

## Alternate 191

### Chapter 191: chase to the base

A violent explosion sounded, causing the black-feathered Birdmen who were licking their wounds to be shocked. Then, they all looked towards the sound in unison.

On the Holy Dragon City wall in the distance, a huge metal object reflected the sunlight. It slowly rose into the sky and pounced toward the black-feathered Birdman.

The Blackfeather Birdmen turned pale with fright. The terrifying massacre earlier had already made them tremble in fear. Now that they saw that this group of humans actually had metal tools that could fly in the sky, the Blackfeather Birdmen felt despair from the bottom of their hearts!

Looking at the metal flying object that was flying at high speed, the Blackfeather Birdmen did not hesitate to choose to retreat and escape. They had already been frightened by the Holy Dragon City and could no longer muster the courage to resist!

In an instant, these black-feathered Birdmen were like a flock of chickens that had their nest blown up, fleeing for their lives.

On the assault Helicopter, Tang Zhen, who was sitting in the driver's seat, turned his head around and looked at Qian Long, who was staring ahead without saying a word. "Do you think we should just chase after them and kill them, or should we just follow them slowly and tire them out?"

Qian Long looked at Tang Zhen when he heard this. His face was filled with astonishment, of course I'm going to exhaust them to death. I don't think that's a problem, right? "

As soon as he finished speaking, the two of them looked at each other and laughed at the same time.

The other members of the cultivator battle team on the plane looked around speechlessly, but they were in full agreement with the city Lord and their leader's wicked idea!

The Birdmen who attacked today were not good people at all. If Holy Dragon City did not have powerful weapons and defenses, the Holy Dragon City would have been covered in blood by now. Against the weak human race, these foreign races would not hesitate to kill.

Therefore, the best way to talk to these alien races was to kill them!

The military helicopter roared and followed the panicking black-feathered Birdmen at a distance. When it saw the black-feathered Birdmen slowing down, it fired a round of bullets. The exhausted black-feathered Birdmen were so scared that they increased their speed again, afraid that they would be hit by the bullets.

In the process of the pursuit, from time to time, a black-feathered Birdman would exhaust its strength and fall to the ground. Every time this happened, the cultivators on the plane would reward it with a burst of bullets to end its pain earlier.

After chasing for a while, some of the Blackfeather Birdmen flew in other directions, trying to escape in different directions. After a dozen of them were killed, they no longer dared to run around. They could only run in the direction of Blackfeather Tower City.

After about two hours of pursuit, a huge, Straight Mountain appeared on the horizon. It was surrounded by flat land, so it was very abrupt.

When the remaining black-feathered Birdmen saw the mountain peak, it was as if they had been injected with chicken blood. They increased their speed once again and ran towards the cliff.

Tang Zhen observed the huge mountain in front of him through the map view and confirmed that this should be the building of the black-feathered Birdmen. This was because he saw a group of black-feathered Birdmen with the same appearance flying out of the cave on the mountain peak and heading straight for the armed helicopter.

The distance between this tower and the Holy Dragon City was obviously more than a hundred kilometers, so it was not displayed on the cornerstone trading platform's map.

“Get ready, we're going to work!”

Tang Zhen softly ordered. At the same time, he turned on the weapon operating unit and locked on the approaching black-feathered Birdmen as targets.

“Pa pa pa!”

A muffled sound suddenly rang out, and the attack helicopters began to spray fire. The large-caliber artillery bullets collided with the aggressive black-feathered Birdmen, and blood and flesh exploded in the sky.

Dozens of black-feathered Birdmen were enveloped by the 30 mm cannon as soon as they came into contact with each other. None of them were spared!

The terrifying power of this weapon not only scared the black-feathered Birdmen, but even the Holy Dragon City cultivators on the armed helicopters grimaced in pain. Just imagine the scene of this kind of weapon bombarding the body. That was the real death!

Tang Zhen flew the assault Helicopter over the mountain peak and looked at the black-feathered Birdmen that were on the verge of collapse. They were unable to move at all and were paralyzed. He turned his head and signaled Qian Long to kill them.

Since they had already completed their mission of leading the way, there was no need for these guys to live anymore. It was definitely a dream to think that they could escape unscathed after attacking Holy Dragon City!

Gunshots were heard. A large group of black-feathered Birdmen who had just rushed out of the cave watched as their own people were shot and twitched a few times before dying miserably in front of them, bleeding all over. All of them roared in anger.

Tang Zhen could sense the fury in their eyes. They wished for nothing more than to tear him into ten thousand pieces!

don't worry. I'll send you to hell to reunite immediately!

Tang Zhen gently shook his head as he looked at the black-feathered Birdman that was about to fly. He pressed the launch button again and an air-to-ground missile left the armed helicopter. After drawing a trajectory in the air, it bombarded the entrance of the cave!

A huge explosion rang out, and the gathered black-feathered Birdmen were immediately swallowed by the flames, not even their bones were left.

The entire mountain peak seemed to be shaking, and boulders kept falling from the peak. Many of the black-feathered Birdmen who had just run out of the cave were smashed to the ground by the boulders. The survivors looked at the cave entrance that had completely collapsed in fear, and their faces were filled with unconcealable horror and panic.

Tang Zhen, who was sitting on the plane, watched for a while and fired another missile. This time, the missile directly blew off the top of the mountain. A huge rock rolled down and fell to the ground after crushing a few black-feathered Birdmen to death.

Since the city Lord of the black-feathered Birdman didn't come out, I'll blow it out!

After a series of cannon attacks, when Tang Zhen was about to launch another missile, several loud bird calls were heard. Then, more than ten tall black-feathered Birdmen flew out of a hole at lightning speed. They held bows and arrows and aimed at the armed helicopter.

"Who are you? why did you destroy my tower?"

A Birdman with sparse golden and black feathers loudly questioned Tang Zhen. However, from its appearance that was fierce on the outside but weak on the inside, it seemed that this sentence was just to support its clan.

cut the crap. Who gave you the guts to attack my tower? if you don't give me a reasonable explanation and a satisfactory compensation, I'll destroy your bird's nest completely!

Tang Zhen's voice came out from the loudspeaker. Because of the loud noise, it actually scared the black-feathered Birdmen.

Because Tang Zhen was using the language of the black-feathered Birdmen, the other party could completely understand his words. It was also because of this reason that the black-feathered Birdmen's expressions changed and they immediately began to chat.

As the higher-ups of Blackfeather tower, they were naturally aware of the military operations of the tower. However, they did not take this operation to heart.

He had only collected the brains of the kobolds and attacked a human city. It was not enough to attract their attention.

However, who would have thought that after delaying the attack for a few days, not only did the dog-headed people not ask for help again, but these lowly humans even came to their door and destroyed Blackfeather Tower City to this extent.

"These lowly humans should be hung on the rocks and dried, then used to raise meaty bugs!"

Out of his usual contempt for the human race, one of the black-feathered Birdmen couldn't help but curse.

However, just as it finished speaking, a few cannon bullets were fired at it, turning it into a pile of rotten meat.

The Blackfeather birds were shocked. The arrows on their bowstrings were deflected by the strong air current, and they didn't even touch the helicopters. Instead, the archers were hit by the bullets from thousand Dragon and the others.

However, these black-feathered Birdmen were all wearing demonic soldier armors, so the bullets did not cause much damage to them. Just when they thought that the Holy Dragon City could not do anything to them, Tang Zhen's cannon bullets arrived and directly killed these black-feathered Birdmen!

Although the defense of the demon soldier armors was extremely strong, they could not withstand the attack of a cannon. Moreover, they were only wearing low-level demon soldier armors!

After the Lord of Blackfeather tower saw this scene, he realized the horror of the attack helicopters. He was not willing to see his own people being slaughtered like this, so he could only shout loudly, signaling Zhen Tang to stop the attack!

Chapter 192: ruthless extortion

Following the Lord of Blackfeather city's roar, the intense gunshots gradually died down. Zhen Tang's voice once again came out from the loudspeaker, "So, have you thought about it? now tell me your answer?"

A blood-stained Broken Feather floated past. The master of Blackfeather city's face was ashen. He looked at the remains of the Blackfeather Birdmen scattered on the ground and shouted angrily, "What do you want? just say it."

The Lord of Blackfeather city's face was twisted, showing that he was very unwilling to give up. It was only because of the mask that no one could see it.

Although it was extremely eager to kill Tang Zhen, the lethality of the armed helicopter was too terrifying. The black-feathered Birdman had no room to resist.

If the stalemate continued, black feather Tower City might really be destroyed.

these damn humans, I must take revenge on them. I'll kill them all, not letting a single one go!

The master of Blackfeather city suppressed his anger and swore in his heart.

Tang Zhen, who was in the plane, frowned and thought for a moment. Then, he shouted at the governor of Blackfeather city, "I want a million brain beads, now!"

