

Alternate 1191

[Chapter 1191](#)

1191 The primary target to capture

The empty room was silent for a moment.

After Xiao Dao nodded in acknowledgment, the person in charge let out a soft sigh and slowly sat back in his chair.

When Xiao Dao saw the person-in-charge's troubled expression, he laughed bitterly and said, "Captain, you don't have to worry too much. I'll take responsibility for what I've done. From the start of the plan, I didn't intend to drag my brothers into this.

I know you're worried about me and how you can save me from death!"

At this moment, Xiao Dao's face was filled with gratitude, but he gently shook his head and said, "actually, there's no need for that at all. I'm already prepared to die. The only regret is that I can't see the scene of the enemy being killed while I'm alive!

Xiao Dao's words were firm and decisive. It was obvious that he was not lying, and he was indeed prepared to be punished if the matter was exposed.

The person-in-charge waved his hand. After looking at Xiao Dao for a long time, he took a deep breath and reluctantly said to Xiao Dao, " maybe things aren't as bad as you think. As long as we plan properly, we might be able to get through this crisis!

Disbelief appeared on dagger's face when he heard this. He then gave the person in charge a silly smile and stood up from his chair.

"Captain, I already appreciate your good intentions, so don't waste your energy.

I'm well aware of what I've done. I've already violated the rules of the cultivators of the Shang city. I deserve to be punished. There's no need to involve you in this!

I'm going to plead guilty to the manager now. As for the team leaders, just pretend you don't know anything and don't get involved in this mess!"

As soon as he finished speaking, Xiao Dao was about to turn around and leave, but he heard the person in charge behind him let out a bitter laugh.

"It's too late!"

Xiao Dao's strong body trembled slightly. He slowly turned to look at the person in charge and asked in a shocked and hesitant tone, "Captain, don't tell me you've already cowered?"

that's right. I've already told the manager about this matter, just before you came here.

Xiao Dao's expression was nervous, and there was a hint of anxiety and unwillingness in his voice. "Captain, why do you have to waste your time?"

don't say anymore. What we need to do now is to make use of the current situation to make you redeem yourself. In this way, not only can you avoid punishment, but you may also realize your revenge plan!

Xiao Dao, whose face was ashen, was stunned. He looked at the person-in-charge in a daze and did not know what to say for a moment.

alright, now tell me everything you know, and then we'll discuss how to operate this matter!

Xiao Dao nodded blankly. Even though he didn't think that he could easily get away with it, he still told the captain Everything in detail so as not to disappoint him.

The person-in-charge listened attentively and nodded his head from time to time. No one knew what he was thinking.

At this moment, the person-in-charge's communicator rang. Someone had requested to receive the call. The person-in-charge motioned for Xiao Dao to wait for a moment and immediately turned on the communicator.

The figure of a cultivator from the mall appeared. A black mask covered his face, and there was the mark of the myriad world mall between his eyebrows. He looked cold and mysterious, and had a sense of authority.

"There's news from the laboratory that the item sold in the store by the target has been analyzed.

This was a highly toxic substance produced by a special creature. Just a small portion of it sent to the laboratory was enough to kill an entire Street of tourists. It was extremely toxic!

What was worth noting was that almost all those who were poisoned to death would turn into a spiritual energy form at the same time they died. Moreover, after being nourished by this poisonous substance, their cultivation base would rapidly increase and even their memories of when they were alive would be restored.

However, compared to a real energy body, the strength of this kind of spirit body could only be considered ordinary!

It's also only effective on those with weaker cultivation. If you're above rank 6, you'll be able to resist the poison!"

The person in charge frowned and asked, "Is there any effective way to resist this poison? you should know that only one-third of our tourists are high-level cultivators, and at least half of the tourists are mediocre, which just happens to be within the range of the poison.

Once the target releases this poison inside the mall, coupled with his special hiding methods, it's impossible to guard against it!"

When the subordinate heard this, he gently nodded and said, "the laboratory has seized the time to rush out a special mist-like agent. The moment the poisonous substance appears, the drones and defense towers will fire and cover the area after loading the bullets. This will neutralize the toxicity of the poison and prevent it from causing too much damage!

It was estimated that the special bomb would be completed in about an hour, and its use should not be delayed!

The person in charge nodded. Since the other party's poison was no longer a threat, there was no need to worry too much in the process of capturing them.

However, the problem was that they had no information about their target. Even after interrogating the captured cultivators, they still didn't get the answer they wanted!

The cultivators in the city were also unfamiliar with the target and said that they had never heard of it before. From their attitude, it could be confirmed that this group of cultivators was not deliberately hiding anything.

As a result, the matter became complicated and confusing. Tang Zhen, this special mission personnel, was a strange and troublesome existence to the cultivators of Loucheng and the Myriad World Mall. His danger level also began to rise.

In view of Tang Zhen's cultivation as a Law King and the possibility of him having a highly toxic attack, the person-in-charge thought for a moment before he decisively issued an arrest warrant that could be seen by all the customers in the mall.

After this order was issued, all the places in the Myriad World Mall that were used to display the announcement of the mall immediately refreshed a holographic image. Tang Zhen's head portrait was particularly eye-catching on it.

Even the large holographic billboards of some shops had the same arrest warrant on them, which kept rolling.

When the tourists who came and went discovered this unexpected situation, they immediately walked over curiously. They wanted to see what exactly had happened that was worth the Myriad World Mall making such a big fuss.

As a result, the first thing the curious tourists saw was a long list of bounty numbers that made their hearts jump. It was a total of 10000 mall coins!

This was not a small sum of money. The entrance fee to enter the mall was only one Mall coin, and the price of a bottle of liquid of rebirth was only 100 mall coins!

For many tourists who had been wandering around the Myriad World Mall for a long time, 10000 coins was undoubtedly a huge sum of money!

With a hint of greed in their eyes, the tourists all looked at the content below, wanting to see who was worthy of the Myriad World Mall to issue a wanted order and offer a reward of 10000 mall coins.

However, after seeing Tang Zhen's appearance, all the tourists were at a loss. This was because they had never seen Tang Zhen in person.

In fact, ever since Tang Zhen entered the Myriad World Mall, he had only maintained his original appearance for a very short period of time. Moreover, he was still wearing a hood. Under such circumstances, it was impossible for anyone to pay special attention to his appearance.

As for what he looked like after he changed his appearance, it also appeared on the wanted list. However, no one could provide any valuable clues.

Counting on these tourists to help capture Tang Zhen was obviously not a good chance of success. At most, after discovering his traces by chance, they could inform the myriad world mall in time. In this way, the arrest warrant would not be issued in vain.

The long-term visitors who were very familiar with the myriad world mall had noticed a sharp increase in the number of drones and biological patrols above their heads. Some of them were even clearly equipped with lethal weapons, which was almost never seen in the past!

They could not help but click their tongues in wonder. They were all very interested in this guy who made the myriad world mall act as if they were facing a great enemy!

[Chapter 1192](#)

1192 Tracking and ambushing

At the end of a Street in the myriad world mall, a figure hurriedly walked out of a shop.

After walking on the street, he carefully observed his surroundings. After confirming that there was nothing abnormal, he quickly walked towards the dimensional barrier not far away.

When they passed by a huge glowing plant, the figure suddenly stopped and slowly turned to look at the position next to the glowing plant.

A light pillar with a diameter of half a meter was shot out from the ground. Images floated and swam in it, looking very lifelike. The wanted order issued by the myriad world mall was among them, which was extremely eye-catching!

The figure took a closer look, and a trace of anger and fear appeared in his eyes. Then, he lowered his hood and continued to move forward.

A few seconds after the Magus left, a ghostly figure slowly appeared and spoke a few words into the communication device. It then quickly turned invisible and followed him.

At the same time, in other hidden positions in the distance, a number of fully-armed cultivators from the Merchant City were in stealth mode. They were ready to attack at any time when they received the order.

Due to Tang Zhen's extraordinary strength and his mysterious background, the person in charge of the operation had directly mobilized a combat squad to prevent any accidents from happening during the process of capturing him.

All the cultivators from the Merchant City who were involved in the operation looked at the Sorcerer who had been locked on by the Super creature's brain but knew nothing about it.

In fact, when he suddenly appeared in a Commercial Street, the Super biological brain had already locked on to him, and the follow-up action quickly began!

According to the analysis of the person in charge, these few Magi who were being followed by Tang Zhen were most likely already captured by him and locked up in a place where even the Super biological brain could not monitor!

This statement sounded ridiculous at first glance. The Super biological brain that could control the entire myriad world mall actually had places that it could not monitor?

