

## **Alternate 2111**

Chapter 2111 wish my dear readers to get rich in the new year

Just like Tang Zhen's earlier speculation, there were indeed many believers who chose to leave the 153rd defense area in the past few years.

It was not easy to leave such a high-risk defense area, and few people succeeded.

They either had great strength and could change the defense area after accumulating enough battle merits, or they had special skills that could earn battle merits with their skills.

In the area where the Grand temple was located, there were many similar believers, and it was because of their existence that they supported the consumption of materials in all the defense areas.

Most of the items exchanged by the believers came from them, and after the temple purchased them, they were then traded to the believers who needed them.

!!

In this process, the temple's role was to be the merchant in charge of buying and selling.

Although the Grand temple only earned a small difference in price, over time, they could still gain a considerable profit.

Of course, to spiriters, these battle achievements were of no use, but it was beneficial to the temple to be able to appropriately consume the battle achievements in the hands of the believers.

However, when it came to purchasing a large number of supplies, the believers were still willing to come to the central safe zone where the Grand temple was located in person. This way, they could save a lot of military credits.

It was not easy to obtain battle merits, so when the believers spent, they naturally had to be careful.

Among the surviving believers that Tang Zhen was looking for, there were some who lived near the Grand temple and were engaged in armor making work.

Although this job didn't require him to fight sea monsters, it wasn't easy to get a stable and high income.

When the temple purchased materials, they needed to review and accept the materials. If they did not meet the standards, then the believers' previous efforts would be in vain.

Be it the consumption of materials or the time wasted, the believers had to bear it themselves.

That was why the believers were very serious when they worked. They would never be perfunctory, as that would only harm themselves.

But even so, there were differences in the level of the believers, and the prices of the armors they made were also different.

Due to the difference in battle achievements and income, the living conditions of the believers were different, which was no different from the outside world.

Believers with excellent skills had better living conditions, more battle achievements could be exchanged for better materials, and the recycling price of the items they made was higher.

Ordinary believers could only use ordinary materials to make some low-level equipment. Fortunately, the temple recycled them, so there was no need to worry about not being able to sell them.

For example, the basic equipment that the believers were assigned when they first entered the God's kingdom was from the hands of ordinary craftsmen. Even if the Grand temple kept purchasing them, they still could not save enough inventory.

It was a free gift, and the points spent would be borne by the Grand temple.

The believer that Tang Zhen was looking for was an ordinary craftsman.

After he exchanged for the memory, he was lucky enough to recover the armor-making skill that he had originally mastered. He earned enough battle credits with it and was transferred out of the 153rd defense area.

However, after leaving the defense area, he did not develop much. He was still a low-level craftsman, only able to make ordinary armor.

Compared to the luxurious buildings nearby, this residential area was a little shabby. However, because of the scenery everywhere in the divine Kingdom, it was still pleasing to the eye.

After walking along the wide street for a distance, Tang Zhen stopped in front of a house with a single door and courtyard. He gently pulled the door.

Soon after, the sound of footsteps was transmitted from the courtyard. Soon after, the door was pushed open, and a man with a sallow face appeared in front of Tang Zhen.

He seemed to be in a bad mental state. His skin was dry and his eyes were sunken. There was a trace of fatigue in his slightly squinted eyes.

He sized up Tang Zhen and frowned slightly. He seemed to be unable to figure out Tang Zhen's intention for coming.

"Your Excellency, may I know what business you have here?"

Although Tang Zhen was wearing a mask, the armor on his body was extraordinary. This believer was also a person with good eyesight. He immediately confirmed that Tang Zhen's identity was not simple.

"I'm looking for you. Why don't we go in and talk?"

Tang Zhen used an indifferent tone to speak. At the same time, he swept his gaze to the courtyard behind the other party and discovered that it was filled with all sorts of materials and tools. There was even a trace of a strange smell drifting in the air.

This was the smell produced when processing the skin of sea beasts. Tang Zhen only sniffed it once and knew that he was processing the most ordinary sea monster skin. The materials used were also very cheap.

Looking at his clothes and mental state, it was obvious that he had a hard time.

After hearing Tang Zhen's words, the believer hesitated for a moment. However, he still moved aside in the end and invited Tang Zhen into the courtyard.

"I don't have any place to entertain you. If you have anything to say, you can just say it."

The believer did not waste any time and directly asked Tang Zhen about his intention.

He was usually focused on making equipment and had little contact with other believers, so there were basically no visitors.

It was especially so for an expert with Tang Zhen's status. It was even more impossible for him to easily step into the humble house. Therefore, he judged that Tang Zhen must have something to ask him.

However, what he did not understand was that for a low-level craftsman like him, there was nothing worth paying attention to whether it was his strength or skills. Why did Tang Zhen look for him?

Since the other party had asked him about his intention, Tang Zhen went straight to the point.

"I'd like to make a deal with you. I want to know all the information about the plane you were in before you entered the divine Kingdom. At the same time, you'll provide me with a portion of your blood essence.

I can pay you a certain amount of war glory in exchange, or give you the manufacturing process of a set of high quality armor. If you want anything else, I can also satisfy you."

After hearing Tang Zhen's request, the believer frowned and looked at Tang Zhen with a vigilant gaze.

Tang Zhen's request had somewhat exceeded his expectations. He could not understand why Tang Zhen wanted to know the information of the plane that it was originally in. Could it be that Tang Zhen was plotting something?

Handing over his blood essence caused him to have no choice but to raise his guard in order to avoid being used by Tang Zhen to deal with him.

However, he was unable to reject the conditions that Tang Zhen had proposed. Once he missed such a good opportunity, it would be too late for him to regret it.

Tang Zhen laughed softly when he saw the hesitant expression of this believer. After which, he passed an item to the other party.

The believer took it and looked at it. Then, he was stunned on the spot, his eyes full of surprise.

"This is the crafting process of a set of high-grade armor. To put it bluntly, even ten of your lives wouldn't be able to exchange for this item.

I can hand him over to you now. If you're worried that I'm cheating, we can make a contract to guarantee that we'll have no more contact after the deal is over."

Upon hearing Tang Zhen's words, the believer muttered to himself for a moment before nodding his head.

He didn't know why Tang Zhen wanted to know about his hometown. He didn't care if it was a good or bad thing. This had nothing to do with him.

Ever since he understood the conditions of leaving the God's kingdom, the believer knew that he would never be able to return to his hometown.

Moreover, compared to his hometown, he preferred the environment of the God's kingdom, so he would not leave easily.

Under such circumstances, it was a great deal to exchange information about his hometown for a piece of high-level equipment smithing technique that he had been dreaming of.

Chapter 2112 Prepared\_ This transaction was completed very quickly, and Tang Zhen got what he wanted.

"Remember to keep it a secret. Otherwise, it will be a disaster and not a blessing for you."

Tang Zhen used an indifferent tone to speak before he left. It clearly contained a trace of warning.

"Don't worry, I know what to do."

The believer answered quickly, his attitude clearly more respectful, but the excitement in his eyes could not be suppressed.

!!

Tang Zhen nodded. He did not continue with the nonsense and directly left.

After sending Tang Zhen off with his eyes, the believer was so excited that his entire body trembled. He closed the door and directly entered the house.

Looking at the blueprint that he had just obtained, the believer's eyes flickered. He believed that he could definitely change his fate with this item.

As long as he could produce quality advanced armor, he would be able to obtain more battle credits to increase his strength.

The most important thing in a God's kingdom was battle achievements. After all, it was closely related to the improvement of strength, and it was not easy to obtain.

As long as one could steadily obtain military achievements, even a monkey could become a powerful figure in the divine Kingdom.

If one day he could leave his God Kingdom and no longer be suppressed by the world's laws, he would definitely have the power to destroy the world.

It was for this reason that the believers were so obsessed with battle achievements. As long as they encountered an opportunity to obtain it, they would not let it go easily.

Even if they had to pay a huge price for it, they would not hesitate.

This believer was like this. As for what Tang Zhen wanted to do, he was simply too lazy to care.

How could the secretly delighted believer know that if he had not tactfully cooperated, perhaps his memories would have been forcibly searched at this moment, and then he would have disappeared from the divine Kingdom forever.

In order to complete his plan, casually killing an unknown believer was simply too easy for Tang Zhen.

