

## **Alternate 2131**

### Chapter 2131 The strange forest (1)

The battle merits of hunting sea monsters would automatically fall under Tang Zhen's name, even if it was in the deep sea.

God kingdoms were all built by the indigenous gods, so it was only natural that they could sense what was happening here.

If he couldn't do this, the warship plan probably wouldn't be able to be carried out smoothly. Tang Zhen was just taking advantage of the situation.

As for why the sea monsters were allowed to run wild, it was obvious that they were not powerful enough. Otherwise, there would not be a situation where they summoned believers on a large scale and passively defended against the sea monsters.

Tang Zhen was also certain of this point. Therefore, he had ventured deep into the sea alone. Otherwise, he would rather continue searching for the sea monster's lair than waste his time.

The path he was taking now was far from land, and he was gradually going deeper into the unknown.

Tang Zhen didn't have any accurate information on how big the divine Kingdom was, but he knew that there were many unknown areas.

The land where the Grand temple was located could only be considered the last safe zone. If it was also occupied by sea monsters, the entire God's kingdom would fall.

It could be said that other than the safe zone, there was no other safe place.

Under normal circumstances, even if the believers were hunting sea monster nests, they would never go so deep.

In the vast deep sea, there was a great Terror hidden.

Even the strong believers could not guarantee that they could retreat safely after entering the deep sea.

Even in the Grand temple, there was no information about the deep sea, and the only information was vague.

Ordinary believers did not know about the situation there, and even if the strong believers knew, they would not say anything, as it would only harm their own interests.

High-level sea monsters meant a huge amount of battle achievements. Even if the strong believers could not get them themselves, they did not want others to take advantage of them.

Even the Grand temple did not support the believers to enter the deep sea, which was no different from seeking death. However, if the believers took the initiative to enter, the spiriters would not easily stop them.

The purpose of summoning believers was to hunt sea monsters, so naturally, the more they killed, the better.

When the old Believers died, new believers would appear. The Grand temple did not care about such a small loss.

As for outsiders like Tang Zhen, the Grand temple wouldn't stop them from entering the deep sea. If they died during the process, they could only blame their own bad luck.

At this moment, Tang Zhen was still advancing unceasingly. He would kill any sea monster he encountered along the way without any hesitation.

Compared to the coastal waters, the speed of obtaining military merits here was indeed extremely fast, but the risks were also greater.

Unknowingly, a new situation appeared.

The sea water was extremely viscous and gave off a strong smell of blood, as if it was made of blood.

He waved his hand and sent out a stream of energy. It landed on the surface of the sea, but there were no waves. It even had a hint of elasticity.

It would be a wonder if there were waves in such seawater.

The surroundings were silent, and the ferocious sea monsters were nowhere to be seen. It was as if they had all escaped from this Sea area.

Tang Zhen observed for a moment before his body slowly descended and stepped on the jet-black Sea.

Tang Zhen's expression changed slightly the moment he came into contact with the sea.

He found that he only needed to consume a very small amount of energy to stay on the surface of the sea, and it would not affect his normal progress at all.

The ocean water seemed to have a life of its own as it trembled slightly and rhythmically.

is there water flowing below, or is there a monster hidden under this sea? "

From Tang Zhen's point of view, this Sea region was more like a swamp. The sea water under his feet was like mush.

It was not a liquid but a solid. It was only because it had been soaked in seawater.

could it be that there's still land in the depths of the ocean? "

A thread of doubt flashed across Tang Zhen's heart. However, he did not make any further guesses. Instead, he continued to advance forward.

After walking for a few more hours, Tang Zhen saw clusters of strange plants on the surface of the sea. The branches and leaves were all made of flesh and blood.

They were like living creatures, constantly twisting and shaking.

The sky was dark, but the flesh and plants emitted a bright light, illuminating the nearby sea.

At the top of the plant, there was a trumpet-shaped organ, and below it was a long and transparent pipe.

There were egg-like things inside the pipes. When they turned blood red, they would be squeezed out of the mouth of the pipe and fall to the sea.

From Tang Zhen's point of view, these could perhaps be considered as the seeds of a plant.

After the seed fell into the sea, it began to roll around, and it was unknown when it would suddenly disappear.

However, he did not disappear into the sea. Instead, he was caught by something that looked like a tongue and pulled to the bottom of the sea.

Clearly, it was not as if there were no living creatures under the sea. This caused Tang Zhen to become cautious. He subconsciously released his mental energy to probe.

However, for some unknown reason, this seawater was actually able to block out mental energy probes. Even with Tang Zhen's cultivation, he was helpless against it.

After discovering this, Tang Zhen became even more cautious and chose to fly close to the surface of the sea.

The plants on the surface of the sea, including the monsters hidden at the bottom of the sea, seemed to ignore Tang Zhen. They did not have the slightest reaction even when he flew past them.

Tang Zhen similarly did not wish to pay attention to these strange plants. He had a faint feeling that the situation might become extremely troublesome once he provoked these fellows.

The area covered by the strange plant was very large. Almost everything in Tang Zhen's line of sight was covered with this kind of plant.

As they went deeper, Tang Zhen discovered that the size of these strange plants began to increase. Originally, they were only three to five meters tall. Now, they were easily twenty to thirty meters tall.

The appearance of the plant had also changed. It began to have some tentacle-like things, and even in the absence of wind, they were constantly swaying.

When Tang Zhen approached these strange plants, they immediately reacted. Their swaying branches extended towards Tang Zhen's position as if they had been electrocuted.

The deeper they went, the stronger the reaction of the strange plants. If Tang Zhen was not flying in the air, he would have been attacked by these plants.

Tang Zhen, who was in the air, had a somewhat grave expression. This was because he discovered that as he continued to advance, the consumption of his energy was becoming increasingly serious.

From time to time, there would be a flash of light in the air. Although it looked beautiful, it hid fatal danger behind it.

This was a spatial crack that could cut and devour any object. The slightest carelessness could take a person's life.

If it was in the outside world, these spatial cracks would not pose much of a threat to Tang Zhen. However, in a situation where his strength was suppressed, even he did not dare to take it lightly.

Right now, it was certain that the airspace above this Sea region was a no-fly zone. If it wasn't for Tang Zhen's powerful strength, he might have been forced to travel on the ground.

Tang Zhen was also unable to endure for too long. If he wanted to go deeper, he could only land on the surface of the sea.

However, those strange plants were filled with aggression. Once Tang Zhen chose to walk forward, he would inevitably have to fight with these strange plants.

The energy produced in his mental space was already unable to make up for the consumption of energy during flight. If this situation continued, it was very likely that Tang Zhen would be forcefully squeezed dry.

Once that happened, even a low-level sea monster could kill Tang Zhen.

Tang Zhen didn't have much time to think. He directly descended from the sky and landed beside the strange plant.

Just as he had expected, as soon as his feet touched the surface of the sea, countless branches shot toward him at an extreme speed.

Chapter 2132 The forest of fire monsters (1)

At the moment when the strange tree branch attacked, a light flashed in Tang Zhen's hand and a long battle blade appeared out of thin air.

As Tang Zhen brandished his battle blade, it streaked across the surroundings, dragging out numerous dangerous streams of light.

At this moment, the space had been sealed by the saber radiance, and almost no water could enter.

As the light danced, the branches that pounced towards Tang Zhen were cut off one after another. A stinky liquid spurting out from the cut, and the smell was extremely unpleasant.

The branch that was cut off twisted in all directions like a snake. A mouth-like thing actually appeared at the end of the branch and bit at Tang Zhen.

Although they were not snakes or insects, they were definitely more poisonous than real snakes or insects.

As for the trees, perhaps they felt the pain, they writhed even more violently, and their branches waved even more wildly.

Some of the trees even pulled their roots out of the ground when they were wriggling, dragging along the stinky mud and throwing it at Tang Zhen.

There were also some small saplings with their roots intertwining at a rapid speed. They were like agile octopuses scurrying around as they surrounded Tang Zhen in an attempt to launch a sneak attack.

Only at this moment did Tang Zhen notice that there was actually a head-like thing hidden under the roots of the huge tree.

This caused the strange tree to look like a huge carrot. Furthermore, it had complete facial features and a strange and sinister expression.

The head was the size of a house, and when it was exposed, it was chewing something.

From time to time, tentacles would leak out of its mouth. When Tang Zhen saw this, he came to a sudden realization. It turned out that the tentacle that had grabbed the seed was actually the monster itself.

While they laid their eggs, they also devoured the eggs of other strange trees. They were truly incomparably brutal.

While Tang Zhen was observing the strange tree, the head under the strange tree suddenly opened its mouth and spat out mud arrows at Tang Zhen.

At the same time as they attacked, these strange trees were also constantly moving their positions in an attempt to surround Tang Zhen.

It was obvious that on this swamp-like sea, these strange trees could move freely, not just fixed in one place.

There were many strange trees. At this moment, Tang Zhen was being attacked from all directions. There was almost no place for him to hide. His situation was extremely precarious.

