

Alternate 1131

[Chapter 1131](#)

1131 the arrival of! powerful enemy

city Lord, we can't wait any longer. We have to open this passage immediately. If the residents inside are attacked by the monsters, our losses will be huge!

Seeing that there was no movement in the passage for a long time, an elder of Lou city looked anxious and shouted to the Lord of Ling Yan city.

Elder Lou Cheng's face was full of anxiety as he spoke. Everyone knew that his two grandsons were in the passage and their fate was unknown. This naturally made him anxious!

Seeing that no one was taking any action, he could not help but make a suggestion.

"Elder Taros, I can understand your feelings, but you must also know that you can not act rashly at this time. Why don't we wait a little longer? perhaps this passage will be usable in a while!"

Another elder of Spirit Rock City raised an objection. However, the two of them were not on good terms, which led to elder Taros thinking that the other party was targeting him. He immediately glared at him.

The conflict between the two sides had escalated because of this matter. If it wasn't for the advice from the people beside them, the two Lou Cheng elders might have directly attacked.

alright, quiet down. What are you all doing? "

Lord Ling Yan snorted and glared at the two elders. Then, he looked up at the huge passage that was still flickering.

I'll go and see the specific situation first. It won't be too late to make a decision after that!

let's go! city Lord Ling Yan said as he flew from the top of the tower to the passage. Then, under the watchful eyes of the residents, he reached out his hand and slowly explored the passage.

When his palm touched the invisible barrier, he immediately increased his strength and pulled at the passage with great force!

The invisible barrier seemed to have turned into something tangible as it was torn apart by city Lord Ling Yan. Then, a crack appeared in front of him, and the world hidden behind it was vaguely revealed.

However, this narrow crack did not last long. As Ling Yan city Lord's power was exhausted, it quickly disappeared.

Sighing, Lord Ling Yan turned to look at the elders behind him and shook his head.

"I can't break the barrier outside this passage by myself, so we can only continue to wait.

Let's hope it'll be like before, and the passageway will quickly return to normal!"

At this moment, the Lord of Ling Yan city was extremely depressed. Originally, he had gathered a large number of wild cultivators in order to build fortifications as soon as possible. Then, Spirit Rock City

would rely on this to speed up the progress of the exploration, hoping to obtain the greatest benefits before the other forces arrived.

This kind of ownerless passage world that was similar to the cornerstone platform mission world was not known for its specific reason, but it was not the first time it had appeared in the battle zone. Moreover, almost every time it appeared, it would attract countless cultivators to fight for it!

Only the powerful Lou Cheng could firmly control it. Otherwise, even if it appeared in front of their own gate, they could only let other strong enemies fight for it.

Seeing that Lord Ling Yan was unable to open the passage, the elders of the tower looked disappointed. Although they wanted to try to break the passage together, they knew that the difference in strength between a Lord and a King was too great. Even if they were to attack, it would not be effective.

However, he was really unwilling to just wait like this!

Just as the elders were at their wits 'end, a burst of arrogant laughter suddenly rang out in their ears. Then, they saw dozens of figures flying over at high speed.

In the distance, on the road leading to Spirit Rock City, there were clouds of dust rising into the sky. Countless cultivators in loucheng were riding on their mounts and rushing towards Spirit Rock City!

When city Lord Ling Yan saw this, his heart sank. The thing he had been most worried about had finally happened.

The other cultivators of Spirit Rock City were also shocked. Without any orders, they raised their weapons and took a defensive stance. Their faces were filled with shame and anger.

These cultivators were so arrogant that they clearly didn't take Spirit Rock City seriously. How could they not be angry?

Spirit Rock City Lord, since you can't open the passage by yourself, why don't you ask us for help? "

A heavily armored King level cultivator, who looked like he weighed a few hundred pounds, stood in front of the Lord of Ling Yan city. He laughed and looked coldly at the passage. Then, he looked at the gloomy Lord of Ling Yan city.

city Lord Ling Yan, it's natural to share the benefits with everyone. It's not fair for you to keep all the benefits to yourself!

Hearing this, the Lord of Spirit Rock City sneered. He said in a disdainful tone, " this is Spirit Rock city's business, so there's no need to trouble the city Lord. Please leave quickly, or don't blame me for being impolite!

"You're welcome? how are you going to be welcome? are you going to fight me?"

Lord man Gu laughed sinisterly. He glanced at the angry Spirit Rock City cultivators and said in a disdainful tone, " if Lord Ling Yan is interested, I can play with you for a while. It's been a long time since I've fought with anyone. My saber is almost rusty!

As soon as city Lord man Gu finished speaking, the cultivators behind him drew their weapons at the same time. They looked at the cultivators of Spirit Rock City around them with malicious eyes and smiled cruelly.

At this moment, the cultivators of the Barbarian Valley City riding on their mounts had also rushed to the vicinity of Spirit Rock City. There were thousands of fully armed barbarian Valley cultivators, and they completely occupied the passage outside Spirit Rock City. All of them unsheathed their swords and looked murderous!

The cultivators of Spirit Rock City immediately became more nervous. They pushed the heavy city defense weapons out of the windows and shot out sharp arrows, aiming at the cultivators on the mounts.

“I’ll say it again, leave immediately, or I won’t be polite!”

The Lord of Ling Yan city took a deep breath and decided to teach these evil guests a lesson. After all, these people were really detestable. They were clearly bullying him!

If he allowed himself to be bullied like this, where would his dignity as the city Lord be?

However, before the Lord of Ling Yan city could give the order, more figures appeared in the sky, each of them exuding a shocking murderous aura!

After seeing this scene, not only did city Lord Ling Yan’s face become even gloomier, but city Lord man Gu, who was standing beside him, also showed an annoyed expression.

“This bunch of shameless guys, they come faster than anyone else when they see benefits!”

After cursing a few times, city Lord man Gu no longer said anything. He just coldly looked at the cultivators falling from the sky and let out a light snort.

In the blink of an eye, hundreds of figures appeared around Lord Ling Yan. There were five King level cultivators and a large number of Lord level cultivators. They were all wearing armor and holding all kinds of weapons in their hands. They were ready to fight at any time.

After they landed, the cultivators of the tower City ignored Lord Ling Yan and looked at the passage with a hint of greed and joy.

sand spirit city, ancient ship city, high mountain City, the city Lords came without an invitation. Could it be that they are all here for this passageway? ”

The Lord of Ling Yan city was silent for a while. He looked at the king level cultivators in front of him and spoke in a cold tone.

“That’s right. We heard that a special passage connecting to another world has appeared here, so we naturally came to take a look. After all, this isn’t a mission world opened by the cornerstone platform. It can be said to be a land without an owner, so why should your Spirit Rock City monopolize it?”

The sand spirit city Lord was wearing a yellow robe, and the sand was covered with strange runes. Fine sand was constantly dancing in the wind where he stood.

His body seemed to be made of yellow sand. As he spoke, the yellow sand kept shaking off, making people's scalps go numb.

The city Lord of ancient boat tower was dressed like a boatman. He was wearing a half-body armor made of fish bones and shells. His exposed skin was covered with muscles, and his strange face looked very similar to a Chinese perch.

The tentacles at the corner of his lips trembled a few times, and he said to the Lord of Ling Yan city in a muffled voice, "Even though this passageway appeared outside your Spirit Rock City, it doesn't mean it belongs to you. We are all reasonable people. As long as you agree to explore it together, we don't have to hurt our relationship.

Besides, even if we were to really fight, your Spirit Rock City wouldn't be a match for us, right?"

...

High mountain City Lord, who was wrapped in a strange beast skin, looked like a Savage. After Gu Chuan city Lord finished speaking, he also looked at Spirit Rock City Lord with a threatening look.

City Lord man Gu crossed his arms and looked like he was watching a good show.

Faced with the pressure of so many powerful enemies, Lord Ling Yan could only swallow his anger, even if he was unwilling.

[Chapter 1132](#)

1132 Forced entry! 1!

"Don't talk nonsense. Let's hurry into the passage. We can talk after we enter!"

let's go! Lord man Gu said impatiently as he looked at the passage. Then, he ignored the gloomy Lord of Spirit Rock City and walked to the passage.

When city Lord Ling Yan and the others saw this, they quickly followed, as if they were afraid that the other party would get the benefits first.

But before anyone could react, city Lord man Gu had already reached out and hit the invisible barrier on the passage. Immediately after, a ripple appeared at the entrance of the passage, accompanied by a black tear.

