

## Alternate 1501

Chapter 1501 Another world version of "PUBG" \_

In the hall, the participants all had different expressions. However, Tang Zhen could tell that they were clearly filled with envy and jealousy towards him.

Perhaps, in the hearts of some of the trial-takers, they had already treated Tang Zhen as a potential enemy. If they had the opportunity to use underhanded means, they would definitely not hesitate.

Although the trial-takers' points and rewards were related to the completion of the mission, and competition between them was rare, it was still a great thing to have one less strong competitor.

Just as Tang Zhen was pondering on how to ensure his own safety, the ball of light in his mind trembled once again. New information was refreshed on the foundation stone platform.

[ the Soul Master World Mission has ended. The trial-taker will head to the taihao plane to retrieve the foundation stone of the world Tower. After the mission ends, the trial-taker will be given a score based on the value of the recovered materials! ]

Hint 1: the participant will enter the taihao dimension as an energy body and enter the world Tower directly. Due to the restrictions of the world Tower's laws, the participant can not enter the core area. He will need to gradually pass the trials of the world Tower to reach his destination.

[ Hint 2: due to the restrictions of the world Tower, the participant's cultivation will be sealed. ]

[ Hint 3: the natives will also use the opening of the world Tower to snatch the resources inside the tower and try to control it. Please do everything you can to stop them! ]

After reading the mission prompt, Tang Zhen felt his soul begin to leave his body and enter an unknown vortex.

He quickly threw the ring into the ball of light, because this meant that he would leave this world and head to a new trial world.

After completing this step, the body that originally belonged to him softly fell to the ground, ending his short-term mission. The other trial-takers did the same. In the blink of an eye, the hall was filled with corpses!

Teng mu walked into the hall with a reminiscing expression and lightly waved his hand.

A wisp of flame rose from the body that fell to the ground, and then it turned into ashes, which were swept up by the breeze into the sky.

They originally belonged to this world, but the trial-taker had borrowed their bodies. Now that the trial was over, they naturally had to return to this land!

.....

In a daze, Tang Zhen felt himself falling from the sky. Then, he saw the endless wilderness under his feet.

Tang Zhen attempted to fly. In the end, he helplessly discovered that he was unable to mobilize even a trace of the world's energy. Clearly, it was as the mission notification had said. He had been completely sealed.

he wouldn't fall to his death, right? that would be too sullen!

Tang Zhen laughed bitterly in his heart. He did not continue to struggle. Instead, he sized up the surrounding environment.

At this time, he was only wearing a single layer of clothing, but his face was his original appearance. Other than him, many other figures were also falling from the sky in the distance.

These figures were the same as him, all wearing thin clothes and not a single weapon.

Other than the humanoid life form, there were also other life forms with malevolent appearances. However, just like Tang Zhen, their cultivation had been sealed. Even the light orbs used to store items were unable to enter.

Tang Zhen didn't know how many cultivators there were but he knew that not all of them were cultivators. There must be some natives among them. Their goal was to seize control of the world Tower or to search for the treasures.

It seemed that in addition to competing with the trial-takers, this mission also required them to fight with the natives, which greatly increased the difficulty.

While he was thinking about these things, Tang Zhen was already less than a hundred meters from the ground. Just as he was about to think of a way to land safely, a rising force pulled his body and he slowly landed on the ground.

He was currently on a patch of grass. There was a building less than 20 meters away from him, but it was now empty.

Without any hesitation, Tang Zhen headed straight for the building in an attempt to find a weapon for self-defense while avoiding the siege of the natives.

While he was running, Tang Zhen noticed that there were three other people who were rushing towards the building. Their eyes were filled with vigilance and killing intent.

it seems like this is the trial mode of the world Tower. Every participant is their own target. We can't be careless!

Tang Zhen kicked open the door when he saw that it was within reach. After which, he quickly sized it up and removed a battle blade from the wall.

The owner of the house had long disappeared, but the furnishings in the room were still as good as new, and there was not even much dust.

At the same time Tang Zhen grabbed his battle blade, he heard a wave of hurried footsteps coming from behind him. The footsteps were rapidly approaching him.

Without hesitation, he turned around and slashed at the sound. A scream was heard, and the guy who tried to sneak an attack behind him was cut down. Blood spurted out, and he fell to the ground.

After dealing with the enemy who had launched the sneak attack, Tang Zhen grabbed the dagger in the other party's hand and began to search the room. He quickly found a set of clothes that looked like leather armor and ordinary hemostatic drugs.

After finding a bag and wrapping these items, Tang Zhen continued to search the other rooms. At the same time, he carefully observed his surroundings.

He found that there was a strange energy field around the field, slowly gathering toward the center. Although he didn't know what it was, it was definitely not something good.

Its function was to drive everyone to the center, and then start a fight to determine the final winner.

After faintly guessing in his heart, Tang Zhen immediately chose the location of the central area and began to slowly approach it using the cover of the buildings.

Tang Zhen had only taken a few steps when he heard a slight rubbing sound not far away. It seemed to be from the house in front.

He picked up a stone from the ground and threw it towards the opposite side. After which, Tang Zhen swiftly pulled out his dagger and stared intently at the window opposite him.

Just as the sound of a stone hitting the ground was heard, a figure suddenly appeared by the window, raising the weapon in his hand and aiming at the place where the sound came from.

It was an exquisitely-made metal crossbow. The sharp arrowhead glinted with a cold light as it was aimed at the place where the sound came from.

When he realized that the sound came from a stone, the other party's expression changed greatly. Before he could withdraw his head, he saw a cold light shooting towards him.

"Pfft!"

The dagger pierced through his eye and Tang Zhen quickly rushed into the room like a cheetah. He put the items that the other party had collected into his backpack, picked up the crossbow, and continued to move forward.

He had seen three people earlier, but he had already taken care of two of them. This meant that there was still one more hidden here.

Tang Zhen was not interested in looking for this fellow as long as he did not provoke him.

There were about thirty houses in this building. When Tang Zhen finished collecting and came out, the armor and weapons in his hands had been changed. There were also some filtered materials in his backpack.

"According to my calculations, this place will be covered by the energy field in fifteen minutes. I have to leave immediately!"

Tang Zhen withdrew his gaze and observed the surrounding evacuation route. After which, he swiftly advanced along a grass patch that was on a lower ground. He only used over ten seconds to enter the forest.

Tang Zhen felt his scalp go numb the moment he entered the forest. He dodged to the side without the slightest hesitation.

An arrow flew past him with the sound of the wind, piercing deep into the ground. The tail of the arrow was still shaking.

This was the third person that Tang Zhen had met earlier. He had calculated the best retreat route in advance and was currently waiting for an opportunity.

Tang Zhen, who had dodged the sneak attack, did not hesitate at all. He raised the crossbow in his hand, aimed at the large tree in front of him, and quickly pulled the trigger.

...

A muffled groan was heard as the figure on the tree fell. Immediately after, Tang Zhen rushed out like an arrow and swung his battle blade under the other party's frightened eyes.

The head rolled and blood gushed out!

Even if all of his cultivation was sealed, Tang Zhen's battle consciousness was still present. The enemy's ambush did not hurt him. Instead, he had lost his life!

Chapter 1502 The first battle, the cold weapons battlefield

After searching the body of the Ambusher, Tang Zhen began to move quickly through the forest.

Because his cultivation was sealed, he could not use his mental power to search for hidden enemies. He could only judge by sound and smell. Fortunately, his extraordinary sixth sense came into play at this time, allowing him to detect danger in advance.

Tang Zhen did not know how large this world-class Tower City was, nor did he know why it had fallen into the other world. The only thing he needed to do now was to rush to the central region as soon as possible.

Not long after he passed through the forest, a bloodied corpse appeared in front of him. A large hole had been dug out in the chest and abdomen, and the head had been smashed like a rotten watermelon!

About a few hundred meters in front of the corpse, a figure was looking at him coldly and making a throat-cutting gesture to scare him.

"You're trying to scare me. If you have the guts, let's fight with real swords and guns!"

Tang Zhen coldly laughed as he strode forward like a vigorous cheetah.

That trial participant was stunned for a moment when he saw this. However, he immediately turned around and ran forward. It seemed that he did not intend to fight with Tang Zhen.

Now was not the time for a decisive battle. Moreover, looking at Tang Zhen's appearance, it was obvious that he was not someone to be trifled with.

The two of them were running at about the same speed, and they always kept a distance of several hundred meters between each other. They could only compete in endurance to see who would collapse first in the end.

At the same time, there were also figures running in other directions. Each of them was like a rabbit being chased by a Hound, not willing to fall behind the others.

Behind the cultivators, the energy field was rapidly approaching, enveloping the building behind them.

One of the slower trial-takers was trapped in the middle. He screamed as he ran, and blood kept flowing out of his hideous face. Finally, he fell to the ground with a cry and turned into a pool of blood.

