[Chapter 1141](#)

1141 Terrifying content _1

Tang Zhen slowly put down the hidden world Tower's City history in his hand and glanced at the corpse beside him.

If there were no accidents, this corpse should be the last city Lord of this SPACE TOWER. As for why he ended up in such a state, Tang Zhen would have to continue to find the answer.

After flipping through the remaining books, Tang Zhen picked out a diary-like thing and carefully opened it.

With just a glance, Tang Zhen knew that this was the thing he was looking for.

The owner of the diary had a strange and long name. Tang Zhen was not interested in remembering it. Hence, he called him the master of the hidden city.

This diary recorded the life of the hidden city Lord. At the beginning, it was nothing special, nothing more than the trivial life of a reserve city Lord. In order to protect his safety, the future city Lord never left the space TOWER before taking over.

After all, with the cornerstone platform providing redeemable resources, they could live a self-sufficient life.

Of course, he was not the only one. In fact, many residents of the secluded tower never had the chance to see the outside world in their entire lives. Under the deliberate concealment of the nobles in the tower, they even thought that what they saw was the whole world!

Although they had been deliberately deceived, this was actually not a sad thing. After all, being in the chaotic world of the tower, being able to live a peaceful and happy life was definitely something that countless people could only wish for.

As for the cultivators of the tower who had to go out for their missions, this secret had to be kept strictly. This was to prevent the residents of the tower from being restless and wanting to go to the outside world, which would bring unnecessary danger to the secluded tower.

Being hidden from the world, they were naturally unwilling to have any contact with the outside world. Even though the strength of the secluded Tower City was already quite strong at that time, it still kept a low profile.

Therefore, until the secluded city was upgraded to a national level, many residents still didn't understand the truth of the matter. However, it was no big deal even if they knew now. With the strength of a national level city, the secluded city could definitely suppress all the low-level cities within a radius of ten thousand miles!

The peaceful days would not last forever. During a mission to invade the other world, the secluded tower had encountered a huge crisis.

After they were teleported to the other world by the cornerstone platform, they were surprised to find that this was a very desolate place. Many buildings had been destroyed for a long time, and there seemed to be no traces of living activity at all.

The cultivators in the secluded tower, who thought that they had come to a dead land, began to explore this world. However, they soon made a surprising discovery!

It turned out that there were many deep caves on the surface of this world. After careful exploration, cultivator Lou Cheng unexpectedly found an origin stone mine at the bottom of one of the caves!

This was a real mineral reserve. The huge origin stones condensed into one, looking incomparably huge and shining with a dazzling seven-colored brilliance.

The overjoyed cultivators of the City Tower immediately began to cut the origin stones neatly and then sent them back to the city.

The harvest this time was simply too great. There was no need to calculate in detail to know that these origin stones were enough to exchange for a massive amount of points, allowing the hidden Tower to spend freely for many years!

However, when they were searching for the world's origin source required for the mission, they found no clues at all. It was as if the world's origin power had dissipated.

After careful research by the scholars in Lou Cheng, they confirmed that this world was indeed constantly "dying", which was why there were no living creatures and it looked extremely desolate.

However, such 'dead' worlds would either be completely destroyed or be reborn. No matter what the outcome was, it would take millions of years!

It was very likely that the origin Energy had been snatched away by someone else or dissipated for some other reason, which led to this situation!

After knowing the result, the cultivators in the secluded tower were extremely disappointed. They thought that the harvest this time would be beyond their imagination, but now it seemed that it might not be the case.

If they couldn't complete the origin plundering mission given by the cornerstone platform, they would be punished, and these origin stones couldn't make up for it at all.

Therefore, he was afraid that he would lose money on this mission!

However, the problem was that the cornerstone platform would definitely not go to such great lengths to do something so useless. In that case, there must still be a world origin in this world. It was just that it was hidden so deeply that they had not discovered it!

After realizing this, the secluded tower began to dig three feet underground again. As a result, when the cultivators of the tower entered the ruins of this world, they inadvertently woke up the enemies hidden underground.

Countless giant insects of all shapes and sizes swarmed out of the ruins and attacked the cultivators in the building with all their might.

In the face of a powerful enemy that was dozens of times their number, the cultivators in the secluded tower were forced to retreat. They could only retreat and retreat back into the tower in a sorry state.

Because of the unique concealment of the spatial tower, the giant insects were unable to cause any damage to it, which made the cultivators of the hidden Tower, who had suffered heavy losses, heave a sigh of relief.

The residents of the building, who thought that they could rely on the space TOWER to avoid the bug horde, did not know that the disaster had quietly befallen them.

This time, the disaster didn't come from the outside world, but from the inside of the tower. The space TOWER, which could provide them with protection, couldn't help them this time. Instead, it became an accomplice to the enemy!

At this time, the diary's owner had already become city Lord Lou. He recorded the process of the disaster in detail in the diary, allowing Tang Zhen to see the scene at that time.

"The war mission has been going on for a year, and there are giant insects everywhere outside the passage. They seem to be able to sense the existence of the tower, so they have been lingering at the exit and are unwilling to leave.

It's almost impossible to break through the blockade of these giant worms and continue to collect the world's origin."

"Today, someone told me that there seems to be a problem with the tower's Treasury where the origin stones are stored. A portion of the origin stones suddenly disappeared, but no one has entered the place since the beginning, and the Treasury's door hasn't even moved.

I went to check it out myself and didn't find anything unusual. However, I don't know why, but I have an uneasy feeling in my heart."

everything seems normal recently, but I keep feeling that something is wrong, but I can't put my finger on it.

"Someone came to tell me today that some of the residents in loucheng are acting very strangely. They often lock themselves in their houses, and I don't know what they're doing.

The uneasiness in my heart grew stronger and stronger, so I sent someone to check it out, only to find that they had long disappeared!"

"More and more residents of Lou city have gone missing. It's like they've melted into the air and can't be found no matter how hard we look for them. In the last two days, some cultivators have even started to go missing!

I know that this is definitely not a good thing, so I immediately gathered my subordinates. We must get to the bottom of this matter!"

"During today's discussion, there were a few people who looked at me in a very strange way. They just stared at me, and their smiles were very strange. It even gave me a very strange feeling, as if they had been replaced!

I vaguely guessed a possibility and immediately ran to the treasure room in loucheng. As a result, I saw many residents showing that strange smile on their faces along the way.”

the situation has become extremely bad. It seems that I have to make early preparations!

“Damn it, there’s a terrifying bug in the heads of those dead residents. They were controlled by this bug, which is why they desperately tried to open the passage and let the bugs in!

God knows how many people are controlled by the insects. For the stability of the city, I have to kill them all, no matter how many people die!”

When the diary reached this point, it suddenly became scribbled. It was like a child who had just learned how to write scribbling on paper, but in the end, he still wrote down a sentence.

“Food, reproduction Pixiu”

It was followed by another sentence, and the handwriting returned to its original state, but the content was shocking.

“I’ve been infected by a parasite!”

...

[Chapter 1142](#)

1142 The secret tower’s city Lord’s scheme (1)

Although it was only a simple line of words, Tang Zhen seemed to be able to understand the shock in the heart of the hidden world Tower’s city Lord at that time, as well as the pain and unwillingness!

His hands must have been shaking when he wrote this, or the words wouldn’t have been so distorted.

If the owner of the hidden world Tower was infected by the worm, he would gradually lose his freedom and eventually become the worm’s puppet.

A bug that could control a host’s words and actions would never let go of such an important person. However, as long as they controlled the owner of the hidden world Tower, it was equivalent to completely controlling the entire country.

At that time, he only needed to control the secluded City Master to open the passage and let the insects from the outside in!

After the owner of the secluded tower confirmed that he had been parasitized, he immediately realized that the secluded tower had reached a critical moment of life and death. Perhaps after he was completely controlled, the secluded tower that had been passed down for many years would face its end!

As a King level cultivator and the master of a city, the secluded City Master would never admit defeat so easily. So, he began to think of ways to solve the crisis he was facing.

The next paragraph of text recorded the entire process.

“I know I can’t admit defeat like this, because the future of the hidden world Tower depends on me. I have to find a way to solve this fatal crisis!

Although the bugs in my mind kept trying to control me and create all kinds of illusions, I was able to resist them all. However, my mood became more and more urgent, because I felt that my resistance was getting weaker and weaker.”

“My most trusted maid suddenly told me that she was the one who put the eggs in my food, causing me to become a parasite without me knowing.

Looking at the strange smile on her face and her mocking words, I originally thought that I would kill her in anger, but in the end, I chose to remain silent.

what has happened has already happened. I’m too lazy to do such a cowardly act to vent my anger and let those damn bugs see me as a joke!

Not to mention that I was also responsible for what happened today. If I hadn’t been blinded by the huge wealth, I would have carefully examined the origin stones and discovered the abnormality of these origin stones.

