

Alternate 1511

Chapter 1511 Mingfeng (1)

The area of the main city Tower was extremely large, and each room was more than a thousand square meters. In a room near the passage, a group of cultivators were gathered there, vigilantly observing the situation outside.

The leader of the Lou Cheng cultivators was thin and weak. On the surface of his skin, there was a material similar to bone armor. The bone armor was covered with blade marks, which obviously blocked many fatal attacks for him.

His face looked ordinary, but his eyes were shining brightly, exuding a cold and gloomy aura.

One of the cultivators from Lou Cheng retracted his gaze and walked up to him, asking, "Sir Ming Feng, when do we start?"

!!

After hearing the question from the cultivator beside him, Ming Feng pondered for a moment and said, "the path to the cornerstone platform is too dangerous. We can't force our way in alone, so we have to think of another way.

Lou Cheng, who was standing beside him, frowned slightly. This was obviously a difficult problem.

then what should we do? should we just keep staring at them?"

The cultivator who asked the question looked depressed. Although he wanted to try again, he suppressed the urge when he thought of the tragic deaths of the natives.

Ming Feng chuckled. there's no need to rush. We still have a chance. The key is how we use it.

Seeing Ming Feng's confident expression, the hearts of the people around them stirred. Could it be that he already had a solution to the problem?

Sir Ming Feng, what do you plan to do? if there's anything we can do for you, please do not hesitate!

One of the cultivators from Lou Cheng said, and the crowd around him immediately agreed. They were all gathered together now, and they had already silently acknowledged Ming Feng as their leader.

One had to know that in the last trial, Ming Feng was ranked second with hundreds of thousands of Battle Points. During the mission, he was full of wisdom and forced his way into the upper echelons of the spirit Master world.

If it wasn't for Tang Zhen's sudden appearance, the number one position in the trial would definitely be him!

This method was much more brilliant than fighting like a brute, which was also the reason why the cultivators in Lou Cheng chose to listen to his command.

"Don't worry, everyone. Before we came here, I've already ordered people to disguise themselves as natives and spread the news that there's a treasure in the room on the cornerstone platform.

I believe that it won't be long before the natives from the other regions gather here and try to force their way through the passageway!"

At this point, Ming Feng chuckled and said with confidence, " "When the time comes, we only need to follow behind and we can just sit back and reap the benefits!"

Seeing that everyone was still skeptical, Ming Feng continued, " of course, it's not easy to trick the natives, so we need to add more fire to make the natives believe that there's really a treasure on the cornerstone platform!

Then, Ming Feng looked around at the crowd and gave them an encouraging look. "I need someone to help me put on a show. Who is willing to take on this responsibility?"

All the cultivators were silent. It was obvious that no one was willing to take the risk before the situation was clear.

Ming Feng's eyes flashed with dissatisfaction, but he still smiled and said, " "Everyone, please be at ease. There's absolutely no risk in this matter. At most, you'll suffer some physical pain.

And I promise that after the end of this trial, I will give the brothers who carried out the mission a generous reward. I will definitely not treat everyone shabbily!"

Hearing Ming Feng's promise, the cultivators nodded silently. Soon, someone stepped forward and expressed that they could cooperate with Ming Feng's actions.

Ming Feng was overjoyed. He patted the other's shoulder and told him his plan in a low voice.

The cultivator couldn't help but nod and show a trace of admiration."Don't worry, Sir Ming Feng, I will definitely not let you down!"

After saying that, the cultivator sighed, " "I've always admired people like you who have both wisdom and courage. Who would have thought that you would end up in second place in the last trial? even I feel that it's unfair for you!

I don't know where that Tang Zhen popped out from, but he relied on trickery to obtain the first place in the trial. He even caused everyone's hard work to go to waste. He's really detestable to the extreme!"

Ming Feng's eyes darkened when he heard this, but he quickly smiled and said, " you can't say that. He's only able to do this because of his own ability. After all, the trial itself is a competition!

The indignant cultivator laughed and didn't say anything more.

Luo Fei, who was not far away, witnessed this scene and sneered in her heart. She was sure that Ming Feng, who had lost first place, was not satisfied. He had only said those words to protect his image.

As for the cultivator who felt indignant for Ming Feng, he probably didn't have a good heart either. He deliberately mentioned this matter in front of everyone to provoke a conflict between the two of them, and it would be best if they fought to the death.

One had to know that among the participants of this operation, only Ming Feng and Tang Zhen, who had not appeared since the beginning, gave the cultivators the greatest pressure. If the two of them were to

withdraw from the trial due to an accident, then the possibility of the group obtaining the final victory would be greatly increased.

Luo Fei also hoped that Tang Zhen and Ming Feng would fight. Only she knew that if she were to compete with these two guys, the chances of success would be very low.

Among the cultivators, Ming Feng was very famous. He was also publicly acknowledged as one of the cultivators with the highest chance of completing the trial. There were even many cultivators who secretly regarded him as their leader, hoping that Ming Feng would guide them in the future.

To be able to form a relationship with the members of the fifth battle area was equivalent to hugging onto a golden thigh. Who would waste such a good opportunity?

As for Tang Zhen, this trial-taker who appeared out of nowhere, Luo Fei felt that she could not see through him. He did things in an unconventional way and was extremely bold. He looked as if he would not give up until he pierced through the sky.

The actions of the spirit Master world were enough to prove this point. At that time, if he was just a little careless, he could have lost his life and wasted all his efforts in the trial.

Compared to the trial-takers who had always sought stability in their actions, this style of doing things was too different. It was simply a model of courting death!

However, it was not the case to say that he was reckless and arrogant. This was because, according to Luo Fei's observation, Tang Zhen's actions seemed bold. In fact, every step he took was carefully calculated. His seemingly reckless actions could sometimes achieve better results.

if they really treated him as a reckless man, they would probably die a terrible death in the end!

At the thought of this, Luo Fei laughed secretly. She was really looking forward to seeing the scene of Tang Zhen and Ming Feng fighting.

At that moment, Ming Feng walked up to her and said in a familiar tone, "Your Excellency Murphy, I didn't expect that we would have another opportunity to cooperate so soon!"

"I'll be in your care from now on, Sir Ming Feng. Thank you in advance."

Hearing this, Luo Fei smiled and returned the greeting, but secretly, she pouted in disdain. Her serious injuries in the spiritual master world were actually largely related to Ming Feng.

Back then, Ming Feng had a high position and high authority, but he didn't have many people he could trust. Hence, he would sometimes entrust some missions to the trial-takers, and the reward would be to provide the trial-takers with some funds and help in certain aspects, as well as to cover for them at critical moments.

Both sides were mutually beneficial, and the process of cooperation was quite pleasant.

Before Luo Fei met Tang Zhen, she had received a mission from Ming Feng. Who knew that she would encounter an accident during the mission, causing Luo Fei to fall into a trap and almost lose her life!

After the incident, according to Luo Fei's deduction, it was very likely that Ming Feng or his subordinates had betrayed her, but there was no evidence.

However, the biggest possibility was that it was Ming Feng's doing. At that time, he already had victory in his hands. In order to avoid falling short, he had to clear out all the trial-takers in his own situation.

From that moment on, Luo Fei was on high alert against Ming Feng. She tried to contact him, but the cleric chased after her again. Fortunately, Luo Fei was prepared and easily got rid of the enemy.

After hiding for a period of time, Luo Fei, who was at the end of her rope, really had no other way. In the end, she could only ask for help through the cornerstone platform. In the end, she met Tang Zhen who was in the same city as her.

Chapter 1512 The temptation of the treasure (1)

Although it was only a deal with Tang Zhen, Luo Fei still felt a trace of gratitude towards Tang Zhen.

She was very clear in her heart that the deal between her and Tang Zhen was actually a child's play. It could even be said that it did not have much attraction. It was not strange for Tang Zhen to reject it.

However, Tang Zhen had agreed to cooperate with him during the two times they had met. Although there was a reason for them to make use of each other, it was more of a helping hand!

It was also because of Tang Zhen's help that Luo Fei was able to avoid serious losses and persevered until the end of the spirit Master World Mission.

!!

He had even managed to arrive at the core region with Tang Zhen's help earlier and did not miss the best timing.

Therefore, even if Tang Zhen didn't care, Luo Fei would remember this favor in her heart.

Compared to Tang Zhen, Ming Feng's image instantly became much more despicable. Although Luo Fei would not let her emotions affect her actions, her vigilance and disgust towards Ming Feng did not change at all.

Of course, on the surface, she did not show it at all.

After the two of them chatted for a while, Ming Feng suddenly said, "I heard that you had some contact with Tang Zhen. I wonder if you can introduce him to me. What kind of person is he?"

Only by knowing one's enemy and oneself would one be able to control the overall situation. At this moment, Ming Feng had already listed Tang Zhen as his greatest competitor. Regardless of what methods he had used to obtain the first rank in the previous trial, Tang Zhen was someone worthy of him doing his best to guard against and deal with.

Eliminating him from this trial was only the most basic plan. If he had to wait until the time when he had to use his main body to participate in the trial, and the other party was still in the same trial world as him, he had to find a way to kill him!