However, this was the truth, but few outsiders knew about it!

In fact, less than 1% of the dimensional gaps in the myriad world mall had been developed so far. But even so, they had built an unimaginably large Super Mall!

As for the remaining dimensional gaps, they needed to be explored continuously to confirm whether they were connected to the worlds where intelligent races existed. Then, the myriad world mall would contact them and encourage them to open shops in the myriad world mall.

As long as the other party agreed, the myriad world mall would transfer the dimensional gap and merge it with the ever-increasing size of the myriad world mall!

Throughout the entire process, the myriad world mall would naturally take advantage of the first contact to obtain a large number of precious resources. Compared to the invasion of the tower world by force, this method was obviously better and much more powerful than the teleportation invasion!

It was a pity that this model could not be replicated. So far, only one special place like the myriad world mall had been found!

As for invading through the dimensional rift, that was simply impossible. This was because the races that appeared in the dimensional rift were just projections. Only by relying on the special characteristics of this place could items be conjured.

If he were to enter through the dimensional gap, he would only end up in the void. After all, the other party's existence was only a projection, and he had no idea how far away his real body was!

Unfortunately, the probability of finding an intelligent race was not very high. Most of the dimensional gaps that the cultivators in the mall explored were basically dead ends!

In addition to the worlds that could allow living beings to survive, many terrifying stars would also form projections of dimensional gaps here. The consequences of entering it were needless to say!

Every year, there would be casualties in the city of trade. They basically died in the process of exploration. It was also because of this that the myriad world mall would regularly issue free teleportation cards to recruit cultivators to make up for the losses!

These undeveloped dimensional gaps, or places that had been explored and proved to be of no value, would be abandoned and sealed by the Super creature's brain, leaving no means of surveillance.

No matter how rich the myriad world mall was, they would not waste their precious resources on these useless dimensional gaps. The reason was to reduce the energy consumption of the Super creature's brain and reduce operating costs as much as possible!

However, from the looks of it now, this method had a certain drawback. Perhaps, Tang Zhen had made use of this point. That was why he was able to hide without a trace. Even the Super biological smart-brain could not discover him.

Fortunately, this situation was an exception. Otherwise, the managers of the myriad world mall would definitely have a headache!

However, it was also for this reason that the controllers of the myriad world mall attached great importance to Tang Zhen and ordered that he must be captured alive. They wanted to find out how he did it.

Such an unknown method had actually posed a certain threat to the interests of the myriad world mall, so they had to be wary of it!

At this moment, the wizard in charge of collecting the ransom money was still on his way. He passed through many dimensional barriers and gradually approached the edge of the mall. The person in charge, who was hiding in the dark and observing, knew that it might not be long before Tang Zhen appeared in front of him!

After passing through another dimensional barrier, the Sorcerer suddenly stopped in his tracks, as if he was waiting for something.

The cultivators from the mall who were hiding at the side held their breath and focused. They knew that the last moment was coming, so they all subconsciously clenched their weapons.

“Pa da!”

A crisp sound rang out, and a figure slowly walked out from behind a huge glowing ore. However, because of the cloak, it was impossible to see his specific appearance.

The figure stood still in front of the wizard, and the wizard threw out a bag in his hand.

The figure grabbed the bag and opened it. After checking it, he nodded.

“I’ve brought the ransom. It’s time for you to fulfill your promise and release my companions!”

The Magus “tone was very stiff, with a hint of anger and hostility.

“I always do what I say. Now, you can leave together!”

As soon as he finished speaking, the dimensional barrier not far away flashed slightly, and the blood-eyed sorcerer and the others appeared one after another.

The blood-eyed Magus coldly glanced at Zhen Tang before waving his hand at his companions. Then, he turned around and entered the dimensional barrier.

He knew that it was impossible for Tang Zhen to attack him again. However, out of caution, he still got someone to test it out before he felt at ease.

“No problem, let’s go!”

The Sorcerer returned quickly and nodded to the blood-eyed sorcerer, indicating that there were no problems.

The blood-eyed Magus looked at the figure standing in front of him. After hesitating for a few seconds, he gave a serious Magus salute, then quickly turned around and left.

He was thanking Tang Zhen for showing mercy. Otherwise, Tang Zhen would definitely have been able to easily kill them in that completely sealed dimensional gap. However, he did not do so in the end!

The blood-eyed Magus didn't know why Tang Zhen was like this. However, the fact that the other party had let him live was something that the blood-eyed Magus had already remembered in his heart.

If he stepped into the world of loucheng one day and met Tang Zhen again, he might even repay this favor!

The blood-eyed cultivator didn't care about the ransom that Tang Zhen asked for at all. This was because this was a war method that didn't lose face and was suitable for any side that lost.

This method at least proved his value. Moreover, the blood-eyed Magus was of noble status, and clearly did not lack this sum of money.

If Tang Zhen disdained them and let them go without asking for a single cent after toying with them, that would be the greatest trampling and contempt on the dignity of Wizards!

After sending the blood-eyed Magus and the rest off with his eyes, Tang Zhen placed the bag in his hand into the storage space and revealed a satisfied expression.

With these large-denomination coins in his account, his trip was not in vain. Now, he only needed to find a way to complete the mission and find a way to leave.

...

As for the complicated old grudges between the battle zone of the spirit ruins and the Magus world, and even the myriad world mall, he was not in the mood to care at all, because it actually had little to do with him.

Moreover, in the battle between the three behemoths, if he was not careful, he would be smashed into pieces by the torrent, so why should he risk his life?

He just needed to quietly wait at the side and reap the benefits!

Tang Zhen grinned after tidying up his cloak. He gently raised his arm and suddenly blasted out an enormous Fire Dragon to his side!

In the Burning Sea of fire, a dozen Swift figures suddenly appeared and surrounded him, pouncing at him at high speed!

[Chapter 1193](#)

1193 Besieging, chasing, and blocking-1

More than ten figures suddenly appeared in the sea of fire. They were the cultivators from the Shang city who had been following and hiding for a long time!

After the blood-eyed Magus and the others left, they were ready to capture Tang Zhen. However, before they could take action, they encountered Tang Zhen's counterattack!

Under the attack of the fire of law, the cultivators of the city of trade could only move ahead of schedule, and their original plan was completely disrupted.

Although they didn't get hurt because they dodged in time, the cultivators from the mall felt their faces burning. They didn't expect that they would still be discovered by the other party even though they had hidden so cleverly.

Was the enemy too powerful, or was he too incompetent?

There was no time to think about other things. Under the command of the person in charge of the remote command, more than ten cultivators from the Shang city who were in the same Combat Team immediately launched an attack.

They were equipped with excellent weapons. Before they even got close to Tang Zhen, all kinds of terrifying attacks had already arrived. Compared to the fighting style of the Lou Cheng cultivators, the Shang city cultivators paid more attention to cooperation, trying to make the surrounded enemy have no place to escape.

In just an instant, Tang Zhen's surroundings were filled with berserk energy. Its might was sufficient to split apart mountains. However, it was completely blocked by a transparent protective barrier that he had released!

After the fierce attack came into contact with the protective shield, it immediately turned into liquid energy. It was like a wave of water that constantly swam on the surface of the protective shield, looking exceptionally dazzling.

The surrounding ground was affected by this terrifying energy. Several huge ravines immediately appeared on the ground. Only the ground under Tang Zhen's feet remained intact.

"Pa pa pa!"

Seeing that his comrade's attack had been blocked, a cultivator from the Merchant City immediately raised the gun in his hand and shot out thumb-sized bullets at the protective shield, causing it to shake continuously.

The special cannonballs seemed to have the ability to break energy shields. After being blocked, they immediately transformed into Spider-like forms, their sharp claws gripping the energy shield tightly.

As the mechanical spiders glowed at the same time, the protective shield immediately began to move, shattering and disappearing in an instant.

The concentrated and sharp attacks also arrived at the same time as the protective shield shattered!

Tang Zhen shouted in a low voice when he saw this. His body suddenly moved backward and casually threw out a metal-like fireball. It rushed into the cultivators from the Merchant City and suddenly exploded!

The law flames that had been compressed to the extreme spread out, causing the surrounding thousand meters to instantly turn into a sea of fire. Flame feathered snakes flew out from the sea of fire like terrifying bees as they continuously flew towards the cultivators from the Shang city who were surrounding Tang Zhen.

Knowing that these magical creatures were extraordinary, the cultivators didn't dare to be careless. They activated all kinds of energy shields to block the frenzied attacks of the flame feathered snakes.

On the wide street, more than a dozen huge fireballs immediately appeared, looking like a beehive surrounded by bees.

