

## Alternate 171

### Chapter 171: Emptying the warehouse and driving the helicopter

“Ordinary weapons wouldn’t have much effect on these undead. What Tang Zhen needed was a weapon of mass destruction, such as high-temperature pressure bombs, cloud explosion bombs, napalm bombs, and the like!”

“However, there were many restrictions when these weapons were used. Although they were powerful, they did not seem to be suitable for the current situation in Holy Dragon City.”

“Other than that, he could also pilot a helicopter and drop some ‘packages’ from the sky, letting these corpse monsters have a taste of blooming everywhere!”

“According to the altitude of the helicopter, coupled with Tang Zhen’s ‘mobile storage room’, it seemed that the expected effect could be completely achieved!”

“Moreover, compared to ordinary weapons, those restricted weapons were even more difficult to obtain. Therefore, Tang Zhen rejected the previous plan and chose to use a helicopter to drop them.”

“The plan had been set, so let’s begin!”

“Through the [ all-purpose electronic kit ], Tang Zhen could determine where he could find the things he needed.”

“The power of black technology was once again demonstrated. That kind of top-secret information was completely defenseless in front of the [ all-purpose electronic kit ]. It was easily hacked and obtained, and then listed in front of Tang Zhen.”

Tang Zhen looked around for a while and chose a location. It was a military base in kimchi country. It was in a completely closed state. The underground Arsenal of the base had the things Tang Zhen needed.

“The car headed to the military base. After getting off the car from a distance, Tang Zhen turned on the [ quantum invisibility light screen ] and quietly entered the interior of the base.”

“A virtual topographic map marked Tang Zhen’s destination. With this thing as a guide, Tang Zhen did not need to worry about getting lost in this huge base.”

“Avoiding the soldiers on duty and military vehicles that passed by from time to time, Tang Zhen entered the basement of a building. After making two rounds, he came to a huge iron door. This was the destination of his trip.”

“The metal door was locked with an electronic lock and was extremely secure. However, it was useless in front of Tang Zhen.”

“The [ all-purpose electronic kit ] easily opened the door and Tang Zhen walked in. After looking around, Tang Zhen realized that he had made a big profit this time.”

“This warehouse was filled with all kinds of weapons and equipment, including the high military explosives that Tang Zhen needed. The amount of weapons and equipment far exceeded his expectations.”

“After Tang Zhen looked around, he began the work of transporting the goods.”

“It had to be said that Tang Zhen was getting bolder and bolder. He had actually set his sights on the military base. However, in the face of an existence like Tang Zhen, who could not be treated with common sense, the military was probably helpless!”

“After the moving work was over, Tang Zhen looked at the clean weapons warehouse and proudly snapped his fingers.”

“He could totally imagine the wonderful expressions on the officers’ faces when they found out that the Arsenal had been stolen. Then, they would fly into a rage and dig three feet into the ground to find the mastermind!”

“Let them be. The more they caused, the better. When there were more and more mysterious events in the original world, people would get used to it. Then, the theory of soul transmigration would not be so unacceptable!”

“After leaving the underground weapons warehouse, Tang Zhen sneaked into the hangar and took away two assault helicopters and their weapons before leaving!”

“A few hours later, some soldiers discovered that the plane had been stolen, and the entire base’s alarm went off. Then, they found that the entire weapon warehouse had been moved away, without a single bullet left.”

“The entire base was in a state of panic. All the forces that could be used were activated, trying to investigate the matter to the end. As the boss of the base, the American Alliance in the original world immediately responded and mobilized elite troops to kimchi country to take over the investigation.”

The entire original world became lively because of this matter. All forces were ready to make a move. The most active one was the force from the ice Bear Alliance!

.....

“The wind and rain in the original world seemed to have nothing to do with Tang Zhen. At this moment, he was standing in the square, studying how to control the ‘iron bird’ in front of him.”

The assault Helicopter was different from ordinary transportation. It was a powerful flying weapon that required professional training and rich piloting experience to fully pilot it.

“Tang Zhen didn’t meet any of these conditions, but fortunately, he had the application store. There were applications that could solve the problem for him to download.”

“[ all-purpose auxiliary controller. With it, you can even pilot a spaceship. Download cost: 50000 gold coins. ]”

“This application could completely solve Tang Zhen’s troubles, but the price of 50000 gold coins was unacceptable to him. After searching for a while, he finally found an application that was suitable for him.”

“[ aircraft pilot assistant (beginner). With its assistance, you can pilot any aircraft from the original world. Download cost: 5000 gold coins. ]”

“Tang Zhen gave a satisfied smile when he saw this. The price wasn’t high, and it could solve the problem at hand. This would be it!”

“After downloading and installing it, Tang Zhen jumped onto the armed helicopter and began to operate it according to the instructions. When Tang Zhen made a mistake, the application would automatically correct it to ensure that every action reached perfect standards.”

“This plane was equipped with large-caliber artillery and many rockets. In the battlefield of the original world, it was definitely a super killer on the battlefield. However, if it was used to deal with the shocking number and powerful undead, it would not have much effect.”

“Fortunately, Tang Zhen didn’t plan to use this thing to deal with the corpse race. He only used it to block the flying vehicle.”

“After modifying the ammunition and storing it in his storage space, Tang Zhen called Tai Seng and Qian Long over to let them experience the feeling of flying in the sky.”

The two of them came down from the city wall and looked at the military helicopter in the square with curiosity.

“When they heard Tang Zhen say that this thing could fly into the sky, the two people who were exclaiming about the sturdiness of the armed helicopter had suspicious expressions on their faces. They secretly thought, ‘how can this metal lump fly?’”

“Since he had already mastered the method to pilot the armed helicopter, Tang Zhen directly pushed the two people into the helicopter. After giving them some instructions, he started the armed helicopter.”

“The huge propeller started to turn, and the roar of the plane made Qian Long and the other man nervous. When the plane slowly took off from the ground, the two of them howled in excitement and looked down at the Holy Dragon Valley beneath their feet!”

“The residents cheered in unison as they watched the city Lord drive the ‘iron bird’ higher and higher. While they were envious, they were also afraid that the city Lord and the others would fall from the sky.”

“Fortunately, such a situation did not happen. The city Lord and the rest also flew higher and higher, further and further away!”

“When they flew over the Holy Dragon city’s walls, the soldiers who knew about the situation cheered again. Little Jimi even kept shouting that he wanted to go up, but he was kicked a few times by the bone Cat and the other soldiers. At the same time, he cursed, who is the city Lord? no matter how high he flies, he’s not afraid of falling to his death. Why the hell are you following him? get lost!”

“After going out of the city wall, what came into view was a dense horde of zombie monsters. After seeing the military helicopter in the sky, they roared uneasily. Some of the zombie race even jumped up more than 20 meters high, trying to catch the helicopter.”

“After flying to the center of the undead, Tang Zhen got Tai Seng and his partner to push down a few giant bags on the plane while constantly raising the plane up!”

BOOM! Swish!

“A deafening explosion was heard. After the Super cluster bomb modified by Tang Zhen exploded, a shockwave that was visible to the naked eye spread out. All the undead within the range of this shockwave turned into a pile of rotten meat!”

?

“Chapter 172: the retreating undead, the plundering of the insect bandits”

All the corpse clansmen were alarmed by the loud noise. They howled madly to vent the uneasiness in their hearts.

“A huge package with a parachute fell from the sky, heavily landing in the middle of a group of sword-shield ghost soldiers. Seeing the assault Helicopter rapidly flying up, the ghost soldiers roared in anger, and slashed at the package. ”

“However, these saber-shield ghost soldiers only managed to slash a few times before they were engulfed by a searing wave of air. Even the countless saber-shield ghost soldiers around them were blasted into nothingness! ”

“After seeing the power of the cluster bombs, the three of them were amazed, especially from the perspective of the sky. The visual impact was even stronger. Seeing countless undead being blown into the sky by the shock wave, the three of them were boiling with blood. ”

“Seeing that the effect of the attack was very good, Tang Zhen became spirited and threw the cluster bombs on the plane one after another. The impact of the falling large package that weighed hundreds of kilograms could easily smash the undead into meat patties. ”

“Although there were many of the corpse race, the power of the explosion was too terrifying. It was not inferior to the power of the self-destruction bomb. These corpse race members were simply unable to resist and could only escape in all directions. ”

“There were more and more giant pits on the ground, and the remains of the monsters covered the gravel plain. After Tang Zhen threw all the cluster bombs, there was no longer a zombie monster in front of Holy Dragon City! ”

“Now that the undead army had retreated, it was time to harvest the spoils of war. ”

“Tai Seng took out his walkie-talkie and informed the soldiers on the city wall to come down and clean up the battlefield. Tang Zhen, on the other hand, piloted the assault Helicopter and circled two more rounds before landing it on the gravel plain. ”

The three of them jumped off the plane and started to collect the brains of the high-level undead!

Tang Zhen stepped on the gravel that had yet to dissipate from the smoke. He put away the brain of a corpse Centurion and was about to collect another monster's brain when he heard a sound similar to the sound of horse hooves coming from the distance.

