

## Alternate 281

### Chapter 281: luring the Tiger away from the mountain

When the shells of these flat bugs were removed, they would reveal a lobster-like meat stick. It was tough and strong, but it smelled a little bad.

However, the Cyclops loved the taste of these bugs the most and had always regarded them as a peerless delicacy!

Sometimes, the Wanderers would also poach such large insects as food to fill their stomachs.

However, these bugs were not as easy to deal with as they looked. They had great strength and would make sharp cries when they were attacked, summoning the Cyclops.

Even if they were lucky enough to catch these insects, the big nose on the Cyclops 'face was not to be trifled with. They were extremely sensitive to the smell of these insects and could easily distinguish the smell of these insects in the pasture.

Then, the Cyclops would carry their signature weapon and follow the scent to kill all the poachers!

After a long time, there were very few people who poached these big bugs because the price they paid was too great.

Even if the Wanderers were passing by the border of the pasture, they would ignore it when they saw such a big insect!

Tang Zhen did not alarm these large insects. He carefully dodged them and continued to advance toward the stone pillar area.

Not long after, Tang Zhen saw the figure of a single-eyed giant in the distance.

The one-eyed giant had thick body hair and looked like a moving tower from afar. When he stood at a disadvantage, he could smell a pungent stench.

After it walked out from behind the stone pillar, it walked towards a group of big bugs.

In daily life, the one-eyed giant's movement speed was not fast, and it looked slow.

However, due to their height, their seemingly slow steps could cover an extremely long distance!

In a battle, the one-eyed Giants would become extremely fast, displaying a speed that would make the enemy feel despair.

Once they were targeted by these one-eyed Giants, there was basically no possibility of escape.

After the Cyclops walked into the swarm, he slowly bent down and reached out to grab a writhing bug.

In the Cyclops 'other hand, he held a long bone that looked like the rib of some monster.

After it pierced the worm in its hand into the bone, it began to catch a second worm.

After capturing seven or eight big bugs in a row, the one-eyed giant straightened his back and carried the bunch of big bugs back behind the stone pillar.

Tang Zhen stood up from the grass and continued to walk toward the stone pillar area. At the same time, he carefully observed his surroundings.

When he arrived at the stone pillar area, he immediately observed the situation inside through the map view.

This was a large area of stone pillars, covering an area of nearly 10 kilometers. Gray stone pillars of different thickness were everywhere.

A group of Cyclops had gathered in the area of the stone pillars. Tang Zhen counted them and found that there were a total of twelve of them!

There were three level 4 Cyclops, one Lord-tier Cyclops, and the rest were all Level 5.

These were all high-level monsters. If they were to move out in a group, they would form a terrifying destructive force.

The one-eyed Giants were gathered together, as if they were having a gathering.

However, Tang Zhen saw that two one-eyed Giants were doing some unbearable actions between the stone pillars.

This was the difference between a high-level monster and a low-level monster. The intelligence that they displayed was obviously much higher, unlike low-level monsters that were only dominated by instinct.

Beside these one-eyed Giants, Tang Zhen saw a fire pool with flames constantly flashing.

The flames in the fire pool never died down and were used by the Cyclops to roast food.

It was said that this fire pool was created by the one-eyed giant by relying on his innate ability. Once the one-eyed giant left this place, the fire pool would be extinguished.

At this moment, a huge monster was being smoked and roasted above the fire pool. A thick bone stick pierced through the monster and was then propped on two rocks.

After the Cyclops who caught the bug came back, he placed the big bug by the fire pool and let the fire slowly cook it. He was not in a hurry to eat it.

Tang Zhen was not in a hurry to poison the Cyclops. Instead, he tried to look for the remains of the elf cultivators to see if he could find them directly.

Only a few decades had passed, and many things had disappeared and changed. How could it be so easy to find them?

After Tang Zhen looked around, he discovered a large pile of bones in a certain corner of the stone pillar area. There were also some broken weapons mixed within.

This should be where the Cyclops had thrown his junk, as it had already piled up into a small mountain.

There were dozens of similar places in the valley.

How could he lure the Cyclops away and make them leave this place temporarily?

After Tang Zhen thought for a moment, he swiftly headed to a swarm of insects in the distance and threw a remote control bomb.

Soon after, Tang Zhen teleported back to his original world and quietly got an off-road car.

After knocking out the two big bugs with lightning speed, Tang Zhen stuffed the big bugs into the trunk of the off-road vehicle. Then, he used the [ all-purpose electronic kit ] to perform simple control of the car.

After Tang Zhen started the program, the car would automatically drive and move forward in a straight line.

At the same time, Tang Zhen also threw a time bomb in the car to ensure that the car wouldn't fall into the hands of others.

After finishing everything, Tang Zhen immediately ran towards the stone pillar area.

The off-road vehicle with the big bug had started and was slowly driving into the distance.

Tang Zhen found a hidden corner near the stone pillar and did not hesitate to press the remote control bomb that he had placed in the swarm.

“BOOM!”

A loud sound rang out, and over a dozen large bugs were blasted into the sky, becoming fragmented.

The frightened bugs began to scream, which immediately alerted the Cyclops in the stone pillar area.

These guys ran out like a swarm of bees, waving the huge leg bones in their hands and running towards the place of the explosion.

When the Cyclops leader saw the bug corpses that had been blown to pieces and the bugs that were screaming in panic, he immediately flew into a rage and waved the leg bone in his hand.

Then, the one-eyed Giants sniffed wildly and quickly ran in the direction of the off-road vehicle.

In that direction, they smelled the scent of bugs.

This damn poacher, not only did he kill a bunch of insects, but he also secretly took away a few!

The one-eyed Giants were extremely furious. Such poachers had to be killed and eaten!

Under the leadership of the commander-tier Cyclops, the group of big guys immediately strode forward and chased after the off-road vehicle. The ground was stomped with loud “ Boom Boom ” sounds.

After the Cyclops left, Tang Zhen immediately headed toward their fire pool. He did not dare to delay any further.

After arriving at the edge of the fire pool, Tang Zhen took out a box from his storage space and stuffed the poison sealed in wax into the food.

This would ensure a delayed effect, in case the other Cyclops didn't eat after one was poisoned to death.

After he was done with all this, he quickly left the fire pool and hid in a hidden corner.

It didn't take long for Tang Zhen to see the Cyclops appear in the map view.

These guys were carrying the burnt remains of the off-road vehicle and walking back in high spirits!

?

Chapter 282: Exterminating the Cyclops

The things around the fire pool were still the same. The one-eyed Giants had no idea that someone had been here.

They couldn't be blamed for their low vigilance, as the pasture of the Cyclops was a land of death. Normally, no monsters or creatures of the hundred races would approach it.

The one-eyed Giants walked to the fire pool and threw the wreckage of the off-road vehicle on the ground. They began to jump and shout, as if they were celebrating something.

Perhaps they regarded the off-road vehicle as some kind of strange monster and were cheering for the successful defeat?

It could run, make a huge explosion, and even emit fire. It was really very powerful!

The one-eyed Giants had never seen such a "monster" before and subconsciously thought that it was very powerful.

Fortunately, after the off-road vehicle exploded, only a metal frame was left. Then, it was "killed" by the leg bone of the one-eyed giant!

The one-eyed Giants were very happy to be able to kill such a "monster," so they celebrated as usual.

After celebrating for a while, the one-eyed Giants, perhaps hungry, walked to the edge of the fire pool and began to eat.

Tang Zhen hid at the side. His heart was about to jump into his throat.

He stared at the one-eyed Giants without blinking, praying that they would not notice the abnormality of their food.

Actually, Tang Zhen's worry was a little unnecessary. This was because these one-eyed Jue people were used to being careless. They simply did not care if the food had been tampered with. They just picked it up and ate it.

A few of the bugs were eaten by the high-level one-eyed man, while the low-level one-eyed man tore the monster's meat apart. His mouth was full of oil.

After Tang Zhen saw this scene, he began to quietly wait for the poison to take effect.

Before he came, he had already caught a monster and experimented on it, confirming that the poison was effective on it.

The one-eyed giant had a strong digestive ability. After swallowing the small poison pill that Tang Zhen had sealed, it would quickly shatter in the digestive organs of these one-eyed Giants and take effect in an extremely short time.

It didn't take long for the poison to take effect!

A one-eyed man suddenly let out a blood-curdling screech as he spat out a mouthful of filthy liquid. He then began to struggle while clutching his neck.

The one-eyed giant's behavior frightened its companion. Just as it was about to go forward to check, two more one-eyed Giants began to roll on the ground and groan in pain.

In the blink of an eye, the Cyclops had entered the state of poison, and the stone pillar area was filled with the screams of the Cyclops.

The Lord-tier Cyclops had a stronger resistance. It looked at its fellow Cyclops rolling on the ground and couldn't help but roar angrily.

A huge leg bone was constantly being waved by it, smashing gravel everywhere, trying to find the murderer who had hurt them.

At this moment, the Cyclops leader had already vaguely realized that he and his fellow Cyclops had been ambushed!

The pain in its body and the anger in its heart mixed together, causing it to explode with terrifying power, causing destructive damage to the surrounding area.

After the Cyclops leader vented his anger in vain, his body could no longer bear the pain. He sat on a broken stone pillar and gasped for breath with his head down.