Only a dead opponent could make Ming Feng feel at ease.

Although the trial in the fifth battle area was cruel, it was also humane. At the beginning of the trial, they would not use their bodies. This way, they could protect the trial-takers to the greatest extent and prevent them from dying because they were not used to the mission.

When they had some understanding of the trial missions and accumulated a certain amount of points, they would then arrange for the trial-takers to participate in even more brutal missions. Only then would the real trial begin.

90% of the cultivators had died at this stage, the elimination rate was frighteningly high.

Ming Feng, Luo Fei, and the rest were all about to leave the stage of newbies. After completing this trial, the two of them would be able to participate in the real trial mission.

As such, the last two trials were rather important to Ming Feng. Not only could he accumulate enough points, but he could also obtain a higher evaluation and participate in missions with higher returns.

Danger and opportunity coexisted. This was a principle that every trial-taker understood.

The last time, the good thing had already been ruined by Tang Zhen. Ming Feng was already gnashing his teeth in hatred. This time, he would definitely not allow the same thing to happen again. He held his breath and wanted to teach Tang Zhen a lesson!

Who would have thought that from the beginning until now, Ming Feng had not seen any traces of Tang Zhen. This caused him to feel depressed, like a mouse pulling a turtle with nowhere to eat.

That was why Ming Feng placed his focus on Luo Fei. He tried to analyze Tang Zhen through her and then make targeted measures.

He did not know that Luo Fei was already on her guard against him. She was even more alert against Ming Feng's approach.

Sir Ming Feng, I've only come into contact with Tang Zhen once. We didn't contact each other again after that, so I don't know much about this person.

After giving a perfunctory reply, Luo Fei did not say anything else to avoid making mistakes.

When Ming Feng saw Luo Fei's expression, he knew that she was hiding something and did not want to tell him what she knew.

in that case, I won't ask any more questions. I hope your Excellency will fully cooperate with us in the next operation. After all, this matter is very important to you and me!

Ming Feng turned to leave after giving Luo Fei this warning, but his expression was dark and uncertain.

As time passed, more and more trial-takers began to gather in the core area. Ming Feng and the rest also began to put on disguises, mixing in with the natives.

The hall was packed with people. The trial-takers were divided into groups, all looking at the passage leading to the cornerstone platform with greed in their eyes. However, no one dared to approach the passage.

The corpses on the ground and the metal puppets that were constantly moving around had already proven how dangerous this place was. Rashly approaching would only result in death.

“Have you heard? there are countless treasures hidden behind this passage!”

that’s right. It’s said that the treasure room is right there. If we find it, we’ll be rich!

“It won’t be that easy. Any place that stores treasures will be heavily guarded. You should first think about how to deal with those metal puppets!”

“Can’t we just attack together? with so many of us, can’t we handle a few metal puppets?”

The cultivators discussed animatedly. Although they were all coveting the legendary treasure, no one took the initiative to probe.

At this moment, there was a sudden change. A series of hurried footsteps could be heard, followed by someone shouting, ” “Look, someone is running out of the tunnel!”

The conversing trial-takers were stunned for a moment. Then, they vaguely saw a figure suddenly appear. As he ran out, he was stopped by the group of trial-takers at the front.

As this group of trial-takers had almost blocked the entire passageway, the people behind him did not see if he had run out from the deepest part of the passageway. However, what happened next made the natives ‘breathing Quicken.

In the tussle, the bloodied trial-taker was pushed to the ground with a dagger stuck in his body. His bag was also thrown in front of the trial-taker not far away.

With a series of clanking sounds, the items in the bag fell out, and the colorful treasure light made the trial-takers ‘hearts beat wildly.

All of these treasures were of high quality, and any one of them was worth more than the total value of all the treasures collected by the other cultivators!

this is my treasure. I took it from the treasure room. None of you are to take it!

The trial-taker who ran out of the tunnel roared and spat out a mouthful of blood. He fell limply to the ground and seemed to have died.

The cultivators who were dazzled by the treasures were already red-eyed, and they did not care who these treasures belonged to before. Instead, they continued to fight for them, and the sound of fighting rang through the entire Hall.

Many of the trial-takers who had managed to snatch the treasures were struck down by attacks from all directions before they could even see what was happening. Then, the treasures fell into the hands of others.

“Damn it, stop fighting. There are plenty of treasures in the passage!”

that’s right. As long as we get rid of those metal puppets, those treasures will all be ours!

quickly remove those metal doors and use them as shields. We’ll move forward step by step!

the opportunity to make a fortune is right in front of you. Brothers, charge!

Driven by their greed and the motivation of those with ulterior motives, the trial-takers rushed toward the metal puppets and blocked the passage in an instant.

As he watched the trial-takers rapidly advance into the tunnel, a smug look appeared on Ming Feng's face. He indicated for the cultivators beside him to follow closely.

If anyone had noticed this, they would have realized that they were the ones who had deliberately blocked the passage, discovered the trial-takers who had run out of the passage, and encouraged the natives to attack the metal puppets.

Even the owner of the treasure who had died quickly took off his clothes and hid among the cultivators in the building.

From the beginning to the end, this was a trap designed by Ming Feng. Driven by benefits, the natives took the bait.

...

Next, as long as he seized the opportunity to get the foundation stone of the tower, he would be the biggest winner of this trial!

The Mantis stalks the cicada, unaware of the Oriole behind. He was the Oriole hiding behind the scenes!

The complacent Ming Feng did not realize that just as they entered the tunnel, a human figure walked out. It was Tang Zhen, whom he had not seen all this while.

Tang Zhen slowly walked to the front of the tunnel. He stepped on the bloody remains on the ground and followed step by step.

It was still too early to say who the Oriole was!

Chapter 1513 The situation isn't right, we've been scammed

Meeting on a narrow path, using their bodies to fight against the metal puppets, this made the battle scene comparable to the tragic purgatory!

There were broken bodies everywhere, scattered metal parts, and layers of sticky material covering the ground. When they passed by, they could hear all kinds of strange sounds of flesh and blood, which made their scalps numb.

The objects inside the swirling Sea Castle were clearly energy-formed, but the scene they displayed was exactly the same as the real world, making it impossible for people to realize that they were not real entities!

Most of the natives thought that they were experiencing the real world, and only the cultivators of loucheng city could realize that they were in a special illusory world, so they were able to remain calm and indifferent as if they were the only ones awake.

At this moment, the metal puppets responsible for guarding the place had been dismantled into a mess. The natives who had suffered heavy losses were swarming into the deepest part of the place in an attempt to snatch the treasure that did not exist.

The reason why lies were called lies was that they couldn't stand the test of reality. Soon, the natives used their blood to verify this theory.

When they fought all the way and excitedly reached the deepest part of the passage, they didn't see a mountain of treasures. They only saw a Hall that was like a starry sky and a huge stone tablet erected in front of it!

This huge stone tablet was the foundation stone platform. However, it had stopped working long ago, and the natives had no idea what it was.

Being in it made one feel as if they were walking in the vast starry sky, and they felt so small and insignificant.

Although this scene was shocking, the natives who were eager for treasure didn't have the mood to care. They were only stunned for a moment, and then began to search around, trying to find the treasure they had been dreaming of.

Xunmi's figure could be seen rummaging everywhere, not letting go of any corner, wishing they could dig three feet into the ground.

As time slowly passed, the enthusiasm of the natives who were full of anticipation became colder and colder. They were furious to find that there was nothing here!

Apart from the huge stone tablet and the stars above their heads, the so-called treasure was nowhere to be seen. Had he not found it, or had they all been deceived and there was no treasure here?

The greater the expectations, the greater the disappointment. The cruelty of the trial put a lot of psychological pressure on the people, and the desire for treasures made them a little neurotic. After putting in effort but not getting any returns, these natives began to become restless.

"Damn it, who said there's a treasure here?"

my senior and junior brothers were all killed by the metal puppets, but we haven't found anything yet. They died so unjustly!

"Who is lying to me? I'm going to kill him!"

The anger was like a contagious disease, spreading among the crowd, and it seemed to be getting more and more intense.

All of a sudden, someone brandished a saber and slashed at the surrounding crowd while shouting, "it's you! You said there's treasure here! I'm going to kill you!"

Then, similar voices rang out from all directions, all of them berating others for lying to them, but in the end, they had not gained anything at all and had sacrificed their lives for nothing.

At the same time as the curses and accusations, the sound of swords slashing and screams followed, causing chaos to quickly spread throughout the entire Hall.

The people who had been fighting against the metal puppets together just now were now pointing their swords at each other. Under the dim Starlight, they were fighting, and people kept falling to the ground with wails.

Even if some people felt that something was wrong, they couldn't stop this chaotic situation. Some people made a prompt decision to escape, but they didn't expect that there would be people blocking them near the exit. Every time a native tried to escape, they would be chopped to death by a chaotic knife that came from the dark!

The chaotic killing did not last for long. When the Furious people finally regained their senses and realized that the situation was not right, the ground was already covered with groaning injured people and dead bodies.

something's wrong, something's wrong. We've all been set up!

Finally, someone shouted loudly. This made the hearts of the puzzled natives thump as they realized that something was amiss.

