

Alternate 121

Chapter 121: The mother tree and the one-sided battle

“the transportation was already in place, and the holy dragon city’s combatants were also ready. they only needed to wait for the next morning to charge towards the houndhead men’s lair. ”

“After Tang Zhen saw that there was nothing for him to do here, he turned around and headed to the back mountain cave. He took out the various materials that he had prepared to sell on the cornerstone trading platform and put a price on them one by one. ”

Tang Zhen only turned around and left in satisfaction after the entire house was filled with all kinds of supplies. He would come back to check again after this busy period of time to determine exactly what kind of goods had a market in the other world.

“After Tang Zhen had some free time, he returned to his room and sat on a comfortable large chair. He took out a book with green leaves from the space and began to slowly read it. ”

“The green leaf books left behind by the tree spirit race were rich in content, and Tang Zhen would often be inspired when he read them. ”

“The more he understood the tree spirit clan, the more Tang Zhen admired the strength of the mother tree. If he could make good use of the mother tree’s power, he would definitely bring the Holy Dragon city’s strength to another level. ”

“The books he was reading now were about the cultivation of the mother tree. Unlike ordinary loucheng, the loucheng built by the mother tree was alive. If the cultivation method was not right, it could even lead to the death of the mother tree, and then the loucheng would no longer exist. ”

“According to the tree spirit tribe’s experience, there were two ways to cultivate a mother tree. The first was the method used by the tree spirit tribe. They watered the mother tree with a spring water called ‘moon spring’, then prayed in the morning and evening to communicate with the mother tree. The mother tree cultivated in this way would emit the natural aura that the tree spirit tribe liked, making the tree spirit tribe members who lived on the mother tree feel like they were bathing in the spring wind at all times. ”

“Other than that, there was another way to cultivate a mother tree, which was to water it with blood, use the corpses of monsters as fertilizer, and then pray in the morning and evening. The mother tree that was cultivated in this way would give the tree spirit tribe a sense of oppression, making it impossible for them to live normally under the mother tree. Therefore, this cultivation method had never been used by the tree spirit tribe. ”

“Furthermore, the mother tree that was cultivated through different methods would possess completely different powers. One was natural and peaceful, while the other was violent and explosive. ”

“Tang Zhen didn’t care about the so-called sense of oppression that the tree spirit clansmen spoke of. He only knew that the second method was the most suitable for him. This was because there was no

lack of monster flesh and blood in the endless wilderness. If necessary, Tang Zhen didn't mind clearing up the monsters nearby to gather enough fertilizer for the mother tree."

"After thinking of this, Tang Zhen put down the green leaf book in his hand and slowly walked to the roof. He was looking for a suitable place for the mother tree that he was about to cultivate."

"In the end, his gaze stopped at a corner of the valley. After observing it for a long time, he nodded with satisfaction."

.....

"Early the next morning, all the people who participated in the battle had already gathered. Tang Zhen sat in a light off-road vehicle equipped with a heavy machine gun. Under the gaze of the Holy Dragon City residents and the Wanderers who participated in the construction, he waved his hand and ordered them to set off."

"The roar of the engine reverberated in the valley as the convoy rushed out of the valley in succession. Because the vehicles brought by Tang Zhen were easy to operate, the soldiers who already had a little driving experience were able to operate them very easily."

"Five light off-road vehicles cleared the way, followed by a military transport vehicle. The vehicle was filled with fully armed Holy Dragon City soldiers. They crushed the scattered grass on the gravel plain, looking very imposing."

"From time to time, monsters would suddenly appear along the way. Every time this happened, there would be the crisp sound of gunfire. It was the Holy Dragon City cultivators who had just taken on the role of machine gunners."

"Relying on their strong reaction speed and control of their bodies, these cultivators who had only been using heavy machine guns for a few days were able to shoot accurately and tear the monsters into pieces of different sizes."

"The terrifying destructive power of these firearms left everyone speechless. Looking at the monster that seemed to be unable to withstand a single blow from the heavy machine gun, the soldiers on the transport vehicles all looked at the machine gunner with envious eyes, hoping to replace him with themselves."

"The sound of the vehicle's roar could travel extremely far in the wilderness. Therefore, before Tang Zhen's group had even approached the houndhead men's nest, they had already alerted the houndhead men. At this moment, they had already started to gather while shouting and wrangling. They were prepared to resist the enemies that might appear."

"Ever since Tang Zhen had caused a ruckus at the sacrificial ceremony of the dog-headed people's Tower and sent hundreds of dog-headed Warriors after him away, the dog-headed people had always been vigilant, afraid that Tang Zhen would cause another ruckus."

"Because the city-building brain Pearl had been stolen by Tang Zhen, the dog-headed clan leader had no choice but to send his subordinates back to his family and borrow some brain pearls and experts from his father for emergency use. However, every time he recalled the strange words his brothers had said to mock him for his incompetence, it would make the dog-headed clan leader fly into a rage."

“This also made it hate Tang Zhen to death in its heart, and it was eager to swallow his flesh and blood. ”

“A Sentry had just reported that there was a strange sound in the distance, as if something was approaching. This alarm made the Kobold patriarch’s heart skip a beat. He had a vague premonition that it was likely to be the same bastard from last time. ”

“””I’ve already hired an expert to deal with you. Since you’re here, don’t think of escaping so easily!”” ”

The dog-headed patriarch gritted his teeth and thought hatefully in his heart.

“The rumbling sounds from the distance grew louder and louder. Soon, the Kobold patriarch saw the situation of the people who had come. They were indeed the damned humans. However, they were all sitting in strange vehicles, and all of them were fully armed. They were obviously here to start a war. ”

The dog-headed people were fearless. They would cruelly kill their enemies and devour their flesh and blood!

“””Warriors of the Kobold clan, the enemy has arrived. We will never allow them to do as they please here, especially when the enemy is a lowly human. ”

“Now, raise your Spears and fight with me!”” ”

“The leader of the dog-headed people let out a roar, which was immediately followed by countless dog-headed people’s responses. Their roars shook the sky. They waved the short Spears in their hands and bared their teeth. They stared at the group of humans in front of them with fierce eyes. Imagining the scene of them devouring their flesh and blood after victory, they couldn’t help but drool. ”

“Tang Zhen, who was on the opposite side, coldly looked at the group of dog-headed people. A disdainful smile appeared on the corner of his mouth. When the distance between the two sides was less than 200 meters, Tang Zhen informed them to stop the car. Soon after, the muzzles of five heavy machine guns were already aimed at the gathered dog-headed people. ”

The soldiers quickly jumped down from the transport carriages and got into their positions according to their usual training. Everyone unsheathed their swords and waited for the order to charge.

“Without any nonsense, Tang Zhen directly gave the order to shoot. ”

“””Dada Dada Dada Dada!”” ”

“The roar of the heavy machine gun suddenly sounded like the scythe of the Grim Reaper, beginning to harvest the flesh and blood of the living. The kobolds on the opposite side immediately fell to the ground in droves like rice being blown away by the wind. ”

“Blood and flesh splattered everywhere. The power of the heavy machine gun was displayed perfectly at this moment. In the face of the fatal high-speed bullets, the dog-headed man’s body was continuously torn apart, and he fell to the ground with a miserable cry. ”

“All of the kobolds were stunned by this highly efficient killing method. They were caught off guard as they watched their comrades fall to the ground and die in large numbers. They wanted to charge forward and save them, but they had no chance because the bullets would tear their bodies apart in the next second. ”

“The guards of the Kobold patriarch roared and formed a defensive wall with their bodies, blocking the bullets that were shot at the Kobold patriarch. Before they died, they roared loudly, asking their companions to protect the Kobold patriarch and evacuate. ”

“The Kobold chieftain almost vomited blood. It watched as its own people were killed. The Warriors organized a few charges, but they only managed to charge out a dozen meters before falling to the ground. ”

“In the blink of an eye, more than half of his clansmen had fallen. The rest were not any better, as they had almost been scared out of their wits. ”

retreat! Retreat!

“The Kobold patriarch’s heart was bleeding, but he had no choice but to give the order to retreat. If he continued to hesitate, his entire clan would really be exterminated. ”

“Human race, I can’t live under the same sky as you. From now on, if I see any human again, I’ll definitely capture them and skin them alive to vent the hatred in my heart! ”

“The Kobold chieftain, who was being protected by his guards, made a death vow in his heart! ”

“It was a pity that the Kobold patriarch didn’t know that Tang Zhen didn’t plan to let a single Kobold leave today. Moreover, he was the core figure of the Kobold clan. Even if he chased him to the end of the world, Tang Zhen would never let him go. ”

“Seeing that the dog-headed people began to flee in all directions under the orders of the clan leader, Tang Zhen immediately signaled the five off-road vehicles to split up and give chase. At the same time, he ordered the soldiers behind him to charge! ”

?

Chapter 122: The Holy master and the heavy-armored Rengar

“”Kill!”” ”

“The fifty Holy Dragon City soldiers, who had been impatient for a long time, immediately shouted. They were like arrows that left the bow as they pounced on the kobolds. As if they were chopping melons and vegetables, they cut down the frantically running kobolds. ”

“At the same time, there were also Warriors who kept taking out grenades from their waists, removing the safeties and throwing them at the kobolds in the distance. ”

“Explosions sounded one after another, and countless tattered Kobold corpses were scattered on the ground under the impact of the air currents and shrapnel. In the blink of an eye, dozens of kobolds had lost their lives. ”

“Before the houndhead men could recover from the deafening explosion, Tyson and the others pulled the trigger again. The metal Torrent from the heavy machine guns started to wreak havoc again. Even

though their shooting accuracy was very low, many houndhead men still fell to the ground. The houndhead men who were lucky enough to survive felt sad when they saw this. ”

“Tang Zhen did not participate in the killing. Instead, he coldly observed the situation of the dog-headed people. Very quickly, his eyes focused. This was because he had discovered an extraordinary dog-headed person on the chaotic battlefield. ”

“This fellow’s appearance was completely different from an ordinary houndhead man. It was wearing a very gorgeous robe and a purple headband on its thin head. In its dry hands, it held a cane made of an unknown material. Spots of red light were emitted from the surface of the cane. ”

A word immediately appeared in Tang Zhen’s mind when he saw the dog-headed man’s appearance and attire. That was a Holy master!

