Chapter 231: killing the spirit brain Zombie King

“Alright, stop the attack!”

Following Tang Zhen’s order, the Holy Dragon city’s cultivators immediately stopped shooting. At the same time, they looked vigilantly at the damaged gigantic brain.

At this moment, the ground on the third floor was covered with white brain matter, mixed with the broken tentacles, and piled up on the flesh and blood floor under his feet.

Tang Zhen slowly walked to the front of the shattered giant brain and discovered that the clone’s face at the bottom had its eyes wide open and was bleeding from its mouth and nose. It seemed to be deader than dead.

Tang Zhen’s eyes narrowed as he looked at the twisted face that was filled with ferocity and unwillingness. A thought was swiftly spinning in his mind.

The spiritbrain corpse King’s methods were astonishing. First, it forcefully descended into the world of towers, then commanded a large number of corpse race to control the surrounding area, and later built the corpse race’s Tower.

Decisive and farsighted, he was worthy of being one of the eight great corpse Kings of the corpse clan!

Tang Zhen never dared to underestimate such an enemy. Moreover, this spirit brain Zombie King was similar to Tang Zhen in many aspects!

For example, both of them came from other planes, and they did everything they could to build their own cities in the world of loucheng. They also planned to immigrate their own people from their original worlds to the world of loucheng.

The spirit brain corpse King had once achieved this, but it had paid a great price.

Now, The Spiritual Brain corpse King seemed to have given up on the immigration plan and chose a more practical and convenient way to cultivate.

On the other hand, Tang Zhen had been persevering and had never given up on the research of the soul transmission experiment.

Although the spirit brain corpse King was his enemy, even Tang Zhen couldn’t help but admire the spirit brain corpse King’s brilliant means.

However, it was also because of this that Tang Zhen didn’t believe that the spirit brain corpse King would be killed so easily. Maybe this guy had some hidden cards that he couldn’t think of. It seemed like it was killed, but in fact, there was still a chance for Dongshan mountain to rise again!

If that was the case, there would be endless trouble.

In the area under his control, there must be no such hidden danger, so the spirit brain corpse King must be completely eliminated!

Tang Zhen checked the remains of the spirit brain corpse king again and confirmed that there was no sign of life, which meant that the spirit brain corpse King's body was dead.

However, for the spirit brain corpse King that used the divine soul to descend, the most important thing was not its physical body, but its soul!

A soul was shapeless and invisible. One would not be able to search for it without any special means. However, Tang Zhen happened to have the means to detect it.

After he thought up to this point, Tang Zhen immediately used his thoughts to activate the spirit body searching device.

Following the activation of the application, the scenery in front of Tang Zhen's eyes underwent a great change and entered his real vision.

Under the application interface, everything was dark and all the objects looked dilapidated. Even the cultivators from the two cities looked strange and gloomy.

Tang Zhen didn't pay attention to the environment that had changed drastically, but immediately began to search for the spirit brain corpse King's soul.

The space on the third floor was not too large. Tang Zhen's eyes merely swept across half of the area before he discovered his target.

The semi-transparent spirit brain corpse King seemed to be very weak. It was now floating in the air expressionlessly, coldly looking at the people on the third floor.

When Tang Zhen looked at it, the spirit brain corpse King also turned its eyes to Tang Zhen.

The two sides looked at each other and saw the strong killing intent in each other's eyes.

"Is this the divine spell, the eye of truth?"

The Spiritual Brain corpse King was slightly stunned, as if it had not realized that Tang Zhen could see it.

However, when it confirmed that Tang Zhen was looking at it and that the killing intent in his eyes was directed at it, Tang Zhen had already launched an attack.

Since the spirit brain corpse King was a spirit, Tang Zhen directly used the [infrasonic wave generator]!

"Damn it, what kind of divine spell is this?"

A frequency that ordinary people couldn't hear was emitted, but it made the spirit brain corpse King's expression change greatly. After it roared, its body moved quickly, trying to avoid Tang Zhen's attack!

At the same time, a beam of light shot out from the spirit brain corpse king's hand, but it was blocked by Tang Zhen's protective shield.

Light surged, but Tang Zhen was safe and sound.

From the spirit brain corpse King's performance just now, it could be seen that infrasonic waves could indeed cause damage to it.

Tang Zhen saw that his attack was effective and immediately locked onto the spirit brain corpse King. A light flashed in his hand and a machine gun appeared in his hand.

"Pa pa pa!"

The armor-piercing burning bullet was shot at The Spiritual Brain Zombie King, but when the bullet passed through its soul, it only made its body tremble a few times.

Tang Zhen furrowed his brows. A weapon like a machine gun was fine against physical monsters, but its effect was greatly reduced against the spirit brain corpse King.

It was impossible to kill the spirit brain corpse King with just an infrasonic weapon. This made Tang Zhen a little anxious. He immediately opened the application store and began to search for useful options in the [fantasy secret technique] category.

At the same time, he also had to Dodge the attacks of the spirit brain corpse King.

Fortunately, The Spiritual Brain corpse King's strength had been greatly reduced at this time, and its attack power was still slightly inferior to Tang Zhen's. Otherwise, Tang Zhen would not have been able to Dodge so calmly.

When Tang Zhen and the spirit brain corpse King began to fight, the Holy Dragon City cultivators who were guarding the side immediately became alert and firmly guarded the exit of the third floor.

Tai Seng and Qian Long had solemn expressions on their faces. Even though they didn't know what Tang Zhen was doing, they knew that he must have encountered a troublesome matter after seeing his attack and defense.

The only thing they could do now was to protect Tang Zhen and prevent him from being distracted during the battle.

Hundred Flower Valley's city Lord looked at Tang Zhen without blinking. Her beautiful eyes moved and her expression seemed to be deep in thought.

From the moment Tang Zhen used the death ray to attack the spirit brain corpse King's giant brain, the eyes of the hundred Flower Valley's city Lord lit up. After that, during the battle, her eyes never left Tang Zhen.

Just now, Tang Zhen suddenly looked at an empty corner and even took out a machine gun. This caused the hundred Flower Valley's city Lord's eyes to become even brighter. A smile appeared on the corner of his mouth as if he had confirmed something.

From the hundred Flower Valley City Lord's point of view, the reason why Tang Zhen would make such a move was definitely because he had seen something that ordinary people couldn't see. For example, an existence like a spirit body, which caused him to suddenly launch an attack!

In order to see these spirit-like creatures, one had to master a rare divine spell called [eye of truth]!

There was also a skill among the divine spells mastered by Holy Masters that allowed them to conjure up an item in an instant. However, it was extremely expensive, and ordinary Holy Masters could not afford to exchange for it.

This young Holy Dragon City Lord was not simple. Not only was he a level five cultivator, but he was also a Holy master and had mastered at least three rare divine spells!

As such, he would have to reevaluate his value and carefully formulate countermeasures.

He didn't expect to meet such an outstanding figure in such a remote place. It seemed that this trip was not in vain!

When the city Master thought of this, the smile on her face grew even wider.

At this moment, Tang Zhen did not know that it was because he had activated a few applications that had changed his weight in the heart of the hundred Flower Valley City Lord.

In the eyes of the city Master of Centaurea Valley, he had become a level five cultivator who had mastered a rare Divine Art. His importance had been raised by several levels.

This might be some kind of strength assessment standard of heaven battling city, but it also indirectly proved Tang Zhen's strength. Unfortunately, Tang Zhen simply disdained such an assessment.

He had a unique path of advancement, so how could the heaven battling tower dare to meddle in this matter?

At this moment, Tang Zhen had already found the application he needed in the [mysterious secret technique] category.

demon-killing rune engraving machine. It can instantly engrave demon-killing runes on an attack item. It has powerful exorcism and demon-killing effects. The effect is long-lasting, and the operation is simple and convenient. Download cost: 100000 gold coins.

It was another high price of ten thousand brain beads, but Tang Zhen had to buy it.

He selected the application and downloaded it. As soon as the application was launched, Tang Zhen pulled out a saber from the Holy Dragon City cultivator beside him.

Tang Zhen's right hand held the blade while his left hand formed the shape of a sword. He stuck his hand to the blade and slowly slid up. At the same time, a strange symbol that flickered with a purple light appeared on the blade.

Everyone looked at the changes on the blade and could not help but click their tongues in wonder.

damn it, how do you have a soul attack weapon!

The spirit brain corpse King in the corner suddenly roared after seeing this scene and desperately rushed to the exit of the third floor, trying to escape.

"You want to run? dream on!"

In his true vision, the fine steel battle blade in Tang Zhen's hand, which had demon killing runes carved on it, was now shining with a dazzling light. It was as if it was a peerless divine weapon. The sharp light that shot out caused one's skin to feel a piercing pain.

After fiercely rushing forward a few steps and blocking The Spiritual Brain corpse King's path, Tang Zhen's blade slashed down and hit The Spiritual Brain corpse King's body.

The Spiritual Brain corpse King let out a blood-curdling screech, and its weak soul body immediately split into two, as if it would dissipate into nothingness at any moment.

"Lowly insect, you only managed to win by a fluke by ambushing me when I was at my weakest.

One day, the eight great corpse Kings of my corpse clan will gather a large number of troops and once again step into this world. At that time, you will die without a doubt!"

The Spiritual Brain corpse King looked at Tang Zhen with a sinister smile. The two halves of its soul body became dimmer and dimmer, and finally disappeared.

The spirit brain corpse King's soul of the corpse race was dead!

?