However, I still couldn’t control my hands and feet. In the end, I opened up the maid’s head and began to study the insects that were living inside, trying to find a solution to the problem.”

Tang Zhen nodded his head when he saw this. The hidden city Master had finally realized that there might be a problem with the origin stones. This was because as long as he analyzed the entire process of the incident, he would be able to guess that the insect was definitely hiding within the origin stones.

The cultivators of the secluded tower might have moved an entire hive into the tower!

However, things had developed to this point and it was almost impossible to reverse it. The fate of the secluded tower seemed to have been decided!

However, the secluded City Master was obviously unwilling to admit defeat like this. Instead, before he was controlled by the insects, he began a series of actions. Killing his maid to study the insects was just an insignificant thing, because what he did next was even more brutal.

“Today, I gathered all the infected people in the city, more than 3000 people. Then, I silently watched them being surrounded and killed, and then burned.

Even though this is extremely painful for me, I have no choice but to do this in order to protect the tower!”

“After I washed myself, I thought I was the only one infected in Lou Cheng. I didn’t expect that night, my wife would be sitting on the bed and looking at me with a strange smile.

She told me in a proud tone that the bugs that controlled the people in the building were only the lowest level of the bugs. There was a higher level bug King above them, and all the bugs were under its control!

And that bug King is now in my mind!

Even if I kill all the residents, as long as the king is still in my mind, the parasite will not stop until all the residents are killed!”

I was filled with despair and wanted to give up, but I was unwilling to give up. So, I thought hard for the whole night and finally came up with a solution!

“I’ve ordered people to use the special metal in the space TOWER to create a completely sealed metal house. A large number of runes and magic circles were carved on the outside to isolate the insects” communication channel similar to spiritual power.

After that, I will seal myself in the room and completely isolate myself from the outside world. This way, the bug King will not be able to control the bugs outside. I will also use some special means to prevent myself from opening the corridor again under the situation of not being under control.

Because of the existence of the origin stone, I won’t suffocate to death for a long time.”

Tang Zhen came to a sudden realization when he saw this. No wonder the corpse of the hidden world Tower’s city Lord was firmly fixed to the ground. His limbs had also been completely severed. It seemed like this was most likely the “special technique” of the hidden world city Lord!

The secluded City Master, who knew that he would not be able to escape death, did such a self-destructive action in order to prevent the city from being destroyed by the insects. He was decisive and ruthless!

Tang Zhen was suddenly very interested. He wanted to see what would happen next.

“I walked into the metal house and ordered people to seal the door and bury it underground. Then, I began a long wait.

As long as I don’t leave this metal house, the bug King won’t be able to control the bugs outside. The origin stone, the main culprit, has also been moved in and used as the runic magic Circle’s energy source to imprison the bug King in my body!”

“I don’t know if this will be effective, but I have to do it!”

Tang Zhen shook his head when he saw this and continued reading.

“The bug King in my mind became extremely restless, and I also fell into great pain. I felt my consciousness slowly disappearing.”

Soon, the illegible handwriting appeared on the diary again, with only a few words.

“I’m about to succeed!”

Tang Zhen knew that this wasn’t the hidden world Tower’s city Lord’s handwriting. Although it was indeed written by his body, the one controlling the body at that time was the bug King!

The following words were sometimes messy and sometimes neat. It was as if two people were writing sentence after sentence, and this continued until the last page.

“This is the last time I’m writing down notes. I can’t control my body anymore, so I’m preparing to use my final special means.

I will cut off my hands and feet, firmly fix myself to the ground, and use my body as a cage to imprison the bug King!

However, it was only at this moment that I discovered that the metal house actually had a hidden hole that was connected to the outside. This was clearly the doing of the residents controlled by the bug King!

It's a pity that I don't have the strength to investigate and hold them accountable, I only hope that the secluded tower can safely pass through this tribulation."

The diary ended here. The owner of the hidden city must have cut off his hands and feet, and then fixed himself firmly on the nodes of the runic magic circle with a pre-set hook.

This way, even if he died, he could still imprison the bug King in his body!

However, the hole in the metal house had caused the secluded City master's efforts to go to waste. The thick tube that grew out of the back of his head was probably the bug King's main way of contacting the outside world and controlling the blob monster.

It was even possible that the huge tumor was actually a part of the bug King's body. There was something in the soil of the spatial tower that caused it to undergo a terrifying mutation.

After retaining its ability to control it with its spiritual power, the bug King's body continued to devour the soil and grew in size. At the same time, it began to produce a large number of bug eggs!

In the following days, the residents of the hidden world Tower were all killed by the outbreak of mutated insects. Then, the hidden world Tower was teleported back to the tower world.

The bug King that was living inside the secluded tower's city Lord was lucky enough to escape. It did not turn into a monster, or it had already turned into a monster.

After that, it used some unknown method to open the passage for a period of time every 100 years, attracting cultivators from the outside to enter and then turning them into food for the insects.

...

As for why the bugs didn't leave this place, it was probably because they were under the control of the bug King. Under the situation where the bug King couldn't leave, they couldn't leave either!

The moment Tang Zhen killed the bug King, all the bugs were no longer restricted and naturally swarmed out!

[Chapter 1143](#)

1143 Inheriting a debt

After figuring out the cause and effect of the secluded tower's destruction, many of the questions in Tang Zhen's mind were also solved.

The function of the metal house, the source of the large number of origin stones, and some special functions of the tower were all answered at this moment.

At the same time, he was very satisfied with the special soil in this building. If possible, he was very interested in cultivating a similar bug King.

Of course, the premise was that one had to be able to control the bug King completely. The purpose of breeding it was not to self-destruct, but to try to place it on the planet where the teroboros were located and see if it could cause them some trouble.

Tang Zhen's teeth itched with hatred from the bottom of his heart for this powerful enemy who had almost destroyed the Holy Dragon City and caused the entire Savage war zone to be disqualified!

Because of their scheme, millions of cultivators in Loucheng city were captured. What kind of tragic fate was waiting for them?

Now that Tang Zhen had inherited the main control platform of the wilderness Warzone, he would naturally think of ways to rescue them. At the same time, he would launch the craziest revenge against the torobo people!

After provoking the cultivators of Lou city, the people of terobo were destined to have a hard time eating and sleeping in the future.

He did this to vent his anger and take revenge. He also wanted to obtain the reward from the main control platform to increase his authority and finally control the main control platform. He would then be able to take control of the entire newly built battle zone!

Of course, before that, the first thing Tang Zhen had to do was to take control of this SPACE TOWER and think of a way to resolve the Holy Dragon city's crisis. At the same time, he had to bring back all the cultivators in the tower that had been left in the other world.

There were too many things to do. Tang Zhen was unable to split himself and was in urgent need of a large number of helpers. Bringing back the cultivators who had been left in the other world had become his inevitable choice.

Fortunately, the remaining origin stones should be enough to support him in bringing all the residents back.

Looking at the progress of the cell phone's cracking, Tang Zhen estimated the time and began to wait with peace of mind.

In the blink of an eye, a few days had passed. Due to the appearance of a large number of giant worms, the outside world had begun to become turbulent. Tang Zhen, who was cultivating, also opened his eyes. A bright light flashed in his eyes.

A trace of joy appeared on Tang Zhen's face as he sensed the progress of his cultivation. Perhaps, he would be able to completely grasp the fire law in a short time.

Once he completely mastered the law of fire, Tang Zhen's combat strength would soar several times and completely crush those lower-level law Kings!

At the same time, he could also activate a new law star and master another kind of law power to increase his combat strength again. When the time was right, he would think of ways to find the opportunity to enter the next level!

There were definitely cultivators of a higher level than law Kings. Tang Zhen had already confirmed this.

However, as Tang Zhen's level continued to increase, the original method of relying on killing monsters to increase his level was no longer effective. This was because there were no monsters that had reached the law level in the tower world.

The cornerstone platform allowed the monsters to run amuck in the world of loucheng only to provide a tool for the cultivators in the loucheng to train themselves, not to destroy all the loucheng.

There had to be a limit to tempering Lou Cheng's cultivators, or else it would be looking for trouble for oneself. The cornerstone platform would definitely not do this.

Tang Zhen dared to bet that if a law-level monster really appeared in the world of loucheng, it was estimated that the cornerstone platforms of the major battlefields would issue an order to clear it up as soon as possible and kill it completely at all costs!

Since he couldn't increase his level by killing monsters, Tang Zhen could only rely on his own efforts to climb to a higher level with the help of his phone.

Even so, Tang Zhen still had countless advantages over the other cultivators in Lou Cheng. As long as he continued to cultivate step by step, his future path would be smooth without any accidents!

Taking a deep breath, Tang Zhen turned his eyes to the phone and found that the cracking work had been completed. If there were no accidents, Tang Zhen should have obtained the city Lord's authority of this SPACE TOWER!