“Is this all you have?”

Tang Zhen, who was in the middle, suddenly let out an explosive cry. White-colored flames rose from the surface of his body.

The white flame didn't have any temperature, but its power couldn't be compared to ordinary flames. Once touched by the flame, the body and soul would be turned into ashes.

As soon as those branches touched Tang Zhen's body, they began to burn intensely. Then, they retracted as if they were electrocuted.

The fire spread along the branches and went straight to the trunk, wrapping the strange tree in the blink of an eye.

The burning trees let out strange squeaking sounds and whipped the ground with all their might, trying to put out the flames.

Who knew that this flame couldn't be extinguished at all? even the mud on the ground started to burn after it touched it.

It was as if this wasn't mud, but burning heavy oil that would burn when it came into contact with fire.

In just an instant, Tang Zhen's surroundings had turned into a sea of fire. Moving fireballs were everywhere.

The ignited tree sank into the mud, trying to put out the fire, but it quickly rushed out again, screaming and running.

Even the sticky mud could not stop the fire from burning. Instead, it became more and more intense.

There were flames everywhere, and there was almost no place to hide.

Those strange trees that were far away from Tang Zhen were also affected by the burning fireball and were instantly engulfed by the flames.

The surroundings were in chaos. Tang Zhen slowly moved forward in the sea of fire. No monster dared to stop him.

The burning flames couldn't hurt him at all. On the contrary, mist rose around his body, as if he was extremely excited.

This white flame seemed to have intelligence.

The pitch-black sky was now reflecting brilliant colors due to the illumination of the blazing flames.

It was a hidden spatial Rift that was originally invisible to the naked eye, but now it was revealed under the illumination of the fire.

Of course, it was useless for Tang Zhen to reveal the spatial crack. If he was unable to solve the problem of his energy being consumed at a crazy rate, he could only continue to advance on foot.

"Why don't we grab a Mount to save some energy?"

This thought flashed in Tang Zhen's heart. He randomly grabbed at the empty air and a strange running tree by the side was fixed in place.

The strange tree emitted a "Zhi Zhi" sound. No matter how it struggled, it was unable to escape from Tang Zhen's control.

Seeing that it was unable to break free, the strange tree subconsciously wanted to attack Tang Zhen. Its branches shot over like arrows.

"You still dare to struggle?"

Tang Zhen raised his hand. A cluster of white flames rose from his hand, appearing completely unremarkable.

But in the next moment, the ball of fire shot out and landed on a strange tree nearby.

The strange tree was hit by the fireball and immediately became an even bigger fireball. It screamed and turned into ashes.

"If you don't behave yourself, this will be your end!"

Tang Zhen coldly said. The strange tree seemed to understand Tang Zhen's meaning as it was so frightened that its trunk kept trembling.

Indistinctly, a faint trace of spiritual energy was transmitted over, containing fear and submission.

Tang Zhen had already seen that these strange trees were definitely not real plants. Instead, they were a special type of sea monster.

In this strange sea, there were very few plants. Even if there were, the monsters would have already destroyed them.

However, in the boundless ocean of the divine Kingdom, there were indeed plants, and they were very powerful plants.

Tang Zhen had once heard someone mention that there were strong believers who had encountered giant underwater vines that were ten thousand meters long in the deep sea.

Giant fruits with a diameter of nearly 100 meters grew on these giant vines. Occasionally, ripe fruits would fall off and float to the sea.

The fruit would float on the surface of the sea for a period of time. After being exposed to the wind and sun, it would automatically explode and the seeds inside would be scattered into the ocean.

The density of the seed was extremely high and it would sink into the water very quickly. The monster could not bite through it at all.

It wouldn't take long for new giant vines to appear and slowly grow into behemoths.

Like sea monsters, they were parasites of the God's kingdom, but there was no reward for killing them.

As for the remaining fruit shells, they were the best natural ships. With a little modification, they could carry many strong believers.

In the deep sea, many believers and powerhouses used this kind of giant fruit shell as their means of transportation.

It looked unremarkable, but it didn't rot for thousands of years, far better than ordinary wooden ships.

As for the skeletal warship that Tang Zhen had seen before, he would only be able to encounter it by chance. Although its defensive power was stronger, it would require more time to modify.

In addition to these giant undersea vines, there were also plants similar to man-eating flowers in some waters. Once a sea monster passed by, it would automatically prey on it.

These plants had the means to fight against sea monsters. Otherwise, they would not have been able to survive in an environment where monsters were rampant.

Seeing that the strange tree had already submitted, Tang Zhen did not waste any more time and directly jumped to the top of the strange tree.

run forward with all your might. If you dare to slack off, I'll burn you down!

Tang Zhen's mental energy swept across the strange tree and transmitted his thoughts over. The strange tree immediately understood Tang Zhen's intention and rushed forward like a mad man.

Chapter 2133 unknown land (1)

Under Tang Zhen's control, the strange tree passed through the sea of fire without suffering any damage.

This white flame was originally released by Tang Zhen and was completely controlled by his thoughts. How could it harm its creator?

The strange tree, which was originally extremely afraid of the flames, had also let go of its courage and continued to run forward.

It was very clear in its heart that if it didn't satisfy Tang Zhen, then its end would be the same as its companion, being burned to ashes by the raging flames.

As it sensed Tang Zhen standing above its head, the thing that the strange tree was most worried about was whether Tang Zhen would let it off in the end.

After running for an unknown distance in one breath, the strange tree finally realized that it had already rushed out of the sea of fire's area just as it was completely exhausted.

The sea water had disappeared and was replaced by bloody soil. The ground had also become much stronger.

When he stepped on it, he didn't feel like he would sink in at any time. Occasionally, he could see scattered bones and rubbish.

The strange trees that had been everywhere before had now disappeared and were replaced by plants that looked like weeds.

On the wide leaves, there were many fruits that looked like tumors. They were very luxuriant.

In such an environment, it was extremely difficult for the strange tree to move forward, and it had already lost its function as a means of transportation.

"I'll spare your life, hurry up and get lost!"

Tang Zhen jumped down from the strange tree. After sizing up his surroundings, he spoke in a faint tone.

After the strange tree heard Tang Zhen's words, it turned around and fled without the slightest hesitation. It was afraid that Tang Zhen would change his mind the next moment and turn it into charred ash.

Tang Zhen ignored the strange tree that was fleeing. He seriously sized up the land in front of him. His eyes carried a trace of surprise.

Previously, he had guessed that there might be land in the depths of the ocean, but he didn't expect it to be true.

It seemed that the sea monster was only one of the threats to the God nation. Perhaps there were even greater dangers hidden on this mysterious land.

Tang Zhen's expression was a little grave. What he cared about was how many battle achievements he could obtain. As long as he did not destroy his divine Kingdom, it did not matter to him how much those monsters tormented him.

However, the problem now was that the demonic plane's master might have already colluded with these guys.

The enmity between him and the demon ruler was irreconcilable. If there was a chance, the other party would definitely think of ways to take revenge.

The culprit who had previously set up a trap and tried to get the sea monster to kill him was probably related to the demon controller.

Tang Zhen, who thought of this, immediately changed his clothes. At the same time, he wore a black mask.

His original aura had been concealed. Judging from his appearance, no one knew Tang Zhen's true identity.

Before he found the devil Master, Tang Zhen would not expose his whereabouts too much to avoid alerting the enemy.

After walking for a period of time, Tang Zhen saw some footprints. Moreover, it was a creature wearing shoes.

This situation was within Tang Zhen's expectations. There were definitely living beings on the land, and their strength should not be weak.

These footprints stopped around the plants, probably to collect fruits. However, judging from the distance of the footprints, it seemed that the gatherer was not too close.

Perhaps these plants were the same as the strange trees, having some kind of attack that made the gatherers careful.

He walked to a nearby plant. When Tang Zhen tried to approach it, the plant suddenly trembled and sprayed out acid.

"As expected."

A mere acidic liquid couldn't hurt Tang Zhen. He stretched out his hand and gently grabbed the plant, pulling it up along with its roots.

The tumor-like fruit fell into Tang Zhen's hand. With a gentle pinch, it shattered, revealing a dead blood-like juice that had a fishy smell.

"It contains a faint amount of energy. Although it's not a lot, it can be used to replenish the energy consumed in battle if it's refined."

If there was a suitable formula, he could also refine medicine and pills, and the recovery effect would be even better.

If that's the case, it means that the creatures on this land are definitely not sea monsters without brains."

Tang Zhen casually threw away the fruit in his hand. He looked at the land in front of him and continued to walk forward.

This time, after walking for about two hours, he saw a figure in front of him, resting around the skeleton of a giant beast.

There were bamboo baskets beside them, which contained the tumor-like plants and fruits. It seemed that they had collected a lot.

At this moment, those people were crushing the fruit, extracting the juice of the fruit, and collecting it in something like a water bag.

They squeezed the fruit very seriously, almost squeezing out the last bit of water in the fruit. Obviously, this kind of fruit was not easy to collect, and these people did not want to waste it.

