

Alternate 2291

Chapter 2291 Encountering a treasure beast at the auction on the way (1)

Looking at Qian Chongyun, who was trying his best to promote the void treasure beast like a peddler, Tang Zhen felt that it was especially interesting.

After killing the void treasure beast, these guys didn't open the chest to take the treasure, but chose to auction it on the spot.

It was obvious that they were desperate for battle merits, so they chose to use this method to obtain them.

This situation was most likely related to the mercenary support system on ah Feng. It was a bottomless pit that devoured battle achievements.

It might be more appropriate to call it a pay-to-win system. While it provided high-quality services, the fees were naturally not cheap.

After going through a series of intense battles, Qian Chongyun and his men's battle merits had probably been used up.

The auxiliary system didn't have the function of recycling, so they could only watch as their battle credits were constantly consumed without being able to replenish them.

As for the battle achievements obtained from the mission, they could only be calculated after the mission was completed. It could be said that distant water could not quench present thirst.

Exchanging treasures for battle credits was their only choice.

Although they could also exchange energy crystals for battle credits directly, not everyone had such a need. Moreover, this method of transaction was time-consuming and laborious.

After thinking about it, this method of auction could be exchanged for the most battle merits, and it was also the simplest and most convenient.

The cultivators in Lou Cheng actually liked this kind of gambling activity very much. This could be confirmed by their current attitude.

When he saw this scene, Tang Zhen could not help but recall the days of the Holy Dragon city's stone gambling auction. In order to obtain a piece of spirit Jade, the participating competitors were truly willing to spare no expense.

Tang Zhen's state of mind had also become extremely relaxed because the overall situation had already been decided. At this moment, he had encountered such an interesting matter. Naturally, he would quietly become a spectator.

As Qian Chongyun announced the base price, the cultivators in Lou Cheng city quickly shouted out new prices one after another.

The atmosphere immediately became heated. The cultivators of Lou Cheng, who didn't know each other before, all opened their eyes wide and began to bid.

The cultivators of loucheng city who were watching whispered to each other, their faces full of interest.

Qian Chongyun, who was in charge of the auction, was even more excited. He stood on the head of the void treasure-hiding beast and raised the atmosphere with a loud voice.

this brother from the star elves 'territory has bid 550000 battle credits. Are there any higher bids? "

Seeing that the cultivators of loucheng didn't bid, Qian Chongyun reached out his hand and grabbed the ground. An energy gem fell into his hand.

Qian Chongyun raised the egg-sized energy gem and showed it around. He continued to shout, "I don't think I need to say more. You all know that the stomach of the void treasure beast is full of these energy gems.

Perhaps to all of you, this item is no longer of use, but to your subordinates and juniors, this is the best tool to increase their strength.

But here, as long as you dared to invest, you could get a lot of Power Gems. It was definitely worth it.

If we don't want to take the risk, we will also sell them at a clear price. However, the quantity is limited, and the price is not cheap.

If anyone wants it, don't hesitate. Once you miss this opportunity, I'm afraid you won't be able to encounter such a good thing again!"

As soon as Qian Chongyun finished speaking, a cultivator from loucheng city raised his hand and made a new bid.

"One million, I'll pay one million!"

Good things never had to worry about being sold, not to mention the fact that energy gems were rare. These cultivators from Lou Cheng were very knowledgeable, so how could they miss such an opportunity?

Compared to buying it with a clear price tag, they were more willing to bet on it. Perhaps they could make a big profit.

As long as the bidding was controlled, even if the beast didn't have that many Power Gems in its stomach, they wouldn't lose much.

After an intense bidding war, this void treasure beast was successfully traded and was won by a group of cultivators from Zhan Kuang's territory.

This group of people had a rough personality, and the auction was like a war. As long as someone competed with them, they would immediately open their eyes wide and offer a higher price.

As expected of the subordinate of the battle maniac Lord. Such a temperament was very similar to that of the Lord.

"Alright, brothers and sisters, this void treasure beast already belongs to these friends from Zhan Kuang's territory.

if you wish to obtain a void treasure beast, please pay attention to the relevant information at all times. We will be auctioning another void treasure beast here in 50 hours!

May I ask these friends from the territory of Zhan Kuang, do you want to directly take away the void treasure beast, or do you want to open its chest and take the treasure on the spot?"

The cultivators from battle fanatic's territory heard this and immediately waved their hands, indicating that they would be taking the treasure on the spot.

This was more convenient. Besides, they didn't have such a large storage equipment that could store a void treasure beast that was hundreds of meters long.

The storage equipment that Tang Zhen had given him was extremely rare even in the tower world, and it could be considered a precious treasure.

Even if ordinary cultivators in loucheng had storage equipment, they would not have such a large storage space.

When they heard that they were going to open the chest to get the treasure, the cultivators of loucheng, who were about to leave, gathered again with interested expressions.

After the intense auction, they all wanted to see what kind of treasure was hidden in the stomach of the void treasure beast.

At the same time, he wanted to confirm whether the auction price was worth it and satisfy his curiosity.

"Brothers, do you want to do it yourself, or do you want me to help you get the treasure?"

Qian Chongyun was all smiles as he looked at the huge amount of battle merits that the other party had transferred to him. He then asked in a very enthusiastic manner.

Due to their good luck, they encountered a group of void treasure beasts and successfully killed them all.

In this process, ah Feng's contribution could not go unnoticed. Through the system he had on him, he had managed to exchange for a lot of useful equipment in time.

Of course, if one wanted to exchange for items, they had to have enough battle credits. In order to kill this group of void treasure beasts, Tang Hao and the others had used up all their battle credits.

While they were happily collecting the spoils of war, they had met Tang Zhen by chance. After that, the matter of Qian Chongyun borrowing his storage equipment happened.

At that moment, Qian Chongyun already had the idea of auctioning them off, but he couldn't bring the bodies of the void treasure beasts away.

Tang Zhen's appearance could be said to be a great help, allowing the follow-up plan to be smoothly implemented.

At this moment, he still had a few void treasure beasts in his storage equipment. He was going to auction them all for battle credits.

After they exchanged for enough battle merits, they had a bigger plan to carry out, and the purpose of this was naturally to obtain more rewards.

“You don’t need to do it, we can do it ourselves.”

The cultivators of battle maniac’s territory looked at the treasure beast in the air, deep in thought, as if they were trying to figure out how to deal with it.

They didn’t know much about the void treasure beast, and they didn’t know where the power Gems were hidden in such a huge body.

Seeing this, Qian Chongyun immediately explained, “This beast’s body is covered in scales with natural runes. There’s an area on its abdomen where the scales are very bright.

The spatial treasure bag of the void treasure beast is in this area. As long as you break the skin here, the spatial treasure bag will automatically jump out because of the pressure.”

Qian Chongyun said as he gestured. After killing a group of void treasure beasts, they were now very experienced.

Upon hearing this, a few cultivators from battle maniac’s territory immediately followed Qian Chongyun’s instructions and cut open the outer skin of the beast.

With a flash of light, a huge meatball bounced out of the hole.

The moment it flew out of the void monster’s body, the meatball seemed to be overwhelmed and suddenly shattered.

Piles of energy gems suddenly appeared in the air and fell down.

Lou Cheng, the cultivator from the battle maniac territory, stared at the energy gem that buried him in the ground with his eyes wide open. Then, he burst into laughter.

They had profited greatly from this deal!

Chapter 2292 Qian Chongyun’s big plan (1)

wow, there’s such a huge pile of energy gems. It’s like a small mountain!

these barbarians from the battle fanatic’s territory are really lucky. They’ve definitely earned a lot!

sigh, if I had known earlier, I would have continued to raise the price. Now, I’ve let these guys have it easy.

there’s no medicine for regret in this world. There’s nothing I can do even if I miss it. I can only wait for the next auction!

Looking at the pile of energy gems on the ground, the cultivators in Lou Cheng started to discuss among themselves. There were simply too many energy gemstones, so many that the cultivators in the building were surprised, which was why they were sighing.

Some people were envious of the buyer’s good luck, while others felt that Qian Chongyun and the others were out of their minds.

Based on the number of Power Gems they had, they were definitely at a disadvantage. Fortunately, it wasn't a particularly bad loss.

If this pattern continued to develop, the more void treasure beasts were sold, the more losses Qian Chongyun and the others would suffer.

"Anyone could have thought of this, could they not have?"

