

Alternate 1151

[Chapter 1151](#)

1151 A new plan against the world of loucheng

After the dimensional gateway disappeared, Tang Zhen walked toward the ruins of the building in the distance.

Tens of thousands of cultivators who had just returned from the other world were gathered in an open space in the ruins. They were patiently waiting for Tang Zhen's return.

Most of them had a trace of doubt on their faces, not knowing where they were. Some of them even keenly discovered that this world actually had a boundary.

This situation was very familiar to them, and it reminded them of the mission world that they went to when they advanced to the next level. Therefore, the cultivators suspected that they were not in the world of loucheng, but in an area similar to the overseas land.

However, there were still many differences between this place and the small world of the mission, so the cultivators in Lou Cheng couldn't be sure if their guess was correct.

Fortunately, Tang Zhen would give them a clear answer. It was useless to think too much.

Walking among the cultivators, Tang Zhen smiled and said, you must be very confused. Where have I brought you? "

After everyone nodded, he continued to explain with a smile, " "This is actually a national-level city, but for some reason, it has been turned into ruins. I have now obtained the authority of the city Lord!

I'm sure you've already realized that this is actually a small sealed world with only one exit that can be opened and closed at any time!"

Upon hearing Tang Zhen's words, Blood River King seemed to have thought of something. His brows furrowed slightly before he revealed an expression of sudden enlightenment. At the same time, he spoke in a shocked tone, city Lord Tang, this tower of yours isn't a SPACE TOWER, is it? "

After the cultivators at the side heard this sentence, they were slightly stunned at first. Then, they all revealed shocked expressions and looked at Tang Zhen with envy and disbelief.

Almost all the cultivators had some understanding of the legendary SPACE TOWER. It was for this reason that they knew how precious a SPACE TOWER was!

This kind of legendary city that could only be encountered but not sought had actually been discovered by Tang Zhen and obtained the city Lord's authority. This indeed made people extremely envious!

Fortunately, as a citizen of Holy Dragon City, he could share this joy. Therefore, the jealousy only flashed past him for a moment, and all that was left was endless joy and relief.

As for the foreign cultivators, their emotions were a lot more complicated, and some of them even had other thoughts.

However, even if someone had evil intentions, they would first have to consider their own strength and see if they could take control of the spatial tower from the hands of a law King.

Tang Zhen was extremely confident in this. Unless an enemy was unbelievably powerful and could kill him in an instant, no one could snatch the city Lord's authority from his hands!

Due to the previous enlightenment by chance, he had already completely grasped the fire-elemental laws, and his strength had also obtained a substantial increase.

If he were to fight against a law King like the Blood River King, Tang Zhen would be confident of completely defeating him in a few rounds!

It could be said that the current Tang Zhen truly had the qualifications to look down on everyone!

Tang Zhen did not hide anything when he saw everyone staring at him and waiting for him to give an answer. He merely nodded his head gently.

Excited roars came from the cultivators of the Holy Dragon City. Their faces were filled with surprise because they all knew what a spatial tower meant.

As long as it didn't get involved in a war to invade the other world, the spatial tower would not be threatened by any external forces. Even if the tower was destroyed, it could only be from within!

It could be said that with the protection of the space TOWER, the safety of the Holy Dragon City would increase again. This was naturally good news for the residents of the tower!

Blood River King and the other foreign race cultivators sighed repeatedly as they envied Tang Zhen's good luck.

"Alright, everyone. I believe that everyone has already seen that this place is now in ruins. If you want to live here, you will have to clean it up.

The construction of the houses will be done by me and the selected Holy Masters. Your task is to clean up the debris and collect all the valuable items. At the same time, try to capture and collect all the bugs you encounter!"

Although the space TOWER was good, the insect that could live in the brain made Tang Zhen very vigilant. Although when the king insect was killed, almost all the insects that got rid of the restraints rushed out of the space TOWER, there were still fish that escaped the net.

Once the king beetle reappeared and spread, it would undoubtedly be a terrifying disaster for the Holy Dragon City!

Fortunately, as long as it was a resident of the Holy Dragon City, he could monitor them through his mobile phone. He could determine whether the other party had been parasitized, and then treat them immediately!

Of course, Tang Zhen would not passively wait for the insect to attack. Instead, he would take the initiative to capture and domesticate it, turning it into a weapon of war in his hands!

As for those foreign cultivators who had signed the contract, as long as their strength did not exceed Tang Zhen's, they would never have the possibility of breaking the contract. Otherwise, the punishment that awaited them would be so painful that they would wish for death!

After the tasks were assigned, the cultivators got busy.

Tang Zhen, Qian Long, and the others chatted for a while longer before they found a hidden corner and activated the teleportation to return to their original world.

.....

Ever since the tribesmen launched an attack on the wilderness, the teleportation work between the original world and the tower world had been temporarily suspended. Many transmigrators who were far away from Holy Dragon City were caught in the flames of war, and their souls were teleported back to their original world as they died in battle.

The dozens of soul teleportation arrays in the original world were immediately crushed. The well-preserved bodies were taken out one by one and returned to their respective bodies.

The original world also began to understand everything that had happened in the wilderness.

It was because of this change that a large number of investments in the original world went down the drain, causing many financial groups to suffer huge losses.

However, compared to the gains from the world of Loucheng, this loss was nothing, especially after they saw the powerful technology of Terobo, which piqued their interest.

As long as they had this technology, the original world could quickly start the interstellar era and explore the worlds around the inhabited planets.

Compared to the distant world of Loucheng, this path seemed to be more suitable for the original world.

It was a pity that Tang Zhen refused to show himself. This caused the representatives of those large factions to anxiously wait for him. They were afraid that something would happen to Tang Zhen, causing this new path of human development to be completely cut off!

Therefore, when Tang Zhen appeared in the original world, it immediately caused a huge shock. Planes of all sizes from all over the original world landed in the military airport of the desert tower of the Asian Alliance.

Those representatives hurriedly rushed down from the plane. They impatiently requested to meet Tang Zhen and discuss the various problems regarding the Loucheng world.

Tang Zhen did not disappoint them. He quickly met them in the conference room. After which, everyone calmed down and discussed in detail.

The purpose of his return this time was to get the help of these guys. Even the matter of dealing with the Teroboros people would require the support of his original world.

First, he gave a general account of the savage wildland. Then, he told everyone that he was in a new Warzone with more resources. As long as the original world wanted to develop it, he would spare no effort in supporting it!

The forces in the original world would not give up on such a good opportunity, so they decided to send a large number of people to the world of loucheng without any hesitation.

However, this time, they were not in a hurry to fight for territory to avoid unnecessary losses. As long as they mastered the technology of the terobo people, they would not lack land to live in their original world.

Therefore, the major forces decided to join the Holy Dragon City as support personnel. They were responsible for the battle and the collection of various rare resources, which would then be brought back to the original world by Tang Zhen.

When the time was right, the plan to colonize other worlds would be launched again. After all, no one wanted to give up this huge piece of fat meat.

At the same time, the various resources that Tang Zhen needed would be provided by these factions to ensure that there would be no delays.

...

In this way, both sides had gained something and were happy!

[Chapter 1152](#)

1152 The difference between the two worlds (1)

Tang Zhen's return to his original world this time was actually to borrow the strength of his original world to officially carry out his series of plans!

The fact that the Holy Dragon City could develop so quickly was definitely inseparable from the support of the original world. Without the supply of resources from the original world, the Holy Dragon City might even be destroyed by the attacks of crazy monsters the moment it was built!

After the Holy Dragon city's post-war reconstruction this time, the original world had become Tang Zhen's largest logistics base. It was estimated that for a long time in the future, Tang Zhen would have to play the role of a Porter again.

Although he managed the Holy Dragon City in the tower world, Tang Zhen had never neglected the development of the original world.

While he obtained resources from his original world, he was also constantly returning them to his original world. Various items from the loucheng world, as well as the scientific and technological information that he had worked hard to collect, were also continuously flowing into his original world through Tang Zhen.

Because of the things that Tang Zhen had brought, the original world had undergone earth-shaking changes. Life had become more convenient and interesting. The topics of people's attention had also begun to extend from this planet to the distant other world.

Many people had a feeling that the entire world had changed overnight!

Since the soul transfer array had been officially activated, millions of original world residents had entered the world of loucheng, which made them no longer unfamiliar with it. They even regarded it as an indispensable part of their lives.

This time, the changes in the wilderness Warzone immediately attracted the attention of the residents of the original world. Every piece of latest information related to the loucheng world would be commented and viewed by countless people.

This situation was quite advantageous to Tang Zhen. As long as he obtained the support of the major forces and most of the original world's residents, many problems would be solved.

