

Alternate 2281

Chapter 2281 The martial artists 'heart of home

The wind lightning patriarch's attitude was extremely respectful. It was an attitude that had never been seen before.

The change from arrogance to respect all stemmed from strength.

After witnessing the power of the cultivators from Lou Cheng, he no longer had any illusions. He was glad that he knew how to judge the situation and not be used by the sea tribe.

If he really did not come to his senses and continued to fight with the cultivators of loucheng, the consequences would be unimaginable.

Of course, the wind lightning patriarch was smart enough not to make such a low-level mistake. He had already known what he should do from the beginning.

As it turned out, he had made a wise choice.

The battle had ended, but the oceanic species 'experts had yet to appear. This was already enough to explain the problem.

They were the sacrificial pawns, and their purpose was to attract the enemy's firepower. They deserved to die.

Even if the cultivators of loucheng city didn't kill them, the sea tribe wouldn't let them go. They would definitely try to get rid of them all.

This group of damned guys had done things that were far more despicable than the enemy. They wanted to break the foundation of the martial arts continent and not leave any way for the martial artists to live.

At the thought of this, the wind lightning patriarch gritted his teeth in hatred. If he was given a chance, he would definitely teach the sea Race a lesson!

Although according to Tang Zhen's request, it was very likely that the martial artists would leave this world, it might not be a bad thing after thinking about it carefully.

The fact that the powerful sea tribe was no match for the cultivators of the loucheng Kingdom was enough to prove their strength. If the Warriors of the giant city chose to follow them, they might be able to develop better.

This world was too small and had too many limitations. As the descendants of the void bandits, martial artists naturally yearned for a wider world.

From his understanding of the cultivators in loucheng, he discovered that they were actually similar to void bandits in some ways.

Such a powerful force might be more suitable for martial artists like them.

At this moment, Tang Zhen turned his head and looked at the wind Thunder patriarch.

Under Tang Zhen's gaze, the wind lightning ancestor actually panicked. In order to not appear too miserable, he could only lower his head even more.

Tang Zhen involuntarily laughed and said when he saw this, "Your request isn't too much, and I can give you enough time, but not now.

The believer's continent is under attack by the void monsters and is in urgent need of manpower to alleviate the crisis. Since you're already in the team, you'll naturally have to participate.

After all, this matter is also related to you. It won't be long before the warrior continent is also affected.

At that time, not only will you not be able to get the resources you want, but you will also lose your home."

The wind lightning patriarch nodded, but he was a little worried in his heart. He was afraid that Tang Zhen would let the martial artists fight the void monster alone.

The void monster was very powerful. If an ordinary ancient martial art practitioner were to fight it, it would be no different from sending themselves to death.

Tang Zhen seemed to be able to see through people's hearts. He said to the wind lightning old ancestor, "There is one thing you can rest assured about. I will not use you as cannon fodder like the sea tribe.

You're only here as support. You won't be of much use on the battlefield."

Patriarch thunderwind nodded in thanks again, his face full of gratitude.

This was what he and the other patriarchs of the megacity were most worried about. They were worried that they would be used as cannon fodder after seeking refuge with the cultivators of Lou Cheng.

To those who surrendered, this was the greatest tragedy. Their dignity and freedom would be completely lost.

By then, the Warriors would not even have the ability to resist or regret when facing the powerful cultivators of Lou Cheng.

Even if they really resisted, the final outcome was destined to be a tragedy, because the strength of the two sides was not on the same level.

After hearing Tang Zhen's promise, the wind lightning forefather heaved a sigh of relief.

The words of an expert like Tang Zhen carried enormous weight. Since he had said so, he would definitely do so.

His subordinates would also strictly follow his orders and would not go against him.

Tang Zhen smiled when he saw this. He naturally would not lie to the wind lightning ancestor. The Holy Dragon Warzone did not need cannon fodder, and the same was true for the cracked territory.

When martial artists joined the battle, they only carried out auxiliary tasks and rarely participated in official battles.

This had nothing to do with the trust of the Warriors. The quality of the cultivators in loucheng city was extremely high. Many of the tasks seemed simple, but ordinary Warriors could not do it.

If he were to forcefully replace her, it would only increase the trouble and not provide any help.

Under such circumstances, it was naturally the wisest choice to honestly carry out the logistics support mission.

If these martial artists were active in improving themselves, then at the right time, they would also be qualified to become true cultivators of loucheng.

The world of loucheng was extremely inclusive. Even if they were former enemies, they could cooperate with each other and step onto the battlefield together one day.

Tang Zhen knew what the wind lightning ancestor was thinking when he saw his expression. He knew that the wind lightning ancestor was only truly relieved at this moment.

After thinking for a moment, Tang Zhen continued, when this mission is over, I'll give you enough time to return to the martial arts continent and make preparations.

If anything happens, I won't let you suffer any losses and will make up for it in other ways.

Cultivator Lou Cheng will never mistreat his companions, so you can rest assured!"

While he was speaking, Tang Zhen's mind had already shifted to the believer's continent. He was checking the information that had just been sent over.

In fact, in Tang Zhen's eyes, the martial artist Alliance was not even worth mentioning. They could not even be considered an opponent.

His attention was always on the believer's continent, paying attention to the wind blowing and the grass moving there, wanting to see if his guess was correct.

Although he was not there, the cultivators who were stationed on the believer's continent were all his eyes and ears.

If there was any movement, he would naturally be the first to know.

Tang Zhen had felt that something was amiss since the beginning of the battle. As the battle officially unfolded, that feeling became increasingly intense.

It was as if there was a pair of large hands in the dark controlling everything and deliberately going against him.

All sorts of unforeseen events occurred one after another, but they were controlled within a reasonable range, and there would not be a situation where things went out of control.

By the time the void monster appeared, Tang Zhen could basically be sure that there was a conspiracy behind this matter.

Although the number of void monsters was not small, the void was so vast that even if they deliberately searched for them, they might not necessarily encounter them.

However, in this battle, the void monsters had come to find them so coincidentally, and in such large numbers.

If this was really an accident, then it could only be said that the indigenous God was extremely unlucky, and it was destined that he would not be able to protect his God Kingdom.

However, Tang Zhen clearly knew in his heart that this matter was definitely not a coincidence.

“Perhaps the three lords are hiding something?”

This thought flashed across Tang Zhen’s mind. Soon after, he coldly laughed.

Since the other party had chosen to hide it, even if he asked, he would not be able to get the answer he wanted.

Since that was the case, he might as well ask the cornerstone platform directly. He believed that he would give him a satisfactory answer.

After making up his mind, Tang Zhen handed over the command to his subordinates. At the same time, he ordered all the buildings to follow the action and go to support the believer’s continent.

Compared to the Super warship, Lou Cheng’s killing efficiency was more than double when dealing with void monsters.

However, it would also face many dangers. The most powerful weapon of the void monster was its mouth that swallowed everything.

Even the energy shield protecting the city could swallow the building in one bite without any effort.

Therefore, this battle was actually very risky, and it might also be very difficult.

Chapter 2282 Landing reinforcements

The Allied army advanced at an extremely fast speed, and it did not take long for them to reach the shore of the believer’s continent.

Just like when they left, when they returned, the Alliance Army still covered the sea and the sky, as if they had filled the entire ocean.

However, at this moment, no one welcomed their victorious return, and no one witnessed this Grand occasion.

The defense area in front of them was already riddled with holes, and the corpses of sea monsters and believers could be seen everywhere.

The surface of the sea was blocked, and the sea water was sticky and blood-red, with countless sea monster corpses floating on it.

The pungent smell made people want to vomit.

The corpses of these sea monsters alone were a big problem. Once they rotted, the terrible smell was no different from a disaster.

Fortunately, the rules of the divine Kingdom did not allow the existence of plagues. Otherwise, once the disease spread, who knew how many believers would be unlucky enough to be infected.

As Neptune self-destructed, the absolute control that was achieved by the power of his bloodline was completely ineffective.

The out-of-control sea monsters fled, leaving behind a ground full of wolves. The walls of the defense area were unrecognizable, and there were almost no traces of the original.

In addition to the destruction caused by the sea monsters, the heavy warships were also the main responsibility. While cleaning up the sea monsters, Lou Cheng also cleaned up the defense area.

If they wanted to repair it, they would need to consume a lot of manpower and resources. If they were to repair the entire line, the amount of resources lost would be even more uncountable.

However, looking at the current situation, there was no need to repair the defense area.

After this battle, between the cultivators of Lou Cheng and the sea monster, only one side could survive.

However, looking at the current situation, the sea race's defeat was already set in stone, and there was absolutely no possibility of a comeback.

Since that was the case, there was no need to repair the defensive area, because there were no more enemies to defend.

Putting this matter aside, the void monster alone was enough to make the repair of the defense area unnecessary.

