

## **Alternate 2301**

### Chapter 2301 Keep moving forward

As the escort team advanced in the void, they came across a broken divine Kingdom area. The surrounding area had been gnawed away by monsters, leaving only a piece of land with an area of nearly 100 kilometers.

A large group of believers were trapped in this sealed area, and their faces were filled with despair.

Just when they thought they were going to die, the escort team suddenly appeared and flashed through the broken Sky.

“Help!”

After seeing the advancing troops, the believers were stunned at first, then they cried for help excitedly.

He had thought that he would die for sure, but he did not expect the mountains to be restored and the water to be restored, and hope to descend.

“Give them a hand, save as many as you can!”

When the cultivators of Lou city in the team saw this, they took out ropes and ran straight to the believers.

This kind of rope-like equipment was the standard equipment for many cultivators in loucheng. It could shoot out silk like a spider’s silk bag and had super flexibility.

hurry up and grab the rope. If you miss this opportunity, no one can save you!

After hearing the warning from the cultivators of loucheng, the believers did not dare to hesitate and rushed toward the ropes.

In a short time, the hanging rope was full of believers, and then it was pulled off the ground.

With the traction of these ropes, as long as the believers did not let go, they would not have to worry about getting lost even if they entered the void.

The believers secretly rejoiced that they had finally escaped from danger.

However, just as he was about to Enter the Void, the space in front of him suddenly disappeared.

A huge mouth swallowed a few groups of believers and then bit towards the escort team.

The rest of the believers were terrified. They wanted to Dodge, but they found that they couldn’t.

They were still in mid-air, and if they let go of the rope, they would be seriously injured if not dead.

If they fell into the void, they would also have a slim chance of survival.

Most importantly, he would lose the chance to leave and be destroyed along with this incomplete space.

However, in the face of the constantly disappearing space and the frenzied attacks of the void monsters, if he did not Dodge, the end result would also be difficult to escape death.

As for whether this was effective or not, the believers didn't care at all. Since they couldn't escape death, they would die in a glorious way!

The cultivators of Loucheng City in the air looked regretful. Although these believers were not true comrades, they should not have died in vain.

Due to the obstruction of this space, the cultivators of Loucheng did not notice the void monster, and they were caught off guard after the arbitration.

"Attack immediately and prevent the monsters from approaching the team!"

After the order to attack was given, all the cultivators who passed through the incomplete space would attack the void monster.

There was no need for complicated instructions. Through the communication of the spiritual network, every cultivator in the team knew what to do.

The attacks rained down on the void monster like a storm, and the entire space was shattered.

The void monster that was originally hidden was also revealed at this moment. Its size was far larger than ordinary monsters.

If the void monsters were also divided into levels, then the void monster in front of them was obviously a King-level existence in the entire race.

The violent attacks of Lou Cheng's cultivators didn't cause much damage to it, which showed that it had a strong defensive ability.

The void monster was less than 10 kilometers away from the team. It could be said that it could get close in an instant.

"It's dangerous!"

Tang Zhen and the others, who were sharing the spiritual network, immediately felt a strong sense of danger. They teleported over in unison in an attempt to stop this unusual void monster.

As for the other directions, they could only leave them to the cultivators of Lou Cheng to guard. Otherwise, if the monster got close, the whole team would be completely scattered.

"Sir Tang Zhen, there's no need for you to act. Please continue to command!"

As soon as Tang Zhen moved, he heard Star Spirit Lord's warning. As for Golden Eye Lord, he had already rushed forward without a word.

The battle fanatic Lord, who had followed closely behind, laughed out loud, as if he was extremely excited.

In the face of such a dangerous situation, the other cultivators of Loucheng might be nervous, but the battle maniac Lord didn't care.

The more dangerous the environment was, the more excited he would be, and his combat strength would also soar crazily.

In the blink of an eye, the two overlords had rushed to the front of the void monster and launched their attacks.

The void monster was not to be outdone. It opened its mouth and bit at the two overlords, devouring the remaining space.

The darkness was like a huge Kasaya, directly falling down, with almost no place to Dodge.

Just as he was about to be swallowed by the vortex, the Golden Eye Lord suddenly disappeared. In the next moment, a terrifying giant hand descended from the sky.

The void monster was pressed down, like a venomous snake that had its seven inches pinched, and it kept twisting and struggling in the void.

Just by looking at the appearance of this giant hand, one could tell that it was transformed by the Golden Eye Lord. The size of the palm alone was almost the same as that of the void monster.

As for its true body size, it must have been boundlessly huge. Even if it did not materialize except for the palm, it was still boundlessly huge.

Only in the vast void could such a terrifying body be tolerated. If it were in a normal plane, the entire world might collapse.

While the void monster was struggling, the battle maniac Lord's body also expanded rapidly. At the same time, the giant axe in his hand also grew.

"Slash!"

A furious roar came from the void. Then, an incomparably huge figure opened his eyes wide in anger and swung his huge axe down.

Sensing the fatal danger, the void monster tried to struggle with all its might, but it could not get rid of the giant hand that was pressing down on it.

This scene was so similar to killing chickens and dogs!

Following that, a blood-curdling screech could be heard. It seemed to be filled with endless sorrow as the head of the void monster was directly chopped off by the giant axe.

"The two of you have worked hard!"

Tang Zhen clearly saw this scene through the network constructed by his spiritual energy. At the moment the void monster was beheaded, he directly expressed his thanks through the spiritual network.

If the two overlords had not acted in time, the void monster would have rushed into the team and caused great losses.

The cultivators of Lou city who had escaped from the disaster also expressed their thanks, and the believers were even more grateful.

"Lord, look ahead!"

A cultivator from the rift territory suddenly warned Tang Zhen loudly with a trace of fear in his voice.

At the same time the other party reminded him, Tang Zhen had also shared the other party's point of view and saw the scene in front of him.

A sea of gorgeous colors appeared in his field of vision, as if the rainbow and the sunset had fused together.

It was beautiful, but it made people tremble in fear.

It must be known that this place was the void. Other than black and white, there were almost no other colors.

Even the void monsters with huge bodies were black and white, mixed with gray-black and gray-white.

The more beautiful something was, the more dangerous it was.

Since that was the case, the color in front of him might very well represent extreme danger.

Just as Tang Zhen raised his vigilance, a tremor suddenly transmitted from his mind. When he understood the reason, he could not help but reveal a surprised expression.

At the same time, the imprisoned Neptune also began to struggle desperately, as if he had sensed something.

Unfortunately, because he was sealed, his voice could not be transmitted out. Naturally, it was impossible to judge what he had sensed, which was why he acted so abnormally.

what the hell is this? it doesn't seem to be a void monster, right? "

The star Spirit horde leader's voice was filled with a hint of surprise. It was obvious that he was also very confused.

if I'm not wrong, this should be an item from a super plane. I originally thought that this item had entered the divine Kingdom, but it seems that that's not the case.

Tang Zhen's voice sounded. His eyes flickered with an unusual luster as he looked at the colorful items.

No wonder Neptune reacted so strongly. This colorful item had a very close relationship with him, and it was also the root of the sea monsters 'crazy reproduction.

#### Chapter 2302 The magical cloud

The sea monster race was able to reproduce wildly due to the ability passed down by the sea Emperor. In a very short time, they could become a huge group.

Neptune had this ability, but it was not an item from the superior plane.

In the divine Kingdom, this was not a secret. The sea tribe had even deliberately publicized it to put pressure on their believers.

However, no one knew that the magical treasure that Neptune had obtained was actually only a part of the colorful cloud.

To the colorful clouds, it did not cause much damage, but it benefited the indigenous gods greatly.

Even if it was only a small part, it still gave him a terrifying reproductive ability and could pass this ability to his own race.

Neptune was straightforward and directly passed on this ability to the sea monster nests, making them crazy reproductive machines.

He would create elites and think of ways to improve their strength, making them his trump card.

Thousands of years of preparation was nothing in the face of a truly powerful force.

At this moment, the gorgeous cloud that was blocking Tang Zhen's eyes was the true body of that special treasure. It looked like a cluster of clouds and mist.

After a thousand years of nurturing, its size had already expanded by who knows how many times compared to when it first started.

Tang Zhen was able to know the origin of this multicolored cloud because the two items in his divine Kingdom had actually transmitted the same information to him.

This thing is very important, so don't miss it!

That fiery red Bird even wanted to fly out. However, it was suppressed by Tang Zhen.

The current environment was special, and he didn't want to cause any trouble. It was better to observe the situation first.

After knowing the origin of the colorful cloud, Tang Zhen would definitely not miss it even if he did not receive a reminder.

This was a weapon that could help a race reproduce, and at the same time, it would not leave any hidden injuries. It was simply magical.