Some were squeezing juice, while others were doing other things. They were holding tools in their hands and surrounding the giant beast skeleton.

The giant beast had been dead for an unknown period of time, and its bone armor had long been broken. These people used tools to continuously chop at it, making a Dong Dong sound.

From the looks of it, they had been hacking for a long time. However, the giant beast's bone armor was as hard as steel, and these people had only dug a small hole so far.

After seeing Tang Zhen, these people sized him up with vigilant eyes. Soon after, they began to get busy.

This beach wasn't private property, and it was common to see solo gatherers. These people were generally capable, and few people dared to provoke them.

Although they would not take the initiative to provoke him, the other party still maintained their vigilance. If Tang Zhen harbored ill intentions, they would not be afraid since they had the advantage in numbers.

At this moment, Tang Zhen had already walked over.

"This brother, what advice do you have?"

A brawny man stood up, cupped his hands towards Tang Zhen and asked in a hoarse voice.

After seeing the other party's hand gesture, Tang Zhen felt that it was somewhat familiar. It was as if he had seen it somewhere before.

"I'm just passing by. I'll rest for a while and leave. I won't disturb you."

Tang Zhen revealed his identity and indicated that he had no ill intentions.

"This isn't our place, you can rest as much as you want."

After the man finished speaking, he returned to the beast bone and continued to swing his axe-like thing.

It didn't take long for him to be so exhausted that he was sweating profusely.

"Did you chop this beast bone for the bone marrow?"

Tang Zhen watched for a moment by the side before asking the man who was resting.

"That's right. The Alchemist in the city wants the bone marrow oil of sea beasts. The price they offered isn't low.

If I can get a few catties of bone marrow oil, I'll make a lot more money than these meat tumor fruits!"

The brawny man turned to look at the tree-like beast bone behind him with a dejected expression.

"It's just that this beast bone is really too hard. I'm afraid that it will take a long time to break it."

Tang Zhen nodded. He walked in front of the beast bone and suddenly swung his fist.

"Be careful not to get hurt. The bones of these sea beasts are comparable to steel Pixiu."

The brawny man quickly reminded him, but he suddenly shut his mouth halfway through his words.

This was because the beast bone that was incomparably hard in his eyes had already been smashed by Tang Zhen. Golden colored sea beast bone marrow oil was currently flowing out, emitting a faint fishy smell.

"Is it hard? why don't I feel it?"

Tang Zhen smiled as he turned his head and asked the strong man.

The brawny man and the others looked at the crack on the sea beast's bone. Then, they looked at Tang Zhen's completely undamaged fist. They could not help but swallow their saliva.

This traveler in front of me has extraordinary strength, ah?

Chapter 2134 The martial arts continent (1)

big brother, how did you do it? can you teach me? I can give you all the fruits I pick!

While the brawny man was still in a daze, a young man beside him suddenly spoke up in an excited tone.

There was also a trace of worship in the eyes that he used to look at Tang Zhen.

The bones of sea beasts were extremely hard and difficult to obtain. Otherwise, the recycling price would not be so high.

If he had Tang Zhen's methods, he would be able to find the remains of sea monsters and obtain more bone marrow oil.

If that was the case, it wouldn't take long for him to make a huge profit.

At that time, he could find someone to matchmake and marry the girl he saw the last time he was picking herbs, Yingluo.

Just as he was fantasizing, the strong man next to him slapped him on the head, causing the young man to grimace in pain.

“Why are you hitting me?”

The young man was depressed. When he turned to look at the strong man, he found that his expression was very serious.

“Get lost, you have no right to speak here.”

As the burly man spoke, he kept winking at the young man, signaling him to quickly step aside.

At the same time, he was cursing in his heart. This damn idiot, he simply doesn't have any brains.

Tang Zhen's punch piercing through the sea beast bone armor was sufficient to prove his strength. Brat, you want to take advantage of me? aren't you afraid that my fist will land on your head?

Everyone in the village said that this kid's brain wasn't very bright, and now it seemed that it was true. He really didn't know what was good for him.

An old man at the side immediately stepped forward, pulled the young man's arm, and took a few steps back. At the same time, he constantly smiled apologetically at Tang Zhen.

At first, the young man was unwilling, but when the old man saw this, he quickly whispered a few words in his ear. Similarly, he had an expression of wanting to strangle him.

The young man was stunned. He seemed to have realized something and retreated to the side.

However, from his expression, it was obvious that he was extremely unwilling. From time to time, he would secretly raise his head and look at Tang Zhen. His eyes contained a trace of desire.

Tang Zhen softly laughed when he saw this. He felt a trace of admiration for this young man's lack of impulsive actions.

This seemingly ignorant and impetuous young man might really be able to obtain some good fortune if he was lucky enough.

“The child is insensible, please don't mind him.”

The brawny man once again cupped his hands and bowed to Tang Zhen. Compared to the attitude he had when they first met, he was much more polite now.

Tang Zhen's punch earlier had already proven his strength, causing the burly man to not dare to underestimate him.

Even though he didn't have such strength, he had basic knowledge and insight. He knew that Tang Zhen was definitely not an ordinary person.

“Hurry up and put this thing away. If it continues to drip, it will be a waste in the end.”

Tang Zhen pointed at the broken sea beast bone and said to the strong man. His face still carried a smile.

“You mean, you’re giving us the bone marrow oil?”

The brawny man was stunned at first, but he didn’t even thank him. Instead, he took out the container of the giant conch from the basket and put away all the bone marrow oil that was flowing out.

“Hurry up, don’t spill it.”

The burly man and the others moved very carefully, afraid of spilling even half a drop. Seeing some bone marrow oil on the ground, they muttered in distress.

After half a day of hard work, everyone had collected all the remaining bone marrow oil in the sea beast’s bones. There was not a single trace left.

At this moment, their faces were filled with joy.

“If I sell this bone marrow oil, I should be able to get quite a bit of money. I’ll be able to get more food then.”

The group of people discussed in low voices. They looked at the container full of bone marrow oil as if they were looking at a can of money.

The brawny man grabbed the container and lifted it up with both hands before delivering it to Tang Zhen

“Your Excellency, these are all yours. Please accept them.”

When the people around him saw this, their faces were filled with anxiety and unwillingness, but no one spoke in the end.

If it wasn’t for Tang Zhen’s punch that pierced through the sea beast’s bones, even if they wanted to obtain this bone marrow oil, they would need to spend a large amount of time to do so.

However, it was not safe here. Every night, sea monsters would appear to take people’s lives, so they did not dare to stay for too long.

He could only come during the day and leave at night, slowly digging through the sea beast’s bones.

During the entire process, not only would they waste a lot of time, but they would also have to bear the corresponding risks. If there was no bone marrow oil in the bones of the sea beasts, it would be inevitable that they would have worked in vain.

Tang Zhen smiled and shook his head when he saw this.

“I’ve already said before that I don’t want these things. You guys can keep them.

I’m new here, so I don’t know much about the situation here. Why don’t you introduce it to me?”

The brawny man repeatedly expressed his thanks when he heard this. With Tang Zhen’s strength, he really did not care about these things.

Since it was given to him, he had to accept it obediently. Otherwise, it would seem like he didn't know how to appreciate favors.

After inviting Tang Zhen to sit down, the burly man thought for a moment and slowly began to explain.

It turned out that they came from a nearby village. There were dozens of families living in the village, and they made a living by collecting all kinds of medicinal herbs.

There was a large city about 40 miles away from their village. There were countless residents and many martial artists in the city.

The herbs that the brawny man and the others collected would all be sold in the city and exchanged for the necessary living supplies.

It was said that there were other cities even further away, and each city had a powerful martial artist.

While the brawny man was introducing, he also secretly sized up Tang Zhen and pondered over his specific background.

Tang Zhen had just punched through the sea beast's bone and displayed extraordinary strength. This caused the strong man to subconsciously treat him as a martial artist.

It was for this reason that the brawny man's attitude became very respectful, and he almost answered all questions.

In his impression, martial artists were all very powerful and should not be easily provoked.

Otherwise, once he infuriated Tang Zhen, they would not be his match even if they had the advantage in numbers.

Tang Zhen could not help but frown slightly when he heard the introduction of the strong man. The situation of this piece of land was somewhat different from what he had imagined.

the martial arts powerhouses you mentioned, are they the same race as you, or are they other races? "

The brawny man thought for a moment and said in a certain tone, " there are Warriors from other races, and there are also people from the same race as us. It's just that in those big cities, no one would care about these things.

Tang Zhen thought for a moment before asking the burly man, "Then, will the Warriors in these cities go out to sea to hunt sea monsters?"

The brawny man shook his head. the area near the ocean is full of monsters. No one dares to approach it easily. Otherwise, there's an 80 to 90 percent chance that they'll die there.

Moreover, the experts in the city had ordered that they were not allowed to approach the sea. Once caught, they would be severely punished.

We also secretly came here to pick herbs, but because we were not too close to the sea, no one paid attention to us."