However, this situation only lasted for a few seconds before it returned to normal.

City Lord man Gu didn't feel embarrassed at all that he couldn't break through the barrier. Instead, he turned to look at the other law Kings and laughed, as expected, it's impossible to enter the interior of this passage alone. Let's all attack together!

The Lord of Ling Yan city snorted and said in a calm tone, "Why don't you wait a little longer? the entrance to the passage might return to normal then. Why waste your energy?"

I have to remind you that if you force your way in, you may encounter unexpected danger!"

Hearing this, city Lord man Gu waved his hand impatiently. you're not trying to scare us on purpose, are you?

I'm telling you, I can't wait to see what's in there. As for whether it's dangerous or not, I'm not afraid!"

After saying this, he turned to the three king level cultivators and said loudly, "God knows how long this passage will last. We'd better hurry up so as not to delay the progress of the exploration.

If you really miss out on something good, then it'll be too late to regret it!"

The three city Lords nodded in unison. They had come here with such a large force specifically for this passage, so they naturally did not want to waste their time.

Therefore, even if they couldn't enter the passage, they had to break it open by force so that they wouldn't waste their time!

Seeing the four King level cultivators gathered at the entrance of the passage, city Lord Ling Yan's eyes flashed with a cold light. He then moved closer.

In fact, he also wanted to go in and see how the residents of his building were doing.

"Everyone, let's work together to reopen this passageway. Then, the five of us will lead a team of ten men each into the passageway. What do you think?"

Sand spirit city's city Lord's strange voice sounded again. No one had any objections, so they each chose ten Lord cultivators to follow.

"Open it!"

As the five King-level cultivators attacked at the same time, the invisible barrier of the passage was torn apart, revealing the world of ruins behind it.

"All of you, get in and hurry up!"

let's go! with Lord man Gu's order, the ten Lord cultivators following him immediately rushed into the passage without any hesitation. Seeing this, the cultivators from the other towers also followed suit.

After all the Lord level cultivators had entered, the five King level cultivators looked at each other and followed.

As soon as city Lord Ling Yan and the others disappeared, the passage was sealed again. Only the cultivators in the five towers remained on guard, waiting for the city Lord to return from the passage.

At this moment, the world that the passage was connected to was deathly silent, as if it had frozen. All sounds had disappeared. The 10,000 cultivators who had entered earlier were nowhere to be seen, not even a trace of blood was left!

Perhaps it was because they had forced their way in, but the five city Lords and their cultivators were not randomly scattered. Instead, they gathered in a huge square.

Wisps of black smoke floated out from the cracks on the ground and formed a thick cloud in the air, making the surroundings appear blurry. Even with Lou Cheng's insane vision, he couldn't see what was hidden behind the black fog.

Unlike the normal entrance, the entrance to the square was not outside the ruins, but in the middle of the ruins. This saved the cultivators a lot of trouble.

Only Lord Ling Yan was surprised when he saw the surrounding scenery, but it quickly disappeared.

"City Lords, are we going to move together or explore separately?"

Ancient ship City Master carried a weapon that looked like an anchor. He scanned the ruins around him and asked with his eyes wide open.

I wonder if you have any good suggestions, Lord Ling Yan. After all, you are the host. You must have explored this place more than once before we arrived, right?"

City Lord man Gu glanced at city Lord Ling Yan, who had a gloomy expression on his face, and asked in a mocking tone.

When the other three city Lords heard this, they looked at city Lord Ling Yan in unison, as if waiting for his answer.

City Lord Ling Yan shook his head and said in a cold tone, "The passage only appeared for a short time, and we have only explored the periphery, so we can't give any useful suggestions!

Besides, would you believe me if I said it?"

City Lord Ling Yan, who did not see any traces of the City Tower's residents, was in a very bad mood at the moment, and his tone was quite unfriendly.

Hearing what city Lord Ling Yan had said, the other four city Lords' expressions showed that they had expected it. Obviously, they did not expect city Lord Ling Yan to give them any useful information.

After all, from the Lord of Spirit Rock city's point of view, the cultivators from the other four towers were evil guests who had come to attack them. He probably hated them to death, so why would he help them?

City Lord man Gu's words were just to annoy city Lord Spirit Rock.

The five towers, including the spirit Rock City, were all level eight towers. The areas they controlled were connected to each other, so there were inevitable conflicts on a daily basis. Now that the four towers had formed an alliance, it was natural for them to take advantage of the situation with words.

As long as they did not go too far, even if Lord Ling Yan was unwilling, he could only choose to swallow his anger.

"Since the Lord of Ling Yan city doesn't have any good suggestions, let's explore separately. The first team to return will wait here, and then we will break the passage and leave together!

If anyone dares to abandon everyone and leave by themselves, they will have to bear the consequences!"

Seeing that no one had any objections, city Lord man Gu immediately waved to his subordinates and took the lead to walk in one direction. Seeing this, the other cultivators no longer delayed and scattered to explore the ruins.

Lord Ling Yan looked at the cultivators from the four cities who had disappeared into the black fog. The killing intent on his face became more and more obvious. After a few seconds of silence, he took out a hand-drawn map from his pocket.

The few explorations in Spirit Rock City had not been a waste of time, and the map in his hands was his greatest gain.

If one looked at the map carefully, they would find that there were many dangerous areas marked on it, and the direction that the cultivators of the four towers were heading towards had all been marked with dangerous areas!

these damn bastards! They're delusional if they want to fight for profits with our Spirit Rock City. When we enter the core area of the ruins, you'll know how dangerous it is!

After sneering, Lord Ling Yan led his ten Lord cultivators into the black fog carefully.

The thing he was most concerned about now was where the residents of his tower had gone. As for city Lord man Gu and the others, whether they could come back alive was a problem!

[Chapter 1133](#)

1133 The strange insect

When city Lord Ling Yan and the others entered, Tang Zhen was standing on top of a tall collapsed building. He was calmly looking at the ruins under his feet.

From the area that could be observed so far, the area of the ruins was extremely large. It looked like a Super City with all kinds of buildings densely packed together.

From the style of the buildings, it was somewhat similar to the medieval style. Many of them were built with bricks and stones, which looked very thick and neat. At the same time, on the remaining walls of these buildings, there were terrifying slash marks everywhere. Many bricks had been cut off by sharp weapons!

It seemed that the giant insect with blade legs could cause such destruction. It was obvious that the destruction of the city had something to do with the giant insect.

After carefully examining them, Tang Zhen confirmed that these buildings were extremely ordinary and were definitely not made of special materials.

Originally, Tang Zhen thought that this place was the remains of a special building. However, he became uncertain after seeing the materials used for these buildings.

If one looked carefully, they could actually find many swords and weapons in the ruins. Even some armors were well-preserved, but there were no remains of corpses, not even a skeleton!

Looking at the traces left behind in the ruins, it was obvious that a tragic war had taken place in the past. It was impossible for there to be no corpses left behind. However, the situation was just so strange. Even with Tang Zhen's powerful mental energy cultivation base, he actually did not find a single corpse!

When he thought of those giant insects that were immune to continuous attacks and that even mental energy scans would have difficulty discovering them, Tang Zhen seemed to already know the direction of these corpses.

Perhaps all the corpses had already been collected by the giant zergs and eventually became their food!

However, the ruins seemed to have existed for a long time. With the huge size of these insects, how long could they last even if there were millions of corpses?

Could it be that they had some kind of special ability that allowed them to survive for countless years without eating or drinking? or could they enter a state similar to dormancy, which was why they could live until now?

Tang Zhen's heart was filled with puzzlement as he swiftly headed toward the center of the ruins. He was anticipating to discover something.

Ten minutes later, Tang Zhen had already arrived at a wide street.

"Swish!"

A soft sound entered his ears. Soon after, a strong wind blew over. Tang Zhen's body twisted slightly, and he saw a black light flash past his side.

His almost tangible spiritual force sealed the surrounding space, and the object that was shot at him was also confined in the air. It was a black bone spike!

He turned his head to look at the location of the sneak attacker, only to see a giant insect with spikes all over its head crawling out from the back of a building. The instant Tang Zhen turned his head, a few more bone spikes shot out in succession.

Naturally, the insect's attack was unable to harm Tang Zhen. He could easily avoid it. However, what made him feel strange was that he had not discovered any signs of the bone spike insect's existence before this!

It was as if this insect had appeared out of thin air and then directly locked onto him to launch an attack!

