

Alternate 1441

Chapter 1441 Yu Heng's request

When they saw the dazzling light shooting up from the top of the city Tower, the residents of Morning Star City waiting outside cheered in unison. Many old people knelt on the ground and prayed in low voices with tears in their eyes, as if they were comforting the spirits of their ancestors.

Only they themselves knew how much hardship their clansmen had paid in order to realize this dream!

Under their eager gazes, the sky above Morning Star City suddenly changed dramatically. The originally clear sky became as if night had fallen, and bright stars could be seen faintly.

The image of a giant tree slowly appeared in the night sky, and those bright stars actually became the flowers and leaves of the giant tree, exuding an ancient and mysterious aura.

When they saw the giant tree, the residents of Morning Star City were immediately excited. They kept shouting " progenitor's tree " and knelt on the ground in unison.

This mysterious ancient tree was the totem of the elves. It often appeared in the records of the ancestors and in their daily lives. He did not expect that when the tower was activated, the projection of the progenitor tree would appear!

To the residents of Morning Star City, this was equivalent to the recognition of their ancestors. How could they not be excited when they saw this?

A few minutes later, The Phantom of the giant tree disappeared, and everything returned to normal. However, when one looked at Morning Star City again, one would find that its aura had become lighter and lighter, as if it were a city in a Fairyland!

As if to celebrate the rebirth of Morning Star City, hundreds of flowers bloomed on the vine plain, and birds flew in groups. The intoxicating fragrance of flowers filled the air.

Inside the Morning Star City, Tang Zhen shifted his gaze away from the officially operational cornerstone platform and turned to congratulate the excited city Lord Yuheng.

City Lord Yu Heng suppressed the joy in his heart and saluted Tang Zhen once again. This time, apart from expressing his gratitude, there was another reason. It was to express his respect for Tang Zhen, who was a spirit Emperor.

When signing the contract, both parties 'true soul power would be revealed, and there was no way to hide it.

Through the contract that he had just signed, Yu Heng was able to sense the strength of Tang Zhen's main body. He also knew that the person before him was actually just his clone!

In the world of loucheng, the strong were respected. Facing a rarely seen spiritual Emperor cultivator who was also the future master of this continent, Yu Heng naturally had to show some respect.

thank you for everything, Your Excellency Tang Zhen. I can guarantee you that, whether now or in the future, Morning Star City will never do anything against Holy Dragon City. Otherwise, may the heavens destroy us!

“With city Lord Yu Heng’s words, this tang can rest assured!”

After the two parties exchanged a few words, Tang Zhen seemed to have recalled something and asked Yu Heng, “Actually, this Tang still has a question. I hope City Lord Yuheng can help me answer it?”

&Nbsp; Yu Heng smiled. actually, I also have a matter I would like to trouble you with, but it’s not urgent. You should go first.

“It’s like this. I guess your ancestor in Morning Star City was a sector Lord, right?”

Yu Heng was taken aback. He pondered for a moment before nodding his head.

“You’re right. The ancestor of our Morning Star Race was indeed a sector Lord, and he was the one who built the city.

However, due to an accident, our ancestor was seriously injured, and even Morning Star City was affected, unable to operate normally.”

Tang Zhen nodded and probed, “Then what happened to your ancestors? did they leave this mainland because of heavy casualties?”

Seeing Yu Heng’s troubled expression, Tang Zhen smiled and said, “If this Tang’s question makes it difficult for you, then city Lord Yu Heng can choose not to answer!”

Shaking his head and chuckling, Yu Heng sighed, “There’s nothing to hide about this. Since city Lord Tang is interested, there’s no harm in telling you.

Back then, the injuries my ancestor suffered were already very serious. The small world in his body was destroyed and the residents of Lou city suffered heavy losses. It could be said that less than one in a hundred survived!

after arriving on this continent, my ancestors couldn’t bear to see the residents of the city suffer, so they spared no effort to build morning stars city.

Unfortunately, our ancestors were already at the end of their rope. They could only build the framework of the tower and provide a shelter for the surviving residents of the tower, but the cornerstone platform was no longer able to start the engine.”

Caressing the things around him, Yu Heng’s eyes were filled with emotion as he said in a regretful tone, “After the ancestor finished this matter and left behind some items, he passed away with a smile, Xuanji.”

Tang Zhen was also silent when he heard this. The image of a cultivator from Lou Cheng before his death seemed to appear in front of his eyes. He seemed to have seen the vicissitudes of life and his eyes were full of calmness.

your ancestor is really an extraordinary figure. He really makes people feel admiration!

“Thank you!”

After a moment of silence, Yu Heng said to Tang Zhen, “Sir Tang Zhen, you’re asking about my ancestor because you want to get information about the sector Lord right?”

Tang Zhen nodded his head. He indeed had this intention and there was nothing to hide.

“I can help you with this, but I have a condition. I hope you can agree to it.”

“What condition? tell me about it.” Tang Zhen’s brows slightly raised.

I’ve been trying to become a spiritual Emperor, but I’ve never succeeded. So, I hope you can help me!

Hearing Yu Heng’s request, Tang Zhen was slightly troubled. One must know that he had only managed to advance to the spirit Emperor realm by chance. He was confused, so how could he guarantee that he could help someone else advance?

it’s not that I don’t want to help you. In fact, there are several residents in Holy Dragon City who are facing this problem, but they can’t find a solution, so I can’t do anything about it.

Seeing Tang Zhen’s awkward expression, Yu Heng smiled and said, I have an idea, but I’ll need someone to cooperate with me. If city Lord Tang agrees, I’m willing to share it with you!

A glint flashed across Tang Zhen’s eyes. He seemed to have thought of something as he doubtfully asked, “City Lord Yu Heng, could it be that this method was left behind by your ancestors?”

“Indeed!”

The corner of Tang Zhen’s mouth revealed a trace of a smile. He no longer had any hesitation in his heart as he said to Yu Heng, “Alright, I promise you!”

Yu Heng had been waiting for Tang Zhen to say this. He burst into laughter and took out an extremely exquisite-looking item from his storage equipment. It was about the size of a fist and was covered in a dense runic array.

The storage equipment that Yu Heng used was one of the “divine weapons” on this continent. Although it was regarded as a treasure by the natives, it was unable to arouse Tang Zhen’s interest. At this moment, all of his thoughts were placed on the item in front of him.

After a careful observation, Tang Zhen saw hundreds of runic magic circles on it. Almost all of them were related to spatial transmission.

if I’m not wrong, this should be a compressed teleportation gate? ”

Tang Zhen shifted his gaze and asked Yu Heng.

that’s right, it’s a folding teleportation portal. It’s a one-time thing that can teleport four people at the same time!

Yu Heng seemed to be looking at a rare treasure as he said to Tang Zhen, this folded teleportation portal is connected to a different world. The treasure left behind by my ancestors is hidden there. As long as you take it out, you can obtain the coordinates of a plane and lead to a high-energy world.

As long as you enter the world connected to this plane's channel and find a suitable place, you'll have a chance to advance to the spiritual Emperor realm!"

After hearing Yu Heng's story, Tang Zhen revealed a trace of doubt and said in a deep voice, if it was before morning Star City was activated, you might not be able to act alone. But now that the cornerstone platform is officially operational, why don't you do it yourself?"

Yu Heng bitterly laughed when he heard this. He turned to Tang Zhen and said, of course I want to do that, but this teleportation gate can only be activated by four kings of laws. There are only three in the entire Morning Star City. I can't do it even if I wanted to!

...

Chapter 1442 Treasure hunt in another world

"I see!"

Tang Zhen knew that the Morning Star City Lord would not give out benefits for free. It turned out that he lacked the cooperation of a law King. Of course, one of the reasons was that the foundation stone platform could not operate. Otherwise, how could such a good thing fall into the hands of an outsider?

After understanding the cause and effect, Tang Zhen naturally did not have too many concerns. He said to Yu Heng, "If that's the case, I can help you, but it can't be for too long, so as not to delay other things."

Yu Heng nodded and said in a certain tone, " don't worry, Your Excellency. It will be completed in less than a month!

a month? Yingluo?"

Tang Zhen mused for a moment before he nodded and agreed.

The importance of the plane's coordinates to the Holy Dragon City was needless to say since it could help a law King advance to the spirit Emperor realm. If possible, he would naturally want to raise his clone to the spirit Emperor realm. Therefore, Tang Zhen did not want to miss this opportunity.

After the two reached an agreement, Yu Heng immediately made arrangements. Tang Zhen also called Yue qianhua and Murong Ziyue over and explained everything to them in detail.

According to Yu Heng, this operation might take about a month. Although it was not a long time, some things had to be properly arranged in such a time of change.

