

Alternate 291

Chapter 291: woman's schemes, mobile phone upgrade!

In a spacious and bright study, Tang Zhen sat on a huge chair and looked at the report that Tai Seng had just delivered.

After a brutal interrogation, the one-horned tribe captives all gave in and told him everything they knew.

One-horned Holy Masters who knew the human language were pulled over to act as temporary translators.

The level five Holy master had repeatedly requested to see Tang Zhen and said that he had something important to report, but he was mercilessly rejected by Tyson.

Tang Zhen had already given the order to ignore the group of Holy Masters and to let them suffer first!

With Tang Zhen's order, Tai Seng naturally did not bother with these Holy Masters who had looks of anticipation on their faces.

These Holy Masters had dejected looks on their faces. They could only follow the arrangements of the Holy Dragon city's soldiers and obediently squat in the specially made prison, pondering how they could see Tang Zhen again.

They were determined to get their hands on the spatial storage ability!

After carefully reading through the report, Tang Zhen turned his head to the side and said to Tessen, "Since these one-horned people came from the ninth-grade city ten thousand miles away, did they mention heaven battling city?"

Tai Seng nodded and said with a serious expression, "I've asked them, and heaven battling city does indeed exist. It's a Grade 9 human race City, and it's an enemy of the one-horned race.

At the same time, several other foreign races were also eyeing heaven battling city.

According to the information given by those captives, that woman from Blossom Valley didn't lie to you!"

Tang Zhen smiled when he heard this. He gently shook his head and said to Tai Sen, "That woman doesn't need to lie to me about this. As long as I put in my heart, I can get all the information.

But is everything she's doing really out of good intentions?"

After Tang Zhen said this, he stood up and walked to the huge floor-to-ceiling window. He had a pondering expression, "If she was really that sincere, she would definitely remind me about the disaster of the Cold Moon in her letter so that I could make early preparations!

Even if I already knew about such a terrifying disaster, she should still have mentioned it. That would be more in line with her style.

However, this woman didn't say a word about this matter, so it was worth pondering.

This woman is from heaven battling city and is very knowledgeable. She knows a thing or two about the weapons we use.

It's precisely because of this that I think she has ulterior motives. Even a one-horned warrior knows about the disaster of the Cold Moon, how could she not know?

Didn't she know that the inheritance of the Wildlands had been cut off, and that most of the cultivators knew nothing about the disaster of the Cold Moon?

In my opinion, she might have thought that she couldn't resist the disaster of the Cold Moon, so she gave me the tower City of the hundred Flower Valley.

With that, not only will the residents be grateful to her, but even I will have to look at her in a higher light!

However, ever since I found out about the existence of the Cold Moon disaster, I became more and more suspicious of this woman.

Knowing that the disaster of the Cold Moon was coming, why did she come to this Savage Land?

She clearly knows that I'm not on the same side as her, but why is she so friendly with me?

People of different paths could not work together. A battle of ideas could lead to bloodshed.

What's more, she had received the education of heaven battling city since she was a child, so she had no doubts about the ideals of heaven battling city!

The more I think about it, the more I feel that this woman is not simple. Perhaps she is using these methods to hide her true purpose!

I really want to ask this woman face to face what she's up to!"

Tang Zhen started to slowly walk around the room as he spoke up to this point. His brows were slightly furrowed.

Tai Seng thought for a moment and said to Tang Zhen, " but the problem is that she has already left. The survivors of hundred Flower Valley have also joined the Holy Dragon City and become our residents!

A thought suddenly flashed in Tang Zhen's mind after he heard Tai Seng's words. A moment later, the corners of his mouth curled into a faint smile.

"If I'm not wrong, this woman didn't return to heaven battling city. Instead, she's hiding in Holy Dragon City!"

Tai Seng was startled when he heard this. After thinking for a moment, he revealed a killing intent as he said to Tang Zhen,"City Lord, do we need a Wuwu?"

Tang Zhen waved his hand and said to the solemn-looking Tessen,"Don't worry. She won't be able to cause any trouble in Holy Dragon City.

But now I'm even more curious about her purpose!

She could have left the Wildlands before the disaster of the Cold Moon, but she chose to stay. What was her plan?

Let's not act rashly, we just need to observe in secret. I believe that when the disaster of the Cold Moon comes, this woman will definitely give herself away!"

After Tai Seng left, Tang Zhen took out the token given to him by the hundred Flower Valley's city Lord, and his face was filled with deep thought.

Heaven battling city, what are you planning? besides this woman, what other unknown methods do you have?

After thinking for a while, Tang Zhen threw the token on the table and turned his attention to the mobile application he had downloaded.

Apart from the consumption of the loucheng sacrifice, Tang Zhen still had a large number of brain beads in his hands, so his waist bag was quite full.

Tang Zhen had obtained thirty Level 6 brains from the elves 'relics found at the Cyclops' place!

A level 6 brain bead was equivalent to 100000 brain beads. If it was converted into gold coins, it would be equivalent to one million gold coins in the application store!

Thirty level six brain beads were equivalent to thirty million gold coins!

This was definitely a huge sum of money for Tang Zhen.

With these gold coins, Tang Zhen should start to consider the problem of upgrading his phone and applications.

The first upgrade of the phone was because the balance of gold coins had exceeded one million gold coins. If he wanted to upgrade it again, he would need to have a balance of more than ten million gold coins!

Tang Zhen originally didn't want to spend this sum of money, but he had to spend it!

Some of his applications had been upgraded to a bottleneck, and his map had been upgraded to the top.

When he wanted to upgrade the map again, he was told that the version of his phone was too low, and that he could only continue to upgrade it after upgrading his phone.

Apart from the map, the cultivator skills that Tang Zhen guessed would most likely appear after the phone was upgraded.

Tang Zhen was actually full of anticipation for the upgraded application store.

He would not be leaving the Holy Dragon City for the next few days, so he might as well upgrade his phone directly!

After Tang Zhen thought up to this point, he immediately took out all the items in his storage space and exchanged the ten level six brain beads for gold coins.

Just as he had expected, when the balance of his phone exceeded 10 million, a notification popped up in front of his eyes.

This time, the upgrade would take a day. Tang Zhen only needed to read his books in peace.

As his phone was turned off, Tang Zhen's vision returned to normal, which made him feel a little uncomfortable.

Unknowingly, Tang Zhen had already formed a reliance on his phone.

Fortunately, although his phone was turned off, his cultivation was still there. Tang Zhen was still the sixth grade Overlord who crushed countless low-level cultivators!

Inside Tang Zhen's study room, there were countless books that were neatly placed on the bookshelves.

Collecting all sorts of books had also become one of Tang Zhen's hobbies.

As he sipped the coffee that Murong Ziyan had brought, Tang Zhen picked up a thick book that he had gotten from colossal bone city and began to read it carefully.

A day passed in the blink of an eye. When Tang Zhen felt his phone vibrate slightly, he knew that the upgrade had been completed.

With an excited and nervous mood, Tang Zhen turned on his phone and entered the application store!

?

