

Alternate 1831

Chapter 1831 The mysterious Tang Zhen (1)

After seeing the changes in the town, other than Tang Zhen, the other members of the adventurer team who had doubts were already dumbfounded.

No one would have thought that in the blink of an eye, the town had become like this!

This was a disaster, a disaster that was enough to shock the entire world. In the history of this Island, such a thing had never happened.

Looking down from above, they could see all kinds of sea monsters wreaking havoc in the town, devouring the lives of the people who were fleeing in panic.

Cultivators and ordinary people had no power to resist these sea monsters.

One had to know that a small half of these sea monsters were King-tier monsters. Who could stop them?

“BOOM!”

There was another loud noise, and the ground in the center of the town bulged up. The buildings collapsed one after another, and then a giant turtle that was nearly a thousand meters long suddenly appeared.

The giant turtle seemed to have lived for countless years, and even the sharp bone spikes on its back seemed to have a trace of vicissitude.

At this time, there were a few big trees on the turtle's head, which looked very funny, but no one who saw this scene could laugh.

Anyone could tell that this was definitely a terrifying monster. The surrounding sea monsters all avoided it as if they were avoiding a flood.

An aura that far exceeded king class was released, and one could clearly feel the rhythm of the laws. This proved that this sea monster was not simple.

After this giant turtle sea monster appeared, it didn't wreak havoc like the other sea monsters. Instead, it raised its huge head and looked up at the sky.

In the giant turtle's perception, there was a powerful existence that far exceeded its level, and it seemed that it could kill it with a move of its fingers.

If it was any other time, the giant turtle would definitely stay far away and would never provoke such a terrifying existence.

But at this moment, it took the initiative to come forward because the mysterious and powerful person was summoning it.

After a dozen breaths, the turtle seemed to have received some kind of hint and turned its head to the side.

It moved its heavy body slowly in the town, the buildings were like weeds under its body.

In the end, the turtle stopped in front of the cave entrance where Tang Zhen and the others had been trapped. It slowly lay down as if everything in the surroundings had nothing to do with it.

Wisps of Origin Energy were being slowly absorbed by the sea monster turtle. Its huge eyes seemed to be filled with joy.

In the cave behind the giant turtle, a miner pried open the stone and was about to escape.

When he looked up, he saw a giant turtle the size of a small mountain lying in front of him. He was so scared that he immediately shrank back.

The giant turtle seemed to have noticed this, but it did not care. Instead, it moved its body slightly and firmly blocked the entrance of the cave.

The miners trapped in the cave trembled and kept praying that the heavens would open their eyes and not let the monsters eat them.

Some of the miners secretly regretted that they should not have been greedy for the reward and come all the way here to earn this money.

Because of the giant turtle, the sea monsters didn't dare to go too deep, making it the safest area in the town.

Perhaps it was because the sea monster had caused too much damage, the town's ground had caved in. Because of the underground tunnels, it had become a huge Lake in a short time.

The once prosperous town had now completely sunk into the water, and there was no trace of its existence on the surface.

There was an isolated island in the middle, where a huge sea turtle was sitting. It was looking at the sea monster that was wreaking havoc in the water coldly.

As if it felt that it was about time, the giant tortoise suddenly raised its neck and let out a deep roar, shaking the air in the entire Valley.

Its aura had clearly become stronger.

The sea monsters that had been running around seemed to have been frightened and fled through the underground tunnels and rivers, disappearing in an instant.

The giant tortoise seemed to be very satisfied with this scene. It narrowed its eyes and looked at a certain spot in the sky. Its huge head nodded twice.

Moving its heavy body, the giant turtle slowly entered the water and quickly disappeared.

After waiting for a while, a light sound came from the blocked cave, and a miner stuck his head out.

When he realized that the giant turtle had left, he informed his companions and carefully walked out.

But when they saw the surrounding scene, the miners hired from outside were all stunned in place, their faces full of shock and joy.

The original town had long disappeared, and in its place was a vast ocean with strange dark red waves. Looking around, apart from this isolated island, there was no trace of any living person.

.....

The giant bird flew slowly in the air, and there was only a short distance left to the Academy.

The passenger cabin was silent. This situation had been going on for a long time.

Ever since they had witnessed the great changes in the town that day, the members of the adventurer team looked at Tang Zhen with a deep sense of respect and a trace of fear that was hard to detect.

No one would have thought that the reason why Tang Zhen insisted on staying behind was to let them witness the destruction of a town with their own eyes!

The town that had been hostile to them had completely disappeared from this world. As for those indifferent cultivators, they had all been buried in the stomachs of the fish without exception.

The adventurer team members who had witnessed the entire scene had already forgotten how they had left. It was only after they were far away from the town that they regained their senses.

On the way back, no one talked about what they had just witnessed, as if it had never happened.

However, the adventurer team's members were all pondering the same question: why had such a thing happened?

Coincidentally, they recalled the words that Tang Zhen had said as well as the various things that had happened after that.

All the evidence showed that this matter might be related to Tang Zhen. Otherwise, there was no way to explain his actions at that time.

They had been resentful of the actions of the cultivators in the town, but at this moment, no one cared about that.

Although they had been treated unfairly, at least they had kept their lives. Those cultivators who had ignored their safety had already paid the price with their lives.

Taking a step back, perhaps this matter really had nothing to do with Tang Zhen. However, the fact that he was able to know about these things in advance was already shocking enough.

Tang Zhen, who was originally extremely mysterious, had become even more mysterious now. At the same time, he had an additional label that he could not be provoked.

...

Tang Zhen's heart was as calm as water towards the adventurer team's members "reverent and distant gazes, not caring at all.

Originally, he only wanted to attack those cultivators, but after hearing the young man's reminder, he changed his mind at the last minute.

There might be innocents in the city, but most of the residents were not as simple as they looked.

Some of them were Pirates, while others specialized in robbing and killing adventurers who came here. They were engaged in shady business.

The boss behind the dark and thin boss was actually the city Lord of this town, but very few people knew about it.

It could be said that snakes and rats were in the same nest.

The young man knew many secrets of this town, and more than half of them were ugly and dirty.

Therefore, the young man begged Tang Zhen, hoping that he could destroy this town. It would be best if it disappeared completely.

The young man was born here and did not want the place where his clansmen once lived to continue being sullied by such a group of people.

Tang Zhen naturally had no reason to reject the young man's request.

Moreover, to Tang Zhen, the destruction of a city was not worth mentioning compared to the destruction of a plane.

...

The number of living beings that had been obliterated directly or indirectly because of him was more than ten billion. Why would he care about a town full of malice?

As a sector Lord of the tower world, Tang Zhen's life form was already completely different from normal people. Even if it didn't reach the level of looking down on all living beings like ants, it wasn't too far off.

Therefore, while the members of the adventurer team were still thinking about this matter, Tang Zhen had long thrown this matter to the back of his mind and was not the slightest bit worried.

On the table in front of him, there was a pile of something like glue. It could change its shape at will, disappearing and reappearing from time to time.

Even though this thing didn't have an outstanding appearance, it was a special creature that Tang Zhen had cultivated. It could be used to freely enter and exit the crystal wall of the creation ball.

It was just that this thing was still in its infant state and needed to be nurtured for a period of time before it could be officially put into use.

Looking at the little thing rolling around on the table, Leah, who was reading a book next to him, smiled. She picked up a fruit from the plate and pressed it on the little thing's head.

The little thing melted like water and wrapped around the fruit. A few seconds later, it spat out a fruit core.

The flying fruit core happened to hit The Beastmaster's head. The other party turned around to take a look, a helpless smile on his face.

The beast Tamer ignored the little thing that was randomly jumping around on the table. He walked in front of Tang Zhen and bowed to him.

“Sir Tang Zhen, we’ve already arrived home.”

Chapter 1832 You siblings should go to school (1)

Without the reminder of the animal controller, everyone had already seen the familiar scenery on the ground through the window.

Seeing that they had returned to their homeland, everyone couldn’t help but have mixed feelings.

The team’s adventure this time did not achieve their expected goal. On the contrary, a few members had unfortunately died, which made everyone’s mood much heavier.

The Fortune within the misfortune was that their team had Tang Zhen.

If he had not turned the tide at the critical moment and killed the monsters that were taking lives, none of them would have made it back.

Everyone had been observing Tang Zhen’s performance during this period of time and had many speculations about him.

No matter what the result of the guess was, there was one thing they agreed on, and that was that this person couldn’t be easily provoked. He was definitely not as simple as he seemed on the surface.

In the world of artisans, there were actually some hidden clans. Although they were not famous, they had extremely powerful strength.

Therefore, some people secretly guessed that Tang Zhen, whose identity and background were extremely mysterious, might have come from these hidden clans.

Some people even secretly guessed that the monster that destroyed the town was very likely related to Tang Zhen. At least, he knew that the sea monster was about to attack the town.

Otherwise, how could he explain that he knew about the sea monsters destroying the town and warned them in advance so that they could avoid another disaster?

As for the monster that destroyed the cave, no one linked it to Tang Zhen. Instead, they thought that it was related to white.

This was because he had used the beast lure that the city Lord had concocted during the competition. Tang Zhen had not added anything from the beginning to the end.

Perhaps it was this beast lure that attracted the sea monster, which led to a series of changes.

