated his computer and a holographic image popped up. It was a snapshot of Tang Zhen commanding the battle. The background should be the decisive battle in the water world.

The big sister glanced at the image and nodded with certainty. "That's right, it's him!"

Cultivator Lou Cheng nodded and operated the computer on his wrist again, as if he was contacting someone.

I beg you, please hurry up! My companion can't hold on any longer!

The big sister looked at bin Zi, who was covered in blood, and raised her head to beg the cultivators of Lou Cheng.

Upon hearing this, the Lou Cheng cultivator immediately took out an item that looked like a talisman from his waist and pressed it directly on bin Zi's body. Immediately, a ray of light protected the wound.

Bin Zi, who was originally on the verge of death, suddenly became a lot quieter, and his complexion looked much better.

“Don’t worry, with this thing, your companion won’t die for the time being!”

While they were talking, cultivator Lou Cheng had already sent out the video of big sister and was ready to do the final confirmation procedure.

After a few seconds, he received a reply. His superior informed him to accept the big sister’s request.

“Alright, come with us!”

Then, cultivator Lou Cheng called out to the door, and two cultivators came in. They used a folding stretcher to lift bin Zi and quickly went downstairs.

The survivors looked at each other and then all rushed to the window.

The scene on the street made them suck in a cold breath.

Hundreds of loucheng cultivators in black armor had completely blocked the entire Street. Drones were circling above them, searching for possible hidden enemies.

A cyborg aircraft that was slightly bigger than a truck was parked in the middle of the street. After big sis and bin Zi got on it, they quickly rose from the ground and drove in the direction of the city.

After seeing this scene, the survivors didn’t know what to feel.

Just now, everyone was still gathered together to discuss how to escape, but in the blink of an eye, one died and one was injured. Among them, the injured bin Zi and the big sister had already successfully left this dangerous city.

As for their fate, it was full of unknown. Only the heavens knew how long they could last in such a dangerous environment.

.....

After Tang Zhen returned to the underground base at the foot of the mountain, he entered a cave alone and slowly sat down.

On the wall in front of him, a slightly protruding part of the wall trembled and then condensed into a human-shaped object.

Its face was smooth, and as it left the wall, the surface of its body began to turn black. It was the liquid robot that had regained its connection!

“Well done, take out the item!”

Following Tang Zhen’s order, the liquid robot took a step forward and placed a storage ring in Tang Zhen’s hand.

After taking a glance at the ring, Tang Zhen used his spiritual force to shield the surrounding space and released the items inside.

He could not wait to see what the teroboros were keeping in their secret chamber, which was why the cornerstone platform had issued a special call.

However, when the items in the ring were taken out, Tang Zhen was slightly stunned. This was because the mission item had really exceeded his expectations.

If he wasn't wrong, the stone-like objects in front of him were clearly the foundation stone platform that had been cut into eight pieces!

What was he doing?

With a trace of doubt, Tang Zhen checked again and confirmed that there was nothing else.

Tang Zhen raised his head and glanced at the liquid robot before shaking his head.

This liquid robot would definitely carry out his orders thoroughly. Even a speck of dust in the secret room would be brought back, so the possibility of missing was very small.

Now, it was certain that this was the only item in the teroboros 'secret chamber.

However, the tribesmen had gone through so much trouble to transport a shattered cornerstone platform, and the cornerstone platform had mobilized so many people to snatch it. What was their purpose?

With a mind full of doubts, Tang Zhen began to size up the stones on the ground. He wanted to figure out what was so strange about this thing.

After carefully thinking back, he was shocked to find that this seemed to be the first time he had seen an independent cornerstone platform, because after every tower was destroyed, the cornerstone platform inside would disappear without a trace.

This was a bizarre situation. If he had not seen the broken foundation stone platform today, he would not have realized this!

Then where did the destroyed cornerstone platform go? why was the cornerstone platform in front of him preserved?

Tang Zhen's mind jolted when he thought of this. When he carefully observed again, he discovered that the surface of these shattered stones had actually been specially treated. There seemed to be a kind of strange force field that firmly wrapped the stone within it.

