

Alternate 1111

[Chapter 1111](#)

1111 Repair and the Cyborg's strange movements

Tang Zhen looked at the newly downloaded application and pondered for a moment before starting it.

Two clusters of light that looked like air bubbles instantly appeared and floated at a position about five meters away from Tang Zhen. There were many light belts connecting the two of them. There seemed to be runes continuously flickering on them.

As he was observing, words appeared in front of his eyes.

[please select and lock the item to be repaired. After that, place an energy source into another ball of light. The repair will begin immediately!]

After seeing the subtitles, Tang Zhen casually released the broken foundation stone platform. After locking onto it according to the requirements, the broken stones were directly sucked into the light ball.

He didn't know how the head-sized ball of light could store all these stones. It must have a similar storage function!

Tang Zhen went over to take a look and discovered that after those stones were sucked in, they actually quickly pieced together to form a complete foundation stone platform. However, it was a mini version.

Upon closer inspection, one would find that the complete cornerstone platform had a lot of damage, but they were all filled in by translucent dotted lines.

Then, the words appeared again.

[shattered foundation platform, damage at 90%, requires a large amount of energy to repair, please insert energy source!]

Tang Zhen thought for a moment before he casually took out a handful of origin stones and threw them into another light ball.

At this moment, a progress bar appeared in front of his eyes. However, the value displayed made Tang Zhen scratch his head. It was actually not even one in a hundred thousand!

Tang Zhen shook his head slightly. He was a little frightened.

He took a light breath. He felt a little troubled. It seemed that repairing this cornerstone platform would definitely consume a huge amount of energy. But where could he find it now?

However, his eyes soon lit up. He immediately turned around and walked out of the cave. After a while, he hurried back.

He stretched out his hand, and a seven-colored crystal appeared. It was the core component of the energy absorbing device used to store the world's energy!

this thing has devoured almost all the energy from hundreds of King level cultivators. It should be enough to feed you!

As he spoke, Tang Zhen directly threw the rainbow crystal into it. After that, the progress bar suddenly jumped to the end. Moreover, an even darker progress bar actually appeared on top of it. It looked like it was just a little bit away from being full!

Tang Zhen was happy when he saw this. From the looks of it, not only could this seven-colored crystal support the restoration of the foundation stone platform, there was also quite a lot of surplus!

Tang Zhen pondered in his heart on how to continue to charge the seven colored crystal. At the same time, he activated the application. Soon after, a countdown appeared in front of his eyes.

The menu showed that it would take 72 hours, which meant that it would take three days to complete the repair.

Although Tang Zhen was a little anxious, he could only wait silently. He only hoped that the foundation stone platform that had been repaired would not disappoint him!

Of course, it was impossible for Tang Zhen to stay here all the time during the repair process. The great battle was about to arrive, and there were too many things that he had to do.

After summoning two Holy Dragon city's overlords to guard him, Tang Zhen hurriedly left the cave. No one knew where he went.

All Lou Cheng's who had sensed that something was wrong were secretly preparing, so he naturally couldn't fall behind!

.....

In the other parts of the cyborg headquarters, the cyborgs had become extremely active.

Although the headquarters had been destroyed by Lou Cheng and almost all the high-level officials had died, the cyborgs in other areas were not affected much.

Even though the cyborg troops that were sent to support were completely annihilated, there were still many cyborgs who were not affected and still controlled the original divisions.

It was only because of the cultivators of Lou city that the remaining half-mechs kept a low profile, afraid that the cultivators of Lou city would come to kill them.

The appearance of a large number of resistance organizations also made the cyborgs feel as if they were walking on thin ice. They hid in their respective safe areas and their defense systems were fully activated!

However, in just one night, the half-androids jumped out. They gathered all their close friends, promised huge benefits, and distributed a large number of weapons. They quickly formed an Army.

After that, with the transportation of various tools, an Army of nearly 500000 soldiers was sent to the vicinity of the cyborg headquarters and assembled.

Then, a team of tanks, armed robots, drones, and various vehicles, carrying the civilian Army without any military training, rushed from all directions to the cyborg headquarters!

For this operation, the cyborg had taken out almost all the resources in his inventory. He was really going to fight to the death with the Lou Cheng cultivators!

Of course, only the half-robots who served as the commanders knew that their mission this time was only to seal off the periphery of the city and prevent the cultivators from escaping.

They were not needed in a real battle. With the powerful strength of the cultivators in Loucheng, they had no chance of winning even with more than 500,000 people!

Because according to the intelligence, the number of enemies this time was actually more than three million!

What a terrifying number! If all of them were to be added together, they would probably fill up the entire plain near the headquarters!

Moreover, they were not ordinary people, but powerful cultivators who had mastered magical abilities.

A cultivator could easily beat up a group of ordinary people, even if they had guns, because they were not on the same level at all!

Only the ground forces of the Terobo people were the true opponents of these cultivators in the city!

On the other hand, the civilians who had been summoned at the last minute were full of excitement, as if they were looking forward to the scene of gaining wealth and fame after making great contributions.

Of course, in addition to that, the high salary offered by the cyborgs was also the reason for their high fighting spirit.

Just one month's time was equivalent to ten years of income. Who wouldn't be enthusiastic about such a good thing?

Even if they might lose their lives in a war, how could there be such a high reward if there was no danger?

At most, when the war really came, he would hide and be careful. In that case, there wouldn't be much of a problem. If he still lost his life like this, then he could only blame it on his bad luck!

Until this moment, the civilians still did not realize that they were just cannon fodder sent by the cyborgs.

If the cultivators of Lou Cheng really wanted to break out of the encirclement, they would definitely be able to kill gods if they were in their way. Although the civilians had weapons, they were just ordinary people. How could they be a match for the cultivators of Lou Cheng?

If millions of cultivators gathered together and chose to break out of the encirclement, they would be trampled into meat paste!

The people who didn't know the truth kept approaching the city that had been turned into ruins. However, as they got closer, they finally realized that something was wrong.

The tall and strange plants and the ferocious mutated monsters made the civilians who had just picked up their guns tremble in fear.

Even though these monsters were shot and killed, they still felt a lingering fear, especially as they got closer to their destination. This situation became more and more frequent.

...

They began to feel uneasy. Who knew what the cyborg headquarters, which was at the center of the mutation, had become?

[Chapter 1112](#)

1112 Start of the battle

As the cultivators in the tower waited uneasily, the war tower never appeared. However, the fleet of torobo finally arrived.

They maintained synchronization with the planet's rotation and firmly locked onto the location of the cyborg headquarters. It was obvious that this was their target!

The vast sky was blocked, and the sunlight disappeared. Only endless shadows were cast, covering the vast land.

The wind seemed to have disappeared, and the clouds had also been scattered. The position above their heads was completely occupied, and it was exposed to the People's sight without any concealment.

When the sky darkened, all the sounds on the ground disappeared, as if all the living creatures had become mute.

Without giving the planet's creatures any time to adapt to the changes, the terobo's attack arrived.

Objects that were shimmering with light were shot down from the bottom of the warship, dragging a long and straight tail of flames as they headed straight for the ground.

This was a weapon without power, but just by falling from an extremely high position, it would produce intense friction with the atmosphere, and the surface would start to heat up and burn due to the high temperature.

It didn't take long for the "meteors" to fall above their heads and explode when they were dozens of meters above the ground.

A large amount of thick smoke spread wildly in all directions and quickly shrouded the surrounding area. The creatures affected by the smoke immediately twitched a few times and quickly entered a state of suspended animation.

The citizens who were still hidden in the ruins kept breathing in the smoke, struggling to fall to the ground, and soon stopped moving.

When his companions saw this, they thought that the poisoned person had already died. They were so scared that they immediately turned around and fled, trying to avoid the terrifying poisonous smoke as much as possible.

The smoke was very strange. It seemed to be sticky and only stayed in the area where it was spreading. It didn't drift away. So, from the sky, it looked like white mushrooms were rising from the ground!

In the process of the explosion, a lot of smoke fell into the area where the cultivators of loucheng were hiding. However, they had already anticipated that the enemy might use poisonous gas to attack, so they had already taken countermeasures.

After all, in the past battles, they had encountered or used this kind of attack more than once. As long as they did not inhale or come into contact with this smoke, they would not have any problems for a short period of time.

Furthermore, the cultivators of Lou city were not ordinary people. They had countless means to dispel the poisonous gas.

As the smoke spread, cultivators from loucheng city, who were protected by a protective shield, appeared one after another. Some of them were gusts of wind, some were mist, and some were flames that filled the sky. They quickly entangled with the smoke.

The poisonous smoke near the encampment was either blown away or neutralized, so it couldn't cause any harm to the cultivators in loucheng city.

However, that was all the cultivators in the city could do. It was impossible for them to disperse the poisonous smoke that had shrouded the entire city!

But for the people of terobo, that was enough!

With the poisonous smoke blocking their vision, the loucheng cultivators' vision would be affected, and the airdrop would be much smoother later. At the same time, the area of activity of the loucheng cultivators would be greatly reduced due to the restriction of the poisonous smoke.

