

Alternate 1431

Chapter 1431 Cooperation?

The border city was built against the mountain. From a distance, it looked like a super garden in the sky, looking extremely beautiful.

Compared to other races, the lifespan of elves was generally more than 200 years. In addition to their leisure and reclusive life, they had enough time to create their favorite works of art.

The peaceful environment allowed these pieces of art to be passed down in an orderly manner. Over time, it could be said that every gathering place in the morning Star Empire was an Art Museum!

As everyone slowly advanced on the long bridge, melodious music began to play. The tune was gentle and light, making people feel more and more cheerful.

!!

After hearing the music, a group of rainbow-colored birds flew out from the surrounding forest and circled above the long bridge. They chimed in harmony with the music, but it was not chaotic at all. Instead, it gave off a natural feeling.

Even on the gem-like lake surface, there were colorful fish and water beasts jumping out and following Yue qianhua and the others.

Yue qianhua and the others were naturally attracted by the scenery here. With bright smiles on their faces, they entered the border city together.

Different from other cities, the city wall of the border city was not made of bricks and stone. Instead, it was built from the original mountain. The surface of the city wall was covered with ancient carvings. Under the embellishment of green vines and moss, the ancient and vicissitude aura came from the city.

These mottled and old stone walls should not be underestimated. Once a war really broke out, they would form an impregnable defense system. Unless one paid a very painful price, no one could occupy this place.

After entering the city, Yue qianhua and the others walked on a winding road decorated with various houses and went straight to the city Lord's mansion at the top.

Although border city had a long history and a population of more than 500000, when one entered the city, they would find that there were not many pedestrians on the streets. It even gave people a faint feeling of returning to the countryside.

master Slade, why are there so few people on the streets? ”

Murong Ziyue looked at the surrounding scenery curiously. Then, she seemed to have thought of something and turned to ask Slade.

“May I ask who this beautiful lady is?”

After hearing Murong Ziyue's question, Slade asked Yue qianhua very politely.

When they met just now, only Yue qianhua had told them her name, while Murong Ziyue and the others had been standing behind her the whole time.

“This is the sister of our city Lord’s wife. Her name is Murong Ziyue.”

Yue qianhua opened her mouth to introduce her, but in her heart, she was secretly praying that the little girl wouldn’t mess around.

“Oh, it’s miss Murong Ziyue. I’m sorry!”

A hint of surprise appeared on Slade’s face, but he quickly hid it. He smiled at Murong Ziyue and continued, “ lady Ziyue might not know this, but although there are 500000 permanent residents in border cities, most of the time, the residents like to stay in the forest and Lake. Only in those places can you see their figures.

At this point, Slade pointed to the forest by the lake in the distance and said, “ the place I’m pointing at is home to nearly 100000 residents of the border city. It can be said that there is a house under every big tree.

Murong Ziyue nodded and said with a hint of expectation, “ I see. In that case, will the city Lord allow me to take a look? ”

of course. If you’re interested, we can go at any time.

“City Lord, we have a very important mission this time. Therefore, we are not in a hurry to visit,” Yue qianhua replied.

Yue qianhua turned to look at the little girl and saw her pouting slightly but did not say anything. A faint smile appeared on Yue qianhua’s face.

“In that case, let’s head straight to the city Lord’s mansion.”

They chatted along the way and arrived at the city Lord’s mansion under the curious gazes of the residents.

Then, Slade invited everyone to a floating platform with beautiful scenery. He took out the Morning Star Empire’s Specialty Fruits and invited everyone to taste them.

Although the fragrance of fruits and melons filled the air, Yue qianhua still felt a sense of urgency. This was because she had already received Tang Zhen’s reminder before she set off that the envoy of the orc Alliance would soon arrive at the Morning Star Empire.

Although the Holy Dragon City cultivators would try their best to intercept and kill the messengers of the Beastman Alliance, they still had a chance of successfully arriving. Thus, the cooperation with the Morning Star Empire had to be established as soon as possible.

After pondering for a moment, Yue qianhua said to Slade, “ “City Lord, you might have already guessed the purpose of our trip, so qianhua won’t hide it anymore. To be honest, we’ve come this time in the hope of forming a partnership with the Morning Star Empire.

On my way here, the Holy Dragon City had already launched an attack on the Beastman Alliance. A war in the future is inevitable.

We hope to cooperate with the Morning Star Empire to fight against the orc Alliance. If you are not willing to participate in the war, we hope that the Morning Star Empire will remain neutral.

In order to express our sincerity, the Holy Dragon City will give you generous gifts and cooperate with you in many ways to seek common development!"

There was a warm smile on Slade's face, and he gave off a feeling of a spring breeze. After Yue qianhua finished, he said, "Your Excellency Yue qianhua, do you know that the Morning Star Empire has never been willing to get involved in the disputes of the continent? the reason why we appeared in the chaos a hundred years ago was actually to take back an important item. It wasn't as the rumors outside said, that we were trying to seize land and be defeated.

Even if the continent is in chaos this time, the Morning Star Empire still has no intention of getting involved. Therefore, whether it's you or the orc Alliance, we will choose not to help either side.

As for the cooperation you mentioned, there's actually no need for it. The Morning Star Empire has its own cultural heritage and doesn't like to be disturbed by external factors.

I have to say that your arrival was completely unnecessary, because you didn't understand the principles of the Morning Star Empire from the very beginning!"

A smug expression appeared on Slade's face. He was obviously very proud of the culture and history of the Morning Star Empire.

Yue qianhua smiled and didn't refute, but she didn't think so.

What Slade had said was true, but they were not shackles that bound the Morning Star Empire. As long as there were enough benefits, these things could be put aside for the time being. After obtaining enough benefits, they could be used to whitewash everything.

If used properly, it would be a very good cover.

Therefore, Slade did not agree to the cooperation only because the benefits offered by the Holy Dragon City were not enough.

The Holy Dragon City finally decided to befriend the long-range and attack the short-range after much discussion.

Moreover, the Holy Dragon City was determined to win this time and had made ample preparations. If Yue qianhua's trip failed, and the morning Star Empire chose to cooperate with the orc Alliance, it wouldn't take long for this paradise to be filled with Flames of War.

Chapter 1432 The secret of the capital city

The reason why Slade welcomed Yue qianhua and the others so warmly was because she represented the Holy Dragon City. No matter what the relationship between the two sides was, Slade should show due respect to a new and powerful representative.

As for the cooperation that Yue qianhua had mentioned, Slade was not interested at all. He also knew that the royal family would not be interested, so he rejected it directly.

city Lord, don't be in a hurry to refuse. Can you take a look at these things first? "

As Yue qianhua spoke up to this point, she gently swiped her finger and an item that looked like a tablet computer appeared in her hand.

!!

After seeing this, Slade's eyes lit up. He was obviously very interested in Yue qianhua's storage equipment.

Before the Holy Dragon City appeared, there were only a few storage equipment on this continent. They were in the hands of the Morning Star Empire and a few legendary mages. There was also one hidden in the royal family of the demon barbarian Empire, and its successor was the princess of the demon barbarian Empire.

The demon barbarian princess 'storage equipment contained some Royal Secrets. After seeking shelter in the Holy Dragon City, she had given the items inside to Tang Zhen to express her determination and attitude.

Other than these few storage equipment that were known as divine weapons, only Holy Dragon City had similar items in the entire continent. Moreover, the popularity of these items had already left all the major forces dumbfounded.

Many people hoped to obtain similar items from the Holy Dragon City, but unfortunately, no one had succeeded so far.

Noticing the city Lord's gaze, Yue qianhua smiled and said, " if Sir Slade is interested, I can give you one. I just hope you can work hard to promote our cooperation!

Slade seemed to be struggling, and it was obvious that he was tempted.

After a few seconds of silence, Slade chuckled and said with a hint of regret, " "Your Excellency Yue qianhua, to be honest, I really do want to have a storage equipment, but I really can't help you with this.

In fact, I've already received orders from the royal family when you arrived. What I've just said represents the royal family's attitude, and it can't be changed!

So, I can only regretfully say that you might have made a wasted trip!"

Yue qianhua thought to herself,"as expected. Although the city Lord of a border city is powerful, he might not be able to refuse the cooperation on behalf of the Morning Star Empire. However, he spoke so decisively just now, so he was obviously prepared."

Castellan Slade, don't be in a hurry to reject us. Take a look at what we can provide first. Maybe it will change your mind.

Slade was also a little curious about Yue qianhua's repeated requests. After glancing at Yue qianhua, his gaze fell on the table.

Following Yue qianhua's actions, a screen appeared on the tablet. After seeing the image on the screen, Slade was shocked.

"Your Excellency Yue qianhua, how did you get these things?"

Slade's tone was questioning, but more than that, he was surprised.