After all the matters were settled, Tang Zhen no longer wasted time and returned to the war zone on the six-winged bird.

After arriving at defense area 153, Tang Zhen first confirmed the warship order. There were more than fifty warships in total.

The commanders of the various defense areas ordered more than 30 ships, all paid in full, and no credit was allowed.

The price of an ordinary warship was two million battle credits, which was a considerable expense for the major defense areas.

However, in order to get the warship as soon as possible, even if the commanders were reluctant, they could only force themselves to pay.

Just this order alone was worth more than sixty million Battle Points, making the commanders of the defense area green with envy.

This business of Tang Zhen's was similar to robbing money. Moreover, as the other defense areas invested and ordered, Tang Zhen would earn even more battle merits.

If this had happened to other believers, it might have attracted disaster, and they might have lost their lives.

However, it was not a problem for Tang Zhen. With the strength that he had displayed, not many people would dare to have any crooked ideas.

If he really did that, it would be no different from courting death.

Apart from the warships ordered by the major defense areas, the rest of the warships were sold in cooperation. The believers applied together, and after verification, they could obtain the right to use the warships.

It was not easy to obtain the qualifications to cooperate. First, they had to meet the basic requirements of the number of people to operate the warship and ensure that they could pilot it directly after obtaining it

Tang Zhen wouldn't allow a warship with insufficient personnel to appear. Not only would it be a waste of resources, but it would also put the warship in danger.

Once the warship sank due to danger, the one who suffered the greatest loss would naturally be Tang Zhen. Therefore, this matter could not be taken lightly.

Even though the rules were quite harsh, in a short time, 20 warships passed the review and were now included in the construction plan.

The first thing Tang Zhen did when he returned to the defense area was to head to the shallow waters to look for huge rocks. After a simple modification, he would bring them back to the defense area.

There were more than fifty warships in total. Tang Zhen spent a lot of time to collect them all.

After completing this work, Tang Zhen rarely took action and left everything to his subordinates to handle.

He entered the mountain alone and began to prepare for the next step of his plan.

Through the information obtained from the believer, it could be confirmed that the plane where the other party was located was only a low-energy world, and the strongest person could only barely fly.

Tang Zhen could annihilate a large number of cultivators at this level with just a finger. Conquering such a low-energy world was not difficult for Tang Zhen at all.

Tang Zhen wasn't interested in conquering this world. At most, he would use it as a transit point to his God nation.

Even if they really wanted to conquer it, it would be done by the cultivators of loucheng city. There was no need for Tang Zhen to act.

He had carefully observed the believer's physical appearance and found that there were many similar races in area 153.

They were all fanatics who had just arrived at area 153 through the temple's teleportation circle.

This situation was enough to prove that the plane was still sending fanatical believers to the divine Kingdom, and there were no major changes.

This was naturally a good thing for Tang Zhen.

As for how to go to the other party's plane, Tang Zhen decided to take advantage of the instant the transmission channel opened to activate the reverse transmission function and use violent means to send himself out of the divine Kingdom.

Under normal circumstances, the divine Kingdom was a place where one could only enter but not leave. If one wanted to leave, they would have to pay enough battle merits.

If it was just battle merits, it wouldn't be a problem for Tang Zhen at all. Now that he was rich, he could easily pay for it.

The problem was that Tang Zhen did not belong to that plane. Therefore, even if he paid the corresponding battle merits, he was unable to freely choose his destination.

This was also a way to prevent any unforeseen circumstances. If a powerful foreign cultivator suddenly descended into a low-energy plane to cultivate believers, it would undoubtedly cause a terrible disaster.

If the cultivators of the same race returned, this problem would not occur. Even if the other party ruled the entire world, they would not easily destroy the entire world.

After all, destroying the world was the same as destroying oneself. Only a real lunatic would do that.

The most important point was that when the believers saw the outside world, 99% of them would not return to their homeland.

Compared to the greater world outside, the resources of the low-energy worlds were scarily poor.

Returning to such a world was equivalent to locking oneself in a cage, and it was very likely to completely cut off the path of cultivation.

If there was no need, Tang Zhen would not enter such a world. It would make him feel extremely uncomfortable.

It was as if a ruler of the water had suddenly entered a dry desert. He could not even breathe.

However, in order to complete his plan, Tang Zhen would definitely not give up easily no matter how difficult it was.

#### Chapter 2113 Leaving the God's kingdom (1)

Using reverse teleportation to leave the God's kingdom required a huge amount of energy, and it was not easy to do so.

This was a confrontation with the world rules of the divine Kingdom. The slightest carelessness in the entire process could cause all previous efforts to go to waste.

In the process of teleportation, one would still need to break open the gradually closing spatial passageway. If one did not have enough power, it would be impossible to achieve this.

If Tang Zhen wasn't only a step away from becoming a creator, he wouldn't have dared to try it. Doing so would only put himself in danger.

Tang Zhen was prepared to build a runic magic circle inside the mountain peak. When the transmission array in the temple was activated, he would instantly connect with it and send himself into the transmission channel.

Setting up this kind of special runic magic circle required Tang Zhen to personally take action. There was no room for any mistakes during this period of time.

After instructing that no one was allowed to disturb him, Tang Zhen began to gather the materials and seriously set up the interior of the mountain peak.

Compared to the runic magic circles engraved on warships, such reverse transmission circles were more complicated and required more and more precious materials.

Fortunately, Tang Zhen had the ability to conjure objects. If he were to exchange for it through the temple, the amount of Battle Points he would have to spend would probably be more than ten million.

Tang Zhen didn't feel heartache over the battle Points, but he didn't trust the ability of the Grand temple. If the items exchanged by the Grand temple didn't meet the requirements, all his hard work would be wasted.

Since he was able to do it, Tang Zhen would not ask for help as much as possible.

Time slowly passed, and in the blink of an eye, dozens of days had passed.

Under the constant recruitment of people in area 153, the progress of the warship construction was accelerated again, and it was already in the final stage of the deployment of weapons.

As long as this step was completed, the warship could be put to use and enter the sea to gallop freely.

The believers who were ordering warships stayed in defense area 153 all day long. They watched the warships that were gradually taking shape with anticipation.

Especially at the last step, they were even more eager to participate in the construction work and strive to launch the warship as soon as possible.

Unfortunately, this last process could only be completed by Tang Zhen. Other believers could not replace it at all.

Tang Zhen, who had not appeared for many days, finally appeared in front of everyone. He once again revealed his ability to create things in front of the public.

Seeing the cannons and machine guns appearing on the bare warship, the believers nearby cheered loudly.

There was joy from the completion of the warship, as well as compliments and praise for the experts. Because of Tang Zhen's appearance, they finally had the qualifications to March into the ocean.

While the believers were sighing with emotion, Tang Zhenhu was still fully focused on locking onto the warship and continuously completing the materialization of the weapon.

The materialization of the weapons of more than fifty warships did not waste too much time. To Tang Zhen, it could be completed with a single thought.

After all the work was done, Tang Zhen stood on the mountain peak with his hands behind his back and silently looked at the crowd below.

When the believers saw this, they all bowed regardless of whether Tang Zhen saw it or not.

Regardless of whether Tang Zhen would stay in Scandinavia in the future, he would become a legend and be remembered by countless believers.

From this moment on, the God's kingdom's warship plan had officially begun. It wouldn't take long for the believers to have a steady stream of war achievements.

With the completion of the warship, there would be more believers coming in the following time to drive the warship into the sea.

Although there were flying birds as a means of transportation, it would still take a lot of time for the believers to arrive and operate the 50 warships skillfully.

Fortunately, the warship was mainly driven by runic magic circles, and the operation process was very simple. The believers did not need to go through training at all, and only needed a short time to master it.

The scene of more than fifty warships going out to sea must be spectacular, but Tang Zhen did not have the time to personally preside over it.

The reverse teleportation array had been set up, and he was ready to take action as soon as possible.

Moreover, to Tang Zhen, he was used to seeing tens of millions of cultivators launching an invasion and hundreds of thousands of interstellar battleships sailing in the universe. The battleships going out to sea was just a small scene.

After summoning Sun Jun, the horned helmet and the others, Tang Zhen arranged everything properly and once again entered the mountain peak.

