

Alternate 1271

[Chapter 1271](#)

1271 Spirit body minions (1)

The dream Crusher's method of rebirth was too similar to the Holy Dragon city's soul teleportation. This method had its advantages and disadvantages. At this time, the dream Crusher was being held in place by the Holy Dragon City!

With Tang Zhen and blood River King's cooperation, more than 3000 origin stones were intercepted. This also meant that 3000 Dream Chasers would not be able to be reborn. This was definitely a big blow to the dream Chasers.

After the battle ended, Tang Zhen began to deal with the origin stones that he had seized.

He was only interested in the power of origin contained in the origin stone. He had no interest in the soul of the dream Crusher. There was no need to destroy it, so he simply imprisoned them in the reincarnation mirror.

After the souls of these Dream Chasers were tamed, they would be a great help to Tang Zhen.

It seemed that the spiritual bodies in the reincarnation mirror were not much different from the dream Crusher in nature. They were all pure energy bodies.

Dreamworld was a special world of energy. The sleepless and dream Chasers that lived here were in the form of energy, not real physical bodies.

The metal materials that he brought in from outside the dream world were real, but like the buildings, they were allowed by the rules of the dream world. Only after they were tempered would they be able to unleash their true power.

During this process, physical materials would be gradually eliminated, and the final weapon would become an energy body!

After realizing this, Tang Zhen immediately took out the reincarnation mirror and carefully released a group of spirit bodies. He wanted to see if they could move freely in the dream world.

Just as he had expected, the environment in the dream world was like a fish in water for the spirit body. It was no different from being in the reincarnation mirror!

Tang Zhen was overjoyed when he saw this. If he had known this earlier, why would he go through so much trouble to bring the Holy Dragon City cultivators in? wouldn't it save him a lot of trouble if he directly controlled these spirit bodies?

However, after thinking about it carefully, Tang Zhen still discovered the disadvantage of doing so.

Whether it was in terms of strength, cultivation, intelligence, or obedience, these muddleheaded spirits could not be compared to the Holy Dragon City cultivators. Unless they were of a higher level, they could not be controlled as easily as their own arms.

They were just a bunch of random soldiers, how could they be compared to the cultivators of Loucheng who had been fighting for years?

However, if used well, these minions could cause a lot of trouble for the Dream Crusher, or be used to restrain the large number of Sleepless.

After making up his mind, Tang Zhen called the reincarnation mirror's gatekeeper out. He wanted to know how many spirit bodies he had now.

The gatekeeper still had that cheap appearance. After seeing Tang Zhen, he first flattered him and flattered him to the extreme.

Tang Zhen was already used to the gatekeeper's behavior. Instead, he directly asked about the number of spirit bodies he could use.

After hearing Tang Zhen's question, the guard pondered for a moment before giving an answer.

"The total number of spirits in the reincarnation mirror has exceeded 10 million, but more than half of them are incomplete and don't even know what they are. Once these guys are released, it won't take long for them to get lost!

It would probably take a lot of time to retrieve them.

The remaining half of the spirits have consciousness, but their strength varies. I estimate that less than two million of them can be used."

After hearing the number reported by the gatekeeper, Tang Zhen couldn't help but be slightly stunned. He didn't expect that there would be so many available spirit bodies in the reincarnation mirror.

Although they had just defeated the Dream Crusher Army, the Holy Dragon City's cultivators did not have an advantage in numbers compared to the dream world's many Dream Crusher. Therefore, Tang Zhen would try his best to improve the quality of his equipment to make up for the gap in this aspect.

He had even planned to mobilize tens of thousands of Holy Dragon City cultivators to participate in the war. Now, it seemed that there was no need.

With the help of millions of spirit bodies, Tang Zhen could directly enter the Dream Crusher's base camp and give him a drastic change!

pass on my order. We'll set off in an hour and head straight for the dreamer's lair!

.....

In the Forbidden Zone where the Dream Crusher's base camp was located, the atmosphere was depressing. The usual clamor had long disappeared.

When the light of Mother God's avatar flickered again, and the dream Chasers who died in battle were constantly reborn, the dream Chasers who stayed in the restricted area had confirmed that the Army that cleared out the intruders must have fought with the enemy. Otherwise, there would not be such tragic casualties.

The invader was not weak, but in front of an Army of 5000 Dream Chasers, they were doomed to be annihilated!

Just as he was about to ask about the results of the battle, he saw the faces of these reincarnated people turn ashen, as if they had suffered a great blow.

It would not be surprising if only one person was in such a state, but when all the reincarnated people were in such a state, the dream smatterers who stayed behind immediately realized that something was wrong.

Could it be that the enemy was so powerful that the 5000 Dream Crusher Army in charge of clearing the area was no match for them?

After realizing that things were not that simple, the remaining Dream Chasers were about to ask more when Mother God's avatar suddenly glowed. Nearly a thousand reborn Dream Chasers appeared at the same time, filling the surrounding space.

where's qiangzi? where are you Little Rascals? get out here!

A leader of the dream Crusher team jumped down from the altar and shouted to the surroundings. He was obviously summoning his resurrected team members.

However, after shouting for a long time, there was no response. This strange situation made the leader's heart sink.

what's going on? where did my team members go? they clearly died in battle, so why haven't they been resurrected? "

After looking around, the leader of the dream Crusher finally confirmed that he was the only one who had successfully resurrected in his completely annihilated team!

Such a situation had never happened before. The leader of the dream Crusher team was obviously at a loss. After shouting and ignoring everyone, he went straight to the building where the higher floors of the dream Crusher building were located.

When he saw the other dream Smasher shouting that their companions were missing, the team leader suddenly realized that something big had happened!

It didn't take long for rumors to spread that the new intruders had special means to destroy the reincarnation of the dream Crusher. Once killed by these enemies, it was equivalent to true death!

After hearing these rumors, the dream Chasers turned pale with fright. An atmosphere of fear and uneasiness began to spread in the Forbidden Zone.

Being able to be reborn from the dead had always been the biggest advantage of the dream Chasers. It was also their fearless reliance against the monsters. However, when this reliance disappeared, the dream Chasers immediately fell into fear and confusion.

Due to the fear of death, many of the dream Crusher had already developed a fear of battle. They were afraid that the intruders would launch an attack on their base camp!

The higher-ups of the dream Crusher saw that the situation was not good and immediately stood up to try to calm the people, but the effect was not obvious.

Left with no choice, the higher-ups of the dream Crusher could only bitterly look for countermeasures. At the same time, they also began to ask for help from the other Dream Crusher camps and organized all the sleepless in the vicinity to prepare for the upcoming battle.

Everyone knew that these intruders would not stay put and would probably be heading toward their base camp.

Fortunately, the distance between the two places was not short. It was impossible for the intruders to arrive in a short time, so they still had enough time to make preparations.

Just as the dream Crusher's camp was nervously preparing for the battle, the Holy Dragon City Army was gradually approaching. The battle was about to begin!

[Chapter 1272](#)

1272 Unstoppable momentum _1

The stacked city where the dreamer's base camp was located was now in a tense atmosphere.

The war with the demons had just ended, and new invaders were about to arrive at the city. Compared to the gloomy-faced Dream Chasers, the sleepless were actually more depressed.

Every time their base was in danger, the dream Chasers would use the sleepless as cannon fodder. Not to mention the distant ones, more than 100000 sleepless died in the last monster invasion.

The dream Crusher was blessed by Mother God and could be reborn after dying in battle, but if sleepless were to die, then it would really be over!

Even an ant would covet life. Although life was difficult for sleepless, they did not want to lose their lives in vain.

However, under the threat of the dream Crusher and the temptation of a large amount of food, they had no choice but to participate.

At the edge of the city, a long line of defense had been set up. More than 100000 sleepless were stationed there, nervously waiting for the arrival of the invaders.

Their weapons came in all sorts of shapes and sizes, and they were all extremely common items. Under the circumstances of not being tempered, they could cause minimal damage to the enemy.

However, no one cared, because the sleepless were just cannon fodder. Their only purpose was to stop the invader's attack. The real battle still needed the dream Crusher to complete.

It was almost noon, and the people and horses were tired.

Just as sleepless was feeling hungry and thirsty, finally, a dream Crusher walked out of the city and slowly came to a pile of food nearby.

After taking out a card and waving it over the pile of food, the dream shatterers had a pained expression on their faces. Then, they ordered people to distribute the food one by one, making sure that they had a portion!

In order for sleepless to do his best, the dream Crusher's base camp had put in a lot of effort this time. The consumption of food purification alone was enough to use one-fifth of their points.