When the cultivators of Lou Cheng thought of this, they subconsciously sized up Qian Chongyun and the others. They realized that these guys were all very smart and didn't look like fools.

It could only be said that the buyer was not as good as the seller. No matter how he calculated, the seller would definitely not lose money.

As for how Qian Chongyun and the others were going to make a profit, he probably didn't think of it or he had other plans.

No matter what, this auction was worth it. If there was a next time, the cultivators of Lou Cheng would definitely participate.

A few cultivators from the battle fanatic territory were so happy that their teeth could not even be seen. They excitedly picked up the energy gems on the ground and exclaimed that this trip was not in vain.

They had just arrived in the God's kingdom, and they had already encountered such a good thing. This made them full of anticipation for the rest of their journey.

If he could fill his storage equipment with treasures, then this trip would be worth it. This was not a pipe dream, but a fact.

The divine Kingdom was on the verge of collapse, and the entire world would be abandoned. All kinds of treasures were in a state of ownerless, allowing the cultivators in the city to plunder them.

When the Aboriginal deities had built their divine kingdoms, they had invested a large amount of divine source and had materialized them as physical entities through their thoughts.

However, when the God's kingdom collapsed, the divine source would be restored, and it could also be transformed into various treasures in special forms.

As long as one was lucky enough and encountered one or two treasures, the harvest would definitely not be inferior to killing a void treasure beast.

In fact, the reason why Zhan Kuang Lord and the others had summoned their subordinates here was not because they did not have the intention of letting their subordinates make a fortune. After all, Scandinavia was about to collapse, and it would be a waste if they did not take it away.

Sending the residents of his territory to participate in the war could not only increase his experience in fighting void monsters, but also reap some benefits while at it. He could also earn a large number of battle achievements. Why not do such a good thing?

From another point of view, this could also be considered as helping Tang Zhen by slowing down the speed of the void monster's destruction.

Even if Tang Zhen knew about this matter, he would definitely not have any opinions. In fact, he would even wish that more cultivators from the two territories would come.

As the auction ended, the cultivators in Lou city dispersed, and the huge square began to become empty.

Tang Zhen, who was originally standing at the back of the group, had revealed his figure at this moment and was noticed by the sharp-eyed Qian Chongyun.

With a hint of excitement on his face, Qian Chongyun immediately walked over and bowed to Tang Zhen.

“We pay our respects to Your Excellency Tang Zhen.”

Tang Zhen laughed softly and nodded to Qian Chongyun

no need to be so polite. I see that all of your team members are here and you’ve killed so many void treasure beasts. It seems that you’re quite lucky.

The void treasure beast was not weak, and it was very cunning, so it was very difficult to kill it.

Qian Chongyun and the others were able to kill it without any casualties, which was already a very lucky thing.

As for why their luck was so good to be able to encounter so many void treasure beasts, Tang Zhen was not very clear and did not want to investigate too deeply.

Everyone had their own secrets and didn’t want others to know. Since that was the case, why should they be the bad guys?

He was sure that these young cultivators were Dragons and phoenixes among men, and they would be famous in the world in time.

Of course, the premise was that he didn’t die in an accident. Otherwise, no matter how talented he was, he had no value to speak of.

As the Lord of the sacred Dragon Warzone, Tang Zhen naturally hoped that his Warzone would be filled with talents. The more elite cultivators there were, the better.

Therefore, as long as there was an opportunity, Tang Zhen would definitely not be stingy in guiding and helping these young cultivators. He would allow them to have better room for development so that they could walk a smoother path on their cultivation path.

It was precisely because of his persistence that the Holy Dragon Battlefield and the cracked territory were different from the other battlefields, allowing grassroots and wild cultivators to advance more.

Although the cost was huge, the Holy Dragon battle zone also benefited from it. Their strength improved by leaps and bounds, and talented cultivators kept emerging.

Without Tang Zhen, the current situation would not be possible, and many cultivators in Loucheng would have their talents buried.

Just this point alone was enough to allow Tang Zhen to obtain even more support. No one would be able to shake his position.

Qian Chongyun took the opportunity to speak to Tang Zhen, "Thank you for your concern, Sir. Our luck this time is indeed pretty good. When we were searching for void monsters, we happened to encounter a group of void treasure beasts that were tracking the underground palace.

after that, we used a special method to mark the void treasure beast. Then, we exchanged for suitable weapons and equipment through ah Feng's auxiliary system.

In the following period of time, it was a frightening battle without any danger. We were lucky enough to kill all these void monsters.

The last time we met you, we were cleaning up the battlefield. We saw that you had something urgent to attend to, so we didn't explain it to you in detail."

Qian Chongyun spoke very quickly as he told Tang Zhen about the origins of these void treasure beasts. At the same time, he explained the reason why he wanted to borrow the storage equipment.

"We've used up too many battle merits, so we've decided to use this auction method to sell a few smaller void treasure beasts.

When we've gathered enough battle merits, we'll prepare to set up a trap to attract more void treasure beasts.

If the plan succeeds, our harvest will double, and we might even be able to capture all the void treasure beasts in the divine Kingdom!"

When Qian Chongyun said this, he revealed a confident expression. One could tell from his expression that he was very confident in his plan.

Tang Zhen smiled. Regardless of whether the plan of Qian Chongyun's group would succeed or not, just their courage and confidence were extremely praiseworthy.

then work hard. If there's anything you need help with, you can just let me know.

With Tang Zhen's status, he wouldn't make promises easily. But now, he had actually agreed to help Qian Chongyun and the others realize their plan.

Qian Chongyun, mo Ziqi and the rest looked at each other and revealed an expression of being flattered. They then shook their heads.

If they relied on Tang Zhen's help and not their own strength to complete this matter, it would more or less make them feel that it was not perfect.

Therefore, even if Tang Zhen asked, they would definitely not beg for it. However, they could not help but feel a strong sense of pride in their hearts.

To be acknowledged by the Lord of a battle zone, a legendary master with a long reputation, this was definitely the greatest reward for them!

Chapter 2293 The depressed Poseidon (1)

“Work hard, but remember not to force yourself. No matter what, you must first ensure your own safety.

Otherwise, you’ll only become history. You won’t have the right to create history, and you’ll eventually be drowned by history.”

Tang Zhen looked at everyone and used a faint tone to remind them. He was afraid that they would be muddled by the momentary victory and do something that would overestimate their own abilities.

Qian Chongyun and the others nodded at the same time after hearing Tang Zhen’s advice. They had to keep the experience of a master of creation in mind.

After chatting for a while, Tang Zhen turned around and left, leaving behind the extremely excited Qian Chongyun and the rest. Once again, they were full of confidence as they started to plan.

After leaving area 153, Tang Zhen didn’t go to the Grand temple but went straight to the hiding place of the indigenous gods.

Since things had developed to this point, the transfer of the indigenous gods was a necessary step. Because of the appearance of the void monsters, this approach had become reasonable.

On the surface, this was for the sake of the indigenous gods, so it could not be considered a violation of the contract. Even if he was really punished, it would definitely not be too serious.

He moved forward along the God’s kingdom that was riddled with holes, avoiding the huge void holes that blocked his way from time to time. He would also take care of one or two void monsters that blocked his way.

The number of void monsters had obviously increased by more than several times.

This caused Tang Zhen to feel a little worried. He wondered if the hiding place of the Aboriginal deities had been discovered by the void monsters.

When Tang Zhen arrived at his destination, he only saw a few heavy warships floating in the air. The surrounding space was completely silent.

As it was too far away, the void monsters that were like headless flies did not wander over.

Near the entrance, Tang Zhen had a few words with the cultivators in charge of guarding the gate. After that, he flew into the tunnel.

When he passed through the tunnel again and appeared in the subsidiary small world, he found that there were already countless believers gathered nearby.

They were fully armed and stood guard near the underground palace, as if they were determined to protect the native gods.

Among the originally weak believers, there were now some experts with decent strength. This was obviously the work of the spiriters, in preparation to protect the underground palace.

It was just that this method of forcibly instilling power into the believers would cause serious damage to them, and at the same time greatly shorten their lifespans.

However, for these fanatical believers, it was the greatest honor to be able to protect the God they believed in. They would not hesitate to sacrifice their lives.

Now, it was just shortening his lifespan, which was nothing.

The moment Tang Zhen appeared, these believers gathered over as if they were facing a great enemy. Some of them had seen Tang Zhen before, but they did not know whether he was a friend or a foe.

Before they received orders, the believers would never let their guard down and treat Tang Zhen as a potential enemy.