With a thought, the reverse teleportation formation full of Godstones and precious space materials slowly opened. Light flowed in the belly of the mountain, as dazzling as the ocean.

Tang Zhen was in the reverse transmission array, but his spiritual force had already enveloped the divine temple. He was patiently waiting for the moment when the fanatic believer would be transmitted.

The opportunity was fleeting, and there was no room for any mistakes.

While he was waiting, fanatical believers appeared from time to time. Unfortunately, the plane where these believers were located was not the place he wanted to go.

After waiting for a while, the teleportation circle of the temple was activated again, and a fanatic with a blank face slowly appeared.

Tang Zhen was overjoyed the moment the other party appeared. He activated the runic magic circle without the slightest hesitation.

There was a buzzing sound in his ears, and the light was as dazzling as the sun. At the same time, a powerful energy was triggered from the array, instantly connecting to the temple's teleportation array.

The dimensional gateway that had been closed was torn open by this tremendous force. Tang Zhen also entered the dimensional gateway.

An unimaginable pressure pounced on him. The moment Tang Zhen entered the transmission channel, the world's laws immediately reacted and tried to suppress and destroy his actions.

This power was so vast that it could even crush a mountain into dust.

Tang Zhen, who was enduring the attack, clenched his teeth tightly. He continued to maintain his body, which could shatter at any moment, and used his fastest speed to rush through the transmission channel.

The moment he came into contact with the plane barrier, Tang Zhen used all his strength to launch an attack, creating a gap in the plane barrier that had not completely healed.

Before an even more powerful attack could arrive, Tang Zhen's body had already turned into a ray of light and passed through it in an instant.

Thousands of dangers merged into an instant. Fortunately, Tang Zhen was well prepared and was not affected too much.

In the next moment, Tang Zhen appeared on a vast wasteland. Not a single blade of grass could be seen within a thousand miles.

An indescribable feeling of carefreeness assaulted him, causing Tang Zhen to involuntarily let out a long howl. It was as if all the pressure and shackles had disappeared without a trace at this moment.

Without the restrictions of the divine Kingdom's world law, Tang Zhen's strength had already fully recovered. He was still a peerless expert who was only one step away from becoming a creator!

As if it was infected by Tang Zhen's joyous mood, a layer of tender green actually appeared on the barren wasteland beneath his feet.

Then, the wild grass grew wildly and spread into the distance. Countless flowers bloomed.

In the blink of an eye, this wasteland had completely changed its appearance, becoming a rich land with rich water and grass.

Tang Zhen looked at the scene that was happening beside him. He smiled softly and shook his head.

Due to the suppression of the divine Kingdom's laws, he had become a little rusty in his control of his own strength. This had caused the desert to instantly turn into a grassland because of his joy.

Because when he was happy, he released a surging life force that could turn a desert into a fertile field and let the dead trees come back to spring.

This was the power of a creator. His will could affect his surroundings. In a moment of anger, the weather would change, and in a moment of joy, flowers would bloom.

Tang Zhen was not far from becoming a creator.

Chapter 2114 The cultivators of loucheng descend (1)

After the faint joy passed, Tang Zhen felt that something was wrong.

&Nbsp; he suddenly realized that his memories of the divine Kingdom had been extremely clear and had not been erased during his departure.

Tang Zhen still couldn't be sure if it was caused by his special way of leaving or if it was because the exchanged eyeball preserved his memory.

Of course, this wasn't important. It was only because his method was difficult to replicate, and he didn't intend to try again.

The process of being attacked by the laws of the divine Kingdom world had been shocking. Although it had only been a short moment, it had still been extremely dangerous.

Tang Zhen secretly felt that he was lucky. If he had not managed to rush out in a dangerous manner, he might have already turned into dust at this moment.

At the same time, another problem emerged.

&Nbsp; why would such a powerful divine Kingdom have a crack that allowed outsiders to enter without being summoned?

Could it be that the God sleeping under the Grand temple had become so weak that it caused this?

Tang Zhen frowned and thought about it. He felt that this was not impossible. Perhaps the sea monsters that were wreaking havoc were the best proof.

If it wasn't for the unforeseen event, the God wouldn't have allowed the sea monster to act so arrogantly in his divine Kingdom. He could probably kill it with a single thought.

They would also not continuously summon believers to clean up and stop the sea monsters, so as to prevent the God's kingdom from being completely invaded by the sea monsters.

So if he had the chance, he might be able to get to know more about it and see if he could gain more benefits.

Of course, before that, he had to first obtain ten billion battle credits and become a creator.

After sizing up his surroundings, Tang Zhen directly chose the location he appeared at and once again displayed the method of moving mountains and filling the sea.

The ground was flattened in an instant, followed by stone pillars that were several feet thick rising from the ground, as if a building had emerged from the ground.

These stone pillars were not scattered and disorderly, but were arranged according to a certain pattern, especially the two stone pillars in the middle, which looked more like huge doorposts.

When the stone pillar was completed, the ground began to show knife-like marks. At the same time, melted metal liquid was poured into it.

Under the sunlight, these lines glowed with a silver light, as if the earth itself was shining.

Stone chips kept falling off from the giant stone pillars, and then mysterious ancient runes appeared one after another.

Just like the complicated lines on the ground, the runes on the stone pillars had also been poured with a metallic liquid, and they were connected by hidden lines.

At each node, gemstones condensed from energy kept appearing. Any random gemstone was enough to make low-level cultivators fight for it.

Unknowingly, the sky had turned dark, and the area above the stone pillar was pitch black, as if night had fallen early.

Tang Zhen wasn't surprised by the changes in the sky.

The items he used were all precious treasures. The energy value contained in them far exceeded the limit of this low-energy world, which was why there was such a strange rejection phenomenon.

The world's will had long discovered the abnormality. It instinctively wanted to get rid of the destruction runic magic circle, but it was afraid of Tang Zhen's strength and did not dare to act rashly.

It was only a basic will, and could not be compared with the world will of the high-energy plane. Its thinking was also like a child's.

The world's will could sense the power of fear from Tang Zhen's body and knew that if it rashly attacked, the consequences would be unimaginable.

Therefore, it continued to circle around, wanting to see what Tang Zhen wanted to do and prevent Tang Zhen from doing something intolerable.

Tang Zhen had long discovered the world's will that was floating in the void. However, he was too lazy to care about it. It was as if the world's will did not exist.

With his current strength, the primary will of a low-energy world would not be able to affect him.

If the other party dared to provoke him recklessly, he could find the origin of the world in a very short time and completely wipe out the ignorant will of the world.

If it was the will of a high energy world, Tang Zhen would not dare to be too brash. This was because he was simply unable to fight against it by himself.

The world's will did not dare to act rashly, and Tang Zhen was too lazy to care about it. The strange phenomenon in the sky continued to condense and did not dissipate. The range of its influence continued to expand.

At this moment, a group of people suddenly appeared in the distance.

They were riding strong warhorses and rushing towards the dark clouds.

There were faint energy fluctuations on the bodies of the riders who were riding the warhorses, and their movements seemed very valiant.

Looking at the dark clouds in the sky, the riders' eyes were filled with unconcealable shock. The closer they got, the more shocked they became.

They were all believers of their God, and the God they believed in was the creator of the divine Kingdom.

These believers, who were stationed in the temples of the nearby cities, had inadvertently witnessed the whole process of the desert turning into a grassland. They were so shocked that they could not come back to their senses for a long time.

a miracle! This is a miracle created by the gods! It's a hint!

Soon, someone shouted loudly, which immediately attracted the agreement of others. Then, the entire city was filled with figures kneeling and praying.

In the eyes of the believers, only God could do all this. He must have heard the prayers of the believers, and then turned the desert into a grassland.

The believers at the bottom were always the most confused group of people. They insisted on their beliefs and believed that God would one day fulfill their wishes.

However, to the emissaries of the temple, things were definitely not that simple, because they knew more secrets.

Although they claimed to be believers of God, as far as they knew, God had not shown any miracles for a long time. The last record was hundreds of years ago.

There were fewer and fewer believers who believed in the old gods, and new religions had appeared, claiming that the existence of gods was a lie.

The believers who had mysteriously disappeared had actually become sacrifices and delicious food for the demons of hell.