With a trace of curiosity in his heart, Tang Zhen casually threw out a bone spike, shooting through the sneak attack from the head to the tail!

Without waiting for the insect to die, Tang Zhen quickly rushed over and continuously searched for the possible hiding place of the giant insect. However, after searching for half a day, he could only see a short trace of the insect. He was unable to determine where it had come from.

Just as Tang Zhen was feeling extremely confused, a sense of danger suddenly assaulted him, causing him to teleport and Dodge without the slightest hesitation.

At the moment he dodged, two almost transparent giant worms appeared out of thin air. Their huge blade-like legs slammed into the ground, cutting the bricks and sending them flying.

The two invisible giant worms that missed their target immediately disappeared from Tang Zhen's field of vision. They were like phantoms that could not be found.

Although he couldn't determine the exact level of these two invisible insects, Tang Zhen could conclude that even if a king class cultivator was a little careless, he would suffer a big loss under the sneak attack of these invisible insects!

If a Lord-level cultivator encountered these invisible bugs, they would most likely lose their lives!

The combat strength of the strange insects in this world of ruins seemed to be surprisingly strong. This caused Tang Zhen to be curious. At the same time, a thought also faintly appeared in his heart.

What would happen if these giant bugs were placed on the planet where the teroboros were?

After thinking about the feasibility, Tang Zhen's eyes slightly narrowed. He casually took out a standard rifle used in the Holy Dragon City from his storage ring, aimed at a certain area, and pulled the trigger.

Emerald green liquid splashed out. At the same time, the translucent outline of an invisible giant worm began to twist. Tang Zhen's rifle bullets easily tore its body apart.

Compared to those giant insects with thick shells, these invisible translucent insects were agile and strange, but their physical defense was not that great. The Holy Dragon city's standard rifle could easily kill them!

Of course, the premise of killing these invisible giant worms was to lock onto their hiding position!

As the transparent giant worm was shot to death, the other invisible giant worm was not spared either. It was shot in the head by Tang Zhen three times in a row!

Tang Zhen walked up to the transparent invisible giant worm's corpse and examined it for a while. He then kept the worm's corpse into his storage ring and prepared to leave it for the Holy Dragon city's scientific researchers to use as experimental material.

Although the Holy Dragon City had been sealed, Tang Zhen was confident that he would be able to resolve the crisis of the city being destroyed and restore the Freedom of the City's residents!

However, the three special insects that appeared out of thin air had completely aroused Tang Zhen's interest. He recalled the random teleportation channel to this world and seemed to have thought of something.

The next step would be to see if the sound of his gun could attract more insects!

Tang Zhen's brows slightly furrowed when he thought of this. Soon after, he suddenly looked behind him and opened fire with the rifle in his hand.

A series of bullets shot out and hit a human-shaped black figure that had suddenly appeared. In the end, the black figure was forced to take a few steps back. However, it suddenly leaped up and rapidly pounced toward Tang Zhen's position.

Tang Zhen had already clearly seen the appearance of this black shadow the moment it attacked. It was actually a strange Bugman with six scimitar-like arms and a head that was like a Locust!

The speed of this kind of Bugman was extremely fast. In the blink of an eye, it had already arrived in front of Tang Zhen. Its scimitar-like arm danced with lightning speed and attacked hundreds of times in an instant.

If they were hit by the Bugman's attack, they would probably be turned into a pile of minced meat!

Although this Bugman's attack and movement speed were extremely fast, its target was a law King. If it wasn't for the fact that he wanted to observe it carefully, Tang Zhen would have turned it into a torch long ago.

Tang Zhen easily received the Bugman's attack. Just as he was about to subdue it and study it in detail, he saw the Bugman suddenly open its mouth and emit an attack similar to ultrasonic waves, causing Tang Zhen's eyes to become slightly dazed.

An attack that could affect a law King would definitely pose a huge threat to low-level cultivators. This was obviously another killing move of the bugmen!

After exchanging a few more blows with that Bugman, Tang Zhen had already basically figured out its attack methods. Only then did he casually take out the soul devouring saber and directly cut it to the ground!

Tang Zhen swept a glance at the enormous building that was faintly visible within the black fog in the distance. He then quickly rushed over!

[Chapter 1134](#)

1134 A trap! 1!

"Search carefully, don't miss anything!" He ordered.

let's go! city Lord man Gu shouted to his subordinates and led the way with his saber in hand. At the same time, he constantly scanned the surrounding buildings to prevent any monsters from launching a sneak attack.

Although city Lord man Gu acted like a rough man in front of city Lord Ling Yan and the others, it did not mean that he was brainless. Most of the time, his rough words were just a habitual disguise.

Once they made a wrong judgment because of his words and actions, they would definitely pay a heavy price!

At this time, city Lord man Gu's face was full of vigilance. Even though he had not seen any traces of the monster, he did not relax at all.

"City Lord, there are a large number of weapons scattered on the ground in front of us. They don't look ordinary. Should we go over and take a look?"

One of the cultivators pointed to an area in front of them and reported to city Lord man Gu. City Lord man Gu followed the direction of the finger and saw many swords and sabers on the ground. The seven-colored light they emitted was extremely eye-catching.

“Let’s go and take a look, but be careful!”

After saying this, city Lord man Gu took the lead and walked over. Soon, he arrived at the place where the swords were scattered. However, when he saw the style of the swords, he couldn’t help but be slightly stunned.

No matter what kind of common item it was, it would all have a similar appearance. It was the same for weapons like swords. However, due to the difference in age, there would be some subtle differences.

Unless one had a certain level of understanding in this area, it would be impossible to determine the approximate forging age with a single glance.

However, the rough-looking city Lord brute Valley was an expert in this area. As long as the weapon was held in front of his eyes and he scanned it, he could basically determine the material and age.

It was also because of this ability that he could determine that the weapons on the ground were from different years with just a glance. The difference in time was basically more than a hundred years!

The earliest demonic weapons seemed to be a thousand years old, while the shortest weapons were a hundred years old!

This strange scene filled city Lord man Gu’s heart with doubt. Could it be that in the past thousand years, a group of cultivators had come here every hundred years or so and then left their weapons here?

According to this line of thought, then this group of people were the ones who had entered after a hundred years?

&Nbsp; realizing this, city Lord man Gu’s heart suddenly trembled. Without hesitation, he dodged and retreated, trying to avoid this area that filled him with unease.

“Quickly leave this place, the further the better!”

While retreating, city Lord man Gu also warned his men to leave as soon as possible.

However, just as the city Lord man Gu issued a warning, a giant translucent worm suddenly appeared beside the cultivators who had been following him. It waved its sharp blade-like legs and slashed down!

These translucent invisible insects seemed to have suddenly appeared without any warning. Their attacks were as fast as lightning. Before the cultivators of the loucheng Kingdom could react, their sharp blade-like legs had already landed on their bodies.

“Pfft!”

The sound of a sharp blade cutting through the air could be heard. Of the ten Lords that had entered with city Lord man Gu, six were cut in half, while the other four had barely avoided the fatal sneak attack.

Seeing their companion's body split into two and struggling on the ground, the four Lord cultivators who had just escaped from death let out angry roars and rushed forward with their swords.

However, as soon as they launched their attacks, the invisible bug disappeared. No matter how hard they searched, they couldn't find any trace.

everyone, be careful. The guys who ambushed us must still be nearby. Don't let them succeed again!

The remaining four cultivators looked at each other, their faces filled with fear and wariness. At the same time, they subconsciously looked in the direction of city Lord man Gu. Only then did they discover, to their shock, that city Lord man Gu had already begun fighting with the enemy!

The enemies blocking him were the six-armed black bugmen. There were four of them in total, and they were attacking city Lord man Gu crazily!

Although these bugmen could not use any skills, their speed was extremely fast, and their long and thin blade arms were like divine weapons that could easily cut through gold and iron!

Under the crazy attack of the four bugmen, city Lord man Gu's situation was very critical. He could be hurt by the bugmen if he was not careful!

Seeing that the city Lord was in danger, the four cultivators would not sit by and do nothing. They completely ignored the invisible insects around them and directly rushed toward the clumsy city Lord man Gu.

However, at that moment, the invisible bugs that seized the opportunity appeared at the same time, and their blade-like legs slashed down with a cold light!

On the battlefield of life and death, the enemy would not care about the situation. As long as you revealed a slight flaw, a fatal attack would follow.

With a flash of cold light, the four cultivators of loucheng city who were eager to save their master suddenly stopped and fell to the ground in pieces!