Chapter 292: The new version of the App Store

As the phone was officially launched, Tang Zhen's mood became more and more nervous.

Tang Zhen couldn't help but be nervous. After all, this phone was too important to him!

As the phone was turned on, Tang Zhen immediately noticed the change in the phone.

The wallpaper of his phone now was the Holy Dragon Valley, which stood tall in the wilderness.

He reached out and clicked on it. Tang Zhen realized that the picture on the desktop wasn't simple.

As Tang Zhen continued to operate, he discovered that he could observe the Holy Dragon City from all angles according to his own will.

Compared to the map view, this kind of manual operation was very troublesome. Tang Zhen didn't know the meaning of the desktop.

He casually tapped on the Holy Dragon City residents passing by in the image, and a magical scene happened.

A small notification popped up above the resident's head, and it was full of subtitles.

The subtitles included the name of the resident, his cultivation level, intelligence, combat power, and other values. There was even a loyalty indicator!

After seeing this scene, Tang Zhen's heart was incomparably shocked. Then, a joyous expression appeared on his face.

He didn't expect that after the phone upgrade, there would be such a practical and convenient ability.

With this, Tang Zhen could easily understand the information of every resident and control the Holy Dragon City even more easily.

By relying on this method, Tang Zhen could easily get rid of potential enemies, find useful talents, and arrange work for each person according to their strengths.

In fact, among the skills of the Holy Masters, there was also such a detection spell, just like Tang Zhen's [monster detector], which could understand all the information about a person.

Many high-level buildings would train Holy Masters who cultivated such skills to assist the city Lord in management.

It was because of the existence of this Holy master skill that the residents of the high-level buildings were extremely loyal.

As long as there were disloyal ones, they would be dealt with as soon as they were discovered.

In order to maintain the stability of the tower, he had to use some thunderous means!

However, compared to those divine arts that required constant consumption of mental energy, the information displayed on Tang Zhen's phone was more comprehensive, and it also saved him more effort.

Originally, Tang Zhen had planned to exchange for a similar skill on the cornerstone trading platform to manage more and more residents. Now, it seemed that there was no need!

After the phone was upgraded, it gave him a big surprise at the beginning. This made Tang Zhen look forward to it even more.

Tang Zhen quickly opened the application store and found that the interface of the store had indeed undergone a large change, giving people a completely new feeling.

Compared to the previous application store, the newly upgraded application store had a cultivator skill option, but there were only two download options.

These two cultivation skills were the two cultivation skills that were recorded in the application store after Tang Zhen exchanged for them on the cornerstone trading platform!

If he wanted to complete it, Tang Zhen still needed to head to the cornerstone trading platform to continue exchanging.

Tang Zhen was very happy to do this. Other than being able to obtain the complete version of a cultivator's skill, there was another reason.

Along with the increase in the number of cultivator skills, there was a new download function.

Not only could Tang Zhen use his brain to directly download and install the application, but he could also pay a small portion of his brain to choose to download a one-time application card!

After tearing this application card, one could directly use a cultivator's skill once, which was simple and practical.

Moreover, there were no cultivation restrictions on that kind of card. Ordinary people could use it as usual after getting it.

After Tang Zhen saw this scene, he immediately discovered the rich business opportunity within.

If he were to sell those cards or use them as rewards, they would definitely be very popular!

The Holy Dragon city's cultivators could also be equipped with some cards, which would greatly increase their combat power.

After the auction house opened, that kind of card could also be sold as a signature product, and it would definitely be very profitable!

The appearance of the one-time application card would definitely be a huge surprise!

Tang Zhen's face was filled with joy as he continued to look at the other new functions.

Many new applications had been added to the store. Maps and other applications could be upgraded. After seeing this, Tang Zhen felt relieved.

As the Holy Dragon city's territory grew larger and larger, a mere ten-kilometer map view could no longer satisfy Tang Zhen's needs. Upgrading the map was a must.

As if to match the map that was getting bigger and bigger, the App Store had added some special applications that could not be downloaded but could be purchased according to the number of times they were used.

[space-based weapon comprehensive edition. Able to shoot lasers and throw Special Metals to strike any target within the map. Usage price: 10000 brain beads per use!]

super antimatter bomb, extremely powerful attack, capacity adjustable, lowest version price, one million brain beads each time!

[meteor attack, a large number of meteorites falling from the sky can form a high temperature sea of fire. Usage price, 100000 brain beads per use!]

[super flying sword, use a flying sword to attack a target within the map, instantly arriving without a trace, price, 50000 brain beads per use!]

?.....?

These special applications that were paid for were extremely powerful, and each of them could launch an attack within a hundred miles. Tang Zhen was speechless as he watched.

Good goods were sold at good prices. The price of these special uses was also ridiculously high. Tang Zhen would not use them easily.

In addition to these special applications, the application store also added some insignificant things. Tang Zhen took a look and didn't care.

After the phone upgrade, the most obvious change was that it no longer used gold coins as payment. Instead, it used brains.

Secondly, there was a new mandatory spending function in the store. Whether Tang Zhen was willing or not, he had to spend a hundred brain beads every day to draw the lottery.

If Tang Zhen didn't have time, the application store would draw a prize for him and automatically save the prize.

Although Tang Zhen didn't lack brains, he still had some complaints about this kind of forceful method.

After looking at the new features, the next step was to upgrade the few existing applications.

The first was to increase the visible area of the map. Tang Zhen spent one million brain beads to increase the visible area of the map to 100 kilometers!

He wanted to level up again, but he found that he needed to pay 10 million brain beads.

This caused Tang Zhen to hesitate for a moment before he temporarily gave up on the plan to continue upgrading.

At the moment, a map view with a radius of 100 kilometers was enough for him.

The remaining brain beads still needed to be upgraded for other uses, and could not be wasted.

After upgrading the map, Tang Zhen began to upgrade the storage space.

As he brought more and more resources, the storage space was no longer enough for Tang Zhen to use. Therefore, the remaining brain beads were basically prepared to upgrade the storage space.

As a large number of brains were thrown in, Tang Zhen's storage space also continued to expand.

When the storage space reached nearly 100000 cubic meters, Tang Zhen stopped upgrading. The brain Pearl was almost used up.

Tang Zhen could not help but quietly sigh in his heart as he sensed the nearly fifty meters of storage space.

From now on, he no longer had to constantly teleport back and forth because of the storage space's capacity.

?

Chapter 293: The preparations before the opening (1)

In the main hall of the Holy Dragon City, Tang Zhen sat on a large chair and looked at a document in deep thought.

The Holy Dragon city's people in charge were all gathered here, discussing the matters before the opening of the business district.

A middle-aged man with a calm expression looked at everyone and said under Tang Zhen's signal, "All the preparations in the commercial district have been completed. The goods have also been put on the shelves.

After our strict selection, each store has selected a suitable person-in-charge and the service staff has also completed their training, so they can open for business at any time."

"There are a total of twenty properties belonging to the Holy Dragon City in the business district right now. They are the Holy Dragon Mall, the Holy Dragon Hotel, the Holy Dragon Hotel, the Holy Dragon auction house, the Holy Dragon mercenary Union, the Holy Dragon Restaurant, and so on.