As for what the actual reason was, it was impossible to determine based on mere speculations. However, there was one thing that kept them in mind.

When Tang Zhen made a bet with white, he signed an IOU of 100 million gold coins. It was unknown how Tang Zhen would get it back.

In the world of artisans, they were naturally the most respected. The city Lord wasn't a powerful figure, but he still had a lot of influence.

Not to mention, the city Lord was also an intermediate artisan and had quite a reputation in the city's inner circle.

The city Lord had just lost his son. If he were to encounter a matter like this again, he would probably go crazy with anger.

"If this Tang Zhen dares to come and collect a debt, there will really be a show to watch."

One had a mysterious background and extraordinary means and strength, while the other was the city Lord. Sparks would definitely fly when the two of them clashed.

It didn't take long for the big Bird to land on the square in front of the school Hospital, and everyone walked down in order.

"Sir Tang Zhen, this is my business card. If you need anything, you can come and find me at any time."

An artisan came forward and handed a well-made business card to Tang Zhen. He cupped his hands and left.

this is my business card. Please come to my humble home when you have the chance to. Let me express my gratitude.

Another artisan walked up and handed his business card to Tang Zhen with a smile on his face.

The other members of the adventurer team also said goodbye to Tang Zhen one after another and expressed that they would visit him more often if they had the opportunity.

Although they did not participate in Tang Zhen's experiment in the cave, they saw the results of the experiment.

If there were no accidents, Tang Zhen would soon pass the review and become an official artisan.

If the results of his experiment were as expected, he might directly become a 3-star artisan, an existence that they had to look up to.

With such a bright future, everyone naturally wanted to make more friends, which was equivalent to paving the way for their future.

After everyone had left, Leah looked at Tang Zhen. After making an appointment to meet tomorrow, she hurriedly returned home.

After experiencing so many unforeseen events this time, she had to tell her family everything so that they wouldn't worry about her.

It was absolutely impossible to keep the secret. Whether it was the deaths of those members or the matter of the town being destroyed, it would probably spread like wildfire.

Tang Zhen got on a car at the school gate. At the same time, he took out a gold coin and inserted it into the coin slot on the back of the car.

Then, the strange-looking car, which was actually a living thing, started to run down the street.

Tang Zhen only needed to direct the direction from the seat, and the car would send him to the designated place and automatically find new passengers.

It wasn't the first time Tang Zhen had ridden in this kind of car, so he wasn't unfamiliar with it. He had even specially studied it before.

It was said that every night when they finished work, these eight-legged cars would automatically return to the resting place and open the coin slot for people to take out the coins.

After that, these cars would eat and drink. When they were full, they would run to the pen to rest and continue working the next day.

It was said that the creator who bred this creature had earned a huge amount of gold coins, and his business was almost spread all over the world.

This was the advantage of being an artisan. As long as their research results were widely used, it meant that they would have an endless stream of gold coins in their pockets.

Tang Zhen returned home along the lively Street. He saw that the siblings were cleaning the room. Regardless of whether it was the floor or the furnishings in the room, everything was cleaned until there was not a single speck of dust.

After seeing Tang Zhen return, the sister and brother's faces were filled with joy. They quickly went forward to help him change his clothes and prepare to cook at the same time.

"Don't worry about me. I still have an experiment to do. You two eat first."

Tang Zhen was very satisfied with the performance of the siblings. After praising them, he took out some gold coins from his pocket.

"In the future, if there's anything you need to buy at home, just buy it directly. There's no need to be too frugal. I don't lack your gold coins."

Tang Zhen saw the food on the table the moment he entered the room. It could be described as plain food.

Seeing the gold coins Tang Zhen handed over, the older sister hurriedly waved her hand to refuse. At the same time, she explained in a soft voice, you still have a lot of gold coins left from last time. Please don't give me more. Otherwise, I won't be able to sleep well at night with so many gold coins.

His younger brother also nodded quickly, as if he couldn't bear to be disturbed. Perhaps protecting these gold coins made him worry a lot.

Tang Zhen did not force him upon seeing this. He smiled and took out a few items from his storage equipment, which he placed in the hands of the siblings.

"This is the gift I picked for you and your brother when I went out this time. Remember, you are not allowed to refuse."

Seeing the package in Tang Zhen's hand, the siblings hesitated for a moment before extending their hands to receive it. At the same time, they repeatedly thanked him.

"If we didn't meet Mr. Tang Zhen, the two of us might still be wandering on the streets without even having a full stomach.

...

You provide us with free food, accommodation, and even pay us our wages. This is more than enough for us.

I heard that an artisan needs to spend a lot of gold coins to do experiments, so please don't buy anything for me. We really don't need it."

The older sister held the package in her hands, but a trace of tears appeared in her eyes as she spoke to Tang Zhen in a choked voice.

Her younger brother did not say anything. Instead, he clenched his fist tightly and nodded at Tang Zhen with all his might.

"This small expense is nothing to me. Don't always think of it as something to be ashamed of or to repay my kindness.

I like to do things as I please, and when I encounter something that I can help with, I will definitely not stand by and watch.

If you really want to repay me, there's one thing you can do for me."

When they heard Tang Zhen say that he needed help, the siblings hurriedly nodded and didn't ask what Tang Zhen wanted them to do.

As long as it could be of help to Tang Zhen, the two of them would not hesitate.

Tang Zhen laughed softly when he saw the siblings staring at him, waiting for him to state his request.

Even lowly people were grateful. Sometimes, they would hesitate because they had too many things to consider.

...

This pair of siblings had nothing, but they were even more free and easy, and their hearts were even purer.

"Actually, the requirements are very simple. I will need an assistant when I do experiments in the future, and it must be someone I trust.

Since you two want to help me, then starting tomorrow, you two will go to the creator Academy to study.

In this way, you can help me with my experiments while reading. Do you understand?"

After hearing Tang Zhen's arrangement, the brother and sister were stunned on the spot. They had surprised and at a loss.

Never in their dreams would they have thought that Tang Zhen's so-called help was actually to send the two of them to the creation Master Academy to study.

The opportunity that many people could not even dream of was placed in front of them just like that. No wonder the two of them were at a loss and their minds were in a mess.

How was this helping Tang Zhen? it was clearly a pie that fell from the sky. Moreover, it was a golden pie that was enough to completely crush people!

Chapter 1833 Challenging the city Lord's residence (1)

After being stunned for a few seconds, the elder sister was the first to shake her head and refuse, indicating that she wasn't a material for learning to be an artisan.

After rejecting Tang Zhen, the older sister turned her head and looked at her younger brother. Her eyes carried a trace of guilt and heartache.

She was very clear that entering the creator Academy had always been the dream of her brother and father.

Now that the opportunity was right in front of her, she didn't know if her brother would hate her if she rejected it.

As expected, her younger brother revealed a hesitant expression. Tang Zhen's words earlier were definitely a huge temptation to him. It was really difficult to reject it.

!!

After a moment of silence, the younger brother raised his head and looked at Tang Zhen with a very serious expression.

"I know you're doing this for my sister and me, and I really don't want to miss this opportunity. Otherwise, I might never have the chance to become an artisan in my life.

But you've already helped me and my sister too much. If you continue to sponsor our studies, I really don't know how to repay your kindness."

Tang Zhen shook his head as he looked at the young man who had a hesitant expression. He used an indifferent tone to say, "If you're grateful and want to change your fate, then you can't miss this opportunity.

Only by working hard to become a true artisan can you take better care of your sister and repay me.

Those who had dreams in their hearts must seize the fleeting opportunity even more. They must never hesitate, or else their dreams would never come true.

Now, you can tell me what you really think."

After hearing Tang Zhen's words. The young man clenched his fists tightly and nodded his head.

thank you for giving me this opportunity. I would like to study at the creator Academy.

Tang Zhen revealed a satisfied expression when he saw that his younger brother had finally made up his mind. The first step of his plan had also finally gotten off to a good start.

In Tang Zhen's plan, not only did he have to choose the elites of the tower world, he also had to choose the geniuses of the natives.

Due to the limited conditions, it was unknown how many talented artisans were buried and eventually lost to the masses.

What Tang Zhen wanted to do was to unearth and provide financial assistance to them. In the end, they would become the team that he would use to control the world.

He had the ability to see through geniuses, and at the same time, he had enough money, so it was not difficult for him to do this.

After a few years, all the talented artisans in the world would be related to him, and it would be easy for him to control the world.

In the following period of time, Tang Zhen continued his experiment. The siblings were so excited that they did not know what to do. Their eyes were filled with longing.

His elder sister similarly had to go and learn. After drinking Tang Zhen's spirit medicine, the two of them already had quite a good foundation. How could they easily waste it?

The next morning.

Tang Zhen left the house with the brother and sister. He rented a car parked by the side of the road and went straight to the artisan Academy.

He was going to complete the admission procedures for the siblings today, and then he would go to Leah to participate in her experiment as promised.

Who knew that just as he arrived at the Academy's entrance, he would see a group of cultivators standing there. When they saw him, they immediately swept their eyes over with unfriendly gazes.

"You are Tang Zhen?"

Tang Zhen had just alighted from the car when a man dressed as a Butler walked over. He unceremoniously sized him up a few times before using a slightly arrogant tone to ask.

you two go to the academy first. Take this business card and look for creator Leah. Tell her that I'll let her take you to handle the admission procedures.