Tang Zhen’s heart trembled when he thought that the dog-headed man was likely to be a Holy master. He told himself that he had to get rid of this guy first!

“Although Tang Zhen had never met a real Holy master, nor had he seen the so-called Divine Art, he had a preliminary guess about the possible form of the divine Art after the cultivators of Black Rock City mistook his ability for Divine Art. ”

“Judging from the dog-headed man’s aura, he should be a Grade 1 cultivator, or a Grade 1 Holy master. ”

“Due to his fear of the divine Art, Tang Zhen did not rashly choose to engage in close combat even though the other party’s cultivation was very low. Instead, he decided to snipe! ”

Tang Zhen quickly took out a large-caliber sniper rifle from his storage space and lay down on the ground. He placed the dog-headed Holy master in the scope’s field of vision and waited for the [super shooting assistant] to lock onto the target before he decisively pulled the trigger.

“The moment Tang Zhen’s bullet shot out, the dog-headed shaman looked in his direction as if he had come to a realization. Immediately after, a thin film that looked like a ripple appeared in front of the dog-headed shaman, protecting him like a barrier. ”

“Tang Zhen watched with his eyes wide open as the powerful sniper rifle bullet was blocked by the thin film-like barrier. After which, it mysteriously disappeared, as though it had melted. ”

“””How is this possible?”” ”

“Tang Zhen was extremely shocked in his heart. An armor-piercing bullet that could easily penetrate a steel plate was actually unable to penetrate the thin layer of water at this moment. This was the first time he had been defeated by a firearm after coming to this world. Moreover, it was a powerful heavy sniper rifle. ”

“I don’t believe that a sniper rifle can’t kill you. Even if you’re a Super Turtle shell, I’m going to make a hole for you! ”

“Tang Zhen made up his mind. The sniper rifle in his hand fired continuously like an automatic rifle. The huge recoil caused his shoulder to hurt, and he accidentally missed a few times. ”

“However, his efforts finally paid off. When the third bullet hit the water membrane, the water membrane that had been flashing non-stop shattered completely. This caused the Kobold Holy master to look terrified and turn to escape.”

Tang Zhen was overjoyed when he saw this and pulled the trigger again. The last bullet in the sniper rifle’s magazine whizzed out and hit the dog-headed Holy master’s chest.

“The bullet left a huge hole in the dog-headed Holy master’s body. His skin and flesh were torn apart, and his internal organs were all shattered. The dog-headed Holy master opened and closed his mouth with great difficulty, but in the end, he still lowered his head and looked at his hollowed chest before falling to the ground unwillingly.”

“Tang Zhen stood up and replaced the empty magazine. When he turned to look at Tai Seng and the others, he realized that they were still chasing after the dog-headed people. The Holy Dragon city’s soldiers with high morale were surrounding the fish that had escaped the net. When they saw the dog-headed people that were not completely dead, they would also go up and give them a stab.”

“From the looks of the situation, annihilating this group of houndhead men was no longer a problem!”

“Just as Tang Zhen was thinking this in his heart, he suddenly heard a furious roar coming from the vicinity of the dog-headed people’s lair. Soon after, he saw a dog-headed person with a Lion-like head brandishing a large sword and wearing heavy armor as it rushed over.”

“The dog-headed man’s heavy armor seemed to weigh at least ten pounds, but it was as if he was wearing a cotton shirt, and his running and jumping were not affected at all.”

“Seeing the charging speed of the lion Dog-headed man as well as the level three cultivation that it revealed, Tang Zhen immediately shouted at the machine gunner, all of you, f * cking shoot that Rengar! Throw your grenades at it as well!”

“&Nbsp; Tai Seng and the others also saw this imposing fellow. Because of its 1.9-meter height, it was extremely eye-catching among the low Dog-headed people. Coupled with its heavy armor, it looked extremely intimidating.”

“With the arrival of a powerful enemy, Tai Seng and the others didn’t hesitate. Just as Tang Zhen’s words fell, a wave of firepower covered the path of the lion Dog-headed man.”

“The lion Dog-headed man dodged most of the bullets nimbly, while some were blocked by his demonic armor and lost their power. Tyson and the others used up all their bullets, but only a few hit the lion Dog-headed man’s body. Although it was bleeding, it couldn’t stop the lion Dog-headed man’s charge.”

“Tang Zhen watched from the side with fear. The purple lightning short sword in his hand had already been unsheathed. Once the situation changed, he would attack and kill this Lion Dog-headed man!”

“At the same time, he was carefully observing the lion Dog-head man. He vaguely noticed that its body was covered in a layer of white light. However, as the lion Dog-head man continued to be attacked, the white light was getting weaker and weaker.”

“Upon seeing this, a thought flashed through Tang Zhen’s mind. He immediately shouted at Tai Seng, ““Don’t hesitate, beat him to death!”” ”

“go! Tai Seng and the others roared and immediately used up all their remaining ammunition. The effect of this attack was obvious. The lion Dog-head man had already taken more than ten shots, and it was now covered in blood like a god of War. ”

“At this moment, the lion Dog-headed man had already charged in front of Tai Seng and the others. With a loud roar, he swung his sword at a Holy Dragon City warrior. That warrior blocked with his sword, but was sent flying by a huge force. He spat out blood and fell to the ground. ”

“you’re courting death! Tai Seng’s eyes widened as he threw away the heavy machine gun in his hand and charged forward with his saber. In the blink of an eye, he was already engaged in a battle with the lion Dog-headed man. ”

“When Tang Zhen saw that many soldiers had stopped their pursuit and were guarding at the side to watch the battle, he immediately shouted, what the hell are you all watching? charge in and kill all the dog-headed people! ”

“Seeing Tang Zhen’s anger, the Holy Dragon city’s soldiers were so scared that they shrunk their necks. They immediately brandished their weapons and pounced towards the dog-headed people’s nest with murderous intent. ”

“Hmph! seeing how Tai Seng and the heavily injured Lion Dog were equally matched, Qian Long couldn’t help but sneer coldly. He pulled his bow and fired an arrow at the lion Dog-head man, but he didn’t expect it to pierce through the gap between the lion Dog-head man’s leg armor. ”

“The lion Dog-headed man groaned and knelt on the ground. After glaring at Qian Long, the despicable sneak attacker, with its bell-like eyes, it closed its eyes as if it had accepted its fate. Then, Tai Seng’s saber whizzed past, and the lion Dog-headed man’s basin-sized head rolled onto the ground, looking extremely ferocious. ”

“this Lion Dog-head man is definitely a peak level 3 expert. If it wasn’t for my previous injuries, I wouldn’t have been his match at all! ”

“There was no hatred in Tai Seng’s eyes as he looked at the lion Dog-headed man’s corpse. Instead, there was a trace of respect. ”

“Tang Zhen gently nodded his head when he heard this. He used a slow tone and said, the hatred between our humankind and the non-humankind can never be solved peacefully. Therefore, the final result of the war will always be one side falling down. No matter whether the other side’s behavior is worthy of our respect or not, as long as they stand on the opposite side of the rise of the humankind, they will be our common enemy! ”

Tai Seng waved the battle blade in his hand and casually killed a wounded dog-headed man before he looked at Tang Zhen and nodded silently.

“At this time, the battle was nearing its end. The dog-headed people who put up a last-ditch struggle were all killed, and their corpses were strewn all over the field. The stench of blood floated around the battlefield and did not dissipate for a long time. ”

?

Chapter 123: Victory over the flashing gold race sanctuary _1

Tang Zhen's feet stepped on the ground that was covered in blood and minced meat. His leather boots were constantly wrapped in mud. He slowly walked to the front of the dog-headed man patriarch and sized it up without saying a word.

"The Kobold chieftain's body was covered in wounds, and the corpses of a dozen loyal guards had fallen around it. They had all fought to the last moment, and their bodies were unrecognizable."

"Seeing Tang Zhen standing in front of him, the dog-headed patriarch, who was kneeling on the ground and tied up by a rope, coldly snorted and turned his head to the side. He gritted his teeth, but perhaps because of the pain, the dog-headed patriarch's muscles kept twitching and trembling. However, from the beginning to the end, the dog-headed patriarch didn't make a sound."

"Although the other party was an enemy of a foreign race, Tang Zhen was still full of admiration for the dog-headed people's loyalty and their unyielding will."

""Since you've chosen to be the enemy of the human race, you'll end up like this sooner or later. What do you have to say before you die?"" "

Tang Zhen used a cold and indifferent tone as he shouted at the dog-headed man patriarch.

"Upon hearing Tang Zhen's question in the dog-head man's language, the dog-head man patriarch turned his head around and glanced at Tang Zhen with a painful but mocking gaze. He then sneered and said, ""Despicable human, don't think that you're so great just because you won this battle. In this wilderness, you humans are the most lowly race, only worthy of being slaughtered and enslaved by the dog-headed men and all other races. ""

"Just wait and see, I think it won't be long before you and your men will be killed and cooked. At that time, you will find how ridiculous your current appearance is!"" "

"After the Kobold patriarch finished speaking, he fiercely stuck out his entire tongue and bit it hard. Tang Zhen only heard a slight "" creak "" sound and immediately saw blood gushing out of the Kobold patriarch's mouth like a spring. "

It coughed out blood and laughed miserably before falling to the ground like mud.

"Tang Zhen looked at the life aura of the dog-headed people's patriarch that was rapidly disappearing. He used a low and deep voice to slowly say, ""Perhaps in the eyes of you alien races, the human race is so weak and insignificant that you can bully and kill them at will. However, you have forgotten that the more suffering a race has experienced, the more likely it is for it to rise up in a powerful way. When that day comes, the suffering that the race has suffered will be paid back ten times more than what the enemy has suffered. ""

"I might be the fulcrum for the rise of the human race, and you are very lucky to be the first foreign race to be defeated by me. Perhaps one day, the Kobold race, known for their reproductive ability, will become one of the countless races that will be extinct in this wilderness."" "

"Tang Zhen's words were not only said to the dead dog-headed man patriarch, but also to himself! "

“He wondered if the Kobold chieftain, who had already stopped breathing, had heard these words and what he was thinking.”