In addition, the shops and caves that were rented out had also been renovated and tidied up, and could be rented out at any time!

At present, there are close to ten caravans waiting outside the city. I believe that on the opening day, there will be more caravans coming!"

After the middle-aged man said this, he glanced at Tang Zhen before sitting back down on his chair.

Tang Zhen nodded his head. He was quite satisfied with this middle-aged man who was in charge of managing the business district.

since that's the case, we'll keep the original opening date. However, we'll still have to spend some effort on the opening ceremony and make these country bumpkins drop their jaws in shock!

Everyone laughed in their hearts when Tang Zhen's words were spoken.

After the laughter stopped, Tang Zhen looked at a well-built young man and asked with a smile, "Xiao Rui, how is the security of the commercial district?"

Little Rui stood up when he heard this. He said to Tang Zhen, "All the security work in the commercial district has been arranged. The drill to deal with emergencies has been carried out several times. It is guaranteed that the first time an accident happens, it will be handled properly."

At this moment, Xiao Rui's entire body was bursting with heroic spirit, and his face was filled with confidence.

He was wearing a set of armor designed by the dwarven hearthhammer. The main body was made of metal cloth of the glittergold race, which had been processed into black. The chest and some vital parts were protected by black metal plate armor, which looked majestic.

Overall, it was very similar to the combat suit of the celestial deity Army.

There was also a pair of black monster leather boots, a black combat hat with chain armor inside, and a pair of black half-finger leather gloves.

In terms of weapons, the guards of the commercial district were equipped with 9mm pistols, black-scabbard steel daggers, and a few grapeshot guns and automatic rifles.

With this set of equipment on him, he was so handsome that he blinded the eyes.

In the first few days of the equipment, the guards of the commercial district would attract a lot of attention wherever they went.

The guards of the commercial district were very proud after feeling that they had become the focus of attention.

As one of the facade of the commercial district, Tang Zhen had spent a lot of resources on these guards.

From the looks of it, the effect was pretty good.

After Xiao Rui sat down, Tang Zhen's gaze turned to the person in charge of the auction and the mercenary Association.

Tang Zhen was very concerned about these two places.

The inventory in the Holy Dragon city's warehouse had been cleared once. Any item that had been identified was sent to the store with a clear price tag.

Some precious and special items would be sent to the auction house, waiting to be auctioned and sold in order to create the greatest value.

There were many items of unknown origin that were temporarily stored, and they would be appraised again after they were recruited by a knowledgeable person.

The one-time use cards exchanged by Zhen Tang would also be sent to the auction house for bidding.

After the person in charge of the auction house finished speaking, Tang Zhen looked at the person in charge of the mercenary Association.

This was a brawny man whose height was second only to da Xiong's. He had a scar on his face and his entire body was emitting a baleful aura.

However, he appeared extremely respectful when facing Tang Zhen.

"The mercenary Association's staff has already completed their training, and the other preparatory work has also been completed.

At present, hundreds of missions of different levels had been sorted out. After the business was opened, they could be distributed to the Wanderers and residents.

The level and reputation system has also been perfected, and with the equipment you've brought, work efficiency will be greatly improved."

After the person-in-charge of the mercenary Association finished his report, Tang Zhen nodded his head and indicated for everyone to head to the commercial district together to carry out the final inspection.

A group of people followed the wide road slowly to the location of the commercial district.

The entrance to the commercial district was located under a giant peak. The archway was more than ten meters high and nearly thirty meters wide. It had been carefully decorated.

In order to make the entrance of the commercial district look even more high-end and magnificent, several hundred construction workers busied themselves for a full five days before barely meeting Tang Zhen's request.

Their hard work was not in vain. At least, people who saw the commercial district for the first time couldn't help but stare at it for a long time.

The crowd exclaimed in admiration as they walked into the clean commercial district.

Tidiness and hygiene were Tang Zhen's most basic requirements for the business district. He didn't want this great environment to be destroyed by garbage.

Walking on the wide Stone Street, Tang Zhen began to size up the surrounding environment.

The plants that he had transplanted were all growing luxuriantly. There were colorful flowers and plants everywhere.

Tall trees were planted on both sides of the road, full of fresh flowers and green leaves, looking magnificent.

The newly decorated tall building was now wide open, and the staff in various uniforms were making the final preparations before the opening.

Countless colored flags were hanging over the road, and some balloons were floating above the commercial district, becoming one of the embellishments of the Green Mountains and rivers.

The business district was very large. It took Tang Zhen over twenty minutes to walk to the central square.

A patrol team of the commercial district came over. After seeing Tang Zhen, they immediately stopped and saluted.

Seeing these ten young security guards who were wearing standard black armor and exuding a heroic aura, Tang Zhen laughed out loud and loudly praised them.

When the guards heard this, they were all overjoyed and very excited.

They were the survivors of Black Rock City who had just obtained the qualifications to become an official resident. Their average age was less than 18 years old and they were full of vitality and energy.

Ever since they had come to Holy Dragon City, they had experienced many things. Unknowingly, they had completely integrated into this place and their loyalty to Holy Dragon City was very high!

The environment here was more free, the scenery was more beautiful, the benefits were more generous, and the potential for development was more abundant!

Every day that he lived here was a breath of fresh air.

The hot blood of the young people was ignited. They actively participated in all kinds of work in the Holy Dragon City, full of energy!

This time, the commercial district was selecting guards. When they saw the guards “uniforms and equipment, the young people immediately erupted with enthusiasm and signed up for the selection.

These ten young security guards were the best of the best who had passed all the trials and were finally selected!

Now that they had obtained Tang Zhen’s praise, their fighting spirit was even greater. It was as if hot blood was burning in their chests!

Tang Zhen didn’t know that all the young people in the Holy Dragon City regarded him as an idol. A single word of praise from him was enough to excite these young people for a few days!

Tang Zhen returned to his room after walking around the commercial district.

In another two days, the Holy Dragon city’s business district would officially open for business!

?

Chapter 294: A caravan from a foreign race (1)

Another morning came. Huo Lu came out of his tent and stretched his body.

Not far away, there was already smoke rising from the kitchen. The members of the Fire Tribe’s caravan had already started to get busy and at the same time, they had closed their tents.

He turned around and saw that the other caravans near the camp were also packing up. The entire salty river was a busy scene.

“5 more caravans arrived here yesterday. There might be more in a while!”

The existence of the trade caravans was to compete with the cornerstone platform for profits and earn some hard-earned money.

The foundation stone platform of loucheng was in the hands of the powerful people of loucheng, and ordinary residents of loucheng couldn’t get any benefits at all.

Compared to the cornerstone platform, which had a high handling fee, the rich goods of the caravan were undoubtedly more friendly and competitive.

Many of the loucheng’s low-value specialties were never sold on the cornerstone platform. The reason was to attract merchant teams, bring popularity, and provide additional service income.

For the sake of profit, the merchants were willing to go through mountains of daggers and seas of flames. How could the wilderness stop them?