"Tang Zhen looked in the direction of the voice, only to see nearly a hundred people riding war horses as they galloped in his direction. "

"After this group of people entered the area filled with the corpses of the undead race, they immediately jumped down from their horses and began to collect the brain beads in a swaggering manner. They did not put Tang Zhen in their eyes at all. "

Tang Zhen was initially startled. He smiled and shook his head before slowly walking over.

""Buddy, after you guys collect the brain beads, put them all here!"" "

Tang Zhen pointed at the ground under his feet and spoke to those people. His face carried a very serious expression.

"Through the clothes of these people, Tang Zhen recognized that they were the notorious insect thieves who were currently taking advantage of him. "

"After hearing Tang Zhen's words, these insect bandits feigned a blank look at each other. Then, they began to laugh wildly without any restraint. After laughing for a long time, one of the insect bandits pointed at Tang Zhen and scolded,""Is there something wrong with your brain? could it be that these corpse monsters belong to your family, so you won't let us collect their brains?"" "

"Tang Zhen replied with an ""Oh."" After which, he feigned a blank expression and asked,""But I killed them. Shouldn't they belong to me?"" "

"The insect thieves laughed wildly again, and the eyes that looked at Tang Zhen became contemptuous. "

""F \* ck your mother, Who Do You Think You Are?"" "

""And you killed them all? how did you kill them? are you farting?"" "

""What's the point of talking to him, just cut him down with a knife!"" "

The insect thieves spoke one after another. They did not place Tang Zhen in their eyes at all. They even discussed how to torture and kill him for fun in front of him.

"When the bug thieves heard the loud noise in the distance, they rushed over on their horses to take a look. In the end, they did not see the scene of Tang Zhen blowing up the monsters. Instead, they saw the corpses of the corpse monsters on the ground, and there were even some high-level monsters among them. "

"The bug thieves were not interested in what caused the death of these corpse monsters, they were only interested in the brains! "

“As long as one wasn’t a fool, they would know that this meant a huge fortune. The insect bandits, who had always made a living by killing and robbing, would naturally not let go of this opportunity to make a fortune!”

“As for this overconfident and crazy brat in front of him, he would just kill him directly!”

“He dared to show off in front of the insect bandits who killed people like flies, shamelessly saying that he killed all these monsters, and not allowing them to collect their brains. Wasn’t he tired of living?”

“Tang Zhen, who had retracted his aura, looked like an ordinary person. It was inevitable that the insect thieves would misunderstand. Furthermore, this group of people acted arrogantly. Previously, they even dared to intercept and kill the cultivator battle team from Black Rock City. It was believed that they did not place Tang Zhen, the city Lord of Holy Dragon City, in their eyes.”

“When he saw a few insect bandits walking over with sneers and unsheathing the battle swords at their waists while staring at him with killing intent, Tang Zhen shook his head and muttered to himself, actually, not all human beings should be saved. For example, you scumbags should be exterminated!”

“As soon as he finished speaking, Tang Zhen flicked his wrist and a machine gun appeared in his hand.”

“””Dada Dada Dada Dada!”””

“The scorching hot bullets whistled out. Before the ten or so insect bandits in front of Tang Zhen could even recover from their shock, they were already torn into two by the bullets. They fell to the ground and howled in pain. The strange insects on the faces of the insect bandits gave them a strong life force, but it made them suffer even more in this situation.”

“All of the insect bandits were stunned. They looked at the dozen or so of their comrades who had died and cursed as they pounced forward. Some of them waved their swords while others raised their arms. Through the strange parasites on their arms, they shot poisonous stingers at Tang Zhen one after another.”

“Tang Zhen dodged the attacks of the bug bandits while retaliating. As time passed, more and more bug bandits fell.”

Qian Long and Tai Seng had also rushed over. The two of them had automatic rifles on them and were currently dodging the poisonous stingers of the bug bandits while attacking them from different directions!

“As more and more bug bandits fell, the leader of the bug bandits saw that the situation was bad and immediately led the rest of the bug bandits onto their warhorses and began to escape into the depths of the wilderness.”

“””This bunch of damned insect thieves, they actually set their sights on us, they really don’t know what’s good for them!”””

“Qian Long spat out a mouthful of saliva before opening fire on the head of an insectoid who was trying to launch a sneak attack. He then turned to Tang Zhen and said,”””These insect thieves are the most shameless. They can do anything. Since we’ve made enemies today, we’ll be harassed by them in the future. It’s impossible to guard against them!”””

“Tai Seng also had a look of agreement on his face, and the disgust on his face was the same as Qian Long’s!”

“No Wanderer would have a good impression of the black sheep of the human race, the insect thieves. It would not be an exaggeration to say that everyone wanted to kill them.”

“Tang Zhen coldly looked at the bug thieves that were running further and further away. He turned his head and asked, since the insect thieves are so despicable, does no one want to destroy them? ”

“”It’s not that I don’t want to exterminate them, but that these guys are very secretive, and no one knows where their nest is. Everyone, including Black Rock City, had tried to hunt down the bug bandits. In the end, not only did they not find their nest, but they also caused quite a number of casualties. Therefore, no one paid attention to these bug bandits after that, which made them more and more arrogant!” ”

“Qian Long’s face was filled with regret as he spoke. From his expression, it seemed like he hated the insect thieves to the core!”

“Tang Zhen didn’t know what kind of grudge Qian Long had with the insect bandits. However, these fellows had come to take advantage of him and had such a bad reputation. If Tang Zhen didn’t deal with them, it wouldn’t be in line with his character.”

“Moreover, he had been a Bandit for many years. These insect bandits must have accumulated a lot of wealth. How could Tang Zhen miss such an opportunity to make a fortune?”

“”You two get on the plane first. We’ll go back to the city to get some things, and then we’ll go to the wilderness to meet those bastards!” ”

?

“Chapter 173: the bug thieves “lair, the dock reconnaissance”

“Tang Zhen’s speed was extremely fast. Since he did not wish to let these insect thieves off, he naturally would not waste any time. Once these fellows disappeared from the map, it would be unknown when he would be able to catch their traces again.”

“After replenishing their supplies, the assault Helicopter whizzed out and flew straight into the depths of the wilderness.”

“At this time, the bug thieves had already run out of the map’s display range. Fortunately, the plane’s speed was fast enough. It didn’t take long for the bug thieves to appear on the map again. However, Tang Zhen discovered that the place where these guys were moving forward was actually a huge Lake.”

Tang Zhen stared unblinkingly at these insect thieves as he piloted the plane. He wanted to see what they were doing by the lake. Could it be that their nest was in the lake?

“This was a good location that no one could guess, but how were they going to enter and live underwater?”

“After observing for a while, Tang Zhen noticed that the bug thieves had all jumped off their warhorses. Then, they took out two semi-circular objects from their pockets. One of them was placed on the warhorse’s mouth, while the other was placed on their own mouth.”

Tang Zhen zoomed in on the map. Only then did he discover that those semi-circular things were actually disgusting bugs with countless tentacles!

“Then, the insect thieves led their warhorses and walked into the lake from a shore full of gravel. They quickly disappeared without a trace, leaving only faint ripples on the water surface.”

“””So that’s how it is. No wonder we couldn’t find it. Also, that semi-circle insect that covers its mouth should have the ability to provide oxygen underwater.”””

“After figuring out these things, Tang Zhen had an idea of what to do. After talking to Qian Long and the other man, he returned to the Holy Dragon City.”

“The nest of the insect thieves was located under the lake, and they didn’t know the exact situation. Therefore, Tang Zhen planned to go alone and find out what was going on. It wasn’t suitable for Qian Long and the other two to follow.”

“After returning to the Holy Dragon City, Tang Zhen parked the plane on the city wall and decided to head to the bug thieves ‘lair.”

“Inadvertently, he saw the Holy Dragon city’s soldiers struggling to go up and down the city walls. Tang Zhen thought for a moment and resisted the thought of opening the city gates on the city walls. It was better to wait until the threat of the undead race and houndhead men was completely resolved before he considered whether to open the city gates or not!”

“After arriving at the place where they had fought with the insect bandits, Tang Zhen greeted the Holy Dragon city’s soldiers and bent over to search one of the insect bandits ‘bodies. He quickly found the semi-circular insect that was placed in a bottle filled with water. It was still struggling non-stop in his hand.”

“In addition, Tang Zhen also studied the bugs that could be parasitic on the arm and the face-hugging bug, the symbol of the bug thieves. It was a pity that these two types of bugs were already dead. It seemed that they were something that depended on the user’s life!”

“When Tang Zhen was studying the insect, Tai Seng and the others were worried about a large pile of warhorses. This was a good thing, and even money might not be able to buy it. However, the city walls of the Holy Dragon City were too high, and it would take a lot of effort to get it into the valley.”

“A group of men were discussing how to get the warhorses in. After Tang Zhen heard this, he pointed at the helicopter on the city wall and said,”””You don’t have to worry. With that thing, I can even get an elephant in.”””

“Tai Seng and the others were overjoyed when they heard this, and they requested Tang Zhen to quickly bring the warhorses into the sacred Dragon Valley. If they were to escape, they would suffer a great loss!”

“Tang Zhen had originally planned to head to the insect thieves ‘lair after this, but after hearing Tai Seng’s request, he felt that he was a little too impatient. Thus, he nodded and said that he would take care of it. However, he had to make some preparations before that.”