Of course, this was only an emergency measure. Currently, Holy Dragon City was filled with talents. Everything could be handled properly. Tang Zhen's main role was only to make decisions.

Even if there was something that he couldn't handle, Tang Zhen's main body could take action to solve it. He was a true spirit Emperor expert, and he was strong enough to crush the entire continent!

After everything was ready, Yu Heng also rushed over with two helpers. One was called Yu Tao, and the other was called Yu kun. They were the two hidden law Kings of Morning Star City.

Unlike Yu Heng, who deliberately maintained an old appearance and looked like he was about to die, these two law Kings were both young and tall, and they were very handsome.

After explaining the things to take note of, the four of them headed to the top of Morning Star City and worked together to activate the fist-sized foldable portal.

With a flash of light, the ball suddenly bounced open, and an object that looked like a door appeared in front of them. Its surface was covered with dense runic magic circles.

“Everyone, let’s go!”

Yu Heng was the first to push open the door and step into the dazzling white light.

.....

“Bang Bang Bang”

“Pi Li pa la!”

A crisp cracking sound was heard. It seemed that the wine bottle had fallen to the ground and rolled a few times.

In a dirty basement, an ancient door was pushed open, and four men with gloomy faces walked out.

“Yu Heng, tell me what’s going on?”

Tang Zhen’s face carried a trace of anger. He coldly stared at the old man beside him, as though he was waiting for an explanation.

ahem, ahem, ahem, I don’t know what’s going on either. The notes left by our ancestors are extremely tattered. They only left the information on how to use it and the treasure, but they didn’t mention anything about the suppression of strength after entering!

Yu Heng explained with an innocent expression and a dry smile.

Tang Zhen glanced at Yu Heng and discovered that he did not seem to be lying. Yu Tao and Yu kun’s faces were as black as the bottom of a pot, and they looked at Yu Heng with unkind eyes.

Tang Zhen involuntarily laughed bitterly after he confirmed this point.

“Fine, we’ve all been tricked by your old ancestor!”

Tang Zhen carefully recalled the array on the foldable teleportation door and shook his head, “We’re all law cultivators, but our strength is only equivalent to a level five cultivator. If a spiritual Emperor or a realm Lord comes in, will their strength be suppressed?”

Even if he is suppressed, it will definitely be better than our current situation!

Your old ancestor is a sector Lord, after suppressing his cultivation he should still have the strength of a law cultivator, enough to deal with any situation!

Could it be that he’s doing this to add an extra layer of insurance to the treasure to prevent it from being obtained by outsiders?”

After Tang Zhen said this, he smiled at Yu Heng and the other two. If that's the case, there must be a surprise hidden in the place where your ancestors hid their treasures. You won't be able to get them without some effort!

Tang Zhen shook his head as he looked at Yu Heng's group of three who were deep in thought. He turned his head and looked at the spot where he was.

He was now certain that there was definitely a trap on the folded teleportation gate, and it had deliberately set a limit of four law Kings.

If one was placed in the hands of a sector Lord, would it be able to be activated?

If this item belonged to the old ancestor of Morning Star City, why would he not explain these things and deliberately lie to his juniors?

This meant that the origin of this item was very suspicious. The treasure might not have anything to do with the ancestor of Morning Star City. Otherwise, why would a sector Lord like him place his treasure in another world and create such a complicated folded teleportation gate?

The most likely possibility was that the folded teleportation gate had been obtained by the Morning Star City patriarch by accident, but he had not had the chance to take it out, and it had ended up in the hands of Yu Heng!

There was no point in thinking about this now. The most important task was to find the hidden treasure and then find a way to leave this world, in case anything happened!

Tang Zhen once again sized up the pitch-black basement when he thought of this.

Judging from the items piled on the ground, the environment here should be similar to the original world, or perhaps it was another parallel world.

If that was the case, things would be much easier!

"Let's go up first and collect some specific information about this world before we think about what to do."

Tang Zhen pointed at the stairs in front and took the lead to walk over.

Gently pushing open the door of the basement, a slightly dark corridor appeared in front of everyone. There seemed to be a room at the end of the corridor, and excited roars could be heard from time to time.

He glanced at the window at the other end of the corridor and was sure that it was night time. He could occasionally hear the sound of a car.

A trace of a smile was revealed on the corner of Tang Zhen's mouth after he listened for a few seconds. He then walked toward the open door.

It was an extremely messy room. The bed and the floor were in a mess. A fat little man was sitting in front of a computer, talking about something. On the monitor was a scantily dressed woman, who seemed to be video chatting with the fat man.

After Tang Zhen walked into the room, the little fatty didn't notice anything at all. He continued to stare at the computer excitedly and occasionally blurted out a sentence or two.

Tang Zhen laughed softly. He randomly picked up a book that was thrown on the bed and carefully flipped through it.

Through the translation of the mobile application, Tang Zhen didn't feel any pressure reading the text. He finished the entire book in a dozen seconds and had a basic understanding of the world.

As he had guessed, this world was similar to the original world, with a time difference of about ten years.

...

Tang Zhen casually threw the book on the bed. Just as he was about to pick up another book, the woman on the other side of the computer finally noticed him, this uninvited guest. After which, she reminded the little fatty.

The little fatty, whose face was filled with excitement, was stunned for a moment. He turned his head around with a stunned expression and coincidentally met Tang Zhen's gaze.

"I'm done chatting, come over and sit for a while!"

Tang Zhen waved his hand at fatty. At the same time, he gently waved his hand at the computer and shut it down.

"Who are you? what do you want?"

The little fatty looked at Tang Zhen in horror. He subconsciously picked up the wireless keyboard on the table and shouted with a voice that was tough on the outside but weak on the inside.

"If I were you, I'd shut my mouth obediently to avoid getting myself into unnecessary trouble."

Tang Zhen casually picked up another book and spoke in a faint tone.

"You'd better get out now, or I'll call the police!"

The little fatty shouted at Zhen Tang as he silently moved towards the door. Then, he suddenly raised the wireless keyboard and threw it at Zhen Tang. He then ran out of the door without looking back.

However, just as he reached the door, an old man appeared in front of him and pushed him to the ground.

...

Chapter 1443 The terrified fatty

Looking at the old man standing at the door, the little Fatty's heart was in a mess.

He was just chatting with a hot girl for a while, how did a stranger come into his house?

What did they want to do? Rob and kill, or did they like his fat body?

The moment he thought of that indescribable scene, the little fatty subconsciously tightened his butt.

Also, why was this old man so strong? he didn't even move when he hit him with his 200-pound weight. Instead, he sent him flying with a slap?

The more he thought about it, the more he felt that something was wrong and the more he felt afraid.

After shuddering a few times, the little fatty immediately leaned against the corner of the wall. At the same time, he looked at the two strangers in front of him with a vigilant look, thinking about how to get out of the predicament.

It was only then that he realized that the clothes of the two intruders were very strange. Although the material was excellent, it was completely different from the style of normal people.

If one had to describe it, it would be that the two's costumes were very similar to the costumes of historical actors, and they gave off a very majestic and luxurious feeling.

"This is the first time I've seen a robber dressed like this!"

Although he was full of doubts, the little fatty still obediently leaned against the corner of the wall, not daring to act rashly.

Ignoring the little fatty, who appeared to be trembling but was actually rolling his eyes, Tang Zhen looked at Yu Heng and said, "Tell me about the information you have. How can we find your ancestor's treasure?"

According to the information left behind by the ancestor, he left a rune sign in each of the four locations in this world. As long as we find them and piece them together, we can easily find the specific location of the treasure according to the guidance on them.

Tang Zhen was slightly startled. He put down the book in his hand and said with a smile, "Your ancestor is quite a troublemaker. Are you sure he really wants to leave these treasures to you?"

Pretending not to hear the teasing in Tang Zhen's tone, Yu Heng smiled and said, "How could the treasures left behind by an expert like our ancestor be so easily found by others?"

"I see. Do you have any specific information about these four locations?"

Yu Heng nodded. There were markings on the locations, but they were too far apart. We have to look for them one by one!

Oh, then what do you plan to do? do you want to split up and go to a location each, or do you want to work together?"

Upon hearing Tang Zhen's question, Yu Heng revealed a trace of annoyance. "My original plan was for the four of us to split up so that we could find the rune sign in the shortest time possible.

But now that the situation has changed, if we act alone, the danger will be multiplied. Once the natives discover our tracks and obstruct us, there's a possibility that we'll die!"

Tang Zhen nodded. Things were indeed as Yu Heng had said. The strength of a rank 5 cultivator was not enough to guarantee that they could run amuck. Once their whereabouts were exposed, who knew what kind of danger they would encounter? this matter had to be taken precautions.

Therefore, the wisest thing to do was for the four of them to act together. Even if it would waste more time, they could ensure that they could look out for each other in the event of danger.

