

Alternate 251

Chapter 251: The story of the rock

Stone waved a small knife and scraped off the scales of a big fish in his hand. Then, he took out the internal organs and threw them into the bucket.

It was said that these organs would become food for the ogres, so they couldn't be wasted.

After smearing the fish meat with coarse salt, Shi TOU placed it in a big basket at the side. Soon, someone carried it away.

The fish meat would be dried and stored in the cave.

After processing a batch of fresh fish, stone wiped the sweat on his forehead and turned to look at the side.

Many of the survivors of Black Rock City, like him, were buried in their work, dissecting and processing countless fish and shrimp.

"With this food, we don't have to worry about hunger anymore, right?"

As Shi TOU thought of this, he felt an inexplicable sense of happiness in his heart.

They were not residents of Holy Dragon City yet, but the city Lord had already promised that as long as they performed well, they could obtain the qualifications of reserve residents!

Although he was once a resident of Black Rock City, stone did not feel very happy. Instead, he felt a slight sense of depression.

In a place like Black Rock City, all the good things were controlled by the rich and powerful. The ordinary citizens could only barely fill their stomachs and work day after day, living like The Walking Dead.

There, you would never feel any hope, only confusion and loss.

Stone didn't know why the Wanderers outside envied the residents of loucheng. Was it because they didn't have to worry about starving to death?

During the period when Black Rock City was besieged by the undead, stone saw many acquaintances disappear from his life.

Some of them had died in battle, while others had starved to death. The food exchanged on the cornerstone trading platform was controlled by the rich and powerful, and would not be distributed to the hungry citizens of Black Rock City.

When stone was on the verge of starving to death, Black Rock City was burned down. He struggled to escape with his remaining physical strength and was later captured by the Allied forces of the three cities.

Looking at the Black Rock City that had been burned to the ground, stone did not feel any sadness, because that place only had painful memories.

Just as stone thought that he was about to wander in the wilderness or be killed by the Allied forces of the three cities, the convoy of Holy Dragon City appeared and rescued them.

The Holy Dragon city's fully armed soldiers, the spectacular convoy, and the incomparably powerful city Lord all made stone feel like he couldn't resist.

After witnessing the death of the city Lords of the three towers and the powerlessness of those who resisted, stone knew the final outcome.

This was a powerful enemy. The four towers, including Black Rock City, were no match for him!

A bowl of porridge from the Holy Dragon City had saved Shi TOU's life, giving him a chance to live again. This also made Shi TOU extremely grateful to the Holy Dragon City.

After a long journey, Shi TOU finally arrived at Holy Dragon City.

Looking at the Holy Dragon city's tall city walls and the heavenly scenery inside the city walls, stone suddenly had an impulse. How good would it be if he became a resident of the Holy Dragon City!

After entering the Holy Dragon City, the days were busy but simple. He was busy from morning to night, but stone felt particularly fulfilled.

Here, one didn't have to worry about going hungry, and there was no bullying from the rich and powerful. One could also see many things that they had never seen before.

Every day, after stone finished his work, he would go outside to see the mother tree under the night sky. The guards would never stop him.

After a while, stone became familiar with the guards. From their mouths, stone learned more about Holy Dragon City.

The Holy Dragon city's city Lord was very powerful and had an extremely mystical ability. It was said that he could move a small mountain in an instant.

The Holy Dragon city's weapons were very powerful. The Holy Dragon City had killed more than two hundred of the four-legged flying dragons that were imprisoned in the valley. Their blood had dyed the city walls dark red.

The Holy Dragon city's benefits were very good. Not only could they eat their fill and wear warm clothes, but they also gave out many free items, all of which were brand new!

The more he knew about the Holy Dragon City, the more stone desired to become a resident of the Holy Dragon City.

Just as stone was letting his thoughts run wild, a Holy Dragon City soldier walked over. He held a tube that could produce a very loud voice and began to speak from a high place.

"Attention all citizens of Black Rock City. The governor is going to form a new army and will be selecting soldiers from all the citizens of Black Rock City.

As long as they were successfully selected, they could obtain the qualifications of a reserve resident of Holy Dragon City. If they performed well, they would be directly promoted to an official resident. Their family members could also obtain the qualifications of an official resident!

Those who want to participate in the selection, report to me and take the test tomorrow.”

Listening to the Holy Dragon City warrior’s explanation, stone’s eyes grew brighter and brighter. When the queue for registration was announced, he was the first to rush forward.

.....

Early the next morning, Shi TOU and a large group of people walked to the back Valley and began the selection test.

The one in charge of the selection was the Holy Dragon city’s Army’s chief. It was said that his name was Tai Seng, and he was a very powerful cultivator.

After nearly half a morning, stone was so tired that he could barely stand up. Finally, he passed the test.

From now on, stone had obtained the qualification of a reserve resident. After the next upgrade, he would become an official resident of the tower.

There were a total of 500 people who had passed the test, and they were led by Tai Seng to a cave.

Under the command of a beautiful woman, Shi TOU and the others carried out many weapons and armors from the cave, as well as new clothes and shoes.

Stone looked at the beautiful woman and felt his heart beat fast, but he didn’t dare to let his thoughts run wild.

I heard that this beautiful woman is called Murong Ziyang, and she’s the city Lord’s woman.

Several times, she was seen walking into the city Lord’s room in the middle of the night, and only walked out of the room with a tired expression after dawn.

Stone felt that this was a very normal thing, because this woman was in charge of all the supplies in Holy Dragon City. It was a matter of great importance, so the city Lord naturally had to hand it over to the people closest to him.

The city Lord’s woman was naturally someone close to her!

After throwing away the random thoughts in his mind, stone turned to look at the weapons and equipment he had been given.

There was a steel sword, a strange-looking dagger, a set of armor, clothes, and shoes.

They were all brand new things that could be changed from the inside out.

even the most elite warriors in Black Rock City can’t get such equipment. Holy Dragon City is indeed rich!

Stone was a little disappointed that he didn’t get the automatic rifle, but he knew that it couldn’t be given out casually.

This was an extremely powerful weapon. Not only was its destructive power shocking, but it was also extremely expensive. It was said to be worth thousands of brain beads!

When Shi TOU first heard the price, he was immediately shocked. When he looked at the guns again, it was as if he was looking at a pile of shiny brain beads.

Putting on his clothes and armor, and hanging his weapon on his waist, stone felt that he had never been so majestic before. He kept his chest out and his head up as he walked.

Looking at the envious gazes of the Black Rock City survivors around him, stone felt extremely proud.

Because from today on, he had also become a member of the Holy Dragon City!

?

Chapter 252: A barbecue party by the river

Tang Zhen hummed a little tune as he walked on the road. Behind him, Murong Zi Yan and dozens of people were slowly walking out of the Holy Dragon City.

From time to time, the Holy Dragon city's residents would bow to Tang Zhen, their faces filled with respect.

Looking at Tang Zhen, who had a satisfied expression and was wearing a set of loose clothing, the residents felt a little strange. Why was the city Lord so leisurely today?

Looking at the group of people behind him, all of them were important figures in Holy Dragon City, as well as their respective families.

Looking at their clothes, they seemed to be going out of the city to play, right?

When the Holy Dragon city's residents saw Tang Zhen, he would usually be in a hurry, often so busy that his feet would not even touch the ground, wishing that he had a clone to help.

This was the first time he had put down his work to go out and play!

Perhaps the city Lord was tired, so he decided to take a rest!

When the residents thought of this, they sincerely hoped that the city Lord would rest for two more days and not be too tired.

Tang Zhen indeed didn't have any urgent work today. Therefore, he chose to rest for a day.

Everything that needed to be done in the Holy Dragon City had been arranged properly. Tang Zhen only needed to find time to patrol.

Tang Zhen's hands were also a little itchy after seeing the bustling fishing scene a few days ago. He planned to play for a while.

Unlike the fishermen who were purely fishing, Tang Zhen just wanted to take the opportunity to rest and have a barbecue.

It just so happened that the new residents needed to be communicated with, so Tang Zhen simply called all the Holy Dragon city's higher-ups to go to the river to relax!

The pickup truck that followed behind them had a large pile of barbecue supplies.

After arriving at the Riverside, Tang Zhen and the rest found a quiet and clean place and began to get busy.

Tang Zhen did not intend to use a fishing rod to fish. Instead, he took out a bow and arrow from his space and began to aim at the fish in the water.

The mo battle bow he was using had a special line wheel attached to it. A high strength fishing line was connected to the arrow to ensure that it could be quickly retracted after being shot.

Simply put, this was a bow that had been modified by Tang Zhen and was specially used to shoot fish!

In addition, there were more than 20 ordinary bows and arrows in the pickup truck, which were also fixed with special release wheels.

Tai Seng, Qian Long, and the others didn't need to be called out as they all put on their polarized glasses and ran to the riverbank to shoot fish.

Tang Zhen stood alone on the shore and slowly pulled the demon bow in his hand.

With the activation of the application, the river water was immediately blocked and filtered. Tang Zhen began to scan the river in front of him and chose the fish and shrimp that were suitable for eating.