Chapter 232: The surrendered city of hundred Flower Valley

As far as the current situation was concerned, the spirit brain Zombie King was Tang Zhen's biggest enemy. With its divine soul being killed, Tang Zhen could finally start to show his strength.

Although this was only a temporary peace, and the spirit brain corpse King in the other plane was still not completely dead, it could not do anything about the tower world in a short time.

Even if one day, the eight corpse Kings joined forces and prepared to invade the tower world, Tang Zhen would have enough means to deal with it.

At that time, the so-called undead race's Allied army would only be providing him with a new source of brain matter.

As the Holy Dragon City gradually grew stronger, the enemies that seemed incomparably powerful in the past now seemed vulnerable.

Tang Zhen admitted that he had defeated the spirit brain corpse King when it was at its weakest, but it didn't matter. As long as he was the one who won, he didn't need to care about other minor details.

The winner lived a life of luxury, while the loser's head was on the ground. Reality was cruel!

Tang Zhen turned around and looked at the cultivators from hundred Flower Valley with a cold glint in his eyes.

The most powerful enemy had been dealt with. The next thing to do was to clean up the surrounding forces.

In Tang Zhen's heart, the most ideal outcome was to peacefully receive the resources and residents of these buildings without shedding a single drop of blood.

However, this was only the most ideal ending, but things were always difficult to achieve.

Since blood and slaughter were unavoidable, he would just let nature take its course. As long as his goal was great and bright, Tang Zhen could only try to be cruel.

After following Tang Zhen for a long time, Qian Long immediately understood Tang Zhen's thoughts. At the same time, he also reacted.

He silently dodged to the side and chose a seemingly ordinary position, his finger gently touching the trigger of the automatic rifle.

As long as there was a slight movement in the tower of hundred Flower Valley, he could shoot from this angle and bring all the cultivators of hundred Flower Valley into his shooting range.

Tai Seng seemed to be expressionless, but in reality, his muscles were already tensed up. If anything happened, he would burst out and kill the three cultivators from Centaurea Valley closest to him.

The other cultivators of the Holy Dragon City also began to move, seemingly unintentionally, and placed their weapons in the most convenient places.

An oppressive and murderous atmosphere slowly spread across the third floor.

The cultivators of Centaurea Valley also felt that the atmosphere was not right. They looked nervous and stared at the cultivators of Holy Dragon City with alert eyes.

Just as Tang Zhen was sizing up the hundred Flower Valley's city Lord, the other party was also sizing him up.

From Tang Zhen's eyes, the hundred Flower Valley's city Lord saw a trace of killing intent and also a trace of reluctance. However, even more of it was a man's ambition!

The city Master of hundred Flower Valley knew that an ambitious man would use any means to achieve his goal.

She wasn't sure if the Holy Dragon City Lord was such a person, but she didn't dare to take a gamble.

Tang Zhen's warning was still ringing in her ears. It caused her to clearly realize that she must make a decision as soon as possible.

From the moment the corpse clan wreaked havoc in the wilderness and Black Rock City was heavily besieged, it was time for a reshuffle in this region. Any ambitious ruler would dream of getting a share of this opportunity.

And among these ambitious people, the Holy Dragon city's strength was undoubtedly the strongest.

Whether it was luck or shamelessness, it was an indisputable fact that the Holy Dragon City had the power to completely destroy the tower City of hundred Flower Valley.

“How long has it been since I last saw my parents? five years, or even longer? Perhaps it’s time to return to my hometown and hand in an answer to my teacher!”

After thinking up to this point, the city Master of Centaurea Valley chuckled and suddenly felt a sense of relief.

She was different from Tang Zhen. She built the hundred Flower Valley City only for a mission. She didn’t have too many concerns in her heart.

At this moment, the mission should have ended. Regardless of whether the hundred Flower Valley City Master was willing or not, she had no other choice.

“Now that the spirit brain corpse King has been killed by you, I wonder what the Holy Dragon City Master wants to do next?”

Hundred Flower Valley’s city Lord said in a soft voice. Her expression was very indifferent, causing Tang Zhen, who was still a little hesitant in his heart, to be slightly startled.

It was impossible for this woman to not see his killing intent, but her attitude at this time was obviously very relaxed. What did she mean?

Tang Zhen bent over and picked out a brain bead from the remains of the spirit brain corpse King. He looked at the Halo scattered on it and nodded in satisfaction.

After finishing this matter, Tang Zhen turned to look at the hundred Flower Valley’s city Lord. He lightly smiled and said, perhaps now is not the best time to make a choice, but I think you should make a choice. It’s not for your own sake, but for the sake of the residents of your city.

in fact, I’ve already made my choice. I just don’t know if Holy Dragon City has enough residential space.

The city Lord of hundred Flower Valley looked at Tang Zhen and gave her answer.

Tang Zhen took a deep look at the other party when he heard this. He gently nodded, you don’t have to worry about this, because very soon, Holy Dragon City will have a third-grade main city and at least two auxiliary cities, and two of the auxiliary cities will also be third-grade!

The eyes of the hundred Flower Valley City Master flashed, and she praised sincerely, “The Holy Dragon City Master is so bold, this little sister is impressed!”

After saying this, the hundred Flower Valley’s city Lord’s expression turned serious as he said to Tang Zhen, “Since the Holy Dragon City intends to control this area, my hundred Flower Valley tower can not be an eyesore!

I hereby promise you that as long as your Holy Dragon City replaces Black Rock City and becomes the ruler of this area, my hundred Flower Valley will join the Holy Dragon City unconditionally. Are you satisfied with this?”

“I hope this isn’t a stalling tactic. You should know that in the face of great strength, any schemes and calculations are just a joke!” Tang Zhen nodded.

After he said this, Tang Zhen's expression turned cold as he coldly said, "If you're planning to play any tricks, I'll definitely make you regret it for the rest of your life!"

Tang Zhen didn't care about the city Master of hundred Flower Valley, who had an unsightly expression, and ordered the clearing of the tower. After finding the foundation of the tower, they would immediately destroy the tower of the corpse race.

The Holy Dragon city's soldiers outside received orders to be on high alert and to prevent the undead outside Black Rock City from returning in an attempt to rescue the undead's city.

With the order, the Holy Dragon City soldiers immediately began to search the ground full of rotten flesh.

Only God knew where the foundation stone of the corpse race's Tower was. Everyone searched for half a day, but they still couldn't find the location of the foundation stone.

In the end, Tang Zhen had to thoroughly scan the entire corpse clan's Tower before he found a hidden room on the top of the third floor. He found the foundation stone of the corpse clan's Tower that was suspended inside.

However, when Tang Zhen removed this cornerstone, he discovered that this cornerstone was extremely strange. It was completely different from the building's cornerstone that he usually saw.

Tang Zhen didn't know that the foundation stone of the undead clan's Tower was extremely special. It had fused with the origin stone brought by The Spiritual Brain corpse King and had an extremely magical creation ability. This was also the main reason why the tower was able to breed the undead clan.

This tower's foundation stone wasn't simple. Tang Zhen had too many doubts in his heart, but now wasn't the time to study these problems.

After putting the Tower Foundation stone into the storage space, Tang Zhen waved his hand to signal everyone to evacuate immediately.

There was no longer a need for this city of the corpse race to exist!

?

Chapter 233: The Alliance of the three cities, the end of the black lava dukedom

Outside Black Rock City, the three-City Alliance led by the colossal bone building was constantly besieging the zombie monsters.

These Warriors of loucheng city, who had been fighting in the wilderness all year round, had survived to this day after countless battles, so their experience and strength could not be underestimated.

Against these slow-moving corpse monsters, they could be said to be more than capable. Even if the number of corpse monsters far exceeded the coalition of the three cities, they were still not at a disadvantage.

The cultivators of Lou city formed small teams and surrounded the corpse race's Centurions. Through their skillful cooperation, they killed them one by one.

Compared to the corpse monsters that only knew how to swarm up, the Allied army that advanced and retreated in an orderly manner undoubtedly had an advantage.

Arrows, flying rocks, Spears, these long-range weapons kept falling into the group of zombie monsters, killing them.

The row of ballistae continuously shot out huge arrows, piercing the corpse monsters into a string. They fell to the ground and struggled continuously before they were beheaded by the Lou Cheng soldiers.

The cultivators of Black Rock City were also fighting bravely. This was because behind these corpse monsters was the tower they lived in, and their loved ones lived in it.

From the beginning of the battle, it was in the Alliance's favor.

The city Master of colossal bone city waved his battle blade and laughed as he cut a corpse race being in front of him into two. Then, he continued to advance.

Behind him, the ground was filled with the corpses of the corpse monsters, some of which were still struggling.

"We will win this battle for sure. Kill!"

kill! the city Lord of colossal bone city roared, and all the participants responded. Their fighting spirit was once again ignited, and they chopped down the corpse monsters in front of them.

They didn't stop at all when they passed by the bodies of their fallen comrades. Death was inevitable for Warriors, and it was only a matter of time.

Before the battle began, the three city Lords had promised that the brain pearls obtained from killing the corpse monsters would all belong to the soldiers of the Loucheng Kingdom who were participating in the battle. That would be a huge fortune!

As long as they could kill these zombies, they would obtain a huge number of brains, allowing their families to live better!

Driven by profit, the soldiers were more motivated to kill the enemy, and their morale was higher and higher.

Suddenly, a thunderous sound came from the distance, causing the city master's expression to change. His originally smiling eyes immediately became sharp.

that damned Holy Dragon City. They must be using that terrifying weapon to bombard the city of the corpse clan.

Thinking about the powerful weapons Holy Dragon City had, other than envy and jealousy, the city Lord was also very worried.