“Looking around, he saw that all the houndhead men in the hill area had been killed. The Warriors were cleaning up the battlefield. They were constantly moving messy things out of the smelly cave. Most of them were dried meat, and a small number of weapons and herbs.”

Tang Zhen didn't even look at the dried meat that was probably made from the blood and flesh of his own kind. He ordered the soldiers to throw it away as he didn't lack such disgusting food.

“A warrior dragged a leather bag out of the cave. He seemed to be struggling. A sharp stone on the ground accidentally cut the leather bag, revealing the Golden object inside.”

“Tang Zhen immediately walked over when he saw this. He ordered the soldier to open the leather bag. Immediately after, countless objects of various sizes that were shining with golden light appeared before Tang Zhen's eyes.”

“With just a glance, he was sure that these artifacts were made of gold. The shape and decoration were very familiar, and they were of the same origin as the gold artifacts used by the nomadic rich exploration team.”

“After ordering the soldiers to pour all these gold products on the ground, Tang Zhen rummaged around and picked out a gorgeous Golden Disc. It was full of strange decorative patterns and text-like symbols.”

“After activating the [mysterious word cracker], the words on the gilded disc were easily cracked and turned into words that Tang Zhen could read and understand.”

Tang Zhen looked at the contents of the words on the Golden Disc and could not help but frown.

“the natural disaster has come, and the world has collapsed. The prophecy of our ancestors has come true, but the brave glittergold race will not sit still and wait for death. We have built the safest sanctuary, and all of our people can hide in it. After the disaster is over, the sanctuary will be reactivated, and we will still be the overlords of the world!”

Tang Zhen could easily determine that these golden objects came from a refuge shelter called the flashing gold race through the words cast on the Golden Disc. All of their clansmen were hiding in this refuge shelter in the hope of avoiding the so-called natural disaster.

“However, when these gold items appeared in the world of loucheng, it meant that their plan had failed. The glittergold race, who had tried to dominate the world after the disaster, might never be able to wait until the day to open the sanctuary.”

“According to the strange laws of this other world, buildings destroyed by disasters like this would appear in the form of wild buildings, followed by living creatures that were destroyed together with them. However, they would all become monsters with brains.”

The foundation that Tang Zhen used to build the Holy Dragon City came from the wild buildings in the bank. There were no bank employees or customers who had turned into monsters because these monsters had been killed by the bloodthirsty gnomes and became their food.

“Monsters eating monsters was also a very common phenomenon in the endless wilderness, so there was nothing to be surprised about.”

Tang Zhen put down the gilded disc and slowly walked back to the off-road vehicle. He lit a cigarette and considered whether he should clean up the shining tribe’s sanctuary.

“Tang Zhen was in need of money. The gold in the sanctuary could bring him a huge amount of wealth. Tang Zhen was also in need of brains. The glittergold people in the sanctuary who had turned into monsters could provide him with a huge amount of brains, even high-level brains.”

“The most important thing was that Tang Zhen was very likely to obtain the books and materials left behind by the flashing gold tribe in the sanctuary. This was what he was most interested in. Even if the first two items were not there, as long as he could obtain valuable books and materials, Tang Zhen felt that this trip was not a loss.”

“After thinking about it, Tang Zhen couldn’t seem to find a reason to give up exploring the flashing gold race’s sanctuary. Tang Zhen made a decision in his heart after thinking of this.”

“He turned around and saw that the battlefield had been cleared. Other than the dog-headed people’s corpses that were strewn all over the ground, no one cared about them. The rest of the useful items had been packed up by the soldiers and placed on the transport trucks, filling up the place.”

“A portion of the spoils would be given to them. The soldiers who participated in the battle would also receive points or coins distributed by the Holy Dragon City. The points could be used to upgrade their level and status. They could use the battle to sustain the battle, using benefits and glory to ensure that the soldiers would always be filled with the desire to fight.”

“Since everything was over, Tang Zhen indicated that they should return to the Holy Dragon City. Because the transport vehicles were occupied, the soldiers could only return on foot. They followed the slowly moving vehicles and lined up in a column as they advanced in the wilderness.”

“The orderly footsteps of the Warriors, accompanied by the sound of swords and sabers clashing against armor, became a unique accompaniment in this wilderness. However, this accompaniment was full of solemnity and solemnity, representing Iron Blood and death.”

“Tang Zhen sat in the carriage and looked at the long line of soldiers in a daze. However, he was fantasizing in his heart that there would be a day when millions of Holy Dragon city’s soldiers would wear armor and form an endless square formation to conquer all the enemies in the endless wilderness.”

“With his continuous efforts, perhaps the day when his dream would come true would not be far!”

?

Chapter 124: The nouveau riche Captain with! screw loose in his head

“Although the world of loucheng was extremely large, the time it took to rotate between day and night was only slightly longer than the original world. When night was about to fall, the soldiers had already arrived at the entrance of the Holy Dragon City Valley.”

“The Holy Dragon city’s residents and Wanderers, who had received the news long ago, came forward to welcome them. They lined the streets to welcome them, bringing water and food to the soldiers. At the same time, they looked at the mountain-like piles of spoils of war on the transport carriages, their eyes full of envy.”

“In this wilderness, fighting and killing had become an instinct for almost every man. To be able to come back alive after every battle and bring back a pile of spoils of war was already regarded as a Supreme honor by the Wanderers, because it represented strength and the hope of the survival of the family.”

“Even though they were now residents of the Holy Dragon City and no longer had to worry about starving in the morning, nor did they have to worry about food for the next day, this mindset that was deeply rooted in their hearts had not changed at all.”

“Moreover, they had come out to kill the dog-headed people. Out of their common hatred for the alien races, the residents and Wanderers were full of respect for these Warriors.”

“When the transport carriages stopped at the Plaza in front of the building, a Holy Dragon City Manager immediately directed the Wanderers to move forward and unload the spoils of war from the transport carriages. Then, they temporarily piled them up in the Wanderer market, which had already been completed.”

“As the Wanderers carried the spoils of war, they drooled in envy. At the same time, they estimated how much food and weapons these spoils of war could be exchanged for.”

“Seeing the Holy Dragon city’s Warriors, who appeared awe-inspiring after being fully equipped, they felt even more envious. Many strong Wanderers, who were confident in their strength, were secretly thinking about how they could become Holy Dragon city’s Warriors. When the time came, they could also get a set of expensive equipment.”

“When they thought of how they would look in armor and hold swords in their hands, they became more and more eager. They tried their best to show off their abilities while carrying the spoils of war, hoping that they would be noticed by the manager and recruited into the Army.”

“Even if they could not become an official soldier of Holy Dragon City, as long as they could become an auxiliary soldier, they would be satisfied!”

“Tang Zhen took in this scene and laughed in his heart. These Wanderers might not have realized that since Tang Zhen had allowed them to enter the valley, he definitely did not have the intention of letting them leave. Sooner or later, these Wanderers would become official residents of Holy Dragon City.”

“However, at this moment, it was not the time to tell them these things. First of all, the number of resident slots in the first-level city was limited, and they could not be allocated an identity card at all. Moreover, Tang Zhen wanted them to endure for a longer period of time and see the benefits enjoyed by the residents of the Holy Dragon City. This way, the expectations in their hearts would become heavier and heavier. When they became official residents of the Holy Dragon City, they would also cherish this hard-won identity.”

Tang Zhen inadvertently turned his head and saw a brawny man among the Wanderers carrying a leather bag as he strode toward the Wanderer market. The leather bag was filled with all the gold items from the flashing gold race's sanctuary.

"Such a heavy leather bag, when placed on the strong man's body, was like carrying a bag of wheat bran, which was extremely easy."

"He took a closer look at the brawny man carrying the leather bag. It was the captain of the rich exploration team, the guy whose head was a little rusty."

"This was a very interesting fellow. When Tang Zhen heard that he had just arrived, he was very unconvinced of Tai Seng, who had beaten him to the ground. He thought that Tai Seng was just using his power to bully others. Otherwise, he, who was also a Rank 2 expert, would not have been easily defeated by Tai Seng."

"When Tai Seng, who was bored to death, heard this, he immediately gave the team leader a chance to redeem his honor and promised that if he failed, he would give him a bag of food as compensation."

The team leader was overjoyed when he heard this. He immediately took off his arms and started fighting with Tai Seng on the grass.

"Although this team leader's brain wasn't too good, he had a lot of strength. In this aspect, even Tai Seng was slightly inferior. Unfortunately, in a battle, just relying on strength alone and fierce attacks might not be enough to win."

"Tai Seng's strength was only slightly inferior to the nouveau riche Captain, but his combat experience far exceeded his opponent's. Furthermore, ever since Tang Zhen had sorted out the martial arts combat videos he had obtained from the original world and continuously played them for the cultivators and Warriors of the Holy Dragon City to watch, Tai Seng had already created a unique combat technique based on his own experience and what he had learned from the videos. It was simple and sharp, and every move was fatal!"

"It wasn't an overstatement to say that in terms of technique and experience, the team leader was miles behind Tai Seng."

"It was precisely because of this that the originally high-spirited team leader was completely screwed over by Tai Seng during the battle. Almost every attack was like a bull's, but Tai Seng easily dodged the attacks. Then, with just a single move, the team leader would fall flat on his face."

"What was even more infuriating was that Tai Seng even gave a live lesson, explaining the principles and techniques of a certain move to the surrounding Holy Dragon City soldiers as he fought, causing the spectators to either praise him or applaud him. They would then mock the tycoon captain a few times, one after another, causing the tycoon captain's lungs to explode with anger."

"Didn't you say that we're going to fight fair and square? you brought some people here to watch the fun and keep mocking me, what kind of hero are you?"

"The rich Captain was furious. After getting up, he attacked Tyson even more fiercely, but he was still knocked to the ground again and again. On the other hand, Tai Seng only took a punch to his face because he was not careful, but he was still full of energy and laughing."