If he recruited the residents of the city again, countless people would respond, and their quality would be greatly improved. It would not be like the first recruitment, which required careful planning and could only be done in the backward areas of the original world.

There were basically no major problems in the original world. What he really needed to pay attention to was the world of loucheng.

Although the original world could not be compared to the world of loucheng in terms of area and the number of Intelligent Lives, the level of technology and potential for development in the original world were definitely not comparable to the world of loucheng.

The two worlds' development patterns had no similarities at all. In fact, they were completely opposite.

The main purpose of the world of loucheng was to invade and plunder. Other than improving their own combat power, they had no interest in creation and development. As a result, after countless years of development, they were still used to using cold weapons in battle.

In the end, in the battle with terobo, even though the cultivators of Lou Cheng had the advantage in strength and numbers, they were still defeated by terobo Bo. This also proved that cold weapons were no match for technological weapons, even with the magical abilities of the cultivators of Lou Cheng!

Tang Zhen believed that in the past years, the cultivators in the city had encountered similar battles more than once. However, what was shocking was that no city seemed to have taken this as a warning!

In fact, it wasn't entirely because the cultivators of loucheng city were complacent, but because of the overlapping of various reasons, which eventually led to this situation.

Even the cornerstone platform would never sell any items related to technology. It was not only the wilderness Warzone that was like this, but also the other warzones.

This was obviously the deliberate intention of the cornerstone platform. Its main purpose should be to avoid the cultivators of loucheng from coming into contact with these things as much as possible, so that they could master powerful technological means.

According to the information he currently had, Tang Zhen could basically confirm that the cornerstone platform was actually a special technological item. However, it was completely different from the existing technological system.

Tang Zhen was more willing to believe that this was a super technology that had combined with a mysterious power. This was why it possessed so many strange and mysterious abilities!

However, this technology obviously had its own drawbacks. The main control platform of the wilderness Warzone had been invaded by the teroborians. This was the most obvious example. Especially after the seemingly omnipotent cornerstone platform was invaded, it could not resist at all and was easily controlled in the end.

Even Tang Zhen's mobile phone had successfully hacked into the main control platform and took over the main control platform by chance. There were no restrictions on the promotion of permissions!

However, through this matter, Tang Zhen also felt a sense of crisis.

If the teroboros were to repeat the same trick and invade the main control platforms of other battlefields, who knew if they would face the same crisis as the wilderness battlefields?

Tang Zhen had once considered whether to find a way to inform the other battle platforms of this matter so that they could make early preparations. However, doing so would require taking a great risk.

If other people knew that he had obtained the main control platform of the wilderness Warzone and that he could even completely control it one day, then Tang Zhen would have to face the cross-Warzone pursuit from countless powerful cities!

Even those continent-level buildings would not miss such an opportunity to continue to develop and grow.

After asking the main control platform, Tang Zhen found out a lot of information that he had never known before, including the possibility that Lou Cheng might have obtained the highest authority.

No matter how developed the loucheng was, the access to the platform was always a threshold. Even the continent-level loucheng, which had obtained countless military achievements, could only obtain the highest access of the intermediate level!

Do not underestimate this intermediate authority, because the meaning it represented was definitely not simple.

When they obtained true intermediate authority, these loucheng were qualified to participate in some of the rules of the cornerstone platform. At the same time, these loucheng with intermediate authority also formed the Alliance Elder Council of the war zone and gave instructions on many things in the world of the loucheng.

Although many turrets were not convinced, they could only swallow their anger because of the continent-level turrets behind the elders Guild and the fact that they could indeed affect the operation of the cornerstone platform.

It could be said that the Alliance of elders formed by the intermediate towers was the other ruling class of the world of towers. It was a huge force!

If the intermediate authority was already so powerful, then the attraction of the cornerstone platform's highest authority would be enough to drive all the cultivators in loucheng crazy!

If Tang Zhen were to expose the secret that he might obtain the highest authority of the main control platform in the future, the elders Guild of the war zone would be the first to not let him off!

Although he already had perfect control over the fire law, he was not arrogant enough to think that he and the Holy Dragon City alone could resist this behemoth.

However, there were two sides to everything. Even though the elders Guild was overbearing and dangerous, they were extremely powerful. Tang Zhen really wanted to use this sharp blade to deal a fatal blow to torobo!

Tang Zhen and the tribesmen were bound to have a battle. However, taking revenge did not mean acting rashly. He was very clear that with the current strength of the Holy Dragon City, they were not the tribesmen's match.

It was possible to cause a small-scale chaos, but it was impossible to completely defeat them!

If he could pull in the Alliance of elders and make them his thugs, then the success rate of this plan would greatly increase.

As for how to use the power of these towers to attack the terobo people, he still needed to plan carefully.

[Chapter 1153](#)

1153 An item that makes one's heart race (1)

The meeting was still going on, and many problems were raised by both sides. They would then be discussed and resolved. For these conference participants who represented the power of the country, there were not many things that could stump them.

This was the strength of the original world and the huge potential it had!

No matter how developed the Holy Dragon City was, Tang Zhen would never give up on the cooperation with the original world. As the original world's strength continued to improve, the help that the Holy Dragon City would receive would also increase.

Because there weren't many conflicts of interest, the cooperation between the two sides could last for a long time.

The meeting went on for more than half a day, and the results were satisfactory. The various forces' representatives then hurriedly returned to prepare for the next operation.

Tang Zhen contacted Xu Feng and the rest to deal with the accumulated matters. After that, he headed to the next location to meet with a group of scientific research experts that had been urgently gathered.

Inside a huge laboratory, top experts of all skin colors were gathered and waiting for Tang Zhen's arrival.

Although their time was extremely precious, they still rushed to the desert tower at an extremely fast speed after being urgently called up. Firstly, it was because they could not refuse such a call, and secondly, it was related to Tang Zhen himself.

Everyone knew Tang Zhen's identity. These scientific research experts were extremely interested in a matter that even Tang Zhen couldn't solve and had even asked for help.

As for the reason why Tang Zhen had gathered these research experts, it was to solve the crisis that Holy Dragon City was facing. Once the two-dimensional seal was removed, Holy Dragon City would immediately be destroyed by the energy light pillar that fell from the sky!

The entire process took less than three seconds. It could be said that as long as Tang Zhen released the seal, the Holy Dragon City would completely disappear before his eyes!

This matter concerned the lives of hundreds of thousands of Loucheng residents, including the foundation of Loucheng that he had worked hard to build. Therefore, Tang Zhen didn't dare to be the slightest bit careless. He had to ensure that nothing went wrong before he could remove the special seal on the mobile phone.

He only had one chance. Therefore, Tang Zhen must succeed!

He described the situation that the Holy Dragon City was facing in detail. Then, Tang Zhen took out a large number of video materials for the researchers to analyze.

In order to let the research experts have a physical contact, Tang Zhen even released a slightly damaged small Terobo people battleship so that the research experts could operate it directly and accurately evaluate the destructive power of the energy light beam.

Only after confirming the true power of the energy weapon could he come up with a reasonable plan to ensure that there would be no mistakes!

This small warship had come from the invasion of the savage war zone. After the tribesmen retreated, this warship that had been shot down by the residents of Holy Dragon City had been kept by Tang Zhen.

As for the large warships that were destroyed by the continent-level tower, Tang Zhen's storage space could not store them, so he could only leave them there for the time being. When there was a need, he would return to the savage wildland to retrieve or even repair them!

Tang Zhen had originally planned to use the mobile phone app to repair the small warship in front of him. However, ever since he obtained the light warship, he had temporarily given up on this plan.

After a series of unforeseen events, the origin stones in Tang Zhen's hands were already running out. As a result, he had no choice but to carefully calculate and absolutely did not dare to waste a single bit.

Right now, they needed to resolve the Holy Dragon city's crisis, and these small warships carried similar weapons, so he took them out directly and let the researchers test them with real objects.

Even though it was a small battleship, it took up almost half of the parking lot in front of the laboratory. When the researchers saw the battleship, their eyes immediately lit up and they almost jumped up in excitement.

The researchers immediately rushed forward and surrounded him, sizing him up.

After obtaining Tang Zhen's permission, these researchers immediately boarded the battleship and began to study it with full concentration. They did not miss any inch of the area as if they were facing a rare treasure.

Unexpectedly, the commotion that Tang Zhen caused was really too big. After the small warship was taken out, a large number of soldiers immediately appeared and completely sealed off the surrounding area, preventing any unrelated people from entering.

If not for Tang Zhen's thoughts, the researchers from the other Alliance forces might have even been expelled to ensure that the secrets of the warship would not be leaked.

Although the various forces in the original world were temporarily cooperating because of Tang Zhen, the fights in the open and in the dark had never stopped. After all, no one wanted to fall behind.

