

Alternate 1121

[Chapter 1121](#)

1121 Helpless _1

Tang Zhen was very clear that it was impossible for him to fight against the torobo people's warships alone.

Although Tang Zhen was a law cultivator and possessed terrifying strength, it was still not enough in front of such a super war weapon.

It was impossible for him to split the outer shell of the warship with the soul devouring saber in his hand, nor could he use the fire of law to melt the warship into molten iron. When Science and Technology developed to a certain extent, it would possess destructive power that was not inferior to mysterious forces, and might even surpass them!

The lethality of a low-level cultivator might not be comparable to a bullet, and the full-force strike of a high-level cultivator might not be comparable to a heavy artillery. Although this ability was amazing for the cultivators in Loucheng city, in this life-and-death battle, the individual ability of a cultivator could not affect the outcome much.

The collision between technology and mysterious power was an unfair battle. The former required time to accumulate, but once it reached a certain stage, it would possess Super Combat ability. The latter also required time to accumulate, but the only powerful one was the cultivator himself.

However, an overly powerful individual would have an impact on the overall improvement of strength, which could not be ignored. However, the cultivators of Loucheng city had chosen this path, which had not changed for many years.

Therefore, when an ordinary person stepped onto the battlefield and could easily kill the cultivators of Lou Cheng with technological weapons, the outcome of the war was already decided!

Moreover, the technology that the Teroboros people possessed had far exceeded that of the original world. The cultivators in the wilderness who could not even withstand the weapons of the original world were now facing an even more terrifying opponent.

From the beginning to the end, Tang Zhen had never denied the strength of Lou Cheng's cultivators. He also knew that when this kind of cultivation reached its limit, it would definitely possess the strength to destroy the world.

However, there were only a few cultivators in Lou city who could reach this stage. In the process, the cultivators would have to face the invasion of unknown dangers and they might die at any time.

Under such circumstances, how could the cultivators in the wilderness, who were already lagging behind, be a match for a powerful enemy like the torobo people after more than half of their elites were tricked away?

A long time ago, Tang Zhen had always had a doubt in his heart. That was why it was rare to see technological items appearing in the wilderness Warzone.

Later on, as time passed, Tang Zhen realized that this might be a way for the cornerstone platform to protect the tower. This was because when faced with the foreign world's Aborigines who used cold weapons, the cultivators in the savage war zone had a crushing strength. They could even easily destroy One World after another.

However, if they were to encounter a powerful opponent like the terobo tribe, their advantage would be greatly reduced. If they were not careful, they might even suffer a backlash.

The current invasion war also proved this point!

This catastrophe not only affected all the buildings in the savage barren territory, but also completely destroyed the foundation. Even the foundation stone platform was not spared.

Perhaps it was just as the mysterious old man had said. After this catastrophe, the wilderness Warzone would be completely wiped out of the 3000 warzones in the world of Lou Cheng!

At this moment, the torobo battleships were still chasing after Tang Zhen. As Tang Zhen dodged, he was also constantly reaping the lives of the torobo soldiers on the ground.

If they couldn't defeat the battleships, could they not defeat the soldiers?

They were all enemies and the targets of Tang Zhen's revenge. Since they were unable to pose a threat to the torobo battleships, he would start with these soldiers.

After all, the main theme of war was to kill and conquer. This had never changed. He would not hold back just because these torobo Warriors were no match for him!

Once he possessed sufficient strength, Tang Zhen would definitely not let off the instigator of this matter and let them know how it felt to have their entire home destroyed.

Seeing Tang Zhen's figure continuously shuttling back and forth on the ground, the raging sea of fire and spirit bodies causing a huge number of casualties to the torobo Warriors, while he himself remained unscathed from the pursuit, the commanders of the torobo warships in the sky fell silent.

They were all thinking about the same question. Was it worth it to pay such a heavy price to kill a cultivator of Lou Cheng?

No one had expected that a cultivator from Lou Cheng would cause so many casualties and trouble to them. He was truly unstoppable when surrounded by thousands of soldiers and horses!

Under the heavy blockade of technological weapons, it was not easy to achieve this.

There was always a price to pay, but the current situation made them feel like they were suffering a huge loss. Moreover, the situation was still developing. If they didn't change this situation, they would really suffer a huge loss this time!

However, the decision makers of this warship were not them. Even this war was full of the smell of employment. The soldiers of the Empire were just hired thugs who were paid to fight with their lives.

The nobles of the terobo Empire had led this invasion and invested a large amount of resources in order to obtain generous returns. In fact, in order to ensure that everything was under their control, they had all sent out their respective agents.

The young man in front of him was the agent of an important figure and had absolute control over this warship.

Therefore, no one had the right to stop the pursuit of Tang Zhen without him opening his mouth!

Of course, this was just a cover up. Anyone who was not blind could tell that the ones being chased were actually the ground forces of torobo!

Under the gazes of all the officers, the young man's arrogant face finally showed a trace of fatigue, and he slowly sat down on the chair.

give the order to retreat. We can't waste any more time here. As for that cultivator Lou Cheng, ignore him for the time being!

When he said this, the young man's tone carried a hint of helplessness and even a hint of frustration.

He had never thought that he would fail to kill a cultivator from a backward world with the heavy warship he controlled and countless fully-armed terobo Warriors!

However, when this matter really happened before their eyes, even if their hearts were filled with unwillingness and wished to chop Tang Zhen into meat paste, they simply could not allow him to act as he pleased in front of the plans of the faction behind him.

Even though his identity was special, he still had to compromise with benefits. However, Tang Zhen's figure and appearance had been firmly remembered by the young man in his heart. If he had the opportunity to meet him again, he would definitely make Tang Zhen pay the price!

As the warship gave the order to retreat, the torobo soldiers acted as if they had been granted Amnesty. When the micro-gravity tunnels appeared, the ground troops quickly entered.

Under the protection of the energy shield, the terobo soldiers and the mech-fighters swiftly flew into the skies, entering the interior of the battleship.

By the time the light pillar that was chasing after Tang Zhen had shut down, all the torobo Warriors had already retreated, leaving only a piece of scorched earth on the ground.

Tang Zhen stood on the scorched ruins and watched as the terobo people's heavy battleship slowly flew toward another building.

The teroboros would never stop their assault until the final deadline arrived. Instead, they would destroy as much as they could, pillaging precious resources and captives!

However, just as they were wreaking havoc in the savage wildland as if they were entering a no man's land, an abnormal fluctuation suddenly appeared in the isolation zone between the savage wildland and the other battlefields.

One after another, super towers that were as large as continents and as tall as mountains quickly passed through the barrier that was impossible to cross under normal circumstances, and descended on the wilderness Warzone with an overbearing aura!

On top of these towers, countless cultivators in battle armors with terrifying auras were gathered together. They looked coldly at the terobo people who were acting recklessly in the savage war zone, and their killing intent soared to the sky!

[Chapter 1122](#)

1122 fleeing

The sudden appearance of these super turreted cities immediately alerted the nearest terobo battleships. Then, without any hesitation, they controlled their weapons and locked onto the enemy.

Looking at the terrifying size of their opponent, the teroboros people felt a sense of powerlessness.

Compared to the Super tower, the originally gigantic terobo warship was now like a Sparrow, while the Super tower was a giant Goshawk. In terms of size alone, it was completely crushed!

However, its size alone was not enough to terrorize the teroboros. The key was the movement of the tower. The moment it appeared, it was like a mad bull, charging at the teroboros warship with all its might.

Violent, brutal, and the terrifying speed almost made the hearts of the torobo people jump to their throats.

Seeing the gigantic city that was flying towards them like a huge continent, commander torobo trembled in fear and shouted madly, "destroy it at all costs. Don't let it get close!

At this moment, a trace of fear appeared in the heart of the warship commander, and his eyes were filled with deep fear.

This was the first time he had such an expression on his face since he arrived at the savage barren territory. This proved that these super towers did give them a great sense of danger!

After the terobo warship stopped for a moment, a beam of light shot out from the huge muzzle. It then wrapped in a dazzling brilliance in the air, like a spear, and directly landed on a super tower on the opposite side.

"BOOM!"

The light landed on the walls of the Super tower, creating a loud explosion and even more dazzling light spots. However, it was blocked by the protective shield of the Super tower. The walls of the tower, which were full of the vicissitudes of history, looked completely undamaged!

The commander of the terobo warship was shocked. The power of the cannon was so great that it could easily destroy a city on the ground. However, when it landed on the Super tower, it was like scratching an itch. It did not cause any damage at all!

An ominous premonition gradually rose in his heart.

However, the warship's commander did not give up easily. Instead, he ordered to increase the intensity of the attack, to destroy it no matter what!