“If they wanted to use the military helicopters to transport these warhorses, they would need a suitable cage. The Holy Dragon City currently did not have one, so they had to go to the original world to find one.”

Tang Zhen chose the container at the dock as his target. This was because the size of the container was just right. It also saved him the trouble of looking for it everywhere.

“After being teleported back to his original world, Tang Zhen directly took a car to the dock. At a hidden location near the dock, he activated the [ quantum stealth light curtain ] and went straight to the container storage position at the dock.”

“This time, his target was a container. Therefore, there was no need for him to open it and inspect the goods. After he found a hidden location, Tang Zhen kept a container of a suitable size.”

“The entire process was extremely easy. When Tang Zhen saw that he had finished his business, he teleported back to the tower world.”

“However, Tang Zhen did not know that at the instant he collected the container, a series of urgent alarm sounds immediately sounded from a hidden room at the dock!”

“Four or five American agents who were chatting suddenly jumped in front of a large row of computer screens. Their fingers moved quickly, and a concise report sounded from time to time.”

abnormality found in area No. 1. Comparison complete. A container is missing!

unknown energy signature detected in area No. 1. Duration: 0.1 seconds!

area No. 1 has been locked. No unusual people have been found!

“scan of area No. 1 complete. Abnormality detected, but can not be accurately determined!”

an unknown energy has appeared in area No. 1 for 0.1 seconds. The energy has disappeared!

“.....”

“At the same time, a group of fully-armed American soldiers appeared like ghosts and quickly surrounded Tang Zhen’s previous position. However, Tang Zhen had already teleported away, so they naturally missed!”

“However, the area was strictly sealed off. In less than five minutes, several cars arrived and a dozen American experts entered the scene with all kinds of equipment.”

“When they arrived, a huge canopy was set up, completely blocking the peeping from the sky.”

“They set up all kinds of equipment and searched the area for half a day. In the end, they carefully picked up a few pieces of sand and a strand of hair from the ground and put them into a sealed box. Then, they removed the equipment and ran away like the wind.”

“Perhaps, Tang Zhen himself had never imagined that the debris that had fallen from his shoes would reveal so much information. However, even if he knew, he would not place it in his heart.”

“This was because from the beginning to the end, he had been using some not-so-obvious methods to declare his existence to the Masters of this world. The day they knew about him would be the day Tang Zhen laid his cards on the table.”

“As for whether he would fall into danger or be controlled, Tang Zhen was not too worried. Compared to the mysterious and strange world of buildings, the power of the original world was still too simple and shallow. In the face of the application of black technology, it was almost defenseless.”

“Tang Zhen believed that he would definitely be the final Victor. Moreover, from the very beginning, he had the intention of bringing benefits to his original world. He was walking on the righteous path, so what was there to fear?”

“After returning to the Holy Dragon City, Tang Zhen and the others tied the steel wire rope to the container and secured it with a U-shaped bolt. Tai Seng and the Warriors rushed the warhorses into the container and closed the door firmly. Then, Tang Zhen started the helicopter and hoisted the warhorses to the sacred Dragon Valley.”

“After the warhorses were finished, Tang Zhen also hoisted a batch of high-level zombie corpses to increase the ‘nutrition’ of the mother tree that had just advanced to level two!”

They busied themselves until the evening before everyone returned to the Holy Dragon City. Tang Zhen threw the plane onto the city wall and immediately ran out to check on today’s harvest.

“In the resting room on the city wall, Qian Long and Tai Seng stared at the pile of leather bags on the ground with wide eyes.”

“Opening the leather bag and grabbing a handful of sparkling brains, Tai Seng and Qian Long looked at each other and burst into laughter.”

“”””With these gains, the city Lord finally doesn’t have to worry about his brain anymore, hehe.””””

“”””That’s right, we don’t have to look at his ugly face all day long, it’s all because of this damn brain bead.””””

“Tang Zhen, who had just entered the door,”””Yingluo.””””

?

#### Chapter 174: The lakebed (1)

“After the three of them finished counting the brain beads, Tang Zhen’s face was filled with unconcealable joy. He kept the brain beads into his storage space and said to thousand Dragon tai Sen, whose hands were about to cramp,”””I’m so happy today, let’s go drink!””” ”

“The two of them were overjoyed and immediately ordered the soldiers to drive to the warehouse to get the wine. At the same time, they also brought a cartload of meat, intestines, and other things that

they had gotten from the container last time. Since they were going to drink wine, they must drink to their hearts 'content! "

The originally exhausted soldiers immediately jubilantly drove the two pickup trucks that Tang Zhen had brought over and ran straight to the Holy Dragon city's warehouse. They moved two carts of food and wine from the warehouse that Murong Zi Yan was in charge of and ran back in a flash.

"Someone had already cleared out the area, and a large row of tables made from ammunition boxes was arranged. When the pickup truck arrived, the soldiers immediately moved the beer, white wine, and red wine onto the truck. Then, there were all kinds of food, most of which were canned food and military food. "

"Next, everyone gathered around the table, filling it up. "

"Under their feet was the huge city wall, and above their heads was the bright moon in the sky. The oil barrels around them were burning fiercely, and the monsters were howling for food below the city wall. In this atmosphere, everyone raised their glasses and drank to their hearts 'content, and the laughter and laughter were endless! "

Some of the soldiers who could not drink took a pile of food and drinks and ate while observing the situation below the city. Their vigilance did not drop at all.

"The meal lasted until midnight. After eating and drinking to their hearts 'content, those who were supposed to sleep went to sleep, and those who were supposed to stand guard went to sleep. The crowd dispersed in a hubbub. "

Tang Zhen ran to the mother tree's treehouse and slept for the night. It wasn't until the next morning when the sun shone in through the cracks of the treehouse that Tang Zhen stretched his body and walked out.

"After taking in a breath of fresh air, Tang Zhen stood on the mother tree's two-meter thick branch and sized up the mother tree that had advanced to Rank 2. "

"The mother tree's trunk had expanded to an extremely exaggerated extent. Tang Zhen estimated that it had a diameter of at least twenty meters, which was extremely spectacular. "

"Sitting under the mother tree, one could see bits of light falling from the branches and leaves from time to time, which was an extraordinary beauty. "

"The remains of the high-level zombie monsters that Tang Zhen had brought over yesterday were now swept into the ground by the roots of the mother tree. It was not visible from the outside at all, but this was good. After all, those hideous zombie monsters 'remains looked too disgusting. "

"Perhaps, it was the nature of the mother tree to worship nature. Even if it was fed with flesh and blood by Tang Zhen, it still could not change the proud nature in its bones. "

"Currently, within the one-mile radius of the mother tree, the ground was covered with inch-long light-green grass, like a flat green carpet, soft and comfortable. Every now and then, there would be piles of bright flowers blooming, and a faint fragrance would drift in the air. "

“After not seeing them for a day, a group of colorful birds with long tail feathers flew over from God knows where. They occupied a corner of the mother tree without the permission of the city Lord, Tang Zhen. At this time, they were chirping happily among the branches and leaves. ”

The warhorses that had been brought into the Holy Dragon Valley yesterday were now having fun on the lawn under the mother tree. There was also a pair of shameless guys doing it in broad daylight. The stallion’s long face had a triumphant expression.

“After Tang Zhen took a glance, a flash of inspiration suddenly appeared in his mind. ”

He felt that he should take out the dog-headed people’s building foundation and use it as a livestock pen after the building was built. He believed that the livestock’s fertility rate would definitely increase greatly.

“The more Tang Zhen thought about it, the more he felt that this method was feasible. He secretly thought that after the Holy Dragon city’s scale increased and expanded, he would definitely use the dog-headed people’s building foundation to build a livestock pen! ”

“If the Kobold royal family knew of Tang Zhen’s plan, they would definitely send their troops to attack again. They would use the building foundation that had been separated from the Kobold Royal city’s Foundation to build a pigsty. Only Tang Zhen could think of such a despicable move. This was simply a huge insult to the kobolds! ”

“After sweeping a glance at the increasing number of beautiful treehouses, Tang Zhen greeted Li Sha who was living in another treehouse and descended to the ground along the tree vines. ”

“He went to the lakeside to wash up and then went to the cafeteria for breakfast. Only then did Tang Zhen carry his bag, which contained the insect thieves “”strange insects that could breathe underwater. He drove a pickup truck and went straight to the insect thieves”” nest. ”

“In the boundless wilderness, Tang Zhen drove the pickup truck all the way. From time to time, there would be wandering monsters blocking the road. In the end, all of them were shot in the head by Tang Zhen without exception. The car did not stop at all along the way. ”

“After running for a while, Tang Zhen finally arrived at the edge of the desolate Lake. He put the pickup truck into the origin space and placed the insect that could breathe underwater into his mouth. ”

“After sensing the breath coming out of Tang Zhen’s mouth, the strange insect immediately sealed Tang Zhen’s mouth completely and inserted two wriggling tentacles into his nasal cavity. At the same time, on the back of the strange insect, countless leaf-like organs stretched out and began to shake. ”

Tang Zhen sensed for a moment and discovered that his breathing wasn’t greatly affected. He only felt a little suffocated. Doubt immediately rose in his heart. Could it be that this strange insect had other effects other than breathing underwater?