Seeing this, Tang Zhen waved his hand again. Teams of flame cavalry rose from the sea of fire and raised the flame Spears in their hands. They began to attack the cultivators from the Shang city who were trapped by the flame feathered snakes!

The expressions of the cultivators from the Merchant City changed when they saw the valiant and extraordinary flame Knights charging over. Their ears were filled with the neighing of the warhorses as they charged. They could only Dodge the attacks in a panic and had no time to care about Tang Zhen.

Although the cultivation of these cultivators from the Shang city wasn't ordinary, it was still a lot weaker than Tang Zhen's cultivation. They dared to attack because they had the advantage of equipment and numbers.

Furthermore, they were in the myriad world mall. Cultivators from the mall would receive the assistance of the Super biological intelligent brain. Experts of the same level as Tang Zhen were also on the way to reinforce them.

As long as he persisted for enough time, Tang Zhen would definitely be unable to escape even if he had wings!

Who knew that Tang Zhen already had the idea of retreating quickly in his heart to avoid being surrounded. When he saw that the cultivators from the Shang city who were besieging him were being held back, he immediately retreated and his figure ran into the distance like lightning.

The cultivators from the Shang city who were trapped in the sea of fire immediately let out indignant roars. They broke through the interception of the magical creatures one after another and followed in the direction where Tang Zhen had disappeared.

At the same time, the dimensional barrier not far from the sea of fire flickered one after another. The person in charge and another law king who had come to reinforce them had arrived with a large group of people!

The person in charge's face was covered in frost as he watched Tang Zhen's figure gradually disappear into the distance. He coldly swept his gaze over the members of the combat squad that had rushed out from the sea of fire before ferociously giving chase.

This abnormal scene immediately alarmed the tourists. They looked at Tang Zhen in surprise as he disappeared in a flash. Immediately after, a large number of cultivators from the mall with angry faces whizzed over, their bodies filled with killing intent.

Before they could figure out what was going on, they heard a sudden noise in the sky in front of them, and drones fell from the sky one after another.

The plankton in the air could not escape the same fate. Under the influence of the raging energy explosion, they all turned into a rain of blood and sprayed to the ground.

Under the control of the Super creature's smart-brain, the defense towers that no one paid attention to during normal days were all activated at this time. Bright rays of light pierced through the sky one after another, making the sky Flash continuously as if there was a thunderstorm. The loud sounds were even connected together!

At this moment, a different number of cultivators from the mall had also rushed out from the dimensional barrier that was connected to the other commercial streets. With their special privileges, they completely ignored the flight prohibition here and swarmed towards Tang Zhen's location.

At this moment, Tang Zhen was like a small boat struggling in a storm. He was in an extremely dangerous state at every moment. The slightest carelessness would cause the boat to capsize and everyone to die!

A cold glint flickered in Tang Zhen's eyes when he saw that he was about to be surrounded by hundreds of cultivators from the Merchant City. A terrifying law flame suddenly appeared and condensed. At the same time, it continued to spread with him as the center.

A flame giant that was hundreds of meters tall appeared quickly. It bent its back and roared at the cultivators from the mall, spewing flames from its mouth!

The flames were like a river of fire that fell from the sky, engulfing the cultivators from the Shang city. With a series of screams, human-shaped fireballs fell from the sky.

After annihilating a group of cultivators from the Merchant City, the flame giant turned around and spewed out another wave of flames at another group of cultivators from the Merchant City!

The rest of the cultivators from the Shang city did not dare to be careless after seeing their companions being injured by the flames. They dodged with all their might, but even so, some of them were still stained by the flames of the law and could not be put out in a hurry!

A rain of fire fell from the sky and landed on the streets and shops, instantly causing a panic and chaos. Countless tourists and merchants fled in a hurry, trying to avoid the battle.

The sky and the ground were filled with jumping flames, and the area was getting bigger and bigger. One by one, fire Maxim creatures were born from it, and then they bowed to the flame giant as if they were worshiping the God in their hearts!

Seeing this, the cultivators from Shang city immediately became alert and subconsciously avoided the area affected by the flames. They were at a loss as to what to do in the face of the thousands of troops in the sea of fire!

“Tang Zhen, what exactly do you want to do?”

The person in charge gasped and muttered to himself.

He had long guessed that Tang Zhen’s cultivation was extraordinary and might even surpass his own. However, it had only appeared at this moment. The other party’s methods were actually so terrifying!

Instantly creating tens of thousands of magical creatures was no longer something an ordinary magical King could do. Even those at the realm of law comprehension perfection could not do it, because it required terrifying mental power to support it!

Even if it was possible that he had used some special means, it still proved that the other party’s mental energy was extremely strong. Otherwise, there was no way to explain what was happening in front of them!

The person in charge felt a headache at the thought of the magical creatures scattering and attacking in all directions. The entire Commercial Street would probably have to be repaired and rebuilt after this battle!

Because of the huge cost of reconstruction, the person in charge even felt a little regretful. If he had known earlier, he would have used a different method to capture them.

However, he was already in a difficult position. He had caused such a huge commotion in front of everyone. If he still couldn’t capture Tang Zhen, then he would completely lose the face of the cultivators in the Shang city!

[Chapter 1194](#)

1194 Above the laws of nature

The magical creatures that appeared in the sea of fire were basically majestic Knights riding on flaming warhorses. They formed a huge square formation and protected the flame giant in a circle.

A wave of murderous aura spread out from the formation of these flame Knights. It seemed that no enemy could stop their terrifying charge!

At the edge of the sea of fire, there were some strange creatures of laws playing in the waves of fire. They seemed to be very agile. If they were not made of fire, people would have subconsciously thought that they were real living creatures!

The pure fire-elemental energy they carried far exceeded that of ordinary living beings, making them extremely extraordinary!

There was no lack of knowledgeable cultivators among the onlookers. When they saw these strange-looking fire-elemental creatures, they were surprised and their eyes were filled with amazement.

On the roof of a shop in the distance, it was already full of tourists. Some of them were even eating snacks while watching, looking very comfortable.

Even the shopkeeper himself was among them. He looked at the sea of fire in the distance, his face full of joy.

The tourists discussed animatedly, and a white-haired cultivator among the crowd explained from time to time, making everyone sigh.

Tang Zhen and the cultivators from the Merchant City were fighting in full swing, but the entire matter had nothing to do with the tourists. Therefore, the only thing the tourists needed to do now was to find a safe place and quietly watch a good show.

Many cultivators would never have the chance to witness such a Grand and intense battle!

you might not know this, but when a cultivator has perfected the power of a certain law, they will have the special ability to create things from the law. However, due to the difference in strength, the number and intelligence of the creatures they create will be greatly surprising!

The white-haired old man pointed at the magical creatures that were playing and said to the tourists beside him.

“Then tell us, what’s so different about this thing?”

A well-built young man casually said. However, his eyes were staring at Tang Zhen, who was in the sea of fire. A dense shock was hidden within his eyes.

This person was the “money-grubbing young man” that Tang Zhen had met by chance. He was also the one who had warned Tang Zhen that there was a hidden mystery in this mission. It was very likely that it was a plot planned by a traitor of the tower world!

And the truth of the matter was indeed similar!

Upon hearing the money-grubbing young man’s question, the white-haired old man who was eager to show off immediately explained, “There are many types of nomological laws in this world, but they are all derived from several major origin source laws. The closer a cultivator’s comprehension of the nomological laws is to the origin source laws, the more powerful they are!

However, comprehending origin source laws was extremely difficult and very few cultivators could do it.

However, the man who was being hunted by the cultivators from the city of Shang was obviously an expert who had comprehended powerful laws of nature. He might even have pure origin source laws. Otherwise, he could not have such a terrifying combat power!

Ordinary nomological Kings are no match for this cultivator at all. The only outcome of fighting him is death!”

The white-haired old man pointed at the creatures of laws playing at the edge of the sea of fire and sighed. “Do you see those magical creatures? in fact, they weren’t created by the cultivator’s will, but they were automatically generated by the true magical creatures!

Even if they leave the domain formed by the fire of laws, as long as they are placed in a place where the flames exist at all times, they can continue to live. They will only die when the flames disappear!”

The tourists around them were shocked when they heard that. Someone even exclaimed, “If that’s the case, wouldn’t that cultivator be able to create a special race?”

The white-haired old man nodded, then shook his head and sighed, " "You're right and wrong. These creatures of laws can indeed survive independently, but they can't reproduce because they are pure fire-attribute creatures. In a situation where the world Energy in their bodies is out of balance, they can't reproduce at all.

