

## Alternate 1401

### [Chapter 1401](#)

1401 An unexpected way of meeting (1)

Seeing that Blood River King and dream city Lord, who was suspected to be a law King, had joined the battle, Tang Zhen naturally wouldn't just watch from the side. As balls of flames rose beside him, countless flame Knights whizzed out and engaged in a battle with Dream Crusher.

These flame Knights were wearing armor and brandishing their sabers. The war horses they were riding were made of pure flames, and everywhere they stepped on was scorched black.

The flaming saber and dream Crusher collided, and a large ball of flames exploded, turning Dream Crusher into a wreckage.

Then, a large amount of water mist appeared. Giant Ice Wolves roared and pounced on the nearby Dream Crusher with a ferocious look.

Once the enemy was bitten, they would instantly turn into ice sculptures and shatter.

After that, there were rock giants, mottled ancient trees, and giant lightning Eagles that flickered with lightning. They continuously appeared around Tang Zhen and killed the dream Crusher until his blood flowed like a river.

On this kind of tragic battlefield, Tang Zhen alone was comparable to a thousand troops!

Although Blood River King and the others knew that Tang Zhen's strength was extraordinary, they did not expect him to be so powerful to this extent. From the methods he used, it could be seen that he had clearly comprehended more than one power of law.

Moreover, Lord Blood River already knew that Tang Zhen was only a clone. His main body had long advanced to the spiritual Emperor realm and was refining the Holy Dragon City day and night.

However, in such a short period of time, he had raised his clone to this level, and at the same time, he had comprehended more than one kind of law power. Such a person was simply monstrous!

Although he could not compare to Tang Zhen in terms of cultivation base, when he thought about how he was Tang Zhen's subordinate and would have the opportunity to build his own city in the future, Blood River King hoped that Tang Zhen would become as strong as possible.

As for the dream city Master, who was madly venting his anger, he cast a strange look at Tang Zhen and helplessly shook his head.

With the ability to travel through time, no one would know what the dream city Master had seen in the future if he didn't tell them.

The battle between the two sides became more and more intense. However, with the addition of the creatures of law, the situation suddenly changed.

As they were formed from pure nomological power, the strength of these magical creatures far exceeded that of ordinary cultivators. After they joined the Holy Dragon city's camp, the cultivators in

Lou city were like tigers with wings. Even though they were far fewer in number than the dream shatterers, they still had the upper hand.

Many cultivators in Loucheng city had been killed, but even more Dream Crusher had been killed. The area of the circular pillar was now covered with wreckage, completely covering the ground.

Tang Zhen glanced at the metal pillar that trapped everyone in the surroundings. He casually waved his hand and hundreds of streams of light flew over from the distance. They were as fast as lightning as they collided with the metal pillar.

A series of violent collision sounds rang out, and the light screen outside the metal pillar trembled violently before shattering in an instant.

The streams of light that followed struck the metal cylinder in succession, cutting it into pieces, and the debris fell to the ground.

“BOOM!”

In the blink of an eye, the metal pillar that was as large as a skyscraper was quickly cut off and fell to the ground.

As the metal pillar broke, the protective light curtain could not be reconstructed. The transmigrators who had been waiting outside took the opportunity to rush out and attack the dream Crusher from the ground.

Although their strength was far inferior to these Dream Chasers, their weapons were sharp and they had the advantage in numbers. They managed to contain the attacks of the dream Chasers and reduced the pressure on the cultivators in Lou Cheng.

Tang Zhen waved his hand and killed a group of machine-like dream Crusher. He was just about to equip himself and continue his attack when he suddenly felt an unusual aura.

The aura came so suddenly as if it was deliberately reminding Tang Zhen that this place was unusual.

Frowning slightly, Tang Zhen turned around to look at the building remains at the side before he hurriedly rushed in.

The exterior of the building looked extremely ordinary. However, when Tang Zhen approached it, the strange aura appeared once again, immediately connecting Tang Zhen with the mutation source.

Although there were many doubts in his heart, Tang Zhen would definitely not let go of this fleeting opportunity. Even if it was a Dragon's pool or a Tiger's Den, he would still want to charge in.

With a wave of his hand, half of the wall in front of him was pulled away by an invisible hand. Then, a deep underground passage appeared in front of him, and he could vaguely see green water rippling.

As he stepped into it, the stinky sewage under his feet automatically dispersed, opening up a path that was enough for people to pass through.

This underground passage had long been filled with sewage. As Tang Zhen moved forward, the sewage was constantly pushed away by his spiritual force. During this period, there was not a single bit of sewage on his clothes and armor.

After moving forward for a few hundred meters, Tang Zhen came to an underground parking lot. This place was also filled with sewage and countless debris floated in it. As Tang Zhen continued to move forward, a large number of skeletons continued to roll with the water.

On the muddy ground, a hole with a diameter of more than ten meters appeared in front of him. It led deep into the ground, and there was a faint flash of light.

Tang Zhen walked to the entrance of the cave. He squatted down and checked it before a trace of a cold smile appeared on the corner of his mouth.

This thing that looked like a stream of water was actually just on the surface. It was more like the material that formed the plane's channel.

If he was not wrong, this place should lead to a special space, similar to a special small world.

Tang Zhen leaped and headed straight to the bottom of the cave. During this period of time, he discovered that it was indeed as he had guessed. This place was not some deep underground pool.

However, after a dozen seconds, the water around Tang Zhen had disappeared. Immediately after, his feet stepped on the soft grass.

It was different from The Dark World he had imagined. This was a world full of dreamy colors. The sun was bright, and the air was filled with an alluring fragrance.

Tang Zhen could not help but be startled when he saw the surrounding scenery. This was because he had seen a similar scene before.

The scenery in dream city was exactly the same as here!

Melodious music was suddenly transmitted from the front just as Tang Zhen was feeling amazed. Soon after, a long red carpet appeared under his feet. Hundreds of flowers bloomed in the surroundings and there were even dazzling fireworks that continuously flashed in the sky.

"Esteemed guest, please follow me!"

A tall and beautiful lady in a maid's uniform appeared in front of Tang Zhen and invited him with a smile.

The woman had a good figure. Her legs were long and straight, and her long black hair was soft and smooth. Her smile was extremely sweet.

Tang Zhen could not help but be a little absent-minded when he saw the lady's appearance. He did not know why, but he kept feeling that the lady's appearance and figure were extremely pleasing to the eye. It seemed that she was the type that he liked most.

The most important thing was that the other party wasn't an illusion. Instead, it was a life with flesh and blood. Tang Zhen would definitely not be wrong about this.

This origin mutation was obviously up to something. It had actually set up such a welcoming scene. Only the heavens knew what it was planning to do.

Many thoughts flashed across Tang Zhen's mind. He gently nodded and slowly followed behind the lady.

The castle was not far from Tang Zhen's location. After passing through the red carpet that was surrounded by exotic flowers and plants, Tang Zhen saw a group of beautiful women dressed in the same clothes standing in front of the castle and bowing to him.

"Welcome, city Lord Tang Zhen!"

The corner of Tang Zhen's mouth twitched slightly. He swept his gaze over the castle's main door, where music was being emitted unceasingly. Tang Zhen stepped into it under the gazes of a group of beautiful women.

After walking two rounds around the castle that was filled with rare treasures, a huge dining room appeared in front of Tang Zhen. It was filled with a luxurious atmosphere and the long dining table was filled with delicacies.

A tall and beautiful woman was currently sitting at the dining table. She was looking at Tang Zhen with a smile. Clearly, she was the owner of this place.

...

"City Lord Tang Zhen, please sit!"

Tang Zhen sat on a chair that was pulled out by a maid. He looked at the lady opposite him and said in an indifferent voice, "It's obviously not suitable for us to meet in such a place. I wonder what your Excellency wants?"

The stunning woman on the opposite side looked at Tang Zhen and softly laughed, "I want to make peace with you. What do you think?"

## [Chapter 1402](#)

### 1402 The conditions for the origin of mutation (1)

"Make peace?"

Tang Zhen laughed softly. He sized up the beautiful lady who was smiling and looking at him.

It was wearing a translucent black gauze dress, which was a strong contrast to its snow-white skin. Its lively eyes were full of light, and its full red lips were crystal clear.

Only the heavens knew what the mutation source was thinking. It had actually transformed into such a charming figure and was constantly emitting a soul-stealing charm. If an ordinary person saw it, they would have long been enchanted.

After exchanging glances with the stunning woman, Tang Zhen spread out his hands and said, "If that's the case, it's actually a good thing. At least my city's residents will have fewer casualties."

In fact, in the beginning, Tang Zhen had planned to mobilize enough cultivators to investigate the specific situation of Zhonggong city before launching a general attack.

Unfortunately, the mutation source did not provide such an opportunity. As soon as the dream world shattered, it immediately set up a plane barrier, forcing Tang Zhen to launch an attack in a hurry.

Without sufficient preparation for war, and with the entire world sealed off, Tang Zhen would not be able to escape unless he defeated the mutation source.