Unusual times called for unusual things. Now that a strong enemy was attacking, the higher-ups of the dream Crusher did not dare to be stingy.

Holding the food that was distributed to them, the sleepless were all smiles. Although war was terrifying, it had its benefits too. The food supply that was given at a fixed time would definitely feed them well!

The purpose of many sleepless who participated in the war was actually to have a full meal. They didn't care even if they lost their lives.

The dream world did not lack food, but the sleepless did not have a purification card. Now that they had the help of the dream Crusher, they naturally had to have a good meal!

There was a lot of food that they had been drooling over for a long time. Now, they could finally taste it without worrying about being poisoned.

When the sleepless started eating, the reinforcements from the nearby base camp appeared one after another. They ignored the sleepless on both sides of the road and headed straight for the restricted zone.

Although they were all Dream Chasers, each of these bases did not interfere with each other. Only when they encountered danger would they work together to overcome it.

"Where is your manager? tell him to come out and welcome you!"

Nearly a thousand travel-worn Dream Chasers stood at the entrance of the Forbidden Zone. The leader of the dream Chasers had a proud look on his face as he shouted at the guards at the entrance.

They had come all the way here to help, but the other party didn't even do the proper etiquette. This was obviously looking down on them.

The dream Chasers behind him were also in a heated discussion. They looked at the forbidden area with anger in their eyes. If it were not for the order, half of the dream Chasers would have turned around and left.

The security guard at the door did not dare to delay and quickly went back to report. It did not take long for a group of people to rush in.

"I'm sorry, I'm sorry, I'm too busy. Please forgive me for my negligence!"

A brawny man in golden armor smiled and led the way. He apologized to the dream Crusher who had come to help. Seeing his sincere expression, the resentment in everyone's hearts was reduced a little.

"No, now that the war is imminent, it's normal to be busy."

The dream Crusher who came to help immediately replied with a smile. His actions just now were just to appease his subordinates and at the same time, to not let the other party look down on him.

After exchanging a few pleasantries, the 1000 dream shatterers entered the restricted area and waited for their next mission.

At this time, the Forbidden Zone was busy. All the dream shatterers were making the final preparations before the battle. They either seized the time to refine their weapons or exchanged for materials in front of Mother God's avatar to improve their combat effectiveness.

The danger level of the Holy Dragon City was already on par with the demons. After killing the cultivators of the city, the dream Chasers would get the corresponding points, which were much higher than killing the demons.

It was obvious that the origin intent had already regarded Holy Dragon City as a thorn in its side, and could not wait to get rid of it immediately!

There were always brave men with great rewards. Although there was a certain probability that they would not be able to revive after being killed by the Holy Dragon City cultivators, most of the dream shatterers were still in high spirits under the stimulation of the rich points.

As time passed, more and more dream smatterers gathered in the restricted zone. The sleepless in the vicinity were all gathered together, covering the entire defensive area of the city.

When the sky gradually turned dark, a boundless black line suddenly appeared on the wilderness in front of the piled-up city. It was slowly approaching along the horizon.

The dream Crusher who was responsible for reconnaissance had long noticed the abnormality, but when he saw the object that made up the black line, he was immediately frightened out of his wits. He subconsciously shouted, "The enemy is here, they're everywhere!"

As soon as he finished speaking, a crisp alarm rang throughout the city, reminding people that war was coming.

The entire city fell into chaos as the sleepless entered the defensive line. They held their weapons tightly while trembling and silently prayed for the mother God's blessing.

An Army of more than 50000 dream Smashers rushed out of the city and formed a square formation in the wilderness, waiting for the arrival of the enemy with a serious expression.

There were also many dream shatterers in the city who were good at hiding and assassinating. They were prepared to use the city to resist the enemy, instead of fighting in the wilderness, which would reduce their combat effectiveness.

At the same time, many experts among the dream Chasers were ready for battle, trying to kill the stronger ones among the invaders.

However, when the enemy arrived, the dream Crusher finally knew what he was facing. An indescribable fear slowly rose in his heart.

The 20,000 Holy Dragon City cultivators were protected by more than two million ferocious spirit bodies. They gathered together like a wave that devoured everything and were approaching the dream Crusher's camp.

The barren wilderness had been completely occupied, with almost no space left.

If it was an ordinary spirit body like sleepless, the dream shatterers would not care at all. However, the problem was that these spirit bodies were not weak. The weakest one was comparable to a level 2 cultivator!

When the dream Chasers in the opposite camp saw this, the despair in their hearts grew stronger. This was because many of them had low cultivation levels, even lower than these spirit bodies!

At the thought of the tsunami-like attacks from the intruders, many of the dream Chasers had already lost their confidence before they even started fighting.

"Kill!"

A low roar came from the Holy Dragon city's camp, followed by an earth-shattering roar. Countless spirits went straight to the dream Crusher's camp.

"Raise your shields and face the enemy!"

Despite the fear in their hearts, none of the dream Chasers turned around to escape because they would die even faster!

The distance between the two sides was less than a thousand meters. In the blink of an eye, they collided. The seemingly huge Dream Crusher camp was like a reef hit by a wave, disappearing without a trace in an instant.

...

[Chapter 1273](#)

1273 Killing their way to the forbidden area (1)

"Bang Bang Bang!"

A series of muffled sounds came. The spirits at the front were like a chariot that had lost control. They crashed heavily into the thick shield wall set up by the dream Crusher. Then, they were pierced together by the long Spears that extended out.

The pierced spirit body wailed in pain but still waved its arms, trying to tear the dream Crusher into pieces.

The dream Crusher's battle results stopped there. In the blink of an eye, the solid shield wall was violently smashed apart. Countless spirits roared and rushed into the dream Crusher's camp, fighting with the fully armed Dream Crusher.

The sounds of killing and screams rose one after another. Blood and minced meat were everywhere, and hideous bones were everywhere. It looked like hell.

Although most of the spirit bodies were bare-handed, they had the absolute advantage in numbers. Even though the dream Chasers formed a line of defense, they were still torn apart by the crazy charge of the spirit bodies.

Then, the spirits swarmed up and surrounded the separated Dream Crusher. They tore him into pieces in an instant and devoured him with sinister smiles!

To a spirit body, these dream smatterers were great nourishment. They must not be missed.

After killing and devouring the dream Crusher, the spirits would pick up the dropped weapons and attack their next target with a crazed look.

In the face of the overwhelming number of crazy spirits, the 50000-strong Dream Crusher Army did not even last 10 minutes. All that was left was blood and remains, dyeing the wilderness red!

More spirits bypassed the Army of Dream Chasers, roared ferociously, and launched an attack on the city.

Looking at the ferocious spirit bodies that were rushing over like a tide, the sleepless who were on guard had fear written all over their faces, and they let out howls of despair.

They had no way of resisting such a terrifying enemy. Even if they risked their lives, it would be of no help!

The eyes of the dream Crusher in charge of supervising the battle had already turned red. He waved the weapons in his hands with all his might and ordered sleepless to raise their weapons to fight. However, looking at their current state, they were obviously frightened by the terrifying number of spirits.

“Ah, Yingluo!”

A sleepless suddenly let out a scream as he saw the approaching wave of spirits. Then, he threw away the brick in his hand and rushed toward the city without hesitation.

“Pfft!”

A cold light flashed and sleepless’s head flew into the sky, rolling and falling to the ground.

“Whoever dares to run away will end up like him!”

The dream Crusher, who was supervising the battle, roared loudly in an attempt to intimidate the sleepless who were afraid of the battle. Who knew that it was completely ineffective. As he roared, countless sleepless broke away from the defense line and ran towards the inner part of the city.

“Bastards, all of you will die!”

The dream Crusher, who was supervising the battle, was furious. He swung his sword and tried to stop the sleepless who were running away. However, after killing more than a dozen people, there was no effect at all.

It was also at this moment that the wave of spirits crashed into the defensive line formed by the sleepless. Deafening curses and screams of pain rose into the sky.

A long snake of blood mist suddenly appeared on the long and narrow defensive line. Broken limbs and pieces of flesh flew everywhere. The sleepless who didn't manage to escape in time were torn into pieces by the spirit bodies, and then they were completely swallowed by the wave of spirits that followed closely behind.

Seeing this, the dream Crusher in charge of supervising the battle let out a desperate roar. They waved their weapons to meet the enemy, but their end was no different from sleepless, or even worse.

The spirit bodies might not want to devour the body of the sleepless, but they would never let the dream Crusher go. The final outcome would be death without an intact corpse.

After breaking through the second line of defense, the spirit Army officially entered the city. Their advantage in numbers began to disappear.