Not far in front of it, the Cyclops had stopped struggling, and their life force was gradually fading.

To be able to last so long under the high dosage of cyanide poison, these Cyclops were already considered strong.

On the other hand, the Cyclops leader's physique was extremely strong, and it had not died yet!

In the face of the Cyclops Lord, whose strength had been greatly reduced, Tang Zhen no longer needed to waste any more time.

He quietly moved to the back of the Cyclops, took out a rocket launcher from the storage dimension, and aimed at the back of the Cyclops.

"Bang!"

The burning trail produced a great thrust, and the rocket went straight for the back of the Cyclops Lord.

Because of the poison, the Cyclops Lord's reaction and movement speed were greatly reduced. By the time it realized the sneak attack from behind, it was too late to Dodge!

“BOOM!”

The rocket with a powerful armor-piercing ability arrived in an instant, drilling into the Cyclops Lord’s skin and flesh, and exploded!

The Cyclops Lord howled in pain as a terrifying bloody hole appeared on its back. Even its spine was exposed.

He didn’t expect that the one-eyed giant didn’t die immediately after suffering such a heavy blow. Instead, it waved its thigh bone and pounced in Tang Zhen’s direction.

Although Tang Zhen was surprised by the strength of the Cyclops Lord, he immediately jumped and dodged. He ran at an extremely fast speed and played hide-and-seek with the Cyclops.

After being discovered, Tang Zhen’s [ quantum invisibility light screen ] was no longer effective under the mental lock of the Cyclops Overlord. Therefore, the other party had been following closely behind it.

The enormous leg bones continued to attack. Tang Zhen nimbly dodged and occasionally retaliated.

Based on the injuries of the Cyclops Lord, it would not be able to last long!

Sure enough, it did not take long for the Cyclops Lord’s speed to slow down. After a while, the Cyclops Lord fell to the ground.

Tang Zhen stopped, turned around, and walked to the side of the Cyclops Lord. He used his alloy sword to cut off its head.

Tang Zhen heaved a sigh of relief when he saw the giant head of the Cyclops leader.

After spending half a day, Tang Zhen took out all the brains of the Cyclops and began to search for the moonlight pebbles.

This was a rather time-consuming matter. Tang Zhen had to carry out the search with a plan.

First of all, he had to determine the age of these dozens of piles of bones, and then look for traces of elven items in the bones of similar ages.

Tang Zhen directly ignored those fresh bones. He jumped onto a pile of bones that was already overgrown with weeds, covered his mouth and nose, and began to search.

The bones were piled up in layers. There were monsters ‘bones and humans’ bones. The gaps were filled with all kinds of parasitic insects.

An indescribable rancid smell filled the air. It was so smelly that Tang Zhen could only wear the underwater breathing insect to block out the smell.

After searching for half a day, Tang Zhen found many broken armors, weapons, brains, and other random things. However, he did not even see a shadow of the moonlight pebble.

It was unknown how many years these Cyclops had lived here. Each of them was a big-bellied man, so one could imagine the amount of food remains they had accumulated.

Tang Zhen felt a slight headache as he looked at the pile of bones under his feet that had been dug for several meters.

If he were to search alone, who knew how long it would take him to find the moonlight pebble?

He had to think of a way!

Tang Zhen sat on the pile of bones and muttered to himself for a moment. Then, he informed Tai Seng to bring a hundred Holy Dragon City soldiers over.

Immediately after, Tang Zhen teleported back to the Wei Island and sneaked into a construction site after making seven or eight turns.

While no one was paying attention, Tang Zhen directly activated the application and brought all the excavators and shovels that were parked at the construction site back to the loucheng world. He also got a lot of tools.

Just these things weren't enough, so Tang Zhen continued to bring fuel and a large amount of food and drinking water. He only stopped transporting them when Tyson and the others arrived.

?

Chapter 283: The wealth in the trashy remains \_1

When Tai Seng arrived with a group of Holy Dragon City soldiers, the first thing he saw was dozens of cars and tools of labor.

They had never seen an excavator before, but they were more familiar with a forklift, because there were two of them in the Holy Dragon City!

Looking at these things, Tai Seng was a little confused. Could it be that Tang Zhen had called them over to transport these things back to the Holy Dragon City?

"City Lord, I've brought all the soldiers here. Do you have any orders?"

Zhen Tang?" Tyson, who was wearing a camouflage suit and had a pistol on his waist, walked over and asked Zhen Tang.

Tang Zhen pointed at the cars that he had thrown on the grass and said to Tessen,"Divide the soldiers into a few small groups and have them go around the area to capture people for me. Then, bring them all here.

Remember not to hurt anyone. Just tell them that I'm short of people to work here, provide food and drink, and give them all kinds of rewards after the work is done!"

&Nbsp; hearing this, Tyson didn't hesitate at all. He immediately ordered the soldiers to jump into the cars and then spread out into the wilderness.

The roar of dozens of cars immediately resounded through the wilderness, and they rushed toward the place where the Wanderers gathered.

&Nbsp; Tai Seng’s mouth couldn’t help but Twitch as he glanced at the one-eyed Giants on the ground.

As a native who had lived in this area for many years, Tai Seng naturally knew about this group of terrifying one-eyed Giants and had heard many rumors about them.

This was a group of terrifying creatures. In this area, they were invincible!

However, at this moment, these terrifying monsters all lay on the ground, turning into cold corpses.

And the person who had killed these terrifying monsters was the young Holy Dragon City Master in front of him!

Tang Zhen didn’t hide his purpose and told Tai Seng about his plan to find the moonlight pebble.

&Nbsp; ” yes! Tai Seng finally understood and quickly ordered the soldiers to get to work.

As a high-ranking figure in the Holy Dragon City, Tai Seng naturally knew the significance of the mother tree to the Holy Dragon City, so he was as anxious as Tang Zhen.

After arranging for a Holy Dragon City warrior who knew how to drive a tractor to operate it, Tai Seng jumped onto the excavator and asked Tang Zhen how to operate this awe-inspiring big guy.

Since he had downloaded the specialized application, Tang Zhen could easily operate the excavator. Since Tai Seng wanted to learn, he directly guided him.

It didn’t take long for Tai Seng to be able to operate the excavator and dig up the remains and bones.

Tang Zhen still had a lot of preparation work to do before the Wanderers arrived.

After an hour or so, the first group of Wanderers, under the pressure of the Holy Dragon city’s Warriors, arrived at the stone pillar area while trembling in fear.

This was the territory of the one-eyed giant, so the Wanderers naturally knew that. When they heard that the one-eyed giant had been killed, they all had suspicious expressions.

However, seeing the Holy Dragon City warrior’s solemn expression, coupled with the threat of the rifle, they had no choice but to obediently go to the Cyclops pasture.

As soon as they entered the stone pillar area, the Wanderers saw the corpses of the Cyclops lying all over the place and confirmed that the Holy Dragon city’s Warriors had not lied to them.

However, the more this was the case, the more frightened the Wanderers were.

The Holy Dragon City was so powerful that they could actually kill all the Cyclops. It was definitely not as simple as being strong!

There were many powerful monsters and cultivators, but none of them could escape from the Cyclops.

It was precisely because of this that the Wanderers were even more afraid of Holy Dragon City.

He had to be careful. Otherwise, if he angered them, he might be killed directly!

The Wanderers looked at each other and immediately became obedient, cooperating with the Holy Dragon city’s soldiers ‘commands.

After they took their tools in order, they began to walk to the bones that had been pushed aside. According to the requirements of the Holy Dragon City Warriors, they cleaned up and collected everything other than the bones.

As the Wanderers worked, they peeked at the rumbling hovercars and excavators. They were extremely curious and surprised by this mechanical monster.

The Holy Dragon City was indeed powerful and mysterious. These roaring mechanical monsters explained everything!

As time passed, more and more Wanderers were brought back by the Warriors.

By the time the last batch of Warriors returned, there were a thousand Wanderers gathered here!

Under the watch of the Holy Dragon city's soldiers, they began to rummage through the pungent-smelling bones.

It didn't take long for the Wanderers to make some discoveries.

"What's in this bag?"

"This is the bi 'an demon weapon!"

"I found a pile of rare ores!"

Under the watch of the Holy Dragon city's soldiers, these Wanderers did not dare to hide any of the items they discovered. If they were discovered, they would immediately be beaten up.

In order to ensure that the moonstone wouldn't be hidden by the Wanderers, Tang Zhen didn't hold back.

Moreover, the Holy Dragon city's Warriors had already told them that they would be rewarded according to the total value of the items they found. The more they obtained, the more generous the rewards would be!

None of the Wanderers had expected that there would be so much good stuff in these skeletons!

If it were not for the one-eyed giant occupying this place, it would have been discovered and cleared by the Wanderers long ago.

However, it was also because of the existence of the one-eyed giant that this wealth was preserved to this day.

As the saying goes, "wealth can move people's hearts. some Wanderers were already secretly planning to occupy this place immediately after the Holy Dragon City left.

As long as he dug with his heart, he would definitely have a rich harvest!

As for the Holy Dragon City, which would take the majority of the profits, these Wanderers did not dare to have any other thoughts other than being envious.

The items that had been cleared out were gathered together and counted by a special person. Then, they were stored in different categories.

