

Alternate 1291

[Chapter 1291](#)

1291 Fleeing without a fight (1)

Seeing the arrow in Mr. Qi's heart, Zhang Dazhuang let out a cry of surprise and rushed out of the restricted area, his face full of anxiety.

Before he entered the dream world, he had been saved by Mr. Qi, who was a big entrepreneur. The honest Zhang Dazhuang had always wanted to repay him, but he had never found a suitable opportunity.

Now that they finally had the chance to meet again, Mr. Qi had been killed. Zhang Dazhuang could not accept this!

However, after a few steps, Zhang Dazhuang felt that something was wrong. Mr. Qi did not show any pain on his face. Instead, he looked at the headquarters of the Forbidden Zone with contempt. That was where the higher-ups of the dream Crusher were located.

"Mr. Qi, are you alright?"

Zhang Dazhuang asked tentatively, and the worry on his face slightly eased.

"Don't worry, I'm fine!"

As he spoke, Mister Qi pulled the arrow out of his chest and tossed it to a Holy Dragon City cultivator behind him. He smiled gratefully.

Zhang Dazhuang heaved a sigh of relief. Through Mr. Qi's torn clothes, he seemed to have seen a purple light, but it quickly disappeared.

so Mr. Qi was prepared. Good, good!

Zhang Dazhuang's hanging heart was put at ease. He turned to glare at the center of the restricted area. Obviously, he was extremely angry at the dream Crusher's sneak attack.

In fact, Zhang Dazhuang was not the only one who felt this way. After knowing about the despicable behavior of the dream Crusher, almost all the transmigrators from other worlds were extremely angry. They did not expect that the dream Crusher camp that they had protected with their lives would do such a heartbreaking thing.

This emotion spread like a tide among the transmigrators. They knew what they were about to face, but they no longer had the heart to fight, because they could not stand being stabbed in the back by the side they were protecting!

Seeing the excitement of the transmigrators, Mr. Qi raised his arms and shouted, "My comrades, wake up! Don't be kidnapped by these Dream Chasers and protect the damned Mother God's avatar for the culprit who harmed us!

We definitely have no chance of winning this battle. Holy Dragon City is definitely not the demon that the dream Crusher spoke of. Instead, it is our true Savior!

as long as we are no longer deceived by the dream Crusher and no longer act as cheap cannon fodder in their eyes, Holy Dragon City will guarantee that we can be reborn and return to our original home!

Only by following Holy Dragon City can you obtain a new life. What are you still hesitating for?"

Mr. Qi's last sentence immediately attracted Zhang Dazhuang and the others' support. Then, the transmigrators from the other world swarmed out of the Forbidden Zone like a flood.

"Bastard, don't listen to him! He's lying to you!"

The round-faced fat man shouted in anger, but no one paid him any attention. Perhaps it was because he was angry from embarrassment, but this guy actually picked up a rifle and started shooting around.

The surrounding crowd was too dense, and people couldn't avoid the dense bullets at all. People screamed and fell to the ground.

"You animal, go to hell!"

In the crowd, Joseph's eyes were bloodshot. He raised the rifle in his hand without hesitation. Although the bullets had been emptied, the bayonet was still shining coldly.

He dashed behind the round-faced fatty and stabbed the sharp bayonet into his back. Then, he stabbed the fatty several times until he fell to the ground.

Seeing the round-faced fatty who killed his mother and grandmother die, Joseph's anger was finally reduced a lot, but he still didn't forget to spit on the body.

Thanks to this bastard, his mother and grandmother had detonated the bomb in a panic and died on the city wall again. Half of their revivals had been wasted.

He could suffer, or even die, but Joseph would never allow his family to be hurt!

He had already made up his mind. Even if this fatty could be reborn, he would still kill him until he couldn't be revived!

Looking at the people continuously pouring into the Holy Dragon City, Joseph laughed bitterly. He had been killed by the Holy Dragon City four times, and now he only had one life left. They could completely see each other as mortal enemies!

However, as long as they had the chance to get their family out of this nightmarish world, so what if they cooperated with the enemy? besides, they were forced to participate in the war and had no enmity with the Holy Dragon City!

Because of Mr. Qi's instigation, the entire forbidden zone was in chaos. However, the dream Crusher did not stop it, which was rare. It was as if this matter had nothing to do with them.

In fact, with the strength of the dream Crusher, it was impossible to stop them. As long as they made any strange movements, they would be faced with the Holy Dragon city's overwhelming bombardment.

Perhaps in just a few minutes, all the dream Chasers in the Kun Palace city would be annihilated!

However, other than this layer of concern, the kun Palace city's Dream Chasers seemed to be a little too calm, as if they were certain that they would be fine.

It was obvious that they were hiding some secrets that only the dream crusher knew!

When all the other-world travelers in the Forbidden Zone had escaped, leaving only Dream Crusher in the Forbidden Zone, the earth Palace city Lord suddenly laughed wildly and rushed toward Mother God's avatar.

The moment the earth Palace city Lord came into contact with Mother God's avatar, a bright pillar of light shot up into the sky, just like Mother God No. 1. It was extremely dazzling.

Demons, you won't be able to be arrogant for long. Just wait to be driven out of the dream world by Deva!

The earth Palace's city Lord's maniacal laughter rang out. Immediately after, the entire forbidden zone was enveloped by a blinding light. The dream Crusher within it quickly turned illusory and disappeared in an instant.

The eye-piercing light grew a little more intense, then began to shrink continuously. Like an energy cannon that had finished charging, it suddenly shot into the sky!

At the same time, six more pillars of light shot up into the sky from the horizon. They could be seen clearly even in the day.

Everyone was stunned by the scene in front of them, especially the transmigrators from the other world. They had no idea what was going on.

However, the dozen or so King-level cultivators guarding the Forbidden Zone suddenly made their move. Violent attacks were launched at Mother God's avatar.

Two more figures shot into the sky and appeared near the pillar of light. Terrifying nomological power burst out, forcibly sealing off the sky above the Forbidden Zone.

"You're daydreaming if you think you can escape!"

Tang Zhen's voice sounded. His mental energy field collided with the light pillar and actually bent the invisible light pillar!

Blood River King roared and cooperated with Tang Zhen to exert more pressure. He aimed the beam of light at Mother God No. 1, which was floating outside the Forbidden Zone.

When the earth Palace city's mother God's clone's distorted light pillar was aimed at the Holy Dragon city's mother God No. 1, the two light pillars suddenly converged together, like two giant pythons entangled.

Whether it was Mother God's clone or Mother God No. 1, they had their own simple consciousness. The light pillars were like their bodies that had been turned into energy, not much different from living things.

Now that both sides were serving their own Masters, they would naturally fight each other without mercy!

Tang Zhen and the others did not just stand by and watch as the two original wills fought. Instead, they rushed to Mother God's avatar in the center of the Forbidden Zone in an instant and began to bombard the huge origin stone!

Once the origin stone was destroyed, the light pillar that contained the origin of the world would become rootless water. Not only would it be unable to continue condensing, but it would also not be received by other Mother God's avatars.

The earth Palace city's Dream Crusher had tried to escape this place and used hundreds of thousands of transmigrators to delay and exhaust the Holy Dragon city's Army. However, he did not expect Mr. Qi to have already discovered his secret. This allowed the Holy Dragon City to quickly set up a plan and completely ruin the plan of these jumping clowns!

...

[Chapter 1292](#)

1292 News of an old friend _1

For ordinary cultivators, origin stones that contained the power of laws might be indestructible, but for Tang Zhen, destroying it was as easy as blowing off dust.

The two great kings of laws of the Holy Dragon City attacked at the same time. The huge origin stone cracked after a few breaths and then completely shattered. Fist-sized fragments scattered everywhere!

The origin Energy tried to escape, but it was also captured by Tang Zhen and imprisoned in a special container.

With a wave of his hand, he kept the shattered origin stone and the origin Energy into his storage space. Tang Zhen turned to look at the light pillar that was fighting with Mother God No. 1.

Without the support of the origin stone, the light pillar gradually withered. It only lasted for a few minutes before it was absorbed by Mother God No. 1's light pillar!

The kun Palace city's Dream Crusher tried to use the light pillar to teleport to other main cities but was intercepted by the Holy Dragon City. Although many of them escaped successfully, most of them were intercepted by Mother God No. 1.

From this moment on, their life and death would be in the hands of the Holy Dragon City!

With the escape of the dream Crusher taken care of, the battle in the kun Palace city was officially over. The transmigrators' Army erupted in deafening cheers, celebrating the fact that they had taken down a main city and had obtained a large number of points.

In particular, the Army bosses who contracted the siege missions were so happy that they couldn't close their mouths. Compared to the points obtained by ordinary transmigrators, they had earned a lot!

Of course, the biggest winner was the Holy Dragon City. The origin stones they obtained were enough to cover all their expenses. As for the more precious world origin, it was not included at all.

What the Holy Dragon City had to pay was only a sum of money and some reserve materials that had been left in the Holy Dragon city's warehouse for a long time but were shockingly valuable in the original world.