Since they could not reproduce, how could they be called a race?

If he wanted to create living beings that could live and reproduce in the world, he would have to comprehend all the origin source laws or at least have all five origin source laws. Otherwise, he would not be able to do this!

However, when a cultivator reaches the stage of comprehension, they'll try their best to break through to a higher realm. Who would waste their precious time to comprehend the power of origin source laws that are already extremely difficult to comprehend?"

At this point, the white-haired old man let out a long sigh, as if he had thought of something, and a sense of desolation appeared between his brows.

The surrounding tourists were originally listening with great interest, but after the white-haired old man sighed, his face became dispirited. It was like a different person from the way he spoke with fervor and assurance just now, which made the tourists immediately dissatisfied.

why aren't you saying anything? hurry up and continue. What realm is after the king of laws? "

The money-grubbing young man turned his head and asked the white-haired old man. The tourists around him nodded at the same time. Obviously, they were also very interested in this question.

The white-haired old man shook his head and looked at the crowd with a mocking expression. "You're really aiming too high. It's enough to crush thousands of cultivators to have the opportunity to peek into the realm of the king of laws in this life. Why do you have to figure out so many unattainable secrets?

Sometimes, the more you know, the more worries you have. As time goes by, it might even become a heavy burden that prevents your cultivation from advancing even an inch!"

The tourists immediately looked disdainful when they heard this. Someone directly sneered, " if you don't know, just say it. Why do you have to be so mysterious here? you make it seem like you know everything!

The white-haired old man laughed. He had a feeling that he was the only one who was sober. He was very outstanding!

A well-dressed tourist had a disdainful look on his face. He ignored the dissuasion of the guard beside him and said to the crowd, " What's there to hide? actually, I've heard before that the realm after the king of laws is actually called the spiritual Emperor!

It's said that spiritual emperors are of a higher level of life, and they have many incredible abilities. They can control an area of ten thousand miles, change the weather with a snap of their fingers, and all living beings are like ants in their eyes!"

The tourists were stunned, and their faces were filled with shock and suspicion. They did not seem to believe what the other party had just said.

Only the white-haired old man and the money-grubbing young man had a grave expression. After exchanging a glance, they looked in Tang Zhen's direction.

Although the current Tang Zhen appeared majestic, only he himself knew that this kind of formation would not last for long. Even if his mental energy was as vast as the sea, he was still unable to support such a terrifying output for long!

The only thing he could do now was to get out of here as soon as possible to prevent the myriad world mall from dispatching more high-level experts. By then, it would be difficult to get out!

[Chapter 1195](#)

1195 In danger! 1!

As the battle broke out, the entire Street became empty, and the doors of the shops were tightly closed, looking like a ghost town!

At the same time as the battle, the Super biological brain issued an evacuation order, asking tourists and merchants to leave as soon as possible. At the same time, it temporarily closed the entrance and exit passage. Except for verified personnel, no one could leave through the dimensional gap!

The remaining tourists were also expelled by the cultivators of the mall. Even if they were unwilling, they could not fight against these powerful cultivators. Otherwise, they would most likely face the punishment of being expelled and denied entry.

After the Super biological brain had analyzed it, it had determined that Tang Zhen had the means to steal the authority of the waist token. Therefore, it was constantly on guard to prevent him from using the same trick again.

It was also because of the interference of the Super creature's brain that the mobile phone could not send him to the unmonitored dimensional gap in a short time, let alone leave this world!

The myriad world mall did not have many restrictions on small batches of stowaways, which was why cultivators from Lou Cheng had the opportunity to teleport to this world. However, it was extremely difficult to teleport in and out of this world on a large scale because of the defense array of the myriad world mall.

In most cases, the best way to leave was to rely on the teleportation array. As for the success rate of smuggling out, it was pitifully low!

Because Tang Zhen was on the wanted list, it was impossible for him to rely on the teleportation array to leave. Thus, he could only rely on the mobile phone to teleport.

Being in a sealed dimensional gap and surrounded by a large number of cultivators from the mall, Tang Zhen was already in an extremely dangerous situation!

how much time do I have to activate the teleportation? I'm in a very bad situation right now. I can't hold on for too long!

Tang Zhen was suspended in the middle of the flame giant as he asked in a deep voice.

In order to delay the cultivators from the mall and let his phone find a way to escape from danger, he had to constantly activate the power of laws to defend against the enemy. Although the effect was good, it also consumed a lot of his energy.

If he was unable to obtain the result he wanted, then Tang Zhen could only fight a bloody battle with the enemy and even die together!

Under Tang Zhen's questioning, the phone was silent for a few seconds before it gave a rather clear answer.

[the space has been sealed. Trying to break it. Estimated time is around 10 minutes!]

After hearing the notification on his phone, Zhen Tang's brows furrowed slightly as he raised his head to look at the dimensional barrier in the distance.

"It's best to be faster. I don't know how long I can last. I was too careless this time, hehe."

Having a way to escape from a desperate situation was already something that made people feel fortunate. However, Tang Zhen clearly knew in his heart that although ten minutes was not a long time, it was completely enough to carry out a high intensity offensive and defensive battle!

On the battlefield, life and death were often decided. Where would there be so much time to waste?

The cultivators from the Shang city wouldn't give him too much time either. When the powerful reinforcements arrived, they would definitely launch a strong attack on Tang Zhen!

He could only hope that the enemy's reinforcements would come a little later, so that his chances of escaping would be greatly increased.

Unfortunately, Tang Zhen's wish was destined to be unable to be realized under such circumstances. This was because he had already sensed the aura of a powerful enemy that was unceasingly approaching his location.

Because of the powerful strength he had shown, the myriad world mall had finally sent out a strong enough expert, and the aura that the enemy revealed made even him feel a little shocked!

If his guess was correct, this cultivator from Shang city that was approaching him was most likely an expert that had surpassed the realm of a nomological King!

the myriad world mall really thinks highly of me. They actually sent such an expert to participate in the battle!

The corner of Tang Zhen's mouth revealed a ridiculing smile. However, it was soon replaced by a crazy fighting intent. He looked at the group of figures that were rushing over from the distance and coldly laughed as he waved his hand.

Countless flame Knights roared in unison and charged toward the enemy like a Thunderbolt. It was as if a wave of flames was surging forward. Anything that blocked their way was instantly turned into ashes!

All the cultivators from the city of trade dodged to the side in case they were killed!

On the other hand, the enemy that the flame cavalry was attacking did not have any intention of retreating. Instead, they charged forward, especially the cultivator in the lead. He stepped out from the crowd and faced the flame cavalry.

“Owwuuu!”

As the cultivator from the City of Commerce waved his arm, dozens of terrifying giant beasts of law appeared out of thin air. They roared and roared furiously, colliding with the flame cavalry with ferocious expressions.

As soon as the two sides came into contact, a fierce collision immediately broke out. Under the bite and trampling of the precept behemoths, the flame cavalry broke into pieces one after another, but they still launched a fierce attack.

They were like a group of soldiers who were not afraid of death. Facing an enemy who was countless times larger than them, they had no fear at all.

There were too many flaming cavalry. Under their continuous attacks, these giant beasts of law were soon covered in wounds and kept howling in pain.

Unlike the flaming cavalry, these giant beasts of law were all high-level magical creatures. They were almost the same as real creatures, and in some cases, they were even mentally connected to the cultivators who created them!

Seeing that his law beast was heavily injured, the cultivator from the City of Commerce was furious. He rushed into the sea of fire and killed a large number of flaming cavalry with a wave of his hand.

The fire of law that the other cultivators of the City of Commerce avoided like the plague couldn't cause any damage to it!

As this expert stepped into the battlefield, the other cultivators of the Shang city also launched fierce attacks on the flaming Knight. A large number of nomological flames were extinguished one after another, causing the area of the sea of flames to shrink.

If this situation continued, the cultivators from the Shang city would break through the fire cultivator's defense in a few minutes and fight with Tang Zhen.

The situation was precarious. Tang Zhen knew that if he did not take any countermeasures, he would immediately fall into a desperate situation!

He narrowed his eyes and took out an item from his storage space, then gently shook it twice.

“I'll give you an appetizer first, then we'll bring the main course!”

As soon as he finished speaking, he quickly threw the item in his hand towards the group of cultivators from the mall.

The defensive towers on the ground immediately locked onto the item, and several energy pillars accurately hit it. However, at the same time, there was a loud bang, and a terrifying shock wave immediately spread out on the street.

This was Terobo's star destruction mother-child bomb. Although it was just a bullet, it still contained extremely terrifying power. Destroying this Street would definitely be extremely easy!