The voice of the spiritualist came slowly, making these believers feel relieved. Although they looked like they were not afraid of death, they did not have any confidence at all.

Clearly, they were extremely clear in their hearts that it was useless no matter how many of them there were when facing an expert like Tang Zhen.

Tang Zhen stood in midair with his hands behind his back. He did not care about the ant-like believers on the ground. Instead, he looked at the underground palace in the city.

The Golden Eye Lord was still standing in the same place, looking at the place where he had looked last time. The sea Emperor, who had been hiding there, had not moved from his position.

At this time, Neptune was extremely depressed. Because he had been locked on by the Golden Eye Lord, he did not dare to make a move.

This was because he knew very well that if he took any action, he would suffer a fatal blow from the Golden Eye Lord.

His strength was far inferior to the Golden Eye Lord's, and he could only curl up in a corner and shiver like a mouse being watched by a cat.

He could even see a hint of mockery in the Golden Eye Lord's eyes, which meant that the other party did not take him seriously at all.

The Golden Eye Lord's heart was filled with unwillingness. He really could not understand how things had developed to this stage when victory was clearly in his grasp.

After thinking about it, the source of all the changes was Tang Zhen!

This made Neptune gnash his teeth in hatred. If he had known this earlier, he would have killed Tang Zhen even if he had to use all the strength of the sea Race!

When he first received the information about Tang Zhen, although Neptune deliberately waited for a while, he did not take Tang Zhen seriously.

He was just a realm Lord cultivator. To Neptune, he was nothing.

The ocean Emperor's strength was already equivalent to that of a master of creation. His men were strong and powerful, and he had several Masters equivalent to the master of creation realm.

Under such a situation, Tang Zhen who only had the strength of a sector Lord was no different from an ant.

The interception and hunting of Tang Zhen were only the actions of Neptune's subordinates. They were not personally instructed by him.

Tang Zhen was indeed lucky in this matter. From the beginning to the end, he had not been hunted down by the sea Emperor. Otherwise, he would not have had the chance to become a creator and would have died in the God nation.

From the beginning to the end, Neptune had underestimated his enemy. He did not expect that an ant he looked down on would completely ruin his thousand-year-old plan!

The more Neptune pondered, the deeper his hatred for Tang Zhen became. It even far exceeded the Golden Eye Lord who guarded the underground palace.

It was a pity that Tang Zhen, who had advanced to the creator level, was already evenly matched with him. Furthermore, other than Tang Zhen, there were three other creator-level experts that gave him a headache.

What Neptune needed to consider now was not how to take the body of the indigenous God, but how to escape from danger.

He had already realized that something was wrong. The Golden Eye Lord clearly had the strength to kill him, but he did not do so. Did this mean that he was planning something?

With the gradual collapse of the divine Kingdom, the indigenous gods would definitely be seriously injured. This was the best time for him to seize and control the body.

However, if he thought about it from another perspective, wasn't he the best tonic at this moment?

If he were to be absorbed by the Aboriginal deities, his severe injuries would definitely heal quickly.

could it be that the cultivators of loucheng wanted to capture me and then roll me up? "

Thinking of this, Neptune suddenly felt a chill run down his spine. If this was really the case, he had to escape as soon as possible.

Even if they had to escape from the divine Kingdom and suffer some losses, it would be much better than being killed and devoured.

Furthermore, once the God nation collapsed, there would be no point in him snatching the bodies of the natives.

Even if they were lucky enough to survive, it would take a long time to heal their injuries.

If he really had that much time, even if he slowly cultivated, the benefits he would obtain would not be any worse than snatching the main body.

Since that was the case, why should he be so persistent in snatching the body of the indigenous God? why not leave this troublesome place as soon as possible?

All of a sudden, Poseidon came to a realization. He felt that following the underground palace had been a stupid decision.

Just as he was about to think of a way to leave, he heard a commotion from the believers. Then, he saw the figure that he hated to the bone suddenly appear in midair.

Because of Tang Zhen's arrival, the surroundings were in chaos. Neptune was overjoyed and was about to take the opportunity to escape.

Before he could take any action, Tang Zhen, who had discovered him in midair, suddenly looked at the place where he was hiding.

He did not know if it was an illusion, but Neptune saw a trace of ridicule in Tang Zhen's eyes, which was exactly the same as the Golden Eye Lord's eyes.

Chapter 2294 Poseidon's end (1)

"Dammit, could it be that my invisibility technique is so bad that even Tang Zhen has already discovered me?"

Neptune's heart was beating wildly. He had wanted to take advantage of the chaos to escape, but now it seemed that he was going to fail.

Since Tang Zhen had appeared, it was impossible for him to allow Tang Zhen to escape.

With Tang Zhen's interference, Golden Eye Lord could take the opportunity to attack, and he was destined to have nowhere to escape.

"What do we do?"

In the face of life and death, Neptune's heart was burning with anxiety, and his eyes slowly turned blood red.

When his eyes were completely red, a fierce light flashed in his eyes. He believed that only by fighting to the death could he escape from this place.

Whoever dared to stop them would fight with their lives, and they would be resurrected after death!

After making up his mind, his fear disappeared instantly and was replaced with endless courage.

When the ocean Emperor became a creator, he encountered an accident, and his personality was greatly incomplete. Sometimes, he was cautious, and sometimes, he was extremely paranoid.

Now that he had made up his mind, he no longer had any scruples and directly rushed into the space tunnel.

Even if Tang Zhen was there, he was fearless. In fact, he was even a little eager to try and see if he could kill Tang Zhen to vent his hatred.

At the same time, rolling waves appeared out of thin air and gushed out in all directions.

Neptune's ability to create things was incomplete. He could only create a limited number of things, and creating seawater was one of them.

Now that he was fighting to the death, he naturally had to release it to boost his morale.

The believers on the ground were instantly swallowed by the huge wave. They did not even have the chance to scream.

Even if they were fully armed, they were still vulnerable in the face of a strong person like Neptune.

The lives of the weak were as fragile as dust. With just a gentle breeze, they would be swept into the whirlpool of death.

“Kill him!”

Seeing Neptune’s sudden appearance, the spiritual envoy was first stunned, then showed an expression of extreme hatred.

If it were not for the ocean Emperor, Scandinavia would not have ended up in this state, and its master would not have fallen into a deep sleep.

His hatred for the ocean Emperor was like a raging river, and he wanted to pull out his bones and pull his tendons.

Now that he saw that the sea Emperor had chased him to a subsidiary world, the spirit, who had always been calm and low-key, was suddenly enraged and fell into a state of madness.

In the spiritualist’s eyes, the ocean Emperor clearly had evil intentions and wanted to secretly harm his master.

Since that was the case, there was no need to have any more scruples. Today, they would fight to the death, and one of them would die!

When the indigenous gods were in a deep sleep, the spiriters were his full representatives. Now, they had finally made up their minds to help their Masters get rid of future troubles.

Of course, the main reason was that Neptune was alone, while they had two masters of creation.

In addition, the entire subsidiary world was full of believers of the indigenous gods, so the spiritualist had a 90% chance of killing Neptune.

Just after the spiriters gave the order, the divine servants who had been silent the whole time, as well as the believers who had been forcibly promoted through instilling, rushed to Neptune’s position like arrows and surrounded him.

“Do you think you can kill me with just trash like you?”

Neptune laughed eerily and had already entered a state of madness.

Although he had the appearance of a human, his entire body was covered with sharp bone spikes. The surface of his body was also covered with a layer of black bone scales, making him completely impervious to weapons.

The weapons of the believers fell on him, but they could not cause any damage at all. Instead, they were easily torn to pieces by him.

Even the divine servants' attacks did not have much effect. In an instant, they were killed by Neptune.

"Your Excellency, at this point, are you still not going to make a move?"

The spiritual envoy looked at the Golden Eye Lord. This was not the first time he had said something similar.

If Tang Zhen and the Golden Eye Lord did not make a move, then the divine servants and believers would only die in vain. It would be a fool's dream for the spiriters to kill the sea Emperor.

The Golden Eye Lord did not care about the spiriters at all. Instead, he stared at the battlefield as if this matter had nothing to do with him.

However, if one looked closely, they would notice that the Golden Eye Lord's eyes were flashing with a dangerous light.

The Golden Eye Lord had been waiting for the cornerstone platform's final decision all this time.

In other words, it would depend on Tang Zhen's attitude and whether he would reach a settlement with the cornerstone platform.