As if she had already expected Slade's reaction, Yue qianhua said in a confident tone, "Sir Slade might not know, but with the Holy Dragon city's strength, there is no place on this continent that can escape their detection.

Looking at Slade's twitching mouth, Yue qianhua smiled and said, "Even the capital of the Morning Star Empire is under our surveillance!"

Slade showed a trace of anger and said in a cold voice, "Your Excellency Yue qianhua, can I take this as a provocation?"

Yue qianhua shook her head. There was no trace of panic on her delicate face. Instead, she pointed at the image in front of her and said, "To the common people, the capital of the Morning Star Empire has always been filled with mystery. Many people have only heard of its name and know that it is the ancestral land of the Morning Star Empire.

It was a mysterious place even in the morning Star Empire. No one could approach it without permission.

Am I right, Sir Slade?"

Slade nodded, as if he was thinking about something.

we were also very interested in this place, so three months ago, we specially investigated this matter. In the end, we discovered something that shocked us.

At this point, Yue qianhua paused and said to Slade, "Your Excellency, guess what we found?"

"Tell me, I'm actually very interested in this!"

Since the Holy Dragon City did this, they naturally had their own reasons. Slade had a faint sense of anticipation in his heart.

"After careful analysis, we've confirmed that your ancestors in the morning Star Empire are inextricably linked to the world of loucheng. This can be seen from your capital.

your ancestors used some unknown method to build a building that was very similar to the city. However, for some reason, it became a defective product and was unable to perform its original function!

If your ancestors had succeeded back then, perhaps this continent would have fallen into your control long ago, am I right?"

Slade took a deep breath. As a noble of the Morning Star Empire, he obviously knew more secrets, and what Yue qianhua had just said was indeed something that had happened in the past.

“What’s the purpose of your words? do you think that by knowing these secrets, you can make us compromise and cooperate?”

Although these things are the Morning Star Empire’s top secrets, it’s not like they can’t be known to others. That’s why the information you have isn’t of much use.”

Slade’s tone carried a hint of sarcasm and even a faint anger.

“If we can change everything and make the Imperial City operate as your ancestors had imagined, what do you think?”

Yue qianhua smiled and said to Slade.

“What did you just say?”

Slade, who was originally calm, suddenly stood up. His eyes were filled with disbelief as he stared at Yue qianhua. The aristocratic aura on his body had long disappeared.

“You said that you can make the Imperial City operate again. You’re not joking, are you?”

Slade’s heart was filled with shock. He had been to the Imperial City before and naturally knew how great it was. If the Holy Dragon City could really operate, it would definitely be a great event for the Morning Star Empire!

Looking at the anxious Slade, Yue qianhua shook her head and said, “ Sir Slade, do you think we would joke about this? ”

“If you can really do that, I can guarantee that the Morning Star Empire will not work with the orc Alliance. On the other hand, there’s a high chance that we’ll work together!”

When Yue qianhua heard this, she shook her head and softly said, “ “Sir Slade, if we really do that, I’m sure you know what it means for the Morning Star Empire.

Therefore, after doing everything you need, we hope to get more in return. Sir Slade, can you make a promise on behalf of the Morning Star Empire?”

Slade was stunned.

If the Holy Dragon City could really do this, then the Morning Star Empire would naturally have to pay a corresponding price. However, it was no longer his place to worry about this!

After a moment of silence, Slade said in a serious tone, “ “If you can do this and are willing to do so, I will immediately arrange for people to escort you to the Imperial City!”

Yue qianhua stood up and bowed to Slade.

“In that case, I’ll have to trouble you, Sir Slade!”

...

Chapter 1433 The depressed orcs diplomatic corps

Just as Yue qianhua reached an agreement with the city Lord and was about to head to the capital of the Morning Star Empire, a group of beastmen hurried over on the path to the maple forest ferry.

Compared to Yue qianhua's group, who had come on a small battleship and only changed to short-horned deer when they got close to the Morning Star Empire, the orc envoy was in a much worse state.

From their appearance, it was clear that they had experienced a bloody battle not long ago. There were still traces of blood on their robes and armor, and they looked quite miserable.

When the fiery red maple forest appeared in front of these orc cultivators, they all showed a trace of relief and couldn't help speeding up.

"We've finally reached the Morning Star Empire. I thought we would die on the way!"

"Don't worry. Since we're here, those bastards from Holy Dragon City shouldn't appear again. After all, this is someone else's territory. They won't dare to hunt us down so brazenly!"

"If we meet on the battlefield, I will definitely kill a few more Holy Dragon City cultivators to vent my anger!"

A few orc cultivators whispered to each other, and their voices were filled with irrepressible anger.

"We've just received news that we're the only team that has reached the border of the Morning Star Empire. The other teams were ambushed by the Holy Dragon City on the way, and they probably won't be able to come back!"

The leader of the beastmen diplomat group had a grave expression, and a hint of hatred could be seen in his eyes.

His brothers were in the other teams and had been ambushed three times on the way. The possibility of them coming back alive was almost zero.

Compared to their companions, they were undoubtedly much luckier. They had been able to escape the pursuit through a hidden tunnel and successfully reach the border of the Morning Star Empire.

However, this was only the beginning. In the following process, they still had to try to persuade the nobles in the morning Star Empire to cooperate with the orc Alliance to resist the Holy Dragon city's invasion.

This was not an easy task. After all, this was not the first time the orc Alliance had dealt with the Morning Star Empire. For some reason, the two sides had always looked down on each other, and the few times they had worked together in history had all ended on bad terms.

Even so, the orc Alliance had no choice but to take the initiative to attack. Once the Holy Dragon City launched an official attack, it would be no different from a disaster for the orc Alliance.

After a period of war, although the orc Alliance had plundered a large amount of resources, they had also paid a heavy price. Nearly a million orc soldiers had died on the battlefield, and countless were injured.

For the orc Alliance, this situation was definitely suitable for them to continue the war, especially against a powerful opponent like the Holy Dragon City.

This was the truth. Although the Holy Dragon City would face more than one enemy, they were still at ease. On the other hand, the Holy Dragon city's enemies were trembling in fear, not knowing how to deal with it.

The more they knew about the Holy Dragon city's strength, the more obvious this feeling became. This monster that had suddenly appeared had strength that made them feel uneasy!

It was for this reason that the enemy forces would do everything they could to change the current situation and eliminate this terrifying enemy.

"Your Excellency shaman, we will need you to take action next!"

Looking at the wide river in front of them, the envoy leader called out. Then, an orc dressed as a shaman walked out and danced a strange dance by the river while chanting.

As the incantation spread, the clear river's surface rippled, and huge fish appeared one after another, staring at the orc cultivators standing on the shore with cold eyes.

When the strange dance ended, the orc shaman took out a dagger and cut a long wound on his arm. Blood immediately gushed out.

The blood dripped down his arm, but when it came into contact with the river water, it quickly dispersed and rushed towards the water beasts and strange fish at the bottom of the river like a living creature.

The water in the river churned. When the water monsters sucked in the orc shaman's blood, they immediately became drowsy, as if they were drunk, and their bellies were facing the sky.

hurry up and cross the river. Don't fly over the river, got it?"

The orcs immediately stepped on the bodies of the fish and jumped across the river. Seeing this, the other beastmen followed one after another, and soon arrived at the other side of the river.

No one asked why they couldn't fly over the river, because when they crossed the river, they felt a heart-palpitating power coming from the sky above the river.

If someone were to fly past, they would definitely be attacked by this force, and the consequences would be unimaginable!

In fact, many years ago, the orc cultivators had suffered a great loss. They had ignored the warning and jumped into the river, only to be ground into minced meat in the middle of the river and become the food of the water monsters.

After crossing the river, they naturally ran all the way. The orc cultivators were not in the mood to admire the scenery along the way.

The road to the checkpoint wasn't very far, especially for these Lord-tier and above orc cultivators. It didn't take long for them to arrive at the checkpoint, but they were met with soldiers who were waiting in formation.

Seeing the Morning Star Empire soldiers unsheathing their weapons, the members of the orc diplomat group felt that something was wrong. However, they still stepped forward and revealed their identities.

we are a diplomatic mission from the orc Alliance. We would like to meet the city Lord of the border city, Slade. Please allow us to pass!

The commander of the checkpoint was the one that Yue qianhua and the others had seen before. At this time, he was standing on the top of the wall, looking down at the orc diplomatic mission with a faint smile.

“I’m sorry, but without the permission of the city Lord, no matter who you are, you are not allowed to pass through the checkpoint!”

The leader of the orcs ‘diplomatic mission frowned slightly. After thinking for a moment, he continued,“We have a very important matter. Can you make an exception for us?”

The checkpoint commander shook his head, indicating that this was impossible.

The orc captain cursed in his heart and tried to make a few more requests. However, the checkpoint officer only shook his head and refused to see him.