Although he was angry, Tang Zhen understood that this was a good opportunity that had come to his door. If he could establish a connection with the Holy Dragon City while obtaining the treasure, the cultivators in the tower City could launch an invasion into this world. Wouldn't it be killing two birds with one stone?

Regardless of whether Yu Heng and the others were willing or not, this world had already been reserved by Tang Zhen. This was considered as their compensation to him.

Just as this thought emerged in Tang Zhen's heart, he heard Yu Heng say, this incident was caused by my negligence, so to express my apologies, I will gift this world to you. Please do not delay it.

Tang Zhen secretly cursed an old fox in his heart. He smiled and nodded, "Since that's the case, then many thanks to city Lord Yu Heng!"

"You're too polite, this is only natural."

With just a few words, he had completed the compensation. Now, it was time to officially start the operation.

Yu Heng took out a piece of animal skin, on which a map and four marks were drawn. When the eyes of the audience fell on the marks, an image would appear in front of them, looking very lifelike.

This was a pattern that was carved using mental energy, and it was exactly the same as what the creator had in mind. Tang Zhen and the others only needed to find it according to the location marked on the map.

we have the map now. The next step is to determine our current location and find the nearest location of the treasure!

When Tang Zhen said this, he turned his head and looked at the little fatty on the ground, "Buddy, give me your phone!"

The little fatty hesitated for a moment. He trembled as he took out a black phone from his pocket. Just as he was about to stand up and hand it to Tang Zhen, he saw the phone suddenly float from his hand and fall directly into Tang Zhen's hand.

"Oh my God, am I seeing things?"

The little fatty cried out madly in his heart. His heart that was originally filled with fear, suddenly had a trace of intense curiosity.

Who were these strangers who had suddenly appeared in his house? why were they able to take things from a distance?

This was no longer an ability that ordinary people could possess. Coupled with the strange attire of these two people, it was inevitable that people's imagination would run wild!

In this information-advanced world, all kinds of strange information spread wantonly. This was also the reason why little Fatty's mind was full of imagination after seeing this abnormal scene.

Tang Zhen took the little Fatty's phone in his hand and fiddled with it a few times. He confirmed that it was an ordinary smartphone, which was quite different from the original world.

He easily unlocked the lock screen and used the positioning function to confirm their current location.

Alright, we can now confirm that the third location is the closest to us. If we take ordinary transportation, we can reach it in about a day!

Yu Heng's tensed face finally revealed a trace of a smile. He nodded lightly and then turned to look at the little fatty beside him.

Seeing Yu Heng's gaze, the little fatty seemed to realize something. He began to tremble involuntarily and prepared to get up and escape.

However, it was only now that he realized that his body seemed to be confined by an invisible force, and his head seemed to be stuffed with something that was constantly expanding as if it could explode at any time!

"Don't be in a hurry to kill him. There are still some things that we need him to deal with."

Yu Heng, who was just about to kill the little fatty, retracted the mental power that was surrounding him and turned to walk towards the living room.

"What are you waiting for? are you waiting to be killed by that old man?"

After putting the phone into the storage space, Tang Zhen waved at the little fatty and walked out of the bedroom first.

After witnessing supernatural abilities that were beyond his imagination and the feeling that everything was under his control, the little fatty realized that he had no chance of escaping.

For the sake of his own life, the little fatty only hesitated for a few seconds before he stood up from the ground and followed Tang Zhen into the bedroom.

Then, the little fatty saw the other two intruders. One was standing at the door, and the other was watching TV. When he appeared, he only gave him a cold glance and then turned his eyes to the side.

After clicking a few times on his arm, a holographic image appeared in front of everyone. It was the world map obtained by the wrist-guard computer after copying the data of the little Fatty's mobile phone.

The map clearly showed the four locations and their current location.

Guys, let's get started. Fatty, you're in charge of driving. If you don't behave, this will be your end.

...

Tang Zhen grabbed the bronze sculpture on the table. With a slight force, the hard sculpture was flattened and thrown in front of the little fatty.

Looking at the completely deformed bronze statue under his feet, the little fatty nodded his head in a hurry and revealed a flattering smile.

Chapter 1444 The first location

In the speeding car, Zhen Tang retracted his gaze and looked at Yu Heng and the other two behind him. A smile flashed across his eyes.

In order to make it easier for them to move, Tang Zhen and the other three had changed into the clothes of this world. At this moment, Yu Heng and the other two were sitting together, while he sat in the front passenger seat.

The clothes naturally came from the fatty beside him. It was fortunate that his clothes were fat enough. Otherwise, Tang Zhen and the others would not be able to wear them.

The problem was that after Yu Heng put on the Fatty's coat, he was like an old cabbage pretending to be young, making people feel uncomfortable.

Yu Heng seemed to have realized this as well. Therefore, when he noticed that Tang Zhen's gaze had landed on him, he unhappily snorted to express his dissatisfaction.

Tang Zhen smiled and turned his gaze to the front. Yu Heng and the other two continued to look at the scenery outside the window and occasionally asked Tang Zhen a question.

Tang Zhen had seen similar worlds more than once, so he wasn't interested at all. On the other hand, Yu Heng and the other two had never entered a different world before. Thus, until now, they were still filled with curiosity about the surrounding environment.

Of course, in addition to curiosity, the more important reason was that they had to obtain as much information as possible about this world in order to better complete this operation.

Know yourself and know your enemy, and you will never lose a hundred battles.

Compared to the nervousness and uneasiness he felt when they first met, the little fatty now appeared much more relaxed. From time to time, he would even chat with Tang Zhen.

Ever since he was kidnapped until now, little fatty had already seen too many inconceivable things from Tang Zhen and the others. Every single one of them was enough to make one's jaw drop!

It was obvious that he was extremely curious about the background of Tang Zhen's group of four. However, he was able to control his mouth very well to prevent himself from being killed because of this.

The little fatty was not stupid. On the contrary, he was very intelligent. After he realized that he could not escape from the devil's grasp, he took the initiative to cooperate with Tang Zhen and the others in order to obtain a trace of goodwill.

Tang Zhen naturally understood little Fatty's thoughts. Moreover, he was extremely satisfied with the other party's cooperation. In a situation where their cultivation was restricted, being able to have such a tactful native guide would undoubtedly make their operation much easier.

The little Fatty's second-hand car was still speeding. Before they knew it, they had left the city and were now in the middle of a wilderness.

The scenery outside the car window proved that their environment was very similar to the American Alliance in their original world. On the long and empty road, they were the only ones moving along other than the cars that appeared every few days.

The place that Tang Zhen and the others were heading to was a Park. The land there was vast but the population was sparse. The number of residents nearby was very small.

&Nbsp; this environment was very suitable for movement. As long as he was careful, he wouldn't attract the attention of the native factions.

After a night's drive, they were now less than half the distance to their destination. Little Fatty's eyes were dazed, and he was obviously very sleepy.

the car is out of gas. It's not enough to reach the destination. Should we refuel first? "

After yawning, the little fatty glanced at the car's work station and carefully asked Tang Zhen.

you can decide what to do. I just need to reach the destination at the scheduled time. I don't care about anything else.

After hearing Tang Zhen's reply, the little fatty nodded and drove towards the nearby gas station.

After the car stopped, Tang Zhen and little fatty got out of the car at the same time and quickly filled up the fuel.

Tang Zhen entered the store and quickly bought a lot of food, throwing it to everyone.

Everyone took a simple bite, and when the car started again, an accident suddenly happened.

A police car suddenly appeared and stopped the car of Zhen Tang and the others. Then, two police officers slowly walked over.

"Hey, officer, how can I help you?"

The chubby boy was extremely nervous. The sudden appearance of the two police officers did not give him a sense of security, but instead made him more dangerous.

It turned out that when the two police officers appeared, Tang Zhen, who was sitting on the side, suddenly took out a pistol and shook it in front of the little fatty.

"You should know what to do, right?"

After saying this with a smile, Tang Zhen quietly sat by the side, waiting to watch the little Fatty's performance.

The chubby boy, who had originally regarded these police officers as his saviors, secretly complained. He forced a smile and began to deal with the two uninvited police officers.

If he was not careful, his little life would be over!

The two police officers took out their identification documents as required. After checking them, they turned their eyes to Tang Zhen and the other three.

“Who are they? where are you going?”

While he was asking, a police officer had already walked to the back seat and gently knocked on the window.

“Open the car door, hurry up!”

The atmosphere suddenly became tense at this moment. Tang Zhen had already noticed that the police officer had raised his elbow and seemed to be ready to pull out his gun at any time.

“Buddy, I think we’ve been exposed!”

Tang Zhen helplessly sighed. He suddenly raised his hand and fired two shots at the police officer by the window.

The police officer who was about to pull out his gun was caught off guard and fell to the ground.