Seeing this scene, the cultivators' hearts were beating wildly. They couldn't help but increase their running speed, afraid that they would be caught up by this terrifying energy field.

They tacitly gave up on attacking each other and only ran forward with all their might. But even so, there would be heart-wrenching screams coming from the wilderness from time to time.

Tang Zhen felt that his throat was on fire. While running, he took out a bottle of water and took a sip. He was not in a hurry to swallow it. After that, he continued to bury his head and run wildly.

Unconsciously, everyone came to a high slope, which was the center of the field.

The moment they rushed up the slope, they were surrounded by flashing figures. The energy field had forced everyone here. This was obviously the location of the final battle!

At the center of the hill, there was an extremely eye-catching teleportation array. From its size, one could tell that it was a single person teleportation array. In other words, only one person among the trial-takers present could leave!

The energy field behind them was still closing in, further compressing the space of the trial-takers, and at this point, the trial-takers had no other choice.

"Go to hell!"

A loud shout came from the crowd. A trial-taker waved his Mace and smashed the head of the trial-taker beside him. Blood and flesh flew everywhere, but he was immediately shot by several arrows and fell to the ground with an unwilling expression.

A chaotic battle suddenly broke out at this moment. There were flashes of blades everywhere, and roars and screams resounded through the sky. From time to time, trial-takers fell to the ground, and their blood quickly dyed the ground red.

All of the trial-takers had bloodshot eyes as they madly attacked any moving target until they fell to the ground.

The closer they got to the center of the teleportation array, the more broken limbs there were on the ground. The surviving trial-takers were all covered in blood, looking like ferocious ghosts that had crawled out of hell.

The blade in Tang Zhen's hand was already bent. His entire body was covered in sticky blood and minced meat. In a flash, he stabbed the dagger into the chest of the incoming participant and used his shoulder to push the other participant towards another.

As his opponent dodged, he pulled out the dagger and threw it at his opponent.

Just as the other party dodged, Tang Zhen took a big step forward and his battle sword also slashed over.

The feeling of a sharp blade in his hand was transmitted over. Tang Zhen did not hesitate to let go and retreat, dodging the attack of another trial participant. After rolling a few times on the ground, he casually pulled out a crossbow arrow from a corpse.

The cultivator who was chasing him had already rushed to the front. He waved the long sword in his hand and slashed at Tang Zhen. However, he was grabbed by Tang Zhen from the side. He then grinned hideously and pierced the crossbow arrow into the other party's eye.

"Pfft!"

Just as he finished off this participant, his back was shot by an arrow. Tang Zhen, who was in pain, suddenly turned his body around. He used the participant's corpse as a shield, picked up his long sword and rushed towards the attacker's position.

At this moment, the hillside was already covered with corpses and trial-takers lying in pools of blood everywhere. There were only a dozen people still fighting.

The energy field was still shrinking further, further shrinking the living space, leaving only an area of less than a thousand square meters.

More than a dozen participants were confined to this narrow area and began to fight again. Even though they were covered in wounds and were so tired that they could not even lift their weapons, they still used their hands to dig and their teeth to try to kill the enemy!

This kind of physical fight was actually more bloody and tragic. Those with weak will would definitely have a mental breakdown in this kind of scene!

Tang Zhen was similarly extremely weak. However, he still pressed his sharp sword against the chest of the sneak attacker. After which, he relied on his weight to press the longsword into the other party's body under the other party's despairing eyes.

He raised his head with difficulty and saw two bloody figures beside him. One of them had a few arrows stuck in his body, and the other had lost an arm. They were both at the end of their lives.

Tang Zhen laughed coldly. He inhaled a deep breath of air and pulled out the longsword from the corpse. He raised it high in the air toward the trial participant closest to him.

That participant let out a bitter laugh and knelt on the ground with a “bang.” At the same time, he used a provocative gaze to sweep over Tang Zhen.

“Have a safe trip!”

Tang Zhen’s words had just sounded when his longsword landed on the other party’s neck and he forcefully pushed it forward.

Blood spurted out as the other party fell to the ground, dead.

The other participant coldly watched this scene. He casually picked up a long spear from the ground and pointed it at Tang Zhen from a distance.

Without any unnecessary words, the two staggering figures passed through the corpses on the ground and fought to the death with their last strength.

“Pfft!”

The sharp blade pierced into his body and emitted a slight sound. Tang Zhen felt a chill on his chest and almost fainted.

He slowly took a step back and pulled out the blood-stained spear head from his body. His long sword would forever remain in the mouth of the trial-taker opposite him, piercing through his head!

The trial-taker who had died in battle fell to the ground, but the spear in his hand was still pointing at the sky.

Tang Zhen turned his head to look at the teleportation array behind him. He staggered over and kept falling and getting up on the way. His face was as pale as paper.

The energy field behind him was closing in step by step. Tang Zhen had no choice but to forcefully hold on and forcefully charge into the teleportation array.

“Swish!”

When the energy field covered the entire mountain slope, the teleportation array was finally activated. Tang Zhen instantly disappeared without a trace.

...

Chapter 1503 The second Battle, hunt in the abandoned city

After an unknown amount of time, Tang Zhen regained his consciousness.

He quickly opened his eyes and observed his surroundings. He found himself on the roof of an old building. The entire city was silent.

The wounds on his body had already disappeared, and he had already recovered to his peak condition. Unfortunately, his cultivation was still in a sealed state.

Just as he was about to observe the surrounding environment, Tang Zhen suddenly heard a gunshot. Immediately after, a bullet whizzed past his ear.

!!

“Damn it!”

Tang Zhen shot toward the rooftop hut beside him, kicked the door open, and rushed down.

After looking around, Fang ning saw a pistol and a few boxes of bullets on the ground. He picked them up and checked them before continuing his search.

He had a rough idea of the trial mode of the tower. It started with cold weapons and then slowly leveled up. After each level, the weapon’s damage and resistance would increase.

First, it was cold weapons, and now it was firearms. What was the next stage?

Tang Zhen had a faint guess in his heart. However, he quickly expelled these unnecessary thoughts from his mind. The only thing he needed to do now was to survive in the rain of bullets.

After walking around the building, Tang Zhen found an automatic rifle, a grapeshot gun, and some other miscellaneous items. He put all of them in his backpack.

What surprised him was that those healing potions had magical healing effects. Even if one’s blood was in critical condition, they could be healed quickly through the treatment of the potions!

After placing the scope on the guide rail and quickly adjusting the crosshair, Tang Zhen began to slowly move toward the center position according to his memory.

When he had woken up earlier, he had already seen that there was an energy field around the city. It seemed that they still had to head to the central area and continue to engage in a bloody battle to determine the final winner!

Tang Zhen carefully jumped out of the window. Just as he was preparing to walk along the remote street, a human figure suddenly flashed by his side.

He reflexively raised his gun and fired. The figure fell to the ground with a loud bang. Half of his face had been shot, and there was still an expression of disbelief on his face.

This was a female participant and she didn’t look too old. Tang Zhen searched her body and took away all the weapons and ammunition.

The gunshot just now had already exposed his position, and God knows how many guns would be pointed at him. If he rushed out rashly, he might be immediately shot into a hornet’s nest.

When he thought of this, Tang Zhen lifted the corpse and carefully carried it out of the corner. Immediately after, he heard a gunshot.

“Pfft!”

The corpse’s head was shot, and it was shattered beyond recognition.

Tang Zhen, however, was able to determine the direction of the enemy through the sound of the gunshot. At the same time as the corpse fell to the ground, he rushed out of the street and raised his gun to aim at a building not far away.

A figure flashed past the window. Tang Zhen pulled the trigger and quickly sprinted forward, entering the alley by the side of the road.

He didn't know if the shot had killed the enemy, but he wasn't in the mood to care. Instead, he quickly moved along the alley and observed the surrounding buildings from time to time.

When he passed by a building on the side of the road, Tang Zhen seemed to hear footsteps coming from inside. He stopped, took out a grenade, and directly threw it in from the window.

“BOOM!”

A loud sound rang out, and at the same time, a spray of blood and minced meat splattered on the wall beside him. It was obvious that the trial-taker had already been blown into meat paste!

After getting rid of the potential threat, Tang Zhen had already walked to the end of the alley. A wide street was in front of him.

The center was still very far away from him, but he didn't dare to run on the streets. That would be equivalent to a live target. Even if he had nine lives, he wouldn't be able to reach the center alive.

damn it, in such a big city, don't tell me there isn't a single vehicle? ”

Tang Zhen had just finished grumbling when he was stunned for a moment. Soon after, his face revealed a pleasantly surprised expression.

In the alley opposite him, a pickup was parked. Behind the back of the car, there was something like a rocket nest. It was obviously a modified weapon.