“Just when the team leader was thrown down for the 20th time and thought that he would never be able to catch Tai Seng and throw him to the ground with his ultimate move, for some reason, Tai Seng’s lapels were caught by him. ”

“&Nbsp; the team leader was overjoyed. Just as he was about to hug Tai Seng and lift him up high before falling down, he felt his arm being bent in a weird way. Then, his entire arm was locked behind him and he could no longer move. ”

“Then, he heard Tai Seng roar towards the surrounding, “” all of you, look carefully. This is the so-called ‘capture’ of that Suan ni. Yes, it’s a ‘capture’. It uses its joints and weak points to attack the weak points of the enemy’s body. You see, although this guy is strong, once I use this move to lock him down, he can’t move anymore! ”

“After saying this, Tyson let go of his hand and kicked the rich captain’s butt. The rich Captain was caught off guard and pounced forward. Once again, he performed a gorgeous action of stealing sh * t. ”

“In the following period of time, Tai Seng seemed to have gotten addicted to the game as he kept using the rich Captain as a Human Target, testing all kinds of fighting techniques that he had learned, but he made the rich Captain look extremely embarrassed! ”

“In the end, the team leader, who had a bloody nose and a swollen face, finally admitted in his heart that he couldn’t beat this guy with a stomach full of strange tricks. However, he was stubborn and refused to admit defeat, so he just lay on the ground and pretended to be dead, causing everyone to laugh. ”

“However, ever since he was beaten up that time, the team leader had become Tai Seng’s Lackey. As long as he had the chance, he would approach Tai Seng and smile while flattering him, trying to learn a thing or two from him. ”

“Every time, Tai Seng would squint his eyes and sneer as he looked up and down at the tycoon Captain. He was well aware of the latter’s sinister intentions. ”

“Damn it, didn’t he just want to learn my moves and then take revenge on me after he was done? With that brain of yours that doesn’t know how to spin, even if I were to teach you, you wouldn’t be able to f * cking learn! ”

“Therefore, every time this happened, Tai Seng would kick the rich captain’s butt and then swagger away. ”

“However, the team leader had strong willpower, or rather, he was a one-track minded person. Even if he was beaten up this time, he would continue to suck up to Tai Seng the next time he saw him. ”

“In the end, whenever Tai Seng saw the nouveau riche Captain, he would shrink his neck and quickly run away. He was really scared of this guy and couldn’t be bothered anymore. He thought to himself, “” I can’t afford to offend him, but I can at least hide! ”

“Tang Zhen was thinking about the interesting story of the rich Captain. Coincidentally, he had returned once again. He waved his hand and ordered the soldiers beside him to call him over. ”

“When the rich Captain heard Tang Zhen calling him, he immediately jogged over and stood in front of Tang Zhen. He grinned and said, “““City Lord, why did you call for me? if there’s anything, just say the word. This little one will definitely get it done for you!”” ”

“Tang Zhen nodded with a smile. He took out a pack of cigarettes from his pocket and handed it to the rich Captain, almost causing the latter’s snot to pop out. This was good stuff. The price in the Wanderer market was very high. Even among the residents of the Holy Dragon City, few people were qualified to smoke it.”

“Now that he had a pack, old Mike and the other Holy Dragon City Rascals would definitely go crazy with envy!”

“At the thought of this, the rich Captain felt as if his heart had been soaked in honey. It was so sweet that when he smiled, even his molars could be clearly seen!”

?

Chapter 125: The adventures of the rich Captain

“Cigarettes were a good thing. Whether it was in the original world or in the other world, there were a group of people who were obsessed with the feeling of smoking. However, in the world of loucheng, cigarettes were something only the big shots were qualified to enjoy. After all, there were only a limited number of cigarettes found in the wild buildings, and many Wanderers had never even heard of them.”

“Seeing that the rich Captain, who had obtained a rare item, was in a good mood, Tang Zhen opened his mouth and asked,““The weapons you used before were very strange. Where did you get them from?”” ”

“The team leader’s smile immediately disappeared, and he said with a sad face, “““City Lord, you don’t know, but I almost lost my life in order to get these junk!”” ”

“Tang Zhen’s interest was piqued when he heard this. He continued to ask,““Tell me, what’s going on?”” ”

“The rich Captain revealed a reminiscing expression as he gestured to Tang Zhen while explaining,““That day, someone ran over and told me that there was a hole on the slope not far away. There seemed to be something inside, but everyone was afraid of the danger inside, so they didn’t dare to go down and check.”

“I became interested and led a group of brothers to run over. We found that there really was a hole on the hill. However, the hole was very small, and not even people could get in. After throwing a torch in, I observed it with the light of the fire and found that there was a lot of shiny metal inside.”

“City Lord, you don’t know, but I was so happy at that time. I secretly thought about how many weapons could be made with this metal and how many brains could be exchanged. You know, we only have two rusty weapons in our hands.”

“These metals meant a lot of wealth, who wouldn’t be tempted?”

"I couldn't hold it in any longer and quickly ordered people to enlarge the hole. I carried a rusty knife and a torch as I walked in. When I got inside, I realized that the hole was actually a huge room. The shiny metal inside was made into all kinds of things, each of which was very heavy."

I picked up a metal bar from the ground and tried to break it. The metal bar bent. I didn't expect that the hardness of this metal was not as good as the iron bone grass in the wilderness. How could it be made into a weapon?

"At that time, I was discouraged. My heart ached that I couldn't make a sharp weapon with this room full of metal. Just as I was about to turn around and leave, a smart brother in the tribe said that we could use this metal to make a hammer, or even flatten it to make armor. After all, it was still metal, and it was better than a weapon made of bones. Moreover, it looked quite scary!"

"When I heard that, I also agreed, so I called my brothers to start moving the metal, and we especially picked the small ones because we couldn't move the big ones. As we moved, we moved things out, aww!"

"When the rich Captain said this, he paused for a moment and smacked his lips twice. When Tang Zhen saw this, he gave a look to old Mike, who was listening with great interest. Old Mike immediately took the water bottle from his waist and handed it over. At the same time, he urged, f*ck, you're such a busybody. Hurry up and drink some water. After you're done, you can continue your lecture."

"The rich Captain looked really thirsty. After drinking the entire bottle of water, he wiped his mouth and continued, "" ""At that time, one of the brothers saw a big stick standing on the ground. The thickness and length were just right for a weapon, so he pulled it out with all his strength, but he couldn't pull it out. Then he pushed it forward, but he didn't expect to actually push it this time."

"But then, a crack suddenly appeared on one of the walls. The crack grew bigger and bigger, and at the same time, an indescribable stench drifted out. I could vaguely see something moving behind the crack, so I stuck my face to the crack to take a look."

"It was this one look that gave me a big fright!"

"When the rich Captain said this, his face revealed a lingering fear. After wiping the cold sweat on his face, he continued to say to Tang Zhen, "" ""My God, it turns out that behind the crack, there are monsters densely packed together. There are big monsters, small monsters, floating monsters, and even those metal monsters made of shiny metal, blocking the passage behind the crack tightly."

"once these monsters run out, all of us, including the men, women, old, and young of the tribe, will be f*cking finished!"

"I was so scared that I broke out in a cold sweat. I immediately shouted at the brother who was pulling the metal rod and asked him to pull the rod back. The brother saw that the situation was not good and before I could finish speaking, he put the metal rod back."

"After the metal rod was pulled back, the crack stopped opening and quickly closed. However, a few metal spiders still ran out of the crack and headed straight for us."

“These spiders were only the size of a fist, but they were extremely fast. One of the brothers couldn’t Dodge in time and was bitten by the metal spider. Then, his entire body immediately fell to the ground like a stiff stone.”

“After seeing this, I realized that the metal spider is poisonous. I can’t let it bite me, or I’ll die!”

“Thinking of this, I shouted at my brothers not to panic. Then I raised a piece of metal beside me and smashed it. Coincidentally, the metal spider could not move at all.”

“Seeing this, the other brothers also picked up the things around them and smashed the metal spiders in the face. We were lucky that the metal spiders couldn’t move after being hit. We were relieved.”

“When we went to check on the brother who was bitten, we found that his face was blue and he was long dead!”

“After that, we put the bodies of our lost brothers up there and then sealed the hole with stones, planning to never go in again.”

“As for the metal that we brought out, we made it into a sledgehammer and armor. In the end, other than me, everyone complained that the metal was too heavy and soft. They even wanted to throw it away.”

“I was so angry that I went up and beat up those guys. Damn it, this was something that I had exchanged my brothers’ lives for. How could I throw it away just like that? Besides, it felt pretty good to use this kind of big hammer to hit monsters!”

“The rich Captain explained everything in one breath, including the origin of the gold and some information about the shining gold tribe sanctuary.”

“From the rich captain’s description, Tang Zhen’s previous guess was completely correct. The refuge of the glittergold race was already filled with monsters. As for the metal spiders, they might be the technological products of the glittergold race.”

“Now that the existence of the flashing gold tribe’s sanctuary had been confirmed, the next thing to do was to clean up and explore it.”

“Tang Zhen sat in his room, his mind filled with thoughts about the flashing gold race’s sanctuary.”

“A sanctuary that could accommodate the entire glittergold race must be extremely large. If they could obtain its Foundation and gradually upgrade it, then the Holy Dragon City would have a huge underground structure. This would only be good for the Holy Dragon City.”

“However, it was precisely because of the large area of this shelter that the number of monsters inside was likely to be very large. Even if someone told Tang Zhen that there were more than a million monsters inside, Tang Zhen would choose to believe it because it was very likely.”

“Some people might think that such a large number of monsters was too terrifying. However, to Tang Zhen, this refuge was a huge treasure. As long as he patiently cleared it out, he would be able to obtain a huge amount of brains and gold. He might even be able to raise his cultivation level once again!”

“Regardless of the reason, he had to clean up the shelter!”