In the endless wilderness, Level 1 brains were the basic unit of measurement. Therefore, Blackfeather tower only needed to take out brains equivalent to one million brains, for example, 100 level 5 brains!

The master of Blackfeather city's expression changed. He roared at Tang Zhen again, " "This is extortion! We don't have that many brains!"

Tang Zhen sneered when he heard this, "your City Tower is at least level three. It should have been built for quite a few years, right?" Furthermore, you guys can kill monsters in the sky and have the advantage. So, I don't believe that you don't have a million brain beads.

Since you're not willing to compensate me with your brain, let's fight!"

After Tang Zhen finished speaking, the sound of the cannon firing rang out once again. The remaining black-feathered Birdmen were so frightened that they hurriedly flapped their wings and fled.

"Damn human, I promise you!"

The master of Blackfeather city let out an indignant roar and gave an order to the terrified Blackfeather Birdman beside him. Without saying a word, he flapped his wings and floated in the air. His cold mask was covered in frost.

Tang Zhen's exorbitant demand this time had completely emptied the foundation of Blackfeather Tower City. This was the accumulation of many years!

However, in order to protect black feather tower, it had to do this. After all, black feather tower was its Foundation. If it lost the tower, it would be better off dead.

He could earn more brain pearls, but he had to protect Blackfeather tower. He had to take revenge, but he didn't have to be in a hurry!

Within the assault Helicopter, Tang Zhen turned around and asked Qian Long in shock, "It agreed just like that, shouldn't it haggle for a bit?"

Qian Long shrugged, indicating that he didn't know the situation either.

"If I had known that it was so rich, I would have asked for two million brain beads!" Tang Zhen pouted and mumbled.

If the governor of Blackfeather city had heard this, he would have fainted from anger. This was too shameless.

Dozens of Blackfeather Birdmen flew out from the tower, each holding a huge leather bag in their hands. Following the orders of the Lord of Blackfeather city, they piled the bags on the ground.

"The brains you want are all here. Please take them and leave immediately. Don't try to ask for anything else, or I'll fight you to the death even if I have to risk my entire clan being exterminated!"

The Lord of Blackfeather city roared and flew back into the tower without looking back. The remaining Blackfeather Birdmen looked at each other and followed him back.

Tang Zhen landed the assault helicopter on the ground and jumped down to inspect it. He then waved his hand and kept all the brain beads into his storage space.

Tang Zhen turned around and looked at the Lord of Blackfeather city, who was standing at the highest point of Blackfeather tower. He then jumped into the military helicopter and flew away under the hateful gazes of countless people.

The next time he set foot in Blackfeather Tower City, it would be the time when the Birdmen city would be destroyed!

Tang Zhen had never let down his guard against these damned people. This time, he had relied on the help of the armed helicopter to completely intimidate the Blackfeather Birdmen. Under the threat of destroying the city, the governor of Blackfeather city had unwillingly handed over the brain bead.

They would definitely not be willing to be extorted by Tang Zhen. They had probably already begun to discuss their revenge plan.

Unfortunately, they did not know that the Holy Dragon City was not an ordinary human city. If they dared to attack, they had to be prepared for a one-way trip!

The assault Helicopter sped all the way back to Holy Dragon City before night fell, attracting cheers from all the soldiers on the city wall!

Tang Zhen and the others jumped off the plane, and Tai Seng and the others, who had been waiting for a long time, immediately pounced over and asked Qian Long and the others about the situation.

During this period of time when Tang Zhen and the others were pursuing, everyone was on tenterhooks. Although they were very confident in the city Lord's strength, there were countless accidents in the endless wilderness. No one dared to guarantee that they would never encounter any accidents in the wilderness.

Now that the city Lord had returned, he must have returned with a great victory!

When they heard that Tang Zhen had blown up the buildings of the black-feathered Birdmen, killed and injured many of them, and even successfully obtained one million brain beads, they immediately cheered in excitement.

Tang Zhen laughed and joked with them for a while, then walked to the ammunition box at the side and sat down. He thought about how to deal with the possible retaliation of the black-feathered Birdman.

From today's battle, it could be seen that as long as one's cultivation was not above level five, they would be extremely fragile in the face of guns and weapons. Even the black-feathered Birdmen, who were wearing low-level demonic soldier armor, could not withstand the impact of large-caliber artillery.

If they were equipped with more powerful combat weapons, they should be able to guarantee Holy Dragon city's invincible position in this area!

Tang Zhen had many channels to get his hands on heavy weapons. However, these weapons required too much professional knowledge. The guys from the Holy Dragon City could play with rifles, but to expect them to pilot tanks and aircraft, they would have to wait until the sun rose from the West.

If they could get a batch of cannons, they could easily control them, but at most, they could use them to defend the city.

Therefore, the Holy Dragon City had more than enough power to protect itself, but not enough power to attack.

Before a large number of talents from the original world poured in, Tang Zhen could only temporarily slow down the pace of his expansion. At the same time, he could constantly improve the self-protection ability of Holy Dragon City. Even if he expanded his territory, he would at most wipe the corpse race and Black Rock City off the map.

He had to speed up the progress of the cross-plane Soul transmission experiment. Otherwise, who knew when Holy Dragon City would be able to reach the scale of Tang Zhen's dream!

This time, he had obtained quite a number of brain beads. He could upgrade the Holy Dragon City to Level 3. However, before the flashing gold race's sanctuary was cleared, Tang Zhen did not plan to upgrade the tower City. Instead, he chose to upgrade it together with the underground auxiliary city.

At that time, Holy Dragon City would have one main city and two auxiliary cities, both of which would be third-class turreted cities!

Those applications that were useful to him could be upgraded or downloaded. Even if he didn't need them now, he could download and install them in advance so that he wouldn't be short of money when using them.

Then, he helped Tai Seng and Qian Long exchange for two cultivator skills. They had followed him for a long time and had been very careful. Each of them exchanged for two cultivator skills as a reward.

This was what Tang Zhen wanted to do next!

Chapter 193: cultivator's skill!

Summoning Tai Seng and Qian Long over, Tang Zhen led the two of them down the city wall and headed straight for the tower.

Although they really wanted to know what Tang Zhen wanted to do, neither of them asked. They only silently followed behind and entered the foundation stone Hall that had become even more spacious after the upgrade.

Looking at the puzzled faces of the two capable generals, Tang Zhen smiled and explained, the two of you have been with me for a long time, building Holy Dragon City from scratch. It can be said that the Holy Dragon city's current situation is entirely due to your hard work.

When Tang Zhen said this, he glanced at the two of them and gently nodded his head in thanks.

Qian Long hurriedly waved his hand. city Lord, there's no point in saying that. Before I met you, I was just a wandering Wanderer who lived in constant danger. If it wasn't for the fact that I saw how extraordinary you were and wanted to form a good relationship with you, I probably wouldn't be where I am today.

In my heart, you're a mysterious and magical person who's very protective of your citizens and subordinates. Without you, Holy Dragon City wouldn't have its current scale. At most, I'm just running errands. It's not as serious as you make it out to be."

Tai Seng also laughed and rubbed his bald head, " "If the city Lord didn't appear, Lisa and I would have become food for the bloodthirsty gnomes. Other than fighting the war, I can't contribute to any of the Holy Dragon city's matters. If fighting the war is considered a contribution, then the city Lord's contribution is the greatest. If it wasn't for the city Lord's weapons and equipment, as well as those god-like abilities, how could our Holy Dragon City defeat so many powerful enemies again and again!"

Tang Zhen laughed when he heard that. He pressed his hands down and said, Alright, alright, let's not flatter each other. I called you two over today to exchange for cultivator skills for you two. Two for each person, no price limit!

Qian Long and Tai Seng looked at each other and immediately burst out laughing. After bowing to Tang Zhen, the two of them immediately ran to the cornerstone trading platform and picked out the cultivator skills that they were interested in.

In fact, the two of them were even more clear than Tang Zhen about the cultivator skills in the cornerstone trading platform. When they had nothing to do, they would often discuss the pros and cons of these skills. If it wasn't for the fact that they didn't have enough points and brains, the two of them would have long come here to exchange for skills!

The two of them had already chosen the cultivator skills that were suitable for them. Therefore, they quickly finished choosing and waited for Tang Zhen to pay the points.

After this period of sales, Tang Zhen had already accumulated more than 30000 points. However, the four skills that the two of them had chosen required more than 70000 points, so Tang Zhen needed to add 40000 Level 1 brain beads.

Tang Zhen himself also wanted to exchange for two kinds of cultivator skills to use, so he simply paid 100000 Level 1 brain beads, obtaining 130000 points.

Following the payment of the points, Tang Zhen saw three light orbs floating out from the cornerstone trading platform and slowly landing in front of the three of them.

Following the instructions in his mind, Tang Zhen stretched out his hand and grabbed a ball of light. After which, he violently squeezed it.

After a soft "PU" sound, the five-colored flowing light dispersed from Tang Zhen's hand and formed an oval-shaped light egg. After his body completely surrounded it, it slowly floated into the air.