Previously, when Arel was distinguishing the edible fish with his clansmen, Tang Zhen was watching from the side and remembered a few of the delicious fish and shrimp.

Tang Zhen had once tasted these fish and prawns. That kind of fresh and delicious taste almost made him bite off his tongue. It was still fresh in his memory.

What Tang Zhen needed to do now was to search for those few types of fish in the river and have a good meal.

However, according to Arel, those fish were rare even in the Starfall sea. They were sold at high prices, and ordinary people would not be willing to eat them.

Tang Zhen secretly prayed in his heart. He hoped that his luck would be better and he would be able to catch a few to satisfy his craving.

In the field of vision, he could see everything in the river, including countless fish.

What Tang Zhen had to do was to search for the target he wanted to catch among the large and small fish and shrimp.

For some unknown reason, the magic-eye Tyrannosaurus drove away countless water monsters, as well as countless ordinary fish and shrimp, to the hole in the sky.

perhaps the demon-eye Tyrannosaurus wants to rely on these water monsters to achieve some kind of goal. These ordinary fish and shrimp are just food for the water monsters? "

Tang Zhen had a faint guess in his heart, but he did not dare to confirm it.

However, the demon-eye Tyrannosaurus could never have imagined that the water monsters, fish, and shrimp it had used to carry out its plan had now become the Holy Dragon city's food reserves!

Tang Zhen might be the nemesis of these people.

Whether it was the spirit brain corpse King or the demon Eye Tyrannosaurus, Tang Zhen had once destroyed their plans, intentionally or unintentionally!

Tang Zhen had never dared to take the demon-eye Tyrannosaurus lightly.

According to Tang Zhen's guess, when a monster reached the king tier, it would mean that it had entered a new height of life. Its intelligence would also be greatly improved.

The magic-eye Tyrannosaurus' actions were very strange. There must be a deeper meaning behind this!

It was just that his information channels were limited, so he was temporarily unable to figure out its true purpose.

It seems that I have to keep a close eye on these water monsters' movements in the future!

Tang Zhen's eyes suddenly focused when he thought of this. The bow and arrow in his hand suddenly shot out.

The sharp arrow shot into the water like a bolt of lightning and went straight to the bottom of the river, which was more than ten meters deep.

Demon weapons had extremely powerful attributes. The demon battle bow in Tang Zhen's hand was the same.

Apart from special underwater firearms, it was very difficult for ordinary weapons to penetrate the river water that was more than ten meters deep and hit a swimming fish.

However, Tang Zhen's demon weapon battle bow could do this. This was why he used this weapon.

In the clear salty river, a foot-long fat fish with a translucent body was slowly swimming, not aware of the approaching danger.

"Pfft!"

A sharp arrow suddenly fell from the sky and pierced through the fat fish's body.

"Haha, we hit the target!"

Due to the use of the water shield, Tang Zhen completely did not need to consider the problem of refraction and directly hit the translucent fat fish.

He quickly retracted the fishing line wheel. The fat fish that was struggling on the brink of death quickly left the water surface and fell into Tang Zhen's hands.

"Ziyan, try this fish!"

Tang Zhen removed the sharp arrow and took a military knife from the folding table at the side. He quickly broke it down into countless pieces of thin skin.

Tang Zhen picked up a thin piece of fish and brought it to Murong Ziyang's mouth.

Murong Ziyang gently opened her small mouth and put the fish slice in Tang Zhen's hand into her mouth. At the same time, she also sucked on Tang Zhen's finger without leaving a trace.

Her charming eyes were like silk, and the affection in her eyes was unconcealed.

However, she was soon attracted by the deliciousness of the fish and praised, "the fish melted in my mouth. It's so delicious!

Hearing this, Qian Long immediately came over and placed a piece of fish into his mouth before giving him a thumbs up.

"Haha, I also shot one!"

Not far away by the river, Tai Seng, who was wearing a pair of polarized glasses, was constantly retracting his fishing line as he shouted.

Looking at the tension of the line in the water, it was obviously a big fish.

It didn't take long before a big, round fish was pulled out of the water by Tai Seng, still struggling non-stop.

Tai Seng flicked his finger lightly at the fish's head, and the fish was immediately killed, being carried in Tai Seng's hand.

Arel walked in front of Tyson and looked at the one-meter-long fish, "This fish tastes good, but it's not as delicious as the one that city Lord shot!"

Because of Arel's strange accent, it took Tyson several times to understand the meaning of his words.

"It's fine, as long as it can be eaten!"

let's go! Tai Seng waved his hand heroically and passed the big fish in his hand to Xiao Rui, who was beside him, and then continued to search for other fish in the water.

Mr. MoRun was fiddling with the barbecue rack, turning pieces of roasted meat over and over. Soon, a fragrant aroma filled the air.

When he was young, he had roamed the wilderness and had barbecued food in the wild countless times, but that was only to fill his stomach.

It was the first time he had come into contact with a barbecue method like today, which had all the ingredients and tools, so he was very excited.

The little ones ran over from time to time and secretly took a skewer of roasted meat. Mo ran never stopped them, but just watched them silently with a smile on his face.

Such a pleasant life was his lifelong pursuit!

?

Chapter 253: The beginning of! great development

After shooting a few rare fat fish, Tang Zhen passed the bow to a strong man beside him.

This person was one of the Wanderers that Tang Zhen had rescued from the insect thieves 'lair. He had already obtained an important position in the Holy Dragon city's Army with his own abilities.

Stepping on the fine gravel, Tang Zhen walked to mo ran's side, picked up a skewer of roasted meat, and tasted it.

"Your cooking skills are not bad. The roasted meat is delicious!"

Tang Zhen gave mo Yun a thumbs up and praised him.

Mo ran smiled. He picked up the teacup beside him and took a sip before saying to Tang Zhen, "I don't deserve it. It's mainly because of the complete set of ingredients."

Tang Zhen picked up another meat skewer, but he did not immediately eat it. Instead, he said to mo ran, from tomorrow onwards, all the children in Holy Dragon City who meet the standards will begin to receive your guidance. Thank you for your concern, Sir!

Mo ran's expression turned serious when he heard this. He said to Tang Zhen, this is my job. There's no need to worry about it. City Lord, you're too polite!

Tang Zhen shook his head. He looked at the children playing by the river and softly laughed, "Mr. Murun is very experienced and has taught many disciples. I believe you understand the importance of cultivating reserve cultivators better than I do.

From the looks of it, the Holy Dragon city's forces were strong and no one nearby could defeat them, but what would happen if they walked out of this area?

Holy Dragon City was different from Black Rock City. They would not be content with staying in a corner. The most likely method to use was to expand their military power!

I even dare to say that when loucheng develops to a certain extent, the soldiers of the main battle Legion may be replaced by cultivators, and the ordinary soldiers of loucheng will gradually be eliminated!"

After he said this, Tang Zhen looked at mo ran without turning his eyes and said in a very serious tone, "Mr. MoRun, you may not have realized how important your duty is.

It might take a year, or three years. In short, Holy Dragon City would welcome a large number of new residents.

After these residents arrive, many of them will become your disciples and receive the most basic cultivation skills training!

Thus, you have a huge responsibility on your shoulders, so you must be mentally prepared."

Mo ran listened carefully and asked casually, " what is the large number of residents that the city Lord mentioned? ten thousand or more? "

Tang Zhen smiled and shook his head. He extended a finger.

Mo ran's expression became a little solemn as he slightly bowed to Tang Zhen, "Please tell me the exact number of people, city Lord. This way, I can be prepared!"

Tang Zhen hesitated for a moment before giving a conservative number, "One million!"

Mo ran was shocked when he heard this. If these words were not said by Tang Zhen, he would definitely think that the other party was spouting nonsense!

A million cultivators was a terrifying number.

Not to mention the resources required to train these cultivators, just the one million students with the talent to become cultivators alone could only be selected from hundreds of millions of humans!

A talent ratio of 1% was not something to be said casually.

However, when he looked around, mo ran couldn't even find a place with hundreds of millions of humans. The place with the most humans he had ever seen only had about 100000 people.

Even the human race's buildings that had been passed down for 10000 years only had 10 million residents and 100000 cultivators at most!

Where did the one million cultivators that the city Lord spoke of come from?

Mo ran was filled with doubts. Unfortunately, Tang Zhen didn't tell him more information and only told him to be mentally prepared.

After a while, everyone gathered around. All kinds of drinks were moved to the table, and the fragrant barbecue was also placed on the table.

With wine and food in hand, everyone was in high spirits and kept exchanging cups.

Tang Zhen was holding a cup of wine and a delicious grilled fish in his hand. His face was filled with enjoyment as he savored the fragrance of the food.

After Tai Seng and Qian Long had a drinking contest, he walked over with a red face. From his expression, he must have gotten Qian Long drunk again.

In this aspect, Qian Long had never won.

Picking up a grilled fish skewer, the two of them sat on the chairs by the river. Tai Seng looked at Tang Zhen and said, " "City Lord, the Army is ready. We can start tomorrow!"

When Tai Seng said these words, there was not a trace of drunkenness on his face, and he appeared to be unusually serious.