The city was too big. Once the two million spirits scattered, they couldn't cause much of a stir.

It was not something that could be done overnight to kill all the dream Chasers scattered throughout the city. In addition, the terrain of the city was special. There were layers of buildings everywhere, making it the best place to hide. This was also the reason why the dream Chasers and sleepless could not be killed.

When they encountered danger, they only needed to hide in these hidden cracks, and most of them could save their lives.

However, the Holy Dragon city's main goal was not to kill the dream Crusher, but to break through the defense of the Forbidden Zone and destroy and plunder Mother God's avatar!

The dream Crusher would naturally take precautions against this, so on the road leading to the Forbidden Zone, he had already laid down heavy defenses. The experts among the dream Crusher were even more on guard, swearing to protect the safety of the Forbidden Zone with their lives.

The cultivators of the Holy Dragon City no longer supervised the battle. Instead, they quickly gathered together, leading the Army of spirit bodies that was like a wave, and quickly advanced towards the restricted zone.

The dream Crusher would definitely not let the Holy Dragon City cultivators get close to the core area. Therefore, with every step forward, the Holy Dragon City Army would be frantically blocked. They were like a fearless ant colony, trying to devour the giant pythons that attacked their nest!

However, in the face of the Holy Dragon City cultivators who were as ferocious as wolves and tigers, these obstacles were meaningless. Sometimes, the Holy Dragon City cultivators did not even need to make a move. Those spirit bodies would swarm forward and tear the despairing Dream Crusher to pieces.

As more and more dream smatterers were devoured, many spirit bodies began to advance, and the aura they emitted became colder and colder.

As they got closer and closer to the restricted area, the dream Crusher experts who had been waiting for them finally appeared. They were basically all wearing gold equipment and had caused quite a number of casualties to the spirit bodies.

The Holy Dragon City cultivators in charge of supervising the battle saw this and immediately locked on to these Dream Crusher experts. Their cultivation and equipment were not inferior, and they were fighting each other without a clear winner.

The besieged Dream Crusher experts were in shock. Even though they had already regarded Holy Dragon City as their most dangerous enemy, they only realized after fighting that they had still underestimated the terror of these invaders.

In less than 10 minutes, the dream Crusher left hundreds of corpses and fled towards the restricted area.

Ignoring the spirits who were fighting over the bodies, the Holy Dragon City cultivators tidied up their formation and once again set off for their destination!

Once again, they charged through the layers of obstacles and saw a huge circular wall appear, completely blocking the Holy Dragon City cultivators 'path.

Behind this magnificent city wall was the base camp of the dream Chasers, including the forbidden land where Mother God's clone was.

The city wall was filled with Dream Crusher. They looked at the Black Mass of spirit bodies and the weapons in their hands trembled slightly.

The previously carefully arranged defensive line was a joke to the million-strong spirit Army. It was completely destroyed in less than an hour. Almost no dream Crusher or sleepless who participated in the battle survived.

That's right, almost none of them survived!

With Tang Zhen and the Blood River King's blockade, the dream shatterers who had died in battle were isolated in another space. There was no way they could return to the forbidden area to be reborn.

This was the most ruthless move. In this way, the number of Dream Crusher would only decrease as the battle went on. It would not be like the time when they fought against the invasion of the demons, where they could send a continuous stream of troops to reinforce the front line!

It was because of this that the dream Crusher had already regarded the cultivators of Lou Cheng as more dangerous than the demons. No matter how big the price was, they had to get rid of them!

The two sides were already fighting to the death. As soon as they met, the fierce siege battle directly began.

What the Holy Dragon City cultivators did not expect was that just as they were about to fly over the city walls, a protective light screen suddenly appeared, completely protecting the city walls and the forbidden area.

At the same time, countless dazzling rays of light descended from the sky and landed directly in the Army of spirit bodies. The surrounding spirit bodies were affected by the light and they let out a miserable cry before disappearing rapidly like bubbles!

[Chapter 1274](#)

1274 Taking down the base camp _1

After the white light fell, the Army of spirit bodies that were as dense as ants immediately suffered heavy losses. A large empty area suddenly appeared in the camp, and the casualties were extremely heavy.

Compared to the spirit bodies that disappeared like bubbles, many Holy Dragon City cultivators were also affected by the falling light. After struggling in pain for a few times, they shattered like glass and escaped from the dream world.

This light was not simple as it carried a faint power of law. Any invader who did not belong to the dream world would not be able to escape its purification!

Compared to dying in battle and leaving, this special white light had obviously caused greater damage. Even if the Holy Dragon City cultivators did not die, they would need a long time to recover.

Due to the obstruction of the protective light curtain and the bombardment of the white light, the attack momentum of the spirit body Army suddenly slowed down. However, under the command of the Holy Dragon City cultivators, the spirit body Army immediately launched an even more violent attack.

The cultivators of Lou Cheng were no strangers to attacking a city. It was just an energy shield, and it could not stop the Holy Dragon City cultivators!

hit and bombard an area. The faster the better!

Under the command of the Lou Cheng cultivators, the terrifying and concentrated attacks landed on the protective barrier one after another, causing it to flicker continuously.

The Holy Dragon City cultivators were overjoyed to see this. According to their past experience, as long as the violent attack continued for more than a minute, the energy shield would malfunction, similar to not being able to charge properly.

As long as he seized the opportunity, he would be able to break through the protective shield and enter it successfully!

At the same time, the Holy Masters who were involved in the attack set up layers of protection to resist the attacks of the dream Crusher from the city walls.

The dream Chasers seemed to know the weakness of the protective shield. When the Holy Dragon City launched an attack on the protective shield, they threw a dense barrage of short Spears and sharp arrows, as well as building fragments the size of a water tank, to block the Holy Dragon city's attack.

In less than a minute, the bottom of the city wall was filled with corpses and debris. The energy shield, which had been under attack for a long time, finally revealed a flaw.

“BOOM!”

Almost a hundred figures of the Holy Dragon city's Overlord soared into the sky, forming a human wall in the air. Under the frightened gaze of the dream Crusher, they all blasted a heavy blow at the energy shield!

“Huala!

At the same time as the hole in the energy shield was blasted open, dozens of figures wrapped in golden light soared into the sky. They passed through the hole in an instant and landed on the city wall, killing wantonly.

Blood mist began to spread on the city walls. The Holy Dragon City cultivators in gold equipment were like ferocious Tigers, and no one could stop them!

The dream shatterers in charge of defense were immediately thrown into chaos. They attacked the dozens of Holy Dragon City cultivators on the city wall at the same time. In the end, the Holy Dragon City cultivators were in a complete mess. Their torn bodies kept falling from the city wall.

After another wave of fierce attacks, the protective shield of the dream Crusher suddenly shattered. The Army of spirit bodies that filled the bottom of the city wall swarmed up and covered the entire city wall in an instant.

The dream Crusher who was responsible for resisting lost his support and was immediately swallowed by the sea of spirits. No one escaped.

With the fall of the city wall, the last defensive barrier of the dream Crusher’s base camp disappeared. The Holy Dragon City cultivators drove straight in and quickly surrounded the Paradise built in the ruins.

According to the information collected, the inside of the Forbidden Zone was completely different from the outside world. As long as the dream Crusher was in the Forbidden Zone, he would receive the blessing of Mother God’s clone and receive a continuous increase in life and strength.

Under such circumstances, the dream Crusher would not die immediately as long as his head was not chopped off!

In fact, it didn’t matter even if he died. As long as Mother God’s avatar was still there, the dream Crusher who died in battle would immediately be reborn. In this critical moment of life and death, the dream Crusher would not suffer the punishment of a drop in cultivation after death!

It could be said that as long as Mother God’s avatar was not destroyed, there would be an endless stream of guardians in the Forbidden Zone, and it was almost impossible for there to be any danger of falling!

In the Forbidden Zone, the remaining Dream Crusher looked as if they were not afraid of death. They first bowed to Mother God’s avatar, then silently stood up and clenched their respective weapons.

Banish the monsters, protect Mother God’s clone, and restore peace to the world. This was the oath that every dream Crusher had to make. This was the last chance for them to show their determination with blood!

Without any unnecessary words, the Army of spirit bodies suddenly launched an attack. They rushed into the forbidden land like a tide, wanting to drown this place completely!

All kinds of lights shot up to the sky. All the dream shatterers no longer held back and began to do their best to stop these invaders from the foreign world, even if they had to exchange their lives for theirs.

The forbidden area that was like a paradise had completely turned into a millstone of flesh and blood. There were killings and screams everywhere. The torn bodies of the dream Smashers were everywhere. The lights of the spirits and cultivators who died in battle were so dense that they looked like fireworks.