This small battleship was the first heavyweight item that Tang Zhen had taken out. Although it was only for the researchers to study, it was obvious that the Asian Alliance was tempted by the battleship!

Tang Zhen didn't show any dissatisfaction when he saw this. Instead, he boarded the warship and patiently explained to the researchers. He even informed the military of the Asian Alliance and conducted a test fire in the desert!

After the research experts reluctantly walked out of the small battleship, Tang Zhen took out a piece of silver metal that was a specialty of the space TOWER. He reckoned that this special material that could greatly nullify energy attacks should be of some help in solving the Holy Dragon city's crisis.

After understanding the specific situation, these scientific researchers who had outstanding achievements in their respective fields immediately began to work together.

The threat caused by technological weapons naturally had to be removed using scientific methods. Tang Zhen was extremely certain of this point.

Plans were formulated one after another, but they were immediately rejected by experts. Tang Zhen estimated that it would take a long time to get the answers he wanted.

This was still under the circumstances where a large number of truly authoritative experts from the original world were gathered. Otherwise, who knew when Tang Zhen would be able to completely resolve the crisis by himself?

After discussing with these researchers for half a day, Tang Zhen still couldn't come up with a reasonable plan.

After leaving the busy scientific research experts, Tang Zhen went to the next location without stopping. He met with the head of the Asian Alliance, director Tang, who had been waiting for a long time.

The two had known each other for a long time, and they often met because of work, so they naturally exchanged greetings.

After chatting for a while, they went straight to the main topic. Tang Zhen handed the list of materials he needed to director Tang.

In fact, there were many things here that Tang Zhen could get his hands on, but it would undoubtedly waste a lot of time, especially some sensitive materials that were only controlled at the national level and couldn't be found by the public at all.

Director Tang just glanced at the list and nodded to promise that it could be done. However, he then made another request. He hoped that Tang Zhen could provide a complete small terobo people warship.

Of course, if there were none, the damaged battleship in the laboratory could also do it.

When Tang Zhen heard this, he looked at director Tang. However, the other party's expression didn't change and he didn't look embarrassed at all.

After thinking for a moment, Tang Zhen agreed to the other party's request. After all, this kind of thing was dispensable to him. Moreover, compared to the light warship he possessed, the attack power of this super small warship was not satisfactory.

Since the other party wanted it, then he would give it to them!

The Asian Alliance's ability to reverse-crack was extremely strong. Even with a technological gap, it was still possible to obtain enough valuable information from the warship, especially in the case of Tang Zhen providing a large amount of scientific information. It was not impossible to copy a low-performance warship!

The Holy Dragon City had a space warship that was being manufactured and experimented on. Its main designers and builders were the residents of the original world. Therefore, whatever the Holy Dragon City could do, the original world could do it as well!

However, it was clear that the goal of the Asian Alliance was not limited to this. Otherwise, they would not have made such a request after Tang Zhen took out the small warship.

Tang Zhen hoped to use the warships produced in his original world as soon as possible. This way, when the Holy Dragon City cultivators went to war in the other world, they could drive the mass-produced warships and launch an overwhelming offensive against the enemy!

[Chapter 1154](#)

1154 Preparing for the reconstruction (1)

"I need a house that can be built quickly. It only needs to be assembled and can be used for living. I don't have too many requirements in terms of keeping warm, but it must be beautiful and durable!

As for the exact number of houses, I think we need at least ten thousand!"

Tang Zhen sat on a large, soft chair as he spoke to the staff member of the Holy Dragon Corporation in front of him.

At this time, in the conference room full of a sense of technology, all the senior management of the Holy Dragon Corporation was gathered. In addition to Xu Feng and Tang Yajie, Ivanov and the others from the ice Bear Alliance were also present.

Due to the Holy Dragon Corporation, they were all influential figures. However, Tang Zhen still maintained a humble attitude in front of them, and there was even a hint of fanaticism in his eyes.

After hearing Tang Zhen's request, everyone discussed with each other. Soon after, Xu Feng spoke, boss, what do you think of a light-Steel House? if it's possible, we can immediately assemble a Custom House. I estimate that it will take three days at most!

At this point, Xu Feng tapped on the holographic screen in front of him a few times, and then a holographic image was projected on the conference table. It was a beautiful two-story villa.

I've come into contact with this new type of light-Steel Structure Building some time ago. Compared to traditional construction methods, this new type of building has a great advantage in terms of construction period and cost. Moreover, various supporting facilities can be added to the interior according to the needs.

If you're afraid of the lack of aesthetic beauty, I suggest that it's best to let the designer do a simple plan before the construction and choose a few more styles for backup.

As for the total cost of these materials, the initial estimate is about 1.5 billion. I think it's completely acceptable!"

Tang Zhen nodded his head. Looking at the holographic image on the table, he nodded his head in satisfaction and said to Xu Feng, I think this kind of building is not bad, so I'll use it for the time being. There are not many requirements for the addition of internal facilities, just the basic water and electricity will do.

The most favorite place for the residents of the tower was still inside the tower. However, being inside the spatial tower was equivalent to living in the tower. These buildings were only temporary resting places.

When the Holy Dragon City came into contact with the seal, there would be plenty of places to live. Therefore, Tang Zhen only needed to solve the problem at hand.

In fact, he could make do with using a tent. However, Tang Zhen needed to give the newly joined Holy Dragon City cultivators a refreshing feeling. In addition, he felt rather awkward when he saw the ruins. Thus, he decided to build a new batch of houses to live in.

In fact, he could also quickly build a batch of rough houses using the mobile phone application, but he needed to carry out internal decoration next. Tang Zhen couldn't find suitable workers, and he also didn't want to waste time.

After all, the construction of such a large scale was definitely not something that could be completed in one or two days, and what he lacked the most right now was time.

It was not a problem for the guys in his hands to kill and fight, but if they were to be used as construction workers, who knew if they would tear down the houses?

After solving the problem of the houses, Tang Zhen turned the topic to road construction and greenery. Tang Zhen could use his mobile phone to solve the problem of the road. Even if the road was bombarded with artillery shells, it would only have a pit and would definitely be extremely strong.

As for the problem of greenification, it was just a casual mention. Tang Zhen could solve it himself. He still had a lot of plant seeds from the dream city Lord, and it was better to use them to sow in the space TOWER.

After one problem was solved, they moved on to the next one. After a discussion with the Holy Dragon corporation's higher-ups, all the problems were resolved and immediately implemented.

Tang Zhen needed to wait for three days. After that, he would be able to obtain all the resources he wanted and bring them back to the world of loucheng!

After the meeting ended, Tang Zhen invited everyone to have a meal together and treated them with food from the Lou Cheng world.

Under the cooking of the top chefs, these extremely delicious ingredients from another world immediately conquered all the customers. They enjoyed the food with an intoxicated expression and chatted with each other from time to time.

Tang Zhen, Xu Feng, and his sister, Tang Yajie, were standing at the side, chatting and laughing. Although he was now in a high position, he did not become distant from his friends and family.

After the banquet ended, Tang Zhen took a short break and went back to work.

The next thing he had to do was to customize and modify a batch of chariots for the temporary use of the Holy Dragon City cultivators.

He was prepared to save up enough brain beads and energy stones before attacking the terobo people. As long as he had enough money in his pocket, he would have the confidence to start an invasion against a strong enemy.

After all, the consumption of war itself was endless. In a situation where he was empty-handed, how could he dare to start a war?

As such, he set his sights on the high-grade buildings in this Warzone. As long as he was fast enough, he would be able to collect enough brain beads and origin stones in a short time.

Although this method was a little shameless, it was indeed one of the fastest ways to make money. Extraordinary times called for extraordinary things. Besides, the law of the jungle was an unchanging law in the world of loucheng.

The defense of this type of vehicle did not need to be too high. Its main purpose was to carry combat personnel and then install some machine guns and other weapons. It should be completed quickly.

He told his request to director Tang, and the other party agreed very quickly. He promised to send the required vehicle to Zhen Tang as soon as possible.

After finishing the work at hand, Tang Zhen had just sat down to rest when a staff member knocked on the door and came in, saying that the batch of supplies he had ordered people to prepare had arrived. Then, a stack of storage cards was placed on his desk.

Tang Zhen asked somewhat curiously when he saw the pained expression on the familiar staff member's face, "Little Zhang, what's wrong with you? why do you have such an expression?"

The young man who was called Xiao Zhang by Tang Zhen was a special service agent sent by director Tang. After hearing Tang Zhen's question, he pointed to the storage card on the table and said, " Mayor Tang, I've just estimated that all the supplies here added up are not worth as much as one of your storage cards. Yet, your staff used more than a dozen of them at once. I keep feeling that it's such a waste!