However, according to the information obtained by Tang Zhen, the mutation source controlled more than One World. Although the dream world's losses were not small, they were nothing to the mutation source.

The enemy was still powerful, but the Holy Dragon City was heavily restricted. Under such circumstances, if the Holy Dragon City wanted to win, they would have to pay a heavy price.

However, if they failed, the Holy Dragon City would suffer a great loss. Not only would they lose the lives of tens of thousands of cultivators, but they would also lose nearly ten million transmigrators. Just thinking about it made one's heart jump.

Since the construction of the tower, Tang Zhen had never suffered such heavy losses. Therefore, he would naturally try to avoid it as much as possible.

Tang Zhen's original intention of entering the dream world was to figure out the secrets of the dream notebook and obtain the world's origin. Now that the dream Tower had been rescued, Tang Zhen's gains had far exceeded his initial expectations. What more was there to be dissatisfied about?

After hearing Tang Zhen's reply, the peerless beauty on the opposite side revealed a smile and said, "I knew city Lord Tang would choose to make peace. After all, it's for the best for both of us!"

"You're pretty confident."

Tang Zhen coldly laughed as he said to the stunning woman, if that's the case, please remove the plane barrier so that it'll be easier for us to evacuate.

The stunning woman transformed from the mutation source laughed and said, "There's no hurry. I actually still have a few questions I'd like to ask city Lord Tang,"

"Oh, please speak. This Tang will definitely tell you everything he knows."

"Actually, it's nothing. I'm just curious about the way Lou Cheng obtained the world's origin. I wonder if I can imitate it?"

Tang Zhen was stunned when he heard this. He glanced at the mutation source and asked in a puzzled tone, "From what I know, you control more than One World. Is this Origin Energy not enough?"

hehehe, city Lord Tang is really interesting. Who would complain about having too many of these things? "

Tang Zhen laughed, " that's true. However, I might not be able to help you with this matter. You should know that there are many harsh conditions involved. It's definitely not something that you can do just because you want to. At the very least, you definitely can't do it!

The beautiful woman nodded and said softly, " "I know. You need to build a tower and a foundation stone platform, right?"

"You know quite a lot, don't you?"

of course, why do you think I lured the dream city here? it was to figure out the specific operation method.

Tang Zhen was stunned when he heard this. He glanced at the beautiful woman opposite him. He didn't expect that the plane coordinates obtained by the dream Tower were actually given by the mutation source on purpose. It had used a complete world as a trap to study the operation of the tower.

As expected of the world's origin that had awakened its own consciousness, it did things unscrupulously. In order to achieve its own goal, it actually used billions of living beings as experimental subjects!

Perhaps in this guy's eyes, those living beings were even worse than ants.

if that's the case, then the layout here must have been modeled after the dream Tower, right? I was wondering why it looked exactly the same.

of course, good things should be enjoyed. Although the strength of this dream city is average, the scenery here is quite good. It's especially comfortable to stay here.

The stunning woman laughed. She pointed at the beautiful female servant beside Tang Zhen and said, this should be your favorite type, right? I'll give it to you. I guarantee that you'll listen to everything I say and do whatever you want!

The corner of Tang Zhen's mouth twitched when he heard this. He coldly said,"I believe that Your Excellency already knows that I can not help you in this matter, so please let us through as soon as possible!"

"Who said you can't help me? as far as I know, city Lord Tang is preparing to build a war zone, right?"

Tang Zhen gently nodded his head. A trace of doubt flashed across his heart. This mutation source seemed to know too much.

"We are indeed preparing to build a war zone, but so what?"

in this case, there will definitely be many buildings in the new Warzone. I also want to build one for fun. I wonder if Lord city Lord will allow it? "

After saying this, the beautiful woman stood up and slowly walked to a chair not far from Tang Zhen. She sat down and said with a slightly excited tone, as long as I have a tower that belongs to me, I can obtain the origin of the world as I please. I won't be locked up in a prison like this. It's so boring.

Her quick-witted eyes swept over Tang Zhen. The absolute beauty appeared to be very obedient, don't worry. The world's origin that should be handed over will definitely not be a single cent less. I will also abide by the rules that should be followed. I will definitely not cause any trouble for city Lord Tang!

"Promise me, this will be good for both of us!"

Tang Zhen fell into deep thought after hearing the words of the beautiful woman. A moment later, his eyes revealed a bright light as though he had thought of something.

"If I'm not wrong, you've met the dream city Master more than once, right?"

The beautiful woman looked impressed. city Lord Tang is indeed smart. We've met a few times in the past. However, that guy is very annoying. I don't like him!

Tang Zhen nodded. In this way, many things could be explained.

With the mutated Origin's ability, if it wanted to destroy the dream Tower, it might not need to go through so much trouble. However, the dream Tower had been safe for hundreds of years and was finally rescued by Tang Zhen.

He originally thought that the enemy was too weak, but now it seemed that the mutation source had done this on purpose. Its purpose was to wait for Tang Zhen to take the bait.

Tang Zhen would never believe that the dream city Master did not know about this. Perhaps he had told the mutated origin about what might happen in the future, which led to the current plan.

However, it was obviously impossible for these two to set a trap for him. The dream city Master clearly knew the severity of this matter and would not dare to act rashly.

As for the origin of mutation wanting to join the war zone, it was actually not a bad thing. With its ability, it should be easy for it to upgrade the tower. After all, it had the support of several worlds behind it. At the very least, it would not lack resources and manpower.

The world of loucheng accommodated thousands of races, and existences like the origin of mutation were not rare. There were even more rare ones.

Moreover, after joining the war zone, the mutated origin would have to act according to the rules of the war zone. Unless Tang Zhen gave the other party the highest authority in the war zone, they could forget about turning the world upside down.

Tang Zhen did not hesitate when he thought of this. He nodded at the mutation source.

"If that's the case, then I welcome you to join us."

you're awesome! the beautiful woman snapped her fingers. I'm starting to like you!

The corner of Tang Zhen's mouth twitched again. At the same time, he laughed.

...

## [Chapter 1403](#)

1403 Leaving the dream world\_

Tang Zhen had an indescribable feeling of awkwardness in his heart when he heard the words “mutation source.”

Through his earlier judgment, this mutated origin was clearly an expert that was on par with a spirit Emperor. Although it might not be as good as Tang Zhen in terms of techniques, it had a unique advantage.

In a situation where he was able to freely control the origin Energy, this fellow was simply an existence that had cheated. Just his means of being able to casually create living creatures was definitely not something that Tang Zhen could compare with.

The peerless beauty in front of him was clearly a transformation of the mutation source. However, it was definitely not its true body. Tang Zhen did not believe that this cunning fellow would expose himself so easily.

The origin of the mutation that had developed its own consciousness had a way of thinking that no one could understand. This also led to its strange behavior, which was very different from that of ordinary people. Therefore, Tang Zhen would subconsciously choose to block its crazy words.

It was obviously impossible to have a good chat with this guy.

In his heart, Tang Zhen subconsciously felt a little repulsed by this fellow who treated human lives like dirt.

Since both parties had already reached an agreement on the conditions for a truce, there was no need to continue staying here. Tang Zhen stood up and prepared to leave.

city Lord, remember to leave me a top-grade building foundation stone. I don't want it if it's too bad!

When Tang Zhen stood up, the mutation source reminded him with an expression that said “I know this very well.”

there is a limited number of top-grade foundation stones for the tower. I don't have many of them now. If you want them, you can only wait for a while. If you are in a hurry, there are still a few foundation stones with good attributes to use.

in that case, an ordinary building foundation will do. I don't have the patience to wait!

The stunning woman nodded. Soon after, she pointed at the female servant behind Tang Zhen and said, “She's already yours. Remember to take her with you!”

The female servant smiled at Tang Zhen when she heard this. Clearly, she was extremely gentle.

“Why would I bring her back? no!”

Tang Zhen coldly replied before turning around and walking out of the castle.

When the little maidservant heard this, she immediately revealed an aggrieved expression. Soon after, she was like a little wife who had been bullied as she followed closely behind Tang Zhen.

“I say, what are you trying to do?”

Tang Zhen helplessly stopped his footsteps. He glanced at the cowering little maid and spoke to the mutation source.

“Please don’t misunderstand, Mayor Tang. I asked her to go back with you to make it easier for me to deal with the construction of the tower. After all, it’s not convenient for me to stay at your place all the time because of my special identity.”

When she said this, the stunning woman smiled tenderly at Tang Zhen, “Of course, this is only a secondary job. Her main task is to serve you, pour tea for you, warm your bed, or give birth to a child.

You might not know this, but in order to shape her, I collected countless samples and consumed a lot of Origin Energy. She is definitely the best of the best!”

Tang Zhen’s face was filled with black lines when he heard this. He really had no interest in continuing the conversation with this mutation source that did not speak properly.

However, the mutated Origin’s words made sense. After returning to Holy Dragon City, he could immediately arrange for the construction of the tower. With the other party’s subordinates by his side, it would be much more convenient to deal with things.