The Golden Eye Lord was very clear that Tang Zhen would return to the fifth battle area to demand an explanation from the cornerstone platform.

Although he understood what was going on, the Golden Eye Lord could not tell Tang Zhen. If he wanted an answer, he could only let Tang Zhen find the foundation stone platform himself.

After all, this matter involved Tang Zhen's compensation. Other than the cornerstone platform, no one else had the right to make a decision.

When he saw Tang Zhen return, the Golden Eye Lord knew that the matter had come to an end.

Hence, he looked at Tang Zhen and said with an indifferent voice, "Lord Tang Zhen, how was your trip?"

yes. Tang Zhen nodded and softly said, "the matter has been resolved. Everything will proceed according to the original plan.

As for what the original plan was, Tang Zhen was actually not particularly clear. It was just that before he left, the cornerstone platform had specially instructed him.

If the Golden Eye Lord asked, he could answer like this.

Sure enough, after hearing Tang Zhen's words, the Golden Eye Lord's head, which could only be seen with its eyes, suddenly revealed a Crescent-like mouth. That sinister smile made one's hair stand on end.

The next moment, the Golden Eye Lord suddenly made a move and appeared directly beside Neptune.

Tang Zhen only felt his eyes blur. Soon after, he heard a miserable cry before there was no more sound.

Nine transparent boxes appeared at the place where the battle had taken place. Neptune, who had been crazed earlier, had been torn to pieces and stored in the transparent boxes.

The broken limbs wriggled in the box like worms, but they could not break the rune seal on the box.

The malevolent head continued to roar in anger. Its blood-red eyes were filled with unwillingness and resentment.

The believers who had fought Poseidon before were now dumbfounded. They did not seem to understand how Poseidon had been cut into pieces.

At the same time, some believers were secretly rejoicing. If the Golden Eye Lord had not made a move, they might have been the ones who would have been beheaded in the next moment.

“Hahaha, thank you for your help, Sir!”

After seeing Neptune’s miserable state, the most excited person was the spirit. He rushed over from the underground palace and looked at Neptune’s broken body with bright eyes.

The excitement in his heart could no longer be described with words.

The sea Emperor was the mortal malady of the indigenous gods and could be said to be the root of all disasters in the kingdom of God. The spiriters were loyal to their Masters, so they naturally hated the culprit to the bone.

Now that he had avenged himself, it was only natural that the spirit envoy would be so excited that he would lose his composure.

At this moment, Tang Zhen also slowly approached. He glanced at the struggling Poseidon and discovered that he had actually turned back into nine complete bodies in a short period of time.

Its huge body was locked in a narrow space, and it was completely distorted due to the pressure. Its appearance looked extremely ferocious and ugly.

When they saw Tang Zhen observing them, the nine Poseidon’s in the boxes roared in anger at the same time. Their eyes looked as if they were choosing a person to die.

The ocean Emperor naturally recognized Tang Zhen. It was because of his appearance that he had fallen into such a miserable state.

Under such circumstances, Poseidon felt even more humiliated.

After all, Tang Zhen was representing the victor while he was a prisoner. His appearance was extremely miserable.

However, after a long time at the Poseidon road, he realized that Tang Zhen did not pay attention to him at all, as if he did not exist at all.

Being treated like this by the person he hated the most made Poseidon almost go crazy. His angry roar turned into a bitter smile, and in the end, it became silent.

Chapter 2295 Neptune is a good medicine?

Poseidon no longer roared. His heart was like dead ashes.

After being defeated, he was no longer the king of the sea tribe. Instead, he was the prisoner of the cultivators in Loucheng, and his life was in the hands of others.

Roaring in such a situation was equivalent to asking to be humiliated, so why bother?

After figuring this out, Neptune also became quiet, and the same was true for his nine split bodies.

Although it was silent at the moment, it did not mean that it had given up. If there was a chance, Neptune would definitely find a way to escape.

God Kingdom, this land of sorrow, the further away the better. Even if there were no void monsters appearing, he would definitely not return!

As for the obsession in his heart, it had long disappeared and could no longer control his emotions.

Poseidon was enlightened. Although this was a good thing, it seemed to be a little too late.

If the Lou Cheng cultivators wanted him to live, it would not be a problem. However, if they wanted him to die, he would not be able to cause any trouble even if he had three heads and six arms.

At this time, the spiritualist had already circled four or five times around the dismembered body of Neptune.

His eyes were full of smiles, as if he was looking at some peerless treasure, and his mouth let out a sinister and strange laugh.

He even deliberately looked at Poseidon with a provocative look, trying to mock him. However, Poseidon did not respond. He was as silent as a rock.

The spiritualist felt bored, so he shook his head and turned back to the Golden Eye Lord.

“Your Excellency Golden Eye, why didn’t you burn this bastard to ashes? why did you imprison him?”

With the sins he has committed, it is not enough to pay with his death. Just killing him is already the greatest mercy!”

what’s wrong? ” after the excitement, the spiritual envoy’s cold face returned. She looked at the Golden Eye Lord and asked in a slightly dissatisfied tone.

Because of the contract, he could make some requests that were not too excessive, such as suggesting how to protect the safety of the indigenous gods.

Otherwise, he would not have dared to be so presumptuous in front of the Golden Eye Lord. That would have been courting death.

The so-called Fox borrowing the Tiger’s might, presumably it was like this.

However, the main reason was that this spirit envoy’s mental state was very abnormal. He was like a completely different person from before.

When the Golden Eye Lord heard this, he squinted his eyes slightly. He could not help but feel a little disgusted with this foolishly loyal servant.

In order to protect his master, he had become a little crazy and paranoid. As the divine Kingdom headed towards destruction, this state became more and more obvious.

This was not a good thing, and it was even a little dangerous. If this guy lost control, he would probably be a new Poseidon.

Due to its special authority, the danger this guy could cause might even exceed Neptune's.

If he came up with an extreme idea after learning about the cultivators' plan, such as killing the Aboriginal deity or escaping with him, the whole plan would be greatly affected.

As he thought about his next plan, the Golden Eye Lord could not help but think about whether he should kill this guy.

In that case, the last hidden danger surrounding the indigenous gods could be completely eliminated.

The problem was that it was easy to kill a spiritualist, but there would be endless trouble.

This spiritualist was the closest person to the indigenous God and was almost a confidant who had gone through life and death with him. If he were to kill him rashly, how would he explain it when the indigenous God woke up?

The native gods were not weak, and they had information about the Super planes. If possible, the fifth battle area would naturally try to win them over.

If they could serve the 5th battle area, they would have the chance to become a Lord and become a member of the 5th battle area.

Since that was the case, he couldn't be too ruthless, but he had to leave some leeway.

If he killed his loyal servant after destroying his God Kingdom, it would be a little unreasonable.

At this thought, the Golden Eye Lord gave up on the idea and turned to look at Neptune.

Although he had imprisoned Poseidon, he did not kill him. Before he sent him to the world of towers, he had to keep a close eye on him.

Seeing that the Golden Eye Lord was ignoring her, the spiritual envoy's expression turned slightly gloomy, but she did not say anything.

At that moment, he did not realize that the Golden Eye Overlord had been pondering whether to kill him or not!

At this moment, Tang Zhen's voice sounded, "The purpose of keeping Poseidon here is probably to save your master and help him recover as soon as possible.

I'm sure you know more about Neptune's background than anyone else here. To put it bluntly, Neptune is half your master, just that he has an independent consciousness.

What will happen if you erase Poseidon's consciousness and then merge it with your master?"

When the spiritualist heard this, his body trembled slightly. He naturally knew what the result would be.

However, it was extremely difficult to do that. The spirit couldn't do it on its own unless the cultivators of Lou Cheng were willing to help.

Since Tang Zhen had said such words, did it mean that Lou Cheng had decided to help?

When the spirit envoy thought up to here, she revealed a trace of excitement on her face as she looked at Tang Zhen with hope.

Tang Zhen didn't care about the excited spirit envoy and continued, "If you don't want your master to wake up one day earlier, you can kill Poseidon now, and by yourself.

Therefore, we will never, ever do such a thing. Do you understand?"

Tang Zhen glanced at the spirit envoy and spoke in an emotionless tone, alleviating the awkward situation from earlier.

Upon hearing Tang Zhen's reply, the spirit envoy was stunned for a moment before revealing a terrified expression.

What he had done just now was almost equivalent to murdering his master. If he really wanted to take it seriously, it was simply an unforgivable crime.