Seeing this, the orc cultivators could only curse loudly while sitting in front of the checkpoint and waiting.

If they knew that the Holy Dragon city’s diplomatic corps had successfully passed through this place and were preparing to head to the capital of the Morning Star Empire, they would probably be so angry that they would try to stop them with all their might.

Although they were furious, they knew that they were too weak to pass this seemingly ordinary barrier. Even if they were lucky enough to pass it, they would be hunted down by the cultivators of the Morning Star Empire.

After a short discussion, the leader of the orc envoy decided to continue thinking of ways to pass through the checkpoint. At the same time, he would send a message to the reinforcements behind him to see if they could sneak into the morning Star Empire through other means.

.....

After waiting in the border city for two days, Yue qianhua and the others finally received a reply from the royal family, inviting them to go to the heart of the Morning Star Empire.

After receiving the news, Slade immediately ordered his subordinates to prepare flying mounts and personally accompanied Yue qianhua and the others.

Slade had already known about the arrival of the orcs and knew that they would definitely offer attractive conditions for cooperation.

If it was before Yue qianhua and the others arrived, thred might have considered their conditions. But now, he was not interested in them at all.

The only things the orc Alliance could offer were land and precious resources. However, the Morning Star Empire didn't lack these things at all. Compared to the Holy Dragon city's offer, they were not even worth mentioning.

Therefore, Slade immediately ordered people to stop the orc diplomat group, to prevent them from deliberately ruining the cooperation with the Holy Dragon City when they were desperate after hearing the news.

With a clear whistle, a group of flying mounts unique to the Morning Star Empire soared into the sky, and under the control of beast tamers, they headed straight for the capital.

The feathers of these flying mounts were very beautiful. When they flew in groups, they looked like a brilliant cloud, which was very spectacular.

In order to prevent being blown off by the wind during the flight, everyone held the rope tightly and formed an energy shield on the surface of their bodies to prevent themselves from being unable to breathe normally.

...

Riding on flying mounts was actually a rather monotonous and boring process. Other than the initial feeling of novelty, the rest was just a boring one.

After flying through countless villages and towns, and even taking a few breaks during the journey, the group finally arrived at the capital of the Morning Star Empire, Morning Star City, which was located on the vine plain.

Chapter 1434 The origin of morning stars city

The origin of the name of the vine plain was naturally the giant seven-colored vines on the field.

These giant vines were unusually thick and strong. When they grew, they would surround each other and form a ring. Then, they would intertwine and grow. The tallest giant vine was nearly a thousand meters tall!

Flowers of different colors bloomed on the surface of the giant vine. Every time a breeze blew, the fragrance of the flowers would fill the entire plain, attracting groups of colorful butterflies.

Morning stars city was located in the center of the vine plain, surrounded by trees. From a distance, it looked like a huge mountain, guarding this ancient land.

As they had been notified in advance, Yue qianhua and the others were not interrogated. Instead, they were led by the patrolling cavalry in the air to their destination without any obstructions.

If one entered this place without permission, they would be attacked immediately. The eerie white bone sculptures around the vine plain were enough to prove this.

Even the skeletons that represented death could still be turned into strange works of art by these elves!

The flying mount finally stopped at a wide square. There were already cultivators from the Morning Star Empire waiting for them. After introducing themselves, they led Yue qianhua and the others towards Morning Star City.

In front of everyone was a magnificent giant city that was made of emerald green jade. It was at least several hundred meters tall, and it was surrounded by exquisite statues that looked very lifelike.

On the straight road leading into the city, heavily armed Morning Star Empire cultivators stood guard on both sides. They wore ancient-looking armor, and the weapons they used were gleaming.

The people of Holy Dragon City only needed one look to know that these were all magic weapons and equipment that had a long history.

A group of women in white robes stood at the city gate and looked at Yue qianhua and the others who were slowly walking over with a faint smile on their faces.

welcome to Morning Star City. From the moment you came here, I felt the call from my bloodline, which proves that we have the same ancestor!

The leading white-robed woman looked at Yue qianhua and gently touched her forehead. She spoke in a very kind tone.

I have the same feeling as you. This must be the arrangement of our ancestors. We are so far apart, but we still have the chance to meet here!

Yue qianhua half-knelt on the ground, using the elf clan's etiquette of greeting elders, and her tone also revealed joy.

Murong Ziyue, who was standing at the side, pouted. She thought that Yue qianhua's behavior was a bit out of control. However, before this operation, Tang Zhen had told her that she had to listen to Yue qianhua's orders. So, even if she had some doubts in her heart, she still didn't show it.

After a simple conversation, the white-robed woman, the state preceptor of the Morning Star Empire, led the crowd into the city.

After entering the city, Yue qianhua and the others finally understood the origin of the name when they saw the starry sky above and below them.

Walking in this city, he actually felt like he was strolling in the sea of stars. From time to time, there were meteors flying by, and when he reached out to grab them, he realized that they were just illusions.

If other races on the continent were here, they might be shocked by this scene. However, the cultivators of the Holy Dragon City had seen similar scenes more than once.

The magical thing about the world of towers was that there were all kinds of strange towers. Because of the existence of the world's origin, any tower could be transformed into a strange small world, and any seemingly magical scene could be displayed inside the tower.

After seeing so many of them, he naturally wouldn't be surprised anymore.

When the residents of Morning Star City saw the Holy Dragon city's diplomatic corps' performance, they could not help but feel slightly surprised. In the past, every outsider who was lucky enough to enter Morning Star City would be shocked by the scene here. This was the first time they had seen someone as calm as the Holy Dragon city's diplomatic corps!

They had originally wanted to see the dumbfounded expressions of the Holy Dragon City cultivators, but they did not seem to care at all. This made the residents of Morning Star City, who were in charge of welcoming them, feel very depressed.

After passing through the Starlight tunnel, the group came to an area comparable to a paradise. There were clusters of flowers here, and pavilions were hidden within.

The empty space in the garden had long been filled with chairs, and all kinds of delicious food had been prepared. The state preceptor of Morning Star City raised the wine glass on the table and invited Yue qianhua and the others with a smile.

"Since you've come from afar, please have a taste of our Morning Star city's specialty wine. I believe you won't be disappointed."

Yue qianhua and the others took a sip of the wine and praised.

As for the Holy Dragon city's cultivators who had come along, they only raised their glasses symbolically and then gently placed them on the table.

The Morning Star city's state preceptor smiled and said to Yue qianhua, "I once heard that the Holy Dragon City was not a native of this world, but had broken through the spatial barrier and finally arrived at the land of exile. I don't know if it's true?"

Yue qianhua replied with a smile. It's indeed as the Grand Tutor said. My Holy Dragon City does not belong to this continent. It's from another world!

When the people around him heard this, they all revealed a look of surprise. They secretly thought that there was indeed another world beyond this world!

In fact, it was recorded in The Secret History of Morning Star City that there was a wider world beyond the sealed continent, and the ancestors of Morning Star City came from there.

Although many people wanted to confirm this, the spatial barrier that sealed off the continent was extremely terrifying. Those explorers had all entered the fog and never returned.

As time passed, some people began to doubt whether what their ancestors had said was true or not. What method did they use to enter this mainland?

The appearance of the Holy Dragon City had finally brought this matter to a conclusion. The ancestors of Morning Star City had not lied. They had just not found the right way.

The state preceptor had obviously guessed this long ago, so she was not as excited as the others. However, the brilliance in her eyes was enough to prove that her heart was not calm.

"So that's how it is. Then may I ask one more question, what is the world you were in before?"

Yue qianhua thought for a moment and said softly, " the place we are in is called the wilderness Warzone.

The Imperial advisor was in deep thought. He seemed to have never heard of this name.

In fact, this was very normal. Only God knew how long the ancestors of Morning Star City had been on this continent. The world of loucheng was extremely vast, and there were more than three thousand warzones. It was reasonable that the Morning Star Imperial Preceptor did not know about the wilderness Warzone based on the information recorded by his ancestors.

After a moment of silence, Imperial Preceptor Chen Xing said, have you heard of a place called the Saint war zone? "

Yue qianhua was slightly stunned. She looked at the Imperial Preceptor in a daze and said in a trembling voice, " "Grand Tutor, could it be that the ancestors of Morning Star City came from the Holy Spirit war zone?"

"That's the place. Have you heard of it?" the Morning Star Imperial Preceptor nodded.

Yue qianhua took a deep breath and said in a slightly excited tone, " "I've read my family's history book, and it records our origins. According to it, all the descendants of the elves in the world of loucheng are actually from the Saint war zone.

That's the ancestral land of the elves, and all the towers in the battlefields are controlled by the elves. Among the 3000 battlefields, they're one of the top 100 Most Powerful beings!"