Just as he was about to nod in agreement, the stunning woman said, “ city Lord tang can tell her all the materials needed for the construction of the tower. She can make the decisions on my behalf. After the construction of the tower, she can also replace me as the city Lord!

Tang Zhen did not say anything more when he heard this. He walked out of the door.

The little maid was all smiles as she hurriedly chased after Tang Zhen. The sound of her light footsteps reverberated in the castle.

After leaving the castle, the surrounding scenery began to fade away, and finally, only a passage remained in front of the two.

Tang Zhen and his partner walked out of a light door and appeared on the battlefield above ground. The original underground tunnel had already disappeared without a trace.

The dream city Master had once used a similar method. After leaving this half-real, half-fake illusion, unless someone was in charge of guiding them, they would never be able to return to their original place.

Perhaps they had received an order from the mutation source, but the dream shatterers who only knew how to kill had disappeared. Only the Holy Dragon City cultivators were left to clean up the battlefield.

Tang Zhen could not help but be secretly shocked when he glanced at the number of cultivators left. In just a short tens of minutes, at least thirty thousand cultivators had died in battle.

If this war continued, it would probably not take long for all the cultivators in Holy Dragon City to die. At that time, the situation of the war would be extremely unfavorable for Holy Dragon City.

Fortunately, the two sides had already stopped fighting and reached an agreement. The plane barrier was closed, and the cultivators who had died in the city returned to Holy Dragon City, back to their original bodies.

The transmigrators who died in the battle had also left, and they would leave forever. After returning to their original world, the transmission channel between the two worlds would be completely closed, and the dream world would become the eternal memory of the transmigrators who participated in the war.

“City Lord, what did you just do?”

Blood River King and the others stepped forward and asked after seeing Tang Zhen. It was obvious that they had already discovered Tang Zhen’s disappearance.

In fact, after Tang Zhen entered the underground passage, there were cultivators from Lou Cheng who immediately followed him to protect him. However, no one expected that the passage would suddenly disappear after Tang Zhen entered. The cultivators tried their best to enter but couldn’t. In the end, they could only helplessly give up.

Everyone quietly heaved a sigh of relief when they saw Tang Zhen return safely.

As for the little female servant behind Tang Zhen, everyone merely glanced at her curiously. No one asked anything.

“I just met with the mutated origin. The matter has been resolved, and it is preparing to join our battle zone. The person beside me is the envoy sent by the mutated origin.”

Tang Zhen introduced the little maid behind him to everyone. During this time, he indifferently glanced at the dream city Master.

Dream city Master smiled bitterly when she saw this and sent an apologetic look to Tang Zhen. Clearly, she had already guessed that Tang Zhen knew about some hidden matters. Although she wanted to explain it to Tang Zhen, it was clearly not the right time.

“I’m Xiaomei, please take care of me!”

The maidservant smiled and bowed to everyone, then stood to the side without saying anything.

Everyone nodded. They could not help but be a little wary of the messenger sent by the mutation origin. get ready. We’ll return to Holy Dragon City as soon as possible. As for these weapons and equipment, we’ll bring them back together. It’ll be just right for the immigrants in The Hunting Ground to use. It’ll also save us the effort of forging them!

Tang Zhen began to prepare for the evacuation after taking a breath of the original mutation source.

After a few hours, the Holy Dragon City cultivators began to leave the dream world one by one. After the last person had left, this abandoned world once again fell into a dead silence.

It was unknown how much time had passed when the sound of light footsteps was heard from the wasteland. The peerless beauty who had met Tang Zhen earlier was slowly walking among the ruins. Her face was filled with an intoxicated expression as she looked at the surrounding broken walls.

“It’s so beautiful. This silent wasteland world is my favorite place.

It’s such a wonderful feeling to see it being built from nothing and then destroyed at its most glorious moment!”

The mutated origin murmured in its sleep. It looked like a child who had just gotten his favorite toy and was dancing among the ruins.

In the empty world, its laughter seemed to be constantly echoing, but this bell-like laughter gave people a faint feeling of gloominess and horror.

...

#### [Chapter 1404](#)

##### 1404 The means of the origin of mutation (1)

After returning to the Holy Dragon City, Tang Zhen was busy once again.

The end of the war in dream world not only meant that the Holy Dragon City had once again obtained a large amount of the world's origin, which reduced the disadvantages of fighting on multiple fronts, but they had also recruited two powerful assistants, which was extremely beneficial to the early development of the Holy Dragon Warzone.

Tang Zhen was naturally extremely satisfied with these two towers that he had obtained by chance.

After the construction of the mutated origin tower, it would have greater potential than the Holy Dragon City. After all, it had the support of several worlds behind it, and there was no lack of resources and manpower.

One thing was for sure. In order to quickly upgrade the level of the building, the rich mutated origin would definitely spend a lot of resources. This was the advantage of players who paid money. Ordinary buildings were definitely not comparable to this.

He believed that it would not take long for the mutated origin loucheng to be upgraded to a national level and become a major combat force in the new battle zone.

As for the dream Tower, it was a purely old-school tower with a history of more than a thousand years. If it had not failed miserably and encountered the sinister variant origin, it might have been upgraded to a continent-level tower by now!

Although his strength had been greatly reduced after being sealed for hundreds of years, his original foundation was still there. As long as he recuperated for a while, he could completely recover.

Therefore, compared to the world's origin that they had plundered in the war, these two towers were the biggest gains!

Tapping twice on the office table, Tang Zhen pointed at the holographic screen in front of him and said, these are the foundation stones you can choose from. Which one is suitable? I'll ask someone to prepare it for you!

When the maid Xiao Mei, who was standing by the side, heard this, she hurriedly walked in front of Tang Zhen and began to seriously choose.

Unlike the Holy Dragon City, which was in the dark when it was first built, after a large amount of data analysis by the building's scientific researchers and various auxiliary means of identification, the Holy

Dragon City could make a rough assessment of the building's foundation that had not been used, with an accuracy rate of up to 80%.

This was definitely a great thing, as it could save a lot of detours for the construction of the towers in the war zone. In the 3000 war zones, there were only a few who had mastered this technology.

There were more than 30 cornerstones displayed on the holographic screen, all of which were carefully selected and more than enough to build a new city.

The maid, Xiaomei, looked at it very seriously. From time to time, she would smile and ask Tang Zhen to help her choose one.

you have enough resources to support you. In this way, there won't be too many requirements for the attributes of the foundation stones of the building. These foundation stones should be able to do it.

Speaking up to this point, Tang Zhen pointed to a building foundation stone on the holographic screen and said, this building's Foundation is called ring city. It looks like a huge ring-shaped building, and it's lifted off the ground by nine giant pillars. Its main attribute should be physique enhancement, which should be very useful for you guys, "

Xiaomei listened attentively. After Tang Zhen finished speaking, she nodded affirmatively and said, "Then we'll choose this foundation stone. City Lord, when can we build the city?"

anytime. Also, I want to remind you that before Lou Cheng is promoted to a national level, the number of residents entering the war zone can not exceed one million. The interdimensional teleportation array will also be monitored. Don't play any tricks!

city Lord, don't worry. We sincerely want to build a city. We won't cause any trouble!

Little Mei smiled sweetly and raised her hand to guarantee Tang Zhen. She seemed to be afraid that Tang Zhen would not believe her and added, besides, this is the city Lord's territory. It's even more so after we became residents of the tower. If we dare to cause trouble, you definitely won't let us off!

Tang Zhen nodded his head. This mutation source's cultivation was similar to his own. However, if they were to really fight, it would definitely be the one to die in the end.

As for the worlds it controlled, they were all low-energy planes and could not pose a threat to Holy Dragon City at all.

If the mutation source really dared to play tricks, Tang Zhen would definitely dig three feet deep to drag this guy out and kill him even if he had to risk his previous tempering progress!

it's good that you know. Since you've already chosen this foundation stone, then contact your master and build a plane channel to transport the materials. As for the location of the tower City, we'll set it here for the time being!

Tang Zhen extended his hand and pointed on the map. It was a plain area several hundred kilometers away from the Holy Dragon City.

As the order was issued, the area selected by Tang Zhen immediately became lively. First, there was an Army of tens of thousands of people stationed nearby. Then, a large number of engineers arrived and worked overtime to build the interdimensional teleportation array.

At the same time, in the world controlled by the origin of mutation, the troublemaker began to stir up trouble again. This time, its target was a planet similar to the original world.

It was just a nap, and the world had changed dramatically. Some monsters appeared out of nowhere and launched attacks on the populated places one after another.

While they were panicking, some ordinary people began to feel the abnormality in their bodies. They suddenly found that their strength had increased sharply, their movements were agile, and their minds were clearer.

Due to the strengthening of their physical fitness, these self-proclaimed awakened ones began to show off their abilities. They killed a large number of monsters and gained the worship and support of the people.

Compared to ordinary people, these awakened ones had a higher chance of survival in the face of disasters. As the number of monsters increased, the number of awakened ones also began to gradually increase. They also gradually gained a certain amount of power in their hands.