Tang Zhen ignored the Butler who had asked the question and warned the siblings. After which, he used an encouraging expression and patted his younger brother's shoulder.

The brother and sister looked at the cultivators with unfriendly expressions and looked at Tang Zhen with worried eyes. However, they saw him gently shaking his head.

"Then we'll go in first, please be careful."

After the elder sister bowed to Tang Zhen, she brought her younger brother and quickly left. This was because she clearly knew in her heart that the two of them couldn't help in this kind of matter.

If he stayed here, he would only cause trouble for Tang Zhen. He had better quickly look for Leah for help.

The elder sister could tell that the fairy-like elder sister liked Mr. Tang Zhen. She would definitely help when she encountered this kind of situation.

Tang Zhen only turned his head to look at the Butler in front of him after sending the siblings away with his eyes. His eyes carried a trace of coldness.

"The city Lord's mansion, right? it saves me the trouble of making a trip here. Your young master white owes me a hundred million gold coins. When will he send it to me?"

Upon hearing Tang Zhen's words, the man dressed as a Butler was stunned for a moment. Soon after, he sneered repeatedly.

"Young master White's IOU, show me. If it's real, we naturally won't go back on our word."

At this moment, the way that Butler looked at Tang Zhen was as though he was looking at a hothead. Moreover, it was the kind that did not know whether he was Dead or Alive.

If Tang Zhen really took out the IOU, he would not admit it, let alone return it to Tang Zhen.

"Do you think you're worthy of it?"

Tang Zhen naturally understood the expression in the other party's eyes. He immediately laughed coldly and mercilessly ridiculed.

"Bastard, who are you talking to?"

The Butler was furious. He pointed at Tang Zhen as the corner of his mouth kept twitching.

He felt that he had lost all his face after being ridiculed by Tang Zhen.

Tang Zhen coldly laughed when he saw the Butler's flustered and exasperated appearance. He turned around and walked towards the Academy.

"Stop him! If he dares to resist, break his legs!"

When the housekeeper saw this, he immediately shouted at the cultivators not far away, his face full of malice.

you want to break my legs? I think you don't want your legs anymore.

Tang Zhen's expression turned cold when he heard this. He lifted his leg and swept it towards the Butler. This leg was so fast that it was inconceivable. The other party was completely unable to Dodge.

The sound of bones breaking could be heard. The housekeeper screamed and flew out, crashing into the cultivators who were rushing over.

A series of screams could be heard as the cultivators who rushed up were smashed to the ground. Only one cultivator standing at the side was not affected.

The cultivator looked at the scene in front of him in a daze. After hesitating for a moment, he immediately retreated to his companion's side to help him.

At this moment, even if he was given a few more guts, he would not dare to rush up and deal with Tang Zhen alone. That would be no different from seeking death.

...

The cultivators on the ground all vomited blood. Their bodies seemed to have fallen apart, and they had no strength at all.

Their hearts were filled with shock and gloominess. They could not understand how Tang Zhen's kick came about. Why did it carry such a terrifying force?

However, the Butler only had his legs broken, and the rest of his body was unscathed. The way he used his strength was shocking.

These cultivators, who originally didn't put Tang Zhen in their eyes, were now full of fear in their hearts. They fell to the ground and looked at him with evasive eyes.

Tang Zhen looked at the Butler and coldly said, "Listen up, there are many people who can prove that white made a bet with me and wrote an IOU, and there's even a photostone as proof.

I'll give you three days to deliver the gold coins. If you don't, I'll personally come to ask for them."

"As the saying goes, if you agree to a bet, you must accept your loss. The city Lord's mansion is a big household, so I don't think it's worth a hundred million gold coins.

If you want to use such a despicable method to renege on your debt, then let's see who can win!"

Tang Zhen coldly threw out these words before turning around to return to the Academy.

When the Butler whose legs had been broken by Tang Zhen saw this, he immediately roared with a ferocious expression, "Tang Zhen, you listen to me. My young master's death is related to you. If you don't explain it clearly, don't even think about leaving this city alive!"

Hearing the Butler's angry roar, Tang Zhen slowly turned around and his gaze fell on the other party.

...

Feeling the coldness in his eyes, the Butler subconsciously shivered and an indescribable fear rose in his heart.

Tang Zhen softly sighed. He used a mocking tone to say, many people saw your young master die at the hands of the sea monster. Are you going to blame this on me just to renege on your debt? "

The Butler shook his head and shouted, " don't try to quibble. I've already sent people to investigate. Young master white used a beast lure, but it was not enough to attract the king-tier monster. You must have done something secretly.

Besides, if it wasn't for your bet with young master white, how could all these things have happened? you can't shirk your responsibility."

At this moment, there were already more and more onlookers in the surroundings. They had different expressions on their faces when they heard the conversation between Tang Zhen and the Butler.

Tang Zhen shook his head in the face of the Butler's angry roar. He used an indifferent tone and said, "First of all, you have to remember that white had already used the beast lure before the bet.

Even if the beast lure can't attract a King-class sea monster, it can attract the seven-colored Sea Dragon, and the seven-colored Sea Dragon is enough to attract a King-class sea monster.

White wanted to use the beast lure to plot against me, but he went for wool and came home shorn. Instead, he was killed by the sea monster.

From the beginning to the end, white was the one who sought his own death, and now you want to put the blame on me. You're truly shameless."

When Tang Zhen said up to this point, he turned his head to look at the surrounding spectators and spoke in a cold and stern tone, "White is a despicable and sinister man. He tried to harm me time and time again, but he didn't succeed.

In the end, after his death, the city Lord's mansion still wanted to use such underhanded means to try and frame him. This was intolerable.

I, Tang Zhen, will make it clear today that if the city Lord does not give me a satisfactory explanation, then I will make him pay a painful price even if he is the city Lord."

After hearing Tang Zhen's words. The onlookers were all shocked.

No one thought that his personality would be so unyielding. In order to protect his reputation, he did not hesitate to issue a letter of challenge to the city Lord's mansion in public.

Although his courage was commendable and showed that artisans were not afraid of power, how could he be a match for the city Lord's mansion by himself?

Chapter 1834 The laboratory gate (1)

After hearing Tang Zhen's words, the Butler was stunned. His face was filled with astonishment.

Originally, he thought that with the power of the city Lord's mansion, no one would dare to not give him face. Therefore, he was usually extremely arrogant.

In his opinion, there was nothing that the city Lord's mansion couldn't settle. Even an artisan would have to be wary of it.

He was a seventh-rank official in the gatekeeper of the Prime Minister, and he represented the face of the city Lord. Who would dare to act rashly?

But today, he finally encountered a nail. This young man named Tang Zhen was actually so arrogant and completely did not care about the power of the city Lord's mansion.

Not only did he break his legs, but he also seriously injured the guards of the city Lord's mansion. He even openly challenged the authority of the city Lord's mansion and issued a challenge.

Who did he think he was to challenge the city Lord's mansion? did he have the right?

The pain in his body and the anger in his heart mixed together, causing the Butler's face to twist.

He had made up his mind. No matter what Tang Zhen had to rely on, he must take revenge.

Especially the challenge letter just now, it would definitely cause great damage to shrewdness's dignity, so he could not let it go just like that.

If they didn't do anything, many people would probably laugh at the city Lord's mansion.

The Butler was already able to guess the outcome after the city Lord heard these words. Not only would Tang Zhen be unable to escape this calamity, but even he himself would also suffer the punishment.

Thinking of the city Lord's methods, the Butler felt a chill in his heart. He was even more resentful towards Tang Zhen.

However, from the looks of the situation, they were clearly not Tang Zhen's match. Therefore, this matter still needed to be considered.

A wise man does not fight when the odds are against him. Moreover, with his identity, he really did not need to engage in a verbal battle here and lower his status for no reason.

Although they had only met for a short period of time, the Butler was able to see how ruthless Tang Zhen was. If he really angered him and caused him to casually kill him, it would truly be a loss that outweighed the gain.

After these thoughts flashed through his mind, the Butler immediately wisely shut his mouth and at the same time, motioned for his uninjured subordinates to help him up.

There were more and more onlookers around him, so it was better to evacuate as soon as possible.

Most of the people who could enter the creator Academy were well-known people. They could naturally recognize the identities of the Butler and his group.

When they saw the city Lord's family head leave dejectedly, their hearts were filled with astonishment. They did not expect the other party to give in so quickly.

However, there were even more people who felt that this matter would definitely not end so easily. Regardless of Tang Zhen's declaration earlier or the way the city Lord's mansion did things, it was destined that this matter would not end well.

After passing through the crowd, that Butler turned his head and swept a glance at Tang Zhen. His eyes were filled with a sinister expression.

Tang Zhen merely indifferently swept his gaze at the other party's departing back. He slowly turned around and walked towards the Academy.

When the surrounding people saw this, they immediately made way for him and looked at him with all kinds of emotions.

As soon as he reached the entrance of the Academy, he saw Leah and the siblings rushing over. When they saw Tang Zhen walking over, the three of them heaved a sigh of relief at the same time.

“I heard that you had a conflict with the people from the city Lord’s mansion. Did anything happen?”

The anxiousness on her face disappeared in a flash. Leah regained her composure and asked in a calm tone,

“It’s nothing. Sorry for making you worry.”