However, he was the only commander in this city.

"How's the situation? have you completed the cracking?"

Although Tang Zhen already had an answer in his heart, he still casually asked.

[the hacking is complete. You can now use the castellan's authority. Another reminder, the hidden Tower has been severely punished by the main control platform of this battle zone because it has not participated in the invasion war for many years!]

Tang Zhen suddenly had a bad premonition. He hurriedly asked, "Quickly tell me, what is the punishment?"

The cornerstone platform had never been polite to Lou Cheng who refused to accept the invasion mission. The punishment was also very serious.

Tang Zhen understood this very well. After all, the cornerstone platform had spent a lot of resources to nurture Lou Cheng so that they could plunder the world's origin for him after they had enough strength. Once Lou Cheng refused to carry out the mission, it would mean that all their previous efforts had been in vain.

Towards such an ingrate, the cornerstone platform naturally had to severely punish him to achieve the goal of killing one to warn the others!

During the years when the secluded tower was controlled by the bugs, it still retained the qualifications of a national-level tower. It must have received countless infiltration missions from the cornerstone platform. However, in the situation where only a group of bugs were left in the tower, it would be a miracle if it could accept the mission!

Perhaps with the wisdom of the bug King, it could figure out the twists and turns in this matter. However, because it was imprisoned by the body of the secluded City Master, even if it wanted to usurp the throne and accept the invasion mission, it was simply impossible!

Now that Tang Zhen had become the city Lord of this SPACE TOWER, this debt would have to be borne by him. He couldn't shirk it even if he wanted to, unless he didn't want this SPACE TOWER anymore.

It was impossible. Even if he had to pay a huge price, Tang Zhen would never give up because the space TOWER was too precious and important to Tang Zhen. With its existence, the Holy Dragon city's strength would once again increase by a large margin!

If he were to miss this kind of opportunity that could only be encountered by luck, Tang Zhen would probably regret it for a lifetime.

After the shock, he quickly regained his calmness. Tang Zhen had also thought it through. How could there be so many good things in this world to obtain a rare SPACE TOWER out of thin air without paying any price?

Let's first listen to what the so-called punishment is, and then think of a solution!

due to the fact that the secluded tower has rejected the invasion mission many times, all trading functions of the cornerstone platform have been temporarily suspended. The trading function will only resume when the invasion mission is accepted again.

[the hidden world Tower needs to complete a three-star invasion mission before it can restore its upgrade function. The time limit is 300 years. If the mission is not completed within the time limit, the level of the tower will be reset to zero and it will be restored to the size of a level 1 Tower!]

Tang Zhen was unusually depressed when he saw this. He also felt an endless headache when it came to that three-star invasion mission.

Once the cornerstone platform's mission was marked with a star-class, it meant that every tower could receive it. It was also because of the star-class Mark that it showed that the difficulty of the mission was extremely high.

A one-star Mission was already very dangerous, let alone a three-star Mission. To Tang Zhen, it was no less than hell mode!

Of course, if he was able to successfully complete it, the generous reward he would obtain would definitely cause Tang Zhen to be so happy that he would be unable to close his mouth.

After letting out a long sigh, Tang Zhen once again inquired, "How much time do I have left? can I complete the mission in time?"

The space TOWER was still maintained at a national scale, which meant that the deadline for the mission had not arrived, which was why Tang Zhen asked this question.

[less than ten years left. Due to the high difficulty of the mission, it may take a lot of time. Therefore, it is recommended to accept the mission as soon as possible!]

Tang Zhen softly sighed. His face revealed a helpless expression. However, his eyes became increasingly determined.

Although it was an eventful period with troublesome matters happening one after another, Tang Zhen was extremely clear that as long as they could endure through this most difficult period, what awaited the Holy Dragon City would be an even vaster world!

In the three thousand battlefields of the loucheng world, there would come a day when the Holy Dragon city's name would be known everywhere!

...

[Chapter 1144](#)

1144 Returning to the other world _1

Although there were many 'debts' that he had to bear on the shoulders of the space TOWER, and he had to bear all of them as long as he became the new city Lord, Tang Zhen still chose to accept it without hesitation.

He didn't plan to take away the foundation stone of the tower directly and then go through a long upgrading process until it reached the scale of the current Hidden Tower.

There were too many things to pay in order to upgrade a city to the national level. Tang Zhen had a deep understanding of this. Therefore, he absolutely did not want to try it again.

Tang Zhen silently calculated the remaining time for the mission. After arranging the things that he had to do one by one, he tried to use his authority as the city Lord to close the passage connecting the hidden Tower to the outside world.

Only by completely closing the passage could they truly be at ease. Otherwise, outsiders could enter this place at any time!

Even though Tang Zhen had obtained the authority of the castellan, he had to leave temporarily because he had something to do. If he was invaded by a large number of enemies during this period of time, it was still possible that the foundation stone of the City Tower would be taken away. If that happened, his loss would be huge.

At this moment, following Tang Zhen's order, the seemingly unstable passage entrance closed and contracted at an extremely fast speed. It quickly condensed into a point and then completely disappeared.

The cultivators of Spirit Rock City who were guarding the entrance of the passage immediately reported this matter back. When the Lord of Spirit Rock City heard the news, he only smiled slyly.

.....

As the teleportation light disappeared, Tang Zhen appeared on the land of the other world.

After obtaining the authority of the space TOWER and clearing all the possible hidden dangers and loopholes, Tang Zhen activated the teleportation and arrived in the other world.

Of course, the teleportation function he used was not the kind of plane channel teleportation used by the main control platform, because it consumed too much energy. The main control platform, which had been severely damaged and had not yet recovered, was not able to do this at the moment.

As for the teleportation function of the mobile phone, although it could be used, there was a special restriction. It could only teleport to a special world with the plane coordinates locked by the mobile phone, because the mobile phone only had the plane coordinates of those worlds.

The world that the cultivators in the wilderness Warzone had descended into was an ordinary world, so it was not within the transmission range of the mobile phone at all. Without the plane coordinates, it was impossible to directly teleport.

Just as Tang Zhen was feeling a little troubled, his phone, which rarely took the initiative to help, gave him a suggestion this time. That was to use the main control platform to give him the coordinates of the plane teleportation, and then use the phone to receive it before teleporting.

The only thing Tang Zhen had to do was to obtain the plane coordinates from the main control platform.

It was very easy to do this. He could directly make a request to the main control platform. For the main control platform that once controlled the entire wilderness Warzone, it was not difficult to provide a plane coordinate.

It was just that Tang Zhen had to pay a sufficient amount of points to exchange for it. Even if he was already the person in charge of the main control platform, before he had the authority to do so, he could only obediently pay for whatever he wanted!

With a trace of resentment and heartache, Tang Zhen almost emptied all his points to obtain the valuable plane coordinates from the main control platform.

After secretly cursing “vampire,” Tang Zhen used the mobile phone that had obtained the plane’s coordinates and activated the teleportation function to arrive at the destination.

He scanned his surroundings and saw that it was a scene of desolation. Abandoned junk was piled up on the ground, and a train that had rushed out of the track was lying crookedly in the grass. It had long been dismantled, leaving only its skeleton.

Compared to the last time he had descended, this place was more like a wasteland!

Tang Zhen knew that the occurrence of this situation was definitely related to the loucheng cultivators. This was because the half-mechs had no intention of managing this world. They had never cared about the lives of the indigenous residents. Now, in order to capture the fleeing and hidden loucheng cultivators, they had no scruples in destroying things!

As for the cultivators in the towers that were hidden all over the world, they also did not have any psychological burden of destroying this world. They had strong combat power and strange and fierce means, which made their destruction efficiency extremely amazing!

The world that was originally free of war was now filled with smoke and war!

If one were to look carefully, there were four main forces active in this world. They were the cultivators of loucheng who had escaped and were hiding, the teroboros who had stopped in their tracks, the cyborgs who were controlled by the teroboros, and the members of the resistance organizations of various sizes.

With the 4 forces fighting, the ordinary people caught in the middle were in big trouble. Once they were caught in the flames of war, their homes could be destroyed in a very short time!

“Whoosh!”

A sharp sound was emitted and a bullet flew past Tang Zhen’s side. However, it was firmly fixed in the air when it was a meter away from him.

Tang Zhen turned his head to look in the direction where the bullet came from, only to see more than a dozen indigenous residents darting out from the grass. They were holding large-caliber rifles and locking onto him. At the same time, low growls came from their mouths, indicating to their companions that they must not let Tang Zhen escape.

“Guys, it’s time to get rich. This guy should be worth a lot of money!”

be careful. These cultivators are very powerful. Let’s inform the cyborgs!

don’t worry, boss. I’ve already sent out the notice!

Although the Aboriginals had guns and weapons in their hands, one could tell from their nervous and serious expressions that they obviously knew Tang Zhen’s identity as Lou Cheng’s cultivator and their strength. They couldn’t deal with him with their strength alone.