At the same time, the back door was kicked open and landed heavily on the police officer’s body. Then, Yukun leaped out and killed the police officer.

Tang Zhen walked out from the front passenger seat and sized up the surrounding environment. He used a slightly curious tone to ask the little fatty, “Tell me, how did you call the police?”

Little fatty shook his head with all his might and denied, “ Believe me, this matter really has nothing to do with me. I really didn’t call the police!”

since it’s not you, then it might be your family or friend. Also, your car directly exposed our whereabouts.

Tang Zhen sighed as he and Yu kun changed into the uniforms of the two police officers. After which, they stored the bodies and the original car into their storage equipment and got into the police car not far away.

alright, guys, let’s go quickly. It probably won’t take long for us to be wanted by the natives all over the world!

Dragging the frightened little fatty, the five of them drove the police car and headed towards their destination.

This time, they arrived at the scheduled location without any trouble. After putting the police car into their storage equipment, the five of them took a speedboat and headed to the location marked on the map.

The place where the rune sign was hidden was a swamp with a large number of crocodiles and a terrifying quagmire. Ordinary people would rarely come here.

Along the way, there were other speedboats that passed by. The drivers were hunters that were hunting for crocodiles in this area. After seeing Zhen Tang and the others, they kept casting vigilant gazes.

The uniforms on Tang Zhen and his partner were effective, preventing the hunters from treating them as poachers and mistakenly thinking that they had other motives.

Yu Heng, who was on the speedboat, was constantly sensing the location of the rune sign and constantly adjusting the direction of their advance. However, the water channel was too chaotic, so it was impossible to reach the rune sign directly.

...

After getting used to the movement style of law Kings, which was like the wind, Tang Zhen and the others inevitably felt that their hands and feet were bound by this kind of low efficiency. Unfortunately, they had no other way.

There was a flying device in Tang Zhen's storage space. However, it could only accommodate one pilot. Therefore, it would not be of much help even if he took it out.

After going around in circles for half a day, the speedboat finally arrived at a body of water in the depths of the swamp. Tang Zhen had also discovered traces of a runic magic circle here.

If one could not understand the operating principles of the runic magic circle, they would never be able to discover the secret of this place. They would only think of it as a forest in the water, with a sparkling surface of water in the middle.

This was just a smokescreen. They only needed to go around a few real trees to pass through the illusion and land on the island.

However, the moment he passed through the illusion, Tang Zhen suddenly felt danger approaching. At the same time, he saw a huge black shadow crash into the front of the speedboat with the sound of water!

Chapter 1445 The giant crocodile on the island

The danger came so suddenly that Yu Tao, who was sitting in front, could not react at all. He was sent flying by the black shadow and crashed heavily into a withered tree behind him.

"Crack!"

The withered tree was broken and Yu Tao fell into the water, causing a huge wave.

"Damn it!"

Tang Zhen and the others, who were close to Yu Tao, flew into the air and launched a series of fierce attacks. Before the speedboat could be destroyed, the blades and fists landed on the black Shadow's body one after another.

"Owwuuu!"

A series of muffled cries could be heard, followed by the splattering of blood in the air. The attacks of the three of them had clearly injured the monster.

In this split second, Tang Zhen also clearly saw the appearance of the monster. It was actually a strange crocodile that was fifteen meters long. The scales on its body were black and glowed with a red light, as if it was made of metal!

There was a row of jagged dorsal fins on its spine, which were slightly transparent and unusually strong, as if they could cut through anything.

Unlike the crocodiles in the swamp, this giant crocodile's abdomen was not particularly bloated. Instead, it was slightly slender, giving people the feeling that it was more like a legendary flood Dragon.

Judging from its aura alone, this crocodile monster's level had long surpassed that of a Lord-tier monster, and it was only a step away from becoming an Emperor-tier monster!

To Tang Zhen's group, this was definitely a threat that could not be underestimated.

Although Tang Zhen and the others had caused a certain amount of damage to the giant crocodile, it was not fatal. Therefore, it quickly launched its second attack after letting out a wild roar.

Its huge body ran on the water like the wind, and it didn't seem to sink at all. In less than two seconds, a terrifying mouth came toward the broken speedboat.

A gust of fishy wind blew over, mixed with a rancid smell, making people want to vomit.

Tang Zhen's body suddenly leaped up. The soul devouring blade was accompanied by a Black Flame as it heavily slashed down on the head of the giant crocodile. The sharp blade was like cutting through butter as it left a deep mark on the monster's body!

Yu Heng and the other two shot out sharp arrows condensed from energy one after another. Their targets were the eyes of the giant crocodile. With a furious roar, the eyes of the giant crocodile suddenly became two huge bloody holes.

The heavily injured giant crocodile writhed its body crazily, causing the water surface to become extremely muddy. However, even in such a situation, it still did not forget to attack Tang Zhen and the others. Its huge tail swept toward the speedboat.

There was a muffled clang as the broken speedboat was swept away by the giant crocodile's tail, and it flew far away like a broken ball.

Tang Zhen threw the little fatty in his hand onto the tree. His figure once again shot out and his battle blade ruthlessly hacked onto the giant crocodile's head. This blade that used all of his strength broke through the scales and actually forcefully cut off the giant crocodile's head!

"Plop!"

The giant crocodile's headless body fell into the water, and its foul blood spread on the Muddy River surface, dyeing the water dark red in an instant.

"PEI, this damned animal!"

Yu Tao spat out a mouthful of blood. It was clear that he had suffered some injuries from the collision just now. This was the first time he had been in such a sorry state ever since he had become a law King.

As for the little fatty who was lying on the tree, he was already shaking all over. His eyes were filled with fear as he continuously sized up the monster's corpse, Tang Zhen, and the others.

the monster has been dealt with. Let's go to the island now!

Tang Zhen swept his gaze over the surrounding water. After confirming that there were no monsters, he grabbed the little fatty and leaped towards the surface of the water. After a few rises and falls, they had already arrived at the shore.

Yu Heng's group of three followed closely behind and landed on this small island that had been sealed off for who knew how many years. They surveyed their surroundings.

Perhaps it was because no one had come here, but the natural environment of the island had not been damaged in any way. The trees were lush and green, like a garden built in the middle of the lake.

Tang Zhen and the rest were not in the mood to appreciate the scenery here. Instead, they rapidly advanced towards the center of the island. After walking about seven to eight hundred meters, a simple stone building appeared in front of them.

A greenish-gray rune sign was placed in the middle of the building. It was the item that Tang Zhen and the others were looking for.

Yu Heng walked forward and examined the rune sign in his hand. He then nodded to Tang Zhen and the others.

"That's right, it's the thing we're looking for!"

Although they had successfully found the first rune sign, there were still three more rune signs that needed to be collected. Tang Zhen and the others chatted for a while before they walked out of the small island. They did not want to waste any time.

The speedboat they took on the way here had been destroyed. Fortunately, there was a charging boat in Tang Zhen's storage ring. After the five of them got on the speedboat, they quickly arrived at the place they came from.

the location of the next rune sign should be within the borders of another country. We have to change our transportation, or we won't be able to reach it in a short time!

Yu Heng and the other two didn't know much about this world, so the entire operation was left to Tang Zhen to complete. They would do whatever he asked them to do.

"As for you, just forget about these things!"

Tang Zhen turned around and said to the little fatty. Without waiting for him to recover, he slapped the little Fatty's head.

"CAW CAW CAW"

The little fatty collapsed limply on the side of the road. His recent memories had been completely erased, and he probably couldn't even remember how he came here.

This wasn't a bad thing. At the very least, he would be able to keep his life.

After taking out the police car, Tang Zhen and the others jumped into it and sped away.

.....

Not long after Tang Zhen and the others left, someone discovered the little fatty who had fainted on the side of the road. Not long after, a police car rushed over.

They first confirmed the little Fatty's identity before they immediately took action and began to chase after the traces of Tang Zhen and the others.

It turned out that after the little Fatty's family discovered that he was missing, they had already called the police at the first moment. Then, two police officers' recording devices simultaneously uploaded the process of questioning Tang Zhen and the others.

It could be said that Tang Zhen and the others were listed as dangerous criminals at the same time the two police officers were killed. They would be arrested immediately once they appeared!

At this moment, with the appearance of the little fatty, the traces of Tang Zhen and the others were once again exposed. Following the route that they were moving forward, countless police officers patrolled the road, not letting go of any suspicious traces.

After the little fatty was awakened, he was dumbfounded when he was asked because he couldn't remember anything at all.

After the experts confirmed that the little fatty was not in disguise, his recent memories had really been erased.

This situation made those experts extremely vexed. The reason why they attached so much importance to this case was firstly because Tang Zhen and the others might have killed two police officers. Secondly, they found something unusual in the uploaded video.