The entire world had already been devoured and there was no longer a place to stand. What was the point of repairing the defense area?

However, most of the believers did not realize how serious the situation was, nor did they know that the time they would stay in the God's kingdom had already entered a countdown state.

He had come in muddleheadedly and left inexplicably. He had become a believer of the indigenous gods. He had probably not encountered any good things.

These believers should be glad that Tang Zhen was willing to bring them away. Otherwise, this collapsed God Kingdom would be their grave.

In fact, even Tang Zhen was unable to stop the collapse of his God Kingdom. The attack of the void monster was an unsolvable situation.

No matter how strong Tang Zhen was, it was impossible for him to stop the void monster's devouring. If it could be easily dealt with, the cultivators in the building would not have avoided it.

The cultivators of loucheng only plundered the plane, while the void monsters devoured the entire plane. When comparing the two, the void monsters were naturally more ruthless.

When faced with void monsters, the cultivators of loucheng rarely fought them head-on. Instead, they seized the time to plunder resources and then retreated as quickly as possible.

It wasn't impossible to fight them head-on. They might be able to do it if they mobilized the entire war zone's forces.

However, the price paid was not proportional to the gains. Even if they won, it would be meaningless.

Under such circumstances, the only thing Tang Zhen could do was to try his best to slow down the speed of this world's destruction.

This was also the reason why he was annoyed. In this way, the series of plans he had made could no longer be implemented normally.

The losses suffered from this were almost uncountable.

In fact, Tang Zhen might not have suffered a loss. One must know that he was the beneficiary of this matter from the beginning to the end.

This was also the reason why Tang Zhen was able to stabilize his emotions and didn't directly go to the cornerstone platform to reason with it.

However, he had already made up his mind to seek an explanation. After the battle situation stabilized, he would return to the fifth battle area and confront the cornerstone platform.

Just as Tang Zhen was frowning and thinking, the division commander who had taken over the command had already started to assign tasks.

With each tower as a unit, a sufficient number of cultivators from the tower, as well as the scattered martial artists from the giant city, they advanced in a line toward the believer's continent.

As long as they saw a void monster, they would immediately kill it, and they would not let go of any sea monsters that escaped.

Due to the special circumstances, the various skyscrapers could move freely, and the spoils of war could also be dealt with freely.

If they were lucky, they could encounter some void treasure beasts and make a fortune.

The believers who were originally stationed in the major defensive areas and the cultivators in Loucheng who were responsible for support all joined the team to search for the void monster.

There was no need for them to stay in the defense area anymore. They naturally had to follow the large group. Otherwise, no matter if they encountered sea monsters or void monsters, they would not have the ability to fight them.

As the order was given, the cultivators of Lou Cheng immediately took action. The long coastline was filled with moving figures.

The sky and the ground coordinated with each other, forming a three-dimensional line, like a large net pushing forward.

Under such circumstances, as long as the void monster was within the search range, there was no possibility of it escaping.

The command center also gave the order that if the void monsters were strong enough that the cultivators in Lou Cheng couldn't fight them, they were allowed to let them go.

There were countless void monsters, so there was no need to fight them to the death. If they suffered losses because of this, it would not be worth it.

Other than sending a large force to search for the void monster, the command center also mobilized a large number of cultivators to quickly head to the Grand temple to provide support.

Up until now, the damaged area above the Grand temple was still the main battlefield to stop the void monsters.

Because the number of sea monsters kept increasing, the cultivators in charge of blocking the attacks were under great pressure. If they didn't get reinforcements soon, the void monsters would soon break through the defense line.

Once the defensive line collapsed, the void monsters would surge in without control, and that would be the real end of the world.

Such a situation had to be avoided as much as possible. The resources of the God Kingdom were still considered rich. Even if they were to pack it up and bring it back to the world of Lou Cheng, it would be better than being devoured by the void monsters.

Knowing that they could not do anything, the command center would not act rashly. Instead, they would quickly plunder resources and pack them up along the transmission tunnel.

After the plundering of resources was completed, they could leave this world to minimize the losses.

All the plans had been formulated. In the following time, he only needed to adapt to the situation.

Tang Zhen also followed the reinforcements and headed to the Grand temple. There were some things that he had to ask Star Spirit Lord and the others.

The team in charge of supporting the Grand temple was made up of five towers, ten heavy warships, and a large number of light warships.

In addition, there were nearly a million believers and Warriors who were allowed to go to the outer area of the City Tower and follow them to the Grand temple.

The believers and Warriors who had just arrived at the city were all shocked. They had never thought that such a magical building would exist in this world.

This giant building that could float in the air was a super war fortress. It could attack and defend, and was almost invincible in war.

While they were envious, the Warriors and believers were also guessing how powerful the world of towers would be if it had these Super Battle fortresses.

Unknowingly, the believers and Warriors had an extra sense of anticipation for the world of Lou Cheng.

They wanted to see with their own eyes what this magical world with countless buildings looked like.

Chapter 2283 Tang Zhen's arrival

The fierce battle above the Grand temple was still ongoing. Countless void monsters were killed, and their corpses were floating in the void.

If these corpses were allowed to drift on, they would remain in their current state even after millions of years.

In the vast void, this was not the only strange thing. It was both dangerous and magical.

The cultivators of Loucheng had to deal with the void in order to conquer the world. Therefore, they were familiar with such a special environment.

Even when fighting in the void, they could deal with it calmly and had corresponding tactics.

When the tower was upgraded to the national level, the cornerstone platform would release this information so that the residents of the tower could obtain it for free.

The purpose of this was to prevent the Lou Cheng cultivators from not knowing how to deal with similar situations.

Some special towers even had the ability to survive in the void for a long time. They were like lonely boats, drifting in the endless ocean.

These lone towers were like void monsters, searching for traces of the plane world in the vast void and plundering it at the right time.

This kind of plane invasion was more direct and more efficient, but because it was far away from the tower world, it was difficult to get help in times of crisis.

He was like a lone wolf. If he won, he would live. If he lost, he would die.

If they encountered the ruins of a city in some planes, it was likely to be a lost lone city.

In some aspects, the solitary tower was quite similar to the void bandits, which made the cultivators of many planes change their expressions.

When Tang Zhen and the others arrived, the cultivators in charge of defending weren't in a good state.

The long-term high-intensity battle had caused the fleet to suffer great losses. The people were tired and the ammunition was scarce, so they could not hold on for long.

The arrival of the reinforcements immediately alleviated the crisis, allowing the cultivators of Lou Cheng to heave a sigh of relief.

The line of defense that was on the verge of collapse became stable again. Countless attacks were launched into the void and landed on the monsters that were constantly surging forward.

The void monsters that were attacked were in a state of chaos, running around in the group.

The originally orderly formation had also become a mess, like a school of fish that had been frightened.

Due to the obstruction of the monster's corpse, it was already very difficult for the void monster to continue approaching the gap.

However, this did not mean that the crisis had been resolved. The fearsomeness of the void monster had not yet been fully displayed.

If a group of giant void monsters appeared and they seized the opportunity to break through the defensive line, it would cause unimaginable losses.

The more you worry about something, the more likely it will happen.

As expected, the battle didn't take long before dozens of void monsters that were close to 10000 meters long appeared and charged over with an aggressive aura.

One of the void monsters had unknowingly gotten close to one of the towers. It opened its mouth and bit down fiercely.

In the blink of an eye, a huge hole appeared in the building, as if someone had taken a bite out of a whole cake.

Lou Cheng, who had been ambushed, immediately retaliated. The dense firepower seemed to have eyes as they all shot at the position of the void monster.

The void monster wailed as huge wounds appeared on its body. However, it still charged forward and continued to attack.

The larger the size of the void monster, the harder it was to kill it, and the greater the threat it posed.

Therefore, the most ideal strategy was to attack the void monster from a long distance and not let it get close easily.

For example, at this moment, the tower that was being attacked was in imminent danger, and it could be bitten by the void monster again at any time.

The cultivators of the city had all been mobilized and surrounded the void monster. The moving city suddenly launched a fierce attack, and the piercing light pillar directly hit the body of the void monster.

Half of the void monster's body was smashed into pieces, and its corpse flew out.

If there was no obstruction, the corpse would fly far away, and no one knew when it would stop.

After the crisis was resolved, Lou Cheng quickly began to repair the hole, but it did not affect his operation.

But at this moment, several void monsters took advantage of the opening and charged straight for the tower.

"This bunch of bastards, go to hell!"

A furious roar was heard. Then, a cold light flashed and the void monster that was charging over was cut in two.

"Bah, trash!"

After casually killing a void monster, the battle fanatic Lord's face was filled with excitement. He waved his battle axe and locked onto another void monster.

Who knew that this time, just as he raised his battle axe, the void monster opposite him stopped moving forward and suddenly shattered into countless pieces.