Merchants could be seen everywhere in the trading markets of each city.

It was the same for Holy Dragon City. After selling rare specialties on the cornerstone platform for a period of time, they had also set their sights on the trading market.

This was a common practice of many high-level buildings, so it was understandable.

However, this was even better. The nobles in Lou city could not enjoy the exclusive right to sell the goods, and the caravan could share the profits.

Holy Dragon City is rich in goods. I hope this trip is not in vain!

After mumbling to himself, Huo Lu turned to look at the tall city wall behind him and sighed in his heart.

Even though he had traveled the Wildlands and visited countless cities of various races, the Holy Dragon City wall in front of him was still the grandest city wall he had ever seen.

There was probably no monster that could break through such a wall, right?

According to the Holy Dragon city's Warriors, the dark red area on the city wall was the mark left behind after killing the four-legged flying dragon.

Huo Lu had seen the four-legged flying dragon before and knew how powerful it was.

However, it was precisely because of this that he could not stop sighing in his heart.

Who knew how many four-legged flying dragons the Holy Dragon City had killed to dye the entire city wall this color?

Looking at the Holy Dragon city's soldiers on the huge city wall, fire Lu recalled what had happened when he had rushed to the Holy Dragon City.

Ever since they had entered the hundred-mile radius of Holy Dragon City, the number of monsters had sharply decreased. They had even walked for more than ten miles, but still could not see any monsters.

This unusual occurrence made Huo Lu and the others, who had just arrived, extremely curious.

After asking the Wanderers, they received a shocking piece of news. It turned out that almost all the monsters within a hundred-mile radius had been killed by the Holy Dragon City!

When they first heard this news, Huo Lu and the others were all shocked.

If the Holy Dragon City was a high-level building, the fire runes would not be surprised, because the other party had the power to do so.

However, the fact that a third-class city could also do this was beyond the expectations of Huo Lu and the others.

There were rumors in the wilderness that the Holy Dragon City was very powerful and had destroyed five human cities in a short period of time. One of them was even a city belonging to the dark wing tribe!

However, before seeing Holy Dragon City, fire Lu and the others were still skeptical.

But now, it seemed that the rumors were likely to be true!

If that was the case, the Holy Dragon City could not be underestimated!

After the Wanderer left, the caravan of hundreds of people continued to move forward. They didn't go far before they saw a steel monster speeding toward them.

After the fast steel monster stopped in front of the trade caravan, a few fully armed soldiers jumped down and slowly walked toward the trade caravan.

Although there were only a few people on the other side, the guards of the merchant group became nervous and stared at the few soldiers without blinking.

Whether it was the steel monsters that could run or the weapons and equipment of the Warriors, they all gave them a lot of pressure.

Fire rude sized them up. From the badges on their leather armors, he could tell that they were Holy Dragon city's loucheng Warriors.

These Holy Dragon City soldiers were all holding flintlocks in their hands, each of which was worth thousands of brain pearls.

In addition to the other equipment they were wearing, their value had long since exceeded 10000!

Huo Lu calculated in his heart. He was shocked, but his eyes were shining.

In addition to being envious, the fire runes had a deeper understanding of the Holy Dragon city's strength.

Even an ordinary loucheng warrior had equipment worth more than ten thousand brain beads. Huo Lu would never believe that the Holy Dragon City did not have money!

The Holy Dragon City soldiers arrived before the caravan. They first bowed to the person in charge of the caravan, then introduced themselves.

we are the Holy Dragon city's patrol squad. Are you a caravan heading to the commercial district? "

The two-meter tall Holy Dragon City soldier asked them with a dignified expression.

Most of the members of the trade caravan that Huo Lu was in came from the fire Race. However, he was proficient in more than ten different languages, including the human language. Therefore, he immediately walked over.

that's right, we are the caravan heading towards the Holy Dragon city's commercial district. May I know what orders you have for us? "

Fire rude looked at the Holy Dragon City soldier in front of him and replied with a smile.

Although the human race was weak, as an experienced non-humankind warrior, Huo Lu did not show any expression that he should not have.

As a merchant, he placed profit above all else. As for racial prejudice, it was nothing in the face of profit!

Just looking at the Holy Dragon City behind the other party, they could not underestimate them.

The Holy Dragon City soldier first smiled at Huo Lu's reply. Then, he took out a black object from his waist and shouted a few words.

Huo Lu could clearly hear that the other party was informing another group of people about the arrival of his caravan.

The warrior's actions made Huo Lu curious. Could this small black box be used to transmit information?

Just as he was feeling puzzled, another person's voice came from the small box, indicating that he already knew and was rushing over as soon as possible.

Huo Lu was a little dazed. Could this thing really send messages to distant places? If that was the case, it would be the best commodity!

If he could buy this kind of long-distance communication device and sell it in the high-level cities, he would definitely be able to sell it at a price that would make him laugh in his sleep!

After thinking about this, Huo Lu was even more excited about Holy Dragon City's commercial district.

Next, Huo Lu began to get closer to the Holy Dragon City Warriors. He inquired about the products sold in the Holy Dragon City, and focused on the black box that allowed communication.

Just as the two of them were chatting, another steel monster came at a high speed.

A few Holy Dragon City Warriors jumped down one after another. After exchanging a few words, they signaled for Huo Lu's caravan to follow them.

A few members of the Holy Dragon City's patrol team jumped into the car, kicking up a cloud of dust as they continued their patrol.

After another two hours of traveling, the caravan finally arrived at Holy Dragon City. At the same time, they saw the huge city walls that shocked everyone.

After seeing the city wall, the members of the caravan all exclaimed in admiration, because everyone knew what such a city wall meant.

With this city wall as a barrier, there must be a safe world inside!

After the Fire Tribe's caravan arrived, staff from the Holy Dragon City immediately came over and arranged for them to rest by the river. They told them that they had to wait here for a few days.

Huo Lu and the others had no objections to this. In their opinion, this was very normal.

When trading in many towers, they didn't have the right to enter, so they all chose to trade outside the city.

It was already amazing that Holy Dragon City could build a special business district.

In the next few days, Huo Lu and his caravan waited in peace.

More and more caravans arrived at Holy Dragon City. They were of different races, and there were many familiar faces among them.

After everyone set up camp by the river, they began to communicate with each other. During this period, there were all sorts of speculations and rumors about Holy Dragon City.

The caravans were actually very curious about Holy Dragon City, which had risen to power and was filled with all sorts of secrets.

There were countless conjectures regarding the Holy Dragon City Master Tang Zhen.

After listening for a few days, fire rude had a preliminary impression of this mysterious Holy Dragon City Master.

First of all, he was very strong. It was said that he had the cultivation of a Lord. In the Wildlands, he could be considered a top master.

They had strange abilities and possessed the skills of both cultivators and Holy Masters. They might even have storage demonic weapons or skills!

No matter what kind of storage ability it was, it was enough to make people jealous!

The most important thing was that the Holy Dragon City Lord could get his hands on countless good things of all kinds.

