

Alternate 1471

Chapter 1471 Preparation before the trial

The invasion war was in full swing, but Tang Zhen had returned to Holy Dragon City.

An invasion of this scale could not arouse his interest at all, especially after he had obtained the qualification to participate in the elite Tower selection in the Super war zone. He had put all his attention on this matter.

The gap between the Super Battle zone and the normal battle zone was too big. If they wanted to catch up with the normal method, who knew how many years it would take?

A thousand years?

!!

Ten thousand years?

Perhaps even longer!

Tang Zhen did not want to wait for too long because he had once promised that one day, when he was fully grown, he would take revenge on the torobo people who had once destroyed the Wildlands Warzone!

With his current strength, it was impossible for him to do this. It should be known that it was a Colossus-like interstellar empire that possessed quite a terrifying strength.

Tang Zhen wouldn't do something like throwing an egg at a rock. However, he had to fulfill his promise. Moreover, the qualifications for the elite Tower selection had coincidentally given him the opportunity to raise his strength.

After obtaining a place in the Super Battle zone, Tang Zhen would be able to repay his own battle zone and let the Holy Dragon City truly enter the ranks of the strongest towers.

Of course, the main reason was that Tang Zhen hoped to raise his own strength and broaden his horizons.

Tang Zhen's mind seemed to be wandering as he sat cross-legged in the secret room. In reality, he was sorting out the cluster of white light that he had received on the island earlier.

This item could be considered a storage equipment. It was bound to the soul and had extremely high concealment. It was considered one of the rewards for the trial-takers.

The storage space wasn't particularly big, but Tang Zhen didn't care much about it because the phone had the same function, or even more powerful.

The thing that he was truly concerned about was that there was a projection similar to the cornerstone platform in this space. In other words, as long as he carried this thing, Tang Zhen would be able to carry out a transaction at any time.

This was what Tang Zhen cared about the most. If he was in the other world, this platform projection would be a heaven-defying logistics warehouse, allowing Lou Cheng's cultivators to not be afraid of any challenge.

The projection platform should be considered a super battlefield. Tang Zhen saw many heaven-defying things on it. Even the cultivator skills were far better than ordinary battlefields. It was not much worse than the improved mobile phone!

However, there was one thing that Tang Zhen was very puzzled about. He did not see the so-called reward at all. What exactly was it?

After carefully reading it once, Tang Zhen had a sudden realization.

It turned out that the Super Battle zone's projection platform could also be connected to the foundation stone platform of the battle zone that the trial-taker belonged to, and it could be completed with a very simple step.

After the connection is completed, the residents of the building that the participant belongs to will be able to obtain a special privilege to purchase the items sold on the foundation stone platform of the Super Battle zone!

This situation was like an ancient person entering a modern supermarket to shop. To the ancient people, every item here was worth a city!

This was the reward given by the Super Battle zone. Not only did it take care of the participants, but it also benefited the loucheng that belonged to it!

Although it was not a monetary reward, it was far more valuable than that!

From this, one could see how tyrannical the Super Battle zone was. The cornerstone platform of a battle zone could be connected to it as it wished, and it could sell things in other people's territory as it pleased. However, the main control platform of the ordinary battle zone could not resist.

This was the difference in the level of authority. In other words, the Super Battle zones had higher authority, and the lower battle zones had no right to refuse!

Tang Zhen studied it for a while before finally connecting to the Holy Dragon city's main control platform.

He guessed that this was done in preparation for the trials in the future. Compared to the high prices in the Super Battle zone, the normal battle zone was obviously much cheaper. If the participants were short of war points, the goods in the normal battle zone were undoubtedly the better choice!

However, every participant had at least a law-level cultivation, and they all had the identity of a city Lord. Would such an existence really lack points?

Tang Zhen suddenly realized something as a trace of solemnness flashed across his eyes.

Could it be that he was going to transfer his soul to another world and take nothing with him except this ball of light?

The more Tang Zhen thought about it, the more he felt that this possibility was extremely high.

It seemed that he had to prepare some things in advance so as not to be caught off guard when the time came.

In fact, Tang Zhen did not have anything to tell his subordinates. All the matters in the Holy Dragon City were handled by his subordinates. His main body only needed to stay in the Holy Dragon City and continue to complete the refinement of the tower.

After thinking about it, Tang Zhen really did not have anything to worry about.

since that's the case, then adjust your state and slowly wait for the trial to begin!

Tang Zhen made up his mind and began to cultivate in the secret chamber. He hoped to reach the barrier of spiritual Emperor as soon as possible and raise the strength of his clone to the same level as his main body.

Cultivation knew no time, and in the blink of an eye, three years had passed.

During this time, the Holy Dragon City had completed the unification of the continent, and new towers were built all over the world.

The Golden-armored corpse Emperor of the corpse clan world had already left. At the same time, he had given them the coordinates of the plane as agreed. However, when the Holy Dragon City launched an invasion, they discovered that these small planes were actually the territory of the Golden-armored corpse Emperor's enemy.

It meant that when the Holy Dragon City invaded, they also helped the Golden-armored corpse Emperor take revenge!

Of course, this was nothing. Lou Cheng's cultivators only cared about how many resources they could get. They didn't care about the grudges behind this at all.

Unknowingly, nine national-level cities had completed the invasion mission and were successfully promoted to national-level.

Now, as long as one more level 9 city completed the upgrade mission, the Holy Dragon War zone could be officially established!

Everyone was looking forward to the arrival of this moment because when the war zone was officially established, the cultivators in Lou Cheng would get more benefits.

In these three years, Tang Zhen rarely appeared in public. Most of the time, he would be in the secret room quietly cultivating.

Now, his clone was only one step away from a breakthrough. However, without certain opportunities and special conditions, it was still impossible for him to become a spiritual Emperor.

Tang Zhen wanted to go to the spiritual ruins Warzone to see if he could repeat the previous advancement process. However, he knew that it was unrealistic because he couldn't find the way to go.

Tang Zhen had a premonition in his heart. Perhaps, he would have to start his trial in the next few days!

Since his main body was tempering Lou Cheng, he didn't have much free time. On the other hand, his clone was participating in the trial. God knows when he would be back. Therefore, Tang Zhen didn't cultivate for the next few days. Instead, he accompanied his family and had fun.

Now, there were many immortal land-like areas around the Holy Dragon City. If they wanted to play, they would not be able to explore it in half a year.

Five days later, Tang Zhen returned to the Holy Dragon City. He quietly sat cross-legged in the secret room. Very quickly, his breathing became weak, and his original terrifying pressure disappeared. At first glance, he looked like a vegetable.

The truth was that his soul was being pulled by a mysterious force and entered a mysterious and strange passage. After drifting for an unknown period of time, he finally arrived in a special world!

The elite Tower selection trial belonging to Tang Zhen had officially begun!

...

Chapter 1472 A traveler from an unfamiliar world

Tang Zhen recovered from his drowsy state. He quickly stabilized his mind and began to observe his surroundings.

It was a tent-like room that looked very solid. There was a row of folding beds on the ground, as well as some strange-looking daily necessities.

He was lying on the bed, and it seemed like his head was injured. The slightest movement would cause a tearing pain.

After confirming that there was no danger in the surroundings, Tang Zhen sensed the condition of his body and discovered that the light ball in his mind was still there. Everything was normal. Only his cultivation had completely disappeared.

!!

Being in an unfamiliar environment with heavy injuries and no cultivation left was undoubtedly a very dangerous thing.

As a law king who had experienced countless battles, Tang Zhen's mind had long been as firm as a rock. Although the current environment was very bad, it was still nothing compared to his past experiences.

After musing for a moment, Tang Zhen decided to observe his surroundings first before deciding on his next move.

Just as he was about to get up and take action, the sound of footsteps came from outside the door. Soon after, he saw a fat man walk in and coldly sweep his gaze at Tang Zhen.

"He didn't die? he's really lucky!"

After coldly snorting at Tang Zhen, the fat man continued to speak with malicious words, if you're not dead, get up quickly and continue to take care of your Ling Miao. If anything goes wrong, be careful that the big boss will take your dog life!

After saying that, the fat man cursed in a low voice and walked out of the tent.

A killing intent flashed across Tang Zhen's eyes. He crawled up from the bed with great difficulty and staggered out.

This body was too weak, and he had to heal as soon as possible.

However, he didn't have any Battle Points at the moment, so he couldn't exchange for healing potions, so he had to think of another way.

After walking out of the tent, Tang Zhen discovered that he was in a Valley. His surroundings were shrouded by a dense fog. A group of men and women in uniform were each guarding a strange-looking plant. They were carefully loosening the soil and fertilizing it, taking care of the plants as if they were taking care of babies.

Quite a number of people revealed a strange expression when they saw Tang Zhen's appearance. This was especially so for a young man who was standing beside the fat man. A cold glint flashed across his eyes.

"Little bean, why are you up? why don't you hurry back and rest!"

would he dare to rest? that variant spirit sapling has not been taken care of for several days. If he continues to wait, the spirit sapling might die!

hehe, the Ling Miao will definitely not die. However, there are people who wish for him to die so that they can obtain the right to supervise the Ling Miao. When the Ling Miao matures, it will at least be a one-star Spirit weapon embryo.

a 1-star embryo. This kid is really lucky to have encountered such a good thing. Not only will he receive a handsome reward, but he might even be appreciated by the spirit Master and be recruited as a full-time gardener!

that's why I'm jealous. But this guy is really lucky. He didn't die in the hands of the ghost, Zhenzhen.