After estimating the width of the street, Tang Zhen took a deep breath and suddenly rushed over.

Without any gunshots, Tang Zhen successfully arrived in front of the pickup truck. He jumped in to check it and started it with a happy expression.

Following the sound of the engine's vibration, Tang Zhen turned the steering wheel and directly rushed onto the wide street.

Under Tang Zhen's control, the car's speed was very fast. It didn't take long before it had already driven several kilometers and turned into an even wider Street.

This Street led straight to the city center, which was also the final location of the trial-takers 'final battle.

A moving car entered his line of sight. Tang Zhen immediately increased his speed upon seeing this. At the same time as the car in front was continuously approaching, he activated the rocket nest on the back seat.

There was an LCD monitor inside the car. At the same time, there was also a control stick. As Tang Zhen continuously adjusted it, it finally locked onto the car in front.

He gently pressed the ignition button on the control lever, and a rocket shot out with a " whoosh ", hitting the car in front of him.

After a loud bang, the car in front of them turned into a fireball and rolled to the side!

“Haha, that’s strong!”

Tang Zhen glanced at the half corpse that had been thrown out. He continued to speed forward, heading straight for the center.

Who would have thought that after running for a short distance, they would see a sudden explosion on the road ahead. The violent shock wave mixed with broken concrete directly overturned the driving pickup truck.

After a few turns in the air, the pickup truck landed in the grass by the side of the road with a muffled sound.

Tang Zhen’s face was covered in dust. There was a trace of blood at the corner of his mouth. He struggled to climb out of the car and coldly looked at the end of the street.

There was a tank parked there. Due to the simple disguise, Tang Zhen actually did not discover its existence!

“Damn it, just you wait!”

Tang Zhen cursed in his heart. He took out a rocket from the rocket nest behind him and simply fixed it in place. Then, he began to slowly advance in the grass.

There was a store that looked like a supermarket not far away. Tang Zhen quickly rushed in. After rummaging around, he took out the rocket and did some simple modifications.

Ten minutes later, Tang Zhen carried the rocket to the top of a nearby building. He aimed it at the tank below and pressed the ignition device.

The rocket, which weighed less than 50 catties, whizzed toward the tank and turned into a ball of flames, enveloping the tank.

Although the rocket could not penetrate the armor of the tank, the violent explosion was enough to kill the operator inside the tank!

However, Tang Zhen still stared at the tank. When he saw someone climbing out from inside, he immediately fired a series of shots, opening a few bloody holes in the person’s body.

...

Tang Zhen turned his head and glanced at the energy barrier behind him. He fiercely spat on it, raised his gun, and rushed onto the street before continuing to carefully move forward.

The streets near the center seemed to have been specially designed. Other than the eight streets leading to the center, there were no other roads that could reach the center.

As time passed, the participants had all gathered here. The gunshots became more and more frequent, and the long Street was filled with participants lying in pools of blood from time to time.

Looking at the approaching energy field, the trial-takers became more and more anxious. The closer they were to the central area, the faster the speed of killing.

The killing efficiency of firearms was incomparable to that of cold weapons. By the time the crowd crossed the street and finally gathered in the center, there were less than ten people left!

In the center of the arena, there was a huge eight-trigram pattern. When they were forced to this place by the energy field, there was no longer anything to cover them.

Intense gunfire suddenly erupted at this moment, accompanied by the sound of bullet shells falling to the ground. One figure after another fell into a pool of blood.

A few minutes later, Tang Zhen struggled to get up from the ground and threw away the steel plates that were tied to his body.

A "corpse" at the side moved and suddenly raised its gun to aim at him. However, it was shot through the head by Tang Zhen, who was already prepared.

When the gunshot rang out, he immediately laid on the ground. Even so, he was still shot in the chest three times, and one shot through his shoulder.

Tang Zhen raised the weapon in his hand and fired a few more shots at the corpses. He then let out a sigh of relief and slowly walked toward the teleportation formation that was located at the center of the eight trigrams diagram.

...

The teleportation array flashed, and Tang Zhen's figure disappeared once again!

Chapter 1504 The third Battle, doomsday's Lonely City?

After he regained consciousness, Tang Zhen appeared in a Super City with tall buildings.

From the appearance of those buildings, one could tell that this was a world with a very high level of technology. However, it had still been baptized by the flames of war, and there were ruins everywhere.

Tang Zhen didn't know if the scene in front of him was an illusion or not. He only knew that what he felt was extremely real. It was obvious that this was the secret technique of the world Tower and it wasn't as simple as an illusion.

As far as the eye could see, the streets were filled with scattered garbage, and there were thick dark clouds floating in the air, not a single ray of sunlight could penetrate them.

!!

If one looked closely, they would see a flying object flickering with blue light in the air, but it had never revealed its true appearance.

The terrifying energy field had disappeared, and in its place were mechanical insects like a swarm of bees. They were like a terrifying black sandstorm, circling the city in groups, killing all living things in their path!

When Tang Zhen looked at them, these mechanical flying insects were continuously advancing toward the center of the city, leaving behind an earthen yellow desert.

It was just changing the soup to one that did not contain the medicine, but he still had to force the trial-takers to kill each other.

He looked around and saw that the ground was littered with corpses. A few of them were wearing smooth combat suits and weapon parts were everywhere.

After Tang Zhen observed for a few minutes, he quickly took off the coat of the corpse and put it on while enduring the pungent smell.

With his cultivation level restricted, he had to use everything he could to complete the trial alive. So what if he took a few clothes from a corpse?

Through observation, he could confirm that this combat suit had a built-in energy source and some combat accessories. If it was fully equipped, it could allow an ordinary person to have the combat power of a level five cultivator.

This kind of armor was gradually becoming common in Holy Dragon City. Therefore, Tang Zhen only needed to look at it for a while before he could basically understand its working principle.

After changing into the combat suit, Tang Zhen began to search for energy modules and combat accessories on the body. Although most of them were destroyed, some were still barely usable.

It did not take long for Tang Zhen to find a vibroblade fixed on his forearm, a miniature energy shield, an electromagnetic rifle with a miniature rocket on his shoulder that could change its shooting mode, and several plasma grenades.

After checking all the weapons and equipment, Tang Zhen put on a helmet with bullet holes and dried brain matter on his head and carefully advanced along the dilapidated Street.

After walking for less than fifty meters, a mechanical beast jumped out from a building on the roadside. Its eyes flickered with red light as it locked onto Tang Zhen and fired a series of concentrated bullets at him.

The moment the mechanical beast appeared, Tang Zhen had already dodged quickly. At the same time, he raised his gun and aimed at the mechanical beast's joint.

At the same time, Tang Zhen was also secretly rejoicing in his heart. This ferocious mechanical beast did not adopt a close-range attack. Otherwise, he would be in a dangerous situation.

Even if he was holding a weapon in his hand, Tang Zhen might not be a match for the ferocious mechanical beast in close combat under the condition that his cultivation was sealed. This was because its close-range attacks were too terrifying.

For ground combatants, it would be a terrible disaster if they encountered such agile mechanical beasts in urban combat!

His aim was not to kill the mechanical beast, but to destroy its mechanical structure.

However, all these Bionic robots would be heavily protected at the vulnerable parts. Their seemingly fragile heads and eyes could actually withstand high-intensity continuous attacks.

If he attacked these places during a direct battle, it was very likely that the mechanical beast would be fine, but he would be killed first.

However, if he attacked their joints, he might be able to kill them. Even if he couldn't kill them, he could avoid being chased.

As a series of gunshots rang out, the bullets that had super armor-piercing capabilities continuously splashed sparks. The joints of the mechanical beast clearly showed signs of cracking and deformation, proving that Tang Zhen's attack had already taken effect.

"Crack!"

The last metal pellet flew out from the guide. While Tang Zhen reloaded the magazine, he also began to use the buildings as cover to quickly move it.

he didn't have time to waste with this mechanical beast. he had to evacuate as soon as possible!

Seeing that Tang Zhen was about to escape, the mechanical beast furiously roared. It bent its body backward and was about to jump and give chase. Who would have thought that just as it exerted its strength, its body would suddenly fall!

Tang Zhen's earlier attack had already destroyed its joints. It was unable to run normally. Naturally, it could not continue to chase after Tang Zhen.

That mechanical beast had artificial intelligence and could simulate the thoughts of a real beast. At this moment, when it saw Tang Zhen escaping in front of it, it immediately let out a furious roar and shot out miniature rockets one after another, causing the entire Street to fall into a sea of fire.

after barely escaping the attack of the mechanical beast, tang zhen continued to advance. however, he soon encountered a new crisis.

A group of humanoid soldiers in combat suits had discovered him. They raised their guns and fired at his hiding spot. The walls of his hiding spot were penetrated one after another, forcing him to constantly change his hiding spot.