"Damn it!"

The eyes of city Lord man Gu, who was entangled by the four bugmen, immediately turned blood red. Seeing ten of his loyal subordinates die in front of him, he was already furious!

A terrifying aura spread out, and city Lord man Gu's saber was covered in a layer of blood. His body suddenly doubled in size!

As his body grew in size, his appearance also changed rapidly. In just a few breaths, he had become a terrifying monster!

This was a cultivator's skill that could only be used after a monster's blood essence was implanted in the body. The more one looked like a monster, the more powerful the skill would be. looking at city Lord man Gu's current performance, it was clear that he had already cultivated this skill to a very high level. Otherwise, it would be impossible for him to become so close to a monster!

At the same time, city Lord man Gu laughed wildly and punched an Bugman.

The Bugman's abdomen was hit by city Lord man Gu's fist, and its body immediately went limp. Then, city Lord man Gu grabbed it, pulled it in front of him, and bit it.

"Crack!"

A piece of the insectoid's hard shell was gnawed off by city Lord man Gu, and dark green liquid splashed everywhere.

&Nbsp; " die! city Lord man Gu chewed on a piece of Bugman flesh, his face and chest covered in green liquid. At the same time, he roared and split the Bugman in two!

However, just as he was brandishing the two insect carcasses as weapons, the remaining three bugmen launched another attack. Their slender blade-like arms would slash across his body from time to time, cutting him all over.

However, the monster-like city Lord man Gu seemed to have become crazy. He rampaged all the way, making the bugmen not dare to approach easily.

&Nbsp; but just as man Valley charged at another Bugman, who quickly dodged, man Valley, who seemed to have lost control, sneered and disappeared.

It was obvious that he had given up on avenging his subordinates and had chosen to teleport away!

In his opinion, these bugmen weren't King level cultivators, so they couldn't lock on to him at all. As long as he could escape from their encirclement, he would be out of danger.

However, what he didn't see was that after he teleported away, the bugmen and invisible bugs disappeared at the same time. Then, behind the ruins in the distance, city Lord man Gu's frightened and desperate roar suddenly came.

[Chapter 1135](#)

1135 The Sea of Bones "nest _1

When he was approaching the center of the ruins, Tang Zhen was ambushed by dozens of bugmen.

Not only were these bugmen extremely fast, but they also had special abilities. There was even a terrifying poison on their blade arms that would gradually paralyze the body with just a little bit of it.

However, when facing Tang Zhen, these terrifying bugmen didn't have any advantage. They were often split into two by Tang Zhen after two to three exchanges!

The difference in strength between the two wasn't just a little bit!

As for those invisible giant insects and some insects that spat bone spikes and venom, he had killed nearly a hundred of them. As he walked, he was left with the remains of insects.

In the process of killing, Tang Zhen finally discovered the secret of the insects 'silent appearance.

It turned out that these insects were all transported by a mysterious force. Moreover, there was no energy fluctuation during the transmission. This was also the reason why Tang Zhen was unable to discover the insects.

However, as long as these insects appeared, they could forget about hiding from Tang Zhen's senses. The final outcome would be being killed by him with a single slash!

However, Tang Zhen was filled with curiosity towards this special energy that could transport the insects. Therefore, he continuously attracted the insects to appear and took the opportunity to study this special energy.

Tang Zhen's plan had succeeded. In order to get rid of him, the insects kept appearing in waves.

In the end, just as Tang Zhen was about to reach the center of the ruins, the number of bugmen he had killed was simply too many. No matter how he tried to attract the bugmen, there was no reaction.

The bugs seemed to have given up on chasing him and allowed him to approach the center of the ruins!

Tang Zhen tried a few more times. When he saw that those insects were indeed unwilling to appear again, he finally gave up his attempt with an unwilling expression and continued to approach the center of the ruins.

This time, it didn't take long for him to arrive in front of a huge building. He raised his head and looked at it carefully.

The exterior of the building was similar to an ancient palace, and its surface was full of complex and gorgeous decorations. It could be seen that a lot of effort had been put into its construction.

However, the materials used in this building were extremely ordinary items. This caused Tang Zhen to feel extremely disappointed.

Combined with what he had seen and heard along the way, Tang Zhen had reason to believe that this place was extremely similar to the mission world that was opened when the tower was upgraded. It was very likely that there were one or several tower ruins here!

After having this thought in his heart, Tang Zhen had been searching for the possible ruins of the loucheng. However, he did not discover anything along the way.

This result could not help but cause Tang Zhen to be extremely puzzled. Could it be that his speculation was wrong and there was no ruins of loucheng here?

After pondering for a moment, Tang Zhen walked into the building in front of him and quickly disappeared into the darkness.

"Huala"

There was a violent tremor, and the bricks beside the giant building kept falling. Then, huge bugs crawled out from the ruins and gathered around, blocking the exit of the building.

In addition to these giant insects, hundreds of bugmen that Tang Zhen had killed appeared at once. Some of the bugmen looked extremely special. Tang Zhen had never seen them before.

After they appeared, they did not enter the building either. Instead, they stood guard outside with the giant bugs.

If one observed these insects carefully, they would find that they seemed to be full of fear of this building. They definitely did not dare to take a step closer. Their originally emotionless eyes now had a trace of fanaticism.

At this time, the giant building was completely surrounded. Any cultivator who wanted to enter or exit would have to pay a heavy price!

Tang Zhen did not know what was happening outside. Instead, as he went deeper, he was attracted by the strange things inside the building.

At first, he was very curious as to why there were no skeletons in the ruins. However, after entering the building, he realized where the skeletons had gone.

In this giant building, there were piles of bones, so many that they were uncountable!

The bones looked clean and there was no trace of flesh at all. There were also signs of serious corrosion, most likely the excrement after digestion.

In addition to the piles of bones on the ground, there were countless things hanging down from the top of the building. They looked like Dried egg-shaped objects piled together.

They piled up in layers, looking like inverted stalactites, almost touching the bones on the ground.

The space of the building that was dozens of meters tall was completely filled with skeletons and such things. They blocked Tang Zhen's path like the criss-crossed teeth of a dog, causing Tang Zhen to have no choice but to take a detour.

At the same time, an indescribable rancid smell filled the building. He had to take out the underwater breathing insect and cover his mouth and nose to block the smell.

After walking for a distance, Tang Zhen discovered that the Sea of Bones in front of him had started to sink. At the same time, a deep underground passage appeared in front of him.

The bones had been solidified by some kind of mucus, so they did not fall down. As a result, the tunnel was surrounded by pale bones, as if something had directly entered from here!

Tang Zhen glanced at the tunnel and found that a large amount of blood was dripping on the bones. It didn't exist for a long time. Perhaps the cultivators who were killed by the giant insect were dragged into this underground cave.

However, why didn't they find any traces of moving along the way? were the corpses also transported here?

Tang Zhen stared at the entrance of the cave for a few moments before he quickly stepped in.

However, he had just taken a step forward when he saw a large number of green dots of light suddenly appear at the entrance of the cave. They were filled with an ice-cold and cruel intent as they looked at Tang Zhen, who was walking over from a distance.

Tang Zhen's footsteps slightly paused. He raised the soul devouring saber in his hand and did not hesitate to meet the attack.

A series of air-piercing sounds rang out. Soon after, a swarm of insects covered in silver armor that looked like metal poured out swarmed out and rushed in front of Tang Zhen in the blink of an eye.

Tang Zhen's blade slashed out and cut the silver insect at the front. In the end, he was shocked to discover that the insides of this insect's body were no different from metal.

Even with the sharpness of the soul devouring saber and Tang Zhen's terrifying strength, he was only barely able to split open the insect's body. From this, one could see how hard it was!

Moreover, what made Tang Zhen most surprised was that the Black Flame that was constantly present on the soul devouring saber had suddenly disappeared when it came into contact with the insect's body. As a result, the power of the soul devouring saber had been greatly reduced.

If it wasn't for the fact that the soul devouring saber itself was hard enough, it might have been broken by the blow just now!

[Chapter 1136](#)

1136 Bug eggs and food (1)

The silver-white giant insect had a magic resistance attribute that was several times stronger than ordinary insects. No matter what energy was used in the attack, it would disappear when it came into contact with its body.

Just this point alone was enough to make cultivator skills completely ineffective!

In addition, the insect's shell was extremely tough, no less than real metal, which made most of the attacks from the cultivators in the building unable to cause any damage to it.