This was the advantage of cross-border trade. An item that was not considered rare in the tower world could be sold for a sky-high price in the original world. For example, the Holy Dragon city's special spiritual Jade and medicinal herbs with special ingredients were all main items that could be exchanged with points!

It could be said that the Holy Dragon City only needed to pay a very small price to obtain a great harvest. It was definitely a small capital with ten thousand profits!

Of course, the Holy Dragon city's investment was not small either. Whether it was the construction of Mother God No. 1 or the teleportation of various weapons and equipment, all of them required Origin Energy. However, they were sold to transmigrators at different discounts during the exchange.

When transmigrators exchanged for equipment, the Holy Dragon City had to help share almost half of the cost. Otherwise, how could the legions exchange for so many heavy weapons?

Tang Zhen's family and business were big, so there was no need to scheme against transmigrators. Even if he gave them a little compensation, it was still nothing compared to the gains.

Only by giving up small profits would one have a chance to earn big profits!

The battle at the kun Palace city had ended. The next thing to do was to clean up the battlefield, calculate the points, and make preparations to attack the third main city.

Now that everything was on the right track, the high-level cultivators of Holy Dragon City had also entered the dream world one after another. Under the protection of Blood River King and more than ten King-level cultivators, as long as there were no major changes, it was only a matter of time before they took down the remaining six main cities.

Tang Zhen had already begun to plan how to deal with the hidden Zhonggong city. That was the real core of the dream world, where the original will was. Once he took it down, the world's origin he obtained would probably make Tang Zhen wake up from his sleep with joy.

After settling the trivial matters and settling the transmigrators, Tang Zhen left the dream world and returned to Holy Dragon City.

.....

city Lord, this is the request for help we received. The person said that he came from the moon god tower in the wilderness Warzone!

After receiving the letter from the assistant, Tang Zhen opened it and glanced at it. He frowned slightly.

This letter was written by Yue qianhua. It was obvious that she had avoided the catastrophe and had been teleported to the spiritual ruins Warzone.

Tang Zhen had a deep impression of this female city Lord who had once schemed against him. However, those were just some small matters that were difficult to get rid of. He was more interested in the contents of Yue qianhua's letter.

"City Lord Tang, please forgive qianhua for being presumptuous, but I do have something important to tell you.

After Qian Hua and the other residents entered the spiritual ruins Warzone, she met a woman named Arel by chance. She seemed to have met city Lord Tang before, and the child she was leading looked very similar to you.

Qian Hua was happy to see her old friend and protected her to prevent the mother and son from being in danger.

But recently, some evildoers appeared and detained qianhua and the others. They couldn't get away, and when they heard of city Lord Tang's reputation, qianhua was extremely excited and sent a letter to ask for help, begging city Lord for help!"

Tang Zhen put down the letter in his hand and turned to look at his assistant.

"Call that Messenger over. I have something to ask her."

The assistant nodded and went out. Not long after, a woman with a weather-beaten face walked in.

"Green soul greets the city Lord!"

Tang Zhen nodded. Speaking of which, this woman was an acquaintance. When Holy Dragon City encountered the Cold Moon disaster, she was the one who had followed Yue qianhua to Holy Dragon City.

However, the Holy Dragon City was still very weak at that time, while the fairy clan was extremely powerful. Each and every one of them was extremely arrogant. In the end, they were tricked by Tang Zhen and suffered heavy losses, almost completely annihilated.

As time passed, the wilderness Warzone had long been removed from the 3000 warzones. The towers of the elves had all been destroyed. Only the Holy Dragon City had been preserved and was still growing.

Green soul was no longer as high-spirited as before. Although her white armor was clean, it was damaged and her beautiful face was full of worry.

"Yue qianhua mentioned Arel in her letter. What does she look like?"

Tang Zhen invited green soul to sit down before asking in an indifferent tone.

Green soul quickly described the situation. At the same time, he emphasized the appearance and age of the child next to Arel. At the same time, he secretly observed Tang Zhen's expression.

this is a token that Arel gave me. She said that you'll believe me if you see it.

Green soul explained as he handed an exquisite bracelet with runes engraved on it to Tang Zhen.

Nodding his head gently, Tang Zhen looked at the protective equipment that he had personally given to Arel and confirmed that the other party was not lying to him. The child beside Arel was most likely his own flesh and blood.

Although he appeared calm and composed, there were waves in Tang Zhen's heart. He really did not know how to describe his feelings when he suddenly found out that he had a descendant.

Regardless of whether the matter was true or false, Tang Zhen had to personally go and confirm it.

After asking for information on the criminal who detained Yue qianhua and the specific process of the entire incident, Tang Zhen already had a rough judgment in his heart.

you rest for a while. We'll set off immediately after I'm ready!

After making up his mind, Tang Zhen no longer hesitated and immediately stood up to prepare.

The enemies who detained Yue qianhua and the others weren't weak. It was said that there were two King level cultivators, many Lord level cultivators, and thousands of low-level cultivators!

The only thing that surprised Tang Zhen was that this group of strong cultivators didn't have a tower. Instead, they were a group of wild cultivators similar to horse bandits!

With the strength of these cultivators, they could build a city Tower and enjoy the benefits and attribute enhancement of the city. Wouldn't it be much easier than being a horse Bandit?

However, this was not the case because these powerful wild cultivators could plunder resources by force. Although their cultivation speed was not as fast as Lou Cheng's attribute increase, they could find other ways to make up for the gap in this aspect.

Of course, the most important point was that wild cultivators did not need to participate in the invasion missions issued by the cornerstone platform. They did not need to worry about dying in the battlefield in the other world. They could live freely every day, as happy as Immortals!

...

With Tang Zhen's strength, he could single-handedly deal with these horse bandits. However, he felt that this matter was not that simple.

The area of the battle zone of the spirit ruins was far larger than the original world, and the survivors of the wilderness battle zone were randomly teleported. Yue qianhua actually met Arel and his mother so coincidentally, and she even asked Tang Zhen for help in time when she was in danger?

Sometimes, when things were too coincidental, it was very likely to be intentional!

No matter what the other party's goal was, as long as the safety of his loved ones was threatened, Tang Zhen would definitely not let it go!

[Chapter 1293](#)

1293 A trap! 1!

The sound of horse hooves could be heard from afar on the green grassland.

In the world of loucheng, horses were one of the most common mounts. However, compared to the horses in the original world, the warhorses in the world of loucheng looked more like ferocious beasts with bulging muscles.

In terms of speed and endurance, the horses in the original world could not even compare.

As the sound of the horse's hooves became clearer, a group of human cultivators in cloaks quickly appeared. They seemed to be in a hurry.

Tang Zhen sat on his War Horse and looked at the green soul galloping ahead with a trace of contemplation on his face.

According to the green soul, they were not far from their destination. With the speed of the Mount, they should be able to reach it by dark.

This time, Tang Zhen had brought 300 cultivators from Lou city with him. All of them had the cultivation of a Lord. By right, they did not need to use a means of transportation like warhorses and could just fly.

There were even small warships that could fly extremely fast in Tang Zhen's storage space. He could take them out and use them at any time.

However, in order to avoid alerting the enemy, Tang Zhen still decided to ride a warhorse. At the same time, he could also make green soul unable to figure out his trump card.

Regarding this matter, Tang Zhen had always been suspicious. Naturally, he would be on guard against the green soul. What she could see was naturally what Tang Zhen had deliberately let her see.

Along the way, green soul seemed to be very worried. From time to time, he would ask Tang Zhen to speed up to prevent any accidents from happening to Yue qianhua.

From this point alone, this green soul could be considered a loyal servant.

On the way, Tang Zhen asked about the enemy's specific situation and knew that they had occupied an abandoned city. Not only were there a large number of wild horse bandits, but there were also many Wanderers gathered there. The good and the bad were mixed together, and the scale was comparable to a small city.

Green soul had once suggested that Tang Zhen should not swagger into the horse bandits' camp. It was best to hide the Holy Dragon City cultivators he brought and wait for the critical moment to launch a surprise attack. This way, they would be able to achieve better results.

Tang Zhen did not refuse. In truth, he had only brought people here to deal with any accidents. With his cultivation as a law King, he would even dare to charge into a Dragon's pool or a Tiger's Den!

As they journeyed, the sky was already dark. A brightly lit area appeared in front of them, almost occupying the entire Hill. At the highest point was a huge dilapidated building, which looked like a ferocious giant beast in the dark!

city Lord Tang, the camp of the horse bandits is right in front of us. Qian Hua and the others are under house arrest in the ruins of the tower. When are we going to rescue them? "

Pointing at the abandoned building in front of them, Lu hun asked Tang Zhen.

actually, you don't need to move with me. You just need to wait here. If the horse bandits find you and fight with you, I may not be able to take care of you!

Tang Zhen reminded as he looked at green soul beside him.

don't worry, my Lord. Ordinary horse bandits can't do anything to me. Besides, I'm very worried about qianhua. How can I just wait? "

Green soul's tone was very firm. He was determined to follow Tang Zhen.

"Since that's the case, you can lead the way!"