However, while he dodged, Tang Zhen would also counterattack from time to time, knocking down those humanoid soldiers one after another.

During this period of time, there were a few humanoid soldiers who entered the interior of the building but were quickly shot dead by Tang Zhen. He then took the opportunity to check the bodies of these soldiers.

It turned out that they were all real living creatures, but they were controlled by the brain controller on the helmet. At the same time, a nutrient tube was inserted into their mouths to ensure that their combat effectiveness would not be reduced due to physical fatigue.

As for their nutrition supply, it would be completed by a special " tanker.

To put it bluntly, they were just some war puppets controlled by people. Although they did not have superb combat power like elite soldiers, they were definitely more than enough to patrol and deal with ordinary targets.

This was truly a deranged method. There was no need for professional training at all. They only needed to find some young and strong men and women to be used as war puppets.

If it was necessary, it would be easy to create millions of puppet soldiers!

Tang Zhen suddenly had a guess. Perhaps, the background of this trial world was a world that was similar to an AI. The purpose of them creating this kind of control device was to cause their own kind to kill each other!

In the history of the invasion of the world of loucheng, it was not rare for artificial intelligence to suddenly rebel and destroy the world. However, compared to the world controlled by the indigenous creatures, the difficulty of invading such a world would be lower.

The reason was that the AI's target was the native creatures, but when it faced the cultivators with supernatural abilities, the effectiveness of its attacks would be greatly reduced.

Sometimes, even a single spiritual Emperor could easily destroy the entire world!

After replenishing his ammunition, Tang Zhen continued to move forward. If they only had these artificial intelligence, then the following battle might be much easier.

As he continued to advance toward the center, Tang Zhen encountered another two ferocious mechanical beasts. At the same time, there were also dozens of puppet soldiers. However, he easily avoided them and did not engage in a head-on battle with them.

Compared to the previous two trials, this one was much easier. Or rather, he was more suited for this type of battlefield.

The only thing he needed to be careful of was the final battle in the central area. Compared to the mechanical beasts and puppet soldiers, these trial-takers were the biggest threat.

They arrived at the central region without any mishaps. Tang Zhen also saw the other trial-takers. However, when he searched for the teleportation array, he discovered that he did not see any traces of it.

"Dammit, what is he up to this time?"

Tang Zhen furrowed his brows and continued to observe. The other participants were also confused, unable to figure out what was happening.

Just as everyone was puzzled, the ground suddenly shook violently. Then, a giant monster that looked like a turtle suddenly appeared and slowly walked toward them.

The teleportation circle that everyone had been searching for was located behind the monster. There was not just one, but five of them!

...

Chapter 1505 The trial is finally over!

After seeing the teleportation array on the back of the giant monster, the trial-takers understood that this was the start of the final battle.

However, this time, other than having a duel with the trial-taker, he also had to find a way to climb onto the back of the giant turtle monster. However, it was obvious that the giant turtle monster was not easy to deal with.

On the back of the giant turtle monster and its four limbs, there were sharp bone spikes, and on them, there were swaying corpses, which seemed to be the food that it had deliberately stored.

Compared to the previous two trials, this one was clearly more dangerous.

!!

The trial-takers did not have time to hesitate. The moment the giant turtle monster appeared, the battle had officially begun.

Intense gunshots reverberated in the sky above the ruins. Compared to ordinary gunpowder weapons, electromagnetic weapons were faster and more lethal. Most of the time, the target would fall as soon as the gunshot rang out. There was no time to react at all.

While they were attacking, the trial-takers were still approaching the giant turtle monster one after another, trying to enter the teleportation array as soon as possible.

One only needed to look with the naked eye to know that these teleportation arrays were already in an activated state. It could be said that one used meant one less. If they waited until they were all robbed, it would really be too late to cry.

It did not take long for some of the trial-takers to get close to the giant turtle monster. However, facing the behemoth that was more than 30 seconds tall, it was impossible to climb up its back without the help of tools.

Moreover, after getting close to the giant turtle, not only did they have to avoid the sneak attacks of the other trial-takers, but they also had to be on guard against being trampled into meat patties by the giant turtle. It was truly an extremely dangerous situation.

After Tang Zhen finished off a few trial-takers, he also began to prepare to climb onto the back of the giant tortoise. However, he was prepared to use the surrounding buildings as a platform and jump onto the back of the giant tortoise when the monsters approached.

There were only three buildings nearby that could do this, and at this moment, they had become the target of all the participants. They were exchanging fire as they approached the roof, afraid that others would take their chance.

On the road leading to the top of the building, there were constant gunshots, and from time to time, corpses would fall.

Seeing the surrounding mechanical flying bugs getting closer and closer, the trial-takers' killing became even more frenzied. Each of them was like a demon from hell, and any moving target would be attacked by them.

Tang Zhen was suppressed by a few trial-takers in a corner and was unable to get close to the top floor. When he saw that the giant turtle was getting closer and closer to the building, he raised his gun and fired a few plasma grenades in succession. After which, he madly ran toward the edge of the building.

When the other participants saw this, they all opened fire at Tang Zhen. The bullets hit the ground and walls around him, causing sparks to fly.

Tang Zhen's body was shot. The bullet penetrated his shoulder and the powerful kinetic energy almost tore his shoulder apart!

Forcefully enduring the indescribable pain, Tang Zhen quickly jumped onto the outer wall of the building and leaped towards the giant turtle that had just approached.

The other participant followed closely behind, but was swallowed by the giant turtle monster with its long neck stretched out. Its sharp fangs brushed past Tang Zhen's body, and the stench made people want to vomit.

"Bang!"

Tang Zhen stepped on the thick and heavy tortoiseshell and rolled twice. He then got up and rushed toward the teleportation formation.

At this moment, he had become the target of all. The three buildings fired a dense barrage of bullets in an attempt to stop him from approaching the teleportation array.

At this moment, Tang Zhen no longer had any way out. He would either charge into the teleportation array or be killed by the chaotic gunfire and become the dismembered corpse beside him.

The bullets landed on his body one after another. Tang Zhen felt that his body was about to be torn apart. However, he still clenched his teeth and forcefully rushed into the teleportation array.

The moment he entered the teleportation array, an energy shield shot out and blocked the bullet that was flying toward him.

Tang Zhen softly collapsed onto the ground. Fresh blood spurted out from his body like a fountain. He had never felt like death was so close to him before!

Tang Zhen coldly swept his eyes over the participants. He raised his hand with great difficulty and made a throat-cutting action.

This group of people had completely infuriated Tang Zhen. If there was a chance, he would definitely make this group of people pay a heavy price!

Waves of dizziness came over as Tang Zhen's vision turned black and he quickly fainted.

.....

When he woke up again, he found himself in a huge square, surrounded by trial-takers like him.

Compared to the eliminated cultivators, those who were able to stand here were all elites among elites, and their bodies were filled with killing intent.

However, no one made a move because they were all bound by the Halos and could not leave the area surrounded by the Halos. Even so, the cultivators' eyes were still filled with vigilance.

After three rounds of brutal and bloody battles and eliminating countless trial-takers, they had already subconsciously regarded all the trial-takers as enemies and were on guard against them from launching an attack.

Tang Zhen didn't know how many cultivators there were in the building because everyone was in their original appearance. Not only did some cultivators look strange, but even the natives were the same.

I wonder what the next trial will be like. Is it going to be a kind of Gu-raising killing? ”

As he thought of this in his heart, Tang Zhen discovered that the light circle around his body suddenly changed, forming something similar to a holographic screen. Soon after, he saw groups of words continuously flashing on the screen.

What surprised Tang Zhen was that during the refreshing process, these words seemed to have read Tang Zhen's thoughts. After which, they were changed into the words that he was most familiar with.

“Is this the written test of Yingluo?”

Tang Zhen softly laughed as he looked at the contents of those words. He did not feel that it was strange.

Lou Cheng's cultivators weren't pure Warriors. They had great power and also mastered many special skills. Most of this knowledge came from the invaded world. After screening, it was provided to Lou Cheng's cultivators for them to choose what to learn.

The cultivators of loucheng city who had only powerful martial strength and those who had powerful martial strength and all kinds of knowledge were obviously stronger.

What made Tang Zhen interested was that these questions actually touched on many fields, including runes, geography, Science and Technology, as well as psychological aspects. It could be said to be all-encompassing. Every one of them required a certain level of basic knowledge in order to be able to answer.

Looking at the continuous questions in front of him, Tang Zhen suddenly became very interested in this world-class tower. At the same time, he was also puzzled in his heart. What exactly caused this world-class tower to fall into the other world?

Perhaps an expert that surpassed the sector Lord level had fallen here, which was why the world Tower had fallen.

If that was the case, then where were the residents of the world Tower? had they died with the tower or were there still people who survived?