They cursed loudly, then subconsciously recalled what had just happened. They then looked at Ming Feng and the others who were standing at the door!

"It's you guys. That's right, it's you guys who did this!"

damn it, I knew something was wrong. They were the ones who blocked the passage and shouted that someone was running out of the passage, but I didn't see it at all!

I didn't see it either. I only heard it from them!

there's no need to think about it. This is all a show they put on. We've all been deceived!

After sorting out the context of the whole matter, how could the Aboriginals not realize that they had been deceived? while they secretly hated themselves for being blinded by greed, at the same time, infinite killing intent rose in their hearts. They could not wait to cut Ming Feng and the others into a thousand pieces!

"Kill them!"

that's right. Let's take action together and avenge our brothers who died unjustly!

"A blood debt must be paid with blood!"

The Aboriginals were in a frenzy as they brandished their weapons and charged at Ming Feng and the others. Because of the anger in their hearts, they were once again United.

Who would have thought that just as they launched their attack, the team would suddenly question in horror, and the sounds of fighting could be heard again.

Their original companions suddenly drew their swords and attacked the crowd. As the natives were not prepared in advance, in just a few breaths, blank areas appeared in the crowd, filled with natives with disbelief.

The sudden turn of events threw the natives into chaos once again. Ming Feng and the rest, who had originally sealed the entrance, also made their move at the same time. Their swords were like dragons, and they raised clouds of blood among the natives.

At this moment, all the hidden cultivators of Loucheng city attacked. Although they did not have the advantage in numbers, their killing techniques were at the peak. The natives had just experienced a battle, and now that something had happened, no matter how many people they had, it was useless!

Seeing that they would definitely be annihilated if this continued, the natives gritted their teeth and charged towards the exit.

A group of crazy people fought with their lives, and even the cultivators of Lou Cheng did not dare to face them head-on. This allowed the seal on the exit to be broken quickly, and dozens of natives poured into the passage.

Just as Ming Feng was thinking about whether to send someone to intercept them, a loud bang suddenly came from the tunnel. Then, there was a flash of fire and several incomplete corpses flew into the hall.

This sudden scene shocked the cultivators in Loucheng. They subconsciously looked at the entrance of the passage, their eyes full of vigilance.

Takashi Takashi Takashi Takashi Takashi ”

The sound of slow footsteps came from the passage, each step gripping their heartstrings, making everyone nervous.

The cultivators of Lou Cheng didn't know who the other party was, but they knew that he came at the right time when both sides were exhausted but evenly matched. He also had a weapon that looked like a bomb in his hand.

For those who had their cultivation sealed, it was extremely dangerous for them to be in such an enclosed space. A weapon like a bomb that could attack indiscriminately over a large area was extremely dangerous. They would be hit if they were not careful!

The unexpected appearance of this disrupter had changed the situation. He alone was enough to affect the outcome of the battle.

Ming Feng's brows were tightly knitted together, and his eyes flickered. Suddenly, he thought of something and turned to look at Luo Fei, who was holding a long sword.

However, Sophie was looking at the passage at the moment. She looked at the figure that slowly appeared and smiled strangely.

“Looking at the time, you should be here!”

Chapter 1514 The cornerstone in hand _

The killing stopped temporarily because of a person's appearance. The air seemed to become heavy, and heavy breathing could be heard faintly.

In the dim light, a figure appeared in front of everyone and then stood there quietly.

No one could see his face clearly, but they understood why he was standing there. It was obvious that he wanted to seal the entire entrance and not let anyone escape!

Ming Feng's eyes flickered and he suddenly laughed. "Sir Tang Zhen, I didn't expect that we would meet here!"

The figure in front of him glanced at him. After a few seconds of silence, he said softly, "Ming Feng?"

"Yes, it's me." Ming Feng nodded.

Tang Zhen nodded and remained silent.

Seeing that Tang Zhen had admitted his identity, a hint of gloominess flashed in Ming Feng's eyes. He knew what Tang Zhen wanted to do. It was also because of this that he felt unusually angry in his heart.

Even before he had arrived at the core area, he had already been making plans and making use of the greed of the natives to complete his plan step by step.

However, just as he was about to achieve his goal, Tang Zhen had suddenly appeared and interfered, attempting to snatch the fruits of victory that originally belonged to him.

At this moment, Ming Feng was extremely furious. He really wanted to kill Tang Zhen right now. However, he had sealed his cultivation and Tang Zhen was in possession of a bomb. It would not be easy to do so.

If he wasn't careful, he would be blown to pieces as well!

"You want the foundation stone? sure, but we'll have to see if you have the ability!"

Ming Feng's words were equivalent to telling Tang Zhen not to be overconfident that he had a way to deal with him.

He must not weaken his aura when facing a competitor like Tang Zhen.

Tang Zhen ignored Ming Feng. He merely chuckled and casually threw out a black object that flickered with fire.

There was only one tower Foundation stone. If Tang Zhen wanted to obtain it, he had to first get rid of the other competitors. There was no second path for him to choose!

"Damn it!"

Ming Feng was so scared that he hurriedly dodged. He did not expect that Tang Zhen would not give him the chance to negotiate and directly attack.

The bomb suddenly exploded in the process of rolling, and the violent shock wave mixed with gravel and metal flew wantonly in the crowd. The trial-takers fell to the ground like bundles of wheat blown by the wind.

The second bomb flew over, then the third, and the fourth.

Only the heavens knew exactly how many bombs Tang Zhen had created during this period of time. As he continued to throw them, the intense explosive sounds continued to ring out. The waves of fire and thick smoke seemed to have engulfed all the moving figures.

Tang Zhen, who had launched the attack, was like a machine. He made accurate judgments and sealed off any possible escape routes.

The current attack had long been in the plan and had even been deduced several times, so there were no mistakes.

When he arrived, he had already discovered the traces of the explosion, which proved that explosives could be used in the spiral Sea Castle.

Actually, this wasn't strange at all. Although the cultivation base of the residents of the swirling Sea Pavilion was sealed and the teleportation between the floating lands was restricted, it was no different from the real world in other aspects.

This situation was very similar to the dream world. What could be done in the outside world could also be done here.

Therefore, after discovering this pattern, Tang Zhen began to deliberately collect materials that could be used to make bombs. Since he could make a simple aircraft's propeller, he could naturally make the bomb he wanted.

There were many things that could be used, and with the help of the runic magic circle, it was not difficult to achieve this.

Tang Zhen wasn't the only one who thought of this. However, these trial-takers were either anxious to snatch the treasures or to head to the core region as soon as possible. Very few people would calm down and create the weapons they needed.

Looking at the weapons they used, most of them were broken weapons picked up from the island. There were also some self-made powerful weapons, but the number was very small.

Moreover, even if there were people who did this, they might not be able to persist until this point. Or perhaps, their knowledge reserves might surpass Tang Zhen's and create a more powerful weapon.

No matter what the reason was, Tang Zhen was the last one to stand here. He was the winner who could suppress a group of people with his bomb!

Ming Feng dodged the attacks of the bombs continuously, and his face became gloomier.

Tang Zhen's angle of throwing the bomb was too tricky, and it seemed to have sealed off all the possible hiding spots. Although Ming Feng wasn't killed, his entire body was covered in wounds that were dripping with blood.

Under normal circumstances, this kind of attack wouldn't be able to harm a single hair on Ming Feng's body. Even if he was injured, he would be able to heal in an instant. But now, these injuries had become a talisman that pressed for his life.

He didn't know how long he could hold on, but he was certain that Tang Zhen's bombs were limited. The moment the bombing stopped would be the time for him to counterattack.

The Aboriginals suffered heavy casualties, but not many cultivators in loucheng died. They were also holding a fire in their hearts and were ready to kill Tang Zhen to vent their anger!

Other than this, they also felt a trace of helplessness in their hearts. This was because if this situation continued to develop, Tang Zhen would undoubtedly be the final Victor. On the other hand, they would only be the background of this trial.

"BOOM!"

Another loud noise was heard. Then, the continuous explosions suddenly stopped. In the flying dust, figures jumped up from the ground and went straight to Tang Zhen's position.

Who would have expected that at this moment, a stream of air would suddenly rise up behind Tang Zhen. The simple flying device that was used to fly over the floating land earlier had appeared once again, pushing him straight toward the starry sky above his head.

"Dammit, stop him!"

Ming Feng, who had been calm all this while, suddenly roared loudly. He picked up a long spear from the ground and threw it into the air. Immediately after, he found a bow and arrows on the ground and shot them at Tang Zhen.

Rather than saying that this was an attack, it was better to say that it was to vent the anger in his heart.

The reason why he was so flustered and exasperated was that the cornerstone of the tower was floating in the starry sky above his head, merging into one with the flickering stars. It was impossible to discover it without careful observation.

The natives didn't know the secret of the foundation stone, and they couldn't check this starry sky in a short time, so they ignored the most valuable thing here.

Of course, to the Aboriginals, the foundation stones of loucheng weren't of much use. Only cultivators of loucheng would see them as a target that they had to snatch.

Ming Feng had long known the location of the tower's foundation stone. He was prepared to wait until all the problems were solved before thinking of a way to get it down. However, Tang Zhen's actions had disrupted his entire plan.