The doubt in Tang Zhen's heart grew even stronger when he heard the burly man's explanation. If this was the case, did it mean that the sea monsters had no relationship with the martial artists on land?

The information that he had collected so far was too little and he couldn't easily come to a conclusion. Tang Zhen was prepared to take a look at the city that the brawny man had mentioned. Perhaps he would be able to find the answer he wanted.

Tang Zhen did not waste any more time when he thought of this. After asking for the specific route, he continued to move forward.

The burly man looked at Tang Zhen's back. He frowned and thought for a moment before gently shaking his head.

He faintly suspected that Tang Zhen might have come from the other side of the ocean. Otherwise, he would not have raised those questions earlier.

The elders in the village had seen such a strong person before. At the same time, they had repeatedly warned them not to provoke him if they met him.

However, such a person was very powerful and could easily destroy their village.

Chapter 2135 The megachaAfter leaving the beach, Tang Zhen continued to move forward.

Tang Zhen had naturally noticed the doubt in that strong man's eyes. However, since the other party did not do anything, Tang Zhen could not be bothered with him.

They were just some minor characters, and they didn't want to cause any trouble. When they encountered such a thing, they would avoid it like the plague, so how could they cause more trouble?

However, the information obtained from the brawny man also made Tang Zhen more and more certain that there was something unusual about this piece of land.

And what was the connection between it and the land where the believers lived?

After advancing for a period of time, Tang Zhen saw the ruins of the city wall. It spread out in the wild grass for an extremely long distance.

From the looks of it, the city wall had long lost its original function, which was why it had not been repaired.

"Perhaps the sea monster's target is only the Grand temple where the native gods are sleeping, and it doesn't care about other places.

If the sea monsters don't attack, there's no point in the city walls, so it's normal for them to be abandoned."

Perhaps a long time ago, there had been believers here, and the people living here were the descendants of the believers.

It was not impossible, but the probability was quite high. After all, ninety-nine percent of the outsiders in the divine Kingdom were believers who had been summoned.

After stopping at the city wall for a moment, Tang Zhen continued to advance.

The surrounding scenery began to return to normal. The grass, trees, birds, insects, and fish were no different from the outside world.

The free energy of heaven and earth in the air was also more abundant than that of the believer's continent, but it was much less than that of the ocean.

This kind of special environment could not cultivate powerful cultivators, but it was more than enough to support martial artists.

No wonder the brawny man said that the city was controlled by Warriors. It was obviously created by a special environment. Rather than being limited by the poor earth and heaven energy, it was better to find a new path.

The sky here was also very special. Starting from the position of the city wall, it seemed to be divided into two areas.

The light outside the city wall was extremely gloomy, but it was much more normal inside the city wall. Under the sunlight, the oppressive feeling that made people collapse disappeared.

A few streaks of light that streaked across the horizon slowly wriggled in the sky, looking very gorgeous.

He could vaguely see the twinkling stars, but they were extremely far away.

Behind this beautiful scene, there was a terrifying truth.

They were actually scenes that appeared after the space barrier was torn apart and could not be restored. The sun and stars were the starry sky outside the divine Kingdom.

The cracks near the demonic plane could not be compared to this. The former could only be considered a human scratch, but the latter was fatal.

Because of the tear in space, powerful cultivators might be able to easily enter the divine Kingdom.

I wonder if I'll still lose my memories under the influence of the world's rules if I enter the divine Kingdom from here? "

Tang Zhen felt that he should explore it carefully. If there weren't such disadvantages, the cultivators of loucheng could use positioning methods to enter the God Kingdom through these cracks.

It would be much easier to launch an attack on the divine Kingdom, and he could do it at any time.

Thinking of this, he looked up at the sky again and found something unusual.

The so-called sun was more like a huge star in Tang Zhen's eyes. It projected its light from the crack to the earth.

The alternation of day and night should be a special phenomenon caused by the self-healing of the cracks in the stronghold.

Under Tang Zhen's observation, lightning flickered at the edge of those cracks. They had been trying their best to close up.

The moment the crack closed, it would be the time for night to fall, blocking the sun's rays from the starry sky.

However, this kind of repair was in vain. It wouldn't take long for the terrifying power from the void to tear it apart again.

Day would come again, and light would shine on the earth.

This situation repeated itself, but it was not stable. There was no telling when changes would happen.

The residents living here must have been worried about the sky.

Tang Zhen retracted his gaze. He passed through the wild grass in front and arrived at a small path that had been trampled out.

Not long after following the small path, a large road appeared in front of them. It was paved with gravel, and the road surface had been rolled and tamped.

From time to time, there were pedestrians passing by. Looking at the direction they were heading, it should be the big city that the burly man had mentioned.

There were some men and women who were dressed like martial artists among the pedestrians. They subconsciously sized Tang Zhen up after seeing him.

Tang Zhen's attire was slightly different from theirs. Moreover, his aura was not simple.

Tang Zhen also ignored the gazes of these martial artists. He only buried his head and moved forward. His speed was extremely fast. It did not take long before he had already disappeared from everyone's vision.

A journey of over forty li was nothing to Tang Zhen. It did not take long for a magnificent giant city to appear in front of him.

The city wall was about 20 meters tall and over 10000 meters long. It was no exaggeration to call it a giant city.

An area of several hundred square kilometers was enough to accommodate millions of residents. However, he did not know how many martial artists were there and what cultivation level the leader of the giant city was at.

There were many people gathered at the city gate. They were all lining up to enter the city, and two rows of fully armed martial artists were lined up on both sides.

Fully armed soldiers stood on the city wall. In addition, there were also city defense weapons similar to ballistae, but they looked a little old, perhaps not used for a long time.

The soldiers stood in front of the battlements with crossbows in their hands. They were sizing up the crowd below with cold eyes.

Those who entered the city would be inspected and receive something similar to a certificate. At the same time, they would have to pay a certain amount of entrance fee.

Tang Zhen followed the group and slowly advanced. It didn't take long before the soldier in charge of inspection arrived before him.

Upon seeing Tang Zhen carrying a battle blade and his face being covered, the other party's eyes revealed a trace of wariness.

"Where are you from, and what are you doing in the city?"

The soldier asked with a slightly doubtful tone. At the same time, he took two steps back and maintained a certain distance from Tang Zhen.

is it not allowed to enter the city to buy medicine? "

Tang Zhen looked at that soldier and asked in a faint tone.

you can enter the city, but remember not to cause any trouble. Otherwise, bear the consequences!

That soldier did not pester him too much. He only warned Tang Zhen before extending his hand.

"The fee for foreign martial artists to enter the city is ten times higher. If they don't leave the city before dark, the fee will be automatically accumulated and will be paid when they leave the city.

However, if you become a martial artist of this city, all the expenses will be waived, and you can also receive welfare subsidies regularly.

If you want to join, there's a registration place in the city, and someone will be in charge of receiving you at any time."

That soldier was still speaking coldly earlier. However, in the blink of an eye, he had put up a wave of advertisements, causing Tang Zhen to be somewhat caught off guard.

From the looks of these soldiers, they did not seem to be friendly to foreign martial artists. However, if they were martial artists from the city, their attitude would be completely different.

At this time, two martial artists had already arrived at the city gate. They showed their waist tokens, and the soldiers didn't even check them before letting them in.

There must be some reason for such a situation to occur. However, Tang Zhen was too lazy to care about it.

He conjured a few coins and handed them to the soldiers. After which, Tang Zhen followed the stream of people and slowly entered the city.

As soon as they entered the city, they were greeted by the smell of the stock market. The dense pedestrians and the shops on both sides of the road showed that the city was very prosperous.

Tang Zhen had a feeling that he was not within the divine Kingdom. Instead, he had arrived in the outside world.

Although it was only a sea away, the seemingly omnipotent grand temple did not affect this place at all.

After walking two rounds around the street, Tang Zhen stopped at the entrance of a pub by the roadside. He looked at the martial artists that were continuously entering and leaving and also walked in.

#### Chapter 2136 City of martial artists (1)

The tavern wasn't small, with a total of five floors. It was considered an extremely tall building nearby.

For such a city, due to military needs, it was not allowed to have buildings that were too tall, and the owner must be someone extraordinary.

The hall was very clean and could even be said to be spotless. The floor was paved with turquoise-like tiles.

Although there were many guests coming and going, it didn't seem crowded at all and seemed to be in an orderly manner.

There were private rooms inside the hall. According to the size of the building and the number of people, it should be quite lively.

However, when the martial artists gathered together and talked to each other, no sound came out.

It turned out that there were many strange plants around their private room, which had the effect of absorbing sound.

As long as one took a step further, the sound would become inaudible, which made the entire Hall very quiet.

The manager of the tavern was also very creative. He used flowers, grass, mountains, and stones to create partitions. At the same time, there were small bridges and cloisters, making people feel as if they were in a Fairyland.

If he didn't walk around, he wouldn't know how many people there were, which would ensure the privacy.

After Tang Zhen entered the door, a waiter led him to his seat and quickly served tea and snacks.