Three rays of light flew out from the cornerstone trading platform. After it was connected to the light egg, it caused the surface of the light egg to flow with brilliance. Tang Zhen and the other two entered a state that seemed to be sleeping but not sleeping. The information of the two cultivator skills that they had exchanged was also completely transmitted into their minds.

After an unknown amount of time, Tang Zhen finally recovered from his soul-leaving state. When he opened his eyes, he noticed Qian Long and Tai Seng were still floating in the sky, and they had yet to wake up from that state.

After confirming that there was nothing abnormal with the two people, Tang Zhen began to comprehend the two cultivation skills that he had just obtained.

[ flame rage: when attacking, the surface of the body will emit a flame-like energy fluctuation. Duration: 1 minute. The target is hit by fire damage, consumes 50% of strength, and attack power is doubled! ]

[ ice edge battle armor. When activated, a dark blue Mystic ice battle armor will form all over the body. Lasts for one minute, consumes 50% of strength, and increases defense by one fold! ]

These were the two cultivator skills exchanged by Tang Zhen, one for attack and one for defense.

It wasn't that Tang Zhen lacked a cultivator's skill for self-defense. He was more curious and wanted to see what this cultivator skill was all about.

According to the information obtained in his mind, Tang Zhen activated raging Flame Strike. Then, an orange flame rose from his palm. This flame did not burn his clothes, but quickly covered his entire body. In the blink of an eye, Tang Zhen had become a man of fire.

He tried to touch the door with the flame on his finger and issued a burning command in his mind. A black pit was immediately burned on the wooden door sill, and green smoke slowly drifted out.

It seemed that before he gave the order, the flames would not be able to hurt anyone.

After Tang Zhen understood this point, he was about to try out the ice edge battle armor's effect. However, at this moment, his phone suddenly vibrated. At the same time, a set of words appeared in front of his eyes.

[ unknown application detected. It's an incomplete version with a degree of incompleteness of more than 60%. It has been included in the application store and has been completely supplemented. You're rewarded with a free download of the application and a free upgrade of the application level. ]

Tang Zhen looked at the subtitles in front of him and frowned. He immediately opened the application store and quickly searched for the new application.

[ raging flames, Level 1 (total of 10 levels). Through special guidance, natural energy can be used to stimulate a special flame that can be controlled. Beginner usage duration: one minute. Consumes 50% of the body's energy. Attack power is doubled. Download cost: 50000 gold coins. ]

Looking at the introduction of this application and comparing it with the cultivator's skill introduction in his mind, Tang Zhen felt that there might be a special connection between the two that he didn't know about.

Since the phone had already notified him that he could download it for free, Tang Zhen naturally wouldn't let go of such a good opportunity. After downloading and installing it, Tang Zhen started the application.

The orange-red flame once again covered his body, just like the cultivator's skill.

A minute later, the flames on his body disappeared. Tang Zhen opened the application store again and found the upgraded version of the application.

[ raging flames, level two (total of 10 levels). Natural energy can be guided through a special channel to stimulate a special flame that can be controlled. The basic use lasts for two minutes, consumes 45% of the body's energy, and the attack power is doubled. Download cost: 100000 gold coins. ]

With just one level up, the duration of the flame frenzy had doubled. The energy consumption had been reduced by 5%, but the attack power had doubled!

Tang Zhen once again had a deep understanding of the heaven-defying ability of the application store.

Because of the reward, Tang Zhen could upgrade once for free, which would save him 10000 brain beads!

After downloading and installing the upgraded version of [ raging flame frenzy ], Tang Zhen immediately started the application. Only this time, the flames covering his body turned yellow and white, and the temperature increased by nearly a thousand degrees!

Tang Zhen felt it for a while before closing the application. Then, he slowly activated the cultivator skill called [ ice edge battle armor ].

An incomparably dazzling dark blue battle armor covered the surface of Tang Zhen's body. As Tang Zhen's arms shook, two 1.5 meter long blue ice blades appeared on his arms. They appeared incomparably sharp.

As expected, a row of words once again appeared in front of Tang Zhen's eyes!

Chapter 194: The secret of mobile applications?

[ unknown application detected. It's an incomplete version with a degree of incompleteness of more than 60%. It has been included in the application store and has been completely supplemented. You're rewarded with a free download of the application and a free upgrade of the application level. ]

The content of the subtitles was exactly the same as raging flames. Both of the cultivator skills were identified as incomplete applications by the mobile phone and were stored in the application store.

With the experience from the first time, Tang Zhen directly downloaded and installed the original and upgraded versions. Then, he tried to start them.

This time around, the speed at which the ice Armor appeared was even faster. With just a thought from Tang Zhen, the ice Armor that had turned a deeper color rapidly condensed on the surface of his body. At the same time, some sharp ice spikes also appeared on his shoulders and elbows.

The icy saber that was condensed by his will seemed to be even sharper and more threatening. Both its sharpness and hardness had increased by a lot!

Tang Zhen really wanted to test out the might of these two techniques. However, he was currently inside the tower and didn't have any space to use them. It seemed like he could only wait for Qian Long and the other man to finish before he went to find a suitable testing ground.

After another ten minutes or so, Tang Zhen saw the light on the surface of Qian Long and Tai Seng's bodies dissipating at the same time, and the two of them slowly landed on the ground.

Qian Long and Tai Seng opened their eyes one after another with a pleasantly surprised expression. After exchanging a glance, they did not say anything and followed Tang Zhen out of the tower.

On an empty plot of land in the valley, Qian Long first displayed his cultivation skills.

Of the two cultivator skills he had exchanged for, the first was a movement skill, which could double one's speed for a short period of time. However, this skill consumed a lot of physical strength and could not be used for a long time.

The second cultivator skill was a stealth skill. It could help thousand Dragon's body become as light as a swallow, and he could land without making a sound. After using this skill, for some unknown reason, the place he was in would become blurry, causing people to subconsciously ignore that position.

After Qian Long displayed his skills, Tai Seng couldn't wait to display his cultivation skills as well.

Among the two skills, one was mainly for attack. When it was used, it was abnormally violent, making people not dare to block its edge.

The other skill focused on defense. It could form a gaseous armor on the surface of his body. Not only would it not affect his movement, but it could also block the attack of javelins and poisonous smoke. It was a good defensive method.

After the two of them displayed their respective skills, Tang Zhen also started to use them and displayed them in front of the two of them.

Qian Long and Tai Seng furrowed their brows as they watched. They had also understood the two skills that Tang Zhen had exchanged for. However, from the introduction, these skills were only so-so. How could they be as powerful as the one that Tang Zhen was using right now?

However, Tang Zhen did not explain. The two of them did not ask further.

After familiarizing themselves with the exchanged cultivator skills for a while and exhausting the energy in their bodies, the three of them left.

Tang Zhen once again returned to the cornerstone trading platform. After browsing through all the cultivator skills, he tried to download two more skills.

One was an offensive skill of a cultivator, while the other was a defensive skill of a Holy master.

The egg of light appeared once again. Tang Zhen floated in the air and entered a state of comprehension. After he returned to normal, he immediately began to use the skill he had just obtained.

When he used the cultivator's attack skill, words popped up on the screen again, exactly the same as the previous two prompts.

However, when Tang Zhen used the Holy master skill, the group of subtitles did not appear. This situation made Tang Zhen let out a soft "Yi" and stand in place as if he was deep in thought.

From the current experiment, the phone's application store should only be missing cultivator skills, or an application similar to cultivator skills. That was why when Zhen Tang used it, the phone would prompt him and give him a reward.

However, there was no reaction from the phone after the Holy master's skill was used. Did that mean that the skills used by the Holy master had a corresponding application in the application store?

After Tang Zhen thought up to this point, he filtered the items according to the characteristics of the Holy master's protective shield that he had exchanged for. Unfortunately, he did not find the corresponding download after searching for a long time.

'What's going on? don't the cell phone see the Holy master's skills?'

That was not right. The skills of a Holy master should not be inferior to that of a cultivator, and might even be a level higher. But why was it not in the application store, and why did his phone not prompt him to record it?

Tang Zhen, who was full of doubts, looked through the application store but once again discovered that something was wrong. The two cultivator applications that he had downloaded earlier had actually disappeared!

As for the subsequent upgraded versions, they did not appear at all!

These applications had clearly existed just now, but why couldn't he find them now?

What was the secret behind this?

Tang Zhen furrowed his brows and thought for a moment. Suddenly, a flash of inspiration appeared in his mind. He could vaguely guess why such a strange situation would appear in the application store.

He remembered that after the phone was upgraded last time, the application categories had been changed, and there were many new options in the application store. Did that mean that he could only download and upgrade the cultivation applications after the phone was upgraded again?

Also, when the phone was upgraded again, would there be more applications similar to the Holy master skills?