...

The stone that was wrapped in it was extremely unstable, as if it had already turned into energy. It was only because of the existence of this strange force field that it did not dissipate into nothingness!

It was obvious that the teroboros had used some special method to preserve the foundation stone platform that was supposed to have disappeared!

What was the purpose of keeping this cornerstone platform?

When he tried to assemble them, Tang Zhen was surprised to discover that there was a hidden space within these stone pieces. It seemed to have once stored an item.

Of course, the item had already disappeared, leaving only an empty groove.

Tang Zhen had a premonition that the item that had disappeared was the true core of the cornerstone platform!

He had a guess that the cornerstone platform might not have issued the mission for these broken stones, but for the thing in the groove!

In order to confirm his guess, Tang Zhen took out an item from his storage space. It was the item identification card that he had obtained from the lottery!

The probability of this item appearing wasn't high, so every card was saved by Tang Zhen in order to be used when needed.

Following the tearing of the card, a stream of light landed on the rock. Soon after, a set of words appeared in front of Tang Zhen.

[the shattered cornerstone platform can not be restored because the core of the energy Terminal has been lost. Its value has been greatly reduced, so you can throw it away!]

...

Tang Zhen revealed an "as expected" expression. It seemed that the matter was as he had guessed. The so-called Energy Terminal core was no longer there, and it was the most important thing in the cornerstone platform.

But the problem was that the core of the energy Terminal was so important that the teroboros would not let it go so easily, and why would they ship a bunch of useless shells to this world?

Tang Zhen's eyes narrowed. He seemed to have smelled a trace of conspiracy.

[Chapter 1107](#)

1107 Mutation and backpass

In an unknown space, there was endless darkness.

In this special and wondrous place, there was a huge milky-white ball of light floating in the air. Countless tentacles extended from it, constantly squirming gently.

Every time the tentacles wriggled, there would be more or less items appearing in the space.

It was unknown how many years this scene had lasted, and it seemed like it had never changed.

Until one day, a certain area on the ball of light suddenly dimmed. Then, starting from that abnormal area, black blood vessel-like objects appeared, like ink that was sprinkled into the water, and began to seep into the surrounding area.

The bright white ball of light trembled violently and burst with light, completely illuminating the space within a radius of a thousand miles.

In an instant, treasure light shot into the sky, dazzling everyone!

It turned out that in this vast space, there were countless items piled up. Priceless treasures, brains, origin stones, and so on were piled up into small mountains!

The total amount of wealth here was simply impossible to estimate. Even if they could obtain a small portion of it, they would definitely be the richest in the world!

However, the light that was shining on the treasure was flickering. As time passed, the light became dimmer and dimmer.

On the other hand, half of the huge ball of light had become as black as ink, revealing a trace of chilling strangeness!

While the fight was going on, more than half of the black balls of light were constantly flashing with subtitles.

The other half-white ball of light seemed to have become more urgent and was trying its best to stop the text from appearing. However, after trying for a long time, it had no effect.

The other half of the black ball of light exerted force again and seized a large area.

As the black color continued to suppress the White part, the White part became smaller and smaller, and the light became weaker and weaker.

From the looks of it, it wouldn't take long for the White part to be occupied, and then it would completely become a black ball!

Because this strange and intense scene was happening in an unknown space, no one had witnessed it, nor did they know that a certain magical existence was about to be completely controlled by some unknown force!

.....

Timrell, Snow Hill.

Teams of Holy Dragon City soldiers who were on a mission suddenly took out their identity cards in unison, looking at the contents displayed on them in surprise.

[due to special reasons, all loucheng that are carrying out missions in the other world will activate the return link in three days. I hope all loucheng residents can return to their respective loucheng as soon as possible to avoid missing the teleportation and staying in the other world!]

After seeing the identity card prompt, the soldiers looked at each other and had the urge to curse.

As a resident of the tower, one thing he had to remember was that the cornerstone platform would never release false information. Once an order was issued, it must be strictly followed!