Therefore, these natives wanted to trap him and then hand him over to the cyborg in exchange for the reward!

Tang Zhen originally wanted to wave his hand and leave. After all, with his status, he disdained to fight with these indigenous people who could be crushed to death with a wave of his hand. However, a thought suddenly appeared in his heart just as he was about to leave.

After the tribesmen captured the cultivators of Lou Cheng, they would not send them away one by one. Instead, they would lock them up and send them away when there were enough.

This time, he was going to lead his people away. If he was going to chase one sheep, he was going to let two sheep go. Why not bring back the cultivators who were trapped in the savage war zone?

Their towers had been destroyed, and they were now purely wild cultivators. On account of their past relationship in the same war zone, as long as they were willing to work for the Holy Dragon City for free, Tang Zhen would be very happy to help them.

Moreover, they all had a common enemy, the terobo people, who had destroyed the wilderness Warzone and made countless cultivators in the loucheng area homeless.

As long as Tang Zhen stood up and took the lead to fight against the torobo people, the loucheng cultivators would probably join the Holy Dragon city’s camp without any hesitation. They would think of a way to rescue the captured loucheng cultivators.

In this way, the ultimate winner would still be Tang Zhen. Not only could he improve his strength and take revenge, but he could also earn points from the main control platform to upgrade his privileges. It was simply a good deal!

When he thought of this, Tang Zhen did not hesitate. He casually waved his hand and the natives that surrounded him fell to the ground one after another. Each of them was knocked unconscious by his mental energy.

After getting rid of these eyesores, Tang Zhen used his phone to call Qian Long's communicator. The call was quickly picked up.

"City Lord, you've come!"

The image of a thousand Dragons appeared, and a hint of surprise could be heard in his voice.

"I just came here and was about to bring you guys back to the world of loucheng. How are you guys doing?"

"Everything's fine. We've been hiding in the cave since you left last time. We took the opportunity to take action a few times and rescued many cultivators from other buildings."

Tang Zhen nodded his head when he heard this. He used an approving tone and said, "You've done well. I was planning to leave with the other cultivators of loucheng, but I'll give you a task now, which is to contact the other cultivators as much as possible.

As long as they agree to be hired by the Holy Dragon City for twenty years, they can leave with them. If they don't agree, you don't have to force yourself!"

Tang Zhen paused for a moment when he spoke until this point. He swept a glance at the vehicle that was speeding over from the distance and said to Qian Long, I have something to deal with now. I think it will take a few days. You just have to wait in peace during this time!

After saying this, Tang Zhen turned off the communicator and turned to look at the cyborgs rushing over in the vehicles. A sinister smile appeared on his face!

...

[Chapter 1145](#)

1145 The top of the bounty list (1)

The twenty or so cyborgs on the off-road combat vehicles that were speeding over had excited expressions as they looked at Tang Zhen's position from a distance.

At this moment, their minds were filled with colorful banknotes flying in the air!

Ever since the end of the last war, the triumphant torobo tribesmen had begun to hunt for the cultivators who had escaped. They had even offered extremely high rewards.

The terobo people distributed items similar to tablets everywhere. They stored the wanted list that they had created after interrogation and screening. The bounty for cultivators of different levels in loucheng varied.

However, even if it was the most ordinary cultivator in Lou Cheng, the reward for capturing him was enough to make one rich overnight!

There were always brave men with great rewards. Although the strength of the cultivators of Lou Cheng made the natives afraid, they still chose to take the risk and began to hunt down the cultivators of Lou Cheng under the stimulation of the high reward.

In this extremely unfavorable environment, the situation of the cultivators in Lou Cheng became more and more difficult.

After all, they were not gods and could be killed by guns and weapons. Moreover, after losing Lou Cheng's support and all kinds of supplies, the combat power of Lou Cheng's cultivators was greatly limited.

As time passed, more and more Lou Cheng cultivators were captured. The natives who caught them did receive a huge reward from the terobo people.

Stimulated by the legends of sudden wealth, more and more natives joined the ranks of the cultivators in Lou city. Even some resistance organizations that opposed the terobo people secretly participated in the capture.

They also needed funds for their activities, and in the eyes of many rebels, the cultivators of Lou Cheng were despicable intruders, just like the terobo people. Therefore, it was reasonable to capture them in exchange for the reward!

As for the cyborgs that were directly controlled by the teroboros, they had expanded once again. Many of them were members of the native Army who had participated in the interception of the cultivators in the city. After the cyborgs suffered heavy losses, they were also recruited and modified.

To put it bluntly, they were just mass-produced cannon fodder, not on the same level as the cyborg Warriors.

The reward order issued by the terobo people was also effective on these cyborgs. The terobo people had even sent out many cyborg capture teams to capture cultivators all over the world.

The half-robots in front of him were members of a small capture team. After receiving the notice, they immediately rushed over.

At this time, they were less than a kilometer away from Tang Zhen. A cyborg impatiently used the equipment to lock onto Tang Zhen and used an extremely fast speed to capture his image for comparison to confirm Tang Zhen's specific bounty price.

A cyborg holding a gun impatiently looked at his companion who was holding an electronic device and asked in an urgent tone, "How is it, brother? do you have any information on this guy? how much is he worth?"

The other people in the carriage also perked up their ears. They were obviously very concerned about this matter. If they really encountered a Lord-level big fish, they would basically be able to live without worries for the rest of their lives.

While everyone was asking, the half-robot that was in charge of confirming Tang Zhen's identity stared at the screen with a face of disbelief. After which, he subconsciously rubbed his eyes that had been modified.

The cyborg glanced at the information displayed on the screen again. He looked up with a blank expression and looked at his anxious companion.

"Tell me, how much is this guy's bounty?"

Seeing that the car was about to approach Tang Zhen, everyone was ready to fight. However, they still urgently needed to know the bounty price of this cultivator in order to determine the other party's combat power.

At this moment, the cyborg who had confirmed Tang Zhen's identity shouted in a near-crazy voice filled with despair, "damn it, he's the number one wanted person on the wanted list, that Holy Dragon City Lord Tang Zhen!"

As soon as he said that, the cyborgs, who were originally full of fighting spirit, immediately fell into a state of shock as if they had been struck by lightning.

An indescribable fear emerged in the cyborgs' hearts, making them feel like they had fallen into an ice cave!

Although cultivators of loucheng were being captured all over the world, most of them were low-level cultivators. Occasionally, they would encounter Lord-level cultivators, and they would need the help of a cyborg at the level of a Regional Inspector to ensure the success of the capture.

If the cultivators in loucheng were stronger, they would not be able to capture him without a large number of people and a certain number of casualties!

Just a few days ago, a heavily injured King-class cultivator had been discovered. The cyborgs had dispatched a large number of combat personnel, and the teroboros had even sent a warship to participate in the battle. Only then did they successfully subdue him.

Although they won in the end, hundreds of androids died in battle. The casualties of the ordinary native soldiers were far beyond imagination!

This King level cultivator was only ranked below 50th on the wanted list, and he was severely injured. From this, it could be seen how powerful Lou Cheng, who was ranked at the top, was!

To be exact, the top 50 cultivators of Lou Cheng were all King level cultivators who had escaped from the battle. They were now hidden all over the world and were the biggest threat to the cyborgs. They were also targets that must be captured.

However, with the strength of King level cultivators, an ordinary hunting team like this wouldn't get rich if they ran into them. They would get themselves killed!

This was especially so for Tang Zhen, who was ranked first. He was someone that all the cyborgs and natives were familiar with. His wanted order had already been posted in every corner of this world.

That long string of bounties attracted countless greedy gazes.

The tribesmen had already given the order that once they discovered Tang Zhen's traces, they must immediately report it without any hesitation. Otherwise, they would be severely punished!

However, ever since the end of the great battle, Tang Zhen's figure had disappeared into thin air. Even the cultivators of the Holy Dragon City had disappeared without a trace. Only the heavens knew where they were hiding.

Never in their wildest dreams did this small capturing team expect that they would actually meet Tang Zhen by accident. This was not a pleasant surprise to them at all. Instead, it was a nightmare!

The leader of the capture team was the first to regain his senses. He shouted at the pilot beside him, "quickly turn around and escape. If we're any slower, we'll be dead!"

After hearing their leader's words, the other cyborgs woke up from their daze and immediately shouted at the same time, urging the pilot to turn around quickly. At the same time, they also issued a warning to their companions who were following closely behind.

The car that was originally rushing towards Tang Zhen suddenly turned around at this moment and returned in the direction it came from.

As they retreated, all the cyborgs looked at Tang Zhen's position with worried expressions. They only heaved a sigh of relief after confirming that he had not continued to chase after them.

immediately inform the headquarters that they have discovered Tang Zhen's traces. Tell them to immediately send experts to assist in the battle. At the same time, dispatch warships to capture him!