The battle fanatic Lord was stunned for a moment. Then, he turned his head and looked at a position not far away.

There was a figure standing there with his hands behind his back. In front of him, there were two rays of light dancing and shuttling back and forth, constantly killing the void monster.

"Tang Zhen?"

The battle maniac Lord's mouth twitched when he saw the attacker. Although he didn't like people snatching his prey, it still depended on the time.

The situation was critical earlier, and it was normal for Tang Zhen to act. After all, it was his subordinates who were in danger. He could not count on others to act.

Nodding to Tang Zhen, the battle maniac Lord then flew towards the other void monsters. In his battle mode, he had never been in the mood to care about other things.

The number of void monsters was uncountable, and it was a good opportunity to fight to his heart's content. If he missed this opportunity, who knew when he would meet them again.

The battle maniac Lord was different from the other loucheng cultivators. He lived for the sake of battle. Other than battle, he didn't have the mood to think about anything else.

The fact that the star Spirit horde leader was able to notice the abnormality, but the Zhan Kuang horde leader didn't notice it at all, was enough to prove his character.

Therefore, Tang Zhen did not intend to communicate with him. This was because he was unable to obtain the answer he wanted from the other party's mouth.

Tang Zhen chuckled and shook his head as he watched the battle maniac Lord rush into the void monsters and swing his battle axe left and right.

This Lord was also a worry-free person. He only did what he liked to do and did not need to care about other things.

If you feel it's unfair, then let's fight until one side completely falls.

Among the cultivators that Tang Zhen had come into contact with, a simple and pure cultivator like him would often be able to obtain higher achievements.

"Lord Tang Zhen, how have you been?"

A faint voice sounded in his ears. Then, the star Spirit Lord suddenly appeared and stood not far away from Tang Zhen.

He was still wearing a long white robe. The surface of the robe was spotless, and it fluttered like the clouds.

With a smile on his face, he made people feel like they were bathing in the spring breeze.

However, the long sword in his hand destroyed his otherworldly temperament and made him exude a sharp chill.

It was obvious that he was still fighting with the void monsters just now, and he had killed countless people.

so, it's star Spirit Lord. That Aboriginal deity has already left. I wonder why you're still here? "

Tang Zhen revealed a trace of doubt as he asked in a faint tone.

The star Spirit Lord chuckled, and the sword in his hand disappeared instantly, as if it had become one with his body.

The sharp sword intent also turned to her, but it disappeared in a very short time.

with the Golden Eye Overlord following them, the Aboriginal deities will definitely not have any problems. Since that's the case, Zhan Kuang Overlord and I will naturally stay behind to help stop the void monsters.

The star Spirit Lord's explanation was reasonable as if he was helping Tang Zhen.

Their mission was to protect the native gods while Tang Zhen's mission was to protect the safety of the country.

Although there was a certain connection between the two, the star Spirit Lord could decide whether to help or not based on his mood.

Chapter 2284 It has nothing to do with me

After hearing Star Spirit Lord's words, Tang Zhen smiled and said, " "In that case, this Tang would like to thank you for helping me at the critical moment!"

The cultivators in loucheng city were all Tang Zhen's subordinates. Because of the participation of the two masters of creation, the casualties were reduced to the minimum.

In terms of morale, it was especially obvious, allowing the cultivators of loucheng to fight without worry.

Under such circumstances, the star Spirit Lord and the other creator were worthy of Tang Zhen's gratitude.

you and I belong to the same Battlefield. There will be many opportunities for cooperation in the future. This is just a small matter. There's no need to thank me.

The star Spirit Lord shook his head gently. He knew that Tang Zhen definitely didn't appear here to stop the void monster.

Since Tang Zhen already knew that something was amiss, he would definitely figure out the ins and outs of the matter and not remain silent.

If that was the case, things would become even more dangerous.

If Tang Zhen were to take things too hard and do something impulsive, it would be difficult to deal with him.

If it wasn't dealt with in time, it could even affect the fifth battle area and affect the final battle area ranking.

Therefore, even though this matter had nothing to do with him, the star Spirit Lord still hoped that this matter could be resolved satisfactorily.

"So, do you have something to ask me?"

Tang Zhen looked at the star Spirit Lord and saw that he was smiling as if he was waiting for something.

A thought appeared in Tang Zhen's mind. He seemed to have thought of something as the corner of his mouth revealed a faint smile.

"That's right. I do have a few questions in my heart, but I should have the answers now.

There's no need to ask or not."

When Tang Zhen spoke, it was as though a burden had been lifted off his shoulders. His entire body revealed a relaxed feeling and was no longer as heavy as before.

Seeing this, the star Spirit Lord smiled and said, "you still have to ask. You can't just guess. You have to hear it with your own ears.

Tang Zhen nodded his head. Even if this was the case, he still had to pay it back.

"It seems like this matter has nothing to do with you, Sir?"

Tang Zhen's words didn't make any sense, but Star Spirit Lord knew what was going on and nodded seriously.

"That's right, it has nothing to do with me, and it also has nothing to do with Zhan Kuang Lord.

We're the same as you, we don't know what's going on.

Now that you feel that something is wrong, we also feel that something is wrong. If you didn't ask, I wouldn't have taken the initiative to clarify. Since you asked, you must make it clear.

We definitely won't take the blame for this!"

The star Spirit Lord had thought that Tang Zhen would treat them as accomplices of the cornerstone platform and couldn't help but feel a little depressed.

However, at this moment, he felt that he had released all his anger and was extremely relaxed.

However, Tang Zhen frowned slightly as he looked at the star Spirit Lord and asked, "If it has nothing to do with you or Zhan Kuang horde leader, then does that mean it has something to do with Golden Eye horde leader?"

The star Spirit Lord chuckled. He wouldn't speak carelessly about such matters. It was none of his business how Tang Zhen guessed.

Tang Zhen saw the star Spirit Lord's expression and knew what was going on, so he didn't continue to speak nonsense.

Since the two lords had nothing to do with this matter, Tang Zhen's purpose for coming here had been achieved. There was no need to stay any longer.

He wasn't a stubborn person. He knew that he couldn't do it, but he still insisted on doing something meaningless.

Therefore, before retreating, Tang Zhen gave an order that the cultivators in Loucheng could adapt to the situation.

If the void monster's attack was too fierce, they could give up this position and choose to use guerilla warfare to continue delaying the void monster's devouring speed.

While they were intercepting the void monsters, a series of preparations for evacuation had to be carried out at the fastest speed possible.

As for the cultivators in Loucheng who were blocking the void monsters, they had to persist in the battle until the last moment when all of them left the God Kingdom.

Hearing Tang Zhen's order, Lou Cheng's cultivators heaved a sigh of relief. In fact, they didn't want to do such a meaningless thing.

However, before the order was given, they would never retreat from the battlefield, even if they were the only ones left.

After arranging the matters on the battlefield, Tang Zhen left the battlefield and headed straight in the direction where the underground palace had disappeared.

Looking at Tang Zhen's back, the star Spirit Lord was silent.

do you think he'll start fighting with the Golden Eye Lord?"

The battle maniac Lord had appeared out of nowhere. He was still holding onto his battle axe, and his face was filled with curiosity.

"Don't worry. Tang Zhen isn't an idiot. He won't make a mistake in this kind of matter.

Even if the Golden Eye Lord knew about it, he was only an executor and not the real schemer.

If Tang Zhen wanted to seek justice, he would have to look for the cornerstone platform. In fact, he should be very clear in his heart that this matter was done by the cornerstone platform.

What he's doing now is just collecting evidence, hoping to get 90% of the evidence."

Zhan Kuang Lord nodded, then shook his head, a look of deep thought on his face.

"These things have nothing to do with us. Since the misunderstanding has been clarified, it's for the best!

It's a pity that this world can't be maintained for long, or I'd definitely get the cultivators in my territory to come over and have a good fight!"

As the battle fanatic Lord said this, a trace of regret appeared on his face, as if he was unwilling to give up on a hunting ground like God's kingdom.

Hearing this, the star Spirit horde leader revealed a puzzled expression and said in a puzzled tone, "Now that the God nation has become like this, it no longer has any value and could be abandoned at any time.

Tang Zhen won't say anything even if you tear down the God Country now. If you're willing to bring people to kill the void monster, Tang Zhen will definitely welcome you with open arms."

Hearing this, Zhan Kuang horde leader's face lit up with excitement. He turned to Star Spirit horde leader and said, "There's a competition in my territory. Why don't we move the competition venue here?"

Compared to the battle between the cultivators in the towers, killing void monsters was obviously more exciting and could also have the effect of actual combat training.

It's not easy to encounter a void monster of this scale, at least it's my first time.

Since you say there's no problem, I'll immediately find someone to send a message and gather all the cultivators in loucheng!"