Tang Zhen expressionlessly drank a mouthful of wine before turning to look at Tai Seng, " remember what I said. Holy Dragon City doesn't need citizens who have second thoughts. When you lead your troops to take over the resources of the four towers, you will act according to this standard!

Tai Seng nodded his head, but his eyes were cold.

As the Holy Dragon city's population grew rapidly, the difficulty of management also gradually increased. Those who had disloyal thoughts had to be cleared out at the first opportunity.

A thousand-mile dam could be destroyed by an ant's nest. In the face of such a matter of life and death, one must be ruthless.

After taking over all four towers, Tang Zhen was prepared to take some time to digest it and upgrade Holy Dragon City to Level 3!

At that time, they would be able to show the true strength of the Holy Dragon City to all the races in the wilderness!

.....

The next morning, more than a dozen wasteland war chariots were parked side by side in the Holy Dragon city's Square.

The survivors of Black Rock City who passed by pointed and discussed. The captives had complicated expressions on their faces. They all knew the meaning of the wasteland war chariots leaving the cave.

This was a war machine. Once it appeared, it meant that the Holy Dragon city's war blade had once again been unsheathed.

He did not need to think too much to guess that the Holy Dragon City was going to send out Warriors to take over the wealth and resources of the defeated cities.

I hope that they will show mercy and accept the residents of this city as well. Then, we can reunite with our families!

Many of the captives were praying in their hearts. After all, their families were their only concern.

Orders were continuously passed down. Other than the Holy Dragon city's Legion Warriors, the newly established Holy Dragon city's second Legion had also finished assembling.

They would act as auxiliary troops and participate in the operation together with the Holy Dragon city's main Battle Legion.

With Tai Seng's command, the convoy slowly drove out of Holy Dragon City, heading straight for colossal bone city and hundred Flower Valley.

As for the other two towers, they would have to see if the river blocked their path before making a decision.

Tang Zhen looked at the Holy Dragon city's Army through the map's view. Only then did he turn his gaze back to the map in front of him.

&Nbsp; Tai Seng's operation this time would take about three days. During this period, he would keep in contact with the Holy Dragon City and could request for military helicopter support at any time.

Based on the speed of the assault Helicopter, it would reach the target in less than an hour.

With such a method, Tang Zhen could guarantee absolute control of the 100-kilometer area, leaving no place for the monsters and the Raider group to hide!

This was also one of the things that Tang Zhen wanted to do. It was to completely clean up the area within 100 kilometers and turn this place into a Pure Land.

The reason why Tang Zhen wanted to do this was to provide security for the supermarket he was going to build and the business groups that came to trade.

According to Tang Zhen's plan, after Lou Cheng was upgraded to Level 3, the Super market in Holy Dragon City would also officially open!

?

Chapter 254: Holy Dragon city's commercial district

A week later, in a certain area of the Holy Dragon City, there was currently a huge construction going on.

The construction site was bustling with people, busy figures everywhere, and cars would roar past from time to time.

This was a newly added piece of land that was originally part of the gravel plain.

Tang Zhen once again used the [map transformation plug-in] and circled a large area of land into the sacred Dragon Valley.

There were three areas in Holy Dragon City at the moment. They were the original location of the valley where the main and auxiliary cities were located, the back Valley that was used for planting, and the newly added commercial area.

This construction site was the commercial district that the Holy Dragon City was currently building. It was separated from the residential district and belonged to a different area.

When this place opened for business, all business groups that came to the Holy Dragon City to trade would enter this area to purchase all kinds of goods sold in the Holy Dragon City.

Goods from other places would also be traded here.

In order to build this commercial area, Tang Zhen had invested a large number of brain pearls and resources. Just the number of brain pearls consumed by the terrain transformation alone was over three hundred thousand!

Fortunately, after the last attack on the corpse race, Tang Zhen's pocket became more and more full, and he could completely cope with this kind of consumption.

It was because of these efforts that the commercial area was built to be magnificent. One would be deeply shocked at a glance.

The power of cell phone applications was once again displayed perfectly.

The wide and flat streets, the tall houses transformed from rocks, and the dense caves in the rock walls were all prepared for this commercial district.

Thousands of Black Rock City's survivors were using all sorts of tools to make the place even more perfect and neat.

Tang Zhen walked on the rocky road that was built using the [terrain transformation plug-in] with his hands behind his back. He would occasionally look at the buildings on both sides of the road.

Because of the deliberate adjustment, the buildings in the commercial district were extremely tall. The huge square in the central area was not inferior to the Holy Dragon City square.

As the main buildings were made of rock, the style was very rough, and the corners were not smooth.

Such a building would give people an uncomfortable feeling.

The survivors of Black Rock City divided the work and worked together. They used tools such as hammers and metal drills to deal with the rough areas, making them look more beautiful.

Some places were even decorated with paint and cement to make it look neater and more beautiful!

Originally, from the map perspective, the entire commercial district was filled with the aura of wasteland. This was the place that Tang Zhen was most dissatisfied with.

In addition to being majestic, his own commercial district also needed to be beautiful and prosperous. However, the monotonous khaki color clearly could not meet Tang Zhen's requirements.

In order to erase the monotonous yellow color, Tang Zhen moved all the trees in a Park on the Wei Island in one breath and then transplanted them to every corner of the commercial district.

These transported trees were all decades old. Every year when they bloomed, they would attract a large number of tourists.

Tang Zhen's action of completely removing all these trees this time immediately caused a huge uproar. The media also reported it without restraint.

However, no matter how they investigated, they could not confirm who had dug up these trees. In the end, the matter was left unsettled.

Perhaps it was due to the mutation or the influence of the mother tree's ability, but the trees from the original world survived quickly after being transplanted and showed a different life force.

In less than two days after the transplantation, the branches of these trees were actually covered with flower buds, and after another night, they all bloomed.

In just a few days, the business district had turned into a sea of flowers!

Tang Zhen saw this and was amazed. He bought a large number of green seedlings and planted them in all corners of the commercial district.

A canal leading to Pearl Lake was also led by Tang Zhen to provide daily water for the commercial district to nourish the flowers and trees.

With the existence of these trees and green grass, the business district was no longer monotonous and appeared to be full of vitality.

According to the plan on the map, the business district contained many business places, such as auction houses, restaurants, hotels, and so on.

When the time came, these places would be managed by the residents of Holy Dragon City, earning a large number of brain pearls for Holy Dragon City!

In the Holy Dragon city's warehouse, there were a lot of resources stored. Many of them were things that Tang Zhen did not need. When the time came, they could all be used to trade.

Many strange items could also be sent to the auction house to be sold, and other merchant groups could also send them to the auction house.

There were also restaurants and inns that could let the Aborigines of the world of towers enjoy a different kind of enjoyment!

Only when the customers were satisfied would they pay for it, and Tang Zhen would have a large sum of money to earn!

The publicity work for the business district had already begun. Tang Zhen had spent a large number of points on the cornerstone trading platform to let many forces in the city know of the existence of the Holy Dragon city's business district.

Many buyers who were trading with Tang Zhen on the cornerstone trading platform helplessly expressed that they would send caravans to purchase after Tang Zhen announced the change in the trading method.

Although it was convenient to trade on the cornerstone trading platform, as an exclusive supplier, Tang Zhen had the right to choose the trading method. These buyers could not do anything to him.

This was the advantage of a monopoly. One could easily set all kinds of rules that benefited one.

These days, Qian Long had been flying a military helicopter to a place a hundred miles away to throw out flyers, and then left under the horrified gazes of the Wanderers and Lou Cheng's forces.

Through these flyers and attack helicopters, these buildings had the most basic understanding of Holy Dragon City!

It was only at this moment that they realized that a human city called Holy Dragon City had appeared a hundred miles away.

Although it was only Rank 2, it had conquered five towers in a row, including Black Rock City and colossal bone city!

What kind of terrifying strength was this? when people first heard it, they would think that he was joking.

However, after seeing the assault helicopters and hearing the rumors, the various forces in the wilderness had no choice but to believe it.

This Holy Dragon City indeed possessed terrifying strength, and at the same time, it had incomparably rich resources!

A strong sense of crisis hit them, making the leaders of the forces who had received the Flyers feel as if they were sitting on pins and needles. They were afraid that the Holy Dragon City would point their troops at them!

According to the information they had obtained, the Holy Dragon City had the power to easily destroy a City Tower. How could they not be afraid?

However, it was useless to be afraid of such things. At most, they could take precautions in advance and form alliances to strengthen their own cards.

Looking at the introduction of the Holy Dragon city's business district on the Flyers, as well as the dazzling array of various products, the leaders of these forces were all greatly shocked!

Should he send a caravan to the Holy Dragon city's commercial district to trade?

The leaders of many forces fell into deep thought.

In the Holy Dragon city's business district, Tang Zhen stood on top of a stone tower that reached the clouds as he carefully observed the scenery beneath his feet.

It was one of the highest points in the central area of the commercial district, which could be used to monitor the entire commercial district.

When the business district opened for business, this place would be the alert point of the business district. The cultivators stationed in the Holy Dragon City would hold guns and be on guard. At critical moments, they could directly kill the rioters.