Under the dream Crusher's desperate resistance, the Holy Dragon City paid a heavy price. This allowed them to gradually reduce the activity space of the dream Crusher, allowing them to continuously gather at the rebirth altar in the central area.

In the fierce battle, the activity area of the dream Crusher became smaller and smaller. In the end, it was all squeezed into an area of less than one square kilometer.

The battle had progressed to such a degree that it was finally time for a life-and-death battle!

The king level cultivators, who had been biding their time, suddenly appeared and attacked the dream Crusher from all directions. Tang Zhen and blood River King locked onto the giant origin stone known as Mother God's avatar and used the power of law to isolate it.

A fire Dragon, accompanied by a river of blood, instantly wrapped the shimmering origin stone and completely separated it from the dream Crusher for a short time.

The moment Tang Zhen completed the isolation, the Holy Dragon city's Kings' attacks landed on the despairing Dream Crusher. Without any sound or vibration, tens of thousands of Dream Crusher's bodies were directly turned into dust!

As the origin stone was isolated, the dream Crusher who died in battle could not be reborn. The last protective barrier had completely disappeared.

The origin stone, which was controlled by the two law Kings, trembled violently, as if it wanted to escape. At the same time, dark clouds suddenly covered the sky. Terrifying lightning bolts descended from the sky, continuously bombarding Tang Zhen and the other Holy Dragon City cultivators.

"You still want to struggle even now? just stay here!"

Tang Zhen coldly laughed. In a flash, he rushed to the side of the origin stone. His right hand clenched into a fist and was raised high up. His entire body was completely wrapped in flames.

"BOOM!"

Following Tang Zhen's punch, cracks immediately appeared on the surface of the huge origin stone. However, it struggled even more intensely.

"Still not being honest, take another punch from me!"

Following Tang Zhen's loud roar and punch, a fire Dragon appeared once again and smashed towards the origin stone along with his fist.

"Huala"

The extremely hard origin stone shattered immediately. At the same time, a ray of light full of vitality struggled out and was about to disappear in an instant.

This ray of light full of vitality was the world's origin. Although it was insignificant compared to the main body, it was still comparable to the total origin of some small worlds. Its value was immeasurable!

Tang Zhen had been waiting for this moment all along. How could he allow it to leave so easily? his vast mental energy sealed the surrounding space and completely confined the world's origin that was attempting to escape.

Although it possessed the magical power of creation and control of laws, it required a special medium to be used. The pure world's origin did not actually have much destructive power. At this moment, after being controlled by Tang Zhen's spiritual power field, there was no longer any chance of escape!

With a gentle wave of his hand, the world's origin that was suspended in the air disappeared. At the same time, the huge origin stone under his feet fell to the ground, stirring up a cloud of dust!

[Chapter 1275](#)

1275 The nine great main cities (1)

After a great battle, the city was in ruins.

Although the city was built on ruins and could have been dirty and broken, it was not as thick as the smoke, blood, and corpses everywhere. There was also a strange smell in the air that made people want to vomit.

The already dilapidated city now had an even more somber atmosphere.

Sleepless crawled out in fear and tried to search for purification cards from the dreamer's mutilated body. If he was lucky enough to get one, he would not have to worry about hunger for a long time.

Of course, they had to avoid the Holy Dragon City cultivators. After all, these were their spoils of war and they would not allow anyone else to touch them. Once they found out, they would not let them off easily.

Fortunately, the cultivators in Loucheng city were all busy clearing the enemies and didn't have time to clean up the battlefield. Otherwise, the Sleepless wouldn't be able to take advantage of the situation.

Tang Zhen was currently sitting in a Hall in a forbidden zone that was similarly filled with wolves. He was checking the losses of this war.

In this battle to besiege the Dream Crusher's base, the Holy Dragon City had invested nearly 20000 cultivators in the city towers. Among them were eight King-level cultivators, two Kings of Laws, and an Army of nearly two million spirit bodies.

As a result, after a huge battle, nearly 5000 Loucheng cultivators were "killed" and left the dream world. They needed to rest and recuperate to recover. Nearly 100000 spirits were killed, and the recovery rate of the reincarnation mirror was less than 60%!

In other words, over 40000 spirits had been completely wiped out by the original will of the dream world!

Compared to the Holy Dragon city's casualties, the dream Crusher's side suffered even greater losses. Tens of thousands of Dream Crusher were killed or captured. The number of casualties of the sleepless servant army affected by the war could not be counted!

Although the casualties in this battle were not small, the gains were equally huge. However, the world origin alone was enough to cover all the gains from invading a world.

After pondering for a moment, Tang Zhen raised his head and looked at the surrounding Holy Dragon City cultivators. He said in a deep voice, "According to the information we have, there are a total of nine main camps in the dream world. They are called nine Palace city by the dream Chasers, and the main camp that we have occupied is one of them, Gen Palace city!

Other than this base camp, there were seven other main cities that had reincarnation altars. There were countless cities of various sizes around them. There were hundreds of them in total, and the total number of Dream Crusher was definitely more than 500000!

There's also a main city called 'central Palace', which ranks first in strength among the nine main cities. It's said that only dream shatterers chosen by Mother God are qualified to enter. At the same time, there's also a rumor that Mother God's true body is in there!"

city Lord, let's just attack Zhonggong city directly. This is called capturing the king before capturing the bandits!

The rich Captain, who was sitting in the corner, raised his hand and suggested with a wise expression.

Tang Zhen was happy when he heard this. He continued to use a somewhat helpless tone, "Although I really want to go straight to the root of the problem and take down the central Palace main city, then the other seven main cities will be easy to capture!

But the problem is that no one knows the location of the central Palace's main city!"

When Blood River King heard this, he looked at Tang Zhen with some doubt and said in a faint tone, "what's going on? could it be that this central Palace city is invisible?"

Tang Zhen shook his head and pointed at a Holy Dragon City cultivator. you're in charge of collecting intelligence. You should tell us in detail!

The Holy Dragon City cultivator who was called out had squarish faces and large ears. He looked like a lucky man, and it was easy for people to have a good impression of him. He stood up and smiled at everyone, then said in a very calm voice, "Lord Blood River is right. This central Palace city is indeed invisible. According to our intelligence, it is not in the dream world!

I believe everyone already knows that the dream world we are in is constructed by the original will of the world. The objects here are real and virtual, but most of them exist in the form of energy, including us!

However, after our investigation and analysis, we've confirmed that there are three types of real entities in the dream world. The first type are the buildings that form the cities, they are all real entities. The second type are the origin stones, and the third type are monsters, they also exist in physical form!"

no, I've studied those monsters before. They're also made of energy, not a physical body!

The fat man beside him shook his head and raised a different opinion.

Everyone was happy when they heard this. Obviously, they all knew why the fatty was hunting demons. He just wanted to see if this thing was edible.

The Holy Dragon City cultivator in charge of intelligence gathering chuckled and continued, "you're right, these monsters are indeed energy bodies. But have you ever thought that these monsters were actually energy bodies before they entered the dream world?"

Fatty was stunned for a moment, then he shook his head lightly.

you don't say, I really didn't notice this. By the way, the city Lord said that these monsters might be the residents of the dream city. Could they all be energy bodies?"

that's right. The residents of the dream city are all made of energy and not three-dimensional beings. I can confirm this!

Tang Zhen interjected. After which, he indicated for the intelligence officer to continue.

Nodding to Tang Zhen, the Holy Dragon City cultivator continued,"Energy enemies are very difficult to deal with. Under normal circumstances, they are in a completely different dimension from us. The other party can attack us, but we can't attack them!

Of course, for a Lord-tier cultivator, this was not a problem. There were many ways to kill an energy body, but the problem was, how many of them could reach the Lord-tier cultivation level?

He believed that the dream world had encountered a similar problem in the past. They were unable to fight against the cultivators of the dream Tower who existed in the form of energy, so the entire world was destroyed.

However, it was obvious that the dream Tower had underestimated its enemy. In the end, it made a mistake at the last moment and fell into the trap of the awakened original mind. This caused the entire tower to fall into the dream world constructed by the original mind. Even its consciousness was severely injured and it became muddleheaded.

Other than the residents of the dream city who had turned into monsters, both the incubus and the night Demon were actually residents of the dream city. The former was the battle Beast of the dream city while the latter was a special spiritual parasite.

The origin of the world was a good plan. In this special world, the advantages of the cultivators in the dream Tower were all gone. The enemies they were facing were the dream Crusher, which was also made of energy, and the sea of sleepless!