It was for this reason that the spiritualist felt terrified and uneasy, feeling that he was a sinner.

"I'm sorry, I was too muddleheaded. Please forgive me."

The spirit emissary only used an extremely short amount of time to adjust his state of mind, before bowing and apologizing to Tang Zhen and the other person.

"Forget it, I can't blame you for not knowing."

The Golden Eye Lord only glanced at the spiritual envoy from the corner of his eyes at this moment and spoke in a cold voice.

The spirit envoy thought for a moment and asked Tang Zhen, "If I may ask Sir Tang Zhen, if my master's injuries recover, is there a possibility of restoring the divine Kingdom?"

When the spirit heard that the sea Emperor could be used to heal his master and that the indigenous gods might wake up in advance, a glimmer of hope was ignited in the Spirit's heart.

Tang Zhen laughed softly when he heard this. However, there was a faint trace of ridicule within his smile.

Not to mention the invasion of the void monsters, which was a disaster that could not be resolved, just based on the plan made by the fifth battle area, the God Kingdom was destined to be unable to survive.

It was even more delusional to expect the indigenous gods to protect their divine kingdoms by themselves after they woke up.

The destruction of the God Country was not far away.

Chapter 2296 Unquestionable _1

With Neptune's subjugation, the biggest threat had disappeared. No one could pose a threat to the indigenous gods except for the void monsters.

However, nothing was absolute in this world. No one could be sure if there would be any changes until the last moment.

Therefore, the safest thing to do was to complete the transfer as soon as possible and send the indigenous gods to the world of loucheng.

It was also a necessary step in the plan to take drastic measures and leave the native gods with nowhere to go.

The indigenous gods who were in a state of deep sleep had to have a sufficiently safe place to rest. At the very least, they could not stay in the void.

Otherwise, before he could wake up, he would be gnawed until not even his bones were left.

A subsidiary world could not do the same. Although it would not collapse immediately like a god Kingdom, without a God Kingdom, such a subsidiary world would not be able to exist for long.

Unless there was a god-like master in these subsidiary worlds, then they could slowly change their form and become a real world.

Otherwise, these subsidiary worlds would wither and die in tens of thousands of years.

Without the skin, where would the hair go?

However, before doing this, he still needed to get the consent of the spiritualist. After all, he was the full representative of the indigenous God.

In other words, he was equivalent to half of the master of Scandinavia. Unfortunately, this master was somewhat incompetent. After running it for a thousand years, it still ended up in such a state.

Although the main reason was still due to the void monster, even without the void monster, the God Kingdom was destined not to last for long.

Whether it was Neptune's covetous eyes or the use of believers as tools, there were great hidden dangers.

It was only a matter of time before he completely exploded.

Looking at the spirit envoy who was in a state of deep thought, Tang Zhen said indifferently, "You've seen the current situation of Scandinavia. The void monster is unstoppable, and the destruction of Scandinavia is already a foregone conclusion.

For the sake of your master's safety, I suggest you follow our arrangements and send him to my world.

Your master can receive effective treatment in our place. Perhaps it won't be long before you and your servant can meet again."

Hearing Tang Zhen's words, the spirit envoy's expression was somewhat excited. It had already been over a thousand years since he had seen his master.

Just the thought of it made him extremely excited. In the eyes of a spiritualist, his master was omnipotent.

However, the spiritual envoy thought of something else. In the blink of an eye, she hesitated.

“Sir Tang Zhen, is it really impossible to turn back the situation? even you can’t protect Scandinavia?”

The spiritual envoy’s gaze dodged and his tone was slightly unnatural because he had faintly discovered some problems.

Through this period of contact, the spiritualist had some understanding of the strength of the cultivators in loucheng and knew how strong they were.

Apart from the Masters of creation, even the ordinary cultivators in loucheng were all elites.

All kinds of powerful war weapons, such as heavy warships as mountains and a rune missile that could destroy a sea monster nest, were enough to prove the strength of the cultivators in Lou Cheng.

The tower that had suddenly appeared in the divine Kingdom was like a war fortress, and the combat power it possessed was even more terrifying.

According to the information they knew, the spiriters knew that this was the most powerful weapon of the cultivators in loucheng. It was also their home.

To transform one’s home into a weapon of war and enter a state of war at any time and place, one could see how terrifying Lou Cheng Xiu was.

Every time he thought of this, the spiritualist rejoiced in his heart.

If not for his master’s wisdom in choosing to cooperate with the loucheng cultivators, the divine Kingdom would have already been wiped out by them.

The damage caused would not be any worse than that of the void monster. It might even be more serious.

That was why he was suspicious and thought that Lou Cheng did not use all his strength.

The spiritualist’s question immediately made the atmosphere tense.

The Golden Eye Lord squinted his eyes and turned to look at the spiritual envoy. He exuded a dangerous aura.

The cultivators of Lou city were fighting fiercely with the void monsters, and there would definitely be casualties during this period. However, the spiritualist suspected that they had not used their full strength.

This distrusting attitude made the Golden Eye Overlord very uncomfortable. How dare a conjured creation of a God question the cultivators of loucheng?

There were indeed conspiracies among the higher-ups, but the cultivators of loucheng who followed orders never had any problems.

Since they had received the order to fight, they would not be half-hearted and would fight to the death.

Being suspected by the person he was protecting after being bathed in blood on the battlefield was the most hurtful thing.

“Tell me, do you have the heart?”

Before the Golden Eye Lord could react, Tang Zhen’s expression suddenly turned cold as he looked at the spiritual envoy and asked in a stern voice.

“Sir Tang Zhen, what do you mean by this?”

The spirit envoy’s eyes flickered. He actually didn’t Dodge and asked Tang Zhen.

“If you had the heart, you shouldn’t have said such words. Do you really think you are a character that needs me to put on an act for you with the lives of my subordinates?”

Perhaps in the eyes of you and your master, the believers who protect you with their lives are just ants and fools.

No matter how many sacrifices you make, you won’t care.

However, I’m different from you, or rather, Lou Cheng’s cultivators are different from you. We are a team. Although there are differences between us, we are as close as brothers on the battlefield.

If you insult them, it’s the same as insulting me, Tang Zhen. If you don’t apologize, do you believe that I won’t kill you now?”

Tang Zhen’s tone was stern. A cold glint flickered in his eyes as he stared unblinkingly at the spiritual envoy.

When the Golden Eye Lord saw this, a faint smile appeared in his eyes. Then, he looked at the frozen face of the spiritual envoy and his sharp cold light flashed again.

Just like what Tang Zhen had said earlier, the relationship between the cultivators in Lou city was completely different from the relationship between the indigenous gods and their believers.

If Tang Zhen had not spoken first, the Golden Eye Lord would not have let the spiritual envoy go and would have made him pay the price.

The spirit envoy’s face twitched. He did not expect that Tang Zhen, who had always been calm and composed, would actually be angered by his words.

However, after thinking about it carefully, Tang Zhen couldn’t be blamed for being angry. After all, suspecting these Lou Cheng cultivators was the same as suspecting Tang Zhen and the others.

He had just solved the biggest hidden danger in the country and imprisoned Neptune in nine parts. It was really inappropriate for him to say such words.

If there were no void monsters appearing, then with the death of the sea Emperor, the kingdom of God might have regained its peace.

It could only be said that Lou Cheng’s luck was bad. Just as he was about to complete his mission, he was attacked by void monsters.

Not only were the believers caught off guard, but even the cultivators of loucheng city, who had an absolute advantage in strength and were sure to win, were also in a difficult situation.

His efforts were in vain, so he must be angry. If he suspected that Lou Cheng's cultivators didn't do their best, he would be digging a hole for himself.

Chapter 2297 Transfer (1)

Looking at the cold expression on Tang Zhen's face, the spiritual envoy knew that his words earlier had already angered this God grade cultivator.

Tang Zhen rarely got angry. Once he really got angry, the consequences would be very serious. It was very likely that it would make his situation even more awkward.

Realizing this, a trace of fear flashed through the Spirit envoy's heart.

In fact, he himself knew that God's kingdom had already reached the end of its rope, and he was now the only one his master could rely on.

If there was a problem here, then the fate of the indigenous gods would be bleak, and he would be unable to escape the blame.

damn it, what's wrong with me? is it because I'm too concerned, or is there some other reason? "

As if a basin of cold water had been poured on her head, the spirit immediately became clear-headed, and at the same time, she was secretly surprised. How did she become like this?