He knew that the Holy Dragon City Master had the same goal as him. They both wanted to gain benefits from this chaos and even directly control this area.

Both sides were in a hostile state from the beginning. Whoever wanted to obtain the final victory would have to see whose fist was tougher!

Now that he had control of the Alliance Army of three cities, the number of soldiers he had far exceeded that of the Holy Dragon City. Even if that bitch from Centaurea Valley joined the Holy Dragon City, he still had a huge advantage.

The only thing he needed to worry about was the flintlock in his hands and those terrifying cannons.

At this thought, the city master's eyes narrowed, and a cold glint flashed in them.

'If I had struck first and sacrificed a portion of my Warriors to kill them all, the Holy Dragon city's flintlocks would have become my spoils of war.

With the assistance of these flintlocks, who else in this area can resist my rule?"

With that thought in mind, the city Master hacked at the corpse monster beside him and laughed smugly, but the killing intent in his eyes grew stronger.

"Holy Dragon City must be eradicated!"

Just as the master of giant bone city made up his mind, the undead army, which was madly attacking the Allied army of the three cities, suddenly stopped their attacks. Then, the undead monsters turned around and headed straight for the undead city.

The soldiers of the Allied army were slightly stunned, but they did not want to let go of such a good opportunity and began to chase after the corpse monsters.

What surprised them was that these corpse monsters just allowed the Lou Cheng Warriors to attack them without any signs of fighting back. They just ran madly, as if there was an urgent matter ahead.

The city Master was secretly shocked. From the looks of it, the undead were clearly planning to return to reinforce their city.

Could it be that the Holy Dragon City had already broken through the guards outside and entered the city of the corpse race?

If that was the case, then the Holy Dragon city's strength was beyond his imagination!

However, the more it was like this, the more Holy Dragon City could not be left alive. It must be completely eradicated!

After sending out a group of Warriors to chase after the corpse monsters, the city Lord of giant bone city turned to look at Black Rock City, which was not far away, and a cruel smile appeared on his face.

"Now that the siege on Black Rock City has been lifted, it's time to execute our plan!"

Following behind him, the city Masters of Redwater city and earth Valley City looked at each other and nodded at the same time.

As the secret signal was sent, the cultivators from the three cities who were fighting side by side suddenly turned hostile and began to attack the cultivators from Black Rock City beside them.

They used a strange powder to attack the cultivators from Black Rock City, causing them to instantly become exhausted. Other than a small number of cultivators who managed to escape, the rest of the cultivators were captured.

After the cultivators from Black Rock City were detained, the Alliance Army of the three cities immediately charged towards Black Rock City and surrounded it tightly.

In Black Rock City, the expressions of the citizens of Black Rock City, who were originally celebrating the defeat of the undead army, changed. They could see a strong killing intent on the faces of the soldiers who surrounded the city.

The nobles of Black Rock City, who had been watching from the sidelines since the beginning of the rescue battle, suddenly felt as if the end of the world was coming.

These tower Warriors were different from the corpse monsters. They could surround the tower at any time and then massacre them.

Realizing that the situation was not good, the nobles of Black Rock City immediately sent cultivators out of the city in an attempt to communicate with the Allied forces of the three cities.

However, as soon as these Black Rock City cultivators left the city, they were immediately subdued by the Alliance Army of the three cities. They were then tied up and locked up.

At this moment, the nobles of Black Rock City naturally knew what the master of colossal bone city was planning!

“Despicable, shameless!”

“That damned colossal bone city. They should be hacked into a thousand pieces!”

The influential people of Black Rock City were all furious. They kept cursing and their hearts began to panic.

The giant bone tower had intended to destroy Black Rock City and take its place as the ruler of this region. As for them, their fate would probably be extremely miserable.

They would either become ordinary residents of the city or be driven into the wilderness to become lowly Wanderers.

The biggest possibility was that they would all be killed and never have any future trouble!

Asking the nobles of Black Rock City to give up their luxurious lives was worse than killing them. Moreover, there was the threat of death. They could not accept this result.

They had no other choice but to fight to the death!

The nobles of Black Rock City immediately began to organize their men and prepare for a counterattack. They were trying to make a Last Stand.

However, the current Black Rock City was different from its heyday. A large number of soldiers died in the battle with the corpse race, and a large number of cultivators in the city also died in battle. The remaining cultivators were either sent to seek help or were the descendants of the influential people.

The once prosperous Black Rock City had fallen to such a state!

In the end, Black Rock City still managed to put together a team of nearly five hundred people and began to launch a counterattack.

It was a pity that the city Lord of giant bone city had made thorough preparations before sending his troops to assist in the battle. The counterattack of Black Rock City was also within his expectations.

When the cultivators of Black Rock City launched their counterattack, the siege had already begun!

All of the citizens of Black Rock City went into battle. They threw down items from the windows in an attempt to attack the soldiers who were climbing up the tower. However, their efforts were to no avail.

There were already soldiers from the Allied army who had successfully entered the city Tower and started killing the citizens of Black Rock City who were trembling in fear.

At the city gate of Black Rock City, more than 500 soldiers of the mixed Army of Black Rock City who had rushed out of the city gate were met with a head-on attack.

Mounted crossbows, bows and arrows, javelins, and that kind of powder that could instantly make people lose their strength. These things covered the heads of the miscellaneous troops of Black Rock City, causing them to suffer more than half of the casualties before they even fought with the enemy.

The cultivators from the three cities who were guarding the side rushed forward and began to kill the remaining resistance.

The mixed Army of Black Rock City did not last long before they were all killed. The remaining soldiers saw that the situation was not good and also raised their hands to surrender!

Looking at Black Rock City spewing smoke from its window, the master of colossal bone city smiled triumphantly.

?

Chapter 234: life is unpredictable, instant strike on the giant bone

As the interior of Black Rock City caught fire, the residents of Black Rock City immediately began to flee the city. The entire building was in chaos.

Due to the thick smoke blocking their vision, the citizens of Black Rock City could not see the road in front of them clearly. This caused many of the citizens of Black Rock City to be pushed and trampled. They kept screaming in pain, but no one paid them any attention.

Some of the residents of Black Rock City who were trapped in the flames in their rooms chose to jump out of their Windows. No one cared about the outcome of the battle.

Black Rock City, which had been passed down for thousands of years, was now heading towards destruction. No one could save its fate.

The disheveled citizens of Black Rock City swarmed out of the city gates and were soon controlled by the Allied forces of the three cities. They looked at the thick smoke billowing from Black Rock City behind them and cried out in pain.

The destruction of Black Rock City meant that they would become Wanderers in the wilderness, living a precarious life and could lose their lives at any time.

Even though Black Rock City was rotten, at the very least, it provided them with a place to stay. However, the burning fire had taken everything away, and they were destined to be homeless.

More and more citizens of Black Rock City ran out of the city gates. Their faces were covered in black soot and their clothes were in tatters. Many of them had wounds of varying depths on their bodies.

The refugees from Black Rock City were gathered together and locked up. They sat on the ground in a daze and cried endlessly!

The number of residents sitting on the ground was only two-thirds of the original number. As for the remaining one-third, the chances of survival in the fire were slim.

The Warriors of the three cities Alliance who were besieging Black Rock City were indifferent to the situation. They only carried out their orders seriously and captured the residents of Black Rock City who ran out from time to time, then put them under central supervision.

In an open space not far away, the poisoned cultivators of Black Rock City were in excruciating pain. They could only watch as Black Rock City was burned to the ground without any ability to resist.

At this moment, their hearts were burning with anxiety, but they could only constantly pray that their loved ones had escaped from the sea of fire.

A few kilometers away, Tang Zhen was sitting in a military jeep. His expression was as gloomy as water.

Through the map view, he had already seen everything that had happened in Black Rock City. He wanted to stop it, but he was powerless.

Tang Zhen had never imagined that Black Rock City would end in such a manner. This had caused his original plan to be ruined.

People often say that plans can't keep up with changes, and this was exactly what was happening in front of them.

Although Tang Zhen had already seen through the city master's plan, he did not expect him to be so impatient and so ruthless. He did not leave any room for retreat for Black Rock City.

Tang Zhen had originally planned to destroy the undead clan's city before dealing with the matters in Black Rock City. However, he did not expect that the undead army surrounding Black Rock City would be recalled by the spirit brain corpse King. This caused the Allied forces of the three cities to attack Black Rock City in advance.

One wrong move and he would lose the entire game!

The city Lord of colossal bone city had helped Tang Zhen destroy Black Rock City, but he had also caused a large number of Black Rock City's residents to die in the sea of fire. This was undoubtedly an infuriating matter for Tang Zhen, who was in urgent need of residents.

As the main conspirator of this matter, Tang Zhen had already labeled the city Lords of the three towers as dead in his heart.

Because of the death of the spirit brain corpse King, the Army of the undead that had always been under its control immediately broke out in chaos. The undead monsters that returned to rescue began to run around, and even the undead had a face of fear, quietly escaping into the depths of the wilderness.

The Warriors of the Allied army of the three cities who were chasing after the corpse monsters were now tied up by the Holy Dragon city's Warriors and were slowly moving forward with the convoy.

Some of them tried to resist, but the Holy Dragon city's soldiers shot them dead and threw them into the wilderness.

The actions of the three-city coalition Army made Tang Zhen extremely angry. Therefore, he didn't show any mercy to those dishonest soldiers of Loucheng city.

attention all Holy Dragon City soldiers. When you receive the order to attack later, no one is to hold back. Otherwise, you will be punished by military law!