However, at this moment, the Super-tower suddenly accelerated again, using a jumping method similar to teleportation to crash into it. Every time it flashed, it doubled its speed.

In the blink of an eye, the two sides collided with each other, creating a deafening sound!

The terobo battleship let out a deafening sound as it rolled backward. The entire ship was in a complete mess. Everyone was bruised and swollen from the impact. Some of the unlucky ones had their brains split open, and their corpses were scattered everywhere!

Fortunately, the terobo warship had a way to deal with such a situation. At the critical moment, a special force field appeared and stabilized the tumbling warship.

However, before the torobo people could regain their consciousness, the Super-tower crashed into them again like a maggot in a tarsal bone.

This time, the lucky boss did not care about the terobo warship. Its outer shell suddenly broke into two, and blazing flames burst out from the inside, rolling and falling to the ground.

With a muffled sound, a large pit was formed on the ground by the fallen warship, and almost half of it was deeply buried in the soil.

When the ground forces saw this, they were immediately stunned. They could not believe that the almost invincible terobo warship had been shot down!

The cultivators who had just had their homes destroyed let out earth-shattering cheers. They looked at the Super City with shock and gratitude in their eyes.

Then, under everyone's gazes, countless black dots flew out of the gate of the super-tall tower, covering the entire sky in an instant.

When the black dots got closer, the survivors were surprised to find that they were all fully armed cultivators. Each of them exuded a terrifying aura, and the weakest one was at the Lord-level!

Even King level cultivators would appear from time to time. How many of them were there?

After these cultivators appeared, the entire sky seemed to freeze and was filled with an oppressive aura.

In the blink of an eye, the terrorizing cultivators of loucheng had come into contact with the torobo Warriors. Blood and screams resounded through the sky. The torobo people who had suppressed the cultivators of loucheng were now like chickens and ducks, being wiped out by the cultivators of loucheng!

The technological equipment that they were so proud of had completely lost its advantage at this moment. It could not pose an effective threat to the cultivators in the building!

The brutal battle lasted for about half an hour, and all the troboans on the ground had been killed, leaving only broken corpses and remains. It was a tragic sight.

As for the wreckage of the torobo battleship, it had already been devoured by the flames, and there were no survivors.

One of the king level cultivators looked at the survivors who were trembling on the ground. His eyes were cold and disdainful. He then shouted, " the wilderness Warzone has been invaded. The cornerstone platform has been destroyed, and more than 70% of the buildings have been destroyed. It is no longer qualified to fight in the Warzone.

According to the ruling of the elders of the Alliance of the war zones, the wilderness War zone will be abandoned from today onwards and will be converted into a common trial ground for the low-level buildings of the 3000 war zones!

[all cultivators who have received the notice, please make preparations as soon as possible and leave this place through the teleportation array. You will be randomly teleported to other battlefields!]

Those who refuse to leave after the time limit is up will be responsible for the consequences!"

After saying this, the king level cultivator followed the Army of cultivators and flew towards the Super city in the sky.

Then, under the watchful eyes of the survivors, the Super-city was shrouded in light and disappeared without a trace.

The survivors around the ruins came back to their senses and looked at each other. Although they didn't understand what the king level cultivator meant, they were very clear about one thing: the savage wildland would no longer exist!

Countless monsters would appear on this land and rule the battlefield in place of the cultivators in loucheng.

Even if they stayed here, they would no longer be able to enjoy the benefits of the building because of the destruction of the cornerstone platform. Under such circumstances, the fate of the survivors could be imagined when facing the terrifying monsters.

If it was before the city was destroyed, they might have hesitated. But now that their home had disappeared, there was no point in them staying.

Therefore, as long as one didn't want to die, they had to make preparations as soon as possible. Then, they would randomly head to other battlefields and start a new life.

Although the future was uncertain, it was much better than staying here and waiting for death!

.....

The appearance of the Super tower immediately threw the tribesmen into chaos. In just an hour, more than 20 heavy battleships had been destroyed!

The weapons that the teroboros people were so proud of were not of much use against these behemoths that had suddenly appeared. They were completely suppressed!

The tribesmen, who thought they had a good understanding of the cultivators in the city, could not understand what was going on. Why would such a terrifying city appear on the battlefield?

Compared to these super loucheng, the National loucheng was not worth mentioning at all. The gap in strength was even greater!

He didn't need to guess to know that this was an existence that far exceeded the national level. According to the cultivator of the tower, it should be the legendary continent-level tower!

However, it was now certain that this was not a legend, but a super war base that really existed!

Although the area of these super towers could not be compared to a real continent, they were tens of thousands of meters in size and were not inferior to a small continent. It was no exaggeration to call them continent-level towers!

The reason why the savage wildland was ranked so low was because there had never been a Continental Tower before, which was why the tribesmen had overlooked the existence of such a super war machine!

However, when the two sides came into contact, the torobo people were shocked to find that they felt a sense of despair when facing such a continental-class building.

...

As the news of the warship being destroyed spread, the torobo people finally panicked. They immediately stopped their destruction of the savage war zone and quickly gathered together.

Under the pursuit of the continent-level turrets that had rushed over to provide reinforcements, the torobo warship quickly entered outer space and left the dimension through the dimensional portal!

Before they found a way to deal with the continent-level city, the tribesmen would not invade the city again. They might even be worried about the teleportation of the continent-level city!

After the torobo people left, the continental buildings that had completed their missions began to cross the barrier and return to their respective battlefields.

Only the survivors looked at the destroyed homes and the devastated wilderness, and could not help but cry.

[Chapter 1123](#)

1123 Complicated situation _1

Tang Zhen sat on the mountain peak in front of the Holy Dragon City. His eyes would occasionally look at the sky.

Half an hour ago, a continental-level city had suddenly appeared in the sky. It stopped at the original location of the Holy Dragon City for a moment. Seeing that the Holy Dragon City had completely disappeared, it once again teleported to the location of other cities.

Although it was only a fleeting glimpse, the indescribable aura of the continent-level City Tower was deeply engraved in Tang Zhen's mind.

He finally knew why the continent-level loucheng was so highly respected by cultivators of loucheng. It was indeed worthy of its reputation!

Not only could King level cultivators teleport, but also towers that had reached a certain level could. When the defense of the tower reached a certain level, its body would become the most powerful weapon.

Under such a terrifying acceleration, almost no enemy could withstand it. Almost half of the torobo warships that were attacked were destroyed!

Although the Holy Dragon City could also float in the air, it could not be compared to a continent-grade building in terms of size and function. At best, it was just a low-end torobo warship without weapons!

If the Holy Dragon city's enemy was a continent-level city, then the Holy Dragon City would have been turned into a piece of scorched earth before Tang Zhen could return!

However, what shocked Tang Zhen the most was the strength of a cultivator in a continent-level building. When it appeared, Tang Zhen found that there were more than a dozen powerful mental forces constantly sweeping around his body.

Tang Zhen was very clear that this was the law King on the tower investigating him. After confirming Tang Zhen's identity, the mental energy slowly retreated, and the continent-level tower teleported away!

Tang Zhen didn't have any strange movements during this process, but the shock in his heart was indescribable. He didn't expect that the number of law Kings in a continent-level city had already exceeded the total number of law Kings in the savage wildland!

It would not be an exaggeration to say that such a force could crush the entire wilderness Warzone.

Tang Zhen turned his head to look at the empty Holy Dragon city's original location. He gently sighed as a trace of worry appeared on his face.

He was in a terrible situation now. In order to seal Lou Cheng, which was about to be destroyed, he had used some special ability on his phone, which eventually led to an excessive energy consumption and caused him to be unable to use it normally for a short time.

The phone could only be restored to normal if it was injected with sufficient energy!

The shrunken cornerstone platform could still be used with some difficulty. However, due to the damage done by the terobo people earlier, the energy of the main control platform had been exhausted. It would not be able to help Tang Zhen much.

however, the long-term mission to kill the terobo people that it had issued had allowed tang zhen to earn quite a number of points.

However, the price of origin stones was very high, and he could only exchange a few with these points. Compared to the consumption of the mobile phone, it was probably far from enough!

Other than these things, his tower needed to be removed from the danger and the seal. There was still a group of residents in the other world who might be hunted down by the terobo people at any time. Putting all these messy things together, Tang Zhen felt that his head was getting bigger.

cornerstone platform, can I send all my residents back now? ”

Tang Zhen thought for a moment and asked the mesmerizing cornerstone platform.

[insufficient energy, unable to start large-scale return transmission. Please wait patiently!]

The cornerstone platform itself had a way to replenish energy and did not need Tang Zhen to provide energy. However, this process could be long or short. Tang Zhen really did not have the patience to keep waiting.