Tang Zhen didn’t mention what had just happened. Instead, he looked at the siblings and said, “I’m preparing to arrange for the two of them to enter the academy to study. Is there anything I need to pay attention to?”

Leah shook her head. The artisan profession didn’t have many restrictions at the start. As long as one had enough gold coins, anyone could try it.

Of course, in this process, more than 99% of the people would be eliminated, and the number of people who could persist was less than one in ten thousand.

It’s good that there aren’t any restrictions. If you’re not in a hurry, I’ll take care of this first and then go to your laboratory.

Leah nodded, indicating that she didn’t have anything to do for the time being and could help Zhen Tang with his admission.

With her connections in the Academy, she would be able to get things done much faster and save time.

As expected, the siblings’ admission procedures went smoothly. After Leah’s appearance, some unnecessary procedures were completely omitted.

Obviously, in the world of artisans, there was a saying that it was easier to get things done with help.

After making the arrangements for the siblings, Tang Zhen gave them a few more instructions and followed Leah to his laboratory.

To an artisan, their private laboratory was the most precious asset. Without permission, even their closest people couldn’t enter.

Leah’s experiment was related to her advancement to a 3-star artisan, so there was no need to elaborate on its importance. The fact that she was willing to invite Tang Zhen to be her assistant was enough to show her trust in him.

Under the surprised gazes of the passers-by, Tang Zhen followed Leah into the strangely-shaped building. After making a few turns, they arrived in front of a house.

The door of this room was very unique. It looked like the head of a giant beast. On the door, two big eyes kept turning, sizing up the pedestrians.

After seeing Leah, the two big eyes on the door blinked a few times, and a blue light flashed from the eyes.

welcome back, my dear miss Leah.

Leah's pretty brows furrowed as she said to the door, "I think you should change your lines. Otherwise, if you listen to it for a long time, it will inevitably make people feel annoyed!"

"Why would I feel annoyed? Haven't you noticed that my voice is getting better and better, and it's filled with an intoxicating magnetism?"

Leah shook her head, indicating that she didn't feel that way.

After hearing Leah's words, a trace of disappointment and grievance flashed across her big eyes, as if she was very hurt.

"Alright, you're the cutest. Hurry up and open the door."

After hearing Leah's words, his eyes narrowed slightly, as if he was very happy.

but can you tell me who this person beside you is? is he also going to enter the laboratory? "

That pair of eyes looked at Tang Zhen with a trace of doubt.

"That's right, this is His Excellency Tang Zhen, an assistant of my laboratory. From now on, he's also free to enter the laboratory."

After hearing Leah's words, the pair of eyes immediately fell on Tang Zhen, full of curiosity and scrutiny. he must be an amazing person to be chosen by miss Leah as her assistant. Raul Must maintain his respect.

...

It's a pleasure to meet you, Sir Tang Zhen. My name is Raul, the most loyal and conscientious guard."

Tang Zhen smiled when he saw that pair of eyes looking at him. He softly said, "It's a pleasure to meet you, Raúl,"

After they got to know each other, the pair of eyes slowly closed. Then, the door gradually became transparent, like a wave of water.

Under the gazes of the two, the door disappeared in a few seconds, revealing the laboratory behind.

Tang Zhen's eyes were fixed on it. After a slight analysis, he had already figured out the operating principle of this door.

This gate should be some kind of special creature, probably a masterpiece of an artisan. It had the ability to become invisible and enter spatial cracks.

Without Raúl's permission, outsiders would not be able to enter, and might even be sent to death.

To put it simply, Leah's laboratory was actually in the body of this special creature.

This door was Raul's mouth, and the main body of the laboratory was actually located in the spatial Rift. It could not be found in reality.

Chapter 1835 Tang Zhen must die _

Raul was a gift from my grandfather when I became an artisan. He has been with my grandfather for more than 300 years and is one of the most reliable partners of my family.

Leah explained in a soft voice when she saw Tang Zhen staring at the door with an interested expression.

This was the first time she had mentioned Raul's origin to anyone. Many of the Academy's artisans didn't know about it.

it is indeed a very wonderful creature. It has the ability to create illusions and space at the same time. The creator must be a great master.

Leah chuckled when she heard that. She looked at Tang Zhen and said, " if my grandfather heard your praise, he would probably be very happy too, because Raul was his creation.

Tang Zhen thought to himself that it was as he had expected. As the Dean of the creator Academy, it was only natural for Leah's grandfather to have such abilities.

that's why the more you understand, the more you can feel the wonders of the artisan profession. It's no wonder so many people are crazy about it.

Upon hearing Tang Zhen's sigh, Leah nodded in empathy. With a reminiscing expression, she said, " Almost all of my family members are artisans. They are respected and have a very high status.

I grew up in such an environment, and becoming an artisan has become my biggest dream.

However, when I started learning about this profession, I realized that becoming an artisan wasn't as simple as I had imagined.

Even though I have the responsibility to learn this talent, I still put in a lot of effort to barely get the results I have today.

However, compared to my grandfather and father, I'm still very far away. I'm still far from my ultimate dream."

Tang Zhen had been listening attentively the entire time. At this moment, he comforted her in a timely manner, when you're chasing after the legend, you don't know that you've already become a legend in the eyes of others.

A smile appeared on Leah's face when she heard that. She seemed to be very happy.

"Perhaps in the eyes of others, my life is extremely smooth and I'm envious.

However, the truth is not so."

Leah's brows furrowed slightly, and she sighed softly. She continued, " In fact, fate is the fairest. When you get something, you must pay something.

In order to become an artisan, my past life has always been very monotonous. I spent almost every day studying and doing experiments.

So, I will never forget this island's adventure for the rest of my life, because it gave me a completely different and exciting experience.

At the same time, I have to thank you. If it wasn't for you, I might not have been able to come back, and my dream naturally wouldn't have been realized."

Tang Zhen shook his head and did not dare to claim any credit.

From the beginning to the end, this matter had actually been within his calculations. It seemed to be filled with danger, but in reality, it was just a scare without any danger.

Under no circumstances would Leah's life be in danger. She just didn't know about it.

In essence, Leah was just a chess piece in Tang Zhen's plan. Of course, Tang Zhen didn't think so.

One must know that this matter had appeared randomly and was not part of Tang Zhen's plan. Therefore, there was no need to talk about using it.

Compared to Tang Zhen's true plan, this matter was even more insignificant. From the beginning to the end, he had not put it in his heart.

"You don't have to always remember this. I only helped you guys while I was saving myself.

It's not a favor, and you don't owe me anything.

Since it's already in the past, don't mention it again, or else it will only restrict our communication."

Leah nodded, then smiled and invited Tang Zhen into the laboratory.

Raul was not lying. This was indeed the first time Leah had invited an outsider to her laboratory, other than her family.

.....

City Lord's mansion.

Looking at the Butler whose legs were broken, the city Lord, who had just walked out of the laboratory, had a gloomy expression on his face. He sat in his chair and did not say a word.

After seeing the city Lord's expression, the Butler's heart trembled and his body trembled.

Having followed the city Lord for many years, the Butler naturally understood his nature. He was very clear that this was the city Lord's appearance after he was angered.

Although it wasn't a violent storm, it was full of killing intent and could take lives at any time.

The air became very heavy, so oppressive that it was almost hard to breathe.

After a long time, the city Lord slowly spoke.

"Send someone to the island. No matter the price, find a way to bring White's body back.

I'll think of a way to ask a high-level artisan to help. With their methods, they should be able to restore White's body.

Even if he's not my real son, at least he has his blood. It makes no difference to me.

As for that Tang Zhen you spoke of, he's merely an arrogant person. Since this matter is related to him, he must pay the price.

I'll leave this matter to you. I want him to completely disappear from this world within three days. If you can't do it, you'll have to disappear from this world of your own accord.

I still have an important experiment to complete. When I come out, I hope to see everything handled properly, do you understand?"

The Butler quickly nodded and did not dare to hesitate.

The city Lord stood up and returned to the laboratory as if he was dealing with a very ordinary matter.

The Butler heaved a sigh of relief, but cold sweat was already flowing all over his body.

It was rumored that the city Lord doted on his son white, but that was not the case.

Because he had to deal with the city's government affairs and his own experiments, the mayor had no time to care about white.

Perhaps it was because of his guilt, but he had always turned a blind eye to White's actions, which led to White's arrogance.

However, neither the city Lord nor white himself felt that they had done anything wrong. They also felt that this was the right they should enjoy.

Now that white had lost his life, he could not blame anyone else for it.

However, the city Lord didn't think so. His son couldn't be wrong, and the one in the wrong would only be someone else.

...

White's mistakes could be forgiven, but others' mistakes, especially those that offended them, had to be severely punished.

Therefore, Tang Zhen, who had a conflict with white, naturally had to bear the greatest responsibility. Even if white was the hand of the sea monster, Tang Zhen could not escape the blame.

As for Tang Zhen asking for the gambling money and threatening to get an explanation from the city Lord's mansion, the city Lord didn't even put him in his eyes.

A foreigner, even if he had some spare money and some unorthodox means, couldn't be the opponent of a city Lord and an intermediate artisan.

The two of them were not on the same level at all.

In the eyes of the city Lord, he did not even put Tang Zhen in his eyes and treated him like an ant.