This kind of thing was very wonderful. Whether it was for personal use or for trading, there would definitely be no lack of market.

There were some races in the world of Loucheng that had very low fertility. If he traded this treasure to them, he might be able to get a very rich return.

As this thought flashed across his heart, Tang Zhen prepared to take action and attempt to subdue the colorful cloud.

Avoid the area ahead and continue to move toward the marked location. Try to leave the void in one minute!

Tang Zhen had already charged forward when he gave the order. At the same time, he raised his hand and waved it forward.

The giant hand formed by World Energy moved toward the colorful cloud like a giant pocket, trying to take it in.

The colorful cloud seemed to have sensed danger and began to move slowly, preparing to avoid Tang Zhen's capture.

"You want to run?"

Tang Zhen increased his speed and controlled the huge pocket to continue closing up, tangling with the colorful cloud.

At the same time, a red flame rushed out of his body. It was the Supreme plane's treasure that had taken the form of a bird.

After the bird appeared, it let out a long cry, as if it was summoning its companions.

After hearing the cry, the colorful cloud trembled a little, and then an obscure spiritual power swept over.

Tang Zhen was clearly aware that this was the colorful cloud's doing. It was trying to confirm the little bird's identity.

The other divine Kingdom item that Tang Zhen had obtained, the special crystal that could conjure heart demons, also emitted waves of special fluctuations that spread out after penetrating the divine Kingdom in his mind.

After the aura of the two treasures appeared, the colorful cloud no longer moved and began to allow Tang Zhen to gather it.

This confident approach was undoubtedly showing Tang Zhen that it was not afraid of encountering any danger.

Actually, it made sense when he thought about it. To be able to give all kinds of creatures abnormal reproductive abilities, it must have a super strong vitality.

It would be extremely difficult to kill him.

Because the multicolored clouds were extremely compatible, it only took a short time for Tang Zhen to gather them together.

The pocket condensed from heaven and earth energy then compressed the colorful cloud until it was only one cubic meter in size.

After he finished gathering it, Tang Zhen extended his hand and sent it into the divine Kingdom in his mind.

In this short period of time, the escort team had already gone far away, but the spiritual force network was still connected.

However, Tang Zhen chose to block it one-way. In this case, no one would know what he had done.

Tang Zhen did not waste any more time after collecting the colorful cloud. He quickly caught up with the escort team.

As he returned to the team, the previously blocked spiritual power network was instantly reconnected.

“Lord Tang Zhen, have you already collected the colorful cloud?”

As soon as the spiritual power network was connected, the star Spirit Lord’s voice was heard with a hint of curiosity.

that’s right, but it wasn’t forcefully taken by me. It was voluntary, which is very interesting.

Tang Zhen did not expect that the colorful cloud would not show any signs of resistance after sensing the aura of its kind.

The process of subduing the multicolored cloud was so smooth that it was a little ridiculous. It had far exceeded Tang Zhen’s expectations.

“I heard that this cloud is related to Neptune’s reproductive ability. If that’s the case, this thing’s value is extraordinary!”

There was a hint of envy in the star Spirit Lord’s tone. He had clearly seen the value of the colorful cloud.

However, when they encountered the colorful cloud, Tang Zhen was the first to recognize its origin. After that, he was the first to rush forward.

The star Spirit Lord was a step too slow, so he naturally couldn’t fight for it, as it would make others look down on him.

Moreover, he did not have as many trump cards as Tang Zhen. Even if he were to face the colorful cloud, he might not be able to successfully subdue it.

This thing came from a super plane, so it must have quite a special ability, which was impossible to guard against in many cases.

Therefore, other than Tang Zhen, the other three overlords would not easily take action.

A thought suddenly appeared in Star Spirit Lord’s mind when he saw Tang Zhen subduing the colorful cloud.

“Sir Tang Zhen, are you sure that this kind of colorful cloud has the effect of increasing one’s reproductive ability?”

In fact, Tang Zhen could not be sure. After all, he had not tested it personally. However, with Neptune’s example, there should not be too much of a problem.

After receiving Tang Zhen’s reply, Star Spirit Lord hesitated for a moment before saying, “I have a friend who’s also a creator. The problem he’s facing now is that his family is not large.

If the colorful cloud is effective, I wonder if you can give up a portion of it and let my friend try it to see if it works?

If it’s useful, the other party will definitely give you a satisfactory return. At the same time, they will remember this favor.”

The star Spirit Overlord raised this matter. Not only was he helping his friend, but he was also helping Tang Zhen to accumulate connections. It was killing two birds with one stone.

Of course, the premise of everything was that Tang Zhen was willing to part with it and the colorful cloud was indeed effective.

after this matter is over, I will try to separate a part of it. If I can do it, I will contact you.

Tang Zhen didn't give a definite answer, and the star Spirit Lord didn't care. The conversation between the two ended there.

look, there's a hole up ahead. We're about to enter the divine Kingdom!

Someone shouted, and the voice spread through the spiritual network. The next moment, the darkness that shrouded the surroundings disappeared.

The clear sky reappeared in front of him, but it was also full of holes, like the end of the world.

Countless cultivators of loucheng coordinated with each other and fought with the void monsters. The minced meat on the ground piled up like a mountain, as if hell had descended.

Chapter 2303 Full evacuation

speed up! Don't hesitate! Don't fall behind!

After sending out a warning through the spiritual network, the huge and bloated guard team was suddenly pulled into a slender snake.

The narrow hole in the void was easily passed through, and it went straight for the light.

"I'm out, hahaha Yingluo"

After they rushed out of the void, all the cultivators in the team heaved a sigh of relief. Some of them even laughed out loud.

Although the inside of the God Kingdom was equally dangerous, the cultivators would rather face the ferocious void monsters than the endless darkness.

When fighting in the void, cultivators would encounter too many restrictions, and they would not be able to use their full strength.

When they had crossed the void earlier, the pressure they had endured was not ordinary. They did not dare to make any mistakes during this period of time.

Firstly, the void was indeed dangerous. To cultivators who entered it, it was simply a hopeless situation.

The second was the existence of the mental network, which allowed Lou Cheng's cultivators to share their senses and the psychological pressure of the members of the network.

Without the spiritual network, the low-level cultivators in the void were no different from cripples. No matter how many of them there were, they would be useless.

This was originally a good thing. When the pressure was evenly distributed, it would make those who were originally under pressure feel more relaxed.

However, before getting used to this spiritual network, Lou Cheng would feel uncomfortable all over, as if there was a huge stone pressing on his heart.

Therefore, when the spiritual network was disconnected, the cultivators in Loucheng felt relieved, as if they had finally climbed out of a swamp.

“Everyone, continue forward!”

It was still the same order to move forward, but this time, his tone was more relaxed.

The most difficult part of the journey had been safely passed. If there were no accidents, it was only a matter of time before they reached area 153.

The route that was marked at the beginning had been completely cleared, and the cultivators of Loucheng city were trying their best to stop the approaching void monsters.

The escort team moved quickly. Everyone knew that even a second’s delay could lead to new changes.

As for the cultivators who were blocking the void monsters, it was time for them to retreat after the escort team passed.

The command center in area 153 had been keeping an eye on the guards. They gave a new order.

All cultivators are not allowed to fight, just follow the group. The final destination of this trip is the 153rd defense area. Upon arrival, we will immediately leave the divine Kingdom!”

The divine Kingdom was already in ruins. The longer the cultivators of Lou Cheng stayed, the higher the possibility of them being trapped here.

This world, which was riddled with holes, was already in a state of being scrapped. Moreover, there was no way to collect resources normally under the interference of the void monsters.

Since that was the case, it was better to leave early and avoid unnecessary casualties.

After receiving the order from the headquarters, the cultivators of Lou Cheng immediately pulled back their line of defense. After the escort team passed by, they immediately gave chase.

Those void monsters were originally just wandering around and didn’t have to attack the route they were taking. However, the cultivators of Lou city didn’t allow them to get close, so they took the initiative to attack and drive them away.

Most of the void monsters that were attacked avoided their path of advancement to avoid being attacked again.

However, when the warship carrying the indigenous gods passed by, these void monsters seemed to be stimulated and chased after the team.

As mentioned earlier, to the void monsters, the Aboriginal deities were the most delicious food.

Every void monster was afraid that they would be too slow and the Aboriginal deities would be eaten by their own kind.

However, they didn't know that this was a poisonous bait. Although they could see it, they were destined not to be able to eat it!

"Brothers, beat him up!"

The cultivators at the back of the team naturally blocked with all their might, not allowing these void monsters to approach.

As if he was hitting a target, he poured out his ammunition without any worry. He could hit the target without aiming.

Along the way, more and more void monsters were being sucked in and chased behind the guards.