“However, there was a problem now. The location of the flashing gold race’s sanctuary was far away from Holy Dragon City. It was not suitable for a long-term exploration at all, because it involved safety, survival, logistics, and many other aspects. With Holy Dragon city’s current strength, it could not support such a large-scale operation. ”

“Was it possible that he had to clean up by himself? however, the efficiency of doing so was too low. It was far slower than a group of people cleaning up. Not to mention, Tang Zhen couldn’t stay in the sanctuary to clean up monsters every day. Once he had something to do, no one would take over. This would definitely affect his work efficiency. ”

Tang Zhen frowned as he pondered. How should he resolve this problem?

?

Chapter 126: The Wheel of Fortune and its million applications

“Tang Zhen had unconsciously formed a habit. When he encountered a problem that he couldn’t solve, he would look for a solution in the application store. This time, he habitually opened the application store and indeed found a solution. ”

terrain transformation plug-in. It can transform the terrain of any map. It can be used once a day for one minute. It consumes 10000 gold coins per minute. The download amount is one million gold coins.

“Tang Zhen’s eyes lit up as he looked at the introduction. Once he had this application, he would be able to move the flashing gold race’s sanctuary near his Holy Dragon City without any effort. This way, many problems would be solved! ”

“However, it would cost one million gold to download the application. Although he still had some brains in his pocket, they were for upgrading the building. Even if he used them, they would not be enough for one million gold. ”

Tang Zhen frowned slightly. How should he solve the gold coin problem?

“After pondering for a while, Tang Zhen finally endured his heartache and took out a brain Pearl that was surrounded by a faint light ring from his storage space. This was the level 6 brain Pearl that he had snatched from the corpse monster Lord, which was also a Lord-tier brain Pearl! ”

“Tang Zhen had been keeping this brain bead for a long time. He planned to use it when he upgraded Lou Cheng in the future. However, looking at the current situation, he was afraid that he had to use it in advance. According to the exchange rate of brain bead and gold coins, this Level 6 brain bead could be exchanged for one million gold coins! ”

“Tang Zhen looked at the Pearl of brain with a sense of nostalgia and gave the order to absorb it. Then, the Pearl of brain in his hand disappeared instantly, and an additional one million gold coins appeared in the application store. ”

Tang Zhen sighed. He was really unwilling to just spend the one million gold coins that he had spent so much effort on. Could he think of a way to spend as little gold coins as possible?

“That’s right, the last time he looked at the intermediate lottery area of the [Lucky Wheel], he found a random discount card. At that time, he only took a look at it and ignored it. ”

“After Tang Zhen thought up to this point, he immediately activated the [Lucky Wheel] and carefully searched the intermediate lottery area. As expected, he saw the random discount card! ”

“However, when he thought about the 1% chance of winning the lottery, Tang Zhen slightly scratched his head. ”

“In his spare time, he had tried the basic lottery draw a few times. In the end, he only got a few basic cards that were not of much use to him. The cards that Tang Zhen had given to Ivanov and the other man were the prizes for the basic lottery draw. ”

“Therefore, Tang Zhen had always loved and hated the [Lucky Wheel]! ”

“However, he had to take a gamble today. Whether or not he could save the gold coins would depend on his luck. ”

“According to the rules of the intermediate lottery, the price of each bet was 100 gold coins. At the same time, one blank space could be removed. Tang Zhen calculated that there were a total of 240 blank spaces in the intermediate lottery wheel. If he were to bet all of them, he would need a total of 24000 gold coins. ”

“However, the rules required that he couldn’t place all his bets. Instead, he had to leave ten empty slots. This way, he would have to spend 23000 gold coins. According to the one in ten chance, if he was unlucky and had to draw ten times to win, Tang Zhen would probably have to put in 230000 gold coins. ”

“However, there was another problem. Once a prize in a blank space was drawn, a new prize would appear. There was a guarantee that there would be ten blank spaces. Therefore, Tang Zhen did not dare to guarantee that he would not draw a prize in a blank space again during the lottery draw. ”

“””I don’t care anymore, I’ll risk it this time!”” ”

“After Tang Zhen thought up to this point, he immediately took out the three lucky cards that he had previously saved up from his storage space. These were also the lucky Wheel’s basic prizes that he had previously saved up. ”

“He tore the three cards with both hands, and they immediately turned into specks of light and dissipated. At the same time, he felt an indescribable confidence in his heart, and he immediately began to draw the lottery. ”

“The 20,000 gold disappeared in the blink of an eye, and the remaining ten areas contained the random discount card. ”

“As Tang Zhen activated the lucky Wheel, a rapidly spinning interface appeared before his eyes. When the interface stopped, a card appeared in front of him. ”

congratulations! You have obtained a universal appraisal card!

Tang Zhen curled his mouth and kept the card. He placed his bet on the lucky Wheel once again. His gaze was fixed on the spinning Lucky Wheel and he was unwilling to relax even a little.

congratulations! You have obtained a super positioning card!

Black lines appeared on Tang Zhen's forehead as he secretly guessed in his heart. Could it be that the beginner lucky card was not useful for the intermediate lucky draw?

Another lottery draw began. Tang Zhen's heart clenched as he secretly prayed that he would win. He must win!

"As the wheel stopped, a notification appeared. Tang Zhen's vision turned black and he almost fell to the ground."

"congratulations, you have obtained a permanent sex change card!"

"Damn, what the hell is in this Lucky Wheel?"

"Tang Zhen cursed in his heart. Only then did he raise his spirit and place another bet. However, this time, he was already somewhat lacking in confidence. He was afraid that he would draw some strange card."

congratulations! You've won a random discount card!

"The wheel stopped and the card appeared. Tang Zhen was stunned for a moment when he saw the content of the prompt. Immediately after, his face was filled with wild joy as he excitedly shouted."

"Holding the dazzling card in his hand, Tang Zhen wished he could give it a kiss. Next, he would have to see if this random discount card was powerful or not!"

"While downloading the [terrain transformation plug-in], Tang Zhen also used the random discount card. Then, he saw the one million words under the application rapidly scroll and suddenly stopped after a few seconds."

"the random discount card has been successfully used. The discount rate is 5, and the download amount is 500000 gold coins!"

"f * ck, that's awesome. This feeling is too good!"

"Tang Zhen roared excitedly. This lucky card was indeed useful. He didn't expect to get a 50% discount. With this, he could save half of his gold coins!"

"After deducting 500,000 gold coins, Tang Zhen started the application after it was downloaded and installed. The terrain around him instantly appeared in front of his eyes. At the same time, he could circle an area with his mind and transform it."

"The transformation would take one minute, and the effect was still unknown."

Tang Zhen studied the terrain transformation plug-in for a while and found that he still needed a few conditions to successfully move the flashing gold race's sanctuary over.

"First of all, the time needed to transform the terrain was too short. In such a short time, it seemed that he could not do anything at all. If he could cooperate with the map teleportation function, it would be much easier."

“Also, how deep could the terrain modification plug-in affect? would it move the entire area above and below the ground, or only the surface?”

“Tang Zhen thought for a moment and decided to personally test it out to determine the most realistic effect. However, if he wanted to compare it with other uses, this was a gold-devouring beast. It seemed like the 10000 gold coins were going to be wasted!”

“Tang Zhen didn’t want to spend this money, but he had no choice.”

“He walked out of the room and came to a huge rock in the valley. The rock was about 10 meters above the ground, and the volume underground was probably even larger. It was the most suitable to test the effect of the terrain modification plug-in.”

“Following his thought control, the terrain transformation plug-in instantly covered the huge rock and the surrounding land. With a thought, Tang Zhen activated the map teleportation plug-in at the same time, and his entire person instantly disappeared.”

“At the same time, an extremely deep and bottomless hole suddenly appeared where the Boulder had been. The air in the hole flickered with faint ripples, as if it could devour everything in the world.”

“In the blink of an eye, the surrounding earth squeezed over and filled the empty space. The terrifying black hole also quickly disappeared, making it impossible to tell that a Boulder had disappeared here.”

“Ten seconds later, Tang Zhen rushed back like lightning. At the same time, he picked up the phone that he had placed aside with the camera function on. Looking at the scene captured by the phone and then combining it with the situation he had observed through the map, the stone in Tang Zhen’s heart was finally lifted and he laughed out loud.”

?

Chapter 127: A crazy migration (1)

“Something like this, which involved huge benefits and was also a matter of monopolizing the food, had to be completed cleanly and neatly. Any delay would lead to changes.”

“What the endless wilderness didn’t lack the most were flies that chased after the smell of fish and hungry wolves that were brutal and bloodthirsty. Once he was discovered by them, Tang Zhen wouldn’t need to silently dream of getting rich!”

“However, if he wanted to move the flashing gold race’s sanctuary over as soon as possible, he couldn’t completely rely on the [terrain modification plug-in]. He still needed help from other aspects.”

“Therefore, Tang Zhen exchanged some more gold coins. After barely gathering 500000 gold coins, he upgraded the map to a high level, causing the visible range to reach a radius of ten kilometers!”

“The reason why Tang Zhen did this was to coordinate with the [terrain transformation plug-in]. This way, the distance he could teleport to would be greatly increased. He would only need a few days to move the entire Fallout Shelter.”

“Even if the matter of moving the flashing gold race’s sanctuary did not happen, Tang Zhen also had plans to upgrade the map. The original visible area of the map was barely enough for him, but it was of little value to the Holy Dragon City. ”

“Now that the map had been upgraded, Tang Zhen’s visual range had greatly increased. This way, the area within ten kilometers of Holy Dragon City would be under Tang Zhen’s surveillance, which greatly increased the safety Index of Holy Dragon City. ”

“However, in this way, Tang Zhen was once again reduced to a poor man. There were not many brains left in his hand. The feeling of having an empty wallet was quite unpleasant. ”

“The brainless Tang Zhen had already placed his hopes on the refuge of the flashing gold race, hoping to get a satisfactory return from there. ”

“The process of moving the flashing gold tribe’s sanctuary did not require too many people to follow. Tang Zhen only needed to confirm the location and he could complete it alone. However, before that, he needed a guide, so the rich Captain had to follow him. ”

“Early the next morning, Tang Zhen drove the off-road vehicle and pulled along Tyson and the rich Captain out of the sacred Dragon Valley, heading straight for the cave that the rich Captain had discovered. ”

“However, the team leader of the tycoons was someone who only remembered what he was fed and not what he was beaten up. When he saw that Tyson had killed a monster with the heavy machine gun, he immediately asked him to teach him how to operate the heavy machine gun. ”

“f * ck! Tyson was so angry that he beat up the team leader again, but he still couldn’t suppress the curiosity of the team leader. Looking at the curious team leader with panda eyes, Tyson rubbed his head helplessly and closed his eyes to play dead without a word. ”

“Seeing that Tyson didn’t pay attention to him and didn’t dare to harass Tang Zhen, the rich Captain could only stare at the heavy machine gun. No one knew what he was thinking about, but he didn’t notice it at all and was still giggling. ”

Tang Zhen speechlessly shook his head when he saw this. He secretly thought that this nouveau riche Captain was really a top-grade Living Treasure. The number of times that Tai Seng would get a headache from being pestered by this fellow was likely to increase.

