

Alternate 241

Chapter 241: King-tier monster, visitors from! foreign land

Unlike Tang Zhen, Tai Seng had been struggling to survive in the endless wilderness since he was born. He had a much deeper understanding and experience towards the monsters in the wilderness.

It was also because of this that Tai Seng found it unbelievable.

To ordinary Wanderers, monsters above level four were already extremely terrifying existences, and they would usually turn pale at the mention of them.

After becoming the Loucheng Warriors, their horizons had broadened, and the challenges they faced had gradually increased. At this point, only Lord-tier monsters could make them feel afraid.

However, never in his wildest dreams did Tai Seng imagine that he would encounter an existence that was even more terrifying than a Lord-tier monster!

This monster was so terrifying and strange that he almost lost his life just by looking at it.

Thinking back to the desire to die that he had just experienced, Tai Seng still felt his hair stand on end.

After understanding how terrifying this monster was, Tai Seng couldn't help but worry in his heart. Would this guy escape from the hole in the sky?

If things really developed in that direction, the Holy Dragon City would be in danger.

As if he had seen through Tai Seng's worry, Tang Zhen said to Tai Sen without turning his head while flying the plane, "You don't have to worry too much. Although this monster is extremely powerful, it definitely won't be able to break through the hole in the sky so easily!

The force of its impact was extremely terrifying, but it was still unable to cause much damage to the hole. Furthermore, after each impact, the hole would automatically repair itself!

This meant that the hole in the sky could only be expanded to this extent. No matter how terrifying its strength was, it was powerless to do anything.

This might be the influence of Some Kind of Heaven Earth Law. Otherwise, it would have already broken through the hole and come here!"

Even though he was comforting Tyson, Tang Zhen was still shocked by the information he got from the monster detector.

[Starfall sea, magic-eye T-Rex, level 11, King-tier monster (the rank of a Lord-tier monster after its next upgrade!) Possesses a special talent in finding spatial gaps. Excels in mental control. Flaws: [unknown?]

This was the information that Tang Zhen had obtained after using the advanced [monster detector]. This was also the reason why he had left this place in a hurry.

If they hesitated, they would be controlled by the king-tier demon-eye T-Rex, and they would have no chance of escaping.

Tang Zhen glanced at the vast ocean below the plane after he thought of this. A trace of worry flashed across his eyes.

“Although we don’t have to worry about that terrifying demon-eye T-Rex, we still have to be careful of the other monsters that will come with the flood.

I just saw at least five Lord-tier monsters in the water. If they have the ability to leave the water, they will most likely come ashore to harass the Holy Dragon City, so we have to be on guard!”

When Tai Seng and the others heard this, they all nodded in agreement.

Although the Holy Dragon City was not afraid of the underwater monsters, they still knew very little about the people from the devilfall sea. This was extremely disadvantageous to Tang Zhen and the others.

Just what kind of place was this devilfall sea? was it an alternate dimension or some place within the loucheng world?

Questions continuously appeared in Tang Zhen’s mind. However, he was unable to obtain an accurate answer.

As the military helicopter flew over a wide river, the bone Cat rubbed his eyes and suddenly pointed at the river and shouted, “ “City Lord, look! There seems to be someone over there!”

Tang Zhen looked in the direction that the bone Cat was pointing at. Indeed, he saw seven humans floating in the shallow waters of the river.

He originally thought that these seven people were unlucky Wanderers. However, when Tang Zhen swept his gaze over their clothes and accessories, he could not help but be slightly stunned.

Compared to the Wanderers in the wilderness, these people’s clothing style was full of a different aura. It seemed to be more suitable for living by the water. The weapons and accessories they used also had a strong ocean style.

“Could Tao Wu and the others have been brought here by the flood?”

After this thought appeared in Tang Zhen’s mind, he immediately maneuvered the armed helicopter and slowly landed on the riverbank not far away.

After the plane stopped, everyone jumped into the river and dragged all of them to the shore.

After an examination, it was confirmed that two of the seven were dead, and the remaining five were in critical condition and could die at any time.

Tai Seng and the others began to perform emergency treatment on the five of them while Tang Zhen continued to size up the belongings of the five of them, trying to confirm their origins.

Weapons made of special fish bones, armors made of strange shells, and strange clothes full of fish skin patterns all indicated their identity as outsiders.

It seemed like the flood had not only brought monsters, but also a group of unlucky people!

Tang Zhen's mood became extremely good after he confirmed the background of these five people.

With these five humans who came from the same place as the water monster, Tang Zhen finally had an information channel to figure out the origin of the monster.

After checking the area around the river again and collecting some scattered items, Tai Seng and the rest carried these guys onto the military helicopter and headed straight for Holy Dragon City.

Not long after, the plane landed at the Holy Dragon City square. Under the fearful and curious gazes of the survivors of Blackstone city, it slowly landed.

The military doctor Who had received the order was already waiting at the side. As the military helicopter turned off, everyone immediately rushed forward and carried the five unconscious people into the cave not far away.

The other two corpses were also properly taken care of and Tang Zhen didn't need to worry about them.

Tang Zhen waved his hand and indicated for the various items that these people had brought to be sent to his study room. After which, he turned around and walked towards Lou Cheng.

.....

Arel felt that his soul was about to collapse, and he could return to the sea god's arms at any time.

No, he seemed to have returned to the sea God's embrace!

As he recalled the giant whirlpool that the cargo ship encountered during its voyage, Arel felt that the end of the world had come because they were destined to be unable to escape.

Arel felt extremely depressed when he thought of the outcome that he was about to face!

This time, she had brought along all the wealth that her tribe had gathered and braved countless risks to buy a batch of expensive goods from the mainland merchants of the Starfall sea. She planned to make a fortune after selling them.

He believed that the profits from the sale of the goods would definitely allow his clansmen to live a good life for a few years!

Everything was going smoothly, and the smile on Arel's face grew. However, when they were less than halfway to their destination, they encountered something that the hundred races of the Starfall sea were most unwilling to encounter!

A King-tier monster suddenly appeared and drove countless sea monsters into a Whirlpool. When it passed by Arel's small cargo ship, it also pulled the cargo ship into the whirlpool.

The crude cargo ship was instantly torn to pieces by the waves. Arel and his companions struggled desperately, but they could not escape the fate of being swallowed by the vortex.

In the last moment before losing consciousness, Arel's heart was filled with sorrow.

She really couldn't understand why the human race's fate was so miserable. Not only were they bullied by the alien races, but even the sea and the monsters wouldn't let them go.

With endless resentment, Arel finally fell into a coma.

After an unknown period of time, Arel finally regained consciousness. This also made her realize that she was not dead.

Feeling the soft bedding that wrapped around his body, a strong curiosity rose in his heart. Where was he now?

Opening his eyes with great effort, the first thing that Arel saw was a field of rocks. He seemed to be in a cave.

There were four beds in the surroundings with their clansmen lying on them. At this moment, they were still unconscious, and strange tubes were fastened to their mouths.

A girl in a white robe saw that he had woken up and immediately waved to the side. Then, Arel saw two human cultivators in the same uniform walk over.

I'm the commander of the Holy Dragon city's cultivator troop. You can call me Qian Long!

After the young cultivator introduced himself, he looked at Arel and said, "Now, can you tell me your name and identity, and what kind of place is the Starfall sea?"

?

Chapter 242: The rumors of the falling star sea

When Arel walked out of the cave, he was shocked by the scene in front of him.

What appeared in front of her was a huge Valley that was like a Fairyland. The beautiful colorful scenery was too much for her to take in, and there was peace and warmth everywhere.

Countless human beings were working together. Some of them were building valleys, while others were tidying up the land by the lakeside. It was a busy scene everywhere.

Arel had never seen such a magnificent scene of labor, even in the powerful foreign clans.

this might be a building of some powerful human race. Otherwise, it's hard to explain everything I've seen. But why have I never heard of this place?"

With so many doubts in his mind, Arel followed the cultivators of loucheng to the tall building not far away.

When he stepped onto the stairs of the tower and saw two fully-armed human warriors, he was sure that this was a powerful human tower.

the scale of the valley where this City Tower is located is huge. I think it has been passed down for countless years, which is why it is so prosperous now, right?"

As Arel thought to himself, he slowly walked into the tower.

On the roof of the building, Arel saw many glowing things. The light they projected illuminated the dark corners and lit up the interior of the building.

He walked up the huge steps and finally stopped in front of a room.

After knocking on the door, the cultivator ordered Arel to go in alone while he stood guard outside.

With a hint of anxiety in his heart, Arel walked into the room with heavy steps.

It was a large room with simple decorations, but it was filled with all kinds of books.

A young man with a tough face was standing in front of the table, on which Arel's weapons and goods were placed.

After seeing Arel come in, Tang Zhen pointed to the things on the table and said, "If I'm not wrong, you should be from the devilfall sea and are all ordinary Wanderers."