“Can you let me return to the other world first, and then teleport me back after I’m done with the matters there?”

After thinking for a moment, Tang Zhen probed.

[teleportation is possible, but the remaining energy will be completely exhausted. Do you want to proceed?]

wait for a while. I’m going to collect some weapons and bring them there to improve their self-defense ability as much as possible!

As soon as he finished speaking, Tang Zhen had already rushed toward the battlefield. Pieces of usable terobo armor and weapons were collected and kept in his storage ring.

After circling the battlefield once, Tang Zhen clapped his hands in satisfaction and opened the plane transmission channel.

.....

Tang Zhen slowly stepped out of the dimensional gateway and once again arrived at this parallel world that was similar to his original world.

The hunting war had ended, but the smoke had not yet dispersed. Although the fleet of the teroboros had left, they still left behind a large number of troops to pursue the fleeing cultivators.

In the eyes of the nobles and aristocrats, the cultivators in loucheng were a huge fortune, and they would not give up on them easily.

As the flames of war continued to spread, this world had also suffered great damage, and ruins could be seen everywhere on the vast land.

The enraged cultivators of loucheng began to destroy the world at all costs so that they could hide in the chaotic situation.

In just a few days, the world was in complete chaos. Fierce mutated monsters and bloodthirsty zombie spirits began to appear in the vision of ordinary people one after another, and they soon formed a terrible disaster!

Faced with such a situation, the cyborgs could only stand up to maintain order. They did not want the world to be destroyed. Due to the chaotic situation, the tribesmen were no longer able to lock onto the cultivators of Lou Cheng. Although they were frustrated, there was nothing they could do.

The battle to capture Lou Cheng's cultivators also began to become long and arduous!

After conversing with Qian Long, Tang Zhen's figure soared into the sky and headed straight for the deep mountains and old forests a thousand miles away.

An hour later, he finally saw the Lou Cheng cultivators hiding in the cave. Seeing that everyone was safe and sound, Tang Zhen also heaved a long sigh of relief.

The Holy Dragon City had not lost a single person despite the frantic pursuit of the tribesmen. This was a miracle!

As for the other loucheng, they were in deep trouble. Countless cultivators from the loucheng were sent to the transport ships and sent directly to the planet where the terobo Empire was located. Only a small number of cultivators from the loucheng were spared.

As they were carrying a large number of storage cards, it was not a problem for the Holy Dragon city's cultivators to replenish their supplies. Now, with the weapons and equipment that Tang Zhen had sent over, they could even fight against the torobo people.

Even if the terobo warships were not deployed, the Holy Dragon City could easily crush them!

Tang Zhen hesitated for a moment as he looked at the familiar faces around him. In the end, he still told them about what had happened in the wild war zone.

There was still a chance for things to turn around, so he didn't plan to hide anything. It would be unfair to his residents.

After a moment of silence, the Holy Dragon city's cultivators who knew about the news finally accepted this matter. They also believed that Tang Zhen could fulfill his promise and let the Holy Dragon City reappear before their eyes.

After telling his people not to act rashly and that it was best for them to wait until he came to pick them up and leave, Tang Zhen bade farewell to Qian Long, Murong Ziyue, and the others. He activated the teleportation channel and returned to the world of towers.

Tang Zhen inhaled a long breath of air as he looked at the broken ground. A trace of determination flashed across his eyes.

Through this battle with terobo, Tang Zhen had already realized his own shortcomings. He was certain that he was no match for the terobo people with his current strength.

The enemy's heavy warship was already enough to make him feel helpless, and in the terobo Empire, who knew how many more of such warships there were!

The purpose of his return this time was to look for opportunities in other battlefields to obtain a large number of origin stones to restore the mobile phone's operation.

He still wanted to continue to become stronger and advance toward a higher level. This required him to continue comprehending and fighting so that he could master fire-elemental laws as soon as possible and then activate new law stars.

...

Once Tang Zhen grasped two or more types of law power, his combat strength would increase by several times. If he accumulated it to a certain extent, he would be able to step into an even higher realm!

Tang Zhen no longer hesitated when he thought of this. He directly found a quiet cave and began to continuously Polish the law power that he had mastered.

Three days passed by quickly, and midnight arrived. In the places where the towers had once been in the Wildlands Warzone, a pillar of light shot up into the sky, and strange runes flashed in the light.

The survivors, who had been waiting for a long time, carried their heavy bags and glanced at their homes that no longer existed. They entered the teleportation array with faces full of unwillingness.

It wouldn't take long for monsters to run rampant here. Without the protection of the city, the cultivators wouldn't be able to hold on for long. Therefore, even if they couldn't leave their homeland, they had to go far away and face their unknown fate.

Tang Zhen, who was cultivating, slowly opened his eyes. A faint smile appeared on the corner of his mouth. He did not hesitate to step into the teleportation array and once again left the boorish desolate war zone!

[Chapter 1124](#)

1124 Future plans

A squirrel squatted on a branch, holding a hazelnut that looked like a hazelnut in its hand. It was looking at a spot not far from the tree with a dull gaze.

A strange fluctuation was constantly coming from that place, making the squirrel feel both fear and curiosity. Just as it was about to leave this dangerous place, a change suddenly occurred.

A ray of light suddenly appeared where the Rocky beach had been. At the same time, a large group of figures with different appearances appeared and quickly scattered on the Rocky beach.

They held all kinds of weapons in their hands, and with curiosity and caution on their faces, they kept looking around. After confirming that there was no danger, they all let out a long sigh of relief.

God knows where this random teleportation would bring them. If they were to appear in the nest of a King-tier monster, it would be too late for them to cry!

After confirming that there was no danger around them, the survivors from the savage war zone immediately spread out and went to different areas to rest.

Although they were teleported to the same place, the survivors were still on guard against each other. After all, many of them carried a large number of valuable items found in the ruins of the city.

It was normal to be careful when he was carrying a precious treasure.

Tang Zhen was also among them. However, he was currently dressed in a very low-key manner and looked like an ordinary cultivator. The nomological aura on his body was also perfectly concealed.

If it wasn't a cultivator of the same level, one wouldn't be able to tell his exact cultivation.

Even the residents of Loucheng didn't expect that a powerful ruler would be teleported here with them, and he was so low-key!

But even if they knew, so what? They were all people who had their cities destroyed and their homes destroyed. The fate of the Law Kings was no better than theirs. At this moment, they were just a group of people who had no choice but to leave their homes.

Upon seeing Tang Zhen looking around in a daze, a middle-aged man from an unknown city patted Tang Zhen and said with a smile, "Little brother, what are you still standing there for? Hurry up and rest for a while. After that, we still have to find a place to settle down!"

After he finished speaking, the middle-aged man shook his head, as if he was speaking to Tang Zhen and himself, "Although the city is destroyed, as long as we're still alive, it will be rebuilt one day!"

Although we've already left the wilderness Warzone, as long as we work hard in this strange place, we might not be worse off than before!"

Tang Zhen gently nodded his head and sat down not far from the middle-aged man. He looked like he was resting, but in fact, he was constantly studying the tasks given by the cornerstone main control platform.

Perhaps it was unwilling to see the wilderness Warzone destroyed like this. Therefore, this mini-version of the cornerstone platform, which possessed the highest authority on the cornerstone platform, had prepared a series of missions for Tang Zhen.

Other than the long-term mission of exterminating the Teroboros, there was another mission, which was to build a new war zone!

This mission was made up of a series of side missions. As long as Tang Zhen completed one of the missions, he would receive a certain reward and at the same time, his authority would be increased.

When he had completed all his missions and obtained the highest authority in the main control platform of the battlefield, it would be the day when the savage wildland reappeared!

The rewards for the mission to rebuild the war zone were very generous. However, each mission was not simple. For example, the first mission at the beginning had made Tang Zhen scratch his head.

[open up an area in the ownerless land and build at least ten towers. Guarantee that at least one tower will be a national-level tower!]

What kind of place was this foreign land? Tang Zhen had never even heard of it before, let alone opening up land there. On the contrary, it was not difficult to build ten towers. If the seal on the Holy Dragon City was lifted, it would not be a problem to build a national-level tower.

However, before he could think of a way to erase the destruction light pillar, Tang Zhen would definitely not dare to easily remove the seal. Otherwise, the only outcome that would await the Holy Dragon City would be the destruction of the city and the death of its people!

Although the task of rebuilding the savage war zone was not easy to complete, it would bring great benefits to the Holy Dragon City once it was successful. Just obtaining the highest operating authority of the cornerstone main control platform was enough to move Tang Zhen.