The other cultivators of the building also attacked one after another. The air was filled with dancing swords as they tried to strike Tang Zhen down from the sky.

However, all of his attacks were in vain. Tang Zhen had already exceeded his attack range and had directly flown to the highest point in the starry sky.

When he stopped, he had already landed on a transparent platform. A faint light flashed from the platform, allowing the cultivators below to see Tang Zhen's every move.

He turned around and smiled at the people below. Then, he reached out to the cornerstone floating on the platform and gently clenched it.

The entire Hall seemed to shake for a moment, and then everything became different, which meant that the collapse had begun.

...

“Bastard, he got lucky again!”

Ming Feng was so angry that his body was trembling, but he was completely helpless. The moment Tang Zhen obtained the tower’s foundation stone, it meant that the trial had ended.

The final winner was still Tang Zhen, and their previous efforts were all in vain. Even if they had collected a lot of valuable items, they were still not worth mentioning compared to the building foundation stone.

Coldly looking at Tang Zhen, Ming Feng chuckled a few seconds later. When Tang Zhen looked at him, he slowly turned around. There was no meaning in saying anything now. If they had the chance to meet again, Ming Feng vowed to make Tang Zhen pay the price!

The other cultivators in Loucheng city had different expressions. Compared to Ming Feng’s hatred, they were more helpless and unwilling.

When the starry sky above their heads started to collapse and the entire world started to collapse, they also turned into streams of light and dissipated one after another. They were sent back to the world of Loucheng by a special force.

Ten minutes later, the tower in the foreign land completely collapsed, disappearing from the world forever.

Chapter 1515 The black hole prison

His soul consciousness seemed to have been crushed and flattened before it was forcefully glued back together. Then, his memories surged out like a tide.

Tang Zhen discovered that he was in a huge space. The area of the space was very large and one could not see the boundary. There seemed to be no one else other than him.

He didn’t know where he was, but he didn’t feel any danger.

He checked the condition of his body and found that his cultivation had recovered, and he was now a spiritual Emperor.

This way, his main body and clone would both have the cultivation of a spirit Emperor. To the Holy Dragon City, this was no doubt another layer of protection.

Of course, compared to those super battlefields, this kind of strength was still nothing. He still needed to continue to work hard.

The ball of light was still in his mind, but the items he had obtained from the swirling Sea Tower had long disappeared. They must have been taken away by the foundation stone platform of the fifth battle area, leaving only some scattered items that belonged to him.

The results of the trial had already come out. Without any surprises, Tang Zhen once again occupied the top spot, leaving the other participants far behind.

That guy called Ming Feng's results were really not worth mentioning. He wondered what was going on.

How would Tang Zhen know that in order to make his act more realistic and to lure the natives, Ming Feng had taken the initiative to take out the precious treasures he had collected along the way.

The baiting plan was indeed successful, and the natives fell for it as expected. However, Ming Feng did not get the foundation stone of the tower. Instead, he was intercepted by Tang Zhen.

All of this was because of Tang Zhen. Ming Feng must hate him to the core!

Tang Zhen shook his head when he thought of this. An Army of thousands would cross a single-log bridge. This kind of trial itself was based on one's ability to speak. If he had not achieved victory by surprise, then the one who would be depressed now would be him.

While the cornerstone platform was calculating the results, it also gave a hint for the next trial mission. Compared to the previous two missions, this time, the trial-takers were clearly given some time to prepare.

[mission requirement: sneak into the black hole prison and seize the items on the list. Each item will give you a corresponding amount of points.]

[Hint 1: this mission requires physical teleportation. Your cultivation will not be sealed, but you will need to resist the special Defense Force field of the black hole prison. It is very likely to lead to your death. Trial-taker, please be careful!]

[Hint 2: the foundation stone platform will not be available in the black hole prison. Please prepare the required items in advance. The weight can not exceed 10 kilograms and place them inside the light ball!]

[Hint 3: the mission will begin in 12 hours. If necessary, the participant can return to their respective loucheng.]

When Tang Zhen saw this, he frowned slightly. Soon after, he chose to return to Holy Dragon City. Soon after, he saw a transmission channel appear in front of him.

Tang Zhen stepped into it. When the scene in front of him no longer changed, he had already returned to Holy Dragon City.

There wasn't much time left for him. He had to make preparations immediately. Therefore, Tang Zhen immediately went to the secret chamber after he returned and took some things from his main body.

Because the trial process was too dangerous, the mobile phone was always in the hands of the original body to prevent it from being lost in an accident.

This time, Tang Zhen still couldn't bring his phone with him, but he could bring some application cards. Compared to other items, the card not only had powerful functions, but it was also very light, which was especially suitable for this operation.

Because the clone and the main body were the same person, when Tang Zhen arrived at the secret room, the main body was already prepared. There were a total of 1000 application cards, and their weight was half of the weight of a portable item.

To the outside world, those cards were priceless, and many of them had never been displayed to the public.

There was no need to talk too much. The thoughts and memories of the main body and clone had already been exchanged. Then, the main body continued to cultivate while Tang Zhen headed to the core area of Holy Dragon City to make the next step of preparations.

Since he was going in with his main body, he had to find a way to improve his own defense. At the same time, he had to find a way to get some more powerful weapons so that he wouldn't be helpless when he encountered danger.

They arrived at their destination without any obstructions. Tang Zhen immediately gathered the heads of various organizations and told them his request. He hoped that it would be completed within ten hours.

It was impossible to develop a new product in such a short period of time. However, it was entirely possible to modify the foundation of the original item.

After the order was given, the entire city immediately began to operate at high speed. Plans were formulated one by one, and then they quickly began to implement them.

Warframes, weapons, potions, and auxiliary equipment.

One by one, the items were sent to Tang Zhen and they were being tested and modified on the spot. In the spacious hall, thousands of people were circling around him.

Time slowly passed by. The items that Tang Zhen needed were finally all prepared. There was less than an hour left.

At this moment, Tang Zhen's entire body was covered in a cloak. Outsiders were unable to see what he was wearing. Even if he lifted the cloak, they would not be able to see anything. This was because many items had already been camouflaged.

"Everyone, it's been hard on you. I'll be leaving first!"

Tang Zhen cupped his hands together and bowed to the busy people. After which, he opened the spatial tunnel.

"I wish city Lord a Swift victory!"

Tang Zhen stepped into the passage and disappeared in an instant amidst the blessings of the thousands of residents in the city.

.....

When Tang Zhen reappeared, it was still the same enormous space. However, the Halo-like mist around him had already dissipated.

He could see even further. Then, he saw many figures standing nearby. They were all cultivators from Loucheng City who had participated in the trial.

Hundreds of people with different appearances, but all of them were spiritual emperors, were gathered in one place. It was likely that many people would never have the chance to see this scene in their entire lives. Just the terrifying aura alone was enough to make people tremble in fear.

However, no one cared about this at the moment. Instead, they all turned their eyes to a giant warship in the center.

The appearance of this flying device was somewhat similar to a meteorite. It was several kilometers long, and its surface seemed to have been carefully polished. It was actually shining with a warm luster.

Tang Zhen revealed a trace of surprise. He did not expect that the mission this time around would require the use of a battleship. Could it be that the spatial tunnel was unable to connect to the black hole prison? Hence, they had to use this method of forcing their way in?

The more he thought about it, the more he felt that this possibility was extremely high. A trace of bad premonition faintly appeared in Tang Zhen's heart. If they had to go through so much trouble just to enter, how would they leave after the mission was completed?

However, now was obviously not the time to think about these problems, because all the cultivators had heard the prompt for them to board the warship quickly.

One figure after another quickly approached the warship and boarded from the entrance that was more than ten meters high. Then, they followed the instructions and headed to a Hall inside.

After waiting for more than ten minutes, Tang Zhen felt that the battleship had already started. Then, a notification sounded in his ear again, telling the cultivators to stand in a circle of light.

Tang Zhen followed the instructions and stood inside. After which, he felt his body being fixed by an invisible force field. Soon after, clusters of a sticky-like substance appeared and wrapped around his body.

Tang Zhen did not resist. Instead, he allowed that sticky thing to continuously wrap around him. The mental energy that was originally spreading outward was also gradually cut off.

He did not expect that this material actually had the effect of isolating spiritual power. As such, Tang Zhen was unable to sense the outside world and the outside world was similarly unable to discover the situation inside.

Unknowingly, Tang Zhen's entire body was covered by this substance. He fell into a World of Darkness and was completely unable to sense any information from the outside world. It was as if he had fallen into a state of suspended animation.

After a few minutes, all the cultivators had turned into "rocks," and the sticky liquid became abnormally hard in a short time.

...

After an unknown period of time, the warship began to shake violently, as if it was going through some kind of Warp Speed, and the value was very high.

When the shaking stopped, the battleship appeared in a space where no stars could be seen, and there was only a huge vortex below.

we've arrived at our destination. Beginning delivery!

A sound came from the empty battleship. Then, the 'stones' wrapped around Lou Cheng's cultivators floated up at the same time and were ejected from the battleship through an exit, flying toward the black hole.

delivery complete. Activate stealth mode!