As soon as the battle maniac Lord finished speaking, he disappeared. It was obvious that he was going to make arrangements.

Star Spirit Lord was stunned. He had only said it casually and didn't expect Zhan Kuang Lord to really summon the cultivators of his territory.

Was he not afraid of trouble?

However, after thinking about it carefully, it was actually not that troublesome. It was just entering the rift territory through a long-distance teleportation array, and then entering the God's kingdom through a transit station.

As long as Zhan Kuang Lord gave the order, with the speed of the loucheng cultivators, they would arrive in no time.

"It's a good thing to use this opportunity to let cultivator Lou Cheng accumulate experience in fighting void monsters.

Since that fellow Zhan Kuang isn't afraid of trouble, what should I be afraid of? in any case, I just need to give the order."

At the thought of this, the star Spirit Lord took out a scroll that looked like a goatskin and wrote a paragraph of words on it.

After he finished writing, he silently chanted an incantation. The words on the scroll flashed with golden light and then disappeared.

This was a special method to transmit the text message to the cornerstone platform, and then to his own territory.

After receiving the news, the cultivators in the star elves 'territory could take action directly and arrive at the God Kingdom through the teleportation array.

Thinking that cultivators from the three territories and a low-level battle zone would gather in God Kingdom, Star Spirit Lord felt very interested.

It was estimated that it would not take long for the divine Kingdom to become unusually lively. Many cultivators would launch a special hunt for void monsters in this plane that was about to collapse and disappear!

Chapter 2285 The hiding place of the indigenous gods

After Tang Zhen left the battlefield, he continued to advance.

At this moment, what he saw along the way was already a Wolf's Den, the once magnificent scene no longer existed.

This was all thanks to the void monsters. When they devoured, they did not pick a time or place.

Wherever he found pleasing to the eye, he would directly take a bite, and a pitch-black gap in the void would also appear.

There was more than one void monster, and there was more than one hole in the gnawing, causing the God Kingdom to be riddled with holes.

The cultivators of loucheng believed that the kingdom of God was destined to be destroyed for this reason. How could they defend the kingdom of God that was full of loopholes?

Tang Zhen's expression was neither happy nor sad after he saw it. It was as if he did not take it to heart.

Since things had already developed to this extent, he could only let nature take its course. There was no need to waste his effort to maintain it.

Nothing was perfect, and hard work might not be rewarded. This was a very normal thing.

When Tang Zhen executed this plan, he was already prepared for failure. The only thing he didn't expect was that the reason for the failure was actually related to the cornerstone platform!

There must be a reason for this abnormal situation. Tang Zhen didn't think that there was any special reason why the cornerstone platform was targeting him.

While he was thinking about this problem, Tang Zhen was also carefully searching for the traces left behind. From there, he could determine the true direction of the underground palace's transfer.

When the spiriters were moving the underground palace, they had deliberately erased their traces to avoid being tracked down by void monsters and unscrupulous people.

The spaces that they passed through in the underground palace were all replaced by spiriters, making them unrecognizable.

It was like a floor that had been lifted and put back together. The original traces naturally no longer existed.

If it was another person searching for the trail, it might waste a lot of time. However, Tang Zhen was different.

He could sense the aura left behind by the Golden Eye Lord. This was something that the other party had deliberately left behind, and every creator could do it.

This kind of aura could be left behind if one wanted to, but if one didn't want to, then it would be untraceable.

However, the Golden Eye Lord followed the rules and left behind traces so that his companions could track him.

It was also possible that he had left it behind for Tang Zhen so that he could find him more easily.

Tang Zhen naturally flew forward at a rapid speed with the directions. Unknowingly, he had already flown far away.

The area of a God Kingdom was extremely large. All kinds of terrains and environments could be created according to one's will, and they could be extended infinitely.

As long as he had enough divine source, the difficulty of creating a space in the soil was at the lowest level.

After flying over a desert and empty region, a barrier-like substance blocked Tang Zhen's path.

It looked like he was going forward, but in reality, he was standing in the same spot and could not move forward at all.

Tang Zhen clearly knew in his heart that they had already reached the edge of the divine Kingdom. If they were to continue forward, they would only be able to break the crystal wall of the plane.

However, that would be equivalent to leaving the divine Kingdom and entering the void.

The aura left behind by the Golden Eye Overlord was still there, but the underground palace had disappeared without a trace. He had no idea where it was hidden.

Tang Zhen frowned slightly. He seriously observed his surroundings and searched for any clues that might exist.

However, this area was completely clean. There wasn't even a speck of dust, so there was no clue at all. there's no way out. Where did the spiriters put the underground palace? how could there be no trace? "

Tang Zhen was surprised in his heart. After pondering for a moment, he faintly had a guess.

Tang Zhen quietly stood at his original spot. His mental energy was released and he continued to search the nearby area.

It didn't take long for him to capture a trace of spatial power fluctuation, which was extremely hidden and subtle.

However, for Tang Zhen, just a trace of abnormality was enough to cause him to feel fear.

In the next moment, he had already appeared at the abnormal position. Then, he stretched out his hand and tore it with all his might.

It was violent and direct, but very effective.

The space there was torn apart, revealing the secret hidden behind it

This was actually a tunnel-like tunnel. Due to it being blocked by a special method, Tang Zhen did not discover it earlier.

Strictly speaking, this tunnel was also part of the God's kingdom, just like a branch that extended from a tree trunk.

However, the tunnel was not hidden under the mountain, but in the void, very similar to the Eye of the Sea built by Neptune.

It was still a divine Kingdom, but because of its special way of existence, it was very difficult to be discovered.

If not for Tang Zhen following the aura left behind by the Golden Eye Lord and tracking it all the way to this location, it would be impossible for him to discover the traces of the tunnel.

It seemed that in order to hide their tracks, the spiriters had really put in a lot of effort.

That was all the spiriters could do. There was really nothing they could do about the destruction of Scandinavia.

Tang Zhen took a step into the tunnel and continued to fly forward.

After entering, he discovered that the tunnel was filled with traps to prevent the enemy from tracking him.

These were all small problems that Tang Zhen could remove with a wave of his hand. The spirit envoy's actions were more of a warning.

Following the winding tunnel, they flew for more than a hundred kilometers before the view opened up.

An endless mountain range suddenly appeared in front of him. The mountains, rivers, birds, and flowers were all beautiful, like a paradise.

At the foot of the mountain, there was a large city. The buildings in the city were dense, and the streets were filled with people. It was a very prosperous city.

This was not the God nation, but it was closely related to the God nation. When Tang Zhen first arrived in the God nation, he had entered a place like this.

After the believers were summoned, they would first descend in such a place. Only when the time was right could they enter the God's kingdom through the teleportation portal.

Due to his previous experience, Tang Zhen was able to recognize with a single glance that this was a small world that was attached to the divine Kingdom.

The spiriters thought that the divine Kingdom was not safe, so they had hidden here. However, because the indigenous gods could not leave the divine Kingdom, they had left the tunnel behind.

In that case, this subsidiary small world would be equivalent to merging with the God Kingdom, and the native gods would not have left the God Kingdom.

The spiritualist must have been helpless as well. The unconscious Aboriginal deity had left him with no other choice most of the time.

The instant Tang Zhen stepped out of the tunnel, countless figures surrounded him from all directions. They held weapons in their hands and glared at Tang Zhen like tigers watching their prey.

Looking at their appearance, it was as if they were facing a great enemy, and the arms holding the weapons were trembling.

At this moment, Tang Zhen was wearing a battle armor and was floating in mid-air. He was like a god that had descended into the world, and he gave off an extremely great pressure.

Before entering the God's kingdom, most of the believers were not very strong, at most just a little stronger than mortals.

It was simply impossible for them to be a match for such a Tang Zhen. Naturally, they felt uneasy and frightened in their hearts.

Tang Zhen was too lazy to bother with these believers. Instead, he turned his gaze to the front before it finally landed on the tallest building in the city.

A figure stood on the roof of the building. It was the Golden Eye Lord that Tang Zhen was looking for.

As if sensing Tang Zhen's gaze, the Golden Eye Lord slowly turned around and looked at him.

I knew you would come, so I've been waiting. If you want to know what's going on, then go straight to the cornerstone platform.

After the Golden Eye Lord finished speaking, he did not say anything else. Instead, he continued to look at a certain spot in front of him.

Tang Zhen followed his line of sight and looked over. He discovered that there was indeed something unusual in that place. Something should be hidden there.

Tang Zhen was also very clear about what it was hiding.

He laughed in his heart. This Neptune was extremely unlucky. He had planned for so many years, but in the end, he was interrupted by the cultivators of loucheng.

Now that he had self-destructed his body and followed them, he was waiting for an opportunity to take action. However, he was targeted by an old creator.