Among these items, there were many that were extremely expensive and had particularly good sales.

It was also because of this that the caravans from all races swarmed over.

They hoped to buy enough precious goods here and then sell them to other towers to make a profit.

Thinking of this, Huo Lu turned to look at the Holy Dragon City. He looked forward to the opening ceremony later so that he could make a big purchase.

As for what the opening ceremony was, Huo Lu didn't know. He only knew that it was a celebration.

At this moment, a loud noise was heard. It turned out that the Holy Dragon city's business district was about to open for business!

?

Chapter 295: the bustling commercial district

By the time Huo Lu rushed over, the Holy Dragon city's Gate was already wide open. A group of fully armed Holy Dragon City soldiers walked out and stood neatly on both sides of the gate.

After seeing these Holy Dragon City Warriors, the initial noise immediately weakened.

After a few days of contact, everyone knew that these Holy Dragon City Warriors were very serious and serious. It was best not to provoke them.

All of a sudden, loud music started playing. The tune was cheerful and relaxed.

The people in the caravan were attracted by the music and were intoxicated by it.

Some people were very curious about the source of the music. After looking carefully, they found that the sound came from two big black boxes.

"Oh my God, could it be that there are bards who play music hidden here?"

this box is too small to fit a person. Could it be some kind of monster that can make music? "

this should be some kind of magical machine. I've seen something similar in the elven race!

"Good stuff, I'll definitely buy two back later!"

Everyone looked at the speaker for a while, but they still couldn't get a definite answer.

Many people clicked their tongues in wonder. There were so many rare items in Holy Dragon City!

It didn't take long for Holy Dragon city's staff to come out and read the various rules of the commercial district to the merchants.

The voice was amplified by a loudspeaker and entered the ears of all the caravan members.

first, no littering is allowed. Violators will be fined.

second, you are not allowed to urinate and defecate anywhere. Violators will be fined.

"Third rule, no fighting is allowed in the commercial district. Violators will be punished!"

"The fourth Suan ni"

After hearing the various requirements of the commercial district, the members of the caravans began to whisper to each other. They did not understand the strange rules set by the Holy Dragon City.

However, since the other party had these requirements, he would just pay attention to them when the time came. There was no need to find trouble for himself.

After reading out all the rules, the staff announced that the Holy Dragon City Business district was officially open for business and invited all races 'caravans to enter.

The merchants from various races, who had been waiting impatiently for a long time, quickly rushed to the Holy Dragon city's Gate. Then, according to the staff's instructions, they went straight to the Holy Dragon city's commercial area.

As there was still a second wall behind the main city of Holy Dragon City, these caravans could not see the true layout of the Holy Dragon Valley.

However, the tall main and auxiliary cities of Holy Dragon City, as well as the mother tree that was as tall as a mountain peak, were clearly seen by these merchants.

When they discovered that Holy Dragon City had more than one tower, their evaluation rose once again.

After walking for a short while, a huge mountain peak came into view. On the mountain peak, the words 'Holy Dragon City commercial district' were shining brightly!

There were two huge embossed of divine Dragons on the rock wall, looking very lifelike and mighty.

No one knew what kind of creature this Divine Dragon was, but just by looking at its form, they knew that it was definitely not simple!

There was a huge passage under the mountain, which was the real entrance of the commercial district.

Countless flowers were placed on both sides of the entrance, and the guards of the commercial district in black armor were lined up in two rows, looking majestic.

When the caravan members arrived, a large number of fireworks began to erupt, leaving everyone dumbfounded.

A song and dance performance began, and then the person in charge of the business district said a few words and announced the official opening of the business district!

Everyone recovered from the gorgeous song and dance, and quickly passed through the huge door under the guidance of the staff of the commercial district.

The caravan members were stunned when they saw the commercial district!

They boasted that they had traveled far and wide and had seen countless local customs and practices. However, it was definitely their first time seeing a place like the Holy Dragon city's business district.

To describe it in one word, it was beautiful!

The building was tall and majestic, and the decorations were gorgeous and beautiful.

The streets were long and wide, and the surface was clean.

The plants were competing for beauty and seemed to be full of vitality.

Such a huge Valley was actually within the scope of the commercial district. Its area could be imagined!

In addition to the cheerful music and dancing colored flags, all of this combined together shocked the thousands of caravan members, and they were unable to recover from their shock for a long time.

However, in the blink of an eye, their eyes burst with a shocking light. They quickly went to the various shops according to the instructions of the staff.

The streets of the commercial district were filled with curious and shocked merchants, who were constantly going in and out of various shops.

At this time, in the huge shopping mall of the Holy Dragon City, a group of foreign merchants were standing in front of a stall, holding all kinds of condiments and constantly studying them.

At another stall not far away, a few merchants were gathered together, watching the salesgirl demonstrate how to use soap.

Near the center, a foreign merchant bought 500 kilograms of salt and sugar.

Just as he was about to use the brain bead to pay, he was told that he had to first exchange for the Holy Dragon city's special currency before he could come over to settle the bill.

The foreign merchants mumbled to toot, thinking that the Holy Dragon city's actions were unnecessary.

However, under the staff's insistence, the foreign merchant had no choice but to run to the Holy Dragon City Bank in the commercial district. After exchanging a large pile of thin paper notes, he completed the transaction.

Looking at the colorful notes in his hand, the foreign merchant suddenly had a feeling that these notes were much more convenient to carry than his brain.

More and more merchants ran to Holy Dragon city's bank. They exchanged notes while discussing Holy Dragon city's strange trading rules.

The largest value of the paper notes that the Holy Dragon City exchanged for them was one thousand dollars, which was equivalent to one thousand brains. The smallest value was one dollar, which was equivalent to one brain.

There were also some coins with even smaller values, but most of the merchants did not exchange them.

Tang Zhen had prepared these notes a long time ago, and they were finally being used.

At this moment, the Holy Dragon city's bank was filled with merchants holding their heads, waiting in line to exchange for money.

After they got the money, they looked at it for a while and quickly went to the store, afraid that the goods they wanted would be bought by others.

Unknowingly, the large number of brains brought by these caravans had all entered the pockets of the Holy Dragon City.

A foreign merchant carried a pile of cash and quickly entered a store with his guards. Then, he shouted to the young salesgirl, "I want this kind of white wine, this kind of red wine, and that kind of wine. I want them all!"

This merchant had been doing business in the dwarf City area for a long time, and he knew that the dwarves were all drunkards. As long as it was good wine or strong wine, he could exchange it for a huge profit from the dwarves.

He had accidentally entered the store just now and was immediately attracted by the variety of drinks.

When he saw the wine, he knew that his chance to make a fortune had come.

Therefore, after hearing the shop assistant's request, the foreign merchant changed into paper notes without hesitation and then quickly ran back to carry out the transaction.

After seeing the boxes of white wine being moved to his car, the foreign merchant heaved a sigh of relief and then entered other shops.

This was a rare opportunity, so he had to earn a lot of money!

There were many merchants with the same mentality. They were all in high spirits and lingered in these shops.