Once the savage barren territory was rebuilt and he had the highest authority of the main control platform, Tang Zhen could issue orders through the cornerstone platform and let all the buildings in the territory act according to his orders.

At that time, if Tang Zhen intended to invade a certain world, he could wave his hand and send over eight to ten towers, beating the native forces to the ground!

Tang Zhen felt incomparably excited just by thinking about such a spectacular scene.

Tang Zhen did not have the slightest doubt as to whether this was feasible. This was because once he obtained the highest authority of the cornerstone control platform of the war zone, he would be able to become the rule maker. Changing the rules of the invasion and transmission would only require a thought.

The world of loucheng had been using the teleportation mode for countless years, but because the loucheng were fighting on their own, it was difficult to have a completely trustworthy partner, so there were gradually situations where the loucheng completed the invasion mission alone.

After that, this pattern of invasion was fixed and passed through all the major battlefields, which had not changed for many years.

In the process of rebuilding the wilderness War zone, Tang Zhen would definitely only allow the forces under his control to build the towers. In this way, the entire war zone would be his own people and he would no longer have to worry about being stabbed in the back.

At the end of the day, it was simply taking the entire Warzone as its own territory. It was originally running a City Tower, but now it was running a Warzone!

If he could really do this, then no matter how big the price Tang Zhen had to pay, he would definitely obtain a return that was a thousand times more than his investment. The benefits were simply unimaginable!

In fact, Tang Zhen didn't know that this was the first time in the history of the 3000 battle zones that the cornerstone control platform was destroyed at the same time.

There had been instances of battlefields being destroyed before, but the cornerstone control platform was still there, so the battlefields' qualifications were not revoked. However, if the battle zone can not reach the minimum trading limit within a fixed time, then the battle zone will also be disqualified from existence!

In the end, with the joint efforts of the remaining buildings in the battle zone, the qualification of this destroyed battle zone was successfully preserved and gradually restored to its former glory.

It might sound ridiculous, but the standard for a battle zone to continue existing was actually based on the trading volume of the entire battle zone's platform!

Of course, from another perspective, in order to complete a fixed task and transaction amount, cultivators of Lou Cheng would not stop fighting. This was equivalent to achieving the ultimate goal from another perspective.

This transaction amount included all the operations on the cornerstone platform, such as exchanging skills, trading items, paying for the funds to open the plane transmission channel, the profit sharing of the plane invasion mission, and so on!

The higher the level of the cornerstone platform in the Warzone, the higher the level of the items obtained by the cultivators in Lou Cheng would be. However, the minimum trading standard would also be greatly increased. In this case, the more powerful towers there were in the battle zone, the easier it would be to achieve the mission goal. This was to ensure that the battle zone would not be demoted or disqualified!

Therefore, the cornerstone control platform that maintained such transactions was the key to the existence of the war zone. Without it, the foundation platform of the city building would not be able to operate normally, new buildings would not be able to be built and recognized by the world rules, and the various benefits that belonged to the residents of the city building would not even be possible!

It was precisely because of these important functions that the cornerstone master control platform would only run independently and would never be controlled by outsiders. Moreover, the number of cornerstone master control platforms would only decrease and would not increase out of thin air.

This time, the authority of the wilderness Warzone's main control platform had been transferred to Tang Zhen's hands. It was really an incomparably coincidental and lucky thing. It was just that Tang Zhen had yet to fully realize this.

Just like what the energy life form that originally controlled the main control platform of the savage wildland said, Tang Zhen was definitely a person with great luck. There was a mysterious and powerful force in the dark that was silently protecting him and his Lou Cheng!

If the continent-level City Tower that came to help knew about this, they would definitely snatch it at all costs or firmly control Tang Zhen. This would be equivalent to completely controlling a new war zone in the future!

[Chapter 1125](#)

1125 Forced recruitment! 1!

The rest time was over, and the survivors from the wilderness Warzone got up one after another and embarked on their journey.

At this time, these foreign visitors did not separate, but gathered together to act together. After all, there was strength in numbers, and they could help each other in times of danger.

They had almost no understanding of where they were now, so they had to find a local to ask and then formulate the next step of the plan.

However, the biggest feature of the world of Loucheng was that it was vast and sparsely populated. Sometimes, one might not even see a single person after walking for a few days. Therefore, it would take a bit of luck to meet the local residents.

Tang Zhen was not in a hurry to leave. After all, the purpose of his visit this time was to find a way to improve his strength and obtain a large number of origin stones. At the same time, he would try his best to complete the mission issued by the cornerstone platform and completely resolve the crisis of Holy Dragon City!

As he followed the group and slowly advanced, Tang Zhen pondered over a problem as he walked. In the end, it did not take long before he suddenly heard a noise coming from the front of the group.

After Tang Zhen carefully listened to a few words, a contemplative expression appeared on his face. Soon after, he immediately walked towards the position in front.

At this moment, there was a large group of people gathered at the front of the group. They seemed to be discussing something. Tang Zhen swept his gaze and saw hundreds of cultivators dressed in strange clothes. They were blocking the middle of the road and trying to stop the group from moving forward.

They held a spear-like weapon in their hands and were pointing it at the group. The spearheads flickered with light and at the same time, intense energy fluctuations appeared, as if they could activate some kind of cultivation skill at any time.

This fighting style was slightly different from that of the cultivators in the wilderness, and the weapon was similar to the staff used by the Holy Masters. It also had the function of a spear, which was quite convenient in battle.

Their armors were also different from those of the cultivators in the wilderness. They looked like they were made of shells full of spiral patterns. Under the sunlight, they shone with a strange brilliance, making people feel dizzy.

At this time, these foreign cultivators were looking at everyone with cold eyes. The Lord cultivator in the lead was mumbling something with a very serious expression.

However, none of the people present could understand what he was saying. For a moment, they looked at each other and did not know what to do.

Seeing this, the leader of the foreign cultivators became impatient. His gaze became extremely unfriendly, and his tone became stiff.

The survivors were also helpless, and there was even a faint anger in their hearts. After all, these people had blocked their way.

If they were in the wilderness, the two sides might have already started fighting!

However, there was a saying that a strong Dragon could not suppress a snake in its own territory. They had to be patient as much as possible since they were new here, so as not to provoke the local forces and bring unnecessary trouble to themselves.

In the future, when he was building loucheng, he would have to build a good relationship with these local forces. Otherwise, if he was constantly harassed by these guys, loucheng would not be able to have peace.

Tang Zhen watched this scene from the side in silence. He did not participate in the beginning.

Unlike the other survivors, he couldn't fully understand what the foreign cultivator was trying to say since he couldn't use his mobile phone.

Tang Zhen roughly understood the other party's meaning even though he was guessing.

These foreign cultivators seemed to be gathering people to participate in a mission. The purpose of stopping the survivors was to get them to join.

However, since the survivors couldn't understand their words, these foreign cultivators were a little anxious. They discussed with each other whether they should use force to threaten the survivors.

However, the strength of the survivors wasn't simple. Once they attacked, the foreign cultivators wouldn't be able to gain an advantage. Therefore, they sent messages to their nearby companions, asking them to come and help them.

In this case, if they were not careful, the two sides might start fighting directly, and the survivors on their own were likely to suffer a big loss!

Tang Zhen didn't want to fight with the local cultivators as soon as he arrived. Even if his strength was enough to kill these foreign cultivators, he didn't want to add trouble for no reason.

As he thought of this, Tang Zhen stepped out from the crowd and walked to the gloomy-looking leader of the foreign cultivators. Under the gaze of everyone, he slowly opened his mouth.

"If you have anything to say, you can tell me. I'll help you tell them!"

This sentence was said in a jumble, but the specific meaning had been expressed, and the other party had clearly understood.

The leader of the foreign race cultivators carefully sized up Tang Zhen after hearing this. He then nodded his head and his expression also eased up a lot.

we need a lot of manpower, so you've been temporarily recruited. We'll give you a generous reward, but if you dare to resist, don't blame us for being impolite!

The leader of the non-human cultivators had an obvious threatening look on his face. The cultivators in the surrounding buildings also shook their Spears, and the light on them became brighter.

They obviously didn't know that the young man in front of them was actually a law King. Otherwise, these foreign cultivators wouldn't dare to speak to Tang Zhen in such a manner even if they were given a few more guts.

After all, to a ruler of laws, killing them was as easy as crushing ants!

Tang Zhen turned his head to look at the survivors and repeated the words of the foreign race's leader. After that, he waited for everyone's decision.

In fact, the matter was already very obvious. Once they rejected the recruitment of the foreign cultivators, they would definitely attract the other party's siege. Under the situation where Tang Zhen did not make a move, even if these survivors were lucky enough to win, they would definitely attract the pursuit of their companions!