After shouting this, the leader of the capture team wanted to add another sentence, but he found that his team members were all looking forward in a daze, their faces full of fear and despair.

His heart trembled, and he immediately had a bad feeling. He subconsciously looked in front of him.

The Holy Dragon City Master, who was like a nightmare in their eyes, had appeared in front of their escape path. He was looking at them with a mocking and cold gaze.

It was like a cat staring at a pitiful mouse that was trying to escape in panic.

The leader of the capturing team also looked desperate. Then, he suddenly shouted with all his might, "Attack immediately! As long as we can hold on until the tribesmen arrive, we can still be saved!

If we don't resist, we'll all die!"

When the frightened cyborgs heard this, they all roared in unison. They stretched their bodies out of the window, aimed at Tang Zhen, and began to pull the trigger.

A dense rain of bullets poured towards Tang Zhen. However, these terrifying bullets, which could penetrate steel plates, suddenly stopped less than a meter away from Tang Zhen. It was as though they were blocked by an invisible wall.

Tang Zhen, who was being attacked, did not move at all. He continued to use a mocking gaze to look at them. It was as if he was looking at a group of pitiful worms struggling in their deathbed.

The despair in the eyes of those half-mechs became even more obvious when they saw that their attacks were ineffective against Tang Zhen. However, what followed was an even more frenzied attack to vent the fear in their hearts.

...

[Chapter 1146](#)

1146 ! flying sword that cuts down! warship

A trace of disdain flashed in Tang Zhen's eyes as he looked at those half-mechs that were like moths flying into the fire and continuously launching attacks at him.

These half-robots looked like a group of fearless bees. Although they did pose a slight threat to humans, they could be easily killed by humans!

Most of the time, the attacks of low-level creatures against high-level creatures were in vain because their strength was not on the same level.

With a slight thought, an invisible protective barrier blocked the flying bullets. Then, his almost solid mental power transformed into a pair of giant hands and threw the speeding car high into the sky.

The cyborg that flew into the sky with the car also fell into despair and could only roar in vain.

With the help of his spiritual power, the car was sent flying more than 20 meters in the air before it fell heavily to the ground.

"BOOM!"

A loud crash was heard, followed by an even louder explosion. Almost all the cyborgs in the cars were knocked unconscious!

A cyborg who was lucky enough not to faint immediately struggled to jump out of the car. He then watched as his unconscious companions were engulfed by the flames!

They were just cyborgs that had undergone simple modifications. After being enveloped by the flames, they would at most die a little slower, but it would be even more painful!

"Ah, Yingluo, I'm going to kill you!"

The captain of the capturing unit, whose entire body was covered in wounds, was the only survivor from earlier. He suddenly turned around in front of the blazing flames and looked at Tang Zhen with a ferocious expression.

However, there was no longer any fear on his face. What was left was only a crazy killing intent and even a trace of faint ridicule. It was as if he was a higher existence and Tang Zhen was just a backward barbarian.

The cyborgs who had become vassals of the teroboros had an indescribable sense of pride in their hearts. It was as if they had already left the race of low-level species and become a high and mighty race.

These cyborgs began to look down on their own kind. They even thought that even the powerful cultivators of Lou Cheng were just pitiful creatures who were running away under their pursuit.

As for the role played by the teroboros people, they deliberately ignored it and simply thought that it was their own credit.

To put it bluntly, these cyborgs had placed the might of the teroboros people on their heads, and then hypnotized themselves into developing a strange mentality.

At this moment, under the stimulation of death, the captain of the capturing team subconsciously revealed this kind of mentality, which also gave him an inexplicable sense of confidence!

So what if he was on the top of the wanted list? under the pursuit of an inescapable net, he still obediently surrendered!

“Hehe, Yingluo, you’re dead. No matter what, you’re dead!”

The captain of the capturing team coldly looked at Tang Zhen as he furiously roared with a slightly malevolent tone. At the same time, a complacent smile appeared on his face.

I’ve already informed the headquarters. They’ll be here in a few minutes. No matter how strong you are, you’ll be killed by us!

As if he could imagine the scene of Tang Zhen being chased and beaten until he was finally killed by the terobo people, the captain of the capturing team couldn’t help but laugh wildly. He looked extremely happy.

Tang Zhen shook his head. He looked at the cyborg Captain who had completely gone crazy under the threat of death. His original intention of interrogating him had disappeared.

He was just a nobody, how would he know the secrets of the tribesmen? the only value of his existence was to attract the reinforcements.

There was a Positioning System in the cyborgs ‘bodies, and the other cyborgs had already been burned to ashes. Therefore, capturing the squad leader was the only coordinate for the terobo people to lock onto this area.

Tang Zhen didn’t have much time, so he could only use this direct method. This way, he could follow the clues and find the place where the terobo people locked up the cultivators in Lou Cheng.

Tang Zhen ignored the captain of the small group who was capturing them. However, the other party seemed to have become more and more excited. He actually did not know what was good for him as he continued to ridicule. His tone was filled with an arrogant tone.

“You’re too noisy!”

Tang Zhen coldly snorted. He casually slapped the captain of the capturing squad onto the ground. After which, he turned around and looked at the light terobo battleship that was speeding over from the distance.

The reaction speed of the torobo people was quite fast. In just a few minutes, they had already arrived. Unfortunately, they did not know that even the heavy warships could not cause much damage to Tang Zhen.

This light warship, which was many times smaller, was even less likely to cause any trouble to Tang Zhen. In fact, in Tang Zhen's eyes, this light warship was already in his pocket!

However, if he wanted to take this light warship under his wing, he would need to do something!

Under the Furious gaze of the squad leader on the ground, Tang Zhen casually pointed at the light battleship. After that, over ten streams of light appeared out of thin air in the sky and caught up with the light battleship at an unbelievable speed.

This was the flying sword that Tang Zhen had summoned. It had the ability to destroy everything. Ever since it was used, it had only failed once. It should be more than enough to deal with the light torobo warships with weak protection!

These summoned Flying Daggers were like a school of tiny man-eating fish, swaying around the huge shark a few times, stabbing into the other party's body in unison, and then rushing out in unison!

After a few repeated attacks, the summoning of the flying sword seemed to have exhausted all its power and finally disappeared.

The light battleship that was speeding toward Tang Zhen seemed to have become drunk at this moment. It continuously swayed in the sky before it rapidly fell toward the ground.

“BOOM!”

A loud crash was heard as the light warship of the terobo tribe crashed into the ground, causing the earth to tremble. From afar, it looked like a skyscraper that was hundreds of stories high, slanted into the ground.

Thick smoke floated out of the warship, and sparks kept flashing at the damaged parts. It seemed that there was no possibility of re-rising.

The leader of the capturing team looked at this scene in shock. As he muttered “impossible”, despair appeared on his face again.

The terobo people, who he thought were extremely powerful, were actually destroyed by Tang Zhen. This had far exceeded his expectations. It was also this terrifying power that filled the heart of the captain of the capturing team, who had already gone mad, with fear once again.

He trembled as he turned his head to look at Tang Zhen. His face was filled with an ingratiating smile. His lips squirmed a few times as if he wanted to beg for mercy. However, he did not make any sound.

do you know why I didn't run? it's because I'm the Hunter, and the torobo people are just prey!

since your companions are already dead, there is no need for you to continue living. You should go and accompany them!

Tang Zhen's voice sounded in his ears. The expression of the captain of the capturing team suddenly changed. Soon after, his body was wrapped by flames that appeared out of thin air. He let out a few miserable cries before turning into charcoal and falling to the ground.

Without even looking at the corpse on the ground, Tang Zhen's figure arrived at the fallen light warship in a few flashes. He quickly found the position of the hatch.

On the surface, this place didn't look any different from any other place. However, Tang Zhen, who had a certain understanding of the terobo warship, knew that he definitely didn't find the wrong place.

When he attacked, he deliberately avoided the position of the power Chamber, or the warship would have become a burning fireball!

Although the battleship had been destroyed by the flying sword, there were nano-level repair robots inside. As long as they had enough time, they could definitely repair the damaged area.

Even if the nanomachines couldn't repair it, he still had his special ability to repair all kinds of items. He could completely restore this light battleship to its original state.

After that, he would pilot the light warship to the place where Lou Cheng's cultivators were imprisoned. After rescuing them, he would use the light warship to transport them away.

...

The next thing to do was to enter the battleship and clear out the remaining enemies. At the same time, he would interrogate the exact location of the cultivators in Lou Cheng and immediately launch the rescue operation.

With Tang Zhen's methods, even if these teroboros people were like a piece of hard rock, he would be able to make them obediently tell him the information he wanted to know!

[Chapter 1147](#)

1147 Successful rescue _1

The cyborg headquarters had long been reduced to ruins after the war.

However, due to the existence of the transit station, the cyborg still chose to build a new stronghold nearby and tried to repair the transit station and put it into use.