Carrying the money he had just exchanged, fire Lu followed the staff of the commercial district. They soon arrived at a spacious and bright shop.

Looking at the decorations in the shop, Huo Lu suddenly had a feeling that the trading markets he had been to in the past were no different from the slums.

After walking around the shop, Huo Lu found the item he wanted to buy. It was the black box that allowed long-distance communication.

The young salesgirl noticed that Huo Lu was staring at the walkie-talkie, so she immediately walked over with a smile and began to explain the functions and usage of the walkie-talkie to him.

The more fire Lu listened, the more excited he became. He took the walkie-talkie and fiddled with it a few times. After testing it on the spot, he immediately decided to buy it.

After asking the salesgirl for the price, Huo Lu bought 100 walkie-talkies in one go, as well as solar-powered chargers and other equipment.

This pile of items had cost Huo Lu 150000 brain beads!

However, Huo Lu did not feel any heartache because he knew that he could get at least double the profit after he took these walkie-talkies to the advanced city in the distance.

Immediately after, fire Lu began to ask about the uses and prices of other goods. Every time he saw an item that tempted him, fire Lu would buy it without hesitation. He was very decisive!

Just as Huo Lu had spent most of his time ordering his men to load the goods onto the truck, a series of exclamations suddenly came from not far away!

?

Chapter 296: The application card that caused! sensation

It was the nature of all races to enjoy the show, so when the exclamation was heard, it immediately attracted a large group of merchants to watch.

Unknowingly, there were more and more merchants watching.

When Huo Lu got close, he saw a sweet-looking girl standing on the high platform, showing a dazzling card.

The cards were exquisitely made, with all kinds of patterns drawn on them, constantly flickering with light. They could be collected as art.

is the Holy Dragon City going to sell these cards? but these things aren't worth much? "

Huo Lu was full of doubts. After all, art didn't have much of a market in the Wildlands.

Although he was suspicious, he still patiently watched.

The human girl picked up a card and said to the crowd, " next, I need a friend to come up on stage and test the effect of this card. Which friend would like to try it? "

The group of foreign-race merchants looked at each other, and soon, a young foreign-race man walked up to the platform.

The girl in the long dress smiled and handed the card to the young man. Then, she told him that he only needed to tear the card.

After the young man took the card, he tore it open under everyone's gaze.

A transparent protective shield appeared out of thin air, firmly protecting the young man in the middle.

Seeing the protective shield, many foreign-race merchants immediately cried out in alarm.

“Oh my God, what did I just see?”

this is a Holy master’s protective barrier skill!

how is this possible? I know this young man. He’s obviously just an ordinary merchant without any cultivation!

“Could it be that this card is really as they say, that it can let an ordinary person use a cultivator’s skill once?”

A long-robed foreign Holy master observed for a while from the crowd and said with certainty, “ it can’t be wrong. This is a Holy master’s protective shield, and its protective effect is twice as strong as a normal Holy master’s skill!

With the Holy master’s affirmation, the surrounding merchants immediately became noisy and started discussing fervently.

They could see a rich business opportunity in the application card!

Just think about it, during a battle between cultivators, if someone suddenly took out an application card and burst out with a powerful attack, how much impact would that have on the battle?

If an ordinary person without the strength to even truss a chicken were to suddenly tear up the application card and display a powerful cultivator skill, wouldn’t he be able to instantly kill an unprepared cultivator?

If such an application card were to be brought to a high-level city in the distance, the Holy Masters and cultivators would definitely buy it at a high price!

His own cultivation was very low. If he had a bunch of cards to protect himself, wouldn’t it be much safer?

No matter what the purpose was, the application card had enormous value!

After thinking about that, there were already some foreign merchants who couldn’t wait to ask about the price of that kind of application card.

The girl smiled and asked everyone to wait. Then, she took out an application card and showed it to everyone.

There was a constantly spinning vortex drawn on the surface of the application card. At a glance, it seemed to be able to absorb souls.

is this also an application card? why do I feel that the pattern is moving? ”

“What’s the use of this card?”

yeah, hurry up and tell me. I’m so anxious!

Under everyone's urging, the girl smiled and introduced to everyone, "Everyone here is a guest from afar. It must have been very hard on you all along the way.

Most importantly, you'll have to carry a large amount of goods along the way, which is the most cumbersome and troublesome thing.

And the application card in my hand can help you avoid the trouble of transporting goods. With just one application card, you can easily carry all the goods!"

As soon as the girl finished speaking, the merchants immediately exploded. They were smart enough to instantly understand the meaning of the girl's words.

She didn't need to carry a large number of goods on the road and only needed to carry an application card. Didn't that mean that the application card in her hands had the function of storage?

On this continent, storage-type demonic weapons and equipment were legendary existences. Ordinary people would not even have heard of them!

Even a Holy master's storage skill was something that could only be found by chance. The Holy Masters who mastered this skill were as rare as Phoenix Feathers and Qilin horns!

But today, in the Holy Dragon city's business district, they actually said that their application cards could store things. This was simply shocking!

Did the Holy Dragon City really have such a thing, or was it just for show?

In the crowd's impatient mood, the girl smiled and invited people to go up the stage for the test.

But this time, everyone raised their hands. Some people even rushed up to the stage impatiently.

The guards of the commercial district immediately took action and drove the merchants away.

Huo Lu was lucky enough to be chosen by the girl. He walked up to the platform with excitement.

"You just need to hold the card in your hand, press this place, and say a secret word. Then you can store the things you want to store in it.

When you want to release it, you just need to press this place, say that secret phrase, and tear the card!"

After listening to the girl's introduction, Huo Lu immediately took the card and said his name according to the girl's instructions.

Holding the application card in his hand, fire rude excitedly muttered "keep" to a box on the counter.

Under everyone's watchful eyes, the huge wooden box disappeared without a trace!

"Heavens!"

This time, all the foreign merchants had gone completely crazy. They were shouting loudly, their eyes were red, and they kept waving the cash in their hands. They were extremely agitated.

"Hurry up and let it out, hurry up and let the box out!"

“That’s right, you just need to tear the card!”

“Huo Lu, you bastard! Do you want me to die of worry?”

Under the angry roars of the merchants, Huo Lu took a deep breath and tore the card into pieces.

There was a flash of light, and the card disappeared without a trace. The big box that had disappeared appeared in front of everyone again.

After seeing this, the foreign merchants started shouting again, clamoring to buy storage type application cards!

After the girl saw this scene, a smile appeared at the corner of her mouth. She immediately waved her hand to signal for everyone to be quiet.

After the crowd’s excited mood had slightly stabilized, the girl told the impatient merchants that these application cards were only sold in the Holy Dragon city’s auction.

And tonight, the Holy Dragon city’s auction house would hold the first auction!

When the time came, the application cards would be auctioned off in groups, and the highest bidder would get them!

After hearing that the cards couldn’t be sold with a price, everyone was disappointed.

They were naturally clear about the value of those application cards. After they were put in the auction house, they would certainly sell for an extremely shocking price!

However, they quickly made up their minds to participate in the evening’s auction. Even if they had to risk their lives, they had to get a few application cards and bring them back!