At the moment of the explosion, the Super biological brain that had been monitoring the scene immediately activated all the waist tokens, teleporting all the tourists who had not yet evacuated to the complete area, and then completely sealed the dimensional gap.

As for the cultivators from the Commerce City, they were immediately moved to a safe place. Only Tang Zhen was left on the huge Commerce Street!

[Chapter 1196](#)

1196 Identity verification _1

After the terrifying explosion, what was left was a scene of devastation.

The power of the star destruction bomb was needless to say. Even if the materials used to build the shops were special, they could not withstand the bombardment of such a destructive weapon. In the end, they would only be reduced to ruins!

The cultivators from the Merchant City shuffled back and forth in the dust that filled the sky. They had killing intent on their faces as they searched for Tang Zhen's traces.

Since the establishment of the myriad world mall, this was the first time it had suffered such heavy losses. This made the manager of the mall, who had been monitoring the battle from a distance, furious. He ordered that Tang Zhen must be captured at all costs!

This was the first time for many cultivators of the Shang city.

In the cultivators' impression, these controllers had always been gentle and elegant, as if they were hermits from the outside world. Their actions also gave people a feeling of a spring breeze.

Especially when it came to fighting and killing, he had always been extremely repulsed.

There was a saying that the merciful would not command the Army. Many things related to killing were actually done by the cultivators of the Shang city. The controller would never interfere easily, and the purpose of doing so was only to protect the interests of the Shang city from losses.

If a controller were to do these things, it would only make the situation worse!

It was also because of the indifferently indifferent nature of the controllers that the myriad world mall had been provoked by the Loucheng world one after another, but had never taken any powerful revenge.

However, the long-suppressed dissatisfaction was already on the verge of erupting. Tang Zhen's appearance had coincidentally caused it to completely explode, causing the controller to personally issue the order to capture him!

In fact, even if Tang Zhen did not appear, this situation would happen sooner or later. This was because with the greed of the cornerstone platform, it would definitely not let go of such a huge piece of fat meat!

The Shang city cultivators who had received the order continued to search the ruins. At the same time, a large number of reinforcements had arrived. Any loopholes that could allow Tang Zhen to escape had been completely sealed. They had to capture him alive!

At the center of the explosion, more than a dozen figures were floating high in the sky, coldly sizing up the wreckage on the ground.

According to the estimation of the Super biological brain, the direct loss of the myriad world mall this time had exceeded 10 million mall coins. If the subsequent restoration and reconstruction, as well as the compensation for the shops, this number would probably double several times!

This was definitely not a small sum. Even the total wealth of some worlds added together was far less than this.

It was just a cultivator from Lou Cheng city, but he had caused such a huge loss. This situation was beyond everyone's expectations, and it was a heavy slap to the faces of the cultivators from Shang city who thought they could protect the city!

Compared to the anger of the ruler, the cultivators of the City of Commerce felt a trace of shame and humiliation. Only by capturing and killing Tang Zhen could they recover some of their lost face.

what are you all doing? why haven't you found any traces of that cultivator from Lou Cheng after searching for so long? "

The reprimanding voice came from the cultivator in the lead. He was the one who had fought with Tang Zhen earlier and created a few powerful law beasts. Moreover, his strength had obviously surpassed the level of a law King.

Although he was still a distance away from the next realm, Tang Zhen was definitely not his match!

Lord Deputy Director, we've searched every inch of the center of the explosion, but we didn't find anything. We don't know where he's hiding either.

The person in charge of capturing Tang Zhen bowed and replied. His face was filled with a depressed expression. He could be considered to have personally experienced how powerful and difficult it was to deal with Tang Zhen.

The cultivator who was called the deputy manager snorted. His expression softened, but his tone was still cold."The orders given by the controller must be carried out thoroughly. Therefore, you must collect all of them for me even if this Tang Zhen is burned to ashes.

This matter is related to our reputation and the evaluation of our abilities by the controller, so we can't allow any mistakes. Do you all understand?"

The person-in-charge and the other cultivators from the Merchant City nodded in agreement with a solemn expression.

"Then tell me where cultivator Lou Cheng might be hiding. You must know that this place has been completely sealed by the Super creature's artificial intelligence. It's impossible for him to escape using the loophole on the waist token.

with his strength only inferior to mine, it's impossible for him to die in the explosion just now. The real purpose of him detonating the bomb might be to hide in the chaos!

So this person must still be hiding here. As long as we look for him carefully, we'll definitely be able to find him!"

The cultivators were also confused. The weakest cultivator in the city was a King level cultivator. No enemy could escape their spiritual scan.

Perhaps the other party was hiding in a corner that they did not expect, and was coldly watching them dig three feet into the ground to search?

After realizing this point, the person in charge's heart suddenly jolted. He recalled Tang Zhen's ability to change one's appearance. It was so realistic that even the Super creature's brain was unable to distinguish it!

"Not good! He must be hiding among us and disguised as a cultivator from the Shang city!"

The person-in-charge roared, causing the other cultivators' expressions to change. They then looked at each other nervously with a trace of vigilance in their eyes.

The surrounding cultivators from the Shang city were the same. Some of them even raised their muzzles, hinting at the suspicious targets.

"What are you all doing? put down your weapons!"

After the deputy manager reproached him, he coldly glanced at the cultivators around him and ordered in a decisive tone, "All cultivators of the Shang city who are involved in the operation, gather at my location immediately. Anyone who disobeys my order will be killed without mercy!"

The voice resounded through the clouds and reverberated in the destroyed dimensional gap.

The cultivators from the Shang city who were participating in the search and capture received the order and ran to the designated location without any hesitation to avoid being suspected by their companions.

It didn't take long for them to gather in the open space in front of the Deputy Director. Each and every one of them had a serious expression on their faces, and there was a trace of doubt in their eyes.

"All of you, come before me one by one and report your names and ID numbers. Don't hide anything!"

Ignoring the reactions of the cultivators, the deputy manager pointed at a random person and said, "we'll start with you. Tell us your name and identification number.

The cultivator from the Shang city immediately gave his name and a string of special numbers.

"Verification complete!"

A ray of light swept across the cultivator's body, and the voice of the Super biological brain came from somewhere unknown, proving that the other party was indeed the real person and not the enemy in disguise.

The Deputy Director waved his hand, signaling the next cultivator to step forward and continue to be tested by the Super creature's artificial intelligence.

As if they had realized something, the cultivators from the City of Commerce actively cooperated with the test. However, after dozens of cultivators were checked, their identities were proven to be correct.

However, the deputy manager and the others didn't look relaxed at all, because there were still dozens of cultivators from the mall who hadn't been tested, which meant that the enemy was very likely to be hidden among them.

"It's your turn, tell me your name and ID number!"

The person-in-charge pointed to a cultivator from the mall. Although he had some impression of this person, he still continued to examine meticulously.

The cultivator raised his head and glanced at the person in charge expressionlessly. However, a strange smile appeared on his face, causing the person in charge's heart to tremble.

Just as he was about to warn his companions, he saw the other party suddenly throw out an item that looked familiar.

"This is a red mist bomb!"

...

The person in charge's expression changed drastically, and he suddenly let out a cry of surprise.

[Chapter 1197](#)

1197 Breaking out of the encirclement! 1!

As the person-in-charge exclaimed, all the cultivators of the mall changed their expressions.

The cultivators had already suffered one of Tang Zhen's bombarding attacks. However, because they had been teleported away in time, not many cultivators from the Shang city were injured. However, it was inevitable that they were covered in dust.

The cultivators of the Shang city were also afraid of this special bomb that had an amazing destructive power and a large area of coverage. Even though they were King-level cultivators, they still did not dare to face the blast with their bodies.

In that case, it would be no different from courting death!

To the cultivators of the Shang city, it was already a very unpleasant thing to be blown up by the enemy in their own territory. However, it was going to happen again!

While they were frightened, they were also filled with anger. They swore that they would not let the bomb go off successfully.

Therefore, the moment Tang Zhen threw the bomb, more than half of the cultivators from the Shang city used all kinds of confinement techniques to wrap the bomb in an attempt to prevent it from detonating again.

The other half of the cultivators from the Merchant City locked onto Tang Zhen and launched fierce attacks from all directions.

As the target of the cultivators from the Shang city, Tang Zhen immediately felt as if he was in a stormy sea and was surrounded by killing intent!

“Come on, let’s see what you can do to me.”

Tang Zhen wildly laughed. The talismans carved out of spirit Jade appeared like spurting spring water. They scattered around his body and continuously revolved around it. Furthermore, they were all activated and used at the same time!