It was just that this city Lord would never have imagined that Tang Zhen, who he did not place in his eyes, had once directly or indirectly destroyed dozens of worlds.

He had already killed countless “nobles” like the city Lord, so what difference was there between them and ants?

.....

After watching the city Lord leave, the Butler was carried away, but he kept thinking in his heart.

After learning about the incident on the island, the Butler had already received orders to take back the IOU and bring Tang Zhen to the city Lord’s mansion.

...

In the end, the Butler had underestimated Tang Zhen’s strength. This made the matter that could have been easily solved become a little complicated.

However, no matter what, the ending was the same. Tang Zhen must die.

Coincidentally, Tang Zhen had given the city Lord’s mansion a three-day deadline. The city Lord had also only given the Butler three days. Both parties were waiting for a result.

When he thought of this, the Butler coldly laughed. He didn’t need three days ‘time. Tonight, he would make sure that Tang Zhen’s corpse would not even remain!

Chapter 1836 A visit _After Tang Zhen carefully understood, he found out that Leah’s experiment had long entered the final stage. Otherwise, she wouldn’t have had the time to explore the island.

There weren’t many places that could be changed, but since it was related to her promotion to a 3-star artisan, how could she not do it perfectly?

However, Tang Zhen’s arrival was still very effective. This was because he had a completely different concept and idea from this world. To an artisan, imagination was the most important thing.

An artisan’s vision was limited by this world, so he didn’t know what the outside world was like. Therefore, even if one’s thoughts were wild and imaginative, there were still certain limitations.

Under such a situation, Tang Zhen’s advantage was revealed.

His imagination might not be that strong, but he had a wealth of experience and had seen the local customs and new things of many planes.

Therefore, in the process of the experiment, Tang Zhen would always come up with some strange but refreshing suggestions.

Leah saw this point, so she invited Tang Zhen to be her assistant when the experiment was about to end.

In the end, she was also pursuing perfection, hoping that she could perform outstandingly in every key point of the artisan profession.

As for whether there were other reasons, only Leah herself knew.

There was no need to elaborate on the process of their discussion. In the blink of an eye, it was already evening. Tang Zhen was prepared to stand up and bid farewell.

my grandfather has prepared a family dinner. He has some things to discuss with you. Do you have time? ”

When Tang Zhen was about to leave, Leah suddenly spoke with a hint of anticipation in her eyes.

In fact, Tang Zhen was also looking for an opportunity to get in touch with Leah’s grandfather. It should be known that Leah’s grandfather played a very important role in his plan.

Now that the opportunity had presented itself before him, he naturally had no reason to reject it.

it’s my first time visiting, so I should bring some gifts. I wonder what your grandfather likes? ”

Tang Zhen didn’t refuse. Instead, he asked Leah to avoid being too rude.

A hint of joy flashed across Leah’s face. She shook her head and said, ” it’s just an ordinary family dinner. You don’t have to be so polite. Just come with me.

Tang Zhen nodded and did not argue much. He had an idea in his heart.

The two of them left the laboratory and took Leah’s strange car to the edge of the college.

Compared to the bustling teaching area of the college, the scenery of the residential area was undoubtedly more beautiful. Many of the buildings had strong personal styles, which was eye-opening.

These artisans had enough ability and money to run their own residences. The type of residence often represented the field of expertise of an artisan.

For example, the building they had just passed was actually a huge tree-like creature that covered nearly an acre of land.

A few houses with unique designs were hanging from the thick branches of the tree. There were also bridges woven from vines connecting each house.

Standing on the platform of the building, one could see that the surroundings were filled with red flowers and green leaves, and the fragrance of the flowers wafted in the air. It was definitely an excellent place to live.

The most amazing thing was that this building could be moved at will. For example, if the owner wanted to see the red sun rise one day, he could make the treehouse walk to the edge of the cliff automatically.

Then, in the floating morning mist, they would quietly wait for the arrival of dawn and enjoy the beautiful sunrise from the best angle.

After hearing Leah’s introduction, Zhendi Tang couldn’t help but praise her. He also secretly sighed in his heart. The world of artisans was indeed wonderful.

In terms of killing and conquering, the world of artisans would never be able to compare to the cultivators of loucheng. They were destined to be crushed.

However, in the magical field of creation, the Lou Cheng cultivators were far behind because they were more skilled in destruction.

Perhaps it was because this world was sealed off, but the research direction of the creators was mostly focused on daily life. They rarely touched on the creation of war.

If these artisans were in the world of loucheng, with their talent in this area and absorbing the strengths of the various planes, who knew what kind of terrifying war weapons they would create?

Fortunately, he had discovered this world ahead of time and had enough time to lay out his plans. When he had officially taken control of it, the strength of the Holy Dragon Warzone would definitely advance by leaps and bounds.

It didn't take long for the car to stop in front of a building. It looked like an old-fashioned clock that had been sprung out of a spring.

Compared to the other buildings, Leah's grandfather's residence was a little plain. However, Tang Zhen would never believe that the Dean of the artisan Academy's residence would be any worse than others.

Perhaps the true essence of the building had been covered up by its low-key appearance, so that outsiders could not perceive the exquisiteness of the building.

Under Leah's lead, the two of them walked along the small path between the gardens and headed towards a big tree in front of the house.

The sky was getting dark, and the big tree in front of them was actually starting to glow, illuminating the large open space in front of the building.

The vines hanging down from the trees danced gently in the breeze, and the rustling of the leaves actually sounded like a pleasant rhythm.

After seeing this big tree, Tang Zhen thought of the mother tree in Holy Dragon City. Because of the treatment at all costs, the withered mother tree had long been revived.

After so many years, the mother tree had once again regained its former glory, and was even more robust than before.

However, as the Holy Dragon city's strength continued to increase, the mother tree's innate defensive ability was becoming somewhat inadequate.

Unless it was upgraded to a continent-level building, most of the time, the mother tree was just a symbolic scenic spot.

Tang Zhen temporarily didn't consider the matter of advancing to the mother tree. One must know that the resources consumed to advance to the continent's loucheng were extremely terrifying. Good steel must be used on the blade's edge.

This thought flashed through his mind. Then, he saw the old man sitting under the tree. On the table was the tea set that Tang Zhen had given him.

Looking at the way he raised his cup and sipped the wine, it was obvious that he was enjoying it.

When he saw Tang Zhen and the other person approaching, the old man stood up to welcome them. After which, he looked at Leah with a smile that was not a smile.

Leah, who had always maintained a dignified demeanor in front of outsiders, blushed slightly at this moment. She avoided the Dean's gaze and invited Tang Zhen to take a seat.

Tang Zhen was not in a hurry to sit down. Instead, he took out an item from his storage equipment and handed it over to the old man.

this is something I found by accident. I heard that you like antiques, so I found it for you. It's a thank you gift for helping me answer my question.

There was no problem for Tang Zhen to address himself as a junior. If one were to calculate based on age, the Dean's age was at least several times his.

At this moment, age was the only thing that mattered, not one's cultivation. Otherwise, with the Dean's cultivation and strength, he would not even be qualified to be Tang Zhen's follower.

After seeing the item in Tang Zhen's hand, the Academy's President was initially stunned. Soon after, both of his eyes immediately lit up as he hurriedly received it and checked it.

At this moment, he didn't even mention any polite words, all his attention was on this item.

Tang Zhen's gift was extremely unremarkable. It appeared to be an ordinary metal plate, but in reality, it had a lot of meaning.

...

It came from a low-level civilization that was destroyed by the tribesmen. It was a famous divine artifact, and after it was plundered, it was placed in the tribesmen Museum.

Inside the metal plate, there was a lot of information about that civilization, which was equivalent to a special reading device.

One only needed to click on the words printed on the metal plate, and through the combination of words, one could retrieve the information that they needed to understand.

Tang Zhen had already seen the things inside. They didn't have much value to him, so it was most suitable to take them out as a gift.

Moreover, he wasn't afraid that Leah's grandfather would find out about the contents. First of all, the text was extremely choppy, and Tang Zhen could only read it normally by relying on the translation app on his mobile phone.

If the Dean really wanted to understand the content inside, he would have to consult Tang Zhen about the words inside every three to five days. This would also increase the chances of the two of them coming into contact.

Tang Zhen's true motive for doing this was to obtain a shortcut that would allow him to have the opportunity to come into contact with an even higher level.

If it was possible, Tang Zhen hoped that he would personally take on the role of the Dean of this Creator Academy one day.

Chapter 1837 A showdown? _

Looking at Grandpa Leah's expression, it was clear that he was very interested in these antiques. At this time, he was observing the metal plate with an undisguisable obsession in his eyes.

Leah shook her head. Her grandfather had always been like this. Sometimes, he would even abandon his experiments in order to study these antiques.

If he hadn't spent so much energy on these things, he might have been able to focus on his experimental research and try to break through to a higher realm.

However, no one raised an opinion in this regard. Even if the Dean had a tendency to play around and lose his ambition, his achievements in the field of artisans still needed to be looked up to by later generations.

Perhaps it was because he had learned by analogy, but it was this obsession and seriousness that had allowed the Dean to have his current achievements.

"Grandfather, it's better if you don't study that metal plate first. Didn't you say that you have something to tell Tang Zhen?"

Not wanting to give Tang Zhen the cold shoulder, Leah reminded him in a low voice.