“He turned on the [ quantum stealth light curtain ] and slowly walked into the water. In the blink of an eye, he entered the depths of the lake. ”

“After entering the water, the strange insect started to absorb oxygen from the water to provide Tang Zhen with breathing. Although it was not as comfortable as outside, it was enough to support normal breathing.”

“After confirming that there was no problem with his breathing, Tang Zhen began to size up the environment at the bottom of the lake.”

“As the lake was not polluted, the lake water was extremely clear. One could easily see the scenery at the bottom of the lake in the distance. However, Tang Zhen did not see any aquatic creatures after looking around. He did not know why.”

He switched to the map view and the entire scenery at the bottom of the lake was immediately reflected in his eyes. It was also at this moment that Tang Zhen discovered a huge monster swimming not far away. Its appearance resembled a deformed Wyrn.

“This was a level 4 monster and Tang Zhen could easily kill it. As he was afraid of alerting the enemy, Tang Zhen did not kill it.”

“As the [ quantum invisibility light curtain ] was activated, the monster did not discover Tang Zhen. It continued to wander aimlessly and soon swam to an extremely far place.”

“After Tang Zhen looked at the terrain at the bottom of the lake, he did not discover any traces of the insect thieves. However, he had personally seen the insect thieves enter the lake, so he firmly believed that the nest of the insect thieves was at the bottom of the lake.”

Tang Zhen once again checked every corner of the bottom of the lake. He finally found a dark cave entrance on a cliff at the bottom of the lake.

“Tang Zhen’s spirit was shaken. He immediately walked toward the cave. After he arrived in front of the cave and carefully observed it for a while, Tang Zhen carefully stepped inside.”

“The inside of the cave was very spacious, and the stone walls were covered with fluorescent aquatic grass. The entire cave was shrouded in a layer of misty light, which did not affect the normal vision at all.”

“After walking for a distance, Tang Zhen discovered that the cave had begun to gradually extend upwards. Some places on the top of the cave had already left the water’s surface. After walking for a distance, the lake water in the cave had completely disappeared.”

“At this moment, Tang Zhen was located in an underground karst cave. The space was very spacious and there were clusters of fluorescent plants here and there. They were growing very luxuriantly!”

“After searching and probing once more, Tang Zhen chose a passage and quietly walked over.”

“After walking for a short distance, Tang Zhen heard a series of intermittent conversations. Immediately after, he saw two insect thieves walking over from the opposite side of the passage.”

(Licking his old face for a subscription!)

“The number of subscriptions was too terrible, and it was annoying to look at. He could only thicken his face and ask for subscriptions. He hoped that friends who followed the book could come to Qidian to subscribe and support him. Thank you again!”

?

Chapter 175: The interior of the hive

“””The foreign girl I got a few days ago is really not bad. Her figure and skin are really good, and her little face is really mesmerizing. It’s a pity that we can’t play with this kind of thing, and can only be enjoyed by the big boss. What a pity, Yingluo.”” ”

“””Kid, if you don’t want to die, don’t say such things in the future. If someone tells on you, be careful not to catch you and feed you to the insects.”” ”

“the big boss can’t hear me. He hasn’t left the house for a long time. I’m just talking to you, brother. Hehehehe.”

“.....”

“The two insect thieves were wearing strange insect armor, and they were talking with lecherous smiles on their faces as they walked. They didn’t seem to notice that an enemy who had just sneaked in was standing beside them.”

“Tang Zhen hid in a corner and waited for the two insect bandits to come over. He then directly broke the neck of one of the insect bandits and gently put his corpse down. The other insect Bandit had just realized that something was wrong when Tang Zhen’s purple lightning short sword was pressed against the neck of the insect Bandit. At the same time, he said in a low voice,””Don’t speak, or I’ll kill you!”” ”

“The insect thief panicked as it felt the chill of the sharp blade. It threatened the invisible enemy in front of it, “””Who are you? how dare you be so presumptuous here? do you believe I’ll run away?”” ”

“Before he could finish his sentence, Tang Zhen’s purple lightning short sword had already cut off one of the bug thief’s ears. The bug thief was about to scream in pain, but Tang Zhen had firmly locked his throat. At the same time, Tang Zhen turned off the [ quantum stealth light screen ] and waved his middle finger in front of the bug thief.”

“””If you don’t behave, I’ll cut your throat open!”” ”

The bug thief looked at the enemy that suddenly appeared in front of him and nodded slightly.

“After saying this, Tang Zhen slowly released his hand. The insect thief coughed and took a deep breath. He looked at Tang Zhen and said,””What do you want to know?”” ”

“””How many people are here? who has the highest cultivation?”” ”

“there are more than 500 people in total. The one with the highest cultivation is the big boss, a level 5 cultivator.”

“where’s the big boss and the others? “” ”

the big boss hasn't appeared for a long time. The others are in the other caves.

"Tang Zhen nodded before asking, ""Where's your treasure room? and where are those strange insects?"" "

""I don't know the location of the treasure room, but the bugs are all in the glowing iron room!"" "

""What glowing metal house?"" Tang Zhen was startled when he heard this and asked. "

The bug Bandit raised his chin and turned his eyes to the other end of the passage. it's right there. You'll know if you go and see for yourself.

"After saying this, the insect thief looked at Tang Zhen and sneered, ""I've said what I need to say. Be quick when you attack."" "

Tang Zhen stared at the insect thief for a long time before he nodded his head and stabbed his sword into the insect thief's heart.

The insect thief's body stiffened and struggled a few times before it stopped moving.

"After putting away the two bug bandits 'corpses, Tang Zhen activated the [ quantum stealth light screen ] and continued to explore. "

"After turning the corner from the passage, a huge underground space appeared in front of Tang Zhen. The scenery here was even more beautiful. The strange plants that emitted five-colored fluorescent lights illuminated the place, making it beautiful. It was just that the piles of human bones everywhere destroyed this beautiful scenery. "

"A metal building that was like a Crystal Palace was reflected in Tang Zhen's eyes. Its shape was strange and it had a very high-tech feeling. Its entire body emitted a faint purple light, just like a peerless treasure. "

Tang Zhen was dumbstruck. He only recovered after watching for a long time. He inhaled a deep breath of air and began to slowly approach the metal building at the center of the space.

A few bug thieves were chatting outside and did not realize that an enemy had sneaked in.

"Tang Zhen carefully avoided these people and brought them to the front of the metal building. After sizing it up, Tang Zhen discovered that the main door of the building had already been locked. The surface of the building was as smooth as a mirror. He had no idea how to enter. "

The appearance of a building with a technological aura appeared in his mind. Tang Zhen activated the [ all-purpose electronic kit ] and let it try to scan it. It might be useful.

The application was activated. Tang Zhen looked at the data in front of him and refused to miss a single thing.

"The words that Tang Zhen could understand suddenly changed. At the same time, a strange word began to roll crazily. After a full minute, the words suddenly stopped rolling and a series of prompts appeared in front of him. "

the core secret of the laboratory has been cracked. Highest control has been obtained!

The words disappeared and the smooth metal door quietly opened. Tang Zhen did not hesitate when he saw this. He immediately stepped in and the metal door quickly closed.

“This was a room that was filled with a sci-fi atmosphere. The different architectural style gave one a refreshing feeling. After Tang Zhen looked around for a moment, he slowly walked along the dreamlike building’s passageway. Not long after, he entered a room that was similar to a laboratory.”

“However, after seeing the scene in the laboratory, Tang Zhen suddenly had an impulse to kill!”

“There were more than 30 corpses in the room. They were all broken and there were traces of parasites gnawing on them. Judging from their painful expressions, they must have been cruelly abused before they died.”

“In the transparent container at the side, there were many strange-shaped insects and insect eggs of various colors, which looked terrifying and ferocious.”

“Tang Zhen saw the underwater breathing insect, the face-hugging insect, and the Scorpion-like insect that was parasitic on his arm. As for the other insects, Tang Zhen didn’t know what they were used for.”

“There were too many insects, and Tang Zhen was dazzled by them.”

“A wave of faint moans was faintly transmitted into Tang Zhen’s ears, causing his nerves to immediately tense up. Following the direction of the sound, Tang Zhen carefully moved closer.”

“It was another spacious room. Through a transparent wall, a strange insect close to three meters in size entered Tang Zhen’s sight. It had a dark and solid outer shell and looked very ferocious. However, it seemed to have been dissected as its abdomen had been completely hollowed out.”

“On top of the strange insect’s head, there was a heart-shaped mass of meat. It was covered with red blood vessels, and countless red tubular fibers hung down from it, connecting to the strange insect’s body.”

“Upon closer inspection of the strange insect’s limbs, one could see that it was twitching slightly, which proved that it was still alive.”

What surprised Tang Zhen was that there was currently a naked brawny man standing inside the strange insect’s body. He seemed to have fallen into a deep sleep.

“The brawny man’s body was covered in muscles, but now his body had actually grown together with the insect’s body. It seemed that it would not take long for him and the insect to become one.”

“Tang Zhen felt uncomfortable all over his body when he thought of a human being merging with the strange insect’s body. However, if the appearance was a little more beautiful and he did not need to merge with the insect for his entire life, Tang Zhen would be able to accept it.”

“No matter what was said, this fellow who tried to merge with the insect was someone Tang Zhen had to kill!”