Looking at the excited Yue qianhua, Imperial Preceptor Chen Xing was also full of smiles. He seemed to be proud of having such a powerful member of the same race!

Chapter 1435 Cooperation and the creation of new equipment

After a round of greetings, the conversation between the two sides finally entered the main topic.

I heard from Castellan Slade that you can make Morning Star City run. Is that true? "

After hearing the Imperial Preceptor's question, the residents of Morning Star City immediately perked up and stared at Yue qianhua and the others.

Because they had deliberately sealed off all information about Morning Star City, the outside world knew very little about the situation here. However, the Holy Dragon City was able to successfully deduce the origin of Morning Star City from a picture and a small amount of information they had collected. This was enough to prove their ability in this area.

Especially after confirming that the other party had also crossed over, the residents of Morning Star City became more and more expectant. They prayed that the Holy Dragon City could really do this and restore the slumbering Morning Star City to life.

After all, it had been the dream of the Morning Star Empire's royal family for many years to run the city. They had put in a lot of effort and invested a lot of resources, but they had not succeeded in the end.

It was precisely because of this that the Morning Star Empire's royal family held an emergency meeting after learning that the Holy Dragon City could solve the problem and finally decided to invite Yue qianhua and the others.

Upon hearing the Imperial advisor's question, Yue qianhua nodded and said softly, "Morning Star City should be built in the same way as a City Tower. However, due to some special reasons, even after it's completed, it doesn't have the functions of a City Tower.

If I'm not wrong, although the energy concentration inside morning stars city is much higher than the outside world, there's no possibility of it increasing any further. The foundation stone platform inside can't operate, and even the attributes of the residents of the city can't be increased, right?"

The Morning Star Imperial Preceptor nodded. In fact, it was just as Yue qianhua had said. Other than the framework of a building, the Morning Star City did not have any other functions.

This was what made the ancestors of the Morning Star Empire feel despair. If the tower could not function normally, they would be cut off from their ancestral land. After a long time, who would remember them, who had been wandering outside?

"We can give it a try, but we can't guarantee that Morning Star City will be fully activated. However, before we take action, I still have a question that I hope the state preceptor can answer."

"What's the question?" Imperial Preceptor Chen Xing nodded.

"If we want Morning Star City to run, there's an essential step, and that is to join the main control platform of the war zone.

Based on the current situation, the only way for Morning Star City to activate the tower is to join the main control platform that belongs to my Holy Dragon City. But the question is, are you willing to join the war zone platform, and will you leave the war zone and join the Holy Dragon War zone in the future?"

The questions raised by Yue qianhua were naturally what Tang Zhen wanted to know. He didn't want Yue qianhua to go to other war zones with the idea of acknowledging her ancestors and clan after he had matured in Morning Star City.

If such a situation really happened, even though the main control platform could impose sanctions, it still couldn't avoid losses.

It was because of this consideration that Tang Zhen asked Yue qianhua to raise these questions and asked for a clear answer after receiving the message from the Holy Dragon City cultivators.

The Morning Star Imperial advisor pondered for a moment and said to Yue qianhua, if Morning Star City joins the main control platform, what benefits will it receive, and what obligations will it have to bear? "

"After joining the main control platform of the war zone, the cornerstone platform can operate as usual to trade. You can use points to exchange for various items and cultivator skills on the platform. When Lou Cheng reaches level nine, you can open a plane channel and enter the other world to obtain various resources.

What Morning Star City needed to do was to hand over a certain portion of the world's origin after each invasion.

The reason why there is such a requirement is that the operation of the tower and the opening of the plane's channel both require a certain amount of Origin Energy. The main control platform can't make a loss."

Listening to Yue qianhua's story, the Imperial Preceptor and the others discussed in low voices from time to time, trying to determine if this rule was in line with the interests of Morning Star City.

I've understood the details. We'll discuss it in detail and give you an answer later.

The Morning Star Empire's Imperial advisor stood up and ordered people to send the Holy Dragon city's diplomatic corps to rest. She then headed to the forbidden area of the palace to discuss with the true rulers of the Morning Star Empire to decide whether they should cooperate with the Holy Dragon City.

This matter couldn't be rushed, so Yue qianhua and the others waited patiently.

.....

Holy Dragon City, equipment manufacturing center.

As the Holy Dragon City expanded day by day, the demand for weapons and equipment also increased. Take the armor used by the Holy Dragon city's cultivators as an example. So far, it had been upgraded five times, and its defense and practicality were constantly improving.

However, this kind of upgrade was only targeted at the equipment of high-level cultivators. The development of equipment for ordinary soldiers had not been paid attention to, and most of the time, they used the outdated equipment in the inventory.

When the Holy Dragon City had a small population, this method would not have much of an impact. However, as the number of towers under their jurisdiction gradually increased, the number of ordinary cultivators also increased. This situation had to be improved as soon as possible.

Under Tang Zhen's request, a set of standard equipment that could be promoted to the entire war zone had been put into research and development, and they had already begun mass production.

What Tang Zhen wanted to do today was to check the actual combat effects of these equipment. If they passed the inspection, they could be promoted throughout the entire war zone.

If they made the best use of time, they could complete the preparations for the reinforcements before the war with the orc Alliance and the two empires started.

In the weapon test Hall, a set of black armor had been put on by the test personnel. As the gunshot rang out, the bullets that hit the armor were all bounced off. The internal design of the armor could effectively reduce the impact of the bullets and ensure that the combatants would not be injured by the impact.

After that, he did some slashing with swords, hitting with heavy objects, soaking in water and burning in fire, and other experiments. The data he got was pretty good.

Tang Zhen also tried to wear this kind of battle armor and discovered that it was very fitting. It felt as if he was wearing a set of muscles and skin. There was no discomfort when he moved.

my Lord, this set of armor is made of a new type of alloy, and the surface is sprayed with a special improved solution. It can be hung on a variety of tactical equipment, and while ensuring its defensive power, it can also be upgraded at any time.

When he said this, the staff member displayed an upgraded battle armor. Compared to the battle armor on Tang Zhen's body, this upgraded battle armor was clearly more cool and powerful.

"What we're distributing is only the standard version of the Warframe. The user can use points to purchase various parts and upgrade them at any time according to their own preferences.

"These components include detection, location, stealth, energy shield, weapon enhancement, high temperature environment, underwater survival, and many other functions."

Tang Zhen nodded and said to the staff member, "What's the special solution you mentioned? what's its effect?"

this special solution is extremely tough. After drying and solidifying, even an ordinary wooden board will have a protective strength comparable to an alloy.

The staff member took out a sample and introduced it to Tang Zhen, this solution is not only sprayed on armors, but also on drones and chariots. The effect is very good!

Tang Zhen nodded as he looked at the data that the staff member took out. Then, he personally operated the firearms, swords, and other weapons. He discovered that even without the use of special minerals, the killing effect was not inferior to that of demon weapons.

This was the power of technology. The current Holy Dragon City no longer needed to spend a large amount of time to create a piece of magic weapon equipment like in the past. Instead, they could use mass production to equip an Army in a short time!

Chapter 1436 The panic of the residents of Yuanshan city

The weather gradually turned cold. In the fields of the exiled land, golden grains were about to ripen. A bumper harvest was already set in stone.

With the help of the main control platform's magical transformation ability and the advanced planting technology of the original world, the land of exile had now become a fertile field.

The people who looked after these crops were basically the remnants of the demon barbarian race. After experiencing the pain of war and the crisis of extinction, the remaining remnants of the demon barbarian race had long been afraid of war and avoided it like the plague.

If there were no accidents, the demon barbarian survivors would not be able to participate in the war for the next few decades.

In fact, this was also good. After all, according to the Holy Dragon city's statistics, the number of demon barbarian survivors was less than one hundred thousand, and most of them were ordinary people.

Asking them to pick up their weapons and fight was no different from sending them to their deaths in vain.

Therefore, Tang Zhen accepted the demon barbarian princess's request and asked them to focus on farming and taking care of this land that had regained its vitality.

The demon barbarian survivors were properly settled. The immigrants from the undead world had also adapted to their current status. After Holy Dragon City defeated the flame Empire and took over a large area of land, a portion of the undead immigrants also began to move to the occupied area.

It was impossible for Tang Zhen to gather all the immigrants in one piece of land to avoid any unforeseen events in the future. Although the special social structure of Loucheng was already very mature and could avoid rebellions to the greatest extent, some things still needed to be taken care of before they happened.

According to Tang Zhen's plan, these undead immigrants would eventually be scattered to dozens of residential points on the continent. Then, they would try their best to integrate with the local Aborigines.

In this way, it would only take a few decades for the undead immigrants to completely ignore their past identities and live peacefully on this continent.

.....

After the smoke dispersed, the towns occupied by the Holy Dragon City were rejuvenated. All kinds of new things appeared in the eyes of ordinary people, causing their lives to change without them knowing.