After Tai Seng gave the order, he glanced at the thousand Dragons and said in a deep voice, "it seems that the city Lord is really angry this time. Those three towers are going to be in big trouble!

With a cigarette in his mouth, Qian Long glanced at the Lou Cheng Warriors who were tied up behind him and sneered, "The city Lords of the three towers deserved to die, but it was a pity for the cultivators of the towers. If they had joined the Holy Dragon City, it would have increased the strength of the Holy Dragon City by a lot!

I hope they don't resist too much, so I can have an excuse to show mercy."

Tai Seng shook his head after hearing this. Although he also had the same plan and wanted to increase his men, if the Loucheng soldiers of the Allied army didn't know what was good for them, he didn't mind starting a massacre.

How could they be willing to surrender without seeing the Holy Dragon city's strength?

The convoy moved forward slowly, and they were getting closer and closer to Black Rock City.

The Allied army of the three cities had already discovered the Holy Dragon city's convoy. However, they had not received any orders from the giant bone city's Lord, so they had not made any moves for the time being. They only looked at the Holy Dragon city's people with vigilance.

Perhaps the city Lord of colossal bone city was planning to paralyze Holy Dragon City and then wait for an opportunity to kill the Holy Dragon city's Warriors.

The Alliance Army of the three cities did not move, but that did not mean that the Holy Dragon City did not react. When they were less than fifty meters away from the Alliance Army of the three cities, a dozen machine gunners on the Holy Dragon city's wasteland war chariots opened fire at the same time.

The whistling bullets instantly fell on the defenseless coalition Army of the three cities, and blood and flesh splattered everywhere. In the blink of an eye, hundreds of people were killed or injured in the panic of the coalition Army of the three cities!

The gunshots stopped, but the wilderness suddenly quieted down. Everyone looked at the Holy Dragon city's convoy in horror, their eyes full of fear.

Looking at the casualties on the ground, the soldiers of the three-City Alliance were shocked and angry. They hated the Holy Dragon city's sudden attack, but they were also shocked by the power of the machine guns. For a moment, they stood frozen on the spot, not knowing what to do.

"Holy Dragon City Master, are you crazy?"

The city Lord of colossal bone city bellowed in anger. He then rushed over, and when he saw the dead and injured on the ground, he immediately bellowed in anger.

Tang Zhen jumped down from the car and coldly glanced at the city Lord before gently waving his hand.

"Beat him up!"

The unique sound of machine guns rang out again, and the Allied forces that had gathered on the opposite side immediately fell in droves, scaring the Allied soldiers into dodging.

Some Lou Cheng soldiers tried to rush forward, but they were shot into pieces after a few steps.

The city Lord of colossal bone city had suffered a major attack. Even though he had a rank 5 cultivation, he had still been shot in the calf by Tang Zhen. Although his movements were not greatly affected, his expression had become even gloomier.

Looking at the sneering Tang Zhen, the city Lord of colossal bone city bellowed in anger. He brandished the war blade in his hand and pounced at Tang Zhen with lightning speed.

Tang Zhen also charged toward the city Master. As he activated his skill, a dark blue ice Armor appeared on the surface of his body, and he charged toward the city Master.

When the city Lord saw the ice Armor on Tang Zhen's body, he knew that he had already activated a cultivator's skill, and he hurriedly dodged to the side.

However, just as the city Lord stabilized himself, he suddenly realized that Tang Zhen had disappeared, causing him to be greatly shocked.

An invisible enemy was the most terrifying. Tang Zhen's disappearance had brought him enormous pressure.

Just as the city Lord was about to search for Tang Zhen's location, he suddenly felt a wave of killing intent envelop him. Before he could react, a blue ice blade had pierced through his chest.

"Damn it, how can he be so strong?"

The giant bone City master's face was filled with unwillingness. He first felt a chill in his chest, then a pain in his neck, and then a large head flew up.

In just a few seconds, Tang Zhen had killed the city Lord of colossal bone city!

Tang Zhen, who was wearing a blue ice Armor, walked to the head of the city Lord and used his ice blade to pick it up. He then roared, the city Lord of colossal bone city is dead. Who else dares to be unconvinced? ”

?

Chapter 235: Losses and gains (1)

The giant bone City Master, who had a cultivation of rank 5, was killed in an instant. This caused the Allied army of the three cities to immediately fall into a panic.

In addition to Tang Zhen’s roar, it caused the soldiers of the loucheng Kingdom to feel even more terrified. For a moment, they did not know what to do.

Some loyal and devoted cultivators from colossal bone city had planned to ambush Tang Zhen, but their heads had been blown up by the snipers on the war chariots. This made them even more afraid to act rashly.

The Holy Dragon city’s soldiers were only in the hundreds, but they firmly suppressed the three city coalition that outnumbered them by more than ten times. The soldiers were full of killing intent and were awe-inspiring.

Tang Zhen threw the head of the colossal bone city’s city Lord onto the ground. He looked at the Alliance Army of the three cities, which was as silent as cicadas in winter, and shouted once again, ” city Lord of Redwater City, City Lord of earth Valley City, get out here!

The loud voice echoed in the wilderness, but the two of them did not appear.

Tang Zhen coldly snorted. He searched the map and found the two city Lords who were being protected by the cultivators.

Waving to the Holy Dragon city’s soldiers operating the mortar, Tang Zhen once again shouted, I’ll give you one last chance. Get the hell out of my sight, or you’ll end up like the city Lord of giant bone city.

The two city Lords who were protected by the cultivators turned ashen. However, they still did not move forward. Instead, they began to slowly retreat.

“You’re looking for death!”

When Tang Zhen saw this, he immediately adjusted the angle of the mortar and locked onto the two city Lords.

“Bang!”

A Cannonball whizzed out and flew into the sky before the eyes of countless people. Then, it rapidly fell.

Seeing the cannonballs falling from the sky, the two city Lords turned pale with fright. They tried their best to Dodge, but it was too late.

Boom! Boom! Boom!

A loud sound reverberated as more than a dozen people were sent flying by the impact of the Cannonball, including the two city Lords that Tang Zhen had locked onto.

However, the two of them had already become a bloody mess. Although they were still breathing, they could not hold on for more than a few minutes.

In the blink of an eye, the three city Lords were all killed. This caused the Allied soldiers to panic, and some of them had already thrown down their weapons and started to run away.

“Whoever dares to escape will be beheaded!”

Tang Zhen fired a few shots and knocked down a few loucheng soldiers who were trying to escape. Then, he warned the rest of the Allied forces.

The Holy Dragon city’s wasteland war chariots immediately spread out and opened up enough distance to surround all these soldiers. Countless guns were pointed at their position.

Under such a terrifying atmosphere, some people could not bear the pressure and threw away their sabers, kneeling down and begging for mercy.

After the first person surrendered, there would be a second and a third. In less than a minute, the ground was filled with surrendering soldiers.

Some cultivators in loucheng didn’t choose to surrender. Instead, they tried to escape, but they were shot to pieces by the machine guns.

After seeing the miserable state of those who resisted, even if some of them were unwilling, they could only choose to surrender.

Tang Zhen sighed. He ordered the Holy Dragon city’s soldiers to hold these prisoners while he walked towards the direction of the Black Rock City’s residents.

Tang Zhen frowned slightly when he saw the miserable faces of the citizens of Black Rock City.

Originally, he had planned to gather all the nobles in Black Rock City and kill them, but it seemed that there was no need for that now. The mayor of colossal bone city had already solved this problem for him.

“Where is the governor of Black Rock City? I want to see him.”

Tang Zhen walked to the front of a citizen of Black Rock City and asked him in a loud voice.

The resident shook his head with a trace of sorrow on his face. Perhaps a relative had died in the fire.

“Who knows where the governor of Black Rock City is? hurry up and tell us!”

kill! Tai Seng shouted at the top of his lungs, then he looked around with a face full of killing intent.

One of the citizens of Black Rock City stood up and said in an uneasy voice, “I saw the city Lord, but he didn’t escape with us. He’s Wufu.”

“But what? don’t worry, I won’t blame you!” Tang Zhen said to the citizen of Black Rock City with a smile.

Seeing Tang Zhen reveal a smile, that Black Rock City resident’s courage increased by a lot. He continued, I saw the city Lord laughing and crying, locking himself in the city Lord’s Hall and never coming out again.

After saying this, the resident sat down on the ground. However, the scene he described caused many of the residents of Black Rock City to sob softly.

Tang Zhen nodded his head. He turned around and looked at the Black Rock City which was covered in thick smoke. He was speechless for a long time.

It did not matter whether the governor of Black Rock City was a qualified Governor or how rotten the city he ruled was. However, at the last moment when the city Tower was destroyed, he still chose to die together with the city. He was still a man with some courage!

When a person dies, all matters would be resolved. Tang Zhen was not interested in judging whether the life of the Black Rock City’s Governor was right or wrong. He only wanted to know his final whereabouts.

The two powerful enemies were eliminated, but Tang Zhen was not happy.

There were too many things to do next. Whether it was the handling of the prisoners of war or the settlement of the residents of Black Rock City, they were all problems that Tang Zhen had to solve.

Other than that, there was also the transfer of personnel, the provision of food, the collection of resources left behind by Black Rock City, and so on. This would be enough for Tang Zhen to be busy for a period of time.

After these things were done, Tang Zhen still had to send people to receive the resources and residents of the other four towers. It was another pile of messy trifles.

Just thinking about it caused Tang Zhen to feel a headache.

Fortunately, the harvest this time was quite rich. The number of residents and captives added up to more than ten thousand people. Tang Zhen was always able to find some useful talents among them.