Tang Zhen walked into the room and came in front of the man. He pulled out a pistol from the quick draw holster on his waist and aimed it at the man’s eyebrows.

“As if he sensed the danger of death, that man actually opened his eyes. After seeing Tang Zhen standing in front of him, he revealed an incomparably shocked expression and asked with a hoarse voice, “Who are you? how did you get in?” ”

““Bang!”” ”

“A gunshot rang out, and the man was shot in the middle of his eyebrows. He hung his head down unwillingly. ”

““The person who killed you walked in on his own!”” ”

Tang Zhen pulled the trigger and fired a few more shots at the man’s head. Only after his head was smashed did he reply with a relaxed expression.

?

Chapter 176: The strange insect laboratory

“If Tang Zhen’s guess was correct, the fellow that he had killed with a single shot should be the big boss of the insect bandits. ”

“From Tang Zhen’s point of view, this fellow was a complete lunatic. He had cultivated those strange insects and even used humans for his experiments. The mountain of white bones outside and the wreckage in the laboratory could prove this point! ”

“Perhaps he wanted to pursue greater power, or perhaps it was just a crazy idea, but now he actually thought of fusing himself with the insects. If the experiment was successful, perhaps he would have a strong combat power. ”

“It was just that that kind of neither human nor ghost appearance, just thinking about it made people feel disgusted! ”

“The leader of the insect bandits, who had yet to complete his experiment, was like a helpless lamb waiting to be slaughtered. Despite having a level 5 cultivation, his life was easily ended by Tang Zhen! ”

“This metal building was made of special materials, so it was almost impossible to open it by force. Therefore, the boss of the bug bandits thought that it was extremely safe here, and no one could enter except himself. ”

It was a pity that the boss of the bug bandits never dreamed that someone would be able to crack the password of this building and even obtain the highest control of this place!

“This Big Boss of the insect bandits had done many unjust things, so he deserved to die! ”

“No longer paying attention to that fellow, Tang Zhen began to look around the building. ”

“It didn’t take long for him to find a computer-like device in one of the rooms. Tang Zhen fiddled with it for a while, and through the wireless connection of the [ all-purpose electronic kit ], he learned all the information about the building. ”

Tang Zhen looked at the information that was rolling before his eyes. He combined the information that he already knew and made the following judgment.

“This building also came from another plane. Before it was destroyed, this building was a scientific research laboratory in that plane, mainly used to study those strange insects.”

“The laboratory appeared in the world of loucheng after the main plane was destroyed, becoming part of the wild building.”

And the place where this building appeared was at the edge of the lake!

“At that time, a group of ordinary Wanderers had discovered this wild building. They immediately explored it, and in the process, they found this strange building that was incompatible with the wild building.”

“After cleaning up the building, the insect thieves did their best to move the metal building underground.”

This underground space was once the secret base of the insect thieves. It was the best place to hide the laboratory!

“The head of the insect thieves was lucky enough to obtain the authority to enter this room. Relying on the strange insects in the building, the insect thieves rose rapidly, becoming stronger and stronger, and more and more arrogant!”

“Ever since the big boss of the insect thieves had obtained the strange insects in this building, he had relied on speculation, analysis, and continuous experiments to grasp the characteristics and breeding methods of seven to eight strange insects.”

“However, behind these achievements, countless Wanderers had died an unnatural death!”

“Now that Tang Zhen had obtained the highest authority in this laboratory, he naturally had all the information about these strange insects. After a simple glance at the introduction of these strange insects, Tang Zhen realized that these insects were indeed mysterious. The research results of the insect thieves ‘leader had only scratched the surface at best.”

“For example, the parasites that were like scorpions were harmless. Even if they were to parasitize a human body, they would not cause any harm to the human body.”

“Through the information, Tang Zhen discovered that its ability was not as simple as shooting poisonous stingers.”

“Through a special energy input method, the Zerg could not only shoot out poisonous stingers that were as powerful as bullets, but it could also shoot out compressed energy bullets with astonishing power!”

“As long as they were ordinary human cultivators, they could send the extra energy into the parasite and shoot it out at a critical moment.”

“This kind of energy could be compressed and accumulated, and its power was extremely shocking. Its lethality was not inferior to that of a 100mm grenade!”

Tang Zhen's heart immediately became greatly interested after reading the insect's data. He slowly walked to the transparent containers used to cultivate the insects and picked out a 'Scorpion' that had a purple-black appearance.

"According to the introduction of the laboratory's information, this kind of dark-colored Scorpion was the strongest and healthiest super insect with the most potential for development. Unfortunately, the boss of the insect thieves didn't know what was good, and Tang Zhen got it for nothing."

"Tang Zhen placed the Scorpion in front of his eyes. He carefully sized up this fellow that was continuously struggling. After which, he slowly placed it on his left arm."

"As soon as the Scorpion touched Tang Zhen's arm, its waving claws and tail immediately pierced into his skin and flesh. Its transparent legs began to suck blood. As Tang Zhen's blood entered the Scorpion's body, the originally purplish-black limbs immediately turned blood-red."

"A minute later, the color of the Scorpion's outer shell began to gradually become lighter. In the end, it was actually the same color as Tang Zhen's skin. Half of its body had also sunk into Tang Zhen's arm. At a glance, one would only mistake it as a Scorpion-shaped huge scar!"

Tang Zhen moved his arm and felt that his body was not affected. He then raised his left arm and aimed it at the corpse of the big boss of the insect bandits.

""Whoosh!"" "

"The Scorpion's venomous sting hit its target, creating a hole in the corpse of the boss. It was no less powerful than a bullet!"

"After seeing the power of these scorpions and strange insects, Tang Zhen nodded his head in satisfaction. He decided to cultivate more strange insects in the future. It would be best to give one to every Holy Dragon City soldier. Who would complain about having too many good things?"

"Suppressing his curiosity to test out other bugs, Tang Zhen began to search for the treasure room of the boss of the bug thieves."

"Since this laboratory was regarded as the safest place by the great leader of the insect bandits, he would definitely hide his treasures here. As long as Tang Zhen searched carefully, he would definitely find something!"

"After carefully searching for half a day, Tang Zhen finally found the treasure room of the big boss of the bug bandits!"

"It was a small room filled with a mess of things. There were ores, medicinal herbs, and materials from monsters. The sparkling and resplendent brain beads were mixed among these 'treasures', and it was impossible to tell the number."

"At first glance, it looked like a huge garbage dump!"

Tang Zhen did not have the time to sort it out. He simply put it all into his storage space and prepared to slowly count it when he returned to Holy Dragon City.

“After understanding all the functions of this laboratory, Tang Zhen wanted to take it back to Holy Dragon City and make it his own. However, before that, Tang Zhen had to get rid of all the insect bandits here.”

“After eliminating evil, there was no longer a need for these insect thieves to live!”

“Silently walking out of the laboratory, Tang Zhen carried a military rifle equipped with a silencer and pulled the trigger at the defenseless bug thieves!”

“””Da da da!”” ”

“Even with a silencer, the automatic rifle’s sound was still very loud. However, before the insectoid could react, the cold bullets had already shattered their skulls.”

“After easily dealing with the few insect thieves, Tang Zhen chose a passage and walked in with his gun!”

?

Chapter 177: The imprisoned Wanderer (1)

“Tang Zhen had just entered the tunnel when he saw a group of insect thieves aggressively charging out. Clearly, the gunshots and the miserable cries of a few insect thieves before they died had alarmed them.”

“After the two sides met, without any unnecessary movements, Tang Zhen’s rifle opened fire once again. The bullets seemed to have eyes as each bullet landed on the head and neck of the bug thief, each shot fatal!”

“Tang Zhen’s current reaction speed was extremely abnormal. Coupled with the support from his application, those insect bandits did not have the strength to fight back at all. Even when some of the insect bandits used the Scorpions to spit out poisonous stingers in an attempt to kill Tang Zhen, he was able to easily dodge them.”

“After annihilating this group of insect thieves, Tang Zhen continued to move forward. Seeing another group of insect thieves pouncing over, he casually threw out two grenades.”

The smoke and dust from the explosion had yet to dissipate when Tang Zhen took out his machine gun and fired continuously at the group of dizzy bug thieves.

Tang Zhen did not have any extra thoughts in his mind. All he wanted to do was to kill!

The gunshots stopped and all the bug bandits fell to the ground. Tang Zhen crossed the pool of blood and looked at a bug Bandit who had not died and was staring at him angrily.

“””Who are you? why are you in a rush?”” ”

“””Bang!”” ”

Tang Zhen was simply too lazy to care about this kind of scum and directly ended it with a shot.

“The intense sound of gunfire alarmed all of the bug bandits. They swarmed over and let out strange howls while shooting poisonous stingers at Tang Zhen, throwing javelins and bows.”

“A few poisonous stingers were unable to pose a threat to Tang Zhen. However, once the number exceeded a hundred, it could not be easily ignored.”

“Tang Zhen did not dare to be careless when he saw the dense poisonous stingers peeling off the rocks that he used as cover. After throwing out a few hand grenades, he swiftly dodged to another position.”

“””Ka BA!”” ”

The chain of bullets for the machine gun was used up. Tang Zhen quickly took out the machine gun grenade and bombarded the bug bandits.

“His inventory was filled with ammunition, enough to support the consumption of this battle.”