A super-thick protective shield that the cultivators from the Shang city had never seen before suddenly covered Tang Zhen’s body. It was unknown how many layers it had, but it blocked the attacks from the cultivators from the Shang city.

However, under the attacks of the cultivators from the City of Commerce, the protective barrier was instantly shattered. The second layer was shattered, followed by the third and fourth layers.

It was only the first wave of attacks, and countless layers of protective shields had been shattered!

The shockingly thick protective barrier also began to disappear at a speed that was visible to the naked eye. If this situation continued, Tang Zhen would be facing the frenzied attacks of the cultivators from the Shang city in just a few seconds.

The person in charge by the side revealed a cold smile. From the way he saw it, Tang Zhen would definitely be unable to escape this time around!

However, just as the smile appeared, it suddenly froze on his face, because the person in charge heard the rapid alarm of the Super creature’s artificial intelligence.

warning, an unknown force has invaded. It is attempting to unseal the space. Please take immediate action to stop it!

the unknown force has successfully infiltrated the AI. Part of the AI’s authority has been stolen. The enemy is attempting to activate the teleportation. Please take immediate action to stop it and prevent the enemy from using the stolen authority to destroy it!

the teleportation has been activated. Unable to intercept. Tracking mode activated. Please head to the teleportation destination immediately and kill him on the spot!

The Super biological brain issued three consecutive warnings and orders, causing the expressions of the Shang city cultivators to change drastically. They looked at Tang Zhen, who was still sneering in the midst of the stormy waves, and immediately understood where his confidence came from!

To be able to smile so confidently under the attack of so many cultivators from the Shang city, he must either be crazy or have a trump card to escape.

Clearly, Tang Zhen had a trump card that could allow him to obtain a thread of life from a desperate situation and leave in front of everyone’s eyes!

“Stop him! We can’t let him leave!”

The person in charge let out a furious roar and launched a full-force attack at Tang Zhen, vowing to kill him!

The deputy manager, who had been watching from the side ever since Tang Zhen was exposed, also chose to make a move at this moment. A terrifying aura that caused everyone’s heart to palpitate wildly blasted toward Tang Zhen.

“BOOM!”

All of the protective barriers shattered completely. Tang Zhen’s body was like a doll that was sent flying as he violently vomited blood and flew backwards.

At the same time, a special power wrapped around him, and his figure began to fade away. It was obvious that he was trying to escape from this dimensional gap.

just you wait. One day, I will charge into the myriad world mall again and make you pay an unimaginable price!

Tang Zhen’s eyes were blood red. His body was covered with cracks and there was a faint energy glow flickering below. However, the glow appeared extremely unstable, as though it would be extinguished at any moment.

This situation represented that Tang Zhen had already suffered serious injuries. It was so serious that his life was in danger!

However, until the last moment before he disappeared, the cultivators from the Shang city did not see any signs of pain on Tang Zhen’s face. There was only an indescribable sinister sneer that made their hair stand on end.

If such a difficult enemy did not die and escaped, he would definitely become a major problem for the myriad world mall in the future!

“We must kill him at all costs!”

The Deputy Director roared and punched the bomb left by Tang Zhen, instantly shattering it into pieces!

Just as the Deputy Director’s order was issued, the Super biological AI’s voice sounded again. This time, it provided the location where Tang Zhen had appeared after being teleported.

the enemy is in the fifth dimensional gap prison. Please head to the location immediately and kill him!

Upon hearing the notification from the Super biological brain, all the cultivators from the mall were instantly stunned. They didn’t expect that Tang Zhen would actually walk right into the trap and run into the Dimensional Prison that they specially used to imprison criminals.

However, when they thought of Tang Zhen’s strange methods, the expressions of all the cultivators from the mall, including the deputy manager, changed. Without the slightest hesitation, they rushed towards the dimensional barrier to leave this place.

They were afraid that their slow speed would lead to new changes!

At the same time, all the cultivators of the Merchant City who were closest to the fifth Dimensional Prison also received a warning from the Super biological artificial intelligence. They immediately rushed to the designated location to capture Tang Zhen.

However, when they approached the entrance of the Dimensional Prison, they were shocked to find that the passage there had been forcibly opened by someone. A group of fiendish prisoners were rushing out impatiently.

They laughed without restraint. They were filled with madness and bloodlust.

At the edge of the exit, Tang Zhen, who had blood on the corner of his mouth, was leaning against the wall. He was sneering at the cultivators from the Shang city who had rushed over.

damn it, we can't let them escape. Otherwise, the myriad world mall will be in chaos!

A cultivator from the City of Commerce roared and attacked a prisoner without hesitation.

He didn't know what method Tang Zhen had used to open the passage to the Dimensional Prison, but he knew that once the prisoners detained by the myriad world mall escaped, they would definitely launch the craziest revenge operation against the mall!

However, before the cultivators from the Shang city could attack them, the prisoners who had been imprisoned for countless years grinned and charged at them without dodging.

Long-term imprisonment could cause a person to have a mental breakdown. The torture of the cultivators in the mall was still fresh in their minds. They had long vowed to take revenge in their hearts, but because they were imprisoned in the Dimensional Prison, they could not get their wish!

Now that the opportunity was right in front of them, how could they miss it?

As the prisoners fought with the cultivators from the mall, more prisoners swarmed out of the Dimensional Prison, looking for possible escape routes.

"Brother, aren't you going to leave with us?"

...

Nearly a hundred Lou Cheng cultivators came out of the Dimensional Prison. They were the cultivators from the war zone of the spirit ruins who had carried out the mission with Tang Zhen previously. Compared to their full armor when they came, they were only wearing a single layer of clothes at this moment. Many of the cultivators were covered in shocking wounds.

A cultivator from Lou city looked at Tang Zhen and asked with a slightly concerned voice.

If it wasn't for Tang Zhen's sudden appearance and the use of special methods to open the Dimensional Prison's channel, who knew if they would have had the chance to see the light of day again?

The controller of the myriad world mall did not like to kill, so he chose to imprison the enemy. However, he did not know that this endless imprisonment was actually far more terrifying and desperate than death!

[Chapter 1198](#)

1198 The private collection of the Super biological smart-brain

They had thought that they would never be able to escape the shackles of this life, but they did not expect a pleasant turn of events. They were able to escape from this prison full of the bones of the desperators.

The cultivators of Lou Cheng were grateful to Tang Zhen, who had appeared in time and rescued them. At this time, they even took the initiative to take Tang Zhen away from here.

no need. I still have things to do. You guys should leave quickly!

Tang Zhen gently shook his head and rejected the other party's help.

alright, if you have the opportunity to go to the center of the spiritual ruins in the future, remember to come to the city I'm in. I'll treat you well!

The law King smiled and shook hands with Tang Zhen before saying the name of the city he was in.

When the other cultivators of the tower City saw this, they also laughed and told Tang Zhen the name and location of their respective towers. They invited him to visit them when he had the opportunity.

alright, brother, we should go. We'll meet again!

The leading nomological King laughed and charged at the cultivators from the Shang city who had come to reinforce him. His battle intent was shocking, and the sound of battle resounded through the sky!

At the edge of the battlefield, Tang Zhen was like a spectator as he coldly watched the prisoners and the cultivators from the Shang City Fight.

Due to the fierce attack he had suffered earlier, Tang Zhen was currently severely injured. If it was not for the extremely strong endurance of a law King, he would have already fainted. Naturally, he would not be able to continue participating in the battle.

Fortunately, everything was going according to plan. He was now out of danger. Even if he was still in the myriad world mall, he did not have to worry about falling into the hands of the cultivators of the mall.

Not only did he get a chance of survival at the cost of being seriously injured, but he also used his mobile phone to hack into the Super creature's brain and randomly obtained some authority.

Relying on the authority he had temporarily obtained, Tang Zhen made a decision in the shortest time possible and opened a Dimensional Prison channel that imprisoned Lou Cheng's cultivators and many prisoners.

Only by using these prisoners to pin down the cultivators of the Shang city and create a bigger chaos would he have a chance to escape from this desperate situation!

have you found the coordinates of a connected plane? I need to leave this place as soon as possible!

Tang Zhen noiselessly hid in a hidden corner and asked in a deep voice through his phone.

[the plane coordinates have been locked, and you can teleport at any time. However, your body is severely damaged, and it is likely that you will suffer even greater damage during the teleportation process, or even endanger your life!]

[do you wish to proceed with the teleportation? please make your choice.]