For example, Tang Zhen's group had strength and speed that exceeded an ordinary person's imagination, and Yu Heng's group had strange physical characteristics. These were all extremely unusual situations.

Unable to find any clues from the little fatty, those experts could only analyze the route they took. Very quickly, they discovered that Tang Zhen and the others had entered the marshland.

...

In the following process, they followed the trail and accidentally discovered a hidden island in the depths of the swamp.

Looking at the Paradise-like scenery and the giant crocodile corpse in the water that looked like a prehistoric monster, all the search personnel present were dumbfounded and did not come back to their senses for a long time.

When all the information was put together, it immediately attracted the attention of the upper echelons of the natives. Not only did they strengthen the pursuit, but they also sent a group of special personnel to participate in the operation.

With the cooperation of all parties, it didn't take long before news came that Tang Zhen and the others had been found outside the outskirts of M City!

With a single order, a large number of troops gathered and vowed to capture Tang Zhen and the others!

Chapter 1446 The second rune sign

On top of a slightly old building, a sniper was quietly lying on the platform, his muzzle locked on the road ahead.

In a few buildings not far from him, there was also more than one sniper lurking, especially in the hidden corners, where many police cars were on standby.

Several police officers were standing on the road, making a temporary inspection, but their eyes were looking at the end of the road in the distance from time to time, with a trace of tension in their eyes.

In the sky above them, a satellite had already locked onto the road and was looking down at the car that was speeding over.

The passengers in the car did not seem to realize the source of danger. They continued to drive at a fast speed and got closer and closer to the ambush site.

It didn't take long for the car to appear in front of the crowd. The police officers who had been waiting for a long time immediately waved to stop it and motioned for it to stop for inspection.

However, the car did not slow down at all. Instead, it suddenly rushed down the road and went straight to the factory not far away.

hurry up and catch them! They're trying to escape!

The police officers on the road pulled out their guns and shot, but it was to no avail. They could only call for backup through their communicators.

This scene had long been discovered by the police who were lurking in the distance. As the car rushed down the road, the hidden vehicle personnel appeared in unison. There were cars driving at high speed everywhere, and helicopters even flew up from the factory in the distance, joining in the pursuit.

Under the pursuit of numerous vehicles and helicopters, the fleeing car was like a slippery rat, turning left and right but unable to be forced to stop.

It didn't take long for the fleeing car to enter the nearby factory. Then, four men quickly jumped out of the car and entered the nearby buildings.

A few snipers seemed to have opened fire, but the other party's movements were too fast, and they could not lock on to him at all.

The helicopter flew over and completely sealed off the building. Then, fully armed special combat personnel quickly approached and gradually completed the encirclement.

At his command, all the combat personnel rushed into the building at the same time. However, they did not find any trace of the four men at all, as if they had never been there.

The people who didn't believe it began to search again, but they still found nothing.

Later on, this matter became an unsolved case. No one knew how these four men escaped from the airtight encirclement without leaving any clues.

.....

Tang Zhen's group of four appeared in the forest three kilometers away from the factory. They boarded a car that was parked by the roadside one after another.

To the four law Kings, even if their strength had been suppressed to below the Lord-tier, they could still easily toy with the natives. With just a few small tricks, they had successfully escaped the natives' encirclement.

The reason why they had been discovered earlier was due to a moment of carelessness. Moreover, Tang Zhen's group had to take this route. This saved them a lot of time.

After getting rid of the Aborigines, the four of them went straight to the city's airport.

After another half an hour, a plane took off, heading towards the country where the second rune sign was.

No one knew that the four visitors from the other world were hiding in the corner of the plane and had left the country without anyone knowing.

A few hours later, the plane slowly landed. Tang Zhen and the others left the airport and took a taxi to continue their journey.

The driver was only focused on chatting with Tang Zhen and did not notice the abnormality of the three passengers behind him. Even when Tang Zhen and the other three got off the car, they did not realize that their passengers came from another world.

the location of the second rune sign is nearby, but this place has become a residential area for ordinary people. I'm afraid it will take more effort to find that rune sign.

Tang Zhen said to Yu Heng and the other two as he looked down at the chaotic Street with a helpless expression.

Right now, he was somewhat regretting agreeing to Yu Heng's request. This was because he had been dealing with a lot of miscellaneous matters along the way and had wasted a lot of time for nothing. If he could leave this world, Tang Zhen might have already left.

Grumbling aside, the operation had to continue.

According to the information that Tang Zhen had previously gathered, the second rune sign was located in a slum area. There were gangs running rampant here, and gun fights would break out from time to time.

Although Tang Zhen's group of four was not afraid of the dangerous people here, they did not want to provoke unnecessary trouble in order to avoid delaying the progress of searching for the rune signs.

alright, find the location of the rune sign now. Once you've found it, leave this place as soon as possible.

After handing the three guns to Yu Heng and the others, Tang Zhen also took out a pistol and inserted it into his belt.

During the operation, they had to avoid exposing their true identity as much as possible. Therefore, neither their cultivation skills nor swords were suitable to be used. On the other hand, there were not so many scruples about firearms, and it was difficult for others to discover any clues.

Tang Zhen and the others once again raised their vigilance as they walked among the crowd and looked at the numb and vigilant eyes around them.

With their cultivation suppressed, even a law King could be killed, so they had to pay attention to their surroundings at all times to avoid being hit by a bullet from who knew where.

Yu Heng held a map in his hand as he walked in front of the group. After passing through many streets, they finally stopped in front of a large building.

the rune sign should be in this building. Should we rush in now or wait until night time to act? ”

Yu Heng looked at the heavily guarded building in front and asked Tang Zhen who was observing the surroundings.

don't rush into action. I'll ask around and then make a plan.

The four of them walked into a nearby alley and subdued a local resident. Soon, they got the information they wanted.

This Manor was the residence of a nearby gang leader. Usually, there were at least 50 guards, and once an accident happened, more reinforcements would come.

The reason why the gang leader built a house here was that, according to the legends of the older generation, this was the place where the gods rested. If one was close to it, they would obtain endless good luck.

After knocking out the trembling resident, the four of them discussed for a while and decided to act as soon as possible. They would evacuate immediately after finding the rune sign.

For some unknown reason, Tang Zhen's heart had a trace of uneasiness. He wanted to leave this place as soon as possible.

Using their stealth skills, the four of them quickly sneaked into the building. After avoiding the patrolling guards, they went straight to the backyard of the building.

Tang Zhen saw a small pavilion from a great distance away. There was a strange-looking statue inside. The neck of the statue was wearing the rune sign that they were looking for.

Obviously, the natives here treated the rune sign and the statue as an item, but they didn't know that the statue was actually there to cover the rune sign. At this moment, some people were even kneeling and worshipping the statue.

&Nbsp; Yu Heng charged forward and killed a nearby guard, then went straight for the statue.

Tang Zhen's group also finished off one guard each. After which, they carefully observed their surroundings to prevent other guards from discovering the abnormality in this place.

At this moment, Yu Heng had already arrived in front of the statue. His finger gently tapped on the rune sign and took it off the statue.

&Nbsp; after putting the rune sign into his storage equipment, Yu Heng was about to call everyone to leave when he heard a cracking sound behind him. The metal statue had actually crumbled!

"Something's wrong, let's run!"

...

Tang Zhen was stunned for a moment when he saw the shattered statue. After which, he suddenly roared out and ran out of the manor.

Yu Heng and the other two had already realized that something was wrong. After hearing the shout, they did not dare to hesitate and jumped over the wall.

At this moment, the ground in the backyard trembled violently, and the flat courtyard instantly split into pieces. Then, a thick metal arm stretched out from the ground, and with a casual wave, half of the three-story villa next to it collapsed!

The guards in the manor rushed over one after another, and then they were shrouded by a huge shadow. They were all so shocked that they didn't even know that the weapons in their hands had fallen.

A metal giant that was over thirty meters tall emerged from the ground. Its appearance was no different from the broken metal statue. At this moment, it was staring in the direction that Tang Zhen and the others had fled in as it let out an angry roar toward the sky.

"Swish!"

A series of loud sounds rang out as the metal giant left a deep pit with each step it took. It chased in the direction that Tang Zhen and the others had fled in. Houses collapsed along the way as it screamed continuously!

Chapter 1447 The pursuit of the metal giant

With the appearance of the metal giant, the entire slum area immediately fell into chaos.

People looked at the metal giant in fear. Their weak bodies kept moving, and they talked nonsense, shouting about the God of Destruction's arrival.

Houses collapsed under the metal giant's trampling, and the concrete road was filled with huge footprints. Anything that blocked the metal giant's path would be easily destroyed!