The off-road vehicle sped all the way and was getting closer and closer to the place where the rich Captain had buried the hole. Tang Zhen realized that the location of the hole was not far from the hill where the dog-headed people lived. It was no wonder that the rich captain’s clansmen were discovered and captured by the dog-headed people.

“When the off-road vehicle arrived near a Hill, the rich Captain pointed to a cliff in front of them and said, “” city Lord, that’s the place. Look at the place we’re covering. The soil is different from the other places. ”

“Tang Zhen nodded and jumped down from the car. After carefully sizing it up, he jumped onto the cliff and activated the detection function in the [all-round data combat interface]. ”

This detection function included the earth-penetrating radar and earth-forming image. Tang Zhen had used it once when he left Black Rock City on the panlos stairs.

“As Tang Zhen activated the application, countless dots and lines began to gradually form in front of his eyes. Not long after, a super-huge building model buried deep underground with a top area of five square kilometers and a depth of one kilometer appeared in front of Tang Zhen. ”

“Looking at the various data displayed in front of him, Tang Zhen secretly sighed at the strength of the flashing gold clan. Then, he gestured for Tai Seng to immediately leave with the rich Captain and drive back to the Holy Dragon City. ”

“Upon hearing this, Tyson nodded and told Tang Zhen to pay attention to his safety. Then, he pulled the rich Captain into the off-road vehicle and disappeared into the wilderness. ”

“After the off-road vehicle disappeared, Tang Zhen took a deep breath and activated the [terrain transformation plug-in]. After he circled the area around the sanctuary, he immediately began to run wildly. ”

“At the same time, the terrain plug-in began to count down. The shelter that Tang Zhen had surrounded followed him like a shadow and moved quickly underground. The surface of the ground was filled with turbulent waves. The scene was as if there was a giant monster lurking underground and it was currently chasing after Tang Zhen. ”

“Tang Zhen seemed to be running with all his might. As the countdown gradually came to an end, his figure suddenly disappeared and appeared at the edge of the map. ”

“As he disappeared, the flashing gold tribe’s sanctuary that followed him also disappeared. It then appeared at Tang Zhen’s feet ten kilometers away. When he saw the flashing gold tribe’s sanctuary that followed him, Tang Zhen let out a long breath and sat on the ground to rest. ”

“With his running and teleportation, he had moved the flashing gold tribe’s Sanctuary 11 kilometers. At this speed, he only needed three days to move the sanctuary to the sacred Dragon Valley. ”

“Since today’s plug-in function had been used up, there was no point for Tang Zhen to stay here. So he started the transmission and returned to the warehouse of the ice Bear Alliance. ”

“This time, he needed to prepare a batch of equipment for the exploration and cleaning, such as head lamps, flashlights, communication equipment, power generation equipment, cables, lamps, and so on. ”

The reason why Tang Zhen wanted to purchase generators and other items was that he planned to lay lighting equipment while cleaning to facilitate the subsequent cleaning work.

“This refuge of the flashing gold race was extremely huge. It was definitely not something that could be done in a day to clean it up. Therefore, Tang Zhen naturally had to make plans for a long time. ”

“In addition to these auxiliary equipment, Tang Zhen also planned to get a batch of weapons for killing monsters, such as flamethrowers, high-power grapeshot guns, fragment grenades, and so on. If necessary, he would also equip the soldiers entering the fallout shelter with sufficient safety equipment and biochemical gas masks to avoid unnecessary losses. ”

“After making a list of the required items, Tang Zhen made a phone call and contacted a low-level member of Eternal Heaven who was sent by Ivanov to be in charge of the material collection and preparation work.”

This member used to be Ivanov’s subordinate and knew a little about Tang Zhen’s matters. It was because of this that this brawny man from the ice Bear Alliance became a fanatical admirer of Tang Zhen.

“After receiving Tang Zhen’s phone call, the brawny man named Peter respectfully greeted Tang Zhen and asked what instructions Tang Zhen had. After Peter recorded all the items Tang Zhen needed, he said that he would prepare everything within three days.”

“Tang Zhen nodded his head when he heard this and encouraged Peter with a few words. He immediately became extremely excited and repeatedly expressed that he was willing to go through water and tread on fire for the Oracle, even if he had to die.”

“After hanging up the phone, Tang Zhen stretched his muscles and took out a few cans of beer from the refrigerator. He slowly drank while flipping through the green leaf books of the tree spirit tribe.”

“When the plug-in could be used the next day, Tang Zhen used the same old trick and moved the flashing gold race’s sanctuary eleven kilometers in the direction of Holy Dragon City. After calculating the remaining distance, Tang Zhen only needed to move one more time to complete the mission.”

“After returning to the warehouse of the ice Bear Alliance, Tang Zhen found that Peter had already transported some materials over. Tang Zhen, who had nothing to do, went forward to check.”

It could be seen that Peter worked very hard because the materials that he handled were of the best quality among the same products. Even some very useful items that Tang Zhen didn’t expect were purchased by Peter and sent here.

“Tang Zhen was very satisfied with this. He would never be stingy with such a good subordinate. Therefore, he directly rewarded Peter with a top-quality Ruby the size of a quail egg, which made Peter shed tears of gratitude after being shocked.”

“This man from the ice Bear Alliance had a very heavy family pressure and his life was also very tight. Even after following Ivanov, his life had not improved much. The top quality Ruby that Tang Zhen rewarded him would undoubtedly help him escape poverty and become rich in an instant. This moved Peter and at the same time, he made up his mind to be at Tang Zhen’s beck and call.”

“When the third day arrived, Tang Zhen finally moved the flashing gold tribe’s sanctuary to a place not far from the sacred Dragon Valley. He had originally planned to place the sanctuary outside, but when he thought about the problems of safety and confidentiality, he finally took the risk and moved it under the sacred Dragon Valley!”

?

Chapter 128: Clearing the first underground floor _1

“Tang Zhen’s actions had caused a huge underground city to appear beneath the Holy Dragon Valley. Other than Tang Zhen, no one knew that there were countless monsters lurking beneath the Holy Dragon City.”

“Tang Zhen did not care about this because as long as they guarded the exit of the sanctuary, the monsters entrenched in the sanctuary would not be able to escape from the sanctuary even if they had great abilities. Moreover, according to the nature of the monsters in the wild building, they would not easily leave the area where the building was located, so there was no need to worry about them running around.”

“Now that he had this flashing gold race sanctuary to farm monsters, Tang Zhen would probably be very busy in the future.”

“After gathering all the management personnel of the Holy Dragon City, Tang Zhen announced this matter. Unsurprisingly, it caused some panic. However, when the residents thought of the city Lord’s magical ability to move a wild building from the underground tens of kilometers away, they felt that their worries were unnecessary.”

“What kind of person was the city Lord? He was a man with great ability, so he didn’t need to worry about what he did. It was better to do his job well and listen to the city Lord’s command.”

“Seeing everyone’s obedient appearance, Tang Zhen chose the combatants who entered the sanctuary for the first time and began to distribute equipment. At the same time, he discussed with everyone about the things they needed to pay attention to when exploring the wild building.”

Many of these residents had participated in the exploration of the wild building and were considered experienced. They put their heads together and developed many emergency plans.

“To the soldiers of the Holy Dragon City, exploring the wild building was an exciting thing, because it meant surprises and rewards, which would make them extremely excited. Not to mention that the wild building was right at their doorstep, which was simply ideal!”

“After the discussion was over, everyone dispersed. Tang Zhen went to the entrance of the refuge shelter, which was guarded by the Holy Dragon City cultivators, by himself. After taking a look around, he returned to his room to rest.”

“Early the next morning, Tang Zhen and the fully armed soldiers went to the entrance of the sanctuary after having breakfast. Tang Zhen’s expression was very serious as he looked at the excavated entrance of the flashing gold tribe’s sanctuary.”

Five cultivators holding heavy machine guns pointed their muzzles at the shelter. The rest of the soldiers also held their weapons in their hands and waited for Tang Zhen’s orders. They were both nervous and anticipating the battle that was about to begin.

A few soldiers carefully placed some specially made metal boxes at the exit of the sanctuary. These were weapons specially made by Tang Zhen’s men. Each metal box was filled with steel balls and explosives. They could achieve a directional explosion and could cause extremely terrifying large area damage to monsters.

“After all the metal boxes were installed, Tang Zhen held a heavy machine gun in his hand and indicated for Qian Long to open the entrance of the sanctuary. Qian Long nodded and walked in. He pulled the Golden handle with all his might, and the golden wall covered in decorative patterns slowly opened. ”

“However, Qian Long didn’t leave immediately. Instead, he gave a look to the Holy Dragon City cultivators who were on standby. The two cultivators quickly rushed to the crack and threw two specially made two-meter-long thick iron pipes in. ”

“When thousand Dragon saw the steel pipe being thrown in, he immediately returned the wrench to its original position. As the crack slowly closed, everyone seemed to hear the unwilling roar of a monster. During this time, a few monster arms reached out from the crack and waved non-stop, but they were unable to break through the 1.5-meter-thick door. A few golden spiders that tried to escape were crushed into powder by the incomparably thick Golden Door. ”

“At the last moment when the door was about to close, Tang Zhen gently pressed the button in his hand, and a series of explosions faintly sounded from behind the Golden Door. It seemed to be mixed with the painful screams of the monster. ”

Tang Zhen believed that these two explosive tubes filled with TNT and tiny steel balls would give these monsters a deep impression!