Looking at the notification given by his phone, Tang Zhen laughed dryly and said, "If I stay, I'll definitely die. If I teleport away, I'll have a chance of survival. What do you think I should choose?"

it's just that I'm a little unwilling to go all the way here for nothing, and I'm also covered in injuries!

Tang Zhen shook his head in annoyance. He knew that his injuries were serious and it was a problem for him to protect himself. It was likely that the mission this time around had already been ruined.

If he missed this rare opportunity, who knew when he would be able to complete the unsealing mission of the spatial tower?

The thought of the space TOWER's deadline approaching and it was very likely to be downgraded from a national-level tower to a first-class tower made Tang Zhen feel extremely depressed.

[when I hacked into the Super creature's brain just now, I intercepted some special information. If you're interested, you can give it a try. It might be able to make up for your regrets and losses!]

Tang Zhen's brows twitched when he heard this. His tone carried a trace of surprise, "What special information? why don't you tell me?"

[when the Super biological brain was handling the transfer of resources from the myriad world mall, it secretly did something. It secretly intercepted and hid a part of the resources in a hidden dimensional gap!]

I can't believe there's such a thing. Could it be that the Super biological brain of the myriad world mall also has selfish motives and wants to build its own little Treasury? "

Tang Zhen revealed a curious expression. Clearly, this matter had exceeded his expectations. He was also extremely curious about the resources that the Super biological brain had secretly kept.

The wealth of the myriad world mall was almost uncountable, and the things that the Super biological brain, the Butler, had taken a fancy to and kept for himself were definitely not ordinary!

If it was possible, Tang Zhen Jue didn't mind packing it away. It could be considered as a small revenge against the Super creature's brain.

From the beginning to the end, it had been assisting the cultivators of the Shang city, which caused Tang Zhen to be restricted in many ways and eventually reduced to this situation.

"Can you send me to the location where the supplies are stored? I plan to collect some interest first."

[through analysis, it has been determined that the Super biological brain is extremely strict in guarding the locations where the supplies are stored. Its purpose is to prevent anyone from discovering and stealing the supplies.]

[the dimensional gap where the resources are stored is a dimensional projection of a special celestial body. Its gravity is 20000 times that of the original world, and this is greatly weakened due to the projection!]

if you wish to enter, you will be protected by a special force field. However, you only have three seconds to retrieve the item. If you exceed the time limit, you will be instantly crushed into powder!

Tang Zhen pondered for a moment before gently nodding.

three seconds is enough to do a lot of things. I only hope that the dimensional gap is not very big and that the supplies were not abandoned!

He took out a bottle of concentrated healing potion from his storage space and drank it in one gulp. Then, he immediately issued an order to his phone.

I'm ready. Let's start!

[after obtaining the resources, you will be directly teleported to an unknown location. The operation begins now!]

A ray of white light enveloped Tang Zhen's body and forcefully tore open this dimensional gap, sending him to an unknown region.

[we've arrived at our destination. Please begin the operation immediately!]

Tang Zhen's eyes suddenly opened the moment his phone rang. He rushed toward the area in front of him at lightning speed.

It was a vast white world that seemed to be only a few hundred square meters in size. The ground was filled with transparent crystal pits that emitted a dizzying light like a huge incandescent light bulb.

Only the heavens knew where the Super biological brain had stored the resources. This was because Tang Zhen had not seen any items on the surface. How would he search for them?

He had thought that three seconds would be enough, but now it seemed that that was not the case!

However, for a mobile phone, three seconds of protection time was already the limit that it could withstand. It couldn't do anything more than that!

Since he did not have the time to carefully search, the only thing Tang Zhen could do at this moment was to use the storage ring's function to directly store the surrounding empty area.

It was also at this moment that Tang Zhen suddenly felt an intense vibration coming from the inside of his storage ring. It seemed as though it would break apart at any moment!

He was slightly happy, knowing that he might have already gained something.

[Time's Up. Teleportation begins!]

Just as the phone's notification rang, Tang Zhen felt a terrifying heavy pressure wrap around him, making him feel like he was about to explode into a cloud of blood mist.

...

After losing the protection of his phone, he realized how terrifying the pressure was!

Fresh blood wildly spurting out from the shattered wounds on his body. If it was not for his half-energized body sealing up the wounds, Tang Zhen would have died from blood loss in an extremely short period of time.

Fortunately, this process lasted for a very short time. In an instant, he felt the familiar power of teleportation. Although it still brought him a painful feeling, it was undoubtedly much better.

However, Tang Zhen, who was seriously injured and had lost blood, was unable to continue enduring this kind of pain. His body's protective function caused him to directly enter an unconscious state.

Tang Zhen entered an unknown world while he was completely unconscious. He landed heavily on a pile of garbage that was filled with an overpowering stench!

[Chapter 1199](#)

1199 Trash mountain's native

This was a strange world. There were pitifully few plants on the surface, and it seemed extremely barren.

Other than the tornadoes and the billowing smoke, this place did not seem suitable for any living being to reproduce!

However, there were still some scavenger birds that appeared from time to time above the huge garbage dump. They searched every inch of the ground, hoping to find food to fill their stomachs.

“OWW ~”

A carrion bird suddenly discovered a human-shaped object lying in a pile of trash on the ground. It seemed to be dead.

It let out an excited cry and informed its other companions before it swooped down towards the food!

The strong desire to eat made the other carrion birds follow closely behind, their mouths constantly letting out unpleasant cries.

Although the human-shaped object in front of it did not exude the pungent smell of decay, the smell of blood was extremely strong. Therefore, in the consciousness of the scavenger bird, even if the human-shaped object was still alive, it would not live for long.

Sometimes, in a similar situation, coupled with the fact that the carrion birds were extremely hungry, the fierce and cruel carrion birds would even attack directly and tear their prey that was far larger than them into pieces, instead of waiting for the target to die completely before making a move!

The flock of carrion birds that appeared today were the kind of birds that liked to hunt dying targets. There were more than 70 of them in total, and they descended like a dark cloud.

“Pilalala!”

The scavenger bird that landed first landed beside its prey. It tilted its bald head and sized it up with its blood-red eyes. Then, it suddenly stuck its head out and pecked at the prey.

Ding! Ding!

There seemed to be a faint sound of metal clashing. A trace of pain flashed in the scavenger bird's fierce eyes. It quickly retracted its head and took a few steps back, constantly flapping its wings.

By the time it stopped, its head was still constantly shaking. Cracks had already appeared on its curved beak, and blood was constantly seeping out from the edge of the wound, as if it would fall off at any time.

It was obvious that the scavenger bird had suffered a great loss from the previous Peck. It might even starve to death because of its broken beak!

At this moment, the other carrion birds had all landed on the ground. They surrounded the bloody prey on the ground, looking extremely restless.

Even though the first companion to attack was injured, it did not scare the other carrion birds at all. They carefully moved forward and constantly tilted their heads to look at their prey. After making sure that their prey had no reaction, they suddenly launched an attack.

“Ding ding dang dang!”

A series of metal clanging sounds rang out. The carrion-eating birds felt that after they touched their prey's body, they were immediately bounced back by a huge force, and a sharp pain came from their beaks.

A few carrion birds flew back a few steps from the ground in pain. They cried out in pain and then suddenly rushed into the sky.

The intense pain made the scavenger bird certain that this seemingly dying prey was not to be trifled with. Therefore, the cunning and cautious scavenger bird decisively chose to fly away from this place to avoid further danger!

When the other carrion birds saw this, they seemed to be unwilling, but their naturally cautious nature drove them to leave reluctantly.

This prey that seemed to be on the verge of death was actually quite dangerous!

After the group of disappointed carrion birds left, the garbage mountain returned to its calm state, as if this was a dead and silent land without any signs of human habitation!

This situation continued for an unknown amount of time until a slight noise suddenly came. Dozens of figures slowly appeared on a huge garbage mountain in the distance.

These figures that suddenly appeared were of different heights, wrapped tightly in robes made of various materials, and the large goggles on their helmets were extremely conspicuous, making people mistakenly think that they were some kind of creature with huge eyes.

After they emerged from the pile of rubbish, they stood on the high ground and looked around as if they were waiting for something.

Not long after, another group of Aboriginals in the same dress appeared. They each occupied an area, and they were all looking at each other vigilantly, pointing their simple weapons at each other.

“Shua shua shua”

A loud boom suddenly came from the sky, followed by several large flying objects piercing through the clouds and approaching the garbage mountain.

When the strangely dressed natives on the ground saw this, they immediately turned their attention to the flying objects and used the surrounding garbage to hide themselves.

Under countless gazes, the huge flying devices slowly flew over the garbage mountain, and then a huge amount of garbage fell from the sky and landed on the edge of the garbage mountain.