From time to time, gangsters with rifles appeared on the streets, howling and shooting at the metal giant. In the end, other than causing dense sparks on the metal giant's body, they couldn't cause any damage to it at all.

There were even some gang members who took out rocket launchers and exploded large Balls of Fire on the metal giant's body. Unfortunately, they still couldn't stop the metal giant's footsteps!

With a series of violent explosions, the buildings where the attackers were located collapsed one after another. This was clearly the revenge of the metal giant.

After realizing that guns were useless against the metal giant, the gang members threw down their weapons in despair and fled madly in the streets, afraid that they would be trampled into meat patties in the next second.

Not only did the metal giant have an indestructible shell, but it also had terrifying strength. In terms of strength alone, it was comparable to a King-level cultivator!

When it was hit by the rocket, its body still glowed faintly. It was obvious that a special energy shield had been activated in an instant. It could be said that as long as the energy stored in its body was still there, this metal giant could not be defeated!

damn it, what kind of war puppet is this? how can it be so abnormal? "

Tang Zhen ran quickly on the streets while turning his head to observe the metal giant. He had already cursed Yu Heng over a dozen times in his heart.

Damn bastard, if he had known that there would be so many changes in this treasure hunt, he would not have gotten involved even if he was beaten to death.

It had to be known that with their current cultivation, they were not the metal giant's opponent at all. Even if they could defeat it, they would have to pay a certain price. The slightest carelessness would cost them their lives.

This wasn't a treasure hunt, it was clearly playing with his life!

Judging from the metal giant's appearance, it was clear that it was coming straight for them, with the purpose of taking back the rune sign.

hurry up and get in the car. We have to get out of here. Don't bother with this metal giant!

Seeing that they were about to rush out of the slums, Tang Zhen immediately shouted at Yu Heng and the other two before jumping into the open-top Jeep by the side of the road.

In less than three seconds, Tang Zhen started the Jeep and sped towards the road of the slums.

When Yu Heng and the other two saw this, they jumped onto the Jeeps one after another and followed Tang Zhen as they charged around on the road.

"Bang!"

A car flew over from afar, bringing with it the whistling sound of the wind. Its target was the Jeep that Tang Zhen and the others were driving.

"Sit tight!"

Tang Zhen roared loudly. The Jeep started to twist violently on the road. After that, a loud "boom" was heard as the car smashed beside Tang Zhen and the others. It was just a little bit away from hitting the Jeep.

"Haha, this is fun!"

Yu Tao, who was sitting in the back, threw his head back and laughed. Then, he shouted, "Be careful, there are two more cars flying over!"

As soon as he finished speaking, a violent explosion was heard. Two cars with drivers were smashed over, turning the front of the Jeep into a sea of fire.

Let's rush over quickly. That guy has torn down a house and is smashing it towards us!

Hearing Yu Tao's reminder, Tang Zhen increased his speed and directly passed through the sea of fire, leaving behind two burning tracks.

As soon as they rushed out of the sea of fire, they heard the whistling sound of the wind. Half of the house directly hit the rear of the Jeep.

Tang Zhen's group of four reacted extremely quickly. A second before they were smashed by the house, they had already jumped down from the Jeep. After which, they got into the hover car that Tang Zhen had taken out and drove forward like arrows.

At this critical moment, Tang Zhen could no longer care about hiding his origins. If the metal giant caught up to them, it was extremely likely that they would die here!

Yu Heng and the other two felt much more relaxed as they felt the hovercar's speed. However, when they saw the metal giant that had already rushed out of the town and was chasing them on the road, they couldn't help but feel nervous again.

Normally, any one of the four of them would be able to easily take down this metal puppet, but at this moment, it was like a stray dog.

"Your Excellency, do you need me to kill this guy?"

Yu Heng looked at the pursuing metal giant with an eager expression. It was obvious that he had a powerful weapon with him.

This was also an extremely normal matter. In fact, he was not the only one who had similar weapons. Tang Zhen and the other two had also prepared something in their hands.

Don't be in a hurry to make a move. This is just the appetizer. It will only get more and more dangerous later!

Tang Zhen stopped Yu Kun and immediately accelerated to his maximum speed. The cars that the metal giant threw at him were dashing left and right, and the distance between them was getting further and further.

At this time, a loud roar came from the front, followed by a dozen armored tanks and two assault helicopters in the sky. When they were still a long way from the metal giant, the tanks opened fire.

The whistling cannonballs flew over their heads and landed on the metal giant from time to time, bursting into balls of flames, but they could not stop its footsteps at all.

Obviously, the bombardment of the shells had disturbed the metal giant. He roared and picked up a car, smashing it over and knocking over a moving tank.

One of the military helicopters noticed the unusual behavior of Tang Zhen and the others. It actually ignored the approaching metal giant and headed straight for them.

Yukun, destroy that helicopter!

Upon hearing Tang Zhen's order, Yu kun took out the rifle Tang Zhen had given him from under his clothes. He aimed at the helicopter and pulled the trigger.

Yu kun and the other two were given standard weapons from the Holy Dragon City. They could easily pierce through the armor of low-level demonic soldiers and the outer shell of the helicopter.

Although this was the first time he was using this weapon, for a law-enforcing King, he could definitely shoot with precision that would make even Ace snipers blush with shame.

Sure enough, with a burst of gunfire, a series of white spots burst out on the surface of the helicopter, and the pilot was cut in two by the whistling bullets.

The blood-splattered helicopter spun a few rounds before it suddenly fell onto the road, and flames soared into the sky.

Another Assault Helicopter also locked onto Tang Zhen's group. Dense bullets swept over and whizzed past them. A few tanks also joined the attack. A string of bullets dragged a line of fire that blocked the path of the hover car.

Without waiting for Tang Zhen's order, Yu kun raised his gun and aimed at the helicopter in the sky. After firing a few shots, the helicopter suddenly burst into a fireball and fell to the ground.

well done! Let's charge into the group of tanks and have them delay the metal giant!

As soon as he finished speaking, the hover car was already like a fish in water. It quickly passed through the blockade of bullets and headed straight for the tanks that were constantly firing.

When they saw the hover car flying in the air, the tank soldiers and the infantrymen following behind had expressions as though they had seen a ghost. They subconsciously shot wildly at Tang Zhen and the others. The clanging sounds of the collision lingered in their ears.

Fortunately, the material used to make the hover car was bulletproof. Even after being attacked by the bullets, it was not penetrated by them. Only the surface was covered with dense dents.

...

"Whoosh!"

The hover car sped past the tanks in the blink of an eye.

The metal giant that rushed over was extremely furious. As it ran, it continuously kicked and stomped on the tanks, causing them to explode. At the same time, it grabbed the tanks beside it and ruthlessly smashed them towards Zhen Tang and the others!

Chapter 1448 The world-shocking metal giant

The hover car left in a cloud of dust, leaving behind a series of wild laughter and angry curses.

Under the terrified gazes of the tanks and infantry, the metal Giants were like moving mountains, crashing into the convoy.

“BOOM!”

After the violent collision, there was a series of chaos. The entire communication channel was in a mess. Screams, curses, and cries for help were mixed together with all kinds of negative emotions, making it impossible to complete normal communication.

I’ve been destroyed by the monster. I can’t move now!

damn it, the Black Widow was caught by that monster and thrown out like a stone!

armor-piercing bullets and high-explosive bullets don’t work. We were f * cking sent here to die. These bastards!

“Requesting reinforcements, requesting reinforcements!”

Seeing another tank being casually thrown out by the undying metal giant, the remaining tanks immediately scattered, afraid that they would suffer the same fate.

The military vehicles and infantrymen that were following behind were not so lucky. They were trampled into the soil by the metal Giants and turned into a thin pile of soil. Their original appearance could not be seen at all.

Looking at the metal Giant’s Shadow that covered the sky, many soldiers felt despair and knelt on the ground to pray.

However, they soon realized that after the metal giant passed through the tanks and infantry, it did not stop. Instead, it left a series of deep footprints and wailing soldiers as it continued to run forward.

“Did you guys notice that the monster’s target doesn’t seem to be us?”

I knew it! It’s obviously chasing after that aircraft, and we’re all being used as shields!

“Bastards, if I catch those guys, I’ll make them wish they were dead!”

stop talking nonsense. Let’s quickly contact the higher-ups and report our findings. As for how to solve this matter, let’s leave it to those officials!

Just as the tank soldiers thought, when the metal giant appeared, the country’s high officials were all in disbelief.

He had been Living a Good Life and had not provoked anyone. Why would there be such a Thunderbolt above his head?

Although curiosity about supernatural phenomena was a common problem, when it happened in one's own territory and caused quite a lot of damage, and it was beyond one's control, then curiosity would directly turn into fear.

Especially when they heard that the tanks and attack helicopters sent by the nearby Garrison had been severely damaged, and the metal giant was still driving straight into the country, the high-ranking officials were suddenly in chaos.