The rumors were getting more and more intense. Although the temple kept sending oracles to kill the rumor mongers, they could not control the spread of the rumors at all.

Under such circumstances, the status of the temple had become precarious. Perhaps it would not be too long before they were deprived of all their privileges.

Under such circumstances, the sudden appearance of a miracle was simply a life-saving straw, making these oracles happy.

Regardless of whether the matter was really related to God, they would find a way to make it a fact to prove to the wavering believers that God was still watching their performance.

If the operation was done well, perhaps the unfavorable situation could be completely reversed, and the temple could regain Supreme rule.

Therefore, after an emergency discussion, the temple immediately sent out the strongest cultivators, riding on warhorses to find the source of the change.

In the end, not long after they entered the desert, they discovered the strange change in the sky and confirmed that it was the source of the change.

After realizing this, the oracles of the temple felt much more energetic and impatiently drove their warhorses to gallop over.

Looking at the huge stone pillar that appeared out of thin air from afar and the ground that was flashing with light, the oracles felt a wave of holy aura blowing in their faces.

At this moment, they were certain that this was the work of a God and not something that could be done by a human.

They had been here more than once, but they had never seen such a huge stone pillar. It must have been created by the gods.

we must summon all the believers here and let them witness the divine skill with their own eyes. As long as this matter spreads, those new believers will no longer have any room to survive!

The Oracle on the horse was extremely excited. In a short moment, he had made a series of plans. At the same time, he subconsciously urged the warhorse to speed up.

In the end, when they were only a few li away from the stone formation, countless bolts of lightning suddenly appeared in the sky. Soon after, a pillar of light with a diameter of a thousand li shot into the sky, piercing directly into the heavens.

Before the believers could recover from their shock, they found a big hole in the sky. Figures in black armor slowly descended from the sky.

Chapter 2115 Completely crushed \_The figure that appeared from the dimensional passage was none other than cultivator Lou Cheng from the sacred Dragon Warzone.

The moment the teleportation array connected to the Holy Dragon City, the cultivators on duty immediately recognized the origin of the teleportation channel. At the same time, they confirmed that this matter was related to Tang Zhen based on the information they received.

Whenever such a teleportation array appeared, it meant that a new dimension was connected to the world of loucheng. The cultivators of loucheng had to enter it at the first moment and guard the teleportation channel.

The purpose of this was to ensure that the transmission channel would not be occupied by the enemy, and then they could snipe the cultivators in Lou Cheng.

Especially when connecting to a high-energy plane, he had to be careful of such things, otherwise, he might suffer great losses.

There was no need for instructions from the higher-ups, and cultivators from loucheng city who were dealing with emergency situations appeared and entered the passage one after another.

The various legions that were stationed in Holy Dragon City also responded in the shortest time possible, gathering at the transmission passageway.

The residents of loucheng were already used to such a battle scene, and they had also made corresponding preparations.

When the war required them, they would put on their armor and rush to the front line in the shortest time possible.

At the same time, the news of the dimensional Gateway's appearance was also known to the other towers in the battle zone. If there were any changes, they would immediately send reinforcements.

On the other side of the teleportation portal, lightning snaked in the sky, and black smoke-like objects kept appearing at the edge of the broken plane barrier.

This was the world's natural order trying to repair the damage. However, it felt rather powerless in the face of the constantly operating runic magic circle.

After receiving the replenishment from the world of the tower, unless Tang Zhen took the initiative to close the transmission channel, there was no possibility of repairing the damage.

After the first batch of cultivators in Lou Cheng completed the teleportation, they immediately saw Tang Zhen's figure and went forward to pay their respects.

"Greetings to the city Lord!"

Thousands of cultivators in heavy black armor were scattered around the teleportation formation, but their movements were shockingly uniform.

They were like machines, exuding a cold aura, and their movements were extremely capable.

Many of the cultivators in the city were excited. They were all residents of the Holy Dragon City, and many of them had grown up listening to the stories of the city Lord.

There was only admiration and respect for this legendary city Lord, and he was regarded as a goal to strive for.

Unfortunately, as the strength of the sacred dragon battle zone continued to increase and they came into contact with the vast world, the chances of them meeting Tang Zhen were getting less and less.

The scene of Tang Zhen taking the lead and leading the city's residents to fight against the enemy was basically impossible to happen again.

"Everyone, there's no need to be so polite!"

Tang Zhen faintly smiled. His gaze swept across the surrounding cultivators of Lou Cheng and then looked at the transmission channel.

In the blinding light pillar, figures appeared one after another. After the vanguard arrived, more cultivators of Lou Cheng were also teleported over.

From this, one could see the efficiency of the Lou Cheng cultivators. As long as there was a slight chance, they would not miss it.

In addition, there were also many huge objects. There were terrifying beasts covered in heavy armor, and at the same time, there were super aircraft full of a sense of technology.

After they appeared, they also spread out around the dimensional gateway.

The aircraft's weapon systems were all activated. If an enemy tried to attack, they would attack immediately.

In fact, for a low-energy world like this, a light warship was enough to completely crush the natives.

The current formation of the Holy Dragon City cultivators was enough to launch an attack on a high-energy world and ensure that they would not be defeated.

And this was only the basic standard. If the situation was critical, the first to be dispatched would definitely not be ordinary cultivators, but spiritual emperors or even stronger experts.

All of these changes were completed in a very short time. When the dazzling light weakened, the sky within a radius of dozens of kilometers was already filled with the figures of cultivators from Lou Cheng.

The temple believers who were watching from a distance were already dumbfounded. Their initial surprise and anticipation had turned into unconcealed horror.

They had never seen such a scene before. They did not know what to do, and their minds were in a mess.

Especially when the cultivators of Lou Cheng appeared, they felt a shocking aura. It was a killing intent that was almost tangible.

It was like an invisible blade brushing across his face. Although there were no scars, a pain that came from the bone marrow surged through his entire body.

"They're here with ill intentions!"

After this thought came to their minds, the oracles turned around and fled without hesitation, afraid that they would be discovered by the cultivators of the building city if they were slow.

Who knew that just as they turned around to leave, a figure flashed in the air and blocked their escape route.

As for the other cultivators in Lou Cheng, they didn't move at all. They didn't need to send too many people to deal with native cultivators of this level.

They only needed one cultivator to completely crush the other party.

Before the oracles could react, they felt an irresistible force surge over and completely bind their bodies.

He was like a clay or wood sculpture. He couldn't even move his eyelids.

An indescribable fear rose in their hearts, and the oracles felt like they were trapped beasts, ready to be slaughtered at any time.

"What should we do? what should we do?"

The oracles were shouting madly in their hearts, trying to get out of their own predicament, but there was no way.

However, the cultivator from Lou Cheng city didn't pay any attention to them. He just hung in the air and looked at the teleportation array in front of him.

It was as if in his eyes, these God's messengers were just ants, and he couldn't be bothered to pay attention to them.

Seeing this, the oracles heaved a sigh of relief.

Although his life was temporarily saved, the fear in his heart could not be suppressed. As time passed, the despair in his eyes became more and more intense.

Just as these oracles were about to collapse, the cultivators around the transmission tunnel formed an array again and spread out in all directions.

In a short period of time, the entire desert was under control, and even a flying insect could not sneak in.

After that, nearly a hundred figures flew over from the center of the teleportation array and landed on the grass in front of them.

The power that bound their bodies disappeared in an instant, and the oracles fell from their warhorses one after another, looking very embarrassed.

After regaining their mobility, the oracles were overjoyed. No one cared about their image, and they hurriedly got up from the ground.

They quickly gathered together and stood back to back. Then, they subconsciously drew out their weapons and looked around with panic in their eyes.

Even though they were holding sharp blades, they still couldn't bring them any sense of security. The heavily armored cultivators in front of them weren't existences they could fight against.

Chapter 2116 The panicking Aboriginals \_Surrounded by a group of cultivators, Tang Zhen walked to the front of the divine envoy, whose face was filled with fear.

"Don't panic. We're not here to invade, we're just borrowing a location.

However, if you don't know what's good for you and dare to provoke us, only destruction awaits you!"

Tang Zhen's tone was calm, as if he was just having a casual chat, but the contents of his words made the oracles shudder.