In this way, the connection between the towers would be cut off, and they would be isolated and helpless. Then, they would be attacked one by one!

After the deployment of the poison gas bomb, the entire land was covered in white smoke. The ground forces of the terobo tribe began to deploy the poison gas.

Following the buzzing sounds, a micro-gravity tunnel was formed between the ground and the five torobo battleships. The surface of the tunnel was protected by a special force field.

Even if they were attacked during the landing process, they would be blocked by the protective light curtain outside the tunnel to ensure that the soldiers inside would not be hurt.

Rows of torobo Warriors were like dumplings being dropped into a pot as they flew toward the ground. It was a spectacular sight.

The deployment efficiency of these tunnels was extremely high. Almost a thousand torobo soldiers were landing on the ground every second, and under the cover of their protective masks, they entered the poisonous smoke without any hesitation.

Other than the torobo Warriors who had landed through the microgravity pathway, there were also a large number of aircraft flying out of the warships like a flock of birds, flying in all directions.

This kind of aircraft was extremely fast. In the blink of an eye, it had flown from one end of the line of sight to the other. Ordinary weapons could not lock on to it at all.

Other than that, transport ships also flew out, bringing large combat weapons to the ground and quickly galloped on the ground.

The cultivators of loucheng city remained silent throughout the entire process. They did not have any advantage in terms of long-range attacks. Instead, they would expose their position and be attacked by the terobo aircrafts.

However, when the terobo Warriors landed on the ground, the situation changed.

Almost at the same time, the sound of guns and cannons resounded through the sky. Lou Cheng took advantage of the terobo Warriors 'unstable footing and launched an attack.

Even though they were well-prepared and had the aid of various combat equipment that allowed them to discover the hidden enemies through the poisonous smoke, the torobo Warriors who were attacked in a hurry still suffered some inevitable casualties.

Although their armors could block the attack of ordinary bullets, when the Lou Cheng cultivators used cyborg firearms or the large-caliber rifles sold in the Holy Dragon City, the huge impact would still send them rolling on the ground.

Some unlucky fellows even broke their bone armors or lost their lives!

While the tribesmen were in a state of confusion, countless cultivators from loucheng city who had hidden themselves charged toward their enemies like lightning and began their close-range combat.

Shadows flashed, and blades danced in the air. The armor of the teroboros soldiers was unable to withstand the attacks of these cold weapons. There were people who screamed in pain and fell to the ground.

everyone, hold on! Attack immediately!

Seeing that the casualties around them were getting higher and higher, and screams of pain could be heard from time to time, the officer in charge of commanding the troops, torobo, immediately shouted to calm the soldiers down, and then opened fire at the cultivators in front of him.

Their main mission this time was to capture as many Lou Cheng cultivators as possible to use as lab rats for their experiments. Therefore, the weapons they were equipped with were limited in destructive power.

However, once they were hit by the grapeshot, they would immediately be knocked out by the high-voltage current. Even the cultivators of loucheng city could not withstand such an attack.

In addition to the guns that fired special bullets, the terobo people were also equipped with special weapons like bubble bombs. As the terobo soldiers fired continuously, the cultivators of loucheng city were instantly wrapped up and lost consciousness after a few struggles.

It was obvious that there was some kind of powerful anesthetic in the foam!

Seeing that their attacks were effective, the panicking torobo Warriors were immediately reinvigorated. They dodged the bullets from afar while firing wildly at the cultivators from Lou Cheng who were attacking them in close range.

The armed robots that were following them were moving nimbly among the ruins, trying their best to search for dangerous targets.

The terobo soldiers were equipped with non-lethal weapons, but the armed robots responsible for guarding them were equipped with real guns and live ammunition. Once they determined that the target was too dangerous and could pose a fatal threat to the terobo soldiers, these armed robots would open fire without hesitation!

Many cultivators in Lou Cheng were locked on by these armed robots and fell in pools of blood under the concentrated attacks.

From the beginning of the battle, it had already entered a state of white heat!

[Chapter 1113](#)

1113 Chaotic battle (1)

In the vast ruins, the battle between the cultivators of loucheng and the tribesmen could be seen everywhere. The sounds of gunfire and fighting could be heard without end.

However, due to the poisonous smoke, the participants were unable to see the full picture of the battlefield. They only knew that no matter where they went, they would see an intense battle.

Both sides were trying to make the enemy pay a heavy price through this battle!

The cultivators of loucheng city had the advantage in strength and numbers, while the tribesmen had the advantage in weapons. In the beginning, the cultivators of loucheng city had the upper hand.

Their frenzied and Swift attacks had caused at least tens of thousands of casualties in a short period of time. However, compared to the massive number of more than two million, the casualties were not particularly obvious.

At the very least, under the cover of the poisonous smoke, the torobo Warriors were unable to determine the number of casualties on their side, so their fighting spirit was not affected much.

However, as the initial chaos passed, the teroboros began to gain the upper hand. With the help of the androids and flying machines, they continued to clear out the various areas. The attacks of the cultivators in the city were also suppressed.

As for the cultivators in uniform, they were quickly injected with drugs and then gathered to wait for the transport ship.

When the cultivators of loucheng saw their comrades being taken away, they immediately rushed forward to rescue them. However, they were blocked by the terobo people who were prepared for this.

The drones in charge of aerial support came quickly and launched attacks on the cultivators of Lou Cheng from above. The dense attacks were like a storm, completely sealing off the retreat path of the cultivators of Lou Cheng.

They fell to the ground in droves. Although they didn't die, their future was uncertain.

Who knew what would happen to them if they fell into the hands of the torobo people?

Seeing this, the king level cultivators who hadn't made a move for a long time didn't hesitate anymore. They all rushed to the enemy's camp and tried to rescue the residents of their own loucheng.

However, the torobo people, who had a deep understanding of the cultivators in the city, were already on guard against these King-tier cultivators who were emitting terrifying auras. As they attacked, figures rushed out from the torobo Warriors.

They had been hiding their identities all this time and only jumped out when their target appeared. It was obvious that they had planned this.

Although they looked no different from ordinary torobo Warriors, their movements were much faster and their strength was unparalleled. Apart from being unable to use cultivator skills, their physiques were actually the same as top-level Lords!

Furthermore, their coordination was flawless, especially the weapons they used. They were all high level magic weapons!

To put it bluntly, they were a group of special cultivators who couldn't use their cultivation skills, but had the strength of a top-level Lord and were equipped with technological equipment!

Although they weren't as strong as the king-level cultivators, they were like a pack of bloodthirsty wolves. With the help of various technological weapons, they were able to hold back the king-level cultivators!

No matter how furious the king level cultivators were, they couldn't do anything about it. Even when they tried to use their cultivation techniques, they were interrupted by the enemy's equipment.

Of course, this equipment was not always effective, and it was installed on a transport ship, so it was not very convenient to move it.

Otherwise, as long as the terobo people carried such a device with them, they would be able to suppress the cultivators of Lou Cheng and prevent them from using their full strength.

From this, it could be seen that terobo had been plotting against the cultivators in loucheng for a long time, and had even developed a large number of targeted weapons!

However, even if the king-class warrior could occasionally unleash his skills, it was enough to put the tribesmen in a tough spot. In the short time it took for a spark to fly off a Flint, the tribesmen were constantly killed by the king-class warrior.

If it wasn't for the fear of accidentally injuring the surrounding residents, just the occasional wave of attacks would be enough to kill all the terobo soldiers around them!

As if they realized that they couldn't subdue the king level master with this method, the torobo people began to change their tactics. They activated the special weapon that Tang Zhen had been wary of.

With the spraying of a large amount of metal dust, the small energy absorption device on the transport ship was activated. The cultivators in loucheng instantly felt weak and then were hit by bullets. They twitched and fell to the ground.

Seeing this familiar scene, the king level cultivators were shocked and began to teleport away without hesitation.

Once their cultivation was restricted again, they would become lambs waiting to be slaughtered, at the mercy of the torobo people!

However, it was impossible for these King level cultivators to abandon the residents. After avoiding the area covered by the metal dust, they began to think of ways to disperse the dust and then carry out the rescue.

They wouldn't admit defeat easily until they were at the end of their rope!

As time passed, the battle did not seem to stop.

Smoke was rising from the ruins, and the cultivators of the tower City kept appearing and disappearing. They used all kinds of objects as cover to launch sneak attacks on the teroboros people.

Since he wasn't a match for them head-on, he would attack them in another way!

Since the start of the battle, the number of casualties on both sides had been rapidly increasing. From time to time, the corpses of the terobo Warriors could be seen lying on the grass and buildings, and the number of injured was uncountable.

There were also many cultivators from loucheng who had accidentally come into contact with the poisonous smoke. On the other hand, the tribesmen had the upper hand in this environment because they had already prepared a counter to the poison. The cultivators from loucheng were suppressed so much that they could barely lift their heads.

The Lou Cheng cultivators were naturally unwilling to give up, so they quickly used all sorts of methods to catch the terobo people off guard.

In a room of a building, a few cultivators of Lou Cheng were coldly watching a group of terobo Warriors approaching, cruel smiles on their faces.