Arranging for the evacuation of important personnel, setting up new interception means, and requesting for external assistance were also carried out quickly.

In the order that the interceptors had received, the metal giant was no longer the only thing that needed to be destroyed. The hover car that Tang Zhen and the others were driving was also included. Once their tracks were discovered, they would destroy it at all costs!

It was this shit stirrer who disturbed everyone's peace. He must die!

As for outside help, there was no other way. Although everyone knew that the metal giant was hiding a huge secret, and everyone wanted to keep it in their hands, it was a pity that this country was very weak and could not withstand the destruction of the giant and the coveting of powerful countries.

So the best way was to pull them in and use their advanced weapons to kill the metal giant. Then, he could take the opportunity to ask for post-disaster assistance, and maybe he could make a big profit!

The high-ranking officials' plan was perfect, and they didn't lack people to cooperate with them. As expected, they immediately received a response a few minutes after the distress signal was sent out.

Several military bases near the country would immediately send fighter jets to support, and fleets in the nearby waters could also act at any time to ensure that the metal giant could not leave the country.

After hearing the response from the foreign aid, the high officials who were in a terrible state finally breathed a sigh of relief. They continued to observe the scene captured by the helicopter.

What these high ranking officials didn't know was that a few minutes after the metal giant appeared, the country where the first rune sign was located received the message and locked onto the slums through spy satellites.

When they saw the metal giant that looked like a transformer and exuded black smoke, the entire Intelligence Center fell into a dead silence.

"Oh my God, is this really the world I live in?"

After the director shouted in disbelief, the entire Intelligence Center immediately began to work and collect a series of information.

When they discovered the metal giant's powerful defense and extremely agile movements, everyone had the same thought.

If he could master the manufacturing method of this metal giant and use it in war, what kind of terrifying destruction would it cause to the enemy?

Even if it could not be sent to the battlefield, the metal giant itself was enough to attract the interest of many people. Who knew if it was related to extraterrestrial civilization or prehistoric technology? as long as it could be obtained, it would be equivalent to opening a breakthrough in this aspect!

As such, after the collected information was quickly reported, the intelligence Center immediately received instructions from the highest level.

“Obtain it at all costs!”

At the same time, Tang Zhen and the others, who had started this incident, had also attracted a lot of attention.

The intelligence personnel had determined through the video transmitted back from the scene that the metal giant’s target was Tang Zhen’s group of four. The metal giant would chase in the direction they fled in!

As for the hover car that Tang Zhen and the others were in, the weapons used to shoot down the assault helicopters could be confirmed after analysis that they were all things that had never been seen before. They should all be high-tech items.

This discovery once again caused a shock. The intelligence Center began to analyze their origins and what kind of connection they had with the metal giant.

Very quickly, more information was gathered, proving that Tang Zhen’s group of four had once appeared in their country. During this period, they had kidnapped a young man and used unknown methods to erase the young man’s recent memories.

Then, the group of people went to a National Park and escaped from the tight encirclement. At the same time, they were also related to the bizarre disappearance of two police officers.

After that, pictures and videos were posted. Looking at the isolated island and the huge monster’s corpse, everyone was shocked.

The information contained in this matter was equally sensational, but it turned out that it was done by the same group of people. Who were they, and what were they planning to do?

The staff who felt that something was wrong checked their identities again, but there were no records at all, as if they did not belong to this world!

In addition to this shocking discovery, the staff found something even more shocking after careful comparison.

An emergency meeting was called, and all the elites were present, their faces full of seriousness and curiosity.

The director’s face was full of fighting spirit. This kind of situation had not occurred for a long time. This meant that this mission was no small matter!

according to the video data we collected and after a comparative analysis, we have determined that, except for one of the four targets, who is suspected to be human, the other three have very different

characteristics from normal humans. They are likely to be some kind of intelligent creature similar to humans!

one more thing is for sure. The four targets are much stronger and faster than ordinary humans. When they were avoiding the metal giant, target number four kicked a car away, and it happened to be captured by the camera at the corner of the street.

Looking at everyone's shocked eyes, the head of the intelligence Center said in a serious tone, " we even suspect that the four targets have the ability to become invisible, which is why they were able to avoid being caught without leaving any traces. At the same time, they have a folded space that can store items, and they come from a strange world that we know nothing about!

At this point, the eyes of the intelligence director became more and more eager, and he roared, " that's why we have to control them at all costs. We can't let our opponents get them, or it will be a disaster!

...

Chapter 1449 The beginning of disaster

More than one country knew of the existence of the metal giant. In just half an hour, the news had spread all over the world!

With the participation of advanced communication means, online media, and mobile phones that were popularized to every corner of the world, videos taken from the scene appeared in all corners of the world. The metal giant that was constantly chasing after the black fog shocked every audience.

In the beginning, many people thought that it was a movie video. While they marveled at how exciting it was, they also asked what kind of movie it was so that they could watch it when they had the chance.

Some people claimed that it was true, which had caused great panic, but they were laughed at by others. They obviously did not believe that such an incredible thing could happen in this world.

However, as time passed, more and more related videos appeared. Even some of the more famous media outlets reported on it one after another. Everyone felt as if their heads had been heavily hammered!

This was real, it was actually real!

The metal giant's existence had been confirmed, and people's emotions erupted like a volcano. They were arguing about this matter.

The appearance of the metal giant was like piercing through a layer of white paper. It made the people living behind the white paper suddenly realize that this world was far more dangerous than they had imagined!

The thought of the monsters in movies that could destroy the world and make humans pay a heavy price made people feel creeped out.

Since the metal giant, something that only existed in his imagination, had appeared, it was not impossible for other supernatural creatures to appear.

If the planet really became a paradise for demons, how would the weak humans deal with it? if the existing weapons could not eliminate these monsters, did this mean that this scene was a sign of the end?

All kinds of comments were rampant on the internet. Some people thought that this was just an accidental phenomenon and that ordinary people should live as they should. Some people thought that this was a warning from God and that everyone should be prepared as soon as possible to prevent being caught off guard when the disaster came!

Some people even claimed that this was a sign of an invasion, and it might not be long before aliens launched an attack on this world!

The people who spread this rumor were treated as lunatics, but some people believed it. They even made preparations in silence, storing large amounts of food, medicine, and weapons that could be found.

Some people built underground fortresses and entered the deep mountains just to guard against the origin of the disaster.

Most people scoffed at this kind of behavior. Unfortunately, they did not expect that this seemingly crazy prophecy was actually the real truth!

.....

On a barren land, there were many primitive tribes. The moment the metal giant appeared, an angry roar came from a thatched house. Then, an old priest walked out of the door and knelt in the direction of the sun, his face full of despair.

.....

In a remote town, an old man who was drinking tea felt his heart beating wildly. After that, his face revealed a shocked expression. He went straight to the secret room of his family and took out an ancient book.

When he flipped to one of the pages, his face suddenly turned ashen, and he couldn't come back to his senses for a long time.

.....

In the huge Hall, a group of men and women in long robes had solemn expressions. On the high platform at the front, a white-haired old man was praying softly. He turned around and shouted in a heavy tone, "the seal on the evil demon has been broken. This world is in danger. We must stop its arrival!"

.....

we can't let them gather the items to open the seal. Otherwise, we'll only be dead!

Just as the news of the metal giant's appearance spread across the world, a group of men and women of different identities gathered in the country where the third rune sign was located. They looked at the image on the monitor with a serious expression.

Ordinary people didn't know that there were actually some secret organizations in this world that no one knew about. They obtained magical powers through special means, and at the same time, they also guarded these secrets, never letting outsiders know.

The men and women gathered here were the representatives of the secret organizations, and the thing they were guarding together was the third rune sign.

The reason why the rune sign had fallen into the hands of ordinary people was most likely the doing of Yu Heng's ancestor. His purpose was to increase the difficulty of obtaining it.

In fact, the Guardians had long known that there was not only one rune sign in their hands, but a total of four. As long as they gathered all of them, they could open the seal and let disaster befall this world!

The first and second runes were missing, but the third and fourth runes were guarded by secret successors. Other than enjoying the benefits of the runes and obtaining unimaginable power, they swore to ensure that no one else could obtain them!

The appearance of Tang Zhen's group indicated that the legendary devil had appeared. The test of the protector had finally arrived.

Should they passively wait for the enemy to arrive or should they take the initiative to attack and eliminate the enemy? this matter had been debated by the two great Guardian groups for a long time. In the end, they had come to a clear answer. They would take the initiative to search for the traces of Tang Zhen's group of four. After which, they would intercept and kill them!

As soon as the order was issued, these guardians immediately took action. They used the various channels they had and tried every possible means to gather information about Tang Zhen's group of four.