Although Tang Zhen's cultivation had disappeared, his mental energy was still abnormally strong. It was just that it had already completely condensed into a physical form and outsiders were simply unable to discover it.

Although these people's whispers were inaudible, they were unable to escape Tang Zhen's ears. He was able to figure out many things after organizing and analyzing them a little.

The original owner of this body was called little bean. He had no power or influence and was just an ordinary gardener. However, perhaps he was very lucky, so the spirit seedlings he took care of had mutated and were coveted.

In order to obtain this spiritual seedling, the other party had deliberately schemed against Douzi and caused him to be attacked by ghosts.

As long as the little bean dies, the other party can logically receive the little Bean's spiritual seedling, and then use it to gain the spirit master's favor.

From this information, Tang Zhen quickly found a few key points. They were the spirit artifact embryo, Spirit Master, and ghost!

The existence of these things was enough to prove that this was a world with cultivators. It seemed that there must be a special purpose for the trial world to be chosen here.

However, the ball of light in his mind didn't give him any hints, so Tang Zhen didn't know what to do.

Of course, before that, his first task was to recover from his injuries and then make further plans.

Tang Zhen ignored the discussion of the gardeners and the dark and cold gaze behind him. He walked to a plant in the valley according to the information he had just analyzed.

The spiritual seedling looked like an emerald green vine with Starry silver patterns on its surface. Under the leaves of the vine hung a fruit that looked like a gourd. It was warm and emerald green in color.

When Tang Zhen was approaching the plant, a light screen suddenly appeared in an attempt to stop him from moving forward. However, it quickly disappeared.

This should be a kind of defensive runic magic circle. Outsiders would be blocked from the outside, and only the owner of the spiritual seedlings could enter.

Tang Zhen sized up the Ling Miao. He picked up a Jade pot from the ground and slowly walked towards a spring in the center of the valley.

The surrounding mist continued to gather towards the spring, condensing into drops of dew. The gardeners filled Jade pots with spring water to water their Ling seedlings.

After seeing Tang Zhen preparing to fetch the water, the youth who was standing behind the fat man revealed a malicious smile as he quickly walked towards the spring.

When the gardeners at the side saw this scene, all of them revealed mocking expressions, as if they were waiting to see Tang Zhen make a fool of himself.

Tang Zhen slowly walked to the side of the spring. He used his finger to touch the bone-chilling spring water as a strange expression flashed across his eyes.

It turned out that the spring water actually contained a faint energy. Although it was very weak, if he extracted it, it would still be very beneficial for his recovery.

A series of light footsteps could be heard, getting closer and closer to him.

Tang Zhen silently poured a pot of water. A trace of a cold smile was revealed on the corner of his mouth. He suddenly shifted half his body and turned around at a strange angle.

Aiyo! a cry of surprise was heard, followed by the sound of water falling into the water and a cry of pain.

The young man who had tried to sneak attack Tang Zhen fell into the spring. His two legs were split apart on the slippery rocks as he screamed miserably. He had a twisted expression as if his balls had been broken.

The gardeners who were waiting to watch the show were stunned for a moment. Then, they burst into laughter, causing the young man's face to become even more distorted. His eyes were filled with resentment as he looked at Tang Zhen.

A gardener hurriedly went to support the young man. The fat man then shouted at Tang Zhen, "What's wrong with you? why did you hurt your colleague on purpose?"

Tang Zhen coldly looked at the fat man and said in a deep voice, "Are you blind? he fell into the water himself. What does it have to do with me?"

The fat man glared at Tang Zhen. Under everyone's eyes, he could not say that the young man wanted to deliberately kick Tang Zhen into the cold Spring so that he would have more injuries on top of his injuries and die earlier, right?

Don't tell me Tang Zhen is going to wait there to be kicked? one can't be shameless to this extent!

Not to mention that in the eyes of outsiders, the scene just now was just a coincidence. If there was anyone to blame, it could only be blamed on the youth's bad luck. He wanted to plot against others, but in the end, he kicked the air and pulled on his own balls!

Ignoring the flustered and exasperated fat man, Tang Zhen walked over to the spirit seedling that belonged to him and slowly watered it.

Following that, Tang Zhen learned from the others and used a quill pen to dip in the spring water. He wiped the Ling Miao from the inside out, leaving no dust behind.

During the process of cleaning, Tang Zhen was also carefully observing and sensing this spiritual seedling. He found that it was not a particularly precious thing and there were quite a number of them in the tower world. However, the fruit it bore was very interesting and seemed to be able to accept the tempering of spiritual power.

When this kind of item was tempered to a certain extent, it could be used as a weapon and could even be kept in the body at any time.

...

The gardener had said that the fruit was something that clerics needed. Did that mean clerics also relied on their spiritual power to fight?

After thinking up to this point, Tang Zhen's mental energy condensed into a thin thread and tried to wrap around the small gourd.

Tang Zhen clearly felt a wisp of suction force the moment he made contact with it. His spiritual force was absorbed into it while the small gourd trembled at the same time.

Fine silver lines appeared on the small gourd. They looked like natural runes and were filled with a mysterious aura!

Chapter 1473 A conspiracy

Tang Zhen was slightly stunned when he saw the changes on the small gourd. He did not expect that the invasion of his spiritual energy would actually cause such a huge change to the spirit sapling fruit!

Compared to the state it was in before he touched it with his mental power, the level of the small gourd seemed to have increased a little.

Tang Zhen silently used a leaf to block the small gourd. He sat on a stool beside him and drank a mouthful of spring water before starting to rest.

At the same time, in a tent not far away, the young man with broken balls was lying on a folding bed, grimacing in pain. He shouted at the fat man, "Second uncle, I must kill that guy. You must help me!"

!!

The fat man held the teacup and said with a troubled expression, "Last time, when we were resisting the ghosts, I moved this kid to a corner and secretly removed the protective array there. I thought I could use the ghosts to kill him, but who knew that he was so tough that he didn't die even after his skull was cracked!

You also know that as long as he's not dead, we can't snatch his Ling seedlings. Otherwise, if we're reported, it'll be a serious crime!"

The young man's face was filled with anger and hatred. His eyes were filled with a fierce light as he roared, "He must die. If you want to blame someone, blame his dog shit luck for actually nurturing a variant spirit seedling!

As long as the spiritual seedling lands in my hands, I can cultivate a one-star spiritual weapon embryo. Then, as long as I present it to the Lord Spirit Master, it's very likely that I'll obtain the qualifications to enter the spirit realm!"

The young man's eyes were filled with longing as he said to the fat man, "As long as I enter the spirit realm, I'll have the chance to learn more knowledge and even have the chance to become the disciple of the spirit Master. I might even become a spirit Master!

Second uncle, this is our family's opportunity, we definitely can't miss it. And when I become rich in the future, I definitely won't forget the benefits you've given me!"

The fat man nodded and said, "but the problem is how to solve the problem with the big boss. What if he also wants the embryo?"

The young man sneered and said to the fat man, "I've already asked someone to inquire about it in the spirit realm. Our Big Boss is only a low level spirit apprentice, and I'm going to rely on a high level apprentice. So even if he's not willing, he definitely won't dare to say anything!

Hehe, if he dares to make things difficult for us, I'll plead with the Lord Spirit Master I've taken refuge with. If I become a spirit apprentice, I won't have to be afraid of him!"

The fat man pondered for a moment and nodded slightly.

alright, when the ghost invades again on the night of the next full moon, I'll think of a way to bring him near the protective circle again. I don't believe that he's so tough that he can survive two times in a row!

The fat man's tone was ice-cold. He felt depressed in his heart because he was unable to kill Tang Zhen the last time.

Tang Zhen did not know about the scheme of this uncle and nephew pair. Otherwise, he would definitely be sneering in his heart. In reality, they had already succeeded. Otherwise, Tang Zhen would not be able to occupy this body.

However, now that the body belonged to him, these guys wanted to kill him again. They were simply courting death!

The valley seemed to have been deliberately transformed, and the sun and moon could not be seen. When the sky became dark, everyone returned to their tents to rest.

Tang Zhen's roommates seemed to have an ordinary relationship with the original owner of the body. There was nothing to talk about between them. After a simple wash up, these people went to sleep one after another.

Tang Zhen was lying on the bed. He seemed to be resting, but in reality, he had not fallen asleep.

When it was midnight, he got out of bed and walked out of the tent quietly.

At this moment, it was almost impossible to see one's fingers in the valley. However, Tang Zhen easily avoided those obstacles and walked all the way to the spring's mouth that was emitting a threatening cold air.

Picking up the Jade pot in his hand, Tang Zhen used a stone to draw on it for a while before slowly putting it into the water.

A deep and mysterious incantation was emitted from Tang Zhen's body. Under the urging of his spiritual force, the solidified spiritual force barely condensed into a thread and activated the runic magic circle on the Jade pot.

The Jade pot glowed, and the energy in the spring water quickly gathered inside, becoming more and more viscous.