Tang Zhen paused for a moment when he said this. He then said to Arel, "Do you also call the non-residents of loucheng Wanderers?"

Tang Zhen's voice was very gentle, and it made Arel unconsciously relax.

respected city Lord, we are known as Wanderers near the Starfall sea. It has the same meaning as the Wanderers you mentioned.

Arel's voice was extremely clear, and it seemed to have a mysterious seductive rhythm, giving people a very beautiful feeling.

Tang Zhen frowned slightly. This might be some kind of talent that the other party had. After all, she was only a Rank 2 cultivator and was still unable to charm him.

"I've never heard of the Starfall sea. You can describe that place to me, the more detailed, the better!"

Tang Zhen's words caused Arel's heart to skip a beat. She could now confirm that she had already left the Starfall sea and was now in an unknown region.

Although he had already guessed this, when his guess turned into reality, he still felt extremely terrified.

God knows where that damn vortex had taken him, and whether he could ever return to his tribe in this life.

Pushing down his chaotic thoughts, he raised his head and found the young city Lord Lou staring at him as if waiting for his answer.

After taking a deep breath, arril began to narrate.

"The Starfall sea is an extremely vast and dangerous ocean. There are countless terrifying sea monsters and living creatures in it, as well as many foreign races and humans.

In this area, the non-humankind was the ruler, and the human race was the one being exploited. They had to work hard every day to survive.

There were battles between sea monsters, Pirates, and foreign races. Ever since the day I was born, the fallen star sea has never had a moment of peace!

This time, my clansmen and I bought a batch of rare goods from the mainland's merchants and were prepared to ship them to a remote island to sell. However, we encountered a King-class sea monster and a terrifying ocean Whirlpool.

When I woke up, I found myself here."

Tang Zhen picked up a pen and paper as he listened to Arel's explanation. He continuously recorded it down. After he thought of something, he raised his head and asked.

who are the merchants from the continent you mentioned? which continent are they from? "

Arel shook his head. I don't know the specific name of that continent either. I only heard that there are countless powerful towers on the west side of the Starfall sea, many of which have been passed down for tens of thousands of years.

"Are there many of those King-tier sea monsters in the fallen star sea?" Tang Zhen nodded and asked.

Arel smiled bitterly and shook his head. there are very few King-level sea monsters, and many people don't even have the chance to see one in their entire lives. We're just unlucky this time. Otherwise, we wouldn't be here.

Looking at the dejected Arel, Tang Zhen pondered for a moment and said to the girl,"How much do you know about King-tier monsters?"

This time, Arel pondered for a long time before he slowly said, " "King-tier monsters are just a legend to ordinary people. However, as real monsters, many people have seen them.

When a monster was promoted to the Lord-tier, it would have magical abilities, many of which were very similar to the skills of a Holy master.

However, when a Lord-tier monster advanced to King-tier, their abilities would undergo a qualitative change. They would become even more unpredictable and powerful.

In the Starfall Sea area, there had been several battles where King tier monsters had attacked the towers. Almost every time, the king tier monsters had won, and the towers had been completely destroyed.

However, there were also exceptions.

It was said that hundreds of years ago, a King-tier monster attacked a powerful foreign clan's building. In the end, under the desperate resistance of many Lord-tier cultivators, the king-tier monster did not succeed in the end. It fled into the deep sea after being seriously injured.

One day, half a month later, someone found the king-tier monster's corpse on a deserted island. It had been lost for a long time, and its rotten body occupied nearly half of the deserted island.

This was a King-tier monster with spatial abilities. Around its corpse, people found a huge amount of treasures and brains, as well as many weapons and armors. They were piled up like a small mountain.

These treasures triggered a battle that spread far and wide. Countless foreign races took part in it, and the battle lasted for several months. Blood dyed the surrounding sea red.

In the end, the smell of blood attracted the attention of another King-tier monster. In the last battle, more than half of the foreign tribe experts who were snatching the treasures were devoured by the king-tier monster, and the rest were all injured.

Countless treasures went missing, and no one ever found their traces again, hehe.”

Tang Zhen’s understanding of King tier monsters became clearer as he listened to Arel’s explanation.

Without a doubt, the demon-eye Tyrannosaurus that had created a hole in the sky was a King-tier monster with magical abilities.

It had used its ability to discover the folded space in the falling star Ocean.

Perhaps it was its nature, but the magic-eye Tyrannosaurus used its own ability to enter that space and materialize. It began to crash into the folded space.

The magic-eye T-Rex’s actions eventually brought disaster to Holy Dragon City, which was an unknown distance away from the Starfall sea.

A huge hole was created in the sky that was not solid, causing an uncountable amount of seawater to pour out.

After figuring out the true origin of the demon-eye Tyrannosaurus, Tang Zhen’s mood also became a lot more relaxed.

As long as this fellow wasn’t a creature from another dimension, it shouldn’t have the ability to expand the hole in the sky. He believed that it wouldn’t take long for this Demon Eye Tyrannosaurus to lose interest in crashing into the hole.

As long as the demon-eye Tyrannosaurus was gone for two days, the hole in the sky would be completely repaired, and the endless sea water would stop gushing out.

At that time, this huge body of water that appeared out of thin air would provide Tang Zhen with countless food and brains.

Thinking about it this way, the appearance of the magic-eye T-Rex didn’t seem to be a bad thing.

?

Chapter 243: heading to Wei Island to catch fish and shrimp

“How many kinds of fish and prawns that can be eaten in the fallen star sea can you recognize?” Tang Zhen finally asked Arel.

Arel looked at Tang Zhen in bewilderment. Her slightly opened mouth revealed her white teeth that were like shells. Perhaps it was because of the sea breeze, but her skin color appeared very healthy.

“I know many kinds of fish and shrimp, but how are you going to go to the Starfall sea to catch cormordians?”

After hesitating for a moment, the tall and fit woman realized that she had asked something she shouldn't have, so she continued, “ my companions know more species because most of them make a living by fishing.

Tang Zhen nodded and said to Arel, “Don't worry, your comrades will be fine!

Go back and have a good rest. Perhaps from tomorrow onwards, we will start a large-scale fishing and shrimp catching!”

Arel didn't understand what Tang Zhen meant, but he still bowed and left the city Hall.

After seeing that Arel had left, Tang Zhen returned to his chair and began to list the fishing tools he needed to buy on a piece of white paper.

After the Holy Dragon City gained almost ten thousand people, the food supply immediately became a big problem.

Tang Zhen had planned to contact a world-class food group after returning to his original world and purchase a large amount of food from them to deal with the current predicament.

When the Holy Dragon City had a large piece of land to harvest, he believed that they would be able to be self-sufficient in a short time.

However, the sudden appearance of the huge River brought Tang Zhen a new source of food.

According to Arel, not only were there many fish and shrimp that could be used in the Starfall sea, but even the ferocious sea monsters were also a source of food.

It was because of the abundant food in the fallen star sea that the humans there barely did not have to go hungry.

But that was all.

Due to the oppression of the foreign races, the Wanderers in the falling star sea only suffered slightly more than the Wanderers in the wilderness.

Now, because of the flood, these fish, shrimp, and monsters had been brought to the vicinity of the Holy Dragon City. Tang Zhen had to make good use of such an abundant food resource.

After summoning the Holy Dragon City residents who were in charge of managing the survivors of Black Rock City, Tang Zhen ordered them to select people who were good at fishing. The more the better.

At the same time, the imprisoned soldiers of the loucheng Kingdom would also participate in the fishing. Tang Zhen did not intend to let them eat for free.

.....

Half an hour later, Tang Zhen, who had activated the [quantum stealth light screen], was teleported to the rental house in the pickle nation.

After confirming that there was no surveillance equipment in the surroundings, Tang Zhen walked out of the rental house.

The company that Lin huixun and the other two had founded was already on the right track, and the development of virtual game equipment had also entered a critical stage. It wouldn't take long before it could be launched into the market.

During his stay in the kimchi Kingdom, he had caused quite a bit of trouble and attracted the attention of many forces.

The danger would increase if they stayed for another day. Tang Zhen did not need to look for trouble.

After purchasing the fishing supplies this time, Tang Zhen would leave kimchi country to seek revenge on the mysterious organization that kidnapped Jin mingzhen.

After going through the Face Recognition of the [universal electronic kit] and a large amount of data screening, Tang Zhen had already locked onto the location of the mysterious organization.

The mysterious organization belonged to a super-industrial group in the Wei Island. On the surface, it was a biological research Institute under the group, referred to as "

Through the information collected by the [universal electronic kit], Tang Zhen knew that the organization had been conducting research on various super creatures and had close ties with the Wei Island military.

According to the information obtained, it could be confirmed that SST had successfully completed many cases of super creature experiments. At present, in the International waters of the original world, super creatures bred by SST often appeared and were witnessed by voyagers many times.