The corpses of the void monsters that were shot to death were scattered all over the place, as if a mountain range had reappeared.

In fact, if time allowed, the corpses of these void monsters might really become a brand new mountain range.

However, as the divine Kingdom collapsed and disappeared, all of this would no longer exist, even the corpse of the void monster.

The situation was getting more and more dangerous. The entire sky was occupied by void monsters. Everywhere they passed was pitch-black, forming a huge void passage.

It was like a sharp blade that split the divine Kingdom in half. It was a shocking sight.

The believers who followed Lou Cheng were at a loss. The situation in front of them had completely exceeded their expectations.

The ones who destroyed the divine Kingdom were not sea monsters or martial artists, but these void monsters that had appeared out of nowhere.

Their only choice now was to leave with the cultivators of Lou Cheng. There was no other way out.

At the thought of the situation that they were about to encounter, the believers and Warriors were filled with confusion, not knowing what kind of fate awaited them.

Of course, most of the believers and Warriors were thinking about how to get through the difficulties in front of them and not what to do in the future.

The command center had already given the order for everyone to retreat. At present, other than the teams that were guarding the forward route, the other teams had all retreated to area 153.

There were at least ten million cultivators and believers in the city. It would not be easy to leave the divine Kingdom at the same time.

The slightest mistake would cause endless trouble.

Fortunately, the cultivators in Lou Cheng were very disciplined and carried out their orders to the letter, so there were not too many problems.

As for the believers, they only needed to follow and follow orders.

At the moment, they could only rely on the cultivators of Lou Cheng. Furthermore, the Aboriginal deities were also being escorted away, so they naturally had to follow closely.

Wherever the Aboriginal gods were, the believers would follow.

After so many years of brainwashing, the believers had long developed a reliance on the indigenous gods. Even if they were angry after knowing the truth, they would still choose to protect them with their lives when danger came.

When the indigenous gods woke up, the believers might still follow them and seek new development.

Other reasons aside, the strength of the indigenous gods alone was worth the followers.

Regardless of whether such a situation would occur or not, it would all be a matter for the future and not for the time being.

As they encountered more and more void monsters, the entire battlefield was in chaos. There were violent rumbles everywhere, and huge figures kept flashing in the sky.

At this moment, most of the void monsters had already transformed into a physical state. They had all kinds of strange appearances and looked extremely ferocious.

They swam around in the sky and played from time to time, completely treating the God's kingdom as an amusement park.

After eating and drinking to their fill, some of the void monsters simply floated in the air and entered a state of sleep.

When they woke up, they would continue to devour and then fall into a deep sleep.

The initial feast of devouring had ended. In the following time, the void monster would slowly enjoy its spoils of war and even use the God's kingdom as a nest for reproduction.

Tang Zhen involuntarily rejoiced when he noticed this. It was fortunate that the void monster did not know about the effect of the colorful cloud. Otherwise, it would definitely devour it in a crazy manner.

If they could obtain that kind of abnormal reproductive ability, the number of void monsters would once again increase explosively. No one could say for sure how many times it would increase.

If that really happened, then the fifth battle area would be shooting themselves in the foot.

The void monsters that were reproducing crazily would spread all over the void and become a major threat to the cultivators in the city.

Wherever the cultivators of the City Tower went, the void monsters would follow. The two of them would compete and kill each other, just like the current scene.

Fortunately, the worst case scenario did not happen. The fifth battle area had indeed achieved their goal, turning the God Kingdom into ruins.

Chapter 2304 Successful arrival

The sky above defense area 153 was now filled with warships of all sizes, completely locking down the surrounding area.

This was an absolute forbidden zone. As long as a void monster appeared, it would suffer a destructive blow.

The void monsters' devouring ability was too terrifying, and they definitely couldn't be allowed to stay in a certain area. Otherwise, it would only take a very short time for them to gnaw at the space until it was in tatters.

The holes in the void that were being gnawed at would become the most dangerous traps.

More void monsters would find a way to enter the God's kingdom, and it was impossible to guard against them.

The command center concentrated their firepower to seal off the nearby space, so that the void monsters could not stay and approach.

This defense method was very effective. Even though the surrounding space was damaged, the area controlled by area 153 showed no signs of destruction.

At this moment, the void monsters had already entered the ocean. They were devouring with great pleasure, and the sea disappeared into thin air.

Because of the void's repulsive force, even if there was a hole in the void, the sea still couldn't flow in, but it also made the ocean full of traps.

The frightened sea monsters would occasionally charge into the void hole and disappear completely.

As the ocean had been completely abandoned, the void monsters could devour as much as they wanted here without having to worry about the attacks of the cultivators in the city.

For void monsters, this kind of hunting ground where they could devour leisurely was undoubtedly more suitable for them.

It was precisely because of the existence of the vast ocean that the void monsters on the land were less than 30%. Otherwise, Tang Zhen and the others would have to fight a bloody battle before they could send the native gods to defense area 153.

These ocean monsters had tried to attack the land before, but they were blocked by the cultivators in the city.

The other areas could be caved in, but area 153 could not be lost. There was no doubt about that.

After paying a heavy price, these void monsters became smarter and determined not to get close to the defense area.

This was actually better, as they could save a lot of ammunition for the final battle.

As the teams retreated one by one, the 153rd defense area became lively and full of cultivators.

Due to the limited space, most of the cultivators in loucheng had already entered the teleportation channel and were waiting slowly at the mid-turn.

If there was a need, they would return to their God's kingdom to provide support to their companions.

The battleships of various sizes that had followed the operation earlier were left behind to form the last line of defense.

As they continued to accumulate, the number of battleships increased until they covered the entire sky.

The huge and pitch-black cannon muzzles emitted a heart-palpitating aura. With just one volley, they destroyed a group of void monsters. The destructive power was terrifying.

The cultivators of loucheng city had already controlled the intensity of their attacks and didn't dare to use their maximum firepower. Otherwise, the area that was attacked would be directly turned into nothingness.

In the center of this super steel fortress was the impenetrable defense area 153, which could be said to be the safest place in God's kingdom at the moment.

After identifying the identities of Tang Zhen and the others, a safe passage was immediately opened in the originally sealed space, allowing Tang Zhen and the others to enter.

The warships of all sizes in the other areas locked onto the void monster that was following closely behind, and the fierce firepower once again crossed and fired at the same time.

The aggressive void monsters seemed to have knocked down an invisible wall and were instantly torn apart.

Under the Super firepower of the cultivators in the city, the void monsters were unable to advance even half a step and were firmly blocked outside the defense line.

After the escort team charged into the defensive area, four figures suddenly rushed out. They were Tang Zhen and the other three overlords.

Previously, in order to protect the indigenous gods, they had been restrained and had been suppressing their anger.

Now that they had finally arrived at their destination and the indigenous God had been sent into the portal, there was no need to worry about their safety.

Soon, there would be someone in charge of receiving them and bringing the indigenous deities to the world of loucheng. The mission of Tang Zhen and the others had officially ended.

The four Lords who had completed their mission left the team at the same time and rushed to the periphery of area 153.

Firstly, it was to receive those teams that had yet to return, and secondly, it was to let loose and prepare for a massacre.

Only in this way could his thoughts be clear.

In the eyes of those void monsters, Tang Zhen's group of four were no different from ants. They did not place them in their eyes.

However, in the next moment, they experienced the terror of ants. Just one of the cultivators could kill a group of void monsters.

The cultivators of Lou Cheng who were watching the battle from afar finally experienced the power of the Masters of creation. The terrifying battle scene was far beyond their imagination.

It was like sweeping with a broom or painting with a painter's paint. The result was that groups of void monsters kept disappearing.

The believers and Warriors were also dumbfounded by the battle scene. If it were not for the cultivators of loucheng urging them, they would have continued to watch.

Tang Zhen and the other three killed to their heart's content. The corpses of the void monsters fell to the ground and piled up higher and higher.

"Have you calculated how many cultivators in loucheng have not returned?"

When Tang Zhen killed the void monster, he contacted the command center directly. However, the reply he received was not good.

Up until now, there were at least 100000 Lou Cheng cultivators who had not returned. They were scattered all over the divine Kingdom.

As for the number of believers and Warriors, it was impossible to count them. Compared to the cultivators in Lou Cheng, there were definitely more.

The cultivators of loucheng advanced and retreated together. It was absolutely impossible for Tang Zhen to abandon his subordinates. Therefore, no matter how critical the situation was, he had to wait for the cultivators of loucheng to return.

ask them again if they need any help. Remember not to force yourself!

There were still three masters of creation on the battlefield. If they needed help, they wouldn't just stand by and watch.

Moreover, there were cultivators from other territories among them. Under such circumstances, the three lords couldn't just sit by and do nothing.