As long as he could bring those cards back, he would definitely get a super high return of profit. He definitely couldn’t miss such a business!

It didn’t matter if he didn’t have enough brains. As long as he had a few acquaintances working together, he believed that he would definitely be able to get a set of application cards.

Thinking of this, these foreign merchants immediately divided into countless small circles. They hid in the corners and whispered, discussing the plan for the night.

It didn’t take long for all the merchants in the commercial district to know of the existence of the application card.

While they were marveling, they also began to plan how to get an application card.

If nothing unexpected happened, there would be a fierce battle in the Holy Dragon city’s auction house tonight!

?

Chapter 297: The commercial district at night (1)

The merchants of the foreign races moved back and forth non-stop, and it took them a whole day to walk around the commercial district.

Although their legs were sore and their mouths were dry, everyone was in high spirits.

In just one day, they had seen too many new and interesting goods, and had repeatedly marveled at the abundance of resources in the Holy Dragon city's business district!

They had been doing business for many years and could be said to be experienced and knowledgeable, but they had to admit that the Holy Dragon city's commercial district was the best place they had ever seen.

A market of this scale could not even be seen in the high-end buildings in the distance.

Seeing that the sun was about to set, the foreign merchants prepared to return to the temporarily rented caves and inns to rest as usual.

The nights in the world of loucheng were extremely boring. In other places, the merchants would either go to the taverns for a drink or go back to sleep early!

But just as these foreign merchants were about to leave the commercial district, they saw more and more Holy Dragon City residents.

They swarmed into the commercial district in groups, and everyone's expression was very excited.

Most of these residents were dressed in brand new clothes and were clean. Some girls even had light makeup on, making them look bright and beautiful.

Whether it was his appearance or his mental state, he gave these foreign merchants a huge shock.

The humans in other places did not have such spirit!

The Holy Dragon city's residents had an indescribable feeling.

They were neither humble nor arrogant, and at the same time, there was a faint sense of pride in their words and actions.

Looking at the confident residents of the Holy Dragon City, these foreign merchants who had originally looked down on the human race slowly put away their contemptuous hearts.

They even had a faint sense of inferiority, because the clothes of these residents were even better than those of the wealthy merchants!

Lowering their heads and glancing at the long and short robes they were wearing, these merchants reminded themselves that they had to go to the clothing store tomorrow and buy a new set of similar clothes.

But what were these Holy Dragon City residents doing in the commercial district at sunset? were they having a bonfire party?

The non-human merchants who had nothing to do didn't rush back to rest. Instead, they stayed and watched.

However, it didn't take long for these foreign merchants to open their eyes and mouth wide in shock.

When night fell, the commercial district immediately fell into a sea of joy and lights.

After the lighting system of the flashing gold race had been improved, it was perfectly arranged in the commercial district. Once it was activated, the place immediately became colorful and gorgeous!

Whether it was the tall buildings, the sides of the road, or even the flowerbeds, they were all cleverly installed with lighting equipment.

Under these lights, the business district became a city that never slept, as beautiful as a Fairyland.

These foreign-race merchants were mixed in the crowd, feeling that their eyes were not enough to see.

On the White benches by the roadside, in the lively taverns, and on the fence by the canal, the Holy Dragon City residents were everywhere with carefree expressions.

After a day of work, they began to enjoy the rare leisure time.

As they were walking, a loud noise suddenly came from the sky, attracting everyone's attention.

A colorful stream of light shot into the night sky. It was extremely beautiful against the night sky.

After the stream of light rose high into the sky, it paused for a moment before exploding, bursting out with a colorful brilliance!

"Oh my God, this is too beautiful!"

"This is a firework, it's a good thing the city Lord brought back!"

that's the square. Let's go and take a look!

While everyone was talking, more and more fireworks began to bloom in the sky. As they looked at the beautiful scenery in the night sky, there were constant exclamations and praises.

The foreign merchants were also amazed and quickly followed the crowd to the square.

At this time, the square was full of people watching the fireworks, but because of the Square's size, it did not seem crowded.

At this time, in the huge square of the commercial district, there was a continuous stream of fireworks in the sky, causing the onlookers to exclaim in surprise!

In the main city area separated by a row of mountains, the mother tree was not willing to be left out either. Countless rainbow-colored brilliance slowly rose from its branches and leaves, erupting with an even more dazzling brilliance!

The mother tree, who loved to show off, would never allow her beauty to be compared to other things.

The brilliance of the mother tree and the fireworks in the commercial district complemented each other. The entire sky of Holy Dragon City was instantly dyed with a brilliant light.

The fireworks continued for half an hour and slowly ended in the reluctant eyes of the crowd.

The non-human merchants were speechless for a long time. After watching the splendid fireworks, they were all intoxicated.

In their excitement, the foreign merchants also decided that they must buy some fireworks to bring back.

When they imagined themselves setting off fireworks, the scene of thousands of people watching them satisfied their vanity.

After watching the fireworks, the Holy Dragon city's residents began to travel around.

The commercial district was huge, and it was the first time for many of them to come here. Naturally, they wanted to take a good look around.

In a Tavern on a certain Street, Huo Lu and seven or eight foreign merchants were gathered together.

On their table were the delicacies prepared by the restaurant's chef. They were delicious and exquisite, making people drool.

More than half of the bottle of white wine was drunk, and everyone's face had a trace of aftertaste.

Compared to the wine he had drunk before, Holy Dragon city's white wine was more mellow, had a stronger aftertaste, and had a longer aftertaste.

Although the few of them were intoxicated by the fireworks, the night view, and the delicious food of the business district, they were more concerned about those magical application cards!

The reason they had gathered together was to discuss how to get a set of application cards at the auction.

There were countless small gatherings like this in the commercial district.

These foreign-race merchants were all holding back their energy, wanting to win the competition.

The foreign merchants that fire rude had gathered were all acquaintances. They trusted each other very much, and could cooperate with each other without any worries.

After some discussion, everyone decided to take out 200000 brain beads each. In total, they had 1.6 million brain beads.

If it wasn't enough, they could continue to increase the investment, but it couldn't exceed two million brain beads!

After everyone finished their discussion, they immediately clapped their hands and drank the wine in their glasses.

After calling for the waiter to settle the bill, Huo Lu threw out two notes. Then, everyone headed to the area where the Holy Dragon auction house was located.

Passing through the bustling crowd, Huo Lu and the others soon arrived at the brightly lit auction house. They strode into the bright and spacious hall.

At this moment, the hall that could accommodate thousands of people was filled with foreign merchants who were full of ambition. They kept glancing at the potential opponents around them with very serious expressions.

Huo Lu and the others were first led to a room. Then, someone pressed a flashing black box in front of them.

After walking around the commercial district for a day, Huo Lu and the others had gained some knowledge. They knew that they were using something called a camera, which could take pictures of the scenery.

What shocked them the most was that the photos spat out by the camera were so lifelike that they looked no different from real people.

It didn't take long for Huo Lu and the others to receive a card with their own photos.