The more Tang Zhen thought about it, the more he felt that this was the case. Otherwise, there was no way to explain the strange disappearance of these cultivators' applications!

He was suddenly filled with anticipation for the upgraded phone. He wondered how many more magical applications would be added!

However, when he thought about the amount of gold coins needed to upgrade his phone, Tang Zhen felt that he was being treated as a spendthrift.

The last time his phone was upgraded, it used up one million gold coins. Moreover, it was upgraded without Tang Zhen's consent. Every time he thought of the one million gold coins that were wasted, Tang Zhen felt heartache.

If he wanted to upgrade the phone this time, he would need 10 million gold coins. According to the 1:10 exchange rate between the brain and the gold coins, Tang Zhen would have to take out 1 million gold coins for nothing in order to complete the phone upgrade.

A million brain beads, if it wasn't for Tang Zhen's successful extortion this time, he wouldn't even know what a million brain beads would look like when piled up. It was not easy for him to have some savings, so Tang Zhen would definitely not give it away for nothing.

It was better to wait until he was not short of money and could easily take out a million brain beads. Then, he would study the problem of upgrading his mobile phone!

After no longer dwelling on these problems, Tang Zhen went to the warehouse to move a batch of goods over and placed them on the cornerstone trading platform for sale.

After exchanging for the cultivator skill, the points that he had originally accumulated had been used up. If Tang Zhen wanted to earn points, the only way at present was to sell goods.

The useless items that he got from the containers at the dock were all placed on the cornerstone trading platform for sale. Because they were ordinary items, the price wasn't too high. Tang Zhen sold nearly half of them and barely obtained 30000 points!

In fact, there were many items on the cornerstone trading platform that could be exchanged for a high amount of points. For example, salt, firearms, and weapons. There were also the special cards that Tang Zhen had obtained from the lottery.

The last time, Tang Zhen placed the two cards he got from the lottery on the cornerstone trading platform. He casually marked the asking price of 1000 points and then went to do other things.

In the end, when Tang Zhen came to the cornerstone trading platform again, he was surprised to find that the two cards had already been bought by someone. The buyer even left a message asking if there was any stock. If there was, he could buy them all!

Tang Zhen didn't pay any attention to the buyer. Although these two cards had allowed him to earn a full 500 points, he was more concerned about how many brain beads the cards could exchange for him. This sale was just to test the waters!

To Tang Zhen, the points on the cornerstone trading platform were very unreliable. Only the real brain beads were what he needed the most.

Chapter 195: Equipping the 'Scorpion' strange bug!

Tang Zhen had a lot of valuable items in his hands. Other than the valuable lottery draw cards, the price of the firearms on the cornerstone trading platform was also extremely high!

Even the dwarven and Goblin firearms that were like trash in Tang Zhen's eyes dared to bid hundreds of points. If Tang Zhen's firearms did not bid a few thousand points, the Holy Dragon city's soldiers would be the first to object.

&Nbsp; now, when training soldiers, especially new recruits, the most common phrase that Tai Seng said was: “You guys should be happy. Look at your food and drink, and look at your weapons and equipment. In total, they are worth a few thousand brain beads!

I’m afraid that even the city Lords of some small cities can’t afford to wear such equipment, but you guys wear it all day long, this is f \* cking rich soldiers!

So if you don’t train well and let down your nouveau riche equipment, I won’t beat or scold you. I just want you to take off your equipment and leave. Don’t waste such precious good stuff!”

After a long time, the Holy Dragon city’s soldiers had developed a habit. No matter when and where, their weapons and equipment would always be as bright as new, and they would keep on maintaining them when they were free.

The Holy Dragon city’s soldiers were filled with pride when they wore such equipment!

Tang Zhen wouldn’t sell firearms to the outside world. This was the basis of his standing. In the future, when his manufacturing level increased, he could consider selling some refined gunpowder guns. He could completely snatch over the business of the dwarves and gnomes and let them starve.

Salt was also in high demand. The price on the cornerstone trading platform was very high, but Zhen Tang still didn’t sell it on the platform.

The reason he did this was to build a supermarket and use these fist products to attract caravans from all over the world, making them trade in Holy Dragon City.

In this way, the Holy Dragon City would become more and more prosperous. At that time, Tang Zhen would also earn more brain pearls.

When the Holy Dragon city’s reputation became more and more well-known, and more caravans and Wanderers came here, Tang Zhen could carry out the next step of his plan.

They were different from the natives of the original world. Most of them lived, reproduced, and lived their lives in a city.

However, Tang Zhen had never thought that he would only guard a single City Tower for his entire life. In his dream, other than having a main city, the Holy Dragon City should also have countless auxiliary cities. They would surround the Holy Dragon city’s main city and form an incomparably huge cluster of buildings.

As the Holy Dragon City grew stronger, it would have more and more auxiliary cities. When that time came, Tang Zhen would raise the threshold to become a resident of the Holy Dragon City and use another method to recruit residents.

Building a city, doing real estate, and then making a lot of money!

Want to become a citizen of Holy Dragon City? Sure, but please pay the brain first!

He did not have a brain in his hand, yet he wanted to become a citizen of Holy Dragon City? No problem, you can take out a loan. The Holy Dragon city’s Spirit Bank welcomes you. You only need to use your soul as collateral and you can obtain a large number of brain beads!

The more you mortgage, the more points Tang Zhen will get. This is the benefit of being the city Lord!

He didn't want to pawn his soul, and he didn't have a brain in his hands, yet he still wanted to become a citizen of Holy Dragon City? This was also not a problem!

The Holy Dragon City Market, the Holy Dragon City Auction house, the Holy Dragon City mercenary guild, the Holy Dragon city's exploration team, and the Holy Dragon city's farms and ranches all provided you with the opportunity to earn wealth and work!

As long as you work hard, you can own a house and become a citizen of Holy Dragon City. It's no longer a dream!

Tang Zhen wasn't the kind of person who would resort to military tactics. He deeply understood the logic that it was easy to conquer a country but difficult to defend it.

If the people were tired of the war after he conquered a large piece of land, and he was short of money because of the war, all his hard work would be meaningless.

Having money and power, and being able to realize his own ambitions, this was the goal that Tang Zhen was pursuing!

.....

After walking out of the room on the cornerstone trading platform, Tang Zhen slowly walked towards the back of the mountain. It didn't take long for him to arrive in front of a huge Lake.

There was a small island in the middle of the lake, and there was a small cave on the island. The last time he used the [ terrain transformation plug-in ], he had placed the entrance to the underground tunnel of the bug thieves 'lair inside.

Tang Zhen untied the small boat by the lake and paddled the small boat straight to the small island.

The monster in the lake had been killed by him, and there was nothing in the lake now. Its purpose was to prevent unrelated people from approaching the island and to prevent the insects from running out of the strange insect laboratory.

After landing on the small island, Tang Zhen entered the cave and gradually walked down along the passage filled with fluorescent plants. It did not take long before he arrived in front of the special metal building.

Tang Zhen stood at the entrance. The door of the building automatically opened as he slowly walked in.

He had already cleaned up the laboratory, and all the corpses and dirt had been thrown under the mother tree. Now, the floor of the laboratory was as smooth as a mirror, and the walls and corners were spotless.

Tang Zhen walked in front of a row of breeding containers for eggs. After observing the squirming 'Scorpion' larvae for a while, he casually threw a handful of feed inside.

This was a feed that had been mixed through a special method, and it could increase the quality and level of this strange insect.

After leaving the container that was used to cultivate the larvae, Tang Zhen came to a transparent cabinet full of adult insects. There was a huge monster's leg bone with a dark brown 'Scorpion' lying on it. It looked very scary.

These scorpions had already matured. The purpose of Tang Zhen's visit this time was to take a batch back and prepare to let the cultivator battle team members under Qian Long parasitize them.

After picking out a few dozen scorpions, Tang Zhen put them in a container and checked the condition of the other insects before returning to the ground from the strange insect laboratory.

In a secluded corner of the Holy Dragon City, the members of the Holy Dragon city's cultivator battle team were gathered together, waiting for Tang Zhen's arrival.

Thousand Dragon had already told them that the city Lord was going to equip them with a mysterious bug that he had gotten from the bug thieves. It was very well hidden and powerful!

It was the lifelong pursuit of all cultivators to have powerful strength. However, the thought of having parasites on their bodies made them feel uncomfortable.

The members of the cultivator team had all seen the corpses of the bug bandits and were very disgusted with their half-human and half-ghost looks. Therefore, they couldn't help but feel nervous, afraid that the city Lord would turn them into that kind of disgusting ghost!

After understanding his team members' thoughts, thousand Dragon laughed and told them not to worry. This time, the parasites were only placed on their arms.

Hearing thousand Dragon's words, the team members finally relaxed.

When Tang Zhen arrived, Qian Long was the first to step out and ask Tang Zhen to install the strange parasitic worm.