As soon as he finished speaking, Tang Zhen covered his body with a cloak and slowly walked toward the horse bandits 'camp with green soul.

At this time, the camp of the horse bandits was very lively. There were burning bonfires everywhere, and the air was filled with the smell of roasted meat and bad wine. Wild cultivators and Wanderers in different clothes were gathered together, making noise, laughing, and cursing.

Tang Zhen and Lu hun walked through it. No one provoked them along the way. If they wanted to survive in this chaotic place, they had to keep their eyes open. Once they provoked someone they couldn't afford to offend, they might lose their lives at any time.

In the eyes of these Wanderers, Tang Zhen and his companion were existences that they could not provoke. No one would find trouble for themselves.

After passing through the dirty and messy outer camp, the two of them arrived at the real stronghold of the horse bandits. The outside was just the activity area of the wild cultivators and Wanderers.

The abandoned city was built on the top of the mountain, surrounded by steep rock walls with sharp round wood. On the road leading to the abandoned city, there were fierce-looking horse bandits guarding it.

Since they were going to sneak in, the two of them naturally couldn't enter from the main road, but went around to the side of the cliff.

In fact, if it wasn't for the green soul beside him, Tang Zhen wouldn't have to go through such trouble and would have been able to teleport to the abandoned building.

The two figures soared into the sky and walked on the cliff as if they were on flat ground. Soon, they arrived at the bottom of the abandoned city.

The city was shaped like a bundle of uneven hexagonal pencils. There were dozens of Spire-shaped buildings, but most of them were broken.

At this time, there were flames flickering on the top of the towers. From time to time, there were figures moving around, monitoring the movements in the surroundings.

As long as a tower was above level 6, it would become a giant, and this abandoned tower was the same. Although it was in ruins, it was quite large in scale. It would take a lot of time to find a person here.

Green soul led the way. She entered the abandoned building through a gap and advanced quickly through a row of corridors, approaching the central area.

Perhaps because the city was too big, they heard the horse bandits talking from time to time, but they didn't see any horse bandits.

"Green soul, how much longer will it take for us to arrive?"

Tang Zhen frowned slightly. He coldly swept his eyes over the surrounding dark-black buildings and asked in a low voice.

Green soul, who was advancing with his head lowered, was stunned for a moment before he quickly replied, "we're almost there. Arel and the others are locked up in the building in front. We'll be there after we pass through the square!"

"Very good, I hope they're still there!"

Tang Zhen said with a smile that wasn't a smile. He followed green soul and quickly passed through the huge square.

However, at this moment, the square suddenly lit up with flames. Countless figures appeared and surrounded the entire square.

At the same time, the green soul that was at the front suddenly sped up and rushed to the edge of the square like an arrow.

"If you want to escape, come back!"

Following Tang Zhen's cold cry, green soul's body rapidly retreated and drifted over like a kite with a broken string.

Green soul's face was filled with fear as he shouted towards the edge of the square, "Save me, quickly!"

Unfortunately, no matter how much she shouted, no one at the edge of the square paid attention to her, as if they did not hear her voice.

"Plop!"

Green soul fell heavily to the ground and spat out a mouthful of blood.

"City Lord Tang, please listen to me. I was forced to do this. If I didn't do this, they would have killed qianhua and all my clansmen."

After falling into Tang Zhen's hands, green soul was no longer panicking. Instead, he slowly knelt in front of Tang Zhen and cried, qianhua is the only hope of our elven race. Nothing can happen to her. This matter has nothing to do with her. I made the decision on my own!

"Are you done? Now, you just need to tell me how Arel and his mother are doing."

Tang Zhen's voice was very cold as he asked in an expressionless manner.

...

“I don’t know, but before I left, the mother and son were taken away. I don’t know where they went.”

Green soul quickly said.

“Very good, you can die now!”

Hearing this, green soul’s expression changed drastically. Just as she was about to get up and escape, flames came out of her body. She turned into a torch and finally turned into a pile of ashes with a scream!

From the beginning to the end, Tang Zhen did not pay any attention to green soul. Instead, he turned around and faced the edge of the square. He coldly looked at the several figures that were walking towards him.

“If I’m not wrong, everyone should be from the spiritual ruins in the central region of the war zone!”

[Chapter 1294](#)

1294 Crushing defeat

city Lord Tang, you’re indeed amazing. You managed to guess our origins so quickly!

The blue-faced cultivator in the lead sized up Tang Zhen. A trace of shock appeared in his eyes as he laughed and replied.

When facing Tang Zhen, the blue-faced cultivator actually felt a trace of uneasiness in his heart, as if he was facing a volcano that could erupt at any time.

This Tang Zhen was most likely not simple!

Although he was apprehensive, the mission still had to continue. The blue-faced cultivator hadn’t forgotten the purpose of his trip.

After hearing the blue-faced cultivator’s answer, Tang Zhen sneered as killing intent flashed in his eyes.

This blue-faced cultivator was also a law King. He was a top-tier combat force in the spiritual ruins battleground and rarely appeared. He didn’t expect to see him in a horse Bandit’s nest.

He didn’t even need to think to know that the other party must have set up this trap to lure him here.

In fact, the other party didn’t need to go through so much trouble. As long as they told him that Arel and his mother were under their control, Tang Zhen would not hesitate to rush in even if it meant going through a mountain of daggers and a sea of flames.

Seeing Tang Zhen sneer at him, the blue-faced cultivator didn’t care. Instead, he smiled and said, “I’ve long heard of city Lord Tang Zhen’s great name. Not only is he extremely powerful and has the title of a law King, but the Holy Dragon City is also the only city in the entire Savage wildland that managed to survive the catastrophe!

If it wasn’t for that incident, the Holy Dragon City would probably have been upgraded to a national-level city, right?”

Tang Zhen was noncommittal. He merely continued to stare at the other party and asked in a faint voice, "Tell me, what do you mean by this?"

"Since city Lord Tang is in such a hurry to find out, I won't waste any more time. As an outsider, you should just run Holy Dragon City honestly. It's best not to touch things that don't belong to you!

I don't know what method you used to control a spatial tower, but it belongs to my spiritual ruins Warzone, so you'd better hand it over obediently. This way, we won't have to fight each other over this matter!"

The blue-faced cultivator said arrogantly and confidently.

Tang Zhen laughed disdainfully when he heard this. The other party was indeed here for the space TOWER. In order to completely defeat him, they even found Arel and her son to threaten him!

It was really hard on this group of people. If it wasn't for this matter, Tang Zhen really wouldn't know that he already had a son.

"I don't understand what you're saying. What do you mean by" something from the spiritual ruins battleground "? who made such a rule?"

This kind of main building is something that only the lucky ones can obtain. What right do you have to make me hand it over? who gave you the right?"

If you know my past, you'll know that I'll never compromise. You've only just grasped the power of law, and you dare to threaten me? who gave you the courage?"

Tang Zhen's tone became a little colder with each sentence he spoke. His entire person had already descended into a furious state when he roared out the last sentence.

In the blink of an eye, the entire square was devoured by the sea of fire. The pitch-black night sky turned completely fiery red, and lava-like fire clouds continued to surge and fall from the sky.

Seeing this apocalyptic scene, the wild cultivators and Wanderers outside the abandoned city did not hesitate. They fought to be the first to run in all directions, afraid that they would be affected by the battle.

The entire abandoned city was enveloped in it, and wherever the fire rain fell, there would be raging flames rising into the sky. The screams of the horse gang were endless, and there were figures fleeing in panic everywhere.

The cultivators guarding the square hurriedly dodged. Facing a peak nomological King, they would be crushed into pieces if they were even slightly slower!

The blue-faced cultivator in front of Tang Zhen was the first to bear the brunt. He was like a small boat in a storm that could capsize at any moment.

With a loud roar, the power of law burst out around the blue-faced cultivator, forming a wall of wind around him, blocking the approaching waves of fire. However, compared to the endless flames, this wall of wind seemed extremely weak.

One had just grasped wind-elemental nomological power, while the other had already gained a deep understanding of fire-elemental nomological power. The difference in strength between the two was simply incomparable.

It wasn't an overstatement to say that if Tang Zhen wanted to kill the blue-faced cultivator, the other party would definitely not have the chance to escape!

In just a few seconds, the blue-faced cultivator and his companion were completely surrounded by the sea of fire. The wall of wind that was blocking the sea of fire had been compressed to the extreme and seemed to be on the verge of collapse.

The blue-faced cultivator's original arrogant expression had long disappeared and was replaced by a look of horror. He struggled to support the wind wall that was about to collapse while shouting at Tang Zhen, "Tang Zhen, are you crazy? do you know where I come from?"

Tang Zhen sneered. He didn't care about the blue-faced cultivator's clamoring at all. Instead, he controlled the sea of fire to continuously crush the wind wall.

"Tang Zhen, let me tell you. I have a national-level building behind me, and our city Lord comes from a continent-level building. You can't afford to offend him?"

If you dare to kill me, not only will you not be able to escape death, but your tower will also be razed to the ground!"