Tang Zhen had also left a path on the surrounding cliffs that reached the clouds. He had stationed soldiers from the Holy Dragon City to guard it.

With these forces as a deterrent, it could ensure that the trading groups would not dare to act rashly.

Apart from this, Tang Zhen would also send Holy Dragon city's soldiers to patrol the area and deal with any disputes.

This was Tang Zhen's territory. Anyone who didn't follow the rules would be punished accordingly!

?

Chapter 255: Taking in the white flower Valley and battling the giant bone city

Tai Seng had already returned to Holy Dragon City two days ago, bringing back large amounts of resources and brains.

During this period of time, the loucheng Warriors returned to the Holy Dragon City one after another, bringing back a large number of loucheng survivors. There were thousands of them!

After hearing Tai Seng's report, Tang Zhen finally understood the entire process.

The Holy Dragon city's Army first arrived at hundred Flower Valley's Tower City. According to their previous agreement, they would unconditionally submit to the Holy Dragon City.

However, for safety reasons, Tai Seng ordered all the soldiers to be prepared for battle before they got close to the tower of hundred Flower Valley.

Once the hundred Flower Valley tower showed any signs of abnormality, the Holy Dragon city's Warriors would not hesitate to attack and raze that place to the ground.

However, when Tai Seng saw the hundred Flower Valley residents who had already packed up their bags and had faces full of anticipation, he knew that this battle was not going to happen.

A cultivator from Centaurea Valley walked up and bowed respectfully to Tai Seng before handing him a letter.

respected leader Tai Seng, this is a letter that our city Lord has ordered me to pass to you. Please pass it to the Holy Dragon City Lord!

Tai Seng held The Sealed Letter and asked in confusion, "Where is your city Lord? why doesn't she come out personally?"

"The city Lord has already left this place two days ago and returned to his hometown!

Before she left, she told us that we must treat Holy Dragon City as our new home and not have any other thoughts.

Holy Dragon City is more powerful than Centaurea Valley. We will definitely have a better life there!"

"Is that so? she left in a carefree manner!"

Tai Seng's mouth twitched as he looked at the crowd of hundred Flower Valley residents and said helplessly, "So you've finished organizing the supplies in loucheng?"

Hearing this, the cultivator took out another account book. this is the list of all the supplies. Please check and accept it!

what's the point of me checking? it's all up to you guys!

f * ck! Tai Seng cursed, feeling depressed that he couldn't plunder everything.

Before Tang Zhen came, he had given an order that the residents who were sincerely submitting must be appeased. He did not dare to check the luggage of these residents.

Shoving the bill into his pocket, Tyson pointed at the track behind him and said, "Do you see this route? you can walk there on your own.

I'll send someone to pick you up on the way. You'll probably reach Holy Dragon City before the sun sets!"

After Tai Seng gave a few more instructions, he ignored the embarrassed hundred Flower Valley cultivators and jumped onto the war chariot.

let's go. We're heading to colossal bone city!

Under the reverent gazes of the hundred Flower Valley's residents, the fleet of carriages left a trail of dust behind them as they headed toward the depths of the wilderness.

After another three hours or so, a City Tower built on a huge skeleton appeared in front of everyone.

It was said that the skeleton had a history of 10000 years and had not decayed even after being exposed to wind and rain. It was the remains of an extremely terrifying Super Monster.

Even now, the giant skeleton still exuded a faint aura of power, causing some low-level monsters to not dare to approach the remains.

The appearance of the city was very unique. It seemed to be made of countless white bones, and the skulls of some high-level monsters were hung on the city walls to show off the military power of the city.

Holy Dragon city's wasteland war chariots slowly came to a stop about half a kilometer away from colossal bone city.

&Nbsp; Tai Seng used his military binoculars to survey colossal bone city, and a sinister smile appeared on his face.

"Dammit, this colossal bone city really doesn't know how to appreciate favors. They've actually set up ballistae, and are going to fight to the death!

But that's good too. If I don't see some blood, they won't know how powerful I am!"

After saying that, Tyson immediately jumped into the military jeep and started to roar.

"People of colossal bone city, listen up. I am Tai Seng, the commander of the Holy Dragon city's Army. I am here to receive all the resources and residents of the city.

Your city Lord has been killed. The Warriors and cultivators are all in the Holy Dragon City.

As long as you come out obediently, I'll let your family reunite.

If you dare to resist, I will immediately attack the city.

When the city is broken through, leave no one alive!"

As soon as Tai Seng said that, a pitch-black crossbow bolt whistled through the air and suddenly shot out from the city, landing on the ground a dozen meters in front of him.

This arrow was obviously shot from a ballista, and it was very powerful. After it landed on the ground, it pierced more than half a meter deep into the soil, and the end of the arrow kept shaking.

If it landed on a human body, it would probably be cut into two immediately!

&Nbsp; seeing this, Tai Seng laughed instead of getting angry as he turned around and called out.

"Brothers, get ready to work!"

Following Tai Seng's order, the Super light howitzer was moved down and they started to make preparations for the bombardment.

On the colossal bone building not far away, a gloomy-looking young man was fully armed. He was constantly sizing up the Holy Dragon city's convoy.

This young man was the son of the city Lord of colossal bone city. When he had heard about what had happened from the soldiers of colossal bone city that Tang Zhen had released, he had immediately jumped up to avenge his father. At the same time, he had also locked up the few elders who had advocated for peace.

Although colossal bone city had suffered heavy losses this time around, with most of its armed forces being suppressed by Tang Zhen, there were still some fighting forces left in the city.

The young master of colossal bone city believed that with his own methods and the sturdiness of the city, even if the Holy Dragon City came to attack, they would definitely be defeated!

As for the flintlocks and cannons, although the young master of colossal bone city was wary of them, he did not take them too seriously, as the city was very sturdy.

In the few days before the Holy Dragon Army arrived, the young lord of colossal bone city had been preparing his troops for battle. He had vowed to let the Holy Dragon Army's loucheng soldiers have a taste of the might of colossal bone city's soldiers.

When Tai Seng had shouted earlier, the young master of colossal bone city was looking at the Holy Dragon city's abandoned earth war chariot with bright eyes. At the same time, he had ordered his men to teach Tai Seng a lesson!

Seeing how the Holy Dragon city's soldiers became busy after Tai Seng stopped shouting, everyone knew that they were preparing to attack the city!

One of the cultivators from colossal bone city stepped forward and could not help but ask, "young master, I see that Holy Dragon City is approaching menacingly. I'm afraid it won't be easy to deal with them. Why don't we, Wufu?"

"Shut up!"

The young master of colossal bone city bellowed and slapped the cultivator to the side. He cursed, "Holy Dragon City is just a second-grade city. They only managed to get away with it by relying on the advantage of the flintlock.

If we were to engage in a direct battle, our colossal bone city would be able to kill them 10 to 100 times. This is the advantage of a level 3 city against a level 2 City!

Although the difference in levels wasn't obvious, it was real. Did you think that the increase in attributes of the residents in the city was just empty talk?

Do you really think that the Holy Dragon City will follow the agreement and let you continue to be residents of the city after taking over all the supplies and residents, and not start a massacre?

If you say another word of nonsense to disrupt the morale of the Army, I will kill you immediately!"

After the young master of colossal bone city finished his sentence, he turned to look at the Holy Dragon Army in the distance and said in a deep voice, "I know you're worried that your families will be affected after the city is broken. I've already made arrangements for this matter.

All the Warriors and cultivators who participated in the battle, I've gathered your family and hid them in a safe place.

If colossal bone city fails, they will be sent to a tower a hundred miles away. The city Lord there is my uncle, and he will take care of your family.

As for the remaining residents of the city, they can only leave it to fate!"

The cultivator nodded in acknowledgment at the young Master's words, but he felt a chill run down his spine.

For the sake of his own will, he had dragged countless ordinary citizens along with him. What a sinister act this was!

Even a fool could tell how powerful Holy Dragon City was. However, the young master of colossal bone city had chosen not to cooperate in order to protect his power and wealth.

Once colossal bone city was defeated, would Holy Dragon City easily let off the citizens of the City Tower who had once resisted them?

Even though the young master of colossal bone city had arranged families for the participants, the price was to pay with their lives. Besides, was it really good to live under someone else's roof?

He said that he had arranged for the families of the participants, but wasn't this also a kind of kidnapping and threat, forcing them to fight to the death?

Why didn't they accept the Holy Dragon city's conditions? they had promised not to Rob the wealth of ordinary residents, and to give them the qualifications of reserve residents.

At that thought, the cultivator's eyes were filled with complicated emotions. He looked at the young master of giant bone city with a hint of hatred.

When no one was paying attention, he quietly retreated and slipped out of the city without anyone noticing.

?

Chapter 256: Bombarding colossal bone city

Tyson lowered his head and checked the shell. Then he turned to the machine gunner on the wasteland tank and started to roar.

"Rich Captain, you better save some bullets for me later. If you dare to pull the trigger again, I'll make you a Cookhouse soldier!"

"I don't know how to cook, so why would I be a Cookhouse soldier?"