Another command was issued, and the huge warship trembled for a moment before disappearing in an instant!

Chapter 1516 A difficult landing (1)

The camouflaged "stones" flew toward the unknown black hole-like area, like wandering celestial bodies from the starry sky. There was nothing unusual about them from the surface.

In fact, other than the stones with "stuffing" like Tang Zhen's group, there were quite a number of stones of different sizes nearby. All of them were flying toward that unknown region.

In the process of advancing, it was inevitable that there would be collisions, and strong tremors would come from time to time.

At this time, these powerful spiritual emperors were silently enduring. They knew that this disguise must be very important, so they didn't have any reaction even if they were hit repeatedly.

After an unknown period of time, the speed of their advance suddenly increased. Then, an indescribable force suddenly appeared, penetrating the outer shell of the rock and acting on the cultivators.

The items they were carrying began to show signs of weathering. As time passed, the signs of weathering became more and more obvious, and the items that were not strong enough had even broken.

Tang Zhen, who was in the darkness, suddenly opened his eyes. His face revealed a trace of shock.

this is the Tao Wu's corrosive power of time that belongs to the laws of time. No wonder, no wonder!

Tang Zhen secretly sighed in his heart. No wonder the cornerstone platform required items to be placed into the ball of light and limited the weight. It was because of the existence of a terrifying protective force.

If they were placed outside, it wouldn't take long for these items to be destroyed by the power of corrosion. However, the orbs were bound to the soul, so as long as the soul wasn't destroyed, the items in the orbs could be preserved.

Furthermore, the number of items had to be limited. Otherwise, the more items there were, the more soul power would be consumed. It should be known that the corrosive power of time was not only effective against physical bodies, but also against souls!

He sighed in his heart. It seemed that more than half of the preparations he had made earlier would not be used.

While Tang Zhen was thinking, that terrifying corrosive power was still invading from every single pore. From the items he carried to the physical body and soul of the cultivators in the city, nothing was missed.

The equipment he carried became more and more worn-out, the wrinkles on his body increased, and even his spirit began to gradually weaken.

In this situation, as long as he moved his body, he could hear the sound of objects shattering. Even his body showed signs of breaking at any time.

In order to resist this terrible corrosion, the cultivators in Lou Cheng had to use their mental power to resist and slow down the corrosion as much as possible.

In this non-stop confrontation, the mental strength of the Lou Cheng cultivators was rapidly consumed. If they could not pass through this protective barrier before their mental strength dried up, then what awaited them would be death!

Everyone, including Tang Zhen, was resisting with all their might. They did not dare to be distracted in the slightest. At the same time, they were also praying unceasingly to quickly break through this terrifying energy field.

At this moment, the cultivators of Lou Cheng finally realized why they had to use their main bodies and not seal their cultivation. If they used Soul teleportation, they would be courting death!

However, even with his physical body and profound cultivation to resist it, it was still extremely dangerous. At most, he could only delay for a while.

Tang Zhen's current condition was extremely terrible. Almost all of the items on his body had been destroyed and his body was as stiff as a rock. Under the huge consumption of mental energy, his mental energy had already fallen below King level and was still rapidly decreasing.

The rate of loss of spiritual power was getting faster and faster. If an entire ocean had dried up, what was a small lake to him?

He was extremely anxious now, but there was nothing he could do. He could only continue to struggle.

Just as the cultivators were about to despair, the terrifying power of time suddenly disappeared. The cultivators who had been suppressed for a long time almost roared out in excitement.

damn it! If it were a cultivator of laws who took on this kind of mission, he would have been forced to his death!

Tang Zhen also heaved a sigh of relief. He was just about to check his body when a cold aura that seeped deep into his bones suddenly appeared, causing his body to suddenly freeze. Subsequently, a bitter smile appeared on his face.

I knew it wouldn't be that simple. Looks like I'll have to continue enduring!

As soon as his voice fell, the surface of Tang Zhen's body was covered with frost. His entire body was also wrapped by a terrifying cold energy.

The black hole prison's second defensive barrier appeared. It was similar to the absolute zero defensive barrier, and it could almost instantly kill the physical body of all invading creatures!

All the cultivators stopped moving. Their bodies were like ice, and only the power in the depths of their souls remained, ready to deal with any accidents that might happen.

Under normal circumstances, the outer shell of Lou Cheng's body would immediately shatter into countless pieces and turn into a pile of useless garbage.

However, this was not the case in reality. He did not know what material the outer shell was made of, but it still maintained its toughness in such an extreme environment. Even after the collision, it did not crack.

However, the vibration was also very harmful. Many cultivators in the building had cracks on their bodies and some were even completely broken!

Fortunately, the depth of the second defensive circle was not very large. After about ten minutes, Tang Zhen and the rest had already rushed out.

At this moment, they had entered a space that was similar to the atmosphere. The violent friction caused the temperature of the stone to quickly return to normal. As the frost dissipated, the cultivators in Lou Cheng gradually regained control of their bodies.

If it was a normal life form, it would have been crippled by now. However, a spirit Emperor's body had already been energized, so it could withstand this terrible destruction.

Tang Zhen quietly sighed in relief. From the stone shell that was continuously heating up, he knew that they should be able to land very soon.

However, this was just a guess. Who knew what was waiting for them in this strange black hole prison? it was too early to be happy.

Sure enough, as soon as this thought arose, the stones from the void fell into the lava-like object one after another, and the terrifying temperature began to spread.

Tang Zhen sighed in relief. He was well-versed in fire-type laws. This kind of high temperature was unable to harm him at all.

But the problem was that the black hole prison's defense was so simple, could it not guard against intruders who were not afraid of the high temperature?

Thinking of this, his heart was in his mouth again. At this moment, his cultivation had fallen to the Lord level, and his body was covered in internal injuries. He really couldn't bear too many twists and turns.

"Pfft!"

After waiting in fear for a while, the danger that he had imagined did not appear. The stone that wrapped him with a glazed mucus suddenly flew out of the sea of lava, dragging a long tail, and fell into the cold heavenly River that was suspended in the air below!

As soon as it entered the water, the glass-like substance on the surface quickly condensed. The long tail was the first to cool down, followed by the stone that wrapped around Tang Zhen.

Although he could not see the situation outside, Tang Zhen was able to make a rough judgment. However, it was precisely because of this that his expression suddenly changed greatly!

If his guess was correct, he was in a state similar to Rupert's tear. Once his tail was damaged, his head would also be crushed into dust!

Even with the stone shell as protection, it might not guarantee that it would not be damaged. To solve this crisis, they had to block and resist the power of the object itself.

When he thought of this, Tang Zhen immediately took out a protective card and placed it in his hand, ready to tear it at any time.

As they slowly descended in the heavenly River, the cultivators finally emerged from the bottom of the river. They then saw many crystalline objects with long, curved tails falling toward the land like meteors.

Chapter 1517 Ancient ship desert bandits (1)

Tang Zhen's heart was suspended as he waited for the final moment to erupt.

There was no doubt about the hardness of Rupert's tear, but its fragility was also shocking. Tang Zhen was unable to destroy it from the inside and could only wait for it to break free from the shackles at the moment of collapse.

Wait, wait again, Yingluo

Finally, he waited until the last moment. A trace of a sense of danger assailed his heart. Tang Zhen felt his scalp turn numb as he unhesitatingly tore apart the protective card.

An energy shield wrapped around him. At the same time, he heard a cracking sound. Originally, because the rock was sealed, there was no light inside. But at this moment, it felt like the whole world was occupied by light!

The long tail of the meteor touched something and broke into countless fragments in a very short time. Tang Zhen, who was wrapped inside, was blown out by the huge force and heavily hit a pile of sharp sand like a stone that was thrown out.

Due to the protection of the protective shield, Tang Zhen did not suffer too much damage. However, he was still in a daze from the fall.

"PEI! PEI! PEI!"

Tang Zhen spat out a mouthful of fresh blood. He swiftly observed his surroundings, only to discover that he was in a strange desert with no end in sight.

The sky above them was covered by dark clouds, and the people on the ground could not see the river and lava floating in the sky. Perhaps they did not even know about their existence.

The ground was covered with glass-like shards. They were small and sharp, reflecting a strange luster under the dim light. After a long time, it would hurt people's eyes.

There were also some strange things buried in the sand. They looked like some animal's bone armor or the wreckage of some battleship.

Apart from the jagged bones, there was nothing else inside. They were scattered like broken houses and withered trees, appearing and disappearing in the vast sea of sand.

After looking around, Tang Zhen didn't find the figures of the other cultivators in the city. They had probably been completely separated during the fall.

This was not a good thing. At this moment, they had suffered great losses and needed to rest for a period of time to recover. If they encountered an enemy at this moment, they would probably end up in a very miserable state.

To be able to send hundreds of spirit emperors to carry out a mission, it meant that the black hole prison must be filled with danger!

After quickly checking his equipment, Tang Zhen discovered that the degree of damage to his armor had already reached 90%. Other than barely being able to provide protection, all of its original combat functions were unable to be used.

It could be said that other than the items in the orbs, the items he carried with him had all been destroyed!