Unconsciously, these awakened ones had become arrogant and regarded themselves as saviors of the world.

They began to make use of the power in their hands for their own benefits. The awakened ones belonging to different forces also attacked each other, making the already chaotic situation even more serious.

This situation continued for about three months before something major happened, causing the awakened ones to panic.

After the monsters appeared out of thin air, giant black towers appeared all over the world out of thin air. They had mysterious runes on their surfaces and their bodies were constantly flashing with light. In the night, a dazzling pillar of light could be seen soaring into the sky, connecting with the vortex in the sky.

Outside of these giant towers, there were stone tablets with ancient characters carved on them.

When the awakened ones got closer to examine and saw the words on the stone tablet, they were instantly dumbfounded and did not know what to do.

It turned out that according to the stone tablet, in this world, the power of awakened ones would be limited to a similar level. In order to change this situation, they had to enter the giant tower and be transported to a new world.

If they did not dare to enter the giant tower out of fear, then their strength would rapidly decline. In the end, they would even be inferior to ordinary people and die from torture.

After obtaining superhuman powers, the awakened ones had long gotten used to the benefits they gained. If they were to lose this power, it would be worse than killing them.

However, no one knew the specific situation of the New World. If they went there rashly, they might also encounter life-threatening danger.

On one hand, the awakened were worried about the decline of their strength, but on the other hand, they were filled with fear of the new World. They could not sleep or eat in peace every day and did not know what to choose.

However, there were also some awakened ones who pursued strength who, after careful consideration, resolutely chose to enter the giant tower and prepare to continue improving their strength in the New World.

In the end, none of these people returned. They did not send back any specific information, which made the awakened who were watching depressed.

This situation continued for another half a month or so. The thing that the awakened were most worried about had finally happened. They began to feel a clear decline in their strength. Their bodies were like rusty machines that lacked maintenance, becoming more and more sluggish.

Fear and uneasiness quickly spread among the awakened ones. Initially, they were still skeptical, but now, no one dared to doubt the contents of the stone tablet. Instead, they racked their brains to think of ways to avoid the disaster.

The awakened ones, who were originally like fish in water in the apocalyptic worlds, now felt as if the end of the world had arrived. They were in a constant state of anxiety!

## [Chapter 1405](#)

### 1405 Inter-plane teleportation (1)

Holy Dragon City, the location of the new loucheng.

After some overtime work, the huge plane teleportation portal was finally completed, standing on the vast plains.

To the Holy Dragon City, this was the first time such a plane teleportation array had been built. Its success or failure would be crucial to the Holy Dragon city's future development.

Only by mastering this cross-plane teleportation technology could the method of obtaining plane coordinates that Tang Zhen had experimented with be successfully implemented. The myriad world mall could also establish contact with more planes through this method.

Tang Zhen attached great importance to this matter and participated in the construction of the interdimensional teleportation array almost the entire time. He was afraid of any mistakes.

Fortunately, from the start of the project to the end, everything was smooth, and there were no accidents.

According to Xiaomei, in the world controlled by the origin of mutation, the selection of residents had already begun, and the first batch of residents had been selected.

As long as the Holy Dragon city's plane teleportation portal was completed and connected to the coordinates of the world where the source of mutation was located, the awakened could be pulled into the world of the tower.

According to the operating principle of the planar teleportation portal, it was indeed "pulling" people over. This was because under the circumstances where Holy Dragon City did not allow it, the teleportation portal in the world where the origin of mutation was located was simply a decoration. It was impossible to sit on an autonomous teleportation portal.

It should be known that this kind of cross-plane teleportation technology was not something that could be found on the street. It had never mastered the mutation source, which was one of the reasons why it cooperated with Tang Zhen.

Without the main control platform to open the plane barrier and Tang Zhen not using the plane teleportation array to receive him, the mutated origin could forget about sending a person here.

Therefore, in this matter, the Holy Dragon City had always held the initiative and could not allow the other party to act as they wished.

"Are you sure it's only the awakened and not the dream Crusher that will be teleported?"

Little Mei smiled and nodded in the face of Tang Zhen's question.

"Interesting!"

Tang Zhen didn't know why the mutation source didn't use the dream Crusher. It should be known that the cultivation of the dream Crusher was clearly several times stronger than these awakened ones who had started from scratch!

However, Tang Zhen felt that it was reasonable when he thought about the way the mutation source did things. After all, this guy's thinking was different from that of humans. He definitely could not analyze it with normal thinking.

Tang Zhen withdrew his scattered thoughts and looked at the interdimensional teleportation array in front of him. A trace of a smile was revealed on his face as if he was admiring an exquisite piece of art.

The planar teleportation portal was very large, almost the size of a thirty-story high-rise building. On the flat plain without any cover, it could be seen from a long distance.

The moment the teleportation array was completed, it also meant that the cross-plane teleportation had entered the countdown.

Under his command, the interdimensional teleportation portal was slowly activated. The dense runic magic circle began to flash with light, gathering the free energy in the vicinity.

These alone were not enough to complete the teleportation. The true use was the origin Energy within the teleportation portal. Without its participation, the teleportation between planes would be a joke.

It didn't take long for the teleportation portal to break through the plane's barrier and cross into an unknown space, connecting with the teleportation portal of another world.

In an instant, the weather changed and Thunder rumbled, as if a natural disaster was about to befall.

If an ordinary person saw this scene, they would probably be trembling in fear. However, the cultivators of Lou Cheng were used to this and naturally did what they were doing.

When he saw the dark clouds gathering in the sky above his head and gradually condensing into an incomparably huge vortex, waves of white light erupted from the central region. Tang Zhen knew that the teleportation array between these two worlds had already completed its connection.

As expected, just as this thought rose in his mind, he saw a beam of light shoot out from the top of the teleportation array, heading straight for the center of the vortex in the sky.

on the square below the teleportation array, one figure after another turned from illusory to real, gradually appearing in front of everyone.

After the light disappeared, the awakened from the other world finally officially entered the 'new world' that they had been speculating about!

"Big brother, have we arrived?"

Rubbing his sore and numb eyes, a two-meter-tall strong man looked around and carefully asked the leader beside him.

The leader who was being questioned nodded slightly. He looked at the fully armed Holy Dragon City cultivators in the distance with a grave expression.

He didn't know why, but he felt as if he had entered a beast's nest while being surrounded by these cultivators. His scalp was slightly numb.

This batch of awakened ones were all his subordinates. As the first batch of awakened ones to enter the tower, they were naturally not lacking in courage. However, in the face of this new world that no one had ever set foot in, they were still filled with vigilance and uneasiness.

don't act rashly. We'll act according to the situation!

After instructing his men, the man led his men out of the square. He knew that waiting like this was not the way to go, and he had to take the initiative to control the situation.

As they walked to the edge of the square, the leader gave a yellow-haired underling a look, signaling him to go and find out the truth.

Although the yellow-haired underling was full of fear after receiving the order, he did not dare to disobey his boss's order. He could only force a smile and carefully approach a Holy Dragon City cultivator.

"Big brother, may I ask where this is?"

The yellow-haired underling's attitude was humble when he asked the question, and he did not act like a tyrant when he faced ordinary people before the teleportation.

The Holy Dragon City cultivator glanced coldly at the yellow-haired underling and did not answer his question. Instead, he pointed at a tent not far away.

The yellow-haired underling spoke in the native language, which the Holy Dragon City cultivators could not understand, so they naturally could not answer.

“Alright, thank you!”

After muttering to himself, the yellow-haired underling bowed to express his thanks and hurriedly walked towards the place the Holy Dragon City cultivators had pointed out.

At this moment, a man and a woman were standing in front of the tent. The man was tall and mighty. Although he had a smile on his face, he exuded a terrifying aura, causing the underlings who were about to speak to shut their mouths subconsciously.

Then, he looked at the woman beside him, and his heart trembled. He swore that he had never seen such a beautiful woman before. She was so perfect that she didn't seem human.

If he slept with a woman like this once, he would be willing to live ten years less!

Although he was thinking this, he didn't dare to show it. He subconsciously thought that this woman must belong to the man in front of him, who made people's hearts jump with just one look.

excuse me, is this the New World? ”

The yellow-haired underling asked Tang Zhen. He didn't dare to provoke his woman in front of this Big Boss, so as not to provoke his anger.

that's right. This is the New World. You are all chosen awakened ones who shoulder an incomparably sacred mission!

The one who answered the question was Xiaomei. She looked at the Blondie in front of her and said in a cold voice.

Other than Tang Zhen, she had an ice-cold expression towards everyone.

“I see. Then may I ask who you are?”

...

Sweeping a glance at the Holy Dragon City cultivators around him, the yellow-haired underling asked again. Being in the middle of these cultivators with terrifying auras, he felt his legs trembling. He had already mustered up enough courage to ask this question.

Compared to these powerful cultivators, they were as fragile as little chicks. Perhaps the other party could crush them with a finger.