Judging from the surrounding situation, the trial-takers had yet to approach the core of the city. So, what was the real core area like?

The doubts in Tang Zhen's heart grew. He also knew that if he wanted to answer these doubts, he must first pass the test in front of him.

Questions were answered one after another. Surprise and doubt flashed across Tang Zhen's face from time to time. In the process of answering questions, he was also learning and understanding this world-class tower to make up for some of the lack of knowledge.

When the last question was answered, Tang Zhen's body was once again covered by light. A few seconds later, he disappeared from the square. It was unknown where he had gone.

Chapter 1506 The search for the floating continent\_

Tang Zhen had already gotten used to this kind of frequent teleportation. When he regained his consciousness, he discovered that he was on a floating continent.

A waterfall, a spring, birds chirping, and a fragrant flower fragrance. The murmuring water rolled down from the edge of the cliff and converged on another floating continent below. And even further down was an endless ocean that dotted the islands of various sizes.

It was beautiful, but there was not a single living thing, not even an insect.

Looking at the surrounding buildings, Tang Zhen knew that he had arrived at the core area of the world Tower. In other words, he had successfully passed all the trials.

!!

it really wasn't easy to come here after a narrow escape.

It was a pity that the place was already empty, leaving only empty buildings that were silently welcoming him, a guest from the world of loucheng.

Standing on the edge of the cliff and looking for a while, Tang Zhen followed the Jade stone stairs and continued to move forward. At the same time, stone tablets appeared in front of his eyes. On them, there were many unfamiliar names.

When he reached the tall building at the end of the steps, an even larger stone tablet appeared before him. On it was an introduction to the history of this world grade tower as well as the details of the trial.

It turned out that this world-class Tower City was called the swirling sea. It had existed for more than 10000 years and was one of the old towers in the fifth battle area.

If a city wanted to continue to develop, it couldn't be complacent. It had to be supplemented with new blood as much as possible in order to keep the city prosperous.

The brutal trials that Tang Zhen had gone through were to attract and select the cultivators of the city. The spirit of the city would determine the status of the cultivators who would enter the sea spiral tower based on their performance. The better the results of the trials, the higher the starting point.

In terms of cultivation and resource investment, ordinary cultivators and elite cultivators would naturally be treated differently. The higher the grade of the building, the more so.

Under normal circumstances, a cultivator like Tang Zhen would be in charge of receiving him. However, the swirling sea mansion was already empty. Naturally, no one would be there to welcome him.

Tang Zhen recalled the reminder given by the cornerstone platform. It required the participants to collect as many valuable items as possible to obtain the tower's cornerstone. After the trial mission was over, the points would be awarded based on the items obtained.

In other words, in the following process, he would have to plunder the entire city and take as many things as he could!

Tang Zhen tried to sense the ball of light in his mind and discovered that it could store and withdraw items, but the cornerstone platform could not be traded. Perhaps it was related to this special world, blocking the normal operation of the cornerstone platform.

At the same time, there was an additional notification on the cornerstone platform. As long as you consume your current points, you can exchange for a larger storage space.

However, his sealed cultivation still hadn't recovered. Perhaps this was the internal restriction of the world Tower. He had to seal his cultivation when he was in the tower to prevent this special world from being destroyed.

Tang Zhen currently had more than a million points. However, this was his guarantee for completing the trial. He didn't want to use it easily. One must know that it was very easy to use it. However, it would be much more difficult to earn it again.

Therefore, the best way was to obtain high-quality items. That way, he could exchange for more points and save as much space as possible in the light ball.

After sizing up his surroundings, Tang Zhen went deep into the hall and began to search carefully.

As the owner of the City Tower and having a rich accumulation of knowledge, Tang Zhen was not like a headless fly that was searching for the storage location of precious items. Instead, he was able to lock onto the search area within a short period of time and judge the specific value of an item at the same time.

About half an hour later, he finished his search of the hall and moved on to the next building.

The area of this floating continent was very large, and it was impossible to complete the search in a short time. Tang Zhen had already made preparations for a long battle.

As for leaving this floating continent and heading to a higher level region, he still needed to plan carefully. He knew that there was definitely something like a teleportation array here, but without the corresponding authority, it was not easy to teleport away.

The interior of the towers seemed to be integrated into one, but there was a clear level restriction. Some places were not accessible to the residents. The Holy Dragon City was like this, and the swirling Sea Tower was no exception.

Time passed by slowly, and in the blink of an eye, nearly a week had passed.

During this period of time, Tang Zhen had walked around the entire floating continent and searched all the buildings that had been marked. He had also found some valuable items.

During this time, he did not see any other trial-takers, perhaps he was the only one here.

The reason for this was probably because he was the only one who had qualified to enter this floating continent, while the other trial-takers should be on other islands or floating continents.

Although he was very confident in his own trial results, he did not dare to guarantee that there would be someone who would obtain a better result than him. If the other party was searching on a higher level floating continent, then Tang Zhen would no longer have any advantage.

How could the assets of civilians and nobles be on the same level?

During this period of time, Tang Zhen had also discovered the short-distance teleportation formations that led to the other floating continents. Unfortunately, all of them had stopped operating, and they were unable to send Tang Zhen away.

The possibility of repairing the teleportation array was next to nothing. It was even more impossible to rebuild it. Tang Zhen had to think of another way.

At this moment, the knowledge that he had accumulated in the past finally came in handy. After completing the collection of materials, Tang Zhen began the construction of the aircraft.

He had already tested it before and found that there were no flight prohibiting formations on these floating continents, so his plan to build an aircraft would be completely feasible. There was no need to worry about falling into the sea halfway.

Using the collected materials, Tang Zhen created an item similar to a glider. At the same time, he also created a few high-pressure gas tanks to ensure that it would produce a strong thrust when it exploded.

At the same time, he also set up a simple runic magic circle on the aircraft to reduce its weight as much as possible.

After spending three days, the simple flying device was completed. Tang Zhen tested it a few more times to ensure that it would not malfunction during the process of use.

The competition was still ongoing, and there wasn't much time left for Tang Zhen. He had to head to the higher level floating continent as soon as possible.

After choosing a flat area, Tang Zhen visually estimated the distance to the floating continent in the distance and activated the flying device fixed on his body.

A strong air current spurted out from the air tank that was fixed in place. The aircraft made a sound as if it could not bear the heavy load, but it had also successfully sent Tang Zhen into the sky and headed straight for the higher floating continent.

Tang Zhen estimated the time it would take for the gas to be ejected before he quickly released the second gas tank and continued to rise.

It was closely followed by the third and the fourth. As Tang Zhen's flying altitude continued to increase and he was getting closer and closer to his target, Tang Zhen's suspended heart finally relaxed.

He had been worried that his aircraft would suddenly explode. Fortunately, that scene did not happen.

Who would have thought that just as Tang Zhen was preparing to land, a black figure slowly appeared from not far away. It seemed to be a trial-taker with natural wings.

The other party's target was very clear. It was also the floating continent in front of him. However, he was carrying a bag on his back, which made Tang Zhen certain that this guy was definitely not a cultivator from Lou Cheng.

"I don't care who you are, don't even think about snatching my business!"

Tang Zhen coldly laughed. He pulled out a strangely shaped weapon from his waist and aimed at the figure that was continuously approaching.

During this period of time, other than building the aircraft, he had also built himself a weapon for long-range attacks when he could not find a weapon.

With a gunshot, the flying figure in the distance suddenly trembled, then fell rapidly to the sea like a stone.

With his cultivation sealed, this guy would be seriously injured if not dead.

Tang Zhen ignored the curses that were faintly transmitted from below. He controlled the flying device's wings to pop out and slide toward the continent under his feet.

...

#### Chapter 1507 Meeting Luo Fei again (1)

Looking down from above, the buildings on this floating island were more exquisite, and the environment was more pleasant.

However, Tang Zhen could faintly see a human figure flickering. This proved that he was not the first to arrive. Clearly, someone had already arrived before him.

Tang Zhen frowned. He controlled the wings on his back and slowly descended. Finally, he landed on the top of a tall building and once again observed the situation in the surroundings.

Among the surrounding buildings, there was a colorful building that was extremely eye-catching, showing that it had a different position from the other buildings.

!!

After making sure that there was nothing unusual in the surroundings, he turned around and went down the building, heading straight for the colorful building he had just discovered.

Who would have thought that just as he stepped onto the street, two figures would rush over with their weapons aimed at his vital parts at an astonishing speed.

the natives have already joined forces. No wonder!

Tang Zhen muttered in his heart. His body twisted slightly and dodged the bow and arrow that was shot toward him. He then flicked his hand and threw out a flying knife.

The flying Daggers blocked the Aboriginals who tried to attack in close range. Immediately after, Tang Zhen was like a vigorous cheetah as he suddenly ran left and right on the street, getting closer and closer to the Archer.