The survivors looked at each other and nodded slightly. At this moment, many foreign cultivators had arrived from afar, completely sealing off the survivors' escape route.

Beside these foreign cultivators, there were also many wild cultivators with different expressions and a large number of Wanderers. It was obvious that they had also been forcibly recruited.

After they saw Tang Zhen and the others, they all revealed gloating expressions. Their hearts had also become balanced.

After confirming that they had no other choice, the survivors could only bite the bullet and agree to follow the foreign cultivators.

There were about two to three thousand people in the group. They marched along the trampled roads, heading straight for the city where the foreign cultivators were.

After walking for about three hours, they had gathered with more than a dozen groups of people, finally forming a team of nearly ten thousand people!

Tang Zhen was mixed in with the crowd. He was slightly suspicious as he looked at this mighty group. He didn't know what these foreign cultivators were up to. Why did they recruit so many cultivators and Wanderers to help?

At this moment, a giant city Tower that was built on the plain appeared in Tang Zhen's eyes. It was like a ferocious and terrifying monster that was coldly watching the crowd that was approaching.

Behind the tower, there was an extremely deep passage that led to an unknown, mysterious area!

[Chapter 1126](#)

1126 The magical passageway (1)

Tang Zhen could not help but be slightly stunned after seeing this strange scene. He also had a trace of anticipation for what would happen next.

If he was not wrong, this mysterious passage seemed to be connected to another world. However, it seemed very unstable and could collapse at any time.

If it was just entering the other world, Tang Zhen would definitely not be surprised. This was because for a national-level building, entering the other world for a battle was only an inevitable mission. There was nothing to make a fuss about.

However, the passageway in front of them was somewhat unusual.

When Lou Cheng invaded the other world, he needed the cornerstone platform to open the plane transmission channel to send Lou Cheng and the cultivator over. If this step was missing, the cultivator Lou Cheng would not be able to leave the world of Lou Cheng.

It could be said that without the cornerstone platform, the invasion of the other world could not be completed at all!

However, the mysterious passage in front of them did not seem to require the participation of the cornerstone platform. Instead, it was a crack that was directly torn between the two worlds!

Moreover, the passage formed by these cracks seemed very short. One only needed to take a light step to cross it. However, Tang Zhen was extremely clear that the distance between the two was more than hundreds of millions of miles!

What one saw might not be the truth.

When one stepped into it, it was actually the beginning of a special teleportation. Before people could react, they would be teleported to an extremely far distance.

Strictly speaking, almost everyone could participate in this kind of natural teleportation. This was because the moment the teleportation occurred, the body would be directly energized, and when they arrived at the destination, they would return to their original flesh and blood form.

The teleportation array couldn't sense this process at all, and it was completely unaware that its body had already been reconstructed once!

This explanation made sense. After all, how could a body of flesh and blood withstand such terrifying high-speed movement?

It could be said that as long as one's body was strong enough, and with the appropriate protection, one could freely travel between the two worlds through this crack!

Although the cornerstone platform could also do this, it would consume a large number of battle credit points. How could it be as convenient as this passage?

In fact, this passage was more similar to a special world for Lou Cheng to advance, but there were some differences. At least in appearance, there was something wrong because it didn't have a portal.

What Tang Zhen did not know was that even though this kind of special passage had never appeared in the wilderness Warzone, it was not the first time it had appeared in this Warzone. Moreover, it would attract countless cultivators to fight for it each time.

The only regret was that this kind of passage could only be encountered by luck and not sought for. The city in front of him did not know what kind of luck it had to encounter such an extremely low probability thing, and it even appeared in front of his own door!

The pavilion closest to the water enjoys the moonlight first. They must have already obtained a lot of benefits and were now planning something. Otherwise, they would not have forcefully recruited so many wild cultivators!

Chaotic thoughts appeared in Tang Zhen's mind. However, his gaze was still fixed on the tunnel. The curiosity on his face grew increasingly dense.

This mysterious passage could not be concealed at all. It was estimated that it would soon attract a large number of experts. At that time, Tang Zhen only needed to capture a King level cultivator and he would be able to interrogate him for the information he wanted!

At this time, the people who had long been stunned had already come to the front of the tower along the road and joined the dense crowd that had been waiting for a long time.

At this moment, they were surrounded by fully armed cultivators of Lou Cheng. They looked nervously at the people who had been temporarily gathered, on guard against any possible accidents.

As the residents of loucheng, they naturally knew more about the passageway.

Because of the appearance of the special passage, the atmosphere in the entire city became particularly tense. All the residents were mobilized to participate in this matter.

The cultivators who were in charge of the exploration had returned and brought back a piece of news that made them both happy and sad.

Behind this was a huge world with many ruins and a large number of high-value items. However, the number of monsters was also terrifying!

With the appearance of the passage, the monsters began to gather at the exit, as if they would rush out at any time.

Once the monsters with terrifying strength rushed out of the tunnel, the nearby buildings would be the first to be hit. The city could be destroyed if they were not careful!

In the face of this situation, the elders of Lou Cheng decided to seal off the passage and build a defensive wall inside the passage to prevent the monsters from approaching.

However, when they were about to do so, they found that the manpower in the tower was not enough to complete the task.

It turned out that there was only one entrance and exit in the tower world, but there were many entrances and exits inside, and they were constantly opening and closing!

Fortunately, the positions of these entrances were fixed and not the kind of entrances that would open randomly. Otherwise, there was no way to know where they would appear next.

However, this was not the key to the matter. As long as one entered any of the entrances in the passageway, they would be able to reach the world of loucheng through the only exit in front of them.

After entering the dungeon World through the entrance, one would randomly arrive at a different place in the tunnel.

It was for this reason that the cultivators in the city could not defend all the entrances at the same time. Just a few days ago, a large number of monsters rushed into the world of the tower through the unguarded entrances.

The cultivators in charge of the defense in the world of loucheng suffered a great loss. Under the attack of the dense monsters, they paid a heavy price before they successfully blocked the monsters!

However, the number of casualties in this battle was close to 1000, which was a shocking number.

How many cultivators could there be in a city? no city could afford such a loss.

The elders of loucheng city were worried about this. If the monsters continued to rush out of the passage, how many cultivators would they have to consume?

Once they couldn't block the monsters anymore, even the city would be destroyed by them!

After some discussion, someone suggested that they could not hide the passage, so there was no need to hide it. Instead, it was better to take it slow and steady to avoid unnecessary losses.

At the same time, they could also gather a large number of people and immediately take action after entering the passage to build defensive buildings at each entrance.

After that, they would completely seal the entrances and exits and send cultivators to guard them. As long as they could successfully do this and resist the monster's attack, the previous monster attack would not happen again!

Once he had complete control over all the entrances and exits, Lou Cheng could explore this world freely and obtain endless benefits from it!

After some discussion, the elders of Lou Cheng also felt that this was the only feasible method at present. However, the problem was that there were limited cultivators in Lou Cheng and it seemed impossible to complete this task in a short time.

Most of the residents in the building were just ordinary people. They didn't have the power to protect themselves when they encountered monsters, so they couldn't do this job.

Time was of the essence. In the end, the elders of Lou Cheng unanimously decided to start recruiting a large number of wild cultivators in the control area of Lou Cheng and let them all participate in the construction work.

Since the strength of the wild cultivators was generally not high, the cultivators of loucheng could completely suppress them and make them follow orders obediently.

Once they encountered monsters, these wild cultivators could also act as combat personnel to prevent them from approaching the entrance!

This was the reason why a large number of wild cultivators were gathered. Tang Zhen and the other survivors who were teleported from the wilderness Battlefield were also directly recruited by the cultivators in loucheng because of this matter!

[Chapter 1127](#)

1127 Entering the interior of the passageway

Following the appearance of Tang Zhen's group, the number of unaffiliated cultivators gathered in the open space in front of the tower increased. The sounds of discussion also rose and fell.

Due to the cultivators of Loucheng who were waiting for them, these wild cultivators who were making a living nearby did not dare to be too presumptuous. After all, they were weak and were no match for the cultivators of Loucheng.

However, after seeing the mysterious passage near the tower, everyone was full of curiosity about the reason why they were gathered!

Fortunately, they didn't have to wait for long before a cultivator from Lou Cheng stood up and flew into the air.

Under the respectful and envious gazes of the wild cultivators, this peak-level Lord cultivator, who was close to level 9, glanced around with a cold and sharp gaze. Then, he said in a clear voice, "The reason why Spirit Rock City has gathered all of you here is to ask for your help to enter the tunnel and build a defensive structure to prevent the monsters from coming out and harming people!

you may not know this, but there are a lot of monsters inside the tunnel. Each of them is extremely fierce. Last time, our Spirit Rock City paid a heavy price to resist these monsters. Thousands of cultivators were injured and sacrificed!