I am your guide, responsible for teaching you what to do. Remember, don't try to disobey my orders, or you will only end up dead.

Xiao Mei's tone was still cold and there was a faint trace of impatience. Tang Zhen seemed to see a trace of indifference to life in her eyes.

Xiaomei, who had been created by the source of mutation, clearly had a similar personality. Perhaps in their eyes, these awakened were just pawns that they could use at will.

## [Chapter 1406](#)

### 1406 Recognize the reality (1)

The yellow-haired underling bowed and thanked Tang Zhen respectfully. He returned to the crowd not far away and told the leader what Xiaomei had said.

After the leader heard this, he frowned and thought for a moment, then finally nodded gently.

It was their first time in a new world, and they were not clear about the situation. It was best not to act rashly. Since Xiaomei said so, they would just listen.

As for what he should do in the future, it would depend on the situation.

This was also because the strength of the Holy Dragon city's cultivators far exceeded that of the awakened. Otherwise, why would this group of arrogant people who rose to power in the apocalyptic world be willing to be manipulated by others?

While the Holy Dragon City cultivators ignored them, the leader led his underlings to sit together and discuss in low voices. The contents were nothing more than how to act according to the situation, how to ensure their own strength and obtain more benefits.

A contemplative expression flashed across Tang Zhen's eyes when he saw this scene from afar.

The mutated origin acted strangely, and the way it chose the residents of the city was also original. It actually chose the residents of the city at the cost of destroying a world!

It seemed to be very familiar with this kind of thing, because before this, there was already a dream world that was completely destroyed!

If one observed these awakened ones carefully, they would discover that compared to the other residents of Holy Dragon City, these people seemed to be more selfish and suspicious. Their personality and habits were clearly not unrelated to their previous encounters.

In order to survive, most of the survivors of the apocalyptic worlds had completely abandoned the constraints of morality. It was not surprising that they would do something even more terrifying.

However, this was not a good thing for the residents of the city.

Due to their selfishness and suspicion, these awakened ones would not be able to cooperate better. If this situation continued, it would have a considerable negative impact on the war plan in the future.

The past had proven that in order to successfully plunder a plane, the cultivators of Loucheng must be united. Only then could they guarantee the final victory.

If the residents of the city had their own thoughts and did not put in any effort during the joint battle, even if they achieved the final goal, they would have to pay a higher price.

It was precisely because of these reasons that Tang Zhen did not have a good impression of these awakened ones. He even had the thought that it would be better to replace them with ordinary people.

From the current Tang Zhen's point of view, compared to these unruly awakened ones, the malleability of ordinary people was much stronger and easier to control.

By relying on loucheng's attribute increase, the residents of loucheng, even if they were ordinary people, had the opportunity to become experts. If they worked hard to cultivate and tried their best to keep their lives in the war, they would become powerful soon!

Although he had such a thought in his heart, Tang Zhen would not interfere too much because everything had its advantages and disadvantages. In this harsh environment, it was more likely for cold-blooded and powerful cultivators to appear.

He only looked at the harvest. As for the process, Tang Zhen had no interest in knowing.

At that moment, the inter-plane teleportation portal was still in operation, sending awakened ones into the tower world. The number of people gathered in the square was increasing.

According to Xiaomei, there would be about 50000 people being teleported this time. In the future, there would be more awakened ones coming to the world of loucheng.

After the tower was built, the awakened ones did not enter the hunting grounds to improve their strength. Instead, they waited for the tower to advance to level 9 before starting the dimensional war!

For the origin of mutation, the resources needed for Lou Cheng to advance to level 9 were just a piece of cake. What it cared about was how to obtain more world origin as soon as possible. It did not like to advance step by step.

He didn't know if it was a good thing for such a weirdo to appear in his own battle zone.

50,000 people sounded like a lot, but for the plane teleportation array that was running at full power, it would only take half a day to complete the welcoming.

By the time the last wave of awakened ones arrived, the public square was already packed with people with different expressions. They were secretly communicating with each other and had already obtained the basic information.

city Lord, the residents of the City Tower have been teleported. I will build the city Tower now!

Tang Zhen nodded his head after hearing Xiao Mei's request.

Xiao Mei bowed to Tang Zhen. Her tall figure suddenly rose from the ground and looked down at those awakened ones.

At this time, she was wearing a fiery red body-fitting armor, and a badge was stuck on her left arm. It was the symbol of the Holy Dragon City, and her valiant and heroic posture made people not dare to look at her directly.

Although she was extremely beautiful, none of the awakened ones cared about that. They were all shocked by the terrifying aura that Xiao Mei had displayed.

As they walked in the air, they looked like Immortals. Facing Xiao Mei, who was far stronger than them, the awakened ones who had been somewhat proud of their own strength now realized that they were short-sighted and knew that there was always someone better.

Just as the metahumans were having their own thoughts, Xiaomei's voice was heard. Even though the square was large, everyone could still hear her clearly.

all of you are the elites who have been chosen after the cruel apocalypse. The fact that you are standing on this square is proof of your strength.

Being praised by such a powerful beauty, the awakened ones naturally felt a sense of pride. However, before they could show this emotion on their faces, Xiao Mei's cold voice rang out again, " but I have to tell you that the strength that you are so proud of is nothing in this world. Any cultivator here can kill you and make your blood flow like a river!

Upon hearing Xiaomei's words, the awakened ones subconsciously looked at the expressionless cultivators around them. Their eyes were filled with doubt and scrutiny.

Although these fully-armed cultivators of loucheng city were not to be trifled with, they were not weak either. It was a little exaggerated to say that one of them could kill the awakened ones and make their blood flow like a river.

There was more than one awakened with this thought in mind. Some of the more arrogant ones even looked at the Holy Dragon city's cultivators with a hint of provocation after being provoked.

Tang Zhen shook his head slightly when he saw this. He did not mind what little Mei had said because this was the truth.

Due to the difference between the planes, the awakened ones from the low-energy worlds had no idea how big the gap was between them and the cultivators from the high-energy worlds. It was no exaggeration to say that the strongest among these awakened ones might not even be as strong as an ordinary Level 2 cultivator!

Not to mention that the Holy Dragon City today was no longer the same as before. All the cultivators who were assigned to carry out the mission had at least the cultivation of a Lord. It was no joke to kill a group of awakened ones in seconds.

As if to cooperate with Xiaomei, as soon as she finished speaking, the nearly 1000 cultivators guarding the official court rose into the sky at the same time, densely covering the entire sky.

The awakened ones who saw this were shocked. Many of them felt their legs go weak and could barely stand.

Feeling the fierce aura coming at them, the awakened ones realized that Xiaomei was right. Compared to the powerful cultivators of loucheng, they were really as weak as children who had just learned how to walk.

"Are you envious? are you jealous? I can tell you that this is the world where the strong live. You are now trash that can't even withstand a single blow!

However, as long as you work hard, you will be able to step into the void one day and see a different scenery!”

Upon hearing this, the eyes of the awakened, who had suffered a great blow, lit up, and his face revealed a look of desire and determination.

Xiaomei was right. Although their cultivation base was not as high as the Holy Dragon City cultivators, they were not born so strong. Perhaps in the beginning, these cultivators were not even as strong as themselves.

As long as he cultivated diligently and worked hard to improve his strength, he might have a place in this world where the strong were respected.

Ambition was not innate, but could only be triggered under the right conditions. It was clear that Xiaomei had managed to trick these metahumans with just a few words.

In order to become stronger, even if they had to pay a certain price, the awakened were willing to do so!

### [Chapter 1407](#)

#### 1407 The Awakener's siege (1)

The square was filled with thunderous cheers. Tens of thousands of awakened ones were already boiling with blood and excitement.

Since they had mastered superhuman strength, they knew what powerful strength could bring them, and what stronger strength meant, so when the opportunity to improve their strength was in front of them, no one would choose to retreat.

Whether they wanted to or not, since they had already come to this strange world, they had no other choice.

Seeing that the awakened ones' emotions had been stirred, Xiaomei turned around and flew into the distance. At an empty space about 5000 meters away from the teleportation array, she slowly took out the cornerstone of the tower that she had been carrying with her.

With a wave of his hand, the silver cornerstone of the tower landed on the altar, shining with a mysterious light.

With another wave of his hand, a large number of brain beads fell onto the altar like a stream of water, and disappeared in an instant.

Xiaomei was not a simple woman. She had a special space in her body that could store some precious items. The materials she needed to build the tower were exchanged for with the world's origin.

Xiaomei's eyes were closed as if she was making some minor adjustments to the building's appearance. In just a few seconds, a strange building began to appear on the open space in front of her.

The building was ring-shaped and covered with silver patterns. It looked like a huge silver bracelet.

However, if one were to look at it from the sky, one would find that the building was actually more like a circular Stadium. It expanded gradually from the center, and the rooms were located on the terrace-like platforms.

Nine huge rune silver pillars supported the ring, and it was about twenty meters above the ground. Its strange appearance was very eye-catching.