It didn't take long for the strange insect on Qian Long's arm to become one with him. Under his control, the strange insect spat out a poisonous thorn and shattered a rock.

After seeing the Scorpion's power, the cultivator battle team's members revealed happy expressions. They impatiently asked Tang Zhen to place the strange parasitic worms in them.

After busying himself for a while, all the members of the cultivator battle team had parasitized the Scorpion strange insects. After Tang Zhen explained how to store energy in the Scorpion's body, he bade farewell to the members of the cultivator battle team who continued to cultivate and returned to his original world alone!

Chapter 196: Ogre guilt\_1

The main purpose of returning to the original world this time was to make a set of special armor and weapons for the ogres.

If it was in the ice Bear Alliance, Tang Zhen didn't need to worry about this kind of thing at all. As long as he explained his request clearly, a large group of people would run around to help him get everything done.

However, Tang Zhen was currently in the pickle nation, and the only person he could command was the purchaser Xiao Feng. Unfortunately, the gap between this guy's ability and Ivanov's was like the difference between heaven and earth, so Tang Zhen did not plan to count on him.

Tang Zhen would be satisfied as long as he could deal with his food and supplies.

Unlike ordinary armor, ordinary metals were not suitable for making weapons and armor for monsters like ogres. Otherwise, these armor and weapons could be worn out and damaged in a few days.

The ogre armor was very large and seemed to have a simple structure, but it involved a lot of mechanical processing procedures. There were many parts that needed to be punched and forged. Tang Zhen had to find a suitable manufacturer to produce them.

Fortunately, with the [ all-purpose electronic kit ], there was almost no information that Tang Zhen couldn't find. After filtering through the search results in front of him, Tang Zhen chose a factory in the suburbs!

After driving his pickup truck away from his residence, Tang Zhen drove straight to the factory. Following the map's guidance, he chose the most unobstructed road and arrived at the factory not long after.

After parking the car at the entrance, Tang Zhen walked into the factory and quickly found the owner of the factory.

After exchanging a few words with the boss, Tang Zhen explained his intentions. At the same time, he took out the advance payment and stated that as long as the quality was good, he would definitely not be short of money.

Although the boss didn't understand why Tang Zhen wanted to make these huge metal objects, he accepted the order after seeing Tang Zhen pay so readily and that he could also make a small profit.

After negotiating with the factory boss, Tang Zhen got a USB drive and used the [ all-purpose electronic kit ] to scan the ogres "body data and enter it. At the same time, there was also a set of automatically generated armor blueprints.

After making some slight changes to the appearance of the armor, Tang Zhen found a printer and printed it out.

These blueprints had to be handed over to the factory's boss to be processed according to the blueprints. Since the ogres were all similar in size, the data changes were very small, so the processing would be much easier.

After sending the drawings, Tang Zhen only needed to wait for the finished product.

On the way, Tang Zhen called his purchaser, Xiao Feng, to confirm that the food and other miscellaneous items were ready. Then, he went to the warehouse to transport them.

This was a warehouse built on the outskirts of the city. Every time Xiao Feng would store the purchased materials in it, Tang Zhen would transport all of them away after receiving the notice. This kind of transportation would be carried out once every ten days.

The resources in the warehouse were mainly food. It was not that the Holy Dragon city's food was not enough, but Tang Zhen planned to store more. This way, he could ensure that the Holy Dragon city's food reserves could last for a period of time if an accident happened!

During this period of time, Xiao Feng had sent over a large amount of grain. It was said that all of them came from a world-class grain merchant giant, and the quality was good and the price was low.

Currently, Tang Zhen's cave that was used to store grain was filled with the company's food products.

He drove the car to the vicinity of the warehouse with ease and familiarity. Tang Zhen observed the surroundings through the map view. After confirming that there was no abnormal situation, he walked into the warehouse and began his boring moving work.

After being busy for half an hour, Tang Zhen finally moved all the supplies in the warehouse.

He walked to the pickup truck outside and dialed Xiao Feng's number.

The other party quickly picked up, and Xiao Feng's respectful voice came from the phone, "What's your order, boss?"

&Nbsp; Tang Zhen raised his phone and said in a deep voice, "the quality of the grain this time is not bad. If there are more, get another batch in the next two days. The faster the better!"

"No problem, I'll get it done right away!" Little Feng said.

"You need to be careful. Remember not to let anyone associate you with these grains. Don't forget that!"

Tang Zhen warned Xiao Feng to prevent him from accidentally exposing his identity.

Last time in the ice Bear Alliance, Peter had to abandon his wife and children because the location of the warehouse was exposed. He had to run away with Ivanov in a hurry. It was said that he was shot on the way and almost lost his life!

Although one could be resurrected after being killed, how could a new body be as useful as the original? unless it was a body specially cultivated by Tang Zhen.

It was precisely because of this precedent that Tang Zhen began to pay attention to the safety of his subordinates in his original world. After all, it was not easy to train a qualified subordinate. Tang Zhen did not wish for his subordinate to be inexplicably killed or captured after only a few days of use!

He had caused quite a stir in the kimchi country, and he believed that he had already alarmed many forces. Tang Zhen was indifferent. He knew in his heart that they would not be able to catch him even if he exhausted himself to death.

However, Xiao Feng wasn't like him. He didn't have that kind of ability. Once he got involved, it would be very difficult for him to escape.

Now that he could only use this one person in the kimchi country, Tang Zhen had specially reminded him.

“Don’t worry, boss. I’ve already died once, so I know what to do.”

Little Feng’s tone carried a trace of emotion. He had always held a heart of respect for his boss, Tang Zhen, who had magical abilities. Especially after Tang Zhen resurrected him, other than respect, little Feng also had a strong sense of gratitude.

When he heard the concern hidden in Tang Zhen’s words, his heart was naturally moved.

After hanging up the phone, Tang Zhen drove away from the warehouse and returned to his home.

Unfortunately, Tang Zhen had underestimated the American Alliance’s interest in him. When Tang Zhen approached the warehouse, a satellite had already locked onto this place and clearly captured his appearance.

On the roof of a building two kilometers away, a few American Secret Service agents gathered together and locked their eyes on a monitor. If Zhen Tang was present, he would be able to see the scene of him moving food.

.....

Three days later, Tang Zhen arrived at the factory outside the suburbs.

The custom-made Ogre armor was already completed. Tang Zhen checked it once and paid the rest of the money. He then asked the boss to drive the armor to the warehouse where the food was stored.

After the ogres unloaded the trucks, Tang Zhen sent the truck and forklift drivers away and began to move the armor.

The technical level of this factory was good. The ogre armor made was beautiful and firm. Whether it was the polishing or welding process, Tang Zhen was very satisfied.

After putting away a portion of the armor, Tang Zhen activated the teleportation and sent it directly to old Wan so that they could try to put it on the ogres.

Old wantou and the others came forward and touched the extra-large steel armor in front of them. They looked at the silly ogres and felt a trace of envy for some reason.

Even a fool could see that these armors must be very expensive. The city Lord had given these monsters such good things, which really made people jealous and distressed!

Chapter 197: trapped in! siege

After the ogres wore this beautiful armor, they would definitely be very powerful!

Although they were envious, old Wan and the others shivered when they thought of what had happened to the ogres. At the same time, they cursed themselves for being so obsessed that they would envy a group of tamed monsters.

Tang Zhen didn't know the thoughts of old Wan and the others. Otherwise, he would definitely laugh his head off.

Were these guys out of their minds? why would they envy a bunch of monsters who were destined to be targets on the battlefield?

If he wasn't afraid that these tamed ogres would die easily, Tang Zhen wouldn't have run around and wasted a few days to make armor for these monsters!

Returning to the warehouse of the pickle nation, Tang Zhen finished moving the rest of the ogre armor. Just as he was about to move away the food that he had accumulated over the past two days, he suddenly noticed five assault helicopters flying towards the warehouse.

At the same time, countless armed American soldiers suddenly appeared in the nearby buildings and pounced on the warehouse.

When Tang Zhen saw this scene, he knew that the location of the warehouse had been exposed. This group of people was imitating the ice Bear Alliance's tactics and had come to wait for him!

He quickly activated the [ quantum invisibility light screen ] and rushed out of the warehouse like lightning. He pounced toward the place where the encirclement was the weakest.

This location had already been exposed, so it definitely couldn't be used as a teleportation point. Otherwise, he would really be controlled by others.

Tang Zhen ran a few steps out of the warehouse and came face to face with a group of American soldiers.

Tang Zhen didn't put the American soldiers in his eyes because he had activated the quantum invisibility screen. However, when he noticed that the soldiers' eyes were moving in the direction he was moving, he immediately realized something was wrong.

Sure enough, just as this thought appeared, Tang Zhen saw the American soldiers open fire at the same time. Their target was where he was.

damn it, these guys actually have an instrument that can see through the [ quantum stealth light screen ]!

Tang Zhen glanced at the special glasses that these soldiers were wearing and knew where the problem was.