Under such circumstances, Neptune could lose his life at any time. It was simply delusional to want to seize the body of the indigenous God.

Perhaps there was a special reason why he had not been killed yet. Otherwise, he would not have been able to survive until now.

Tang Zhen cupped his hands toward the Golden Eye Lord and returned to the tunnel under the doubtful gazes of his believers.

He didn't want to return to his God's kingdom, but to return to the fifth battle area. He wanted to hear how the cornerstone platform would explain this.

Chapter 2286 Encounter on the road

After passing through the tunnel, Tang Zhen didn't leave immediately. Instead, he immediately contacted the cultivators in Loucheng and mobilized heavy warships to guard the area.

The spiritualist probably wanted to do the same, but he was powerless. At this time, he could no longer find anyone he could use in the divine Kingdom.

Since this was the case, Tang Zhen would help him make some arrangements to prevent any more unforeseen circumstances.

No matter if it was Tang Zhen or the cornerstone platform, they did not wish for the Aboriginal deity to die. They naturally had to ensure his safety as much as possible under the circumstances where it was within their capabilities.

Everything else aside, the contract alone was enough to make the indigenous gods rest easy.

After issuing the order, Tang Zhen modified the entrance of the tunnel and arranged a runic magic circle.

If a void monster were to approach, the runic magic circle would automatically attack and kill the void monster in an instant.

In fact, judging from the secrecy of the tunnel, the chances of it being discovered by the void monster were very low, and the runic magic circle might not be useful.

It should be known that most of the void monsters were not picky with their food, so it was impossible for them to track them all the way here just to take a bite of the indigenous deity.

However, if they were targeted by the void treasure beast, they could only blame the poor luck of the native gods for encountering such an unlucky thing with an extremely low probability.

Tang Zhen's actions were just to be on the safe side to prevent any unexpected situation from happening.

After everything was arranged, Tang Zhen went straight to defense area 153 and prepared to return to the world of Loucheng through the teleportation channel.

On the way back, Tang Zhen met several teams of cultivators from Lou Cheng who were chasing after the void monsters.

They had encountered more than one void monster, and some of them had even formed teams.

Such a group of void monsters was extremely dangerous, and their destructive power would be multiplied.

Among them, the largest void monster was tens of thousands of meters in size. It was like a ball of thick ink that fell into water, constantly creating a dark void.

The cultivators of Lou Cheng tried to kill it, but due to the lack of firepower, they were unable to pose much of a threat to the void monster.

In the process of killing, it angered the void monsters and they started to kill the cultivators in the city.

Fortunately, Tang Zhen had encountered them and saved them in time, allowing the cultivators of Lou city to escape.

As for the giant void monster, it was also killed by Tang Zhen on the spot. Its huge corpse fell to the ground, not much different from a mountain.

A special creature like the void monster was not completely useless. Many of the items on its body were of use.

This was especially true for the insides of the void monsters' bodies. Although they couldn't accumulate all kinds of treasure crystals like the void treasure beasts, there would still be a lot of treasure residue left.

As long as one had enough patience and slowly rummaged through the trash, one would always find something satisfactory.

Therefore, after killing the void monster, the cultivators and believers in Loucheng didn't waste their resources. Instead, they collected as many precious materials as possible.

At this time, the cultivators of Loucheng became the object of envy of the believers. Not only were they powerful, but their equipment was also quite excellent.

With a storage equipment in each hand, they could take away all the spoils of war, unlike the believers, who could not take away all the good things even if they got them.

Looking at the piles of treasures, but not being able to take them all away, this was undoubtedly a painful thing.

The longer they worked with Lou Cheng, the more the believers could feel the gap between them. They were not on the same level at all.

When they heard that they would have the opportunity to follow cultivator Lou Cheng to a new world if the kingdom of God was destroyed, the believers began to look forward to it.

Being able to follow such a powerful force was a lucky thing in itself. It was very likely that they would obtain more opportunities and have the opportunity to ascend to a higher realm.

As for the indigenous gods, because of a series of changes, the faith in their God Kingdom had completely collapsed.

After his lie was exposed, the believers' attitude towards him had slowly become indifferent and sick of him.

In fact, if it wasn't for the existence of the war achievement exchange system, which made the believers feel that they were not simply being deceived, but that they had obtained real benefits, there would probably be believers who had joined the ranks of the crusade against the indigenous gods.

After helping to deal with the void monster, Tang Zhen continued to move forward. As a result, he met another acquaintance on the way.

Qian Long's descendant Qian Zhongyun, mo ran's descendant mo Ziqi, and the cultivator from White Creek town, Tang Hao, who had the same surname as him, were also hunting void monsters.

The young man with the mercenary support system, Feng, was also in the team.

Looking at his current state, it was obvious that he had become a core member and was highly valued by the cultivators of the three brightness building.

It was not strange for such a situation to occur. Based on Tang Zhen's understanding of this system, it was equivalent to a combat staff officer and a mobile warehouse.

Relying on the system's assistance, the strength of a cultivator could be multiplied, even more so in a team.

After understanding the benefits of the system, it was only natural for ah Feng's position to rise in the team.

Perhaps they were too lucky, but Qian Chongyun and the others encountered the void treasure beast more than once while they were chasing the void monster.

In addition to the battle merits they deserved, they also received a large number of energy gems. Now, they were rich.

After seeing Tang Zhen's appearance, all the cultivators were surprised and happy. They didn't expect that they would have a chance with Tang Zhen.

"We pay our respects to Your Excellency Tang Zhen!"

The group of cultivators could not be bothered to clean up the treasure beast in the void. They hurriedly stepped forward and bowed to Tang Zhen.

"You're welcome. I was just passing by and came to take a look."

Tang Zhen still had many things to do and could not waste all his time here. After chatting with Qian Chongyun and the rest for a while, he was about to turn around and leave.

"Sir Tang Zhen, may I know if you have any extra storage equipment? can you lend it to us?"

Qian Zhongyun hurriedly asked when he saw that Tang Zhen was about to leave. At the same time, he had a trace of uneasiness on his face.

Opening his mouth to borrow something from Tang Zhen was something that he had never thought of before. However, the current situation was special. He could only brace himself and open his mouth.

The relationship between his family and Tang Zhen was extraordinary. This was why he dared to ask. Even if Tang Zhen was unwilling, he would definitely not make things difficult for him.

The other cultivators also revealed an expression of anticipation. They looked at Tang Zhen nervously as if they were afraid that he would reject them.

In that case, they would have to abandon a large number of treasures, and they would probably be heartbroken to death.

“If you’re borrowing storage equipment from me, it means that your storage equipment is already full, and you still have a lot of treasures you don’t want to give up.

If that’s the case, you’ve made a fortune this time, and this trip is definitely not in vain!”

Tang Zhen’s eyes swept over everyone as he softly laughed. His tone was slow and calm.

Qian Chongyun and the rest laughed. Clearly, the matter was as Tang Zhen had said. They had gained quite a lot this time around.

All of his storage equipment had been filled to the brim, and there were no more spoils of war.

There was no other reason for him to ask Tang Zhen to lend him his storage equipment when he coincidentally met him.

There was no need to hide these things. With Tang Zhen’s identity and strength, he would not be interested in these gains of theirs.

“If you guys can’t do it, can’t he do it too?”

Tang Zhen extended his hand and pointed at ah Feng as he spoke with a slightly strange tone.

A ‘Feng’s heart jolted when he heard this. However, he quickly recalled Tang Zhen’s identity and knew that he had no secrets in Tang Zhen’s eyes.

Even his fortune was given to him by Tang Zhen. He should be grateful.

“Sir Tang Zhen, my authority level is not high enough. Therefore, I am unable to exchange for it from the market.”

After hearing ah Feng’s explanation, Tang Zhen suddenly came to a realization. So this was what happened.

Tang Zhen casually took out a ring and threw it to Qian Chongyun. He said with a faint tone, I’ve used this equipment for a period of time. The space is enough for you all to use. It won’t be a problem even if you store the entire void monster inside.

I’ll give you the equipment. All of you work hard. I hope that one day, I’ll be able to see you lead your troops into battle!”

When the cultivators heard this, their expressions turned serious. Then, they shouted, "I won't disappoint your expectations!"

"Very good, I'll be waiting for that day!"

Tang Zhen laughed out loud when he saw this. He used an encouraging gaze to sweep over everyone. After which, his body soared into the sky and disappeared in an instant.

Chapter 2287 Returning to the scarred territory

The battle was coming, and everything had changed. Everyone they saw along the way was in a tense state.

The 153rd defense area was even more so now.

The huge defensive area had changed its style. Items that were filled with the style of the technology plane appeared in this world that had no connection with technology.

The dozens of meters high jelly-like protective wall seemed to be trembling slightly with the wind. It seemed to be easy to break, but in fact, it had a very strong defensive ability.