The blue-faced cultivator roared in exasperation. He had never been in such a life-and-death situation ever since he had become a law King. The immense fear that had risen in his heart was making him completely panic.

Seeing that Tang Zhen was still unmoved, a trace of despair flashed across the blue-faced cultivator's eyes. However, he immediately thought of something and anxiously shouted, "Tang Zhen, I have already sent your woman and son to the middle of the war zone. If you dare to kill me, they can forget about living!"

As soon as the blue-faced cultivator finished speaking, the sea of fire around them disappeared, leaving only a dark red slate, which proved that the terrifying flames had existed.

if my woman and child are hurt, I'll give up everything to kill you and your loucheng!

Tang Zhen coldly said. At the same time, he slowly turned around and left.

I'll spare your life today. Go back and tell your master that I, Tang Zhen, will definitely pay him a visit in person after a while!

The blue-faced cultivator looked at Tang Zhen's gradually disappearing figure on the dark red Square. A trace of fierceness flashed through his eyes, but he immediately sighed in his heart.

The blue-faced cultivator admitted his defeat.

He knew that if it wasn't for Tang Zhen taking care of his woman and child, he would have died today without a doubt!

However, this trip was not without any gains. At the very least, they had confirmed that Tang Zhen's strength and cultivation had far exceeded their expectations. He was definitely not an ordinary law King!

From the aura earlier, Tang Zhen might be just one step away from touching that god-like level!

After realizing this, the blue-faced cultivator was extremely shocked. According to the information they had, Tang Zhen had only used about ten years at most to reach his current cultivation level.

This kind of cultivation speed could no longer be described as a genius, because in the entire spirit ruins Warzone, there had never been such a terrifying figure!

If he really took that step and became a spiritual Emperor who could control thousands of miles, then even the continent-level tower behind him would be extremely wary and would never offend him for a SPACE TOWER!

The problem was that Tang Zhen hadn't taken that step yet, and a SPACE TOWER was extremely precious. The blue-faced cultivator and the others would definitely be unwilling to give up just like that.

If he wanted to obtain the space TOWER without leaving any future trouble, there was only one way, and that was to completely destroy Tang Zhen and his Holy Dragon City!

[Chapter 1295](#)

1295 Urgent situation (1)

Although Tang Zhen was burning with anger, he didn't directly kill the blue-faced cultivator. Otherwise, it was very likely that the enemy would take extreme actions.

A little impatience would spoil a great plan, and he was naturally aware of this.

Since Arel was still in their hands, Tang Zhen could only spare his dog life for the time being. After saving the mother and son, he would definitely make the blue-faced cultivator pay a painful price.

Family was Tang Zhen's reverse scale. This group of people actually used this to threaten him and had already been viewed as a life and death enemy by Tang Zhen!

The words of the blue-faced cultivator had already proved that this matter was related to the continent-level city in the war zone of the spirit ruins. If Tang Zhen wanted to save Arel, it was inevitable that he would have to fight with the continent-level city.

Although Tang Zhen didn't know much about the continent-level tower, he knew that the other party's strength must be extremely terrifying. Even if his cultivation base was enough to dominate a region, he still couldn't withstand a single blow in front of such a terrifying behemoth.

This was not Tang Zhen trying to boost other people's prestige, but it was the truth. This was because the law Kings who were known to be Kings in the outside world were not rare in the continent-level buildings, and there were cultivators of even higher levels.

A spiritual Emperor could control thousands of miles and change the weather with a single thought. His might was comparable to that of a God!

If one wanted to upgrade to a continent-level building, they must have a spiritual Emperor. Otherwise, no matter how strong the building was, it would not be qualified to upgrade!

The so-called Elder Council of the Battlefield was actually made up of these spirit emperors. They all had the intermediate authority of the cornerstone platform of the Battlefield and had the right to know the secret information on the cornerstone platform. They could also influence the operation of the cornerstone platform to a certain extent.

This was the reason why the cornerstone platform had been paying attention to Tang Zhen after he obtained the spatial tower. It had even asked him to head to the central part of the spiritual ruins more than once. It was because there were already spirit Emperor rank powerhouses who had noticed him.

After understanding the cause and effect, Tang Zhen immediately felt the pressure on his shoulders.

Under normal circumstances, a spirit Emperor only needed to take action personally to easily capture Tang Zhen and force him to hand over the space TOWER.

However, after asking the main control platform of the wilderness Warzone, Tang Zhen knew that things were not that simple. It was not that the spiritual Emperor hiding behind the scenes did not want to take action, but that he was simply unable to do so.

The reason was very simple. After the tower was upgraded to the continent level, it would develop towards a world level tower. During this process, the spirit Emperor experts who had completely turned into energy would gradually refine the tower and turn it into an independent small world!

During this period, spiritual emperors couldn't move freely at all. Only after completely refining the continent-level Lou Cheng could they keep it in their sea of spirit. Wherever they went, they could take the Lou Cheng with them!

If they wanted to invade the other world, a spiritual Emperor only needed to enter the plane channel alone, and they could descend with the entire city!

However, the tempering process was very long. It was easy to stay in their nest for decades, centuries, or even a thousand years. This was why it was rare to see a spiritual Emperor in the world of loucheng!

Therefore, Tang Zhen didn't have to worry about facing a spirit Emperor level old monster for the time being. Even so, a continent level City Tower was still an existence that he couldn't afford to provoke.

Now that he had become enemies with the other party, he and the Holy Dragon City would definitely become their targets based on the style of the continental loucheng. Perhaps a plot against the Holy Dragon City had already been launched.

Tang Zhen knew that he had to take action. Otherwise, it would not take long for the Holy Dragon City to face a great disaster!

The best way to solve the crisis was to escape and hide. He would swallow his anger and wait for the Holy Dragon City to develop and grow. Then, he would find a chance to take revenge.

However, it wasn't easy to hide safely. With the enemy's strength, as long as Tang Zhen didn't leave the spiritual ruins Warzone, he would be found out sooner or later. It was useless even if he hid in the space TOWER.

However, if they were to escape from the spirit ruins Warzone, the space TOWER would become the biggest burden. As long as Tang Zhen dared to take it away from the spirit ruins Warzone, he would definitely be hunted down by countless space towers, and it was not impossible for them to hunt him down across warzones!

Since avoiding was not the best way, they could only fight head-on!

The Holy Dragon City now had two kings of laws, more than twenty King-level cultivators, tens of thousands of Lord-level cultivators, and hundreds of thousands of low-level cultivators!

Whether it was the wilderness Warzone or the spiritual ruins Warzone, this was a terrifying force that could not be underestimated. Many countries would be afraid of it.

However, compared to the continent-level loucheng that used King-level cultivators to form a team of cultivators, the strength of the Holy Dragon City was still not enough. Therefore, Tang Zhen had to either frantically increase the strength of himself and the cultivators of the loucheng, or use external objects to strengthen the combat power of the loucheng. At the same time, he had to quickly increase the level of the Holy Dragon city's loucheng!

However, it was almost impossible to accomplish all this in a short time. Moreover, the enemy might not give Holy Dragon City enough time to develop.

The Holy Dragon city's development was already abnormally fast. This was already the result of Tang Zhen's all-out effort. If he wanted to advance further, it would be almost as difficult as ascending to the heavens!

Of course, other than actively defending, Tang Zhen could also take the initiative to attack. He would think of all ways to create trouble for the enemy. Perhaps, it would also have a good effect in blocking the enemy!

However, when he thought of the strength of a continent-level building, Tang Zhen still felt that his strength was not in his heart.

Tang Zhen could not help but feel his head swell when he thought of this. He felt that his thoughts had become a mess.

Just as he was secretly worried in his heart, a flash of inspiration suddenly appeared in his mind. Tang Zhen suddenly remembered the harvest of his trip to the myriad world mall. At that time, he had snatched the Super biological intelligent brain that controlled the entire myriad world mall!

Tang Zhen was not too clear about the true strength of the myriad world mall. However, he had a feeling that the other party's strength was not inferior to the loucheng world!

As the chief Steward of such a powerful organization, the Super biological brain's knowledge was without a doubt. Therefore, the items that it carefully collected must have great value!

Some time ago, Tang Zhen had been busy with chores and did not have time to check it. However, now that the Holy Dragon City was in danger, Tang Zhen suddenly thought of this thing.

Perhaps the items in the treasure would be able to help Tang Zhen resolve the crisis in front of him?

After realizing this, Tang Zhen could no longer suppress the anxiety in his heart. He let the Holy Dragon city's cultivators travel slowly before he directly teleported toward the Holy Dragon City.

After returning to the Holy Dragon City, Tang Zhen directly entered the secret cultivation room. After carefully arranging it, he carefully took out the treasure that he had robbed before.

At the moment he took out the treasure, Tang Zhen felt his body relax. He even seemed to hear a comfortable moan from his phone as if a heavy burden had been lifted.

Tang Zhen shook his head and turned his head to look at the empty ground in front of him.

There was nothing in front of him but Tang Zhen knew that there was definitely something there. It was just that he could not see it.

"If I can't see or touch it, how should I open the treasure?"