After doing all of this, cold sweat continuously appeared on Tang Zhen's forehead. Just like his cultivation, his mental energy had also been sealed. The actions just now had already exhausted all of his strength.

After waiting for half an hour, Tang Zhen finally took out the Jade pot that was emitting cold air. He looked at the dense spring water shaking inside before raising his head and gulping it down in one go.

Tang Zhen's face turned deathly pale after the spring water entered his stomach. He gently trembled for a moment before he opened his mouth and spat out a mouthful of cold air.

"Although the purity of the energy is very low, I should be able to recover from the damage to my body after a few more times."

Tang Zhen nodded his head in satisfaction. He rubbed his ice-cold stomach and slowly walked toward the tent he was staying in.

In the next few days, Tang Zhen took care of the Ling seedlings in the day and condensed the energy in the cold Spring at night. While healing his body's injuries, he also constantly collected information about this world.

However, this Valley was basically in a sealed state. Other than these gardeners, no one else could be seen. This also caused Tang Zhen to not have much harvest.

One morning, the entrance of the valley, which was covered by clouds, suddenly changed. A bus-like vehicle slowly drove in.

alright, today is a rest day. The car is already here. Anyone who doesn't have enough money can come to me to borrow money!

The fat man was the manager of this place. When the bus entered, he shouted to everyone. At the same time, he glanced at Tang Zhen, intentionally or unintentionally.

Just as Tang Zhen was considering whether to take the opportunity to go out and take a look, someone suddenly came over and said to him, little bean, aren't you going out? I heard that there are a lot of new things in the town outside, and they are all from big places!

Tang Zhen looked at this gardener who was not very familiar with him. A smile was revealed on his face as he said, "Is that so? it's good to go out and take a look!"

A trace of pride and excitement flashed across the gardener's eyes. However, he did not see the cold smile on the corner of Tang Zhen's mouth.

The two of them went to the fat man's place to borrow money. The other party's face was dark as he asked Tang Zhen to sign. He then took out ten translucent coins and casually threw them on the table.

Tang Zhen's heart slightly moved as he held the money in his hand. He silently placed the money into his pocket.

After everyone got on the bus, the bus slowly drove out of the valley and began to drive quickly along the road between the valleys.

Tang Zhen had been looking out of the window the entire time. He discovered that he could occasionally see areas covered by clouds in this Valley. It was likely that these were also cultivation gardens.

The gardeners here were all ordinary people with excellent spiritual power. After learning how to cultivate spiritual seedlings, they were hired by various organizations to help them cultivate spiritual seedlings.

After the spiritual seedlings matured, the organization would have the priority to purchase them. However, if the gardener wanted to sell them to others or keep them for himself, he would have to pay a very high fee.

This was a special profession that could not be done by those without talent. The benefits were quite good, but the only drawback was that they lived in the deep mountains and forests all year round, and moved camps from time to time.

For these gardeners, almost no one would miss the chance to go out once a month.

About two hours later, the bus drove into a city built in the mountains, and the people on the streets became more and more dense.

After stopping by the side of the road, the driver informed everyone to gather here in the afternoon and drove off.

Tang Zhen observed his surroundings as he watched the gardeners scatter away. He lowered his head and slowly walked toward a remote street.

Chapter 1474 Counterattack

Just as Tang Zhen was walking towards the street, a few men dressed like gangsters were staring at him from the crowd not far away.

Next to these men was the gardener who had incited Tang Zhen to come out and shop. After pointing at Tang Zhen a few times, he handed the heavy bag to one of them.

this is the reward. Remember, it must be done cleanly and neatly. The corpse must also be disposed of!

The leader weighed it in his hand, then opened the pocket and looked inside. He was satisfied.

!!

don't worry. It's not the first time we're working together. I guarantee it'll be clean and neat!

After the gang leader finished speaking, he tilted his head to the people beside him and followed Tang Zhen.

Not long after, a few of the hooligans also entered the street and searched for Tang Zhen's traces in the crowd.

"Boss, he's there!"

one of his men pointed at the stall in front of him and reminded the leader.

"Follow him and make your move when there's no one else!"

The hooligans nodded at the same time, reached for the weapons hidden at their waists, and quietly gave chase.

At this moment, Tang Zhen was shuttling back and forth between shops and street stalls. He was quietly gathering information about this world. At the same time, he combined it with the information he had obtained in order to figure out the mission objective of his trial this time around.

Since the ball of light did not give any clues, Tang Zhen could only slowly search for it himself.

After walking around the street once, Tang Zhen turned around and walked toward a nearby forest.

Those few punks revealed happy expressions. They secretly thought that Tang Zhen was really fated to die. Walking into the forest while being chased by people was really no different from seeking death.

However, when they chased into the forest, they discovered that Tang Zhen had already disappeared. They did not know where he was hiding.

“Everyone, look carefully. He can’t have gone far. He must be hiding somewhere!”

The leader of the thugs shouted as he pulled out a sharp knife from his waist and shouted at his subordinates.

Seeing their boss’s face full of anger, the hooligans hurriedly nodded and pulled out their weapons to search the forest.

The area of this forest wasn’t small. If Tang Zhen were to discover it and hide, it would definitely waste a lot of time to find it. If someone were to come in during this period of time, even the punks would not dare to make a move.

The leader was still angry. If people knew that the target he wanted to kill had disappeared from under their eyes, it would be extremely embarrassing.

After walking for a distance, the leader seemed to hear footsteps. Just as he was about to turn around to check, he heard a cold voice.

“Buddy, are you looking for me?”

Slightly shocked, the gang leader was about to turn around to check and then unsheath his knife when he heard a crisp “PA” sound and the cold bullet pierced through his skull.

The gang leader’s face was filled with disbelief. A bullet hole appeared between his eyebrows and his body fell to the ground.

“You guys are not qualified to kill me!”

He took out the money bag from the leader’s pocket and muttered the word ‘absorb’. The money instantly disappeared.

When he was borrowing money from the cultivation base, Tang Zhen had discovered the abnormality of the light ball. It turned out that this kind of money was actually the same as the brain Pearl, and could be exchanged for points on the cornerstone platform.

To Tang Zhen, this was definitely a pleasant surprise. Therefore, he immediately exchanged for a pistol with a silencer after getting out of the car.

After taking care of his surroundings, Tang Zhen kept the corpse of the gang leader and walked towards the depths of the forest.

By right, the gang leader had already been killed. After his men lost their leader and their reward, they would definitely not cause any more trouble for Tang Zhen.

However, Tang Zhen didn’t want to leave behind any future trouble. Therefore, these few punks must die.

The following process was very simple. Even without his cultivation, he could easily take care of these little punks.

After a few muffled gunshots, Tang Zhen slowly walked out of the forest.

He first walked around the streets and bought some things. When it was almost time, he slowly walked towards the scheduled meeting point.

The gardener who had schemed against Tang Zhen earlier was also there. After seeing Tang Zhen return safely, his expression became very ugly. He wanted to ask something, but he was afraid of being exposed. His expression was uncertain.

Tang Zhen, however, acted as if nothing had happened. He greeted the gardener and quietly sat on the long bench.

“Little bean, it’s rare for you to come out. Don’t you want to walk around?”

The gardener finally couldn’t help but come over and ask.

“There’s nothing to buy.”

Tang Zhen indifferently replied. However, he had already labeled this fellow as dead in his heart.

Seeing that Tang Zhen was unwilling to pay attention to him, the gardener felt a burst of frustration in his heart. If he was unable to complete the task that the fat supervisor had given him, he would definitely be scolded when he returned.

He cursed the hooligan in his heart. Just now, he was patting his chest and promising that there would be no problem, but in the blink of an eye, he came back unscathed. Was this the guarantee he gave me?

He wanted to find those hooligans to settle the score, but after waiting for a long time, they still didn’t appear.

Damn it, did he run away with the money?

After waiting for more than an hour, the gangsters still didn’t show up. However, the bus drove over.

Seeing Tang Zhen get into the car, the gardener was in complete despair. He followed with an unwilling expression.

There was no need to elaborate on the rest of the process. After everyone had arrived, the bus began to return to the original route.

When they entered the valley, Zhen Tang saw the fat supervisor. He was staring at the gardener who got out of the car. When he saw Zhen Tang get out of the car safe and sound, his face immediately turned gloomy.

After Tang Zhen left, the fat supervisor called the gardener who had incited Tang Zhen to go out into the house. There seemed to be faint shouts and curses coming from inside.

In the distance, Tang Zhen sneered. He picked up the Jade pot beside the Ling Miao and poured a pot of water into the spring.

When he turned to leave, he heard the conversation between the two gardeners.

do you feel that something is wrong? it seems that the temperature of the spring water has risen quite a bit? ”

something is wrong. When I watered the spiritual seedlings with spring water, I realized that they were not willing to absorb it!

...

“Do you think we should report this to the supervisor? if it affects the growth of the Ling seedlings, we will suffer a huge loss!”

“Let’s wait and see. If there’s a mistake, we’ll be scolded!”

Tang Zhen’s footsteps did not stop. However, he was quietly thinking in his heart. It seemed that the abnormality of this Cold Spring had been discovered by someone.

This was also a reasonable matter. One must know that the Ling seedlings in the entire Valley relied on this Cold Spring to water them. It was just that the energy condensed in the clouds every day was limited. After more than half of it was taken away by Tang Zhen, the quality of the spring water would definitely decline.