"I wonder what kind of food Your Excellency would like to eat. Do you need me to introduce it to you?"

The waiter leading Tang Zhen had a smile on his face. He was handsome and clean, his voice was clear, and his speech and actions were very intimate.

"I'm from another city, so I don't know much about the situation here. Can you tell me more about it?"

The people in these teahouses and restaurants had sharp ears and eyes, and they were in contact with a lot of information. He might be able to get useful information from them.

"I will tell you everything I know. However, I can't guarantee the accuracy of these rumors."

The waiter smiled as he explained. At the same time, he passed the menu over and indicated for Tang Zhen to take a look.

Tang Zhen smiled. He took out the materialized coins from his pocket. It was the kind with the largest denomination.

just take a few of them. I'll reward the rest to you. Go and come back quickly.

The attendant was stunned for a moment. However, he simply kept the money and smiled as he asked Tang Zhen to wait for a moment.

As soon as he finished speaking, he had already turned around and left.

Tang Zhen released his mental energy and covered the nearby private rooms. He wanted to hear what those martial artists were talking about.

Although there were sound absorbing plants in the vicinity of the private room, even the slightest noise could not escape Tang Zhen's perception.

Just as Tang Zhen was listening with great interest, the attendant from earlier had already returned. He was carrying a pile of exquisite plates.

This attendant clearly had the foundation of a martial artist. Although he was not very strong, he was comparable to a level one cultivator.

In fact, even cultivators had to wait until they reached level six before they could mobilize the power of heaven and earth. Although they could use some means before level six, they were not invincible when facing martial artists.

Even the cultivators of loucheng could only become a true expert after reaching the Lord Rank.

Tang Zhen had never seen the means of the martial artists in this city, but he could guess it pretty well. This was because there were many pure martial artist dimensions in the world War in loucheng.

These top experts in the world of martial artists also had the power to shatter the void and were comparable to King level cultivators.

It was very strong, but there was a limit.

If the martial artists in the city were the same, then no matter how many of them there were, they would not be able to pose much of a threat to Tang Zhen.

The problem was that this place was connected to the divine Kingdom. Perhaps the city Lords of those giant cities were strong believers who came from across the sea like Tang Zhen.

They couldn't absorb too much energy of heaven and earth, but they could exchange their battle merits with the temple, which could also improve their cultivation to an extremely high realm.

Tang Zhen would not lower his guard against these believers. Who knew if there was an expert with a strength similar to his hidden among them?

While he was pondering, the waiter had already placed the dishes on the table and stood to the side with a smile.

"Sir, what do you want to know? I'll tell you slowly now."

Perhaps it was due to Tang Zhen's generous reward, the attendant became more and more enthusiastic, hoping to get more benefits.

Earlier, Tang Zhen had already noticed that there was an attendant standing beside each table of guests. They were ready to provide service at any time.

Otherwise, in an environment with a bunch of sound-absorbing plants, no one would hear him even if he shouted until his throat was sore.

In fact, he didn't need a waiter to serve him. He could just ring the bell when he needed it. This way, he could also prevent his private matters from being overheard by outsiders.

I'm a martial artist, so I naturally want to know more about martial artists. The more explosive the news, the better.

Tang Zhen tasted the food and wine before turning his head to look at the waiter. He softly asked, "I see that the environment here is not bad. All the taverns in the city are like this, are you the only one?"

When the waiter heard this, he immediately showed a hint of pride on his face, but he still said in a polite tone, "I won't hide it from Your Excellency. In the entire windthunder city, only our place has such an environment.

Only we have such service here. The environment is good, the chef is good, and you will be satisfied.

You may not know this, but our boss is the second son of the city Lord. Otherwise, how could ordinary people have the ability to get these precious plants for decoration?

Don't look at how all the people coming in and out of this place are martial artists, no one dares to cause trouble here. It's not an exaggeration to say that this is the safest place in windthunder city."

Tang Zhen nodded. He did not doubt this point.

The disobedient Warriors all behaved themselves after entering the shop, which was enough to prove this point.

Without any background, he couldn't afford to open this restaurant.

to control such a large city, the strength of the city Lord of wind Thunder City should be quite extraordinary, right? "

The waiter glanced at Tang Zhen when he heard this. He smiled and replied, "Of course, our city Lord is an Emperor level expert, and his strength is obvious to all.

There were also twenty-eight Battle Kings in the city, and they were all very powerful. They took turns to guard the city gate, so that the enemies would not dare to provoke them.

In addition to these powerhouses, there was also an Army of martial artists in the city. There were no less than 100000 people in total, and they could be assembled to fight at any time.

It was said that there was a patriarch in the city who was even stronger than the city Lord. However, the old man had been in seclusion for many years and had not appeared for a long time.

However, back then, hundreds of experts from overseas had invaded and wanted to take control of windthunder city. They were extremely arrogant.

In the end, the great ancestor who was cultivating in seclusion took action and killed 75 overseas experts in one battle. The remaining enemies were all scared away.

It was after that great battle that our windthunder city's name was spread far and wide, and no one dared to provoke us anymore."

The attendant was beaming with joy, as if he was the one who had killed the overseas powerhouse in the past.

Tang Zhen's expression did not change as he listened to the attendant's explanation. However, he was secretly thinking in his heart.

The overseas powerhouse that the attendant mentioned was likely to be the believers who came from across the sea. After they came here, they wanted to seize the city Lord's position, but they were killed and returned in defeat.

From this, it could be seen that the believers and these martial artists should be in a hostile state. As for how serious it was, it would depend on the situation.

"What's a foreign martial artist? is there a tense relationship between you and the foreign martial artists?"

The waiter thought for a moment and said with an uncertain tone, " "They can't be considered enemies, but they can't be considered friendly either. In fact, the enemies that battle-Kings defend against are those martial artists from overseas.

However, as far as I know, foreign martial artists often appear in the city. It's just that ordinary people don't know about it.

Those who can come into contact with the Warriors from overseas are all great figures at the city Lord and Combat King level. Ordinary people have no chance of coming into contact with them."

These words should be true. After all, the strong believers who could travel across the sea all had quite extraordinary strength, so they would not care about these ordinary people.

At this moment, Tang Zhen had already confirmed that the strong believers and these martial artists had come into contact long ago. It was just that very few people on the believer continent knew about it.

What he was most interested in now was whether there were any unspeakable deals between the strong believers and the Warriors.

Chapter 2137 Luring the snake out of its hole (1)

Tang Zhen asked a few more questions before letting the attendant leave.

The other party was just an ordinary person. Even if he knew more information, there was still a limit.

The only ones who truly knew the secret were the martial experts in the city. If Tang Zhen wanted to know more information, he would still have to find them and ask them.

However, his mind power was still locked on the waiter. He wanted to see what this guy would do after he left.

The waiter was very smart. He was arranged to receive martial artists here, so his duty was certainly not limited to his own job.

Collecting information was also one of his jobs. Customers asked him for information, but he was also observing the passing customers.

During the conversation earlier, Tang Zhen had deliberately revealed a lot of information. As long as this attendant wasn't stupid, he should be able to guess his background.

Since this restaurant had a certain relationship with the city Lord, would the waiter, who had confirmed Tang Zhen's suspicious identity, report this matter?

After observing for a while, Tang Zhen shook his head.

Just as he had expected, after the waiter left, he did not return to the door to receive the guests. Instead, he turned around and headed to the top floor of the restaurant.

Guests were not allowed to enter this place. It was the private area of the restaurant owner.

There were four strong martial artists here. They were equivalent to Lord cultivators. Tang Zhen had already discovered them when he used his mental energy to scan.

It was likely that those four martial artists had yet to realize that they had already been exposed long ago. They were completely unaware of Tang Zhen's spiritual force scan.

As for their mission, it should be to guard the restaurant to prevent any accidents from happening. If they encountered an unexpected situation, they could act in time.

The attendant walked to the room where the four Warriors were, knocked on the door, and walked in. Then, he began to talk to them in a low voice.

As for the content of the conversation, there was no need to listen.

It was good that he was being targeted. The other party had taken the initiative to come to his door, saving him the trouble of looking for him.

Tang Zhen stood up and left after waiting for a while. He slowly walked along the street.

The moment he stepped out of the door, he felt a few gazes on him, but they disappeared in the blink of an eye.

The other party did not dare to stare at him for too long in case Tang Zhen sensed something and exposed his existence.

he's cautious enough, but he's too weak. It's useless no matter how cautious he is.

A few figures quietly followed behind. They were good at tracking and could effectively hide themselves with the help of buildings and people.

Unfortunately, no matter how brilliant his tracking technique was, it appeared extremely clumsy in Tang Zhen's eyes. Each and every action of the other party was unable to hide from his gratitude.

After walking for a distance, Tang Zhen entered the street and the few pursuers quickly followed.

In the end, after entering the street, they discovered that Tang Zhen had already disappeared. There was no one in the empty street.

The four martial artists' expressions changed slightly. They hurriedly searched carefully, but they found nothing.