Be it energy or physical attacks, it could easily resolve them. It could even directly devour the enemy who tried to attack.

After the enemy was swallowed into the wall, they would be digested in a very short time and become the growth nutrients of the jelly protective wall.

This included all kinds of energy attacks, which were also nutrients for the Jelly's strong defense, allowing it to grow better and faster.

Similar strange war equipment would appear in front of them from time to time, and it was a refreshing sight.

Many of these special items were still in an experimental state. If they were proven to be useful, they would be further developed.

If they were of no use, they would be eliminated immediately to prevent further waste of resources.

The innovative ability of the Lou Cheng cultivators in the sacred Dragon Warzone was ranked among the top in the 3000 warzones. They were not pure martial artists.

While they were invading the major planes, they were also actively excavating the plane's resources and looking for items with various magical abilities.

This wasn't an indolence, but rather a rather positive state of constantly improving one's combat strength.

For example, the resources collected in the divine Kingdom also included these items. Just like the heavenly materials and earthly treasures, they could all be classified as treasures.

The four-winged birds and the six-winged bird King that were frequently used in the various defense areas were all trapped by energy chains and stuffed into huge cages.

It wouldn't take long for them to enter a new world where the sky was much wider.

As the base of Lou Cheng cultivators in the divine Kingdom, the defense of area 153 was naturally much stronger than other places.

Previously, when the sea monsters were charging madly, defense area 153 was one of the few places that did not fall. They even turned around to chase the sea monsters.

As for the number of sea monsters killed, it was impossible to count. From the beginning to the end, no sea monster had successfully landed.

In the face of the cultivators of loucheng city, these monsters, which relied on their fangs and claws as weapons, had no ability to resist at all.

This was the suppression of strength. If there were no special reasons, it would be easy for Lou Cheng's cultivators to destroy the divine Kingdom.

With the appearance of the void monster, all the defensive weapons in the defense area had been activated. As soon as they discovered the trace of the monster, they would immediately attack.

During this period of time, the cultivators in loucheng city naturally had to race against time and try to complete the material collection before the void monster arrived.

Therefore, when Tang Zhen returned, what he saw was a busy scene with all kinds of vehicles shuttling back and forth.

According to the command center's request, Lou Cheng had already mobilized people and started to collect precious materials.

The cultivators of Lou Cheng would definitely not be interested in the ordinary materials, so they would naturally collect more precious things.

The Lou Cheng cultivators had a lot of experience in searching for such materials, and they also had a variety of methods.

The efficiency of the collection was amazing. From the surface to the core, from the sky to the ocean, there was absolutely no area that was missed.

It could be said that after the cultivators of Lou Cheng had searched through the place, they would not miss out on any treasures. The cultivators of Lou Cheng might not even be interested in the remaining treasures.

After returning to the defense area, Tang Zhen went to the command post and browsed through the battle situation information that was sent back.

The situation was not looking good. There were more and more void monsters inside the divine Kingdom, and it had reached a point where it was out of control.

At the outer region of the God Kingdom, there was also a sea of void monsters gathered, and they were constantly pouring into the God Kingdom.

“According to the speed of the void monster’s devouring, it will take at most a month for the God Kingdom to completely collapse.

The matter has already been settled, and there is no possibility of salvaging it. The only thing we can do now is to try our best to recover our losses, Yingluo.”

As Tang Zhen spoke, a group of cultivators from Lou Cheng stood around him. All of them were quite strong.

They were the commanders of this war. They could make plans and strategies, and they could also go into battle in armor. It could be said that they were well-versed in both literature and military.

Although they led thousands of troops, these commanders were all very respectful in front of Tang Zhen.

Whether it was strength or status, Tang Zhen was an existence that they looked up to. Not to mention, most of the cultivators in Loucheng city were old subordinates who had followed Tang Zhen in all the battles.

They could trust each other unconditionally and even trust each other with their lives.

There was a special person in charge of the divine Kingdom battlefield, so Tang Zhen did not need to worry about anything. Therefore, after a short stop, he returned to the fifth battle area through the transmission tunnel.

As a result, just as he walked out of the transmission passage, Tang Zhen saw a large group of cultivators from other territories. They were walking towards the passage in a hurry.

In the teleportation square of the cracked territory, the long-distance teleportation array kept flashing, and groups of cultivators walked out.

From the badges on these cultivators, it was easy to determine their origins. They were all cultivators from the territories of star spirits and Zhan Kuang.

They had rushed over in a hurry. It was obvious that they were going to enter the divine Kingdom through the transmission tunnel.

This caused Tang Zhen to be slightly surprised. At this moment, the God nation was in a mess. After these cultivators entered the God nation, they would inevitably have to fight with the void monsters.

“Don’t tell me they’re gathering people to help me?”

This thought appeared in Tang Zhen’s mind, but he immediately rejected it. This was because the fate of Scandinavia had already been determined. There was no need to salvage it.

Even he had given up on his God’s kingdom and was ready to leave the battlefield. How could the two lords not see this?

they must be using this opportunity to learn how to fight void monsters and accumulate actual combat experience.

Tang Zhen couldn't help but chuckle when he thought of this. As expected, he had come across an opportunity to take advantage of others. Even a dignified creator wouldn't miss this opportunity.

However, this was also good. At least before the kingdom of God was destroyed, it could provide the cultivators in Lou city with a chance to learn how to fight. It was a good thing.

After quietly observing for a while, Tang Zhen entered the tower and went straight to the cornerstone Hall.

At this moment, there were a few cultivators exchanging in the cornerstone Hall. However, when they saw Tang Zhen enter, they saluted and left.

If their Lord was in trouble, they naturally had to avoid him and didn't need to be reminded.

Tang Zhen gently nodded his head. He waited until all the cultivators in the building had left before slowly walking to the front of the foundation stone platform.

"Foundation stone platform, I'm Tang Zhen."

After his consciousness connected to the cornerstone platform, Tang Zhen called out to the cornerstone platform and requested to have a direct conversation.

After waiting for a few dozen breaths, the sound of the cornerstone platform rang out. It was still filled with an indescribable sense of vicissitudes.

Chapter 2288 The reason and compensation

"Lord Tang Zhen, the reason you took the initiative to contact me this time is to ask about Scandinavia, right?"

From the moment Tang Zhen summoned it, the cornerstone platform knew Tang Zhen's intention. He must have discovered the secret of God nation.

The cornerstone platform did not play dumb. This matter was nothing to it.

If he wanted to find out the reason, he had to let Tang Zhen understand it and not have doubts and resentment.

From the tone of the cornerstone platform, it's obviously waiting for me to come and ask. It seems that the situation isn't as bad as I thought.

Tang Zhen's thoughts were actually different from the judgment of the cornerstone platform. At this moment, he had already thought things through.

What had already happened was destined to be irreversible, so there was no need to make everyone unhappy.

Although he still wanted an explanation, it didn't mean that it had to be reasonable. As long as it was reasonable, it would do.

It was a perfunctory explanation. It could be said that the cornerstone platform did not inform him in time after making the decision.

Of course, such an explanation was too perfunctory. Since the Golden Eye Lord knew about this, how could he not have time to tell Tang Zhen?

In the end, they were still afraid that Tang Zhen would not agree to this matter. Therefore, they temporarily hid it from him and carried out the plan.

After the plan was successfully executed, even if Tang Zhen knew what was going on, he would choose to deal with it calmly after knowing that the matter could not be reversed.

If they didn't find anything, that would be great. The cornerstone platform would even save the trouble of explaining.

Of course, the possibility of this happening was very low. Not every Lord was like the battle maniac Lord, who did not like to use his brain to think about problems.

In fact, Zhan Kuang Lord wasn't stupid, and Tang Zhen wasn't stupid either. Everyone was an understanding person, so there was no need for any nonsense.

The cornerstone platform's direct inquiry was within Tang Zhen's expectations. According to his understanding, the cornerstone platform had always been a straightforward person.

To it, it had no scruples at all, and it did what it should do.

This was the confidence brought by great strength. For the cornerstone platform of the fifth battle area, there was no problem that it could not solve.

"That's right. I did find something amiss. For example, the Golden Eye Lord's abnormal behavior and the void monster that appeared out of nowhere.

I want a reasonable explanation for these unreasonable situations."

Tang Zhen's expression was indifferent, and one could not see the slightest anger.

When one's cultivation base reached the level of a creator, one's mental state was already close to neither sadness nor joy. Moreover, this incident didn't have much of an impact on Tang Zhen.

There were endless opportunities, and if one missed it, there would be a next time. If the Holy Dragon Warzone wanted to develop and grow, the harvest of a divine Kingdom alone was far from enough.

"The reason we changed our plan at the last minute is that the Aboriginal God is not weak, and he also knows information about a super plane.