As for the origin of these Dream Chasers and sleepless, everyone must have already guessed that they were actually the natives of this world and a small number of Soul Travelers!

Under the control and guidance of the original mind, the dream Crusher would constantly kill the cultivators of the dream Tower. At the same time, he could rely on the origin Energy to resurrect from the dead. As long as the cultivators of the dream Tower did not die, this dream world could possibly continue to exist!

Obviously, the dream Tower would not just sit and wait to be beaten. They also rely on the world source to resurrect the residents of the tower who died in battle. As a result, the two sides have been fighting like this until now!”

this means that as long as we destroy the eight main cities in the dream world, this dream world will disappear. By then, not only will we be able to save the cultivators in the dream city, but we will also be able to see the ninth main city, the Zhonggong city that is built in the real world!

[Chapter 1276](#)

1276 The Origin's will's ruthless move _1

After listening to the intelligence officer's explanation, everyone understood the current situation, how to find the most important ninth main city, and the next course of action.

It was obvious that the ninth main city would not reveal itself before the eight main cities of the dream world were destroyed as it was not even in the dream world!

Although Tang Zhen was able to enter the real dream world, it was undoubtedly a very irrational move to search for Zhonggong city in this abandoned world like searching for a needle in a haystack. Moreover, with the cunning of the origin intent, it would definitely try to hide the city.

That was where the main body of the world's origin will was, so there was no harm in being cautious.

Compared to the eight origin stones used to maintain the operation of the dream world and provide logistical support for the dream Crusher, the ninth origin stone stored in Zhonggong city was the real deal. One stone might be equivalent to the total of eight origin stones!

Tang Zhen was determined to get it, and the destruction of the other seven main cities in the dream world was set in stone. There would not be any changes!

However, there were still two things that he could not figure out. With the dream city master's abilities, was there really no way to solve the problem? could he only allow his own residents to be imprisoned in the dream world for hundreds of years?

Or was it because of some special reason that he couldn't save her?

Tang Zhen had always been clear about gratitude and grudges. Back then, the dream city Lord had done him a great favor, but he had never had the opportunity to repay her.

Therefore, when he found out about the dream Tower's situation, he did not think too much about it and immediately invaded the dream world. While trying to solve the mystery, he also wanted to help the dream Tower get out of the quagmire.

But now, it seemed that he was a good person who was rewarded. He had inadvertently obtained a large amount of the world's origin!

However, there was one thing that Tang Zhen could not understand. Why did this world have so many world origins that it was not inferior to super planets?

As for the other doubt, why did the principal will of the dream world treat the sleepless so harshly? could it be that they had committed unforgivable crimes, which was why they could not fill their stomachs and rest normally, so much so that they were like evil spirits from hell?

It did not even let go of the soul after death. It could be seen how deep the resentment of this world's principal will was!

After the meeting ended, everyone began to get busy.

There were still many fierce battles to be fought. After losing a main city, the original will of the dream world would not let the matter rest. The dream Crusher would also be more wary of the cultivators in the Loucheng Kingdom.

Before the Holy Dragon City attacked the other major cities again, the dream Chasers might even form an alliance Army to intercept them. It would not be surprising to use many troops.

In addition, in order to ensure that the Holy Dragon City would be expelled, the origin will even had a certain chance of removing the punishment for sleepless, and then duped them into joining the camp against the Holy Dragon City cultivators.

In this case, not only would Holy Dragon City have to face more than 500000 dream Smashers, but there would also be millions of sleepless. In terms of military strength, they would definitely be defeated.

Other than these two possibilities, the transmigrators were also a big worry. If the origin intent could get one, it could get ten. If it was desperate, it could even get a million transmigrators at once!

This was what Tang Zhen was most worried about. Compared to the natives, these transmigrators were the greatest threat.

Not only did all of them have the qualifications to become dream shatterers, but they also had all kinds of knowledge and skills. Once they had control of the situation, it would definitely cause a great loss to Holy Dragon City!

After frowning and thinking for a while, Tang Zhen made a decision in his heart. He immediately stood up and left the dream world, and then teleported to the original world, Xuanji.

.....

In a certain parallel world, late at night.

Most of the people who had been busy the whole day had fallen asleep, but there were still many people fiddling with their computers and mobile phones, looking very energetic.

When it was close to midnight, the wind and clouds suddenly surged in the dark sky. Huge runes appeared out of thin air and completely covered a certain city like an energy shield.

At the same time, the ground also changed. An invisible force directly tore the ground apart, and a huge bottomless Gully appeared around the city, completely separating the entire city from the outside world!

The terrifying change immediately alerted the people. They looked at the constantly flashing light in the sky and the terrible Gully that isolated the entire city from the outside world, and immediately fell into a state of panic.

Before the crowd could figure out what was going on, they were shocked to see the crowd around them fainting on the ground like dominoes, spreading from one street to another!

In just a few minutes, the entire city's residents had all fallen unconscious. The originally noisy city had turned into a ghost's land, and not a single sound could be heard!

.....

"Damn it, where am I?"

A cry of alarm rang out, and then more and more screams and curses came from the surroundings, making it extremely noisy.

On the barren plain, men and women, young and old, stood many people. They looked around in confusion, not knowing what had happened.

The last thing they could remember was that something had happened to the city. They went out to check on it, but they suddenly blacked out!

Looking at the strange world in front of them, the people were filled with fear, not knowing where to go.

look, there's a city there. Let's go check it out. Maybe we can find out what's happening!

A young man pointed into the distance and shouted, at the same time, he ran forward impatiently.

Seeing this, the others also followed, trying to find out what was going on.

However, he had only run a few steps when the young man at the front let out a blood-curdling screech and shouted, "monster! At the same time, he rolled and crawled back quickly, but there were dozens of black shadows chasing after him.

Hearing this, the crowd immediately stopped and took a look. Then, they all gasped in shock.

Those 70% human and 30% ghost-like monsters that could float in the air were definitely extremely dangerous. He could not let them catch him!

At the thought of this, the people did not hesitate to flee in all directions. For a moment, cries and screams resounded through the clouds.

"Pfft!"

A monster was chasing after a middle-aged woman. Its sharp claws pierced through her back, and when it retracted, it was already holding a bloody heart.

The middle-aged woman screamed and her body fell to the ground with an expression of regret.

The other dozens of monsters also caught their prey. They grinned and tore their prey apart with their sharp claws, then sent the most delicious part into their drooling mouths.

As if attracted by the screams and the smell of blood, more black shadows appeared in the distance and were rushing toward the crowd.

Seeing this terrifying scene, the people felt despair from the bottom of their hearts and kept praying for the appearance of a Savior!

Perhaps God really existed. As the people prayed, nearly a hundred golden and silver lights suddenly rushed out of the giant city in the distance and rushed toward the group.

The terrified people watched as the light quickly approached. Only then did they realize that it was a group of men and women in armor and holding all kinds of weapons.

Without any nonsense, the men and women wrapped in golden light waved their weapons and killed the man-eating monsters that were extremely terrifying to the people.

When the last night Demon fell, a handsome man surrounded by golden light stood up and smiled at the frightened people.

...

“Welcome to the Dream World, my dear transmigrators!”

[Chapter 1277](#)

1277 dramatic changes in the dream world!

The transmigrators from the parallel world were rescued by the dream Crusher. Then, they selected a representative to negotiate with the dream Crusher in an attempt to find out what had happened.

so, in order to defeat the invading evil demons, you must all participate. Only by driving the evil demons out of this world can you regain your freedom!

this is the will of Mother God. No one can resist it, including you!

A dream Crusher said with a smile as he looked at the representatives of the transmigrators in front of him.

according to what you said, we can't return to our original world before the demons are destroyed, right? ”

A man with a big belly asked. The thin clothes on his body were a little overwhelmed, as if they could be torn at any time.

that's right and wrong. As long as the evil demon is defeated, you can all leave. However, if someone has accumulated enough points, they can also apply to leave. No one will stop them!

The dream Crusher explained with a smile, but a strange light flashed in his eyes.

The transmigrators 'representatives were silent for a moment. Although they had already accepted the fact that they had transmigrated, they still felt apprehensive when they were asked to fight the invading demons.

The dream Crusher seemed to have noticed the worry of the transmigrator and said, " "You don't have to worry too much. The evil demons are not as terrifying as you think. In a battle that happened not long ago, we killed more than 200000 evil demons!

Furthermore, you have five chances to be reborn. As long as you are careful, you will definitely be able to hold on until the final victory!"

The transmigrators were slightly relieved after hearing the dream Crusher's words. They thought that the demon was not that terrifying. Otherwise, how could more than 200000 of them be killed in one go?