Hearing this, the team leader's ugly face immediately drooped, and he mumbled in dissatisfaction.

damn it! Tai Seng pointed at the air a few times and cursed before turning to look in the direction of colossal bone city.

The eyesight of cultivators was very good, and Tai Seng didn't need to use a telescope to clearly see the scenery outside the building's window.

When Tai Seng saw the face of the young master of colossal bone city that was asking for a beating, he really wanted to punch out his front teeth!

"Don't cry when the cannon is fired!"

what's going on? " Tyson asked and confirmed that the light howitzer could start firing in a minute.

With the power of the Super light howitzer, it would only take a few shots to blow up colossal bone city!

At this moment, a figure rushed towards the Holy Dragon city's convoy, looking very panicked.

The Warriors of the Holy Dragon city's second Legion were in charge of keeping watch. When they saw the figure running towards the convoy, they immediately drew their battle swords and blocked it.

"I want to see your leader. I have important information to report!"

The man dressed as a cultivator from colossal bone city shouted and tried to break through the blockade. However, he did not dare to be too presumptuous under the lock-on of a few rifles.

"What's going on? why are you making so much noise?"

Tai Seng walked over and looked at the giant bone city cultivator as he said coldly, "Who are you? are you here to surrender?"

The cultivator shook his head and said to Tessen, "The young master of colossal bone city had no intention of surrendering. He kidnapped the families of all the soldiers and forced them to fight to the death!

It would be fine if they succeeded, but if they failed, the families of these soldiers would not be able to escape death!

I've already received reliable information that once the young master of colossal bone city fails to defend the city, he will retreat through a secret passage and meet up with his trusted aides.

All of the wealth of colossal bone city was in the hands of these people, and not a single brain could be found in the city.

According to the young master of colossal bone city's personality, he would definitely not bring a bunch of burdens with him, as that would slow down his escape and make it easier for him to be exposed. The best way is to silence him!"

After saying that, the giant bone city cultivator looked at Tai Seng and pleaded, "Please, please, please stop him from doing this and save the families of those soldiers!"

Tai Seng's brows furrowed slightly. Originally, he had some respect for this young master of colossal bone city who refused to surrender, but from the looks of it now, he was just a scheming fellow.

He was planning to defend if he won, and retreat if he lost!

Thinking up to this point, Tai Seng sneered. There were so many good things in the world, and all of them developed according to his wishes!

Waving his hand to summon a Holy Dragon City cultivator, Tai Seng whispered an order into his ear and turned to leave.

The Holy Dragon City cultivator walked over and asked the giant bone city cultivator a few more questions, before taking him to a pickup truck and driving toward the back of the city.

A wasteland war chariot and Troop Carrier followed closely behind, pulling dozens of Holy Dragon City soldiers.

At the same time, Tai Seng gave the order and the Super light howitzer started to roar.

"BOOM!"

A Cannonball whizzed out and hit the window of the mounted crossbow in colossal bone city.

A few of the Warriors of colossal bone city who had peeked their heads out saw a flash of fire, and then they heard a loud boom. The huge shock wave had turned the entire room into ruins.

A single Cannonball had killed more than ten Warriors of the city, blasting a huge hole in the walls of the city!

The young master of colossal bone city, who was on the other side of the wall, was so frightened by the explosion that his face turned pale, and his legs began to tremble.

The sound of a cannon rang out, and everyone trembled in fear!

At this very moment, he finally understood the Holy Dragon city's terrifying power. He had completely abandoned all his little schemes.

the Holy Dragon city's cannons are so powerful. There's no way that colossal bone city can resist them. I need to retreat quickly!

The young master of colossal bone city had just thought of this when he heard another whistling sound. It was the sound of cannonballs striking again.

The young master of colossal bone city was so frightened that his legs turned to jelly and he rolled down the stairs.

And it was this roll that had saved the young master's life!

After the Cannonball exploded, the house next to it completely collapsed. The guards who had been standing beside him were all killed by the shock wave of the explosion. Their clothes were torn and they were bleeding from their seven orifices.

A Guard's corpse happened to fall not far from the young master of colossal bone city. Looking at the Guard's tragic death, the young master of colossal bone city was completely terrified.

Hearing the continuous sounds of cannon fire behind him, the young master of colossal bone city stumbled into the secret tunnel of the city and ran with all his might.

The Holy Dragon City fired a total of ten cannonballs and then stopped firing.

Although Tang Zhen had managed to bring back a lot of shells this time, Tyson wanted to save as much as possible and only ordered the artillery to fire ten shells.

Looking at the giant bone tower that was riddled with holes, Tai Seng nodded his head in satisfaction, thinking that this was enough to intimidate the rest.

Jumping into the Jeep, Tyson pulled the horn and shouted again, "That young master of colossal bone city, are you convinced now?"

If you're not convinced, I'll give you ten more cannonballs!

Your men risked their lives for you, but you kidnapped their families. You even planned to kill them all and run away.

You're really ruthless to treat your own residents like this!

Now that you've seen the power of my cannon, do you still think you have a chance of winning?"

After Tai Seng said this, he lowered his head and took a sip of water. He planned to use the 'psychological attack' tactic he learned from the video Tang Zhen brought.

But right at this moment, someone from colossal bone city stood up and waved his arm at Tai Seng, shouting, "The young city Lord is not here, he has already run away!"

coward! after hearing this, Tyson shouted into the radio, "If that's the case, then surrender immediately and I'll spare your lives!"

The giant bone city cultivator on the other side turned around and discussed with his companions before shouting at Tai Seng, "after we surrender, can you promise that you will not punish us as per the agreement, and at the same time, promise that you will not harm the residents of colossal bone city?"

cut the f * cking crap. I'll do what our city Lord said. If you keep talking, I'll fire!

shut up! Tai Seng angrily roared and then casually threw the megaphone in his hand.

He had already made up his mind. If this group of people dawdled any longer, he would command the chariot to directly charge over.

What kind of place was the Holy Dragon City? how could it be the turn of this group of people who had lost to them to talk about conditions!

Perhaps it was Tai Seng's declaration that he was going to fire the cannons that scared the Warriors of colossal bone city. In less than a minute, a group of Warriors raised their weapons high and slowly walked towards the Holy Dragon City convoy.

Behind these Warriors were the residents of giant bone city, who were walking out one after another. They were all cowering together, their faces filled with fear.

As time passed, more and more residents of colossal bone city walked out and gathered in the open space in front of the convoy.

When no one else walked out of giant bone city, Tai Seng stood on the abandoned war chariot and began to speak to the residents of the city.

"I believe you all know of our city Lord's promise, which is not to take away your private property, and to give you the qualifications of reserve residents.

This is a good thing that can't be found even with a lantern. It's a good thing that many Wanderers dream of, but how did you do it in the end?

He refused to surrender and even used a mounted crossbow to ambush me!

To be honest, I really want to drive you all into the wilderness and let you die on your own!

However, our city Lord will not allow me to do so, because he loves the people like his children, and he is truly working hard for the prosperity of the human race!

As long as you sincerely pledge your allegiance to the Holy Dragon City from today onwards, all past mistakes will be forgiven, and everyone will be a resident of the city in the future.

If you don't want to come to Holy Dragon City, I won't force you. I'll give you a chance. Please leave immediately."

As soon as Tai Seng said this, he had a ferocious expression on his face as he glared and roared, "now, tell me, who is planning to leave? stand out immediately!

The tycoon captain's mouth twitched as he mumbled with a cigarette in his mouth, "Only a fool would stand out just from your murderous look, Yingluo."

For a full minute, no one responded.

Tai Seng then recovered his smile and laughed, "at least you're tactful. Since that's the case, go back and pack your personal belongings, then immediately head to Holy Dragon City!

Some of the residents of colossal bone city, who were worried that Holy Dragon City would go back on their word and had originally planned to leave, now secretly wiped their sweat.

Fortunately, he didn't stand up, or he would have lost his life!

Just as the residents of colossal bone city were about to return to the city to pack their bags, the sound of a car engine could be heard.

He turned around and saw the young city Lord of colossal bone city covered in blood, tied to the front of the war chariot.

Behind them were a large group of residents of giant bone city, all of them looking as if they had just survived a disaster!

?

Chapter 257: Colossal bone city is destroyed, and two cities are flooded

Upon seeing this, the residents of colossal bone city had a flash of fear in their eyes.

As the most influential figure in colossal bone city, they could not help but doubt Holy Dragon city's promise when the young master of colossal bone city was treated in such a way.

No matter what kind of person the young master of colossal bone city was, they were all on the same side. Was the Holy Dragon City starting to suppress him now?

Hmph! Tai Seng couldn't help but snort coldly when he saw the wavering gazes of the residents and walked up to the young master of colossal bone city.

Both of the young master's legs had been broken, and from the looks of the wounds, they had probably been caused by shooting.

"Come here and explain to them what's going on!"

Tai Seng called the cultivator from colossal bone city who had reported the news earlier over and had him stand on the military jeep before passing the megaphone to him.

The giant bone city cultivator waved his hand at the residents, then shouted into the megaphone, "Everyone, quiet down and listen to me!"