One or two days was not enough to tell anything, but if time passed, the Ling seedlings that lacked the nourishment of energy would definitely show some abnormalities.

Fortunately, Tang Zhen’s injuries had almost recovered after a few days of absorption. Moreover, after he found a way to exchange for Battle Points, Tang Zhen only needed to exchange from the cornerstone platform. He did not need to waste effort to refine the energy in the spring water.

However, Tang Zhen didn’t want to let this bunch of gardeners get away with it. One must know that they had all seen the humiliation that the original owner of the body had suffered. In the end, not a single one of them helped. As a result, although the bean was lost, it still left behind a thick resentment.

Since Tang Zhen had borrowed the other party’s body, he would naturally have to help him complete his last wish!

“Soon. In a few days, I’ll send them on their way!”

Tang Zhen muttered in his heart as he walked to the front of the Ling Miao and continued to repeat his previous work.

Time passed slowly, and before they knew it, it was the night of the full moon!

...

Chapter 1475 The change in the moonlit night

Although it was hard to see the moon in the valley, it did not affect everyone’s nervous mood.

Every time this day arrived, ghosts and monsters would appear and attack the protective barrier in a frenzy, trying to devour the Ling seedlings that were carefully cultivated by the gardeners.

In addition to the spiritual seedlings, living people were also the prey of monsters. Any gardener whose flesh and blood were devoured by these ghosts and monsters had died a miserable death.

It was hard to be perfect in this world. Although the job of a gardener had a good salary, it was very boring and even life-threatening!

!!

However, in most cases, the ghosts and demons were unable to break through the protective spiritual array of the plantation base. Even if it was occasionally damaged, the ghosts would enter the valley and most of them would be destroyed by the guards.

They had weapons engraved with spiritual arrays in their hands, which could cause great damage to ghosts and monsters. As long as they cooperated well, one or two ghosts and monsters were nothing.

But even so, the gardeners were still filled with fear, so they were prepared before sunset.

There was a limited number of weapons engraved with spiritual arrays, so it was impossible for everyone to have one. Most of the time, they were in the hands of the guards. What the gardeners had to do was to cooperate and repair the protective spiritual array.

The fat supervisor had been busy for a long time. He led people to check the Valley's surroundings again and again. After confirming that there were no problems, he gathered everyone to the edge of the valley.

Night fell unknowingly. In the thick fog outside the valley, there would be strange sounds from time to time. They seemed to be wandering in the thick fog, looking at the people in the valley with greedy eyes.

In a daze, there seemed to be distorted shadows walking out of the thick fog. They tried to enter the valley but were blocked by an invisible barrier.

After a few collisions, the shadows seemed to become angry from embarrassment and let out mournful howls in unison. Then, faces full of hatred and pain flashed in front of everyone's eyes, as if they were about to choose a person to devour!

"Bang Bang Bang!"

A series of heavy footsteps sounded, and then a large figure appeared. They had the bodies of wild beasts and emitted a pungent smell. They raised the stones in their hands and kept throwing them at the protective barrier.

The sound of collision rang out continuously. The protective spiritual array was like an elastic transparent film, reflecting those huge rocks back. However, they were quickly picked up by the monsters and repeated the previous attack.

The area of the valley was very large, and the number of ghosts and monsters was unknown. As a result, the knocking sounds could be heard everywhere, making everyone more and more nervous.

something's not right. Why are there so many ghosts and demons this time? "

that's right, it's almost twice as much as before. What happened? "

damn it, can the defensive spiritual array block it? if it can't, we'll be dead!

The gardeners trembled in fear, and the fat supervisor was equally frightened. He had been in this line of work for almost 20 years, but this was the first time he had seen such a terrifying battle.

everyone, listen up. You should immediately spread out and each of you is responsible for guarding an area. Once you find any signs of the spiritual array collapsing, immediately shout and alert the police!

After driving the trembling gardeners to various locations, the fat supervisor began to patrol around with the guards, afraid that there would be any loopholes.

At the same time, he was also secretly puzzled. Why would such an abnormal situation occur?

Just as everyone was busy dealing with the attacks of the ghosts and monsters, in the middle of the valley, a spiritual seedling was quietly changing. The originally green fruit was slowly turning red.

At the root of the Ling Miao, there was a slanted Jade pot. The mouth of the pot was inserted into the soil, and the slightly viscous Cold Spring water was constantly seeping into the soil.

As the color of the calabash-shaped fruit deepened, the attacks of the ghosts and demons became fiercer and fiercer, and the "Bang Bang" sounds of collision became more and more frequent.

"Not good, the protective spiritual array is broken!"

A certain area's protective spirit array suddenly let out a crisp cracking sound, causing the gardener in charge of guarding the area to turn pale with fright and shout at the top of his lungs.

The faces of the fat supervisor and the others changed when they heard the sound. They ran desperately towards the position of collapse and shouted at the gardener at the same time, "What are you waiting for? hurry up and patch it!"

When the gardener heard this, he immediately moved towards the broken protective spiritual array with a tearful face and stretched out his trembling arm.

He had a talisman-like object in his hand. When he approached the protective spiritual array, it began to flash with a faint fluorescent light.

"Owwuuu!"

Seeing the gardener approach, a hideous monster opened its bloody mouth and roared at him fiercely.

"Mother of God!"

The gardener was so scared that his face turned ashen and he fell to the ground. However, he quickly got up and closed his eyes to approach the protective spiritual array.

"Trash, get lost!"

At this moment, the fat manager and the others rushed over. One of the guards reached out and pressed his spiritual talisman on the protective spiritual array. With a flash of light, the cracks were quickly repaired.

Feeling relieved, the fat supervisor was no longer in the mood to pay attention to the timid gardener. After glancing around, he was about to go to another position to save the trouble.

However, when his gaze fell on a figure not far away, his mood immediately became terrible, and a fierce light flashed in his eyes.

This human figure was Tang Zhen. He stood motionlessly in front of the protective spiritual array and stared at those ghosts and monsters without blinking. He seemed to be very interested.

When others saw these monsters attacking the defensive spiritual array, they were all scared out of their wits. Only Tang Zhen had a calm expression as if he was not afraid of these terrifying things.

In contrast, it was extremely eye-catching.

“Is this kid scared silly?”

The fat manager really wanted to remove the protective spiritual array in that area and kill Tang Zhen directly. However, the situation tonight was a bit strange. He was afraid that once the protective spiritual array was opened, he would not be able to seal it again.

“Little bean, what are you doing, you bastard? do you want to die?”

Suppressing his desire, the fat manager roared and turned to leave.

However, at this moment, he saw the usually timid and quiet young man turn around and look at him coldly.

The look in his eyes was very strange, as if he was looking at a dead man!

When the fat supervisor met his gaze, he trembled for some reason. He wanted to curse again, but he held it back.

“Hmph, he’s just a person who’s going to die. There’s no need to be calculative with him.”

The fat manager muttered in his heart. He slowly turned around and saw a shocking scene.

A faint light suddenly appeared in the area where the spiritual seedlings were cultivated. Then, a Vermillion fruit slowly floated up from one of the spiritual seedlings, which was very eye-catching in the dark environment.

The fat manager looked at this scene in a daze, and an expression of surprise and surprise flashed across his face. He couldn’t help but roar, “ this is the embryonic fruit of a mayfly that is at least a three-star!

It was no wonder he was so shocked, because the embryo of a 3-star fruit was extremely rare. To a Spirit Master, it was an excellent raw material for making weapons, and every one of them could be sold for a sky-high price!

...

But this wasn’t the most important thing. If he gave this kind of spirit tool embryo to a Spirit Master and made a request at the same time, as long as it wasn’t too excessive, the other party would basically agree to it.

It could be said that as long as one had this thing, it was equivalent to obtaining the qualifications to make conditions with a Spirit Master. Its value was immeasurable.

Looking at the fruit greedily, the fat manager only had one thought in his mind, which was to get it!

Not only did the fat manager see the floating fruit, but the others also noticed this scene. They also looked at the center of the valley with greedy and envious eyes, even temporarily forgetting the crisis they were facing.

it's actually a three-star embryonic fruit. Am I seeing things? "

"Oh my God, how much is this going to sell for?"

this can't be measured with money at all. Who would sell it for money? "

this is little Bean's spiritual seedling, right? that's right, it's his!

"Hehe, so what if he is? he won't get it anyway!"

Just as everyone was discussing, the ghosts and monsters let out mournful roars. They seemed to have gone crazy as they madly slammed into the protective spiritual array, causing the sound of shattering to ring out!

Seeing those crazy monsters, everyone immediately realized that the reason for tonight's abnormality was obviously this mature three-star spiritual weapon embryo!

...

Chapter 1476 News about the cleric

"Not good, the ghost is coming in!"

Everyone in the valley was shocked. Without any command, they all went to the broken parts and tried to repair them.

Once these monsters charged in, everyone would die Here!

In the face of a life and death crisis, most people threw their greedy thoughts to the side, but there were still some people who were staring at the spirit weapon embryo.

!!

This person was the Bullsh * t young man who wanted to kill Tang Zhen and take the Ling Miao for himself.