Therefore, after three days, the Holy Dragon City would definitely return to the loucheng world!

After seeing this message, the residents of Holy Dragon City were very unwilling. As the control over timlad continued to strengthen, the daily Harvest of Holy Dragon City was enough to make people drool.

As long as this situation continued for a year, the Holy Dragon City would definitely return with a bountiful harvest!

However, this order in front of them made the Holy Dragon city's residents' dreams come to nothing. It was as if they had found a treasure after much difficulty, but after taking only a few treasures, the cave sank into the ground.

That kind of depressed feeling simply couldn't be described with words!

However, even if they were depressed, they still had to carry out orders. So after receiving the message, the commanders of the various armies immediately issued orders. Hundreds of thousands of Holy Dragon City soldiers began to quickly return to the Holy Dragon city's area.

Such a large-scale military mobilization immediately alarmed the native people of timriel, who were on tenterhooks all day long. They mistakenly thought that the Holy Dragon City was about to make another big move.

In the end, they were shocked to find that the Holy Dragon City had actually withdrawn all of their legions and were heading straight for the floating city outside of Snow City!

could it be that this group of otherworldly demons is preparing to leave this world? "

After realizing this, the Aborigines were both surprised and overjoyed. For a moment, they did not care about anything else and only continuously sent out spies to investigate the Holy Dragon city's movements.

The information that they received made them overjoyed. As they had expected, the Holy Dragon city's various legions were gathering under the floating city and being absorbed by the light pillar that descended from the sky.

Even the troops in charge of defense below the floating city, as well as many contract cultivators, had also retreated to the City Tower. There was not a single Holy Dragon City combat personnel left on the ground!

For a time, the matter of what had happened to the otherworldly demons that had caused them to hurriedly gather and evacuate from timriel became the most discussed topic among the native forces.

The native forces would never be able to determine the real reason just by guessing.

Of course, even if they couldn't guess it, it didn't matter. As long as these evil demons could leave, they would thank the heavens.

After all, during the time when the Holy Dragon City had descended, they had not been able to sleep well. From time to time, they would dream that the Holy Dragon City had come to attack them, and then wake up from the nightmare with cold sweat!

Now that the otherworldly demons were finally leaving timrell, they were just short of celebrating and holding a grand banquet!

Before they knew it, the bold Native cultivators and residents began to gather near the floating city, waiting for the exciting moment to come.

Time slowly passed, and in the blink of an eye, three days had passed. Under the expectant gazes of the crowd, a huge vortex appeared in the sky above Holy Dragon City, which was ten thousand meters in the air, and it continued to expand.

The Holy Dragon City, which was like a piece of floating land, began to move toward the vortex. It would probably disappear completely in a short time.

After seeing this scene, the native forces who had been looking forward to it immediately cheered loudly. Some of them even had tears in their eyes.

The heavens had taken pity on them. Ever since this group of otherworldly demons had descended, the entire timriel had been thrown into chaos. At least 500000 natives had died at their hands, directly or indirectly!

For the continent of timriel, this was no different from a catastrophe!

God bless! Those damn demons are finally gone!

old John, you bastard, did you see that? the heavenly Demon tribe has left. We finally don't have to hide here and there anymore!

"Let's hope they die a horrible death, these evil demons."

The sounds of celebration and chaos came from the ground, almost soaring into the sky!

However, some people with sharp eyes noticed that the floating city's 12 arms were suddenly flashing.

A sense of danger rose in their hearts. However, before they could react, they saw countless objects falling from the sky, smashing toward the people on the ground.

The people who had been cheering immediately began to flee in all directions like frightened rabbits.

...

They had a deep impression of the terrifying power of the Holy Dragon city's weapons. They were afraid that the thing that fell was the bomb that had made a loud noise!

However, their speed of escape was obviously not as fast as the speed at which the items fell. It only took about a minute for the items to fall.

It wasn't until the Aborigines were smashed in the head and face that they realized in shock that these things were all domestic garbage!

Smelling the stinky smell on their bodies, the natives roared angrily at the sky. This group of damn otherworldly demons actually didn't forget to disgust them before leaving!