This state of mind was quite strange. He was stubborn and agitated, which was not in line with his personality.

The only explanation was that the collapsing God's kingdom had affected him, but he had not realized it.

The divine Kingdom was closely related to the indigenous gods, and he was a life created by the indigenous gods. When the divine Kingdom was destroyed, would he also be destroyed?

An indescribable fear rose from the spirit envoy's heart. He kept reminding himself that he could not die before his master woke up!

The only person who could help him now was probably cultivator Lou Cheng, so he must not offend them. Instead, he must protect them as much as possible.

Even if he had to endure the humiliation, it was nothing.

"Please don't misunderstand, Sir. I don't mean to target you. It's just that the divine Kingdom is too important to me.

He was painstakingly built by my master, and his feelings for him are extremely deep. I really can't bear to see it collapse and disappear just like that."

When the spiritual envoy spoke, she had a look of fear and trepidation on her face, as if she was sincerely apologizing.

"I see, I can understand."

Tang Zhen's original intention in reprimanding the spirit envoy was to make him aware of his situation. After he felt a sense of danger, he would try his best to cooperate with the Lou Cheng cultivators.

The spiritualist did wake up in time and began to worry about his gains and losses, afraid that his actions would make the cultivators of the tower unhappy and affect his master.

Tang Zhen secretly sneered when he saw this. A spiritualist with such a mentality would be even easier to knead.

“If you don’t have any objections, I’ll summon my men to escort your master away.

The situation now is different from the beginning. The void monster has already remembered your master’s aura. As long as he reenters the God Kingdom, he will definitely be sensed by the void monster.

Therefore, in the process of evacuation, it was very likely that there would be a brutal battle, so they had to be prepared.

If there are any believers who are willing to follow, they can also follow. If they miss this opportunity, they will not be responsible for their life and death in the future!”

Tang Zhen clearly stated the conditions. The spiritual envoy didn’t have any objections and nodded in agreement.

“Alright, I’ll gather the manpower now.”

Tang Zhen turned around and looked at the Golden Eye Lord. They had a tacit understanding.

Both sides contacted their subordinates and began to gather in the vicinity, ready to escort the Aboriginal deities away.

If they were to move again, they would not be able to rely on the six-winged King Bird to pull them, but would need to use heavy warships.

Otherwise, the void monster would only need one bite to directly swallow the indigenous deity, and the cultivators in Lou Cheng wouldn’t even have time to react.

After that, the cultivators of Lou Cheng would lead the way and escort the Aboriginal deities to the teleportation channel until they left the God Kingdom.

Before they took action, they also needed to seal the indigenous God, in case his body would break apart due to any unexpected circumstances when he left the divine Kingdom.

At this time, the indigenous gods and the divine Kingdom seemed to be one. If they were taken away by force, it would definitely bring unknown negative effects.

However, if the spiritual envoy agreed and Tang Zhen and the others took precautions in advance, the negative effects could indeed be reduced to the lowest.

The more participants in this matter, the better. Therefore, Tang Zhen sent a message to Star Spirit Overlord and Star Spirit Overlord, asking them to come as soon as possible.

They were also part of the plan. At this critical moment, they had to be present.

After doing all this, he waited quietly.

It didn’t take long for the two overlords to rush over and arrive at the subsidiary world through a tunnel.

“Sir Tang Zhen, what’s going on?”

When the battle maniac Lord saw Poseidon, he laughed out loud. He felt as if he had just gotten his revenge.

At the same time, he also felt a little regretful that he had not killed Poseidon himself, but that the Golden Eye Lord had taken advantage of him.

When the star Spirit Lord arrived, he directly asked about it in Pond Town and not the Golden Eye Lord.

He had worked with the Golden Eye Lord before and knew that the latter’s personality was as cold as ice. If it was not necessary, he would not speak easily.

He was even more disdainful to explain such things. It would be useless to ask.

Knowing that he would hit a wall, the star Spirit Lord naturally wouldn’t ask for a rebuff and looked embarrassed.

“Before you arrived, I had already reached an agreement with the spiriters. They agreed to transfer the indigenous gods to the world of loucheng.

The reason I invited you here is to seal the Aboriginal deities and help guard them during the transfer.”

Tang Zhen gave a simple explanation. There was no need to go into detail as the two overlords should also understand what was going on.

Although the two overlords didn’t know much about the cornerstone platform’s plan, they knew a thing or two.

Sending the Aboriginal deities into the world of loucheng was the most crucial part of the entire plan.

It was enough to know this. As for the details, they would know when the time came.

“Please work together to seal this Aboriginal God and move him away as soon as possible.”

Tang Zhen did not wish to waste any more time in case something unexpected happened.

The two lords had the same idea. They were ready to send away the native gods as soon as possible, so that the cultivators of Lou Cheng could leave the God Kingdom at any time.

The existence of this fellow would always be a hidden danger. If something really happened, all their hard work would be for naught.

In the following time, Tang Zhen and the other Lords worked together to completely seal the Aboriginal deities in the underground palace.

The indigenous gods in the seal would maintain a special state. Even after leaving the divine Kingdom, there would be no problems.

While the sealing was in place, the cultivators of loucheng who had been summoned also arrived one after another and were waiting near the exit of the tunnel.

The cultivators left the subsidiary world together with the native gods and the suppressed Ocean Emperor.

The believers who originally belonged to the subsidiary worlds all looked at the scene in front of them in a daze. They didn't know that the world they were in had already entered a countdown state.

Compared to the other subsidiary worlds, the believers of this world were even more unfortunate. This was because the spiriters had extracted the energy of the subsidiary worlds, causing the collapse of this world to speed up.

When the indigenous gods were in danger, they stood up to protect them without hesitation, but they didn't know that they had been tricked by the object of their protection.

Rivers and mountains were easy to change, but nature was difficult to change.

This was the style of the indigenous gods, and the spiriters were also deeply influenced by them, so they were not soft-hearted when it came to cheating their believers.

Based on this alone, the indigenous gods deserved what happened to them today.

Chapter 2298 Layers of obstacles (1)

The moment they stepped out of the space tunnel, a heavy warship quickly approached, cooperating with each other.

The spiriters and the others who were guarding the underground palace entered the warship directly without any hesitation.

"Be on high alert and advance at full speed!"

Under Tang Zhen's command, a light warship in front immediately opened up a path and headed straight ahead.

Around the heavy warships, there were also warships of various sizes, also in charge of guarding.

Attacking was secondary, their main task was to act as Pathfinders.

All the cultivators in the building were on high alert and kept looking around to prevent any void monsters from suddenly attacking.

In a concealed state, even a master of creation like Tang Zhen couldn't easily discover the hidden void monster.

If one was bitten by it, even a creator might lose his life, because there was an indescribable special space inside the mouth of the void monster.

He had never heard of anyone being able to escape after being devoured by a void monster.

This was also the main reason why void monsters were so terrifying. Otherwise, it would not be too difficult for a creator to kill such a creature head-on.

The team had not advanced for long when a light warship on the left side of the periphery suddenly had an abnormal situation.

The light battleship seemed to have crashed into transparent rubber. The battleship stopped moving forward, and the energy shield was activated.

not good! There's a void monster!

As the alarm went off, a Black Vortex suddenly appeared in the sky ahead and approached the light warship.

In the blink of an eye, he had already arrived in front of her at an astonishing speed.

This Black Vortex was the terrifying mouth of the void monster, and everywhere it passed was a void.

"Destroy it!"

Tang Zhen gave the order. However, he did not personally take action. Instead, he was in charge of controlling the overall situation.

As the commander, what he had to do now was to calmly lay out the plan and command, not charge into the enemy lines.

On the other hand, the other three masters of creation were the main force. The moment the void monster appeared, the battle maniac Overlord had already taken the initiative to attack.

"Go to hell!"

The battle fanatic Lord didn't advance towards the whirlpool, as that would be equivalent to seeking death. Instead, he teleported to the side of the whirlpool and slashed at the huge figure.

The black Hatchet dragged out a light shadow that was thousands of meters long. After flying for a distance, it instantly sank into the figure.

A scream was heard. The place where the giant axe hit the void monster revealed a huge and hideous wound.

The void monster, which was originally in a semi-corporeal state, quickly revealed its true form after being injured, like a mountain covered by thick fog.

The heavy battleships, which had long been prepared, suddenly opened fire at this moment, and countless beams of light shot toward the wound.