I don't know if you know anything about the Super planes, but if you've come into contact with them, you'll know that all items from the Super planes have extremely wondrous abilities.

Although the fifth battle area was powerful, they were still very concerned about this extremely rare super plane.

If they could enter the Super plane and obtain enough treasures, it would be of great help to the battle zone's strength.

It's rare to come across information about super planes, so we can't miss it easily. The indigenous gods are the key to all this."

Tang Zhen nodded. Before he entered God Country, his understanding of the Super plane was limited. It could even be said to be very vague.

However, after obtaining the little bird from the Firerock and the strange item that could manifest the heart's devil, he already had the most direct understanding of the effects of the treasures of the Super plane.

It wasn't unrivaled, but its ability was quite strange, making it impossible to guard against.

It was just an item from a super plane, yet it had such a terrifying ability. One could imagine how mysterious and powerful the mysterious super plane was.

The more powerful a plane was, the more benefits one would obtain after conquering it. This was an undisputable fact.

The nature of the world of towers was to constantly plunder other planes and obtain resources to strengthen itself.

Encountering such a super plane, he naturally wouldn't easily miss it. Instead, they would think of ways to conquer and plunder it.

It would be abnormal if he remained indifferent. The cultivators of loucheng city were never cowards, so how could they miss such a fat meat that came to their door?

Tang Zhen involuntarily shook his head when he thought of this. He secretly sighed at his lack of consideration.

When they knew that the native gods were involved with the Super plane, they should have immediately realized whether the cornerstone platform would be interested.

Perhaps the cornerstone platform had already noticed this when he was the middleman and made the two sides reach an agreement.

It was laughable that he was still fulfilling the contract and did not know that the cornerstone platform had no intention of leaving behind a divine Kingdom from the beginning.

Looking at the current situation, the first step of the plan had been completed, and the Aboriginal deities would enter the world of loucheng sooner or later.

This was only the simplest part. The truly difficult part was how to attack the Super plane.

To conquer such a high-energy world was undoubtedly an extremely difficult task. Every step had to be taken seriously.

If necessary, they might even mobilize the entire war zone's power to attack the superior plane.

Tang Zhen revealed a pondering expression. The voice of the foundation stone platform sounded once again, explaining the reason for continuing this matter.

“In this case, the Aboriginal deities have become very important, and we must have them under our control.

If he were to wake up and regain his original strength, he would definitely be able to easily escape from the control and hide, making it very difficult to find him again.

After realizing this, the elders in the war zone finally decided to destroy the divine Kingdom and take complete control of the indigenous gods after an emergency discussion.

Only by leaving him in the fifth battle area could he ensure that the indigenous God could not escape, and then find a way to obtain information about the Super plane from him.

This is the cause and effect of this entire matter. Because this decision will damage your interests, the elders Council decided not to inform you so that you won't be unable to accept it and obstruct it.”

Tang Zhen could not help but laugh involuntarily when he heard this.

In the eyes of these elders, this new Lord was so insensible that he would go against the decisions of the Warzone just because of the loss of his interests.

If that was the case, he, Tang Zhen, might not have been able to reach this step today.

because after this plan is carried out, it will affect you Lords who have signed the contract, so the cornerstone platform will make up for it in certain aspects.

Because you've suffered the greatest losses, I can make the decision to give you another portion of divine source as compensation.

This compensation is already quite sincere, and it will definitely not be less than what you can get in Scandinavia. I wonder if Lord Tang Zhen is satisfied?”

Tang Zhen inhaled a deep breath of air. Soon after, he gently nodded his head. A trace of surprise flashed across his eyes.

The foundation stone platform actually compensated him with a portion of divine source. This had exceeded Tang Zhen's expectations. One must know that this item was extremely precious and was enough to make countless sector Lord experts fight over it.

Having one more of such an item was equivalent to having another creator in the Holy Dragon battle zone. This was simply a good thing that they could not ask for more.

Only by reaching the level of a native God could one use their own divine source to help a sector Lord become a creator.

Tang Zhen's realm wasn't high enough and he couldn't help the sector Lord level up. The Golden Eye Lord was still one step away and couldn't do it either.

There were Masters of creation in the fifth battle area who could do it, but they had to pay a great price and would not provide help easily.

If this was the case, Tang Zhen's trip to the divine Kingdom this time could already be considered as a huge profit. How could he have suffered any loss?

Chapter 2289 Zone ranking battle.1

The compensation that he received had already greatly exceeded Tang Zhen's expectations. He naturally had no more complaints.

From this, it could be seen how rich the cornerstone platform was. The things that Tang Zhen thought were extremely precious were directly taken out by the cornerstone platform as compensation.

The richness of the family's wealth was simply unimaginable!

Although the compensation from the other Masters of creation might not be more than Tang Zhen's, it might not be worse.

The native God would never have dreamed that the cornerstone platform would have such courage. Even at the risk of breaking the contract, it would find a way to firmly control him.

From today onwards, although he was saved from death, he was destined to have no freedom.

As for the punishment for breaking the contract, there were actually many ways to avoid it. Compared to the compensation, it was not even worth mentioning.

This matter could basically be considered to have come to an end. What Tang Zhen had to do next was only to deal with the aftermath.

However, there were some things he still had to figure out. After all, this matter was related to the Supreme plane, and he might have a chance to participate in it.

If the cornerstone platform rejected his participation, then Tang Zhen would think of a way himself and would definitely not miss this opportunity.

if we obtain accurate information about the Supreme plane, when will the war zone take action? what are the requirements for the participants? ”

Don't expect things like benefits to come to you on their own initiative. Instead, you should fight for it as much as possible.

Otherwise, you clearly have a chance, but because you don't take the initiative, you will eventually miss it.

Everyone wanted opportunities, and it was impossible for them to only be in love with you. Only those who were extremely lucky would have good things coming one after another.

However, for cultivators who were free from the restrictions of the rules, luck had little effect on them.

The Masters of creation would try their best to avoid contact with luck that they couldn't control.

If he could be affected by good luck, he could also be affected by bad luck. If he thought about it carefully, he would feel that the disadvantages were greater than the benefits.

As for the question raised by Tang Zhen, it actually involved the secrets of the 5th battle area. The cornerstone platform could completely refuse to answer.

Tang Zhen had only casually asked, but he did not expect the cornerstone platform to give him the same answer. It was as if it had already expected him to ask this question.

“We can’t rush this matter. According to the elder Council’s discussion, it’s best to take action on the Super plane after the war zone rankings are over.

One had to know that occupying a super plane wasn’t something that could be done overnight. If they took action now, they would definitely take up a large number of people.

When the war zone rankings are released, the people attacking the Super plane will be unable to be transferred back, which will definitely have a major impact on the entire war zone.”

This was actually better, as it would give him more time to prepare. Otherwise, if he rushed into battle, he might not gain anything.

After thinking for a while, Tang Zhen asked again, “the war zone rankings are about to be released. As a member of the 5th battle zone, I naturally have to do my part.”

If there’s anything you need me to do, can you tell me in advance so that I won’t be caught off guard?”

Tang Zhen didn’t have much interest in the Warzone rankings. He had always held the attitude of a bystander.

Although the cracked territory could also get the benefits of being ranked at the top of the Warzone, there were not many.

Only those old territories and foundational platforms cared about this ranking.

This was a matter of glory and reputation, as well as the benefits of being ranked higher. It was far more important than a plane invasion.

Cultivators loved to fight, and when they encountered such a situation, they would definitely do their best to fight for it.

“You’ve just joined the fifth battle area, and it hasn’t been long since you became a cultivator, so I guess you don’t know much about the battle area ranking battle.

It’s even possible that in your heart, you’ll think that you have little to do with this matter, so you’ll just look on coldly from the side.”

Tang Zhen was slightly startled. He frowned as he looked at the foundation stone platform. His expression was slightly gloomy.

“Don’t misunderstand. I’m not trying to pry into your thoughts. I’ve seen too many similar situations.

I can tell you clearly that the Warzone rankings are not unrelated to you, but are closely related!

When the battle zone rankings begin, new members like you will have to participate.

When that time comes, you will be shouldering the entire war zone’s honor and disgrace. The responsibility you bear is incomparably heavy.”

Tang Zhen couldn't help but feel slightly surprised when he heard the cornerstone platform say this. He even faintly felt that it was inconceivable.

Although Tang Zhen was very confident in his own strength, he wasn't a conceited person. Did he know that there were many cultivators in Loucheng who were stronger than him?

At the level of a creator, he was just a newbie. He hadn't even stabilized his realm yet.

Under such circumstances, having him compete with those old-school masters of creation was simply sending himself to the door to be abused!

This kind of thing had to be made clear, or else it would be like a sharp blade hanging over one's head, making one feel uneasy.