The rich people in the city were already holding their phones and going back and forth in their cars. Items like bicycles had also gradually become part of the lives of ordinary people.

Yuanshan city was once a bustling city in the raging flame Empire. After the war began, it fell into the hands of the Holy Dragon City in less than three hours. It was also because of this that the damage to the city was not serious.

With the end of the war, the merchants on the streets reopened for business, and the number of people coming and going gradually increased. The only change was that the patrolling soldiers on the streets had all changed into the Holy Dragon city's military uniform, looking more heroic and majestic.

In the beginning, the residents of Yuanshan city were not used to it. However, after realizing that Holy Dragon city's management was very lax, their originally uneasy mood gradually calmed down.

However, in the past few days, the residents of Yuanshan city had discovered that something was not right. They did not know when it had started, but many outsiders had appeared on the hillside outside the city.

These people looked like walking corpses. When they first appeared, they even caused a panic, making the residents of Yuanshan city think that these monsters were created by the necromancers.

Fortunately, as soon as the rumors appeared, the officials of Yuanshan city came forward to explain that these strange-looking outsiders were actually immigrants who had moved here, so the residents did not have to panic.

With the official explanation, the hearts of the Yuanshan city's citizens finally settled down. After a few days, no one paid any attention to these strange-looking outsiders.

However, just yesterday afternoon, the officials of Yuanshan city had announced through a broadcast that the city gate of Yuanshan city would be closed from the next morning to noon. No one was allowed to enter or leave during this period.

Especially the area near the East Gate, which was directly listed as a forbidden zone. Those who didn't listen to the warning might even be killed directly!

The residents who heard the broadcast panicked again. They didn't know what the Holy Dragon City was up to. Thus, rumors began to spread in private, such as a massacre and extermination of species, and the closing of the city to capture people. These rumors also came from the mouths of some suspicious people.

Some people scoffed at this, while others believed it. They even made preparations overnight. If something really happened, they could escape at the first moment.

The next morning finally arrived.

Many residents had stayed up all night, waiting for dawn to break, but nothing happened!

However, this did not mean that the danger was over, because according to the broadcast announcement, there was still half a day before the city gate could be opened.

The flow of people on the streets was obviously much smaller. Even if someone went out to the streets, they would also specially observe the surrounding environment to see if there was anything wrong.

In the end, everything was normal!

The residents of Yuanshan city were confused. What was Holy Dragon City up to? why did they suddenly close the city gates and everything was still normal in the city?

On second thought, that was not right. The notice only stated that no one was allowed to enter or leave the city gate. Since there was nothing wrong in the city, could there be something wrong outside the city?

More than one person had thought of this, especially the East Gate area mentioned in the notice. Something big might happen!

For a time, the streets were filled with residents who were heading to the East Gate area. After meeting each other on the street, they looked at each other and continued to walk with their heads down. From time to time, they would whisper a few words, looking quite mysterious.

It didn't take long for the street where the East Gate was located to be overcrowded. The few tallest buildings nearby had long been overcrowded with people. At least a dozen faces were squeezed by the windows.

According to the rules of the flame Empire in the past, the height of the buildings near the city wall could not be higher than the city wall to avoid being disadvantageous to the guards on the city wall. However, as time passed and the form of war changed, this rule was gradually ignored. There was more than one similar building in Yuanshan city.

Because these taverns were built on higher ground, they could clearly see the situation outside the East Gate, which was why it was overcrowded and the business was extremely good!

When he finally managed to squeeze his way up the stairs, he leaned closer to the window to take a look. As expected, the problem was on the hillside at the East Gate.

It was unknown when it had started, but nearly 10000 outsiders had gathered here. Each and every one of them had a strong aura, holding rifles in their hands and carrying long swords on their backs. Even from far away, one could feel the murderous aura coming from them.

Someone was shocked, thinking that they were bandits preparing to attack the city. He couldn't help but shout, "I said that those fierce-looking weirdos on the eastern Hill are not good people. Look, look, I was right!"

What are you all waiting for? hurry home and pack up your gold, silver, and valuables, so that you can escape after the city is broken!"

As a result, the moment this person spoke, he immediately attracted many disdainful gazes, as if they were looking at an idiot.

"Take a closer look at the people in the sky. Don't talk nonsense, okay?"

that's right, that's right. If you talk nonsense again, you might be caught by the secret agents and be charged with deluding people's minds. They'll throw you into the wilderness to build a railway!

The crowd sneered. The residents who had been clamoring about the bandits' attack turned red and craned their necks to take a closer look. Only then did they realize that there were dozens of Holy Dragon City cultivators in black armor floating in the air in the distance.

After seeing this, the man immediately realized that he had made a mistake. If these strange people were really bandits, they would have been killed by the Holy Dragon City cultivators long ago.

Having personally witnessed the battle between the Holy Dragon City and the raging flame Empire, as well as the slaughter between the cultivators from both sides, the residents of Yuanshan city had a deep understanding of the strength of the cultivators from the Holy Dragon City. Even though there were over ten thousand of these strange people, they might not be a match for them if they were to really fight.

Even now, there were still people who remembered the Holy Dragon City cultivators taking out countless bombs during the siege and blowing up the raging flame Empire's defenders.

It sounded like a fantasy to have dozens of people take down a city, but it was the truth!

Chapter 1437 The residents "shock

A mystical and strange scene appeared in front of the residents of Yuanshan city.

A man in a gorgeous robe, under the protection of a group of cultivators, slowly walked to a sacrificial platform carved out of hard rock. After shouting a few words to the sky, he slowly half-knelt in front of the platform.

“Swish!”

The surrounding people half-knelt and turned their eyes to the central area with solemn expressions.

the city is my root, and the residents are my family. Since the day we meet, I will treat you with sincerity for the rest of my life!

“It’s my wish for Loucheng to prosper and not fear external humiliation! The road is long and difficult. Brothers and sisters, you must do your best and die nine times without regret!”

“So today I swear that I will abide by the law and be diligent.”

As the roars of more than 10000 people rang out, the long-robed man in the center slowly stood up and placed the tower’s cornerstone and brain on it.

The residents of Yuanshan city inside the city wall looked at each other, not understanding the purpose of this kind of behavior. Could it be a mysterious sacrificial activity?

But what happened next left the onlookers dumbfounded. Even after many years, they would not be able to forget it.

A building appeared out of thin air. At first, it was like an illusory reflection in the water. Then, it gradually solidified and finally appeared in front of everyone.

It wouldn’t be strange if it was some kind of illusion, but there was no lack of experts among the onlookers. They could be sure with one look that the building in front of them was absolutely the real thing!

This was what shocked them the most. What kind of magical method could actually build a real building in the blink of an eye?

This kind of thing had gone beyond the scope of ordinary cultivators. It was a completely strange and mysterious cultivation system. Now, it was fully displayed in front of them and they were lucky enough to witness it with their own eyes.

Suppressing the shock in their hearts, the onlookers continued to observe the movements on the hillside. He was afraid of missing the slightest detail.

They had already guessed that the appearance of this mysterious building might only be the opening act. There would definitely be more shocking things appearing later!

Sure enough, it didn’t take long for more than a dozen light doors to appear on the hillside. Then, countless ferocious monsters roared out of the light doors and rushed straight toward the building that had just appeared.

It was as if the building was the mortal enemy of these terrifying monsters, and they had to destroy it at any cost.

As for the people who knelt on one knee to make the oath, they already had their weapons in their hands. The moment the monster appeared, deafening gunshots were heard.

Blood splattered everywhere, and flesh and bones turned into mud. Life seemed to have become cheap at this moment. There was only one goal between humans and monsters, and that was to completely destroy the other!

The residents of Yuanshan city trembled when they saw this scene. It was only at this moment that they understood how cruel it was. They finally understood how lucky they were to be able to survive on such a bloody battlefield!

Some people were still worried that these monsters would make Yuanshan city their target. Fortunately, from the beginning to the end, these monsters never paid any attention to the nearby Yuanshan city, as if it had never existed.

The killing continued, and the monsters' corpses had already piled up into a mountain. Because of the advantage in numbers and weapons, the losses on the guards' side were almost negligible!

This strange scene gave the onlookers a faint feeling that this kind of killing was just an ancient and mysterious ritual. The purpose was to use the blood of monsters to water this building that had suddenly appeared.

As time slowly passed, the light doors began to fade, and the number of monsters that emerged from them decreased.

When the last monster was shot dead, deafening cheers resounded through the hillside. The guards waved their swords and celebrated the difficult and bloody victory on the monster's corpse!

Then, under the watchful eyes of the combatants and onlookers, the building became illusionary again, and its size continued to expand. When it finally solidified, it had become a tall and abnormally large Super Fortress that looked as if it was cast in copper and iron!