Tang Zhen thought for a moment before asking through his phone.

[analyzing!]

[scan complete. It is confirmed that the item is sealed in the four-dimensional space. Brute force is required to crack it!]

[cracking in progress, please wait!]

[cracking complete. The treasure has been opened!]

At the same time as the phone notification appeared, a square object covered with runes suddenly appeared in front of Tang Zhen. It was quietly floating in front of him and looked extremely mysterious!

[Chapter 1296](#)

1296 A shocking treasure

When Tang Zhen first saw the square metal body, he immediately realized that this item was definitely not simple!

In fact, there was no need to think about it. How could an item that could be carefully collected by the Super biological brain be an ordinary item?

Taking a deep breath, Tang Zhen began to carefully examine this item.

First of all, the material used to make this square metal body was a special metal with spatial attributes. It could be used to make storage equipment and was extremely valuable.

The Holy Dragon City had spent many years searching and purchasing them at all costs, but they had only managed to obtain a small amount of space metal. Then, Tang Zhen and Lingxu Zi had refined a batch of storage equipment for the use of the Holy Dragon city's higher-ups.

The rarer an item was, the more expensive it would be. It could be said that the price of every storage equipment was extremely shocking!

However, when he looked at the Super biological smart-brain, it actually used such a large piece of space metal to make a storage equipment without adding any other metals. This kind of spending could not be described as extravagant.

As expected of the Super Butler of the myriad world mall, he was extraordinary, rich, and willful!

Putting aside the treasure sealed inside, the value of this piece of space metal alone could not be estimated with money. If it was used to refine storage equipment, every Holy Dragon City cultivator would definitely have one!

This way, the combat power of the Holy Dragon City cultivators would be greatly improved, and their ability to adapt on the battlefield would also become stronger!

Just the container that stored the treasure was priceless. This caused Tang Zhen to look forward to the items inside.

Tang Zhen walked to the front of the suspended cube and sized up the runes on it. There were some runes that he had never seen before. However, he could confirm that this was a huge storage equipment!

Since this storage equipment had already been cracked by his phone, Zhen Tang's spiritual force easily connected to it. He immediately saw the items stored inside.

A shocked expression appeared on Tang Zhen's face. Soon after, it was filled with ecstasy and he almost jumped up from the ground.

With just a glance, Tang Zhen saw a mountain-like pile of origin stones and the sealed world's origin. The dazzling light almost blinded his eyes!

The Super biological brain was indeed rich and generous. It had actually accumulated so many good things. The value of all these things added together was already inestimable!

With these resources, Tang Zhen would definitely be able to greatly improve his combat strength. At the same time, he would be able to rapidly upgrade the level of his building. Even if it could not reach the scale of a continent-level building, it would not be too far off!

After his excitement, Tang Zhen had a trace of doubt. What was the purpose of the Super biological brain for collecting these items?

It was also at this moment that Tang Zhen suddenly saw an item beside the origin stone. It looked like a mass of human meridians and emitted a faint light.

Tang Zhen frowned slightly. He subconsciously controlled his mental energy and moved it toward the item. He wanted to figure out what it was.

The instant his mental energy came into contact with this item, Tang Zhen felt an explosion sound within his mind. Immediately after, countless amounts of information surged into his mind, causing him to nearly have a mental breakdown!

But even so, Tang Zhen still had a face full of smiles, appearing extremely pleased with himself.

This definitely wasn't because Tang Zhen had been turned into a fool, but because the origin of this item was too great. It was so great that Tang Zhen didn't have any mental preparation at all.

Tang Zhen finally understood why the Super biological brain had hidden it so carefully. In order to ensure its safety, it had even sealed it in a special high-pressure environment where normal creatures could not survive!

Even the origin stones and the world's origin were prepared for this item. To be exact, they were all food for this special item!

In fact, this item was a miniature version of the myriad world mall, or rather, the framework template of the myriad world mall. As long as there was enough supply of resources, it could grow into a new myriad world mall!

Who knew how the Super creature artificial intelligence created it, what its purpose was, and why it was carefully hidden?

All of this had nothing to do with Tang Zhen. He only knew one thing, and that was that with the existence of this item, Holy Dragon City could completely build a brand new myriad world mall. At the same time, they could use it to obtain an endless stream of resources!

As long as they operated properly, perhaps it would not take long for Holy Dragon City to soar to the sky. At that time, would they be afraid of a continent-level city?

After the huge surprise, Tang Zhen's brain started to work rapidly and he began to study how to use these resources to tide over the current crisis.

.....

Just as Tang Zhen opened the treasure, a roar suddenly came from a crack in the plane deep in the myriad world mall. It seemed to be filled with unwillingness and anger.

A moment later, a cultivator from the mall whose strength could not be seen suddenly appeared. He went straight through the commercial streets without restraint and went straight to the teleportation platform of the myriad world mall.

The light of the teleportation circle flickered, and the figure of the cultivator from the Merchant City disappeared in a flash. The destination of the teleportation was the wizard World!

.....

The Sorcerer world, the fifth continental ring.

If one were to look at it from the sky, one would be able to see the full picture of the continental rings. They were extremely vast, and they surrounded the ancestral source planet in rings. Countless creatures lived and multiplied in these continental rings.

As the light from the teleportation circle subsided, a figure whose cultivation level was impossible to see through slowly walked out. He glanced at the Magi around him and said in a cold voice, "I'm from the myriad world mall. I'm the Butler's emissary. I want to see the controller of your fifth continent ring!"

After saying that, the cultivator from Shang city ignored the Wizards around him and found a place to sit down. He closed his eyes and did not speak anymore.

The Magus in charge of guarding the teleportation circle did not dare to delay and quickly reported this matter through special means.

In less than half an hour, a teleportation circle glowed, and a dozen figures appeared. The Wizards around them quickly dodged the terrifying aura.

Many knowledgeable Magi trembled when they saw the faces of these people. They were the true Masters of the fifth continent ring!

The leader of the dozen or so Wizards was the blood-eyed cultivator who had fought with Tang Zhen before. He looked at the cultivator from the Shang city in front of him and said in a deep voice, "I wonder what business you have here representing the head butler?"

Many people didn't know what the chief butler meant, but a cultivator at the blood-eyed cultivator's level knew what it meant. This was why he had rushed over as fast as he could after receiving the news.

As he spoke, the blood-eyed cultivator had completely sealed off the surrounding space. Outsiders could not see their figures at all.

The cultivator from Shang city slowly opened his eyes and looked at the blood-eyed cultivator in front of him. He said indifferently, "I know that the fifth ring has always wanted to invade the world of loucheng, but you've never made any progress, right?"

The blood-eyed cultivator muttered to himself for a moment before nodding.

He knew that there was no way to hide this from the myriad world mall, and there was no point in denying it, so he simply admitted it.

The cultivator from the Shang city nodded his head and said, "it's good that you admit it. The purpose of my visit this time is to help you open up a passage so that you can enter the world of loucheng smoothly!"

Upon hearing this, the dozen or so Wizards, including the blood-eyed cultivator, were stunned at the same time, and then their faces were filled with ecstasy.

They knew the strength of the myriad world mall and the identity of the head butler. As long as he agreed to help, this matter would be settled!

Even if the cultivator didn't reveal his identity, the Wizards had already guessed that this cultivator might be a clone controlled by the Butler's consciousness, no different from his original body.

Suppressing his excitement, the blood-eyed cultivator asked in a serious tone, "That's a good thing, but what do you want?"

The cultivator from Shang city said coldly, "I want to kill Tang Zhen and destroy Holy Dragon City. At the same time, I want to take back what is mine!"

...

The blood-eyed cultivator first frowned when he heard the name 'Tang Zhen'. Then, he nodded his head with a murderous look.

"Alright!"

[Chapter 1297](#)

1297 Throwing money to level up (1)

Ever since he obtained the hidden treasure of the Super creature's brain, Tang Zhen immediately fell into a busy state. He wanted to use the shortest amount of time to make himself and the Holy Dragon City strong.

The value of this treasure could no longer be calculated. It was also because of this that Tang Zhen was certain that the Super biological brain would definitely not give up and would definitely try to get it back.

As long as he made good use of the invaluable core structure of the myriad world mall, he could definitely build a superpower. No one could give up such a thing.

However, since this thing had fallen into Tang Zhen's hands, there was no reason to return it.

The law of the jungle had always been the unchanging law of the world of loucheng. Not to mention, this super biological brain had really tricked Tang Zhen quite a bit in the myriad world mall, and this debt had yet to be settled.

Back then, he had stolen the treasure with the purpose of revenge, but he did not expect that he would obtain a great opportunity by mistake!

Compared to those people who would hide good things when they had them, Tang Zhen would only use them as soon as possible. Only in this way would he be able to create the greatest benefits for himself and prevent himself from not being able to obtain anything in the end.

Therefore, he needed to improve his own strength and build a new myriad world mall. The two could be carried out at the same time, and neither would delay the other.

After dealing with the matters that needed to be arranged, Tang Zhen immediately entered the space TOWER and began to execute his plan.