He quickly buried all the damaged parts. After which, Tang Zhen drank a bottle of healing medicine and simply treated his wound.

After doing all this, he took out the purple electric short sword and a powerful gunpowder pistol for long-range attacks from the ball of light and began to run to the highest position in the vicinity.

They didn't use weapons like electromagnetic guns because they were too delicate and couldn't be used normally in some special environments. They could also be easily detected by some special equipment.

Of course, other than this type of gunpowder weapon, Tang Zhen's storage card also contained many high-tech weapons. This was also one of his advantages.

Ordinary storage equipment couldn't store light orbs, but storage cards could. Tang Zhen could be considered to have taken advantage of a loophole in the foundation stone platform.

However, in order to prevent any accidents from happening, Tang Zhen did not dare to bring too much with him. He was afraid that an accident would occur during the landing process. However, from the looks of it now, he was a little too cautious.

No matter what, his current supplies were sufficient, and there was no need to bring more.

Not long after, Tang Zhen had already arrived at the highest point of the sand dune. After which, he carefully hid his body and carefully observed his surroundings.

The surroundings were completely silent. It was as though this place was a dead land. However, Tang Zhen's sharp senses could sense a sound being emitted from behind a sand dune. It seemed like some kind of transportation tool was rapidly approaching.

Without any hesitation, Tang Zhen quickly dug a hole in the sharp sand and buried himself in it.

After completely burying himself, Tang Zhen took out a small Periscope with invisibility function and looked around from the sand.

He didn't dare to use his spiritual power to investigate, in case the enemies here discovered his existence.

The shaking sound grew louder and louder. Soon after, several vehicles that looked like beach cars appeared. They galloped rapidly across the sand dunes and headed straight for the place where Tang Zhen had just fallen.

There was a group of ferocious-looking guys in the car, waving strange weapons in their hands and constantly letting out strange roars.

One of the cars just happened to be parked at the highest point. It was less than ten meters away from Tang Zhen. Four natives jumped down and seemed to be preparing to use the terrain advantage here to observe and be on guard.

After tearing another [mysterious language translator] card, Tang Zhen felt a slight pain in his head. Soon after, he understood what these guys were shouting about.

"Hurry up, don't let the prey escape!"

Lord Gurgan has already said that each of these fallen foreign creatures is worth ten thousand energy coins. Even their corpses are worth a thousand energy coins!

"Haha, I just saw hundreds of meteors falling. If they are all foreign creatures, we will be rich!"

the most important thing is that once we capture these foreign creatures, the reputation of the ancient warship bandits will become more and more well-known. In the future, there may be more important people who will ask us to do missions!

The voices of the conversation entered Tang Zhen's ears intermittently. Soon after, a furious roar was heard, shouting that the prey had escaped and that they should quickly search the surroundings and not let it go.

The bandits on the ancient warship did not leave. Instead, they stayed and looked around because they had been ordered to stay on the high ground.

When the other vehicles gradually disappeared into the distance, Tang Zhen jumped out of the sand pit and raised his gun to shoot at the few bandits. After a few inaudible gunshots, three of the bandits fell into a pool of blood while the other one was shot in the arm and his weapon fell to the ground.

Like a Falcon hunting for its prey, Tang Zhen approached the injured Bandit with lightning speed and placed the purple lightning short sword on his neck.

There was a trace of fear on the Bandit's face, but his eyes were flashing with a fierce light. He stared at Tang Zhen fiercely and sneered.

"Answer my question honestly, and I'll spare your life!"

Upon hearing Tang Zhen's words, the ridicule in the Bandit's eyes became even more intense. He coldly said, you've already killed three, so it's not like you're short of me. So, even if I tell you, you'll still kill me!

"Even if you die, I can let you die a quick death!"

Tang Zhen's reply made the sneer on the Bandit's face become even more intense. The killing intent in his eyes also became more intense. This scene made Tang Zhen a little at a loss. He didn't expect the natives here to be so fierce.

"Since you're not cooperating, enjoy the torture!"

A cold glint flashed in Tang Zhen's eyes. His finger grabbed onto the head of the bandit and pressed down hard.

That fellow's mouth was pressed down by Tang Zhen and he could only let out a suppressed scream. His eyes gradually rolled up due to the pain and his body continued to twist and shake.

"Let me go, Yingluo, I'm begging Yingluo!"

Tang Zhen completely ignored him. There was no reason for him to stop since he had already attacked. This was because this fellow would not be able to survive.

Pieces of memory fragments were collected by Tang Zhen. In the process of searching in-depth, the body of the ancient ship desert bandit twitched more and more.

A minute later, Tang Zhen released his bloodied palm. The Bandit's body was already twitching from the pain, and even his height had shrunk by a lot.

...

"You brought this upon yourself, idiot!"

After tidying up the memories in his mind, Tang Zhen knew that this place was called the fallen star desert. It was one of the dangerous places on the shattered continent. Over the years, there would be all sorts of things falling from the sky.

These guys were called the ancient ship Pirates. They were one of the bandit gangs here, and their lair was located inside a warship with a long history.

They made a living by searching for all kinds of resources in the fallen star desert. Of course, their main livelihood was still pillaging and acting as mercenaries. Every one of them had a lot of blood on their hands and had different wanted bounties on them.

The appearance of the cultivators in loucheng gave the bandits an opportunity to make a fortune. From time to time, precious ores would appear from the fallen items, which were snapped up by the rich and powerful.

If there were things like flesh and blood, they could be sold at a crazy price.

When they saw the cultivators of loucheng city falling from the sky, the bandits were overjoyed. For them, this was a great opportunity to make a fortune!

Chapter 1518 Pursuit in the sea of sand (1)

After obtaining the incomplete information, Tang Zhen sized up the vehicle that the ancient warship was driving and quickly sat in the driver's seat.

The car looked broken, but it was very fast. The specially made wheels could drive freely on the sharp sand without worrying about being cut at any moment and throwing the passengers out.

This was a very important point. It was important to know that even in the desert, one could still fall to their death, provided that the unlucky person hit a hard object or accidentally broke his neck.

After putting the spoils of war into the ball of light, Tang Zhen started the car and accelerated down the sand dune.

He had to leave this place as soon as possible. After all, this was a place where criminals ran rampant. Under the temptation of money, God knew how many criminals would rush in like flies that had smelled blood.

Once that happened, he would be in danger.

This car, which was obviously modified, made a lot of noise. Tang Zhen almost couldn't hear any other sounds during the driving process. His ears were also numb and itchy from the vibration.

After rushing past a sand dune, they were faced with a flat land.

Tang Zhen, who was supposed to be galloping unhindered, frowned. This was because two similar cars had appeared a few kilometers away from him and were rapidly driving toward him.

The ancient battleship bandits who had been chasing him came back, and the two sides met head-on!

The ancient ship bandits had already noticed the abnormality and were shouting in the car. At the same time, they raised their weapons and aimed at Tang Zhen.

"Whoosh!"

The corner of Tang Zhen's mouth was lifted into a cold smile when he heard the gunshot. He did not know what these fellows were thinking. They actually opened fire from such a distance?

Tang Zhen had observed the weapons used by the bandits on the ancient warship and confirmed that they were also a type of gunpowder weapon. The power was acceptable, but it was absolutely impossible to hit the target from such a long distance unless they were possessed by the gun God.

However, Tang Zhen still didn't dare to be careless. He continued to sprint toward his target and traveled far away in the blink of an eye.

The bandits on the ancient battleships chased after him in exasperation. They looked like they would not stop until they were dead. They were determined to catch up with Tang Zhen and capture him.

In the process of the chase, a group of ancient warship bandits was alarmed. When they saw Tang Zhen driving, they immediately jumped into the car excitedly and launched an attack.

The car was hit by stray bullets, and bombs were thrown from time to time. The sand brought up by the shockwave was no less powerful than bomb fragments.

Tang Zhen furrowed his brows. He raised his gun and aimed at the car that was constantly approaching. He pulled the trigger under the rain of bullets.

After the muffled gunshot, the driver's body tilted and he was thrown out of the car.

The three bandits in the car were shocked and fought to control the steering wheel. In the end, two of them were killed by Tang Zhen. The remaining Bandit simply jumped out of the car and rolled on the ground. His body was cut until it was bleeding.

This guy was quite fierce. He didn't care about the wounds on his body at all. He spat out blood as he shot at Tang Zhen. However, he was unexpectedly hit by a car that was driving from behind. He rolled and fell to the ground. Fresh blood kept gushing out like an open faucet.

He was lying there like a dead dog, and no one paid him any attention.

After getting rid of a car, Zhen Tang saw a building that looked like the wreckage of a building in front of him. He directly drove in.

There were hundreds of bandits on the ancient battleship. He did not want to play this game of "you chase me" anymore. It would be bad if he attracted more enemies.

As soon as the car stopped, Tang Zhen jumped up to a high place like a spirit ape. At the same time he hid himself, he took out a storage card from the ball of light and tore it open.

"Huala!

A pile of items appeared on the ground. The most eye-catching one was a cool-looking rifle. One look and you could tell that it was a killing weapon!

This was a complete set of individual equipment. Tang Zhen had stored it in his storage card. Now was the time to use it.