However, the transit station had been severely damaged by the Lou Cheng cultivators and could not be repaired in a short time. It would take at least a few years for it to be put into use again.

Fortunately, the most important thing for the tribesmen was to capture the cultivators of loucheng who were in hiding. As for the repair work of the transit station, it was not a big deal if the progress was slightly slower.

In the vicinity of the cleared area, small flying devices would take off and land from time to time. Cars were constantly shuttling back and forth, and teams of cyborgs were going back and forth. The scene seemed to be very busy.

Occasionally, wounded cultivators of loucheng would appear, wearing special torture instruments. They were pushed out of the vehicles by the cyborg soldiers and then staggered toward the depths of the underground.

The cyborg soldiers guarding the place were already used to this scene. They would even look at the cultivators from Lou Cheng with a disdainful and cold gaze whenever they were escorted over.

To the cyborgs, these cultivators were precious prey that were fleeing in all directions. Therefore, every time they caught a cultivator, they would feel a strange sense of excitement, as if they were honored.

There was another roar. The half-robot in charge of guarding looked up and saw a light warship slowly flying over.

Looking at the huge figure of the battleship, the cyborgs were immediately invigorated, and their eyes revealed a trace of anticipation.

There had been news earlier that the cultivator from loucheng city, who was on the wanted list, had been discovered. That was why teroboros had sent light warships to capture him.

He hoped that he could capture city Lord Lou, who had caught the attention of his Masters, and his residents. It should be known that in order to search for the traces of this group of hateful people, the cyborg Warriors had dug three feet deep, but to no avail.

The half-mech who did not do his job well naturally could not avoid being reprimanded by the terobo people. Therefore, he also gritted his teeth in hatred towards Tang Zhen!

Under the gaze of countless eyes, the light warship flew to the sky above the base and would land soon under normal circumstances.

However, for some unknown reason, the light warship refused to land. It just hovered quietly above the base, and no one knew what it was going to do.

Just as everyone was feeling puzzled, a dazzling light suddenly flashed at the bottom of the Starship, making it impossible to look at it directly.

It was also at this moment that the cyborgs on the ground had a drastic change in expression. They knew very well what the dazzling light at the bottom of the warship meant.

run! This is a large-scale bombing!

run! a cyborg officer shouted at the top of his lungs. Then, he ignored the other cyborgs who were at a loss and ran toward the underground tunnel not far away.

He had seen such a large-scale bombing scene before and knew that it would only cause damage to the target on the surface. As long as he hid in an underground bunker, there was a great chance of saving his life.

He was definitely not the only cyborg who knew this, so after realizing that the light warship was about to launch an attack, cyborgs could be seen everywhere, rushing toward the underground building.

However, they were still a step too slow, because the dazzling light had already hit the ground like mercury. Then, under the control of the force field created by the warship, a special metal particle began to move at high speed on the surface.

They were like miniature missiles flying at high speed, constantly hitting back and forth, penetrating anything they encountered on the way!

Because the metal particles were so small that they couldn't be seen with the naked eye, the items didn't seem to have been destroyed. Instead, they seemed to have collapsed and turned into a pile of powder!

The cyborg Warriors who did not Dodge the attack were instantly turned into pools of meat paste, dancing in the air!

With just one strike, there was no longer any living creature on the ground. Everything was turned into dust!

In the dust made of various materials, the light warship quickly landed. Immediately after, the hatch was opened and Tang Zhen's figure slowly walked out.

Tang Zhen's eyes swept across the ground that had been completely cleared. A trace of shock appeared on his face. Even he had no choice but to admit that the weapons of the torobo people were indeed incomparably powerful!

For example, the attack just now would be a Lethal Weapon in a crowded battlefield. It was estimated that not many people could survive such a terrifying attack!

It seemed like it was best not to engage in a direct battle with the teroboros, as that would inevitably cause huge casualties.

The figure of that giant insect flashed in his mind. Tang Zhen seemed to have already made up his mind. At the same time, his footsteps did not stop as he headed straight to the underground space.

The moment they entered the underground space, the surviving cyborg soldiers and automatic defense weapons immediately launched their attacks. The dense barrage of bullets almost completely blocked Tang Zhen's path.

The protective barrier formed by his spiritual power blocked the attack again. Then, a black ball flashed and instantly broke down into countless black magnetic Flying Daggers, flying toward the attackers.

The half-mechs that were attacking Tang Zhen screamed and fell to the ground. Their bodies were pierced by the black magnetic Flying Daggers, and it was almost impossible for them to stand up again.

Tang Zhen didn't stop at all as he walked straight into the depths of the underground space and killed all the cyborg guards he encountered!

Soon after, Tang Zhen saw the soldiers of loucheng who were locked up in the prison with special torture instruments. There were thousands of them in total!

All of them had some minor and some serious injuries on their bodies, and they looked extremely Haggard. Some of the cultivators were even lying on the ground, their serious injuries on the verge of death.

The intense battle had already alarmed them. When Tang Zhen entered the underground space, many cultivators of loucheng city were leaning on the metal railings and constantly peeking out.

When they saw Tang Zhen, who was dressed in armor and looking around, the cultivators in the building were slightly stunned. Then, someone immediately recognized Tang Zhen's identity!

it's the manhuang King! He's here to save us!

hahaha, Qianqian manhuang King indeed lives up to his name. He actually killed his way into the lair of these bastards alone!

Your Excellency manhuang King, please help me save my brother. He can't hold on much longer!

All sorts of voices sounded, causing Tang Zhen to frown.

"All of you shut up. I'll take you away immediately. We'll talk after we get out!"

As soon as his voice fell, the metal doors that imprisoned the cultivators of Lou Cheng made a loud noise at the same time. They were forcibly torn off from the wall by mental power and had long been twisted out of shape.

The cultivators of loucheng who had regained their freedom quickly walked out of their cells and gathered around Tang Zhen. They bowed and thanked him continuously.

Tang Zhen waved his hand and indicated that everyone should leave with him. He then took the lead and walked out.

After everyone arrived on the ground, Tang Zhen motioned for them to board the light warship that was docked. Then, he activated the [all-purpose electronic kit] and controlled the light warship to quickly take off and go straight to the scheduled location!

[Chapter 1148](#)

1148 No other choice _1

Inside the light warship that was flying at high speed, a group of cultivators from loucheng city, who had just regained their freedom, were looking around in a daze, their faces full of curiosity.

They were very curious about the fact that a Maxim King could pilot an enemy's warship, especially when they realized that there was not a single terobo person in the fleet. Their doubts grew.

Although the enclosed space was filled with all kinds of smells, no one was bothered at the moment because the smells from their bodies were nothing compared to the underground prison that held them.

The cultivators were most concerned about where Tang Zhen was taking them and whether they knew the latest news from their respective towers.

After a moment of silence, a King level cultivator stood out and walked towards Tang Zhen under the gazes of all the cultivators.

dear Lord manhuang, please allow me to express my sincerest gratitude. You have given us hope of rebirth when we were at our most desperate!

After saying this, the king level cultivator respectfully bowed to Tang Zhen. His attitude was extremely sincere.

you're welcome. After all, we've fought side by side and we're all cultivators of loucheng in the wilderness War zone!

Tang Zhen said with a smile. After pausing for a moment, he glanced at the cultivators of loucheng who also had a grateful expression on their faces and continued, although the wilderness Warzone no longer exists, I will never admit that it has disappeared. I am still proud to be a cultivator in loucheng city in the wilderness Warzone!

His words had already spread the news of the destruction of the savage barren battlefield to all the cultivators.

Sure enough, the king level cultivator immediately shouted in a terrified voice, " what? what did you say? the wilderness Warzone no longer exists? "

The other cultivators in the building had a look of panic on their faces. The news brought by Tang Zhen had completely washed away their joy of being rescued. They began to feel worried.

The various encounters during this period of time had caused a trace of doubt to rise in their hearts, suspecting that they had fallen into a terrifying conspiracy.

However, because they were in a different world and couldn't contact Lou Cheng, and they were being chased by the terobo people, they didn't have the time to care about all this. Even so, the uneasiness in their hearts grew stronger.

Therefore, when they heard Tang Zhen's words, they did not have the slightest doubt. Instead, they all thought that this was the truth.

A trace of sadness spread in the hearts of the cultivators. They knew very well that no eggs could remain intact when the nest was overturned. The city they were in would not be able to escape this disaster!

Tang Zhen didn't care about the attitude of the king level cultivator. Instead, he revealed a pained expression and slowly said with a trace of grief and indignation, "The terobo people used a scheme to deceive the cornerstone platform and teleported millions of cultivators here. Then, they sent out super warships to deal with us.

At the same time, the cornerstone platform, which was controlled by the teroboros, issued another order to send back all the loucheng who had participated in the Otherworld conquest mission. Another more powerful teroboros fleet also took the opportunity to enter the savage war zone.