The terobo Warriors did not realize that they had been targeted by the cultivators of loucheng. They continued to search the streets of the city carefully.

When they finally entered the ambush position, a number of blazing arrows shot out from the window, instantly landing on the bodies of the torobo Warriors.

The moment they hit their bodies, the fire arrows exploded, and the dark green flames completely enveloped the target.

The combat suit that was supposed to be able to effectively resist the burning of the flames could not withstand the green flames at all. As they screamed in pain, the torobo Warriors melted like wax figures!

A team of elite torobo Warriors would be taken out just like that!

This scene was seen by another team of terobo Warriors. They roared and commanded the drones and armed robots to launch a fierce attack. The buildings where the cultivators were hiding in collapsed.

However, the Lou Cheng cultivators were as agile as monkeys. Before the attacks reached them, they had already escaped.

&Nbsp; the torobo Warriors could only curse in frustration and chase after him.

Because the cultivators of loucheng city were strong and difficult to deal with, the battle was very difficult. Seeing their comrades fall in pools of blood one after another, the terobo Warriors were both frightened and furious.

But more than that, there was a trace of helplessness.

Because of the orders given by the fleet Commander, the weapons they used were not lethal and could not effectively kill the cultivators in loucheng, which made them in an awkward situation.

It could be said that the higher-ups of torobo were using the lives of these soldiers in exchange for the opportunity to capture the captives!

There was another reason why he didn't use other capture methods. The entire process of the battle would be recorded for future experimental research.

As for why the tribesmen were like this, there were actually some secret reasons that only a few people knew.

...

[Chapter 1114](#)

1114 One man guarding the pass

In front of the Holy Dragon city's encampment, an intense battle was also going on.

The teroboros were not aimlessly searching the city. They had already known the temporary encampment locations of the various towers and had gathered their forces to attack.

It could be said that there were thousands of torobo Warriors attacking each of the towers. With the help of all sorts of weapons, the situation of the cultivators in the towers was getting worse.

If this situation continued, it would not be long before the tribesmen gained the upper hand!

Of course, not all towers were at a disadvantage. For example, the Holy Dragon City, which had been chosen to be stationed outside the city, had become a difficult bone to gnaw in the eyes of the terobo Warriors.

Most importantly, there was only one cultivator from loucheng who had participated in the battle!

At this time, the surrounding of the mountain was filled with the figures of the terobo Warriors. They were gathering over under the cover of the armed robots and flying machines.

However, what awaited them were concealed heavy weapons. When they spewed out flames wildly, the torobo Warriors who were caught off guard immediately paid a heavy price.

The special armor-piercing rounds pierced through their bodies, and the laser weapons sliced their bodies apart. Screams of pain could be heard everywhere, causing the torobo Warriors charging at the back to be stunned.

The continuous explosions of the nuclear mines had caused a huge number of casualties to the tribesmen!

The torobo people, who had suffered heavy casualties, had already realized that the enemy in this tower seemed to be a little different!

What happened next confirmed their suspicions. A series of armed robots appeared from behind the bunker and started shooting at them.

From some of the caves in the mountain, drones flew out one after another and began to fight with the terobo's aircraft.

The terobo Warriors were bewildered by the scene before them. In their minds, weren't cultivators of loucheng city supposed to be wielding swords? when did they start to be equipped with such weapons?

However, the current situation did not allow them to think too much, so the attack formation only paused for a moment before continuing to advance.

Violent explosions could be heard from time to time. It was the sound of the armed robots and aircraft exploding on both sides. Fireballs appeared one after another on the ground and in the air, and debris flew everywhere.

Tang Zhen sneered when he saw his armed robots being blown up one after another. He suddenly mobilized the power of law and terrifying flames spread out in all directions.

At this point in the battle, he finally made his move.

The charging torobo Warriors were immediately turned into human torches, falling to the ground one after another, and turning into ashes amidst their screams.

The instant Tang Zhen made his move, the terobo powerhouses hidden among the charging troops appeared one after another and surrounded his position.

Tang Zhen's eyes were filled with killing intent as he looked at the torobo people who were carrying demonic weapons. He extended his right hand and a two-meter long white flame sword appeared.

The temperature of the Sword of Fire was extremely high, and even the plasma beam was inferior to it. Once touched by it, even metal would be immediately penetrated!

At the same time, a set of flaming armor appeared on his body, causing the surrounding air to distort.

With a roar, Tang Zhen brandished his sword of flames and charged forward. With a single slash, he killed the nearest terobo powerhouse.

"Quickly activate the interference equipment, this is a cultivator's skill!"

One of the terobo experts shouted through the communicator, and his comrades did not hesitate to carry out his order.

However, they were shocked to find that the interceptors that were effective against other cultivators could not interrupt this cultivator's skill!

In that moment of shock, another two torobo experts were killed by Tang Zhen's sword at lightning speed!

The interference equipment had failed, and three of their comrades had been killed in succession. The remaining torobo powerhouses were a little flustered, and they quickly sought for reinforcements.

The enemy's strength was beyond their expectations. If they hesitated any longer, they would be sending themselves to their deaths in vain!

A transport ship in the distance flew over and dropped several bombs in succession. With a loud bang, a large amount of metal powder fell from the sky.

Tang Zhen had been paying attention to the enemy's actions since a long time ago. When he saw that the other party was about to activate the energy absorption device again, he naturally teleported away without the slightest hesitation. After that, he relied on his law flames to continuously eliminate the enemy.

Wherever the sea of fire passed, the enemies fell to the ground one after another. The killing efficiency was amazing!

The eyes of the torobo military officer, who had suffered a huge loss, turned blood red. He immediately ordered all the armed robots to lock onto Tang Zhen, and the bullets were fired as if they were free.

Tang Zhen didn't face them head-on. Instead, he continuously teleported, causing the enemy's attacks to miss. This caused the torobo people to fly into a rage.

"Damn it, why is this guy so difficult to deal with?"

In the transport ship's command room, a torobo officer looked at his subordinates who were constantly being killed. He wished he could immediately use the ship's weapons to lock onto Tang Zhen and blast him into powder!

Of course, he knew the strength of Lou Cheng's cultivators. Even if they were locked on by such a weapon, they might not be killed. Unless it was a powerful weapon that covered an area of more than ten kilometers, even King level cultivators could escape easily!

However, to watch his subordinates being slaughtered without being able to help, this feeling almost drove him crazy!

At this moment, he also hated the nobles of the Empire, because it was their orders to capture the test subjects that led to this situation.

Let's try other methods. If we still can't subdue him, we'll apply for an order to kill him directly!

The Empire attached great importance to the powerful cultivators of Loucheng, and they were not allowed to be killed easily. Even if they had to be killed, they had to be ordered by the commander!

“Even if it’s a corpse, it must be much more precious than ordinary cultivators in loucheng!” The officer added after a pause.

The terobo powerhouses who were involved in the attack on Tang Zhen received the order and once again activated their hunting equipment. Energy chains shot out from their armors, forming a net of light that enveloped Tang Zhen.

Tang Zhen only felt his body stiffen. It was as though his movements had become sluggish. Due to the restraint of these energy chains, he was unable to even teleport!

Seeing this, the terobo powerhouse was overjoyed and took the opportunity to launch an attack. Countless bullets flew toward him in an attempt to subdue him.

The protective barrier appeared and blocked these attacks. However, it didn’t seem like it could last for long.

you want to subdue me with this little trick? you’re simply dreaming!

die! Tang Zhen roared. Flames that soared into the sky spread out with him as the center, devouring all the teroboros around him.

The torobo experts immediately dodged upon seeing this, but there were still a few who were engulfed by the flames and burned to the ground.

request for reinforcements! We’re no match for them!

The terobo powerhouses who were lucky enough to escape with their lives were horrified. They kept their distance from the area covered by the flames and began to shout for help.

hurry up and apply for a kill order from the commander. This enemy is definitely not simple. If we kill him, we can still get a body. Otherwise, once he escapes, we will suffer a great loss!

...

Officer terobo roared at his assistant, but his gaze was firmly locked on Tang Zhen, who was chasing after his comrades in the sea of fire. His eyes were filled with killing intent and fear.

“Report, the commander has replied. According to the information we just received, this enemy is one of the four law Kings and has great research value, so he can’t be allowed to leave!

as for the killing order you requested, it has been rejected by the commander. However, he has already mobilized the heaven’s punishment Paladins. They will probably arrive in a minute!

Before that, please try your best to delay it!”

The terobo officer heaved a long sigh of relief, and turned to give the order to the rest of the terobo experts.

try your best to stall him for a minute. After that, the heaven’s punishment Knight will take over for you. With their help, the cultivator from loucheng city shouldn’t be able to escape!

When the torobo powerhouse who was in the midst of a bitter battle heard this, he subconsciously heaved a sigh of relief. At the same time, there was a gloating look in his eyes as he looked at Tang Zhen!

It was obvious that the tribesmen had high hopes for the Tian fa Knights, and they were not simple characters. Otherwise, they would not be so confident!

Tang Zhen, who was currently chasing after the enemy, suddenly felt that something was amiss.

the torobo experts before him seemed to be stalling for time. even if he had intentionally left an obvious opening, they would definitely not attack.