It didn't take long for the command center to send back information.

no team has requested for assistance. They said they can handle it and will return at the stipulated time.

Tang Zhen and the others were initially stunned when they heard the feedback from the command post. Soon after, they chuckled and shook their heads.

"Don't tell me that this bunch of fellows are trying to take the opportunity to fight?"

Looking at the icons on the screen, the teams had already gathered together and were rapidly advancing toward area 153.

Surrounding these teams were densely packed void monsters that were launching attacks at the cultivators in the building.

In such a critical situation, the cultivators of loucheng city didn't ask for help. It was obvious that they were competing with each other.

Whoever requested for help first would lose.

"This bunch of guys, always making trouble regardless of the occasion!"

The star Spirit horde leader shook his head slightly, his tone carrying a hint of blame. It was obvious that he did not like to see such a thing happen.

Compared to the scarred territory, the strength of the star elves "territory and the battle maniac's territory were undoubtedly much stronger.

Competing under such circumstances would give people the feeling that the strong were bullying the weak, and it would obviously be an unfair victory.

Clearly, in Star Spirit Lord's eyes, the cultivators from the cracked territory and the sacred Dragon Warzone were no match for the cultivators from the two territories.

The cultivators in his territory probably had the same idea, and as a result, they angered the cultivators in the loucheng under Tang Zhen.

When a group of extremely capable and unruly guys met together, it was inevitable that they would have a competitive heart. Once they really started to compete, they would only stop after they had determined who was better.

Chapter 2305 Let's have a competition?

"Sir Tang Zhen, do you want them to withdraw now?"

Someone in the command center suggested. After all, the situation was critical now. Where would they find the time to play a competitive game?

This group of Lou Cheng cultivators didn't care about their own lives at all, and as a result, they implicated their comrades.

If it wasn't for them, more than half of the cultivators in defense zone 153 would have already evacuated.

However, in order to wait for them, the cultivators in the tower City could only continue to defend and ensure the safety and smooth flow of the plane channel.

Who said that they were inevitably resentful? however, they were curious about the identity of the cultivators in the city.

In a situation where most of the troops had already retreated from the battlefield, it was very risky to fight the void monster in a calm and steady manner.

If they were not careful, they might be devoured by the void monsters, and not even their bones would be left.

Those who dared to do this were either crazy or extremely confident in their own strength.

After checking the background of the cultivators, everyone suddenly realized that the cultivators who had not returned to the Holy Dragon battle zone were all contestants who were competing for the position of the Lord of the Loucheng.

They wanted to seize this rare opportunity to madly gain battle merits so as not to miss such a good opportunity.

They only needed to kill a void monster to exchange for a large amount of battle merits. Where else could they find such a good thing?

As for the cultivators from the star elves 'territory and the battle fanatic's territory, they were bold because of their skills. Seeing that the cultivators from the sacred Dragon Warzone were not retreating, they naturally did not want to retreat.

After all, their battle zone was ranked fifth in the world in Loucheng, which was many places ahead of the sacred dragon battle zone.

If not for Tang Zhen, the cultivators in the sacred Dragon Warzone would never have the chance to fight alongside them in their lifetime.

This wasn't arrogance, but the truth. The difference in strength between the two battlefields was too great, and under normal circumstances, it was impossible for them to cross paths.

It was precisely because of Tang Zhen that the cultivators in Loucheng city of the two territories had never looked down on the cultivators in the sacred Dragon Warzone.

The competition between the three parties was only held in secret and not openly stated.

However, after hearing the suggestion from the command post, someone immediately objected.

Who cares about them? Let them have a match. This is a rare opportunity, so how can we miss it?"

The battle maniac Lord was the first to jump out, shaking his head and rejecting this suggestion. Although he wasn't involved, he couldn't wait for the cultivators of the three sides to have a good competition.

"How you all decide is your own business. However, the cultivators of Loucheng in my Zhan Kuang territory definitely do not need any reinforcements!

So what if it's a void monster? Why don't we take advantage of this opportunity to have a good fight and gain more combat experience?"

Zhan Kuang Lord said loudly. His tone was firm, and it was obvious that he had already made up his mind.

If he didn't need to guard the rear, he would probably have rushed to the front line to watch the battle after saying this.

Before coming to the divine Kingdom, the cultivators of loucheng city in the battle fanatic territory had been conducting a competition-like activity to achieve the purpose of training their soldiers.

Now that they were in the real battlefield, and the enemies they encountered were rare void monsters, how could the Berserker Lord miss such a good opportunity?

If he didn't train the cultivators under him and kill the void monsters until their blood flowed like a river, it wouldn't be in line with his character.

"You barbarian, you're just messing around. Is this the time to show off?"

The star Spirit horde leader had always been a steady and resourceful person. He had worked with Zhan Kuang horde leader for many years, so he didn't hold back when he spoke.

Other than feeling that the timing was not right, he was also afraid that Tang Zhen would overthink and cause an unnecessary misunderstanding.

we're going to leave the Holy Kingdom soon anyway. It's a good thing to watch a wonderful performance before we leave.

Tang Zhen, who was standing not far away, slowly opened his mouth and said.

He wanted to give Qian Chongyun and the others a chance as well. Only such battlefields could train true experts.

It was a rare opportunity and he should not miss it.

"That's right, I think so too. If we just leave like this, wouldn't it be very boring?"

If someone were to ask about this mission in Scandinavia, how would you answer?

Could it be that he couldn't defeat the void monster, was chased until he peed his pants, and finally fled the God's kingdom in a sorry state?

In any case, I won't admit it. Even if I'm really going to leave, I'll have to fight to my heart's content!"

Zhan Kuang tribal Lord's voice rang out again. However, from his tone, it sounded like he was a young man in a fit of pique.

Perhaps this was his true nature, which was why he was so warlike and never afraid of enemies stronger than him.

Upon hearing Tang Zhen's words, the star Spirit Lord didn't say anything more. This was just a small matter and he didn't take it to heart.

show me the data of all the cultivators in loucheng. I want to take a good look at the combat power of this weapon.

The battle fanatic Lord ordered loudly. As soon as his voice fell, an image appeared in the sky in front of everyone, and lines of data constantly refreshed.

"It's a fierce fight. Tell me, which group will win?"

Zhan Kuang Lord looked at the image on the screen as well as the battle Points ranking that was constantly refreshing. He suddenly looked at Tang Zhen and the other two and asked.

I don't know. Who can say for sure? besides, the outcome of this competition can't prove anything. It's meaningless.

Tang Zhen didn't speak, and it was still the star Spirit Lord who replied with a hint of disdain.

If it wasn't for the large number of void monsters, the star Spirit Lord wouldn't even be bothered to watch a battle of this level.

"Who says that this kind of competition is meaningless? that's because you don't know the benefits of it. In the continuous battle, you can discover your own various shortcomings and make up for them in time.

As long as one persevered, one's strength would rapidly increase. How could you not know this?

I'll say something you don't like to hear, but the Lou Cheng cultivators of your Star Spirit territory may not be a match for the Lou Cheng cultivators of my Zhan Kuang territory, because we know how to fight better!"

Under normal circumstances, battle fanatic Lord's words would be no different from issuing a challenge.

However, the star Spirit Lord had known him for many years and knew his nature and habits. He knew that there was no malicious intent in his words.

But even so, the star Spirit Lord still laughed contemptuously and did not agree with what the other party said.

a bunch of brainless guys who only know how to act rashly. If we really fight, you're not a match at all!

The star Spirit Overlord's tone was very calm, but his disdainful attitude was clearly expressed.

The battle fanatic Lord's personality was one that could not be provoked, especially when it came to matters that concerned victory and defeat. He would never show weakness.

After hearing Star Spirit Lord's words, battle maniac Lord's eyes immediately widened, looking like an enraged bull.

"Hehehe, why do your words sound so harsh?

Since you're not convinced, why don't we have a competition and see whose subordinate is better?"

Zhan Kuang Lord's tone was filled with provocation as he stared at Star Spirit Lord.

If the star Spirit Overlord didn't take the blow, it meant that it was a coward.

it's good to have a competition. It'll let you figure out the truth and know your own strength!

The star Spirit horde leader's words were impolite, but the battle Emperor horde leader didn't care. He even laughed out loud.

In the past few years, he had been looking for an opportunity to let the cultivators of the two territories compete.

However, the star Spirit Overlord had a cold and arrogant personality. He was not interested in such matters at all. Even though Zhan Kuang Overlord had mentioned it many times, the star Spirit Overlord had ignored him.

Zhan Kuang horde leader had always been concerned about this matter. He had originally wanted to test the waters today, but he didn't expect Star Spirit horde leader to agree.

The reason for his agreement might be related to Tang Zhen.