“When the grenade launcher was empty, Tang Zhen took out a sniper rifle and directly used it as a semi-automatic rifle. The insect bandits were turned over and their bodies filled every corner of the underground space.”

“The insect thieves were frightened. They looked at Tang Zhen, who was like a god of death, and secretly cried out bitterly. They were completely unaware of when they had offended such a ruthless person. Looking at his posture, it seemed like he wanted to exterminate the entire family!”

“The sound of gunfire and explosions rang out, and the screams of the insectoid thieves rang out!”

“Faced with Tang Zhen, an abnormal existence with a high cultivation level, sufficient weapons and strange abilities, the insect bandits did not have any advantage from the start. The longer the battle dragged on, the fewer the number of insect bandits that could continue fighting. After fighting for half an hour, the insect bandits discovered that there were only a few of their companions left!”

“Realizing this, the bug bandits were scared out of their wits and immediately gave up on the battle. The remaining dozens of bug bandits fled along the tunnel.”

“Tang Zhen coldly snorted. He touched his face that was covered in dust, picked up the grapeshot gun that he had just changed, and chased after them.”

“In less than a minute, a continuous muffled sound rang out in the passage, mixed with the screams of the insect thieves, which did not subside for a long time.”

“After the gunshots finally stopped, Tang Zhen walked out with the smell of gunpowder. His entire body was covered in fine bits of meat and blood, making him look abnormally ferocious.”

“Letting out a long breath, Tang Zhen took out a paper towel and wiped the dirt off his hands and face. Then, he got up and went to another passage.”

“After walking for a short distance, Tang Zhen smelled a pungent smell. At the same time, a large row of firm cages appeared in front of Tang Zhen.”

“Tang Zhen’s eyes flashed across these cages. He no longer regretted killing the insect bandits. If he was given a chance to choose again, his methods would likely be even more brutal.”

It was unknown how many people were imprisoned in the long cage. Each and every one of them was dressed in tattered clothes. Their faces were yellow and their bodies were emaciated. Their bodies emitted a foul smell as they looked at Tang Zhen with dull eyes.

“In some cages, some Wanderers were already dead, but their bodies were left there. No one cared about them, and they were left to rot and stink. ”

“When Tang Zhen passed by a cage, he found that it was full of women. It was just that their private parts were not covered at all. Their bodies were covered with dirty filth. After seeing Tang Zhen, they did not have any reaction. It was as if their souls had dissipated, leaving only a weak body. ”

“A bug thief poked his head out from a corner and tried to use a poisonous Stinger to sneak attack him, but he was discovered by Tang Zhen through the map view. He pulled him out and cut off his head without saying a word. ”

I’ve killed all the insect bandits. You’re free!

“When they saw the headless corpses spurting blood, the Wanderers with numb faces finally realized something. Their intermittent voices rang out like a bee’s buzz. All of them begged Tang Zhen to save them. ”

Tang Zhen did not say any nonsense. He released over a dozen men from a cage and ordered them to release everyone.

“For a moment, the cave was filled with the sound of locks being unlocked and tears of joy. Even though the detained Wanderers were seriously injured, they still insisted on climbing out. Then, they touched the ground outside the cage with their faces and began to sob silently. ”

“After everyone was released, a few men who looked tall but had been starved to the point that they were emaciated came to Tang Zhen and knelt on the ground with a “plop” sound, paying their respects to him. ”

Tang Zhen was just about to stand up and refuse when he saw all the Wanderers that had been released kneeling on the ground and kowtowing to him.

“Tang Zhen, who felt a little suffocated in his heart, did not help them up in the end. He merely received their kowtows with an expressionless face. However, everyone noticed that his fists were clenched tighter and tighter, continuously emitting a “crack crack” sound. ”

“After the Wanderers stood up, Tang Zhen spoke to the brawny man who was the leader, I’m the Lord of Holy Dragon City. If you don’t have a place to make a living, you can work at my place. I’ll provide food and shelter, and you don’t have to worry about being harassed by monsters! ”

“When everyone heard this, they were first stunned, then their faces were filled with joy. They lowered their heads and talked. They had just escaped from death, and now they had a place to eat and take refuge. The successive surprises made them suspect that they were in a dream. ”

“The brawny man was not in a hurry to celebrate. Instead, he asked Tang Zhen about the specific location of the Holy Dragon City before he silently retreated to the side. ”

“Tang Zhen glanced at the brawny man before turning around and activating the [ all-rounded digital battle interface ]. Through the communication interface, he contacted Tyson. ”

“””Bring your men to the direction where we chased the insect thieves last time. There’s a Lake here, and I saved a group of Wanderers here.”” ”

“Just as Tang Zhen’s words fell, Tai Seng complained, “” ”City Lord, if I were to bring people to that location, it would take at least half a day. It’s still fine during the day, but at night, Huanhuan”” ”

“Tang Zhen interrupted Tai Seng’s words and asked, “” ”Why did you take so long? You don’t know how to drive, Yingying!”” ”

Tang Zhen’s words came to an abrupt end. He suddenly remembered that the Holy Dragon city’s walls did not have a gate yet. The car could not drive out at all!

“If he had known about this earlier, he would have opened the city gate! ”

“Tang Zhen scratched his head. Just as he was regretting that he shouldn’t have been too careful, he suddenly recalled that other than these Wanderers, he also planned to bring the metal Research Laboratory back. However, how was he supposed to transport such a huge building back? ”

“After thinking about it, it seemed like he could only use the [ terrain transformation plug-in ], which was a gold-gobbler! ”

?

## Chapter 178: Transforming the Holy Dragon City

“In the end, Tang Zhen still opened a passage on the city wall of the Holy Dragon City. Otherwise, it would be too inconvenient to travel. At the same time, he also added a sliding gate to the city gate. ”

“The entire city gate was made of thick and heavy steel plates, and there was a slide at the bottom. Once it was closed, three sides were embedded into the wall, and the bottom was held in place by 12 iron rods as thick as a child’s arm. It was extremely strong, and even a heavy truck would not be able to break it easily! ”

The problem of the city gate was left to the residents of the Holy Dragon City to deal with. Tang Zhen led Tai Seng and the rest to start all the cars in the Holy Dragon City and pulled back the hundreds of Wanderers that were imprisoned by the insect bandits.

“However, when they were pulling people in, Tai Seng pointed to a woman in a cloak and asked Tang Zhen, “” ”How should we deal with this alien?”” ”

“Tang Zhen glanced at the woman. She had unkempt hair and a dirty face, and she was no different from an ordinary wanderer. He had no idea how Tai Seng could tell that the woman was a foreign race. ”

“Tang Zhen retracted his gaze and said to Tessen, if they’re enemies, kill them. If they’re neutral, do as you see fit! ”

Tai Seng nodded his head and ordered his men to help the woman onto a carriage before calling for everyone to set off.

“The mighty fleet of cars slowly left. After an hour, Tang Zhen activated the [ terrain transformation plug-in ] and circled the surrounding area of the lake. Then, he immediately ran!”

“As he ran, the entire Lake and the surrounding desert seemed to have grown legs. They began to closely follow behind Tang Zhen, stirring up a cloud of dust.”

“Tang Zhen, who had a level 5 cultivation, could run a distance of nearly four kilometers in a minute. Coupled with the [ map teleportation plug-in ], he only needed a few days to get the underground space under the lake to the Holy Dragon City.”

“After sleeping in the open for a few days, Tang Zhen finally shifted his target to the back of the Holy Dragon City.”

“This wasn’t the end. Tang Zhen, who had a bulging wallet, used the [ terrain transformation plug-in ] to circle the area ten kilometers behind the Holy Dragon City and used the steep mountains as a barrier.”

“From now on, this place would be the Holy Dragon city’s backyard, mainly used for planting and breeding!”

“In this way, it could greatly alleviate the food supply problem.”

“This series of actions took Tang Zhen nearly twenty days. When he finally finished, the entire sacred Dragon Valley had completely changed.”

Tang Zhen’s hard work and gold coins were not in vain. The current Holy Dragon Valley had become even tidier and more beautiful. It was filled with vitality everywhere!

“Every morning, after the residents had breakfast, they would put on clean clothes and go to work. With their efforts in construction, The Peach Blossom Spring in the wasteland was changing every day, and laughter was everywhere!”

“Currently, the number of residents in the Holy Dragon City had already exceeded a thousand. To Tang Zhen, this was a very meaningful matter. It made him feel that what he was doing was not meaningless.”

“The Wanderers that were rescued the last time were all young and strong. After they were brought back to the Holy Dragon City for inspection for a period of time, Tang Zhen allowed them to join the Holy Dragon City, making these people grateful. Now, everyone was working hard to make themselves worthy of this trust.”

“Tang Zhen, who finally had some free time, began to stroll around the sacred Dragon Valley. However, no matter where he went, a girl wearing a black leather jacket and leather pants would follow behind him. She looked just like Tang Zhen’s shadow!”

Tang Zhen turned his head and glanced at the fellow beside him who was even more beautiful than a woman. He could not help but curse Tai Seng in his heart.

He was the foreign woman that they had brought back from the bug thieves 'lair. It was only when he was giving the stinky Wanderers a bath that everyone realized that he was actually a man!