A trace of panic flashed in the Archer's eyes. He shot several sharp arrows in succession, but none of them hit Tang Zhen.

"Stop him!"

The Archer's heart was burning with anxiety. At the same time as he drew his bow and nocked the arrow, he shouted at the natives who were chasing after Tang Zhen.

Upon hearing his companion's shout, the native with the longsword increased his speed once again. The tip of his sword was pointed at Tang Zhen's back, only a few feet away.

"Go to hell!"

Tang Zhen once again took out three Flying Daggers from his waist. He suddenly twisted his body and threw them out. Soon after, he did not care whether they hit the enemy or not as he rolled once again and dodged the sharp arrows that were shot at him.

He was less than three meters away from the Archer, and he only needed one dash to get close to him.

The Archer's expression changed drastically. He swiftly drew a short sword from his waist and hacked at Tang Zhen with a face filled with killing intent.

Tang Zhen twisted his body to avoid the sword's edge and placed one of his hands on the other party's forearm. At the same time as he exerted his strength, the throwing knife in his other hand was sent out.

The flying knife pierced the other party's heart. Tang Zhen continued to stab him twice. He snatched the short sword from the other party's hand and threw it at the other native who had caught up.

The sound of a sharp blade piercing into a body rang out. The short sword directly pierced through the other party's head and came out from the back of the head.

The native revealed an unwilling expression as he fell limply to the ground.

He took a deep breath and opened the backpacks on the two corpses. After checking them for a while, he put them all into the orbs.

Soon after, Tang Zhen picked up the long sword and bow from the ground and once again rushed towards the seven-colored building.

He had a faint premonition that the trial-takers from the other islands and continents might have found a way, which was why they were appearing on such a large scale. He had to speed up his actions.

Just as he had expected, when he approached the seven-colored building, he immediately heard the sound of fighting. There were some corpses lying on the ground.

Tang Zhen sized up these corpses as a trace of doubt flashed in his heart. He could not understand why the number of trial-takers among the natives would increase so much.

At this moment, the sound of swords clashing rang out from a distance away. Tang Zhen looked towards the source of the sound, only to see a few native cultivators surrounding and killing a tall and slender black-robed woman. Each and every one of them was attacking fiercely, and they were fighting with no regard for their lives.

Tang Zhen didn't know that woman. However, he knew that she was definitely a cultivator from Lou city when he saw that she didn't have any bags on her.

The woman also saw Tang Zhen and immediately cried out for help, "Your Excellency, please help. I will definitely repay you!"

Tang Zhen, who originally wanted to leave, glanced at the woman who called herself Luo Fei with a slightly surprised expression. He casually took out his bow and fired a few arrows.

The native trial-takers who were besieging Luo Fei dodged in a hurry, but Luo Fei seized the opportunity. The long sword in her hand was like a white ribbon. After flying and shuttling back and forth, she actually killed three people in succession.

The remaining native trial-taker turned around and tried to escape, but he was shot in the back of his head by Tang Zhen's arrow. He fell to the ground with a "plop."

Luo Fei retracted her long sword and picked up all four bags from the corpse. She walked to Tang Zhen and handed three of them to him.

"Thank you for your help, Sir. How may I address you?"

Tang Zhen only took two and smiled at Luo Fei, "Your Excellency Murphy, I didn't expect to see you again so soon!"

Hearing this, Luo Fei was stunned for a moment. Her long eyebrows raised slightly, and then a smile appeared on her heroic face.

"So it's Sir Tang Zhen. This is the second time I have received your help. We are really fated."

Tang Zhen smiled. He pointed to the corpse on the ground and said, "What's going on with these natives? Why did so many of them suddenly appear?"

Hearing this, Luo Fei laughed bitterly, shook her head, and sighed. "I've also just received the news that the Aborigines actually sent out tens of millions of trial-takers, and even if they go through a huge selection process, there will still be many people who pass the trial.

In addition, every participant had three chances of rebirth, which would greatly increase their chances of passing the trial.

After saying this, she said in a very unwilling tone, "There are only a limited number of cultivators in Loucheng. Even if all of them pass, they are far less than the number of indigenous cultivators. In this world where cultivation is sealed, we don't have an advantage.

Tang Zhen was stunned for a moment before he said with a sudden realization, "In the final question answering segment, even if one doesn't pass, one can still enter this place, right?"

yes," Murphy nodded. although we can't enter the floating island, we can enter the island below.

"Then how did you get here? as far as I know, the teleportation array can't be used at all?"

actually, it can be activated, but it needs to wait for a certain amount of time. Moreover, it only takes a few minutes to activate.

Tang Zhen nodded his head. If that was the case, it would explain why a large number of trial-takers had appeared here. It turned out that they had used a teleportation array.

Now that he was alone, he didn't have time to watch the teleportation array, so it was normal to miss the teleportation opportunity.

"There's one more question. How many more levels are there above this floating continent? has anyone come ashore yet?"

Sophie shook her head. Obviously, she was not sure.

this place has already been occupied by the Aboriginals, and all the good things have probably been searched by them. There's no point in going in again. I'll make a move first!

Tang Zhen cupped his hands together and said "take care" to Luo Fei. After which, he quickly sneaked into the nearby dense forest.

Sophie opened her mouth, and a trace of anger appeared on her face. She said with hatred,"This bastard, he's afraid that I'll move with him, so he's running faster than a rabbit!"

no, since he didn't use the teleportation array, he must have other ways. Maybe it's better than waiting for the teleportation array to open.

Thinking of this, a cunning smile appeared on her face."Hehe, now that I know about it, you still want to eat it all by yourself? dream on!"

...

As soon as he finished speaking, Luo Fei followed Tang Zhen's path and chased after him. Her face was full of pride.

Chapter 1508 Danger in the air (1)

A few minutes later, Tang Zhen, who was hurrying on his way, suddenly stopped and helplessly turned around.

Your Excellency Murphy, can you not follow me secretly? it makes me subconsciously feel nervous. If I think you're a native, you're likely to be shot like a Porcupine.

Luo Fei elegantly walked out from behind a large tree by the roadside. She smiled at Tang Zhen and said,"Sir Tang Zhen, please hurry along. I'm really just passing by."

The corner of Tang Zhen's mouth trembled. He gently nodded his head and continued to hurry on his way.

!!

Luo Fei continued to follow behind. No matter how Tang Zhen changed directions and hid his tracks, he would be discovered by this woman. It was obvious that she was good at tracking.

Sir Murphy, what do you want? if you want to form a team, please tell me. Of course, I'll definitely choose to refuse.

Tang Zhen felt helpless in the face of Luo Fei's actions, but he could not say anything.

"Actually, I just want to know how you're going to leave this place. I definitely won't delay your actions. You can't be so petty, right?"

Tang Zhen shrugged his shoulders and said to Luo Fei, "In fact, if I can help you, I'd be very happy to. However, my item can't send two people to heaven."

is that so? I'm even more interested now that you've mentioned it.

"Alright, I hope you won't be disappointed!"

The two of them continued forward until they arrived at the edge of the floating continent and looked at the other floating continent in the distance.

It would be more appropriate to call this floating island a small island. Although it was not large, it was the only way to the core area, and there was no way to go around it.

After carefully observing for a while, Tang Zhen took out the simple flying device that he had made and placed it on the ground.

After Luo Fei seriously sized it up a few times, her face revealed a thoughtful expression. Obviously, Tang Zhen did not lie to her. This thing could only be used by one person.

Even if he wanted to duplicate one, he would need enough materials. Unfortunately, he did not have enough time.

After fixing the aircraft on his body, Tang Zhen was about to start when Luo Fei said, "If you modify your aircraft, can it carry two people?"

No. Tang Zhen shook his head. that's too dangerous. It's very likely to lead to an explosion. If that's the case, the two of us will be in danger.

Falling from the sky with their cultivation sealed, in such a high-speed collision, the two of them would definitely be smashed into a pile of meat paste!

you said it's only a possibility. How do you know it won't work if you don't try? "

Luo Fei obviously didn't want to give up so easily. She tried to persuade Tang Zhen. One should know that the teleportation array would be activated two days later. Such a long time was enough for her to fall behind by a lot.

Tang Zhen once again shook his head to express his rejection. He didn't need to take this risk.

Sir Tang Zhen, you should know that our ultimate goal is to take back the tower's foundation stone. However, in the situation where your cultivation is sealed, how confident are you in obtaining the foundation stone by yourself? "

Tang Zhen was silent. He was extremely clear in his heart that he might not be a match for the other trial-takers if he were to fight alone.

Those who were able to walk to the final step were all elites among elites. Tang Zhen was not someone who thought highly of himself. He knew that there were times when one could not avoid cooperating with others in order to complete a task.