Although the five chances of rebirth sounded exciting, if they did not enter the dream world, what use would the transmigrators have?

Little did they know that the dream Crusher was just making things up. Not only did he exaggerate the battle results by several times, he did not even mention the loss of a main city!

As for the five chances of rebirth, if he did not improve his strength, it would not take long for them to be used up!

"Next, you will pass the news down and calm the people down as soon as possible, because the evil demons will come at any time.

In addition, every transmigrator will receive 500 points, which can be used to exchange for various resources at the Deva's avatar, especially food purification cards. Then, they can receive missions to kill monsters and demons!"

After answering a few more questions from the representatives of the transmigrators, the dream Crusher left in a hurry as if he had something urgent to deal with.

The transmigrators' representatives looked at each other before leaving the restricted area with heavy hearts, explaining the entire situation to the people.

Crying and anger could no longer solve any problems. Next, they could only follow the requirements of the dream Crusher, or they would be trapped in this strange world forever!

In fact, not all the transmigrators were depressed and hesitant. After figuring out the cause and effect of the matter, many transmigrators suddenly became energetic and couldn't wait to run to the avatar of Deva to see what they could exchange for.

To these transmigrators, this strange world was far more exciting than the previous world, and their hearts were full of ambition!

.....

No one would have expected that in just one night, the dream world would undergo such a huge change!

The originally barren wilderness was now filled with flowers and trees. There was even a River that was flowing.

The monotonous world of black and white had become colorful and full of vitality. It was no longer as lifeless as it used to be!

However, this was definitely not good news for Tang Zhen. This was because the thing he was most worried about had finally happened.

Tang Zhen, who had just returned from his original world, laughed bitterly as he looked at the city that had been covered by plants and vines. His face was filled with helplessness.

“City Lord, what do you think the origin intent is up to?”

Tai Seng looked at the information that was just sent back and turned to ask Tang Zhen.

“Naturally, it’s to make things difficult for us and find a way to drive us away!”

Tang Zhen’s tone carried a trace of disdain as he said to Tessen, this guy has really put in a lot of effort in order to drive us away. God knows how much Origin Energy will be wasted during this change? ”

When he said this, Tang Zhen revealed a pained expression, as if the origin Energy that was wasted was his.

“Although the original environment of the dream world was harsh, it was extremely beneficial to us. Other than building a city, the dream Chasers have no place to hide.

However, with the modifications of the origin will, we can no longer take down the other main cities quickly. We will encounter countless obstacles in the process of advancing. The dream Crusher can use the terrain to block us, making it difficult for us to approach the other main cities. Especially in an environment covered by plants, it was impossible to find the exact location of the cities from a distance.

I think it won’t be long before we’ll be harassed by the guerilla forces, and it’s impossible to guard against them!”

Hearing this, Tai Seng sneered as a trace of killing intent flashed through his eyes, ” this is nothing. I’ll kill as many as they come, until I can’t be Reborn!

it’s not that simple. I have a feeling that the original mind is up to something, and it’s a big move!

A trace of doubt flashed through Tang Zhen’s eyes. However, due to the lack of information, he was unable to figure out what the origin intent was up to.

Just as he was frowning in thought, a Holy Dragon City cultivator suddenly walked over and handed him a piece of information.

Tang Zhen merely took a glance before he jumped up. His face was filled with astonishment.

Tyson silently took the report and glanced at it. He also revealed a bitter smile. He finally understood why Tang Zhen had lost his composure.

“My Lord, you’re so smart. The original mind is indeed cunning. It has started to equip the dream Crusher with technological weapons!

I’ve just gathered my strength, but now I’ve fallen behind by a large margin. It’s really frustrating!”

Tang Zhen shook his head and said in a deep voice, " the enemy's equipment has not only been upgraded. According to the information, the nearest kun Palace city to us, which is city #3, has suddenly appeared with more than 500000 transmigrators. I believe that similar situations have occurred in other main cities. This is clearly the work of the origin will!

But I really don't understand why the original mind still won't let sleepless off. What's the secret behind this?"

Tang Zhen gently shook his head. He sat back in his chair and began to think of a way to deal with this.

This dream world was constructed by the original will. As long as it followed certain rules, Tang Zhen would not be able to interfere with it no matter how it wanted to play. Moreover, Tang Zhen had long anticipated these changes and even had the corresponding countermeasures.

'Didn't you get a few million transmigrators? it's fine, I can get them too. At most, it'll be a little more troublesome. During this time, not only do I need to modify the soul teleportation array, but I also need the dream notebook to cooperate with it.'

The original world had a population of nearly ten billion. It was not too difficult to get millions of transmigrators to participate in the war.

Tang Zhen already had a solution to the problem of equipment and logistics.

With the combined efforts of the Holy Dragon city's cultivators, the operating principle of Mother God's clone had been revealed. To put it bluntly, it was to allow the real object to be contaminated with the power of the origin, thus obtaining the qualification to enter the dream world. After that, it could only be used after being tempered by mind power.

During this process, the role of Mother God's avatar was only to transport the items, calculate the points for the dream Chasers, and help them rebuild their bodies.

...

After figuring out the specific operating principle, the Holy Dragon City could completely duplicate a clone of Mother God and make it serve the cultivators of the city. At the same time, it would have nothing to do with the original will!

In this way, Holy Dragon City would immediately catch up in terms of equipment and numbers. They might even be able to use their technological advantage and leave them far behind!

[Chapter 1278](#)

1278 Patrol and ambush

"Whoosh!"

The sound of something breaking through the air rang out. The expressions of the Holy Dragon City cultivators who were patrolling changed, and they dodged on the spot without hesitation.

There was damage on the tree trunk not far away. The bullet had already shot through the tree trunk and flew to who knows where.

“Northeast, about 1200 meters away!”

After dodging the enemy’s sneak attack, a Holy Dragon City cultivator quickly jumped up from the ground. After reminding his companion, he ran into the depths of the forest.

The other three Lou Cheng cultivators followed closely, as fast as lightning, trying to intercept and kill the sneak attacker.

“Gosh, what the hell is this!”

A Holy Dragon City cultivator hiding behind a tree cursed. He then drew his bow and nocked an arrow, aiming it in the direction his companion had pointed.

The refined arrow glowed with a golden light and instantly flew over a kilometer, hitting a Hill.

In the distance, a figure flashed and a dream Crusher suddenly appeared at the point of the arrow. He smiled provocatively at the Holy Dragon City cultivators and continued to burrow into the dense forest.

“Hehe, you missed!”

A Holy Dragon City cultivator carrying a battle saber and shield walked over and sneered at the Holy Dragon City cultivator who had just shot the arrow. He did not care about the other party’s dark expression.

f * ck, if I still had my equipment and my sniper rifle, do you believe that I can blow up that guy’s d * ck from 5000 meters away? ”

is that so? that’s amazing. If you can shoot the Ambusher’s balls with your bow and arrow, I’ll be convinced!

“Stop bullshitting. I can’t do it, but do you think you can?”

I’m a saber-Shield Specialist, not a sniper. Do you think I can do it? ”

“Hehe, sorry, Sir system is not a sniper now, but an Archer, understand?”

Seeing that his two companions were fighting again, the patrol Leader, who was observing the enemy’s situation, snorted coldly and stopped their meaningless bickering.

let’s not talk about it anymore. Just hold on for a while more. I think we’ll be able to change our weapons and equipment soon!

Hearing the captain’s words, everyone’s faces revealed a trace of anticipation. These few days, they had been really angry.

Ever since the dream Crusher was able to exchange for technological weapons and equipment, he immediately began to harass Holy Dragon City. From time to time, he would snipe from a distance and never fight with them head-on.

The strength of most of the dream Smashers was similar to the low-level cultivators of the Holy Dragon City, but they were completely abused by the Holy Dragon City cultivators in close combat. However,

ever since they had firearms, they immediately had the long-range advantage, suppressing the Holy Dragon City cultivators until they could not lift their heads.

After the weapons in the dream world had been tempered, their lethality would be multiplied. It was the same for firearms.

Through the simple tempering of the dream Crusher, even an ordinary pistol could have an effective range of 200 meters. The tempered bullets even had a strong armor-piercing ability!

There were many shooting experts among the transmigrators. After becoming Dream Chasers, their senses had improved. Coupled with their refined firearms, their lethality was not to be underestimated.

Under such circumstances, it would be strange if the Holy Dragon city's cultivators, who were equipped with weapons, were not at a disadvantage.