In the information that Tang Zhen had, it also mentioned that the organization was currently conducting a secret research called 'super soldier'. However, there was very little information on what kind of results they had obtained.

It was reasonable for such an organization to be interested in Tang Zhen.

However, their actions had angered Tang Zhen and they had provoked a powerful enemy!

After arriving at the market by car, Tang Zhen bought a large number of fishing tools and sent them back to the loucheng world. He then stepped on a ship to the Wei Island.

After finding a hidden spot on the boat and sitting down, Tang Zhen felt the sea breeze that brushed against his face. He opened a can of beer and happily drank it in one gulp.

By the time the sun rose the next morning, he would have already arrived at the Wei Island.

In the square of Holy Dragon City, hundreds of Black Rock City survivors with fishing experience were gathered together.

The fishing nets, hooks, and net cages that Tang Zhen had sent over were piled together and distributed.

These people would make all kinds of fishing tools based on their own experience, and then concentrate on fishing.

Although the efficiency of this kind of fishing might be a little low, in the situation where the river was full of monsters, it was the only method that could be used for the time being.

When thousand Dragon and the others learned how to pilot the assault helicopters, they could then stand guard in the air above the river for monsters while using their large nets to catch all the fish and shrimp in the river!

The soldiers of loucheng city who were being held in custody would also be selected for those who performed better and given simple weapons and equipment.

Their task was simple. They were to supervise the loucheng Warriors who had bad behavior and ask them to collect all kinds of shellfish, prawns, and crabs from the river.

Tang Zhen did not show any courtesy to this group of people who did not understand the situation. If they were killed by a sea monster while fishing, they could only blame it on their own bad luck!

Under the watch of the Holy Dragon city's soldiers, the thousand or so people began to move towards the river. It did not take long for them to reach the riverbank.

Seeing the wide river that had appeared out of thin air, the captives and the survivors of Black Rock City had a hint of fear in their eyes.

The selected fishermen put all kinds of fishing tools into the water and then retreated to the side to avoid being dragged into the river by the sea monsters.

Further away, there were many captives who did not perform well. They were waving hooks with food embedded in them and constantly throwing them into the water. From time to time, they would catch a strange-looking big fish.

A little further from the shore were the prisoners who had performed well. They held sticks and were responsible for watching over the stubborn prisoners.

Since they did not come from the same building and they wanted to perform well, the guards did not show any mercy when they hit them.

After being beaten up continuously, the disobedient captives became obedient and began to fish.

Even further away were the Holy Dragon city's Warriors in chariots.

Not only did they have to look after the captives, but they also had to lift the monsters in the water. They didn't dare to be careless.

More and more fish and prawns were brought ashore. Looking at the big fish that easily exceeded a meter in length and the giant crabs that were shaped like monsters, these people who had grown up inland could not help but click their tongues in wonder.

The people in charge of collecting fish and prawns were busy transporting the big, lively fish back to loucheng. Arel would identify them and pick out the edible species.

Those that couldn't be used were thrown to the ogres to improve their food. In any case, these guys ate anything and didn't have to worry about being poisoned.

All of a sudden, there was a loud noise. The people who were fishing moved away from the riverbank and pointed at the river.

A huge shadow streaked across the river and was pacing back and forth on the shore. From its appearance, it should be a huge water monster.

The Holy Dragon City soldiers, who were already prepared, immediately dispersed the crowd. At the same time, they operated their machine guns and locked onto the shadow in the river.

?

Chapter 244: Sneaking into the seafood feast?

“Fire!”

Following Tyson’s order, the two mounted machine guns immediately started shooting, and the monster in the river was covered in blood.

The monster jumped out of the water in pain and revealed its true form.

It turned out that this was a snake-shaped creature with huge fins. Its body was smooth and greasy, its head was unusually large, and its mouth was full of sharp teeth.

Judging from its aura, it was only a level-three monster!

Such a low-level monster was not worthy of the Holy Dragon City Warriors’ attention.

The gunshots stopped after less than 20 seconds, and the Hydra’s head had become a pile of mush.

The killed water monsters floated on the river’s surface and were quickly pulled to the shore by the group with hooks. After loading them onto the cars, they were transported to Holy Dragon City to be dismembered.

According to Arel, the Hydra’s meat could be eaten, so they naturally couldn’t waste it.

After easily killing a Hydra, the panicked fishermen immediately calmed down.

Since the Holy Dragon city’s Warriors could easily kill the Hydra, they did not have to worry about their safety.

With safety assured, the efficiency of fishing immediately increased. More and more fat fish and prawns were caught ashore and quickly sent to the sacred Dragon Valley for processing.

During the fishing period, there were several water monsters that appeared, but they were easily taken care of by the Holy Dragon City Warriors without causing any casualties.

However, the captives who were using fishing hooks were not so lucky. More than ten people were pulled into the river by the big fish.

Other than an unlucky fellow who was swallowed by the big fish, the rest of the captives were rescued.

These guys sat on the shore with pale faces, their faces still filled with fear.

After comparing the prisoners who had performed outstandingly to their own situation, the dozen or so people who fell into the water immediately made up their minds.

From now on, he would perform well and get out of this damn captive status as soon as possible.

The more they knew about the Holy Dragon City, the more desperate they felt. In the face of such a powerful enemy, the city they were in had no way of fighting back.

The city Lord had been killed, and most of the soldiers and cultivators had been captured. Colossal bone city and the other two Grade 2 towers had already ceased to exist.

Since that was the case, it was better to surrender as soon as possible. Maybe he could even get the qualifications to be a reserve resident of Holy Dragon City!

If a man didn't do it for himself, the heavens would punish him!

More and more captives had such thoughts, and the hidden hostility began to gradually dissipate.

If Tang Zhen knew the thoughts of these captives, he would definitely be very happy and reward them with a sumptuous seafood meal!

As the sun set, the people who were fishing began to return to Holy Dragon City.

Perhaps it was because of the bountiful harvest, everyone's faces were filled with smiles.

Although they didn't know how many fish and prawns they had caught today, they were sure that it was an astonishing number.

The mountain-like piles of fish and prawns in the sacred Dragon Valley confirmed their suspicions. The residents were still processing them and storing them in various ways.

Drying, steaming, or marinating, all sorts of methods were used.

The chefs of the Holy Dragon City were all circling around the stove. After the half-meter long shrimp and crabs were cooked, they were all placed on the table as tonight's dinner.

The food from the fallen star sea was exceptionally delicious, causing everyone to drool as they ate, wishing they could have another portion.

It was a pity that only the residents of Holy Dragon City had the same treatment. The survivors and captives of Black Rock City could only swallow their saliva and watch helplessly from the side.

Many people could not sleep that night. The refugees and captives of Black Rock City were secretly comparing Holy Dragon City to their own city.

However, after comparison, they were very sad to find that whether it was strength, welfare, safety, or development potential, their original city was not comparable to Holy Dragon City.

If he and his family could become residents of Holy Dragon City, how happy would that be?

The night was silent and the next morning, Tang Zhen had already set foot on the land of the Wei Island.

As he looked at the densely packed containers around him, Tang Zhen resisted the urge to transform into a Porter. He activated the [universal electronic kit] and began to locate his target.

The masked man who kidnapped Jin mingzhen and was killed by him was a Special Agent of the SST Research Institute. His identity was more secretive.

However, with the powerful searching ability of the [all-purpose electronic kit], his information could not be hidden!

Tang Zhen walked to the side of the road as he looked at the route displayed on the map. He randomly chose a car and started it.

As Tang Zhen had chosen the best route and with the help of the application, all of his video recordings were blocked and deleted. This allowed Tang Zhen to approach the target without anyone noticing.

After driving for nearly three hours, the car driven by Tang Zhen stopped at the foot of a mountain with beautiful scenery.

According to the information he had, the SST Research Institute was built near the mountain and was heavily guarded.

Of course, in Tang Zhen's eyes, these security facilities existed in name only. He could effortlessly sneak into any corner of this research room.

After throwing the car aside, Tang Zhen activated the [quantum stealth light curtain], passed through a large forest, and began to slowly approach the SST Research Institute.

When he was nearly one kilometer away from the SST Institute, Tang Zhen scanned a large number of cameras and alarms through his application. However, these ordinary devices couldn't detect the [quantum stealth light screen] at all.

Other than failing in front of the special equipment of the United States, the quantum stealth light screen had always been the best weapon for Tang Zhen to sneak around.

Under the tall wall outside the SST Research Institute, Tang Zhen gently jumped to the top of the wall and then silently jumped to the inner lawn like a Fallen Leaf.

From the construction of the Research Institute, the industrial group that SST belonged to was indeed rich and had made the greenery inside the Research Institute quite tasteful.

Tang Zhen glanced around and walked toward a six-story white building according to the instructions on the map.

Following behind a few researchers who were in a hurry, Tang Zhen easily avoided the guards at the entrance and entered the interior of the white building.