The first thing he had to do was to upgrade Holy Dragon City to a national-level city!

Although the savage wildland had been removed from the list, the main control platform was still in Tang Zhen's hands. As long as he paid enough world origin, he could complete Lou Cheng's official promotion!

However, this kind of promotion was different from normal circumstances. Because the wilderness Warzone had been removed, the main control platform had become an unregistered account. Although its original functions were still there, it had lost its official legal identity.

Under such circumstances, although Holy Dragon City could be promoted normally, it would not be recognized by the other battlefields and could only be considered a level 9 city.

Even if Tang Zhen applied to merge the Holy Dragon City into the cornerstone platform of the spirit ruins Warzone, it would be regarded as a level 9 city by default. It could only enjoy the benefits of a level 9 city or even lower. It would definitely not be recognized as a national-level city.

The most important thing in a building was the increase in the residents' attributes and the benefits of the building. Even if there was only a difference of one level, the losses would be immeasurable.

In addition, if Tang Zhen wanted to become a national-level building recognized by the cornerstone platforms of other war zones, he must complete the corresponding invasion mission and pay enough world origin. Neither of the two could be missing.

The reason why there was such a rule was that the cornerstone platform not only needed the world's origin, but it also needed to verify the combat power of Lou Cheng, so as to prevent any fake Lou Cheng from mixing in.

This was not an unnecessary move. In fact, without the restriction of this rule, the buildings with enough origin of the world could use cheating to upgrade the level 9 buildings to the national level one by one. In this way, the attributes of the national-level buildings could be increased to cultivate a large number of cultivators!

The Holy Dragon City had already launched a similar invasion in the wilderness Warzone. If the wilderness Warzone had not been destroyed, it would have long been upgraded to a national-level city.

Tang Zhen didn't want to do this kind of meaningless test of strength a second time. Moreover, once they joined the cornerstone platforms of other war zones, the Holy Dragon City would also be restricted. How could they be as free as they were now?

Therefore, to Tang Zhen, unless he was at the end of his rope, he would definitely not merge with the other battle platforms.

After connecting to the main control platform of the wilderness Warzone, Tang Zhen operated according to the regulations and paid enough world origin. Then, he received the notice that Lou Cheng could be promoted to the national level!

A wave rose in Tang Zhen's heart when he heard the notification. His face was filled with emotion.

Since the establishment of the Holy Dragon City, he had poured countless efforts into it. Although it had experienced hardships, it had not been destroyed. Now, it had even been promoted to a national-level city that he had never dared to dream of before!

Although it was just an unregistered account that couldn't be recognized by other war zones, Tang Zhen didn't care. It was just a title. How could it be more important than the real benefits of Lou Cheng?

What Tang Zhen didn't know was that because of his unintentional actions today, he had created a legend that made many of the continent-level turreted cities in the 3000 battle regions dumbfounded.

However, this was a story for the future and not to be mentioned now.

After it was upgraded to a national-level building, the size of the building would be further expanded, and the concentration of heaven and earth energy would also be greatly increased. The welfare of the

residents would also increase. Even the cornerstone platform would be changed, and more skills and trading items would appear.

However, in order not to alert the enemy and let the enemy see the changes in the Holy Dragon City, Tang Zhen only secretly expanded the scale of the main city. This way, the floating city would support the entire surroundings of the Holy Dragon City. Once they encountered danger, the Holy Dragon City could rise from the ground at any time!

All of this was happening underground. Other than Tang Zhen, the other residents of Lou city didn't know.

However, this matter could not be hidden for long. As long as they could feel the change in the energy concentration in the tower area and see the changes in the options on the cornerstone platform, the Holy Dragon City residents would be able to guess the truth.

However, since the city Lord didn't say anything, he must have his reasons. We'll just pretend that we don't know anything and go home to enjoy ourselves!

After upgrading the Holy Dragon City to a national level, Tang Zhen did not stop. Instead, he used the world's origin to start leveling up, continuing to upgrade the authority and level of the Holy Dragon City.

A country level was just a general concept. Before it was upgraded to continent level, there was still a lot of room for improvement. With every step forward, the attributes of the building and the welfare of the residents would change.

The higher the progress, the more powerful Lou Cheng would be. To put it bluntly, it was a process of throwing money, and there was no need to verify the invasion war. As long as there was enough world origin, it would be enough.

Tang Zhen was currently rich and generous. He naturally would not be stingy. He smashed all the way to the last step of the door before stopping.

If he took one step further, he would be at the continent-level building that even Tang Zhen had to look up to. However, he needed to complete the missions issued by the cornerstone platform at this time, and it was not just one. Only then could he officially advance to the continent-level!

This was to be expected. As long as one knew how overpowered a continent-level building was, they would understand why the cornerstone platform had such a restriction!

At the very least, before Tang Zhen advanced to become a spirit Emperor, he could forget about Holy Dragon City advancing to continent-level. Even if the Wildlands' main control platform and Holy Dragon city's cornerstone platform merged into one, it would still be impossible for them to make an exception in this matter.

This was not because the main control platform was inflexible, but because once Lou Cheng was promoted to continent-level, not only did he have to accept more dangerous invasion tasks, but he also had to fight with gods and demons. At the same time, the continent-level Lou Cheng was responsible for guarding the land and protecting the cornerstone platform. If he was not strong enough, he would definitely harm himself and others!

After completing the leveling up in Holy Dragon City, the entire Holy Dragon City had completely changed.

The attributes of the city's residents had already reached a very high level. It would not be long before the Holy Dragon city's cultivators' levels would increase like a rocket. King-class experts would be everywhere, and the scene of Lords being inferior to dogs would not be far away!

What Tang Zhen didn't know was that while he was madly leveling up, countless Holy Dragon City residents had already started to break through and level up. Dumbfounded residents could be seen everywhere, unable to understand what was happening.

It would be fine if he broke through when the conditions were right, and it would be fine if he broke through by burying his head in cultivation. However, breaking through by walking, eating, or even going to the toilet was very inconceivable.

what the hell was this? was he dreaming?

Most of the Holy Dragon city's residents were cultivators, so their senses were very sharp. After the shock, they investigated the cause and immediately sensed that the energy intensity of the building was increasing rapidly, as if they were in an ocean of energy.

Under such circumstances, even a stupid pig could forcibly become an Overlord!

At this time, it could be seen how United the Holy Dragon city's residents were. Even if they all understood what had happened, no one opened their mouths to announce it. They were all overjoyed and smiled at everyone they saw. Even if they had broken through, they acted as if nothing had happened.

The Wanderers and cultivators from outside the city could not enjoy the attribute boost, so they had no idea what was going on. They only felt that there was something wrong with the residents of the Holy Dragon City, and they kept laughing foolishly. They asked him what he was laughing about, but he refused to answer.

In the end, it didn't take long for the outsiders to start giggling. Why? because laughter was contagious!

[Chapter 1298](#)

1298 Starting the structure, madly lighting up the stars

As the Holy Dragon city's residents laughed foolishly, Tang Zhen began the second step of his plan, which was to activate the core structure of the myriad world mall, so that it could create wealth as soon as possible!

As long as this thing existed, the Holy Dragon City would no longer have to worry about resources. They would open their doors to welcome guests from all directions, and endless wealth would come rolling in!

Just by looking at the fact that the Super biological smart-brain could embezzle so many origin stones and the world's origin, it was clear how much money the myriad world mall had made over the years. It was definitely rich!

After the experience of this replicated myriad world mall, although Holy Dragon City would not be able to compete with the real myriad world mall for a long time, they could still obtain rich profits!

Therefore, the structure of the myriad world mall had to be activated immediately, and then speed up the cultivation to prevent any changes from happening!

In order to upgrade the Holy Dragon city's level, Tang Zhen had used one-tenth of the world's origin source. He was prepared to deduct another one-tenth and throw the rest into this replicated version of the myriad world mall.

However, Tang Zhen had no idea how much the myriad world mall would grow with such a massive amount of resources.

It seemed like he could only do his best and leave it to fate.

Regardless of the outcome, Tang Zhen had already made up his mind to do it. Perhaps, he would need to invest a huge amount of resources into it because of this. However, the future returns were something that he was looking forward to.

After careful consideration, Tang Zhen decided to build the shopping center in the space TOWER. Not only was it hidden, but it was also safe. At least, outsiders would not be able to enter without permission.

Also, the special feature of the space TOWER was very beneficial to the development of the mall. The combination of the two might produce unexpected results.

After selecting a group of loyal Lou Cheng cultivators to guard the place, Tang Zhen took out the structure of the myriad world mall and placed it in the best position that he had carefully selected.

After leaving the storage dimension, the structure of the myriad world mall expanded rapidly. The object that was originally the size of an adult expanded to a size of several kilometers in a very short time, dancing in the void.

Dozens of tentacles extended in all directions. Then, they seemed to have pierced through the spatial barrier and extended to an unknown place.

At the same time, a signal was transmitted from Tang Zhen's consciousness. It was hungry!