It was obviously illogical for such a situation to appear in a life-and-death battle. After all, the opportunity was fleeting, so who would miss the opportunity to kill the enemy?

...

Therefore, these guys were either afraid or had other motives. Otherwise, it was absolutely impossible for them to have such an abnormal behavior!

[Chapter 1115](#)

1115 Killing the enemy with one strike and leaving calmly _1

After realizing that the situation was not right, a trace of wariness rose in Tang Zhen's heart. While fighting, he also began to pay attention to the situation around him. He wanted to see what the torobo people were up to.

In fact, the best thing to do now was to quickly retreat and wait for the battle to end before making any plans.

However, Tang Zhen was currently unable to leave. This was because he still had to protect his residents and buy them sufficient time.

The moment before the toroboros arrived, Tang Zhen finally confirmed that all the buildings had fallen into the cornerstone platform's trap. It had thrown them into this world and no longer cared about them!

Of course, this was only a possibility, because the cornerstone platform really didn't need to do this. Perhaps there were reasons he didn't know.

Everything had to wait until the broken cornerstone platform was repaired. At that time, he might be able to figure out the truth of the matter!

However, regardless of what had happened, there was no longer a need to continue fighting in this battle. Therefore, Tang Zhen had directly given the order to move. After which, he was in charge of bringing up the rear.

This was also the reason why the Holy Dragon City cultivators had not appeared after the battle had started. He did not want the residents of his city to lose their lives in this foreign land for no reason.

If possible, he would even try to escape from this world and bring the residents back to his own city!

As for what he needed to do now, it was to buy as much time as possible so that the residents could move as far away as possible!

At this moment, Tang Zhen suddenly felt a sense of danger. He subconsciously activated his teleportation and appeared a thousand meters away.

Tang Zhen's pupils slightly contracted when he looked at the spot where he had stopped earlier.

He saw two tall figures wrapped in heavy armor staring at him with blood-red eyes and a sinister smile on their lips. They each held a strange demon weapon that gave off a sharp presence.

Tang Zhen was a little surprised to discover that he was actually unable to tell the level of these two people's demonic weapons. Clearly, they had already surpassed the high level and reached another level!

What did the tribesmen do to get their hands on such good stuff?

This was especially so when Tang Zhen faintly felt a trace of familiarity from the two tall enemies. However, there seemed to be many different aspects. This kind of feeling made one feel extremely uncomfortable.

But one thing was undeniable, and that was that these two enemies were definitely not simple. In fact, their strength was not weaker than his!

There was no time for him to think too much, because the two enemies had already flashed and attacked him again at a terrifying speed!

One of the men's arms suddenly became thicker and smashed at him from a distance. Then, a huge energy ball came straight for him.

The other enemy was flickering, and it was impossible to lock onto his position. Every time Tang Zhen thought that he had already locked onto the enemy, he would discover that it was actually just an illusion.

Tang Zhen's heart once again trembled. These two fellows, who gave him a trace of familiarity, were definitely terrifying strong enemies!

He didn't dare to be careless and quickly took out the soul devouring saber. At the same time, the fire of law spread around his body, and fire snakes kept twisting.

When the energy ball attacked, Tang Zhen's blade shattered it. Just as he was planning to teleport away, he was shocked to discover that he was unable to teleport again!

Could it be that these two enemies were also cultivators of laws like him?

It was only at this moment that he suddenly realized that the sense of familiarity that the other party gave him was nothing else but the power of the laws that the other party emitted!

Frowning, Tang Zhen suddenly retreated. He planned to find out what was going on.

Although the other party had the power of law, and his speed and strength were weak, it was not pure. His aura was also different from a law King's. On the contrary, it was like two completely different things had been forcibly pieced together, making people feel extremely strange.

Another gust of wind blew over. The flames around Tang Zhen were stirred. Soon after, a pitch-black sharp claw headed straight for his back, as if it was going to penetrate his body!

Tang Zhen's soul devouring blade casually flicked and split apart the enemy's sharp claws. After which, he swiftly dodged the pursuit of another enemy.

Although the attacks of the two enemies had put him in a somewhat difficult situation, his life was not in danger for the time being.

However, the torobo battleships in the sky that could fire at any time gave him a sense of danger, so he immediately thought of retreating.

It was estimated that after such a long time, the residents of his building would have run far away!

However, just as he was retreating and dodging, the map that had been activated during the battle showed that there was a hidden enemy in an empty space behind him.

The direction in which Tang Zhen was retreating was precisely where the enemy was hiding!

As he looked at the two enemies in hot pursuit in front of him, how could Tang Zhen not guess that they had dug a pit for him to jump into? once he passed by the hidden enemy, he would definitely be ambushed!

This bunch of bastards really think that they have me in the palm of their hands!

A cold glint flashed across Tang Zhen's eyes. However, he intentionally acted as if he did not notice it as he continued to charge toward the hidden enemy.

When the two enemies chasing after Tang Zhen saw this, the corners of their mouths revealed a trace of a pleased smile. It was as if they were waiting for Tang Zhen to be shocked and remorseful after being ambushed.

However, when he was less than ten meters away from the hidden enemy, Tang Zhen turned his head around and revealed a strange smile to the two of them.

The hearts of the two chasers jolted when they saw this smile. Before they could react, a fire Dragon had already appeared in Tang Zhen's hand.

The fire Dragon let out a roar and then slammed into the void in front of it. In the midst of the flames, a figure let out a muffled groan and his charred body shot into the distance.

"Damn bastard, he must have found out long ago. He was just putting on an act just now!"

"Don't even think about running, you're dead for sure today!"

The two pursuers furiously roared when they saw their companion being sent flying by Tang Zhen's attack without any warning. They suddenly increased their speed and gave chase.

Tang Zhen coldly swept his eyes at the person in hiding who was clearly seriously injured. He actually gave chase. This scene caused the two enemies behind to be furious.

This damned guy actually wanted to kill his injured companion. He was simply a madman!

However, they had to admit that their companions had been seriously injured. If they were to be attacked again, they might really lose their lives!

No matter what, he couldn't let this damn guy succeed. Otherwise, where would the face of the Tian fa Knights go?

However, the two of them didn't know what kind of existence Tang Zhen was. So far, there had been more than one king level cultivator who had died in his hands.

Although the three of them had mastered some techniques of law cultivators, they were not pure law Kings. If Tang Zhen really wanted to kill them, it was not impossible.

However, the surrounding teroboros people who were eyeing him covetously made Tang Zhen not dare to take any big risks. Therefore, he only planned to collect some interest this time!

When he figured out the cause and effect of this matter, he would definitely not let off the fellow who plotted against him easily!

Under the full eruption of his speed, Tang Zhen had caught up to the enemy whose entire body was charred black in the blink of an eye. The soul devouring saber was even slashed out with lightning speed.

...

"Bastard!"

"Don't you dare!"

Two furious roars were heard, but Tang Zhen ignored them. Under the frightened eyes of the sneak attacker, a blade broke through his defense. Blood splattered as a hideous head soared into the sky.

"Hahahahaha!"

After killing the enemy in one strike, Tang Zhen coldly glanced at the two people chasing behind him. He activated the [map teleportation plug-in] and instantly disappeared without a trace!

The two pursuing enemies stopped in their tracks and looked at the spot where Tang Zhen had disappeared. Their eyes were filled with shock and unwillingness.

that cultivator Lou Cheng killed number six. We're in big trouble this time!

it can't be helped. The cultivator from loucheng was so fierce. If he wasn't afraid of our battleship attack, we probably wouldn't have been able to escape!

do you think the gap between us and law cultivators is so big? why didn't it take so much effort to capture that guy with bones all over his body? "

it should be because of the difference in strength between the two of them. No matter what, this guy is a strong opponent. We have to be careful!

...

[Chapter 1116](#)

1116 The truth (1)

He teleported away from the battlefield. When he reappeared, Tang Zhen was already a hundred miles away.

The sounds of gunfire and killing that resounded through the clouds seemed to have disappeared. The surroundings became very quiet, but this did not mean that the war was over.

The cultivators of Loucheng who had been tricked would not give up without a fight. They would not give up until the last moment!

The tribesmen had gone to great lengths to set up this trap, and they had to get back their capital. They would not be satisfied until all the cultivators in Loucheng were captured!

With the advantage that the Teroboros had now, they would definitely defeat the cultivators in the city in one fell swoop. What awaited the millions of residents in the city would be an unknown fate!

Tang Zhen had seen through this point, which was why he had ordered the residents of his tower to quickly relocate to avoid becoming the prisoners of the Terobo people.

The cultivators in the city were powerful and there were millions of them. They were a terrifying force that could almost flatten a world!

However, as the enemy, the Terobo people were even more powerful. Not only was the difference in numbers not too big, but their weapons and logistics support were also far superior!

Even if it was a one-on-one battle of attrition, the cultivators without the support of the war tower were definitely not their match!

They had been crushed in all aspects, and the outcome of the war was almost certain. If they didn't leave now, when would they?

Although the cultivators of Loucheng city were brave, they were not without a plan. They would not fight to the death with the enemy when they knew that they were no match for them!