The monster's corpse on the hill suddenly disappeared, as if it had never existed!

The onlookers were surprised, but they were quickly attracted by the Super-building in front of them.

The residents of Yuanshan city had never seen such a tall building before. It was like a mountain that had suddenly emerged from the ground, standing proudly outside the East Gate of Yuanshan city.

After that, the combatants entered the huge building one after another. Soon, the figures of the combatants appeared at the top of the building and by the windows.

"Look, what's that?"

One of the onlookers suddenly shouted.

It turned out that at some point in time, a multi-colored cloud had suddenly appeared near the building, like a rainbow after a rain, looking extremely gorgeous.

When the cultivators saw this, they gasped and their eyes were filled with envy and madness.

Only they knew that these seven-colored clouds would only occasionally appear when the world Energy had reached a certain density.

Being in such a holy place for cultivation was definitely a dream for cultivators. Even if they didn't dare to dream of reaching the realm in the past, as long as they cultivated in such an environment, it was completely possible to achieve it!

After realizing this, the cultivators watching the scene became excited. They secretly made up their minds to figure out the origin of this mysterious building and then find a way to enter it.

Creak! Creak!

The East City gate, which had been tightly shut earlier, was slowly opened. The residents of Yuanshan city who were watching the scene fell silent at this moment. It was as if the open City gate was the mouth of a ferocious beast, and no one dared to enter it.

A cultivator in the crowd hesitated for a moment, then gritted his teeth and rushed out of the crowd. He was the first to head straight for the eastern Hill.

His actions were like poking a needle into a balloon. Then, hundreds of cultivators rushed towards the eastern Hill like a flood.

When the ordinary residents saw this, they were stunned for a moment. Then, they shouted and followed after him.

They might not be able to see the magic of this newly built city, but they knew that it was definitely extraordinary.

Now that it had just been established, if he could come into contact with it immediately, perhaps something good would happen to him.

Of course, most of the residents of Yuanshan city just followed the crowd. After seeing the people around them rush over, they believed that the law could not punish the masses. They would not be in any danger if they went to watch the show.

It didn't take long for the entire Eastern Mountain slope to be surrounded by the residents of Yuanshan city with all kinds of thoughts in their minds. Their eager eyes were constantly looking at the residents of Loucheng who were going in and out of the city gate.

Unsurprisingly, when they were about to approach the city, they were stopped by the residents of the city on duty, who forbade unrelated people from taking a step closer.

Seeing this, the ordinary residents could only sigh in their hearts, feeling sorry for not being able to enter the city to satisfy their curiosity.

On the contrary, the cultivators were extremely determined and expressed their attitude to the people in charge of the city guards, hoping that they would have the opportunity to enter the city to cultivate.

As a cultivator, he was already defying the heavens. Only by cherishing every opportunity could he possibly break free from the shackles.

This once-in-a-thousand-years opportunity was right in front of them. How could these low-level cultivators, who were born ordinary and struggled for cultivation resources, miss it so easily?

Faced with the cultivators 'pleading, the residents of the City Tower in charge of security hesitated for a moment before nodding and agreeing to help them ask if these cultivators had the opportunity to enter the city Tower to cultivate.

The cultivators thanked him profusely and waited patiently. At the same time, they tried to get close to the other residents of Loulou city and ask about the specific origin of the city.

...

It didn't take long for the residents of Lou city to bring back an answer that surprised the cultivators.

To obtain the opportunity to enter the tower to cultivate, one must first join the Holy Dragon city's mercenary army. Then, one could use their Battle Points to exchange for the opportunity to cultivate and various resources. If one performed well, they might even be qualified to become a resident of the tower!

After the cultivators heard the specific answer, they were all overjoyed. Other than a small number of cultivators who were hesitant, most of them joined the mercenary group without hesitation.

Chapter 1438 Meeting of the city Lords

In the Holy Dragon city's City Hall, a holographic map appeared in front of everyone, marked with red dots.

Nearly a hundred cultivators of Lou city surrounded the map and stared at the mark on it with excitement.

They were the only ones who knew what these red dots represented. They were towers that had been built and were waiting to be built. The cultivators present were basically city Lords or future city Lords, and each of them had important responsibilities on their shoulders.

Tang Zhen's goal was to cover the entire continent with towers. As the war zone was built and the land expanded, the number of towers would increase.

This was reasonable. If there were only a thousand loucheng in a war zone, people would laugh at them!

Tang Zhen stood in the middle of the crowd. He pointed at the area that once belonged to the flame Empire and said, "Up until now, we've already built ten towers between the imperial capital and the great Wall of Miracles. Once we've taken over all of the blazing flame Empire's territories, we'll build another ten towers!

In order to ensure that the new buildings could protect themselves as soon as possible, they were all upgraded to Level 5. Although the process of killing monsters was longer, it saved a lot of time.

Fortunately, our cultivators aren't weak. Even if there are more monsters, we can still deal with them.

If this happened during the Holy Dragon city's initial construction, even if there were a hundred of us, we wouldn't be able to defend the city!"

The old residents around him laughed at the same time. They had all experienced the battle to defend Holy Dragon City when it was first built. Now that they thought about it, it seemed like it was just yesterday.

Little Rui, who was standing beside Tang Zhen, laughed, the term 'hell mode' is too apt. My Lord, you don't know this, but after the defense of the city ended, the residents under my command were all so tired that they couldn't even get up from the ground!

The other city Lords chuckled when they heard this. Clearly, they had also experienced similar things, so they felt the same way.

"There's nothing we can do about it," Tang Zhen said with a smile. "My original intention was to cancel the advancement method of this monster siege. Unfortunately, the main control platform won't allow it no matter what.

In fact, this was not strange. After all, this method of upgrading had been carried out for countless years, and there was naturally a reason for its existence.

At the very least, it could let the residents of the city see blood and realize that it was not easy to build the city. In the future, they would be more protective of the city.

Therefore, after some discussion, they decided to use this one-step method to advance to Level 5. It was reasonable for the number of monsters to increase.

As for the battle to advance from rank 5 to rank 6, there's still no way to deal with it, so we can only wait for now."

Tang Zhen felt that he still needed to explain in order to prevent people from having the idea of favoritism.

the main control platform only gave ten people the opportunity to directly upgrade to level 9. They didn't need to go through the promotion battle and the training in the small world. The purpose was to build the battle zone as soon as possible.

Everyone nodded their heads at the same time when they heard this. They understood that it was not easy to establish a war zone. It was already not easy for Tang Zhen to be able to do this.

"City Lord, I would like to ask when we will attack the orc Alliance. Our brothers can't wait!"

The one who asked the question was a King level cultivator, an old resident of the Holy Dragon City. He was only one step away from becoming a king of laws. There were more and more powerful people like him in the Holy Dragon City.

"Bone Cat, don't use your brothers as an excuse. I think you are in a hurry to become the city Lord?"

The bone Cat didn't mind and said, "Isn't there a saying in city Lord's hometown? I've changed it a little, which is that cultivators who don't want to be city Lord are definitely not good cultivators!

Hehe, actually, I'm not the one who's the most anxious. Didn't you see that the tycoon Captain has already rushed to the front line? he asks three times a day when the war will start, clamoring to destroy the old nest of the orc Alliance.

It's all because the city Lord placed his tower in the heart of the orc Alliance. As long as he doesn't defeat those orcs, his tower will be empty. It's no wonder he's so anxious!"

Everyone burst into laughter at the thought of their nouveau riche Captain scratching his head.

However, there were also people who were worried and asked, "City Lord, although we have a large population and more than five million cultivators of all levels, we'll need to transfer at least half of our cultivators if we start a war with the two empires and the orc Alliance at the same time.

And this is after excluding the Morning Star Empire. If they interfere, I estimate that we'll need at least 500000 more soldiers!

However, the Holy Dragon City still needed to be guarded, and the Golden-armored corpse Emperor in the corpse race world needed to be guarded. He estimated that it would not take long for the ten Tower City to open up two plane channels again.

With so many things added together, do we have enough manpower?"

Everyone nodded slightly. They had also realized this problem and were more or less worried.

Tang Zhen's eyes swept over everyone as he smiled and said, "Your worries aren't unreasonable. Starting a multi-line war is a great taboo for militarists, and the slightest carelessness will lead to complete defeat.

Since we've come to this point, I'll tell you the specific plan so that you won't be uncertain."

Tang Zhen picked up a cup of tea and said in a deep voice, "First of all, let's talk about the radiant and eternal empires. After the invasion of the orc Alliance, the strength of these two empires has been greatly reduced. Even if the orc Alliance chose to temporarily stop the war because of fear of us, these two empires can't recover in a short time.

In the meantime, our special agents have already infiltrated the upper echelons of the two empires and the military. As long as the time is right, we can completely paralyze them in an instant.