After hearing Leah's words, the Dean seemed to wake up from a dream. He raised his head and looked at Tang Zhen again.

His originally kind eyes once again had a trace of affection.

Leah has already told me about your experience on the island. If it weren't for you, she might have been in great danger, so I have to thank you.

Tang Zhen hurriedly shook his head when he heard this, indicating that there was no need to be polite.

"Sit down first. I've prepared some special food. I guarantee you've never eaten it before."

The Dean invited Tang Zhen to take a seat. After which, he gently shook the bell beside the table. Immediately after, Tang Zhen saw the branches above his head continuously dance.

One by one, items were brought over by the branches from afar and gently placed on the table. It could even be done to pour tea.

From the nimble movements of the branches, one could tell that they could not only illuminate, but also be ordered around as servants. In critical moments, they could even be used to fight and protect their master.

If they could carry plates, they could naturally carry knives and guns.

It didn't take long for the table to be filled with all kinds of food. The color, smell, and taste of the food were all great, and it greatly increased one's appetite.

Under the Dean's invitation, Tang Zhen tried a few types of food. As expected, it was incomparably delicious.

After chatting for a while, the Dean sent Leah away and talked to Tang Zhen about white.

"According to my understanding, the city Lord's style of doing things is more extreme and overprotective, and very conceited.

Since he's determined that his son's death is related to you, he definitely won't let this matter rest.

So, you have to be more careful in the coming days. If you really can't handle it, you can come to my laboratory to hide.

With me here, they definitely won't dare to be impudent."

The reason why the Dean of the Academy took the initiative to offer protection was naturally because Tang Zhen had saved Leah. This could be considered as a way to repay Tang Zhen.

Tang Zhen had saved Leah back then, and now the Dean had blocked the city Lord's mansion's revenge for him. They could be considered to be even.

However, with Tang Zhen's methods, it was only a matter of a single thought for him to destroy the city Lord's mansion. He did not wish to waste the other party's favor like this.

"Please rest assured, Dean. I can handle this matter. If they really want to play any tricks, I, Tang Zhen, will accompany them.

To put it arrogantly, if he doesn't want to be the city Lord anymore, or if he doesn't want to live, I don't mind helping him."

Tang Zhen did sound a little arrogant when he said such words in front of a Dean.

One had to know that the other party was not only a city Lord, but also an intermediate artisan. In the eyes of outsiders, he was stronger than Tang Zhen in every aspect.

This was also the reason why most people were not optimistic about Tang Zhen's declaration of war. Some even secretly laughed at him in their hearts.

The reason for the ridicule was naturally because Tang Zhen had overestimated himself.

After the Dean heard Tang Zhen's words. She frowned slightly, then carefully sized him up.

young people must act according to their ability when they speak. Are you sure you have the ability? "

Although the Dean's tone was not very good, it was also out of good intentions, and there was even a hint of probing.

He admired Tang Zhen's talent. At the same time, he had to take care of his granddaughter's feelings. He naturally did not wish for Tang Zhen to act on impulse.

Tang Zhen smiled and gently nodded as he looked at the Academy's headmaster who was sizing him up without blinking.

He felt that there was something wrong with the Dean's attitude, but now was the time to show his strength. There was no need to be too humble.

The Dean nodded upon hearing this. since you're so confident, then do it thoroughly. Make that guy disappear completely.

If you can do it, then I'll help you clean up the mess. I guarantee that there won't be any follow-up trouble."

The Dean took a sip of tea and spoke casually. His tone was as if he was talking about family affairs.

However, the contents of his words were shocking. He had decided the life and death of a city Lord in the midst of a conversation.

As expected, being able to become the Dean of the creator Academy wasn't as simple as it seemed on the surface. At the very least, this ruthlessness caused Tang Zhen to have a higher opinion of him.

If Tang Zhen did not guess wrongly, the Dean clearly wanted to use this opportunity to achieve some goal.

Otherwise, just saving Leah's life wouldn't have been enough for her to help him deal with the subsequent troubles.

The connections and resources required for this process were equally astonishing, and it was even more complicated than killing the city Lord.

Tang Zhen would never believe that the Dean did not have any ulterior motives.

then, can I Ask the Dean to tell me why you are doing this? "

After hearing Tang Zhen's question, the Dean smiled and turned to look at Leah, who was in the distance.

do you know why Leah's parents aren't in this city? it's because he was framed by that guy when he was competing with the city Lord, so he was forced to leave.

He thought he was being secretive, but in fact, I already knew about it. I just pretended to be confused.

Since you have the ability to get rid of him, I naturally have to help you. It can be considered as revenge for my son.

Leah doesn't know about this because I've never told her so that she won't be under too much pressure."

Tang Zhen nodded after hearing the Dean's words. After which, he asked in a slightly curious tone,"Aren't you afraid that I'll speak without thinking, but in fact, I don't have that ability, and instead expose my own secret?"

...

The Dean smiled mysteriously when he heard this. He placed an item on the table and gently pushed it in front of Tang Zhen.

Tang Zhen glanced at the items on the table and felt that they were a little familiar. It seemed to be an accessory that Leah was wearing.

Tang Zhen's mind turned and he understood the cause and effect of the matter. He smiled and shook his head.

He had indeed underestimated the abilities of an artisan. This item was always on Leah's body, but he couldn't see through its secret.

The old man must have known everything about his time with Leah, and that was why he had said those words to him.

Otherwise, he would not be able to avoid being reprimanded and then shamelessly boasting.

Seeing Tang Zhen reveal an expression of understanding, the Dean smiled and explained, "I only have one precious granddaughter, so I naturally have to take care of her. If you weren't by my side, I would have helped her long ago.

But you're too sly. You clearly have the ability to leave the cave, but you refuse to leave for the sake of the experiment. You even deceived my silly granddaughter.

In the end, I couldn't stand it anymore and found out that your experiment was coming to an end, so I asked someone to warn the city Lord to open the cave as soon as possible."

Tang Zhen came to a sudden realization when he heard this. He was still puzzled earlier as to why the cultivators of that town would suddenly choose to rescue them. It turned out that it was because of the Dean.

Fortunately, the things that the other party knew about were all deliberately shown by Tang Zhen. It didn't matter even if the Dean knew about it.

...

When the Dean said this, he reached out and touched the metal plate that Tang Zhen had given him. He then said with a slightly solemn tone, "In fact, I'm very curious about your methods and origin. When you were trapped in the cave, I had someone investigate your origin, but there was no result.

That's why I'm guessing that you're from one of those reclusive clans. Otherwise, there's no way to explain the strange techniques you're using, as well as the fact that you're deliberately hiding your strength and cultivation.

Actually, I don't want Leah to have too much contact with you, for fear that you'll hurt him. But I can't respect her choice, in case this girl hates me for the rest of her life.

Fortunately, from your usual style of doing things, you don't seem to be an evil person. This is the only thing I'm satisfied with.

So, be nice to Leah, and I'll try my best to help you so that you don't waste your talent."

The Dean's tone was filled with emotion. There was a kind of wisdom in his eyes that seemed to have seen through the world, as well as a faint expectation.

The reason why he would do these things was entirely because of his granddaughter. Of course, it was also related to the fact that Tang Zhen was indeed worth investing in.

Chapter 1838 The product of civilization in the creation sphere? _

The conversation between Tang Zhen and the Dean was very short. After Leah returned, the two of them changed the topic at the same time.

There were some things that were really not good to let her know.

The Dean extended his hand and touched the metal plate that Tang Zhen had given him. An infatuated expression appeared on his face. Although he could not recognize the words on it, he instinctively knew that this item was not simple.

When he touched the combination of letters, words kept appearing in the blank space of the metal plate, forming a text.

He didn't need to guess to know that there must be something recorded in it. It might be some important information.

The Dean looked carefully, but he could not recognize a single word. He was so anxious that he scratched his ears and cheeks.

Unknowingly, he had revealed his true nature.

"Can you tell me the origin of this item? why have I never seen this type of writing before?"

The Dean's face revealed a faint look of doubt. He was known for his vast knowledge and strong memory. In order to facilitate the study of antiques from various periods, he had specially studied this aspect of content.

It was for this reason that he was certain that the words on the metal plate belonged to a civilization he had never come into contact with.

This greatly piqued the Dean's interest. If he could unearth a civilization that had been sealed away for a long time and carefully study it, it would be of great help to his Creation Studies.

No civilization could be underestimated, and their collective wisdom was even more powerful. There were many things they could learn from.

Tang Zhen shook his head when he heard the Academy's President asking about the metal plate's origin, indicating that he wasn't sure.

Now was not the time to reveal the true origin of the metal plate, so as to avoid attracting more attention and bringing unnecessary trouble.

He had only thrown out a bait to bait the Dean. He would wait until a certain day to tell him the origin of this item, so that it would not appear too abrupt.

Sooner or later, he would let the artisans understand that there was a wider world outside, and that their world was nothing compared to it.

The crystal wall of the artisan world was very special. It was also extremely tightly sealed. Tang Zhen was able to enter this place by chance.

Because they had never come into contact with the outside world, only a small number of artisans in this world firmly believed that there were other worlds.

The majority of the remaining artisans believed that the creator's world was the only core world, and even if there were small worlds, they were worlds created by the creation sphere.

They believed that they could create everything and even called themselves the creator. This alone was enough to prove their arrogance.