In less than ten days, at least three hundred Holy Dragon City cultivators were ambushed. They left the dream world gloomily and could not return in a short time.

As time passed, the resentment in the hearts of the Holy Dragon City cultivators grew stronger and stronger, and it was normal for them to complain a little.

As a result, the captured Dream Crusher was miserable. Those who did not have time to commit suicide would be beaten up by the Holy Dragon City cultivators, and then brought back to be tortured. It was really miserable.

Just as everyone was discussing in hushed tones, the sound of footsteps came from the forest. Soon after, the Holy Dragon City cultivators who had left earlier emerged from the forest.

he has committed suicide. This is the sniper rifle he left behind. It's yours!

Casually throwing the seized resources to the archers, the Holy Dragon City cultivator who reported the enemy's location walked into the grass and picked up the spear he had thrown on the ground.

The complaining Archer was stunned for a moment, then laughed in embarrassment. you should keep it for your use. My bow and arrow are still fine.

"I'm a gunner, I'm not used to using a sniper rifle!"

The Holy Dragon City cultivator with the long spear replied and did not say anything else.

alright, you can keep this gun for now. We're all brothers, what's there to be embarrassed about!

Hearing the captain's words, the Archer was no longer polite. After checking the sniper rifle, he pouted and said, "this bunch of dream smatterers are really bad. They only managed to temper this spear to Bronze level. What a waste of good stuff!

"So, from what you're saying, you can temper it into gold equipment? do you have the ability to do that?"

The cultivator from loucheng city who had been bickering with the Archer chimed in again. He seemed to be enjoying it.

“I can’t be bothered with you!”

The Archer replied in disdain. He then hung the other equipment on his body and said proudly, “You guys might not know this, but I’m from the same hometown as the city Lord. Do you think he’ll agree if I ask him to help me temper my weapon?”

tsk, the city Lord is busy every day. Where would he have the time to deal with you? ”

The crowd was disdainful of the Archer’s bragging and shushed him in unison.

“Fine, you guys can believe it or not!”

Although they were joking along the way, everyone was constantly paying attention to their surroundings to prevent another attack from the dream Crusher.

When they reached a River, the patrolmen saw a group of sleepless. They were catching fish and shrimp in the river with a happy expression on their faces.

After the dream world changed, the sleepless also benefited a lot because there were many edible things in the mountains and forests, allowing them to finally be able to barely fill their stomachs.

The sleepless were grateful to Mother God, thinking that she had forgiven everyone’s sins, so she provided these foods for the sleepless.

As for what the sin was, no one could say clearly.

If Tang Zhen knew the thoughts of these sleepless, he would definitely sneer in response. This was because the original will had never forgiven the sleepless. The ultimate beneficiary of this food was not them, but the transmigrators who had not adapted to the dream world.

In fact, it didn’t matter if he knew or not. As long as he could fill his stomach, sleepless was already satisfied. As for how long he could live, it would depend on Mother God’s mood!

After seeing the Holy Dragon city’s patrol team, these sleepless looked at each other, their faces showing a trace of fear and vigilance.

When they attacked gengong city, the spirit Army had killed no less than 100000 sleepless. The scene of blood flowing like a river still left sleepless with lingering fear.

Sleepless had always kept a respectful distance from the Holy Dragon City cultivators and did not dare to provoke them easily.

...

Lou Cheng’s cultivators were not in the mood to care about these sleepless, because these guys did not know what was good for them. When the Holy Dragon City was hunting down the dream Crusher, they found that many sleepless were helping the enemy and had completely forgotten how they were bullied in the past.

Sleepless’s actions were understandable. Compared to the dream Crusher, the Holy Dragon City was the true invader.

“Let’s go, we still have a long way to go!”

The patrol Leader waved his hand, signaling his team members to leave. They had to complete their patrol within the stipulated time.

The cultivators nodded and were about to leave the river when the archers suddenly saw a flash of light on the other side of the river.

“Not good, there’s an ambush!”

The Archer roared out of reflex, knelt on the ground, raised his sniper rifle, and pulled the trigger in a very short time.

After a gunshot, a scream came from the other side of the river. Then, dozens of figures rushed out and fired with single-shot rifles!

[Chapter 1279](#)

1279 A fierce battle on the riverbank (1)

The quiet and clear riverbank had suddenly become a battlefield!

Dozens of Dream Crusher quickly crossed the knee-deep River and surrounded the patrol team in an instant. Dozens of enemies on the other side of the river used the trees as cover and kept shooting.

When sleepless, who was fishing, saw this, he hurriedly fled into the distance, afraid that he would be caught in the battle and lose his life.

Although they were ambushed, the Holy Dragon City cultivators did not panic at all. Several saber and shield wielders immediately huddled together and raised their shields to protect the archers around them, while he took the opportunity to enter the forest by the river.

Although they had just gotten their hands on the sniper rifle, the Archer was still able to operate it with ease. It was as if he had become one with the gun. After every shot, an enemy gunman would be killed.

The Archer, with only a sniper rifle, had completely suppressed the opposing gunner!

When the other cultivators of Lou Cheng had a chance to catch their breath, they immediately fought with all their might against the dream Crusher who had surrounded them.

The dream Crusher they encountered this time was not fully equipped with firearms. Most of them still used cold weapons such as knives and swords. Compared to the bullets that were out of control after being shot, the dream Crusher was more willing to use cold weapons that were as easy as controlling his own arms!

More than 90% of the dream Chasers who fought with guns were transmigrators who had just entered the dream world. Although there were experts, most of them were just minions!

It was the same for the Holy Dragon City cultivators. Although firearms had many advantages, they were not as reliable as swords in their hearts!

However, for the Holy Dragon City cultivators who were used to firearms, switching to bows and crossbows was really uncomfortable. For example, for a sniper expert like an Archer, it was as awkward as losing an arm, and they could not display their true strength at all.

Fortunately, they had just seized a sniper rifle, or the patrol team would have suffered a big loss today!

As for the cultivators in Loucheng City who were used to using single-soldier machine guns, it would probably take a long time before they could be equipped with such a powerful weapon. After all, they couldn't even have a bow and arrow in their hands.

On the empty riverbank in the mountains, the battle had become more and more intense. The Dream Crusher relied on their numbers and the long-range harassment of firearms to gradually suppress the Holy Dragon City cultivators. The situation was precarious.

It was also in this dangerous situation that the Archer in the patrol team seemed to be possessed by God. He played with a sniper rifle to perfection and killed the gunmen on the other side of the river one after another!

The situation had suddenly changed, and the pressure on the patrol team had been reduced.

“Good job, brother!”

The patrol Leader was overjoyed when he heard the gunshots from the other side getting sparser. At the same time, he swung his sword at a Dream Crusher.

He activated his cultivation skills at the same time, and the patrol leader's arm suddenly shot out several Phantom snakes. They stared at their prey with cold eyes, as if they were choosing a person to eat.

The skills of the cultivators in Loucheng were all strange, and they integrated and absorbed the essence of many invaded worlds. Although it was a mess, the lethality was not affected at all, and the strange and unpredictable effects made the enemy even more afraid.

“Go to hell!”

As the patrol Leader roared, the Golden Saber cut through the Dream Crusher's Silver Shield as if it was tofu. With the remaining force, he cut off the enemy's arm!

At the same time as the saber cut through the enemy's broken arm, the strange snake attached to the patrol leader's arm turned into a stream of light and disappeared into the wound.

The one-armed Dream Crusher looked horrified. His entire face immediately turned green and gray, making him look like a zombie.

“Bang!”

With a muffled sound, the Dream Crusher's head suddenly exploded. His body fell backward into the river and slowly floated away along the river.

The Phantom of the strange snake circled a few times and went straight to the patrol Leader who was killing another enemy. It disappeared into his body in a flash and reappeared after a moment of dormancy, killing another seriously injured Dream Crusher.

“Owwuuu!”

The patrol Leader was fighting here and there, but a strange roar came from the side. A Holy Dragon City cultivator had finally successfully used a cultivator skill at the critical moment.

As he let out a roar, his body suddenly grew to more than three meters tall. His slender body, which was covered with scales, also looked like a lizard, and his four pairs of vertical pupils shot out a cruel light.

No matter how one looked at it, it was a pure monster!

For some unknown reason, Lou Cheng’s skills could be used 100% in the dream world. This was also the reason why the dream Crusher was often at a disadvantage in close combat.

However, in the eyes of the dream Crusher and the transmigrators, this was unquestionable ironclad evidence that the invader’s true body was an out-and-out demon!

“Brothers, kill this demon!”

The leader of the dream Crusher was nearby. After seeing this horrifying scene, he immediately shouted.