"Damn it, did that guy discover us?"

One of the pursuers looked around with a gloomy gaze and said in a hesitant tone.

It's very possible, but this is our territory. He can't have run far.

The other pursuer replied. At the same time, he unsheathed the long and thin sword from his waist, afraid that Tang Zhen would suddenly launch a sneak attack.

The strong believers were all lunatics, and they had to be careful, or they could easily fail.

"Who is this guy? Are they Warriors sent by other cities or believers who have just crossed the sea?"

"It must be a believer who has just crossed the sea, and the kind who doesn't know anything about us. Otherwise, he wouldn't have asked those questions.

However, the more this was the case, the more careful he had to be. Those guys didn't know the severity of the situation and were a group of brainwashed idiots.

Do you still remember that guy in the dungeon who kept saying that we were traitors and that he was going to gather believers to form an Army to fight us?"

At this point, the pursuer showed a disdainful look and said in a mocking tone, "The Grand temple can't even protect itself now. The attacks of the sea monsters are getting fiercer and fiercer, and maybe one day they will enter the hinterlands.

once the evil god was killed, the divine Kingdom might unknown even exist.

Even if the sea monsters could not break in, it would not be easy for the believers to cross the sea.

Those sea monsters are in a cooperative relationship with us, so they definitely won't allow the Army of believers to cross the sea.

Therefore, we only need to keep a close eye on these believers who came from across the sea. We don't need to pay attention to anything else. I believe that the city Lord has his own arrangements."

While the two pursuers were conversing through voice transmissions, there were two more pursuers at the entrance of the alley behind them. At this moment, they were still searching for Tang Zhen's traces.

Their faces were filled with doubt.

“Something’s not right. If that guy escaped, it’s impossible for him to leave no traces behind.

Unless the other party’s strength far exceeds ours, he can’t escape or hide in a flash without us noticing.

If that was the case, he had to be careful.

Perhaps the enemy’s level has far surpassed ours. For safety reasons, we must ask the battle King and the city Lord to help.

Otherwise, if such a dangerous guy was allowed to stay in the city, who knew what kind of changes would happen?

If this guy is a complete fanatic, he might cause an even greater crisis. We must not take him lightly.”

Hearing his companion’s analysis, the other martial artist nodded slightly with a hint of fear on his face.

Many of the fanatical believers across the sea were lunatics. They viewed martial artists as enemies, traitors of the divine Kingdom.

As long as these extreme guys found an opportunity, they would deliberately destroy the city. They had created more than one tragedy, causing a large number of casualties among martial artists and ordinary people.

It was also for this reason that Warriors hated believers. Once they found traces of strange believers, they would keep a close eye on them.

If necessary, the battle-Kings in the city, and even the mayor, would personally take action to kill the dangerous believers.

“The other party is not weak, and this is the first time they have appeared.

Send someone back immediately and inform the city Lord of this matter. Tell him that an unknown strong believer has come ashore.

The enemy is currently in the city and has hidden himself. Ask him to send a battle-King to assist us!”

After saying this, the martial artist suddenly raised his hand, and a bamboo tube flew out of his sleeve.

From the bamboo tube, a strange creature that looked like a green snake but had wings suddenly rushed out.

After coming out of the bamboo tube, the strange creature rushed into the air like a bolt of lightning and headed straight for the city Lord’s mansion in the center of the city.

This was a feathered snake used by the martial artists in the city to transmit messages. It could imitate the words of its master and repeat them after being stimulated.

The feathered snakes were extremely fast. They only needed a short time to send the information to the designated target.

Suddenly, a large hand appeared and grabbed the Feathered Serpent that had just taken flight.

“Did you ask for my permission before sending a message?”

Chapter 2138 Go get reinforcements (1)

The hearts of the four martial artists from thunderwind city jumped when they saw Tang Zhen suddenly appear.

They had guessed that Tang Zhen might not have run far away. However, they did not expect that he was hiding right beside them and that they had not noticed him at all.

Previously, they had already predicted that Tang Zhen’s strength wasn’t weak. Now, they had already confirmed that he would be able to crush them.

“Fifth brother, quickly rush out and inform the city Lord. We’ll delay him!”

The leader of the pursuers shouted loudly. He directly pulled out the sea beast bone whip from his waist and lashed it at Tang Zhen.

They knew they were no match for him, but they still attacked. These martial artists did not lack courage.

The other two martial artists also did not hesitate. They waved the weapons they carried with them and sandwiched Tang Zhen in the middle of the alley.

When the martial artist called Lao Wu saw this, he gritted his teeth and turned around to rush out.

He guessed that his three companions were not Tang Zhen’s match, but he did not dare to hesitate. His first and foremost task was to spread the news of the appearance of a strong believer.

“Big brother, don’t worry. If you meet with misfortune, I’ll definitely ask the city Lord to help you take revenge!”

Old fifth’s heart was ruthless. As long as something happened to his brother, he would not rest until Tang Zhen was dead.

Who knew that just as this thought appeared in his mind, he heard three muffled groans behind him, followed by the sound of heavy objects falling to the ground.

“Damn it!”

Without even turning his head, the fifth brother already knew what had happened. Clearly, his three brothers had suffered a great loss in the first exchange.

Resisting the urge to turn around, old fifth continued to charge forward. He was only one step away from the alley.

Who knew that at this moment, an invisible barrier appeared in front of him and he was forcefully bounced back.

“Bastard!”

The fifth brother roared and punched the invisible barrier in front of him. However, he missed and staggered two steps forward, almost falling to the ground.

His expression changed. He felt embarrassed and angry in his heart. He knew that Tang Zhen was teasing him.

He steadied his body and moved forward again, but the invisible barrier reappeared and blocked his way.

The fifth brother was about to go crazy. He swung his fist fiercely, but this time, it was as if he had hit an iron plate. The skin and flesh on his fist instantly burst.

His bones were white and his blood was dripping. The pain was so deep that it almost seeped into his bones.

“Since I can’t escape, I’ll go all out. Even if I die, I’ll gnaw a piece of his flesh!”

A warrior could be killed but not humiliated. Since he couldn’t escape, he might as well die with his brothers.

But when he saw the scene behind him, he was suddenly stunned on the spot, not knowing what to do for a moment.

His three brothers were not killed by Tang Zhen. Instead, they were tied up with ropes and their mouths were filled with weeds.

At this moment, the three brothers were huddled together, constantly twisting and struggling, their faces filled with depression and helplessness.

They didn’t even manage to touch the corner of Tang Zhen’s clothes before they were tied up with ropes. Their mouths were filled with wild grass that reeked of urine. It was truly difficult for them to speak.

He was angry and anxious in his heart. He wished for Tang Zhen to give him a quick death so that he would not be so embarrassed.

Old fifth heaved a sigh of relief in his heart. Tang Zhen did not directly kill him. This proved that there was still room for redemption.

Taking a deep breath and forcefully suppressing the uneasiness in his heart, the fifth brother bowed to Tang Zhen.

“If you have any requests, please feel free to ask. Please do not harm my brother.”

There was no hope of calling the police. Right now, old fifth only wanted to save his brother’s life and then consider other things.

Of course, the biggest possibility was that all four of them would die Here. If that was the case, then the fifth brother would accept his fate.

Tang Zhen threw the trembling feathered snake into the arms of the fifth brother and said in a faint tone, “Inform your city Lord that I’ve invited him to meet me in this alley.

If the city Lord is here, you guys can leave. If he doesn't come, then I can only say sorry."

After hearing Tang Zhen's words, the fifth brother hesitated.

He had rushed out recklessly to inform the city Master that a powerful believer had appeared.

However, at this moment, Tang Zhen had taken the initiative to ask the city Lord to come. He was afraid that this was a trap. If the city Lord met with a mishap because of this, he, the fifth brother, would not be able to escape the blame even if he died ten thousand times.

Tang Zhen shook his head and gently waved his hand at his fifth brother when he saw the difficult expression on his face.

In the next moment, old fifth was like a kite with a broken string, flying out of the alley and crashing into a carriage that was carrying vegetables.

The carriage was smashed into pieces. Old fifth jumped up and rushed back with his body covered in rotten vegetables.

Who knew that just as he approached the entrance of the alley, the invisible barrier appeared again, bouncing old fifth back.

After trying a few times, the fifth brother stomped his feet in exasperation. Under the surprised gazes of a group of passersby, he ran towards the city Lord's mansion.

There were people on both sides of the road who were watching the show. They stared at the alley in front of them and kept craning their heads, trying to figure out what was going on.

Just as they were discussing among themselves, a series of hurried and heavy footsteps were heard. Then, a group of fully armed martial artists suddenly appeared at the end of the long Street.

When the bystanders saw this, they quickly dodged to the side, not daring to block the other party's path.

The residents of windthunder city who lived here for a long time all knew that they absolutely could not delay the actions of the martial Army. Otherwise, even if the other party directly pulled out a blade and killed them, there would definitely be no one who would stand up for them.

within 300 breaths, everyone is to retreat 2000 meters away. Anyone who approaches without permission will be killed immediately!