Preserving their strength and hiding, waiting for things to develop further, that was the right choice.

However, the tribesmen came too quickly and the cultivators in Loucheng realized it too late. In the end, the tribesmen successfully surrounded them.

Only when they were forced to do so would the cultivators of Lou Cheng fight with them for their last chance of survival!

Among the hundreds of buildings, he was not the only one who chose to do this. However, there were not many who could succeed!

However, it was definitely not an easy task to escape from the inescapable net set up by the terobo people. Once one was discovered and locked on, they would be pursued relentlessly by the terobo people!

The reason why the Holy Dragon city's residents could leave quietly without alerting the teroboros people was because they had the help of the locals.

Bin Zi and big sister, who had previously been saved by the Holy Dragon City, were the key to the escape of the nearly ten thousand Lou city's residents from the war. It was also under their guidance that the Holy Dragon city's residents were able to quietly leave through an underground passage.

The hundreds of thousands of native soldiers guarding outside the city did not expect that nearly 10000 enemies would rush over to help them!

Even if they knew now, the indigenous Army did not have the time to chase after them because they were in a bitter battle.

After suffering heavy losses, a large number of cultivators in the city finally began to try to break out of the siege. The native Army that was responsible for sealing off the entire city was naturally the first to be attacked!

Caught off guard, the native Army almost collapsed under the frenzied attack of the cultivators from loucheng. If not for the cyborgs desperately maintaining the formation and the timely support of the teroboros, who knew how many cultivators from loucheng would have escaped?

As for the cultivators of loucheng who had successfully escaped, the terobo tribe did not have the energy to pursue them. Compared to the prey that they had surrounded, those who had escaped were only two or three kittens.

As long as they remained in this world, they would fall into his hands sooner or later!

.....

Tang Zhen first contacted Qian Long and the others. Only after he confirmed that they had hidden themselves did he let out a long sigh of relief.

The torobo people came with a menacing momentum. It was obvious that they had made sufficient preparations in advance. Even a nomological King like him still had means to deal with them!

No matter how powerful a King level cultivator was, he wasn't a God. As long as he had the corresponding means, even a King level cultivator wouldn't be able to escape.

Those terobo powerhouses with strange nomological auras and strength similar to the cultivators of the laws were definitely not easy to deal with. Who knew how many more of such powerhouses were there in the terobo camp?

Although he had killed one of them, proving that these strange experts were nothing more than this, Tang Zhen absolutely did not dare to lower his guard.

He found a hidden abandoned factory to hide. After confirming that he would not be discovered, Tang Zhen opened the mobile application with anticipation.

Two light balls appeared. It was the broken cornerstone platform that had been in a state of repair since the beginning. Now, it had been completely repaired!

Following the control of his mind, the light ball disappeared. A foundation stone platform that was like an image wall suddenly appeared in front of Tang Zhen.

It was the same as the foundation stone platform he usually saw, but this time, it stood alone on the ground and existed inside the building.

However, the appearance of this cornerstone platform was too bad. There were no words or patterns on it. If someone saw it for the first time, they would probably think that it was a real wall!

Only Tang Zhen was clear in his heart that this thing in front of him had consumed a tremendous amount of energy in order to be completely repaired. Therefore, it was definitely not as simple as it looked on the surface!

Although he understood the value of this thing in his heart, Tang Zhen was also at his wits 'end when faced with a blank wall.

what's wrong with this thing? does it need a special way to open it? "

He walked around the cornerstone platform once, even using his identity card and inputting energy, but the cornerstone platform still did not have any reaction.

Tang Zhen was a little troubled. He had spent a huge price to repair it. If he could not use it, he would have suffered a huge loss!

Just as he was secretly worried, his phone suddenly responded, and a text appeared in front of his eyes.

[discovered bare machine platform. Do you want to inject the control system?]

Tang Zhen was slightly startled when he saw these words. He seemed to have thought of something as his brows were gently knitted.

system injection approved!

As the order was issued, a progress bar appeared in front of Tang Zhen's eyes and slowly moved forward.

[operation system successfully inserted. Please set the operating authority!]

what authority? can you explain? "

there are three levels of authorization. The higher level has complete autonomy and can operate automatically at all times. The medium level requires the host's authorization to perform special actions. The lower level is monitored throughout the entire process and can not perform any actions without the host's command!

Tang Zhen nodded. He pondered for a moment in his heart and did not immediately set the authority. Instead, he asked, who's the host of this cornerstone platform? what kind of authority does the cornerstone platform of Lou Cheng usually have? "

[the platform is now completely controlled by mobile phones. The normal access level of the loucheng platform is at the basic level, and only a small number of it is at the intermediate level!]

then, can we use it to connect to the foundation stone platform in the wilderness? ”

[order received. breaking through the realm and invading. ” abnormality detected. ” the platform host of the wilderness Battlefield has been reverse-invaded, and the highest control has been forcibly taken away.]

Tang Zhen had yet to recover from his shock as he looked at the characters that were continuously jumping in front of him. He discovered that the foundation stone platform in front of him was flickering with light. Soon after, a voice that was filled with vicissitudes of life sounded by his ear.

...

“Young man, Who are you?”

A mysterious white-haired old man appeared and floated in front of Tang Zhen. He gave off an ancient feeling.

Tang Zhen only felt an irresistible force assaulting him as he looked at the white-haired old man on the foundation stone platform. It was as though even his soul was trembling slightly. This was the first time he had encountered such a situation!

“I’m tang Zhen, Holy Dragon city’s city Lord!”

After hesitating for a moment, Tang Zhen still replied truthfully.

Holy Dragon City, I know of a place of miracles!

The old man took a deep look at Tang Zhen and said with a sentimental tone, “I know you. You’re a very promising city Lord Lou. You’ve achieved so much in just a few years. This is definitely a blessing for the war zone.”

At the same time, your tower is also very mysterious, because it has a mysterious power protecting it, even I can’t see through it!”

The mysterious old man’s words caused Tang Zhen’s heart to tremble.

[Chapter 1117](#)

1117 The highest authority on the platform

Tang Zhen actually had the same feeling as the mysterious old man.

There were indeed many unusual things about the Holy Dragon City. Tang Zhen had discovered this a long time ago. Not to mention other things, just the fact that the original world’s residents would not turn into monsters after arriving was enough to make countless people confused.

This kind of power that could reverse the laws of the world of loucheng was absolutely beyond imagination!

Tang Zhen ultimately had a guess. That was that these unusual circumstances were likely related to the mysterious phone.

That mysterious old man used a gaze filled with deep meaning to sweep across Tang Zhen's chest. That was where the phone was hung. Clearly, he was pointing at something.

"City Lord Tang Zhen, do you know why I am here?"

The mysterious old man looked at Tang Zhen and spoke with a tone that had experienced many vicissitudes of life.

did something happen to the foundation stone platform? "

Although he already had a vague guess in his heart, he still needed to confirm it. This mysterious old man in front of him was probably the person with the most interpretation!

"You guessed it right. There is indeed a problem with the cornerstone platform, which is why it issued those abnormal orders.

First, they teleported millions of cultivators to this world, and then they teleported all the cultivators who participated in the war back to the boorish desolate war zone!"

Tang Zhen's heart immediately tightened when he heard this. His expression also became ugly.

"So, even the wilderness battle zone has changed?"

Tang Zhen's expression was nervous as he looked at the old man in front of him and asked in an anxious tone.

that's right. Not only did the torobo people set a trap to lure you all here, but they also sent a large number of warships into the wilderness Warzone. I'm afraid they've already made their move!

The old man's face revealed a trace of pain as he spoke.

Tang Zhen inhaled a deep breath of air. After he did his best to calm his emotions, he looked at the old man and solemnly said, please tell me everything that happened. After all, this is a matter of life and death for countless people!

"Don't worry, I'll tell you even if you don't ask, because I don't have much time left!"

The old man then slowly began to narrate.

It turned out that hundreds of years ago, the Wildlands had already made contact with the tribesmen, and a national-level city had invaded the world of the tribesmen.

In the beginning, the torobo people were forced to retreat by the cultivators of loucheng. While they suffered heavy losses, they were also very interested in the magical abilities of the cultivators of loucheng and tried to master them by all means.

In the end, the terobo people had gathered a large number of troops and relied on powerful technological weapons to defeat the cultivators of loucheng. Even the loucheng was almost destroyed, and the news had fortunately returned to the world of loucheng.

However, no one expected that after this battle, the teroboros people's interest in the world of loucheng would increase greatly, and they would do everything they could to study it.

They used all kinds of methods to analyze the items related to the world of loucheng and successfully predicted the few plane invasions of the cultivators of loucheng. At the same time, they sent a large number of troops to snipe them!

Caught off guard, the cultivators of loucheng were defeated one after another, and countless cultivators and items fell into the hands of the terobo people.

Through analyzing and studying these items, the terobo people's technological strength began to improve by leaps and bounds. At the same time, they also used the gene optimization fluid cultivated by the cultivators in Lou Cheng to strengthen their citizen physique.

The different grades of gene optimization fluids were sold at sky-high prices among the tribesmen!