Hearing this, the dream Crusher who was involved in the attack roared and attacked the cultivator who had transformed with hatred.

“Hehe, you reckless fellow!”

After the Lou Cheng cultivator refined the monster’s blood essence, his strength was close to that of a Lord realm cultivator, and his heart had become cold and cruel.

He flicked his long tongue and laughed hideously. He immediately waved his claws, which were like the scythe of the Grim Reaper, and cut the few Dream Chasers surrounding him in half at the waist like a lawnmower. Then, he roared and charged at the other enemies.

All the enemies that he had his eyes on were eventually cut into pieces!

Due to the sudden outbreak of their teammates and the absence of the harassment from the snipe, the remaining patrol members were all free to use their cultivator skills one after another, beating up the dream Crusher until he was crying for his parents.

In just a few minutes, the ambushing Dream Crusher had suffered heavy casualties. The riverbank was covered with broken corpses.

Although there were casualties among the cultivators of Lou city, they became more and more courageous as they killed, each of them like a mad demon!

retreat! Their reinforcements are here!

A cry of alarm suddenly came from the other side of the river, reminding the dream Crusher who was fighting to retreat as soon as possible.

“Brothers, let’s go!”

Hearing the warning from the other side of the river, the remaining Dream Crusher no longer hesitated and retreated to the other side of the river while fighting.

“Son of a b * tch, you’re already trying to slip away without even asking for my permission!”

However, the patrol team had also suffered heavy casualties. Only a few of the dozen members could fight, and the rest were either injured or dead.

Although they were covered in blood and wounds, the patrol Leader and the others were still full of fighting spirit. They held on tightly to their enemies and refused to let go.

Unfortunately, the patrol Captain alone was not enough to keep the remaining twenty-odd enemies here.

Just as the ambushing Dream Crusher was about to successfully retreat, a sudden roar came from the sky. Then, several Holy Dragon City cultivators with wings on their backs rushed in, followed by more than a dozen milky-white unmanned patrol aircraft.

“Brother, leave these B * stards to us. Kill them!”

With a burst of laughter, more than a dozen drones in the air opened fire at the same time. The dense barrage of bullets stirred up water columns. The retreating Dream Crusher collapsed in the river one after another, dyeing the clear river with a light red color.

...

When the gunshots stopped, the dream Crusher who had ambushed them had been completely annihilated!

When the patrol Leader and the others saw this, they all sat down and laughed silently on the river bank that was covered with corpses.

[Chapter 1280](#)

1280 The reinforcements from the original world _1

Gen Gong city, in the forbidden area of the dream Crusher.

Under the protection of many cultivators of the city, hundreds of residents were busy around a metal building. As time passed, the strange metal building was finally assembled.

Holy Dragon city’s residents had their own duties. Just by looking at these people’s clothes, one could tell that they were the technical staff of the city and did not participate in battles on a daily basis.

Although they looked like scholars, it didn’t mean that they were weak. If the enemy underestimated them, they would definitely die a miserable death!

The technical staff of the Holy Dragon City was different from that of the original world. From the beginning of its establishment, Tang Zhen had been searching for elite personnel in all fields. Whether it was in the field of runes or forging, as long as one had a certain level of attainment, they could be recruited.

Many cultivators who thought that they were talented in cultivation joined them, only to find that this profession seemed more suitable for them. Therefore, they simply stopped participating in conquests and buried themselves in research instead, creating many strange things.

Even lingxu Zi, a King level cultivator, didn't want to be left out. He enjoyed it.

The travelers from the original world, the Aboriginals from the loucheng world, and the talents brought back from the other world eventually formed the current technical team of the Holy Dragon City.

This time, the task of replicating Mother God's avatar was completed by their cooperation. With everyone's tireless work, they finally entered the final testing stage.

As the activation command was issued, the clone of the mother God, which was as tall as a three-story building, started to move slowly. A huge pillar of light shot into the sky, suddenly piercing the space barrier of the dream world and connecting with the distant Holy Dragon City.

Although the light pillar would expose its location and it was not easy to hide, it could transfer the items in a very short time. After being transformed by the power of law, the items from the loucheng world could be used in the dream world.

It sounded very simple, but without the origin Energy of the dream world, everything would not be possible.

city Lord, Mother God No. 1 has been activated. Do you want to test it? ”

Lingxu Zi looked at the equipment that was running well and smiled with satisfaction. Then, he turned to Tang Zhen and asked.

“That's for sure,”

Tang Zhen laughed and walked into the mother God No. 1 mission Hall, which was made of metal, and selected the exchange function.

A holographic projection enveloped Tang Zhen. It displayed all his points and the various items that he could exchange for. It was clear at a glance.

If Tang Zhen had any questions, he could still ask him and get an answer.

Unlike the dream Chasers who could not leave the dream world, the points of the Holy Dragon City cultivators could be exchanged with the points of the tower City, which ensured that the points could still be used after the war.

Tang Zhen used his points to exchange for a gun. After fiddling with it for a while, he refined it to gold quality and gave it to a Holy Dragon City cultivator beside him.

The testing work was very smooth, and the expected results were achieved. The Holy Dragon City cultivators' resentment towards the equipment could finally be appeased.

However, due to the restrictions of the dream world, all weapons had to be refined before they could be used, especially those complicated weapons. Hence, it was impossible to use large-scale war weapons in a short period of time.

This was the reason why most of the dream Chasers used simple single-shot rifles. Their poor spiritual power could not support the refinement of complex weapons, let alone the endless consumption of ammunition waiting for them.

Physical bullets that had not been tempered similarly did not have any killing effects. This was the greatest consumption!

The few armed robots in the Holy Dragon City had once wasted a large amount of Tang Zhen's time and energy. He did not want to repeat this kind of boring work.

With the end of the test, Mother God No. 1 also officially began to operate. The Holy Dragon City cultivators who had been waiting for a long time immediately lined up to exchange, and then came out with their favorite equipment with happy faces.

The next thing to do was to refine all the equipment and beat up the dream Crusher on the battlefield.

The first important task was completed, and the second task began to count down.

After the Holy Dragon city's soul teleportation circle had been modified, it could use the " smuggling " channel opened by the dream notebook to teleport souls from the original world into the dream world.

Mother God No. 1 would activate a special network to record the actions of the transmigrators from the original world and ensure that they would get the points they deserved.

The original will of the dream world was domineering. It directly brought the residents of a parallel world into the dream world and made them the cannon fodder to resist the cultivators in the city. On the other hand, Tang Zhen used a relatively gentler method, choosing to use money to hire the residents of his original world to participate in the war.

Even if " death " would cause a certain amount of mental damage, there would still be countless people in the original world who would be interested in it and would be eager to participate!

.....

In the original world, in a large city.

A group of young people were gathered in a building, looking at the many teleportation cabins that were being upgraded with full attention, their faces full of anticipation.

haha, after waiting for so long, we finally have a chance to go to the battlefield. Just thinking about it makes me excited!

A short-haired young man's face was red, and he was obviously in a state of excitement.

I have to remind you that if you die in the dream world, you will suffer mental trauma, and it will take at least a month before you can re-enter!

A woman sitting on the sofa curled her lips and reminded him.

"Tsk, it's not like I'm really dead, what's there to be afraid of!"

The short-haired young man said in a nonchalant tone with a trace of disdain on his face.

"Our Guild has stayed in the Holy Dragon City before and has a certain amount of experience. This is why we have the opportunity to get priority in entering the dream world, so everyone must pay special attention to this.

according to the information I've received, there are more than 10000 civilian groups like us in the world, with a total of more than 200000 people. Other than that, there are also groups from the military, battle teams organized by major financial groups, and a few casual players.

Everyone's goal is basically the same, which is to accumulate as many war points as possible to exchange for the precious resources in the world of loucheng. Of course, we can't rule out the possibility that some people will use them to exchange for cash."

that's why battle achievement points are very precious and can not be easily wasted. All transactions must be approved by me. Do you understand? "

The one who spoke was a short-haired woman with a delicate face. Her words and actions seemed very capable.

don't worry, Captain. We'll all listen to you and not act rashly!

The short-haired young man seemed to be very afraid of this woman and quickly said with a smile.

It was the same for the other members in the room because the short-haired woman was far superior to them in both position and status, not to mention that they were employed by her.

At this moment, the soul teleportation pod's upgrade was completed. Everyone couldn't wait to jump in.

As the teleportation pod slowly closed, everyone fell into a deep sleep. In their daze, they seemed to have entered a narrow and long passage.

When they regained their consciousness, the travelers from their original world had already entered the dream world!