After quickly putting on his equipment, Tang Zhen picked up the rifle on the ground, leaned out, and locked on to a desert bandit on the ancient warship. He easily killed him.

Upon hearing the sudden gunshots, the bandits who were still shouting immediately looked for a hiding spot and stuck their heads out to look for Tang Zhen's position.

Tang Zhen, who had a gun in his hand, was not in the mood to waste time with these ancient battleship bandits. He began to take the initiative to attack. The crisp sound of gunfire rang out one after another as he killed the group of people who were chasing him.

When the ancient warship bandits saw this, they hurriedly looked for cover to hide. Who would have thought that Tang Zhen would be able to quickly determine their hiding location and then quietly kill them?

Seeing that his companions were dying one after another, the remaining ancient warship Bandit wanted to escape in his car, but his head was blown up by Tang Zhen with a bullet!

A battle was settled in less than five minutes. After cleaning up the battlefield, Tang Zhen once again advanced toward his target.

Not long after Tang Zhen left, a few figures cautiously approached. Just like Tang Zhen who had just descended, they had injuries of varying degrees on their bodies and appeared to be in a slightly sorry state.

After sizing up the traces of the battle and Tang Zhen who had gradually gone far away, the few cultivators from loucheng city looked at each other and nodded their heads gently.

"The other party should also be a cultivator of loucheng, should we follow them? maybe we can cooperate?"

The one who spoke was a woman with grid-like skin and a single horn on her head. The surface of her body was constantly changing, making her look like a chameleon.

I don't suggest following them rashly. They might not be willing to cooperate with us. If we go out now, we are likely to face continuous danger. It's better to take advantage of our current advantages.

The other Lou Cheng cultivator shook his head and expressed his opinion.

"Oh, then what do you think we should do?"

Upon hearing his companion's question, the cultivator with sunken eyes and no hair on his face answered, "Don't you think that these ancient battleships and desert bandits are the best tools? as long as we control them, someone will do things for us. Isn't it more efficient than us searching for them without thinking?"

It shouldn't be too difficult for us to deal with them with our strength!"

The other cultivators of Lou Cheng nodded in agreement. It was a good idea.

"Let's not delay any further. We'll start now!"

The cultivators quickly picked up the weapons on the ground, jumped into the vehicles, and went straight to the nest of the ancient warships and bandits.

Tang Zhen drove the car for another few dozen kilometers before the car broke down because of the fuel. He threw the car into a hidden place and began to walk.

He was not far from the edge. According to his speed, he would be able to get out of here in less than half a day.

Compared to the desolation of the inner region, strange plants had begun to appear here and there. They were like rat tails, tough and ugly, growing tenaciously in the sea of sand.

In addition to this plant, from time to time, there were also broken bones and casually discarded garbage, which proved that there was frequent activity here.

As expected, it did not take long for Tang Zhen to see a group of men and women in tattered clothes. They were scattered on a dark-colored sand dune and were using the tools in their hands to search for something.

Tang Zhen didn't rashly approach them. Instead, he carefully observed them for a moment and discovered that they indeed didn't look like bandits. They were merely ordinary people.

After confirming that there was no danger, Tang Zhen stood up from the ground and slowly walked towards the location of these people.

...

Chapter 1519 Chaotic towns_

Tang Zhen had just appeared when he was noticed by a lazy child. The child hurriedly warned his companions.

A trace of vigilance and panic appeared on the faces of these people when they saw the weapons on Tang Zhen's back. They subconsciously hid some things under the sand.

A few of the men even rushed to the front and deliberately revealed the weapons on their bodies to warn Tang Zhen not to provoke them.

In this area, bandits were rampant, and their arrogant figures could often be seen. Robbery also happened from time to time, and ordinary people were often harmed, so they were full of vigilance against strangers.

Tang Zhen had naturally noticed the expressions on these people's faces. However, there was still some information that he needed to obtain from the mouths of these natives. Therefore, even though the other party's attitude was extremely obvious, Tang Zhen still took the initiative to approach them.

"Don't misunderstand, I'm just lost and have some questions to ask."

Tang Zhen raised his hands and explained. He then took out a few shiny coins from his pocket and threw them to the man who seemed to be the leader.

They were the spoils of war collected from the ancient ships and bandits. They were made of a special material and contained a special energy.

The man took the energy coin and looked at it for a moment before putting it into his pocket. He was obviously very happy, and his expression had softened a lot.

The man once again sized up Tang Zhen before speaking in a deep voice, generous stranger, what do you want to ask? I will tell you if I know.

Money had its use everywhere, especially the energy coins given by Tang Zhen, which were equivalent to their income from several days of work. The guard in the man's heart was naturally reduced a lot.

tell me what's outside the desert, who's in charge of this place, and who I need to find if I want to get information.

The man sighed in relief after hearing Tang Zhen's question. He subconsciously treated Tang Zhen as a mercenary who was traveling around.

This kind of wandering mercenaries was actually very common. In order to fill their stomachs or improve their strength, they often shuttled between the various fragments of the mainland. Compared to the fierce bandits, these people were obviously easier to talk to.

Perhaps the young man in front of him was a bounty hunter who specialized in hunting down bandits for Commission. He had gotten lost in the fallen star desert in order to hunt down the ancient warship bandits.

After listening to the man's story and combining it with the memories he obtained from the ancient ship bandits, Tang Zhen knew the specific information about the edge of the desert.

There was no unified government in this world, and most of the land was private territory. For example, the city at the edge of the desert was controlled by a guy named "the modified"

He was very strong and controlled many wandering mercenaries. He was not much different from a local tyrant here.

It was precisely because of the bounty order from Gurgan that the ancient Pirates would enter the Starfall desert whenever there was a meteor, in search of a bounty that could allow them to exchange for a large reward.

As Gurgan was obsessed with his modification experiments, he was not in the mood to manage his own territory, which led to an abnormal chaos in the security environment. There were fights every day in the town, and deaths were common.

If Tang Zhen wanted to obtain information, he would naturally have to come into contact with the mercenaries and the merchants who traveled to and from the fragment world. Only they would have the most complete and timely information.

In the town, there was more than one such place. Some were open to the public, while others belonged to secret organizations. Ordinary people couldn't come into contact with them, so Tang Zhen had to look for them carefully.

The two of them talked for more than ten minutes and Tang Zhen obtained all the information he wanted. At the same time, he also knew the reason why these people were rummaging through the sand.

It turned out that there was a special metal from outer space buried in the sand. However, the metal was very small and inconspicuous in the sand. It could only be found after careful inspection.

This was a very hard job, and his body would often be cut. Sometimes, he would be busy for an entire day and would not find a few Special Metals.

Because this special metal could be used to create high-grade weapons or the core component of a precision instrument, it had always been very expensive. The biggest buyer was also Gurgan.

According to the man, there were thousands of people digging for Special Metals and precious crystals in the fallen star desert, but most of them were concentrated in places further away. Most of them were old, weak, sick, and disabled, so they could only stay at the edge of the desert, and their harvest was naturally pitifully little.

Tang Zhen sized up these people's bodies and discovered that there were cut marks everywhere. In particular, their palms were filled with hideous wounds. The scars had even formed thick calluses.

Be it the elderly or the children, they were all like this.

thank you for telling me. In addition, you'd better dig a place where you can stand. You might get an unexpected harvest!

Tang Zhen extended his hand and pointed at the man's feet. His face carried a trace of a strange smile.

A trace of doubt appeared on the man's face when he saw Tang Zhen turn around and leave. However, he still tried to use his tools to dig a little. This was because he felt that Tang Zhen's words were not randomly spoken.

After digging a few times, he saw a special metal the size of an egg, and its surface had traces of melting.

"This Tao Wu!"

The man was stunned for a moment, then his face revealed a look of ecstasy. He held the heavy metal in his hand and bowed repeatedly to Tang Zhen, who was far away, regardless of whether Tang Zhen could hear him.

He had never dreamed that he would get such a generous return by just telling the other party some information that everyone knew.

With this unexpected gain, they would not have to worry about hunger for at least a year. They could even use the remaining money to improve their lives!

Tang Zhen, who had gone far away, naturally heard the cheers of those pitiful people. However, he did not care about it at all. This matter was something that he had done casually and was not worth mentioning.

In fact, there was an even larger piece of special metal nearby. However, Tang Zhen did not tell the man because this was not a good thing for them. It was very likely that they would attract unnecessary trouble.

A small fortune was a blessing, but a great fortune could very likely bring disaster, which ordinary people could not afford!

Tang Zhen continued to advance in the desert and finally arrived at the edge. A large number of dilapidated buildings with various shapes appeared in front of him. From time to time, he could see wandering passersby, whose entire bodies were emitting a decadent aura.

A few men carrying weapons on their backs sized Tang Zhen up with scrutinizing eyes. However, they did not take the initiative to approach him. After all, people like Tang Zhen were often seen. Sometimes, hundreds or even thousands of people would appear.

Some of them were caravans, some were mercenary groups, and some were bandits. Only in such a situation would they attract the attention of the sentries.

Tang Zhen passed through the street that was filled with garbage and feces as he slowly walked toward the central area of the town under the gazes that harbored ill intentions.