"What a beautiful face, what a perfect figure, he was simply the best among women, but this guy was a good man. At that time, everyone's eyes fell out of their sockets in shock! "

"What was even more unacceptable was that this guy was clearly a man, but his character was as soft as water, with a look of pity, and his movements were almost no different from that of a woman. "

"you're courting death! Tai Seng, who had planned to give him to Tang Zhen as a maid, couldn't wait to throw him over. When Tang Zhen saw the disdainful expression on that fellow's face, he immediately gave him a hard kick in the butt. "

"[ you think it's disgusting, but do you think I'm not worried? what does this mean? does he not take the city Lord seriously? ] "

"you're Xuanji yuelang, right? you said you're a half-elf and have been to the Royal elven city. Can you tell me what you've seen there? "" "

Tang Zhen walked on the back Valley's main road that had just been opened up as he asked the beautiful fellow behind him.

"The half-elf named Yue lang immediately laughed and replied with a bell-like voice, "" ""Since the city Lord wants to hear it, then I'll tell you."" "

This coquettish voice caused Tang Zhen's entire body to shiver. He forcefully resisted the urge to hit her and revealed an expression of being all ears.

"the elven capital is the holy city in the hearts of all elves. This city is a massive world Tree, and countless elves live around it. At the same time, there are other races from the endless wilderness who admire the beauty and prosperity of the elven capital and live around it all year round, unwilling to leave. "

"I've heard people say that the elven race's buildings are all connected to the world Tree, so they'll suffer losses together. That's why the elven race is the most United and arrogant. There are very few races that they treat with respect. "

"In addition, the proportion of Holy Masters in the elves was very high, and the cultivator team was also very famous. Ordinary foreign races and monsters did not dare to cause trouble in the areas controlled by the elves, or they would be severely punished. "

"Humans don't have a good life in the fairy clan's territory, and most of them are treated as slaves. Since the fairy clan hates dirty things, they won't allow Wanderers to exist in their territory!"" "

Yue lang spoke with great energy and Tang Zhen also listened attentively. It didn't take long for the two of them to arrive in front of a large piece of land.

"This was a piece of fertile land that Tang Zhen had moved using the [ terrain transformation plug-in ]. Now, it had been cultivated and various grain crops were planted. As far as the eye could see, the fields were filled with busy Holy Dragon City residents who were fertilizing and watering. "

“Tang Zhen looked for a while before turning to Yue lang and asking,“”since you’ve been to so many places, then tell me, how does Holy Dragon City compare to those places?“” ”

“Yue lang chuckled upon hearing this. He looked at Tang Zhen and shook his head,“”City Lord, there’s no way to compare. Those towers have their own races to rely on, so it’s understandable for them to be prosperous and powerful. Holy Dragon City, on the other hand, was built by you. The starting points of the two are completely different. ”

“Although the Holy Dragon City is still very weak, it is the city with the greatest potential for development that I have ever seen. With you here, I think that it is very possible for the Holy Dragon City to be promoted to a level 10 city!“” ”

“After witnessing Tang Zhen’s magical ability for the past few days, yuelang was shocked by Tang Zhen. These words were said from the bottom of his heart. It was also because of this that yuelang, who had half elven bloodline and a trace of pride in his bones, was willing to serve Tang Zhen. ”

“In the hearts of the elves, they were the noblest race. Even if they were half-elven, they were still much nobler than the lowly humans. If Tang Zhen was an ordinary human city Lord, even if Yue lang was submissive to his tyrannical abuse of power, his heart would still be filled with contempt. How could he be as humble and respectful as he was now! ”

“Strength determined everything, and it was the same everywhere! ”

?

Chapter 179: The missing purchaser

“At the entrance of the flashing gold race’s sanctuary, Tang Zhen watched as the residents carried out bundles of golden cloth. He curiously walked forward, planning to see what was going on. ”

“After seeing Tang Zhen walk over, the residents immediately greeted him. After Tang Zhen gestured for everyone to dispense with the formalities, he carefully examined the Golden cloth. ”

“This kind of cloth felt very soft in his hand and was no different from ordinary cloth. However, when Tang Zhen forcefully tore it, he discovered that the toughness of this cloth was simply beyond his imagination. ”

“Tang Zhen’s curiosity was piqued. He immediately used the purple electric short sword to cut off a large piece of cloth. After conducting electricity, burning, soaking in water, and acid corrosion, he was able to figure out the properties of this cloth. At the same time, he was able to confirm that the material used to weave this golden cloth was a special kind of insulating metal thread. ”

“””Where did you get these metal cloths, and how many are there in total?“” ”

Tang Zhen found the foreman and asked.

“my Lord, these metal cloths were moved out from the third floor of the sanctuary. There are more than 500 bundles in total. The ones that were moved out earlier have already been stored in the warehouse. These are the last batch! ”

“The foreman was very respectful, and he answered the questions in a straightforward manner.”

“Tang Zhen nodded when he heard this. He secretly thought that if this kind of metal cloth was used to make clothes, it would be an extremely good material. It could completely block the penetration of ordinary arrows and greatly increase the defense of soldiers!”

“The flashing gold clan had a lot of good things. This kind of metal cloth was very good. When he had time, he would ask the Queen of the flashing gold clan about the weaving and sewing method of this metal cloth. If it wasn’t too troublesome, Tang Zhen was prepared to make more for storage.”

“The figure of the Queen of the flashing gold race flashed in front of his eyes. Tang Zhen’s expression was serious. He did not dare to let his guard down against this mysterious and strange woman. He did not believe that this woman would compromise so easily. She might be brewing some scheme in her heart, waiting for him to jump into the pit.”

“The Queen of the flashing gold race had returned to the fourth underground floor. The space on the upper three floors had been vacated for the Holy Dragon City to clean up. However, no one from the Holy Dragon City had entered the fourth underground floor so far.”

“The body for the soul to reside in had yet to be fully cultivated. Tang Zhen was not in a hurry to have a showdown with the Queen of the flashing gold race. He intended to give this woman a chance. If she was still stubborn and wanted to plot against the Holy Dragon City, Tang Zhen would not mind letting the flashing gold race become history.”

“As for the mechanical puppets of the flashing gold race, Tang Zhen had also researched some names and found a way to restrain them. However, he was not sure about the specific effects!”

“While Tang Zhen was racking his brain to think of a way to deal with the Queen of the flashing gold race, in the base of the United States in kimchi country, more than a dozen military senior officials and some military experts were gathered together, discussing their latest findings with serious faces.”

“through the analysis of the samples collected from the dock last time, we found several unknown substances in it. We can basically confirm that they don’t belong to earth.”

“In addition, a strand of hair was found at the scene. After analysis, it should belong to some unknown creature. This creature’s muscle density is extremely high, and I believe it is an extremely powerful beast!”” ”

“After the expert finished speaking, he nodded and looked at the information in his hand.”

“Another expert spoke. He pointed at the content displayed on the screen and said, “” “”The mysterious theft at the dock and the missing container are the same as the theft at the Arsenal at the military base. I believe they’re all done by the same organization.”

“According to the information we’ve received, a similar thing has happened in the ice Bear Alliance, but they’re very strict with keeping information confidential. So far, we haven’t gotten enough information, but we think there must be a connection between the two!”” ”

“After the expert finished speaking, a man in a black suit said, “” we’ve already sent out our elites, and I believe it won’t be long before we get valuable information. However, this time it involves supernatural

forces and unknown creatures, should we invite more experts in this area to cooperate with the investigation? "" "

the military has already contacted a few experts in this area and they're on their way. I believe that ...

"Before the officer could finish his sentence, there was a knock on the door. Then, an officer walked in and said to everyone, "" an unknown energy has appeared at the dock. The Special Forces stationed there have begun to move. The current situation is unknown! "

.....

"Tang Zhen, who had activated the [ quantum invisibility light screen ], walked out from the grass. He dusted off the dust on his body and began to slowly move along the road. "

"This time, he returned to his original world to purchase some sewing machines and other things. Who knew that as soon as he completed the teleportation, a group of fully armed soldiers rushed over, and the target was the position he was teleported to! "

"Tang Zhen, who saw this scene, immediately realized that he had been caught by the tail. It made sense when he thought about it. Bizarre theft cases had occurred one after another at this dock, and the method was the same as the incident at the military base. It would be strange if the other party did not use the method of waiting for the rabbit to come out of the tree stump! "

"Without saying anything, he directly activated the [ minimum teleportation plug-in ] and ran to the side of the road several kilometers away in the blink of an eye. "

"He would just let those guys torment themselves, it would be a miracle if they could find him! "

"As he thought about this, Zhen Tang took out his phone and dialed the number of the young man he had chosen as the purchaser. Unfortunately, after calling twice, the other party's phone was turned off. "

"She had told him to turn on his phone all day long so that she could contact him easily. Now, this guy had turned off his phone. Could it be that he had run away with the money? "

"The gold was worth a lot, and he wondered if this guy had any ill intentions. "

"Tang Zhen thought for a moment before activating the [ all-purpose electronic kit ] and began to search for the location of the phone. At the same time, he forcefully turned it on and opened the call mode. "

"When Tang Zhen turned on the application, in a room in a remote corner of the city, a mobile phone placed on the table suddenly turned on. Its screen flashed and then fell into darkness, but the communication and camera functions were already turned on. "

"At the same time, a three-dimensional map of the city appeared in front of Tang Zhen's eyes. The red dot on the map indicated the location of the mobile phone. "

"The camera was turned on. Tang Zhen could only see darkness, but there were intermittent sounds transmitted over. "

“A few men who spoke in kimchi language were talking in low voices. The content of their discussion involved information, remuneration, plans, and other words. Perhaps it was because they were too far away from the phone, Tang Zhen could only hear a rough idea. ”

All of this wasn't important. Tang Zhen only needed to determine the location of the phone and directly kill his way in.