Unknowingly, hunting down cultivators had become the most popular activity among the nobles of trobo, because it represented an uncountable amount of wealth!

This time, the tribesmen had successfully locked onto an invading tower and used the equipment that was specifically designed for the cultivators in the tower to destroy it in a short time!

After destroying the National tower, the terobo people used some unknown method to use the energy core of the tower's cornerstone platform to send a distress signal across planes to successfully invade the main control platform that controlled all the cornerstone platforms in the savage war zone!

The main control platform did not know that it had been hacked. When it found out that the cornerstone platform had been obtained by the tribesmen and that they had tried to crack it, it immediately summoned hundreds of King level cultivators in an attempt to snatch it back!

Little did they know that they had fallen into the trap of the teroboros people, because this planet had been turned into their hunting ground!

Later on, the main control platform was further hacked, and the authority was stolen to issue teleportation orders, teleporting millions of cultivators into the world below.

Then, under the control of the teroboros, the main control platform recalled all the towers in the foreign world and opened a teleportation channel, allowing the waiting teroboros fleet to cross the dimensional barrier and reach the space where the wilderness battle zone was located!

Such a large-scale reverse invasion was probably the first in the history of the world of loucheng!

The main control platform's energy had been completely depleted and it had become extremely weak. It was no longer able to continue fighting against the invading mysterious force.

If it wasn't for Tang Zhen's accidental repair of the cornerstone platform and the connection to the main control platform, it wouldn't have taken long for this old man to be completely destroyed. He wouldn't have had the chance to reveal the truth!

At this point, the identity of the mysterious old man was clear. He was a special energy life form in the main control platform!

The old man's tone carried a trace of hope as he looked at Tang Zhen, who had a look of realization on his face. "I was already in despair, but I didn't expect you to suddenly appear under such circumstances. This is really an unexpected surprise.

No matter whether you like it or not, I have one thing to entrust you. As long as you succeed, all the wealth that has been accumulated in the boorish desolate war zone for so many years will be your reward!"

Tang Zhen, who was originally feeling heavy, was immediately jolted awake when he heard this.

Even if the savage wildland was ranked at the bottom of the 3000 warzones, the wealth accumulated over countless years was definitely an astronomical figure. If it fell into his hands, it would definitely be an unimaginable help to the Holy Dragon City!

Perhaps with this accumulation, Holy Dragon City could one day be promoted to the legendary continent-level city!

"I will use the last of my strength to transfer the authority of the main control platform to this cornerstone platform, and hand it over to you for safekeeping!

Of course, you're not the master of this cornerstone platform, but you can accept my preset and random missions from it, and then obtain the corresponding rewards!

City Lord Tang Zhen, after this catastrophe, I'm afraid that the wilderness Warzone will be completely destroyed and officially removed from the 3000 warzones!

I know you have great luck, so I hope you Don't Let Me Down. You can make the wilderness Warzone rise again, and even make it famous in the 3000 warzones!

The road ahead is difficult, please be careful!"

As soon as he finished speaking, the old man's figure slowly disappeared, leaving only a long sigh.

The moment the old man disappeared, the entire foundation stone platform immediately glowed brightly. Its originally simple appearance also began to change continuously, and some mysterious runes appeared continuously.

After the light disappeared, the foundation stone platform had completely changed its appearance. It was purple-gold in color and exuded an extraordinary aura!

the cornerstone platform has been upgraded. It has the highest authority in the war zone and is currently sealed. Please work hard to complete the mission to upgrade the level of authority and constantly remove the seal to completely control the platform!

After the words appeared, this mutated version of the foundation stone platform actually rapidly shrank. After which, it directly landed in Tang Zhen's hand.

...

As he looked at the miniature foundation stone platform, Tang Zhen suddenly had a feeling that this thing was actually extremely similar to his mysterious phone.

Could there be some special connection between the two?

However, he didn't have the time to study this at the moment, because there was an extremely important matter waiting for him to deal with immediately.

Under the massive invasion of the tribesmen, Holy Dragon City, which only had a small number of high-level cultivators left, could not resist the enemy's terrifying attacks at all!

In such a dangerous situation, Tang Zhen had to rush back to turn the tide and let the Holy Dragon City, which he had painstakingly built, avoid this catastrophe!

I want to return to the wilderness Warzone. Can you activate the return pass immediately? ”

After a few seconds, the words appeared again.

[the cornerstone platform's energy is insufficient, unable to activate a large-scale return transmission. Currently, only one person can be teleported!]

Tang Zhen gritted his teeth when he saw this. After sending a message to Qian Long and the others, he did not hesitate to activate the return transmission!

[Chapter 1118](#)

1118 The danger of destroying the city

The entire Wilderness War zone was now enveloped in the flames of war.

The sky seemed to have been completely occupied by the huge battleships, and the ground was covered in black smoke. The terobo's aircraft flew past in groups, attacking the buildings on the ground.

Under such a terrifying attack, the low-level buildings did not even have the chance to resist before they were razed to the ground!

The panicking residents of loucheng all turned to the cornerstone platform for help when they were attacked, hoping that it could help them fight against the invading enemy.

However, they were shocked to find that the cornerstone platform had completely malfunctioned. No matter how the residents of the building operated it, there was no response.

Without the cornerstone platform, the City Tower was at best a special building, unable to withstand the enemy's artillery fire.

The despairing residents of the city could only watch helplessly as the city was destroyed by the artillery fire. Other than putting up a futile resistance, there was nothing they could do.

Even if the city had a certain level of air defense, it could not withstand the terobo's storm of attacks. It would not last long before the entire city was blown into ruins!

During this period, countless residents of the city were caught in the disaster and were buried in the collapsed ruins. There were few survivors.

After the city was destroyed, the ground forces of the teroboros would follow closely behind. They would clean up the scorched earth, collect useful supplies, and then quickly rush to the next city.

Unlike Tang Zhen and the others, the torobo people seemed to have come to the savage war zone purely for the purpose of destruction. At the same time, they also plundered precious resources. Therefore, unless the person was a cultivator with extraordinary strength, no one was in their range of prisoners.

This was also the reason why the teroboros were equipped with weapons of great destructive power, aiming to kill the enemy with high efficiency and speed. Ordinary buildings would not be able to resist!

On the vast battlefield, towers were attacked one after another, and then they were quickly wiped off from the map, leaving behind scorched earth.

The aggressive torobo people pushed their way forward, and there were no enemies along the way. It was clear that they were going to wash the entire Savage war zone in blood!

The teroboros had always regarded the cultivators of loucheng who could invade the plane through the cornerstone platform as a major threat, and they had always wanted to get rid of them completely.

The best way was to destroy the foundation of the cultivators in loucheng so that they could no longer cause any trouble!

It was as if the tribesmen had already determined that this was the only way to get rid of any future trouble and prevent them from being invaded by the cultivators in the tower.

In the elven Imperial City, a terobo tribe heavy warship hovered in the sky. Beams of light descended from the sky, turning any building in its path into dust!

The tall city wall that had once been difficult for countless enemies to cross collapsed in an instant. Then, the light pillar spread all the way, forming a blank space.

The giant tree in the Imperial City burst into a blinding light, resisting the destruction of the light beam. All of its branches and leaves drooped down, trying to protect the elven Imperial City under the shade of the tree.

One by one, the elven cultivators rode on their flying warbeasts and launched attacks at the enemies in the sky with grief and indignation on their faces. However, they were intercepted by the aircrafts and shot down one by one!

Seeing the corpses of the cultivators falling and the buildings collapsing under their feet, the residents of the elven Imperial City could only rush out of the buildings in grief and anger, fleeing into the surrounding wilderness.

The terobo soldiers that were thrown onto the ground were constantly chasing after the fleeing soldiers. The wilderness was filled with the shadows of bloody battles.

However, under the lightning-fast attacks of the torobo people, only a small portion of the elven Imperial city's residents managed to escape. The fate of most of the remaining people was unknown.

As time passed, this ancient city that had existed for thousands of years finally turned into ruins!

Not too far away, the moon goddess loucheng had also been locked on by the battleships of the terobo tribe. After paying a heavy price, Yue qianhua, as the city Lord, decisively ordered the loucheng to self-

deconstruct and then took the cornerstone of the loucheng and the escaped residents to hide in the mountains.

Under such circumstances, although the moon goddess tower had been destroyed, Dong mountain still had the capital to rise again.

Heaven battling city, celestial sword city, and black prison tower

The National and ninth-grade turrets in the Wildlands were all heavily guarded by the teroboros, and almost every one of them had a teroboros warship in the air.

Countless weapons of war were thrown down, and the fully armed terobo Warriors and terobo cultivators went all out, killing any enemy who dared to resist!

With the foundation stone platform completely ineffective, the cultivators of loucheng could only use their own bodies to fight to the death against the enemy who had powerful weapons. Blood splattered on every inch of land around the loucheng, and the corpses of cultivators and teroboros were everywhere.

However, even though the cultivators of the city had paid the price with their lives, they were still no match for the terobo people. Under the merciless attacks of the terobo people, one city after another was destroyed.