They mobilized countless small warships and ground troops to attack all the towers in the entire battle zone. Under this sudden attack, almost none of the towers were spared, and countless residents died in the battle!"

When they heard Tang Zhen's words, some of the cultivators "eyes turned red. Hatred flashed in their eyes as they clenched their fists tightly.

Tang Zhen shook his head at the cultivators of loucheng who were suppressing their anger. He then said in an unwilling tone,"Although the continental Tower from another war zone drove the torobo people away at the critical moment, it was too late. The entire Savage war zone had been turned into scorched earth!

The continent-level turrets from other war zones have announced to all survivors that because too many turrets have been destroyed, the boorish desolate war zone has lost its qualification to exist. Therefore, it has become a wasteland and a place for cultivators from other war zones to advance and train!"

Tang Zhen did not explain in detail what had happened because many things were his personal secrets. How could he let other unrelated people know about it?

However, what he had just said was enough to explain the general course of the incident!

After Tang Zhen finished speaking, the entire Hall of the battleship fell into a dead silence. Many cultivators in the building sat on the ground powerlessly, their eyes filled with confusion.

Loucheng was their home and their spiritual sustenance. Their families also lived there. But now, their city had been destroyed, and their family members might have died in the war. They had suddenly become ownerless souls in the other world, and they didn't know what to do next.

After a long silence, the king level cultivator raised his head and looked at Tang Zhen in a daze. He then said in a hoarse voice, " "Lord manhuang, please forgive my rudeness, but I still want to know, how did you get this information?"

A person's reputation was like the shadow of a tree. The title of "wasteland King" was a well-known golden signboard in the entire war zone. Therefore, no one would doubt that Tang Zhen was deceiving them. Instead, they more or less had some unwillingness and wishful thoughts in their hearts. They hoped that Tang Zhen's words were just hearsay.

Perhaps the real situation was much better than what he had said!

Tang Zhen had naturally guessed everyone's thoughts. Therefore, he did not hesitate and used a certain tone to say, I've seen all these with my own eyes. They could never be altered. As for how I returned to the boorish Theater of Operations, it's my personal secret!

The king-level cultivator finally nodded reluctantly. His body swayed a little before he slowly sat down on the ground.

This was all there was to it!

A cultivator from loucheng city repeatedly muttered the names of his family members with a dazed expression on his face. However, it didn't take long before he suddenly stood up and ran in front of Tang Zhen.

Your Excellency, you said that you can return to the boorish Warzone. Can you bring the others back? "

In the situation where he couldn't use the cornerstone platform to return to his hometown, Tang Zhen, who could return to the loucheng world, immediately became the only hope in the heart of this cultivator.

He couldn't believe that all his family members were dead, so he was eager to return to the wilderness Battlefield and try to find his family members who might have survived.

The other cultivators were stunned when they heard this. They all looked at Tang Zhen with a trace of anticipation on their faces.

Tang Zhen looked at the cultivator from Lou Cheng, who had a pleading expression on his face. After hesitating for a moment, he said in a troubled tone, I can indeed bring people back and forth, but the price is very high. I can help with one or two people, but I can't afford too many people!

Your Excellency, I wonder what kind of price would it take for you to bring us back to the boorish Warzone? "

The king level cultivator who had been paralyzed on the ground stood up again and asked Tang Zhen anxiously.

Tang Zhen gestured for the other party not to be anxious. Then, he looked at the surrounding cultivators and said, the Wildlands Warzone has been completely destroyed by the tribesmen. Although my city has also been attacked, there is still a glimmer of hope for recovery. However, all of you have been completely reduced to wild cultivation.

The world was so big that it would be difficult to find a suitable place to stay!

my Holy Dragon City is willing to open its doors to all of you. As long as you join us, you will enjoy the benefits of an official resident. At the same time, we will help you find your family and take revenge on the torobo people!

As for the cultivators who are unwilling to join, they can also sign a contract with the Holy Dragon City. As long as they serve the Holy Dragon City for twenty years, they can leave freely!"

After stating his conditions, Tang Zhen looked at the cultivators of Lou Cheng who had complicated expressions and said in a cold and stern tone,"I, Tang Zhen, am not a great philanthropist. To those who are unwilling to join Holy Dragon City or sign a contract, I only want to say sorry.

There is a limited number of return passes, and I will not waste them on outsiders unrelated to Holy Dragon City!"

After saying this, Tang Zhen looked at the cultivators in the building without turning his eyes, waiting for them to make their final choice!

[Chapter 1149](#)

1149 The price of the return pass _1

Tang Zhen gave these cultivators two choices. They could either join the Holy Dragon City and obtain the qualification to return to the city, or they could stay in this world and continue to hide from the torobo people.

Although this method was a bit unreasonable, in the world of Lou Cheng where the strong preyed on the weak, this method was very normal!

The determined cultivators of Loucheng wouldn't be sad because of the death of those who had nothing to do with them. They also understood that they had to pay for what they had obtained.

Therefore, after hearing Tang Zhen's request, all the cultivators were only stunned for a moment before they regained their calm.

Your Excellency manhuang King, may I ask if you will truly avenge your fallen brothers and declare war on the terobo people? "

A three-meter-tall, muscular cultivator with dense scars all over his body pushed the crowd aside and walked in front of Tang Zhen. He asked in an extremely serious tone.

Although he was only a two stars feudal lord, he wasn't the slightest bit timid in front of Tang Zhen. His eyes would occasionally flash with anticipation and fanaticism.

I can tell you clearly that as long as the time is right, I will immediately invade the teroboros and make them pay the most painful price!

Tang Zhen looked at the ogre-like foreign race cultivator in front of him and spoke with a certain tone.

When the cultivator from Lou Cheng heard this, he gently nodded his head and knelt down on one knee in front of Tang Zhen. His right hand pressed on his chest and his head drooped down.

Gu Qi, a cultivator from nurwa city, is willing to join Holy Dragon City. He hopes that one day, he can follow the city Lord and bathe the trobo people in blood!

After the cultivator named Gu Qi swore his allegiance, the other wounded cultivators half-knelt on the ground one after another, uttering the names of themselves and the Loucheng they had once lived in, and at the same time swearing to join the Holy Dragon City.

Some of the cultivators in Loucheng who were still hesitating also expressed that they could sign a contract with the Holy Dragon City to fight for the Holy Dragon City for twenty years!

None of the cultivators of Lou Cheng chose to stay because they knew very well that staying in this world was equivalent to waiting for death. If they missed this opportunity, they would never be able to return to their hometown!

Tang Zhen gently waved his hand at the cultivators, signaling them to stand up. A faint smile appeared on his face at the same time.

With the addition of these cultivators, the Holy Dragon city's strength would undoubtedly increase greatly. This was undoubtedly a happy thing for Tang Zhen, who had the task of rebuilding the war zone.

He had a faint trace of anticipation in his heart. He wondered how many cultivators Qian Long and the others had gathered and what kind of strength they had.

.....

The light warship's flying speed was extremely fast, and it only took about an hour to land in the mountain range where Qian Long and the others were hiding.

When Tang Zhen led the rescued loucheng cultivators out of the light warship, they immediately saw the Holy Dragon City cultivators all over the valley. They were all wearing the same black armor and occupied every corner of the valley. They all let out deafening cheers!

Qian Long and the others stood at the forefront, looking at their legendary city Lord with fanatical expressions. Smiles appeared on almost all of their faces.

Although they had suffered an unprecedented setback, the Holy Dragon city's cultivators still maintained high morale because of Tang Zhen's existence. It was a sharp contrast to the dejected foreign tribe cultivators.

Tang Zhen smiled at the crowd. However, his gaze landed not far away. This was because there were many foreign tribe cultivators standing there. Compared to the cheering Holy Dragon City cultivators, their faces were filled with bitter smiles.

After conversing with Qian Long and the others, Tang Zhen walked to the front of the foreign race cultivators and smiled at the leader, Blood River King, we meet again!

King Blood River, who was wearing a native costume, sighed helplessly. He said with a hint of unwillingness, " Lord manhuang, I have decided to fight for Holy Dragon City for twenty years in exchange for a place to return. I hope you will take care of me in the future!

As a law King, he needed the help of others to return to the world of loucheng, and he had to give up 20 years of freedom. It was absolutely nonsense to say that Blood River King was willing.

However, he did not have much of a choice. As long as he stayed here, he would have to face the pursuit of the torobo people. He was not afraid, but he had to think for the people of the tower.

Therefore, after receiving the thousand Dragons 'notice, Blood River King only hesitated for a moment before immediately agreeing to the Holy Dragon city's conditions. He brought the residents of Lou city and other foreign cultivators who had submitted to him to wait here.

In addition to Blood River King's Group, there were many cultivators from other towers. There were more than 20000 people in total.