The interior of the building was not simple. Other than the six-story building above ground, there was a huge underground space dozens of meters underground.

The real secret of SST was all hidden there!

It was just that the entrance to this basement was very well hidden. If one did not know the correct way to enter, they would probably never be able to enter it.

Fortunately, the [all-purpose electronic kit] was omnipotent. It hacked into the computer of a senior employee of the research room and obtained the specific information to enter.

Tang Zhen, who was in an invisible state, first walked to the third floor. He used his application to crack the lock and opened the door of one of the laboratories.

After entering the room, Tang Zhen knocked out a middle-aged man in the laboratory with one punch and tied him up firmly with a rope.

After changing into the middle-aged man's white uniform, Tang Zhen activated the [virtual reality simulator].

A ray of light rapidly swept across the middle-aged man's face. Immediately after, Tang Zhen's face began to fluctuate. His eyes and nose rapidly changed shape, and his hair also became a mix of black and white.

In just a few seconds, Tang Zhen's face had become exactly the same as the middle-aged man's.

This kind of disguising technique was one of the functions of the [virtual reality simulator]. It could completely simulate a person's body and appearance.

However, this kind of simulation could not escape the perception of cultivators and the high-precision scanning equipment of the original world.

It was more than enough to fool people normally!

Tang Zhen, who had turned into a middle-aged researcher, slowly walked out of the room. He used the [universal electronic kit] to destroy the door lock before walking to the elevator at the end of the corridor.

After entering the elevator, Tang Zhen used his employee tag to scan a certain area on the elevator and then pressed a button in succession.

A ray of light swept across Tang Zhen's entire body. Under the shielding of the [universal electronic kit], he did not discover any abnormalities.

After doing all of this, Tang Zhen stood with his hands behind his back. His face was wooden.

Ding! Ding!

A notification sound was transmitted over. The elevator door slowly opened, and a brightly lit underground hall appeared before Tang Zhen's eyes.

?

Chapter 245: underground transportation, initial fame

Tang Zhen let out a cold laugh as he looked at the transparent high-strength bullet-proof screen wall in front of him and the busy crowd behind it. He placed his palm on the scanning platform at the entrance.

“Verification complete. Please enter!”

Following the elegant voice of a Wei Island woman, Tang Zhen slowly withdrew his palm and stepped into the bulletproof glass door that had just been opened.

SST’s Underground Research Institute had already appeared in front of him without any cover, and he could do whatever he wanted.

According to the information collected by Tang Zhen, this underground laboratory had the best Experimental equipment in the original world. There was also experimental data from various super creatures. There were many things that could not be measured with money.

Therefore, what Tang Zhen had to do was to completely empty this place!

Following Tang Zhen’s operation, the entire Underground Research Institute’s communication system was completely blocked, completely losing contact with the surface.

Before communication was restored, the ground would not know anything that happened here.

He activated the [all-rounded digital battle interface] and began to scan the surrounding environment. It did not take long for the search to be completed.

The surveillance cameras of the entire Underground Research Institute were controlled and began to lock onto the armed guards. They were marked on the map.

Everything was in place. Tang Zhen stood at the door and slowly raised his head under the puzzled gaze of the guards.

“Bang!”

After sending the guard beside him flying with a punch, Tang Zhen laughed out loud as he took out an automatic rifle. He pointed it diagonally to the sky and pulled the trigger.

“Pa pa pa!”

Rapid gunshots sounded, causing all the staff in the underground Research Institute to be startled at the same time. They immediately panicked after seeing Tang Zhen holding an automatic rifle.

The three guards quickly approached Tang Zhen and tried to use their taser guns to subdue him.

However, they had just taken a step when they were knocked to the ground by Tang Zhen. All of them were shot in their vital parts.

all of you, get on the ground and spread out your hands. Otherwise, I won’t be polite!

Tang Zhen once again knocked down a guard who had tried to launch a sneak attack as he shouted at everyone.

Looking at their blood-stained white uniforms, the researchers finally realized what they should do. They immediately lay on the ground obediently, their movements extremely Swift.

Tang Zhen nodded his head in satisfaction when he saw this. He looked around and chose a spacious room before ordering all the researchers to enter.

After one room was filled, Tang Zhen ordered everyone to enter another room.

After the two rooms were filled up, Tang Zhen took control of the underground Research Institute's fire broadcast system and loudly shouted, "You bunch of B * stars, you actually dared to scheme against me. Now I'm here to collect interest!

Do you want your experimental equipment and research materials?

Then send the materials I need to the location I've given you, or I'll let you see a pile of scrap metal!"

After shouting, he saved the recording and entered a map into the computer.

After finishing these things, Tang Zhen began moving the valuable experimental instruments into the space and piled them up in the Holy Dragon city's warehouse.

Other than these experimental instruments, he also did not let go of anything that Tang Zhen thought was valuable. He brought everything back to Holy Dragon City.

During the transportation, they would occasionally encounter hidden researchers and armed guards. Every time this happened, Tang Zhen would unceremoniously knock them unconscious. If they dared to resist, he would directly shoot and kill them.

After being busy for half a day, Tang Zhen finally cleared the underground Research Institute completely without leaving a single piece of paper.

When the boss of the Research Institute saw this scene, would he faint from heartache?

Tang Zhen had just casually inquired about the price of one of the experimental equipment and was surprised to find that it was worth over a hundred million. Moreover, it was not something that could be bought with money!

Looking at the text introduction of this test equipment, Tang Zhen realized that he seemed to have overlooked a source of income.

If he had all kinds of rare materials, could he auction them in his original world in exchange for what he wanted?

However, if he did that, he would officially step onto the stage and be recognized by everyone!

Tang Zhen was a little conflicted as to whether he should do it or not.

After carefully thinking for a while, Tang Zhen felt that the advantages of this matter outweighed the disadvantages. If the conditions allowed it, there was no harm in doing it.

Tang Zhen patted the dust off his hands and swaggered out of the underground Research Institute. At the same time, he removed the communication block there.

Half an hour later, the workers on the ground forcefully broke open the underground entrance that Tang Zhen had destroyed and rescued the researchers who had a frightened expression on their faces.

When the news of the looting of the SST underground laboratory came, the bosses of the laboratory in the Japanese capital vomited blood.

The Furious Board of Directors ordered a thorough investigation to begin. Who could have committed such a shocking robbery?

A few hours later, when an investigation report was placed on the table of these bosses, they were all silent.

According to the investigation, there was only one man who had participated in the robbery. He had disguised himself as a researcher of the underground Research Institute, used some kind of technological means to sneak into the underground Research Institute, and instantly cut off all communication equipment to the ground.

During the time when they lost contact with the ground, the man had shot seven armed guards and locked up all the researchers in two rooms.

The most shocking thing was that the man had secretly moved away more than ten tons of experimental equipment and a large amount of precious scientific research materials in a short time.

How did he manage to do it in an enclosed area dozens of meters underground?

Tang Zhen's voice recording was also played. The information revealed in his words made these behind-the-scenes bosses whisper to each other.

A gloomy-looking middle-aged man waved his hand, and the door of the conference hall was opened.

A young woman in a black combat suit walked into the hall. She looked around and said to the crowd, "according to the information we have, the SST robbery was most likely done by a man from the Asian Alliance.

As the woman spoke, Tang Zhen's ID photo was displayed on the big screen behind her. At the same time, the table in front of every board member also became a screen that played a video.

The Woman in Black continued, "the man's name is Zhen Tang. It has been confirmed that he has many magical abilities. Some time ago, there were records of his whereabouts in the ice Bear Alliance and kimchi country.

Not long ago, our special task force had tried to capture this man to assist in the ongoing 'super soldier' experiment. In the end, the operation failed completely, and no one survived!

Therefore, we concluded that this was his revenge. Only he would be able to take away more than ten tons of experimental equipment tens of meters underground without a sound!"

After The Woman in Black combat suit said this, she looked around at the crowd and said sincerely, "I hope that everyone can allow us to send out the 'celestial God troops' to ambush Tang Zhen at the trading location and completely subdue him!"

Everyone lowered their heads and discussed for a while. Then, an old man looked at The Woman in Black battle suit and said, "This man called Tang Zhen is very powerful. Are you sure that the members of the celestial deity Army can subdue him?"

The woman in the black combat suit nodded firmly and said in a deep voice, "I guarantee that I can capture him. Please rest assured!"

"Alright, we'll do as you say!"

?

Chapter 246: Delicious seafood, clear the warehouse

Tang Zhen had set the date for the trade with spa half a month later, which was enough for them to be anxious for a while.

He believed that he would be able to gather all the things he wanted.

After purchasing some supplies on the island, Tang Zhen returned to the loucheng world.

The moment Tang Zhen returned to the Holy Dragon City, he immediately discovered a small mountain of dried salted fish!