Tang Zhen called a taxi and directly rushed to the location marked on the map.

The taxi finally stopped on a Street that was filled with low-rise buildings. Tang Zhen walked down from the taxi and swept his gaze over the surrounding environment. He tidied up the wind Coat that was used to cover his cloak before walking out of the street.

“After walking along the winding alley for a while, Tang Zhen stopped in front of a two-story building. He planned to push the door and enter, but he discovered that the courtyard door was tightly locked. He took out the purple lightning short sword, inserted it into the gap of the door, and made a cut. The lock on the door was easily cut off, and Tang Zhen stepped into the small courtyard. ”

A brawny man came out to take a look after hearing the sound of the door opening. He immediately saw Tang Zhen standing in the courtyard. His expression changed as his right hand quickly reached for his waist.

“However, just as his fingers touched the gun handle, he was knocked unconscious by Tang Zhen's punch. ”

“Stepping over the brawny man, Tang Zhen entered the house. When he saw another two men with weapons coming over, he immediately fell to the ground and went straight to the cell phone in the room. ”

“On the messy table, there was a black mobile phone. It was the young man's communication tool. However, the mobile phone was here, but the young man was nowhere to be found. ”

“Tang Zhen looked at his phone, and an ominous feeling suddenly gushed out in his heart. ”

?

Chapter 180: Collecting the scattered spirits

“Putting away his phone, Tang Zhen dragged a man lying on the ground to the sink, turned on the tap, and poured water on him.”

“After being splashed by the cold water, that person immediately woke up. He dizzily wiped his face and immediately started to struggle. Unfortunately, Tang Zhen's hand was as hard as iron and he was unable to break free.”

“””Where did the owner of this phone go?”””

Tang Zhen took out his phone and waved it as he asked the man.

“The man, whose face was covered in water, had a fierce expression as he roared at Tang Zhen, who the f\*ck are you? do you think I won’t kill you? ””

“Tang Zhen sneered when he heard this. He took a badly maintained pistol from the man’s waist and stared at his head as he coldly said, ”Don’t talk to me with such an attitude, or you’ll lose your life.””

“Feeling the killing intent from the cold muzzle, the man finally calmed down and said in a low voice, ”that guy knew a lot about us. The boss asked us to kill him just to be safe. His body is in the basement, and we haven’t had time to deal with it yet.”

Tang Zhen’s expression was grave as he nodded his head. He knocked the man unconscious with the butt of his gun and casually threw him on the ground.

“In the basement, Tang Zhen’s face was filled with unwillingness as his eyes widened when he saw the young man’s body.”

“Tang Zhen patted the young man’s face and shook his head, you’re really unlucky, kid. You just met me, a rich man, and before you could get rich, you were killed. You must be full of grievances before you died, right? ””

The dead couldn’t speak. Tang Zhen’s behavior was just a kind of dark humor with a hint of self-mockery.

“Although this young man had not followed him for a long time, he was still considered his subordinate. Tang Zhen’s heart was naturally filled with anger when he was killed just like that. However, before this, he still wanted to see if this unlucky fellow’s soul had dissipated.”

“If his soul was still there, Tang Zhen had the confidence to resurrect him. If it had already dissipated, Tang Zhen would be helpless.”

“He took out a pistol and opened a hole in the young man’s head. Tang Zhen put a brain bead in and took it out ten minutes later. However, he found that only less than half of his soul power had been injected.”

“Tang Zhen shook his head. The young man had been dead for too long, and more than half of his soul had already dissipated. Even if he was resurrected, he would most likely be a fool with incomplete intelligence. There was no meaning in doing this.”

“After looking at the brain in his hand and thinking for a while, Tang Zhen opened the application store. After searching for a while, he found an application.”

“spirit body seeker, able to scan all spirit bodies within a set range. It also indicates the spirit body’s energy strength and type. Download price: 20000 gold coins.”

“This application belonged to the fantasy secret technique category. Tang Zhen had long read the introduction about it, but he had never had the opportunity to use it. Now, it seemed that he could use it.”

“Although the download price wasn’t cheap, when he thought about how he had to rely on this thing to collect the young man’s scattered soul, he was afraid that he would need it more in the future. Tang Zhen immediately paid the gold coins and chose to download and install it!”

“After the application was activated, a gloomy and terrifying interface immediately appeared in front of Tang Zhen’s vision. It was as if the entire world had turned into the netherworld. It made people shiver with fear.”

“According to the application’s explanation, the scene that Tang Zhen was seeing now was the world where his soul was. It existed as a part of the normal world and was not seen by others. Because of the existence of resentment, it was filled with desolation and loneliness!”

This was a strange world that looked extremely terrifying!

“After Tang Zhen walked one round around the house that was constantly emitting black smoke, he entered the soul fluctuation of the young man and began to search.”

“Like a radar wave, a green halo constantly spread out with Tang Zhen as the center. It passed through the buildings that were constantly emitting black smoke and spread to an extremely far place.”

“Not long after, a Green Dot of light appeared in front of Tang Zhen. Tang Zhen glanced at the location on the map and immediately rushed towards the location of the target.”

“He had to race against time for this kind of thing, so his speed was very fast. In less than five minutes, Tang Zhen had already appeared in a remote alley.”

“In Tang Zhen’s eyes, this small alley that was extremely ordinary in the eyes of an ordinary person was actually a place filled with strange scenes. Many strange things were entrenched here. The faintly discernible spiritual body of the young man was standing here with a blank and ignorant face.”

Tang Zhen stepped forward and touched the young man’s forehead with the bead of the brain in his hand. The young man’s spirit body was immediately absorbed into the bead of the brain.

Tang Zhen shook his head. He swept a glance at those strange things that were restless before he turned around and left the small alley.

“There were too many secrets in the world. Tang Zhen was not interested in being an old pedant. He had to figure out everything that he didn’t understand. As long as it had nothing to do with him, Tang Zhen was not interested in it.”

“After obtaining the first scattered spirit body, another Green Dot of light appeared in Tang Zhen’s field of vision. However, this Green Dot of light was a little far away. It seemed to be at the other end of the city.”

“Tang Zhen got into a taxi and ran towards his destination. After passing through the bustling city and running for a while, Tang Zhen finally arrived at his destination.”

“This was a very high-end villa. The greenery inside was very good, exquisite and pleasant, but the high walls and courtyard blocked the view inside.”

Tang Zhen stood at the door and took a look. He then jumped in and went straight to the location of the young spirit body.

“After sneaking into the villa’s room, Tang Zhen saw the young man’s spirit body. However, at this moment, he was blankly looking at a woman who was sleeping on the sofa. His wooden face seemed to be filled with something called ‘happiness’.”

Tang Zhen glanced at the woman and discovered that her appearance was not bad. She was gentle and moving. Her figure was also very well-proportioned. No wonder the young man’s spirit body was unable to take his eyes off her.

This young man’s spirit body didn’t go anywhere but this woman’s house. There was obviously a reason he didn’t know. Could it be that he had been secretly in love with this woman and was brought here by his obsession after his death?

“Tang Zhen was not in the mood to investigate this gossip. He walked forward and kept the young man’s spirit body. At this time, the brain was already filled with soul power and could be used to complete the secret technique of soul lodging.”

“Tang Zhen was just about to turn around and leave when he saw a slightly chubby man walk into the room. He was first stunned when he saw Tang Zhen. Immediately after, he was about to open his mouth and shout, but unfortunately, Tang Zhen smashed a teacup at him and directly fainted on the ground.”

“After walking out of the villa, Tang Zhen stood on the side of the street and waited for a car. He was prepared to run his own errands and collect the materials needed to resurrect the young man.”

“Tang Zhen, who was waiting for the car, didn’t notice that a black car was passing by not far from him. It quickly turned back and slowly stopped by the roadside.”

A woman wearing black sports attire with a hat covering her head and a pair of color-changing glasses on her face jumped out of the car. She slowly walked over from a direction that Tang Zhen couldn’t see.

“Tang Zhen casually took out a cigarette. He had just lit it when he felt a hard object pressing against his back. At the same time, a low shout was transmitted into his ear, ““Don’t move, or I’ll shoot!”””

“Tang Zhen was startled. From the map view, he saw the woman standing behind him and the gun she was pointing at him.”

“““Officer han, what a coincidence!”””

Tang Zhen held a cigarette in his mouth and laughed. His face was filled with disapproval. He was wearing a black cloak and was not afraid of being shot by such a gun.

Tang Zhen’s original plan was to take action and restrain the other party before leaving.

“However, when Tang Zhen remembered the organization that had killed the young man, he decided to fill in the gaps and let the kimchi police deal with them.”

“If it wasn’t because he didn’t have any free time, this matter would have been personally handled by Tang Zhen!”