“Tang Zhen threw the gun in his hand away and signaled Qian Long to open the door again. This time, they were going to fight with real weapons. Qian Long didn’t hesitate and opened the door again. He then jumped out and picked up a grapeshot gun from the ground before aiming it at the entrance of the shelter. ”

“As the Golden Door opened again, a bloody smell mixed with a rancid smell was extremely pungent. Dozens of metal spiders impatiently ran out from the gap of the door, but they were blocked by the metal net on the ground. ”

“The metal net was connected to an electric source by Tang Zhen. As soon as The Golden Spiders came into contact with it, they began to wriggle violently. At the same time, electric sparks flashed. Dozens of golden spiders soon stopped struggling and hung on the metal net. ”

“There were a few golden spiders that were not electrocuted, but they were shot to pieces by the dense bullets, not even leaving behind an intact corpse. ”

“At this moment, the Golden Door was already half open. Tang Zhen could clearly see the scene behind the door. He could see that the monster’s limbs were everywhere in the wide passage. Dirty blood was splashed everywhere. The ground was piled with a layer of thick meat and blood, appearing muddy. ”

“Several hundred human-shaped monsters let out strange cries as they pounced forward. Some of them were wearing shiny cloth robes, while others were wearing dazzling armors. Each of them had a malevolent expression and an inch-long horn on top of their heads. At the same time, they were all wearing headbands that were engraved with the words of the flashing gold race. ”

“””Lie down, detonate!”” ”

“Under Tang Zhen’s command, all the metal boxes that were placed in advance were detonated. A series of loud explosions were heard, and the monsters’ screams were endless. When the smoke and dust dissipated, there was almost no monster standing at the entrance of the sanctuary. ”

Almost all of the monsters were torn to pieces by the shock waves of the explosion and the steel balls!

“More than a dozen monsters that survived the explosion were crawling out with their broken limbs, but their heads were blown to pieces by the soldiers’ grapeshot guns. ”

Tang Zhen stepped onto the soft ground that was covered in blood and flesh. The blood had completely soaked his rain boots. He put on his mask and indicated for everyone to continue moving forward.

“A series of flashlights were projected into the passage. Tang Zhen walked forward while looking at the words and patterns on the wall. The passage under his feet was very wide and the decorations on the wall were very beautiful. However, at this time, it was filled with the corpses of monsters, making it look filthy. ”

“Tang Zhen walked and walked. Suddenly, he quickly walked to the front of the wall. He stared at a protruding square with a sun pattern on it for a while before reaching out his hand and pressing it down with all his strength. ”

“Everyone was confused, but then they saw a Halo suddenly appear in the dark passage, and it was slowly turning bright. In less than half a minute, the entire passage was bright. ”

“Upon seeing this, everyone turned off their head lights and flashlights and looked at Tang Zhen, who was removing his palm from the wall. ”

“this is the lighting system of the glittergold race. I didn’t expect it to still work. This way, my original plan to build lighting equipment can be canceled because compared to the electricity we use, the glittergold race’s energy seems to be more efficient! ”

Tang Zhen muttered to himself as he walked. He glanced at the monsters that had become restless after the lighting system was activated. He raised the heavy machine gun and aimed at them.

the cleaning operation has begun. Attack!

Tang Zhen issued an official order to attack as a large group of monsters pounced at him.

“For a moment, the sound of gunfire rang out. Most of these monsters were only Level 1 and Level 2, and they could not withstand such a dense barrage of bullets and grenade attacks. One by one, they fell on the road of the charge. ”

“Even if there were any fish that escaped the net, they would be cut in half by the cultivators with shields and sabers, and they would not pose any threat to the crowd at all. ”

“After half an hour of clearing out the monsters in the hall, the team slowly advanced. After clearing out all the monsters in the tunnel, they all breathed a sigh of relief and rested while arranging their weapons and equipment. ”

“With Tang Zhen as a moving warehouse, they completely did not need to worry about logistics. ”

“At this moment, Tang Zhen was seated on a chair that was decorated with gold in the hall. He was holding a stack of paper that was faintly golden in color and was currently reading it with great interest.”

“Although the contents of this paper were just a very common document in the flashing gold tribe, Tang Zhen was very clear that he could find very useful information from these written materials.”

“For example, he now knew that the shining gold race’s sanctuary was divided into many levels. In addition to the living quarters, there was a small special area that no ordinary shining gold race people were allowed to approach.”

“They were currently in one of the prohibited areas in the shelter because this was the only direct entrance to the shelter. To prevent any accidents from happening, this place was completely isolated from the underground.”

“In order to open the door from the outside, the guards inside had to cooperate and pull the other lever, which was usually closed.”

“However, due to the monsters’ random collisions, the wrench was accidentally pushed to the open state. Therefore, Tang Zhen and the others could be considered very lucky to be able to easily open the fallout shelter’s door from the outside!”

?

Chapter 129: Harvest and preparation (1)

“When they had recovered enough, they split into several small combat teams and began to clean up the sealed rooms one by one. They did not have to pay much attention to the rooms that were open because the monsters inside had basically gathered in the hall and had been torn into pieces by the bullets.”

“However, Tang Zhen did not directly take action during the cleaning process this time around. Instead, he constantly observed his surroundings through the map in order to prevent any unexpected situations from occurring.”

“Through his heaven-defying map function, he had a panoramic view of the entire floor. He had also marked out the rooms with monsters. Tyson and the others only needed to follow Tang Zhen’s instructions, kick the door open, and pull the trigger.”

“By the time everyone felt exhausted, the cleaning of the entire first underground floor was already halfway done. Tang Zhen was extremely satisfied with this kind of highly efficient work speed.”

“He planned to clean up this underground floor as soon as possible, so he didn’t return to the surface to rest. Instead, he took out a large pile of military food from the space. It had an automatic heating function, and although the taste was ordinary, it was already very delicious for Tyson and the others who had just eaten for a few days.”

“Qian Long was gnawing on a piece of compressed biscuit. As he chewed, he fiddled with the dagger in his hand. This was a weapon of the flashing gold race. It looked as though it was made of gold, but its

hardness far exceeded that of ordinary gold. Moreover, this weapon gave Tang Zhen a strange feeling, as though it had some special effect. ”

“Zhen Tang asked for the dagger. After a few simple tests, he confirmed that the dagger was made of a kind of alloy. The edge was very sharp and tough. It seemed to have a strong corrosion resistance. It looked like gold, but it was very light and had a little memory metal. ”

“If the cost of this kind of metal was very low and it was easy to make, he believed that it could absolutely replace ordinary steel and become the main material for the armor of the Holy Dragon city’s soldiers. ”

It seemed that he would have to pay more attention to the text information about this metal in the next search process.

“When Tang Zhen thought up to this point, he immediately warned everyone that they must try their best to collect any papers and books they see later. At the same time, they must ensure that they are complete. ”

“Everyone present knew that their city Lord liked to read, so they all nodded in agreement. There was even someone who asked Tang Zhen seriously if he wanted to collect the toilet paper. In the end, he was pressed to the ground by Tai Seng and was beaten up. ”

“Tang Zhen didn’t even need to turn his head to know that the one being beaten up was definitely the rich Captain. This was because only someone with a screw loose in his head would be so talkative. However, other than this small problem, the rich Captain could definitely be considered an excellent soldier. Therefore, Tang Zhen had also brought him along this time. ”

“When everyone saw their rich Captain getting beaten up, they started to kick up a fuss. After Tang Zhen stopped them with a smile, the rich Captain stood up with an aggrieved face and kept muttering, “” why did you beat me up? I asked the right question. Didn’t the city Lord say that as long as it’s paper, it should be collected? is the paper used to wipe my ass not paper? “” ”

“Hearing this, Tai Seng pretended to hit him as he laughed and scolded, “” “”If you f * cking speak less, no one will think you’re mute. Kid, you’ve only used toilet paper for a few days in Holy Dragon City. Before you came to Holy Dragon City, you’d probably have collected toilet paper as if it was some wordless heavenly book, “” ”

“Tai Seng’s words caused everyone to burst into laughter again. The rich Captain didn’t get angry and even scratched his head, “” haha, you’re right. If I had seen a toilet paper before coming to Holy Dragon City, I would definitely have kept it as a good thing! ”

The team leader’s words caused another round of laughter from the crowd!

“In the next two days, everyone completed the cleaning work of the first underground floor without any danger. At the same time, Tang Zhen also discovered the entrance to the second underground floor. However, he was not in a hurry to open it. ”

He had a feeling that the truly dangerous monsters in the glittergold tribe’s sanctuary were in the space below the second underground floor.

“There weren’t many golden spiders in the first underground floor. He didn’t know how many there were below, and if there were any similar things. ”

“After receiving Tang Zhen’s order, the residents waiting on the ground rushed in to clean up the battlefield. They moved the monsters ‘corpses outside and piled them up. At the same time, they dismantled and sorted out the small gold items. ”

“After the sorting was done, Tang Zhen would bring the gold back to the original world and hand it over to Ivanov for smelting. Tang Zhen did not know the total weight of the gold, but it was definitely not less than a few hundred tons. ”

Tang Zhen didn’t need to worry about how to sell and use so much gold because he believed that Ivanov would definitely have a way to deal with it perfectly without causing market turmoil.