Although he knew that there was a huge amount of fish and shrimp in the water, Tang Zhen did not expect that there would be so many.

This was a great thing. Tang Zhen couldn't wait for more dried fish.

In the dining hall of the Holy Dragon City square, Tang Zhen was followed by Arel and her clansmen. He stood in front of a table and was tasting the newly added seafood of the Holy Dragon City.

Tang Zhen peeled off the shell of a half-meter long giant prawn in his hand and reached out to pull off a large piece of jumping prawn meat.

He placed it in his mouth and chewed it gently. An indescribable delicious taste filled his mouth, causing his saliva to flow out involuntarily.

After eating a few mouthfuls of shrimp meat, Tang Zhen also tasted several other kinds of fish, shrimp, and crab, each of which was quite delicious.

After tasting the fish and shrimp, Tang Zhen walked to a large pot and scooped out a spoonful of meat wrapped in sauce.

This was the Hydra's meat. After it was broken down and cleaned, it could be cooked directly.

Tang Zhen took a bite and discovered that the meat was very coarse, but the taste was very good. It could be considered a good food.

After putting down the water monster meat in his hand, Tang Zhen looked at the chef behind him and said, "This Hydra meat will be the food for the captives. If they don't act strangely after three days, provide this food to the survivors of Black Rock City.

If everything is normal after ten days, this Hydra meat can be added to the residents "diet, understand?"

The chef nodded in agreement, indicating that he would do as he was told.

Tang Zhen nodded. He turned to look at Arel and the others behind him and asked the five of them to follow him to the river.

From time to time, a car filled with fish and shrimp would pass by on the wide road in the sacred Dragon Valley, carrying a strong fishy smell.

Seeing the cars of the Holy Dragon City, Arel and her people were full of surprise because they had never seen such a self-moving four-wheeled cart.

In the few days that they had woken up, the shock that Holy Dragon City had given them had increased.

Compared to the refugees of the fallen star sea, the Holy Dragon City was far superior in every aspect!

If they could live in such a place forever, how happy would they be?

When they reached the river, a lively scene of fishing appeared in front of everyone.

With the harvest from the previous two days, the Holy Dragon City had mobilized nearly three thousand people to catch fish this time. The densely packed crowd filled the riverbank.

In order to improve the efficiency of fishing, the fishermen began to use the blood and internal organs of water monsters as bait to attract the fish and shrimp upstream and downstream, and then concentrate on fishing.

The water monsters that would cause a trace of panic to the fishermen had now become their target.

Once a water monster appeared in the river, the Holy Dragon City soldiers did not need to fire. The captives would fight to throw the eight-clawed fish hooks at it.

Once the sharp fishhook caught the water monster, a group of people would pull it out of the water.

The next step was for the Holy Dragon City soldiers to operate the machine guns and mince the monsters, and then drag the Hydra's body ashore.

With the cooperation of a group of experienced captives, the whole process was as smooth as flowing water.

It didn't take long for the killed water monsters to be dragged ashore and transported away in trucks.

After ordering Arel and the others to guide them on how to catch the fish, Tang Zhen also began to prepare to kill the water monster.

Tang Zhen's cultivation was currently at rank 5. If he wanted to advance to rank 6 Lord, he would have to kill ten Rank 5 monsters!

Now, the wide river with water monsters everywhere had become the most ideal place for Tang Zhen to level up.

However, when facing underwater monsters, firearms would become very useless.

Even a powerful 12.7mm sniper rifle would not be able to effectively kill a target two meters underwater!

Therefore, Tang Zhen had to either design a weapon to deal with the underwater monsters or wear the underwater breathing insect and fight those Level 5 monsters in close combat!

However, the most ideal method was to use depth charges and airdrop torpedoes to attack!

Tang Zhen, who had a military helicopter, could drop depth bombs from low altitude to attack the various water monsters hiding at the bottom of the river.

In the military field of the original world, depth charges were a common anti-submarine weapon, and the equipment rate was high.

Tang Zhen, who didn't have any deep water bombs in his hands, had to act as a Porter again this time!

After thinking up to this point, Tang Zhen turned around and returned to Lou Cheng, teleporting back to his original world.

Tang Zhen sat on a long bench by the road and started the [all-purpose electronic kit]. He started to search for the information he wanted.

The black technology that was used to transform into a network spirit immediately began to crazily collect information in the Wei island's network system, and at the same time, it began to filter the information.

In less than a minute, Tang Zhen had obtained the information he wanted.

At present, there were a total of nine places in the Wei Island that stored the things Tang Zhen needed. Six of them were military bases and three were underground military reserves.

After careful analysis, Tang Zhen chose an underground military reserve in a coastal city on the Wei Island.

This place had the materials that Tang Zhen needed, but it was not eye-catching!

After choosing his target, Tang Zhen began to act.

Tang Zhen took the shinkou route and looked at the scenery as he walked. A few hours later, he arrived at the city where the target was located.

According to the information that Tang Zhen had obtained, this underground military reserve was not far from the sea. It was camouflaged on the outside and he could easily sneak in.

According to his usual stealth mode, Tang Zhen activated the [quantum invisibility light screen] when he was one kilometer away from the target.

From the outside, this underground military reserve was not eye-catching at all. If one did not know the inside story, they would never think that there was an entrance sealed by an iron door in the middle of the huge warehouse.

As this military reserve was closed all year round and was an emergency facility, Tang Zhen did not intend to break through the door but decided to use the teleportation function.

After Tang Zhen entered, the outside world would not be able to sense anything. No one would think that a living person was hiding inside the warehouse.

Next, Tang Zhen would be able to carry out the moving work with a peace of mind. Before he was discovered, Tang Zhen was confident that he would be able to completely empty this place!

Tang Zhen quietly avoided the soldiers in charge of guarding and came to the large metal door in the middle of the warehouse. He activated the [teleportation plug-in] and entered the warehouse.

After relying on the application to shield all the surveillance equipment, Tang Zhen began to size up the underground warehouse.

The underground warehouse's frame was very high and was made of high-strength reinforced concrete. It was divided into different areas.

After walking around, Tang Zhen found a large amount of firearms and ammunition, military vehicles, cannons, and tanks.

Most of these supplies were old models, but fortunately, they were well-maintained and did not affect their use.

If all these materials were moved to the world of Loucheng, Tang Zhen would not have to worry about the supply of weapons for a long time.

After checking all the materials in the warehouse, Tang Zhen began the transportation work.

As there were too many materials in the underground warehouse, Tang Zhen had priority in choosing the materials that he could use and sent them to the Holy Dragon City.

As he watched the slow moving progress, Tang Zhen once again sighed as the storage space was not enough.

However, he didn't have the spare money to level it up again, because he still had to use the brain beads he had saved up to level up Lou Cheng.

While Tang Zhen was transporting the goods, a large group of people in Holy Dragon City were also sorting the goods and storing them in a huge cave.

Fortunately, the cave in the Holy Dragon City was enough. Even if it was stuffed with countless 'useful' and 'useless' things, there was still enough space.

This time around, the transportation took a full two days before Tang Zhen finally completed the transportation work. He left the empty underground warehouse with a satisfied expression.

The next thing to do was to kill monsters to level up!

?

Chapter 247: Bombing the Hydra and being attacked by the lake

After returning to the Holy Dragon City, Tang Zhen took a short break before he started to prepare to kill monsters and level up.

After storing the depth charge into his storage space, Tang Zhen called for Qian Long and a few Holy Dragon City cultivators to control the military helicopter to slowly take off from the city wall.

The loud roar of the plane attracted the attention of the people by the river. They all looked up at the steel beast that was flying rapidly in the sky.

The Holy Dragon city's soldiers were full of pride, while the captives and the citizens of Black Rock City were filled with shock and fear. They had a deeper understanding of the Holy Dragon city's strength.

With such terrifying strength, who else could stop the Holy Dragon City from rising?

The captives and the survivors of Black Rock City had already given up on any thoughts of resistance. They only hoped to perform well and obtain the qualifications to be a reserve resident of Holy Dragon City as soon as possible.

A level-four water monster suddenly jumped out of the river and went straight to the fisherman.

However, before it could get close to the shore, the artillery of the armed helicopters roared and broke the water monster into four or five pieces. The broken body dyed the river red.

The terrifying power of the cannon shocked everyone who witnessed it. They couldn't help but wonder if the bullet would hit a human body, wouldn't there be no bones left?

"Long live the city Lord!"

A Holy Dragon City soldier shouted excitedly, and the people around him also echoed loudly!

The captives and the survivors of Black Rock City were affected by the atmosphere. They waved their arms and shouted in unison.

"Long live the Holy Dragon City!"

"Long live the city Lord!"

"....."

Amidst the shouts, the assault Helicopter circled twice and quickly headed upstream.

After flying for a distance, Tang Zhen passed the assault Helicopter to Qian Long and let him slowly pilot it.