Starting from the wound, the void monster's body was torn in half and fell to the ground with a wail.

"Boom! Boom! Boom!"

With a loud sound, the void monster's corpse smashed through the ground, revealing a large dark hole.

It turned out that at some point in time, the ground below had already been devoured by the void monster. It was just that it had not reached the critical point of collapse.

"These cunning guys, they actually know how to hide underground and devour. I wonder how many are hidden here?"

As the battle fanatic Lord spoke, he was about to charge underground and continue his hunt for void monsters.

don't linger in the battle. We'll deal with these monsters after we complete the escort mission!

Knowing Zhan Kuang horde leader's personality, Star Spirit horde leader immediately warned him in case he disappeared in the blink of an eye.

He had done this kind of thing more than once, and he would not stop until he had killed to his heart's content.

"What a killjoy!"

When battle fanatic Lord heard this, he had a regretful expression on his face, but he did not hesitate to return to the team.

He guarded around the heavy battleship and kept looking at the void in front of him with a gloomy face.

This was the attitude of Lou Cheng's cultivators when they carried out missions. No matter what the reason was, they would put the mission first.

Even the Zhan Kuang Lord would not act rashly. Even if his qualifications were higher than Tang Zhen's, he would still follow orders without a doubt.

If Tang Zhen was in Zhan Kuang's position, he would also take the initiative to obey orders without the slightest hesitation.

It was precisely because of this high degree of obedience that the cultivators of Loucheng could cooperate closely in battle, advance and retreat as one, and sweep across the major planes.

After quickly dealing with the void monsters, the cultivators who participated in the escort didn't relax. Instead, they became more nervous and serious.

They had just set off, and they had already encountered the lurking void monsters. This meant that the monsters had completely spread out.

Due to their special innate abilities, the void monsters were particularly sensitive to certain things. After devouring the matter of the divine Kingdom, it was equivalent to obtaining information about the indigenous gods.

Under such circumstances, they could use their own abilities to lock onto the indigenous gods and try their best to devour them.

Any target that was targeted by them would find it difficult to escape their pursuit even if they hid in the void.

Therefore, the cultivators in the building were very clear that there would be an endless stream of void monsters coming in the next few days.

What they had to do was to defend the indigenous gods as much as possible and keep approaching the dimensional gateway.

Only after entering the passage and leaving the divine Kingdom would the mission be considered complete.

As Tang Zhen and the others advanced, the cultivators and believers scattered across the divine Kingdom also began to approach Tang Zhen's path.

The total number of people participating in the battle was in the tens of millions. At this moment, all of them had gathered, and the momentum was spectacular.

Their mission was to guard the way forward and kill all the void monsters that tried to approach, thus clearing a safe passage.

The cultivators in defense area No. 153 had already activated their full defense mode to ensure that the void monsters couldn't get close.

One by one, balloon-like things were released into the sky by Lou Cheng's cultivators. These things contained a special dyeing substance and would explode immediately once they came into contact with the void monsters.

It was not used to kill void monsters, but to mark them with bright colors. Even if the void monsters were invisible, they could be easily discovered.

It didn't take long for the sky near the 153rd defense area to be filled with such balloons. The balloons were blown away by the strong wind created by the cultivators in the city.

There were also battleships of various sizes flying toward Tang Zhen's direction. At the same time, they were constantly releasing the urgently developed items.

All the cultivators in Loucheng had been mobilized, waiting for the final battle.

The void monsters outside the divine Kingdom were still pouring in. The void monsters inside the divine Kingdom were all rushing in the direction of Tang Zhen and the others.

It didn't take long for the traces of void monsters to appear around the route they were taking. They were immediately attacked by the cultivators of Lou city.

Even before the first void monster was killed, more void monsters began to appear. The cultivators in charge of guarding the building also made their moves, trying their best to intercept and kill these void monsters halfway.

If these void monsters were allowed to gather together, the destructive power they possessed would be multiplied. The pressure that Tang Zhen and the others would face would also be multiplied.

They were the key to the entire plan, and no matter what the reason was, no mistakes were allowed.

Chapter 2299 no way out?

"According to the information we've just received, we've found traces of more than 300 void monsters so far.

Only one-fifth of the void monsters were killed, and the rest had all fled. However, according to the habits of the void monsters, they should return soon.

According to his observations, there were still a large number of void monsters lurking near the route. These monsters had high intelligence and were probably preparing to ambush them halfway.

As they did not know much about void monsters, they could not be sure if there were any leader-level monsters in their group.

However, looking at their behavior, this possibility was very high, and it was recommended to be more careful.

The team in charge of scouting the path ahead is currently fighting with the void monsters. Before these monsters blocking the way are eliminated, I estimate that more monsters will come!”

A cultivator from Loucheng City looked at the screen and reported to Tang Zhen. The screen in front of him marked the direction of the void monster.

With just a glance, one could tell that the void monsters had already completed their encirclement and were continuously gathering toward Tang Zhen’s group.

There were void monsters everywhere in the Divine Kingdom, and there was no safe place.

How long has it been? The situation has become so serious. This void monster really lives up to its name!

Tang Zhen frowned as he listened to his subordinate’s report. He felt that the situation was not optimistic.

As soon as the route was determined, they encountered void monsters one after another. Although it was still within their expectations, it was the worst result.

This meant that the void monsters had already sensed the aura of the native gods and were swarming over in an attempt to devour them.

The longer they delayed, the worse the situation would become.

Under such circumstances, he could not hesitate any longer. He could only let go of his courage and continue moving forward.

If he was too afraid, he would miss the opportunity.

Tang Zhen had encountered such a dangerous situation more than once. He naturally knew how to deal with it.

Although the situation was critical, they were not at the end of their rope yet. If there was a need, they could mobilize more people to participate in the war at any time.

There were many void monsters, but the number of cultivators in the building was much more.

Ever since Tang Zhen returned to the fifth battle area, this matter was no longer his own business. When he faced difficulties, he would also have reinforcements.

“Don’t be stingy with your ammunition. Bombard the entire way and don’t miss any spot.

All the buildings quickly approached and opened fire at the same time, responsible for the task of cleaning up and prevention.

During the operation, if anyone tries to obstruct or sabotage the operation, kill them all!”

The plan had already reached a critical moment. Tang Zhen did not want any accidents to happen. Therefore, he decisively gave the order and started a carpet bombing on the route.

Even if there were many obstacles in front of them, they would use the fiercest artillery fire to open up a safe passage.

As long as the void monster hid within the explosion range, it would suffer from continuous fire attacks, thus completely exposing its hiding place.

This was also a preventive measure, so that the void monsters would be afraid and not dare to approach. Or if they got close to the route, they could be discovered by the cultivators in the building immediately.

Although the void monster’s abilities were terrifying, it would still be torn to pieces when attacked by heavy warships.

Fortunately, this was the case. Otherwise, Tang Zhen would have long thought of another method and would not force his way through like this.

This order would consume a lot of ammunition, but in this special situation, they had to grit their teeth and bear it no matter how much it cost.

Tang Zhen was even a little worried that the output firepower of the cultivators in loucheng wouldn’t be enough to achieve the expected clearing effect.

hurry up! Full speed ahead!

The news of the void monster being eliminated came from the front. Tang Zhen immediately gave the order and the team advanced a distance forward again.

But at this moment, ear-piercing alarms kept ringing, and void monsters appeared one after another.

This time, it wasn’t just one or two, but a large group of void monsters. They entered the void through the hole that had just been torn open like venomous snakes.

The moment they entered the divine Kingdom, these void monsters were attracted by the aura of the indigenous gods. Like a pack of hungry wolves, they rushed toward the escort team.

As they had never fought with the cultivators of Lou Cheng, the void monsters did not know how powerful they were. At this moment, they only had eyes for the native gods and nothing else.

For most of the native creatures, void monsters were invincible existences and could be called unsolvable disasters.

In the face of the void monsters that were extremely large in size and had terrifying devouring abilities, the indigenous residents of the invaded plane had no ability to resist at all.

Because they rarely met a worthy opponent, these void monsters became unscrupulous. After discovering their target, they would swarm forward as if there was no one else around.

However, their opponents this time were cultivators of Lou Cheng, who were also intruders like them.

When the void monster attacked, the Lou Cheng cultivators also opened fire. Ear-piercing rumbles and dazzling spots of light appeared in the sky.

The void monster that was charging over suffered a head-on blow, and its mountain-like body was instantly covered in wounds.