Zhan Kuang Lord didn't want to figure out the specific reason. As long as they could compete in the previous round, it would be fine. He wanted to take the opportunity to let Tang Zhen and the other two see how strong the cultivators in loucheng were!

Chapter 2306 Not giving in to each other

"My three lords, why don't we make a bet and see which team will win?"

The battle maniac Lord suddenly suggested, looking very excited.

The more battle-hungry they were, the more they loved to gamble and were obsessed with the thrilling and exciting feeling.

The battle maniac Lord was like this. The competitions that he held in his territory were also accompanied by all sorts of gambling bets, allowing the cultivators in the loucheng to participate in the guessing game.

Otherwise, what was the point of a simple competition?

Zhan Kuang Lord had absolute confidence in his subordinates. One had to know that the cultivators who had rushed to the divine Kingdom this time were all elite contestants.

They had passed through many rounds of selection, and none of them were weak. The battle maniac Lord was very clear about the strength of these cultivators.

He suggested this because he was a gambler and had enough confidence.

you're taking a gamble. Are you that confident? "

Hearing this, the star Spirit horde leader glanced at Zhan Kuang horde leader with a smile that wasn't a smile. He could guess what the other party was up to.

He must be relying on his strong Army and strong horses, thinking that victory was in his grasp, so he was so arrogant and confident.

This barbarian, do others think he's a fool?

Tang Zhen chuckled. At this moment, spirit Lord Zhan Kuang's face was beaming with joy, giving off an arrogant feeling.

Of course, he wasn't really being arrogant. It was more like a joke between friends to lighten up the atmosphere. Otherwise, he would be too stupid.

Spirit Lord Zhan Kuang wasn't stupid. Although the star Spirit Overlord called him a barbarian, he had never treated him as a brainless brute.

"Of course, I'm just afraid that you won't dare to take the bet!"

Zhan Kuang horde leader roared as he looked at Star Spirit horde leader with a hint of provocation in his eyes.

Then, his gaze swept across Tang Zhen and the Golden Eye Lord like a pugnacious rooster, revealing an aggressive aura.

Under such circumstances, even if he had no interest in the competition, he could not back down.

"Why don't you tell me what you're betting on and what the stakes are?"

Star Spirit Lord's gaze swept over Tang Zhen. Seeing that he didn't have any reaction, it was obvious that he didn't object to Zhan Kuang Lord's suggestion.

This made spirit Lord star feel slightly surprised. One should know that among the three forces, Tang Zhen's subordinates were the weakest.

If there wasn't a bet, it didn't matter who won or lost, but if there was a bet, it would be too much of a loss.

If he lost the bet, he would have to pay the bet. It was impossible for Tang Zhen not to know this.

In this competition, the cultivator from the sacred Dragon Warzone was only a foil at best.

Since this was the case, why did Tang Zhen do this?

"Don't tell me that Tang Zhen's subordinates still have some hidden methods that give them a chance to obtain victory?"

Such a thought suddenly appeared in the star Spirit Lord's mind, but he immediately rejected it.

Whether it was the level of the Warzone, the strength of the cultivators in loucheng, or the various resources that they usually came into contact with, the sacred Dragon Warzone was far from comparable to the two great territories.

Under such circumstances, the chances of victory in the Holy Dragon battle zone were slim.

"Lord Tang Zhen, are you also prepared to bet with this barbarian?"

The star Spirit Lord couldn't suppress his curiosity and asked Tang Zhen to see if he could figure out what was going on.

Although he had only been in contact with Tang Zhen for a short time, he was certain that Tang Zhen was definitely not the kind of person who would act recklessly.

There were many times when Tang Zhen's seemingly risky actions were actually done after careful consideration. He would only do it when there was an extremely high chance of winning.

Now that he dared to participate in the bet, he must have enough confidence and not give the bet to others for free.

how can I miss such an interesting event? do you think I'm not qualified to participate? "

Tang Zhen smiled and asked the star Spirit Lord.

of course, I didn't mean that. It's just that there are some things that I don't understand. How could Lord Tang Zhen not know about this? I think he must have been prepared for this? "

Tang Zhen shook his head and denied, "Star Spirit Lord is thinking too much. This competition is only a last-minute decision. How could I have made any preparations?"

I'm only here to encourage my subordinates. After all, this is the battlefield of the cracked territory. How can my people not participate? "

So, you two can let your men compete with each other. As for my men, they'll just be playing with you."

Tang Zhen had a carefree expression when he replied. It was as though he did not care about the outcome of the battle.

"Hehe, I don't believe you!"

The star Spirit Lord chuckled and didn't say anything else. Tang Zhen was confident, so wasn't he?

Since that was the case, then let's see who's better with their own abilities!

"Then let's see where the loucheng cultivators with the most battle merits come from after all the cultivators have returned."

Zhan Kuang suggested. Tang Zhen and the other two didn't object to it. This method of competition was much more simple and fair.

"Since that's the case, I'll have to inform them so that they won't be lazy."

As the battle fanatic Lord spoke, he had already connected to the front line through the command center. His image appeared in the sky.

"Loucheng cultivators of the battle maniac territory, listen up. I made a bet with the three overlords that you will definitely kill the most void monsters and obtain the most battle merits.

Whether or not you can win back your reputation will depend on your performance. I will always pay attention to you, so Don't Let Me Down!"

Spirit Lord Zhan Kuang's voice reverberated in all directions. Even though the sounds of fighting could be heard everywhere, it was still unable to drown out his voice.

After hearing this voice, the cultivators of the loucheng Kingdom in Zhan Kuang's territory began to roar, their faces filled with excitement.

In the blink of an eye, their combat strength had increased by several times, and each of them was like a Wolf or a Tiger.

All the cultivators were trying their best to show their Lord how much strength they had.

“Alright, hahahahahahaha Yingluo.”

The battle maniac Lord, who noticed this, laughed out loud in a carefree manner. He seemed extremely pleased with himself.

The performance of the cultivators from the battle fanatic territory was completely in line with his expectations. In front of the three overlords, they had helped him gain face.

“Hahaha, my three lords, how are my subordinates?”

This kind of open-mouthed behavior was probably in line with his aura.

However, from Tang Zhen’s point of view, the strength of the cultivators from the rift wasn’t weak. However, this didn’t mean that they would be able to obtain victory in this competition.

The cultivators in the star Spirit territory were not weak, and the cultivators in the sacred dragon battle zone had their trump cards, so they were on par with each other.

Therefore, there was no way to determine who would win and who would lose. It could only be said that the winning rate was a part of each.

Lou Cheng’s cultivators from Zhan Kuang’s territory began to show their strength, and the same went for the Lou Cheng cultivators from Star Spirit territory.

They knew their Lord’s style and would not easily participate in such a competition. Now that they were involved, although there was some special reason, they were not afraid.

Since that was the case, they definitely couldn’t let their Lord lose face. They had to obtain the final victory no matter what.

As for Lou Cheng’s cultivators in the Holy Dragon battle zone, they remained calm and cooperated with their companions to kill the void monsters.

At this time, the cultivators who had yet to return from the sacred Dragon Warzone were all participating in the competition for the position of the city Lord. In order to obtain that precious qualification, none of them were willing to give in.

Even if Tang Zhen didn’t come out to cheer them on, these cultivators would still do their best to obtain a better result.

It would naturally be for the best if he could help Tang Zhen gain face while obtaining battle merits.

Chapter 2307 Sure to win?

After simply agreeing on the bet, Tang Zhen and the others turned their attention to the battlefield to see how the cultivators in Lou Cheng would perform.

The stakes of Masters of creation were definitely extraordinary. If his underlings won, they would naturally be rewarded.

All the cultivators in Lou city knew that they would gain both fame and fortune if they won this battle!

With such a huge reward, there would definitely be brave men. The originally intense battle began to become more and more exciting.

At this moment, on the vast plain, there were areas gnawed by void monsters everywhere, and the dark appearance was extremely conspicuous.

As the void monster was huge, the area it devoured was naturally large. From a distance, it did not look like much, but when one got closer, one would know how large the area of the damaged area was.

The cultivators of loucheng city had to be extra careful in the process of fighting to prevent themselves from accidentally entering a void hole.

Such a battlefield environment was extremely disadvantageous to the cultivators of Lou Cheng. The longer they delayed, the more passive they would be.

In fact, the cultivators in loucheng city were constantly moving towards defense zone 153 during the battle.

They were also afraid that their escape route would be cut off, and the surrounding space would be gnawed at. If that happened, they would have no way to advance or retreat.

Although it was important to obtain battle merits, the prerequisite was that he had to make it out alive. Otherwise, it would be useless no matter how many battle merits he obtained.

As the news of the competition spread, the cultivators in loucheng who were fighting the monsters were no longer in a hurry to leave.