Tang Zhen smiled when he heard this. He could understand little Zhang's thoughts. After all, things like storage cards were definitely considered precious strategic resources in the original world. Once a war really broke out, this kind of convenient and extremely concealed storage card could even determine the outcome of a local war!

Therefore, even his business partners didn't have much in stock. Tang Zhen wouldn't give them more even if they wanted more.

There were many times when Tang Zhen would give a storage card with a corresponding volume according to the volume of the required material. In the end, those guys would use all kinds of methods in order to save a storage card.

For example, he could remove all the packaging of the items and then compress all the wasted space. Or, he could wrap the entire item and make it into an appearance that saved the most space. This way, he could use the least amount of storage cards to store all the materials Tang Zhen needed.

They would deliberately "forget" to return the rest of the cards. Tang Zhen didn't care about this. The next time they prepared supplies, they would do the same.

Because little Zhang had been in contact with Tang Zhen for a long time, he knew how difficult it was to obtain a storage card. Therefore, he felt extremely pained by Tang Zhen's wasteful behavior.

After chatting with little Zhang for a while, Tang Zhen took the storage card and teleported back to the world of loucheng.

[Chapter 1155](#)

1155 Cleaning up the ruins (1)

Inside the tower, the work of cleaning up the ruins continued.

The scene of more than 50000 people working together was very spectacular. It was rare even in the original world, not to mention that all the people working were cultivators in loucheng, and there were many Overlord level Masters.

It could be said that any one of them was enough to make the residents of the low-level buildings shiver in fear and serve them like they were Lords.

If they had seen the cultivators of the Lord working hard to move the stones, they would have thought that there was something wrong with their eyes or that they were still dreaming!

Even Tang Zhen himself felt a little funny. He was probably the first person in the tower world to use so many high-level cultivators as hard labor.

However, he had no choice. Who asked him to take over a semi-abandoned national-level building? he had no way to make this garbage disappear!

He could do it by using the storage ring. However, there were so many people who were idle. If he could find something to do and not let them think about it, why wouldn't Tang Zhen be happy?

After passing the storage card to the Holy Dragon city's residents beside him and asking them to prepare dinner, Tang Zhen walked to the side of the Blood River King, who had a melancholic expression on his face. He saw the Blood River King sitting on the ground with a bitter face as he used his spiritual force to throw pieces of broken walls far away.

"What's wrong? you seem to have something on your mind?"

Tang Zhen sat beside Blood River King and asked with a smile.

Blood River King nodded and sighed softly. He said in a sad tone, "After this calamity, I wonder how many residents of my city are left?"

I don't know how many of my descendants survived. It would be good if I knew the exact news, but I didn't get any news at all. This is what worries me the most!"

Even a ruler like Blood River King had emotions and desires. After learning that his tower had been destroyed, he had been silent for almost an entire day.

After a brief pause, Blood River King continued, "you said that all the survivors have been sent out of the wilderness. We don't know which war zone they will go to. It will be even more difficult to find them!"

Tang Zhen pondered for a moment before he said to Blood River King, "Actually, I think that the random teleportation has a certain range. The final teleportation point should be the war zone where the continent-class buildings that were involved in driving out the torobo people back then.

And the battle zone we're in should have one or more continent-level towers, which is why I was teleported here.

When everything is on the right track, I will think of a way to release the news on the cornerstone platform and try to gather the survivors in the wilderness Warzone as much as possible. This is also the responsibility that we, the leaders of the wilderness Warzone, should bear!"

Blood River King nodded gently when he heard this. He turned to look at Tang Zhen and a faint smile appeared on the corner of his mouth.

"City Lord, I find that I can't see through you more and more. Whether it's your strength or your special methods, they all make me extremely surprised!"

In the past, my understanding of you was only based on rumors from various channels. However, after coming into contact with you in person, I realized that the rumors were not exaggerated, but rather, they were discounted.

Not to mention other things, just based on the fact that you can return tens of thousands of cultivators from the other world without the help of the cornerstone platform, and you have such a SPACE TOWER in your hands, I admire you from the bottom of my heart!

If I'm not wrong, the power of laws you've mastered should be completely perfected, right?"

After his speech, Blood River King stared at Tang Zhen, waiting for his answer.

Tang Zhen similarly smiled and gently nodded.

Blood River King sighed. His eyes were filled with envy. He stood up and bowed respectfully to Zhen Tang. Then, he laughed and turned to walk toward the labor site.

Looking at Blood River King's figure, Tang Zhen was very clear that as long as he was still the Holy Dragon city's city Lord, Blood River King would definitely keep his promise and serve the Holy Dragon City for twenty years.

As for what would happen twenty years later, Tang Zhen didn't need to consider it.

The best way to intimidate this kind of proud and arrogant person was to use strength to crush them and make them completely lose their confidence. And the current Tang Zhen just happened to have this kind of strength!

Foreign experts like the Blood River King would probably come to the Holy Dragon City from the other world in a steady stream in the future. As for the exact number, Tang Zhen could not say for sure.

There would definitely be many unruly people among them. However, with an expert like Tang Zhen intimidating them, they would definitely not dare to be rash.

Moreover, after signing the contract, these guys wouldn't be able to cause any trouble!

Tang Zhen felt a headache when he thought of the contract. It was because a special building like the ghost bank had never appeared in other buildings before. He did not know why it had appeared in the Holy Dragon City.

If he wanted to get enough contracts, he had to lift the Holy Dragon city's seal. Therefore, this matter could not be rushed.

The ghost bank was not the only special thing about the Holy Dragon City. Its existence had also provided Tang Zhen with a lot of convenience. He even had a faint suspicion that these things were related to mobile phones!

Of course, he knew that the phone was just a medium. The real mysterious existence was the bead that he had accidentally broken!

It was also because of the bead's heaven-defying function, in addition to the invisible protection, that Tang Zhen and the Holy Dragon City were able to smoothly reach where they were today.

Therefore, Tang Zhen wanted to figure out the origin of the bead, but he was also afraid that if he knew the real secret, it would bring unimaginable danger to himself and the Holy Dragon City.

After all, no matter how one looked at it, this Pearl was a heaven-defying item. It definitely had an extraordinary origin!

Tang Zhen retracted his thoughts and decided not to think about these problems. Instead, he would first deal with the matter in front of him.

He got up and went to the cultivators of loucheng who were cleaning the site. Tang Zhen chatted and laughed with them as they worked. He threw the garbage far away until it became a constantly rising mountain.

By the time it was time to eat, everyone had cleared out an open space of 50 square kilometers, which was more than enough to build a new house!

After calling for everyone to stop working, the cultivators in charge of preparing food carried a large basket and distributed the food that Tang Zhen had purchased. Some dried sea monster meat that was necessary for the Holy Dragon City cultivators in battle also appeared in front of everyone.

However, Tang Zhen did not know whether to laugh or cry when he saw those large square Barrels filled with wine. He secretly thought that those fellows from his original world had really dug up all their thoughts in order to save their storage space.

However, compared to the bottled drinks, these drinks in bulk did save a lot of space, and the quality was definitely not a problem.

When the cultivators of loucheng saw the big barrels being moved in front of them, they felt a little baffled. However, when the barrel's lid was opened, Tang Zhen immediately heard the sound of saliva being swallowed.

Many people even ran to the barrel and took a deep breath, showing an expression of enjoyment.

When they were first teleported to the other world, the cultivators immediately prepared for battle. Then, they were chased around the world by the teroboros and did not have the chance to drink any wine. It was normal for them to lose their composure after seeing the fragrant wine.

Besides, in the world of loucheng, other than the expensive top-class drinks, how could ordinary drinks be compared with the ones brought by Tang Zhen? they were turbid, light, and had a peculiar smell. Even the appearance of the drinks was a lot worse!

Seeing that all the cultivators were in a hurry, Tang Zhen did not hesitate and directly ordered the meal.

More than fifty thousand cultivators of Lou Cheng had gathered together, sitting cross-legged on the clearing and drinking to their heart's content!

[Chapter 1156](#)

1156 Holy Dragon city's great training of soldiers

Thick wine easily numbed one's mind. Once they were immersed in it and drank it together, they would quickly forget their worries and eventually lie on the ground drunk.

The wine was not intoxicating, so it was a good idea to use the paralysis of alcohol to dilute his worries!

The cultivators of loucheng had been fighting all their lives. Although they had killed countless people and had a firm heart, deep down in their hearts, they still had a connection to their loucheng and their family. It was just that they rarely showed it.

Now that the savage barren war zone had undergone a great change, their homes had been destroyed, and their friends and family had been killed and separated, how could that kind of bone-deep pain be erased in a day and night?