Compared to the residents of the low-level lounges, the cultivators of these national-level lounges were qualified to be captured. The defeated cultivators were wearing special shackles and were driven into the transport ships by the terobo Warriors. They were sent in batches to the Super warships in outer space.

From this moment on, their future life began to become uncertain.

.....

Outside the Holy Dragon City, the flames of war were already raging.

The moment the torobo warships appeared, all the anti-air weapons of the Holy Dragon City were activated, giving the aggressive torobo people a head-on blow!

After the rocket took off, it hit the outer shell of the terobo's warship. Although it did not break through the defense, it still gave the terobo's people a big shock.

The city in front of them seemed to be a little different?

As the teroboros 'aircraft descended from the sky, the Holy Dragon city's surface-to-air missiles whizzed out and collided with the aircraft.

Even though the terobo people's aircraft managed to Dodge in time, they still suffered significant damage. As the explosions continued, fireballs fell from the sky.

Anti-aircraft machine guns, close-range defense cannons, and all kinds of air defense weapons were fired. Even the loucheng soldiers were holding weapons like rocket cannons in their hands, constantly resisting the enemy's attack.

Drones flew out of the cave one after another and fought with the enemy mechas. It was a dazzling sight.

The Holy Dragon city's cultivators, who had long discovered that the cornerstone platform had gone out of control, were not too flustered at this moment. This was because other than the protective shield provided by the cornerstone platform, the Holy Dragon City still had other defensive measures.

The wizard defense tower that could automatically activate the protective shield, as well as the mother tree that could form a protective light screen, could all provide a guarantee of the Holy Dragon city's safety!

The only thing to worry about was whether the enemy's attack was within the protective Shield's tolerance range!

As the war began, the runes on the White Mage towers flickered, and a huge protective shield completely covered the Holy Dragon City.

The attacks from the aircraft were all successfully blocked, while the Holy Dragon city's attacks easily passed through the light screen and landed on the enemy.

Upon seeing this, the torobo battleships in the air began to cast light pillars that struck the protective shield.

After being attacked by the light pillar, the stable protective shield began to flash violently, as if it would collapse at any time. However, with the continuous energy replenishment from the Holy Dragon City cultivators, it finally returned to a stable state.

However, terobo's attack did not stop there. After a few dozen seconds, beams of light shot down from the sky one after another, continuously striking the protective shield.

At this moment, the attack power of the light pillar had more than doubled!

At the same time, a large number of terobo soldiers were deployed, and with the help of the androids, they began to launch attacks from the ground.

...

The Holy Dragon City was not to be outdone either. Rows of armed robots were activated. With the cooperation of the Holy Dragon City soldiers, they formed an indestructible steel defense line to stop the enemy.

The sky and the ground were already in chaos!

[Chapter 1119](#)

1119 A critical moment _1

Holy Dragon city's resistance had completely exceeded terobo's expectations. In the course of half an hour's attack, Holy Dragon city's ground defenses had not been broken.

Even the protective light screen in the sky did not shatter. It was still holding on stubbornly.

&Nbsp; the torobo Warriors that had participated in the attack had suffered heavy casualties, but without any orders to retreat, they could only brace themselves and continue the attack.

The Holy Dragon city's fearless Warriors had left a deep impression on them, and even a faint trace of fear had risen in their hearts.

Ten thousand meters in the air, the atmosphere on the torobo warship responsible for attacking Holy Dragon City was extremely tense.

A young man in a military uniform was staring at the battlefield. His face was very gloomy, and his slender eyes were constantly flashing with killing intent.

"Who can tell me what's going on with this city? why are there so many technological weapons?"

The young man looked at the Holy Dragon City under the protective shield and slowly turned around, asking the few torobo officers beside him.

"It's probably a war trophy that this tower took back when it invaded the other world. Although it's quite powerful, it can't damage the warship.

Compared to our weapons, their equipment is far behind!"

The officer explained as he glanced at the rocket that had been successfully shot down.

that's right. We'll probably be able to completely destroy this city in a few hours!

Looking at the confident officer torobo, the young man sneered and said in a low voice, " "A few hours? hehe, it's easy to say, but do you know how much time we have in total?

We only have forty-eight hours left. By then, we have to retreat no matter what. Otherwise, the dimensional gateway will completely close, and we will be left in this damn place forever!

That's why I need to take down as many towers as possible in the shortest amount of time and get the most spoils. This way, I can ensure that my contribution will not be inferior to any of the commanders of the warships!"

At this point, the young man's face twisted, and he shouted at the officers, " "But look, it's just the first tower and we've wasted so much time. How am I supposed to defeat those damn guys?

They suffered heavy casualties from a group of Aboriginals with outdated weapons, and you still have the face to say that it will take a few hours to defeat them?

My grandfather sent you here to help me, and this is how you're going to help me?"

Hearing the young man's angry scolding, the few torobo officers' faces turned ugly. However, due to the young man's special identity, they could only hold it in.

After cursing a few times, the young man took a deep breath and said in a cold tone, " "I don't care what method you use, but you must destroy this city within an hour and collect all the spoils of war.

If you can't do it, then don't blame me for being merciless!"

After hearing the young man's words, the few torobo officers felt a chill in their hearts and looked at each other.

don't worry, we'll definitely destroy the target in an hour at most and collect the spoils!

After making the promise, the officers immediately gave the order to begin a frenzied attack on the Holy Dragon City!

In order to satisfy this young master, they could no longer care about the casualties of the soldiers.

In the blink of an eye, the beams of light shot out by the battleships became even more concentrated, and the protective shield kept flickering with light.

This kind of strength seemed to have exceeded the limits of the mage defensive tower. Cracks began to appear on the defensive tower, and the bricks kept falling off.

The Holy Dragon City cultivators guarding the inside of the defense tower were desperately filling the energy pool with energy items such as brains. However, the speed of deployment gradually could not catch up with the speed of absorption.

"Crack!"

With a crisp sound, a hole suddenly appeared in the protective shield above their heads. Then, a beam of light fell into Holy Dragon City, causing a large area of the city to collapse!

As the pillar of light moved, the buildings began to collapse. The residents hiding in the buildings began to look desperate. Many people were affected by the pillar of light and turned into ashes in an instant.

At the same time, the soul transfer array in the back Valley began to operate rapidly, constantly absorbing the souls of the dead.

"Quickly think of a way, or Holy Dragon City will be destroyed!"

Just as the Holy Dragon city's residents were in despair, a large group of mother tree's cultivators stood up. Under the lead of Lisa, who was wearing a white dress, they knelt in front of the mother tree and prayed devoutly.

Bursts of white light spread out from their bodies. Their thoughts were successfully connected to the mother tree, and they kept begging the mother tree to protect the Holy Dragon City.

The mother tree, which was originally calm, began to shine. Bursts of light gathered at the crown of the tree, and a beautiful little girl appeared, looking at the prayer on the ground with a calm face.

Looking at the Holy Dragon City engulfed in the flames of war and the residents of the city who were trembling under the attack of the tribesmen, the little girl's eyes flashed with a hint of pain and pity.

The residents of these buildings had once stayed by her side, and their laughter still lingered in her ears. Looking at those happy smiles, the mother tree also felt particularly happy.

Seeing the residents of the city fall one after another, the mother tree felt as if a knife was being cut into its heart, and crystal-like tears flashed in its eyes.

Protecting this city and the residents in danger was also her unshirkable responsibility. She would not hesitate no matter how great the price she had to pay.

“Goodbye, everything I love!”

After the little girl muttered a few words to herself, her body flew into the sky, and then turned into countless emerald green streams of light, completely surrounding the Holy Dragon City.

The beam of light from the terobo warship was once again blocked by the green light screen. It would not be able to pose a threat to Holy Dragon City for the time being.

Seeing this, the residents of Lou city cheered.

However, the cultivators around the mother tree could clearly feel the mother tree’s weakness. Its originally lush green leaves were withering at a speed visible to the naked eye.

Yellow leaves fell from the sky, covering the withered flowers and grass, making the place look extremely bleak.

It was as if the mother tree’s power was constantly flowing away, and its life was gradually coming to an end!

The mother tree’s cultivators who felt this scene showed sadness in their eyes, and then turned around without hesitation, joining the camp against the enemy.

The mother tree was willing to sacrifice its life for the Holy Dragon City. As the residents of the tower, what did they have to fear?

All the combat personnel left behind in Holy Dragon City were locked in an intense battle with the tribesmen. The invading enemies were constantly being killed, and the number of casualties in Holy Dragon City was slowly rising.

Every minute and every second, there were fresh lives falling on the battlefield, but no one retreated!

Behind them was their home, the place that the Holy Dragon City cultivators had sworn to protect with their lives. Even if they were to be torn to pieces, they would not let the enemy succeed!

On the other hand, terobo seemed determined to destroy the Holy Dragon City. Even though the mother tree sacrificed itself to form a new protective screen, it still could not stop their frenzied attacks.

...

As another wave of frenzied attacks came, the green light curtain formed by the mother tree began to flicker, a clear sign that it was about to break.

As for the mother tree’s main body below the light curtain, all its leaves had fallen, and its branches had dried up and mottled!