Countless bullets flew over, completely sealing off Tang Zhen's escape route. Fortunately, the black cloak under the trench coat easily blocked these bullets. However, the trench coat was riddled with holes!

Tang Zhen's gaze swept over the bullets on the ground. He let out a soft "huh" and randomly picked up a bullet in his hand.

This was a bullet that was suppressed with a special material. After hitting the body, it actually turned into powder. The [ all-rounded digital combat interface ] was activated, and he immediately analyzed that this was a special anesthetic bullet.

Now, even the air was filled with a faint sweetness. It was the smell of the powder-like anesthetic powder!

Tang Zhen hurriedly covered his nose and mouth to prevent himself from inhaling the anesthetic powder.

Another wave of bullets rained down. Tang Zhen used the Holy master skill that he had just exchanged for. A protective barrier appeared around Tang Zhen, blocking all the bullets.

Just like countless raindrops smashing into a Lake, the bullets continuously created waves on the protective shield. Under the impact of the rapid bullets, the protective shield was on the verge of breaking at any time.

This kind of Holy master skill looked very scary, but to Tang Zhen, who was used to using mobile applications, this kind of weakened version of the skill was extremely unpleasant to use!

In the military helicopter in the sky, a white-haired old man immediately picked up his communication device excitedly after seeing the protective shield used by Tang Zhen, "Did you guys see that? haha, did you see that? it's an energy shield, an energy shield!

We have to catch him at all costs, because he's too important to our research!"

As the old man's roar was transmitted to the roof not far away, a Secret Service agent in black immediately shouted into his headset, "listen to my command. Execute plan B immediately!

Following the black-shirted agent's order, nearly twenty tall American soldiers stepped out of the crowd. They held specially made long weapons and aimed them at Zhen Tang.

Streams of electric current shot out from these weapons. They drew crooked curves in the air and wrapped around Tang Zhen's protective shield.

"Pa!"

Tang Zhen seemed to have heard a soft sound. Soon after, the protective barrier suddenly shattered. At the same time, those twisting electric snakes also bound his body. A numb and dizzy feeling assaulted his mind.

What a powerful thing, I almost fell for it!

Tang Zhen's heart skipped a beat when he felt the strange feeling in his body. He endured the discomfort and took out two rifles. He then began to fire at the strange-looking American soldiers.

Intense gunshots rang out and the soldiers surrounding Tang Zhen immediately fell. Most of them looked for cover nearby and threw strange grenades that were emitting electric light in all directions.

This strange electric current made Tang Zhen feel uneasy. He didn't dare to continue fighting and immediately activated the [ map teleportation plug-in ].

It had exceeded Tang Zhen's expectations. His teleportation this time around did not succeed!

At the same time, the words appeared in front of Tang Zhen's eyes. [ there is a special energy interference in the surroundings, causing the application to be unable to be activated normally. Cracking is in progress. Please wait! ]

f \* ck, these American guys are really powerful. They actually found a way to interfere with my teleportation!

After figuring out the reason for the failed teleportation, Tang Zhen was no longer anxious. Since this group of people wanted to catch him, he would play with them for a while and let them understand the situation. It was not that easy to take advantage of him!

Tang Zhen scanned through his application list and immediately activated the [ ice edge battle armor ]. A completely sealed dark blue armor appeared on the surface of Tang Zhen's body.

"Oh my God!" The American soldiers cried. "I'm seeing things!" "Cool!" , He rushed forward with large strides.

"Bang!"

Tang Zhen's legs exerted strength and his entire body immediately rose into the air, directly landing on the top of the warehouse that was nearly seven meters high!

With a shake of his arms, two crystal-clear ice sabers appeared on his forearms. Under the sunlight, they looked delicate and strange.

An Assault Helicopter was very close to the warehouse. Tang Zhen turned his head and glanced at it. He immediately flew up on the roof. He was like a blue lightning bolt, passing through the dense rain of bullets and flying towards the assault Helicopter!

The pilot of the assault Helicopter turned pale with fright when he saw Tang Zhen pouncing toward the plane. He immediately pulled the control stick and pulled it up with all his might in an attempt to avoid Tang Zhen's attack. However, how could his speed be compared to Tang Zhen who was a rank five cultivator?

The dark blue ice blade directly cut into the back of the assault Helicopter. The two shocking blade marks looked extremely ferocious, smoke and electric sparks kept flashing.

The assault Helicopter was like a wild goose that had been shot by an arrow. It began to shake in the air before falling towards the ground.

"Bang!"

Tang Zhen's feet landed on the ground and the cement ground under his feet had a spider web of cracks. It was enough to show that the impact of his fall was extremely great!

After seeing Tang Zhen destroy an armed helicopter in the blink of an eye, the soldiers who were participating in the battle felt their legs tremble. The scene in front of them was like a scene from a sci-fi blockbuster. It had completely impacted their world view!

quick, shoot! We must catch him!

One of the officers in the lead shouted as he kept pulling the trigger. However, when his bullets landed on the blue ice Armor, they only hit a large piece of ice and instantly recovered!

Tang Zhen, who was wearing the ice front battle armor, was a real nightmare in the eyes of these soldiers!

Chapter 198: Crazy transportation \_1

After a few charges and jumps, Tang Zhen had already completely broken out of the encirclement and left those soldiers far behind. Currently, his biggest threat was the four assault helicopters circling above his head.

After he rushed out of the area, a menu appeared in front of him, indicating that he could use the [ map teleportation plug-in ] as usual.

After sending a few soldiers who were attacking him with taser guns flying with a punch, Tang Zhen continued to run forward. He was very angry today and had to do something to return the favor to these guys.

He might need to use the map teleportation plug-in later, so Tang Zhen didn't immediately teleport.

The [ ice edge battle armor ] 's usage time had just ended and the shining armor immediately turned into white mist and dissipated, revealing Tang Zhen who was originally hidden under the ice Armor.

After seeing Tang Zhen's Ice Armor disappear, the soldiers in charge of surrounding him immediately opened fire. However, this time they used military steel core bullets and locked on to the position below Tang Zhen's buttocks.

After discovering that the anesthetic bullets and taser guns couldn't subdue Tang Zhen, they decided to use real bullets!

As long as they could injure Tang Zhen, they would be able to successfully subdue him and control him.

After Tang Zhen dodged a wave of live ammunition, he sneered and jumped into a courtyard by the side of the road. He activated the teleportation function.

As soon as he appeared in the sacred Dragon Valley, Tang Zhen immediately opened the application store and selected an application to download and install.

[ electromagnetic pulse bomb, destruction radius of one kilometer. Download cost: 10000 gold coins. ]

After opening the application, Tang Zhen immediately returned to his original world. The entire process took less than half a minute.

As soon as he appeared in the original world, Tang Zhen saw the attack helicopters hovering above him and the American soldiers surrounding him. They would surround him again in less than a minute.

With a chuckle, Tang Zhen stared at the armed helicopter in the sky without blinking and activated the electromagnetic pulse bomb!

“Pa pa pa!”

As the application was activated, a devil that specialized in devouring Industrial Technology was released. In a short moment, a huge electromagnetic field burst out, and all electronic equipment within a radius of one kilometer was scrapped. Exclamations sounded from different places at the same time.

The power was cut off, communication was cut off, phones were burnt, the special glasses worn by the American soldiers were all burned, the cars on the ground were out, and the helicopters in the sky were on the verge of collapse. The whole world seemed to have quieted down.

In the fallen military helicopter, the white-haired old man saw Tang Zhen activate the [ quantum invisibility light screen ] and disappear without a trace again. He couldn't help but angrily roar, “Dammit! Damn it! So close, so close ... Who can tell me why he has a high-frequency microwave bomb, and why it's so powerful?”

No one could understand the white-haired old man's anger, but the American soldiers could!

All electronic devices within a kilometer radius were disabled. Countless people rushed out of their houses and ran to the streets. While they searched for the cause of the accident, they also found the depressed American soldiers with loaded guns.

Nearly a thousand people were dispatched at once, all equipped with the latest special glasses, special anesthetic bullets, and special interference devices and special firearms!

Such a scale and investment could be considered luxurious. However, as long as they captured that mysterious Asian Alliance kid, they would be able to receive excessive returns!

This guy had too many secrets. So far, they had discovered many obvious and magical abilities such as teleportation, energy shield, invisibility, and super powers. It could be said that this guy was a human-shaped treasure.

If they could capture him and study him, even if they could only figure out one magical ability in the end, it would still be a very profitable thing!

It was a pity that man's plans did not go as well as God's plans. This guy had actually escaped unscathed under the siege of so many soldiers!

At the same time, he disabled all the electronic equipment in the vicinity, causing the few assault helicopters in the sky to fall to the ground.

All the soldiers who participated in the siege had the image of the dark blue armor in their minds at the same time. They sighed and shook their heads, losing confidence in whether they could defeat such a magical figure.