Especially when he was idle, it was easy for him to let his thoughts run wild, and even worse things might happen!

Tang Zhen was aware of this point. Therefore, he had them in a busy state. This way, they would not have the time to let their thoughts run wild. At the same time, he had prepared enough wine to let them get drunk to their heart's content!

At this time, inside the space TOWER, there were drunk cultivators everywhere. They were drinking and chatting with each other, and from time to time, they would put their arms around each other's shoulders, looking very warm.

There were also cultivators who fell to the ground in pain after the strong wine entered their throats, or stood up and laughed wildly. However, no one stopped them. They just turned their heads silently and drank cup after cup!

That night, the cultivators in the tower started to become familiar with each other after drinking and singing in the tower. The strangeness gradually disappeared.

The residents of the Holy Dragon City and the newly joined cultivators of the building needed time to get familiar with each other. It was absolutely impossible for them to trust each other immediately and trust each other with their backs on the battlefield.

Therefore, they needed a period of time to get used to each other. However, it was destined that this time would not be too long. Tang Zhen, who was anxious to obtain resources, had to cut down on this process as much as possible.

Therefore, Tang Zhen's current goal was to let the new and old residents cooperate and deepen their understanding of each other. Letting them rebuild the city together and have more contact during work also had this intention.

Other than participating in the work together, Tang Zhen was also prepared to give them special military training to further shorten this process of cooperation.

When everything was ready, it would be time for the wolves to move out!

Therefore, when the next day arrived and all the cultivators recovered from their drunken state, Tang Zhen issued a new order. He let the elite cultivators selected from the old residents act as instructors and lead the new residents to undergo a special 'recruit training'!

The cultivators of loucheng were confused by this order and thought that they didn't need any new recruit training. In the end, they obediently accepted the order from the city Lord. With a trace of disdain and a trace of curiosity, they participated in the so-called military training.

On the field that had just been cleared out, the cultivators of the city were dressed in battle uniforms of various sizes. They were lined up according to the instructions of the Holy Dragon City instructors!

These combat uniforms were all from the original world. Although the style was not very good, they were strong and durable, and would not be easily torn.

After changing into the uniform, the newly joined cultivators of loucheng wore a look of novelty on their faces. From time to time, they looked around at the troops who were dressed in the same way. For some reason, they actually felt a little proud!

He also felt a sense of belonging to this new group.

They had yet to realize that this sense of belonging and cohesion would become more obvious and substantial as the training progressed. In the end, they would become a single entity and become a terrifying war beast!

In the huge open space, the Holy Dragon city's instructor's orders rang out from time to time. Then, a group of cultivators who were undergoing training in loucheng city almost made a fool of themselves.

They either didn't know left from right, or they were walking with turns. There were even people who looked flustered and kept looking left and right. Their expressions and actions looked extremely funny, causing a burst of laughter.

The Holy Dragon city's instructors turned a blind eye to this and continued to issue orders meticulously, their expressions rather serious.

Although the cultivators of loucheng city were just playing around at the beginning, as the training progressed, they gradually realized the benefits of this training and their original disdain and contempt gradually disappeared.

They were all Warriors who had been through hundreds of battles, and they had an extremely keen sense of war-related things.

They knew very well that once all the cultivators of Lou Cheng could follow their orders and learn to cooperate with their companions, they would become an invincible force in an instant!

The cultivators of loucheng, who were used to fighting alone or forming small teams of cultivators to cooperate with the invasion of loucheng, began to gradually accept this training mode and improved by leaps and bounds.

After all, it was a piece of cake for the cultivators in loucheng to March in an orderly formation with their physical fitness and extremely fast reaction ability!

At this time, the Holy Dragon city's instructor asked them to maintain this standing posture as much as possible even when they were not training. This was also meticulously completed by the cultivators in loucheng.

Seeing the initial results of the training, the cultivators from the city could line up in neat rows and walk around the wide field. New training subjects were brought out by the Holy Dragon City instructors.

As a result, the foreign cultivators, who now had a trace of military temperament and were no longer as unorganized as before, were pulled to the training ground in batches and began their first shooting training in their lives.

The new residents were no stranger to firearms. Whether it was the Holy Dragon City cultivators, the cyborgs, or the teroboros, they all used this kind of long-range weapon with astonishing lethality.

Although they were used to fighting with cold weapons, the new residents had to admit that the killing power of firearms was quite amazing. Even they were afraid of them.

Therefore, the new residents were conflicted about coming into contact with this weapon. They were a little resistant, but also a little curious. At this moment, they were listening attentively to the Holy Dragon City instructors' explanation of the weapons in their hands.

this is a standard rifle used by Holy Dragon city's soldiers. It weighs 17 kilograms and has a 15 mm caliber. It can easily penetrate a 35 mm steel plate from a distance of 300 meters. It can kill an enemy wearing low-level demon soldier armor with one blow!

The well-built instructor from the Holy Dragon City raised the rifle in his hand, aimed at the target in front of him, and pulled the trigger.

After a muffled gunshot, a large hole was made in the human-shaped target. The low-level demonic soldier armor on it was completely destroyed!

Seeing the terrifying destructive power of this gun, the new residents all gasped in unison, and a trace of heat flashed in their eyes.

Although they preferred close combat with swords, no cultivator would refuse the temptation of a powerful weapon. At this time, a trace of desire had appeared in their hearts, and they hoped that they could have a similar weapon.

The Holy Dragon City instructor glanced at his new recruit, a faint smile on his lips. He casually put the rifle to the side and picked up a gun that looked like a wooden stick but had a sharp bayonet in front.

"This is a special gun for a recruit. It's a semi-automatic rifle with a caliber of 12.7mm and a capacity of 10 rounds.

Only after you have successfully mastered it will you be qualified to equip the weapon I just used, as well as distribute other Holy Dragon City standard equipment!"

At this point, the Holy Dragon city's instructor immediately ordered all the cultivators to lie on the ground and start testing the rifles used by the new recruits. They wanted to hit targets a hundred meters away as soon as possible!

The new soldiers were still somewhat disdainful of the instructor's request. After all, to them, even if they threw a rock, they could easily hit a target from a hundred meters away. How difficult could this request be?

The instructor from the Holy Dragon City did not give any explanation and only let them do it themselves.

However, the confident new residents soon realized that it was not easy to hit a target 100 meters away. Most of the time, the bullets would fly to unknown places.

He exchanged glances with the surrounding recruits, only to find that they all had awkward expressions on their faces, because almost no one hit the target!

Seeing the Holy Dragon city's instructor destroy the target a thousand meters away as if he was playing, these guys finally realized the difference. They all listened to the instructor's explanation of the shooting essentials seriously and kept trying.

In the continuous gunshots, the recruits finally mastered the weapons in their hands and their shooting became more and more accurate!

[Chapter 1157](#)

1157 Collectively splitting up the houses

Tang Zhen had just returned from his original world when he heard the continuous sounds of explosions in the distance.

This wasn't because the Holy Dragon City had been attacked by the enemy, but rather because the new and old residents had formed a team and were conducting live-fire training. The large amount of grenades and bullets stored in the original world were being played around by this group of people who had too much energy and had completely stimulated their desire to train.

The original disdain and resistance to training had completely disappeared. The new residents had gradually accepted and adapted to the change in their previous fighting habits.

Due to their powerful strength and various magical abilities, these weapons were used in various ways. Tang Zhen once saw a cultivator with a bunch of tentacles on his back carrying a basket of grenades and then throwing them two hundred meters away like hailstones.

The scene of the grenades exploding continuously was definitely comparable to a cannon attack. If there were any enemies in that area, they would have been blown to pieces!

As a result, Lou Cheng, who had a special talent, was chosen by his teammates as the grenade launcher. During training, he only needed to carry a large number of grenades and follow behind.

When the training began, a group of Lou Cheng cultivators who were used to swords and knives rushed forward. The semi-automatic rifles in their hands were fired like machine guns. One magazine was quickly emptied, and the next one was quickly replaced. The firepower suppression was quite powerful.

They weren't shooting randomly. The targets in the distance that were constantly shattering could prove this point. It showed that the recruits' shooting accuracy was extremely high!

While the loucheng cultivators used cover to attack, the grenade throwers were responsible for dropping bombs, blasting the targets into pieces.

The cultivators of loucheng who were as fierce as wolves and tigers rushed to their targets impatiently. First, they emptied their bullets, and then they used the bayonets on their rifles and standard military

knives that they pulled out casually to cut the target that was made in the shape of the terobo people into pieces!

Tang Zhen could not help but silently mourn for their enemies when he saw the manner in which these people were gnashing their teeth. This was because if this was a real battlefield, these enemies would probably have already turned into meat paste!