If a group of cultivators attacked at the same time, only the Lord-tier cultivators could cause slight damage to it. The other low-level cultivators' attacks would only be in vain!

Tang Zhen had no doubt that the appearance of this giant silver worm would immediately cause a disaster anywhere in the world of loucheng. Under the situation where most of the cultivators in the loucheng were helpless, the spread of the giant worm would be unstoppable.

Tang Zhen, who thought of all this, could not help but feel some fear in his heart. It even caused the strength in his attack to increase a little in an attempt to directly kill this scourge!

Although the safety of this war zone had nothing to do with him, Tang Zhen also knew that if the lips were to die, the teeth would be cold. Once this insect spread in the loucheng world, who knew if it would affect him?

Since it was a hidden danger and he had the ability to solve it, he naturally had to eliminate it!

If he couldn't do it, Tang Zhen wouldn't force himself because he was very clear that once a situation that endangered the loucheng world appeared, the cornerstone platform would naturally not stand by and watch.

As for now, it was better to kill these giant silver worms first!

As he swung his saber, the giant silver worms were killed one after another. Their broken bodies scattered on the ground, and silver light flickered on the cross-section of the bodies.

A strange expression flashed across Tang Zhen's heart when he saw this scene during the battle. The speed of his attack suddenly increased by a little.

There were only a few dozen giant silver worms. It seemed like a lot. However, under Tang Zhen's terrifying attack speed, they were all killed in just a few breaths of time!

Fortunately, Tang Zhen was a law King. If it were any other Lou Cheng cultivators fighting the giant silver worm, they would be the ones getting dismembered!

Tang Zhen casually pulled up a section of the insect's leg that had been cut off. After he carefully sized it up, a faint happy expression surfaced on his face.

&Nbsp; it turned out that the insect's body was really made up of a large amount of metal. The main component was the strange material in the soil. It was actually a special metal!

Originally, he was still worried about how to extract the special substance from the soil. In the end, the appearance of these giant silver worms had saved Tang Zhen a lot of trouble. Looking at the silver worm corpses on the ground, Tang Zhen even felt a little regretful. The number of these giant silver worms was a little too little.

With a wave of his hand, he kept the metallic corpses of these giant worms into his storage ring. Tang Zhen's eyes focused as he once again walked toward the deep and serene white bone Cave.

The rancid smell seemed to have become stronger. There was a sticky liquid everywhere along the way, which continued to emit a dark green fluorescent light. Walking in such an environment gave people a strange feeling as if they were walking in the body of some kind of creature.

This time, Tang Zhen had walked for a long time. However, he did not encounter any monster attacks. After he reached the end of the tunnel, a huge underground space appeared in front of him.

Tang Zhen could not help but draw in a breath of cold air as he looked at the underground world that was covered by a dark green light.

From his point of view, there were eggs of various sizes everywhere. They were stuck together by a layer of mucus, looking like small hills!

Next to the 'Hills' of eggs were piles of transparent jelly-like objects, and inside them were cultivators of Lou city with different appearances. They had been frozen in layers of 'jelly' and had lost their life force long ago!

Looking at the eggs that had already hatched and the bones that were being gnawed at, Tang Zhen knew that his previous guess was correct. The cultivators in the building were indeed the prey of the giant insects. Furthermore, they were the food for the newly born insects!

It was likely that the tens of thousands of cultivators that had entered with Tang Zhen earlier had all been killed!

A trace of anger burned in Tang Zhen's heart. Although he was not familiar with these cultivators, one should not forget that there were many survivors from the wilderness War zone among them!

Even though the area of the wilderness War zone was equally vast and Tang Zhen had no interaction with those survivors before, they still had a trace of intimacy with each other since their floors were destroyed and they were in a foreign land.

When they were attacked by the giant worm earlier, if there were survivors from the wilderness Battlefield, Tang Zhen would definitely not stand by and watch. During the process of his exploration, he also had the idea of helping the survivors from the wilderness Battlefield.

However, looking at the current situation, it seemed that it was already too late!

Sighing softly, Tang Zhen walked past the hill of insect eggs and the insect rations and continued to head deeper.

There was not much point in destroying the eggs. The key to solving the problem was to find the culprit.

After walking for another few thousand meters, a dozen giant white flesh worms suddenly appeared among the eggs. They wriggled their fat bodies with great effort, and then, as if they were vomiting, they spat out human-shaped objects one after another from unknown places.

These humanoid figures were the cultivators who had died in battle. At this time, they were all wrapped in the slime secreted by the flesh worm. When they came into contact with the air, the slime that wrapped the bodies immediately turned into transparent "jelly"!

When the cultivator's corpse had accumulated to a certain number, these huge white flesh worms would twist their bodies and go to another pile of eggs, continuing to spit out the cultivator's body parts that had been swallowed.

The body of the White flesh worm that was closest to Tang Zhen had already shrunk by several times after it vomited. After which, it could be seen to swim forward for a distance before finally drilling into an area that was covered by light.

In the blink of an eye, the 30-meter-long flesh worm had disappeared into thin air!

this is the short-distance teleportation used by the mayfly bugs!

Tang Zhen was incomparably surprised when he saw this scene. He was just about to step forward to take a look when he discovered that a white flesh worm that was as big as a round ball had suddenly appeared in the underground space at the spot where the light had enveloped.

Under Tang Zhen's unblinking gaze, the White flesh worm rolled its body and carefully moved to a pile of eggs. It spat out the cultivator's remains that were wrapped in mucus once again!

After seeing this scene, Tang Zhen finally understood why he did not see any traces of the cultivators' remains being moved. It turned out that they were all swallowed by these white flesh worms and then transported back through this method!

Tang Zhen coldly snorted as he rushed over at lightning speed. His soul devouring blade directly slashed at the ball-shaped white giant worm.

bang! the White flesh worm was cut in half. A large amount of mucus wrapped around the broken body parts and splattered in all directions.

The contents of its stomach spilled all over the ground. The White flesh worm immediately turned into shriveled skin. After wriggling on the ground a few times, it completely stopped moving.

Tang Zhen did not plan to let any of the meat worms go. Therefore, after killing one, he immediately rushed to the next one!

After a few breaths, all the flesh worms in his sight were killed. The ground was covered with jelly-like mucus and body pieces. It was a disgusting scene.

Tang Zhen glanced at the hill of insect eggs in front of him, but there were no corpses of cultivators. He had a faint premonition that he was about to meet the creator of these insect eggs!

[Chapter 1137](#)

1137 The giant tumor

Tang Zhen's movement speed involuntarily increased a little as the doubt in his heart was about to be answered. This time around, he had advanced another few thousand meters before he finally saw the target he had been searching for.

In the huge underground space ahead, a huge tumor that was hundreds of meters in size was constantly wriggling forward on the ground. There were pipes dragging on the ground, and fresh eggs were laid from time to time wherever it passed.

The huge underground space seemed to have been opened up by it because Tang Zhen could clearly see that some of the tubes on the sarcoma were constantly spurting out mucus, which melted and diluted the surrounding soil, turning it into a semi-fluid and then being swallowed by it.

In addition to constantly ovulating towards the ground, the giant sarcoma also had a dense honeycomb-like cavity on its body, which also contained a large number of eggs. However, compared to the eggs on the ground, the eggs on these sarcomas were undoubtedly somewhat special.

Tang Zhen guessed that those silver insects had hatched from these special eggs!

In short, the giant blob in front of him looked extremely ugly, exuding a disgusting aura. With just a glance, one would feel a strong disgust from the bottom of their heart.

There was only one thought in Tang Zhen's heart. He wanted to directly charge forward and smash this ugly tumor into pieces!

However, just as Tang Zhen was about to take action, the giant sarcoma seemed to have discovered Tang Zhen's existence. Its huge body suddenly stopped moving. Then, a huge eyeball popped out and was lifted by a Python-like tentacle. It kept approaching Tang Zhen.

Around fifty meters away from Tang Zhen, the huge eyeball that was wrapped in green blood vessels suddenly stopped. After which, it stared at him without blinking.

Tang Zhen only felt a wave of giddiness the instant he was stared at by the eyeball. His blood immediately became ice-cold and everything in his surroundings suddenly disappeared, leaving him alone in the pitch-black space.

Loneliness, fear, uneasiness, and other negative emotions gushed out like a fountain, making him extremely anxious and restless.

Just as he was at a loss, a voice seemed to ring in his ear, telling him to move forward quickly, because this was the only way to leave this dark space!