If Tang Zhen were to handle all of these matters, he would definitely die of exhaustion.

In an open space not far away, Xiao Rui and Mo Yun led a group of cultivators from Black Rock City and rushed back.

They had just dodged the ambush of the giant bone city’s city Lord’s powder, and after escaping the pursuit, they had been prepared to seek help from Tang Zhen. In the end, the two sides had not met.

When they saw the thick smoke rising from Black Rock City, they immediately charged back, only to find that Black Rock City had already ceased to exist.

After finding their relatives among the residents of Black Rock City, Xiao Rui and Mo ran walked to Tang Zhen and asked him what they should do next.

From this moment on, the two of them had already regarded themselves as Holy Dragon city's residents. They naturally had to obey Tang Zhen's orders.

"Mr. Murun is in charge of appeasing the residents and explaining the benefits of Holy Dragon City to them to make sure that they don't overthink things.

Xiao Rui, you will be in charge of commanding the Black Rock City cultivators and helping the Holy Dragon City soldiers to look after the captives. If anyone dares to cause trouble, kill them immediately!"

Unusual times called for unusual things, and Tang Zhen was not allowed to be merciful.

There were many things that Tang Zhen wanted in Black Rock City that was filled with thick smoke. For example, the meat worms and mushrooms in the underground space, the foundation of the city, and the wealth that Black Rock City had accumulated over the years.

However, after this fire, how many things would be left?

When Tang Zhen thought of this, his heart twitched in pain, and he wished he could kill that damned colossal bone city Lord once more!

Forget it, I'm lucky to have it, but I'm not fated to have it. Let's not think about those troublesome things.

'I'll see what's left in Black Rock City after the fire is extinguished.'

I hope I can leave something good for myself.

?

Chapter 236: Clearing Black Rock City

When the fire in Black Rock City finally stopped, Tang Zhen brought Xiao Rui and the others into the city.

After the raging fire, the originally majestic and tall Black Rock City had been completely reduced to ruins!

The pungent smell of smoke made it difficult for people to breathe. Wherever they walked, they would stir up a cloud of dust.

The interior of the building was full of burn marks, and it was charred black. One could no longer see its former glory.

After seeing this scene, Xiao Rui couldn't help but let out a soft sigh, a trace of sadness in his eyes.

Personal grudges aside, he had lived in Black Rock City for many years. It would be a lie to say that he did not have any feelings for it.

Tang Zhen patted little Rui's shoulder as a form of comfort. However, he didn't say anything and just walked in the direction of the basement.

In the underground space of Black Rock City, there were flesh worms and mushrooms that he urgently needed. They would be of great help in alleviating the food supply.

Following the familiar path, Tang Zhen soon saw the huge 'potatoes' growing in the mud pool!

The flesh worm and the mushroom were also safe and sound.

Although the underground space was filled with a faint smoke, the flames did not spread to this place. This caused Tang Zhen to let out a long sigh of relief.

Since the food source in the underground space had not been damaged, the next thing to do was to transport all these things back to Holy Dragon City.

After thinking of this, Tang Zhen immediately arranged for people to move all the substitute food out of the basement and immediately send them to the Holy Dragon City for settlement.

However, the means of transportation had become a big problem.

The Holy Dragon city's chariots were mainly used for combat and could only transport a very small number of resources. Moreover, they were used to guard prisoners of war, so they could not be used easily.

Although the other four turrets had some livestock to transport supplies, they could not guarantee that they had enough capacity.

Fortunately, there were still a large number of residents of Black Rock City. With their help, he believed that they should be able to transport all the substitute food in the entire underground space.

After arranging the food transportation problem in the underground space, Tang Zhen and the others began to search the entire loucheng under Xiao Rui's lead.

The brain Pearl was unafraid of the burning of fire, so it should be able to be preserved. This was also the main search target.

The search began from the bottom and gradually went up. From time to time, they would see the dead bodies of Black Rock City residents in the corridors and rooms. Whenever this happened, a temporary group of Black Rock City residents would carry them away and send them to the large pits dug outside the city.

The citizens of Black Rock City who were in charge of transporting the goods were all mournful. Many of the citizens who had met with misfortune were familiar faces, and some of them were even family and friends.

The sudden change and the destruction of their homes made every citizen of Black Rock City feel terrible.

After seeing this, Tang Zhen suddenly felt grateful to the city Lord. The fire he had lit had helped Tang Zhen avoid a lot of trouble.

In this way, not only could Tang Zhen achieve his goal, he could also eliminate the hatred of the citizens of Black Rock City towards him. All he needed to do was to sit back and enjoy the fruits of others' labor!

As they searched higher and higher, more and more wreckage was discovered. They were all residents of Black Rock City who did not manage to escape in time.

A large metal door blocked their way, and the Holy Dragon City cultivators used tools to pry it open.

After passing through the iron gate that separated the ordinary citizens from the aristocrats of Black Rock City, Tang Zhen entered the 'high-class residential area' that the citizens of Black Rock City had mentioned!

The residents of the tower were all from influential families in Black Rock City.

One iron door, two worlds, showing the superiority of the rich and powerful.

However, after the fire started, the iron gate became the biggest obstacle to the nobles 'escape!

Countless wreckages were piled up in the passage in front of the iron gate. One could imagine how many people had wanted to escape from this place, but the panic and the thick smoke had become a curse, preventing them from crossing the threshold.

In fact, even if they managed to escape through the metal door, the sea of fire was still waiting for them outside.

Tang Zhen saw the city Lord of Black Rock City in the city Lord's Hall that had been turned into ashes. However, his limbs were twisted as he fell to the ground. He had died a long time ago.

The Supreme ruler of Black Rock City had used this method to walk down the path of destruction with his own city.

Tang Zhen carefully sized up this enemy that he had never met before. In fact, he looked down on the actions of the Black Rock City Lord.

It was said that the governor of Black Rock City was also a rank 5 expert. However, he did not have the courage to fight his enemy. Instead, he chose to end his life in such a cowardly manner.

Perhaps to the governor of Black Rock City, who had been pampered since he was young, the so-called cultivation level was just a way to show off his status.

For a city Lord who did not lack resources, it was not difficult for him to accumulate his cultivation to rank 5.

However, what made Tang Zhen feel rather strange was that it was said that the governor of Black Rock City had never stepped into an area where ordinary citizens lived in his entire life. The number of Black Rock City's residents who had seen his appearance could be counted on one hand.

Compared to Tang Zhen, who was always on good terms with the residents of Lou city, Black Rock City's actions were the style of an old-school City Lord.

Compared to the ordinary residential areas, the number of brains remaining in this high-class residential area was shocking. The Holy Dragon City cultivators in charge of the search would have new gains from time to time.

These brains should be the private property of the influential people. Even when Black Rock City was facing difficulties, these influential people still had no intention of contributing these brains. Instead, they hid them in what they thought was a secret place.

Now that the fire had died down, these brains had all gone to Tang Zhen.

After leaving the city Lord's Hall, Tang Zhen came to the room where the foundation stones were stored in Black Rock City.

Unlike Holy Dragon City, the room used to store the foundation stones in Black Rock City was much larger, and the trading platform even took up an entire wall.

However, after the fire, this place was beyond recognition.

Tang Zhen slowly took down the foundation stone that was suspended in mid-air, announcing the end of Black Rock City's inheritance.

It would not be long before this place was reduced to ruins. Black Rock City, which had experienced countless years of wind and rain, would completely disappear into the endless wilderness.

Walking through the busy crowd, Tang Zhen slowly walked to the huge stone statue in the middle of the Black Rock City square.

This was the statue of the founder of Black Rock City. Tang Zhen had obtained his first huge fortune by cutting a piece of Jade from this statue.

Currently, this top-grade Jade that represented a huge amount of wealth already completely belonged to Tang Zhen.

However, the current Tang Zhen was no longer the weak and poor kid from back then who could only carefully sneak into Black Rock City!

Tang Zhen kicked the giant statue to the ground and ordered his men to load it into a car and take it away.

This thing would be reprocessed and become a part of the Holy Dragon City.

At this moment, both the inside and outside of Black Rock City were busy. Under the supervision of the Holy Dragon City Warriors, all the residents of Black Rock City were involved in the transportation work. It would not take long for this place to be empty.

A few hours later, night slowly fell.

All of the transportation vehicles were stuffed with items. The citizens of Black Rock City were carrying all sorts of supplies on their hands and shoulders as they lined up in a long queue.

The captives' hands were still tied, and they did not dare to move rashly under the watch of the Holy Dragon city's soldiers.

Tang Zhen raised his head and looked at the bright moon above his head before gently waving his hand.

"Let's go back to Holy Dragon City!"

?

Chapter 237: Late night deserter successfully returns to the city

The endless wilderness would become extremely dangerous at night, and very few people would come out.

If it wasn't for the situation forcing him, Tang Zhen would not be willing to rush at night.

Fortunately, the nearby monsters had been cleared out by the undead, so it was much safer to travel at night.

Under the bright moonlight, a long line was slowly moving forward, with no end in sight.

The car lights were bright, the engine roared, and the shouts of the Holy Dragon City soldiers were endless.

Due to the large number of people, they made a lot of noise when they walked. Fortunately, they did not encounter any monsters.

In order to prevent anyone from escaping and causing trouble during the March, the soldiers of the Holy Dragon City were all on high alert and loaded their bullets. If any disobedient prisoners made trouble, they would immediately shoot and kill them.

After killing dozens of troublemakers, the captives finally calmed down and didn't dare to act rashly.

After seeing this scene, Tang Zhen was slightly relieved and temporarily shifted his gaze away from the map.