No matter what, the new residents were doing well in their training. As long as they could keep up with the training, the casualties would be greatly reduced when the war against the teroboros started.

The weakness of the cultivators from loucheng city was that they were not used to this kind of technological combat mode. As a result, they did not know how to make use of their own advantages. They only knew how to fight and charge, and then they were defeated by the torobo people.

After a series of military training, they at least knew how to avoid the enemy's shooting, and then use their magical abilities to launch Swift and fatal attacks on the enemy!

Tang Zhen wanted to turn them into the most ideal super soldiers. No matter what kind of similar world they invaded, they would be able to quickly join the battle without any restrictions!

After walking around the training ground, Zhen Tang took out his storage card and filled a large box.

There were a lot of materials stored inside. Among them were the fast-built houses that Tang Zhen needed. However, in order to save storage space, these houses were not assembled.

After calling Qian Long and the others over, Tang Zhen sent them a video file to demonstrate how to assemble these houses. After that, he told them to arrange their time and find time to assemble these houses as soon as possible.

Thousand Dragon and the others were quite interested in this beautiful two-story villa. The group studied it for over ten minutes before immediately starting to experiment on the planned open space.

Due to Tang Zhen's request, this kind of house had been redesigned. Many of the cumbersome procedures had been simplified as much as possible. Therefore, only two people were needed to build a house.

Seeing Qian Long and the others building a beautiful house like building blocks, many cultivators who had nothing to do immediately gathered around and watched with curiosity. At the same time, they couldn't stop discussing and praising.

Unknowingly, a house had completely taken shape!

Patting the dust off their hands, Qian Long and the others looked at the beautiful two-story building. After exchanging a glance, they all nodded in satisfaction.

They had been lying on the ground for the past few days. Not only was it uncomfortable, but there was almost no shelter around them. Especially at night, all kinds of noises kept many people awake.

Some of them snored like thunder, and it was impossible to fall asleep while lying next to them. In addition, there were also the sounds of walking, talking, and talking in their sleep. It was a mess that could make people collapse!

There were more than 50000 of them, so it would be strange if the commotion was small!

Qian Long had never felt such a strong desire for a house before. This way, he would be able to sleep peacefully.

Murong Ziyue was the first one to jump out when she saw the house. She begged her brother-in-law to build one for her first, otherwise, she would follow Tang Zhen wherever he went!

Tang Zhen did not reject her. Instead, he generously handed her the materials to build the house. However, he told her that she had to build the house herself. Otherwise, she could continue to lie on the ground and sleep!

It was neither windy nor rainy in the tower anyway. Other than the fact that it would make too much noise if many people slept together, it was actually quite comfortable to sleep in the open.

Murong Ziyue mischievously made a funny face and smiled disdainfully at Tang Zhen. Then, she immediately called him " brother " and " uncle " before happily leading a group of Holy Dragon City cultivators to build a house.

The cultivators of the Holy Dragon City all doted on this little girl, Murong Ziyue. Now that she had asked for help, who would have the nerve to refuse?

Even if they wanted to build a house for themselves as soon as possible, it was better to practice on the little girl's house first. In any case, even if it collapsed by accident, she could at most ask for another one from the city Lord.

It must be known that the city Lord, who was feared by his enemies outside, had a headache whenever he saw this girl, especially when he saw the dog-like er ha war beast that was inseparable from Murong Ziyue. His face was even more depressed.

After Murong Ziyue left, Tang Zhen, Qian Long, and the others looked at each other and shrugged helplessly. The result made everyone burst into laughter.

Soon, the Holy Dragon City cultivators who finished their training received a new order. Those who did not want to continue sleeping on the ground could work together to get a house, but they had to build it themselves!

The cultivators of Lou city, who had long been curious about the beautiful houses that had suddenly appeared, immediately gathered around the material distribution point and excitedly carried all kinds of materials to the designated location to build houses.

Of course, there were some cultivators in loucheng who didn't like to live in ordinary houses. They claimed that it would give them a sense of restraint, which would lead to insomnia all night!

Therefore, the sky was their bed, and the earth was their bed. Sleeping all the way until dawn was their greatest enjoyment!

Tang Zhen did not care about this bunch of people who tried to cover up their laziness with words. Instead, he allowed them to continue sleeping on the streets.

However, it probably wouldn't be long before they realized the benefits of living in these houses, and they would come to beg him!

In the end, there were busy figures everywhere that night. The cultivators were all talking and laughing as they built houses. Because of the colorful night sky of the spatial tower and the Holy Masters constantly shooting light balls into the sky for illumination, the progress of the construction was not affected much.

With the deft efforts of Lou Cheng's cultivators, houses were built along the planned streets. When they reached a certain scale, they immediately formed a strong visual impact and looked extremely beautiful!

Although the house had been assembled, the interior decoration was not completed yet. However, the cultivators of Lou Cheng, who had had enough of sleeping on the ground, didn't care at all. They immediately carried their bedding and went in excitedly.

As for those lazy guys who claimed to be close to nature and refused to build houses, they could only look at the empty ground around them, cover their heads with the quilt, and continue to sleep.

The process of building the houses lasted for several days. As far as the eye could see, the two-story villas were neatly arranged on both sides of the road, decorated with various plants from other places in the space TOWER, which actually gave people a very pleasant feeling!

Both the new and old residents were extremely satisfied with these houses, and they had been smiling for the past few days.

Just as everyone was immersed in joy, the Holy Dragon City cultivator in charge of scouting finally returned. At the same time, he brought back the information that Tang Zhen had been waiting for.

A cold glint flashed across Tang Zhen's eyes as he looked at the information that had been arranged. He slowly stood up and looked out of the window on the second floor.

The short period of peace had ended. A storm of blood brought by the Holy Dragon City was about to blow over this still-unfamiliar war zone!

[Chapter 1158](#)

1158 The low-level Lou Cheng's counterattack

Recently, the area around Spirit Rock City had become very unstable.

For some unknown reason, a large number of wandering cultivators appeared out of thin air. They were of different races, and many of them were cultivators with extraordinary strength. It seemed like they were avoiding the war.

In addition, they didn't dress like ordinary wild cultivators. They looked more like cultivators from some city. However, they didn't see similar armor in the surrounding cities, so they must have come from somewhere else!

The wild cultivators were at a disadvantage against the cultivators of Lou Cheng. However, if they had superior equipment and a large number of them, they would be a big threat to Lou Cheng!

If these wild cultivators gathered together, they could completely destroy the low-level towers, so the appearance of these outsiders made the city Lords of various sizes worried.

Fortunately, what they were worried about did not happen. These unknown wild cultivators only stayed in the vicinity for a short time before leaving the area one after another, and their whereabouts were unknown.

As the city Lords heaved a sigh of relief, they also gradually inquired about the rough background of these wild cultivators.

They were all from the savage wildland, the place that had been attacked by foreign enemies and turned into a scorched land, with its qualification as a Warzone revoked!

Regarding this matter, the city Lords of the various towers had also learned a little about it through the cornerstone platform.

Although the world of loucheng was said to have 3000 battlefields, which sounded like a lot and one more or one less did not matter, the truth was not so.

Even if the last battle zone was destroyed, it would still cause a huge commotion. After all, this was a battle zone, not an ordinary building!

After knowing the situation, many city Lords sighed and said that nothing was eternal. Even a giant object like the loucheng Warzone was destroyed!

However, they had never expected that the survivors from the wilderness War zone, which was so far away from them, would actually appear in their own war zone!

Fortunately, as the survivors of the savage war zone gradually left, the days gradually calmed down.

However, the appearance of a group of giant insects made these buildings nervous again.

As more and more insects appeared near the towers, the damage they caused became more and more serious. The towers had to organize people to try to kill these insects.

However, after the fight, the cultivators of loucheng were horrified to find that their attacks could not cause much damage to the giant insect. No matter whether it was swords or energy attacks, they could not kill the giant insect. Instead, their own casualties were increasing!

The cultivators in the city had no choice but to retreat and wait for reinforcements.

The low-level towers in this area were all under the control of the spirit Rock City. They would receive offerings regularly. Now that the situation was critical, they naturally had the obligation to dispatch cultivators in the towers to resolve the crisis!

In the end, the cultivators who went to seek help did not return, and the number of giant insects increased. They ate almost everything, not even the soil, leaving only a ground full of wolves!

Looking at the abandoned area that had been gnawed by the giant insects, the city Lords were all worried. If this situation continued, the original thousand-mile green field would be replaced by a desert!

In that case, the living environment would become extremely harsh, and the development of Loucheng would be greatly affected!

The only good thing was that the giant worms hadn't targeted the buildings yet, but who could guarantee that they wouldn't target their own buildings after they ate everything on the ground?