"Shua shua shua"

The voice from the speaker gave everyone a fright, but they quickly quieted down and looked at the giant bone city cultivator.

"You may not know this, but our young city Lord has kidnapped the families of all the soldiers and gathered them in the concave land in the back mountain.

At the same time, he had also packed up all the wealth of colossal bone city and brought it out with him.

Then, he made us fight the Holy Dragon city's Army to the death, while he abandoned everyone and sneaked away through a secret passage!"

At this point, the cultivator's eyes turned red. He pointed his arm at the young master of giant bone city and roared in pain, "In the end, as soon as this bastard got away, he ordered all the soldiers' families to be killed, not a single one!

You're simply heartless, worse than a pig or a dog!"

When the residents of colossal bone city heard this, they immediately burst into a commotion. The Warriors of the City Tower even jumped up, wanting to seek revenge on the young master of colossal bone city.

The family members of the soldiers of loucheng who had been sitting in the troop carriers also came over. They hugged their husband and son and began to cry.

“If not for Holy Dragon city’s timely arrival, I’m afraid we wouldn’t have been able to meet again!”

young city Lord, you’re so cruel. You and your father risked your life for loucheng, but this is the result!

this guy is selfish and doesn’t treat the residents as human beings. I think we should kill him directly!

“Yes, kill him!”

“Kill him!”

In the beginning, there were only a dozen or so residents of colossal bone city who were shouting to kill, but after less than ten seconds, almost all of them were shouting.

They all felt the pain of being betrayed and abandoned, and the culprit was clearly the young master of colossal bone city!

Seeing this, Tai Seng waved to the soldiers beside him and said, “Drag them to the front and kill them all!”

When the Holy Dragon City Warriors heard this, they immediately untied the young master of colossal bone city from the carriage.

At the same time, more than ten colossal bone city cultivators, who looked like dead dogs, were dragged to the open space.

These cultivators were all trusted aides of the young master of colossal bone city, and none of them had escaped.

Their families had left colossal bone city a few days ago to seek refuge in other buildings.

Under the crowd’s curses, these people were lined up in a row and knelt on the ground.

The young master of colossal bone city was still struggling on his deathbed. His hair was disheveled and his face was covered in dust as he shouted at Tai Seng, “ you can’t kill me. I’m the young master of colossal bone city, and my father is the great elder of a fifth-grade city. If you kill me, he’ll definitely not let you off!

Tai Seng was taken aback and said to the young master, “ what did you say? aren’t you the son of the city Lord of colossal bone city? how did you get a father who is an elder of a level 5 building? ”

the city Lord of colossal bone city is not my father. My father is the Grand Elder of blood Sand City. This is absolutely true!

When the crowd heard this, they immediately began to discuss with each other, their faces full of gossip.

They did not expect to learn of a shocking secret at this moment.

It would be a joke if the long-Dead City Lord of colossal bone city did not know about this!

No, if he knew the truth, it would be even more of a joke!

The cunning and Sinister City Lord of colossal bone city was actually a green hat city Lord who had been a father for many years!

Tai Seng wasn't in the mood to investigate the weird love history of the city Lord of giant bone city. A mere Grand Elder of a level 5 City Tower was also unable to threaten him.

The confidence that the Holy Dragon City had given him allowed him to be fearless of any threats from any force!

Tai Seng looked coldly at the kneeling young master of colossal bone city who was still talking non-stop and said, "Kill!"

"Don't, Yingluo!"

"Pfft!"

A group of Holy Dragon City Warriors drew their blades at the same time and hacked the back of the head of the young master of colossal bone city and the others. Blood immediately spurted out.

The young master of colossal bone city fell to the ground. After twitching a few times, he became completely silent.

Since the young master of colossal bone city was dead and all the residents had surrendered, the following matters were much simpler.

After taking stock of the goods and the number of people, Tai Seng informed the Holy Dragon City and requested for a convoy to assist in transporting the goods.

The next morning, the convoy from Holy Dragon City arrived. After Tai Seng gave a few instructions, he once again stepped onto the chariot and headed for Redwater city and earth Valley City!

The rest of the journey did not go smoothly.

When Tai Seng arrived at Redwater city, what he saw was the city that had become an isolated island in the middle of a Lake.

Redwater city was named so because it was surrounded by Redwater Lake on three sides and only had one passage. It was a natural defense.

However, it was also because of this reason that the terrain near Redwater city was relatively low. Now that there was a flood, Redwater city was immediately in big trouble.

Standing by the river and looking through the telescope, one could see that the river had already spread to the third floor of Redwater city. A water monster in the shape of a Dragon was lying on the roof of the building, lazily basking in the sun.

Judging from the current situation, I'm afraid there are no more residents in Redwater city. I just don't know if they're Dead or Alive.

Tai Seng jumped onto the military vehicle and smacked his lips, "It's a pity that those treasures in Redwater city are not fated with us!"

As he spoke, Tai Seng took out a map and pointed his finger at the map before shaking his head.

“It seems that those rats in earth Valley City will not be able to escape this time. We might have made a wasted trip!

I don't care anymore, I need to take a look before I can be at ease. Order the convoy to set off!”

The chariot slowly moved again, and then, with a cloud of dust in its wake, it headed straight for earth Valley City.

Earth Valley City was located in a rocky area full of strange peaks. There was a huge cave in the mountains, and colossal bone city was built in it.

According to Tai Seng's current understanding, Redwater city and earth Valley City should be located in an ancient river that had dried up for countless years, surrounded by low-lying terrain.

If not for the flood, these places would have been perfect for building a city!

But who would have thought that a flood would fall from the sky?

Tai Seng looked at the old river outlined on the map and then at the river outside, his brows furrowed slightly.

could it be that there's some special connection between the ancient river and the flood? ”

On his way to earth Valley City, he encountered some Wanderers, and Tai Seng ordered his men to capture them.

After a little inquiry, these Wanderers spilled everything they knew.

Originally, these Wanderers were the original residents of earth Valley City. Now, earth Valley City, which had been built in an underground karst cave, had been completely submerged, and only a small number of residents had fortunately escaped.

When Tai Seng heard this, he revealed an expression that said “I knew it.”

After ordering a few survivors of earth Valley City to lead the way and gather the scattered survivors, the convoy continued to move toward the location of Earth Valley City.

Just as the survivors had said, the sky above earth Valley City had turned into a vast ocean. Now, only a few Black Mountains were exposed above the water, and they were constantly washed away by the rapid waves.

Redwater city and earth Valley City had completely disappeared from the tower world!

?

Chapter 258: The demon-eye T-Rex's intention?

After Tang Zhen heard Tai Seng's story, he praised him and slowly opened the envelope in his hand.

This was something that hundred Flower Valley's city Lord had left for him. He didn't know what was written inside.

After opening the envelope, a stack of letter paper was pulled out by Tang Zhen. A metal plate with a strange texture was taken out and fell on the table.

This metal plate was extremely hard, but it was very light. There were two sharp characters carved on it.

Zhan Tian!

The words looked familiar, similar to the ancient language of the league, but the strokes were slightly different.

Perhaps there was some unknown connection between heaven battling city and the original world?

Recalling the words of the hundred Flower Valley's city Lord, Tang Zhen could faintly guess the use of this metal plate.

With a soft laugh, Tang Zhen placed the metal plate to the side and began to read the contents of the letter.

All he could see were beautiful words, clear and beautiful with a trace of strength, as expected, the words were like the person.

"Please forgive my little sister for leaving without saying goodbye. Perhaps this is something you have already expected.

I was born in heaven battling city, thousands of kilometers away, and the reason I came here was to complete the task my teacher gave me.

Every resident of heaven battling city has the responsibility to give everything for the prosperity of the human race. Since I was born, everyone around me has told me this.

Unconsciously, fighting for the prosperity of the human race has become my lifelong belief!

It was with this belief that I went through countless hardships to come to this land and build the tower City of hundred Flower Valley.

I originally thought that through my efforts, I could end the chaotic state of this region and let the humans here live a happy life.

However, the real environment made it very difficult for me. I spent a lot of time and energy, but the city of hundred Flower Valley only advanced to level two, let alone control this area.

My little sister had also been deeply depressed. The heroic words she said when she left home were still in my ears, but reality made me understand the hardships of the world.

Fortunately, I met city Lord Tang Zhen when I was in the most desperate situation!

Although our ideals don't match, I can still see that you have great ambitions and are sparing no effort for the development of the human race.

Compared to your achievements, what I've done is simply insignificant!

My teacher once said that people of different paths can not make plans together, but I don't think so.

As long as the humankind could rise up under the pressure of the other alien races, so what if they were not on the same side?

This time, my little sister returned to heaven battling city to report her experience to my teacher, and then tell him my thoughts.

No matter what the outcome is, I will still support your actions!

The mountain is high and the road is long, I'm afraid we won't meet again in this life. This little sister is thousands of miles away, I wish you to suppress the hundred races and become an Overlord soon!

Lastly, I've attached a heaven battling city token and a map of my heaven battling city as my little sister's apology for not saying goodbye.

I hope you take care, we will meet again!"