Just as they were cursing, the huge image of a fat cultivator suddenly appeared in the sky, almost blocking the entire sky. Then, an arrogant voice spread.

"Don't be too happy just yet, you guys. It won't be long before I come back!"

After hearing this, all the native cultivators were dumbfounded and looked desperate.

[Chapter 1108](#)

1108 The plan of the teroboros people

In the vast starry sky, five enormous torobo battleships were advancing at high speed, approaching a Blue Planet. Based on the fleet's current speed, they would probably reach their destination in a few days.

They were like moving asteroids, and the wreckage of the warships outside Holy Dragon City was not even one-tenth of their size!

Such a huge warship must have an extremely terrifying carrying capacity and also had terrifying weapons.

Although there were millions of cultivators in Lou city, it was hard to predict the outcome of the battle against such an enemy.

After all, the enemy was in the sky, and less than one-tenth of the cultivators in loucheng could fly. As for those who could fly out of the atmosphere and fight in outer space, there seemed to be no one at all.

How could the battle continue when faced with such an enemy?

At the center of the command ship, a few teroboros people in silver armor were watching a series of encrypted videos.

According to the information they had, Lou Cheng's cultivators in the wilderness Warzone had not cracked this kind of encrypted communication method. Therefore, this information would never be intercepted by them.

The scene recorded in the holographic image was the activity scene of the cultivators of loucheng. There were even symbols marked on the map, which were the temporary encampment of the cultivators of loucheng.

It could be said that with the appearance of this information, the secrets of the cultivators in Lou Cheng were completely exposed to the enemy. There were no more secrets to speak of.

Of course, the torobo people did not completely believe the content of the information. After all, when the cultivators of loucheng chose their encampment, they did not hide much. Who knew if they did it on purpose?

A cunning rabbit had Three Burrows. When facing this group of powerful enemies, it was never too much to be careful!

Even though they had high-tech weapons, the torobo people, who had dealt with Lou Cheng's cultivators many times, had learned to face these enemies who had magical abilities and made them suffer.

Of course, with the weapons the torobo fleet had, they could launch an attack from space and wipe out the cultivators on the ground!

In fact, the tribesmen even had a fearsome attack technique that could completely crush their target in a designated area and make them disappear in the three-dimensional space.

This type of attack was somewhat similar to dimensional attacks, but it was not fully developed. Currently, it only existed in the laboratory of the highest Academy of Science in the terobo Empire, and could not be used in battle.

And according to some rumors, this kind of appalling attack method was actually obtained from the corpses of a group of cultivators in Lou city with extremely terrifying combat strength!

In order to get rid of them, the teroboros had paid a heavy price, and both of their warships were completely destroyed!

That was why the tribesmen had always placed great importance on mystical items and live captives in the world of loucheng. This was also the reason why the Imperial Academy of Science had repeatedly requested for a ground battle before their departure.

They were in urgent need of a batch of test subjects to carry out large-scale experiments.

However, who knew how many elite soldiers of the Empire would be sacrificed in this case? the main reason was that they lacked "lab rats" for research!

'These damn guys, are the lives of the Empire's soldiers not as important as those War Monsters in their eyes?'

Even though he felt indignant, as a soldier and a second-class citizen who did not have much say, the fleet Commander had to carry out the orders given by the influential people of the Empire.

If he disobeyed orders and acted on his own, then he would definitely be questioned and blamed when the war video was reviewed later. This would have a huge impact on the future career of the commander!

Between official duties and comradeship, the fleet Commander could only choose the former!

With mixed feelings, the fleet Commander and the others finished reading the report. Then, he turned around and looked at everyone with a sharp gaze.

"This is the real-time information from the cyborgs. Due to the attack by the cultivators of Lou Cheng, they have lost two-thirds of their total number. The survivors are now scattered across the planet.

As for the cyborg headquarters occupied by cultivators of Lou Cheng, there were only a dozen special cyborgs in it. They were able to escape the cultivators of Lou Cheng's pursuit because they looked no different from ordinary natives!"