With the Four Masters of creation watching over the battlefield, the cultivators in Lou Cheng could fight without any worries. They didn't have to worry about being trapped in the shattered space.

Their already high-spirited fighting spirit was completely boiling at this moment, and they were all fighting to be first.

Every cultivator in Lou Cheng had the heart of a strong man and would never admit that they were weaker than others.

Even if there was a difference in strength, it was only temporary and did not mean that it would be the same in the future.

This competition was an opportunity that was hard to come by. If he could take this opportunity to show his talent, he would definitely be able to achieve better development in the future.

There were many cultivators in loucheng who had similar thoughts, causing the competition to become more and more intense. The brave figures of the cultivators in loucheng could be seen everywhere, and they were engaged in fierce battles with the void monsters.

Cooperative battles were common, but it was not uncommon to see people fighting alone. They were clearly true experts.

All the cultivators were fighting each other, afraid that the void monster would be snatched away if they were a step slower.

There were more wolves than meat, there was no fighting, there was no way to get it.

Some people were happy, while others were sad. Some cultivators in the Holy Dragon battle zone didn't like such competition.

Looking at the chaotic scene and feeling that the difficulty of the battle had increased, it was inevitable that some people would complain.

don't worry, the void monsters have started to gather. I'm afraid you won't be able to kill them later!

That was indeed the case. As time passed, more and more void monsters gathered, and the battlefield environment became more and more dangerous.

This was not a cat or a dog, but a terrifying monster that could devour everything. If one was not careful in the process of fighting, they would end up without even a corpse.

From the start of the battle until now, the casualties had been continuing, and most of them were believers and Warriors.

Even though there were casualties among the cultivators in Lou Cheng, the number was so small that it was almost negligible.

With the increase in the intensity of the battle, the believers and martial artists felt depressed, as if they were forced to die.

They didn't want to get involved in such a meaningless battle, but without the help of the cultivators from Lou Cheng, they couldn't leave the battlefield.

He was in a dilemma.

When they were chasing after the void monsters, they had followed the cultivators of Lou Cheng to fight. They did not expect to encounter such a situation.

It was their bad luck that the Lou Cheng cultivator they were following had a special identity. Others would have avoided danger, but they had to face it.

The believers were cursing in their hearts, but they could only brace themselves and continue to persist while looking for an opportunity to retreat from the battlefield.

In fact, there were believers who had been trying to leave, but without the firepower of the cultivators in Lou Cheng to clear the way, they couldn't fight the void monsters at all.

Once they were attacked by the void monster, they would not have much chance to resist and would be devoured in one bite!

Under such circumstances, the believers and Warriors did not dare to act rashly. They could only pray in their hearts that the cultivators in the city could evacuate as soon as possible.

However, the result was disappointing. Not only did the cultivators in loucheng not retreat, but they also encountered a few Masters of creation who made a bet to see whose subordinates were more powerful.

Faced with such a situation, the believers had completely broken down, which then turned into a deep sense of helplessness.

This was the sorrow of the weak. They could only obey the decisions of the strong and could not control their own fate.

this group of cultivators from Lou Cheng are all complete lunatics!

As the believers cursed, they had already resigned themselves to their fate. If they were unlucky enough to die, the cultivators in loucheng city would not have a good time either.

At the same time, there were also some believers who were very smart and were secretly happy. Under the surveillance of the four God-level cultivators, the cultivators in loucheng city would almost never be in any life-threatening danger.

Which Lord would watch their elites die while watching a battle? they would definitely provide help at the critical moment.

At most, it was done in a more concealed manner and maintained an appropriate scale so that the competition would not be affected.

Although the people they protected were not believers or Warriors, as long as they were smart enough and followed the footsteps of the cultivators in the city, they could ensure their safety as much as possible.

Of course, they couldn't follow blindly either. At this moment, the cultivators in the city were all surrounding and killing the void monsters. If they overestimated themselves and rushed forward, they would probably not be able to escape death.

Under countless gazes, the competition between the cultivators of the three-sided city became more and more exciting.

The loucheng cultivators from the two territories indeed had a huge advantage in strength. They entered the battlefield as if no one was there, and void monsters were constantly killed.

In comparison, the Lou Cheng cultivators from the Holy Dragon Warzone were much slower in killing monsters.

It was an undeniable fact that the cultivators in the two territories were very strong. Therefore, no one would be surprised if such a situation happened.

In the eyes of many spectators, the final Victor would only be between the two territories.

The data displayed in the 153rd defense zone also proved this point. The cultivators from the two territories had firmly occupied the top 100 positions.

Because the conditions didn't allow it, this competition couldn't continue indefinitely. He believed that it wouldn't be long before the competition ended.

Under such circumstances, it was almost impossible for the cultivators in the Holy Dragon battle zone to enter the top 100 and win the competition.

Everyone thought that the final outcome was already decided. Who would have thought that at this moment, a change would suddenly occur?

On the leaderboard that didn't change much, three cultivators from Lou Cheng kept rising and finally entered the top 100.

The top 100 was nothing. The most important thing was that these three Lou Cheng cultivators were all from the sacred Dragon Warzone.

"Eh, these three little guys look a little interesting!"

The Golden Eye Lord, who had been silent all this while, suddenly spoke with a hint of surprise in his tone.

Spirit Lord Star Spirit and Lord Zhan Kuang also noticed this scene. They looked at the three cultivators who were rising in rank and couldn't help but frown.

"Lord Tang Zhen, could it be that these three cultivators are the reason for your confidence in participating in the bet?"

The star Spirit Lord suddenly asked Tang Zhen softly.

There could only be one final winner, so the top 100 didn't mean anything. Only the top 10 had a chance of competing for the final champion.

However, looking at the state of the three cultivators, it didn't seem difficult for them to enter the top ten.

This was why the star Spirit Lord had such doubts. If these three cultivators were Tang Zhen's trump cards, they must be treated with great importance.

If the final result was the Holy Dragon battle zone's victory, then he and the battle fanatic Lord would not only lose their wagers, but they would also lose face.

Chapter 2308 A strong reversal

A smile appeared on the corner of Tang Zhen's mouth as he looked at the refreshed data. Reality had already proven that his guess was indeed correct.

Qian Chongyun and the other two, who had suddenly erupted, were heading straight for the champion's position in an unusually fierce manner.

Along the way, they overcame all difficulties and trampled on those opponents who were far stronger than them.

In a normal battle, Qian Chongyun and the other two might not be a match for the top 100 cultivators of loucheng, and might even be ranked below the top 10000.

However, in this kind of competition, he could make use of the existing rules and easily defeat the other party with his battle results.

Tang Zhen dared to bet because he saw the existence of Qian Zhongyun and the other two on the list of cultivators in loucheng.

With the way the three of them did things, they would definitely not listen to orders obediently. Instead, they would try their best to earn battle merits before leaving the divine Kingdom.

Although the cultivators of loucheng had the same idea and wanted to gain more battle merits, these three cultivators had more trump cards than the other cultivators.

Putting his own strength aside, ah Feng in the team had the mercenary support system, which was quite an amazing thing.

It was a mobile shopping center and a combat staff officer. As long as one had enough military merits, there was almost nothing that could not be done.

The reason why the three of them had auctioned the void treasure beast was to gather enough battle merits and prepare for a big fight.

Although Tang Zhen did not really understand their plan, he knew that since these few fellows wanted to do it, they would definitely persist until the end.

When he was watching the battle just now, he specially checked the information of the three people, and in the end, he discovered a very unusual thing.

During this period of time, Qian Chongyun and the others had killed very few void monsters, and the speed at which they obtained battle merits was obviously slower than others.

From Tang Zhen's point of view, this matter was very abnormal.

With three powerful cultivators from loucheng city leading a large group of subordinates and three warships providing fire support, how could they not get military achievements?

Therefore, Tang Zhen immediately confirmed that this group of People's Plan was still being executed. Perhaps it wasn't time to close the net yet.

However, with the order to retreat, they did not have much time to wait, so they would soon find out.

But at this moment, Zhan Kuang suggested a duel and Tang Zhen agreed to it.

If Qian Chongyun and the others won, it would be a great encouragement for the cultivators in loucheng at the sacred dragon battle zone.

In a situation where they were far inferior to the two territories in all aspects, they could actually win against the strong. This in itself was an exciting thing.

Of course, this was only a possibility. In a situation where powerhouses were as common as clouds, even if he had a unique skill, he might not be able to win.

It wasn't a problem for Star Spirit Lord to suspect that Tang Zhen had a trump card. However, even Tang Zhen couldn't interfere with the effectiveness of this trump card.

This was the fun of a wagered battle. No one knew who the final winner would be until the last moment.