It's because of our Spirit Rock city's selfless sacrifice that these monsters are unable to wreak havoc and endanger the safety of everyone and your families!"

The elder of Spirit Rock City glanced at the dense crowd of wild cultivators and saw that they were all cold and indifferent. He took a deep breath and continued, "in order to ensure that our home will not be destroyed by the monsters, this matter must be done as soon as possible. In order to not let you suffer losses, we will also pay the corresponding reward, which is equivalent to hiring you!

When some of the wild cultivators heard this, their faces revealed looks of satisfaction. They did not want to work for Spirit Rock City for free, so it would be best if they could be paid!

At the same time, there were many wild cultivators who looked worried. They thought that even the cultivators of Spirit Rock City had suffered such heavy casualties when facing the monsters. Wouldn't the wild cultivators whose cultivation levels were far lower than theirs suffer even more losses?

Could it be that the purpose of Spirit Rock City hiring them was to act as cannon fodder to exhaust the monsters?

After thinking of this, the wild cultivators immediately felt conflicted. They did not want to die in vain.

However, because they were alone and were closely guarded by the cultivators of Spirit Rock City, they had no chance to leave this place. So, even though they were anxious, they could only silently endure and hope to find a chance to escape.

Among the many wild cultivators present, there were many who had this idea, especially the survivors of the savage war zone, who couldn't wait to leave this place immediately.

They didn't want to enter this tunnel that had appeared out of nowhere. They didn't want to risk their lives.

Spirit Rock City seemed to have noticed this as well, so they did not give the cultivators too much time to think. One by one, the cultivators in the tower City walked out and began to call out to the wild cultivators to follow them.

Forced by the cultivators of the surrounding buildings, the Rogue cultivators could only brace themselves and follow them, even though they were unwilling to give up. They quickly approached the location of the passage.

When they passed by a location, some Lou city residents even gave them tools like pickaxes. It was obvious that they were going to use them as coolies!

The wild cultivators looked at the tools in their hands with conflicted expressions. They hesitated whether to throw them away or not, then left with a flick of their sleeves.

don't think too much about it. Let's just go in obediently. If we anger the cultivators of Spirit Rock City, they will definitely not let us off easily!

An old wild cultivator advised the person beside him. Then, he carried the pickaxe on his shoulder and followed them with an indifferent expression. He didn't seem to be angry about this matter.

The old cultivator who had experienced countless ups and downs in his life had learned to adapt to the situation and not fight against fate. Perhaps he had once, but after he had been beaten to a pulp, he had learned to follow his fate. Otherwise, he might not have been able to live to this day.

After seeing the old cultivator's performance, the indignant wild cultivators all lowered their heads and sighed. They resigned themselves to their fate and continued to follow the crowd.

Tang Zhen followed closely behind. He took a shovel from a Lou city resident and looked around while walking.

He found that there were many high-level cultivators hidden among the wild cultivators, but they all used various methods to hide their cultivation. At this time, they were also moving forward with the crowd.

With their skills, they could definitely escape the pursuit of the cultivators of Spirit Rock City. However, they did not do so. It was obvious that they had other plans.

Spirit Rock City had also realized this, but they did not expose them. Instead, they allowed these people with ill intentions to enter the tunnel.

In fact, Spirit Rock City was also very helpless. Once these hidden high-level cultivators were caught, it would inevitably cause a great chaos, and the wild cultivators they had gathered with great difficulty would escape in the chaos.

Therefore, even though they knew that there were many wild cultivators here, they pretended not to see anything. After all, once these guys entered the passage, they would have to see if Spirit Rock City agreed to leave!

As an eighth-grade city, it controlled an area of a thousand miles. There was a King-level cultivator in the city, and a large number of Lord-level cultivators. They could completely annihilate the enemy who had ill intentions!

Before they knew it, the crowd had already reached the front of the passage. The cultivator from Spirit Rock City took the lead and stepped into the passage.

There was a hint of hesitation in the expressions of the wild cultivators behind him. After all, as wild cultivators, they had no access to matters related to the other world, so they subconsciously resisted.

“Hurry up and leave, don’t dawdle!”

The cultivators of Spirit Rock City who were guarding the entrance of the passage growled in a low voice. They showed an impatient expression and pushed the unaffiliated cultivators who were not moving forward into the passage.

After the first wild cultivator entered the passage, it seemed that nothing unusual happened. The other wild cultivators were less apprehensive and followed him in one after another.

The instant Tang Zhen passed through the tunnel, he felt as though his body had been stretched endlessly. However, this feeling disappeared in an instant. Soon after, he discovered that he had arrived in a desolate world.

The sky was covered with thick dark clouds, making the world look gray. A super ruin was hidden in the thick fog. Although it was in ruins, one could still imagine the magnificent scene of the past!

Although the ruins appeared to be quiet, Tang Zhen could sense that there were a large number of monsters hiding in the corners. They were using cold and cruel eyes to continuously size up the outsiders.

Looking back, Tang Zhen found that there were many wild cultivators coming in one after another, but many of them were not in the group just now. They had obviously been randomly sent here.

Even the cultivator from Spirit Rock City who had led the way had disappeared. Who knew where he had been teleported to?

However, there were dozens of cultivators from Spirit Rock City waiting there. They looked warily at the ruins in front of them, and their faces were filled with fatigue.

In front of the cultivators of Spirit Rock City, there were some hideous monsters lying on the ground. They seemed to have been dead for a long time!

Tang Zhen swept his gaze over the corpses of those monsters and discovered that their appearances were extremely malevolent. All of them had thick and heavy shells, just like an enlarged version of insects. They possessed extraordinary killing power!

The cultivators of Spirit Rock City had paid a heavy price in order to stop the insect monsters. More than a dozen broken cultivators’ corpses were placed on the ground at the side, and it was a terrible sight.

To Spirit Rock City, the sudden appearance of this mysterious passage had always brought them both pain and joy!

[Chapter 1128](#)

1128 A strange substance _1

Tang Zhen sized up the oppressive environment around him. He had yet to take a closer look when he heard a low roar by his ear.

what are you all waiting for? hurry up and build your fortifications. Otherwise, you won't be able to survive when the monsters attack!

Looking in the direction of the roar, they saw a cultivator from Spirit Rock City holding a spear. He was standing on a stone that flickered with silver light and glaring at the wild cultivators.

From the aura of his cultivation, he was obviously a Lord-tier cultivator.

However, he didn't seem to be in good condition. His armor was severely damaged due to the intense battle, and there were many wounds and bloodstains on his body. Other than the serious injuries that had been simply treated, he did not pay any attention to the small wounds. At first glance, he looked a little fierce.

At this moment, he was scolding the crowd in a cold tone. The spear in his hand was slightly raised, as if he would teach the wild cultivators a lesson if they disobeyed his orders!

When the cultivators of Spirit Rock City saw this, they immediately raised their Spears and energy waves rippled from them.

The wild cultivators were both envious and afraid of the low level mo weapons used by the cultivators in the city.

Due to their fear of the cultivators in the city and the fact that their cultivation equipment was inferior to that of the cultivators in Spirit Rock City, the Rogue cultivators could only follow their orders and start building the defensive fortifications, even though they were annoyed.

Tang Zhen was surprised at the beginning. Why didn't spirit Rock City send Holy Masters to transform the terrain? wouldn't it be faster to build fortifications?

However, when he personally entered the world in the passage, he was surprised to find that the land here seemed to contain a strange material that could repel and offset the skills released by cultivators.

Even when low-level cultivators used their skills, they couldn't make any changes to the ground. Even if there was a reaction, it was very small!

It could be said that a Holy master's terrain transformation skill that belonged to the laws of earth was completely ineffective here. Even a King of the laws of earth would be at his wits 'end here!

Tang Zhen didn't know if the [terrain transformation plug-in] would be effective here, but now was not the best time to experiment.

However, he was quite interested in the strange substance contained in the soil. He wondered if it would also repel other types of natural energy. If it was the same, he could try to extract it on a large scale and then integrate it into the standard armor of the Holy Dragon City cultivators.

Wearing this kind of armor with " anti-magic " attributes, the Holy Dragon City cultivators would weaken the enemy's energy to the minimum, while their own attacks would not be affected. This way, the advantage they had on the battlefield would increase by several times.

The Holy Dragon City cultivators, who were already fierce, would probably become the nightmare of all cultivators in the same level!

After making up his mind, Tang Zhen also pretended to use a shovel to dig up the soil that was also flashing with silver light and piled it between the cracks of the stones.