They didn't doubt the truth of this sentence. The scene of the cultivators of loucheng flying in the air was enough to prove their strength.

This was supposed to be the proof of the plane's strongest, but at this moment, such powerhouses were everywhere, and some were even stronger.

Since when did super experts become so cheap?

"Don't worry, Sir. We didn't mean to offend you. We didn't show any disrespect.

If there's nothing else, we'll leave immediately and won't disturb you."

The leader of the oracles quickly explained, and his companions followed suit.

Regardless of whether the Lou Cheng cultivators believed it or not, they had to make their stance clear to avoid any misunderstandings.

There was no falsehood in his words. Even if they were given a hundred guts, they would not dare to be presumptuous in this situation.

“That’s good. That saves us a lot of trouble.

I can let you go, and when you return, you can tell the world that this place has been occupied by us.

We don’t like to be disturbed. From this moment on, this place is a forbidden area. No one is allowed to approach.

“At the same time, collect the tomes of the gods you believe in and all sorts of information. Try to send them here as soon as possible.

Remember to be serious and don’t be half-hearted!”

The group of God’s messengers heard this and quickly nodded in agreement, indicating that they would definitely complete it as soon as possible.

“Forget it, you’re too slow on horses. I’ll send someone to go with you so that we don’t waste time,”

After Tang Zhen said this, he turned to look at cultivator Lou Cheng beside him. The other party gently nodded his head.

Then, he raised his left arm and said a few words. At the same time, he looked at the teleportation array. Then, an aircraft slowly approached and flew over everyone’s heads.

The aircraft was about 500 meters long, and it covered the sky like a dark cloud, casting a huge shadow.

Around the aircraft were muzzles of different sizes, all of which were pointing at the ground.

This was a light assault ship seized from the terobo star system. Its main purpose was to break into the atmosphere from outer space and launch a strong attack on the enemy on the ground.

According to the tactics of the teroboros, when such light assault ships were in action, there would usually be dozens or hundreds of them moving at the same time. They had extremely high mobility.

When the ground troops encountered such an attack, they had no way of fighting back. Due to the outstanding combat effectiveness, every fleet was equipped with a large number of equipment.

Unfortunately, no matter how strong their equipment was, it could not save them from their demise. The once powerful torobo people had long become the dust of the universe.

The loser didn’t have to say that he was unlucky, but the winner didn’t have to be too proud. It was normal to win or lose, and who knew when it would fall on them.

However, as the instigator and Victor of that war, the Holy Dragon battle zone had obtained a large number of spoils of war, including tens of thousands of light assault ships.

However, in the hands of the cultivators of Loucheng, the most important role of these assault ships was to provide Transport Security. The cultivators of Loucheng were still in charge of the actual battle.

Compared to the high altitude attacks of the assault ships, the cultivators of Loucheng were more destructive. They were invincible after landing on the ground.

In addition to the light assault ships, the Holy Dragon City also had many heavy warships. However, unless it was confirmed that an official war was going to start, they would not use them easily.

Although it was the smallest battleship, it was still an unbelievably huge object to the native cultivators.

A group of oracles looked up at the light assault ship above them, and they no longer had any thoughts of getting lucky.

The only thing they could do was to be at the mercy of the cultivators of Lou Cheng. They had no right to resist and choose.

Just as they were feeling depressed, the cultivator from Lou Cheng walked over and looked around with a sharp gaze.

He looked at the group of frightened oracles and said in a cold voice, "In the following time, all of you must listen to my commands. You are not allowed to have any wishful thoughts, or you will bear the consequences!"

This wasn't an alarmist talk. In the eyes of the cultivators in Lou city, the indigenous cultivators were just like ants, unable to withstand a single blow.

They wouldn't bully others, but they definitely wouldn't allow the other party to offend them. Otherwise, they would use the most brutal means to punish them.

This was a common method used by the strong to enslave and discipline the weak. It seemed cruel and heartless, but it was simple and efficient.

Fortunately, the cultivators of Lou city were not here to invade and plunder. Otherwise, they would not have to go through so much trouble. They only needed to send 100000 troops to sweep across the world and they would be able to kill the entire world in a few days!

As he spoke, the Lou Cheng cultivator used his mental power to connect with the Oracle's mind and converted it into a language that the Oracle could understand.

don't worry, we know what to do. We promise to follow your command.

The group of oracles nodded quickly. Although they were secretly shocked by the magical means of direct communication through consciousness, it was not the time to study this problem.

Then, they followed the instructions and walked to the open space at the side. They started to wait uneasily.

At this moment, the bottom of the light assault ship lit up, and a translucent beam of light shot out from the bottom of the assault ship.

This was a device used for short-distance teleportation. It enveloped several oracles and Lou Cheng cultivators, and under the zero-gravity and energy propulsion, they flew away from the ground at a rapid speed.

The oracles, who had never experienced such a scene before, were already uneasy, and they finally panicked.

“What is this? let me out!”

The oracles who were sucked into the pillar of light danced in fear as they tried to escape, but they were unable to do so.

In their panic, they could only shout for help, but it was to no avail. They could only look at the black hole above their heads in horror and then be “swallowed” in one gulp.

The oracles who were not enveloped by the pillar of light dodged without hesitation. They looked at their companions in the pillar of light, their eyes flashing with uncontrollable panic.

They didn’t dare to help in case they were implicated. Moreover, they didn’t know what to do.

The roars ended quickly. Both the cultivators and the oracles had already entered the assault ship.

Then, the assault ship turned on the propulsion engine, and under the drive of a special force field, it disappeared like lightning into the horizon.

The remaining oracles felt a strong sense of powerlessness. They couldn’t fight against this group of powerful cultivators of unknown origin.

Since that was the case, he would obediently listen to the command so as not to lose his life in vain.

In the following time, the cultivators of Lou Cheng followed Tang Zhen’s instructions and completely sealed off the area within a radius of hundreds of miles.

More than a dozen law cultivators made their moves at the same time, building a giant wall up to 20 meters high, completely sealing off the area.

#### Chapter 2117 Platform Summoner (1)

The sudden appearance of the Lou Cheng cultivators immediately caused a huge uproar in this low-energy world. The native cultivators who received the news all focused their attention on the wilderness.

To them, cultivators with powerful cultivation bases were no different from the gods in the legends.

Before the news of the desert turning into a grassland could spread, the light assault ship suddenly appeared in front of the world.

In the written records of the natives, there was a description: “It’s an extremely huge flying building. It’s completely made of metal, and the details are exquisite.

Even the best craftsmen could not create such a magical building. The moment it appeared, a dazzling light filled the entire sky.

From the light pillar that descended from the sky, a group of soldiers who were fighting for the gods walked out. They were wearing gorgeous battle armor, and when they walked, even the air seemed to tremble!

The accompanying oracles were extremely respectful. They invited the soldiers of the gods into the temple and handed the books to the oracles. Then they went back to the palace of the gods and flew into the sky.

Some people chased in the direction where the palace of the gods had disappeared. In the end, they saw a huge city wall in the desert that had turned into a green grassland.

This was the kingdom of the gods in the mortal world. As long as one looked at it, one could see the flying palaces of the gods from time to time, as well as the divine warriors flying like birds.

Countless believers began to gather in the wilderness. They guarded outside the wall and prayed to the God's kingdom, hoping that they could be sensed by the God and be connected to the God's kingdom to be revived."

For things that they could not understand, the Aboriginals always liked to associate them with the gods. Not to mention, in this world, there were all kinds of legends about the gods.

The powerful cultivators were naturally associated with the gods by the natives. As time passed, more and more natives accepted this theory.

Due to the influence of the energy dissipated by the dimensional gateway, the wasteland had indeed undergone tremendous changes. Both the animals and plants were very different from other places.

The desolate wilderness had suddenly become a Holy Land. As time passed, dozens of cities of different sizes had been built around it.

Countless natives were gathered here. Even though the cultivators in the city didn't pay attention to them, the natives still enjoyed it.

Although the cultivators of Loucheng city knew about the changes outside, as long as the natives didn't enter the city wall, no one would care about them.

A wall that wasn't indestructible separated the natives from the cultivators of Lou city. Even after many years, nothing had happened between them.

This was something to be discussed later.

After Tang Zhen obtained the ancient books regarding the gods in this world, he carefully studied them and discovered that the ancient books actually had a very strong hypnotic method.