In fact, even if he lost, it was nothing. Tang Zhen could not afford to lose. He could even use this matter to motivate the cultivators in Loucheng at the sacred dragon battle zone.

In order to prevent such a situation from happening again, they would definitely work hard to cultivate and think of ways to improve their strength.

When one's cultivation had reached this level, there were very few things that could stimulate them, so failure was sometimes not a bad thing.

"Your Excellency Tang Zhen, do you know anything about these three Lou Cheng cultivators from the sacred Dragon Warzone?"

Seeing Qian Chongyun and the other two's battle Points continue to increase, even after entering the top 100, they still maintained a steady rate of increase. The battle maniac Lord could no longer keep his cool.

He was the one who suggested this wagered battle, and according to his plan, the final winner would definitely be him.

Currently, the number one cultivator, Lou Cheng, was from Zhan Kuang's territory. The number three and number five were also his subordinates.

Although it seemed like victory was in the bag, any experienced cultivator would know that no one could guarantee that they would be the final winner on the battlefield.

At this moment, the Berserker Lord felt a sense of danger. He was afraid that the fruits of his victory would fall on someone else.

If that was the case, it would be too embarrassing.

Hearing Zhan Kuang Lord's question, Tang Zhen gently nodded his head. There was no need to deny this matter.

that's right. I know a thing or two about their situation. If there are no accidents, they should be together now.

Zhan Kuang horde leader nodded his head. At the same time, he stared at the battlefield, trying to find the position of Qian Chongyun and the other two.

However, after looking around, he suddenly realized that there was no sign of these three guys on the battlefield. He also did not know where they were.

“Eh, what’s going on?”

Zhan Kuang tribal Lord’s face was filled with surprise. If Qian Chongyun and the other two were not on the battlefield, then where did the battle Points come from?

“There’s no need to look for them. Those three little fellows aren’t here at all. They’re in another place.”

The Golden Eye Lord said. He was looking in a direction where no one was around, and his gaze seemed to penetrate through endless space.

This was his special ability, and very few people could imitate it.

The battle maniac Lord was stunned for a moment. Then, he immediately contacted the command center and requested to locate Qian Chongyun and the other two.

In a very short time, the command post sent a message, indicating that they had successfully locked on to the target.

“Show me the image. I want to see what these three guys are up to. How can they be so fierce?”

An image quickly appeared in the sky above defense zone 153. It was the battle scene of Qian Chongyun and the others.

On another damaged plain, thousands of Warriors and believers were gathered together, attacking the void monster.

Their weapons and equipment were of excellent quality, and no one knew where they got them from. It was with the weapons in their hands that they were able to deal effective damage to the void monsters.

The main reason for the surge in battle merits was that these void monsters were all trapped and were constantly struggling in a huge runic magic circle.

No matter how much they struggled, they could not break free from the runic magic circle. Even their special devouring ability could not destroy the runic magic circle.

This runic magic circle was obviously designed for void monsters, and it could completely counter their means.

Under the intense firepower of the believers, the void monster could only be hit like a target and shattered.

It was worth noting that whenever a void monster was on the verge of death, the believers and martial artists responsible for attacking would immediately let it go.

After that, Qian Chongyun and the other two would attack one after another, locking onto the severely injured void monster and delivering the final fatal blow.

After the void monster died, the battle achievement points would go to Qian Chongyun and the others. This was also the reason why their battle achievement increased so quickly.

This method seemed to be a trick and seemed to be against the rules, but in fact, there was no problem.

These martial artists and believers were under the command of the three of them, and the weapons they used were also provided by the three of them. It was completely reasonable for the battle merits to be counted to the three of them.

The cultivators in the other two territories would also use the help of their subordinates and companions to obtain more battle merits.

However, compared to Qian Chongyun and the others who were well-prepared, their efficiency was much worse. That was why they were quickly surpassed at this moment.

The most depressing thing was that the methods of Qian Chongyun and the others couldn't be replicated at all, and they could only watch helplessly.

Firstly, there was no time to set up the runic magic circle, and secondly, there was no place to find so many suitable weapons and equipment, so that the believers, who were originally playing the role of a burden, could also help to gain battle merits.

This was also the reason why Zhan Kuang and the others were puzzled. They really couldn't understand how Qian Chongyun and the others managed to do this.

Chapter 2309 Do you need an auxiliary system?

Due to the unusual change in the ranking, Qian Chongyun and the other two immediately became the focus of attention, especially the cultivators of Loucheng who were watching from the back. They all focused their attention on them.

Everyone wanted to see what they were up to and how they were able to do such an unimaginable thing.

It didn't take long for someone to notice that something was wrong, and then they started whispering in private.

"Lord Tang Zhen, do these three cultivators have any large storage equipment?"

The star Spirit Lord, who had been watching the battle, suddenly turned to Tang Zhen and asked. He seemed to have already seen the reason.

That's right. I once gave them a storage equipment, and the capacity is indeed very good.

Tang Zhen nodded in acknowledgment. However, the star Spirit Lord still frowned as he felt that something was wrong.

Even with a large storage equipment, it was impossible to bring all the required items unless they had made sufficient preparations beforehand.

However, the situation on the battlefield was constantly changing, and anything could happen, so it was almost impossible to make full preparations.

But looking at these believers again, it seemed that such a phenomenon did not exist at all. It was as if whatever was lacking would come!

Under such circumstances, it was no longer strange for Qian Chongyun and the others to be able to kill void monsters so quickly.

The few Lords had experienced countless Wars and were extremely experienced. They understood that such excellent logistics services simply did not make sense.

Under such circumstances, the mercenary ah Feng, who was in charge of providing the supplies, quickly attracted the attention of spirit Lord Star Spirit and the others.

“It’s him! There’s definitely something wrong with this guy!”

The battle maniac Lord pointed at ah Feng and said in a certain tone, but his eyes were filled with surprise.

No one would have thought that the key to all of this was related to an ordinary mercenary.

that’s right. This mercenary didn’t have any storage equipment on him. So where did his items come from? ”

The star Spirit Lord’s eyes lit up as if he had discovered something interesting. If it wasn’t for the fact that it was inconvenient now, he would have brought ah Feng to study him.

Ah Feng’s Secret couldn’t be hidden from everyone, especially against these Masters of creation. He couldn’t hide it from them.

Even if he didn’t say anything, these Masters of creation would definitely be able to figure it out with their abilities.

Tang Zhen didn’t intend to hide it. He was even prepared to take the opportunity to advertise and let these overlords know about the existence of the auxiliary system.

Even the Masters of creation had to do some trading in order to get the resources they wanted.

Therefore, Tang Zhen cut the long story short and briefly introduced the auxiliary system. Some of its functions, combined with the current situation, were undoubtedly more convincing.

After listening to Tang Zhen’s introduction, the three lords were surprised. They didn’t expect the sacred Dragon Warzone to have such a thing.

For the cultivators of loucheng, this method might be a bit improper, but it was really good in practical use.

For example, at this moment, the three cultivators from loucheng city, who were not outstanding in strength, could actually crush many powerhouses with the convenience of this system.

He would buy whatever he was lacking and get whatever he wanted. Was there anything that he couldn’t do?

With such a weapon, they would be able to succeed in every endeavor. Otherwise, even if they tied up Qian Zhongyun and the other two, they might not be a match for the top 100 floors.

This wasn’t to belittle them, but it was the truth.

The fifth battle area was famous, and those who entered the divine Kingdom were all elites from the two territories. Many of the cultivators "strength was unfathomable.

Perhaps, it was nothing to Tang Zhen. That was because his cultivation level was there.

However, to the low-level cultivators, these cultivators from the two territories were like an insurmountable mountain. They were existences that were worth looking up to.

A battle like this one was extremely rare. It could even be said to be a one in a hundred years event.

To be able to experience it personally was a lucky thing in itself. It was even more difficult to beat the other party in battle records.

Many cultivators of Lou Cheng understood this, so they were overjoyed when they saw the change in the rankings. They started to cheer for Qian Chongyun and the other two.

Even if the three of them couldn't hear it, it didn't matter. The cultivators in Loucheng just wanted to take the opportunity to vent their anger.

Hearing the thunderous cheers, Zhan Kuang and spirit Lord Star Spirit exchanged a look, a helpless smile on their faces.

They had thought that they would win the competition for sure, but such an unforeseen event had occurred. It was really beyond their expectations.

If Qian Chongyun and the other two won, it would definitely cause a commotion. The cultivators of Loucheng who were originally ranked high would definitely not be satisfied with such an outcome.

However, with these two lords in charge, they would definitely not dare to be presumptuous, or they would be severely punished.

If you agree to a bet, you must accept your loss. This was the rule of the battle.

The two lords weren't the kind of people who couldn't afford to lose. If the cultivators from the Holy Dragon Warzone won by using the rules, they would definitely not go back on their word.