Although his trash-picking harvest was rich, Tang Zhen's mind wasn't on these things. He only wanted the moonlight pebbles.

As time passed, more and more items were collected, but there was still no sign of the moonlight pebble.

Tang Zhen knew that this wasn't something to be anxious about. Thus, he waited with a peace of mind.

Not far away was the cookhouse's territory.

&Nbsp; when the Holy Dragon City soldiers arrived at the Cyclops 'pasture, the Army chef in charge of food ordered people to capture the giant insect and slaughter it for dinner.

The rice, flour, and oil had already been prepared, so the chefs who came with the carriage only needed to start a fire to cook.

It didn't take long for a soldier to drive a cart back and throw a pile of bugs on the ground.

The chef deftly peeled off the bug's outer shell, revealing the white and tender bug meat.

Next, the chef used a knife to slice off a piece of worm meat. He sniffed it and tasted it again. Then, he called for the helpers to peel off all the shells of the worms.

After washing the worm meat, he marinated it with fine salt and seasoning, filling up seven or eight large plastic buckets.

A few Wanderers smashed a thick-looking grass root with a stone and then washed it in a bucket.

By the time the roots were only left with fiber, Tang Zhen found that a lot of white sticky substances had been deposited in the bucket.

Upon closer inspection, it turned out to be natural starch!

After the starch settled down for a while, the excess water was poured out. The starch was then taken out and wrung dry on a gauze.

Strips of fat and tender worm meat were taken out of the bucket and thrown into the starch one by one. Soon, they were wrapped in starch.

A large pot had been set up beside him, and a large barrel of soybean oil was poured into the pot. It began to boil not long after.

Pi Li pa la " sounds of deep-frying could be heard. After the starch-coated insect meat was deep-fried in the boiling oil for a while, it was taken out and placed into a large basin beside it.

&Nbsp; after the temperature dropped a little, the fried insect meat was ready to eat!

Tang Zhen curiously picked up a piece and tasted it. Immediately, he felt that his mouth was filled with fresh fragrance. The taste was simply amazing!

These guys were born to be chefs. They had only watched a few cooking videos and their standards had improved so quickly!

Looking at the chef's proud face, Tang Zhen decided to find them a few more cooking tutorial videos next time. This way, he could also taste the top food in the loucheng world!

?

Chapter 284: traces revealed

When night fell, all the searching work stopped.

The Wanderers were gathered together, and under the command of the Holy Dragon City soldiers, they lined up to receive their food.

There was rice, deep-fried worm meat, spicy pickled vegetables, and a steaming hot vegetable soup.

This was tonight's food, and everyone was given enough to fill their stomachs.

After the Wanderers received their food, they gathered together again and gobbled up the food.

After being cooked by a chef, the taste of every dish was extremely alluring, and the Wanderers almost swallowed their tongues.

After eating such delicious food, they became even more envious of the Holy Dragon city's residents.

After eating and drinking their fill, these Wanderers leaned together to rest.

Some of them were so tired that they fell asleep on the ground.

For the Wanderers, sleeping in the wild was a common thing, but the premise was that they had to be well-protected and not be attacked by wandering monsters.

Due to the presence of the one-eyed giant in this area, the wandering monsters did not dare to approach.

Moreover, there were still Holy Dragon city's soldiers standing guard outside. The flintlocks in their hands were not just for show.

With this double protection, the Wanderers who had eaten and drunk their fill naturally rested in peace.

Tang Zhen sat beside the fire and looked through today's harvest with Tai Seng.

There were dozens of different kinds of mo weapons and equipment in the basket. The good things that the cultivators used to value as their lives were now piled up like cabbages.

Tang Zhen found a strange looking staff from the demon weapons and carefully examined it.

The staff was cast from an unknown metal, and it was covered with complicated and strange patterns, giving it a mysterious feeling.

At the top of this cane, Tang Zhen found an extra-large brain bead that was firmly embedded and fixed.

Tang Zhen also had a similar brain Pearl. It was a trophy he had obtained from the lake monster when he was cleaning up the Pearl Lake in the sacred Dragon Valley.

According to the results of the appraisal card, it was a rare mutated brain Pearl.

The mutated brain Pearl had a unique attribute and was a rare treasure to a Holy master.

The staff in Tang Zhen's hand was a weapon used by Holy Masters. It could enhance the divine skills that were cast.

Now that he had accidentally obtained a cane, Tang Zhen naturally wanted to try its effect.

With a thought, a protective barrier immediately appeared on Tang Zhen's body. The surface of the barrier flickered with light.

After sensing it carefully, Tang Zhen discovered that the protective Shield's toughness had indeed increased a little. However, it was still extremely limited.

Perhaps the level of this mutated brain Pearl was too low. If it was a Lord-tier mutated brain Pearl, there might be an even stronger boost!

After thinking up to this point, Tang Zhen threw the cane back into the big basket and took out a light pocket-sized dagger.

The dagger looked small and light, more like a toy than a weapon. However, Tang Zhen knew that it was a genuine weapon for Holy Masters.

On the cornerstone trading platform, there was a special spiritual power skill for Holy Masters, which allowed them to control these light magic weapons to fly and kill enemies within a certain range.

The forging process of these mo weapons was complicated and they were not cheap.

Combined with specialized Holy master skills, killing monsters and ambushing were very effective!

After putting the weapon back into the storage space, Tang Zhen glanced at the brain Pearl beside him.

After an inventory check, they found a total of several thousand brain beads of different levels. Added together, it was not a small harvest.

As for the other miscellaneous items and ores, Tang Zhen had also carefully searched through them but did not find the moonlight pebbles.

A third of the clearing was done, but there were still no traces of the moonlight pebbles.

Hopefully, the moonlight pebble was hidden in the remaining garbage remains. Otherwise, Tang Zhen would really not know where to find it.

.....

Early the next morning, after the Wanderers had their breakfast, they began to search and clean up again.

This time around, Tang Zhen personally went into the battle. He continuously searched through the pile of debris in an attempt to find traces of the moonlight pebbles.

Not far away, another pile of bones was being excavated by an excavator. Tang Zhen walked over and took a look. He inadvertently discovered an exquisitely-shaped metal belt.

After seeing this belt, a trace of joy appeared on Tang Zhen's face.

At the bottom of the sinkhole, he had seen a belt of a similar style on the half-elf Captain, so he was sure that it was an item of the elf race at a glance.

Since there was an elven item here, the moonlight pebble was most likely in this pile of garbage.

let's go! Tang Zhen immediately beckoned Tai Seng over and moved all the bones away to make it easier for the Wanderers to search.

Tai Seng drove an excavator over and in a short while, he had opened up a large area.

More and more elf-style items were found by the Wanderers. The joy on Tang Zhen's face became more and more intense as he monitored this place through the map view.

At the edge of the area, a Wanderer moved away the monster's skeleton under his feet, and a Broken Skull entered his sight.

There were gnawing marks on the surface of the skull, and the brain matter had been sucked by the Cyclops.

There were countless similar skeletons, so the Wanderer didn't pay much attention to them.

However, an exquisitely-made leather bag next to the skull caught his attention.

He bent over and took out the leather bag. After the Wanderer opened it, he found a few leather bags inside.

The Wanderer looked around him. After making sure that no one was paying attention to him, he carefully opened one of the bags.

The Wanderer's heart almost jumped out of his chest after a glance.

It turned out that in the leather bag, there was a large number of brains shining with a beautiful halo, which looked extremely moving.

"This is a Suan ni Lord-tier brain!"

The Wanderer suppressed the shock and ecstasy in his heart and quickly tied the leather bag. Then, he stepped on the ground and created a pit.

Using the body and remains as cover, the Wanderer quickly placed the leather bag into the pit and covered it with soil.

After doing all this, the Wanderer looked around and continued to pretend to look down and search.

However, the leather bag was once again stuffed into the pile of bones and buried.

You can't put all your eggs in one basket. Even if one of them is found, there's another one!

After the Wanderer finished doing this, his mind was spinning.

“After the Holy Dragon city’s soldiers leave, I’ll quietly dig them out and run as far away as possible!”

there are a few leather bags inside that big leather bag. There must be more good stuff!

“With these brains, I can eat whatever I want and have whatever woman I want!”

God, please don’t be discovered. Don’t let 1000 watts get ridiculed.

The Wanderer kept praying and looked around again to see if anyone had noticed his actions.

But this time, when the Wanderer raised his head, he saw a young man standing in front of him, looking at him with a faint smile.

The Wanderer was shocked. He knew the other party’s identity, because all the Holy Dragon City Warriors called him “ Lord City Master “!

After realizing who Tang Zhen was, the Wanderer was so frightened that his heart started beating wildly. He revealed an extremely ugly smile at Tang Zhen.

“Lord city Lord!”

Tang Zhen stared at the Wanderer for a full minute before he sighed softly.

“There are some things that you simply can’t possess. Once you obtain them, you’ll realize that they’re not good fortune, but disaster!”

After Tang Zhen finished speaking, he took out his leather bag and pouch under the Drifter’s dumbstruck gaze.

The Wanderer felt as if he had instantly fallen into an ice cave. The fear of death made his mind clear, and he instantly understood the meaning of Tang Zhen’s words.

If you have the life to make a fortune, if you don’t have the life to spend, all your schemes are in vain!

city Lord, I was wrong. I was possessed. Please don’t kill me, Yingluo!