The thing he was most worried about along the way was the captives from the three towers. It would be a pity to kill them, but not killing them would also be a great hidden danger.

Fortunately, the city of hundred Flower Valley had already surrendered to the Holy Dragon City. Now, they had all returned to their own territory.

It wouldn't be long before Centaurea Valley's city Lord would take all the residents to Holy Dragon City.

As for whether that woman would come according to the agreement, Tang Zhen actually didn't care.

If the hundred Flower Valley's city Lord kept his promise, Tang Zhen would have less trouble. Otherwise, he would have to send troops to attack.

Traveling in the night would definitely greatly affect one's vision, and at the same time, it would also block the small movements of many people.

A group of Warriors were mumbling among the captives of colossal bone city, and at the same time, a short dagger was being passed to and from the crowd.

The ropes binding them were cut off silently. In order not to be discovered by the Holy Dragon City soldiers, they continued to hold the ropes in their hands and put on a nonchalant expression.

Before they knew it, several hundred of the giant bone city captives had already cut the ropes in their hands.

At this moment, they began to wait for an opportunity, ready to escape into the depths of the wilderness under the cover of the night.

A thousand meters away, Tang Zhen expressionlessly looked at the actions of the colossal bone city captives while his fingers lightly tapped on his raised thigh.

When the colossal bone city captives had just started to plan to escape, Tang Zhen had already discovered their little tricks. However, he did not send anyone to stop them this time.

Under the map perspective, any conspiracy could not be hidden in Tang Zhen's eyes.

Since these guys didn't know how to appreciate his kindness, he would let them taste the consequences of running away without permission. At the same time, it would also serve as a warning to those who harbored unfathomable motives.

Since Tang Zhen had such a plan, the fate of these colossal bone city captives was already decided.

The team continued to move forward slowly, but when they passed by a Hill, the prisoners of the giant bone city suddenly shouted and ran in the only direction that they could not stop.

These captives' actions immediately caused quite a commotion. Many of the captives who had not untied their ropes also tried to escape. However, after dozens of them were knocked down by the Holy Dragon City Warriors, they immediately became obedient.

Their eyes were fixed on the captives who were running toward the distant colossal bone city, waiting to see if they could escape successfully.

"Pa!"

More than ten bright lights shone on the escaping captives, allowing everyone in the team to see what was going to happen next.

"Bang Bang Bang!"

A series of heavy footsteps sounded, and the people in the team were shocked to find that a few huge shadows were blocking the escape route of these captives.

It's the ogres, the ogres in armor!

Some of the captives with good eyesight shouted out loud, pointing at those huge black shadows.

As he shouted, more and more prisoners and citizens of Black Rock City recognized the identity of the black shadows.

They quietly held their breaths, wanting to see what would happen next.

The fleeing giant bone city captives also saw the black shadow in front of them, and their faces were filled with fear as they tried to turn around and escape.

A huge fear of death shrouded their hearts, making their legs tremble.

But before they could turn around, the ogres' huge clubs whistled through the air and smashed into the bodies of the giant bone city captives.

“Bang Bang Bang!”

A series of dull thuds could be heard. It was the sound of the spiked club smashing into bodies. It was mixed with the shrill cries of the prisoners from colossal bone city and the sound of bones being broken. It filled the wilderness that was shrouded in the night.

Under the bright lights, five huge ogres were trampling on the captives of giant bone city.

They waved their spiked clubs, which were filled with bits of flesh and organs, and easily crushed the captives of the giant bone city.

Blood and flesh flew everywhere, and screams of pain could be heard!

When the last giant bone city captive's head exploded, the ogres, under big bear's command, licked the meat off their spiked clubs and once again hid in the night.

All that was left were broken limbs and bones scattered all over the ground.

The prisoners of giant bone city who had tried to escape had all been killed, and the team continued to move forward.

However, the tragic scene that had just happened was clearly displayed in the eyes of the onlookers, causing them to shiver.

When they thought of the tragic fate that would befall them if they were to escape, all of them extinguished the plans in their hearts and obediently followed the order to continue on their way.

With the escape of the colossal bone city captives as a precedent, there were no more accidents along the way.

The bloody massacre in Holy Dragon City had already successfully intimidated these captives and the citizens of Black Rock City.

At noon on the third day, the long journey finally arrived at Holy Dragon City.

Looking at the tall blood-colored walls, all the Holy Dragon City soldiers heaved a sigh of relief. They had been exhausted from the journey.

After seeing the Holy Dragon city's convoy appear, there were already soldiers who opened the city gates to welcome Tang Zhen and the rest who had returned triumphantly.

The exhausted captives and citizens of Black Rock City began to slowly walk through the gates of Holy Dragon City, but their mood became extremely depressed.

The huge city wall would only make them feel sad, because this was an impassable moat, which completely extinguished their thoughts of escaping.

Tang Zhen stood beside the Holy Dragon city's city walls and looked at the captives and residents that were swarming into the city like ants. He also felt a sense of relief.

This time, by sending out troops to assist in the battle, not only did they eliminate the hidden danger of the corpse race, they also resolved the problem of Black Rock City, and also gained a large number of residents and captives.

As long as they were slowly appeased and converted, these people would become a part of Holy Dragon City, contributing to the city's strength.

The next thing to do was to separate the captives from the citizens of Black Rock City.

The captives would be locked up in temporary cages, and the citizens of Black Rock City would be forced to work under the watch of the soldiers.

Tang Zhen would gradually give these survivors their freedom based on their performance and allow them to have the qualifications to become Holy Dragon city's residents.

With an example, these survivors of Black Rock City would definitely perform well in order to get rid of their half-captive status and obtain the qualification to become a resident of the tower as soon as possible.

As for the imprisoned soldiers and cultivators, Tang Zhen would use the same method to continuously divide and select them to become a member of the Holy Dragon city's armed forces.

However, before that, Tang Zhen had to completely sweep the three towers and bring the families of these soldiers to Holy Dragon City.

With their families' support, these unruly fellows could then work for the Holy Dragon City with peace of mind.

?

Chapter 238: A torrent from the heavens for the construction of the City Tower

After having a good sleep, Tang Zhen woke up in the tree house. He first checked the cultivation progress of Lisa and the others before starting to patrol his territory.

After spending the night in the cave, the survivors of Black Rock City had gathered in the square, waiting for their fate.

Overnight, they had turned from residents of Lou city to prisoners. Many people couldn't adapt to the huge gap, and they were very nervous.

Now, they were gathered in the square, waiting for the judgment of their fate.

While the refugees of Black Rock City were having wild thoughts, the residents of Holy Dragon City were so busy that their feet were smoking. They had too many things to do.

The first thing he had to do was to register the citizens of Black Rock City, do a head count, and find out what they were good at.

Due to the large number of people, Tang Zhen had no choice but to select a group of literate residents from the survivors of Black Rock City and let them help him register.

Tang Zhen had specially granted the families of the Black Rock City's cultivators who had submitted to the Holy Dragon City the right to become reserve residents in advance. This made the Black Rock City cultivators who had surrendered to Mo Ran and Xiao Rui secretly feel grateful.

Other than that, the survivors of Black Rock City would begin to join the construction work of Holy Dragon City after understanding their own strengths.

Under the watch of the Holy Dragon City's soldiers, the registration process was carried out in an orderly manner. Anyone who had completed the registration could receive a portion of food, and then gather in the designated area to eat.

Tang Zhen had his own plans for the work arrangements of these residents.

He first picked out the residents who were originally in charge of planting the giant 'potatoes' in Black Rock City and had them try to cultivate the crop in the cave.

After that, it was time for the residents to plant 'mushrooms' and rear meat worms. They would also conduct experiments in the pitch-black cave that Tang Zhen had ordered people to transform. They wanted to see if these two things could be cultivated after leaving Black Rock City and provide a substitute for food.

The remaining survivors of Black Rock City would be involved in the planting and construction work, which would also require a lot of manpower.

In the valley behind the Holy Dragon City, there was a huge piece of uncultivated land. Their mission was to turn this place into fertile land and then sow a large number of grain crops.

At the same time, the cleaning of the Flashing Gold Tribe Sanctuary could also be accelerated. After the cleaning was completed, Tang Zhen could prepare for the upgrade of the Level 3 building.

Other than these tasks, the Holy Dragon City also had to send Warriors to take over the three towers, including Giant Bone City, and bring all the residents back to the Holy Dragon City.

As he thought about it, Tang Zhen suddenly felt that the available manpower was really too little. The work that needed to be done was really too much.

There was no use in being anxious about some things. Tang Zhen also understood this principle. Therefore, he only needed to do the work at hand.

After shifting his attention away from the refugees of Black Rock City, Tang Zhen headed towards the cave where the cultivators from the three cities were imprisoned. He wanted to see if they were still obediently staying there.

In front of the cave where these captives were locked up, there were currently two Holy Dragon City soldiers guarding it. After seeing Tang Zhen, the two of them immediately stood up and saluted.

After chatting with the two soldiers for a while, Tang Zhen slowly walked into the interior of the cave.

The interior of the huge cave was brightly lit, illuminating every corner.

The illumination system of the glittergold race was the most valuable here, preventing those with evil intentions from hiding their little tricks in the dark.

On both sides of the cave, there were countless small caves. They were originally used to store goods, but now they were used to hold these prisoners.

Out of safety considerations, the soldiers of the loucheng Kingdom were thrown into disorder and reorganized to minimize the possibility of them colluding with each other.