The power of these guardians should not be underestimated. Because of their long history, they had far more means than ordinary people, which allowed their tentacles to extend to a wide range. Perhaps a public figure who held great power was one of the outer members that they supported!

The selected operation team members also set off quickly. According to the route they had analyzed, they were determined to kill the evil demon that had seized the rune sign!

.....

Because of the appearance of the metal giant, the entire world fell into chaos. Some unknown things also began to appear before the eyes of the world.

Although Tang Zhen didn't know that the current world was already in chaos, he knew that they would be completely exposed to the natives following the appearance of the metal giant. The process of obtaining the remaining two rune signs would become even more difficult.

What was Yu Heng's ancestor trying to do? he had gone to such great lengths to create obstacles. What was he trying to hide?

Although Tang Zhen really wanted to find Yu Heng and ask him about it, it was clearly not the right time. This was because there was still a metal giant chasing them.

those damn idiots can't even deal with a war puppet?"

Tang Zhen cursed. He drove the hover car and continued to fly. Behind him was the roaring metal giant. Everywhere he passed, there was a broken wall!

Along the way, they had already crossed more than one blockade line. Tang Zhen had even taken the risk of being shot down and deliberately passed through the tanks and aircraft. However, the metal giant had easily broken through each time.

Helplessly, he could only try his best to fly towards the sea, hoping that after entering the sea, he would be able to successfully escape the pursuit of the metal giant!

If he was still unable to shake off this hateful fellow, Tang Zhen could only use some special methods to make this damn metal giant go to hell!

To be honest, this metal giant did not give Tang Zhen much pressure. What he was most concerned about now was what was hidden within the treasure. If it was just the coordinates of a high-energy plane, was it worth going through such great efforts?

Chapter 1450 The reason for entering the sea

In order to get rid of the metal giant, the interceptors used all kinds of means. Missile planes were deployed, and the artillery on the ground was constantly roaring. It was a spectacular scene of the arrival of war.

Under the intense artillery fire, the metal giant's body burst into flames with every step it took.

After going through layers of interception, the metal giant's body was already clearly damaged. Its body was full of dense bullet holes, and black smoke was spewing out.

At the end of the day, it was just a war puppet. Although it had terrible defense and lethality, it still couldn't face thousands of enemies with modern weapons alone!

Even so, it continued to persistently chase after Tang Zhen's group without the slightest hesitation.

As for Tang Zhen's group, who had been running in front all this time, they were continuously attacked. Fortunately, the speed and agility of the hover car were extremely outstanding, allowing them to easily avoid the attacks.

In addition, Tang Zhen's route would change from time to time. It was impossible for the interceptors to set up defenses everywhere on the vast land. This led to the situation where Tang Zhen's group had already escaped through the gaps in the defensive positions that had just been established.

The commander at the back was so angry that he threw his hat and cursed, but he still couldn't solve the problem. He could only drive the car and plane to chase after them.

Unknowingly, an ocean with vast blue waves appeared in front of Tang Zhen. A few warships were swimming on the surface of the ocean, trying to make their final interception against Tang Zhen and the others.

Tang Zhen gently sighed in relief. If nothing unexpected happened, this Super Chase that had attracted the attention of the entire world would temporarily come to an end.

According to Tang Zhen's analysis, even if this metal giant was able to travel on the seabed, it would definitely be unable to cross the ocean and catch up to them. This was because the energy stored in the metal giant was already running out after being blocked and attacked all the way.

Perhaps in the next second, the metal giant would run out of energy and no longer pose a threat to them.

Although this war puppet had a very high research value, Tang Zhen was not in a hurry to keep it in his hands. After he occupied this world, what would he not be able to obtain?

However, after seeing the secrets and dangers that could be hidden in this world, Tang Zhen suddenly had an idea. He wanted to drag Morning Star City into this.

No matter how much of a bastard their old ancestor was, he would not go so far as to harm his own descendants. However, if he really did so, Tang Zhen would at least have to drag an unlucky fellow down with him to be struck by lightning!

Just as they were about to arrive at the seaside, Tang Zhen and the rest were attacked again as expected. The bullets from the military vehicles kept coming. They even used electromagnetic weapons in an attempt to make the hover car fall from the sky.

Fortunately, the Holy Dragon city's technological level was far beyond the imagination of the natives. This kind of method did not have much of an impact on the hover car, and they easily avoided the attack.

After successfully passing through the blockade line, the hover car rushed into the sea. After driving for a few kilometers, the hover car was kept by Tang Zhen into his storage equipment, and the four of them dove into the sea.

In the distance, a warship had already sent out frigates and speedboats, which were speeding towards the place where they had entered the water. The figures of planes flashed in the sky from time to time.

The shore was ablaze, and the metal giant had already taken half a step into the sea, struggling to move forward on the soft sand.

As the metal giant gradually entered the depths of the ocean, a large amount of seawater began to pour into its body from the damage. Its movements began to become slower and slower, and every step seemed to be extremely strenuous.

Unknowingly, the metal giant's movements became slower and slower, and finally, before the sea swallowed its head, the metal giant finally stopped moving forward.

It stared intently at the spot where Tang Zhen and the others had disappeared. Its flame-like eyes gradually dimmed and finally turned gray.

The interceptors, who had been chasing the metal giant, cheered in joy. When they saw the metal giant enter the sea, they thought that all their previous efforts had been in vain. They did not expect that at their most disappointing moment, they would welcome such a pleasant turn.

Soon, the sea became extremely lively. There were ships and planes everywhere on the sea. Steel cables were tied to the metal giant's body, ready to fish it up to shore.

For Tang Zhen's group of four who had already dived into the ocean, other than sending warships and submarines to search and capture them, the aircraft and satellites were also monitoring the entire sea region, not letting go of any suspicious targets.

However, the hunters had searched the sea more than a dozen times, with divers and all kinds of technological equipment taking turns, and even using trawling nets to salvage it, but they still found no traces!

Just like the previous encirclement, Tang Zhen's group of four was like a clay ox entering the sea, disappearing without a trace.

.....

On an ocean-going freighter, Tang Zhen's group of four hid in a container and threw their clothes that were soaked in seawater to the side.

"Yu Heng, tell me in detail, what's going on with this ancestral treasure?"

Tang Zhen's face was expressionless, but Yu Heng could clearly feel a suppressed anger. It was obvious that Tang Zhen was waiting for him to give a reasonable explanation.

After the previous series of encounters, if he were to use vague words to brush Tang Zhen off, he would definitely anger this future war zone leader.

Although the cultivation of the four of them was suppressed to the fifth rank, if they were to really fight, even if Yu Heng and the other two were to join forces, they might not be a match for Tang Zhen.

"To be honest, this treasure was indeed left behind by my ancestor, but it was set up by someone else.

In truth, this folded teleportation gate was something my ancestor obtained by chance. To a sector Lord, even though it was connected to a treasure trove, but among his collection, it was only one that wasn't eye-catching.

In addition, according to the ancestor's analysis, this kind of folded teleportation gate should come to a world-class tower in the Super Battle zone. It was specially designed to train the younger generation!

The ancestor had not taken out the treasures here. Firstly, he did not have the time, and secondly, he did not take a fancy to the treasures.

After that, because of a series of unforeseen events, our ancestors were severely injured. In order to let the surviving residents have a place to rely on, they exhausted all their efforts to build morning stars city and left the few remaining treasures for the younger generation. This treasure is one of them!"

As Tang Zhen listened to Yu Heng's story, he appeared expressionless, but he was actually secretly shocked in his heart.

Who would have thought that this treasure would be connected to a World Tower? if that was the case, would there be something incredible hidden within the treasure?

Yu Heng was also an old and experienced man. Without waiting for Tang Zhen to ask, he took the initiative to explain, " "You are probably thinking about what is in this treasure, right?"

"Actually, according to my ancestor's analysis, the rewards for training the younger generation of the world-level towers mostly include the resources needed for the construction of the tower to upgrade to a national level. There might also be some war weapons, such as the metal giant that chased us!

Once you obtain the reward, you'll have the right to become a subordinate of the world Tower and build a tower in a short period of time!"

what? " Tang Zhen frowned and said in a deep voice, " although this reward sounds very generous, it's nothing to four law Kings, right? "

Hearing this, Yu Heng laughed and shook his head, " "You're wrong. According to my ancestor, in those super battlefields, the price of a Tower Foundation stone is not only terrifyingly high, but there's no market for it. Even a law King can't take it as he wishes.

Therefore, in the eyes of the trial-takers, the building foundations in this treasure are the most valuable things. Firstly, the rarer something is, the more precious it is. Secondly, the building foundations produced by these wild buildings in super battlefields are definitely the best of the best. The building foundations in ordinary battlefields could never be compared with them!"