As the light dissipated, the 12th tower in the banished Lands was completed. Xiao Mei turned around to look at the stunned awakened ones behind her and her cold voice rang out again, " "this is the tower city, a very magical building. not only is it a holy place for cultivation, but it will also be your future residence!

Your duty is to protect it and make it stronger!"

The awakened ones recovered from their shock and were immediately filled with doubt. They could not understand how the building before them could accommodate tens of thousands of people.

A level 1 city Tower was only the size of an ordinary building. It was no wonder that the awakened would be suspicious.

Xiaomei did not explain. Instead, she looked at the awakened ones coldly and said in an emotionless voice, " "Now, everyone is moving closer to this building, because in half an hour, there will be a Sea of Monsters attacking the building, and the goal is to destroy it!

I can tell you clearly that from now on, your fate is bound to this city. As long as the city exists, you will get unimaginable benefits. If the city is destroyed, you will lose the value of your existence!

Therefore, my request is to defend the tower at all costs!"

As soon as she finished speaking, Xiaomei flew straight to the newly built tower. She landed on the top of the tower and looked at the awakened ones coldly.

She knew that not all of these awakened ones would be obedient. Thus, she would take advantage of the battle to clear out a group of them as a warning to the others.

The awakened ones who heard Xiaomei's order began to whisper again.

is this for real? it's just a strange-looking house. Is it that serious? "

I'd rather believe it than not. Let's hurry over!

hehe, who does this woman think she is? can she control tens of thousands of us? "

brothers, come with me and eat your fill. Remember, this is a new world, not our old home!

The awakened had their own thoughts, but most of them followed Xiaomei's command and quickly gathered around the new building to choose a suitable defensive position.

These awakened ones did not lack experience in fighting monsters. After being teleported here, they had brought along all sorts of weapons and equipment. It would be a piece of cake for them to form a defensive line in a short period of time.

However, in the blink of an eye, the area around the building was filled with awakened ones, who were nervously waiting for the monster to arrive.

However, there were still a few awakened ones standing in the distance. They did not join the defense immediately. Instead, they stared at Lou Cheng as if they were watching a show, as if this matter had nothing to do with them.

Sweeping her gaze across the disobedient awakened ones, a cold glint flashed across Xiao Mei's eyes, but an intoxicating smile appeared on her face.

Half an hour passed by in the blink of an eye. Just as the awakened were guessing where the monster was, a dazzling door of light suddenly appeared behind the observers.

"Owwuuu!"

In a series of frightening roars, hideous and terrifying monsters swarmed out. The sound of their running footsteps made the earth tremble slightly, and the stench of blood filled the air.

"Damn it, we've been tricked!"

The spectating awakened ones were the first to bear the brunt of the attack. They were torn apart and devoured by the monsters amidst miserable howls, blood and flesh flying all over the sky.

In the face of these terrifying monsters, the awakened ones had long been scared out of their wits. It was only now that they realized that the strength of these monsters had far exceeded their expectations. They were no match for them in a hurry.

The ground where the monster was running was covered with the remains of awakened ones. The screams of the heavily injured could be heard without end.

The survivors ignored their companions' screams and ran toward Lou Cheng with all their might, screaming for help.

"Brothers, quickly help me!"

shoot! Kill those monsters!

"Damn it, what are you all looking at? why aren't you attacking?"

As the survivors ran, they shouted for help at the awakened ones around the building, only to be met with cold gazes.

From the moment they refused to defend the city, they had already automatically stood against the defenders. If they still wanted to help, they would be wasting their time in the apocalyptic world.

There were some awakened ones who wanted to lend a helping hand. However, just as they were about to take action, they immediately felt a terrifying force descend upon them, causing them to tremble uncontrollably.

When he turned around to check, he met Xiaomei's cold gaze, which carried a hint of warning.

Seeing this, the awakened ones who tried to help immediately extinguished the thoughts in their hearts. They could only watch helplessly as the survivors were caught up by the monsters, torn apart and devoured by the monsters while cursing bitterly.

After getting rid of the awakened ones who disobeyed the order, the monsters' bloodthirsty eyes turned to the newly built city and then swarmed over.

Looking at these massive monsters with far more destructive power than they had imagined, the awakened were filled with fear and subconsciously clenched the weapons in their hands.

The distance between the two parties was getting closer and closer. When the first monster was within a thousand meters, Xiaomei's voice suddenly rang in everyone's ears.

"Kill!"

Upon hearing this order, the awakened ones seemed to have found their backbone. Half of the fear in their hearts disappeared and they launched their attack without hesitation.

the world that these awakened ones were from was similar to their original world. naturally, their weapons and equipment were similar. although the majority of the awakened ones were used to using cold weapons, they were still used to carrying large amounts of firearms.

in the face of such a sea of monsters, the advantage of firearms was obvious. as the storm-like gunfire rang out, the monsters at the front fell to the ground one after another. with the new building as the center, a circular wall of corpses was built.

Seeing the terrifying monsters fall in droves, the fear in the awakened ones' hearts was once again reduced. They finally discovered the advantage they had.

...

Although the monsters were powerful, the awakened ones had the advantage in numbers. With sufficient weapons and a defensive position, it was not impossible to kill all the monsters!

With confidence in their hearts, the morale of the awakened ones began to rise. Even though the monsters were getting closer and closer, they did not panic.

The battle had only been going on for a few seconds. The awakened ones outside the building were already very close to the monsters. Under the cover of their companions, the awakened ones with cold weapons roared and collided with the charging monsters!

A series of sounds of swords and sabers clashing rang out. In the midst of it, there were also the Furious roars of awakened ones and the angry roars of monsters. The sounds reverberated in the sky for a long time.

## [Chapter 1408](#)

### 1408 The merciless battlefield (1)

when the monsters reached the bottom of the building, the brutal battle would officially begin. at such a distance, the effectiveness of firearms would be greatly reduced, and they could only rely on bloody close combat to kill them.

At this moment, the city was surrounded by figures fighting against the monsters, using their flesh and blood to build an indestructible line of defense.

However, compared to the ferocious monsters, the awakened ones were still much weaker. As the monsters continued to attack, the number of awakened ones who fell increased.

“Someone help me, I can’t hold on much longer!”

A bare-chested brawny man let out a furious roar. He kept waving a large saber forged from spring steel in his hand, continuously hacking at the giant monster in front of him. The dull hacking sounds were endless.

On the ground beside him, the corpses of many awakened ones and monsters could be seen.

Due to the monster’s ferocity, the awakened ones who were fighting beside him had died one after another. At this moment, he was the only one left to face the monster, which was covered in wounds.

The monster that was attacked in succession roared and swept its huge hammer tail at the burly man, aiming for his head.

If he was hit by this hard hammer tail, even if the burly man’s head was made of iron, it would be smashed into pieces!

“Big brother, be careful!”

Seeing that the brawny man was in danger, a thin young man beside him roared and rushed to the front of the brawny man without hesitation. He used his body as a shield and blocked the fierce attack.

“Crack!”

With a muffled sound, the emaciated young man’s sternum was shattered. Blood spurted out of his mouth as he flew backward and fell to the ground.

“Hu Zi!”

The brawny man’s eyes were bloodshot as he roared in grief and indignation. He looked at his comrades who were like a pile of mud and went crazy.

“Damn monster, I’m going to tear you into pieces!”

With a roar, the brawny man waved the weapon in his hand and charged at the monster, vowing to avenge his brother.

Perhaps due to his anger, the brawny man’s body, which was covered in blood and minced meat, suddenly glowed with a red light, making the tattoos on his body come to life. At the same time, a fierce aura appeared.

“Go to hell!”

With another roar, the brawny man's body flew up like a cannonball, and the weapon in his hand slashed at the monster's neck.

"Pfft!"

As the monster wailed, its huge head fell from its neck. Under the Furious attacks of the burly man, only a trace of skin and flesh remained!

After staggering a few steps forward, the monster's corpse fell to the ground with a loud crash, causing the awakened to cheer.

When they looked at the burly man, there was a hint of envy in their eyes. Clearly, the burly man had broken through the bottleneck and advanced to a higher level!

In the original world, they couldn't do this no matter how hard they tried, but in the New World, they could easily do it.

While they were envious and jealous, the awakened also let loose. They knew that only by risking their lives and fighting could they obtain the opportunity to break through in such a special environment.

The brawny man did not have time to be excited. Instead, he rushed to the thin young man lying on the ground and looked at his companion, who was bleeding profusely, with tears in his eyes.

"Brother, let's go!"

The brawny man wanted to say something, but he felt as if his throat was blocked. He was choked with sobs and couldn't speak at all.

The emaciated young man's eyes were unfocused. He tried to open his mouth as if he wanted to save the strong man, but his mouth was full of blood and he couldn't make a sound.

The brawny man punched the ground. He knew very well that the thin young man might die in the next second.

"Brother, you can't die, you can't die!"

The brawny man roared like a madman. Then, he seemed to have thought of something and turned to look at Xiaomei, who was standing above the tower. He shouted with all his might, "Save my brother, please save my brother!"