At this point, he paused for a moment, as if he was thinking about something. Then he continued, "Of course, this isn't the key. We don't count on them for the battle. The key is that we're going to face more than three million cultivators in loucheng!

It can be said that two-thirds of the elite cultivators in the savage war zone are currently concentrated on this planet. What awaits us is definitely a brutal war!"

After hearing the number, the four teroboros men in front of the commander were shocked.

“Those damn guys from the Imperial Military headquarters, are they trying to kill us?”

“Our total number of soldiers is no more than 3 million, and only 2.2 million can be directly deployed for ground combat. We don’t have the advantage in numbers.

Especially when fighting on the ground, because we have to injure but not kill, our combat power will be weakened. This is simply a trap!”

let us deal with the tough bones, and then the children of the influential people of the Empire will attack the nest of the cultivators in loucheng. Not only do we not have to face a large number of enemies, but we can also break them one by one and easily get a huge amount of spoils and captives. This is too unfair!

“Hehe, I knew that good things wouldn’t fall on our heads!”

Looking at the angry faces of the four captains, the commander sighed and said in a stern tone, ” “Don’t complain. Remember that you are soldiers of the Empire, and you must strictly follow orders!

Moreover, once we win this war, it will definitely shake the entire Empire. At that time, you will definitely be able to get your share of the benefits!”

The four captains stopped complaining and looked at the commander in unison.

The other party was right. The more powerful the enemy, the larger the scale of the war, the easier it was to accumulate military merits, allowing them to climb higher.

Perhaps because of this war, their citizen status could be raised by another level, and they would become an existence that countless low-level torobo people looked up to!

Seeing that his men were tempted, the commander immediately struck while the iron was hot and gave the order to prepare for battle.

“From now on, all members of the ground forces will immediately return to their respective troops. The standard of their weapons and equipment will be set as the highest grade hunting suit!

The transport ships and unmanned attack aircraft were all out of the warehouse, ready to land at any time!

In addition, before landing, we can release the No. 9 paralyzing poison gas bomb to weaken the resistance of the cultivators in loucheng as much as possible!”

After some thought, the commander added, ” give orders to the remaining cyborgs and tell them to quickly gather at the headquarters. It’s best if they can organize a large number of native armies to fight together. Set up a defensive circle around the periphery and help us capture and intercept the cultivators of loucheng who are trying to escape.

I’m going to set up an all-encompassing net to trap all these cultivators, and then I’ll take my time to capture them all in one go!”

At this point, the commander’s lips curled into a cold smile, and his eyes flickered with a cold light!

Although the nobles of the Imperial Academy of Sciences wanted to capture him alive, as long as he was still alive, they wouldn't be able to find any fault with him.

In order to ensure victory as much as possible and prevent any unexpected situations from happening, he didn't mind using some special means. After all, war itself was a war that would use all means!

[Chapter 1109](#)

1109 The delayed war tower

In the underground base outside the city, Tang Zhen was with the Holy Dragon city's researchers, studying the dismantled energy absorption device.

This kind of device was a great threat to the cultivators in Loucheng. The experience a few days ago had left a deep impression on him. Therefore, before he solved this problem, he had almost no hope of winning the war.

He didn't believe that the Torobo people, who had such a powerful weapon, wouldn't use it during the battle to weaken the cultivators in the city.

If he had a choice, Tang Zhen would rather not participate in this war and bring his citizens back to Holy Dragon City.

However, he did not know that the wilderness was facing the same situation as them. They were probably also facing a scheme, a cruel and merciless war.

At this moment, a Holy Dragon City resident who looked very young but had a rather steady manner of doing things was standing in front of an instrument and speaking to Tang Zhen, "According to our research, this energy absorption device can't work anytime and anywhere. It needs certain special conditions to work!"

Tang Zhen's eyes brightened when he heard this. He gently nodded his head and waited for the other party's explanation.

"Through experiments, it has been proven that there is a special metal element in the soil of this city. When this energy-absorbing device is activated, these metal elements will automatically burn and then produce a strange force field that will squeeze out the natural energy that cultivators need.