Due to time constraints and limited conditions, the cultivators of Spirit Rock City could only choose to use the local materials, such as rocks, trees, and soil, to build simple fortifications to defend against the sporadic monsters that would attack from time to time.

With the joint efforts of hundreds of wild cultivators, it didn't take long for a ring-shaped Foundation to be built around the entrance. Then, they just had to continue to pile the rocks and soil higher.

With the protection of the wall, the pressure on the cultivators of Spirit Rock City would be greatly reduced when they fended off the monsters.

The cultivators of Spirit Rock City were watching the wild cultivators with long Spears. They also had to pay attention to the ruins in the distance and watch out for the monsters that could appear at any time. They looked very nervous and urged them to hurry up.

"Hurry up. If you don't finish your work here, no one can leave. Without our proof, you will be caught even if you go out!"

The leader of the cultivators from Spirit Rock City saw that the cultivators were so weak that he immediately shouted in a cold tone. He even had a smug look on his face.

It was obvious that Spirit Rock City had already considered the possible situation before they had forcefully recruited these wild cultivators. The reason why the leader of the cultivators had said this was to make everyone dispel their perfunctory attitude.

He said it now to let these wild cultivators know what to do and not to dawdle like this.

Seeing the expressions of shock and anger on the faces of the wild cultivators, the leader of the cultivators snorted coldly and continued to shout, "You don't have to be angry. I can tell you clearly that as long as you work hard, you can finish the work in a day.

When you leave this place with the certificate I've given you, you'll be able to receive a decent reward. My Spirit Rock City will definitely not be stingy with this small amount of money!

However, if you continue to dawdle, the fortifications will not be completed in time. If you are killed by the monsters, you can't blame anyone else!"

The wild cultivators were indignant, but due to the strength of the cultivators of Spirit Rock City and the consideration of their own lives, they had no choice but to speed up their work.

As Tang Zhen's mobile application was temporarily unavailable, he was unable to observe the details of this world through the map. However, he could still use his mental energy to cover the surrounding area of several kilometers and search inch by inch without the cultivators of Spirit Rock City noticing.

With the mental power of these Spirit Rock City cultivators, they couldn't detect the mental power that had spread to the surroundings. They couldn't imagine that a law King was hiding in the wild and observing the ruins around him.

It didn't take long for Tang Zhen to discover some interesting items. They were half-hidden among the ruins and withered vegetation.

Just as he was considering whether he should go over and take a look, his expression suddenly changed slightly. He turned his head and looked at a mound not far away.

Seeing Tang Zhen stand up and stare into the distance, one of the spirit Rock City cultivators in charge of supervising the construction walked over and shouted at Tang Zhen, "What are you daydreaming about? hurry up and get to work!"

At the same time, the spear in his hand was fiercely whipped towards Tang Zhen's head. If a low-level cultivator was hit, his head would definitely be broken and bleeding.

It was obvious that in the eyes of this cultivator from Spirit Rock City, these cultivators who had been forcibly recruited were not worthy of respect.

"You're looking for death!"

As city Lord Lou and a law King, how could Tang Zhen allow a low-level foreign cultivator to offend him? therefore, the moment the other party attacked, he snorted and raised his hand to slap.

The invisible mind power smashed down like a heavy hammer, and the spirit Rock City cultivator's chest caved in. He flew back a dozen meters with a look of disbelief on his face before he fell heavily to the ground.

This sudden scene shocked everyone present. All the wild cultivators dodged Tang Zhen as if he was the God of plague. The cultivators of Spirit Rock City roared in anger and waved their weapons to surround him.

"Damn bastard, are you tired of living!"

The leader of the cultivators from Spirit Rock City glared at Tang Zhen. His face was full of anger, but there was a trace of fear in his eyes. This was because Tang Zhen's casual attack just now proved that he was not an ordinary rogue cultivator. Even he could not do it.

Could it be that the cultivators from the enemy tower nearby had already sent people to infiltrate this place?

Thinking of this possibility, the leader of the cultivators from Spirit Rock City became even more alert. He sized up Tang Zhen again and slowly raised the spear in his hand.

"Take him down! If he resists, kill him on the spot!"

As the leader of the cultivators gave the order, the long Spears in the hands of the spirit Rock City cultivators suddenly glowed with light and quickly rushed toward Tang Zhen.

Unfortunately, Tang Zhen did not care about them at all. Instead, he suddenly flew into the air and sneered at the shocked cultivators from Spirit Rock City. He then said in a calm tone, "You'd better survive first, then think about how to deal with me!"

When the cultivators on the ground saw Tang Zhen fly into the air, they immediately realized that he was a Lord-ranked cultivator. Just as they were about to attack in shock, they were stunned by his words.

The leader of the cultivators from Spirit Rock City was about to capture Tang Zhen, but when he heard this, he immediately frowned and his expression changed.

[Chapter 1129](#)

1129 The terrifying giant worm

not good, the monsters are attacking. Retreat!

The leader of the cultivators from Spirit Rock City roared. At the same time, he glared at Tang Zhen with hatred. Then, he turned around and quickly moved towards the exit.

Compared to Tang Zhen, who had an unknown origin, the threat of these monsters was undoubtedly greater. Moreover, after thinking for a moment, he did not seem to have the confidence to defeat Tang Zhen.

In that case, it would be better to leave him to these monsters. No matter how amazing his strength was, he was probably no match for these monsters. He would probably end up being torn to pieces by these terrifying monsters and become their food!

Although they didn't see the monster, all the cultivators of Spirit Rock City turned around without hesitation and ran toward the entrance after hearing the warning from their leader.

As for the unaffiliated cultivators, they were even more chaotic. They all followed behind the cultivators from Spirit Rock City in an attempt to escape the dangerous area.

However, what happened next made their hearts turn cold, and their eyes filled with despair.

As it turned out, just as they were about to approach the tunnel, the already unstable tunnel suddenly trembled, then closed and disappeared at an extremely fast speed.

His last escape route had been completely cut off!

Who knew if these monsters knew the exact time the passage would close? otherwise, they wouldn't have appeared so coincidentally and launched a surprise attack on the cultivators here.

Seeing that they had no hope of escaping, the cultivators immediately looked at the distant Hill in despair.

The ground, which was originally filled with withered grass and trees, was now covered by the figures of countless monsters. Their huge figures moved quickly, making rustling sounds as they moved forward. It was extremely horrifying.

From Tang Zhen's point of view, these monsters looked like giant beetles of various shapes and sizes. The one that was charging at the front was a large insect that looked like a rhinoceros and had a thick shell with sharp horns. A row of thick and solid insect legs continuously stomped on the ground, causing its heavy body to accelerate continuously.

Looking at the charging posture of these bugs, even if there was a mountain in front of them, they would probably flip it over and crush it!

The giant worm that followed closely behind had a streamlined shell and several tubes as thick as a fist on its head. A green fluorescent liquid was dripping from the top of the tubes.

There was also a bright green area in the abdomen of this insect. It was constantly moving up and down as it ran, and it seemed to be filled with the green liquid.

In the process of charging, these giant bugs would raise their heads from time to time, then violently move their abdomens, spraying out balls of green mucus.

It was unknown what the structure of the giant worm was, but the green mucus was actually sprayed out nearly a thousand meters away and accurately fell into the panicked crowd.

As it left the insect's body, the green slime started to burn continuously. When it fell to the ground, it splashed everywhere. Anything that came into contact with it would burn violently.

The cultivators who were touched by the green mucus immediately let out heart-wrenching screams. There were numbing sounds of corrosion on their armor and skin. Some people rolled on the ground in pain, trying to put out the flames on their bodies.

However, this kind of flame was even more terrifying than the white phosphorus bomb. The body full of oil became the best fuel, and the limbs that were contaminated quickly appeared to be in a charred state, looking like dried branches!

The cultivators who were being attacked looked at the approaching insects in horror as they dodged the green mucus. The hands holding their weapons began to tremble.

In the face of such a monster's terrifying charge, their hearts were filled with fear, and they had no idea how to deal with it.

However, the escape route had been sealed. Other than staying to fight the monsters, they could only hide in the surrounding unexplored ruins, but that might not necessarily be the case.

Although the field cultivators were not clear about the situation, the cultivators of Spirit Rock City were very clear that the ruins were full of danger. Whether it was the terrifying insects or the strange mechanical creatures, they were all full of fatal threats to the explorers.

In addition to these threats, there were also many metal boxes buried in the soil. As long as one got close, they would cause a violent explosion!

Over a hundred cultivators in Spirit Rock City had been either killed or severely injured because of these messy items. This made Spirit Rock City afraid of exploring the ruins.