Xiaomei coldly glanced at the burly man and turned her head to the side, completely ignoring him.

The brawny man shouted again, but unfortunately, on this noisy battlefield, his voice couldn't travel far. Not to mention, it wasn't just his companion who had died in battle, so no one paid attention to this place.

The brawny man was in despair, as if all his strength had been drained in an instant. He sat limply beside the thin young man, holding him in his arms and crying loudly.

Seeing the brother who had risked his life to save him slowly die in his arms, and yet he had no way to save him, this feeling was even more unbearable than the cruelest punishment.

Just as the brawny man was feeling hopeless, a young man's voice suddenly sounded in his ear. Then, a stream of light flew across the sky, and an emerald green syringe fell into the brawny man's hand.

give him this injection. Although it can't cure his injuries, it can at least keep him alive for a while!

The brawny man was stunned for a moment. He turned to look at the syringe and saw a young man in purple-gold armor looking at him. It was obvious that he was the one who had given him the agent.

"Thank you, thank you!"

The brawny man was ecstatic. He knelt down and kowtowed to the young man without hesitation. Then, he opened the syringe and injected the drug into the thin young man's body.

The emaciated young man's body trembled a few times, and he spat out a large amount of black blood. However, his face suddenly became much rosier.

Seeing this, the burly man burst into tears of joy. He hugged the thin young man and did not let go, afraid that he would be stepped on by other awakened ones.

Just like that, the two of them sat on the chaotic battlefield. Even when there were monsters around them and awakened corpses all around them, they still refused to move like stone statues.

Upon seeing this, Tang Zhen, who had stopped in the air to watch the battle, turned his gaze towards the battlefield. The help he had given to the burly man was merely a casual act. As for the life and death of the other awakened ones, he did not care about them at all.

These awakened ones were not the residents of his building. Tang Zhen had no reason to interfere too much. He only needed to be a quiet spectator.

As time passed, the battle of the city defense began to come to an end.

When the city was first built, the number of monsters was not endless. As long as the residents of the city could hold on for a long time, the monsters would retreat.

There were tens of thousands of awakened ones. Naturally, the speed at which they killed the monsters was not slow. Under their all-out attacks, the speed at which the monsters appeared from the door of light gradually could not keep up with the speed at which they were killed.

When the awakened ones saw this, they could not help but reveal a trace of joy on their faces. Some of them even began to leave their groups and moved closer to the light door.

There were even awakened ones who targeted the door of light. From their point of view, as long as the door of light was destroyed, the monster would naturally be trapped behind it.

The awakened's idea was not bad. However, this door of light had a form but not a physical form. No matter how fierce the attack was, it would not be able to hurt it at all. What they were doing would only be a waste of energy!

After another round of intense fighting, the last monster fell to the ground, and the tragic battle to defend the city finally ended.

From Tang Zhen's point of view, he could see that the newly built city was covered with corpses. Half of them were awakened ones and half of them were monsters. The scene was extremely tragic.

...

It was just a battle to defend a level 1 city Tower, yet there were already such heavy casualties. This scene was indeed beyond Tang Zhen's expectations.

The reason for this was very simple. Firstly, the awakened ones were too weak. When faced with fierce monsters that attacked the city, it would usually take more than ten people to kill them.

Secondly, the awakened ones did not understand the rules of the city defense. They thought that they had to kill all the monsters to win. They did not know that as long as they held on for enough time, the monsters would retreat.

Xiao Mei knew this but did not give any hints. This allowed the awakened to kill all the monsters that were attacking the city!

Although they had paid a heavy price, the new city Tower called ring city had been successfully built. In the near future, it would quickly complete its upgrade from Level 1 to level 9, and then directly start the plane invasion!

#### [Chapter 1409](#)

1409 The past.

The battle at ring city was extremely brutal. Although they won in the end, nearly 3000 awakened ones died under the fangs and claws of the monsters!

This was only the battle for the upgrade of a level 1 building. As ring city gradually upgraded in the future, who knew how many more awakened would be killed in the wilderness?

However, there were two sides to everything. Although the number of casualties in this battle was not small, there were many awakened ones who had broken through their bottlenecks and possessed higher strength.

According to the strength of the cultivators in loucheng, these awakened who had broken through were equivalent to Level 1 cultivators and had officially embarked on the road of cultivation. It was not easy to achieve this.

Only by doing this would they have the chance to become true cultivators of Lou Cheng.

As the battle raged on, the awakened ones would gradually grow stronger and eventually become the sharp swords in the hands of Huan Cheng!

From Xiaomei's expression, it could be seen that she was very satisfied with the outcome of the battle. After comforting the depressed awakened ones, she began to carry out her duties as the city Lord and got the city to operate as soon as possible.

Tang Zhen had also left ring city. He still had to make a trip to the dream city. He was naturally very concerned about this old city with a long history.

The small battleship traveled quickly. At the border of the banished Lands, Tang Zhen saw the dream Tower floating in the clouds.

According to the dream city Master, the border area was close to the void, which allowed the dream city to better absorb the free energy in the void and accelerate the recovery speed of the residents.

Tang Zhen stepped through the tall bronze gate and once again saw the familiar grassland and Castle, as well as the residents of the dream Tower that were made up of pure energy.

They were floating on the grassland around the tower, all in a state of deep sleep. Their bodies were wrapped in seven-colored light, slowly healing their damaged bodies.

Dream city Master was standing at the entrance, bowing to Tang Zhen, her face calm and peaceful.

“If you don’t have enough Origin Energy, I can give you some. Don’t be too embarrassed to ask.”

Tang Zhen glanced at the dream city which was emitting a heavy aura and said in a calm tone.

thank you for your concern, city Lord. Even though the dream city’s source reserves have been greatly consumed, it’s barely enough.

Lightly nodding his head, Tang Zhen looked at dream city Master and said, what’s the connection between you and the origin of mutation? how did you fall into its trap? ”

City Master Meng smiled bitterly and invited Tang Zhen to sit on the chair beside her, to be honest, I didn’t know about this from the beginning until a hundred years after loucheng was sealed. I didn’t realize that something was wrong, but it’s a pity that I can’t do anything about it.

“Oh, then what’s going on?”

The dream city Master took out a pot of tea and filled Tang Zhen’s Cup before slowly telling him about the past.

As it turned out, hundreds of years ago, the dream city belonged to another war zone. Due to its long history, it had a rather powerful strength, and it was only a matter of time before it became a continent-level city.

The dream city master’s strength was close to that of a spirit Emperor, and with his race’s unique talent, he had a reputation in the entire battle zone.

At his level of cultivation, he would think of ways to improve his strength, hoping to reach the spiritual Emperor realm as soon as possible.

However, becoming a spiritual Emperor wasn’t an easy task. If becoming a law King was as difficult as ascending to the heavens, then becoming a spiritual Emperor was thousands of times more difficult. Countless law Kings had been stuck at this step.

In order to solve this problem, the law Kings had tried all kinds of methods and finally concluded a shortcut, which was to sneak into a more powerful world and break through the barrier with the help of the heaven and earth energy in these worlds that far exceeded the world of loucheng, thus achieving the goal of advancing to the spiritual Emperor realm.

If they were blessed, they could even obtain more resources from these worlds and advance to a higher level!

However, this process wasn't as simple as they had imagined. Not to mention the difficulty of breaking through the plane's barrier, their identities alone were not tolerated by these worlds. Once they were discovered, they would inevitably be hunted down by the native powerhouses, and if they were the slightest bit careless, they would turn into ashes!

Therefore, the king level cultivators who used this method were all very careful. They were afraid that they would not be able to return.

At this point, dream city Master couldn't help but sigh, " "At the end of the day, it's because the Warzone I'm in is too weak. It's said that the top 100 warzones can directly invade these worlds and occupy large territories for a long time. Those law Kings don't need to sneak in at all. They all enter openly!"

"The strong will become stronger. This is the principle!"

Tang Zhen nodded when he heard this. Compared to those powerful battlefields, the few battlefields that he knew of were not even on the stage. The gap between them was even more outrageous.

In order to break through to the spiritual Emperor realm, dream city Master had once tried his best to sneak into a powerful world. However, he had spent nearly a hundred years and was only one step away from becoming a spiritual Emperor.

Just as the dream city Master was about to snatch a treasure and use it to break through, he accidentally exposed his identity and was chased by the native powerhouses.

After a narrow escape, the seriously injured dream city Master finally left that world. The moment he returned to the battlefield, he received the news that his city was trapped.

As he was afraid that the tower would be in danger, the dream city Master had tried every possible means to enter the dream world. In the end, he had fallen into the trap of the mutation source.

After a huge battle, the heavily injured dream city Master was sealed and could not leave easily.

Fortunately, he had a backup plan and a clone that he could use. The dream city Master that Tang Zhen had met back then was actually a clone. After completing the mission, this clone had also disappeared.