At the same time, the energy absorption device will also begin to work, absorbing the world energy instantly and storing it in the rainbow crystal in the core!"

Tang Zhen nodded his head gently and said, "In that case, without the metal element, the energy absorption device will not work, right?"

"That's basically what it means. After the last activation, the metal elements sprayed on the city have been used up, so even if it's activated again, there won't be a sudden disappearance of World Energy!"

then, is there a possibility that before the tribesmen activated, they sprayed this metal element into a designated area without us noticing? "

that's possible, but we can design a detection device and install it on the bracer computer. Once it detects the metal element, we can immediately retreat to a safe area.

Tang Zhen sighed in relief after hearing the other party's explanation.

Although the method of constant detection was somewhat passive, it was still much better than having his energy sucked dry and his cultivation base limited. As the experiment progressed, he would probably find the corresponding defense means.

Tang Zhen's mood was clearly much more relaxed after he confirmed that this energy absorbing device also had its shortcomings.

During these few days, the energy absorbing device had been shrouding his mind like a dark cloud. Before he could find a way to deal with it, Tang Zhen absolutely did not dare to lower his guard.

After stopping for another ten minutes or so, Tang Zhen returned to the center of the underground space and coincidentally met Qian Long who had just returned from his patrol.

The two of them walked side by side, and after a few words, Qian Long casually mentioned the war tower.

I've heard of the tower of war a long time ago, but I've never had the chance to see it. This time, I must seize the opportunity and Exchange for two advanced cultivator skills!

Looking at the smug expression on thousand Dragon's face, it was obvious that he had already prepared the battle Points and was waiting for the war tower to descend.

Tang Zhen subconsciously recalled the shattered foundation stone platform when he heard Qian Long's words. A trace of doubt surfaced on his face.

It had been five days since he received the order from the cornerstone platform, but the war tower had not been teleported over.

Was it because the construction of the dimensional gateway was too difficult, or something had happened in the process? otherwise, the war tower would not have not appeared yet!

The war was coming, and there were too many items to exchange for the millions of loucheng. If the exchange was not done in time, the cultivators who lacked logistics supplies would inevitably be in a very passive position.

Why was the cornerstone platform so unreliable this time?

First, they gathered hundreds of King level cultivators and teleported them over to snatch items that were of no value. Then, they suddenly teleported millions of residents over. They seemed to be impatient.

In the end, after so many people were mobilized, the war tower, which should have appeared at the first moment, did not appear. The cultivators in the war tower could only find ways to find supplies on their own.

The monsters in the city had been very unlucky these two days. After they suddenly turned into giant beasts, they were killed by the cultivators in the city who were short of food before they could get addicted to being the Masters.

Before these monsters mutated, many of them were pets, so there was no problem eating them.

The famished cultivators of Loucheng City will eat even the capital of God!

Tang Zhen supported his chin with his hand and pondered for a moment. He then looked at Qian Long and said, go and inform the foreign merchants that other than the weapons, don't sell any food, medicine, and other items for the time being. I have a feeling that we might need them in the future!

Qian Long nodded and asked, "You're talking about the war tower's Kasaya?"

Tang Zhen nodded. His tone carried a trace of worry. I keep feeling that there's something wrong with this mission," he said slowly. The cornerstone platform's actions are too abnormal. I don't know what's the reason?"

"Are you thinking too much? There shouldn't be anything wrong with this, right?"

"I hope I'm overthinking it, otherwise things will be troublesome!"

After the two of them chatted for a while, Tang Zhen came to another cave. Compared to the other areas, the aura of technology here was extremely rich.

Electronic equipment was placed here, and dozens of Holy Dragon City residents in black combat uniforms were constantly operating computers and other equipment. Holographic images could be seen everywhere.

After seeing Tang Zhen enter, a person in charge bowed and greeted him. After which, the two of them walked to a control panel.

"So far, the Cyborg's air defense system is under complete control and has been modified. It can be put into Use at any time!