This voice resounded through the clouds. When the surrounding passers-by saw this, they immediately broke into a run.

As the strong believers had appeared more than once, there was often a lot of noise in the city, and the residents had long been accustomed to it.

If they encountered such a thing, it was best to run as far away as possible. Otherwise, once the battle started, God knew how large the scope would be.

If he was not careful, he could lose his life.

In the blink of an eye, the street was empty.

The ground was covered with fruits, vegetables, and leaves, as well as the shoes and coins that had been lost. However, no one cared about them at this moment.

The armored warriors guarded the exits. Some Warriors jumped onto the roof and nocked their bows.

If there was the slightest movement, there would be a rain of arrows.

Soon after, the sound of air being torn rang out again. Over a dozen figures appeared in the sky. They exchanged glances with each other before surrounding the alley where Tang Zhen was.

It's the combat King Warriors from the city! There are actually more than ten of them here! It seems like the enemy is not weak!

On a building in the distance, a group of martial artists was watching from the roof. When they saw the dozen figures in the air, they immediately exclaimed.

Battle-Kings weren't as common as cabbages. On this continent, they were definitely considered top-tier combat forces.

A situation where more than a dozen Battle Kings were mobilized was extremely rare in Wind Thunder City. It was obvious that the opponent was far stronger than a battle King. Otherwise, why would they go to such great lengths?

Just as the crowd outside was in a heated discussion, the atmosphere in the completely cleared blockade was terrifyingly quiet.

Looking down from the sky, one could clearly see the scene in the alley. Three martial artists were tied up and thrown on the ground. Tang Zhen, who was wearing a mask, stood with his hands behind his back.

Although he was surrounded, he stood quietly in the same place, as if he didn't care about those martial artists at all.

Right at this moment, several battle-Kings suddenly made their move. They charged straight toward Tang Zhen, who was in the passageway, and prepared to launch probing attacks.

A muffled sound rang out, and several battle-King martial artists flew out of the alley at a speed faster than they had charged down, directly smashing into the nearby buildings.

A rumbling sound could be heard, and the house collapsed. There was chaos.

Chapter 2139 Windthunder city's Castellan \_These battle-King Warriors had bodies as tough as iron, and ordinary impacts could not hurt them. However, those buildings were in great trouble.

By the time the rumbling stopped, dozens of buildings on the side of the road had been severely damaged, and the walls were full of shocking holes.

A few battle-King Warriors crawled out, all covered in dust and dirt, looking extremely embarrassed.

Although their faces and ears were red, their expressions were very solemn. Tang Zhen might have struck them until they flew out, but he did not use any heavy force.

Otherwise, they would have become corpses by now and would never have the chance to stand up again.

not good, the enemy is too strong! A few Battle Kings are no match for them!

The Warriors who were watching the battle from the side immediately cried out in surprise. The battle King, who was extremely powerful in their eyes, was so vulnerable.

Ordinary people couldn't see the exact situation, but they could hear the rumbling sounds. Some people began to worry about their assets.

I can't confirm his strength. Should I try again?"

A battle-King warrior said in a soft voice. At the same time, he looked at his companions around him, and his tone was a little hesitant.

It wasn't just the onlookers who were shocked. The battle-King warriors in the Sky who were responsible for holding the line also felt their hearts beating wildly.

Through the scene earlier, they could confirm that Tang Zhen's strength had already far exceeded their expectations.

Under such circumstances, they could no longer rely on their numbers to win. They could only try their best to stabilize the situation.

It should be known that the suppression of cultivation level was the most ruthless. Even if they attacked together, they might not be able to win.

don't probe anymore. City Lord, please make your move!

A few battle-Kings secretly transmitted their voices. Then, they contacted the city Lord of thunderwind city while thinking of ways to stabilize Tang Zhen.

If Tang Zhen wanted to escape, they could only risk their lives to stop him. They absolutely could not let him leave easily.

An enemy hiding in the dark was far more terrifying than an enemy on the surface. This was especially so for an expert like Tang Zhen.

As long as he wanted to, he could kill every single battle-King here. No one could escape from him.

seal off the surrounding space. Don't act rashly. We'll wait for the city Lord to come first!

There was a ranking system for the battle King Warriors in windthunder city. The battle king who was giving the orders was an old man who was ranked first.

He used a grave gaze to look at the alley and did not dare to be distracted in the slightest, afraid that Tang Zhen would suddenly attack.

What made him feel slightly relaxed was that after Tang Zhen sent several battle-King Warriors flying, he didn't continue to attack. Instead, he still stood with his hands behind his back.

As this thought flashed through their minds, the battle-Kings became even more careful, and cold sweat dripped from their foreheads.

When encountering such a strong person, one had to be fully focused and could not relax at all.

Just as they were on tenterhooks, a figure flashed across the sky and a man appeared in front of them.

"City Lord bi an"

A battle-King warrior was about to speak, but the man had already waved his hand, indicating that there was no need to say more.

"All of you retreat to the side. Let me handle this."

Ignoring the surrounding war Dragon martial artists, the man looked at Tang Zhen, who was standing with his hands behind his back, and seriously sized him up.

you look unfamiliar, Sir. Are you a strong believer who came from across the sea? "

Tang Zhen shook his head. In the next instant, he appeared in the air and was only a dozen meters away from the city Lord.

When the battle-King saw this, he subconsciously wanted to move closer to protect him, but he was ordered to retreat by the city Lord.

Suppressing the shock in his heart, wind Thunder City Master was on full alert as he asked again, "Don't joke around, Sir. You're not a warrior from my continent. If you're not a believer, what are you?"

"It doesn't matter where I come from. Besides, I don't have any intention of starting a war with you." Tang Zhen said with a smile.

To tell you the truth, I'm just passing by and wanted to listen in and take a rest."

The city Lord was startled when he heard that. He then laughed bitterly, "Your method of gathering information is very special. Aren't you afraid of returning empty-handed?"

"I didn't look for you directly because that might cause a bigger misunderstanding.

I've heard that there's an old ancestor in your wind Thunder City. If I were to suddenly visit, the old ancestor in your city would probably personally take action. At that time, the commotion would be even greater."

In fact, when he entered windthunder city, Tang Zhen had already faintly discovered that there was a loophole in the city Lord's mansion in the center of the city.

The so-called hole was actually a wound in the divine Kingdom. At every moment, there would be an endless stream of World Energy seeping out.

The sea monster Lair could use a special ability to devour the energy of heaven and earth that maintained the operation of the divine Kingdom like a vampire, and continue to multiply and become stronger.

The cultivators on this continent had also used similar methods to create a blessed land for cultivation.

The old ancestor of windthunder city should be sitting on this hole and using the heaven and earth energy that seeped out to improve his cultivation.

Perhaps the other cities on the continent had similar loopholes, which was why these martial Dao powerhouses built them around.

Although this matter was kept a secret, it could not be hidden from Tang Zhen's senses. However, the other party's strength was not weaker than his. Therefore, he did not rashly head to the city Lord's mansion.

Using a small shrimp to catch a big fish to lure the city Lord out was indeed an opportunity to ask him some things he wanted to know.

As for the other purpose, it was to draw out the hidden demonic plane's master and look for an opportunity to kill him.

Rather than passively allowing the other party to scheme against him in the dark, he might as well take the initiative to attack. As long as he gave Tang Zhen a chance, the demonic plane's master would die without a doubt!

The reason why Tang Zhen was so confident was that when he went out the last time, he had brought all the gold coins of destiny that he had accumulated in Holy Dragon City and the cracked territory.

With these destiny gold coins, he could completely trade with the scales of fate and Exchange for an equipment that could threaten the creator, and then wait for an opportunity to kill him.

After hearing Tang Zhen's words, wind Thunder City bamboo's heart was filled with depression. If it wasn't for the fact that he didn't have confidence, he would have immediately killed Tang Zhen.

In the past, the strong believers who had come into contact with them either regarded them as traitors of the divine Kingdom and would fight them without saying a word.

Some of them had selfish motives and secretly made deals with the city Lords, using the items exchanged from the Grand temple to exchange for what they wanted.

In fact, every city Lord on this continent had secretly communicated with the strong believers. This was already a half-open secret.

After all, there were only a few fanatical believers. When one's cultivation base reached a certain level, most of the believers would think for themselves.

However, it was the first time that the city Master had encountered such an incident.

Even though he was extremely furious, the city Master did not show it. Instead, he said softly, "It's not impossible for you to get information, but do you have to pay a price?"

There's no such thing as a free lunch in this world, and it's the same for my wind Thunder City. If you're not willing, then please leave quickly.

As for the matter of disturbing my city's residents, I can let bygones be bygones, what does your Excellency think?"

Since Tang Zhen had a request, the city Lord of windthunder city would not be polite. If Tang Zhen agreed, he would definitely extort a huge sum of money from him.