Without any hesitation, balls of the world's origin were thrown towards the myriad world mall's framework, which was then grabbed by the wriggling tentacles and absorbed madly.

Immediately after, its size increased again, and more and more tentacles extended out. Its body also began to gradually become transparent, as if it was about to break away from the dimension in front of it and enter another dimension.

According to the information he had received earlier, this was a normal phenomenon because the real myriad world mall was also in another dimension. Otherwise, the size of the space TOWER alone would not be able to accommodate such a huge object that expanded infinitely!

What Tang Zhen had to do now was to observe the growth of the myriad world mall while tirelessly providing it with the nutrients it urgently needed. He did not dare to leave for a moment.

Unknowingly, three days had passed. The initial evolution of the myriad world mall's structure had finally been completed, and it had entered the consolidation and exploration stage.

If they continued to expand and develop in the future, they would use the current structure as a Foundation and extension. It could be said that the more stable the foundation was, the greater the potential in the future!

Softly sighing in relief, Tang Zhen sat down cross-legged on the spot and revealed an expression as if he had been relieved of a heavy burden.

After a series of investments regardless of the cost, the structure of the myriad world mall was finally stabilized. Fortunately, the Super creature smart-brain left enough world origin. Otherwise, even if the entire Holy Dragon City was sold, it would not be able to gather one-tenth of the required resources.

The gold-devouring beast indeed lived up to its name!

Fortunately, the initial construction had already been completed. Next, Tang Zhen only needed to wait patiently until the tentacles of the myriad world mall connected to the other world and found a suitable plane. Then, he could open his business!

Of course, in the beginning, it was not as prosperous as the real myriad world mall. There were countless shops opened by dimensional merchants. They could only temporarily rely on Tang Zhen to carry out transactions with the other party, and then use the dimensional tentacles of the myriad world mall to transfer items.

In order to have a steady flow of customers, they had to entrust a dimensional merchant they were working with to build a teleportation portal. Only then could they activate the dimensional teleportation function. This was also a top-secret technique. At least, the Holy Dragon City had yet to grasp it!

Tang Zhen was even a little suspicious. With the defensive strength of the tower world, would it allow creatures from the outside world to be transported in? In the past few times he had come into contact with them, the stowaways had directly turned into monsters!

As for why the Holy Dragon city's teleporter was fine, Tang Zhen had two speculations. Either it was related to the mysterious phone, which blocked this special law, or the rules of the tower world had already tacitly acknowledged that these transmigrators were residents of the Holy Dragon City, so they would not turn into monsters.

In summary, the matter of building a teleportation array didn't need to be considered for the time being. It wouldn't be too late to study it when the conditions were ripe!

The Holy Dragon city's upgrade had been completed, and the myriad world mall's structure had also been built. In the following time, Tang Zhen would start to improve his own strength.

After advancing to a law King, Tang Zhen had almost never met an opponent again. He had practically crushed his way through, so he couldn't help but slack off in improving his strength.

However, as he came into contact with an even larger world and encountered more and more powerful enemies, Tang Zhen faintly felt that his strength was not in his heart. Even though his comprehension of

the fire-type laws had reached an extremely deep level, it was still unable to give him a sufficient sense of security.

In the current list of enemies, there were behemoths like the myriad world mall and the continent-level City Tower. If Tang Zhen did not improve his strength, the final outcome would be the destruction of the city and the death of people!

Taking a deep breath, Tang Zhen released the origin stone that was as large as a small mountain. It was as dazzling as the sun, causing people to be dazzled.

He ordered the absorption into his phone, and in an instant, all the origin stones in front of him disappeared.

Looking at the soaring wealth on the phone interface, Tang Zhen pondered for a moment and lit up the water law star Kasaya.

Then, he lit up the wood-elemental starry sky.

Earth-type mayfly

Gold-element Kasaya

Wind-style Kasaya

Time-type Kasaya

Technology Branch

As long as it was a star that could be lit up, Tang Zhen would light it up without hesitation. Then, he would light up his branch skills. If he did not have enough origin stones, he would continue to absorb them. In any case, the reserves of the Super creature's brain were terrifying!

Tang Zhen knew that it was impossible for him to advance to a spirit Emperor in a short period of time. Therefore, he might as well develop in all aspects and try to rely on quantity to trigger a qualitative change!

There were pros and cons to this. The advantage was that the endless number of trump cards could overwhelm the enemy. When facing an enemy of the same level, he could completely crush them. When facing an enemy stronger than him, he could also have more means to deal with and escape.

As for the disadvantages, it would be wasting too many origin stones. It was very likely that he would be too greedy and might even have a certain impact on his advancement to the spiritual Emperor realm!

Of course, this was only a guess. For Tang Zhen, who was rich and could completely master a law skill once it was lit up, advancing to the spirit Emperor realm wasn't an unsolvable problem.

Cultivating and comprehending, hunting law level monsters, or finding a shortcut through the phone, all of these might be able to help Tang Zhen step into the spirit Emperor realm!

Compared to ordinary cultivators in loucheng, Tang Zhen had more than one way. If those law Kings who had no way to advance knew about this, they would definitely be extremely envious!

[Chapter 1299](#)

1299 Invasion of the Wizards

Tang Zhen closed his door and bitterly cultivated in an attempt to deal with the powerful enemy that was about to attack. He did not dare to relax for even a moment.

As the Holy Dragon city's residents leveled up, their strength rose like a rocket. At the same time, under the secret order, they quietly began to prepare for battle!

The enemies who were eyeing the space TOWER did not take any action for the time being, but one thing was certain, they would not let this go!

As for Arel and his mother, they should be safe and sound for a short period of time. After all, this was the trump card they used to threaten Tang Zhen. How would they dare to hurt them easily?

At the same time, the sorcerers world, which had been coveting the world of loucheng for a long time, had also entered the general mobilization for war. The entire fifth continent ring was in a state of turmoil.

Overnight, more than half of the Wizards and Knights on the fifth ring were notified that they had to go to the center of the fifth ring within three months.

They would be reorganized and armed there, and when the time came, they would immediately cross the passage and start the invasion of the tower world.

Those who didn't arrive in time would be severely punished!

No one dared to ignore the call for war issued by all the top Wizards in the fifth ring. They made preparations in the shortest time possible and headed straight to the center of the ring.

Wizards and apprentices, fully-armed Knights and servants could be seen hurrying along the road. The short-distance teleportation circle on the fifth continent ring was also constantly sending batches of summoned people to their designated locations.

The central area of the fifth continent ring was now crowded with Wizards and Knights, and temporary tents were set up everywhere.

In addition to these Wizards and Knights, there were also countless ordinary people in charge of logistics and miscellaneous things.

In order to deal with this invasion, the high-level Wizards of the fifth continent ring took out all their savings and set up a point system to reward wizard Knights who bravely killed the enemy on the battlefield.

Naturally, the myriad world mall was involved in this matter. In fact, cultivators from the mall had appeared in the current command camp. Of course, only a few people knew their true identities.

As the deadline approached, more and more people gathered there. It was impossible to count the exact number, and there were only dense figures as far as the eye could see.

However, in this huge camp, there was a huge open space that no one was close to. Several huge stone pillars covered with mysterious runes stood tall.

There was a huge vortex between the stone pillars, with a diameter of several hundred meters. The dark-colored energy ball was shrinking inward, but the rich spatial energy was constantly spreading out.

There were close to a hundred powerful Magi guarding the area, and anyone who dared to approach without permission would be expelled or even killed. From this, one could see the importance of this place!

Under everyone's anticipation, the day of the teleportation finally arrived.

The blood-eyed Magus and the rest looked down from above and waved their arms at the Sorcerer-Knights that covered the entire mountain. Immediately after, a tsunami-like roar sounded.

As far as the eye could see, the vast wilderness was filled with neat squadrons. Wizards and Knights were mixed together, and with the addition of elite warriors sent by the various royal families, they looked majestic.

In order to adapt to the needs of war, even magi were equipped with armor and even a large number of specialized weapons, looking very powerful.

Under this spectacular formation, even World Energy was drawn in, and in the blink of an eye, the weather changed!

In addition, there were also a large number of ferocious-looking monsters that were ready to move, but because of the existence of Beastmasters, they did not dare to be too presumptuous.

These wizard Knights were just regular combat forces, and the true elites had not yet been revealed. Obviously, they would not teleport at the same time as the main Army, so they could not display the true strength of the elites.

The division of strength in the Magus continent was similar to that in the world of Loucheng. After rank 6, there was a dividing line. After rank 10, one would become a King or a Saint. Cultivators at the level of the blood-eyed Magus were already considered to be at the top of the hierarchy!

The so-called elite sorcerers were actually equivalent to Lord-ranked rank 6 sorcerers. Each of them was powerful and could dominate a region in the Sorcerer world.

Under everyone's watchful eyes, the blood-eyed Magus stood in the air and waved his hand to shoot out a pillar of energy. The swirling vortex between the stone pillars gradually revealed a completely different world, as if the fog had been removed.

everyone, listen up! The target is the world of Loucheng. Set off!

As soon as he finished speaking, a tsunami-like roar rang out. The Army moved at the same time, and even the earth trembled!