If it doesn't work, I don't mind throwing a few more fireworks to let them know the consequences of going against Holy Dragon City!"

Tang Zhen's tone was extremely calm. However, it caused those who heard it to feel a slight chill. This was because this city Lord only needed to give an order and hundreds of thousands of living beings would be turned into dust!

A General's success was built on ten thousand bones. A country was built on blood. If Tang Zhen wanted to build a war zone, who knew how many unavoidable killings he would have to experience?

This had nothing to do with bloodlust. As long as one stood in the way of this path, they were destined to be crushed into dust. No one could stop them!

It seemed that Tang Zhen also didn't want to talk about this topic, so he directly turned to the orc Alliance.

“The orc Alliance and the three empires went to war at the same time. Although there were many casualties, they also gained a lot. Moreover, this was a selection to remove the weak and only the elites were left!

Against such an enemy, he could not take any chances and had to go all out.

Of course, we already have the advantage. Whether it's the strength of our cultivators or our weapons and equipment, we can crush the other party. As long as we don't make too many mistakes, it's only a matter of time before we defeat the orc Alliance.

In addition, the orc Alliance isn't a piece of iron. There are many tribes that are being bullied in their territory. Our special agents have also infiltrated them and are trying to pull them apart. According to the information I received, they have already achieved some results.

As for the lack of cultivators, there was no need to worry about that.

Let's not talk about the new equipment that will greatly enhance the combat power of low-level cultivators. Just the newly recruited mercenary group alone has more than ten thousand people. I believe that when the war begins, we will have at least two hundred thousand native cultivators.

Although the good and bad are mixed, it's enough to alleviate the situation of insufficient manpower.”

When Tang Zhen spoke up to this point, he used a slightly cold tone, “Besides, from the very beginning, I've already planned to end the battle quickly. If the enemy is still putting up a stubborn resistance, I'll directly use the nuclear bomb without any hesitation.

We don't lack land, all we need is a stable rear. In order to achieve this goal, we can do whatever it takes!”

Tang Zhen then looked in the direction of the Morning Star Empire and said indifferently, as for the Morning Star Empire and the Golden-armored corpse Emperor, if they cooperate obediently, everything will be fine. If they dare to cause trouble and hinder the progress of the war zone, then there's no need for them to exist!

“This is my arrangement, do you all understand?” he turned to the city Lords.

The hearts of all the city Lords trembled when Tang Zhen's gaze swept over them. It was as if he could see through one's heart. They stood up in unison and said in unison, “Understood!”

It's good that you understand. Let's end the meeting!

...

Tang Zhen gently nodded. He turned around and walked to the window. He did not say anything as he looked at the clouds in the distance. No one knew what he was thinking in his heart.

Chapter 1439 The realm Lord and the conditions of cooperation

Just as the Holy Dragon City was preparing for war and building low-level buildings, Yue Qianhua and the others in the Morning Star Empire finally met the state preceptor and received the royal family's reply.

Just as Tang Zhen had expected, the Morning Star Empire was not willing to be controlled by others, especially its Imperial City. It did not want outsiders to encroach on its territory.

However, if they did not join the main control platform of the Holy Dragon War zone, there was no way for Morning Star City to be activated!

After confirming that there were no other solutions, the royal family of the Morning Star Empire, after careful consideration, requested to hold formal talks with the Holy Dragon City.

It was obvious that they did not want to hand over the city to the main control platform just like that. Even if the restrictions were not too great, it was still something that the Morning Star Empire was unwilling to accept. The purpose of the meeting was to find a more beneficial way of cooperation.

Although he was a special envoy, he still needed Tang Zhen's permission for such important matters. Therefore, after asking Tang Zhen for permission and getting a reply, he agreed to the Morning Star Empire's request.

The meeting was held on the first vine of Morning Star City. It was as large as a mountain, and its top had been forcibly turned into a mosquito-like shape, forming a huge platform in the sky.

It had been deliberately trimmed and decorated with flowers and wisteria, making this place look like a paradise, beautiful beyond words.

Looking down from above, one could have a panoramic view of the surrounding scenery. It was truly an excellent viewing platform!

A long table was set up, and the representatives of both sides were already in place. The negotiation officially began.

"Your Excellency Yue qianhua, I have a few questions here that I hope you can answer."

After Yue qianhua nodded, the Morning Star Imperial Preceptor continued, "If Morning Star City is merged with the main control platform, is there a possibility of separation? what are the conditions and restrictions?"

Yue qianhua had already guessed that there would be such a question, so she had already prepared a script in her heart. Without any hesitation, she said, "Under normal circumstances, after Lou Cheng received the guidance of the main control platform of another battle zone and obtained the permission of the original platform, he can leave the battle zone as usual.

Of course, this process required a huge price. Under normal circumstances, it would be paid using the world's origin!

If you leave without the permission of the original platform, it is equivalent to betraying the war zone. Then the main control platform will issue a kill order and kill the defectors at all costs!"

Yue qianhua looked up at the Morning Star Imperial Preceptor, who was deep in thought, and continued,"As for the restrictions, there aren't many of them. At the end of the day, the main control platform is just a supervisory existence. Its main function is still to run the cornerstone platform. As long as it does things according to the basic rules, it won't be too restricted!"

Hearing this, the Morning Star Empire's representative discussed in low voices and seemed to have made a decision.

Your Excellency Yue qianhua, we have decided to merge with your main control platform. However, before that, we need to sign a contract. That is, if we wish to leave the battle zone, we will not be stopped by you.

The Morning Star Imperial Preceptor took out an ancient-looking box and took out an item that looked like a scroll.

"This is the contract our ancestors brought from our ancestral land. It's said that it has an extremely strong binding force. Even if it's a world Overlord, after breaking the contract, they will be punished by the power of the laws, unable to use any World Energy!

That's why we hope to sign a contract with city Lord Tang Zhen. This way, we can ensure that we won't suffer any losses to each other!"

Yue qianhua's brows furrowed slightly. The item that the Morning Star Empire had taken out had clearly exceeded her expectations, and her actions made her feel very uncomfortable.

"I'm sorry, I can't make the decision on this matter. I have to ask the city Lord first!"

The Morning Star Imperial Preceptor smiled and indicated that it was fine.

After taking out the communicator from her storage ring, Yue qianhua clicked on it a few times and quickly connected with Tang zhenjian.

After hearing the Morning Star Empire's request, Tang Zhen, who was in the Holy Dragon City, was slightly taken aback. He then began to ponder.

Tang Zhen had actually heard of the contract that the other party had taken out. This was an item that was sold on the cornerstone platform. It required a relatively high amount of Battle Points to exchange for.

The prerequisite was that the main control platform had to be of a high enough level. Otherwise, even if one had Battle Points, the main control platform would not have any products. It was obvious that the ancestors of the Morning Star Empire had bought it from a higher level battle zone and brought it to this continent.

As for the realm Lord that the other party mentioned, it was the realm after a spiritual Emperor refined Lou Cheng. Each person could carry a small world and launch an invasion of the other world by themselves!

When the cultivators reached this level, they were like human-shaped buildings. When needed, they could send out thousands of troops, and when needed, they could even join forces with many sector Lords to invade!

Compared to the plane channel opened by the cornerstone platform, this invasion method was faster, more covert, and more convenient to evacuate. It was absolutely impossible to guard against!

Tang Zhen was still some distance away from breaking through to this realm. This was a matter of grinding and grinding. He simply couldn't be too hasty.

The fact that the ancestors of the Morning Star Empire had such a rare and precious scroll was enough to prove that they came from a powerful Warzone. Their ancestors might even have been sector Lord level experts.

This was the only reason that could explain why he had appeared in this ownerless land. It seemed like he was planning to build a war zone here!

Since a sector Lord could be called a human-shaped tower, he naturally had the ability to connect to the main control platform, building a tower in the land of no king wasn't impossible.

However, this process required a large amount of Origin Energy. The main control platform couldn't transfer it across worlds, so it could only consume the origin Energy carried by the sector Lord.

As for why the other party did not succeed, according to Tang Zhen's guess, it was because this sector Lord's world origin was insufficient, or he was once seriously injured, causing an accident during the construction of Morning Star City, which led to the current situation.

As for the reason why Morning Star City wasn't activated, first, it was because the sector Lord had already left this place. Second, it was because the other party had already died. Tang Zhen himself was more inclined to the second guess.

Otherwise, how could such a valuable contract appear in Morning Star City? it was obvious that the descendant of the sector Lord had used his legacy.

After thinking about it for a while, Tang Zhen gave a reply and asked Yue qianhua to convey the message.

After turning off the communication device, Yue qianhua looked at the Morning Star Imperial Preceptor and said, "our city Lord agrees to sign the contract, but there are also a few requirements that need to be written into the contract.

"Please speak!"