After a period of practice, the members of the cultivator battle team could already control the armed helicopter. Now, they only lacked experience.

With Qian Long in charge of driving, Tang Zhen was able to free up his hands and feet to focus on hunting the water monsters.

Tang Zhen activated it, and the wide and deep River water was immediately filtered out, leaving only the various creatures slowly swimming in the river.

A few low-level monsters were slowly swimming towards the fishing spot in the Holy Dragon City, obviously attracted by the smell of blood.

Tang Zhen ignored these low-level monsters as he continued to pilot the assault Helicopter and flew further away.

Not long after, a level five water monster entered Tang Zhen's field of vision. At this time, it was lying quietly at the bottom of the river.

They took out two depth charge bombs from their storage space. After setting the depth of the explosion, the two cultivators threw the depth charge bombs in their hands according to the position given by Tang Zhen!

The two heavy iron blocks fell into the water at the same time, making a big splash, and went straight to the level five water monster at the bottom of the river.

In Tang Zhen's field of vision, the two depth charges quickly floated to the top of the water monster's head. Under the surprised gaze of the water monster, two dazzling flames suddenly burst out.

A huge wave emerged from the surface of the water. Tang Zhen heard a painful roar from the water monster, followed by a huge amount of blood spurting out of the water monster's body.

The massive amount of blood was like a red mist, completely enveloping the Hydra and then being completely blocked.

The Hydra was struggling painfully with its bones and internal organs exposed. Its body was covered in rotten flesh, and it wailed from time to time.

The two depth charges had already sent it to the brink of death.

He tied a steel cable around his waist and hooked an underwater breathing insect to his nose and mouth. Tang Zhen jumped off the armed helicopter and directly entered the water.

After approaching the dying water monster, Tang Zhen took out his alloy sword and easily killed the water monster!

He took out a rope from the storage dimension and tied the water monster's body. Then, Tang Zhen ordered the cultivators on the plane to lift him up.

The elevator installed on the armed helicopter began to work and pulled Tang Zhen directly out of the water.

After securing the rope in his hand to the armed helicopter, Tang Zhen began to use the buoyancy of the water to drag the body of the water monster to the river.

After taking out the water monster's head, Tang Zhen informed Tai Seng to bring the captives and a car to transport the water monster's body back to the Holy Dragon City.

It was said that such a large pile of food contained nutrients that were extremely useful to cultivators. Tang Zhen naturally would not waste it.

After dealing with the water monster, Tang Zhen checked the progress of the upgrade. As expected, the distance had increased by a small grid.

The assault Helicopter took off again and continued to search along the riverbank.

It didn't take long for another level 5 water monster to enter Tang Zhen's sight.

This was a water monster that looked like a crab. It had a hard shell. For safety's sake, Tang Zhen dropped a total of four depth charges this time!

The terrifying explosion sent the mud at the bottom of the river flying. The crab monster's shell was shattered, and its claws were broken. It fell not far away.

Tang Zhen jumped into the water again and killed the crab monster. Then, he used the same rope to tie it up.

After killing five water monsters in a row, Tang Zhen was getting closer and closer to the hole in the sky.

Tang Zhen had always kept a respectful distance from the king-tier monster. Therefore, the armed helicopter took a big detour and flew to the other side of the river.

During this time, no one dared to look at the huge hole in the sky, afraid that the king-tier demon-eye T-Rex would take control of their souls and recklessly seek death!

On the other side of the river was an extremely huge water surface.

As this place had once been a low-lying swamp, the surging river water had all gathered here, forming a huge Lake with a depth of more than 100 meters.

If the hole in the sky could not be closed in time, this giant Lake would spread towards Holy Dragon City, turning Holy Dragon City into an isolated island!

Prevention was better than cure. Before the hole in the sky was blocked, Tang Zhen must be prepared for the Holy Dragon City to be flooded.

Fortunately, with the [terrain transformation plug-in], Tang Zhen could ensure that the Holy Dragon City would not be flooded even if a flood were to come.

let's wait for a while more. If the hole in the sky hasn't been sealed up by then, I'll circle another piece of land and raise Holy Dragon City higher!

Tang Zhen stared at the vast water surface below the plane and quietly made a decision in his heart.

city Lord, there's a level 5 water monster in that direction!

Just as Tang Zhen's mind was wandering, a Holy Dragon City cultivator reminded him, causing him to return to his senses.

According to the direction pointed by the cultivator, Tang Zhen indeed found a water monster rolling in the mud on the shore. Its appearance was similar to an eel.

"Fly over and kill it!"

The water monster was not hiding in the water, so it could be killed by cannons and missiles.

As the assault Helicopter neared, the Hydra howled and spat out a ball of mud filled with acid.

Thousand Dragon maneuvered the assault Helicopter to Dodge, and quickly fired its cannons at the Hydra.

As long as the cannon bullets landed on the Hydra's body, they would tear a bloody hole the size of a human head or tear off a piece of flesh.

In less than half a minute, the Hydra was smashed into pieces and was not far from death.

Tang Zhen jumped down from the sky and waved his alloy sword, directly beheading the water monster!

Tang Zhen bent down to retrieve the water monster's brain. He was about to return to the armed helicopter when he suddenly saw a cold light coming from the corner of his eye.

Tang Zhen did not hesitate to leap to the side. He saw a black bright object whistling over, sweeping past the position he was standing at earlier. Its speed was not the slightest bit inferior to a strong crossbow.

If Tang Zhen didn't Dodge in time, this black and bright object would definitely hit him!

After being suddenly attacked, Tang Zhen immediately took out an automatic rifle and began to shoot at the muddy grass not far away.

After only half a magazine was emptied, dozens of creatures covered in mud jumped up in camouflage cloaks that looked like rotten grass.

They held mottled blow darts in their hands and aimed at Tang Zhen!

?

Chapter 248: Swamp Frogman, professional fisherman

After discovering that Tang Zhen was under attack, Qian Long turned pale with fright. He immediately maneuvered the assault Helicopter to the nearby sky, ready to fire at any moment.

Four Holy Dragon City cultivators descended from the sky, quickly occupying an advantageous position, and aimed their guns at these mud-like creatures.

Tang Zhen frowned slightly as he looked at the blow dart that was aimed at him. His finger that was pulling the trigger began to exert a little force.

With just a little more strength, the whistling bullets would be able to kill these guys wrapped in mud!

"Who are you? why are you invading our territory?"

The mud monster on the other side suddenly roared, its tone strange and obscure.

Tang Zhen activated the [universal language translator] and asked in the same language, "Who are you? why did you suddenly attack me?"

After the mud creature heard Tang Zhen's question, it immediately said in an excited tone, " Oh my God, you can actually understand our swamp doll language. This is really shocking!

The swamp Frogman that was talking to Tang Zhen put down his blow dart and took off the hood that was like a turf.

A face that looked like a combination of a frog and a lizard was revealed. Its eyes and mouth were very big, and there was not a single strand of hair on the surface of its body.

"The sudden flood destroyed our home and forced us to leave this place.

Human Sir, do you know where the flood came from?"

The swamp Frogman's face was filled with urgency as he asked Tang Zhen.

"This flood comes from the sky. I don't know when it will stop flowing."

Tang Zhen pointed at the upper reaches of the river as he spoke to the swamp Frogman.

When the swamp Frogman heard this, it immediately revealed a disappointed expression and said to Tang Zhen, it's unbelievable that a flood appeared in the sky, but this might be the real answer, because my father said the same thing.

The land under your feet is our home for countless years. Unfortunately, the water is full of monsters now, and our survival is threatened.

The strange river water made our skin red and swollen, so no one dared to go into the water.

Our former home has been completely submerged, and we don't know what to do!"

The swamp Frogman then bowed to Tang Zhen,"We mistook you for a bad person just now, so we suddenly attacked you. Please forgive our rudeness!"

Although the frogmen looked strange, they were very polite.

Tang Zhen looked at the lonely swamp Frogman and asked, " now that your home no longer exists, where will you go? "

The swamp Frogman sighed helplessly at those words, and said in a dejected tone, " "Now that things have come to this, we can only wander around. I hope we can find a similar land so that my people can continue to live!"

"In that case, are you able to stay in the water for a long time? do you know how to breed fish?" Tang Zhen nodded and asked.

The swamp Frogman nodded and said to Tang Zhen,"In fact, we've been living in the water all the time. We usually rely on breeding and catching fish and shrimp for a living!"

"How many clansmen do you have left?" Tang Zhen asked.

"Why do you ask?" the swamp Frogman asked.

Seeing the swamp Frogman looking at him warily, Tang Zhen smiled and explained, "I'm the city Lord of the human race's loucheng. It's only a day's journey from here.

There are two huge lakes in my city, and I've been thinking about whether I should use them to raise fish.

It's a pity that I don't have the manpower to do so, so I haven't put this plan into action.

If you can help me breed fish, I can provide shelter for you and allow you to become an honorary resident of Lou city.