His eyes flickered with excitement as he rushed towards the fruit without a care for anything else. He completely ignored the monster that was madly attacking the protective spiritual array.

Under normal circumstances, only a Spirit Master could personally control the spirit array to ripen the fruits of these spirit seedlings. This was also the reason why he had wanted to kill Tang Zhen before.

Who would have expected that the fruit would automatically ripen tonight? therefore, it did not matter whether he killed Tang Zhen or not. As long as he managed to snatch the fruit into his hands, what could that fellow who bullied others do to him?

Even if he said that the fruit was his, someone had to believe him and be willing to testify!

If this still didn't work, he would just kill them directly. It wouldn't take much effort anyway.

Thinking about the benefits of giving the fruit to the spiritual master, the ridiculous young man's footsteps quickened a little. Looking at the fruit in front of him, he was so excited that he almost roared.

However, the moment he stretched out his hand, he felt a slight chill in his heart, as if something had penetrated his body.

A face slowly emerged from the darkness. It was the little bean that he wanted to kill.

He was looking at her with a teasing expression, as if he was looking at a fool.

Once upon a time, he had also looked at the other party with this kind of gaze. But when the other party looked at him with this kind of gaze, it represented the arrival of death!

"Plop!"

The ridiculous young man fell to the ground with an expression of death.

After putting away the fruit that was hanging in the air, Tang Zhen turned his head and glanced at the fat manager and the others who were blocking the protective spiritual array. He took out the remote control and pressed it gently.

"BOOM!"

A loud explosion rang out, and a large hole was blasted in the protective spiritual array. The guards and demons nearby were directly torn to pieces.

"Roar!"

The ghosts and demons let out excited roars and swarmed into the cave, killing wantonly in the crowd.

The gardeners were torn apart and devoured by the monsters one after another, and the ghosts were also wantonly absorbing the essence of the living. The valley was filled with broken corpses.

The fat manager and more than a dozen guards were gathered together, trying their best to resist the attacks of the ghosts and monsters. Although their weapons could deter the monsters, as more and more monsters gathered, their resistance became less and less effective.

A miserable shriek rang out as another guard was caught by the demon and torn in half!

quickly attack and kill them! Otherwise, we'll all die!

The fat manager's face was completely twisted. He kept roaring and waving a more delicate retractable stick in his hand. Every time he waved it, there would be a silver light, and the monster's skin would be torn open.

Even so, they were still unable to defend against the tide-like attacks of the monsters.

The fat manager's eyes flashed with despair. He now hated the fruit that had suddenly ripened and the gardener who had cultivated the Ling seedlings. If it were not for these two factors, the crisis at this moment would not have appeared at all!

“This damn pea, I should have killed him back then!”

The fat manager gritted his teeth and his eyes became extremely sinister.

As soon as the thought came to his mind, the fat manager saw a familiar figure appear in the darkness. He stood behind the group of monsters and looked at him with a faint smile.

Although it wasn't a ghost, in the fat manager's eyes, this figure was far more terrifying than a ghost!

What frightened him the most was that the crazy monsters were not far from him, but they seemed to turn a blind eye to him.

“Damn it, what's going on?”

The fat manager was completely flustered. He stared at Zhen Tang, trying to figure out what had happened.

At this moment, Zhen Tang, who was in the middle of the group of monsters, smiled and raised his pistol.

“Bang!”

With a flash of fire, the fat manager's arm trembled, and the weapon in his hand suddenly fell.

Before he could scream, a monster's sharp claws grabbed the fat manager's head and pulled hard!

Blood splattered everywhere as the fat manager's head was torn off. The headless body twitched a few times before it fell to the ground.

The rest of the guards turned pale with fright. Before they could react, they were surrounded by more monsters and turned into broken corpses on the ground in the blink of an eye!

.....

At noon the next day, a group of people in charge of checking the casualties on the night of the full moon appeared outside the valley. After calling out repeatedly but receiving no response, they immediately realized that the situation was not good, and then rushed in.

Then, everyone saw a hellish scene. The valley was filled with broken corpses and the Ling seedlings that the gardeners had taken care of were all devoured by the demons.

After searching the entire Valley, not a single person survived!

Some people couldn't stand the gory scene and vomited uncontrollably.

This kind of tragedy couldn't be concealed at all, so it spread very quickly. It was said that it even attracted the attention of a few Spirit Masters, who came to investigate the scene.

In the end, they came to the same conclusion. This place had once nurtured a spirit weapon embryo of extraordinary quality. That was why it had attracted the frenzied attacks of the ghosts and demons, which eventually led to a massacre!

As for the whereabouts of the spiritual weapon embryo, some people speculated that it had been eaten by monsters, while others suspected that it had been taken away by survivors. However, because there was no evidence, no one could confirm its whereabouts.

After some time, the matter was settled. The valley was cleaned up again, and soon a new plantation team was stationed there.

As for those who died, who would care?

.....

Tang Zhen walked on the bustling Street and would occasionally glance around.

...

He was in a big city with a population of several million. There were tall buildings and all kinds of new things everywhere.

This was a world that was completely different from his original world. Not only did it have a perfect and developed social system, but it also had powerful cultivators.

As for those ghosts and demons, it was said that they lived in another dimension. They appeared on the night of the full moon, but they only hovered in the deep mountains and old forests, never daring to approach the town.

Tang Zhen was very interested in the information of Spirit Masters. Unfortunately, he had only collected very little information. Moreover, a lot of it was unclear.

According to the information he had gathered, most of the cultivators in this world were far away from ordinary people. Ordinary people might not be able to come into contact with them for the rest of their lives. It was as if they lived in different worlds.

The reason for this situation was that there were strict rules between the spirit Masters, which restricted them from coming into contact with ordinary people. Also, ordinary people were not allowed to enter the area where the spirit Masters lived unless they had special permission.

The city that Tang Zhen was currently in was a place where ordinary people lived. However, there was a train that led to the location of the spirit Master in the train station!

He was able to discover this secret because he had once secretly followed a spiritualist apprentice, who was the big boss that the fat manager had mentioned.

After the other party had surveyed the valley, they had left without a word, not knowing that there was an extra tail behind them.

The spiritualist apprentice then went to a private room in the station. After waiting for a while, he boarded a seemingly ordinary train.

At first, Tang Zhen wanted to board the carriage with him, but he discovered that a protective spiritual array had been set up on those carriages. Without a pass, it was impossible to enter.

...

However, Tang Zhen still followed the train for a trip. In the end, he discovered that when they passed a certain station, those carriages would enter a special space. They would only leave after the passengers got off.

Ordinary people couldn't see this scene, and they didn't even know the existence of these carriages!

Tang Zhen witnessed the entire scene before following the train back to the city where he had set off from. However, he already had a plan to sneak in.

A dozen meters in front of him, a young man got off a vehicle-like vehicle and entered an entertainment place accompanied by several strong men.

This young man, who had a faint energy fluctuation on his body, was the target that Tang Zhen had his eyes on!

Chapter 1477 Entering the spirit realm

In the dim light, there was a chaotic atmosphere. A man and a woman with blurred eyes were dancing slowly in the flashing light.

In some dark corners, there were still scenes of things that were beyond the limits of morality, but they were extremely common here.

Tang Zhen had spent quite a bit of effort in order to sneak in. After which, he did his best to reduce his sense of existence as he searched for the young man that he had been tracking all this while.

After walking around the hall, he didn't find anything.

!!

Tang Zhen relied on his vague aura to sense and looked at the second floor.

That guy was most likely up there, but the entrance was guarded, so it wouldn't be easy to sneak up.

He now had two choices, either to kill the other party, or to find a way to lure the guards away. There was no other way.

After pondering for a moment, Tang Zhen chose the latter.

He entered the hall, found a woman with a hot body, and deliberately stirred up trouble in front of her companion. Then, he ruthlessly beat her companion to the ground.

In such a place where hormones were flying, Tang Zhen's actions were the rhythm of a war.

A chaotic situation appeared. Tang Zhen circled around the crowd and caused more friction. In an instant, the entire Hall was in chaos.

The guards at the door were attracted and couldn't help but turn their attention to the hall, but they didn't notice that someone had sneaked up the stairs.

The entire process was very fast, taking less than three seconds!

After successfully arriving at the second floor, Tang Zhen saw the other two guards. They were standing at the door and observing the surroundings. They would occasionally chat a few words.

Tang Zhen was hiding in a corner and was thinking about how to enter when he heard a series of footsteps behind him.

A man dressed as a waiter was approaching with wine and food in his hands.

Tang Zhen moved over. His hand was like lightning as he knocked the person out and threw him to the side. Immediately after, he changed into the other party's clothes and carried the wine to the door that the two strong men were guarding.

The other party sized up Tang Zhen before pushing open the door.

A burst of unbridled laughter rang out. The man that Tang Zhen was chasing was sitting on a sofa. Beside him were four naked women. They were wriggling around the man like maggots.

Even when Tang Zhen entered, no one paid any attention to him.

Tang Zhen bent over and placed the wine down. However, he did not leave. Instead, he walked to a lady beside him and extended his hand to gently press on her neck.

The woman fell unconscious to the ground, and the others still didn't notice the danger approaching.

Tang Zhen had long since seen that these people had consumed some kind of medicine, causing their mental state to be abnormal. Even their basic vigilance had disappeared.