The Wanderer’s tears flowed down his face. He knelt on the ground and howled madly, begging for Tang Zhen’s forgiveness.

Tang Zhen, who had just taken a few steps, slowly turned his head and looked at the Wanderer with an expressionless face.

“I’m in a good mood today, so I’ll let you live. Remember to remember this in the future!”

When the Wanderer heard this, he felt as if a heavy burden had been lifted off his shoulders, and he kowtowed like he was pounding garlic.

?

Chapter 285: The pool of gemstones under the mother tree

Tang Zhen didn't care about the wailing Wanderer behind him. He turned around and walked toward the military jeep at the side.

He was merely a fellow who was obsessed with money and was not worthy of Tang Zhen's attention.

Tang Zhen didn't suffer any losses. With his status, he didn't need to be calculative with a Wanderer that he could easily crush.

At this moment, Tang Zhen suddenly had some enlightenment. He seemed to understand the feelings of the demon-eye Tyrannosaurus when it found out that he had captured the water monster.

It was just a small matter that didn't matter. It didn't affect the overall situation, so the magic-eye Tyrannosaurus couldn't be bothered to care about it.

Only when Tang Zhen tried to kill all the Wanderers and sea monsters did the demon-eye Tyrannosaurus give him a small warning. This was also because Tang Zhen was too greedy.

After sitting in the car, Tang Zhen first opened the small leather bag and saw the brain inside.

Even with Tang Zhen's experience, he could not help but exclaim at the value of the brain beads in this bag.

No wonder the Wanderer dared to take the risk to hide it. It seemed that it was worth the risk!

Even if Tang Zhen's current wallet was very full, his heart could not help but beat wildly.

Tang Zhen held these Lord-tier brain beads in his hand and admired them for a while, before keeping the leather bag into his storage space.

He casually opened the bag beside him. If he was not mistaken, the moonlight pebbles should be inside.

He reached out and took out a bulging leather bag. After Tang Zhen opened it, he took out an exquisitely shaped metal box.

The metal box was slowly opened while Tang Zhen was filled with anticipation.

A stone that looked like a miniature moon was revealed. It emitted a faint light that was no different from the moonlight.

With just a glance, Tang Zhen was sure that this was the moonlight pebble of the elf race!

Tang Zhen extended his hand and held the Pebble in his hand. It was abnormally warm to the touch, just like the tender skin of a young girl.

He felt as if his soul was immersed in a dense fog, and his spiritual world became extremely clear.

It was indeed a magical thing. His efforts for such a long time had not been in vain.

After obtaining the moonlight pebble, Tang Zhen's mood became cheerful. He then inspected the items in the other leather bags.

There was a beautifully packaged book, a scroll filled with vicissitudes of life, and an exquisitely shaped metal badge!

These were all the remaining items in the bag. They were all put into the storage space by Tang Zhen.

When he had time in the future, he would take it out and study it slowly.

The rest of the cleaning work went smoothly. By noon the next day, the cleaning work was completed.

After the Wanderers were searched, they were gathered in an open space.

The Holy Dragon city's soldiers loaded all the goods onto the truck. The excavator was kept by Tang Zhen in the storage space. The harvest from the past three days was also loaded into the car.

There was still a lot of food left. Tang Zhen used it as a reward and distributed it to the Wanderers according to the original agreement.

The Wanderers expressed their gratitude, but they had no intention of leaving.

Tang Zhen understood the Wanderers' thoughts. They had their eyes on the Cyclops' pasture and wanted to take it for themselves.

Not to mention the good stuff that might have been "left" in the skeletal waste, just the pasture where giant insects could be raised had great value.

After he left, there would probably be a bloody battle here!

There were also some Wanderers who requested to go to Holy Dragon City to find a job in the commercial district. Tang Zhen agreed to them without the slightest hesitation.

After the Wanderers got permission, they jumped into the back of the car excitedly and started chatting.

The Holy Dragon city's convoy lined up in a long line and began to slowly drive in the direction of the Holy Dragon City.

The convoy finally returned to Holy Dragon City just before night fell.

The residents who had already received the news gathered around and moved all the harvest to the front of the warehouse. After Murong Zi Yan recorded the inventory, they sent it to the warehouse to be stored.

The Wanderers who had followed them were sent to the commercial district, where they were provided with food and lodging.

Tang Zhen watched for a while before he turned around and walked toward the mother tree in the distance.

The sky was getting dark, and the mother tree's branches and leaves were getting brighter and brighter, as if it was decorated with countless neon lights.

Li Sha, who was wearing a long white dress, was currently guiding a young man's cultivation. When she saw Tang Zhen walking over, she smiled and came forward to welcome him. Her face had a happy expression.

Tang Zhen stared at Li Sha for a while before a trace of joy similarly appeared on his face.

if I'm not wrong, your ability to communicate with the mother tree has improved greatly, right? "

Lisa's raised face immediately showed a trace of shock, and she asked in confusion, "How did you know? I was planning to give you a surprise!"

Tang Zhen smiled and explained to Lisa, your aura is very close to that of a grade-2 Holy master. That's why I came up with such a guess.

did you advance so quickly because you absorbed the soul crystal? " he asked.

Lisa nodded and said in a certain tone, " after absorbing the soul crystal, I feel that it's easier to communicate with the mother tree. I can also understand more meanings. The effect is very good!

it's good that it's effective. You can come to me to get more after you use up the soul crystals I gave you last time.

Lisa obediently nodded her head and reached out to hold Tang Zhen's arm.

The two of them walked to the mother tree. Tang Zhen took out the moonlight pebble and slowly lifted it up under Lisa's mesmerized eyes.

as promised, I've brought you the moonlight pebbles, which are even more precious than the moon spring water. Are you happy now? "

Tang Zhen raised his head and looked at the mother tree with a helpless expression.

The mother tree's branches and leaves glowed with a brilliant light. At the same time, countless seven-colored radiances drifted down from the branches and leaves, making people feel like they were in a Fairyland.

A silver bell-like laughter seemed to ring out beside Tang Zhen's ears. It was as though a little girl had received her favorite gift. Her laughter was filled with joy.

A clear spring slowly appeared under the mother tree and quickly expanded into a clear pool of water that was half an acre in size.

All kinds of beautiful plants grew rapidly beside the pond, embellishing it with beauty.

Countless colorful gemstones suddenly gushed out from the ground and covered the bottom of the pool, shining in the clear spring water.

Li Sha's face was filled with intoxication as she looked at the scene before her. Suddenly, she turned her head to Tang Zhen and said,"The mother tree said thank you, and even asked you to put the moonlight pebbles in the pool."

Tang Zhen laughed in a self-deprecating manner. He thought in his heart that this "thank you" was really not easy to obtain.

Tang Zhen slowly walked to the pond under the mother tree. He gently threw the moonlight pebble into the pond.

Just as the moonlight pebbles entered the water, the gemstones at the bottom of the pool began to emit a bright light like electric colored lights, illuminating the pool with a myriad of colors!

From afar, the pool seemed to have turned into a huge gemstone, reflecting the light of the mother tree beside it, making one intoxicated.

The mother tree, the pool, the green grass, and the gorgeous flowers that could be seen everywhere formed a beautiful scenery.

Tang Zhen was intoxicated in this pleasant scenery and was unable to extricate himself for a long time!

?

#### Chapter 286: Upgrade to a level 3 building

When the last giant puppet in the glittergold race's sanctuary was transported into the cave, Holy Dragon City began to prepare for the upgrade to a level 3 building.

A large amount of weapons and ammunition were being transported to the city wall. All the soldiers in the city were doing their defense exercises to deal with any unexpected situations.

This time, Tang Zhen's actions were very big. The number of monsters attacking the city would definitely not be small. Therefore, they had to be fully prepared.

Although the atmosphere was tense, the Holy Dragon city's soldiers did not have a trace of fear.

Relying on their powerful weapons from the original world, the Holy Dragon City was confident that they would not be able to return to the land or air monsters.

The ones who were the happiest about the tower's advancement were actually the reserve residents. They didn't expect to be able to obtain the qualifications of official residents so quickly.

According to past experience, it would take at least ten years to become an official resident from a reserve resident!

If one became a reserve resident of a high-level city and wanted to become a full-time employee, it would be an extremely long waiting process.

Some reserve residents had waited for their entire lives but still could not cross this hurdle!

Who would have thought that after joining the Holy Dragon City, they could become official residents after being reserve residents for a month? how could they not be surprised?

The reserve residents who received the news were all in a state of excitement.

They were all looking forward to Lou Cheng's advancement.

They were all confident that the Holy Dragon City could resist the monster siege. They thought that it was not a problem at all!

As former residents of the city, they were very familiar with the situation when the monsters attacked the city.

Although the monsters attacking the city were strong, they could not withstand the Holy Dragon city's powerful defensive weapons.

As the people anxiously waited, the day of Holy Dragon city's advancement finally arrived.

On this day, all work in the Holy Dragon City stopped. The residents were not allowed to act on their own accord as per the requirements. The city walls were filled with fully armed Holy Dragon City soldiers.

Tang Zhen was dressed in an exquisitely hand-made robe. Under the protection of a group of mighty and strong Holy Dragon City cultivators, Tang Zhen began the Lou city's advancement ceremony.