The true creator was not as simple as they thought.

The Dean seemed to have thought of something, but he did not dare to be certain. He held the metal plate and studied it for a while before he said in an uncertain tone, "Perhaps the creator of this metal plate also came from the world in the creation ball. They created their own civilization and created this metal plate for recording.

Such a situation is extremely rare, but it's not impossible. Moreover, all of these creation spheres that have a civilization have a long history and extremely rich resources."

This kind of creation ball was extremely rare, and most of them came from family inheritances or ancient ruins. Ordinary people had no chance to come into contact with it.

With the supply of resources from the creation ball, those reclusive families did not need to contact the outside world and could be self-sufficient.

They only occasionally sent a group of juniors to blend in with the crowd and get in touch with the latest creation knowledge so as not to be completely out of touch with this world.

In addition to these normal underworld clans, there were also some more extreme underworld clans that had not been in contact with the outside world for thousands of years.

Someone had once discovered such a reclusive family. They found that their clothes and style of speech were out of tune with the current world. They looked like a group of people who had lived in ancient times.

From the Dean's point of view, this metal plate that was very likely to have come from the creation sphere was sufficient to prove Tang Zhen's identity.

"The probability of the creation sphere automatically breeding intelligent creatures is not high, and it is even rarer to be able to create its own civilization.

Up until now, I've never seen an intelligent life form that the creation sphere has automatically nurtured. This is somewhat regretful."

The headmaster touched the metal plate and sighed softly.

Tang Zhen nodded his head as he thought of the young man on the island.

After the other party had followed him here, he had become more and more cautious. He had been hiding in the dark and was unwilling to come out. It was obvious that he was not used to coming into contact with such a world.

He was a native of the creation ball, and because of some kind of mutation, he had a rare innate divine ability.

The race that he used to belong to also had no civilization. They were more like primitive barbarians who ate raw meat and drank blood.

Under normal circumstances, no matter how strong the life form in the creation ball was, it would be suppressed to an extremely weak level after leaving the creation ball.

To the life forms of the artisan realm, the world of the artisan was the main world, and the power of the law had an innate restriction on them.

This was also the reason why the life forms produced by the creation ball could be ordered around without being able to resist. It was because from the moment they were created, they had already been labeled as slaves.

Dean Xu sat for a while and let Leah accompany Tang Zhen. He then went back to study the metal plate.

Before he left, he also told Tang Zhen that if she had any problems in the future, she could directly go to the laboratory to find him.

To be able to receive guidance from the Academy's Dean at any time would definitely make other artisans envious. One had to know that even his personal disciples might not receive such treatment.

Tang Zhen knew that the Dean was trying to get close to him. After all, the two of them could be considered to be in a cooperative relationship. They had to face a common enemy.

In addition, it was naturally because Leah and Tang Zhen had a closer relationship.

After sitting for a while, Tang Zhen saw that the sky was gradually turning dark. He stood up and bid farewell.

Leah saw Tang Zhen off at the door, hoping that she would visit him often when she had time. Then, she watched him leave.

This continued until Tang Zhen's back view had completely disappeared. Only then did Leah fall into deep thought, slowly turning around and returning to the house.

.....

Not long after Tang Zhen left the Academy, he felt that he was being followed.

This matter had long been expected. It seemed that the city Lord's mansion had already regarded him as a thorn in their eyes and couldn't wait to get rid of him.

Perhaps they knew that Tang Zhen wasn't easy to deal with, so they dispatched ten cultivators this time. All of them were cultivators above the Lord Rank.

In addition to these ten experts, there was also a King level cultivator hiding in the distance. He was using a special secret technique to conceal himself.

Obviously, this was the other party's backup plan. If these ten Lord level cultivators didn't kill Tang Zhen, then the hidden King level expert would wait for the opportunity to make a move.

He could see that the other party's cooperation was very professional. It was obvious that they were not ordinary enemies, but real killers.

...

Regardless of the enemy's background, Tang Zhen did not put them in his heart. They were merely clay chickens and pottery dogs. He could kill all of them with just a move of his finger.

Chapter 1839 Destroying the city Lord's mansion (1)

The boulevard in front of them was the ambush point planned by these killers.

Tang Zhen seemed to be completely unaware as he continued to slowly advance forward. He soon stepped into it.

Just as Tang Zhen had walked to the middle of the road, a light flashed past and headed straight for his vital part.

The hidden assassin suddenly launched an attack. His mission was not to kill Tang Zhen but to attract his attention.

At the same time as the killer made his move, the bark of the big trees on the side of the road suddenly exploded. Countless vines interweaved and cut the boulevard into countless small pieces.

These vines crisscrossed. They were soft yet tough, and were able to trap Tang Zhen in an extremely narrow area.

In this kind of chaotic net, if he wanted to Dodge and move, it would definitely waste some time.

And this short moment was enough for the assassins who were ready to attack to successfully complete their attack.

As if they had rehearsed it countless times, the assassins on the trees revealed themselves at the same time. They held a strange syringe-like object in their hands and sprayed a large amount of black liquid at Tang Zhen.

There were also some artisans who studied weapons. They used the ability of the creation ball to create a variety of biological weapons.

These weapons were strange and rare. Although most of them had average power, some of them were still hard to guard against.

Due to the suppression of the world's laws on the creatures in the creation sphere, most of the artisans would choose to nurture some special plants when they created items.

These plants were very weak against the law's suppression. If they were carefully cultivated, they could definitely be made into a pretty good weapon.

The assassins used this kind of weapon. The black liquid they spat out had a terrifying corrosive and poisonous nature. Even cultivators could not resist it.

Tang Zhen did not hesitate to activate his energy protective shield when he saw the attack coming at him. He attempted to block the black liquid.

Who would have thought that the energy shield would be rapidly corroded after coming into contact with the black liquid, becoming riddled with holes in an instant?

"Eh, this is interesting!"

Tang Zhen praised. However, that was all he did.

He gently flicked his finger, and the black liquid rolled out and scattered in all directions.

The enemies were shocked and quickly dodged.

Being touched by this kind of liquid was not a joke. One would lose their life if they were not careful. Otherwise, they would not use it to deal with Tang Zhen.

Who would have thought that the liquid would come to life and bypass the cover they were hiding behind, and come at them again?

"Damn it, what's going on?"

The Ambusher's heart tightened, and while cursing in his heart, he had no choice but to avoid his hiding spot.

Tang Zhen's palm gently swept across the ground when the enemy appeared. Numerous fallen leaves floated into the air and hovered around Tang Zhen's body.

Unlike normal fallen leaves, these leaves were spinning rapidly, looking like phantoms.

"Whoosh!"

A Fallen Leaf flew out first. The killer closest to him couldn't Dodge in time and his throat was cut by the leaf.

The leaves flew out one after another, surrounding the assassins. They were so fast that they could not be seen clearly.

With a series of screams, the assassins were cut into pieces by the seemingly soft leaves, and their bodies scattered on the ground.

After the killers were eliminated, the leaves flew back and forth between the vines, instantly destroying the large net that blocked the tree-lined road.

Tang Zhen stepped on the broken vines. He turned his head and looked at a spot in front of him. His eyes contained a trace of coldness.

That hidden King level cultivator seemed to have sensed Tang Zhen's emotionless gaze at this moment. His body could not help but tremble slightly.

Never in his wildest dreams did he think that the target of tonight's mission would be so difficult to deal with. In just a breath's time, he had killed all ten experts.

Tang Zhen's strength and methods had already far exceeded his expectations. If he were to rashly make a move, he might not be able to leave tonight.

The king level cultivator wanted to retreat. He used a secret technique to cover his retreat.

As soon as he turned around, he found dozens of leaves floating behind him, as if they were going to hit him in the next second.

A trace of cold sweat dripped from his forehead. This King level cultivator knew that Tang Zhen had already found his hiding place.

At this time, as long as he made a slight movement, he would be cut into mincemeat by these leaves. Even if he tried to escape with his life, he would probably end up with serious injuries.

Thinking of the consequences of falling into Tang Zhen's hands, this King level cultivator secretly gritted his teeth and chose to risk it all without hesitation.

The moment the energy shield appeared, the king level cultivator slashed out with all his might and then shot forward like a bolt of lightning.

The spinning leaves seemed to have been affected. They couldn't block the king level cultivator's path, nor could they destroy his energy shield.

Rejoicing inwardly, the king level cultivator prepared to escape as far as he could.

But at this moment, a breeze blew, and the fallen leaves on the ground floated up at the same time.

Looking at the falling leaves surrounding him, the king-class cultivator cried in his heart, but he had no choice but to continue moving forward.

In the blink of an eye, his body was once again wrapped up by the fallen leaves, leaving no gaps.

The king-level cultivator struggled with all his might, but after a few seconds, he was cut to death by the leaves.

"You've overestimated yourself,"

Tang Zhen gently shook his head as he looked at the bloodied corpse that was half-covered after the tree leaves fell.

In order to deal with him, the city Lord's mansion had indeed sent a true expert to try and kill him directly.

However, it was unable to pose any threat to Tang Zhen. In fact, he could not even bear the disturbance.

It felt like a mosquito flying around him. It obviously couldn't cause much damage, but the sound was extremely annoying.

“I estimate that after this operation fails, they will send more people, or even use roundabout means to deal with the people around me.