This is my condition, can you consider it?"

Tang Zhen looked at the swamp Frogman, waiting for its reply.

The encounter with the swamp frogmen was purely an accident, but after Tang Zhen confirmed their abilities, he immediately had the intention to hire them as fishermen.

The two lakes in the Holy Dragon City could breed a large number of fish. If they were successful, they would definitely become another source of food for the Holy Dragon City.

As the Lord of a city, Tang Zhen had no choice but to consider these people's livelihood problems.

The swamp Frogman's heart was in a mess. It was moved by Tang Zhen's suggestion, but it was also afraid that its people would be deceived, which made it walk around.

After thinking for a long time, the swamp Frogman came to a sudden realization that he had to discuss this with his clansmen.

Looking at the swamp frogmen that were croaking together, Tang Zhen told Qian Long and the others not to worry as he waited for the results of their discussion.

After about ten minutes, the chief-like swamp Frogman walked towards Tang Zhen and said with his mouth open,"After some discussion, our clansmen have decided to go to your tower to take a look first before deciding whether or not to accept your employment!

Please forgive us for being so cautious, but the swamp frogmen have suffered too much damage. We would never enter a human's city if we were not at a dead end!"

After saying this, the swamp Frogman bowed to Tang Zhen.

This was a communication method taught to them by their ancestors. It could express their goodwill.

Tang Zhen was naturally very happy to hear the reply from the swamp Frogman.

He believed that the swamp frogmen would definitely like Holy Dragon City when they arrived.

Once the swamp frogmen settled down, the Holy Dragon city's plan to rear fish in the lake could begin.

After the two of them exchanged a few more words, Tang Zhen contacted Tai Seng again and got him to drive the swamp frogmen to Holy Dragon City.

Due to the appearance of the swamp frogmen, Tang Zhen had no choice but to temporarily stop hunting the water monsters and began to talk to the swamp frogmen.

The swamp Frogman that was conversing with Tang Zhen was indeed the tribe leader of this small foreign tribe. However, it had only been a short while since it became the tribe leader. Including today, it had only been five days.

The old chief of the swamp frogmen had been treated as breakfast by a water monster five days ago.

Along with the old chief, more than twenty swamp frogmen Warriors had also died.

The weak swamp frogmen had no chance of fighting back against the giant water monster.

Only the old, weak, sick, and disabled were left in the swamp frogmen tribe.

This was also one of the reasons why the swamp frogmen were so eager to leave. If they hesitated any longer, the swamp frogmen might be exterminated.

Although it was risky to go to Tang Zhen's Tower, it was much better than annihilating his entire family. At the very least, there was still a glimmer of hope!

As the two sides conversed, Tang Zhen also checked the weapons used by the swamp frogmen.

This kind of blow dart was made from a hollow bird's leg bone. It was smooth and round, and felt very good to the touch.

The swamp frogmen raised a type of small lizard and scraped off a slimy substance with numbing effects from the lizard's body, before applying it to the meticulously polished bone spikes.

These bone spikes were very sharp, but when they hit an armored target, they would not be able to cause obvious damage.

This was a timid, simple, and even somewhat pitiful alien tribe. Compared to the black-feathered Birdmen and kobolds, their lives were simply terrible!

If they had not been lucky enough to meet Tang Zhen, the group of swamp frogmen would have been wiped out of this wilderness forever.

?

Chapter 249: Frogmen's new home, a bright moon that fulfills dreams

By the time Tyson arrived at the lake, it was already a few hours later.

The swamp frogmen were all surprised to see the large modified military truck, and they all gathered in front of it and pointed.

To these swamp frogmen who had lived their entire lives in the swamps, the Holy Dragon city's means of transportation were so magical. For example, this car that could run on its own and the armed helicopter in the sky.

As the leader of the swamp frogmen shouted, a group of swamp frogmen stood up from a puddle in the distance.

They were all camouflaged in the grass as they walked over carefully.

Tang Zhen looked around and realized that most of the swamp frogmen were children who were not even a meter tall.

After calling the swamp frogmen to board the car, the armed helicopter led the way, and the group headed straight for Holy Dragon City.

The chief of the swamp frogmen sighed in his heart as he felt the jolts of the car and saw the uneasy expressions on his tribesmen's faces.

He hoped that the human city Lord was not lying to him, or the swamp frogmen would really have no way out.

Many years ago, their ancestors had gone through great hardships, travelling to the corners of the wilderness and sacrificing countless clansmen before they found a swamp that could barely survive and reproduce.

It was a pity that this home no longer existed. Perhaps it could only appear in his dreams.

When the car finally stopped jolting, Tang Zhen's voice came from outside, informing the swamp frogmen that they had arrived at their destination.

The chief of the swamp frogmen was the first to jump out of the car, but before it could even stand still, it was attracted by a huge Lake in front of it.

The lake water was extremely clear and shimmered with light. It was exceptionally beautiful under the setting sun.

Such a vast water surface could not be seen at all in the swamp, and the quality of the water was also very different.

The swamp Frogman chief was deeply captivated by the beautiful scenery in front of him, and could not help but throw away the grass camouflage on his body and jump into the lake.

Perhaps it was because of their talent, but the swamp frogmen were extremely fast. In the blink of an eye, they had already covered a distance of nearly a hundred meters.

After swimming around the lake, the swamp Frogman tribe leader walked out of the lake and shouted excitedly to Tang Zhen, "Oh my God, this place is simply too beautiful. You really didn't lie to me!"

Tang Zhen nodded and said to the swamp Frogman tribe leader, now that you've seen the lake, are you ready to accept my employment?"

The chief of the swamp frogmen nodded furiously, "of course I am. At the same time, I would like to thank you on behalf of my people!"

The swamp Frogman chief bowed deeply to Tang Zhen, while the other swamp frogmen beside him also bowed with gratitude.

Tang Zhen nodded. welcome to the Holy Dragon City. From now on, you will be the honorary residents of the Holy Dragon City. You will manage the two lakes in the valley.

The swamp Frogman chief called for his clansmen to throw away their grass disguises and go into the river to wash off the mud on their bodies. He turned to Tang Zhen and said, city Lord, although this Lake is beautiful, it lacks the aura of life. I can't wait to rear a school of fish here.

I'm so excited just thinking about the schools of fish swimming in this Lake!

I'll have to trouble you with this. I'll arrange for a few soldiers and a vehicle to transport the fish. You can use it to find fish in the wilderness.

As Tang Zhen spoke up to this point, he turned to look at the swamp Frogman tribe leader. if you need anything, you can just tell me. Is this arrangement okay? "

no problem. We swamp frogmen can smell water and fish from far away, so you can rest assured in searching for baby fish!

The swamp Frogman tribe leader had a face full of confidence as he promised Tang Zhen.

"In that case, I'll be waiting for your good news."

Tang Zhen glanced at the swamp frogmen swimming in the lake. A trace of a smile appeared on the corner of his mouth as he turned around to make other arrangements.

He first assigned a few Warriors to protect the swamp frogmen and search for edible fish, before selecting a shrewd and experienced resident to communicate with the swamp frogmen.

Whether or not he could have an adequate supply of fish in the future would depend on these swamp frogmen, so Tang Zhen had to make proper arrangements.

After a simple dinner, Tang Zhen once again headed to the mother tree to check on the cultivation progress of Li Sha and the others.

Tang Zhen had always valued the mother tree's ability that Lisa and the others had mastered. This was because this would be one of the powerful guardians of the Holy Dragon City in the future.

A large group of children were sitting cross-legged around the beautiful mother tree under the night sky. A rough estimate showed that there were seven to eight hundred of them.

These children were the survivors of Black Rock City. According to Tang Zhen's orders, they had to come to the mother tree every night and try to communicate with it.

Once someone successfully communicated with the mother tree and obtained the mother tree's abilities, they would immediately be able to become a resident of Holy Dragon City. Their family members would also be qualified to become reserve residents.

Up until now, there were five people who had successfully communicated with the mother tree and obtained different abilities.

Out of the five abilities of the mother tree, two were offensive and three were support-type abilities.

One of them was an attack-type ability of the mother tree, which could summon countless black spikes around it. The spikes were 1.5 meters long and were extremely lethal.

Tang Zhen gave it a try and discovered that the hardness of this black spike was extremely high. It was not inferior to steel!

So far, the number of residents in Holy Dragon City who had mastered the mother tree's abilities had reached nine, and he believed that the number would continue to increase in the future.

After silently watching for a while, Tang Zhen planned to go back and rest.

Just as he turned around, Tang Zhen discovered that the half-elf, yuemang, was standing not far away. He was staring at Lisa, who was communicating with the mother tree.

Seeing his intoxicated expression, Tang Zhen could not help but secretly guess. Could it be that this guy had fallen in love with Lisa?