As for the deal between the dream city Master and the mutated origin, it was all related to the information about the tower. Obviously, the mutated origin had already had the idea of obtaining the world origin in this way since then.

This guy even wanted to control the dream patroller and replace it, but he did not get his wish and had to find another way.

The Holy Dragon city's invasion of the dream world was something the mutated origin could not ask for more. This was because it had already known about Tang Zhen's identity from the dream city Lord. It was even more clear that only Tang Zhen could help it realize its dream.

It could be said that from the moment he saw the dream city master's clone, Tang Zhen had already been involved. The dream city Master and the mutation origin had their own goals, but they all required Tang Zhen's participation.

Of course, Tang Zhen didn't suffer a loss. Not only did he obtain a large amount of the world's Origin Energy, but he also obtained two powerful fighters. This was of great help to him as he was preparing to establish a war zone.

Tang Zhen faintly smiled after understanding the cause and effect. Clearly, he did not mind being schemed against. He had already taken all the advantages in this matter, so what reason did he have to be angry?

On the contrary, he was very interested in the world that the dream city Master had mentioned. After all, after he had become a spirit Emperor, he had found that his strength could not continue to increase, which had been a source of distress for him.

After asking the main control platform, he found out that for ordinary battlefields, the cultivation of a spiritual Emperor was already the limit. If they wanted to continue to improve, they had to increase the level of the battlefields and increase the energy concentration in the battlefields. There was no other way.

However, Tang Zhen felt a strong sense of powerlessness when he thought about the conditions required to upgrade the level of the war zone. The astronomical number of resources required had already frightened Tang Zhen.

This was also the reason why the dream city Lord's method was so attractive to Tang Zhen. If it was effective, Tang Zhen would head to these worlds to continue improving his strength after completing the tempering of his tower.

His goal was not just to establish a battle zone, but to become one of the top-ranked existences in the 3000 battle zones. To achieve this goal, his own strength naturally could not be too weak.

In the world of loucheng, the strong were respected. If one did not advance, one would fall back. Tang Zhen had long understood this.

There was another thing that drove him to keep moving forward, and that was to uncover the hidden secrets behind the mobile phone. He found that the stronger he was, the more information he would be able to understand. Perhaps when he advanced to a higher level, he would be able to find out the true secrets hidden behind the phone.

## [Chapter 1410](#)

### 1410 Mine

In the following chat, Tang Zhen asked about the information of those powerful worlds in detail. He gradually made up his mind and returned to Holy Dragon City.

He didn't plan to leave before he finished Lou Cheng's tempering. After all, there were still a lot of things waiting for him to deal with.

After returning to loucheng, Tang Zhen inquired about the progress of the war in the corpse World and found that the cultivators in loucheng had already reached the area controlled by the spirit-brain corpse King.

Including the bone-corroding corpse King, four out of the eight great corpse Kings of the corpse race world had already been captured by the Holy Dragon City. The cultivators of the corpse race that belonged to them all fled at the mere sight of it.

According to the development of this situation, it was estimated that it would not take long to reach the cave that the bone-corroding corpse King had mentioned and obtain the origin of the corpse race world.

To the current Holy Dragon City, the strength of the undead world could only be considered average. It was only a matter of time before they obtained the final victory.

However, there was one thing that made Tang Zhen feel puzzled. From the beginning of the invasion until now, The Spiritual Brain Zombie King had not shown itself, and no one knew where it was hiding.

Tang Zhen had always been wary of this fellow who had once invaded the world of loucheng. There was no need to mention the other party's ability since he was able to enter the world of loucheng through another strange path.

However, what Tang Zhen was most worried about was that he would give up everything he had and think of a way to sneak into the world of loucheng. In this case, it would be like looking for a needle in a haystack if Tang Zhen wanted to search again.

For a cultivator who was obsessed with research, doing this was easy. Not to mention that the spirit brain corpse King's original goal was to leave the corpse race world. Now that the Holy Dragon City launched an invasion, it just happened to provide a heaven-sent opportunity.

Tang Zhen would never believe that the spirit brain corpse King didn't take advantage of this opportunity to cause trouble.

At the thought of this, Tang Zhen ordered to strengthen the defense of the plane channel again to prevent the spiritual-brain corpse King from sneaking into the tower world.

.....

At the entrance of the corpse race's world, the huge city Tower was still standing proudly. All kinds of defensive weapons were activated, completely sealing off the plane's channel. Anyone who passed through here without permission would be attacked by powerful firepower.

As the war continued, there would be cultivators and cars passing by every day to transport the harvested materials back to the Holy Dragon City.

About twenty kilometers away, there was a huge mine. It contained an extremely rare metal that Holy Dragon City had immediately started mining after discovering.

In addition to all kinds of vehicles and machinery, there were also a large number of zombie captives in the mine, engaged in heavy mining work all day long.

Although they had to work from morning to night every day, these corpse race prisoners of war didn't have many complaints. There were even very few people who fled from this place after scanning the map.

The reason for this was that they could obtain food full of vitality here. At the same time, because they were close to the plane's channel, the death aura in this area had been gradually driven away, and the natural environment had undergone earth-shaking changes.

The undead race captives who were affected by the death energy lived in such an environment all day long and naturally benefited a lot. Unconsciously, their appearance had become more and more normal.

It could be said that the heavy work didn't make the corpse race captives feel tired, but instead, they became more and more energetic, and the pain that they had suffered from day to night gradually disappeared.

With these desirable benefits, the corpse race captives wouldn't easily escape unless they had a problem with their brains.

In the huge mine pit, the prisoners of war smashed the huge rocks into the size of a human head, loaded the trucks, pushed them over to the stone crusher in the distance, and poured them into it.

With the sound of roaring machines, the ores were quickly crushed and then transported by conveyor belts for the prisoners to choose the ores they needed.

After the high-grade ores were selected, they would be transported to the smelting area by the captives. After a series of operations, they could obtain pots of hot metal solutions.

The base of the metal made from the solution would be transported to the Holy Dragon City. After further processing, it would finally become the special metal needed by the Holy Dragon City.

The entire process sounded simple, but to ensure sufficient production, they needed enough manpower.

Invading and plundering a world's resources was not as simple as it seemed. It required planning and cooperation from all aspects in order to obtain the most resources in the shortest amount of time.

This process naturally required a lot of manpower, so every tower would try their best to get the natives to work for them. After all, their purpose was only to plunder resources, not to kill.

In the busy mine, a sharp Bell suddenly rang. The undead captives who were working raised their heads and began to put down their work, gathering in the nearby open space.

Under the watch of the fully armed Holy Dragon City cultivators, these corpse race captives were very well-behaved, sitting obediently on the empty ground and waiting for their meal.

It didn't take long for a group of undead captives to come over with large buckets filled with white rice and rich vegetable soup. The alluring aroma of the food made the undead captives drool.

To them, these ordinary foods were comparable to heavenly treasures with magical effects. No matter how much they ate, they would never get enough.

“Everyone, line up. No need to fight. If that guy dares to make trouble, I’ll break his legs!”

The ones responsible for distributing the food were also some undead race captives. Because of their excellent performance, they were assigned to this lucrative job. Compared to the captives who had a limited supply of food, they could naturally secretly keep more food to fill their stomachs.

The captives who had been waiting for a long time immediately formed a long line, filled wooden plates with rice, food, and soup, sat on the ground and began to wolf down the food.

Among the crowd, two corpse race captives sat together. One of them was nearly three meters tall and had a fierce expression. The other captive looked old and had unhealed wounds on his body. Because he was saved by a strong captive when he was bullied, the two of them had been together.

this food tastes really good, ” the robust captive said. it’s just that there’s too little. It’s not enough to fill my stomach!

The old captive named old Wu shook his head and said, ” “It’s good enough that I let you eat it. Why do you have so much nonsense to say?”

The robust captive finished his meal in a few mouthfuls and sighed, ” I hope this war will last longer and I’ll eat more prison food. That way, I can get rid of all the death energy in my body!

Old Wu shook his head and said in a low voice, ” actually, you should be more worried about how Holy Dragon City will deal with us after the war is over. They won’t kill us all, right? ”

When the surrounding corpse race captives heard this, a trace of confusion flashed through their eyes. It was obvious that they were also very concerned about this issue and had been on edge all day long.

During this period, there were naturally some captives who tried to escape. However, the entire mine had been surrounded by an inescapable net, and the corpse race captives were also wearing special shackles, so it was no different from a fool’s dream to escape.

Those who didn’t listen to the advice all died on the way to escape. More and more dried corpses hung around the mine, finally scaring off the captives who tried to escape.

If they stayed here obediently, they might be able to live for a while longer, but if they overestimated themselves and tried to escape, they would really not be far from death!

The meal time was not long, and the rest time was only about 20 minutes. Then, the corpse race prisoners began to repeat the previous work until the sun set.

Standing up numbly, the corpse clan captives repeated their previous work, and the mine became noisy again.

No one noticed that when the corpse race captive named old Wu got up, he secretly glanced at the building in the distance and a faint smile appeared on his face.