Our surveillance equipment has also been lifted into the air. As soon as the torobo fleet appears, we can send out an alarm!"

As he spoke, the person in charge pointed to a nearby image. It was indeed a scene of the planet's outer space.

The torobo people are very strong, so after launching a wave of attacks, these anti-air weapons may be locked down and destroyed. In that case, there's no need to worry about the consumption. All of them are at maximum power!

The laser weapons equipped by the cyborg possessed quite a bit of power. Tang Zhen would naturally not miss out on such a good thing.

If not for the fact that the war was imminent and he needed these weapons to deal with the torobo people, he would have packed them all up and transported them back to Holy Dragon City!

The person in charge nodded, indicating that he would make the arrangements later.

Just as he was about to say a few more words, his wrist-guard computer suddenly sent a notification that someone wanted to talk to him.

After casually opening it, the figure of Blood River King was revealed. This fellow was currently looking at Tang Zhen with a curious expression.

haha, manhuang King, this thing of yours is not bad. After this mission is over, I hope you can sell me a batch. I will also give my own Lou Cheng cultivators some benefits!

Tang Zhen smiled and nodded. After all, this was not a weapon that was strictly prohibited from being sold to the outside world. While he was earning money, he could also obtain a favor. Why not?

After chatting for a while, Blood River King suddenly said in a serious tone, "Manhuang King, do you feel that there's something wrong with this?"

Tang Zhen's eyes focused as he gently nodded. It seemed that he was not the only one who had such a feeling.

...

[Chapter 1110](#)

1110 Blueprint and trade

Blood River King had clearly sensed that something was amiss. Compared to Tang Zhen, who had just advanced, a veteran law King like him had a rich experience and a sense of danger.

Of course, this was not strange. After all, the war tower had not appeared for a long time, which was an abnormal phenomenon. It was normal for the cultivators in the war tower to be suspicious.

However, Blood River King's words confirmed Tang Zhen's guess, and the sense of urgency in his heart increased.

it's indeed not right, but what can we do? Lou Cheng isn't around and we can't contact the cornerstone platform at all. We can't even send a back message. We can only wait for the next instruction.

After hearing Tang Zhen's words, Blood River King smiled bitterly and said in a somewhat depressed tone, that's right. Other than waiting for the tribesmen to appear, there's nothing we can do!

I heard that the residents of your building rummaged through the ruins and took away the heavy weapons of the cyborgs," Blood River King said. can you operate those things? "

Blood River King laughed again, "You're right. If you didn't know how to operate the Cyborg's equipment, we would still be in hiding!

It seems that mastering one more skill will be useful at the critical moment, hahaha!"

Tang Zhen chimed in with a smile. He knew that Blood River King must have something to discuss with him. Otherwise, he wouldn't be so free to chat with him.

As expected, Blood River King's next sentence revealed his intentions.

"Since things may change, we must make early preparations in case we are caught off guard.

Actually, I'm looking for you this time to do business with you. I have a super weapon manufacturing blueprint that I obtained from the other world, I wonder if manhuang King is interested?"

Tang Zhen was stunned when he heard this. This Blood River King was actually trying to sell weapons to him. One must know that he was the biggest arms dealer right now, alright?

What did he mean? was he planning to challenge them and steal their business?

However, he was actually very interested in Blood River King's so-called super weapon. After all, something that could be called a super weapon by a law monarch definitely had extraordinary power!

Seeing Tang Zhen's interest, Blood River King didn't waste any time and directly said, it's a blueprint of an energy cannon made by the natives of the other world. I've seen the real thing before. It's 50 meters long, and after one shot, a mountain dozens of miles away was flattened!

"Oh, that power is not bad!"

it's more than 'pretty good'. If it weren't for the great consumption of this thing, the native cultivators wouldn't be able to withstand the continuous attacks. I guess the invading towers would have been directly blown into pieces!

Blood River King showed a hint of fear. He clearly remembered the scene.