Immediately after, Tang Zhen saw a door appear in front of him. The door was flickering with white light and there seemed to be a sound coming from behind the door. It was filled with happiness and happiness that caused one to be envious. Just hearing it made one feel extremely happy.

The corner of Tang Zhen's mouth revealed a trace of a smile. He subconsciously wanted to walk forward. However, the instant he lifted his foot, a trace of scorching heat was suddenly transmitted from his chest.

A thread of clarity suddenly appeared in Tang Zhen's dazed eyes. He subconsciously bit the tip of his tongue and emitted a low roar from his mouth.

"Swish!"

The darkness in front of him receded like a tide. Tang Zhen discovered that he was still in the underground space. However, the eyeball that had emerged from the huge blob was already less than three meters away from him!

At this moment, the eyeball was staring at him. Its eyes were filled with evil and greed, as well as the desire to destroy everything!

There were even a few slender tubes flying around the eyeball. The front ends seemed to be extremely sharp. Once Tang Zhen got close, they would quickly Pierce into his body!

Tang Zhen's heart was filled with lingering fear. He didn't expect this giant tumor to be so strange. He was a dignified law King, yet he was almost plotted against and killed by it!

After the lingering fear was a thick Fury. Tang Zhen let out a cold laugh as he casually took out a single-soldier machine gun and directly pulled the trigger at the giant eyeball.

The bullets with terrifying momentum landed on the giant eyeball one after another, causing it to shake violently. At the same time, holes of various sizes appeared on the surface of the giant eyeball, and a dark green, stinky liquid continued to scatter before quickly retreating into the tumor.

Tang Zhen thought in his heart that this was indeed the case after seeing this scene. This giant tumor that was also immune to energy attacks was not even as strong as a King level cultivator. This was because the physical attack of a bullet could easily cause great damage to it!

After discovering this weakness, bombs continuously appeared in Tang Zhen's hands and he threw them ruthlessly at the giant tumor.

These bombs were not simple. Although they were only the size of a grenade, their destructive power was not inferior to that of a large-caliber howitzer.

When the bombs came into contact with the giant blob, a deafening explosion immediately erupted. Then, a terrifying wound was torn open on the surface of the giant blob, and dark green liquid and flesh flew everywhere.

The giant blob seemed to be unable to make a sound, but from its wriggling body, one could tell that it was in extreme pain!

It seemed that Tang Zhen's actions had completely infuriated the giant blob. As it continued to throw bombs, bugmen were continuously teleported over and attacked Tang Zhen crazily.

Tang Zhen sneered as he looked at the densely packed bugmen in the surroundings. The soul devouring saber in his hand was swung out with all his might, killing the bugmen one after another.

At the same time, a liquid-like substance quickly separated from his body and condensed into a human-shaped object, which continued to throw bombs at the giant blob of flesh!

This faceless human-shaped object was the liquid robot that was attached to the surface of Tang Zhen's body!

In the series of explosions, Tang Zhen was responsible for killing and intercepting the bugmen, while the liquid robots were responsible for bombing the giant tumor. For a time, blood and flesh were flying everywhere, causing the entire underground space to be in complete chaos.

The liquid robots were not afraid of the bugmen's swords, and their speed was also extremely fast, so even if they were surrounded and blocked, the bombardment did not stop.

Since these bugmen were not afraid of energy attacks, Tang Zhen did not use any of his cultivation skills. He merely relied on his terrifying strength to fight these bugmen head-on.

Unknowingly, the number of Bugman corpses on the ground increased, and the green flesh and blood piled up on the ground.

Tang Zhen's battle armor was covered in wounds. Many terrifying wounds had also appeared on his body. Fortunately, his body had already started to turn into energy. Therefore, the amount of blood that flowed out was extremely little. Moreover, it was rapidly healing while continuously expelling the poison.

There were only a few bugmen left, and he had killed some of the giant bugs that were teleported over. He estimated that Tang Zhen would be able to clean up all the bugmen in about ten seconds.

He turned to look at the giant tumor that was being bombarded by the bombs, only to find that it was in a mess. Even the teleportation of insects could not help.

Finally, after the liquid robot detonated a few more bombs, the giant blob of flesh that had turned into a pile of rotten flesh finally stopped writhing and was blown to death!

Just as the giant sarcoma died completely, the remaining bugmen all trembled violently. Before Tang Zhen could recover, they madly ran out one after another.

Tang Zhen did not care about the fleeing bugmen. Instead, he slowly walked to the corpse of the giant tumor. With a trace of curiosity on his face, he used the soul devouring blade to pick up a piece of the corpse that was emitting a rancid smell.

When he was fighting, he had accidentally discovered that there seemed to be a huge object inside the giant blob. Now that the giant blob had been killed, he naturally wanted to see what was hidden inside.

It was just that the size of the giant blob was really too big. In addition, it emitted an unpleasant smell. Tang Zhen would have to spend a lot of time to clean it up. However, when he saw the hidden item, he couldn't help but be stunned, and the strange look in his eyes became even stronger.

A house-like object suddenly appeared in front of Tang Zhen's eyes. From the looks of it, it was quite large. The material used to make this object was surprisingly a silver-white metal that had an "anti-magic" attribute.

Tang Zhen's curiosity became more and more intense. He immediately summoned the liquid robot to help and once again sped up the cleaning speed, trying to see the full appearance of this item.

However, Tang Zhen, who was in the underground space, did not know that the moment the giant tumor died, all the passageways outside had been opened. At the same time, a large number of insects began to swarm out.

Behind these insects, many missing cultivators appeared one after another. They walked with strange steps and wore strange smiles as they left the place one after another.

[Chapter 1138](#)

1138 The giant worm is out of the cage _1

Countless insects rushed out, causing the cultivators in charge of defense to turn pale with fright and start to fight back.

Although the cultivators from the other towers were also shocked by the giant insect's ferocity, their city Lords were all in the tunnel, so they did not hesitate to rush over and attack together with the cultivators from Spirit Rock City!

Although the insects' attacks were fierce, the exit was narrow. As long as the tens of thousands of cultivators blocked the exit, there was no need to worry about the insects escaping!

Compared to the last time when the cultivators of Spirit Rock City fought alone, there were many cultivators from other towers this time. With them assisting by the side, the pressure on the cultivators of Spirit Rock City was greatly reduced.

Fortunately, this dangerous situation didn't last long. The giant worm disappeared very quickly. Just as the cultivators heaved a sigh of relief, they saw a group of cultivators from Lou Cheng appear from the passage. They all looked very embarrassed.

Seeing that their companions had escaped, the cultivators blocking the worm naturally wouldn't attack. They quickly let them enter their own camps and asked a few questions with concern.

Most of the people who came out were cultivators from Spirit Rock City. There were a few who followed the five King level cultivators into the city. They were all silent in the face of their companions' questions, as if they had something they couldn't say.

Although the cultivators were inevitably suspicious, the current situation was critical and they couldn't ask for details. They continued to stare at the entrance of the passage and guard against the giant worm's attack.

"BOOM!"

The earth seemed to shake for a moment. Then, everyone was shocked to find that a giant worm the size of a Hill had broken through the passage and was crushing toward the cultivators.

Behind the abdomen of this giant insect, countless insects followed closely, as if they were using it as a protective shield to block the attacks of the cultivators in the building.

The attacks of the Lou Cheng cultivators landed on the giant insect's body, but they were all bounced off by its thick shell and couldn't cause much damage at all. As for energy attacks, they had no effect at all!

When the cultivators saw this, they were shocked. However, they still continued to attack.

Countless weapons were thrown out, and a dark cloud seemed to appear in the sky. Every second, a large number of Spears and sharp arrows fell on the insects' bodies.

However, at this critical moment, the cultivators who had escaped from the corridor earlier all revealed strange smiles and chopped their companions to the ground!

In the blink of an eye, more than 100 cultivators of Loucheng city were ambushed, most of whom were important personnel in charge of commanding the battle!

After cutting down their companions, the cultivators of Loucheng city with strange smiles on their faces began to slash around wildly with a crazed look on their faces. However, someone quickly regained their senses and began to counterattack, cutting him down with a flurry of blades!

At present, there were tens of thousands of cultivators blocking the entrance of the corridor. These hundreds of people couldn't cause much trouble at all. However, after the chaos caused by them, the defensive line was directly affected and the rhythm of the attack was completely disrupted.