Tang Zhen was very clear about the thoughts of these soldiers. First of all, they were worried about their families. Second, they could not be sure how Holy Dragon City would deal with them. Hence, some people did not hesitate to take the risk.

Fortunately, Tang Zhen already had a solution to these problems. It wouldn't be long before these guys would stay here in peace and try their best to perform, hoping that they and their families would be qualified to live here.

Tang Zhen had cut off their escape route and left them with no other choice!

Tang Zhen inspected each and every cave entrance once. After enduring the gazes that contained various emotions, he left the cave in satisfaction and returned to his city Lord's Hall.

There were a lot of things to do next, and he had a lot of work to do!

Just as the Holy Dragon City welcomed a large number of residents and Tang Zhen began to get busy happily yet painfully, the sky several dozen kilometers away from the Holy Dragon City suddenly began to turn gloomy.

The sky in the world of loucheng was extremely high, and the clouds seemed to be extremely far away from the ground, making it look carefree and relaxed.

However, the clouds in the sky suddenly became extremely heavy, as if they had turned into floating rocks that could fall at any time.

The originally emerald blue sky also changed, as if it had been frozen in an instant, turning from the void into a solid entity.

Behind the sky, there seemed to be a huge force constantly pressing down, causing a 'small bump' to appear on the originally flat sky!

As time passed, the 'little bump' in the sky became bigger and bigger. In the end, it actually spread across the entire sky, and the original blue color also became translucent.

Behind this huge bump, there seemed to be a shimmering light, as if it was an ocean.

Suddenly, a huge shadow flashed behind the big bun. Its body was covered with black scales, and when it passed by the big bun, it seemed to cover the entire sky.

A moment later, an extremely huge eyeball appeared on the big bag. It was filled with greed and was constantly looking at the world of buildings across the sky.

When the giant eye appeared, a few monsters wandering nearby were already trembling in fear and fell to the ground, unable to get up.

After a long time, the huge shadow finally disappeared, and the sky returned to calm.

A few monsters that were paralyzed with fear struggled to get up, wanting to escape from this area. Their natural monster instinct told them that they had to leave this area as soon as possible, or something more terrifying would be waiting for them.

However, before these monsters could stand up, the big bump in the sky expanded once again. At the same time, a series of cracks appeared on the surface.

Countless bolts of lightning suddenly appeared and struck the huge lump. They swam around the surface of the huge lump like strange lightning snakes.

An invisible force appeared out of thin air and gathered around the huge ball in the sky, as if it was trying to flatten it.

This force was extremely powerful, and the effect was obvious. The huge lump in the sky was rapidly closing up at a speed visible to the naked eye.

However, at this moment, the huge black shadow crashed into the huge bump. The Emerald blue sky that was about to return to normal suddenly began to shake.

“Huala”

A crisp sound seemed to reverberate between heaven and earth. A huge crack quickly appeared in the sky, and water began to pour down from the crack like a waterfall.

The black shadow crashed over again, and the crack in the sky expanded again. The waterfall instantly turned into a River.

When the black shadow crashed over for the third time, the entire sky was like a huge piece of glass, instantly shattering. An uncountable amount of water poured down, crashing heavily onto the ground.

Countless black shadows mixed in with the flood and fell into the world of loucheng.

The huge black shadow tried to squeeze through the hole, but its body was too huge, and it could not pass through at all.

The black shadow let out a loud roar and tried to expand the hole again, but this time, the hole in the sky was as solid as a rock and could not be expanded by an inch.

The invisible force continued to repair the hole in the sky, and the intensity of the lightning became more and more terrifying.

The edge of the hole flickered with electricity and began to close up.

However, every time the hole was repaired to a certain extent, the black shadow would crash into it fiercely, shattering the repaired part again.

In the process of repair and collision, more and more black shadows entered the world of the tower through the current. Their ferocious backs were exposed in the rolling waves, and they began to spread into the wilderness along the current.

Chapter 239: Flood in front of the gate, Spider-Dragon Sea monster

In the Goblin's laboratory, Tang Zhen was discussing the extraction and transformation of energy from the brain.

On the work table in front of them, the two shining gold puppets had been cut into eight pieces, and the parts were scattered everywhere.

Lu Da was holding a metal plate filled with dark gold wires as she excitedly explained her discovery to Tang Zhen.

Suddenly, there was a knock on the door, interrupting the heated conversation. A Holy Dragon City soldier walked in.

city Lord, a large river suddenly appeared on the gravel plain last night. Leader Tai Seng wants you to take a look!

Tang Zhen was stunned when he heard this. The gravel plain was in front of Holy Dragon City. It was desolate and lacked water. Why would a large river suddenly appear?

Switching to the map view, Tang Zhen indeed found a rapidly flowing river one kilometer away from Holy Dragon City.

After seeing this scene, Tang Zhen immediately left Lu DA's laboratory. He got into a military jeep and headed straight for the Holy Dragon city's city gate.

&Nbsp; after discovering the sudden appearance of the river, Tai Seng had immediately gone to investigate and had already arrived at the river bank.

The military jeep sped all the way and soon arrived at the large river that had suddenly appeared. After Tang Zhen jumped out of the car, he headed straight for Tyson who was not far away.

what's going on? why did a large river suddenly appear? "

Tang Zhen looked at the river that was nearly a hundred meters wide and asked Tai Seng.

Tai Seng pointed at the continuously rising river water under his feet and replied with a puzzled expression, " Last night, we found that something was wrong because the soldiers guarding the city heard the sound of running water. However, after checking around, we didn't find anything unusual, so we didn't pay much attention to it.

Who knew that when I woke up this morning, I would find this Big River that appeared out of thin air. Not only is the flow of the river very fast, but the water level is also constantly rising."

Then, Tai Seng pointed to a huge cactus plant in the distance and said, " just now, the river water was only at its roots. Now, it has risen by a foot. I'm afraid that it won't take long for the river to double in size!

Tang Zhen sucked in a breath of cold air when he heard this. If the matter was really as Tai Seng had said, then the Holy Dragon City would most likely be in big trouble!

Although the Holy Dragon Valley, where the Holy Dragon City was located, was very high, which prevented the sudden flood from spreading to this place, if the water level continued to rise, the Holy Dragon City would inevitably become an isolated island no matter how high the terrain was.

What Tang Zhen was most concerned about was the source of the flood and whether there were monsters in the river. These two points had to be clarified as soon as possible.

After thinking up to this point, Tang Zhen no longer hesitated and immediately returned to Holy Dragon City.

Tang Zhen activated the assault Helicopter that was placed on the city wall. He brought along Tai Seng and a few other soldiers and rose into the sky, directly heading upstream of the river.

The assault helicopters let out a deafening roar as they slowly flew across the rapidly flowing river. Meanwhile, Tai Seng and the others carefully patrolled the surface of the river to see if there were any monsters.

there! I saw a huge black shadow flash!

A Holy Dragon City soldier suddenly pointed at the river not far away and shouted. At the same time, he aimed his gun in that direction.

Tang Zhen immediately turned around when he heard this and slowly flew to the place where he had discovered the black figure earlier.

Below the plane was a vast expanse of water. Perhaps this was once a low-lying land, which caused the river to suddenly widen and form a huge Lake.

Everyone, including Tang Zhen, was carefully observing the surface of the lake as they searched for the black figure that had just appeared.

Because he had a map view, Tang Zhen's observation was much easier than everyone else's. He quickly discovered a black shadow slowly swimming under the water.

The artillery of the assault Helicopter locked onto the black figure at the first moment. The whistling sound of the artillery shells continuously smashed into the water and landed on the black figure.

"Aowu!"

A mournful roar sounded. A huge wave immediately rose on the surface of the water. Tang Zhen saw a fifteen-meter long ferocious monster reveal its true appearance from the water.

The monster's body was covered in smooth black scales. Its tail was as long as a Dragon, but its body was like a giant spider. Its snake-like head was filled with colorful bone spikes. It was roaring angrily at the helicopter.

Tang Zhen had already activated the [monster detector]. His gaze was firmly fixed on the water monster, and a set of words quickly popped up.

falling star sea, Spider Dragon monster (Level 5 monster). Its swimming speed in water is average. Its teeth contain poison and can shoot out bone spikes. Its weakness is at the intersection of the spider's body and the dragon's tail.

What the hell was the Starfall sea?

How did the seawater flow onto the land?

These two questions had just appeared in Tang Zhen's heart when he saw the Dragon Spider monster suddenly close its mouth. Its cheeks instantly swelled into a large ball.

"Not good, it's going to shoot out bone spikes!"

Tang Zhen suddenly recalled the description in the monster detector and immediately maneuvered the assault Helicopter to Dodge.

"Pfft!"

The huge head of the arachnid continued to chase after the assault Helicopter in the sky, its ferocious eyes filled with thick red veins. When the assault Helicopter slowed down slightly, it immediately shot out a half-meter long black bone spike!

The speed of the bone spike was extremely fast, like a black lightning bolt. In the blink of an eye, it had reached the military helicopter.

Tang Zhen's heart tightened. If he was hit by this bone spike, his armed helicopter would probably be immediately scrapped!

With that thought in mind, he pulled the control stick and the plane suddenly did a rapid turn. After rolling in the sky, it barely dodged the bone spikes that whizzed past.

a level 5 monster dares to be so arrogant? you're looking for death!

Tang Zhen didn't care about the dizzy Tai Seng and the others. He immediately controlled the cannon and started to fire at the spider Dragon monster, continuously creating bloody holes in its body. In an instant, rotten flesh and tainted blood dyed the water red.

The spider Dragon monster let out a miserable cry and immediately dove into the water to hide. Unfortunately, Tang Zhen had no intention of letting it go.