Hearing the other party's words, Tang Zhen's interest was piqued,"Tell me your conditions. If I can accept them, I'll take the blueprint!"

good, it's really fun to deal with the savage Lord. Give me 50 of the armed puppets you use, as well as 1000 single-soldier machine guns and the corresponding amount of ammunition, and this blueprint is yours!

Blood River King wasn't polite at all. He immediately demanded an exorbitant price.

Tang Zhen shook his head, " this deal definitely can't be done. Do you know the cost of these armed robots? I can give you ten of them. As for the single soldier machine gun, we don't have any extra to give you.

Blood River King gritted his teeth and said, " that's 40 armed puppets. What do you think? "

"Fifteen, I don't want any more!"

"Deal!"

The Blood River King rubbed his brows, looking like he had suffered a loss. But who knew if he was secretly happy?

This blueprint was useless in his hands, but now he could exchange it for 15 armed robots. No matter how he looked at it, he had profited!

Of course, Tang Zhen did not suffer a loss. If this weapon truly possessed such might, he could produce a few of them in bulk and use them as city defense weapons.

The current Holy Dragon city's defensive capabilities were more than enough, but its offensive capabilities were slightly lacking. Once they had such a large cannon, they could make up for this weakness.

Even if he couldn't manufacture it, Tang Zhen wouldn't feel that he was at a loss. After all, this blueprint came from another world. Its design ideas could more or less give some inspiration to the Holy Dragon city's researchers.

After both parties agreed on the deal, Tang Zhen started to arrange other matters without stopping. The sense of urgency in his heart was gradually increasing, causing him to be unable to stop.

The thing that made him feel the most uneasy now was that he could not obtain any information about Holy Dragon City and the cornerstone platform. In a situation where he was in the dark, he would not even know if he had been sold.

However, without Lou Cheng, he couldn't make a return trip. Since this wasn't a special world, his mobile phone couldn't help him with the transfer either.

It could be said that the current Tang Zhen had already been forcefully trapped in this world!

He had been thinking all along. Could he find a way to completely solve the current predicament?

After thinking for a long time, Zhen Tang suddenly had an idea. However, whether or not it could be realized, he still had to place his hopes on mobile applications.

is there an application that can repair any item, even if the item is completely destroyed? "

Tang Zhen asked the mobile application with a trace of anticipation in his eyes.

After a long period of exploration, he had already discovered that mobile phones actually had a certain level of thinking ability, or rather, there was an intelligent system in them.

Such a heaven-defying thing must be hiding some big secret. It was not strange to have an intelligent system. He just didn't know if it was a mutation of the mobile phone's original operating system.

However, 99% of the time, the intelligent system would play dead. It would only occasionally reply when Tang Zhen took the initiative to ask.

However, he soon received a reply.

super repairman, a mystical application. With sufficient energy, it can repair any non-living object.
Download price: 100000 origin stones!

After confirming that there was indeed such an application, Tang Zhen's heart was immediately filled with joy. However, his expression immediately turned strange as he asked, where is the application store? why can't I see it after the last upgrade? "

In the end, after waiting for a long time, there was no response. It seemed that the intelligent system was playing dead again!

Tang Zhen didn't care about this at all. However, when he saw the download price of the application, he felt a pain in his heart.

The download price of 100000 origin stones had almost emptied out his harvest in timrell. To be honest, Tang Zhen was a little reluctant to part with it.

However, on second thought, there would definitely be more opportunities to collect these origin stones in the future. Moreover, other than the fire origin stone, he had no use for the other attributes 'origin stones for the time being.

Instead of taking up space in his storage ring, he might as well download the application. After all, he was in urgent need of it.

In this case, even if he only had one gun barrel in his hand, he could restore it to a complete gun. This was definitely a very practical application, and it was worth the 100000 origin stones!

He just didn't know how much " sufficient energy " this so-called " sufficient energy " was, and how to charge it?

After making up his mind, Tang Zhen no longer hesitated and directly chose to pay for the download.

...

This was the good thing about the mobile phone. It was very straightforward to do things for money. Almost as soon as the origin stone disappeared, the application appeared on the interface in front of him.