Tang Zhen slowly walked to Yue Lang's side and asked with a teasing expression, "I say, What are you looking at? it's as if your soul has left your body."

Yue lang was startled. He turned his head to look at Tang Zhen and slightly bowed. After which, he looked at Li Sha and said, sister Lisa is so beautiful. I'm so envious of her!

"Envy? isn't that like?" Tang Zhen was startled and asked curiously.

Yue lang shook his head and said with a trace of desire in his voice, I don't like you, I'm just envious. It's so blissful to be a woman!

it's a pity that I have an appearance that even women envy, but I'm a pure man. This is the most painful thing for me.

After saying this, Yue lang sighed slightly and lowered his eyes, appearing extremely moving under the moonlight.

Tang Zhen felt a chill in his heart. Just as he was about to distance himself from this damned trap, a thought suddenly appeared in his mind, causing an evil smile to appear on the corner of his mouth.

Tang Zhen cleared his throat and said to Yue lang, "Are you sure you don't regret turning into a woman?"

Yue Lang's big eyes were full of charm, and he asked full of doubt, "Why should I regret it? becoming a woman is my greatest wish!"

Tang Zhen nodded and said with an affirmative tone, "In that case, I can help you realize your dream."

Yue Lang's face was filled with surprise and shock as he asked, "City Lord, is what you said true? you're not lying to me?"

"Of course I'm not lying to you, but before that, you must first tear this card!"

Tang Zhen took out a card from his storage space and carefully handed it over to Yue lang, afraid that he would break the card!

?

Chapter 250: Magical card, upgrade to Overlord

This was a special card that had been obtained by Tang Zhen a long time ago, but it had always been carefully kept by him.

Because of this card's heaven-defying effect, Tang Zhen really didn't dare to touch it easily, for fear that he would accidentally lose his little brother.

Now that he had encountered Yue lang, this strange guy, Tang Zhen immediately took out the card to give him a favor and threw away this hot potato at the same time.

permanent sex change card. You can change your gender immediately after tearing it open. It's a product exclusive to the lucky Wheel!

This was the prize that Tang Zhen had won from the lottery. Tang Zhen had always regarded it as something of little value, but now it finally had a place to put it to use.

Yue lang doubtfully took the card from Tang Zhen's hand. After carefully sizing it up, he raised his head and said to Tang Zhen, "Are you sure I can become a woman after tearing this card?"

"Tear it open first and see if it has any effect!" Tang Zhen nodded and egged him on.

Yuelang looked at Tang Zhen's expressionless face, which was actually trying to hold back a smile, and reached out to tear the card.

As the card shattered, a ray of seven-colored light flashed and enveloped Yue lang.

Tang Zhen's eyes were fixed on the ball of light. He did not dare to miss even the slightest change.

In less than a minute, the ball of light disappeared, and Yue Lang's figure was revealed.

It was just that the current Yue lang had changed quite a bit. His skin was more delicate and fair, the lines of his face were more gentle, and his every movement had a strong charm.

that's it? there's not much change? "

Tang Zhen frowned. He extended his hand and rubbed his chin as he looked at Yue lang and asked doubtfully.

Because yuemang originally looked exactly like a woman, even if he used the [permanent sex change card], he still needed to look carefully to find the subtle changes.

"I wonder if there's any change in those places?"

Tang Zhen swept his eyes over Yue Lang's graceful body and began to laugh with ill intentions.

Different from Tang Zhen whose mind was filled with wild thoughts, Yue lang was already so excited that he was about to go crazy.

She kept touching her body, feeling the changes in the subtle parts, and finally confirmed that she was not dreaming.

city Lord, I really turned into a woman! I'm not dreaming!

Yue lang excitedly shouted. He grabbed Tang Zhen's big hand and placed it on his chest.

"Touch it and see, it's real!

I've really become like big sister Lisa, a beautiful woman!"

Tang Zhen's large hand gently grabbed Yue Lang's chest. Uh, it was very majestic!

After he removed his palm, Tang Zhen was planning to ask a few more questions when he saw Yue lang impatiently running towards Lisa with a face full of joy.

Tang Zhen scratched his head as he looked at Yue Lang's incomparably alluring back. He felt that his world view was showing signs of collapsing.

He quickly shook his head and drove those messy thoughts out of his mind.

After returning to his room, Tang Zhen took out a stack of books and began to read them seriously.

Early the next morning, Tang Zhen called Qian Long and the others to continue flying the military helicopter and killing monsters to level up.

The military helicopter whistled through the air above the winding river, and under the envious gazes of the crowd, it flew into the distance.

A giant water monster that was breathing on the surface of the water saw the attack helicopter. It opened its mouth and roared angrily, at the same time, it jumped up with great force.

It looked like it was going to bite the plane in the sky!

Qian Long maneuvered the assault Helicopter up while Tang Zhen casually took out a metal javelin and threw it at the Hydra's mouth.

The metal javelin had been modified. After it hit the Hydra's soft jaw, it immediately exploded, blowing the Hydra's mouth into pieces.

The water monster that was shot by Tang Zhen howled in pain. Its huge body fell to the bottom of the river, causing a large amount of water to splash.

Ignoring the escaping water monster, Tang Zhen turned to Qian Long and said, these modified metal javelins are quite powerful. I'll inform Lu Da later and ask her to make more and give them to the Warriors who are hunting the water monsters.

After saying this, Tang Zhen began to stare at the river and continued to search for traces of the level 5 water monster.

One, two, three Suan ni

On a muddy ground, Tang Zhen waved his alloy sword and chopped a giant squid-like water monster into pieces.

Letting out a long breath, Tang Zhen slowly sat cross-legged on the ground. A powerful force filled his body.

This power was like flowing Mercury, constantly swimming in his meridians, repeating itself.

Tang Zhen had a feeling that this energy had already been compressed to the extreme. Once it was ignited and released, it would erupt with an incomparably terrifying destructive force!

Finally, he had advanced to the Lord-tier!

Tang Zhen's body started to be transformed by this power. His body had undergone an obvious change.

A faint pressure spread out. This was the aura of a Lord-tier creature, causing Qian Long and the others to be secretly shocked!

At this moment, their breathing became rapid, and they couldn't exert any strength in their bodies. They felt as if they were buried deep in the soil and couldn't escape.

The power of a horde leader was so terrifying!

After a long time, Tang Zhen slowly stood up from the ground. Under the shocked gazes of Qian Long and the others, he took out his gun and aimed it at his arm.

"Bang!"

After a gunshot, Tang Zhen's skin did not suffer any damage. The defensive strength of his physical body was extremely shocking.

After seeing this scene, Tang Zhen's brows slightly furrowed. He took out his automatic rifle and continued to shoot at his arm.

After the gunshot, Zhen Tang's arm was damaged. However, compared to the power of the rifle, this kind of injury was nothing.

Tang Zhen's brows furrowed even more tightly. He took out the purple lightning short sword once again and slashed at his arm.

Fresh blood slowly flowed out. Tang Zhen's skin had been cut open by a sharp blade, but the wound wasn't very deep.

Tang Zhen took out the Ivy ointment and applied it on his wound. He slowly raised his palm and waved it in front of him.

"Swish!"

The Hydra's body was split into two, as if an invisible blade was slashing at the monster's body!

Tang Zhen could sense the energy within his body gushing out from his palm. After which, it suddenly exploded and transformed into an invisible and terrifying force.

This was the power of a horde leader. When facing low-level cultivators, killing them was like slaughtering pigs and dogs!

After experiencing the strength of a horde leader, Tang Zhen felt a trace of worry.

Lord-tier creatures were extremely powerful, and their bodies were also shockingly tough. Normal rifle bullets could only leave insignificant wounds.

Only powerful weapons like cannons and missiles could pose a threat to a Lord-tier creature!

if the Holy Dragon City wants to continue developing, it must be equipped with more powerful weapons. Only then can it ensure that it is undefeatable!

Heavy artillery, tanks, planes, rockets, and laser weapons!

These weapons and equipment could deal damage to Lord-tier creatures, but compared to firearms and weapons, whether it was the difficulty of operation or the logistics supply, they were all several times more difficult!

In addition to these weapons from the original world, demon weapons could also cause obvious damage to Lord-level creatures. It was just that Tang Zhen had never paid too much attention to it in the past.

The demonic soldiers' equipment that he had obtained from the treasure vault in Black Rock City was still in a corner eating dust. Other than a small number of equipment for the cultivator battle team members, the rest was rarely taken out and used.

"It seems like I need to find some time to talk to the dwarf, hammer, and figure out the forging method of the magic weapons. At the same time, I need to make a batch of standard equipment!"

If we can combine the characteristics of the demon weapons with firearms, we might be able to greatly increase the power of firearms. Then, ordinary firearms won't have to face the fate of being eliminated!"

After thinking for a long time, Tang Zhen jumped into the military helicopter and flew over the wide river, heading straight for the Holy Dragon City under the setting sun!