To upgrade a level 2 City building to a level 3 city building, he would need to sacrifice ten thousand Level 3 brain pearls, which was equivalent to one million Level 1 brain pearls!

The higher the level of the tower, the more brain beads needed to be sacrificed. By the time Tang Zhen advanced to a level 5 tower, the number of brain beads needed to be sacrificed would reach 100 million!

This was a terrifying number. Without years of accumulation, it was impossible to gather enough brains to sacrifice!

Tang Zhen threw 20000 Level 3 brain beads into the altar, upgrading the Holy Dragon City and the mother tree City at the same time!

In the eyes of the residents, the main city and the mother tree had undergone tremendous changes.

The mother tree's body had doubled in size once again, its huge trunk looked like a skyscraper, the top of the tree crown was even higher than the surrounding mountains!

The area covered by the mother tree had now reached half a hectare, and it could be said to have blotted out the sun.

The mother tree seemed to be extremely happy after its advancement. Countless radiances rose from its branches and leaves, slowly flying into the air, and then exploded like fireworks!

This was the mother tree's own way of celebrating its advancement in rank.

Compared to the mother tree's boastful nature, the Holy Dragon city's main city promotion was much simpler.

In a hazy Halo, the Holy Dragon city's main city's size rapidly expanded, quickly becoming a huge object!

The exterior of the main city still retained its original external decoration style, but its height had been increased to sixty to seventy meters. It was as if a Super Monster had occupied the Holy Dragon Valley.

After the upgrade, the area of the level 3 building had expanded by countless times, and at the same time, there were countless new rooms.

Tang Zhen could also feel a mysterious power being emitted from the building. It silently affected every resident of the building, strengthening their physical fitness.

Tang Zhen knew that this was one of the so-called benefits of the building. According to the level of the building, it could provide a certain amount of physical attribute enhancement to the residents.

The higher Lou Cheng's level was, the more obvious the increase was!

From now on, the Holy Dragon city's main city had officially been upgraded to Level 3, and the mother tree's city had also become a level 3 city!

After upgrading the main city, Tang Zhen still had to build an auxiliary city!

Two brand new altars were already placed in the Holy Dragon city's Square. Tang Zhen walked in front of them and placed two tower cornerstones on them.

These two cornerstones were the glittergold race's sanctuary's cornerstone and the Black Rock City's cornerstone.

After placing the 20000 Level 1 brain beads on the altar, the past scenes of The Two Towers immediately appeared in Tang Zhen's consciousness.

At the same time, the illusionary image of two towers appeared in front of Tang Zhen. He placed them next to the main city in the sacred Dragon Valley.

Tang Zhen had built the underground city below Black Rock City. The two of them merged into one and were quickly built.

It didn't take long for a new building with an underground entrance to appear in the sacred Dragon Valley. It appeared solemn and respectful.

After silently glancing at the low and newly built auxiliary city, Tang Zhen shook his head and once again threw 20000 Level 2 brain beads into the altar!

The auxiliary city that had just been formed was immediately shrouded in light and became taller and taller.

In a spurt of energy, Tang Zhen invested another 20000 Level 3 brain beads, upgrading both auxiliary cities to Level 3!

After the light faded, a white building that was one size smaller than the original Black Rock City was completely formed.

However, it was even more beautiful than Black Rock City, and it was even more lively!

This time, Tang Zhen had used a total of 4.22 million brain beads to upgrade the building. It was definitely a big deal!

Fortunately, he had gained a lot during this period of time. Even though he had consumed so many brains, he still did not empty his wallet!

Tang Zhen originally planned to upgrade the main building to Level 4, but when he thought about how he still had to upgrade his mobile application, he finally resisted the desire to continue upgrading the building.

Moreover, after the city was upgraded to Level 4, the strength of the monsters' attacks would increase greatly. In addition to the accumulation of the previous continuous upgrades, Tang Zhen did not dare to imagine how many monsters would attack the city!

Compared to Lou Cheng, mobile applications were the foundation of his career. Tang Zhen was very clear about which was more important.

The reason why he was able to do so well in the loucheng world was entirely because of the nature-defying abilities of the mobile application. Otherwise, he could forget about defending the territory that he had fought so hard to obtain.

Although he still had excess brain matter, he had prepared it for the use and upgrade, so he could not simply use it.

Of course, these were all matters for later. The current task was to deal with the monster siege!

After taking off his long robe, Tang Zhen did not even bother to check on the four newly upgraded towers. Instead, he immediately ran towards the city walls.

not long after, tang zhen arrived at the top of the city wall.

More than two thousand Holy Dragon City soldiers were standing by on the city walls, all sorts of weapons ready to fire.

Compared to the past, the Holy Dragon city's defensive forces had become stronger.

what's the situation now? did anything unusual happen? "

Tang Zhen looked at Tai Seng, who was frowning, and asked in a relaxed tone.

In fact, he had also felt a trace of abnormality, as if something bad was about to happen.

The construction of two auxiliary cities would require a total of six levels. Under such extreme circumstances, it was highly possible that the entire gravel plain would be filled with monsters.

However, Tang Zhen's heart was filled with fear by relying on the weapon he possessed!

However, not a single monster had appeared in front of Holy Dragon City. This in itself was a very strange thing.

Although the monsters in this area were almost all killed by the undead race and Tang Zhen, it was more or less enough to form a siege team. It was impossible for not a single monster to gather like now.

A few hours passed by without him realizing it.

Just as the uneasiness in Tang Zhen's heart was growing stronger, a pitch-black Vortex appeared out of thin air on the gravel plain not far away!

As expected, an unforeseen event had happened!

?

Chapter 287: The horned Army that replaced the monsters to attack the city

The appearance of this Black Vortex was extremely sudden. Moreover, it gave Tang Zhen an extremely familiar feeling.

There was depression, deathly silence, and a trace of fear!

He remembered that when the undead clan monster descended into the tower world, Tang Zhen had felt this aura.

could it be that there are monsters from another plane descending on the Pi Xiu? ”

Tang Zhen’s heart was startled. He stared unblinkingly at the Black Vortex in front of him and frowned slightly.

The Holy Dragon City soldiers on the city walls also saw the Black Vortex, but there was no chaos.

At this moment, all the soldiers held their breath, and quietly tightened their grip on their weapons.

The vortex was close to the ground, with clouds and lightning surging in the middle. As time passed, the fog and lightning became less and less.

Tang Zhen could faintly see many black shadows flashing on the other side of the vortex.

A large foot in a combat boot emerged from the vortex and stepped on the gravel plain.

In the blink of an eye, a tall man in heavy armor walked out of the vortex.

The man was 2.3 meters tall and had bulging muscles. He held a giant axe in his hand and exuded a violent aura.

Tang Zhen was able to clearly see the man’s appearance through the map.

His skin was dark, and his face was covered in strange tattoos. He had a high nose and deep eyes, and a black horn that was an inch long grew on his forehead!

After seeing this horn, Tang Zhen knew that this fellow was a genuine foreign race!

But where did this guy come from, and how did he appear in the gravel plain through the black Vortex?

It was a critical time for the monsters to attack the city. There were no monsters at all, but there were alien races descending through the black Vortex.

Could it be that this foreign being was going to attack Holy Dragon City in place of the monster?

Tang Zhen’s heart was filled with doubt. However, he continued to stare in the direction of the Black Vortex without blinking.

After the foreign heavy-armored warrior appeared, he immediately cast his gaze at the Holy Dragon City in front of him. Tang Zhen could see a thick battle intent in his eyes, as well as a faint shock.

A series of heavy footsteps came from the whirlpool. Immediately after, Tang Zhen saw two mammoth-like creatures walking out of the whirlpool. A few of the heavy-armored aliens with similar appearances were sitting on the mammoths.

Two, four, six Suan ni

More and more elephants walked out of the vortex and lined up in a huge formation. They were neat and quiet, clearly having undergone strict training. 1

Behind these mammoths, non-humankind Warriors in light armors walked out in rows. The five of them stood in a straight line, continuously walking out of the whirlpool.

On the gravel plain, these foreign Warriors were lined up in square formations, looking silently in the direction of the Holy Dragon City.

The armor on their bodies constantly glowed under the sunlight, looking very spectacular.

There were 2000 of these light armor Warriors, and each of them was fully armed and looked majestic.

After the light armor Warriors had assembled, another group of foreign race Warriors in leather armor began to walk out of the vortex.

These armored warriors had short swords at their waists and strange mechanical crossbows in their hands. Their faces were full of killing intent.

They must be the long-range soldiers of this non-humankind Army, but how far could their bows and arrows reach?

After the 2000 archers appeared, another group of armored knights riding on strange beasts appeared. There were also more than 1000 of them!

The last to walk out was a team of about two hundred people.

The leader of the group was a tall alien. He was wearing demonic armor and holding a wide-bladed sword. The aura he gave off was at the Lord tier!

Behind this Lord were two other foreign cultivators. One was wearing a long robe, while the other was wielding a demon weapon.

One of them was a level five cultivator, while the other was a level five Holy master.

There were over a hundred foreign cultivators and a dozen Holy Masters following closely behind!

Such a powerful formation was enough to easily destroy an Ordinary Level 3 city!

When these people all walked to the front of the array, the huge vortex began to shrink slowly until it disappeared!