"I can give it a try, but you have to be mentally prepared. Maybe we'll turn into fireballs halfway and then fall from the sky!"

Tang Zhen warned Luo Fei. After he realized that he really needed a partner, he had obviously agreed to Luo Fei's request.

it's okay. Even if I become a fireball, I'll still have you to accompany me!

Lauffie said with a smile, but she immediately began to prepare in case an accident really happened.

Modifying an aircraft was not a difficult task for Tang Zhen. With the existence of the runic magic circle, it could make its operation more stable. However, whether it could successfully send the two of them to other floating islands was still an unknown.

After two hours of hard work, Tang Zhen motioned for Luo Fei to get ready and then lit the aircraft.

Luo Fei hugged Tang Zhen tightly. The two of them quickly rose into the sky under the propulsion of the aircraft and were far away from the ground in an instant.

"Everything is going well. It doesn't seem to be as bad as you said."

Luo Fei's voice sounded beside Tang Zhen's ear. It seemed to carry a trace of pride.

don't be happy too early. Wait until we land safely!

Tang Zhen had been fully focused on controlling the flying device. He was not as optimistic as Luo Fei.

One by one, the gas tanks were ignited. The frequency of the aircraft's vibration became faster and faster. It might explode in the next second. Tang Zhen's heart was still hanging in the air as he had already made emergency preparations.

As the saying goes, what one fears will come. Just as the second last Qi can was ignited, an abnormal vibration came over, causing Tang Zhen's expression to change.

"Not good, it's going to explode!"

After loudly reminding Luo Fei, Tang Zhen directly removed the gas tank fixed on the aircraft and then opened the folded wings.

The metal tube that shot out an intense air current danced wildly in the air and almost hit Tang Zhen and the other person. Soon after, it turned into a dazzling fireball. The loud noise shook everyone's head and made them dizzy.

The shock wave from the explosion sent the two of them tumbling in the air. After barely stabilizing their bodies, they once again flew towards the floating island opposite them. However, looking at their current angle, it was obvious that they would not be able to reach their target smoothly.

Laofei laughed bitterly and sighed, " as a spiritual Emperor, you have to face the danger of falling to your death from the sky. This is ridiculous.

Tang Zhen frowned tightly and shook his head. He extended his hand and pointed at the bottom of the small floating island in front of him. He loudly said to Luo Fei, we're not at the end of our rope yet. Do you know why I chose this direction? "

Luo Fei shook her head in doubt. She turned her head and looked in the direction pointed by Tang Zhen. She quickly discovered that there was a protruding platform at the bottom of the floating island. There was also an inconspicuous hole on it.

if there are no accidents, we should be able to land on that platform smoothly and then find a way to get back to the ground.

Luo Fei nodded. The only thing she could do now was to cooperate with Tang Zhen and land smoothly.

Under Tang Zhen's control, the two of them slowly advanced through the sea of clouds. They were getting closer and closer to the platform.

However, a sense of danger rose in Tang Zhen's heart at this moment. He did not hesitate to control the flying device to turn to the side.

"Whoosh!"

A stone the size of a human head fell from the sky and whistled as it fell into the abyss. If Tang Zhen had not dodged in time, it was likely that he would have been directly smashed by this stone.

However, the crisis had yet to be resolved. Very soon, more rocks were thrown down. Their target was precisely the flying Tang Zhen.

Luo Fei looked up with a trace of anger on her face. She loudly reminded Tang Zhen, there are five natives up there. They are the ones who are constantly throwing stones!

"Be careful, quickly turn left!"

...

While she reminded him loudly, Luo Fei also pinched Tang Zhen's left arm to prevent him from making a wrong judgment.

Tang Zhen had already reacted when he heard Luo Fei's reminder. He then quickly dodged.

A rock the size of a millstone whizzed down. If it was not for Tang Zhen dodging in time, they were destined to be smashed into pieces.

“I definitely won’t let these guys off. They better pray that I don’t run into them!”

Loofy said hatefully. She was angry as if a Tiger had been played by a mouse, and she felt helpless and depressed.

Tang Zhen was not in the mood to care about Luo Fei’s complaints. At this moment, he was completely focused on controlling the flying device. He was like an agile swallow that shuttled and dodged the falling rocks.

“Get ready, we’re about to land!”

Tang Zhen reminded Luo Fei as he controlled the aircraft to land slowly. Then, he quickly removed the aircraft from the ground and kept it back into the ball of light.

we’ve successfully landed. Next, we should teach those guys a lesson!

Tang Zhen took out his weapon from the cluster of light. He turned his head and glanced at the top of the cliff before sneering and entering the cave behind him.

Tang Zhen would never be polite to his enemies. Since this group of people wanted to kill him, they naturally had to be prepared to be killed!

...

Chapter 1509 Ring of teleportation (1)

The cave was long, narrow, and winding. Following the long stairs, one could reach the surface of the floating island.

Tang Zhen and Luo Fei searched as they moved forward. During this period, they saw many scattered bones. Perhaps they were residents of this building, or perhaps they were invaders from the outside world.

Just by looking at the skeletons, one could tell that they must have experienced a brutal battle before they died. The decayed swords and armor were scattered everywhere.

This was the first time Tang Zhen had seen the remains of a corpse in the city Tower. However, he could not explain the specific reason why the residents of the City Tower had disappeared. Although he was curious, Tang Zhen did not stop for long and continued to move forward.

!!

The Aborigines had already arrived here first, which was very unfavorable to Tang Zhen’s plan. He had to reach the core area before the other party. Otherwise, once the foundation stone of the tower was taken away by the other party, it would be very difficult for him to gain much this time.

Luo Fei was the same. Her main goal this time was to snatch the building foundation stone. Even if she was temporarily cooperating with Tang Zhen, she would still snatch it from Tang Zhen at the last moment.

The agreement between the two would only last until the foundation stone of the tower was found, but before that, they would help each other as much as possible.

Tang Zhen and Luo Fei finally reached the ground after running all the way up. They walked out of a fake mountain in a garden.

Compared to the two floating continents he had been to before, there were clearly more traces of battle here, and some buildings had been seriously damaged.

The two of them looked at each other and chose the tallest building in the vicinity. In a situation where they could not use their spiritual power to explore, climbing up to look into the distance was undoubtedly the best way to understand the surrounding environment.

Clearly, it was not just Tang Zhen and his companion who thought of this point. Those natives had already occupied this place. Some of them were in charge of being on guard at the highest point. At the same time, they were pointing out the direction to their companions.

Perhaps, he had discovered Tang Zhen and the other man and informed his companions to attack with the stone.

“I’ll go up and kill him. You stay on guard!”

After reminding Luo Fei, Tang Zhen drilled into the building like a civet cat. He quietly used the cover of the terrain and slowly approached the native standing on the top of the building.

The native didn’t notice the approaching danger and was still constantly observing the sky around the floating island, on guard against anyone approaching.

He was holding a weapon that looked like a crossbow and was equipped with something like a quiver, so he should be able to shoot continuously.

Compared to Lou Cheng’s terrifying combat power, the destructive power of these weapons was like a toy. However, in the case of sealing their cultivation, these weapons still had a certain power.

It was impossible for a world grade tower to only have these ordinary weapons. Hence, the powerful weapons must have been sealed somewhere and would only be released when the cultivators left the tower.

Perhaps the weapons he was using were all left behind by the invaders!

While this thought flashed through his heart, Tang Zhen was already less than three meters away from the native who was on guard duty. This distance was very dangerous, but it was enough for him to complete a one-hit kill attack.

Tang Zhen charged towards his target and thrust his weapon at the same time, ruthlessly piercing the target’s heart.

After slowly putting down the limp body, Tang Zhen quickly observed the surrounding environment and returned to meet up with Luo Fei.

After seeing Luo Fei, Tang Zhen whispered, “This is the only building on this floating island. The natives are searching, and there should be more than ten of them.”

The problem now is how they got here. The natives don't have wings, so they can't fly. They either have a flying device that can carry more people, or they have the key item to activate the teleportation formation!"

Sophie nodded. This was the only reason that could explain why the natives had arrived here before them.

The last test was a test of knowledge, which would determine the specific location of the teleportation. Luo Fei did not believe that the natives had more knowledge than she, a spiritual Emperor.

If that was the case, the trial-takers from the world of towers would really commit suicide out of shame.

so, our primary goal is to figure out how the natives got here, and then snatch the key items, right? "

Luo Fei asked Tang Zhen. After seeing him nod, she pulled out the dagger from her waist.

let's split up. We'll meet here in half an hour.

wait a moment. You can take this bow and arrow. I have this!

Tang Zhen raised the crossbow case in his hand, turned around and slowly walked towards a building not far away, quickly disappearing.

Laofei smiled, put the bow and arrow back into the ball of light, and slowly moved in the opposite direction.