Since that’s the case, we might as well cut off the source and avoid the continuous trouble.”

...

Tang Zhen made up his mind. He turned his head and looked in the direction of the city Lord’s mansion. There seemed to be a ray of light flowing in his eyes.

It did not take long for fireballs to appear in the starry night sky and fly toward the ground.

This scene was quickly discovered by the people, especially the artisans in the city. They immediately confirmed that these fireballs were actually meteors falling from the sky.

Most meteorites contained strange substances and were one of the commonly used materials of artisans. However, this was the first time many of them had seen such a spectacular meteorite fall.

However, when they realized that the meteorites were falling toward the city, the people who had been looking up immediately panicked.

If they were hit by a meteorite, it would be a disaster. Even King level cultivators couldn’t resist such an attack.

Just as everyone was worried, the first meteorite had already landed, and it landed right where the city Lord’s mansion was.

The earth trembled violently, and a blinding flame shot up into the sky. The city Lord’s mansion immediately collapsed, and miserable screams rang out.

More and more meteorites fell, and the place of impact was still the city Lord’s mansion. The buildings nearby were not damaged at all.

The originally gorgeous capital city had been completely turned into a deep pit by the continuous bombardment of meteorites.

As for the buildings on the ground and the people inside, they had long been turned into charcoal after the continuous bombardment.

...

As the last meteorite fell, the people heaved a sigh of relief, but at the same time, a trace of doubt appeared in their hearts.

No matter how he thought about it, it didn’t seem right. Why did all the meteorites land in the city Lord’s mansion? it didn’t make any sense!

Chapter 1840 All kinds of conjectures (1)

Tang Zhen let out a soft snort as he looked at the corner of the city that was illuminated by the raging flames. He turned his head and walked toward his residence.

The moment he left, the corpses and vines on the ground emitted white flames without any temperature and were burned to ashes in an instant.

A gust of wind blew past, and all traces disappeared. No one would be able to discover that a battle had taken place here.

The number of people on the streets grew more and more. They were obviously attracted by the changes in the city Lord's mansion, and they were discussing while watching.

Tang Zhen passed through the crowd. He seemed to be a passerby and everything had no relation to him.

Tang Zhen had never placed the city Lord in his eyes. He was insignificant compared to the enemies he had killed.

If the other party had not provoked him time and time again, Tang Zhen would not even be bothered with them. He had only acted this time around to completely resolve the trouble.

Even though this matter would arouse suspicion, Tang Zhen would not be affected in the slightest without any evidence.

On the contrary, this would increase his own power. At the very least, when Leah's grandfather found out about this, he would have to reevaluate his strength.

Originally, he had promised that after Tang Zhen had dealt with the city Lord, he would be responsible for cleaning up the mess.

However, with the city Lord's mansion being attacked by meteorites, the original means were no longer needed. It was just a natural disaster, what clues did they need to clean up?

She wondered what kind of expression he would have after knowing this.

Along the way, Tang Zhen bought some fresh food from the roadside and returned home for the siblings to cook.

After seeing Tang Zhen's return, the siblings guarding the door hurriedly came forward to welcome him. Their faces were filled with gratitude.

Today's study at the artisan Academy had given the siblings a completely different experience. They had also thoroughly realized the difference between an artisan and an ordinary person.

Although they could not even read due to the limited living conditions, it did not stop the siblings from making up their minds.

He absolutely couldn't let down Tang Zhen's good intentions. He had to learn it and then repay his kindness.

Tang Zhen quietly nodded when he saw the siblings who were clearly much more confident. As expected, one's spiritual will was the main factor that affected one's temperament.

At this time, the siblings gave off a vigorous aura, and they would probably be more active when they encountered trouble.

After inquiring about the two's learning situation and learning about their difficulties, Tang Zhen said a few words of encouragement and told them not to be too hasty.

He had already eaten at the headmaster's house, so he didn't waste any time. Instead, he went straight to the laboratory and started to work.

In order to achieve his expected goal as soon as possible, he even used his Origin Energy to feed the insect, hoping that it would grow as soon as possible.

The effect of feeding it was naturally very obvious. In just a few days, the size of the insect had grown rapidly.

It was estimated that after a period of time, the innate ability of the insects would gradually reveal itself. At that time, they would be able to freely enter and exit the creation sphere under Tang Zhen's control.

It was a quiet night.

The next morning, Tang Zhen brought the siblings to the creator Academy. Along the way, they heard people talking about the meteorite falling from the sky last night.

The entire city Lord's mansion was completely destroyed, and not a single person survived. Not even their corpses could be found.

Even the city Lord, who had the strength of a King, was not spared. Only a small piece of debris was found in the location of the laboratory.

This incident naturally caused a stir in the entire city, and even spread to the nearby cities. It also attracted a lot of attention.

It was said that the capital had sent a top-notch cultivator overnight to the ruins of the city Lord's mansion to find out the specific reason.

There were different opinions among the people on this matter.

Some people said that the city Lord and his son had done too many evil things, so they were punished by the heavens. Otherwise, why did those meteorites only fall on the city Lord's mansion and not damage the buildings nearby?

Some said that this was the doing of the city Lord's enemy, who should be from a reclusive family. They used a special method to summon meteorites to attack and raze the city Lord's mansion to the ground.

However, such a method was unheard of. Even if it was really revenge, it must have been done by an extremely powerful cultivator. Otherwise, it would be impossible to achieve this.

In addition, there was another saying in the market.

Those who supported this claim asserted that there must be a legendary creation ball hidden in the city Lord's mansion, but the creature inside unexpectedly escaped last night.

It was only because the creature in the creation ball had exceeded the king rank and violated the heavenly laws of the world of artisans that the heavenly Tribulation would destroy it.

This was the most fantasizing theory, but some people still believed it because similar things had happened in the world of artisans.

More than a hundred years ago, a certain ruin suddenly appeared, and dozens of creatures from the creation ball passed through the crystal wall and came to the world of the artisans.

This ruin had existed for more than ten thousand years. After the creatures in the creation ball appeared, each one of them had the strength of a King.

As a result, the moment these creatures appeared, they immediately triggered the laws and triggered the lightning tribulation. Within a radius of a hundred miles, the lightning struck these creatures and turned them into ashes.

Because of this Thunder tribulation, many explorers near the ruins were affected and died without an intact corpse.

Therefore, these people were certain that a similar creature must have appeared in the city Lord's mansion, which was why the meteorite attack was attracted.

All sorts of rumors were circulating in the city, and the more they spread, the more mysterious they became. For a time, it became the hottest topic in the entire city.

As for the unpopular city Lord, no one felt sorry for him.

Tang Zhen had an indifferent expression on his face when he heard the discussions of the people on the side of the road. It was as if it had nothing to do with him.

On the other hand, the sister and brother had faces full of excitement. They knew that the city Lord's mansion seemed to be looking for trouble with Tang Zhen. Now that the other party had died overnight without an intact corpse, it was naturally a good thing.

"That's great. I knew that Tang Zhen would be fine. It seems like my sister and I's prayers have come true."

The younger brother said casually, his face full of excitement.

"Oh, what did you pray for?"

Tang Zhen turned around and casually asked after hearing this.

my sister and I prayed that the city Lord's mansion would be burned down, and it really came true. Does this count as a sincere heart? "

Hearing his younger brother's question, Tang Zhen smiled but did not say anything.

The weak were good at praying, hoping that the gods and Buddhas in the sky would respond to them, while the strong could do as they pleased and do what they wanted.

...

With Tang Zhen's current strength, he could become a God in the eyes of those natives if he wanted to.

This was because what he did casually was a miracle in the eyes of ordinary people.

After arriving at the creator Academy, Tang Zhen met a few familiar students along the way. However, after these people saw him, their faces revealed a strange expression.

Tang Zhen knew what they were thinking. He had just issued a challenge to the city Lord's mansion, and the result was that the city Lord's mansion was annihilated overnight.

If the matter was too coincidental, there would definitely be something fishy going on. Some people even boldly speculated that the change in the city Lord's mansion might be related to Tang Zhen.

However, the problem was that if Tang Zhen could really do this, why would he stay in the creation Academy? where could he not go to in the vast world?

At the same time, there were also some people who felt that Tang Zhen was extremely lucky. Otherwise, he would definitely not be able to bear the consequences of offending the city Lord's mansion.

When they saw that Tang Zhen and Leah were very close, they couldn't help but feel jealous. Their thoughts also became darker.

Being able to see Tang Zhen in misfortune would naturally cause them to feel happy in their hearts. They could not wait for him to quickly leave this city.

Who would have thought that in the blink of an eye, an unforeseen event would happen in the city Lord's Manor. It was truly a pity.

Tang Zhen did not care about the various gazes along the way. After parting with the siblings, he headed straight for Leah's laboratory.

...

At that moment, Leah was waiting for him in front of the building. She was dressed in a fitting and capable outfit, which made her tall and round figure look even more alluring.

Her long hair hung down gently, glistening like top-grade plain brocade. Coupled with her delicate but slightly cold face, men and women passing by often turned their heads to look.

After seeing Tang Zhen walking towards her, the corners of Leah's mouth curled up into a smile. It was bright and beautiful, making people who saw it lose their minds.

Those men who were secretly observing were secretly envious of Tang Zhen, who made Leah smile. At the same time, they also felt a faint sense of disappointment.