When the believers were reading the scriptures, they would be hypnotized unknowingly. After a long time, a special energy would be developed in their minds.

The strange thing about this energy was that it could make the world's laws determine that believers were outsiders, no longer living creatures of this world.

When that moment came, the portal would be opened and the believers would be led into the divine Kingdom.

As believers were regarded as outsiders, the world's rules would not protect or stop fanatical believers when the portal was opened.

Under such circumstances, the believers could easily cross the plane barrier and enter the divine Kingdom directly.

In the process of teleportation, even if the believers were weak, they would not be damaged at all.

If Tang Zhen wanted to fake fanatical believers, he would first have to simulate this special energy to make the God Country transportation formation activate on its own.

The energy simulation process was very simple. It was something that Tang Zhen could easily do.

The moment the energy simulation was completed, Tang Zhen immediately felt a repulsive force appear. However, after it came into contact with him, it dispersed in a hurry like a Frightened Rabbit.

For a cultivator with terrifying strength like Tang Zhen, the world's laws of the low energy plane could no longer affect him. They were even afraid that he would destroy the world instead.

This was the benefit of having great power. Even if one represented the will of an entire world, one would not dare to provoke them easily.

The most basic step had been completed. The next thing to do was to choose the right people to disguise as fanatics.

It wasn't difficult to choose a cultivator to enter the divine Kingdom. There were countless cultivators in Lou city, and many of them wanted to improve their strength.

Even if they entered the divine Kingdom to erase their memories, their combat power would be suppressed. However, this was not a problem for the cultivators of loucheng.

When the cultivators in loucheng who entered the divine Kingdom had finished their selection, they would be asked to copy their memories and store them.

These memories would be stored in the Holy Dragon City, and when the cultivators of Lou city returned, they could be re-read and implanted.

Doing so would save him a lot of battle credits, which he could use to increase his strength.

Some work could not be completed in the low-energy plane. Therefore, after Tang Zhen made the necessary arrangements, he returned to Holy Dragon City through the transmission channel.

The moment he appeared in the Holy Dragon Warzone, before he could even return to loucheng, he suddenly received a call from the cornerstone platform of the fifth Warzone.

After Tang Zhen received the message, he didn't immediately head to the fifth battle area. Instead, he returned to the tower to understand what had happened recently.

In the days he wasn't around, the war zone operated normally, and the plan for the Masters of creation's world was carried out in an orderly manner.

This plan was related to the future development of the sacred Dragon Warzone, and there was no room for carelessness. Fortunately, there were countless capable people in the sacred Dragon Warzone, and the plan was carried out flawlessly.

After understanding everything, Tang Zhen told the cultivators in loucheng who participated in the meeting about the selection of people to go to the God Kingdom and the storage of memories.

Tang Zhen had set a time limit and asked them to finish it as soon as possible.

After he was done with his business, he used the teleportation formation to cross the battlefields and arrived at the cracked territory of the fifth battle area.

In the main tower of the cracked territory, Tang Zhen came to the cornerstone platform and built a connection with it.

"Lord Tang Zhen, I didn't expect you to return so quickly. You must have gained something!"

Tang Zhen gently nodded his head. He had indeed gained quite a lot this time around. Although he had yet to officially become a creator, it was only a matter of time.

"You're the first cultivator to return from the rift. Can you tell me what secret is hidden there?"

And what methods do they use to help cultivators reach the Creator level?"

This was the problem that the cornerstone platform was most concerned about. If they could find the reason and make use of it, it would be of great help to the improvement of the strength of the fifth battle area.

"I remember that before we entered the rift, you placed an item on me to record what happened after we entered the rift.

Why don't you just take out that item and read the records inside? wouldn't everything be clear then?"

Tang Zhen frowned slightly and asked in a puzzled tone.

I've already searched for that item, but unfortunately, it didn't work. That's why I'm asking.

The tone of the cornerstone platform was slightly depressed. If the item it placed was effective, why would it have summoned Tang Zhen personally?

"No effect?"

Tang Zhen's face revealed a trace of surprise. He was naturally very clear about how strong the foundation stone platform was. However, he did not wish for there to be any deviation on this matter.

Perhaps that item was quite extraordinary and had exceeded the rules of the divine Kingdom, which was why it had failed.

This was a good thing. As long as Tang Zhen operated properly, Tang Zhen would definitely be able to obtain more benefits.

Chapter 2118 A conversation with the cornerstone platform \_The fifth battle area was very powerful in the tower world. The territory that was ranked at the top could even crush the lower-ranked battle areas.

However, before the fifth battle area, there were still four battle areas that were more powerful than the fifth battle area.

The news about these four battlefields was rarely spread in the outside world, and they were extremely mysterious.

The cornerstone platform of the fifth battle area was obviously not willing to be suppressed, so they spared no effort to improve the strength of the battle area, trying to fight for a higher ranking.

It was for this reason that it paid great attention to the matters of the God's kingdom, wondering what was hidden behind the crack.

Tang Zhen did not hesitate and directly explained, "I do remember what happened behind the crack, and I've checked it carefully. There's no tampering.

That's why I'm certain that my experience in the divine Kingdom has really happened, and it's not a fake memory.

If I'm not wrong, the so-called divine Kingdom is actually a special world built by the local Super Masters.

This world was formed by the will of the natives. It was similar to the world of the mind, but it was more powerful and stable, and could perfectly integrate with the outside world.

The divine Kingdom was extremely large, and it was not made up of a single world. Instead, it had many branch worlds.

The main world was the core region, and there were a few subsidiary small worlds around it, which were used as a transit point for the believers.

These transit stations are connected to the main world through teleportation arrays, and at the same time, they are also connected to some small planes. Their main purpose is to protect the main world and the low-energy worlds where believers live."

Tang Zhen first explained the structure of God's kingdom, letting the cornerstone platform understand what kind of world this was and what was special about it.

The cornerstone platform had enough knowledge. Based on Tang Zhen's introduction, it made a reasonable analysis of God's kingdom.

After introducing the general situation of Scandinavia, Tang Zhen thought for a moment before continuing, according to my observation and analysis, the God who created the divine Kingdom should have encountered an accident and is now in a deep sleep.

If it was sleeping because of a battle, then the enemy of this native God must have extremely terrifying power.

Regardless of whether this enemy exists or not, we must be on high alert and absolutely not be careless.

In addition, there were two other possibilities that could lead to a deep sleep. One was that it had gone mad during its cultivation, so it had to sleep to recuperate.

The other possibility is that this God is nearing the end of his life and is about to begin a new cycle.”

Perhaps in order to ensure their own safety, the gods transformed anything that threatened them into sea monsters before they went into deep sleep.

Regardless of whether this process was magical or not, just the fact that the invisible danger had a physical form meant that there was a possibility of being resolved.

For example, a God was a patient in a coma, a sea monster was the poisonous bacteria in its body, and the believers were the medicine for healing.

Because of the endless poisonous bacteria, the process of summoning believers continued for many years without a break.

In the process of killing sea monsters, one could obtain battle merits as a reward, which was the key to improving one’s strength.

The strength of the indigenous God was extremely strong. Although he was in a coma, he was able to generate heaven and earth energy at all times to maintain the operation of the God Kingdom.

As long as you have enough battle merits, you’ll have the opportunity to channel energy into your body. It’s not impossible for you to become a creator.”

After hearing Tang Zhen’s explanation, the foundation stone platform was silent for a moment. Soon after, it said in a deep voice, “To be able to do this, the sleeping Aboriginal deity must be very powerful, far beyond the level of the creator.

It’s not easy for the native cultivators to do this. Perhaps they have their own opportunities.”

Tang Zhen nodded. He also felt the same way.

Fortunately, this Aboriginal deity had fallen into a deep sleep. Otherwise, even if Tang Zhen had heaven-defying abilities, he would not have the opportunity to enter the world that he had created.

Even if they successfully entered, they would be regarded as intruders by the divine Kingdom and killed by a powerful force.

How difficult would it be to kill this native God? ”

The cornerstone platform suddenly asked. Perhaps this sleeping native God had made it feel a trace of threat.