After seeing this scene, Tang Zhen could already confirm that this foreign tribe Army that had suddenly appeared was charging towards Holy Dragon City.

The original monster siege had become a foreign race siege. Moreover, they had arrived through the teleportation vortex. What was the secret connection between this? this was what Tang Zhen was most curious about.

If he wanted to know the answer, he would have to defeat these guys first!

Just as Tang Zhen was sizing up this group of uninvited guests, these foreign races were also sizing up the Holy Dragon City. However, their expressions were a little interesting.

The non-human Lord in magic armor had a dark expression. He had maintained this expression ever since he saw the Holy Dragon city's tall city walls and the huge mountain peaks that surrounded the city.

The Holy master beside the non-human Lord had a helpless look on his face. He said to the non-human Lord beside him, " "Captain, we've run into a tough bone this time!"

The non-human Overlord nodded and sized up the Holy Dragon city's walls once more. He said coldly, " when I accepted the mission on the platform, I was already prepared to fight a tough battle. After all, to be able to make the cornerstone trading platform issue a siege mission, I think they must be quite strong!

After saying this, the non-human Overlord's face was filled with irrepressible anger. He pointed at the Holy Dragon city's tall walls and said, " but I never thought that the enemy's city wall would be so tall. How can a newly upgraded Level 3 city have such a defense? "

we'll have to pay a huge price if we want to destroy such a tower. Can we bear such a loss? "

could it be that all the buildings in this Wildlands are so powerful? "

When the non-human Lord said this, he was already filled with anger, regretting not accepting this hot potato.

The Holy master beside him shook his head. "I've participated in two operations against these towers. They're not as strong as you think, and their combat power is not even as good as our subsidiary towers.

This Level 3 city with tall walls could only be regarded as an exception, and it was the only thing they could rely on!

perhaps something unknown has happened, causing the number of monsters within a hundred-mile radius to not meet the standard for attacking the city. That's why the cornerstone platform has issued this siege mission.

The laws of the heavenly Dao wouldn't miss any tricks. As long as the tower leveled up, it would inevitably experience a siege battle!

It's the humans "bad luck to encounter such a monster in this city!"

"As long as we can climb up their city walls, we will have won the battle, because the weak human race can't resist the bravery of the one-horned race's Warriors!"

The Holy Master's words made the non-human Lord's expression ease a little. He seemed to only be worried about the tall city walls.

As for the human warriors on the city wall, they were no different from pigs and dogs in his eyes. They were all ants that he could kill at will.

no matter what, we have to fight this battle. Otherwise, we won't be able to safely cross the distance of ten thousand miles and return to our city!

"The longer we drag this out, the more disadvantageous it will be for us!"

"If that's the case, then we'll attack the city immediately!"

At the order of the Lord, the Holy master immediately led the dozen Holy Masters behind him to the river and raised the short scepter in his hand.

The Holy Masters who were mumbling to themselves took out a bunch of brains from their pockets and pointed the short cannonballs in their other hands at the river.

The brains in the hands of the Holy master quickly disappeared, and the river water began to surge. A path that was five to six meters wide quickly emerged from the bottom of the river.

Tang Zhen was slightly stunned when he saw this. This kind of Divine Art skill was very similar to the [ terrain transformation plug-in ]!

The paleness of the Holy Masters' faces after casting the divine spell was immediately compared to the ease with which he operated and used it.

after seeing the path in the river appear, the non-human overlord immediately ordered the army to set off, heading straight for holy dragon city.

However, Tang Zhen was not in a hurry to attack. Instead, he stared at the foreign Army passing through the river without blinking.

Tang Zhen only smiled and waved his hand after the last mammoth passed through the river.

fire the cannons and blow up the passage in the river. I want to catch a turtle in a jar this time!

?

Chapter 288: The one-horned Army in a sorry state \_1

The one-horned Army arrived at the other side of the river. Before they could organize themselves, they suddenly heard a loud noise coming from the city wall.

The non-human Lord was stunned and immediately looked at the Holy Dragon city's walls. However, he suddenly saw countless black dots falling from the sky.

"This is a Kasaya."

before he could finish his sentence, all kinds of cannonballs had already landed in the camp of the single horn army, making a loud noise.

The one-horned Army that had been in an orderly fashion was immediately thrown into chaos. One by one, the one-horned soldiers were blasted into pieces by the cannonballs, and their corpses were thrown high into the sky.

The mammoths and the warhorses of the Knights were also scared out of their wits. They kept letting out cries of fear and began to run and jump around in the group.

A few cannonballs landed on the mammoths' bodies, blasting their bodies into a bloody mess.

The heavily injured mammoths struggled madly for a few moments before falling to the ground.

The originally mighty formation instantly suffered heavy losses!

The Lord's eyes were wide open, his face full of disbelief.

Listening to the screams of his men and looking at the corpses on the ground, he felt as if he had been punched in the chest!

damn it, what's going on? are the city walls filled with Holy Masters who can continuously fire divine spells? "

The non-human Lord roared, his eyes bloodshot.

The Holy master, whose robe was stained with blood, ran over and shouted at the Lord, " "It's not a divine spell, but a cannon!"

these humans have cannons, those cannons from the wild buildings. Our soldiers can't resist such weapons!

The non-human Lord was furious and shouted at the Holy master, " even if they got the cannons from the building, they couldn't have gotten so many cannonballs. This doesn't make sense.

Seeing another Cannonball flying towards them, the Holy master hurriedly conjured a protective barrier to block the flying gravel.

we can't hold on here. We either retreat or rush to the city wall. Their cannons won't be able to do anything to us!

The Holy master was very knowledgeable and immediately came up with a solution.

If it was used to attack a building with ordinary cannons, this move would indeed have an obvious effect. However, to the Holy Dragon City, it was the same no matter where they ran.

The Holy Dragon City, equipped with all kinds of weapons from the original world, could let them enjoy the baptism of artillery from all angles!

The non-human Lord knew that the Holy Masters were very experienced. He immediately gave the order to charge, braving the artillery fire as he headed straight for the Holy Dragon city's walls.

After accepting the mission and being teleported to this Savage Land, the one-horned race Army would either destroy the enemy or be destroyed by the enemy. There was no third option!

The one-horned Warriors, who had left a trail of corpses on the river bank, roared and rushed towards the city wall. However, the pride on their faces had long been replaced by fear.

They had paid such a heavy price to attack a level 3 human city. This was something that they had never expected before accepting the mission.

However, things had already come to this, and they had no way out.

Unless they broke through the enemy's city and took the foundation stone of the city, they would never have the chance to return to their hometown!

The one-horned Warriors charged forward while enduring the constant explosions. Even though their comrades were being blown away by the explosions, they didn't dare to look back.

The powerful destructive power of the cannonballs made them experience what fear was!

The riverbank was not far from the Holy Dragon city's city walls. The sturdy one-horned race Warriors held their breaths, and it did not take long before they reached their destination.

As the Holy master had said, the cannonballs were no longer able to hit them once they were near the city walls.

Unfortunately, they did not know that the reason why they did not suffer the bombardment here was because Tang Zhen still had other means waiting for them!

Below the city wall, the one-horned race's Warriors looked back with bitter expressions.

Starting from the riverbank, the ground was filled with cannon holes of various sizes. Countless one-horned soldiers were lying on the ground. Just by looking at their bloody bodies, one could tell that they were in grave danger.

The one-horned Warriors who were still alive were wailing in pain, but no one dared to save them.

A few one-horned soldiers had tried to save their comrades, but before they could even reach them, the Musketeers on the city wall had already broken their legs, and they were now screaming in pain.

The non-human Lord was covered in dust. He raised his head and looked at the city wall above him. He was in a dilemma.

According to the height of the city wall, the humans guarding the city could use stones and flintlocks to attack them. However, up until now, the other party had no intention of attacking.

The non-humankind leaders could clearly see the mocking looks on those human warriors' faces. They looked at the one-horned Army as if they were looking at a group of rats trapped in a cage.

A cat playing with a mouse, this was probably the situation in front of them!

Thinking of this, the non-human leader was extremely angry, and he wanted to tear all the humans on the city wall into pieces.

It had been a long time since he had been humiliated like this ever since he had been promoted to Lord. This made his killing intent boil!

“Cultivator battle team, charge up the city wall! I want to wash this city with blood!”

“Archers, cover fire!”

Following the order of the non-human Overlord, the one-horned race cultivators, whose eyes were filled with anger, immediately opened the leather pockets on their waists and put on a special glove.

After putting on the gloves, the one-horned race cultivators jumped up the city wall and began to move upward like geckoes!

When their gloves came into contact with the stone wall, they would be tightly sucked in, ensuring that these cultivators would not fall off the city wall.

When the one-horned cultivators climbed the wall, they didn't do it in separate groups. Instead, they formed a line in groups of five, so that only one of them was exposed.

They moved in unison, moving as fast as lightning, quickly climbing up the city wall.

From afar, it looked as if dozens of giant caterpillars were crawling rapidly on the city wall!

The one-horned soldiers raised their crossbows and fired at the Holy Dragon City soldiers.

Unfortunately, the Holy Dragon city's walls were too high. Even if these arrows hit the top of the wall, they would lose their lethality.

Most of the crossbow arrows fell limply to the ground as soon as they touched the city wall.

After all, the range of a crossbow was limited compared to firearms.