However, when Tang Zhen knocked the second woman unconscious, the man finally recovered from his daze. He looked at Tang Zhen with a puzzled expression before a trace of fear appeared in his eyes.

"If I were you, I wouldn't be shouting!"

When Tang Zhen spoke, he used his gun to break the wine bottle on the table. The threat was very obvious.

The man regained his calm. Without Tang Zhen's help, he knocked out the two women beside him.

"Tell me, what do you want?"

The man coldly looked at Tang Zhen. There was a trace of ridicule on his face. In his eyes, Tang Zhen was just an ordinary person. Even if he had a weapon in his hand, he might not be helpless.

"I want to make a deal with you."

Hearing Tang Zhen's reply, the ridicule on the man's face became even more intense. He used a mocking tone and said, "Brother, do you know how many people want to do business with me?"

Tang Zhen was silent and only coldly looked at him.

The man snorted coldly and continued, "whoever wants to do business with me has to be respectful, like the boss here!"

As for those who wanted to use force to threaten me, they are all dead now. Do you want to follow in their footsteps?"

Tang Zhen shook his head and continued to look at the man, waiting for him to reveal more information.

The man shook his head in a bored manner when he saw that Tang Zhen did not open his mouth. He coldly snorted, "With this attitude of yours, you still want to get the bewilderment grass from my hands? you're really delusional!"

Tang Zhen shook his head and sat on the sofa beside him. He used an indifferent tone to speak to the man, "I think you've misunderstood. I'm not interested in the bewilderment grass you're talking about!"

"If you don't want the illusion grass, what do you want?"

A trace of doubt flashed across the man's eyes as he vigilantly looked at Tang Zhen. His muscles were clearly already tensed.

Tang Zhen's brows twitched. Although the man was not wearing any clothes, he still did not dare to guarantee that the other party did not have any means of attack. Therefore, he had long since made preparations for a battle in the dark.

Up until now, Tang Zhen had yet to come into contact with a Spirit Master. He also did not know their fighting style. However, according to Tang Zhen's analysis, this man should not be considered a Spirit Master. This was because the energy fluctuations on his body were too weak.

This was also one of the reasons why he decided to make a breakthrough from the other party. Firstly, there were too few people who were related to Spirit Masters. Secondly, there were many potential targets whose strength far exceeded his. Tang Zhen did not dare to take the risk.

"I'll use this item to exchange for the qualifications to enter the spirit realm and become an apprentice. Can you help me with that?"

As Tang Zhen spoke up to this point, he slowly released his palm, revealing the three-star spiritual weapon embryo.

When the man sitting on the sofa saw the spiritual weapon embryo, his body suddenly stiffened, and his eyes were filled with unconcealed shock and greed.

He stared blankly for half a minute before finally shifting his gaze away with great difficulty.

"Friend, do you know what this is?"

This time, without waiting for Tang Zhen to open his mouth, the man excitedly growled, "Three-star embryo, this is a three-star embryo. This is the first time I've seen it in my life!"

You said that you want to enter the spirit realm and I can help you do it. But to become a spirit master's apprentice, you need to work hard on your own and no one can help you!

In the spirit realm, as long as you have money, you can cultivate at any time. As for whether you can succeed or not, that's your own problem!"

Tang Zhen frowned when he heard this. He gently nodded and said, sure, but you'll have to give me another five million spirit coins. If you want to buy a three-star embryo alone, the price will not be less than ten million, and there's a demand but no supply!

The man nodded, indicating that he could accept this condition.

then I'll wait for your good news. Remember, don't have any crooked ideas. Otherwise, you'll miss this rare spirit weapon embryo!

Tang Zhen took out a box and placed it on the table. Immediately after, he placed a wine glass into it and stuck a metal piece on his wrist.

...

Under the man's puzzled gaze, he saw Tang Zhen use his finger to lightly press down, and the wine cup in the box immediately exploded into pieces!

The man's eyes narrowed when he saw this.

"Three days later, we'll meet at the train station. We'll hand over the money and the goods!"

As Tang Zhen spoke up to this point, he placed the spirit weapon embryo into a similar box and directly stood up to leave.

Tang Zhen left in a calm manner under the dangerous gazes of the two security guards at the door. He entered the crowd on the street.

Tang Zhen gently sighed in relief after he confirmed that no one was following him. He hid in the location that he had found beforehand.

Through today's test, he could confirm that the qualifications to enter the spirit realm weren't as difficult as he had imagined. However, it was still impossible for people without connections to do so.

As for the possibility of the other party harming him, it was also greatly reduced because of the existence of the explosive box. Although the entry qualification and five million spirit coins were expensive, they were nothing to him. On the contrary, it was the three-star spiritual weapon embryo that was difficult to buy with a thousand gold.

It was impossible for the other party to miss out on the opportunity to obtain a treasure because of such an obvious advantage.

After confirming that the success rate of the transaction had reached 90%, Tang Zhen had nothing to worry about. He only needed to quietly wait for the transaction to be completed.

If there was really an unforeseen event, Tang Zhen also had a way to deal with it. It was nothing more than spending more effort.

...

Soon, it was the agreed time on the third day. Tang Zhen met with the man at the train station. After both parties entered the spirit realm together, Tang Zhen handed the spirit weapon embryo to the man.

The moment he entered the spirit realm, there was finally a new change on the foundation stone platform that didn't respond all this time!

Chapter 1478 Easy training

Compared to the outside world, the spirit realm's energy concentration was at least three times higher. This kind of environment was undoubtedly more beneficial to cultivators.

At the same time, Tang Zhen had also discovered something. The spirit realm was actually another independent world with intermediate energy. The entrance to the train station was merely a passageway that connected the two worlds.

Tang Zhen walked out from the train station and seemed to be aimlessly strolling on the streets. In reality, he was gathering information regarding the spirit realm.

The moment he entered the spirit realm, there was already a message on the foundation stone platform. It requested Tang Zhen to gather as much information as possible about this place. At the same time, he would try his best to become a spirit Master and grasp the plane coordinates of the spirit Master world.

!!

Seeing this, Tang Zhen already understood that the tower world had also set its eyes on the spirit Master world. It was just that the tower world was unable to launch an invasion because it had hidden its plane coordinates.

Since he already had a mission objective, Tang Zhen was naturally no longer confused. Moreover, he also realized that he was always under the attention of the cornerstone platform.

He only had one question now. Other than himself, were there other cultivators from Lou Cheng who were carrying out similar tasks? was there any way to contact them?

Of course, in his current situation, it was still not appropriate for him to contact each other, as that would put himself in danger.

Tang Zhen tossed aside the thoughts in his heart and turned his gaze toward the buildings by the roadside. After sizing them up for a moment, he walked toward a building that was similar to a bar.

At this time, there were only a few customers in the bar. Everyone's expression was tranquil and leisurely, as if they were enjoying this rare quiet time.

Tang Zhen walked to the front of the bar. After ordering a drink, he began to inquire about the spirit Master.

The staff in the bar were very talkative. After hearing Tang Zhen's question, they immediately told him everything they knew.

It turned out that in the spirit realm, becoming a spirit apprentice wasn't difficult, but it wasn't easy either. In order to achieve a certain level of achievement, other than having enough talent, one also needed a strong financial support.

In the spirit realm, almost everything required money. Whether it was studying, cultivating, or buying related materials, everything had a price.

It could be said that as long as Tang Zhen was willing and had enough spirit coins, he could immediately start learning!

After leaving the tavern, Tang Zhen turned a few streets and arrived in front of a huge building. This was the place where spirit Master knowledge was taught and many people were wandering around here.

Following the flow of people, Tang Zhen arrived at the trading location.

There weren't many staff members here, but there were rows of devices that looked like game cabins. The users could lie on them and complete the transactions they needed to carry out.

Of course, before that, one had to spend 10000 spirit coins to get an identity card and deposit enough spirit coins for the transaction.

Tang Zhen had just obtained five million spirit coins, so he didn't have any financial problems. After quickly applying for an identity card, he chose a device and lay down.

A translucent glass cover covered his body, and images appeared in front of his eyes, all of which were knowledge about clerics.

[spiritualist apprentice meditation spell, 100000 spirit coins]

[intermediate cleric apprentice meditation spell, 500000 spirit coins]

[cleric apprentice advanced meditation spell, 1000000 spirit coins]

[elementary-level spiritual seedling cultivation technique, 10000000 spirit coins]

[beginner-level spirit weapon tempering art, 200000 spirit coins]

.....

Looking at the information displayed on the screen, Tang Zhen was secretly speechless. It seemed that becoming a Spirit Master wasn't a simple matter. Without money, it was simply impossible.

At the same time, he also found that the information here was only for apprentices, and there was no information about official spiritualists.

After purchasing a Spirit Master apprentice's elementary meditation technique, Tang Zhen only felt that a message was immediately injected into his mind. Only he knew the specific content, but he was unable to explain it to others.

Obviously, this was a way to protect the knowledge, so that people who didn't pay could not learn it.

Tang Zhen found a place to sit down and flipped through the information recorded in his mind. He finally had some understanding of the cultivation methods of a Spirit Master.