"No main control platform will nurture a tower that can leave the battlefield at any time, because this is a losing deal. Because in the process of running loucheng, cultivators of loucheng would carry out transactions through the cornerstone platform and Exchange for various benefits that originally belonged to the residents of this Theater of Operations!"

The Morning Star Empire interrupted Yue qianhua and asked doubtfully, as far as I know, exchanging items from the cornerstone platform requires points, and the points are hard-earned by Lou Cheng's cultivators. Isn't this a fair exchange? why do you say it's a loss-making deal?"

Yue qianhua shook her head, "these items that are traded to Lou Cheng's cultivators through points are only a fraction of their original value. That's why they're called welfare.

As time goes by, these benefits will accumulate to an astronomical figure!"

The Morning Star Imperial advisor nodded and motioned for Yue qianhua to continue.

“Therefore, when you trade on the cornerstone platform, you can choose to trade at the original price. Although there are no benefits, it wins in the fact that you have everything.

If you don't like this method, you can use other ways to make up for the difference. We will send you a bill regularly, and you can also send someone to calculate it.

the ratio of the natural source you take when you invade the other world must also be changed. Originally, you'll only take half, but you'll have to take two-thirds. The extra will be a benefit for the city, and you won't be able to enjoy it either.

As for the cost of leaving the war zone, we'll need to recalculate it. ”

After she finished speaking, Yue qianhua pondered for a moment and continued, ” in addition to these, I hope that your cultivators can accept employment from other buildings and be paid in points!

this is our request. As for the other details, we can continue to discuss them later!

After Yue qianhua finished speaking, she looked at the Imperial advisor quietly, waiting for their final reply.

...

Chapter 1440 Re-opening the Morning Star City

After some discussion, the Imperial advisor and the others finally agreed to the Holy Dragon city's request.

Other than the Holy Dragon City, they really could not find a solution to the problem. After a thousand years of waiting, they were no longer interested in continuing to wait.

If they missed this opportunity, not only would the Morning Star Empire have to continue exploring, but they would also have to face the danger of being invaded by the Holy Dragon City at any time.

The three empires and the orc Alliance were examples. The Holy Dragon City would never leave a potential enemy out of control. The most likely way was to completely eradicate them!

Now that the Holy Dragon City had given them a way out, if they did not quickly grasp this opportunity, who knew what changes would happen in the future?

Of course, bargaining was inevitable during this process. Fortunately, both sides were satisfied with the final result, and the morning Star Empire was temporarily tied to the Holy Dragon City.

As for whether the other party would stay or leave in the future, Tang Zhen didn't really care. After all, the relationship between the two parties was a cooperation of benefits. It was completely different from the other platforms in the war zone.

Without the constraints of the Morning Star Empire, the Holy Dragon City could attack without restraint until they had the entire continent in their hands.

As for Yue qianhua's plan, it was her own business. Tang Zhen would not interfere too much.

Because she had the experience of being the city Lord, Yue qianhua was obviously more adapted to this role. Since this was the case, why wouldn't Tang Zhen be happy?

The signing of the contract and merging with the main control platform required Tang Zhen's personal presence. Hence, after the negotiations between the two sides ended, Tang Zhen immediately took a small warship and headed straight for the Morning Star Empire.

This continent wasn't very large, and it wouldn't take long to reach it by small warships.

Due to Tang Zhen's arrival, the Morning Star Empire had removed the anti-air formation, allowing the small battleships to enter. Then, under the guidance of the cultivators of the Morning Star Empire, they finally landed in front of the city.

At this moment, there were many people standing outside Morning Star City. They were all residents of the city and direct descendants of the residents of the city, the true nobles of the Morning Star Empire.

Just like the real residents of the city, they rarely appeared in the outside world or even out of the city. They were only active near the city.

Compared to the entire Morning Star Empire, the number of these nobles was too small. There were only a few tens of thousands of them.

However, the strength of the residents of Morning Star City could not be underestimated. High-level cultivators were everywhere. Although they were still far from Holy Dragon City, this was a rare sight in other places.

It had always been claimed that the Morning Star Empire had a small territory and a small population, but the proportion of cultivators was the highest on the continent. It was indeed true.

This situation was related to the racial talents of the Morning Star Empire. They were born with a body that was easy to cultivate. In addition, they were in a forest, which was a suitable environment for living, so their cultivation was naturally much easier.

As the small battleship slowly descended, everyone present shifted their gaze to Tang Zhen's group that had just walked out. Their eyes were filled with curiosity.

Although they were in Morning Star City, they still had special channels to obtain information. Even the slightest movement on the continent could not be hidden from the residents of Morning Star City.

It was also because of this that they knew that the smiling young man in front of them was the mastermind behind the chaos on the continent!

"I'm the city Lord of Morning Star City, Yu Heng. Welcome to Morning Star City, Lord Tang Zhen!"

The true owner of this place, a rather old man, smiled and bowed to Tang Zhen.

Judging from his aura, Yu Heng had strength that far exceeded ordinary Kings of laws. As for whether he could become a spiritual Emperor, it would still depend on his luck.

After exchanging some pleasantries, they headed into the tower and headed straight for the room where the foundation stone platform was.

Perhaps it was because of the different warzones, but the cornerstone platform of Morning Star City was completely different from that of Holy Dragon City. Its appearance was like a mirror hanging on the wall, and it looked chaotic and unclear.

Yu Heng stood in the mirror, his face full of emotion. He sighed, "City Lord Tang, you might not know this, but my Morning Star clan has been here for more than two thousand years. Due to our ancestors' instructions, we rarely participate in the disputes of the continent.

During this period, my ancestors paid a great price to get Morning Star City to work, but the results disappointed us time and time again."

Looking at Tang Zhen, Yu Heng continued, Sir Tang Zhen, do you understand this kind of pain? it's like a child who has left home. He clearly has memories of his home, but he's unable to cross over the barrier and can only suffer in a foreign land for a thousand years!

"So, as long as there's an opportunity, Morning Star City will definitely return to the Saint war zone, right?" Tang Zhen smiled and said softly.

Yu Heng was silent for a moment before lightly nodding his head.

it's fine. You and I are in a cooperative relationship, so we should part on good terms. However, I have to say that the home you imagine might not be beautiful. The real world of loucheng is far crueler than you think!

so what? " Yu Heng chuckled. this is my homeland, after all. Besides, this is The Last Wish of my ancestor. If there's a chance, I'll naturally work hard to complete it!

Tang Zhen gently nodded his head. He extended his hand and touched the smooth mirror as he said in a deep voice, "If I'm not wrong, your ancestors' purpose in coming to this land of no king was to build a city here, monopolize this land, and then find a way to merge it into the Holy Spirit war zone, right?"

"The ancestor did have this intention, but he failed at the last moment, which is also a regretful thing. Now that the Holy Dragon City had entered this land, they were unstoppable. Wasn't this also the dream of their ancestors!

In fact, it has nothing to do with us who controls this land, because our goal is not here. Otherwise, we would have taken action long ago!"

"Is that so? I hope so!" Tang Zhen nodded.

How could Tang Zhen completely believe Yu Heng's words? the reason why they didn't occupy this land was because they didn't have enough strength.

If Morning Star City had established a connection with the Holy Spirit war zone before the Holy Dragon City appeared, then this land might not be a land without an owner, and the Holy Dragon City would not be able to teleport here randomly!

After the two of them finished chatting, Yu Heng took out a contract and passed it to Tang Zhen for him to examine. He then imprinted his spiritual imprint on it.

After Tang Zhen confirmed that there was no mistake, he also imprinted his spiritual imprint on it.

The signed contract disappeared in front of the two of them, which proved that it was in effect. If they wanted to check it in the future, they could summon it at any time.

Yu Heng, on the other hand, revealed a trace of surprise. It was obvious that he had sensed something from Tang Zhen's spiritual imprint. The gaze he used to look at Tang Zhen became increasingly solemn.

"Since the contract has been signed, I'll need your help, city Lord Tang!"

"You're too polite. This is something that should be done."

Tang Zhen walked in front of the foundation stone platform. He extended his palm and suspended it on the tower's foundation stone, connecting with the main control platform.

Yu Heng stood at the side and looked at Tang Zhen with anticipation.

A white light appeared on Tang Zhen's palm. Soon after, this light seemed to transform into liquid water that dripped onto the dim building's Foundation.

This was the purest form of heaven and earth energy, the source energy that was completely liquefied. Its purpose was to activate the foundation stone platform, allowing it to establish a connection with the main control platform.

Shua shua shua!

There seemed to be a soft sound in his ear, and then the mirrors around him shone brightly at the same time. Groups of strange runes flowed through the mirrors like a waterfall, and then turned into a dazzling array of options and pictures.

In the sky above Morning Star City, a beam of light shot into the sky and did not dissipate for a long time.

...