Tang Zhen stood by the city wall and clicked his tongue in wonder after seeing this scene. However, he did not allow this group of people to continue climbing.

A group of Holy Dragon City soldiers armed with shotguns and automatic rifles popped out of the city wall and began to spray at the one-horned cultivators climbing the wall.

Muffled gunshots rang out continuously as the flying bullets blocked the one-horned cultivators' escape route.

One by one, the one-horned race cultivators were shot and fell from the high city wall, screaming and turning into a pile of meat paste.

The fifty-meter-tall Holy Dragon City wall had become the place where the souls of the one-horned race cultivators were severed!

Even though the one-horned cultivators advanced in a very special way and could ensure that only the cultivators at the top were attacked, they could not withstand the continuous shooting of the Holy Dragon city's soldiers!

When a group of cultivators attacking the city was crippled, the surviving cultivators would join the other groups and continue to attack the Holy Dragon city's walls.

When they were about to reach the top of the wall, only a dozen of the one-horned race cultivators were left out of the original hundred!

Tang Zhen had specially ordered them to stay alive because he wanted to obtain the information he wanted from these one-horned race cultivators.

When these one-horned race cultivators finally climbed up the city wall and were about to start a massacre, they were greeted by a large patch of special medicinal powder!

It was a special powder from colossal bone city that had a strong numbing effect.

The one-horned race cultivators who inhaled the powder immediately felt their bodies go soft and they collapsed to the ground like mud.

“Despicable, shameless!”

The one-horned cultivator couldn’t speak, so he could only curse in his heart and glare at the man with anger.

The Holy Dragon city’s soldiers who were attacking them had antidotes in their mouths, their faces full of mockery.

A few one-horned race cultivators who reacted quickly held their breaths in time and luckily dodged the attack of the powder.

A dozen Holy Dragon City cultivators quickly surrounded them. They waved their electric batons and easily subdued the one-horned cultivators!

Tang Zhen sneered as he looked at the one-horned race’s cultivators who were tied up on the ground and had unwilling expressions on their faces.

attack freely. Clean up the battlefield in ten minutes!

With this order, the doomsday of the one-horned Army had arrived!

Countless bullets and machine gun grenades rained down, knocking down the one-horn Army!

The eyes of the alien race’s leader were spitting fire, but he had no choice but to continuously Dodge.

Tang Zhen looked down at the one-horned race’s leader from above. He casually took a large-caliber sniper rifle from the table beside him and locked onto his vital spot.

“Bang!”

The bullet whizzed out and directly hit the alien overlord.

The alien overlord dodged in time, and the spear only hit half of his arm!

The heavily injured foreign tribe leader looked at Tang Zhen with hatred in his eyes. After which, he turned around and fled without the slightest hesitation.

The one-horned Army had been completely destroyed by the intense artillery fire.

Now that things had come to this, there was no need for him to stay any longer. He could only make plans after escaping.

No matter what, he had to take revenge!

“You want to escape? dream on!”

Tang Zhen coldly laughed when he saw this. His figure instantly disappeared without a trace.

?

Chapter 289: Hidden platform, kill the overlord

The alien Lord’s arm was broken by a large-caliber bullet, and blood kept flowing out.

If it wasn’t for the Cannonball’s impact on his reaction and defense, he wouldn’t have been hit so easily.

Moreover, the power of this large-caliber sniper rifle was truly terrifying!

At this moment, the non-human Lord’s heart was filled with anger, but more than that, he was filled with fear.

Although they were at the edge of the continent, they still had a certain understanding of this wild land that was tens of thousands of miles away.

Compared to the area he was in, this place was called the Wildlands, and it was indeed worthy of its name.

Due to the effects of the Frostmoon calamity, this area was not suitable for long-term development. Any race with influence on the continent would not waste their resources here.

It was for this reason that the Wildlands was far inferior to the other regions in terms of Resources and Development.

If The Two Towers of the same level were to fight normally, the tower in the Wildlands would have almost no power to fight back!

In the eyes of the cultivators outside the Wildlands, the cultivators of the Wildlands were no different from beggars.

It was also because of this reason that the foreign Overlord had accepted this siege mission from the cornerstone trading platform, leading his mercenary group to teleport to the wilderness continent!

The alien overlord receiving this kind of mission from the cornerstone trading platform was one of the pieces of information that Tang Zhen didn’t know about.

This was a type of mission option that would only appear on the cornerstone trading platform after Lou Cheng was upgraded to Level 5. It was called a continent mission by cultivators, and it usually had extremely generous points as a reward!

Any tower above level five could issue missions on the continent, and they could also form mercenary groups to receive missions.

The spoils of war, other than the mission items, would all belong to the mercenary group.

In many high-class buildings on the continent, there would be registered mercenary groups that specialized in this kind of mission. They were all very powerful!

The missions that the one-horned tribe's mercenary group accepted were special missions that were automatically issued by the platform. They were called heavenly Dao missions!

From this, it could be seen how strong and confident the controller behind the cornerstone platform was. He would actually add the word "heavenly Dao" to the task that was issued by him!

This kind of heavenly Dao mission had always been one of the missions that mercenary groups in advanced Dungeons frantically pursued.

The reason for this was the high return!

When a heavenly Dao mission was accepted, a spatial vortex would appear and send the mercenary group directly to the mission location.

Only the cornerstone trading platform would have such a heaven-defying ability!

There were countless guesses as to who was in control of the cornerstone trading platform. However, after countless years, there was still no accurate answer.

Some said that it was the unbelievably powerful control of the city, some said that it was the control of a powerful alien race, but more people believed that it was the means of the gods!

There were different opinions, and it was difficult to distinguish between true and false!

When he turned around to look at the Lord, his face was ashen.

The leader of the foreign tribes would never have dreamed that the mission that he had thought was not difficult would actually destroy the mercenary group that his family had spent so much effort to build!

This was the blood, sweat, and tears of his family. It was because of this mercenary group that his family was able to maintain nearly a hundred years of prosperity in the one-horned clan's city.

However, after this battle, the entire mercenary group was completely destroyed. The foreign Lord could imagine the expression of his family elders when they heard this news.

If he were to return to the clan now, he would definitely be sent to the dungeon and then executed!

No, I can't go back, or I'll be dead!

After the non-human Overlord thought of this, he couldn't help but speed up and run deeper into the wilderness.

After running for a full half an hour, the leader of the non-humans burrowed into a pile of rocks and found a hidden place to sit down, panting heavily.

The wound on his arm had been tied up by him, and the bleeding had stopped long ago. However, after losing a lot of blood, his breath had become weak.

After looking at his broken arm, a trace of hatred flashed across the face of the non-human Lord.

“Damn it, I didn’t think that there would be so many firearms in this human city. Did they find a few extremely rare wild buildings? otherwise, they can’t have so much ammunition!”

The non-human Lord was quite knowledgeable and knew that cannons needed cannonballs to fire.

However, while cannons were easy to find, ammunition was extremely rare, which was also one of the characteristics of the building.

There was a rule that when clearing out wild buildings, one would not be able to get a large pile of cannonballs after getting the cannon!

In the level 9 one-horned clan’s city, some cannons could be found in the wild buildings.

These cannons came in all kinds of shapes and sizes. Some of them were glowing cannons from giant steel warships. They could even kill King-tier monsters with a single strike. Their power was extremely terrifying!

However, these cannons all faced the same problem, which was the lack of shells.

They couldn’t be used in battle normally and could only be used as decorations or directly smelted into weapons!

This was also the reason why the Lord of the foreign race was so surprised when he saw the Holy Dragon city’s continuous bombardment.

If they had sufficient ammunition, the soldiers in the world of loucheng would have long taken down cities with their rifles and cannons. They would not have used cold weapons to fight!

The Holy Dragon City had many cannons and flintlocks, and it also had a tall city wall to rely on. It was no wonder that the surrounding monsters had all been killed, resulting in the lack of monsters to attack the city.

He had to accept this damn mission and then run into the muzzle of a gun!

The non-human Overlord wanted to cry but had no tears. He also hated Holy Dragon City to the core.

“After I recover, I will definitely sneak into Holy Dragon City and kill until blood flows like a river to relieve the hatred in my heart!”

The non-human Lord growled, his face full of killing intent.

“I’m sorry, but you won’t have the chance!”

A low voice sounded in the ears of the Lord of the foreign tribe, causing him to be scared out of his wits. He wanted to get up to check out the situation out of reflex, but he suddenly felt a chill in his heart.

A purple short sword emerged from his chest and pierced through his mo weapon armor. Then, it twisted violently.

The Lord’s heart was instantly shattered. He opened and closed his mouth twice in a daze, his face full of unwillingness.

When he saw Tang Zhen appear out of thin air in front of him, he wanted to stretch out his hand to grab him. However, he no longer had the slightest strength.

With a heart full of loss and regret, the Lord fell heavily to the ground, dying in the wilderness that he regarded as a wild land.

Tang Zhen raised the purple lightning short sword and carefully cleaned it.

The purple lightning short sword could pierce through low-level demonic armors. This was an unexpected discovery that Tang Zhen had made during a test.

He now cherished this mysterious weapon that he had obtained by chance even more.

After storing the non-human Overlord's corpse in the storage space, Tang Zhen quickly rushed back to the Holy Dragon City.