Ten minutes later, Tang Zhen stopped in front of a building that had been modified from a scrapped warship. He pushed the door open and walked in under the seduction of a prostitute doing business at the door.

The interior of the building was very large, and there were many seats in the hall that was more than a thousand meters long. Men and women with fierce expressions were gathered together, looking at the holographic image floating above their heads from time to time.

This was the mercenary mission display system that was connected to the various fragment continents. It could display the missions issued by the client in real time. Wandering mercenaries would accept missions according to their own strength and travel back and forth between the various fragment continents.

This was a special world. From time to time, the shadow of high-tech items could be seen. People could even travel back and forth between the various fragment continents through transport ships, but no one cared about the infrastructure and the lives of ordinary people. Many remote places were almost like the medieval times.

Tang Zhen walked to an empty table and asked for a portion of food from the six-armed attendant. After which, he quietly observed his surroundings and slowly gathered the information he needed.

A few minutes later, Tang Zhen locked onto a few men and women who were gathered together. Compared to the other wandering mercenaries, these people's equipment was undoubtedly better. Their words and actions were also slightly different from the other wandering mercenaries.

He got the waiter to send a bottle of wine to the other party. When the other party noticed him, Tang Zhen smiled and walked over.

Chapter 1520 The space-time Codex (1)

When he eavesdropped on the conversation of the wandering mercenaries in the surroundings earlier, Tang Zhen had heard the words "Desert Platinum" from these people. His tone carried a trace of expectation that he could not suppress.

Their identity and attire proved that they were not locals, and their strength far exceeded that of other wandering mercenaries. At the same time, they were also very interested in the special Metals in the Starfall desert. As such, Tang Zhen had a chance to operate them.

As long as the other party came for the special metal and knew the information he wanted, Tang Zhen was confident that he could obtain it from them.

In fact, it didn't matter even if the other party didn't know. Tang Zhen's plan included finding a few natives to help him gather information. He would hide his identity as much as possible to avoid attracting the attention of people with ulterior motives.

A trace of vigilance flashed across the eyes of the few people at the table when they saw Tang Zhen walking over. They quietly made their preparations for battle.

The public security environment here was very poor. There were incidents of trouble and fighting happening from time to time. Who knew if Tang Zhen was a local snake who was deliberately looking for trouble?

"Brother, thank you for the wine!"

There were a total of five people at the table, four men and one woman. The one who spoke was a middle-aged man wearing a dark red metal bulletproof vest. It looked like a Knight's plate armor, and there were many traces of damage on it.

His eyes were especially bright, and his face was full of strange tattoos that flickered with fluorescent light, making his appearance very ferocious. He was like a poisonous snake lurking in the dark, and no one knew when he would stretch his head out to bite you.

The middle-aged man held a bottle of wine in his hand and said with a ferocious smile on his face, "But we only drink with people we know, so I can only reject your kind intentions. Please don't mind."

As he spoke, the middle-aged man reached out and pushed the wine bottle to the opposite side of the table. He stared at Tang Zhen without blinking.

It's just a bottle of wine. You don't have to pay anything for it.

Tang Zhen smiled. He picked up the wine bottle and poured himself a cup. After which, he pushed it in front of the middle-aged man and raised the wine cup to take a sip.

The taste of this wine was very strange. After it entered his mouth, there was a feeling of explosion, followed by a mouth full of fragrance, which made people's spirits rise.

The middle-aged man opposite smiled when he saw this. He picked up a bottle of wine and poured himself a cup. After which, he stared at Tang Zhen and said, "Tell us, friend. What do you want from us?"

One must have a certain purpose for being so attentive. Tang Zhen's bottle of wine was just an excuse to talk. Although it was very ordinary, it was very effective.

The middle-aged man couldn't see through Tang Zhen and didn't want to cause trouble for the time being. Therefore, he took the opportunity to give Tang Zhen a chance to speak, so as to prevent him from becoming angry from embarrassment.

I saw that your words and actions were completely different from the others, so I guessed that you must have come from a big place. At the same time, you may know more secret information.

The middle-aged man nodded, tacitly agreeing with Tang Zhen's speculation.

"That's why I want you to help me gather some information. If you can do it, I will definitely not be stingy with my reward." Tang Zhen put down his wine cup and said in a deep voice.

The middle-aged man shook his head helplessly and said in a regretful tone, "I'm sorry, friend. I think you've got the wrong person. If you want to get information, you should go directly to those intelligence dealers.

Tang Zhen nodded, "I will indeed go and look for them. However, I think that all of you will definitely be very interested in it. After all, I have something that all of you want in my hands."

Tang Zhen said as he took out a bag. Inside it was a lot of Special Metals that he picked up on the way from the desert to the town. They made a crisp sound when they hit the metal table.

How could Tang Zhen easily miss out on this kind of special metal that could be used as currency? therefore, he used the treasure hunting function fixed on the ring and picked up quite a lot of it along the way.

Pointing at the money bag, Tang Zhen said with a smile, "No one would go against money. What do you think?"

The middle-aged man glanced at the money bag and gave his companion a look. Then, he saw a bald man in a coat reach out to open the bag and check it carefully.

boss, I don't have energy coins in my pocket. Instead, I have high-quality Desert Platinum!

Hearing the bald man's words, his companion's expression changed slightly. They secretly looked at each other, shock and doubt flashing in their eyes.

This was especially so for the female member who was sitting beside Tang Zhen. She directly snatched the bag over and carefully checked it. After that, she looked at the middle-aged man with an eager expression.

alright, friend. You've offered a price that my companion and I can't refuse. But first, tell me what you want to know. Maybe we won't have the chance to get this bounty.

Tang Zhen nodded and lowered his voice, I only want to know one thing. Do you know anything about the spacetime Codex? "

Hearing Tang Zhen mention the spacetime Codex, the middle-aged man frowned. He pondered for a moment and said, what a coincidence. If you ask someone else, you probably won't get anything. After all, this kind of thing has been going on for a long time, and fewer and fewer people know about it. I've only come into contact with some by chance!

Tang Zhen's heart was filled with joy as he continued to listen.

according to the rumors, this spacetime Codex is a strange object from outer space that suddenly appeared thousands of years ago. It landed nearby, and it is said that it has extremely powerful abilities, allowing ordinary people to become as omnipotent as gods!

It was because of its existence that it had caused hundreds of years of turmoil. It was unknown how many forces had been involved, and the number of people who had died was uncountable.

Back then, the spacetime Codex was split into four parts, three of which ended up in the hands of an unknown top power, and the last one is missing.”

When the middle-aged man said this, he used a cautious gaze to size up his surroundings. He softly said to Tang Zhen, it is said that the missing one is near the fallen star desert, but this is only a legend. No one can confirm this news, and more than one person has come here to look for it, but in the end, all of them found nothing.

Tang Zhen’s heart thumped wildly. If the rumors were true, then he would really have to collect information to see if he could find any information about the spacetime Codex.

After the middle-aged man finished speaking, Tang Zhen nodded and pointed to the money bag, from now on, they belong to you, but I still hope to get more information about the other three spacetime codices. If you can get them, I can pay you double the reward!

The middle-aged man was silent for a moment before he nodded. “I’ll gather information as soon as possible. I’ll still be here in seven days and give you an answer!”

it’s a pleasure working with you. I look forward to your good news!

Tang Zhen raised his wine cup and downed it in one gulp. After which, he walked onto the street and began to wander around.

After Tang Zhen left, the middle-aged man passed the money bag to his female companion and said with a smile, “With these Desert Platinum, you should be able to finish making your spirit force Armor, right?”

The female team member shook her head and said with a hint of disappointment in her excitement, it’s not enough. Even with the ones I’ve collected, I can only complete half of it. It seems that I have to think of another way.

A cloaked man who had not spoken since the beginning said, “are we still going to look for Gurgan? after all, he’s the only one with enough Desert Platinum?”

Beside him sat a man who was dressed similarly. If one looked closely, they would find that the two were actually twins.

The middle-aged man shook his head and sighed, “The modified Gurgan isn’t short on money. As far as I know, his experiments will consume a large number of precious materials, one of which is Desert Platinum.

If you want to use energy coins to buy the desert Platinum from him, the possibility of success is very low. The only way is to snatch it!”

Everyone nodded lightly. In fact, they had already made preparations to take action when they arrived here. However, as the local tyrant, Gurgan had no lack of mercenaries who would risk their lives for anything. It would be extremely difficult to snatch anything from him.

Before they met Tang Zhen, they had been observing and gathering information, waiting for the best time to make a move.

boss, do you think we can find a way from that guy just now? if he still has Desert Platinum, then the problem will be simple, right? ”

The middle-aged man nodded and said in a deep voice, ” this is indeed a solution. So for the time being, we’ll split into two groups and continue to search for the location of the treasures. At the same time, we’ll gather information on the spacetime Codex. Hopefully, we’ll be able to find something!

The middle-aged man shook his head and said in a low voice, ” another lunatic who has been bewitched by the legends. But he’s still of use. I hope he doesn’t die too early!

Everyone laughed at the same time and finished the wine in their cups.

...