Or could it be that the items of the native gods had attracted the greed of the cornerstone platform? after all, they were native powerhouses far beyond the creator level, and their items might be useful to the cornerstone platform.

By killing the Aboriginal gods, he would have a chance to obtain those items that might exist.

Tang Zhen frowned slightly when he heard this. He had never thought of killing the Aboriginal deity. Without sufficient benefits, he would definitely not do such a thing.

He thought about the question raised by the cornerstone platform and said, "it's actually very simple to kill the indigenous gods. You just need to destroy all the planes where they summon their believers.

If that's the case, we won't even need to make a move, and the sea monster will destroy the divine Kingdom.

However, it was not an easy task to find all the planes related to the divine Kingdom. It might take a long time.

Even if they controlled these planes and cut off the source of believers, there was still no guarantee that the sea monsters would kill the indigenous gods.

At this time, we will need to send Masters of creation to attack at the critical moment. Maybe we can kill the Aboriginal gods."

When Tang Zhen said this, he paused for a moment before continuing, "But I don't recommend doing that. We should continue to maintain the status quo to avoid any unknown changes.

At the same time, he had to find a way to collect information and control the place of origin of all believers so that competitors would not discover and destroy them.

As long as we complete this step, the entire God Country will be under the control of the 5th battle area. At that time, whether it is to be used or destroyed, it will be up to us!"

After Tang Zhen spoke of his method, he shut his mouth. The final decision on this matter still belonged to the cornerstone platform.

The cornerstone platform fell into deep thought. After a long time, a desolate and distant voice came.

"We can try your method. Compared to the inheritance of a sleeping God, it's more cost-effective to train Lou Cheng's cultivators.

If I'm not wrong, you've been planning this since the moment you left the divine Kingdom, right?"

Tang Zhen nodded and admitted. This kind of thing couldn't be hidden from the cornerstone platform. Moreover, he didn't intend to hide it.

The plan to explore the divine Kingdom was first initiated by the cornerstone platform. He only had the opportunity to participate in it because he had participated in the previous mission.

Now that he wanted to take all the benefits, let's not talk about whether the cornerstone platform would agree or not. Tang Zhen himself would not do this.

Then, he told them about his plan. Since he already had area 153 in his God's kingdom, there would not be any changes to his plan.

After the cornerstone platform thought for a while, it said to Tang Zhen, "Since you already have a perfect plan, I'll leave this matter to you. The battle zone will provide sufficient support and rewards.

I only hope that you can do one thing, and that is, when Lou Cheng from the fifth battle area goes to the divine Kingdom, do not make unreasonable and demanding requests."

Tang Zhen nodded. Although he was the leader of the Holy Dragon battle region, he was also a member of the fifth battle region.

When dealing with this matter, he had to be fair. Otherwise, not only would it make the cornerstone platform dissatisfied, but it would also bring trouble to himself.

Every cultivator in Loucheng city would become very sensitive when it came to the promotion of their strength. Tang Zhen was very clear about this, so he naturally wouldn't stir up trouble.

#### Chapter 2119 Ten years (1)

For the fifth battle area, there was more than one way to improve the strength of cultivators. Entering the divine Kingdom was only one of the choices.

Since Tang Zhen had already taken the initiative, it would not be good for the cornerstone platform to step in and take control of it in its own hands.

After all, Tang Zhen was also a member of the fifth battle area. Moreover, his performance was outstanding, and he was highly regarded by the cornerstone platform.

Advancing to the 3rd level of the sector Lord realm in such a short period of time, and he was only one step away from becoming a creator, such a speed of advancement could be said to be unprecedented.

It was reasonable to give him the appropriate care. It must be known that once Tang Zhen was promoted, it would be a big deal for the fifth battle area.

Sometimes, the best cultivators were far more important than some benefits.

Moreover, it was more appropriate for Tang Zhen to be in charge of this matter. After all, he was very familiar with Scandinavia's situation and knew what to do.

If he rashly handed things over to others, it was very likely to turn a good thing into a bad thing. This was definitely not the result the cornerstone platform wanted.

If he could satisfy Tang Zhen and not delay his profits, why not?

As for the main reason, the cornerstone platform had not explained it yet, but now it was ready to tell Tang Zhen.

"You'd better start the plan for the divine Kingdom as soon as possible and not waste any time.

This is because in ten years, the battlefields will be re-ranked, and the wealth of the divine Kingdom is related to this matter.”

Just as Tang Zhen was about to leave, the foundation stone platform suddenly opened its mouth and revealed a piece of information that surprised him.

“New ranking?”

Tang Zhen’s expression was a little stunned. He did not expect that such a major event would actually arrive in another ten years!

There was indeed a ranking in the three thousand battlefields of the loucheng world, and it was closely related to benefits.

The battlefields with different rankings enjoyed different levels of authority, and there were many detailed divisions.

This kind of authority was reflected on the cornerstone platform. The higher the ranking of the battle zone, the more special the authority the cornerstone platform had.

The cultivators in loucheng city in the war zone would enjoy more benefits.

Comparing the Holy Dragon battle zone and the fifth battle zone, one could only be considered a grocery store, while the other was a supermarket. The two were not on the same level at all.

As a result, the cultivators in the Holy Dragon Warzone often entrusted the cultivators in the cracked territory to exchange for resources, because some things could not be exchanged in the Holy Dragon Warzone.

He had to pay enough attention to such a big event.

Although he had come into contact with related information before, he didn’t know much about it. Now that the cornerstone platform mentioned it, he naturally had to understand more.

Not to mention that the cornerstone platform had mentioned that this matter was related to Scandinavia. Tang Zhen naturally wanted to get to the bottom of it.

“The rankings of the Theater of Operations are being rearranged. I wonder what’s going on?”

Tang Zhen, who was originally planning to leave, immediately turned around and asked the foundation stone platform.

“For the sake of fairness, the battlefields will be re-ranked every thousand years.

As long as the battle zone was strong enough, they could get a higher ranking and give the real-time platform more authority.

Of course, to the lower tier battlefields, this did not mean much. This was because even if they were to re-rank the battlefields, they would still not be able to surpass the higher tier battlefields.

No matter how hard he tried, his ranking wouldn’t improve much. If he wasn’t careful, his ranking might even drop.

However, for the high-level battlefields, this was an opportunity to increase their strength. Especially for the top 100 battlefields, there would definitely be a fierce battle.

Even if you are one rank higher, you can still gain a lot of benefits. Therefore, each time when the battle zones are re-ranked, all the battle zones will try their best!”

When the cornerstone platform said this, its tone could not help but become more serious.”As far as I know, the sixth and seventh battle areas are ambitious. They are both preparing to take a step forward and become the new fifth battle area.

The top four battle zones were too powerful, so there would not be any changes in the rankings. It should still be the same as now.

Although I want to improve, the top cultivators of the fifth battle area can't be compared to me. Even if I go all out, I may not be able to win.

I only hope that we can maintain our ranking in the fifth battle area, but for safety's sake, I hope that there will be more creator-level cultivators in the fifth battle area.

Before the battle zone is re-ranked, I will send Lou Cheng cultivators to attack the God Kingdom and kill that sleeping native God.

The items obtained after killing the opponent would be of great help to top-notch cultivators, allowing the battle zone to secure their ranking.

Although doing so would be akin to killing the chicken to get the eggs, it's the only way to deal with special circumstances.”

Tang Zhen came to a sudden realization after hearing the explanation of the cornerstone platform.

It was no wonder that when the cornerstone platform asked how to destroy the indigenous gods, Tang Zhen was still puzzled at that time. Why was the cornerstone platform so short-sighted?

But now it seemed like he had no choice.

Even the purpose of the cornerstone platform to explore the crack was to obtain more valuable items, not to find a place for the cultivators to advance to the creator level.

In fact, Tang Zhen wasn't very interested in the battle zone rankings.

As the leader of the battle zone, he knew that the current strength of the Holy Dragon battle zone was not enough to compete with the other veteran battle zones.

It would be great if they could get a higher ranking, but if they couldn't, then there was no need to force it.

For the foundation stone platforms that were ranked at the bottom, even if there were some differences between them, it was not that big of a difference.

When he controlled the Masters of creation's world, he could make a fortune behind closed doors. When the next battle zone rankings were rearranged, he would definitely amaze the world with a single brilliant feat.