Moreover, the insect monsters that they had encountered before were far less ferocious than they were now, and their numbers were not as overwhelming as they were now!

It was as if they had no other choice but to fight to the death.

However, to their horror, after these two types of insects appeared, another type of extremely fierce-looking giant insect rushed out from behind the mound like a furious bull.

They waved their sickle-like forelimbs and flew toward the cultivators.

In just a few seconds, these insect monsters had already reached the cultivators. The cultivators at the front were directly sent flying into the sky, or their bodies were pierced by the sharp horns of the insects.

However, when the cultivators' weapons fell on the shells of these bugs, they could not cause any effective damage at all. They could only leave varying depths of damage, but they could never harm the lives of the giant bugs.

However, a casual attack from these giant insects could cause a lot of damage to cultivators, especially in such a dense number. The cultivators simply couldn't resist such a terrible collision.

In the blink of an eye, the cultivators' formation was in complete chaos. Everyone dodged in all directions while trying to avoid the attacks of the giant insect.

In particular, the cultivators of Spirit Rock City formed teams and fought while retreating, constantly fighting against the siege of the insect monsters.

The cultivators of Spirit Rock City were able to deal with the heavy insects, but when the Bladefoot worms appeared, they were immediately in danger.

The Bladefoot worm's strength was equivalent to that of a level 5 monster. Its huge body, coupled with its sharp blade-like legs, could easily cut through any target within a ten-meter radius. Once hit, the target would be immediately beheaded!

Several cultivator teams from Spirit Rock City couldn't Dodge in time and were hit by one of the Bladefoot worms. They screamed and blood splattered as they were cut in half at the waist and fell to the ground powerlessly.

The rest of the Bladefoot worms were also wreaking havoc in the crowd. Broken corpses were flying everywhere, and from time to time, some of the worms would be killed.

The mottled ground had already been filled with blood and broken corpses!

Tang Zhen, who had been hovering in the air, was observing the situation on the battlefield. At the same time, he had also conjured a protective barrier to resist the attack of the green sticky liquid.

He hadn't made a move before because he wanted to see what these insect monsters had up their sleeves. Now, he had basically figured it out.

Compared to the common monsters in the world of Loucheng, these giant insects were more brutal and fearless. Their defense was more perfect, and they were more lethal!

Tang Zhen could imagine that once these insects appeared in batches in the world of loucheng, it would definitely cause an unimaginable disaster. He didn't know about other places, but this war zone would definitely not be spared!

Those idiots from Spirit Rock City, they were not trying to get their hands on a treasure, but a terrifying giant insect's nest!

[Chapter 1130](#)

1130 Inside and outside the passageway

The shock in Tang Zhen's heart became increasingly dense as he looked at those giant insects on the ground. He was extremely clear of what kind of terrifying disaster would be caused when a terrifying species formed into a sufficient number!

These giant insects that appeared in groups were definitely a terrifying species. They seemed to have a clear division of labor, and when they fought, they each had their own role, possessing extremely terrifying destructive power!

Especially their thick shells, which were extremely difficult to break through for cultivators who were used to using cold weapons.

What caused Tang Zhen to feel even more surprised was that he discovered that there seemed to be something similar to the special material in the soil on the outer shell of these giant insects. It could reject the natural energy, causing these insects to possess an "anti-magic" physique!

When the cultivators' skills landed on the bugs, their lethality was reduced by more than half. Some of the giant bugs with thick and deep jackets were almost immune to the energy skills of the cultivators in loucheng!

Since their energy attacks were greatly reduced and the physical attacks of cold weapons couldn't cause effective damage to the giant insect, the cultivators in loucheng city were doomed!

If they couldn't stop and prevent this terrifying monster in time when the disaster broke out, then the result waiting for people would be the same as the ruins in front of them.

Desolation and extinction of living beings. The old land had completely become a paradise for monsters!

However, what exactly was this place that was connected to the world through a special channel? and why was it destroyed by these giant insects?

Tang Zhen's heart was filled with curiosity. He glanced at the cultivators on the ground who were still resisting before turning around and flying toward the depths of the ruins!

.....

Just as Tang Zhen was exploring the depths of the ruins, a large number of giant insects suddenly appeared in other parts of the world where there were entrances and exits. They launched a crazy attack on the cultivators in the building!

They came out of nowhere in the hundreds and thousands, and like well-trained soldiers, they launched a crazy charge at the cultivators in the building!

In such a situation, the first reaction of all the cultivators was to turn around and escape, and then rely on the only exit to block the attack.

There was more than one exit to the outside world, but there was only one entrance from the outside world, and that was the passage outside Spirit Rock City.

As long as they could guard this tunnel, no matter how many monsters there were, they would not be able to break out!

Last time, a large group of monsters had tried to rush out of the tunnel. Spirit Rock City had used this method to successfully block the wave of monsters.

Although the result of the battle had caused quite a number of casualties, compared to the hidden benefits behind the passage, this loss was completely acceptable!

However, the cultivators from Spirit Rock City who wanted to repeat the same trick immediately saw a scene that made them despair. All the entrances and exits had closed at the same time!

The cultivators of Loucheng city, who had no hope of escaping, looked ashen. They looked at the giant insect that was getting closer and closer behind them and suddenly had a strange feeling. It seemed that the monster had deliberately opened this passage and waited for the target to fall into the trap before closing the entrance. Then, they would catch the turtle in the jar!

The cultivators who entered the tower were like fish that fell into the trap. When the net was pulled in, they would not be able to escape!

In an instant, screams rang out from every corner of the world. The struggling cultivators were swallowed by the worms and turned into cold corpses.

There were also many cultivators who did not die but were captured by these giant insects. Then, they were transported to the depths of the ruins with their corpses!

.....

Outside the passageway, a large number of cultivators stood guard outside Spirit Rock City with nervous expressions. At the same time, their eyes were focused on the constantly changing passageway.

Just an hour ago, when all the wild cultivators entered the passage, they found that there seemed to be an abnormal situation in the passage and urgently informed the people in charge of Loucheng.

Almost all the cultivators in Loucheng city were mobilized. They stood guard outside the passage with nervous expressions and all kinds of heavy weapons were aimed in one direction at the same time.

The governor of Spirit Rock City, a King level cultivator in a silver robe, was also staring at the tunnel with a gloomy expression.

“City Lord, why hasn’t anyone returned after such a long time? did something happen again?”

An elder in a blue robe, Lou Cheng, couldn't help but ask suddenly. He also had a worried look on his face.

"It's been so long, there should have been some residents who returned to take over. There shouldn't be no one coming out yet. I think something must have happened inside!"

Another elder from Spirit Rock City sighed and spoke in an annoyed tone.

"Although the monsters in the ruins are very strong, they can't kill more than 10000 cultivators at the same time. As long as there is a slight buffer time, someone will definitely take the opportunity to rush out!

So the biggest possibility is that there's something wrong with the passage again!"

City Lord Ling Yan pondered for a moment and said in a heavy tone.

When the elders heard this, they nodded slightly. At the same time, they began to worry for the cultivators of Spirit Rock City.

After the tunnel had appeared, they had all entered the ruins to explore, and were pleasantly surprised to find that there were an abundance of resources.

As long as he could retrieve it and make use of it, the strength of spirit Rock City would definitely rise to a whole new level!

However, the monsters that occupied the area were too much for the elders to handle. Even though they had the strength of a peak Lord, they couldn't face the siege of dozens of monsters alone.

The giant insects with thick shells were the nightmares of the cultivators in Lou Cheng!

Therefore, if they encountered monsters during their exploration, their first choice was to avoid them immediately instead of fighting them.

However, the closer they got to the center of the ruins, the more monsters there were, and their strength began to increase. The cultivators of Spirit Rock City, who had suffered a lot of casualties, could only choose to build fortifications first, and then slowly explore.

As long as they controlled this passage, this treasure would naturally belong to them forever. Thus, there was no need to rush to explore it.

At the same time, in the process of several explorations, they also encountered situations where the passageway suddenly could not be used. However, it would not take long for the passageway to return to normal.

This time, a similar situation seemed to have occurred, but the closing time seemed to be a little longer? send someone to try to enter the passage and confirm whether the residents inside are safe!

At the Lord's command, a dozen fully-armed cultivators from Spirit Rock City stepped out and walked into the passage.

However, they had only taken a few steps when they were blocked by a huge force, unable to advance any further!

I don't believe it. Get out of the way and let me try!

Under the gazes of thousands of Spirit Rock city's residents, a Lord cultivator roared and rushed toward the tunnel. However, when he touched the invisible barrier, he was still bounced back.

After rolling on the ground a few times, the Lord cultivator looked at the passage with shame and anger.