Just as the low-level city Lords were anxiously waiting for reinforcements, the cultivators who had gone out to ask for help returned one after another, bringing back news that shocked countless people.

Ling Yan city had been occupied by the giant insect, but it was not under attack. All the residents of the city were now mixed with the giant insect, and the relationship between them was extremely strange.

The Spirit Rock City ignored the low-level cultivators who came to ask for help. Some of them tried to fight back, but they were captured by the cultivators of Spirit Rock City and thrown to the giant worm as food!

The cultivators who had witnessed this scene could only sigh inwardly and return to their own towers.

After hearing the cultivator's story, the city Lords of each building turned pale with fright, and the uneasiness in their hearts grew stronger.

This was because Spirit Rock city's behavior was simply too abnormal. As the ruler of a vast area, how could they tolerate such a destructive giant insect's wanton behavior? This was simply raising a Tiger to bring disaster upon themselves!

Anyone with a discerning eye could see that once the giant insect had devoured all the food that could be eaten, its next move would most likely be to target the various buildings!

Even though Spirit Rock City knew of this possibility, they still did not do anything to these giant worms. Instead, they lived with them all the time, as if they were blood relatives!

A terrifying thought appeared in the minds of all the residents of the low-level buildings in the controlled area of Spirit Rock City. They suddenly realized that these giant worms might be strange war beasts raised by Spirit Rock City!

Because of the giant insect's shocking appetite, Spirit Rock City had turned the area under its control into a farm. It did not care about the lives of the low-level buildings and even treated them as food for the giant insect!

After the sudden realization, he was furious!

None of the city Lords had ever dreamed that Spirit Rock City would do something like this. They were clearly not giving them a way out. This was simply too much!

Left with no other choice, the low-level buildings began to unite. On one hand, they were wary of the giant insect's possible attack on the buildings, and on the other hand, they had the plan to overthrow the rule of Ling Yan city.

Although Spirit Rock City was an eighth-grade city with many powerful cultivators, it did not mean that its status was unshakeable, especially when it had offended the public.

The landscape was beautiful and unchanging for thousands of years, but who could rule for a thousand years?

In the vast world of loucheng, there were countless powerful loucheng, each controlling a large piece of land. However, as countless years passed, they continued to rise and fall. Even the continent-level loucheng did not dare to say that it would last forever!

Sometimes, an unremarkable change could lead to the complete destruction of a powerful city!

Now that these low-level towers had joined forces to destroy Spirit Rock City, they would naturally spare no effort in their bid to win the battle. Otherwise, what awaited them would be the crazy revenge of Spirit Rock City!

After a secret discussion, they decided to gather all the cultivators in Lou city and launch a surprise attack on Spirit Rock City. At the same time, in order to ensure that they had enough combat power, they would hire wild cultivators at a high price to join the battle.

In this war zone, there had always been a large number of mercenaries. They were hired by the tower and completed all kinds of missions. Even in the war of invading the other world, mercenaries often appeared!

It was said that there was once a level nine city that hired more than five million mercenaries in more than 70 years to complete the promotion mission.

Relying on the human wave tactic, this level 9 building finally successfully flattened the mission world and successfully promoted to a national-level building!

Therefore, in order to ensure the success of this surprise attack on Spirit Rock City, the city Lords decided to hire a group of cultivators in the city after some discussion, and the more the better.

When the news was spread, a large number of mercenaries came. They quietly entered the low-level buildings and discussed with the cultivators in charge of the matter.

A large number of field cultivators and mercenaries were recruited and then secretly arranged in secret locations, waiting for the day of the operation.

Two days before the operation began, several human cultivators in black cloaks and black armors suddenly appeared near a low-level city. After careful inspection, they entered the city named 'red earth'!

[Chapter 1159](#)

1159 Contracting the war (1)

reporting to the city Lord, there are a few mercenaries here to apply for the position. However, their request is a little special, so we can't make a decision. We need you to make the decision!

Having his thoughts interrupted by the voices of the residents, the city Lord of the Red Earth City showed an unhappy expression.

He had been busy for the past few days and was under a lot of pressure. In order to calm down and think about problems, he had specifically instructed that he was not to be disturbed unless it was something important.

Taking a deep breath and suppressing the anger in his heart, the city Master asked in a deep voice, "It's just a few mercenaries and you guys can't even deal with them. You're so useless!"

The cultivator from Lou Cheng sneaked a glance at Red Earth City Master, who was about to fly into a rage, and quickly explained, "city Lord, you might not know this, but these mercenaries are not ordinary cultivators. Whether it's their aura or their equipment, they are much stronger than ordinary cultivators!"

After a short pause, the cultivator added, "according to the Grand elder's speculations, these mercenaries have extraordinary cultivation. The lowest should be a 1-star horde leader!"

"Oh, is that so? that's good news!"

Red Earth City master's expression softened a little. Having several Lord-ranked cultivators join their side would be very helpful in increasing their strength. They could even play a key role in the battle.

A low-level city couldn't be compared to a high-level city. Sometimes, a one-star Lord could be the strongest in the entire city. It wasn't like a high-level city, where one could easily bring out many cultivator teams made up of Lord cultivators!

Nodding in satisfaction, Red Earth City Master asked again, "What did they request? are they not satisfied with the Commission? If that's the case, you can raise the price accordingly and try to meet their requirements!"

In the eyes of the mayor, mercenaries were a group of desperadoes who fought for money. As long as the price was right, there was nothing they wouldn't dare to do.

The cultivator shook his head and explained to Red Earth City Master, "If it was about the price, I wouldn't have bothered you. But the request of these cultivators is a bit special, so the great elder asked me to invite you to go!"

Red Earth City master's interest was piqued. He stood up from his chair and went straight to the square below the tower.

Because they were about to attack Ling Yan city, the atmosphere in the red Earth City was very tense. The residents of the city were everywhere, carrying swords and making their final preparations.

In the center of the square, several cultivators in black cloaks stood. They ignored the curious gazes around them and maintained their cold expressions.

The city Master sized them up and couldn't help but nod. Just as his residents had said, these cultivators were all extraordinary.

Therefore, the mayor of Red Earth City became more curious about their special request.

"This is our city Lord, you can make your own requests now!"

After the elder of the red earth Tower introduced them, he retreated behind the city Master and looked at the black-armored cultivators with a serious expression.

“If you have any requests, you can tell me directly. As long as it’s within my means, I will do my best!”

Out of respect for the strong, the master of Red Earth City was very easy-going and didn’t put on any airs just because he was the employer.

Even if they couldn’t work together this time, they had to build a good relationship. Who knew, it might come in handy in the future.

Hearing this, the leader of the black-armored cultivators slowly said to Red Earth City Master, “ the purpose of our visit is to discuss a big business deal with the Red Earth City Master!

Red Earth City Master raised his eyebrows and asked in a calm tone, “ “Oh, what kind of big business is it? why don’t you tell me?”

I heard that your city is preparing to attack Spirit Rock City. That’s why I’m here. I hope that we can take over the battle!

Red Earth City Master was confused and couldn’t help shaking his head. He asked in a confused tone, “ sorry, I don’t quite understand what you’re talking about. What contract war? ”

The black-armored cultivator smiled and explained, “ it’s actually very simple. You’ll pay a sum of money, and then we’ll be responsible for launching an attack on the designated target. You don’t have to do anything during the whole process. That’s what I mean!

Red Earth City Master understood what he meant, but a trace of disdain flashed in his eyes. At the same time, he said in a puzzled tone, “ “Forgive me for being blunt, but the enemy is too powerful, so I don’t think you have the ability to defeat him!”

It was normal for Red Earth City Lord to have such thoughts. Even if all of them worked together, they couldn’t guarantee that they could defeat Spirit Rock City. The final victory was only 50 – 50.

How powerful could these mercenaries be to claim that they could defeat Spirit Rock City without the help of the cultivators in the tower?

If it weren’t for the fact that the other party’s strength was indeed extraordinary, Red Earth City Master would have directly flicked his sleeves and left!

The black-armored cultivator didn’t care about the city master’s doubts. Instead, he continued to say in a calm tone, “ I know that you have doubts about our strength, but this is normal. After all, with your combined combat power, you may not be a match for Spirit Rock City, ” ye mo said.

Red Earth City Master snorted but didn’t deny it.

The black-armored cultivator didn’t care about the city master’s expression. Instead, he continued to say in a calm tone, “ since you’re not confident, why don’t you leave this matter to us? this way, even if our operation fails, Spirit Rock City will only seek revenge on us, and you will not be implicated!

Red Earth City Master was stunned. After rolling his eyes, he squinted at the black-armored cultivator. "What you said does make sense, but this is not a game. How can you guarantee that you can defeat Spirit Rock City?"