After Tang Zhen approached the building, he carefully hid near the entrance. He had already noticed that there were human figures flashing here earlier.

Tang Zhen knew that his target was approaching as he heard the sound of footsteps getting closer and closer. His eyes narrowed slightly, appearing just like a cheetah that was accumulating strength and waiting to pounce.

A human figure appeared in front of him. Tang Zhen saw the shocked expression on the other party's face when he discovered him. Before the other party could react, the other party had already completed his attack.

He put his backpack into the ball of light and dragged the body to the corner. Tang Zhen began to look for his next target.

In the situation where he could not communicate with the natives, he could only try his best to find the leader of these natives. Perhaps the thing he wanted was in the other party.

Like a ghost, Tang Zhen passed through the buildings and dealt with four native trial-takers one after another. However, he still did not find what he was looking for.

Just as he was about to take the risk to draw out all the enemies and determine the target he was looking for, a fierce battle suddenly came from the distance, alarming one of the natives he was about to attack.

Tang Zhen's heart sank. He guessed that Luo Fei had most likely been exposed and was being attacked by the natives.

Seeing that the other party was about to rush over to support him, Tang Zhen immediately took out his crossbow and launched an attack. An arrow pierced through the back of his head!

what a troublesome woman. However, this will make it easier for me to find the leader of the trial participants.

After thinking up to this point, Tang Zhen immediately followed the direction of the sound and soon saw Luo Fei who was fighting with the natives.

At this moment, she was surrounded by five enemies, and there were three people watching her with a teasing look on their faces.

Quietly hiding in the corner of the wall, Tang Zhen quickly locked onto his target. It was the man among the three of them who was being protected by two of his subordinates.

If one looked closely, one would notice that the man was wearing a ring on his finger. Compared to the trial-taker, who had nothing but clothes and weapons, the ring was enough to expose his special identity.

What he needed to do now was to kill this guy and then snatch that obviously unusual ring.

Taking advantage of the perfect opportunity when the other party's attention was attracted by Luo Fei, Tang Zhen quickly approached the position of the three people. He raised the crossbow in his hand and shot five arrows in succession.

Three arrows landed on the native with the ring, and all of them hit his vital parts. The other two arrows landed on the guards beside him, and each arrow was deeply embedded in their bodies, enough to kill them.

Seeing that the target had fallen to the ground, Tang Zhen was not in a hurry to take the ring. Instead, he shot the remaining crossbow arrows at the natives who were besieging Luo Fei.

With Tang Zhen's help, Luo Fei's pressure was greatly reduced. In a few breaths, the remaining Aborigines were dealt with and she heaved a long sigh of relief.

"Thank you!"

If it wasn't for Tang Zhen's timely intervention, she might have been killed by these natives.

...

you're welcome. Let's hurry up and take action!

Tang Zhen retrieved the crossbow arrows from the corpse and removed the leader's ring. After confirming that he had not missed anything, he took the lead and walked towards the area where the teleportation formation was located.

Chapter 1510 The core area \_

When Tang Zhen, who was wearing a ring, approached the teleportation array, the teleportation array that had stopped operating immediately reacted.

just as I had guessed, this ring has the authority to activate the teleportation array. I wonder where the natives got it from? ”

but one thing is for sure. Its original owner must have an extraordinary identity. Ordinary residents of the building don't have that right.

Tang Zhen said to Luo Fei. Then, he tried to activate the teleportation formation to determine how much authority it had. If possible, it would be best to teleport to the core area of the spiral Sea Tower.

!!

Luo Fei, who was in charge of keeping watch at the side, frowned and said after hearing Tang Zhen's words, I think this ring should have been obtained by the natives in the outside world, and they brought it in after knowing its use. As you said, the original owner was definitely not an ordinary person.

The problem is, how many of these rings are there in total? are there other natives using them? if that's the case, we have to speed up our operation.”

Tang Zhen nodded. He agreed with Luo Fei's guess. This ring should be the spoils of war from the natives.

Even such an important item had been taken away, so one could imagine what the residents of the city had encountered.

Not only did they suffer a crushing defeat in the battle with the natives, but now their own nests were also plundered by the natives like bandits. Even the cornerstone of the city might not be preserved.

There was no doubt about the fall of the spiral sea mansion.

This was the highest level tower that Tang Zhen had come into contact with so far. It was also the highest level tower of the trap. He was very curious about the specific process of the trap and hoped to learn from it.

alright, let's prepare for the teleportation!

Tang Zhen snapped his fingers and beckoned to Luo Fei. He was the first to stand in the teleportation array.

With a flash of light, the two of them disappeared. The next moment, they appeared on top of a huge building.

The building looked like an altar, but it was several hundred meters tall. The pure white surface of the building was carved with countless exquisite patterns, making it seem ancient and mysterious.

Just like the floating island, the building had severe damage, but it was at least a few decades old.

From Tang Zhen's angle, he was able to see floating continents of different sizes. They were arranged in a manner that contained some kind of hidden law. The number of them far exceeded Tang Zhen's imagination!

At the end of his vision, he could see the edge of the tower. It was like a chaotic sea of clouds with lightning flashing.

At this moment, Tang Zhen suddenly had a feeling. If he had not arrived at this place, he might never be able to experience how magical a true world-class tower was!

The residents of the buildings made the most of the available space and replaced the entire land with the floating land. At the same time, they also used the different heights of the land to distinguish the residents of the buildings of different levels.

The disadvantage was that when one of the floating continents suffered an accident, the other floating continents couldn't react in time and could only watch the fire from afar.

At this moment, the floating island had directly become a floating prison. It was a trap that had been set up for itself!

This wasn't impossible. As long as they destroyed the control core of the tower and ensured that the laws here wouldn't be broken, the invader could use the laws here to deal with the people here!

Of course, this did not mean that the intruders had won the final victory. The biggest possibility was that the previous intruders had died together with the remaining residents of the building, and then most of the corpses that had turned into energy had disappeared!

The trial-takers from the world of towers and the original world were only able to enter after many years of war. The way they entered was also the way the world-level towers operated by default.

"This should be the core area. Let's split up!"

Luo Fei said to Tang Zhen and quickly rushed out of the teleportation array. Her target was very clear. It was the tall and magnificent building in the distance.

The foundation stone of the tower must have been placed there, and it was very likely that someone had already gotten there. He had to act as soon as possible.

However, Tang Zhen was not as anxious as Luo Fei. This was because he knew that the place where the tower's foundation stone was placed would definitely have a layer of defensive equipment. If a group of trial-takers with their cultivation sealed wanted to charge through, they would definitely not be able to complete it within a short period of time.

What he had to do was to find a way to avoid facing those defensive devices and directly reach the area where the foundation of the building was.

Under normal circumstances, the identity of a resident of an advanced city Tower might be able to solve this problem.

It was a pity that he couldn't get close to the cornerstone platform at all, so he naturally couldn't obtain a Resident Identity Card. And without a Resident Identity Card, he naturally couldn't pass through those defense mechanisms.

If trickery didn't work, then he could only use the most barbaric method!

In the following period of time, Tang Zhen began to wander around the buildings in search of the materials he needed. He did not seem to be in a hurry.

At the same time, in the core area of the sea spiral tower, fights were happening one after another. Cultivators and natives of the tower had arrived one after another. They formed teams and fought for the rare treasures here.

In particular, there were a large number of corpses scattered in the passage leading to the cornerstone platform. They were all reckless fools who had tried to force their way in and were killed by the metal puppets.

With their cultivation sealed, the trial-takers could not even withstand a single attack from the metal puppets.

Loofy was also near the passage at this time, working with more than a dozen cultivators of Lou Cheng. While they were working together to resist the natives, they were also trying to get close to the cornerstone platform.

The hostility between the Lou Cheng cultivators and the natives was not as intense as before. One reason was that they did not get anything after killing the Lou Cheng cultivators, because all the items they collected were placed in the light ball.

Secondly, the cultivators of Lou city had started to hide themselves and mixed into the groups of the natives, so they would not easily expose their identities.

These natives didn't belong to the same camp. In order to snatch the treasure, they didn't have so many scruples. Who would care about the hidden cultivators of loucheng?

The cultivators of Lou city also knew that they didn't have the advantage in numbers, so they became more low-key and didn't easily provoke the natives.

Of course, if there were any ignorant natives who dared to provoke them, the cultivators of Lou city would not be polite. Even if their cultivation was sealed, the combat ability of a spiritual Emperor cultivator was not something that the natives could compare with. Those who dared to try were now dead.

Until now, the natives had not figured out the origin of the cultivators in loucheng. They only regarded them as ordinary cultivators and did not know that they were the enemies who had invaded this world in the past.

Fortunately, they had not been exposed. Otherwise, no matter how strong their combat power was, it was very likely that they would be completely annihilated by the siege of the natives!