To put it bluntly, this was a way to cultivate one's spiritual power. Through training, one's spiritual power would be constantly increased, and then one would be able to communicate with the energy of

heaven and earth. When it reached a certain limit, one would be able to connect to the spiritual Nexus of the clerics.

Only through the recognition of the spirit internet could one become an official spiritualist. Otherwise, everything would be empty talk.

For ordinary people, the spirit realm was an insurmountable barrier. However, for people in the spirit realm, connecting to the spirit internet was a sign of transcendence!

Most of the residents of the spirit realm were ordinary people. Some of them were descendants of Spirit Masters, while others were cultivating arduously, trying to become Spirit Master apprentices.

In order to obtain enough spirit coins to aid their cultivation, these apprentices had tried all sorts of methods.

For example, the cultivation bases in the valleys were where the spiritual disciples cultivated the spiritual seedlings. Then, they rented the land outside and hired gardeners to cultivate the spiritual seedlings.

As for why the spiritual disciple did not cultivate the spiritual seedlings in the spirit realm, it was only because the cost in the spirit realm was higher. It was much cheaper outside.

The man that Tang Zhen was dealing with was secretly cultivating a forbidden medicine called bewilderment grass in order to make a huge profit.

After obtaining the meditation technique, he only needed to cultivate step by step. If he felt that his progress was slow, he could also choose to rent the cultivation room here. Under the amplification of the spirit gathering array, he could make his cultivation speed faster.

Of course, this required even more money, and not many people could afford this kind of consumption.

From this, it could be seen that becoming a Spirit Master wasn't a simple matter. No wonder there were ordinary people with faint spirit energy aura everywhere, but they couldn't be used for battle!

Tang Zhen was not in a hurry to try out the so-called spirit gathering array. Moreover, he knew how to build such a thing. It was just that he did not have enough materials.

Spirit coins were also very important to him at the moment. After all, he could only obtain battle credits through them and Exchange them for the various resources on the cornerstone platform.

After leaving the spiritual disciple trading hall, Tang Zhen spent some money to rent a quiet room. He sorted out the memories in his mind and after confirming that there were no hidden dangers, he began to try to cultivate.

After cultivating for a period of time, Tang Zhen discovered that his mental energy had increased slightly. However, it was still a drop in the ocean when compared to his original mental energy.

Although he was a little depressed, he knew that the purpose of sealing his original mental power was to prevent him from exposing his identity on the spirit internet after he became a cleric.

Therefore, the mental energy that Tang Zhen was currently cultivating was only related to this body. It carried the symbol of this world and would not be exposed even if he became a Spirit Master.

In order to complete his trial mission as soon as possible and become a spirit Master as soon as possible, Tang Zhen could only use some auxiliary means to speed up his cultivation speed.

After connecting to the light ball space in his body, Tang Zhen bought a few soul crystals from the cornerstone platform and slowly absorbed them in his hand.

Tang Zhen was different from those ignorant apprentices. As a spirit Emperor expert in the world of loucheng, he naturally had far more knowledge than ordinary people. Therefore, he had improved the meditation technique to make it more suitable for himself, and the efficiency of his cultivation had also increased.

After a night of cultivation, Tang Zhen easily advanced into a Spirit Master elementary apprentice. There were already faint energy fluctuations on his body.

In the time that followed, Tang Zhen began to deduce this kind of meditation technique so that he did not need to spend the decreasing amount of spirit coins.

...

It was only at this moment that Tang Zhen realized that he would need to spend a lot of time and energy to complete the upgrade of the beginner level meditation technique. It was not worth it compared to spending spirit coins.

Right now, time was the most precious thing to him. There was no need for him to delay the progress of the mission because of spirit coins. Therefore, after a few days, Tang Zhen came to the spiritual disciple trading hall once again.

After successfully completing the transaction, he went straight to his rented house. However, he soon found out that he was being followed!

Chapter 1479 Solving the problem

People came and went on the street. However, Tang Zhen was able to sense that there were at least three people following him in a sneaky manner.

he did not know what the purpose of this group of people was. however, it was obvious that they were here to target him. in order to confirm that his judgment was not wrong, tang zhen deliberately took a detour around a few more streets when he returned. he discovered that they had been following him from the beginning.

The corner of Tang Zhen's mouth revealed a trace of a cold smile. He followed the path in his memory and headed straight toward a forest outside the city.

The three of them followed closely behind and arrived outside the city.

!!

Not long after he entered the forest, Tang Zhen hid himself and secretly observed those people who were chasing him.

At this moment, the three of them were all holding weapons. They had dark and cold expressions as they searched for Tang Zhen's traces.

From the aura of the pursuers, he could confirm that they were all beginner apprentices, and one of them was about to advance to intermediate.

Tang Zhen's attention was focused on the weapons in the hands of these three pursuers. He confirmed that two of them were spirit weapon embryos that were similar to gourds, while the last one was a black spike-like object.

The only thing that could pose a threat to him now was this kind of tempered spirit weapon, so he had to be careful.

Tang Zhen quietly hid his body. When the three of them passed by him, he suddenly attacked. His sharp military knife easily cut the neck of one of the pursuers.

"Damn it!"

The two pursuers at the side turned pale with fright. The gourd in one's hand flew up and spurted out flames, while the black needle-like object in the other's hand pierced straight towards Tang Zhen.

This was a Spirit master's method. After the spirit weapon embryo was completely tempered, it could use mental power to carry out long-range attacks!

Tang Zhen merely laughed coldly when he saw this. After dodging the flames and the needle-like object's attack, he killed the pursuer who was using the gourd with a single shot. Immediately after, he used a swift method to subdue the last pursuer.

The whole process only took a few seconds. It was so fast that the pursuer didn't even have time to react, and the battle was already over!

"Tell me, why are you following me?"

Tang Zhen raised his gun and pointed it at the pursuer's forehead as he asked in an ice-cold voice.

The pursuer's face still had a frightened expression. After hearing Tang Zhen's question, he hurriedly denied, "Sir, you've misunderstood. We have no ill intentions!"

Tang Zhen coldly laughed when he heard this. If they didn't have any ill intentions, why did they take out their weapons?

He was not in the mood to talk nonsense with the stalker. He broke the man's finger and was ready to continue.

The pursuer screamed in pain, but Tang Zhen stuffed his mouth with weeds, making him unable to make a sound.

"I'll talk, I'll talk, damn it I'll talk!"

The tracker couldn't take it and could only choose to tell the truth.

we were sent by Randall. He said that you've just received five million spirit coins, and that you might still have a precious spirit weapon embryo in your hands. So, he asked us to bring the money back and find out where the spirit weapon embryo came from. Yingluo.

Tang Zhen quietly listened to the pursuer's confession and understood who was after him.

That guy named Randall had obviously made a killing by obtaining the embryo of a three-star spiritual weapon. However, he was too greedy and dared to provoke him!

It seemed that he had to get rid of this guy to prevent him from continuing to provoke him.

After asking for Randall's exact location, Tang Zhen dealt with the pursuers and dealt with the body before turning around and walking out of the forest.

He had taken the three spirit weapon embryos with him. After erasing the spiritual imprint, he only needed to refine them again to be able to use them.

Tang Zhen looked down on this kind of ordinary spirit weapon embryo. If he wanted it, it would at least have to be a good thing that was three star grade and above.

Tang Zhen left the city according to the address provided by the pursuer and headed straight for the valley in the distance.

The guy named randner was in a secret camp outside the city, using the trees to plant illusion grass. He belonged to an organization called Oka, and randner was only a member.

Bewilderment grass was a very common medicine for Spirit Masters, but there were restrictions on the number of plants and sales. At the same time, it was forbidden to sell to ordinary people.

Therefore, although Randall, who was in charge of smuggling the bewilderment grass, was not very powerful, his status was far higher than that of ordinary members. It must be known that the business of smuggling the bewilderment grass alone had increased the organization's income by nearly one-fifth!

Tang Zhen was not in a hurry to enter after he arrived at his destination. Instead, he chose a relatively high position and observed from above.

There were many wooden houses in the valley, and people could be seen walking around from time to time, but most of them were ordinary people.

Tang Zhen had been looking for Randall, but it was a pity that this guy was nowhere to be seen. He didn't know where he went.

After waiting for about three hours, just as Tang Zhen was about to grab someone's tongue and ask, randner's figure finally appeared in the valley.

He was in a wooden house in the corner. After exchanging a few words with someone, he returned to the house.

Tang Zhen quietly approached the building. He carefully listened for a moment before directly pushing the door and entering.

There was only Randall in the house. When he saw Tang Zhen walking in, his face revealed a hint of astonishment.

“Friend, is there a misunderstanding between us?”

Randall laughed dryly. He quietly took out the hidden sleeve dart from his waist and growled at Tang Zhen, “Go to hell, Yingluo!”

However, just as he spoke, he heard a gunshot and fell heavily to the ground!

His forehead had been pierced by a bullet, and he couldn’t be more dead!

Randall would never have dreamed that a moment of greed would cost him his life!

Before becoming a Spirit Master, the strength of these Spirit Master apprentices was limited. How could they be Tang Zhen’s match?

After getting rid of Randall, Tang Zhen searched the house and quickly arrived at the place where Randall had hidden his things.

In the safe box in the basement, Tang Zhen not only found the three-star spiritual device embryo, but also many high-value spirit coins and dozens of cattles of the finished bewilderment grass.