The earth rumbled, and in the blink of an eye, another huge mountain of garbage appeared. An indescribable strange smell immediately filled the air.

Although they were separated by thick lenses, the greedy gazes of the Aboriginals when they looked at the garbage mountain could almost be seen through the lenses!

After the aircraft slowly left the place and gradually disappeared on the horizon, all the Aboriginals suddenly jumped out of their hiding places and rushed to the huge Fresh Garbage mountain as fast as they could.

Only God knew where these Aboriginals were hiding. At this time, they were like ants emerging from the ground. They quickly surrounded the garbage mountain and began to frantically rummage through the garbage, trying to find something that could be used.

Sometimes, these strange-looking natives would even fight over the same item, even to the point of fighting!

Every time this happened, the natives with strong bodies and weapons would stand up. They seemed to play the role of Warriors, responsible for fighting against competitors and protecting their own interests.

Although the garbage mountain was huge, there were very few useful resources. It was not an easy task to dig it out.

There were fights for items from time to time, but they weren't intense. This was because the most important thing right now was to find as many useful items as possible and then leave this place in the shortest time possible!

As for the reason for doing so, it was actually very simple. It was because this trash did not belong to them!

hurry up. We only have an hour. Bring as many useful items as you can. Do you all hear me? ”

A man with a huge machete in his hand stood on the garbage mountain and shouted at the busy figure in front of him. From time to time, he would look at the wilderness in the distance, his eyes revealing a sense of urgency.

Time slowly passed, and when a dark cloud slowly appeared in the distant sky, all the natives immediately stopped what they were doing and gathered with their companions. Then, they carried the items they had collected and quickly fled.

Somewhere in the garbage mountain, more than a dozen Aboriginals were running at their fastest speed, trying to avoid the dark clouds. However, when they crossed a Gully, one of the Aboriginals let out a scream.

Morris, what are you shouting for? why are you still here? are you waiting for the destructive storm to tear you to pieces? ”

The man holding the huge machete roared, but his eyes subconsciously followed the direction his companion named Morris was pointing. Then, a man covered in blood, but unconscious on the ground, entered his sight.

Looking at the unconscious man’s strange dressing and the serious injuries all over his body, the leader, the muscular man, frowned and shook his head, ” “We don’t know where this guy came from. Maybe he’s already dead. Besides, the destructive storm is coming. We have to leave as soon as possible!”

but Uncle Jim, I don’t think this person is dead yet. It’s very possible that he can be saved. Why don’t we bring him back? ”

After Morris said that, he actually rushed towards the unconscious man with his bag on his back. Uncle Jim was so angry that he stomped his foot and rushed forward, afraid that this reckless guy would be hurt.

“Uncle Jim, he’s still alive. Shall we rescue him and bring him back?”

Morris ‘tone carried a hint of excitement as he shouted at Uncle Jim, who had a helpless look on his face.

...

[Chapter 1200](#)

1200 The strange unconscious person

“Sigh, you little fellow, I really can’t do anything to you!”

Uncle Jim sighed. He had always felt helpless about Morris ‘habit of ” picking up people.

In the past few years, this kid had ” picked up ” more than a dozen injured Wanderers with unknown identities. Some of them died very quickly after being picked up, some chose to leave after recovering, and some stayed in their team.

This included Jim himself, who was actually picked up by Morris. After his injury recovered, he stayed and became the trusted Uncle Jim.

Therefore, Uncle Jim could not stop Morris 'habit of picking up people. Most of the time, he was responsible for helping Morris " pick up " people and bring them back to their residence.

As for whether the other party was dangerous or not, Uncle Jim never had to worry because he had enough confidence to ensure that his companions would not be hurt.

However, the unconscious man in front of him made Uncle Jim feel a little uneasy, and he subconsciously wanted to refuse Morris 'request.

"It's a dangerous situation now. We can't be afraid."

As Uncle Jim said this, he happened to see Morris's pleading eyes. In the end, his heart softened, and he put the machete in his hand back into the scabbard. He reached out and tried to pick up the man lying on the ground.

However, when he grabbed the man's body and was about to pull him up, he realized that the other party seemed to have grown on the ground. He could not move at all!

damn it, is this guy a robot? how can it be so heavy? "

Uncle Jim was shocked. If the other party was a robot, he definitely could not bring it back, as it would bring danger to his companions.

However, when he saw the man's broken skin and flesh, as well as the White bones, he immediately made a judgment. This was definitely a normal human with blood and flesh!

"Morris, we can't take him away because I can't move him at all!"

Uncle Jim shook his head helplessly and reached out to grab Morris 'arm, trying to take him away from this place.

Morris had also seen the scene just now. He stood up unwillingly. He understood that the situation was very dangerous. If they were caught in the destructive storm, none of them would be able to survive!

Although he had only seen the destructive storm from a distance, Morris was very clear about its horror. The dark clouds formed by countless miniature robots would refine and break down all materials that could be recycled, then store them and continue to produce new miniature robots!

Fortunately, they were only active near the garbage mountain. Every time a new garbage was dumped, these miniature robots would appear and collect the resources they needed from the garbage.

After being collected by these miniature robots, almost all the garbage would be cut and decomposed, becoming riddled with holes or even turning into powder. They could no longer be used!

It was for this reason that the Aboriginals had tried to find some usable complete items from the garbage mountain before the appearance of the miniature robots to make the tools they needed.

However, when the miniature robots were working, no living beings were allowed to appear on the garbage mountain. Otherwise, the miniature robots would treat them as a part of the garbage and would cut them up without hesitation!

&Nbsp; this was why the natives would try their best to escape from the area where the trash mountain was when the terrifying storm arrived, so as to avoid being completely devoured.

This unconscious guy could only blame himself for being unlucky. He had actually fainted on the garbage mountain and couldn't be moved at all!

"Alright, Uncle Jim, let's leave quickly!"

Standing up quickly, Morris carried the bag of miscellaneous items on his back and was about to leave.

However, at this moment, he felt his calf being grabbed by someone, as if it was an iron plier. Then, he saw Uncle Jim pull out his knife nervously, staring at Morris's back.

"Let him go, or I'll kill you!"

Following Uncle Jim's roar, Morris also turned around nervously and looked at the unconscious man.

A pair of clear and calm eyes that seemed to be able to see through everything met Morris' eyes just like that, causing him to shiver slightly.

"Please help me leave this place, thank you!"

After the man said that, he clenched his fist. Morris saw a glimmer of light flash from his hand. It seemed that a strange power appeared at the same time.

Morris subconsciously ran two steps forward, but he felt as if there was some kind of light object hanging on his leg. Then, he found that all his companions were looking at him in a daze.

Behind the transparent lens, there was a look of horror!

"Damn it, what's going on?"

Uncle Jim growled, rushed to Morris' side, and pulled at his calf twice.

Morris leaned over curiously, only to find that the man who had been as heavy as an iron block earlier was now floating in the air, swaying with his footsteps.

However, after a short period of consciousness, the man had fallen back into a coma.

Seeing that Uncle Jim was unable to pull away the unconscious man's hand and was trying to raise the machete in his hand, Morris quickly shouted, "Uncle Jim, you can't do that!"

"Since he's asking us for help, and it's not as heavy as before, let's take him away, okay?"

no, don't you see how abnormal this guy is? who knows what kind of monster he is? "

Uncle Jim's face was filled with determination. He did not care about Morris's dissuasion at all. He raised the knife in his hand again and swung it at the man's arm.

"Bang!"

The sword landed on the man's arm, but blood didn't splatter. Instead, the sword was sent flying by the huge force and landed on a pile of trash a dozen meters away.

One of his companions quickly ran over to pick up the machete, only to find that the edge had been rolled back and was badly damaged!

Due to the extreme scarcity of metal, Uncle Jim treasured this machete very much. Now that he saw that his weapon was damaged, he immediately felt so distressed that the corners of his mouth twitched continuously.

Morris was also shocked, but when he saw the knife fly out and the man's arm was intact, he heaved a long sigh of relief and said to Uncle Jim, "Uncle Jim, since we can't get rid of him, we can only bring him back for now and then think about other things!"

besides, this person is very mysterious and must be very capable. If he can help us to repay our kindness, maybe we can live a better life!

Seeing the determination on Morris' face, Uncle Jim could only sigh helplessly. He asked everyone to leave as soon as possible because a terrible storm was coming.

As for Morris, who was running at the back of the group, he looked extremely strange at the moment. A man who was like a balloon was grabbing his calf with one arm, and it was still shaking with the bump of the running!