“Crack!”

A crisp sound rang out, and a huge crack suddenly appeared on the mountain-like tree trunk. It was a shocking sight!

As the cracks appeared on the tree trunk, the green light screen formed by the mother tree became thinner and after a few flashes, it suddenly disappeared from everyone's sight.

The Holy Dragon city's last line of defense completely disappeared at this moment!

After the terobo warship in the sky noticed this situation, it suddenly condensed into dozens of huge light pillars and bombarded Holy Dragon City.

Looking at the terrifying pillar of light that descended from the sky, all the Holy Dragon city's residents were in despair, because the situation of the city being destroyed and people dying was already irreversible!

At this critical moment, a dimensional passage appeared, and Tang Zhen's figure leaped out.

Looking at the scene in front of him, his eyes suddenly turned blood red. He roared and rushed towards the Holy Dragon City that was about to be destroyed.

"We must protect Holy Dragon City at all costs!"

...

The only thing he could count on now was the phone with its magical power!

It was also at this moment that the mobile phone on his neck suddenly glowed brightly and automatically flew out of his body.

Under Tang Zhen's astonished gaze, the phone was aimed at the Holy Dragon City, which was only one step away from the light pillar, and a "Kacha" sound was heard.

The scene of the disaster froze in an instant. Then, it was quickly cut out from the world and turned into a photo that slowly fell into Tang Zhen's hands.

[the sealed disaster scene has been fixed. It has descended to the two-dimension. Please try your best to erase the disaster scene above and re-upgrade the dimension!]

[the original stored energy has been completely consumed. It is now in standby mode. In order to not affect its use, please replenish the energy as soon as possible!]

After the words appeared, the phone's interface flickered a few times before it returned to Tang Zhen's body.

[Chapter 1120](#)

1120 Soaring Fury (1)

Under the gazes of countless teroboros people, the Holy Dragon City mysteriously disappeared, leaving behind only a void. It was as if a piece of a complete picture had been forcefully dug out. It looked extremely abrupt!

The battlefield quieted down. The torobo Warriors stared at the empty space in front of them, not knowing what to do.

Tang Zhen, who was at the forefront of this void, immediately became the focus of everyone's attention.

damn it! Catch him! We can't let him escape!

When the young man in the warship saw this scene, he was slightly stunned at first, and then he flew into a rage.

He didn't care why the Holy Dragon City had suddenly disappeared, but he was only concerned about one thing, and that was that all the energy he had expended just now had gone down the drain. In the end, he would not get anything!

For a young man who was bent on making a name for himself in this invasion, this was definitely a huge blow, causing him to fall behind by a large margin among the competitors.

The fury had nearly caused him to go mad. Tang Zhen, who was in the middle of the battlefield, immediately became the target of his Fury.

"No matter what price you have to pay, you must capture him, do you hear me!"

Following the young man's furious command, all the terobo Warriors on the ground immediately looked at Tang Zhen and swarmed towards him like a tsunami.

One after another, the experts from the torobo Army stepped out from the crowd. They held demonic weapons and special firearms in their hands, sealing off all of Tang Zhen's escape routes.

There was also a terobo cultivator who exuded a faint aura of laws. He leaped down from the warship and charged towards Tang Zhen like a meteor.

At this moment, Tang Zhen was like a unique peak that was standing proudly in the middle of a stormy sea. Not only did he not show any fear, but his face was filled with dense killing intent.

Loucheng, which he had worked so hard to build, had been reduced to such a miserable state by these bastards. Now, it was even sealed by his mobile phone, frozen in the moment before it was destroyed.

If he had not done so, Holy Dragon City would have been reduced to ruins.

However, the seal did not mean that the crisis had been resolved. At this time, as long as he restored Holy Dragon City to its original state, it would immediately be razed to the ground by the light pillar of the same seal.

He still had a long way to go if he wanted to completely resolve the Holy Dragon city's crisis!

However, what he needed to do now was to deal with the murderer who had destroyed his building and take back a portion of the interest!

Under the support of the fury in his heart, Tang Zhen wildly laughed and suddenly transformed into a flame giant. Everywhere he passed by, flames overflowed into the sky, burning everything into ashes!

With a wave of his hand, countless fire snakes descended from the sky. They left long trails of flames behind them as they wreaked havoc among the torobo Warriors. Smoke and dust rose in their wake. They were the ashes of the enemies that had been burned to ashes!

When the terobo Warriors who were attacking Tang Zhen saw this, they were instantly shocked. While fear rose in their hearts, they also began to continuously summon the drones to participate in the battle in an attempt to subdue Tang Zhen!

However, the moment these flying devices approached Tang Zhen, they immediately seemed to be bound by glue. Then, under the effect of his mental energy, they continuously twisted and deformed, turning into a pile of useless scrap metal!

“You lowly barbarian, just surrender!”

A low roar came from above Tang Zhen’s head. The terobo cultivator, who was emitting faint law fluctuations, had already launched an attack at him from above.

The experts from the terobo Army who were in charge of intercepting Tang Zhen also swarmed forward, launching all sorts of attacks.

When faced with such a terrifying siege, ordinary cultivators would either die or be seriously injured!

“You came just in time, let’s settle this together!”

Tang Zhen did not have the slightest hesitation. He faced the terobo cultivator head on and directly slashed out with his soul devouring saber.

The calm expression on the torobo warrior’s face was replaced by a look of fear.

“Not good, run, run, run!”

Tang Zhen’s battle blade had already slashed across his body before he could finish his words. The two halves of his body were devoured by the black flames and instantly turned into ashes.

The moment he killed that terobo cultivator, Tang Zhen’s body suddenly disappeared. When he reappeared, he was already facing the experts from the terobo Army. The soul devouring saber, which was wrapped in black flames, slashed out once again.

A black Ring of Fire appeared in the sky and instantly spread out in all directions. All the experts from the torobo Army were cut in half by the black Ring of Fire without exception!

Pieces of broken corpses fell from the sky and burned to ashes before they even touched the ground!

In just two moves, Tang Zhen had killed all the enemy experts!

The torobo soldiers who witnessed this scene were horrified. They stopped moving without hesitation when they saw Tang Zhen standing in the air like a Demon King.

They had realized that unless they used endless lives to exhaust him, they were no match for the cultivator from Lou Cheng!

Just as the terobo Warriors were hesitating, they saw Tang Zhen waving his hand in front of him. Following which, a door-like object with a strange appearance appeared. This was the reincarnation mirror of mysterious origin.

“Don’t even think about escaping, all of you will obediently stay here!”

As Tang Zhen's voice fell, countless spirit bodies swarmed out from the reincarnation mirror's door. They covered the sky and flew towards the stunned torobo Warriors with sinister smiles on their faces. In just an instant, the ground was already in chaos!

The torobo Warriors attacked the spirits in a frenzy, but they realized that they were unable to do any effective damage. On the contrary, once they were attacked by the spirits, they would immediately become dispirited.

The weak-willed ones were even controlled by the spirit bodies in an extremely short time. They smiled slyly and opened fire at their companions, causing groups of torobo Warriors to fall under the guns of their companions.

"Hurry up and kill him, hurry up!"

A torobo military officer looked at Tang Zhen in the sky. His eyes were filled with fear. As he roared loudly, the miniature nuclear bomb in his hand also shot towards Tang Zhen.

"BOOM!"

The miniature nuclear bomb that was shot out was blocked by the psychic barrier and exploded halfway through. Many of the torobo Warriors on the ground were affected by the explosion and were instantly blown to pieces!

Seeing how Tang Zhen had caused such a terrifying number of casualties by himself, the expression of the young man on the torobo warship finally changed. He knew that if this continued, even he would not be able to explain himself.

"Kill him, immediately!"

After hearing the young man's order, the few torobo officers beside him immediately heaved a sigh of relief. Then, they controlled the weapons on the warship to lock onto Tang Zhen.

This kind of action that seemed like using a cannon to kill a mosquito precisely showed their fear of Tang Zhen!

Over ten light spots gathered below the battleship. After which, they shot down in unison. Their target was Tang Zhen who was suspended in the air.

An attack of this degree could even flatten a mountain, let alone Tang Zhen's body of flesh and blood. Therefore, he kept the reincarnation mirror and teleported away to avoid the attack of the light pillar.

"BOOM!"

...

When the light beam landed on the ground, the soil and rocks were all turned into dust, and a terrifying giant pit appeared on the ground!

Tang Zhen appeared in the distance. He sneered and was about to continue attacking the enemy when he discovered that countless tiny light pillars were shooting down from the battleship, chasing after him and attacking him.

Although it was called a tiny beam of light, it was actually relative to the size of the warship. Its actual diameter had already exceeded 30 centimeters.

Under the cutting of these tiny light pillars, the earth became fragmented. The once picturesque Holy Dragon city's outer Urban area was completely turned into ruins!

Before the war had even begun, the Holy Dragon City had already detected traces of the torobo fleet. They then ordered everyone in the outer Urban area to take refuge in the Holy Dragon City, hoping to use the protective light curtain to avoid the enemy's attack.

There was not a single person in the Holy Dragon city's outer Urban area!