After storing all these items into the ball of light, Tang Zhen set a fire and left the place silently.

Not long after he left, the valley was ablaze, and Randall’s wooden house was quickly swallowed by the flames. Panicked voices kept coming from the valley.

Tang Zhen did not care about the losses in the valley. He had already returned to the city and continued to work hard to advance to the middle stage.

Compared to an initial-stage spiritual disciple, a middle-stage spiritual disciple required more energy and the meditation method was more complicated. However, it was still very simple for Tang Zhen.

After spending a few hours to improve the intermediate level meditation spell, Tang Zhen exchanged a few soul crystals and continued to cultivate.

...

After two days, Tang Zhen, who had become a middle-stage spiritual disciple, walked out of his house. He wanted to buy the meditation technique for an advanced-stage spiritual disciple and also to find a way to earn spirit coins.

Even though he’d had a huge harvest when he’d entered the spirit realm, and had gotten some more when he’d gotten rid of Randle, the consumption had also been huge.

After exchanging for some essential items from the cornerstone platform, he didn’t have many spirit coins left.

Under normal circumstances, other than thinking of ways to earn spirit coins, spirit disciples could also earn commissions by completing missions. However, to Tang Zhen, this was a waste of time.

When he heard that there was a black market for Spirit Master apprentices in this city, Tang Zhen immediately thought of the bewilderment grass that he had placed in the medium. This kind of thing was said to be very expensive and he thought that it could be sold for a good price.

According to the address that he had inquired about, Tang Zhen finally arrived at a slightly dilapidated neighborhood after walking around the city a few times.

Chapter 1480 The black market and help

The streets here were narrow and messy, and it was far from the spirit realm that ordinary people yearned for.

In fact, this was the true spirit realm. It was just that ordinary people imagined it to be too beautiful, but in reality, it was still full of ugly things.

After circling the street once and finding out the price of the illusion grass, Tang Zhen began to look for a target.

The black market mentioned by the apprentices wasn't that mysterious. In fact, it relied on the existence of some seemingly normal shops. They sold some prohibited items and weren't open to ordinary people at all.

!!

Tang Zhen had only heard that the black market was located in this area, but no one told him which shops it was.

However, after observing the street for a while, he still found a suspect and slowly walked in.

This was a trading company that sold miscellaneous goods. Compared to the bright environment of the other shops, the lighting here was slightly dim. An old man with glasses sat behind the counter and was sizing up Tang Zhen with a judgmental gaze.

"Brother, what do you want to buy?"

The old man glanced at Tang Zhen and said with a weak voice.

"I want the bewilderment grass. How much is it?" he asked.

Upon hearing Tang Zhen's question, the old man still had an absent-minded look as he said to Tang Zhen, "If you want to buy the bewilderment grass, go to the spiritual disciple trading hall. I don't have that kind of thing here!"

Tang Zhen smiled and did not say anything. He only used a faint tone to say, "I heard that not only do you have hallucinatory grass here, but you also have many good things that can't be bought in the market. Is this true?"

The old man coldly glanced at Tang Zhen when he heard this. He spoke in a deep voice, if you're fine, you should leave quickly. Don't get yourself into trouble!

At this moment, the old man revealed his abilities. The aura of an advanced-stage spiritual disciple was faintly emitted, and the threat was very obvious.

Tang Zhen was even more certain of his guess when he saw this scene. This shop was definitely operating in secret.

don't be in a hurry to reject me. I have a lot of good things in my hands. As long as we work together, the harvest will definitely be far beyond your expectations!

Tang Zhen needed to gather as much information as possible about spiritualist to complete his current mission. Purchasing the skills required by the spiritualist disciples was also a step in his plan.

If he wanted to do this, Tang Zhen would need to have enough spirit coins!

When the old man saw that he was smiling at Tang Zhen with a threat, he retracted his aura and spoke in a slow and unhurried tone, "I've already said that this is a proper shop for business. But I'm curious what you have.

If there's really something good, I can introduce some friends to you!"

Tang Zhen softly chuckled when he heard this. He took out a soul crystal from his pocket and placed it in front of the old man's table.

The old man glanced at the soul crystal indifferently. Then, a look of surprise flashed in his eyes. He let out a soft "huh".

After holding the soul crystal in his hand and sensing it carefully, the old man's breathing became a little hurried. He frowned and said to Tang Zhen, "What is this? where did you get it?"

"This is a secret, you don't need to know. I just want to ask you, will you accept it?"

The old man clenched his teeth and nodded to Tang Zhen. "This isn't a prohibited item, so of course I'm going to take it. What price do you want?"

two hundred thousand spirit coins for one pill, but you can't tell anyone about me. Otherwise, there's no room for negotiation!

On the Holy Dragon city's cornerstone platform, this soul crystal was only sold internally, and the price was only 100 points, which was equivalent to 10000 spirit coins. It could be said that he had earned twenty times that amount with a flip of his hand!

The old man muttered to himself for a moment before he bargained, "100000 spirit coins. I can't go any higher!

"Two hundred thousand it is. If you don't want it, I'll sell it to someone else!"

The old man took a deep breath and said coldly, "Sure, but if you have any more, you can't sell it to anyone else!"

"Don't worry, we'll definitely have many opportunities to work together in the future!"

After the two of them finished their discussion, Tang Zhen took out ten soul crystals and took a bag of spirit coins from the old man. He then quickly left the street.

Sure enough, as he had expected, not long after he left the shop, he was followed again, but he quickly got rid of them.

Tang Zhen went all the way to the spiritualist trading hall. He exchanged for the advanced spiritualist meditation technique and returned to his residence.

In the following days, Tang Zhen continued to break the advanced meditation technique to level up to a spiritual disciple. Then, with the help of the soul crystal, he continued to improve his own cultivation.

After a full five days, Tang Zhen finally touched the threshold of advancement and became an advanced spiritual disciple!

To the natives of the spirit Master world, Tang Zhen's cultivation speed was already comparable to a monster. There were very few people who could achieve this in such a short time.

However, Tang Zhen was different. He was a spirit Emperor and had a deep understanding of spiritual power cultivation.

With his insight and the soul crystal, which was a good item to assist in the cultivation of spiritual power, it was natural for him to achieve this!

After becoming an advanced-stage spiritual disciple, he would need to continue accumulating his spiritual power and work hard to communicate with the spiritual Nexus in order to advance to a spiritual master.

To a spiritualist apprentice, this was an extremely crucial step. As the success rate was extremely low, one had to make sufficient preparations.

Otherwise, if there was a mistake, it would lead to very serious consequences, or even no hope of advancing for the rest of his life.

Tang Zhen wasn't in a hurry to advance to Spirit Master. Instead, he took out the three-star spiritual weapon embryo that he had cultivated and prepared to temper it into his own weapon.

The success rate of ordinary spirit weapon embryos was very low. The better the quality of the spirit weapon embryo, the higher the success rate. Moreover, its effects were far better than ordinary spirit weapon embryos, and most of them had special offensive effects.

As the spirit Master continued to nourish it, the power of the spiritual weapon embryo would also continue to increase. Only when the spirit Master advanced to level four could the second spiritual weapon be tempered.

Therefore, to a Spirit Master apprentice, the first spirit weapon embryo was extremely important. However, due to the limitations of their strength and wealth, their first spirit weapon embryo was extremely ordinary.

The 3-star embryo in Tang Zhen's hands was something that could only be found by luck. After randner got his hands on it, he was prepared to hide it and refine it when he advanced to an advanced-level spiritual disciple.

In the end, this guy didn't get anything. Because of his greed, he even lost his life.

After fiddling with the gourd-shaped spirit weapon embryo, Tang Zhen used his mental energy to wrap it and began to continuously temper it.

This was a matter of painstaking work. It required the use of spiritual power to continuously remove impurities, and then condense the spiritual power into a substance to complete the final tempering.

After achieving this step, the initial tempering was completed. At this time, he could use his mental power to control it to attack the enemy or to protect himself.

Back in the dream world, Tang Zhen had a similar tempering experience. He knew how to complete this step in the shortest time possible.

After spending an entire day, Tang Zhen had completed the tempering of the spirit weapon embryo. At the moment when the communication was completed, he could sense the ability that this spirit weapon possessed.

The energy flying needle had the three types of killing effects of electricity, fire, and poison. It could also be used for continuous attacks.

...

With a single thought, the small Calabash that was suspended in front of him was like a machine gun. It continuously shot out flying energy needles that flickered with light, creating a deep pit in the stone wall.

Tang Zhen did not know how strong this kind of attack was. However, when compared to a firearm, this might had already exceeded it by more than double.

Just as he was preparing to find a quiet place outside to properly experiment, Tang Zhen felt the light ball in his mind vibrate. Immediately after, a new message was refreshed on the foundation stone platform.

[a participant from the Soul Master world is in danger and is in urgent need of rescue. This mission is optional. If you succeed, you can raise your trial rating. The specific rewards can be discussed!]

Tang Zhen looked at the information on the platform. After hesitating for a moment, he strode out of the house.

He originally didn't want to care about this kind of thing, but when he saw the coordinates in the message, he finally chose to take a look.

There was no other reason. It was because this person who came from the tower world was located in the spirit realm city that Tang Zhen was in!