At this time, the battle at the city walls had ended. Ninety percent of the one-horned race's soldiers had died in battle, while the rest had been captured by the Holy Dragon city's soldiers.

These captives were tied up with a special metal rope of the glittergold race. At this time, under the custody of the Holy Dragon City soldiers, they were all squatting on the ground.

After seeing Tang Zhen return, the Holy Dragon city's soldiers continuously saluted him.

Tang Zhen walked in front of the one-horned race's captives and threw out the one-horned race's Overlord's corpse.

"Bang!"

When the corpse fell to the ground, it stirred up a cloud of dust, making it look even more miserable.

The one-horned soldiers looked at the corpses on the ground, and the pained expressions on their faces became more and more intense. A sense of sorrow spread among the captives.

In a corner, the Holy Masters who were covered in blood were dumbfounded.

They were different from the one-horned Warriors. The Holy Masters were more concerned about the techniques that Tang Zhen had just displayed!

Heavens, this human city Lord could actually take things out of thin air!

Did he possess some kind of extremely rare Holy master skill, or did he possess some kind of spatial magic equipment?

No matter which point it was, it showed that this human city Lord was not simple!

The grade-5 Holy master's eyes were shining and his face was filled with excitement.

If it wasn't for the fact that a gun was pointed at his head at this moment, he would most likely pounce in front of Tang Zhen and obtain information regarding this matter at all costs.

Tang Zhen also noticed the Holy Masters' expressions and a smile appeared on his face.

This group of people was indeed tempted. In the next interrogation, he hoped to get some information that would interest him!

?

Chapter 290: Loucheng's new appearance (1)

All of the one-horned captives, including the few Holy Masters, were put under strict custody.

Tang Zhen planned to lock up the Holy Masters for a period of time. He would bring them up for interrogation after they were completely honest.

The best time for interrogation would be after the Holy Masters' spirit had been worn down!

After consuming the tranquilizer from colossal bone city, the one-horned tribe captives became as weak as mud, and they no longer had the strength to struggle.

In this way, there was no need to worry about them causing trouble.

Tang Zhen didn't need to worry about cleaning up the battlefield. After walking around once, he turned around and returned to the sacred Dragon Valley.

What Tang Zhen needed to do now was to check the newly upgraded towers.

Along the way, Tang Zhen received the salutations of countless new residents. He slowly arrived at the main city of the Holy Dragon City and climbed the long steps.

After being promoted to level three, the steps in front of the Holy Dragon Capital city had become wider. Each step was half a meter wide and more than twenty meters long, looking extremely spectacular.

White stone guardrails appeared on both sides of the steps. They were covered with exquisite and Noble decorations.

Twenty Holy Dragon City soldiers in bright armor stood on the steps, responsible for the defense of the main tower. Each of them looked majestic.

When Tang Zhen passed by, these soldiers would clench their fists on their chests and bow. Their faces were filled with solemnness and excitement.

After walking up the long flight of stairs, they were faced with the main city's first-floor Hall.

This Hall was extremely bright and spacious. The decorations were simple and luxurious, and it exuded a rich aura.

The Holy Dragon city's main city, which used to be a bank building, always unconsciously revealed a trace of money-related aura.

It was just that there was a new item that was added to the hall that caused Tang Zhen to feel a headache.

The ghost bank, which used to only exist in the shadows, now appeared in the hall in a grand manner, and in the most conspicuous position.

A few Holy Dragon City residents were at the counter, conversing with the female ghost salesgirls.

After seeing Tang Zhen's arrival, a few residents bowed and saluted before swiftly leaving.

Compared to Tang Zhen, the Aborigines in the world of towers only treated these female ghosts as some kind of alien race. They didn't have any fear.

On a large silver plate, written on it were the various trading rules of the ghost bank, which was extremely dazzling.

This Billboard had a magical ability. Even if you were illiterate, you could understand the meaning of the message at first glance.

The price was clearly stated, and he was honest with everyone!

However, was it appropriate for this thing to appear in the main hall of his main building?

Tang Zhen didn't even dare to imagine the scene of a few female ghost salesgirls staring at him every time he returned to loucheng at night.

Tang Zhen felt his blood run cold just thinking about it.

The ghost bank was no longer a small place with only a few female ghosts. With the upgrade of the building, it had become a large sales department with dozens of beautiful female ghosts!

Through the thick bulletproof glass, Tang Zhen could clearly see that in the dark work room behind, there were pale-faced female ghosts floating around.

Even with Tang Zhen's current cultivation, he still felt a little uneasy after seeing this scene.

A female ghost who was familiar with Tang Zhen turned her head around and gave him a sweet smile when she saw Tang Zhen's unblinking gaze sizing up this place.

When the Holy Dragon City was first built, she had already appeared and was in charge of the various businesses of the ghost bank.

Now, with the Holy Dragon city's upgrade, this beautiful female ghost's status had also risen. The badge on her chest had already clearly stated her current identity.

It had to be said that this female ghost was extremely beautiful, and her temperament was cold and shocking.

She was beautiful, but she felt a chill down her spine.

Tang Zhen awkwardly smiled. He hurriedly turned around and headed upstairs.

Since the establishment of the ghost bank, it had already provided Tang Zhen with a lot of Commission, and its customers were naturally the residents of the Holy Dragon City.

Tang Zhen had no way to stop such a thing, nor did he want to stop it.

Other than the rule that residents were not allowed to borrow money beyond their ability to repay, Tang Zhen did not interfere in other aspects.

Everyone had their own ambitions. Since the other party had chosen to trade with the ghost bank, they must have made sufficient considerations. There was no need for him to stop them.

As long as it existed, it was reasonable. Tang Zhen also wanted to see what kind of surprise this ghost bank could bring him.

Due to the lack of an elevator, Tang Zhen could only walk up the stairs. This was something that he had no other choice.

He had never heard of an elevator in the building.

However, in the advanced Dungeons, there was a device bought from the cornerstone platform that could teleport within the dungeon over short distances.

It was a pity that the Holy Dragon city's level was too low, and they were not qualified to equip that kind of thing!

After going from the first floor to the second floor, Tang Zhen began to observe the changes on this floor.

During the upgrade, Tang Zhen had transformed this place into an internal shopping mall. All the shops would be moved here.

As the lighting system had not been installed, the second floor was a little dark. The space of nearly 4000 square meters seemed empty.

It wouldn't take long for this place to become lively, becoming the best place for Holy Dragon City residents to trade.

After leaving the second floor, Tang Zhen headed to the third floor.

This floor was the Holy Dragon city's office. The managers' offices were on this floor, and they handled all the Holy Dragon city's Affairs.

A few levels higher was the city Lord's territory, Tang Zhen. He had a space of several thousand square meters.

The area above the tenth floor was the Holy Dragon city's residential area, and there were special stairs.

The residential houses were built around the windows, forming a ring of houses.

In the middle was an open space, which was where the residents usually interacted and entertained themselves.

Now that there was sufficient living space, Tang Zhen acted willfully and left a place for such activities every two floors.

After Tang Zhen walked around the main city, he headed to the newly built auxiliary city.

The Pure White exterior of the newly built City Tower was like a huge villa, and it was even more pleasing to the eye against the beautiful scenery of the sacred Dragon Valley.

After Tang Zhen's modification, the original lifeless style had disappeared and it became more spacious and bright.

Each floor had a huge hanging balcony, which was intertwined like flower petals. The design was unique and beautiful.

The residents could play and enjoy the scenery here. They could also hold various activities. There was definitely enough space.

Tang Zhen named this place as the first auxiliary city, while the underground city was the second auxiliary city. In the future, there would be third and fourth auxiliary cities.

The ten floors below the first auxiliary city were still treated as public areas by Tang Zhen. The Goblin luta had already instructed her assistant to occupy a large room facing the mother tree and use it as her laboratory.

Hearthhammer, on the other hand, found a place in the underground city to continue his research on his new armor.

After Tang Zhen walked around the first auxiliary city, he headed to the underground city.

The original refuge of the glittergold race had disappeared and was replaced by the new underground city.

The underground city was brightly lit. The lighting system of the new underground city had been completely preserved by Zhen Tang.

Different from the oppressive atmosphere of the sanctuary, this place was brighter and more spacious.

Because it had been upgraded to Level 3, the underground city's area was several times larger than the glittergold race's sanctuary. The available space was even larger than the main city and auxiliary city No. 1 combined!

After the tower City was upgraded, Tang Zhen didn't have to worry about the lack of accommodation because he had enough rooms.

Even if new residents joined, they would immediately have their own new home.

Of the residents who had joined Holy Dragon City later, 90% had become new residents here.

At this moment, the underground city was filled with people. It was like the large underground shopping malls in the original world. Every floor was full of people.

These residents were in groups of three to five. They were currently sizing up their new homes. When they saw Tang Zhen's arrival, they all bowed and greeted him.

They had already received a Resident Identity Card and were now official residents of the Holy Dragon City. Naturally, they would be extremely respectful to Tang Zhen.

Tang Zhen walked around the underground city once before he walked out with a face full of smiles.

The Holy Dragon city's upgrade had been completed, and the residents had been properly settled. Everything had been arranged in an orderly manner by the managers.

The next thing Tang Zhen had to do was to upgrade his mobile application and prepare for the opening of the business district!