The Super giant worm, which was originally struggling to move forward under the concentrated attacks, took this opportunity to increase its speed by a large margin and charged over like a Hill.

When the cultivators on the defensive saw this, their faces were filled with despair and fear. However, none of them retreated and continued to attack.

However, the Super giant worm still managed to withstand the attacks of the cultivators. It crashed into the dense crowd and began to trample continuously. Under its terrifying power, a large number of cultivators were trampled into meat patties almost every second!

The bugs that were hiding under the giant bug's abdomen also swarmed in all directions. Their sharp blade-like legs danced wildly, and blood and remains were constantly sent flying into the air.

The formation of the cultivators blocking the passage was in chaos, and more insects took the opportunity to run out. They quickly covered the ground under their feet like a Black Tide, gradually swallowing the panicked crowd.

Very quickly, there was not a single cultivator left in the open space in front of Spirit Rock City. Instead, it was replaced by a ferocious-looking giant worm!

After a few minutes of silence, more people walked out of the unguarded entrance of the passage.

These people were also cultivators of Lou city. They were covered in blood-soaked armor and looked quite miserable. However, strangely, there was no dejection on their faces at all. Instead, they all had a strange smile on their faces.

Among the cultivators with strange smiles, there were a few figures that stood out. They were the five King level cultivators, including Lord Ling Yan!

However, at this moment, they were just like the other cultivators in Lou Cheng. A strange smile appeared at the corners of their mouths, and when their eyes met, they seemed to be communicating silently.

The open and secret fights that would have happened as long as they met no longer existed at this moment.

“Let’s go our separate ways!”

City Lord Ling Yan stammered out a sentence, then paused for a few seconds. When he opened his mouth again, he was much smoother. wait for the order. Don’t act rashly before the time is right!

Man Gu, the sand spirit, Gu Chuan, and the four city Lords of the towering mountain City all nodded in unison. Then, they led the cultivators who had been killed by the giant insect and strode in different directions.

A terrifying disaster was about to spread across this land.

In the underground space, Tang Zhen had already completely broken open the giant sarcoma, revealing the items hidden inside.

The thing hidden inside the giant blob monster’s body was indeed something that looked very similar to a house. It was covered in strange runes, and the key nodes were inlaid with some kind of crystal, but it had stopped working.

Tang Zhen’s brows could not help but furrow as he glanced at the tentacles attached to the nodes and the electric cable-like objects that extended out of the house.

With his attainments in runes, he could easily determine the function of these runes. They clearly had the function of control and sealing. Tang Zhen even thought of a possibility. It was very likely that the terrifying blob monster was being controlled by the metal house.

To be more precise, he was being controlled by something hidden in the metal house!

A glint flashed across Tang Zhen's eyes. The metal house hidden within the body of the blob monster did not seem to be simple!

If he wanted to know the answer to this question, it was actually very simple. He just had to open the metal house and go in to take a look.

However, when Tang Zhen found the entrance to the house, he discovered that the metal door was actually tightly sealed. The gap between the door was filled with the same metal material. If one wanted to enter, one must use force to break it open!

This small matter was not difficult for Tang Zhen. With his strength, it was an easy task to break this metal house.

Tang Zhen took out the soul devouring knife and stabbed it into the gap of the door. He exerted a little force and easily cut the door down as if he was cutting butter.

"BOOM!"

The door fell heavily to the ground with a dull thud, followed by an indescribable stench.

Tang Zhen held his breath. He frowned as he swept his gaze over the interior of the metal house. After being slightly surprised for a few seconds, a pleasantly surprised expression immediately surfaced on his face.

It turned out that there was a large number of origin stones piled up inside the metal house, and they were all cut into blocks, each the size of a brick!

Without a doubt, this was a fortune that moved even him!

[Chapter 1139](#)

1139 A rare spatial tower

Tang Zhen's mood immediately became much more relaxed when he saw these origin stones.

Tang Zhen's origin stone reserves had long been exhausted. This also caused the phone to enter a dormant state after sealing the Holy Dragon City due to the lack of energy.

Without the help of his phone, Zhen Tang's combat power was greatly reduced. He couldn't do many important things, so he was very helpless.

Therefore, it was extremely important for Tang Zhen to restore the mobile phone's functions. The most crucial point to restore the mobile phone's functions was to absorb and replenish a large number of origin stones!

Originally, the Holy Dragon City still had a lot of origin stones in reserve. However, after the tower was sealed, he could not take them out at all. In desperation, he could only teleport out of the savage wildland and try to collect them through other means.

However, things like origin stones were only circulated among King level cultivators. There would only be a large amount of reserves in the towers of the country. If Tang Zhen wanted to collect them, he could only find a way from these towers.

Forced by the situation, Tang Zhen had no choice but to take a shortcut.

In the end, before Tang Zhen could take action, he unexpectedly obtained an origin stone that filled almost half of the metal house. This was definitely a pleasant surprise for him!

After absorbing these origin stones, the dormant mobile phone would definitely be able to function again, and there might even be a large amount of surplus.

As for the use of these origin stones, Tang Zhen was extremely clear in his heart. They should be the main energy source used to maintain the operation of the runic magic circle. Based on the number of origin stones piled up, it was estimated that it would not be a problem for it to run for a few thousand years!

Who knew which guy was so extravagant as to store so many origin stones in order to maintain the runic magic Circle's operation!

He gave a command in his heart, and the phone on his chest vibrated violently a few times. Then, the origin stones in the metal room decreased rapidly, and it didn't take long for only a thin layer of the ground to be left.

Tang Zhen's heart slightly relaxed as he looked at the mobile phone's interface that had reappeared in front of his eyes. A smile also appeared on the corner of his mouth.

As he walked into the metal house, the things inside were immediately reflected in Tang Zhen's eyes. It turned out that other than the large number of origin stones, there was also a "person" here!

It was not entirely correct to call this guy a human, because other than his head and torso, he did not have any hands or feet. Instead, there were metal wires extending from his body, connecting to the control nodes of the runic magic circle. It looked extremely secure.

It was obvious that Tang Zhen's earlier deduction was extremely accurate. This fellow whose original appearance could no longer be seen was the core of this runic magic circle. It was also in control of the giant tumor.

However, this guy was already dead, because at the back of his head, there was a tentacle that had pierced through the metal house. It had broken, and a large amount of mucus was dripping to the ground.

The real cause of its death was a huge hole in its head. A dead strange insect was lying on it, which should have been in its brain.

Judging from the traces on the body, this guy should have died not long ago.

However, what truly shocked Tang Zhen was that there was actually a foundation stone platform in this room. There was also a Tower Foundation stone that was suspended in the air!

This world of ruins that was filled with terrifying giant worms was actually a special tower!

Tang Zhen was stunned by this unexpected situation. However, his eyes quickly lit up as he recalled the information he had read in the dream city Lord's notes. It seemed to have recorded this kind of special building.

Once the spatial tower was built, it would form a special and independent small world. As the tower continued to upgrade, this independent small world would also continue to expand!

This kind of spatial tower could only be encountered by luck and not sought. In the history of the world of spatial towers, only a few dozen had appeared publicly. As for whether there were other hidden spatial towers, no one knew.

The tower City owned by dream city Master was actually a special type of spatial tower!

The main function of this kind of spatial tower was to provide an independent small world, but after the completion, there would be no buildings inside. If the residents of the tower wanted to live in the house, they had to build it themselves!

Therefore, the ruins of the buildings outside were completely made of ordinary materials by the residents of the City Tower. That was why Tang Zhen did not find any aura related to the buildings in the city.

As for why these buildings were destroyed, it must have something to do with the giant insects!

He walked to the cornerstone platform and took a look. Tang Zhen found that it was still operating normally and had also been recognized by the main control platform of the war zone's cornerstone.

In other words, as long as Tang Zhen had the Resident Identity Card of this tower, he could directly use this cornerstone platform to carry out transactions. However, in order to obtain the highest authority in the entire tower and use the special functions of the space TOWER, he would need the authority of the city Lord.

However, it was not easy to obtain the authority of the city Lord. It required a series of complicated steps, and in the end, one had to obtain the recognition of the cornerstone platform. This was also the reason why there were very few usurps of power in the tower.

Since Tang Zhen was lucky enough to come across this rare spatial tower, he would naturally not miss it. Even if the residents of this tower still existed, he would not hesitate to snatch it!

Fortunately, the residents of the city had been dead for many years and had become a land without a master. This saved Tang Zhen a lot of trouble.