Tang Zhen placed the letter in his hand on the table. After pondering for a while, he unfolded a map drawn with monster leather.

Tang Zhen merely took a glance before his brows furrowed.

Tang Zhen saw an incomparably vast world on this map.

The main body of the map was an incomplete outline of the continent, and the places marked with words only took up one-third of the space.

The other blank areas were marked with the word 'unknown' and a short description.

The Holy Dragon City was located near an unknown area. About 500 kilometers away was a cluster of buildings built by the kobolds.

Further away were the territories of the non-humankind, and the human-kind only occupied a small area.

Compared to the area under the control of those non-humankind beings, this small area of the humankind was not even worth mentioning.

At the other end of the map, Tang Zhen saw the heaven battling city that the hundred Flower Valley's city Lord had mentioned. The area it controlled was very large.

However, around heaven battling city, there were several towers of foreign races that were not inferior in scale, forming an encirclement.

"It seems that woman's words are true. This heaven battling city is surrounded by powerful enemies, and the situation is not optimistic. Being able to hold on until now, it seems that he does have some ability!"

Tang Zhen carefully looked around again and was surprised to find an area called the 'Starfall sea' near heaven battling city.

“The Starfall sea isn’t too Far From Heaven battling city. It should be the place where Arel and the others Live!”

Tang Zhen finally understood the origin of the falling star sea. Some of the doubts in his heart were also resolved. However, some new doubts also emerged.

The devilfall sea was tens of thousands of miles away, and the demon-eye Tyrannosaurus definitely wasn’t doing this out of boredom. It definitely had a purpose that he didn’t know about!

What caused Tang Zhen to be the most shocked was a foreign tribe that occupied a large piece of land far away from the central region of the continent.

A line of small words described the information of this area, and the content of the description was shocking.

[the area controlled by the abyss Fiend Race has a national-level building. The building is an underground city, specific information unknown!]

What made Tang Zhen shocked was this national-level building!

After the tower was upgraded from Level 5 to Level 6, it could be called a Lord-tier tower. After breaking through to level 10, it could be called a national-level tower!

Although it seemed like a simple classification, the meaning it represented was not simple!

Every time Lou Cheng advanced a level, it would consume countless resources and energy. Tang Zhen had a deep understanding of this!

The abyss Fiend Race had actually built a nation-level city, so one could imagine how powerful they were.

Fortunately, the abyss prison demons were tens of thousands of miles away and did not pose a threat to the Holy Dragon City.

When the day came that both sides had no choice but to come into contact, the Holy Dragon City would not be any weaker than the other party. Tang Zhen was very confident about this!

This map was very timely for Tang Zhen. It allowed him to have a clearer understanding of the surrounding situation and also had a preliminary understanding of this continent.

After keeping the map and the heaven battling city token, Tang Zhen looked at Tyson and said, “You said that the path of the flood was actually a River that existed a long time ago. Is your information accurate?”

that’s right. Tai Seng nodded and said in a clear voice, “ according to the captives from Redwater city and earth Valley City, they’ve found the bones of huge fish and monsters many times around the tower, as well as broken shells.

Their ancestors had also mentioned the legend of this River. It was said that it had suddenly appeared a thousand years ago and then disappeared without anyone knowing.

In addition, this area is a continuous low-lying terrain, so I believe that there was a large river here a long time ago!"

Tang Zhen nodded. His face had a pensive expression as he said, "If that's the case, things will be interesting."

"This River suddenly appeared many years ago, and then disappeared naturally not long after. Is it related to the demon Eye Tyrannosaurus?"

What's its purpose for going through so much trouble to drive a large number of water monsters here?"

Tang Zhen stood up and walked to the window. After taking two steps, he said to Tessen, "I've decided to walk along the river you mentioned tomorrow and see where it leads to."

Maybe the answer we want is at the end of this River!"

?

Chapter 259: Flooding the sinkhole and the magical soul crystal

The military helicopter flew over the river, and Wanderers could be seen moving around the river from time to time.

While the sudden flood destroyed countless lives, it also brought a new source of food for the Wanderers.

They formed groups and wandered around the river, trying to catch fish and shrimp in the water. Their harvest was quite good.

During this period, some unlucky guys were swallowed by the water monsters, but it still couldn't stop the Wanderers' enthusiasm for fishing.

When the Wanderers saw the armed helicopter, they subconsciously started to hide, treating it as a flying monster.

From the terrified expressions on their faces, it could be seen that flying monsters were almost the top predators in the wilderness. They were also one of the monsters that the Wanderers were most afraid of.

Tang Zhen did not have the intention to tease these Wanderers. After briefly checking the ruins of Redwater city and earth Valley City, Tang Zhen continued to head towards the end of the river.

The further away they were from the Holy Dragon City, the more monsters there were in the river. Tang Zhen even saw a Lord-tier monster.

When the water monsters passed by the Holy Dragon City during the day, they would definitely be killed. Therefore, Tang Zhen concluded that they should have swum across the river in front of the Holy Dragon city at night.

It might be the nature of these water monsters to hide in the day and come out at night, or they might be under some kind of control.

No matter what the reason was, Tang Zhen could confirm that these water monsters' destination was the end of the river downstream of Holy Dragon City!

After making this discovery, Tang Zhen was even more eager to find out where the end of the river was.

After flying for about an hour and passing by several buildings, a huge sinkhole suddenly appeared in Tang Zhen's vision!

In this desolate area, there were Plains everywhere, making this sinkhole look extremely out of place.

The area of the sinkhole was extremely large. In Tang Zhen's map, he could not see the end.

At the edge of the sinkhole, there was an extremely deep and huge ravine. The surging river water filled it and flowed into the sinkhole.

With the influx of a massive amount of water, the sinkhole would gradually be filled up, and the Hydra would be able to run wild in it!

After Tang Zhen maneuvered the assault Helicopter around, he found a concave area and slowly landed on the ground. He then kept the helicopter into his storage space.

At this moment, Tang Zhen was dressed neatly. A pistol and a saber hung from his waist. He was wearing a slightly old leather jacket and looked like a Wanderer in the wilderness.

After looking around, Tang Zhen began to walk toward the sinkhole.

When he was circling in the air earlier, Tang Zhen had discovered the traces of many cultivators. They seemed to be searching for something in the sinkhole.

Perhaps he could get more information from these people.

Tang Zhen quickly passed through the weeds and soon arrived at the edge of the sinkhole. He also encountered a group of human cultivators.

After seeing Tang Zhen walk out from the wild grass, these people began to size him up with vigilant eyes.

"Brother, are you also here to look for treasures in Tiankeng?"

A burly man with a full beard walked out from the group of cultivators and greeted Tang Zhen.

The burly man's cultivation was at level three, so he should be the leader of the exploration team. The cultivation of his team members was uneven, and there was even a level one teenager.

From their messy equipment, it could be seen that these people were all wild cultivators and belonged to the same exploration team!

Tang Zhen nodded, but his line of sight bypassed these cultivators and looked at another exploration team not far away.

It was an expedition team made up of foreign cultivators. They looked no different from humans, but there were different kinds of strange runes between their eyebrows.

The most obvious difference was that at the back of their necks, tentacle-like tentacles were constantly dancing, as if they were detecting something in the air.

A lady wearing a mask in the exploration team coldly snorted when she saw that Tang Zhen was somewhat indifferent to her group. Clearly, she was a little angry.

The captain of the exploration team could not see Tang Zhen's cultivation level clearly. Seeing that he had a fearless look, he wisely did not say anything.

After smilingly warning Tang Zhen to be careful, he led his team members towards the sky cavern.

Tang Zhen shook his head gently when he saw the human race's exploration team leave. He then walked toward the foreign race's exploration team.

This foreign tribe exploration team was talking about something. When they saw Tang Zhen approaching, two foreign tribe cultivators immediately walked out and scolded Tang Zhen, "Lowly human beings, stay away from this place!"

They treated Tang Zhen as an ordinary human cultivator who was weak but wanted to seek refuge with the alien race. Therefore, their words were not polite at all.

Tang Zhen's footsteps didn't stop at all. He raised his palm and fiercely slapped. A foreign race cultivator flew out and heavily fell to the ground.

Seeing that their companions had been attacked, the foreign cultivators were shocked. They drew their weapons and pounced toward Tang Zhen.

It was a pity that they did not have any chance of winning against Tang Zhen, who had the cultivation of a Lord.

In the blink of an eye, all the members of this foreign tribe exploration team were defeated by Tang Zhen.

Due to Tang Zhen holding back, their lives were not in danger. It was just that they were unable to enter the sinkhole to continue exploring.

Tang Zhen slowly walked to the captain with the highest cultivation among the foreign cultivators. He then took out a military knife and placed it on the captain's neck.

"Tell me all the secrets of this sinkhole, or I'll not only kill you, but also your entire team!"

Tang Zhen said word by word in the language of the foreign race.

When the foreign cultivator heard this, he didn't know whether to laugh or cry. He didn't expect that Tang Zhen would attack them just for this matter!

If this foreign race cultivator knew the true reason behind Tang Zhen's actions, he would probably be even more speechless.