In the blink of an eye, the void monster's huge body began to shatter, and it fell to the ground while wailing.

The battleship in charge of guarding fired at full force and quickly cleared the monsters at the front. Then, it turned its muzzle and locked on to the location of the void breach.

From the terrifying hole, more and more void monsters rushed out. They were like a huge brush, painting the sky Black.

In just a short time, the hole had expanded more than ten times, and more void monsters had poured into the God Kingdom.

don't worry about those monsters. Let's continue moving forward. We'll stop them while we retreat to avoid being surrounded by the void monsters!

When Tang Zhen saw that the situation was not right, he decisively gave the order to retreat and avoid being trapped by the void monsters.

If they were surrounded by the void monsters, new void monsters might surround them before they could kill them all.

If it really came to that time, Tang Zhen and the others would be tightly trapped, and it would be extremely difficult to break out of the encirclement.

The cultivators of loucheng who had participated in the defense had obviously realized this, so they had almost used all their strength when they attacked.

The cultivators of loucheng were running in front while the void monsters were chasing behind. In front of the escort team, void monsters would jump out from time to time.

Even though there were troops clearing the way ahead, they were of little use. There were simply too many of them, and they simply couldn't kill their way through.

Under such special circumstances, choosing to fight against the void monster was definitely a rather stupid move.

Tang Zhen didn't linger in the battle. He commanded the cultivators of loucheng to move forward. At the same time, he gathered the cultivators and believers of loucheng that had gathered and continued to expand the scale of the guards.

Although the battle situation was becoming more and more intense, the escort team did not show any signs of chaos under Tang Zhen's command. They were like a hot knife through butter.

This was because there were four Masters of creation, a large number of elite cultivators, and the strongest fighting force of the Aboriginal deities.

If these experts were unable to deal with the void monster even when they gathered together, Tang Zhen could only choose to ask for help.

Chapter 2300 Entering the void (1)

It didn't take long before even worse news came, making the situation even more tense.

Even though the path ahead was heavily guarded, they still encountered the attacks of the void monsters. It could be said that it was impossible to guard against.

Even though the cultivators of Loucheng City tried their best to resist, they were still gnawed into a mess by the violent void monsters.

There were holes in the void everywhere, making it impossible to move normally. If one was not careful, they would rush out of the God Country and enter the Void.

Once one entered the void, it would be difficult to return to the God Kingdom. It was equivalent to entering the monster's lair.

If Tang Zhen was alone, where could he not go?

Even though the void was terrifying, he had been able to swim in it more than once and retreat unscathed every time.

For a cultivator of his level, the void was not as scary as he had imagined. It was like a mortal crossing the sea. As long as he was well prepared, there would be no problem.

However, he was now the commander of the team and was in charge of commanding the entire escort team. He definitely could not take risks easily.

This was also the reason why Tang Zhen had been avoiding the void hole. After all, that place was the nest of the void monsters. The harsh environment was extremely disadvantageous to the cultivators in the building.

Once they entered the void, they would be restricted in many ways. High-level cultivators would have no problem, but low-level cultivators could very likely die there.

It wasn't a problem to lose some people. The vehicles were unavoidable in the war. Tang Zhen was worried that the entire team would be affected.

However, since the route had already been set, it could not be changed at the last minute. Otherwise, the whole situation would be in chaos.

Knowing that there was a hole in front of them, they had to charge forward without any hesitation.

This was the battlefield, and there were many times when it was not up to one's own will. It was not that one wanted to do it, but that one had to do it.

"Everyone, listen up! The target is the void in front of us. Advance at full speed!"

Hearing Tang Zhen's order, all the cultivators were slightly stunned. However, they quickly regained their composure.

After receiving the order, even if there was a mountain of daggers and a sea of flames in front of them, they would charge forward without hesitation.

Seeing that they had entered the void, Tang Zhen chose to personally go into battle and guard the heavy warship with the three lords.

The battleships of all sizes in the escort team never stopped shooting. All the weapons were activated and were running at full load.

Even if there was nothing in front of them, they still plowed with their cannonfire a few times, not daring to be careless.

The area that had been destroyed by the void monster was already in a state of chaos, and there was almost no way out.

The dark void was like an impassable barrier that completely blocked the escort team.

If they wanted to advance, they had to enter.

Inside the void, there seemed to be pairs of greedy eyes staring at the approaching team.

In the distance, one could see void monsters constantly devouring the leaves like pests, leaving behind clear traces.

in the following time, we will directly pass through the void. I would like to ask the three suzerains to provide us with guards and timely guidance.

The greatest danger of entering the void was the complete loss of sense of direction. Most of the time, as soon as one entered the void, they could no longer find the entrance.

Every time this happened, it would lead to a series of changes until one was lost in the void.

In the entire escort team, there were less than a hundred cultivators who could distinguish directions in the void.

To ensure that such a huge team could smoothly cross the void and return to the God's kingdom through the loophole was undoubtedly a difficult task.

Therefore, Tang Zhen had specially warned the three feudal lords before he took action. He was afraid that there would be some unforeseen changes.

"Don't worry!"

Zhan Kuang horde Lord and Golden Eye horde Lord remained silent. They only nodded in agreement. Only star Spirit horde Lord replied.

"In that case, please be on your guard and Enter the Void immediately!"

Under Tang Zhen's command, the escort team rushed into the hole in the void without any hesitation. They were instantly engulfed by darkness.

The void was pitch black. They could not sense any sound or direction. However, it was not difficult for Tang Zhen and the rest.

The moment he entered the void, Tang Zhen's mental energy spread out and connected with the few cultivators around him.

The other cultivators did the same and released their own mental power to connect with the other cultivators in Lou Cheng.

It only took a very short time to form a mental power net, and then they could share each other's perception and vision.

It was also at this moment that a special image appeared in the minds of the team members who were originally unable to sense anything. It was the void they were currently in.

At this moment, they were not the only escort team in the void. There were also countless void monsters.

They were like sharks that had smelled blood, and they swam in groups. The formation of these monsters was in a three-dimensional state, and it was impossible to determine how many there were.

However, one thing was for sure. Once these void monsters surrounded them, they could easily devour their team.

90% of the cultivators had never seen such a scene in the void. As for the followers who followed them, it was their first time seeing it.

Just as the cultivators in the building were secretly shocked, Tang Zhen and the other three lords had already launched their attacks.

In the void, there was no need to worry about anything. Therefore, the attacks of the four suzerains were extremely fierce, and they were using all their strength.

However, due to the special environment of the void, their terrifying attacks didn't cause much of a commotion.

What the cultivators in the building could see was that the void monsters that were surging over had collapsed and dissipated silently.

Like dominoes, it continued to spread to the back, and no one knew when it would stop.

In the blink of an eye, the surrounding void was filled with countless floating pieces of flesh.

The void monster charged over aggressively, but before it could even get close to the team, it was violently torn to pieces.

Such a magnificent and bloody scene could not be seen with the naked eye, otherwise it would be unforgettable.

The cultivators of Loucheng city who were surrounded were not in the mood to watch the show because more void monsters were coming.

Just as they were hesitating whether to attack or not, Tang Zhen's voice was suddenly transmitted into their ears and directly sounded in their minds.

"Everyone, listen up. Do not hesitate and advance in the direction marked.

If anyone is left behind during this period, they must be pulled back immediately. Otherwise, once the spiritual network connection is cut off, they may be completely lost in the void!"

After hearing Tang Zhen's stern warning, the cultivators in the group didn't dare to be careless in the slightest. They quickly followed the group closely and tried their best to maintain a stable connection to the spiritual network.

Once disconnected, one could lose their way and be completely devoured by the void.

Tang Zhen and the other three lords had already turned into mobile artilleries. They were guarding the four directions of the team.

As for the position in front, it was cleaned up by the heavy warships and other frigates, and the dazzling light kept flashing.

Although the damage wasn't as high as Tang Zhen's group of four, the frequency of their attacks was high enough, so their efficiency in killing monsters wasn't low.

The only safe place now was the direction where the team came from, which had not been filled by void monsters yet.

However, there was no turning back. Since they had already moved, it was impossible to turn back. No matter how dangerous the road ahead was, they had to brace themselves and charge forward.

The area gnawed by the void monsters was more than a hundred kilometers in total, but the Lou Cheng cultivators were extremely fast. In the blink of an eye, they had already covered half the distance.

Perhaps after a while, he would be able to rush out of the void and return to the divine Kingdom through the hole.