Once they alerted the enemy, Spirit Rock City would be on guard, and it would be much more difficult to take action!

Unless you can prove that you have the confidence to defeat Spirit Rock City, I will not agree to this deal so easily!"

The black-armored cultivator nodded and turned to another black-armored cultivator behind him. He extended his hand and made a gesture of invitation.

The black-armored cultivator whose face had been covered by the cloak looked up, revealing a slightly ferocious purple face. He grinned at Red Earth City Master.

At the same time, a terrifying aura spread out from his body. It was as if a grenade had been thrown into a deep pool, immediately setting off a great uproar.

The cultivators of red earth Tower turned pale with fright when they felt the terrifying aura. They drew their swords and glared at the black-armored cultivator as if they were facing a great enemy.

Fortunately, the aura disappeared as suddenly as it appeared. As the purple-faced cultivator in black armor lowered his head, everything returned to normal.

When the terrifying aura appeared, Red Earth City Master quickly took two steps back and looked alert. After the aura was restrained, he secretly gasped and asked in a bewildered tone, " "Sir, you are a King level cultivator?"

The black-armored cultivator in charge of the conversation with the city Master nodded and asked confidently, " "City Lord, I wonder if this can prove our strength?"

Red Earth City Master immediately nodded and agreed.

The biggest obstacle in defeating Spirit Rock City was the Lord of Spirit Rock City, who was a King level cultivator. There was no king level cultivator in these low-level towers.

As long as they could stall or kill the Lord of Spirit Rock City, their chances of winning would increase greatly. Even if they had to exchange more low-level towers for less, they would definitely be able to destroy Spirit Rock City!

However, while he was pleasantly surprised, he was also very confused. Where did these black-armored cultivators come from?

[Chapter 1160](#)

1160 having a good reason to do so

No matter what doubts they had, the existence of a King level cultivator was enough for them to take the risk!

Red Earth City master's mind was filled with such thoughts. He was no longer in the mood to figure out what the black-armored cultivators were up to. He only hoped that they would really go to war with Spirit Rock City, so that he could sit on the mountain and watch the Tigers fight.

The only thing they needed to pay was the military expenses that should have been taken out in the first place, and they didn't need to sacrifice the lives of the cultivators in Loucheng!

No matter how he thought about it, it was a good deal worth doing!

Knowing that this was a golden opportunity, Red Earth City Master immediately made up his mind. He told the black-armored cultivators to wait for a moment before quickly returning to his room. He used a secret method to contact the other city Masters and told them about this matter.

On a square crystal covered with runes, a dozen vague figures appeared. They were the main schemers of this operation, the Lords of some of the highest-ranked towers.

The difference in levels was obvious. Even in these low-level buildings, there was a difference in strength.

As long as the city Lords agreed, they could decide whether to hire the black-armored cultivator or not. As for the other low-level buildings, they had no say and could only follow orders.

After seeing that all the city Lords he needed to contact had appeared, Red Earth City Master stood still in front of the communication crystal from the other world. He raised his hand and inserted a trace of energy into it, saying what he wanted to say at the same time.

The other city Lords were all surprised by the news from Red Earth City Master. After the initial surprise, they began to doubt the black-armored cultivator's intentions. After all, there were many suspicious points in this matter.

However, just like the Red Earth City Master, they were unwilling to give up this opportunity. After careful consideration, they all agreed to this.

However, to be on the safe side, these city Lords put forward a request. That was, the employment could be done, and the remuneration could be discussed, but it must be paid after the task was completed!

If the black-armored cultivator didn't agree with this condition, the city Master could also pay a part of the Commission in advance, but it couldn't be more than 30%!

In the end, the city Lords were still unwilling to miss this opportunity. After all, the war in the tower world was extremely bloody, and even as a city Lord, it was very likely that they would lose their lives.

If they weren't forced into a corner, they wouldn't have made such a choice. After all, the enemy they were facing was a King level cultivator from Spirit Rock City!

Now that things had finally taken a turn for the better, they no longer had to risk their lives, so the city Lords naturally had to make good use of it!

If the black-armored cultivators could not defeat Spirit Rock City or leave after scamming a sum of money, they would not suffer too much of a loss!

In fact, this condition was a little harsh and even a little out of line with the rules. After all, mercenaries wouldn't act rashly if they didn't see money.

The Red Earth City Master felt a little regretful. He subconsciously thought that this deal was going to be ruined. If he were in her shoes, he would not accept such insincere conditions either.

After ending the call with a sigh, Red Earth City Master returned to the square worriedly and told the black-armored cultivator about the decision that they had just made.

He had thought that the cultivator would leave, but the black-armored cultivator only smiled and nodded to the city master's disbelief.

very good, we've decided to accept the job. As for the Commission, you can decide!

The black-armored cultivator's blade-like eyes fell on Red Earth City master's face, and he said with a fake smile, "I believe that the city Lord is definitely not a stingy person, and he definitely won't renege on his debt after the matter is done!"

After hearing the black-armored cultivator's words, Red Earth City master's heart trembled, and he had a bad feeling.

They wouldn't leave behind any future trouble by doing this, right?

Just as he was about to discuss it in detail, the black-armored cultivator in the lead cupped his hands at him and said, "please wait for good news". Then, he soared into the sky.

In the blink of an eye, the black-armored cultivators had disappeared without a trace. From the speed of their movements, how could a one-star horde leader compare to them?

After staring blankly for a long time, Red Earth City Master sighed and hurried back to his room to tell the other city Lords about this.

No matter what, the employment had been completed. Next, they would have to see if the other party really had the ability to completely defeat Spirit Rock City!

At the same time, in order to prevent any accidents, their cultivators would still gather as planned. If the black-armored cultivators succeeded, it would be good. If they failed, they could take advantage of the situation and make it impossible for Spirit Rock City to catch its breath.

.....

Near Spirit Rock City, a few strong figures flew over. After avoiding the giant worms on the ground, they quietly entered a tunnel that had suddenly appeared.

This was the entrance to the dimensional tower, but it had moved a great distance away from its previous opening.

The entrance to the spatial tower was not fixed. It could be moved by the controller's will, and it could even open and close at any place.

Under such circumstances, it was no different from carrying a building with him!

Back then, he had met the dream city Lord once, and he could open and close the entrance of his spatial tower as he pleased. Furthermore, no matter where the dream city Lord was, it was as if he had the dream city with him!

Perhaps this was the dream city Lord's special racial talent, as he had personally admitted that he was a life form from a higher dimension.

However, as long as Tang Zhen completed a three-star Mission and unsealed all the castellan privileges restricted by the cornerstone platform, he might be able to obtain this ability. No matter where he was, he could directly enter the spatial tower!

Of course, this ability had its limitations. Tang Zhen and the space TOWER had to be in the same plane to use it. If he wanted to continue using it in the other world, he had to teleport the space TOWER over!

After the few figures entered the space TOWER, they were immediately enveloped by a ring of light and teleported to the center of the space TOWER in an instant.

They glanced at the surrounding villas and were surprised. Then, they ran straight to the square not far away.

Tang Zhen was currently standing in the square with his head lowered as he discussed something with Blood River King and the others. When the few of them came over, he turned around slightly to take a look.

"City Lord, I'm glad I didn't fail you!"

The leading cultivator in black armor bowed respectfully to Tang Zhen. He was the person who had appeared in red earth Tower City. His true identity was a four star horde leader of the Holy Dragon City!

you've done well. This way, we can have a good reason to do so. We won't cause too much of a commotion and trigger the restrictions of the cornerstone platform!

Tang Zhen's face carried a trace of a smile. He knew that he already had a reasonable excuse to send out his troops and not a brutal pillage that would incur the anger of the masses. This would prevent him from being targeted by the foundation stone platform or even higher level buildings, which would then block or attack him!

The internal conflicts in the world of lounges were like monsters being released. They were all controlled within a reasonable range. Other than forbidding national-level lounges from attacking low-level ones, there was not much interference in the conflicts between low-level lounges.

However, if Tang Zhen led a large group of high-level cultivators to sweep in all directions and pillage all the low-level buildings in a crushing manner, the foundation stone platform of the Warzone would definitely not sit still and do nothing. Instead, it would find a way to punish this black sheep.

After all, he still had another identity. He was the new city Lord of the space TOWER, the controller of a National tower.

However, the situation was different now. A group of non-affiliated cultivators had been hired to attack Spirit Rock City. Even the cornerstone platform could not find any fault with them.

Of course, Tang Zhen would try his best not to make a move during this process to avoid causing unnecessary trouble.

Tang Zhen laughed a few times before he turned to look at Qian Long, Blood River King, and the others. He then waved his fist.

“Guys, get ready, we have work to do!”

...