It was just a competition, so winning or losing didn't mean anything. Even if they really won, it couldn't represent the true strength of Qian Chongyun and the other two.

"Lord Tang Zhen, can you tell me in detail what exactly is going on with this auxiliary system?"

The star Spirit Lord was obviously very interested. If possible, he was willing to pay a price to obtain an auxiliary system for research.

If this system was really useful, he could promote it in his own territory and increase the combat power of his subordinates. These overlords would definitely not reject it.

that's right. Tell me about it. I also feel that this thing is not bad!

Zhan Kuang Lord shouted towards the battlefield, reminding his subordinates to be careful of being overtaken by Qian Chongyun and the other two.

Even if the three loucheng cultivators were aggressive, the cultivators of Zhan Kuang's territory were not weak. If they used the same method, then their chances of victory would still be very high.

In fact, the cultivators in loucheng city were very clear about the specific operation. It was nothing more than a group of cultivators providing help to ensure that one person would obtain enough battle achievements.

Zhan Kuang wouldn't deliberately remind him, but if it was his subordinates who did it, he wouldn't object either.

Then, he came to Tang Zhen and wanted to hear Tang Zhen's introduction of this auxiliary system.

It was not that the two suzerains had shallow knowledge, but because their experience and heritage of civilization were different from the cultivators in loucheng in the sacred dragon battle zone.

Some of the things that the cultivators of the Holy Dragon Warzone thought were natural were rather unbelievable in the eyes of the cultivators of the two territories.

He had never come into contact with it before, so he naturally had no way of understanding it.

Tang Zhen couldn't wait for this to happen. He originally had the intention to promote the auxiliary system, but now he was just pushing the boat with the current.

If such an auxiliary system were to be promoted, the Holy Dragon Battlefront, as a manufacturing and operating company, would gain a lot of benefits.

When cultivators from other territories used the system, not only could they increase their reputation in the Holy Dragon Warzone, but they could also collect more information about planes and treasures.

If necessary, these cultivators who used the auxiliary system could gather at any time to complete some extremely difficult tasks for the Holy Dragon battle zone!

If the auxiliary system was promoted on a large scale, the influence it could produce might not even be inferior to the cornerstone platform.

When that time came, the Holy Dragon battle zone would only need to provide logistics services and would be able to obtain a steady stream of rich income.

#### Chapter 2310 Evacuation countdown

While Tang Zhen and the rest were chatting, the situation on the battlefield had already turned into a white heat. More and more void monsters were gathering over.

As far as the eye could see, there were huge and terrifying figures everywhere, shuttling back and forth in the sky and on the ground.

It was like a moving island and mountain, emitting a desolate and decaying aura. Although this scene looked spectacular, it represented a fatal crisis.

They surrounded the plain, surrounding the cultivators of Lou Cheng and devouring the remaining space.

As long as this area was sealed off, the cultivators of Lou Cheng would be like turtles in a jar, unable to escape the fate of being swallowed.

To the void monsters, the taste of the cultivators in the city was far more delicious than ordinary items, and they would gain more benefits after devouring them.

Living beings that knew how to cultivate were the most delicious nourishments. Void monsters would also retain their memories in the process of devouring and know what was the most delicious.

Therefore, the cultivators of Lou Cheng city were the most delicious bait, attracting the monsters in the void.

They wanted to devour the cultivators of Lou Cheng, but the cultivators of Lou Cheng wanted to turn them into battle merits. Both sides had their own goals, and the intense battle did not stop.

However, Lou Cheng was more passive in comparison. After all, they were surrounded and their living space was being compressed.

This was a war of attrition where one killed the enemy at the cost of one's own life. The longer the battle dragged on, the greater the damage to one's own body.

The void monsters were endless, but the number of cultivators in the city would only continue to decrease.

If there was no time limit for this competition, the casualties of the cultivators in Lou Cheng would definitely increase by several times, or even more.

This group of powerful and confident guys would not leave the battlefield easily until the last moment.

Not only would they lose the opportunity to obtain battle merits, but they would also be showing weakness and would inevitably be looked down upon by their competitors.

This was especially true for the cultivators of the battle fanatic territory. They didn't care about anything else during the battle, and were complete lunatics.

It would not be an easy task to get them to retreat in advance unless spirit Lord Zhan Kuang gave the order.

"I have to set a time for these guys. If they are allowed to delay, they will definitely be trapped in the void!"

It would be more troublesome if we send people to rescue them at that time, and it might even increase unnecessary casualties."

Star Spirit Lord was a steady person. When he saw that the Lou Cheng cultivators were gradually losing control due to their competitive spirit, he immediately gave a new order.

Tang Zhen and the others, who were standing at the side, didn't have any objections. If the star Spirit Lord didn't speak, they would have given the corresponding orders.

The premise of the competition was that it must not delay the official business, otherwise there would be no need to hold it.

after 30 minutes, all cultivators in loucheng will retreat from the battlefield. If anyone refuses to retreat, they will be immediately listed as dead!

The star Spirit Lord said in a low voice. Although it was not loud, it could be heard clearly throughout the battlefield.

His warning could be said to be very serious. If one was included in the list of deaths, then all the battle achievements obtained would be sealed, which was equivalent to wasting all their efforts.

Even if he could restore his normal identity, he would not be able to enjoy the normal rights of the cultivators in Lou city before that.

To put it bluntly, this was a method of punishment, specifically used to deal with those who disobeyed orders, thus achieving the effect of complete obedience.

Sure enough, after this order was given, the cultivators of loucheng city who were red-eyed with killing intent immediately became more restrained.

Since the time to retreat had been decided, what they needed to do now was to stabilize the results as much as possible instead of continuing to take risks.

If they were to encounter any mishaps during this process and get eaten by the void monsters, they would be extremely unlucky.

Some cultivators, after looking at the ranking list, chose to continue fighting because they were not satisfied with their own ranking.

This bunch of people were bold because of their skills. Even if the number of void monsters increased sharply. Vllvp100

At the same time, there were some cultivators who decided to leave the battlefield.

The longer they stayed, the more dangerous it would be. If their way out was blocked, then they would really be crying without tears.

Fortunately, Tang Zhen had already prepared for this. He ordered the warships to open up an evacuation channel so that the cultivators in Lou city could return smoothly.

Due to the intense firepower, the void monsters could not get close to the passage at all, or they would be torn apart in a very short time.

It was because of the existence of this passage that the cultivators in loucheng city dared to fight without worry. At least they knew that they could retreat at any time.

The believers and Warriors who had been waiting for a long time saw this and immediately followed the team to retreat from the battlefield. They were not qualified to obtain military merits, so it was meaningless to kill more void monsters.

Now that the opportunity had finally come, they naturally had to evacuate as soon as possible. After all, everyone could see that the situation was getting more and more tense.

If the void monster really charged in, they would not even have a place to hide. It would be swallowed in a few bites.

haha, you guys, hurry up and retreat. Just leave the task of covering to us!

Seeing this, the cultivators from the battle fanatic territory couldn't help but burst into laughter, their tone carrying a hint of ridicule.

"This bunch of idiots!"

The loucheng cultivators of the star Spirit territory, on the other hand, looked disdainful. The fighting style of this group of people simply made people speechless.

They didn't know how to cooperate at all, and they just charged around blindly, as if the entire battlefield was a stage for them to show their strength.

The cultivators of the war fanatic territory were all like this, no different from their Overlord.

you barbarians should continue killing. Just don't be treated as snacks by the void monsters.

Some of the cultivators from the star Spirit horde sneered at the cultivators from Zhan Kuang's territory and joined the retreating group.

Not all of the cultivators in loucheng had to leave, but there were still some who stayed behind. It only took them a very short time to secretly reach an agreement.

They would attack the void monster, and then hand it over to a designated person, and the other party would complete the final kill.

The way these cultivators did things was very similar to Qian Chongyun and the others, and they had a higher killing efficiency.

As long as there was enough time, it would be a piece of cake to take the top spot.

No matter what the purpose of this competition was, they would not let the championship fall into the hands of others, especially the cultivators of battle maniac's territory.

Therefore, they began to think of ways to ensure that their side would win, especially for the key position of the first place. The competition was getting more and more intense.

The cultivators of Lou Cheng from the battle fanatic territory vaguely noticed that something was wrong. After a simple observation, they immediately understood.

"You bastards, what are you doing?"

One of the cultivators from the war fanatic territory roared at the cultivators from the star Spirit territory nearby, his face full of anger.

I don't want the battle credits. I'm giving them to my friends. What does that have to do with you? "

The Lou Cheng cultivator who was being questioned chuckled as he looked at the cultivator from the battle maniac territory and said with a disdainful expression.