“While carrying the monster’s body, the collection of the monster’s brain beads was also carried out at the same time. One by one, the brain beads stained with the monster’s blood and brain matter were taken out and then thrown into the bucket at the side with a “” plop “” . ”

“After a simple cleaning and wiping, these brain beads that were as resplendent as gemstones were placed into boxes. After each box was filled with 1000 brain beads, they would be sealed and handed over to Tang Zhen. ”

“After another two days, the entire first underground floor had been completely cleared out. He had obtained more than six thousand level one brain beads, nearly a thousand level two brain beads, and only a few dozen level three brain beads! ”

“As for the number of gold tools, Tang Zhen was simply unable to count them. This was because the sacred Dragon Valley was currently filled with sparkling gold. Under the illumination of the sun, it almost blinded everyone’s eyes. ”

“The residents did not understand why the mayor liked to collect such heavy and soft metal, but as long as the mayor liked it, they would do as he said even if he wanted to pick up all the stones from the gravel plain! ”

“In fact, Tang Zhen was secretly worried as he looked at the mountain of gold in front of him. It was impossible for him to bring all this gold back to the original world. If he did, it would definitely lead to a huge mess. However, he could not allow this gold to pile up everywhere. If that happened, the sacred Dragon Valley would also become extremely chaotic. ”

“If there was something that could melt this gold in large quantities, he could use it to cast some trash cans, water tanks, and other decorations to fill up the empty Holy Dragon Valley. ”

“When the soul hosts from their original world came to the other world one day and saw the valley full of golden objects, even decorated with gemstones from the mother tree’s roots, the scene would definitely blind their eyes. Where else in the world could be more extravagant than the Holy Dragon Valley? ”

“When Tang Zhen thought of this, he felt that this idea was good. However, there was no blacksmith among his residents who was good at forging. In the endless wilderness, the best at forging was the

neutral dwarves, while the elf race was the most artistic. Tang Zhen was not related to either of these two races, so he could only think of a way by himself. ”

“It seemed that he had to take some time to return to his original world and get some equipment that could be used to smelt gold on a large scale. It would be best if he could get some molds as well. This way, he could solve the problem of having too much gold. ”

“Now that he had a way to deal with the gold, the next thing he needed to do was to deal with the mountain of monster corpses. ”

“This was also a big problem that had to be solved as soon as possible. Otherwise, once the corpses rotted, it was likely to cause a plague or attract countless monsters that liked to eat rotten meat. ”

Tang Zhen would really be scratching his head if he were to summon another high level flying monster.

“However, Tang Zhen had already made plans for this situation when he moved the flashing gold race’s sanctuary. This was because he happened to have something that required monster flesh to be cultivated. ”

“The cornerstone of the mother tree of the tree spirit tribe. After using it to build the mother tree tower, the more flesh and blood nutrients it devours, the faster and thicker it will grow, and the more power it will provide to the residents. ”

“Now that thousands of monster corpses had been cleared out from the flashing gold tribe’s sanctuary, it was a great opportunity to build a mother tree tower for it to devour and grow. It was a good thing that killed two birds with one stone, so why would Tang Zhen miss it? ”

“Tang Zhen took out the mother tree’s foundation stone from his storage space and let it float in his hand. He looked at the Holy Dragon Valley, which appeared empty due to it being too wide, and softly said, it’s time to build a mother tree City and add a layer of green to the valley. However, the enemies will probably see a sea of blood! ”

?

Chapter 130: The construction of the auxiliary city and the memories of the mother tree

“The idea of building the mother tree Tower City and making it the Holy Dragon city’s auxiliary city had been in Tang Zhen’s mind for a long time. He had been waiting for a suitable opportunity, and now the time was fully ripe. ”

“Hence, Tang Zhen issued an order to inform everyone in the Holy Dragon Valley that an auxiliary city would be built the next day. At that time, all the Wanderers in the valley who had not obtained resident status would have the opportunity to become a resident of the Holy Dragon City. ”

“This was undoubtedly a message that made all the Wanderers jump for joy. Some of them hugged each other and cried, some were so excited that they didn’t know what to do, and some even sat on the ground and kept giggling, but their eyes were filled with tears of happiness. ”

“Seeing that the Lord Castellan wanted to build an auxiliary city in such a short time, the residents of Holy Dragon City, in addition to secretly guessing the ability attributes of the new city, were more prepared to deal with the monsters that attacked.”

“Compared to the nervous and gambling-like mood of the Holy Dragon city’s residents when it was first built, this time, all the Holy Dragon city’s residents were very relaxed. They were only building a level 1 city Tower. When the time came, the monsters that would come to attack the city would probably not be left before the Holy Dragon city’s Warriors had their fill of killing them.”

“Excellent and powerful weapons and equipment, as well as sufficient and complete logistics supply, made the Holy Dragon city’s residents full of confidence. The terrifying and ferocious monsters in the past seemed to be nothing more than this.”

“There was no need for Tang Zhen’s arrangements at all. The Holy Dragon city’s management personnel began to organize the personnel to carry out defensive preparations. With the heavy machine gun as a great killing weapon, they were even confident that they could completely block the monsters outside the valley this time.”

“Qian Long and Tai Seng each led a group of people and busied themselves in the Holy Dragon Valley. Although they had participated in the clearing operation of the glittergold race’s shelter and had a deep understanding of the terrifying damage of firearms, they still didn’t dare to be careless. They completed their respective tasks seriously.”

“The Wanderers who were about to be granted the status of residents would also come forward to help the Warriors do whatever they could without anyone’s invitation. In their eyes, this was their duty.”

“There were even some Wanderers who requested to personally participate in the defense line against the monsters. However, they were rejected by the relaxed and disdainful Holy Dragon City Warriors. If Holy Dragon City had just been built, there would be as many Warriors as there were. But now?”

You guys can just hide in the back and wait for a good show!

“In the busy and excited atmosphere, the next day came quietly.”

“After a day and a little more than half a night of work, a huge earthen wall had appeared out of thin air in front of the Holy Dragon Valley. It was fifteen meters tall and completely blocked the entrance to the Holy Dragon Valley.”

“This earth wall was the masterpiece of Tang Zhen’s [terrain transformation plug-in]. However, at the same time, Tang Zhen also found that this seemingly invincible plug-in actually had hidden restrictions.”

“Originally, according to Zhen Tang’s plan, he was going to use the [terrain transformation plug-in] to kill all the monsters that came to attack the city! However, after some experiments, Tang Zhen discovered that this method did not work at all.”

“It turned out that the terrain modification plug-in would not be able to be used when there were creatures or monsters in the transformed area and nearby. However, when the creatures and monsters stayed in the buildings, the use of the terrain modification plug-in would not be affected.”

“This was also the reason why Tang Zhen could move the flashing gold tribe sanctuary over, but couldn’t kill all the monsters that attacked the city when the building was built. Otherwise, with this super plug-in that could be used for one minute a day, Tang Zhen would be able to do whatever he wanted in the nearby area!”

Now it seemed that the greatest use of the [terrain transformation plug-in] was still for building and moving the terrain. It was actually very limited in battle!

“This [terrain transformation plug-in] was the only application that Tang Zhen had downloaded that required payment. It cost 10000 gold coins per minute, so Tang Zhen didn’t dare to use it easily.”

“Hence, the main force of this battle was still the Holy Dragon city’s soldiers!”

“Compared to Tang Zhen, who felt a little regretful, the Holy Dragon city’s soldiers and residents were once again stunned by the city Lord’s divine power. They watched as a huge Wall Rose from the ground in front of the Holy Dragon Valley. At the same time, a ramp and battlements appeared on the wall.”

“The Holy Dragon City was now completely sealed off. A giant wall completely isolated the valley from the outside. The city Lord said that after they had defeated the monsters attacking the city, they could move the sandbags that had piled up in the doorway under the earth wall to make it easier for everyone to enter and exit.”

“Currently, the giant wall was filled with Holy Dragon city’s soldiers. Everyone was fully armed. They all looked towards the valley in unison, waiting for Tang Zhen to start the sacrifice.”

“Under countless gazes filled with anticipation, a solemn-looking Tang Zhen began the sacrifice. He first dripped his blood on the mother tree’s cornerstone to acknowledge it as his master. After that, he sent a large number of brain beads to the altar. His every move was filled with a sacred meaning.”

“After Tang Zhen confirmed that he was going to build a city Tower, the memories of the mother tree’s life instantly appeared in his mind.”

“It was an incomparably vast world that was completely covered in emerald green. On the horizon, a giant tree that looked like a god stood on the ground. It was so huge that no one could describe its specific height and size.”

“Countless beautiful and magical creatures lived around it, happily chasing and playing. A small branch on the mother tree was enough to house countless creatures, and a fruit from the mother tree was enough to feed countless creatures.”

“Everything was so calm, so peaceful and at ease!”

“Until one day, the sky seemed to be torn apart, followed by countless flaming boulders falling from the sky. Countless plants and creatures died in this natural disaster. The mother tree was also hit by an incomparably huge meteorite and completely disappeared from this world.”

“The scene changed and the mother tree’s memory appeared again. This time, its size was much smaller. It was not even as thick as a branch in its Prime. Moreover, the creatures that relied on it to survive this time had become the tree spirit clan that Tang Zhen had seen in the picture.”

“The tree spirit tribe was a race that yearned for nature and a noble life. By drawing power from the mother tree, they had built their home into a beautiful one, and they sang and danced under the mother tree every day.”

“Year after year, the tree spirits’ demand for the mother tree’s power increased, but the number of tree spirits who were willing to calm their hearts and pray to the mother tree, as well as water and fertilize it, decreased.”

“The tree spirits, who were immersed in their joy, did not know that the mother tree was in great pain. The beneficial insects that had loosened the soil for it had been infected by the monster and were wreaking havoc inside its body, constantly destroying and devouring it. The mother tree wanted to use its own power to expel the insects, but due to the tree spirits’ excessive demand, the mother tree’s power had reached the point of exhaustion.”

“The mother tree wanted to convey its pain to the tree spirits, but it was extremely sad to find that it had not been able to communicate with a single tree spirit for almost twenty years. It had no way to express its pain.”

“The mother tree was tormented by this pain until one day, its body finally broke in half. The scene was earth-shattering, and in the mother tree’s last consciousness, it saw the panicking tree spirits and the overwhelming monster Tao Wu.”

“After reading the memories of the mother tree’s two lives, Tang Zhen silently looked at the mini-version of the small tree in front of him. After a slight transformation, he sent it to the position he had chosen in advance. Then, he looked at the giant tree that appeared out of thin air in front of him in a daze!”