However, the sacred Dragon Warzone could definitely afford to wait for a thousand years.

However, as a member of the 5th battle area, he had to consider the interests of the battle area. However, doing so would cause him to suffer great losses.

In just ten years, no matter how hard the Holy Dragon battle zone worked, how much could they gain from the divine Kingdom?

Tang Zhen could not help but shake his head when he thought of this.

As expected, there was nothing perfect in this world. It was not easy to find a place to improve the strength of the Holy Dragon Warzone, but there was a time limit.

It was just the decision of the cornerstone platform. He had no right to interfere with the changes, unless he had a better way to solve this problem.

However, there was wealth hidden on the body of the indigenous God that even the cornerstone platform coveted. Tang Zhen did not think that he could take out the same conditions to exchange.

In the end, God's kingdom didn't belong to him. If he wanted to take it for himself, he had to pay the corresponding price.

At the thought of this, Tang Zhen left the cracked territory and quickly returned to the sacred Dragon Warzone. He began to prepare without stopping.

To ordinary people, ten years might be a long time, but to cultivators, it was a fleeting time.

Therefore, Tang Zhen had to seize the time and strive to obtain enough benefits within these ten years.

If possible, he would try his best to protect his God nation. Only by doing this could he obtain endless benefits.

Chapter 2120 Returning to the God's kingdom (1)

By the time Tang Zhen returned to the sacred Dragon Warzone, the tasks that he had instructed Lou Cheng's cultivators to do had basically been completed.

It was not difficult to store memories, as the cornerstone platform had similar means in the first place, and the teroboros had even more complete memory replication programs.

The combination of the two methods only needed a little modification to be used.

This was the benefit of war. When a problem was encountered, there were many ways to easily solve it.

Over the long years, the world of loucheng had not only accumulated wealth, but also unimaginable knowledge and technological reserves.

The first batch of loucheng cultivators that entered the divine Kingdom had already been assembled. According to Tang Zhen's original plan, the first batch of cultivators that entered the divine Kingdom was about ten thousand people.

After the initial results were achieved, they would increase the number of people entering the God's kingdom to ensure that nothing would go wrong.

However, after the ten-year limit, Tang Zhen immediately increased the number of people who could enter the divine Kingdom in the hope that more cultivators in Loucheng city would benefit.

A large number of cultivators in Loucheng city entered the middle-turn through the teleportation gate and waited for the next arrangement.

Tang Zhen searched the Holy Dragon city's warehouse and took away a large number of war supplies, which included more than a dozen heavy warships and a complete set of ammunition production lines.

If it was not for the existence of his mental world, it was impossible for him to bring along so many resources. Even so, Tang Zhen still felt that it was not enough.

Ten years was too short. He wished he could send all the cultivators of Loucheng there to gain a wave of battle achievements.

The more people who entered the divine Kingdom, the more battle merits they would obtain.

Before heading to the middle position, the final mission that Tang Zhen left behind was to think of a way to break through the barrier of the God Country and build a stable transmission channel.

If they could do that, they would be able to save a lot of points when they left the God Kingdom.

One or two might not be eye-catching, but when there were thousands or tens of thousands of them, the accumulation would be quite impressive.

If these merits were used by Lou Cheng's cultivators to improve their strength, they would definitely be able to cultivate a large number of Masters, which was of great significance to the sacred dragon battle zone.

Perhaps when the battle zones were re-ranked, the Holy Dragon battle zone, which was originally prepared to watch the show, would also have the qualifications to compete.

Tang Zhen attached great importance to this matter. He told the residents of Loucheng to do their best and promised to give them heavy rewards.

For a time, the elites of the Holy Dragon War zone gathered and rushed to the middle-turn, busy day and night.

After dealing with the corresponding matters, Tang Zhen began to guide the cultivators of Lou Cheng on how to condense the energy of faith. At the same time, he ordered people to brand the cultivators of Lou Cheng with unique brands.

In the case of losing their memories, the special mark left on their bodies could allow them to confirm that they belonged to the same group.

When the cultivators from the fifth battle area arrived, they also had to make preparations according to the corresponding steps, because when they arrived in the divine Kingdom, they would all belong to the same camp.

a teleportation portal was formed instantly. it suddenly appeared beside him and tried to pull him into the portal.

Tang Zhen did not resist. Instead, he followed the strength of the dimensional tunnel and slowly entered it.

Otherwise, with the strength he possessed, this small transmission channel could not have any effect on him at all.

The power of faith began to circulate, producing a kind of hypnotizing force in an attempt to make Tang Zhen fall into a coma.

Tang Zhen simulated the hypnosis signal. After which, a ball of energy wrapped around him and rapidly advanced along the transmission channel.

Tang Zhen only used an extremely short amount of time before he felt that he had passed through the barrier between the planes. He had also arrived at the final destination of his space travel.

It was also at this moment that Tang Zhen felt an incomparably powerful force assault him. It seeped into his mind and his memories were constantly washed away like ocean waves.

Even with Tang Zhen's strength, he was unable to resist this kind of crazy scouring. That kind of terrifying majestic strength had already far exceeded Tang Zhen's imagination.

This kind of feeling was unusually strange. In an extremely short period of time, Tang Zhen had forgotten who he was and all his past experiences.

In the next moment, Tang Zhen appeared in the teleportation array of the divine temple.

Tang Zhen looked around him in a daze. Just as he was wondering why he had appeared here, a voice suddenly sounded beside him.

"Commander, why are you here?"

Tang Zhen looked in the direction of the voice and saw a foreign race cultivator wearing leather armor bowing respectfully to him.

"Commander?"

Tang Zhen nodded without changing his expression. He once again sized up the scenery in his surroundings before slowly walking toward the exit in front.

When he reached the entrance of the temple, he saw the huge tree and the busy believers around it.

After the believers saw Tang Zhen, they bowed and saluted one after another. It was obvious that they were very respectful of him.

However, these believers did not notice that Tang Zhen's eyes had a trace of loss. It was as if he did not understand what had happened.

Just as Tang Zhen was frowning and thinking hard. The sound of gunfire came from the city wall in the distance, like the sound of firecrackers.

The aura of war was almost everywhere.

“What is this place?”

Tang Zhen blinked his eyes. He felt a little uncomfortable, as though something was blocking his vision.

Then, he was shocked to find that the scenes that flashed past his eyes were all related to him.

Tang Zhen’s originally dazed eyes gradually became clear as he looked at the records in the video.

After a full ten minutes, Tang Zhen suddenly sighed softly. The corner of his mouth was lifted into a faint smile.

so this is the true use of the eyeball. Fortunately, I spent a huge price to exchange for it. It seems like it was worth it.

Although he was still a little puzzled, Tang Zhen had already completely figured out his background and what he was going to do next.

Compared to his own memory, the memory stored in the eyeball inevitably gave him a sense of surrealism.

However, Tang Zhen was extremely clear that these were his own real experiences. The difference was that these were scenes recorded by his eyes and not memories in his mind.

“After cultivators of loucheng enter a God Kingdom, they will inevitably experience this state of confusion. The rules of the God Kingdom can’t resist it at all.

Can we use a method to make them understand their origins and what to do next in the shortest time possible?”

As Tang Zhen thought of this, he returned to the temple. Then, under the gaze of the believers who were guarding the teleportation array, he conjured a crystal-clear stone tablet.

The information that Tang Zhen wanted to tell the cultivators in Lou Cheng was stored in this stone tablet. They only needed to touch it with their body to receive the information stored in the stone tablet.

If it wasn’t Lou Cheng, no matter how long he touched the stone tablet, there wouldn’t be any reaction.

from now on, if any believers are summoned here, as long as they have this mark on them, let them touch the stone tablet. Don’t miss a single one!

After giving an order to the believers who were guarding the teleportation array, Tang Zhen slowly turned around and headed straight for the city wall.

The believers who were guarding the teleportation array watched Tang Zhen leave, but their hearts were filled with doubts. They could not understand what the use of this stone tablet was.

Just as he was about to give it a try, the teleportation formation’s light flickered rapidly, and a dense crowd of people walked out.

Such an abnormal scene shocked the guard.

When he took a closer look, he was surprised to discover that these 'fanatical believers' actually had the special mark that Tang Zhen had mentioned!