Putting aside the value of the level 5 brain Pearl, the most important thing was that Tang Zhen would only have the chance to advance to Level 6 if he could kill a level 5 monster.

No matter what, Tang Zhen would not let go of this Dragon Spider monster!

However, Tang Zhen's current application did not have a dedicated underwater detection function. The [all-round data combat interface] could only scan in the water and was unable to provide underwater scanning information in the air.

Tang Zhen was unwilling to let go of the Dragon Spider monster like this.

Thinking of this, he immediately opened the application store and began to search for applications that could deal with the current situation.

In less than a minute, Tang Zhen had found a suitable application.

[polarized filter x-ray vision. Able to observe underwater scenery from high above with excellent clarity. Able to see one kilometer below the water surface. Comes with target lock. Download amount: 20000 gold coins.]

Tang Zhen was overjoyed after reading the introduction. Compared to the possible gains, the 20000 gold coins was nothing.

After downloading and installing it, Tang Zhen immediately launched the application.

Following the activation of the application, Tang Zhen immediately felt the scene before his eyes change. The originally wide river on the ground no longer existed.

At this moment, what appeared in Tang Zhen's eyes were countless aquatic creatures that seemed to be floating in the air. They were following a fixed route and were continuously squirming forward in the air.

More than a dozen water monsters of various sizes were lurking under the water, their brutal eyes constantly flashing. At this time, most of the monsters' eyes were looking up, all locked on the armed helicopter flying above the river.

It was as if as soon as the armed helicopter landed on the river, they would swarm up and launch a fatal level one attack on Tang Zhen.

The half-crippled Dragon Spider monster that was beaten by Tang Zhen was currently quietly hiding in the deepest part of the river. It was in a pit that was fifty meters from the surface of the water, and it was constantly twitching and struggling in pain.

Using cannons to attack such deep waters would probably be useless. If he wanted to kill it, he would have to think of another strategy!

Although Tang Zhen was unwilling, he could only let this Spider Dragon monster off for the time being when he thought of this.

"I'll let you live for a few more days, then I'll deal with you later!"

After making up his mind, Tang Zhen turned the armed helicopter around and headed straight upstream.

Tang Zhen had already become increasingly curious about this River that had suddenly appeared.

?

Chapter 240: The source of the flood,! terrifying existence

The speed of the assault Helicopter was very fast. In less than ten minutes, Tang Zhen saw a scene that made him dumbfounded.

Looking up, one could see a giant waterfall falling from the sky, with uncountable water pouring down on the ground.

It was as if a huge hole had been corroded in the blue sky, and lightning was dancing around the edge of the hole, forming an extremely strange scene of the end of the world.

Through the assistance of the application, Tang Zhen could clearly see the situation in the water. There were countless fish, prawns, and monsters being wrapped by the water and continuously falling to the ground.

Tang Zhen came to a sudden realization. So this was the true source of the flood!

Tang Zhen once again sighed at the strangeness and wonder of the tower world as he looked at the giant waterfall that was like a miracle. There was actually such a scene that he had never imagined even in his dreams.

He had been to this area before, and there was no such hole in the sky, which proved that it had just appeared!

The falling waterfall made a loud noise as the water splashed and flew far away. Tang Zhen did not dare to get close to the armed helicopter and could only observe from a distance.

Tang Zhen was much calmer compared to Tai Seng and the others who had been scared silly by this scene. At this moment, he was carefully observing the huge hole in the sky and the surrounding scene in an attempt to figure out the real reason for this situation.

After observing for a while, Tang Zhen faintly discovered the role of the lightning. It seemed to be repairing the hole in the sky.

Lightning's repairing speed was very fast. It didn't take long for a ring of more than ten meters wide to appear around the hole, and it continued to solidify and thicken.

Tang Zhen made an estimation. According to this speed of restoration, he would be able to block the large hole in the sky in less than two days.

However, things were not that simple!

Tang Zhen had just thought of this when he saw that the area behind the enormous waterfall in the sky seemed to have suddenly become dark.

The waterfall that was originally gushing out suddenly became turbulent. At the same time, a large number of bloody traces and monster remains began to appear in the water.

"BOOM!"

Without waiting for Tang Zhen to react, an incomparably huge shadow heavily slammed into the hole. The surging water was blocked, and a huge body that caused everyone to feel boundless pressure blocked the hole in the sky.

The body was ink-black, and its huge scales were like exquisite works of art. They were covered with strange patterns, and each piece was nearly a hundred square meters in size.

With its impact, the hole that had been repaired by lightning was expanded again, and all the previous repairs were in vain.

At the same time, an extremely uncomfortable feeling surged into everyone's heart, causing Tang Zhen and the others to be extremely terrified.

Tang Zhen was greatly shocked. Just what kind of monster was this? it was actually so terrifying. Just the aura that it emitted was sufficient to cause people to not dare to form any thoughts of resistance?

Tang Zhen could not help but frown tightly when he saw the monster's action of smashing into the huge hole in the sky. Could it be that this huge hole was created by it?

If that was the case, then this monster was extremely terrifying!

Tang Zhen couldn't help but stare at the back of the hole and used the [monster detector] on the black monster that only revealed a scale and half a claw.

He did not expect that Tang Zhen would feel as though his head had been smashed by a large hammer with just a single glance, nearly fainting.

The assault Helicopter shook and almost fell into the ocean below.

At this critical moment, Tang Zhen finally recovered. He quickly adjusted the assault Helicopter, turned around, and shouted.

"Something's not right, sit tight!"

After shouting this sentence, Tang Zhen desperately ran into the distance. His face still had a trace of paleness and fear.

This was the first time that Tai Seng had seen such an expression on Tang Zhen's face. While he was surprised and puzzled, his heart was in his throat as he turned his head to look at the huge hole in the sky.

With just a glance, Tai Seng felt his back covered in cold sweat, and his body couldn't help but tremble.

An incomparably huge pupil appeared at the entrance of the hole, filling up the entire area. At this moment, it was coldly looking at the assault Helicopter piloted by Tang Zhen.

&Nbsp; looking at those terrifying pupils, Tai Seng felt like his blood was about to freeze, and his consciousness was in a daze.

There was only one feeling left in his heart, and that was that he was being watched by a God. There was no room for resistance at all, and he could only let him decide his life and death.

what's the use of working hard when you're living such a lowly life? you might as well die immediately!

At this moment, this was the only thought that was revolving in Tai Seng's mind, and his spirit became more and more dispirited.

If this situation continued any longer, then Tai Seng would lose his will to fight forever and wait for death to befall him in despair without any resistance.

"Pa!"

With the back of his head suddenly hit, Tai Seng's body trembled as he instantly woke up from the feeling of being a lowly ant that wanted to die immediately.

no matter what the situation is, never give up hope!

"No matter what kind of blow you suffer, you must grit your teeth and persevere!"

"It's precisely because life is short that we have to live a more exciting and brilliant life!"

"Did you hear that?"

Tang Zhen's final roar reverberated in Tai Seng's ears like the morning bell and evening drum!

As expected of someone who had experienced hundreds of battles, Tai Seng immediately broke free from that strange state.

As soon as he recovered, he raised his left and right hands, whipping the Holy Dragon city's soldiers, who had also fallen into a strange state, awake.

Even so, the 4 soldiers who had just woken up were still ashen-faced, their faces filled with a negative emotion, as if they were going to die early and be reincarnated early.

"All of you, get your f * cking spirits up. We'll slap each other until we draw blood."

Hearing this, the soldiers seemed to be a little reluctant and disheartened.

Fortunately, the habit of obeying orders had been deeply rooted in their hearts. No matter how unwilling these Holy Dragon City soldiers were, they could only lazily start beating each other up.

After a dozen heavy slaps, their faces were already swollen.

The burning pain finally caused some fluctuations in their dead eyes, which then became brighter and brighter.

After a dozen more slaps, one of the Holy Dragon city's soldiers finally woke up.

f * ck you, old nine. Why did you slap your Bone Cat Grandpa? "

The bone cat's mouth was covered in blood. It covered its swollen cheek and glared at su laojiu.

Su laojiu had a blank look on his face, but after being scolded by the bone Cat, it was as if he had been provoked. He immediately quivered.

Aiyo, you monster's son of a b * tch. You've pulled out my molars!

&Nbsp; after saying this, su laojiu spat out a mouthful of blood, and there was a Black Tooth in it.

The bone Cat immediately burst into laughter and pointed at su laojiu, " "You bastard son, you still dare to blame your father? do you have a conscience?

If I didn't help you knock out this rotten tooth, wouldn't you still be in so much pain that you can't sleep every night like usual?"

As the two of them argued, the other two Holy Dragon City soldiers also regained their consciousness. They covered their oily cheeks and glared at each other in confusion.

Seeing that his subordinates had returned to normal, Tai Seng's suspended heart finally settled down.

Turning around to look at the gloomy-looking Tang Zhen, Tai Seng asked with a lingering fear, " "City Lord, what the hell is that thing? why does it make people want to die?

If it wasn't for you, I'd probably have jumped into the river to feed the fish."

Tang Zhen frowned. He inhaled a deep breath of air and slowly said,"It's an existence that we can't afford to provoke now. It can kill us with a thought.

Damn it, how could that terrifying thing appear here and even create a big hole in the sky!"

After Tang Zhen said this, he said in a serious voice, it's a terrifying monster that has surpassed the Lord tier and entered another level. If you have to measure it by level, you can see it as a level 11 monster!

what? " hearing this, Tai Seng was dumbfounded.