If Tang Zhen didn't agree and even wanted to use force, the wind Thunder City Master, who was confident that the old ancestor was there, might not be afraid of Tang Zhen.

Tang Zhen laughed softly when he heard this. What was the wind lightning city Lord planning? He naturally knew this in his heart.

However, if she wanted to take advantage of him, she would have to see if she had the ability to do so.

He was just a martial arts powerhouse, yet he was negotiating terms with the Lord of the battle zone in the world of loucheng. He really did not know what was good for him.

Chapter 2140 Exchange of blows (1)

The city Lord of windthunder city had already stated his conditions. How the situation would develop would be up to Tang Zhen's choice.

In fact, even if Tang Zhen agreed to pay the price, the other party might not tell Tang Zhen the information that he wanted to know as promised.

These guys were cunning and not as easy to talk to as they seemed on the surface. If they found an opportunity, they would probably swallow him whole.

At this moment, Tang Zhen was an uninvited evil guest in the eyes of the martial artists of wind Thunder City. Perhaps, they had already thought of killing him.

This was an inevitable result. When Tang Zhen took action to subdue the pursuers, it meant that the conflict would continue to intensify.

If he wanted to get accurate information, a fight was inevitable. He had to let the other party know that perfunctory means would not solve the problem.

At the same time, he wanted to see what kind of tricks these traitors of the divine Kingdom had.

Tang Zhen shook his head and sighed when he thought of this, I might not be able to pay the price you've given me. At the same time, I don't want to leave just like this. What do you think is a good idea?"

After hearing Tang Zhen's words, the corner of the eyes of the city Lord of windthunder city twitched, and his expression became extremely gloomy.

"Sir, do you really want to find trouble in my windthunder city?"

His tone was filled with anger and killing intent that couldn't be concealed. It was obvious that the city Lord didn't have much patience.

There were countless martial artists in windthunder city, and there were nearly thirty Combat King realm martial artists. At the same time, there was also the old ancestor who was in charge of the city.

With such strength, the wind Thunder City Master was extremely confident and did not fear Tang Zhen.

He only thought that it was better to avoid trouble. It would be best if he could send Tang Zhen away. If they had to fight, it would be best to do it outside the city.

Otherwise, in a huge battle, not to mention how many residents would be affected, the most important thing was that countless buildings would be destroyed, causing the people in the city to panic.

If the other giant cities took the opportunity to cause trouble in wind Thunder City, things might get out of hand.

However, if he really couldn't chase away an evil guest like Tang Zhen, the city Lord wouldn't mind having a fight.

Most of the strong believers were rich. As long as they defeated and imprisoned Tang Zhen, they would not have to worry about not being able to get a satisfactory compensation.

If they were outside the city, even if Tang Zhen didn't want to cause trouble, wind Thunder City Master would have taken the initiative to attack.

This was not the first time he had done something like this. He had killed more than one powerful believer.

"Looking for trouble? just say so!"

Tang Zhen laughed softly. He disappeared in the blink of an eye and did not leave behind the slightest trace.

Wind Thunder City master's expression changed, and he retreated without hesitation.

As he retreated, the city Lord loudly gave the order. The battle-Kings around him immediately took action, throwing out rune formation discs.

The hidden tang Zhen revealed his traces. Under the suppression of the world's laws, he was unable to completely hide his tracks.

"Interesting, I've underestimated you."

Tang Zhen's expression was a little surprised when he saw those symbol array discs. It seemed that these martial artists had quite a number of attack methods.

The warrior's continent was connected to the temple. The ability to refine runic array discs might have been a technique passed down by the believers in the past.

However, there was another possibility. These array disks were not made by martial artists, but were traded with strong believers.

The moment the runic array disc appeared, the surrounding space was instantly sealed. The people outside could not enter, and the people inside could not easily escape.

“Let’s see where else you can run to.”

A battle-King warrior growled, then threw out a few more runic array discs, reinforcing the space.

you want to trap me with these trash? what a joke!

Tang Zhen coldly snorted. He completely ignored the battle-King Warriors who had launched their attacks at the same time. Instead, he stared at the city Lord who had retreated to the side.

This fellow had taken out a control array disc and was currently coldly looking at Tang Zhen. At the same time, he was controlling the array disc to launch an attack.

Purple electric snakes appeared out of thin air and wrapped around the battle-King Warriors’ weapons, making them look like divine weapons.

Although martial arts powerhouses were not as good as cultivators in terms of spells, they were stronger in a single round of pure attacks.

Coupled with the rune disk array made by the believers, the attack power was increased by several times due to the increase in the energy of heaven and earth.

If they were well-coordinated, they could easily kill cultivators of the same level with one move.

Unfortunately, their opponent was Tang Zhen. His strength had far exceeded the imagination of the wind Thunder city’s martial artists. When those attacks, which could shatter a mountain, landed, they did not harm Tang Zhen in the slightest.

This scene caused the wind Thunder City Master to frown. He began to chant an incantation and activated the runic magic Circle’s strongest attack mode.

If he were to worry about the consumption, he was afraid that the following losses would be even greater.

When he first obtained this runic magic circle, the wind Thunder City Master had personally tried it. Even with his strength, he did not dare to resist it.

He did not believe that Tang Zhen would be able to endure his strongest attack. As long as Tang Zhen was injured, he would immediately attack and kill him. He would definitely not give Tang Zhen the chance to catch his breath.

In the blink of an eye, bolts of lightning as thick as a person’s thigh struck down and wrapped around Tang Zhen.

When the battle-King Warriors saw this, their faces lit up with joy, and their eyes were filled with joy.

“Bastard, let’s see if you still dare to be so arrogant!”

f \* ck! a battle-King warrior cursed. The believers regarded Warriors as traitors, and the Warriors also regarded the believers as lunatics and idiots.

“Be careful, this guy won’t die so easily!”

The city Lord of windthunder city roared in a low voice. Although the might of this array plate wasn’t weak, it was definitely not able to kill Tang Zhen so easily.

If that was the case, then he could only say that he had misjudged.

“You’re right.”

Tang Zhen’s voice rang out. In the next moment, the lightning that had wrapped around him actually shot out and landed on the bodies of those battle-Kings.

The lightning that couldn’t kill Tang Zhen was enough to kill these battle-King Warriors.

The sound of flesh burning rang out, and at the same time, there were continuous screams. The battle-King Warriors in the air fell to the ground one after another.

After the lightning dissipated, there were more than a dozen charred figures on the ground. With just a single strike, these Combat King Warriors were completely crippled.

Under the attack of the lightning, their flesh and bones separated and fell off. Some places were completely cooked, and a strange smell of roasted meat floated in the air.

Although the recovery ability of a battle-King warrior was extremely strong, even if his head was smashed to pieces, it would take enough time for him to recover.

At least from this moment on, they had completely lost their combat power. Perhaps an ordinary person with a kitchen knife could kill them.

Fortunately, Tang Zhen did not attack ruthlessly. Otherwise, there would be over ten corpses that had lost their lives on the ground.

When the wind Thunder City Master saw this, he immediately put away the control array disc in his hand and a weapon covered in light appeared in his hand.

The weapon was a soft whip in the shape of a chain. It was twenty meters long and was crisscrossed with silver-white sharp blades.

As the city Master of wind Thunder City activated it, it immediately became straight like a rod, appearing to be indestructible.

“Go to hell!”

With a furious roar, the city Master of windthunder city brandished his weapon with both hands and ruthlessly smashed it towards Tang Zhen.

The speed of this move was as fast as lightning. In an instant, it had already arrived in front of Tang Zhen. It was so fast that even the air was being torn apart.

The moment the city Master of wind Thunder City made his move, he used his strongest attack in an attempt to kill Tang Zhen in one move.

If Tang Zhen did not die, then it was very likely that he would be the one to die.

Facing the killing move of the city Master of windthunder city, Tang Zhen similarly roared out and extended his hand to grab it.

Windthunder City Master was overjoyed when he saw this. He didn't expect Tang Zhen to be so arrogant and actually dared to grab his weapon with his bare hands.

But in the next moment, the joy in his heart turned into shock, and then into a deep fear.

His indestructible weapon was actually held in Tang Zhen's hand. It was as if it was cast from iron and did not move at all.

"Not good, quickly retreat!"

With this thought in his mind, the city Lord threw away his weapon without any hesitation and turned to escape.

"It's too late to run!"

Tang Zhen's voice suddenly sounded out, and it seemed to be right next to his ear. The hair on the back of the wind Thunder City Master stood up in fear. He did not hesitate to turn around and punch.

In the end, this punch missed. There was nothing behind him, and there was no one at all.

"Something's wrong. He should be in front of me!"

Wind Thunder City Master suddenly turned around and ruthlessly swept out with his leg. However, he still didn't hit any target.

At this moment, the heart of the city Lord was in a state of panic. His previous calm and confidence had long disappeared.

Just as he was searching for Tang Zhen in fear, he suddenly felt a "buzz" in his mind. His consciousness had also instantly become dazed.

At the next moment, a fist came flying over, smashing the city Master to the ground.