The truth was that Tang Zhen didn't like this group of foreign people. That was why he attacked them and also asked about the secret of the sky pit.

He definitely wouldn't get an answer if he asked directly, so he called first!

The foreign cultivator knew that he wasn't tang Zhen's match, so he simply told him everything he knew.

It turned out that in the central area of this sinkhole, there was an extremely hard and strange stone. A thousand years ago, someone had discovered its peculiarity.

It could make a rice-grain sized magical crystal grow in the body of animals and plants.

After this kind of crystal grew in the body of animals and plants, they would have the ability to become invisible and their senses would become extremely sharp. Even cultivators would not be able to discover their traces.

However, this invisibility would lose its effect after leaving the sinkhole, so these mutated animals and plants would never leave the sinkhole.

After conducting experiments, a learned alien scholar discovered that the crystal could assist a Holy master in their cultivation. At the same time, it could effectively improve a cultivator's perception and the strength of their physical body!

The alien scholars called them 'soul crystals' and were willing to buy them at a high price!

For a time, the price of these crystals, which were called 'soul crystals', skyrocketed, attracting countless cultivators to come and collect them. However, the harvest was very little.

Unless one was extremely lucky, no one would be able to find those invisible animals and plants.

However, an accident 1000 years ago allowed the cultivators to obtain a large number of 'soul crystals'!

And that unforeseen event was because of the sudden flood that fell from the sky!

?

Chapter 260: The disaster of the Cold Moon, the soul crystal creature

This secret from a thousand years ago allowed Tang Zhen to finally understand the demon-eye Tyrannosaurus 'plan.

The reason why the demon-eye Tyrannosaurus used its innate ability to smash the sky and drive a large number of Hydra here was probably because of these soul crystals!

As for why it chose to do this a thousand years later and not any other time, it was likely to be related to some strange disaster in the loucheng world.

According to the information that Tang Zhen had obtained from various books, a strange Cold Moon would appear in the sky of the tower world every thousand years or so.

This Cold Moon would stay in the sky for a year. During this period, it would block the sun, causing half of the continent to fall into darkness.

The temperature of the wilderness would drop drastically, and snow would cover the entire wilderness. The monsters would also become more brutal and strange.

According to Lou Cheng's historical records, when the Cold Moon covered the land, all strange objects would form a blue ice Armor that would emit a faint fluorescent light at night.

This kind of monster with Ice Armor had extremely high defense, and its strength was multiplied!

After killing a monster, one would be able to obtain a type of mutated brain Pearl. Its value was ten times that of a normal brain Pearl!

Along with this Cold Moon, there was a strange race called 'ice Imps'!

It was said that these ice Imps were a foreign race that lived on the Cold Moon. When the Cold Moon appeared, they would descend into the world of loucheng through special means.

The ice Imps would kill any living being other than monsters and then transport the corpses to the Cold Moon.

In all the ancient books, the event of the Cold Moon's descent was collectively referred to as the "Cold Moon disaster"!

When Tang Zhen was reading books in the past, he didn't pay too much attention to this matter. At that time, he only took a glance and didn't study it in depth.

Now, through the actions of the demon-eye Tyrannosaurus, Tang Zhen suddenly recalled the various phenomena before the disaster of the Cold Moon. Among them, there were "holes" in the sky and the appearance of wild buildings!

Perhaps as the Cold Moon approached, the space in the world of loucheng became extremely unstable, which was why these things happened.

After calculating the time when the Cold Moon disaster would descend, Tang Zhen was somewhat shocked to discover that there was actually less than half a year left before the Cold Moon disaster this time!

Tang Zhen frowned tightly when he thought of this. A sense of urgency rose spontaneously.

During the disaster of the Cold Moon 1000 years ago, all Wanderers and cultivators who had the ability would try their best to escape from the shadows for fear of being killed by the ice Imps and Monsters.

However, a thousand years later, very few humans and non-humankind beings knew about this secret. Besides, the area covered by the Cold Moon was thousands of miles wide, so where could they escape to?

Even if the city Lords, big and small, knew about the disaster of the Cold Moon from the inheritance, they would still hold the mentality of being lucky. How many of them would be able to give up their own Foundation and run for their lives?

Tang Zhen did not care what others would do.

Now that he knew that the disaster of the Cold Moon was coming, he had to make early preparations to avoid being caught off guard!

“Damn it, why are all these trashy things happening one after another?”

The natives of this world of Loucheng are really like cockroaches. They’ve been tortured by the heavens and still haven’t died!”

Tang Zhen cursed in his heart. He no longer paid any attention to those foreign race cultivators and began to walk toward the depths of the sinkhole.

There were many thick ancient vines growing on the cliffs at the edge of the sinkhole. They were numerous and extended all the way to the bottom of the sinkhole.

The deepest part of the sinkhole was already filled with turbulent waves. The Endless River water was gradually filling up the place.

As expected of a King-tier monster, the demon-eye Tyrannosaurus had a good plan!

When the sinkhole was completely filled with seawater, these Hydra could run wild in the sinkhole and capture the invisible soul crystal creatures to obtain a large number of soul crystals.

This kind of soul crystal creature could only become invisible, but it could not become invisible. When it moved in the water, it would inevitably cause water ripples or waves.

In its own territory, the Hydra could easily track down the soul crystal creatures and capture them.

As for how to hand over the soul crystal to the demon-eye Tyrannosaurus, it wasn’t something that Tang Zhen knew for now.

Tang Zhen swiftly descended along the vines. Not long after, he landed on a platform in the air.

Looking down from here, he could see many cultivators hanging in the air with vines in their hands, staring at the water without blinking.

Most of them were holding a strange kind of net in their hands. It was woven with vines and was connected to a long rope.

Tang Zhen carefully looked at this tool and discovered that it was similar to a hidden weapon called the ‘blood guillotine’ in the original world.

Every time a wave suddenly appeared on the surface of the water, but there was nothing at first glance, the cultivator closest to it would throw the rattan net over and pull it back after hitting the target.

After the net was pulled, it immediately closed tightly. It clearly looked empty, but it continued to struggle and shake.

At this time, the cultivator would quickly withdraw the net cage and shake it violently in his hand. When the soul crystal creature in the cage was shaken unconscious, he could take it out.

Only after the soul crystal creature was killed and its blood was drained could its true appearance be seen. It could be a mouse, a weed, or even an unremarkable worm!

The originally ordinary creatures were no longer ordinary after they had the soul crystal.

Perhaps after the soul crystal appeared in their bodies, their original souls had disappeared, and the soul crystal LED their bodies to continue living.

After killing these soul crystal creatures, the cultivators would find the soul crystals in their bodies and carefully put them into special containers.

The process of capturing these soul crystal creatures was not smooth sailing. It was filled with danger and twists and turns at all times.

These soul crystal creatures were extremely cunning and would not show themselves unless it was absolutely necessary, so they had to keep a close eye on the surface of the water at all times.

While they were capturing the soul crystal creatures, the nearby cultivators also participated in the robbery, both openly and secretly.

Under the vast surface of the water, there were a large number of water monsters shuttling back and forth. They were constantly looking for soul crystal creatures and ambushing the careless cultivators.

In just a few minutes when Tang Zhen was observing the environment at the bottom of the sinkhole, several cultivators were dragged into the water by the water monsters. The outcome was obvious!

The two Lord-tier water monsters emerged from the water from time to time and spat water balls at the cultivators on the vines. Once they were hit, they would immediately be crushed to pieces.

However, the huge benefits that soul crystals represented made these cultivators risk their lives and seize every second to fish out the soul crystal creatures that appeared from time to time.

Men die for wealth and birds die for food. It was the same in the world of loucheng!

The human exploration team that Tang Zhen had seen earlier was currently at the position he was standing on. However, there were only six of them left from the original eight!

A wave of water suddenly appeared. The masked woman of the human exploration team was the closest, and she immediately threw the rattan net in her hand down.

After the net fell to the water, it accurately caught the swimming soul crystal creature.

The masked woman was overjoyed. She quickly pulled the net cage into her arms, afraid that the struggling soul crystal creature would escape.

However, just as the masked woman grabbed the net cage, something strange happened!

A level-four water monster suddenly jumped out of the water, opened its mouth full of sharp teeth, and pounced on the masked woman.

Originally, the masked woman was at a high position, so it was difficult for the Hydra to touch her body. However, this Hydra had a frog-like tongue.

The tongue was like a bolt of lightning, striking straight at the masked woman's chest, making it impossible for the masked woman to Dodge in midair!

"Little butterfly!"

The middle-aged man from the human expedition team roared in pain, but he could only watch helplessly as the masked woman was attacked. He was helpless!

Just when the Hydra's tongue was so close to her that everyone thought the masked woman was dead for sure, a cold light suddenly flashed!

"Owwuuu!"

The Level 4 Hydra let out a scream as its long tongue was cut into two and fell into the water.

The masked woman who had just escaped death immediately looked to the side, wanting to know who had saved her at the critical moment.

Then, she saw the annoying man outside the sinkhole. He was holding an ancient vine and looking at her with a smile that was not a smile!