Tang Zhen unhurriedly walked along the road. His destination was extremely clear. It was the military base that he had visited the last time.

This time, they had made him embarrassed, so he had to get back at them no matter what.

There was no need to do things like causing destruction. There was not much meaning in doing so. It was far more practical to move some things to calm down. It was both satisfying and beneficial!

As he had visited this place not long ago, Tang Zhen was familiar with the terrain of the entire base. Not long after, he found a warehouse. He did not care what was stored inside as he buried his head and started moving it.

After moving this warehouse, Tang Zhen continued to move to the next warehouse and continued to move!

The Holy Dragon city's residents saw the city Lord's gloomy face, appearing in the square every once in a while, releasing a pile of things and then quickly disappearing, and they all started whispering to each other.

hehe! resident a covered his mouth and laughed slyly. did you see that? another blind guy has offended the city Lord!

how did you know? " resident B asked curiously.

"Hehe, how would I know?" resident a said with disdain. From your words, I can tell that you've just joined Holy Dragon City. Am I right?"

Resident B nodded. that's right. I've just joined loucheng. Can you please enlighten me, brother? "

Resident a nodded in satisfaction and said, " this is an old habit of the city Lord. As long as someone provokes him, he will empty the unlucky person's house, leaving not a single grain of rice behind.

After saying that, resident a craned his neck and looked around. After making sure that no one was paying attention to him, he said carefully, " "He didn't even leave you a pair of underpants. Last time, I don't know which city was blind and offended the city Lord, so the city Lord directly emptied that city!

The most important thing is that the city Lord brought back a room full of underwear. I guess he brought back the underwear of all the men, women, old and young in the city!"

After saying that, this guy even pulled open his pants and said, " look, this is the underwear that the city Lord brought back last time. I also sent a message. You should understand this time, right? "

Resident B nodded his head after looking at it. At the same time, he subconsciously tightened his belt. He was not used to the city Lord's habit of stealing other people's underwear!

The distance between the two was quite far, and Tang Zhen was busy moving things, so he didn't hear the conversation between the two. Otherwise, Tang Zhen would have stuffed these two guys into the ogre's cage!

It was said that rumors stopped at the wise, but the Holy Dragon City was a bunch of uncouth guys who loved to spread rumors, and the more mysterious, the better. Many legends that had no traces were blindly created by this group of guys.

I'm afraid that after today, all the residents of the Holy Dragon City will know about the city Lord's hobby. That is, if you offend him, he will steal all your family's underpants!

The truth was that the last time Tang Zhen moved the containers from the dock, there was a box full of undergarments. After Murong Zi Yan checked and put it into the warehouse, it was given out as welfare.

Even Qian Long and Murong Zi Yan didn't know about Tang Zhen's origins, so how would the ordinary citizens know about his secret? that was why they had the guess that Tang Zhen had emptied out the other people's buildings. At the same time, they also treated those underwear as the spoils of war that Tang Zhen had plundered!

The pitiful Tang Zhen still did not know that he had inexplicably gained such an "elegant good"!

Chapter 199: full harvest, Birdman scheme

Tang Zhen's operation this time around was to tell those fellows who had surrounded him that his father was right here. If they had the guts, come and catch him!

Tang Zhen did not have a clear goal during the moving process. He basically moved everything he saw. Therefore, in less than half an hour, he was discovered by the soldiers in charge of patrolling!

In an instant, the alarm rang out, and countless soldiers ran out of their rooms, looking around with blank faces, trying to figure out why the alarm had sounded.

A middle-aged officer walked to an empty space with a face full of anger. He pointed at the empty ground and shouted, "are you guys blind? can't you see that the Super light howitzer that was placed here has disappeared?"

The soldiers turned around and gasped when they saw that the howitzer had disappeared!

Oh my God, did these howitzers get the Allspark and fly away?"

One of the soldiers muttered to himself, his eyes filled with disbelief.

The other soldiers were also quite puzzled. Since the Super light howitzer had been temporarily placed here, no one had touched it. It had been quietly placed there, so how could it have disappeared now?

The officer looked at the soldiers' dumbfounded expressions. Although he was angry, he could do nothing about it.

No one would have thought that someone would be able to steal a few howitzer that weighed at least a few tons in such a heavily guarded military base. This was simply a fantasy.

But at this moment, this joke actually came true!

'Damn it, this is a provocation! A provocation without any scruples!

He had to catch this audacious fellow and lock him up in a dark dungeon, never to be released for the rest of his life!

The officer swore in his heart. At the same time, he gave the order to immediately seal off the surrounding area of the base. At the same time, he would conduct a thorough investigation of the entire base. He must not let these damned bandits off!

what troubled times. The Armory was just stolen not long ago, and now the Super light howitzer has been destroyed. Could it be that this was all done by the same group?"

The officer's heart tightened for no reason as he thought of this. He immediately shouted to the soldiers beside him, "Quickly go and see if there are any other losses!"

In less than five minutes, a soldier came to report the losses. Looking at the long list of lost items, the middle-aged officer felt his vision go black and he fell to the ground.

Damn it, are all the soldiers in the base sleepwalking? This bunch of stupid pigs, someone took away so many things in broad daylight and they actually knew nothing about it?

"This must be a dream, that's right, a dream!"

The middle-aged officer muttered to himself, but his expression became more and more depressed.

Due to certain reasons, this military officer didn't know of Tang Zhen's existence. He also didn't know that he had suffered such a huge loss this time because he had been completely tricked by his own teammates.

His teammates tried their best to catch Tang Zhen. In the end, they didn't catch him, but Tang Zhen instead moved his belongings to demonstrate his power. For the middle-aged officer, this was purely an unexpected disaster!

An unlucky person like him was the target of this!

The Holy Dragon city's Square was once again filled with a mess of things, almost occupying the entire square.

&Nbsp; Tai Seng was very experienced as he led his soldiers to look after the items. The soldiers formed a circle and pointed at some of the items curiously.

The tycoon Captain was sitting in a military jeep with an automatic rifle on his back. He kept touching it with a face full of joy. In the end, he couldn't suppress the love in his heart and smiled at Tyson, "boss, look at this car, it's so suitable for me to drive. Can you let me drive it? don't worry, I'll definitely maintain it carefully and clean it at least twice a day!"

Tai Seng angrily dragged the rich Captain out of the car and sat on it, "you want to drive? save it. I want to drive too. You better go back and be your machine gunner. Why are you always thinking about it? do you think a big-headed soldier like you can drive this kind of car?"

The rich Captain was unconvinced and shouted, "leader, that's not right. Didn't you say that a soldier who doesn't want to be a soldier is not a good soldier? I want to be a soldier, so I can drive this car!"

Tai Seng laughed out of anger and jumped out of the car, kicking the rich captain's butt, "what this and that, you should figure out what that is first, then come over and talk nonsense with me!"

While Tai Seng and the rich Captain were chatting, the soldiers were surrounding a tank and sizing it up. They were all wondering if this thing was hollow or not and what the big metal pipe in front was for.

I'm guessing that this is used to attack the city. The metal pipe at the front is used to hit the gate. When the time comes, we just have to push this metal thing down the city and it will definitely knock a hole in the gate.

The bone Cat rubbed its chin and said with certainty.

Su laojiu, who was standing at the side, laughed and said, "Don't talk nonsense here. This thing doesn't have wheels. How can you move such a heavy iron lump? I think it's like a cannon. We'll place it on the wall, then stuff the shell into the metal pipe like the mortars we use, and then fire it with a bang!"

Hearing this, the soldier beside him said that it made sense. Su laojiu was quite proud of himself, but at the same time, he didn't forget to look down on the bone Cat.

While everyone was talking and laughing, Tang Zhen once again appeared in the Holy Dragon city's Square. After releasing a pile of things, he didn't leave. Instead, he walked forward with a smile and carefully examined the harvest this time!

The more he looked, the more proud Tang Zhen became. In the end, he could not help but burst out laughing.

"Haha, Yingluo actually got so many good things, won't her heart ache to death for those guys? You deserve it for scheming against me. If there's a next time, I'll move to another place and see who's the better one!"

After Tang Zhen stopped laughing, he began to count his gains one by one.

these cannons are called super light howitzers, and they can fire for dozens of kilometers. When I go back and check the distance between the undead's buildings, I'll use them as targets for practice!

this thing is called a tank, not a mortar. Old ninth, if you dare to stuff the grenade inside, I'll immediately hang you on the barrel. I haven't told you about the last time you stuffed two grenades into the barrel. Are you itching for a beating?"

"Don't even think about getting this Jeep. After I'm done with my fun, you can do whatever you want with it!"

The moon's curved moon illuminated the nine provinces, where some were happy and some were sad!

In the sacred Dragon Valley, Tang Zhen led a group of subordinates and was happily holding a meeting to split the spoils. In the American base, the highest-ranking commander was in a rage. His face was as black as the bottom of a pot, and his subordinates kept quiet out of fear.