Since he had decided to take this abandoned tower for himself, he must not touch the foundation stone of the tower. He even had to protect it at all costs, because once others knew about the existence of this foundation stone, they would probably rush to snatch it at all costs!

This was because the residents of this City Tower had all died, and before a new master appeared, anyone could take it away!

Tang Zhen involuntarily frowned when he thought of this. This was because the entrance to the outside world was definitely a huge hidden danger. If he wanted to monopolize this tower, he must firmly guard the entrance of the entrance.

Tang Zhen, who thought of this, immediately waved his hand. Over a dozen drones appeared in front of him and flew toward the entrance of the passage according to the instructions.

He waved his hand once again to release the remaining five armed robots and let them participate in the protection work of the passage entrance. Only then did Tang Zhen sigh in relief.

With the protection of the drones and armed robots, he believed that no one would be able to enter this place in a short time. What Tang Zhen needed to do was to speed up and usurp the authority of the city Lord!

If they did not have the main control platform of the savage barren territory, or if the owner of the tower still existed, it would be very difficult to do so. Most cultivators of the tower would choose to take away the foundation stone and let the tower be destroyed!

After all, under normal circumstances, it would be much easier to simply destroy!

“Can you hack into the foundation stone platform here and help me obtain the authority of city Lord Lou?”

Tang Zhen ordered the phone and then quietly waited for its reply.

analyzing that Youyou can forcefully crack the command. Do you want to execute the command? ”

Today’s cell phone had become more and more perfect, which made it much easier for Tang Zhen to operate it. Many things could be done with just one command.

crack it and get it immediately. The faster, the better!

Tang Zhen’s heart was filled with joy as he immediately confirmed the command.

The cell phone immediately started working after receiving the command. Because there was a copy system of the cell phone in the main control platform of the wilderness Warzone, a lot of data could be accessed, which also greatly reduced the difficulty of cracking the code.

Just as the phone began to hack into the building’s foundation platform, Tang Zhen’s gaze turned to a table at the side and landed on a stack of books.

Perhaps he could learn some of the secrets he wanted to know from these dusty books!

[Chapter 1140](#)

1140 the history of the hidden Tower City

The world of loucheng was a very strange place. There were many races here, and they were brave and good at fighting. They had never been afraid of fighting, and because of the special nature of this world, they were very keen on invading other worlds.

One civilization after another was destroyed in their hands, but the cultivators in loucheng didn’t care about their own civilization inheritance.

The scholar class was unheard of in many buildings.

As a result, there were no words in many of the powerful towers. Even so, it did not affect the normal operation of the towers.

In fact, to put it bluntly, loucheng was a cornerstone platform that raised war machines. Everything was based on strength. Loucheng's development needed to rely on strength. Loucheng's strength also needed strength. Even if the next generation could live better, it also relied on strength!

As long as they were strong enough, the cornerstone platform would be able to provide them with everything they wanted!

As for the words on the cornerstone platform, they were directly projected into the mind through a special method. When they saw them, they would understand the specific meaning and didn't need to learn at all. Therefore, the illiterate residents of loucheng could also operate the cornerstone platform skillfully.

The ordinary residents who never left the city had no need to learn how to read.

Therefore, the cultivators in loucheng city were most concerned about improving their strength. As for things like words and cultural inheritance, what was the use of them after mastering them?

Of course, many loucheng attached great importance to inheritances and even had corresponding characters. Most of the residents in the loucheng had mastered this language and used it in all aspects of their lives.

However, such buildings were extremely rare.

As a result, the books in the world of the tower became the strangest kind of item. Some towers attached great importance to them and specially opened up rooms in the tower for storage.

However, most of the Lou chengs didn't care about the books at all. Even if they occasionally got them, they would throw them away like old shoes. Many precious written materials from the wild buildings were ignored by them or used to wipe their butts!

Tang Zhen was already used to this situation. However, as long as he had the opportunity to obtain a book from the tower world, he would not miss the opportunity to read it. In fact, he had even benefited a lot from it.

The books on the table could possibly answer many of the questions in his heart.

Tang Zhen slowly walked in front of the table and carefully used his mental energy to protect the page. He did not want it to immediately shatter upon contact with it because it had been too long.

After brushing off the dust on the surface of the book, the exquisite cover appeared in front of Tang Zhen's eyes. There was a kind of complicated structure of text on it. The writing style looked like the marks left behind by a sword when it cut through the wall.

Because the phone had returned to normal, Tang Zhen didn't have to worry about not being able to interpret this foreign language. After activating the mysterious language cracker, the foreign language on the cover was automatically translated.

[Hidden Tower's history].

As the name suggested, this was a book that recorded the history and major events of the tower. The content recorded in it was what Tang Zhen urgently needed. It could allow him to have a deeper understanding of the space TOWER.

The book slowly opened, and lines of words appeared on the paper. Perhaps it was because of the special paper and ink, and the fact that it was always in a closed environment, that the book remained undamaged even after a long time.

But that faint sense of vicissitudes could not be concealed no matter what!

Tang Zhen finally had a general understanding of this building as he looked at the lines of words that seemed to be dancing.

The founder of this SPACE TOWER was only an ordinary cultivator. Although his level was not very high, he was a resident of a national-level tower.

During an operation to clear the monsters in the controlled area, he accidentally found the remains of a cultivator of the city and obtained a foundation stone of the city from his backpack. At the same time, there were many personal items.

The value of a building foundation varied. However, unless it was a top-grade foundation stone, it wouldn't be able to sell for much.

For example, in the treasure vault of the building where the founder was, there were a lot of abandoned cornerstones with unknown attributes or whose specific attributes had been confirmed.

Therefore, the founder of the foundation stone of the tower didn't take it to heart. However, he didn't hand it over either. Instead, he kept it secretly.

A few years later, this national-level building encountered a strong enemy when it invaded the other world, and its strength was greatly reduced when it was sent back to the building world.

As a result, another hostile National City took the opportunity to launch an attack. They gathered a large number of cultivators and launched a surprise attack, completely destroying the city where the founder was located overnight!

After the fleeing residents of the city avoided the enemy's pursuit, they began to wander in the endless wilderness. They never forgot to rebuild the city and lived a life without drifting.

At this time, the founder was already a Lord-level cultivator and had some savings. At the same time, he had many low-level cultivators as his followers. After wandering for several years, they finally decided to build a city that belonged to them.

At this time, they were far away from the area controlled by the enemy, so they didn't have to worry about being hunted down by the enemy.

Because he had long wanted to build a city, the founder had several carefully selected building cornerstones in his hands. He was prepared to use all his savings to make a big bet, hoping to get an ideal city.

In the end, the few building foundations that he had placed high hopes on were all extremely ordinary buildings with very low development potential. Running such buildings would likely drag him to death!

Not every city Lord was like Tang Zhen, who could use a huge amount of resources to support an ordinary city and promote it to Grade 9 in a very short time. It could be called a miracle in the savage barren war zone!

The disappointed founder was disheartened. Just as he was about to give up on the idea of building a city, he suddenly remembered the cornerstone of the city he had picked up.

In fact, every time the founder recalled this matter, he would be suspicious of the remains of the cultivator, because almost every item that the cultivator had carried back then was of great value.

It was also because of the brain beads he obtained from selling items that he was able to obtain enough resources to advance to the Overlord level.

So, why would the remains of a cultivator with such a great origin, which were all used with precious items, bring an ordinary building cornerstone?

After realizing this, the founder was immediately ecstatic. He took out the last remaining brain bead as a sacrifice and used the cornerstone that had been preserved for many years to build the city.

As a result, this spatial Tower City, which was called the hidden city, became the new home of the founder and his followers.

Although the creator only realized that the spatial tower had its advantages and disadvantages after entering it, the advantages still outweighed the disadvantages!

Due to the unique nature of the dimensional tower, as long as the entrance and exit passage were not opened, there was no need to worry about being discovered by the enemy. It also prevented monsters from harassing them, so the development of the tower was extremely fast.

In just over a hundred years, this spatial Tower City had already taken shape, and its area had expanded several times.

With the death of the space TOWER's founder, the second master of the space TOWER took over. Since there were not many internal and external problems, the level of the space TOWER continued to be upgraded at a steady pace.

Just like that, without anyone realizing it, the tower was upgraded to a national level and began the battle to invade the other world.

It was also from this moment on that disaster had inadvertently befallen the secluded tower. However, by the time it was discovered, it was already too late!