"Kill! Kill! Kill!"

Huge square formations stepped into the transmission channel. In the sky above them, groups of Griffin cavalrymen whistled and rushed into the world of towers!

.....

Somewhere in the spiritual ruins war zone, Death Valley.

Several cultivators of loucheng city, who were covered in black cloaks, stood quietly, looking at the vast open space in front of them.

Not far from them, there were some bodies of wild cultivators lying on the ground. They had accidentally barged in and saw something they shouldn't have seen, which was why they had lost their lives in confusion.

This was a world where the strong preyed on the weak, and it was far crueler than one could imagine.

"It's almost time, why isn't he here yet?"

"Don't worry, just wait patiently!"

The two tightly-wrapped cultivators had just muttered a few words and suddenly stopped talking. Because in the open space in front of them, a huge teleportation gate suddenly appeared, and then the Sorcerer world's Army spread out like a tide.

"We're here. Put down the things and we'll evacuate immediately!"

The leader of the cultivators from Lou Cheng ordered and threw out a fireball, burning a pile of branches in front of him. Thick smoke rose into the sky.

After the cultivators left, a few Wizards quickly arrived. They first put out the fire and then quickly took away the items that had been placed there in advance.

By the time the Wizards returned to the portal, countless wizard Knights had already passed through the portal. The sound of weapons clashing and the roar of war beasts could be heard.

Dozens of Golden Griffins had already scattered in all directions. Under the control of Grand Knights in light armor, they were responsible for scouting the surrounding terrain and capturing the tongues that provided information.

The blood-eyed cultivator was standing in the middle of the camp, silently looking at the items brought back by the Magi.

This was a detailed map, and the locations of all the buildings in the spirit ruins Warzone were marked on it. Except for the central region, almost no place was left out.

To be able to draw such a detailed map, there were only a handful of forces in the entire spirit ruins Warzone!

After searching around the map, the blood-eyed Magus suddenly looked at a corner of the map, and a cold light flashed in his eyes.

"Tang Zhen of Holy Dragon City, I look forward to meeting you again!"

As soon as he finished speaking, the blood-eyed Magus laughed towards the sky. His voice was filled with madness and arrogance!

[Chapter 1300](#)

1300 The front line _1

In just one night, the battle zone of the spiritual ruins was filled with Flames of War, and towers were broken through and destroyed one after another!

In order to invade the world of loucheng, the fifth ring of the continent had been preparing for many years. With the addition of strong troops and horses, they had the advantage on the battlefield.

Since the start of the war, the Sorcerer world's Army was like a hot knife through butter. There were not many towers that could resist them. After a fierce battle, countless people died in the towers and fled!

The cultivators who were lucky enough to survive the chase all turned to the nearby high-level buildings for help, hoping that they could send troops for revenge.

Although the lower-class buildings in the spiritual ruins Warzone seemed to be independent, they were all inextricably linked to the higher-class buildings. Therefore, when these lower-class buildings were attacked, the higher-class buildings naturally couldn't just stand by and watch. They all gathered a large number of cultivators to stop them.

Unfortunately, they were like moths to a flame. They were constantly annihilated by the wizard Legion. After many bloody battles, not only did they not stop the invading enemies, but they also made the wizard Legion's attack more fierce.

In order to avoid losses, some of the low-level towers actually abandoned the city and fled before the Magus Army arrived. This way, the enemy was able to take down the entire tower easily and transform it into a fortress with iron walls.

With these heavily guarded fortresses, the wizard Army's control over the occupied area became stronger. Any suspicious target would be captured and killed, making the entire occupied area like a ghost's domain. There were very few people moving around in the day.

The situation was critical, and news of the battle quickly spread throughout the entire spiritual ruins Warzone. All the city Lords finally realized the seriousness of the matter.

At the same time, the main control platform of the battle zone of the spirit ruins had completely shut down the foreign world invasion mission. The cornerstone platforms of the various buildings were constantly cleaning up the defense missions. All the buildings in the battle zone were ordered to participate in the operation, vowing to annihilate and drive away all the invading wizard legions!

In order to motivate the cultivators in loucheng, precious resources that were rarely seen on normal days also appeared on the exchange list on the platform. As long as one had enough points, they could freely exchange for them.

As the command from the main control platform was issued, the entire spiritual ruins Warzone entered a state of war. Teams of cultivators who had accepted the mission of driving the enemy away rushed to the front line, and fierce fighting could happen at any time.

However, as the war progressed, bad news came one after another.

On the skeleton plain, 300000 loucheng cultivators fought against the number one Legion of the Sorcerer world with more than 500000 people. Under the situation where the enemy was stronger than them, the loucheng cultivators finally suffered a crushing defeat. After a great battle, corpses were strewn all over the ground, and blood had gathered into a River!

The victorious First Legion of the Sorcerer world pursued and destroyed more than 70 towers, big and small, and a large area was completely occupied.

In the giant tree Canyon, more than 100000 Lou Cheng cultivators were ambushed. After a bloody battle, they were all killed by the third Legion of the Sorcerer world. Not a single cultivator survived!

The Silver Moon Lake was enshrouded in mist.

Black Desert centipede

Battle reports kept appearing on the cornerstone platform, but without exception, all of them were about the cultivators of Lou Cheng suffering a crushing defeat. The few victories they had were only because they had the advantage of numbers and annihilated a few small groups of enemy troops.

Anyone with eyes could tell that Lou Cheng's cultivators were at a complete disadvantage. If this situation continued, it would not take long for a large area of land to be completely controlled by the wizard Army!

Once the Magus Army's rear was stabilized, they would gain a greater advantage. At that time, they would have to pay a huge price to drive them away!

In fact, the war had only just begun. If it really reached a critical moment, not only would the continent-level City Tower in the spiritual ruins battlefield personally participate in the war, but they might even call for help from other battlefields. In short, they could not let the tragedy in the wilderness Battlefield repeat itself!

In this regard, the main control platform of the wilderness Warzone was really a failure. It was not until the entire Warzone was destroyed that the continent-level loucheng of other warzones cleaned up the mess. The real purpose was to divide the surviving cultivators of the loucheng.

From this point, it could be seen that the major battle zones were not United!

Perhaps the Magus Army also knew that they could not rush things, so after taking control of a large piece of land, they gradually slowed down their attack momentum. While they wantonly plundered all kinds of resources in the battle zone of the spirit ruins, they also actively collected information to prepare for the next large-scale attack!

At the same time, the cultivators from the various skyscrapers that were forcibly recruited by the cornerstone platform began to gather towards the enemy-occupied area. It was unknown if it was a coincidence, but the frontline of the battle between the two sides was actually less than two hundred miles away from the Holy Dragon City!

In this way, the Holy Dragon City had become the frontline of the confrontation with the wizard Legion. Every day, there was a steady stream of cultivators coming to the city and directly stationed in the outer area of the Holy Dragon City.

Holy Dragon City was crowded with people. Temporary tents were set up everywhere, and it was really lively.

Although the war was intense, the rights and interests of the City Tower were still inviolable. Without the permission of the city Lord, no outsider was allowed to enter the Main City of Holy Dragon City.

It was the same even for a continent-level city. Unless they used their strength to intimidate the Holy Dragon City, forcing them to swallow their anger, they would have to set up camp outside.

Among the many cultivators in the city, it was inevitable that there would be those who wanted to take advantage of the Holy Dragon City and even force people to buy and sell in the market.

Whenever such cultivators appeared, the Holy Dragon City would kill them on the spot without any hesitation. At most, they would kill more than three hundred cultivators in the city at one time. Only then would those ignorant guys settle down.

Especially after Tang Zhen and blood River King showed their faces, the cultivators from the City Tower, who were originally waiting for an opportunity to take revenge, immediately became obedient. Never in their dreams would they have thought that there would be two law Kings in this strange-looking level nine city!

That's right, because the main control platform of the wilderness Warzone had lost its official qualifications, even though Holy Dragon City had been secretly promoted to a national level, it still looked like a level nine city on the outside.

After the tower was upgraded to a national level, it could also suppress foreign cultivators with the power of laws, making them unable to exert their full combat power. This was also a special defensive ability of the National tower.

It was a pity that the Holy Dragon City was not part of the spiritual ruins Warzone, and it was determined to be a level 9 city, so it naturally could not have this privilege.

The reason why the cultivators of the spiritual ruins Warzone treated the Holy Dragon City as a level nine city was not only because of its appearance, but also because of the suppression of the power of law.

In fact, throughout the entire history of the tower world, special circumstances like the one in Holy Dragon City were extremely rare. It was the first time that such a situation had occurred in the spiritual ruins Warzone. Unless Holy Dragon City was destroyed, the main control platform here would not be able to do anything to Holy Dragon City!

After displaying their strength, the foreign cultivators finally became well-behaved and set up camp outside in an orderly manner. From time to time, they would enter the trading market to buy some of the various stored goods that the Holy Dragon City had taken the opportunity to sell.

Taking advantage of this opportunity, the Holy Dragon City had earned a huge sum of money!