A hundred miles away, in Blackfeather tower, a group of black-feathered Birdmen were gathered together, studying a plan to take revenge on Holy Dragon City.

The last time Tang Zhen had come, not only had he caused countless deaths and injuries in Blackfeather city, he had also emptied out all of Blackfeather city's assets, causing the Lord of Blackfeather city to feel so much heartache that he could not sleep at night.

If they didn't take revenge, the dark wing tribe would never be able to raise their heads in front of the other non-human races!

But the problem was that the Holy Dragon city's assault helicopters were too powerful. More than half of the Blackwing Birdmen's Warriors had died at the hands of these things. When they thought of the terrifying power of the assault helicopters, these Blackwing Birdmen still had a lingering fear.

After researching for a long time, they still could not come up with a satisfactory revenge plan. The Holy Dragon city's powerful strength left the higher-ups of the black-feathered Birdmen at a loss.

After a long silence, an old Birdman suggested, " "Why don't we kill him with a borrowed knife?"

Chapter 200: The Birdman design, the Wyvern attack

The governor of Blackfeather city immediately asked, " "Killing with a borrowed knife? what does this mean?"

The governor of Blackfeather city had always valued the old Birdman who spoke.

It was said that when this old man was young, he had been to a place thousands of miles away and had seen countless strange things. If one were to say who had the most knowledge in the entire black feather tower, if the old bird claimed to be second, then no bird would dare to claim to be first!

If not for the fact that his father was the previous governor of Blackfeather city, the current governor would most likely be this old bird.

Seeing that all the black-feathered Birdmen were looking at him, the old Birdman coughed smugly and drank a cup of morning dew water before he said slowly, " "The so-called" killing with a borrowed knife "means that we don't need to show our face, but use other people's means to achieve our goal!"

Seeing the confused expressions on the Birdmen's faces, the old Birdman continued, " this is a saying from a human city thousands of miles away. It's very wise. In addition, they have many other wise words. They are incisive and wise, which makes people admire them!

The master of Blackfeather city suppressed the urgency in his heart and said to the old bird, " "Mr. Yaoyu, please don't talk about irrelevant topics. Please tell me your plan!"

The other black-feathered Birdmen nodded at the same time. They couldn't stand this old man's tantalizing look the most, and they wanted to beat his beak off!

The old Birdman, Yao Yu, chuckled when he heard this. He then retracted his smile and looked at the master of Blackfeather city with a serious expression. "City Lord, are you sure you want to take revenge on Holy Dragon City? I have to remind you that the Holy Dragon City is not to be trifled with. If you are not careful, the foundation of Blackfeather city that has been built for hundreds of years will be in danger!"

alright, I know what you're saying. I'm just asking you what your plan is!

The master of Blackfeather city waved his hand impatiently. There was a hint of anger in his voice. It was clear that he had been blinded by hatred.

The residents were killed, their brains were stolen, and the buildings were blown up!

Everything that had happened made the Lord of Blackfeather city's face burn. It also made him feel that he had failed as the Lord of the city. Recently, it seemed that every resident had been looking at him with a strange look. This had never happened before!

However, the Lord of Blackfeather city had never thought about how proud he had been in the past, and had never paid attention to the eyes of the residents when they looked at him.

The suspicious master of Blackfeather city felt that his dignity had been damaged. These few days, he had lost his temper from time to time, and his bad temper had been revealed.

However, the more this was the case, the more the residents of Blackfeather Tower City feared the Lord of Blackfeather city. They were afraid of provoking him and suffering an undeserved disaster!

This was a vicious cycle. The atmosphere of the entire Blackfeather Tower City became more and more tense. Every resident was trembling with fear.

In the Lord of Blackfeather city's heart, although he admitted that the Holy Dragon City was very strong, they did not have the power to destroy Blackfeather tower. What they were relying on was nothing more than that flying metal lump!

As long as that metal lump was delayed or destroyed, Holy Dragon City would still be a lowly human that the dark wing tribe could slaughter!

The old Birdman sighed in his heart and took a deep breath. "We can't make an appearance on this matter. Otherwise, if we fail, the Holy Dragon City will inevitably come knocking on our door again, so we have to kill with a borrowed knife!

In other words, we have to find a way to get a group of powerful guys to attack Holy Dragon City. This way, whether we succeed or fail, it has nothing to do with Blackfeather tower!"

The governor of Blackfeather city's eyes lit up when he heard that. He nodded in satisfaction and said, "Haha, good idea! Good idea! No wonder you are the most knowledgeable dark wing tribe in the city!"

After a few loud laughs, the governor of Blackfeather city asked, "Since you've come up with this idea, I'm afraid you've also thought of who to use as a blade to attack Holy Dragon City, right?"

The old Birdman nodded and said softly, "Naturally!"

"Then tell me, who are we using?"

After the old Birdman pointed in a certain direction, he looked around and saw that all the Birdmen had blank expressions. He chuckled and said, "Four-legged Dragon of the Jifeng Valley!"

The master of Blackfeather city frowned, but after a moment, he suddenly realized what was going on. He could not help but laugh out loud. Everyone could feel the joy and comfort in his laughter!

.....

Jifeng Valley, also known as white bone cliff, was filled with strange rocks, lofty peaks, and white bones everywhere!

In this dangerous area, there lived a group of ferocious carnivorous monsters called the four-legged flying dragon.

They had a huge body, a ferocious appearance, two wings, four legs, and could fly above the ground. It was said that they were the descendants of some Super Monster!

Although they were called monsters, these four-legged Wyverns were very different from ordinary monsters. They were a strange creature that was in between alien races and monsters.

Every four-legged Wyvern was at least Level 3. Most of them were Level 4, and there were very few Level 5 Wyverns. As for Lord-tier Wyverns, no one had seen them yet!

These four-legged flying dragons were extremely territorial. Once they discovered any foreign creatures entering their territory, they would immediately attack in a group, tearing them apart and devouring them!

After a long time, the ground of Jifeng Valley was covered with white bones and brains, as well as the remains and relics of various races. It could be said to be a true treasure vault!

In the past, there were often Wanderers and foreign races who would take risks and sneak in, trying to collect the brains and relics on the ground in search of an opportunity to get rich overnight. But most of the time, these adventurers never returned!

Without realizing it, the gale Valley had become a forbidden area, and Wanderers and foreign races who passed by would try their best to avoid this place.

However, today, Jifeng Valley was in chaos. A female dragon that had just returned to her nest had just discovered that she had lost four of her precious dragon eggs!

The Furious female dragon immediately roared and flew into the sky. She kept roaring along the path of Gale Valley, as if she was summoning a lost precious dragon egg!

As the female dragon roared, more four-legged Wyverns quickly flew into the sky and joined the search. These four-legged flying dragons hovered in the sky above Jifeng Valley, covering the sky and casting a large shadow on the ground.

The female dragon circled around for a while. Suddenly, as if it had sensed something, it flew in a certain direction as if it had gone mad.

When the other four-legged flying dragons saw this, they immediately chased after the female four-legged flying dragon!

These four-legged flying dragons flew across the sky in groups, causing the low-level monsters on the ground to shiver in fear. They all lay on the ground, looking like they were waiting to be slaughtered.

In a certain Valley, a Cyclops that was more than ten meters tall was holding a huge leg bone in his hand. He roared at the four-legged Wyvern that was flying in the sky and even threw a huge rock into the sky.

The four-legged Wyverns seemed to know that the huge level-five monster was not to be trifled with, so they carefully avoided the flying boulders and left the territory of the Cyclops as soon as possible.

After flying for a while, the female dragon at the very front seemed to have discovered something. It let out an angry roar and pounced towards a building in front of it with all its might.

The four-legged Wyverns that were following closely behind also roared in unison. Their vertical pupils suddenly contracted, and they suddenly increased the frequency of their wings flapping, quickly chasing after him.

In the Holy Dragon City, Tang Zhen sized up the big Bird egg that the residents were holding in their hands and asked again, you're saying that you found these eggs in the back Valley, and when you found them, two of them had already been smashed by rocks?"

The resident in front of him nodded respectfully and replied, "Yes, city Lord!"

Tang Zhen nodded when he heard this and indicated for the residents to leave.

He walked to the table, touched the big egg with his hand, and then looked at the two strange birds in the broken eggshell. He said to himself, "this is strange. There shouldn't be any big birds of this size near Holy Dragon City. But where did these four eggs come from?"

Tang Zhen, who was filled with doubt, turned to the map to see if there were any large birds around. At this moment, he suddenly saw a group of Wyverns pouncing towards the Holy Dragon City. At the same time, at the edge of the map, two sneaky black-feathered Birdmen were quickly flying away.

Tang Zhen immediately understood the cause and effect after seeing this scene. He coldly snorted and a killing intent suddenly appeared on his face.

Birdmen of Blackfeather city, you're courting death!