Why do you want a newbie like me to participate in the battle? Are the old masters of creation just watching from the side?"

Tang Zhen was very puzzled as he asked the cornerstone platform.

"Lords who are stronger than you will naturally participate in the competition, but they are of different ranks and won't have much interaction with each other.

No one was a fool, so why would they give it away to their competitors?

Therefore, even if you participate in the competition, the opponents you meet will be of similar strength to you, and there won't be too much of a difference between them.

In the 3000 battlefields, the creator-level powerhouses were all concentrated in the top 1000 battlefields.

The strength of the Masters of creation in these battlefields is basically similar to yours, and they belong to the level of low-level gods.

Your competitors are naturally these cultivators."

"What's the point of the competition between low-ranked deities when there's a high-end combat force?" Tang Zhen asked again.

From Tang Zhen's point of view, this kind of competition was completely dispensable and could not prove anything.

Of course it's meaningful," the cornerstone platform said. If the lower-ranked battlefields want to advance, they must rely on competition.

The purpose of your participation is to create pressure for those Lou Cheng cultivators in the low-level battlefields. It's definitely not an easy thing for them to improve their ranking in the battlefields.

At the same time, you have to compete with the higher-ranked battle zones and try to defeat the cultivators in those battle zones to get a better result.

Therefore, don't think that you're dispensable. Perhaps it's because of you that the entire battle zone's ranking rose or fell!"

The tone of the cornerstone platform was very serious, which made Tang Zhen immediately realize that this matter was definitely not a joke.

However, he still didn't quite understand. The content of the competition was completely different from what he had imagined.

Shouldn't he command an Army to invade the plane and then choose the final winner?

When Tang Zhen raised such a question, the cornerstone platform immediately gave an answer. It seemed to be very patient.

there are thousands of loucheng participating in the ranking competition. What kind of plane do you think can withstand the full attack of the entire world of loucheng?"

Tang Zhen could not help but laugh involuntarily when he heard this.

Even the Super plane, which he was afraid of, was nothing in front of the entire world of loucheng.

If the chosen target was a raw egg, then the battlefield was thousands of bullets.

Thousands of bullets were fired at a fragile raw egg at the same time. It was even more excessive than killing a chicken with a butcher's knife.

Chapter 2290 The unknown competition

"So that's how it is. It seems like I was wrong!"

Tang Zhen's face revealed an expression of sudden realization. It turned out that the battle zone's ranking competition wasn't the kind of bloody killing that he had imagined.

Thinking about it carefully, it was reasonable.

Fighting on the battlefield was the Forte of Lou Cheng cultivators, so there was no point in competing.

Furthermore, they were all on the same side, and they were all Masters of creation. It was not good for them to fight each other.

In the process of fighting, if a cultivator was injured and formed a grudge, it would not be worth it.

The cornerstone platform continued its introduction. Tang Zhen was a newcomer, so there were some things that he had to know.

"No one knows about the content of the battle zone ranking competition beforehand. Even the foundation platforms of the various battle zones have no information.

Therefore, the only thing the participants had to do was to wait quietly until the last moment.

As a contestant who must participate in the competition, I suggest that you cultivate your body and mind for a while and don't make any big moves to avoid any unforeseen circumstances.

Otherwise, once the competition starts, and you're not in a good state, it will definitely affect the final result."

Although the cornerstone platform said it was a suggestion, it was actually a warning. It was estimated that in the near future, the cracked territory would not be able to receive any missions from the cornerstone platform.

With Tang Zhen's strength, there shouldn't be anything that could threaten him if he didn't go to a dangerous place.

Tang Zhen was indifferent. It was merely a few years' time. He could afford to wait.

&Nbsp; he could use this time to stabilize his foundations and build up his own divine Kingdom.

This was the foundation of the Masters of creation, and it would have a great impact on the later stages of the cultivators in loucheng. They definitely couldn't be perfunctory.

As for the other things, he could put them aside or take his time to do them.

"I understand. Thank you for answering my questions."

After softly thanking him, Tang Zhen cut off the connection with the cornerstone platform and turned to walk out of the cornerstone Hall.

The problem with the divine Kingdom had yet to be resolved. There were still many things to be dealt with. Tang Zhen had to return to the battlefield.

Following the transmission channel and entering the middle-turn plane, he saw countless cultivators gathered there, many of whom were believers from the divine Kingdom.

They looked at their surroundings in shock. They never thought that they would be able to leave the divine Kingdom one day and come to the outside world.

The loucheng cultivators from the other two territories had already entered the divine Kingdom and were ready to meet up with their Lords.

Near the exit of the plane's passage, Lou Cheng's cultivators also deployed a large number of troops to prevent void monsters from rushing out of the passage.

Of course, the possibility of this was very low. It must be known that if a void monster wanted to enter the plane channel, it must first break through the 153rd defense area.

When that time came, even if the cultivators of Lou Cheng closed the passage, they would never let the void monsters come over.

Tang Zhen had also thought about it before. What kind of scene would it be if the void monster entered the tower world?

After thinking about it, he still felt that the possibility was not high. With the strength of the cornerstone platform, it would not give the void monsters any opportunity to take advantage of it.

Even if the void monster really entered the God's kingdom, it might not be a disaster. Such a terrifying creature that could destroy countless worlds might be hunted down by the cultivators in loucheng.

The loucheng cultivators from the other two territories rushed to the God Kingdom excitedly just to accumulate experience in fighting void monsters.

It was obvious that they did not take the void monster seriously. Otherwise, they would not have such an attitude.

The cultivators in loucheng city made such a big commotion that it alerted the indigenous people near the transfer station. They gathered outside the huge wall with pious expressions on their faces.

In the eyes of these indigenous people, the cultivators in the city were the messengers of the gods, the objects of their worship.

However, they didn't know that the God they believed in, as well as the God's kingdom that was described as incomparably beautiful, had now fallen into a state of collapse.

It wouldn't be long before it completely disappeared.

As for the God they believed in, he was in a deep sleep and might lose his Freedom Forever.

The world that truly belonged to the gods was definitely not as beautiful as one would imagine. It was even terrifyingly cruel.

Those beautiful things were just the imagination of the weak. Once they stepped on the real road of cultivation, they would find that the reality was completely different from their imagination.

But even so, there were still countless mortals who were like moths to a flame, stepping on this path without hesitation.

All he wanted was to change his fate, or to control his own fate. He did not want to be like an ant, silent from life to death.

When Tang Zhen's figure appeared in the sky, the indigenous people outside were first stunned. After which, they let out excited exclamations and knelt on the ground, kowtowing and begging.

Listening to the content of their words, it was nothing more than begging Tang Zhen to take them on the road of cultivation and was willing to pay any price for this.

Tang Zhen's gaze swept over the Aborigines outside the wall. He gently shook his head and entered the passage.

The cultivation aptitudes of these pleading indigenous people were pitifully poor. Even a believer warrior in the divine Kingdom far surpassed them.

Tang Zhen had originally planned to give them a chance. However, from the looks of it now, there was really no need to do so.

After passing through the plane channel, Tang Zhen entered the 153rd defense area.

As soon as he left the passage, he saw a group of cultivators gathered in the huge square in front of him.

These cultivators belonged to the three territories and the sacred Dragon Warzone. At this moment, they were all gathered together and got along well with each other.

This was also one of the commendable advantages of the cultivators of Lou city. Even if they did not know each other, as long as they were together for a mission, they could work together without any worries.

At this moment, they weren't on a mission. Instead, they were watching an auction.

"Everyone, come and take a look. This void treasure beast is fat and its belly is round and bulging. It's obvious that it has eaten a lot of good things.

A void treasure-hiding beast like this would definitely have a lot of treasures in its body, but no one could be sure of the exact number before opening it.

If anyone wants it, then join our auction. Whoever offers the most battle merits will get this void treasure beast!"

Under the gazes of the cultivators in Lou city, Qian Chongyun pointed at the corpse of the void monster on the square and introduced it loudly like a merchant.

Beside them, Mo Ziqi, Tang Hao, and the others were guarding a pile of energy gems. They told the onlookers that these gems had all come from the void treasure beast.

In fact, even without their introduction, the cultivators in Loucheng city knew about it because the news about the void treasure beast had already spread among them.

The cultivators of Loucheng city who had stopped the void monsters at the Grand temple earlier had picked up a large number of energy gems and were now rich.

The cultivators who didn't get it were naturally envious and jealous. At the same time, they also hoped that they would be lucky enough to encounter the void treasure beast while they were fighting the void monster.

Unfortunately, these monsters were very rare and very cunning, so it was not easy to encounter them.

At this moment, a group of cultivators from Loucheng city was auctioning off the corpse of the void treasure beast. This naturally attracted the attention of the cultivators from Loucheng city and they gathered around subconsciously.