They also agreed to the Holy Dragon city's conditions and decided to join the Holy Dragon City or accept a 20-year battle contract.

In this way, the total number of cultivators in Lou city who were going to be teleported was close to 50000, which was definitely not a small number. However, compared to the millions of cultivators that were teleported over, this number was only a fraction.

After the Great War, other than the two million cultivators of loucheng who were captured by the tribesmen, the rest of the cultivators of loucheng were scattered all over the world, hiding in unknown corners.

As time passed, the number of cultivators in the building would continue to decrease and eventually disappear from this world!

Of course, there was also a possibility that they could survive and breed after escaping capture. They could then gradually integrate into this world and eventually become a new race, or even replace them as the new master of this world!

Tang Zhen would not give up on these cultivators, so he decided to leave some men behind and let them continue to gather the scattered soldiers. He would strive to let them join the Holy Dragon City and make preparations for the establishment of a new war zone in the future.

After everything was properly arranged, Tang Zhen immediately gathered his men and began to arrange a one-time auxiliary array.

With the assistance of such a runic magic circle, the efficiency of transportation would be greatly increased. It would also greatly reduce the waste of origin stones, allowing Tang Zhen to not be too embarrassed.

With the assistance of the Holy Dragon City cultivators and the Holy Masters from the other buildings, the runic magic circle was built at an extremely fast speed. By the time Tang Zhen finished explaining the plan for this world, the runic magic circle was already completely completed.

It was also at this moment that the drone sent a warning that a large number of androids were speeding toward them. There were at least tens of thousands of them!

everyone, hurry up and surround the runic magic circle. When you see the light rise, jump in immediately. But remember not to fight for it. You must wait for the people in front to enter before you act!

After roaring a few times, Tang Zhen activated the teleportation function on his mobile phone. Then, a dazzling light appeared in the valley, followed by a huge pillar of light that soared into the sky.

The beam of light seemed to have pierced through the clear sky, and a huge vortex appeared, as if it had pierced a terrifying hole in the sky!

The aura from the world of loucheng once again appeared in this world, causing the weather to change!

After seeing the light pillar, the cultivators around the runic magic circle jumped into it without hesitation. Then, they followed the light pillar and went against the flow, directly into the huge vortex!

Wave after wave of Lou Cheng cultivators jumped into the light screen without any interval. The number of people left in the valley was getting smaller and smaller.

Tang Zhen watched as the cultivators left to carry out the recruitment plan. Then, he looked at the aggressive cyborgs through the map view and sneered as he opened the mobile application.

In an instant, countless meteorites fell from the sky and landed in the cyborg Army, setting off a wave of death.

[Chapter 1150](#)

1150 Perfection in fire-elemental laws of nature

The burning meteorites fell from the sky, and the flames almost dyed the sky completely red. It was as if a furnace of molten steel had been poured over and poured down on his face.

The vast land seemed to be completely covered by these scorching meteorites. No matter where they went, they would be affected, and there was no place to hide!

The cyborg warrior on the ground looked at this scene in a daze. After hesitating for a few seconds, he immediately screamed in horror and fled in all directions.

They were just cyborgs that had undergone simple modifications. Although their comprehensive combat power was far beyond that of ordinary people, in the face of such a terrifying natural disaster, their bodies, which were buried under the skin with special alloy nets, were simply vulnerable!

If he wanted to save his life, the only way was to run as fast as he could!

However, the meteorites summoned by Tang Zhen were completely different from the meteorites that occasionally broke into the atmosphere. Not only were they faster, but they were also more concentrated and had an extremely shocking destructive effect!

Fortunately, these meteorites weren't too large in size. Otherwise, the power they produced would be no less than a nuclear bomb, and might even be much more powerful!

As the first meteorite hit the ground, the area where the cyborg Army was located made a terrible noise. The earth shook violently, and countless cyborgs and chariots were lifted into the sky. The moving targets on the ground fell to the ground in droves, and their bodies immediately burst into flames.

A huge, shocking pit appeared on the flat ground, and this was only the beginning.

The meteorites fell one after another, smashing the ground into a thousand holes. Most of the cyborgs within the attack range had fallen to the ground and could not stand up again. Those who could barely walk had completely turned into fireballs!

The modified bodies gave the cyborgs a stronger life force, but at this moment, they were suffering more pain. Many of the cyborgs were burned to ashes in their semi-conscious state!

A cyborg officer shouted and commanded his troops to run on the ground in an attempt to escape from this terrifying area. However, under the continuous meteorite attacks, the long team was cut into pieces. In the end, only the tank he was driving was left.

The cyborg officer's eyes turned red when he saw the vehicle his soldiers were in being hit by the meteorite and disappearing without a trace. He almost broke the steering wheel of the vehicle.

"Bang!"

With a muffled sound, the speeding chariot suddenly fell into a deep pit, and its head directly fell into it, unable to move forward.

The cyborg officer nimbly jumped out of the tank, completely ignoring the injuries on his body. He covered his mouth and nose and ran for his life.

He could already see the hope of escaping, because less than a thousand meters away from him, he was not attacked by a single meteorite. It was as if they were two completely different worlds!

As long as he could escape to that position, he would definitely be safe!

With the support of his will to survive, the cyborg commander burst out with a speed that even he dared not imagine. In the blink of an eye, he had rushed out of the hellish sea of fire and then staggered and fell to the ground.

After panting heavily for a long time, the cyborg officer finally got up from the ground and turned to look at the area behind him.

The meteorites had stopped, and what replaced them was black smoke. The ground was full of burning wreckage, but no one could be seen.

The cyborg Army, which had a total of nearly 100000 people, was almost wiped out by this terrifying attack. Such a terrible loss was definitely beyond everyone's expectations!

The cyborg officer looked at this scene in a daze. His body trembled continuously, and his bloody face was completely filled with fear and despair.

He knew very well that this was not a natural disaster, but a man-made disaster!

The group of monstrous intruders in his eyes actually had such a terrifying ability. The 100000 and a half fully armed robot warriors were completely destroyed without even seeing the enemy!

After a long silence, the cyborg officer stood up from the ground and tried to find his surviving comrades.

However, he had only taken a few steps when he suddenly stopped and looked at the area in front of him in shock. His legs could not help but tremble.

In the billowing smoke that soared to the sky, a young man in battle armor was walking out. Wherever he passed, the flames and smoke would automatically make way for him, as if he was welcoming the arrival of a Monarch!

If one observed carefully, they would discover that various extremely realistic fire creatures would appear from time to time, reveling wantonly in this land filled with death and despair!

He seemed to have realized something as he suddenly stopped in his tracks. He stood in the sea of fire and thick smoke. From afar, he looked like a demonic god from the Asura hell. It was a terrifying sight!

A strange aura slowly emerged from the young man's body, which made people mistakenly think that he was a creature made of fire, as if he could fuse with the surrounding sea of fire at any time.

The cyborg officer looked at this scene in a daze. He didn't know what had happened to this young man, but he had a hunch that this seemingly familiar young man was getting stronger and stronger.

Wait a minute, the other party's appearance was indeed very familiar. It seemed to be Yingluo.

A trace of doubt appeared on the cyborg officer's face. Then, as if he had thought of something, his body trembled even more violently, and his eyes flashed with deep despair.

He finally remembered the young man's background. He knew that the young man was the number one enemy wanted by the terobo people, the strongest cultivator in the city of Lou, who they had to capture at all costs!

Tang Zhen, the Holy Dragon city's city Lord, the core figure among the millions of cultivators in the city.

Whether it was shutting down the transit station, ambushing the terobo fleet, or destroying the energy-absorbing device, all of them were related to him.

He was the one who had successfully led his men to escape from the pursuit of millions of teroboros, and it was also because of him that tens of thousands of teroboros's ground combatants had died!

Almost every cyborg was familiar with Lou Cheng, who was on the wanted list. However, the cyborg officer did not expect him to be so terrifying!

This terrifying meteor attack finally allowed him to witness the fearsomeness of the cultivators of Loucheng. He also began to doubt whether the tribesmen would be able to win.

At the same time, he was also very clear that if the other party wanted to kill him, it would be as easy as blowing off dust. So even if he turned around and ran, it would be in vain!

Just as the cyborg officer was waiting for the judgment of fate, Tang Zhen, who was in the sea of fire, slowly turned his head and glanced at him with an ice-cold gaze.

The cyborg officer felt as if he had fallen into an ice cave, and he closed his eyes in despair.

However, the death he had imagined did not come. Instead, a cold voice rang out in his ears. Every word that rang out made his soul tremble.

I'm in a good mood today, so I'll spare your life. However, I need you to tell the tribesmen that I'll be visiting their world soon and bring death and slaughter with me!

Tang Zhen's figure disappeared after his voice sounded.

The cyborg officer nodded subconsciously. Then, his body went soft and he knelt on the ground as if he had lost his mind!