The staff in the commercial district told them that as long as they spent a certain amount in the auction, they could upgrade their level and get more discounts.

Huo Lu thought for a moment. He really admired the marketing methods of this auction house.

After finding a place to sit down, Huo Lu and the others waited for the auction to begin in silence.

Time passed by slowly, and more and more foreign merchants entered the auction.

While they were still in a state of anxiety, the auction finally began!

?

Chapter 298: Being fought over to use the card

The auction venue was brightly lit, and melodious music reverberated continuously.

On a luxuriously decorated stage, a young man in a tuxedo walked to a table and looked around with a smile.

After a period of training, this young man could already calmly deal with the situation in front of him, his movements free and easy.

With a smile on his face, he said in a magnetic voice, "Welcome, everyone, to the Holy Dragon auction house. This is the first time our auction house is open for business!

In order to thank everyone for coming, the city Lord has decided to give you a 10% discount on all the items up for auction tonight.

For tonight's auction, our Holy Dragon city's auction house has collected a large number of treasures. I guarantee that everyone will return with a full load.

I believe that everyone is most concerned about how many application cards will be put up for bidding?

now, I can tell you that there are a total of twenty sets of application cards for sale tonight. Each set of cards includes two cultivator skill cards, two Holy master skill cards, and one storage card!

It's a once in a lifetime opportunity, I hope everyone will participate in the bidding.

I hereby announce that the first auction of the sacred Dragon auction house has officially begun!"

As the auctioneer's voice fell, two girls immediately carried a glass display case up.

Through the clean glass cabinet, these foreign merchants saw an exquisitely-made double-barreled hunting gun, which was beautifully decorated.

These foreign merchants were all experienced and knowledgeable people, and they immediately recognized that it was a flintlock.

In fact, there were cultivators who used Goblin flintlocks in these caravans, and they were once proud of it.

However, ever since they arrived at Holy Dragon City and saw the flintlocks of the Holy Dragon city's soldiers, they never took out these Goblin flintlocks again.

Compared to the flintlocks of the Holy Dragon City Warriors, their Goblin flintlocks were almost like fire sticks!

After witnessing the power of the automatic rifle, these foreign merchants also offered a high price to sell a few of them for self-defense.

The price of a few thousand brain beads might scare away ordinary cultivators, but it was nothing to these foreign merchants!

Unfortunately, the automatic rifle was not for sale. No matter how much the foreign merchants wanted it, they couldn't buy a single part.

Many foreign merchants had been brooding over this matter.

They didn't expect that there would be flintlocks for sale at tonight's auction, which made the foreign merchants who had been eyeing the automatic rifles very excited.

"Whether it's for personal use or as a gift, you must buy it."

While the foreign merchants were making up their minds, the auctioneer had already taken out the flintlock and started a brief introduction.

"This is a double-barreled grapeshot gun arranged up and down. It's loaded in the middle, and it's loaded with two bullets at a time and 100 Bullets.

This weapon was very powerful. When shooting at a level 2 monster, it could kill it in one shot if it hit a vital point!

Regardless of its power or appearance, this weapon was extremely outstanding!

The starting price of this gun is 2000 Yuan. Please make your bids now!"

As soon as the auctioneer's voice fell, someone impatiently began to bid.

"2100 Yuan!"

"Two thousand one hundred and fifty Yuan!"

"Two thousand three hundred Yuan."

"....."

The final auction price of the double-barreled shotgun was 5900 Yuan, which was bought by a foreign merchant with yellow hair.

The second item was a unique mo weapon that was quickly sold.

Then, the third and fourth pieces of Kasaya were revealed.

More and more items were being auctioned off, and the application card that everyone had been waiting for finally appeared.

Looking at the application cards in the box, the eyes of the foreign merchants turned red, and they rubbed their fists and palms, waiting to bid.

Among those application cards, the most valuable one was the storage card, which had great research value.

When these cards were brought to the high-level city in the distance, it would definitely cause a sensation!

Although the practitioner's skill application card wasn't as valuable as the storage card, it was still a good thing that was hard to come by.

"I believe that everyone already has a clear understanding of the application of the card, so I won't waste any more words.

The first set of cards has a starting price of 500000, with each increment of 10000. Please make your bids!"

After the auctioneer said this, the foreign-race merchants continued to bid.

"Five hundred and ten thousand!"

"Five hundred and twenty thousand!"

"....."

"One million!"

After the first set of cards was sold for one million, the second set was sold for 1.2 million.

Then, it was the third and fourth groups.

The atmosphere in the hall was extremely lively, with laughter and sighing from time to time.

When all twenty sets of application cards were sold, he had obtained a total of more than 20 million brain beads!

In the VIP lounge on the second floor, Tang Zhen also felt a little surprised after learning of this number.

Tang Zhen spent a total of nearly 500000 brain beads to buy these application cards, but in the end, he got 40 times the return!

This kind of enormous profit, even Tang Zhen was unceasingly moved.

However, Tang Zhen was also very clear that this kind of price wouldn't last long. After a few auctions, the price of the application card would gradually decline.

The rarer something was, the more valuable it would be. The greatest value of those application cards lay in their research. In the period when they had just appeared, there weren't many rich people who would use them in battle.

What Tang Zhen paid attention to was actually the huge market of ordinary cultivators with unlimited potential!

At that stage, the price of the application card was too high, and ordinary cultivators couldn't afford it.

Only when its price dropped would it be possible for ordinary cultivators to use it.

No matter what, the Holy Dragon City now had a new source of income. For at least one or two years, the application card would provide the Holy Dragon City with an endless stream of brain beads!

With the income of these brain beads, Tang Zhen could start some of his plans.

The first thing he had to build was a huge rebirth altar that covered an area of 100000 square meters.

This altar required a large number of brain beads to be embedded to build a huge Soul transmission array.

After it was completed, it could receive the soul that was bound to the altar and receive the soul signal from the original world.

The altar would store the soul fluctuation information of the bound person. After the bound person died, the soul could be instantly recalled by the altar.

These souls would be protected by the altar, waiting to enter a new body and complete a rebirth process.

Tang Zhen estimated that in order to complete this altar, he would need to invest at least 100 million brain pearls!

This was definitely a big project. Apart from not having to worry about the site and Tang Zhen being able to use the [terrain transformation plug-in] to complete it, all the other work had to be done manually!

Based on the scale of the altar, it would take at least a year to complete the construction even if they started now!

Other than building the altar, Tang Zhen also needed to cultivate a large number of bodies, purchase large amounts of ore materials for forging mo weapons and equipment, as well as medicinal herbs and strange items from other regions.

No matter which task it was, it required a large amount of brain matter!

It was also because of this reason that Tang Zhen still felt that he did not have enough money to spend even though he had countless brains!

Fortunately, Holy Dragon city's development had already entered the right track. After the business district opened, it would bring Tang Zhen a continuous stream of income.

When the Holy Dragon city's commercial district became famous in the wilderness and countless caravans rushed here, Tang Zhen no longer had to worry about his brain!

?

Chapter 299: business cooperation, mercenary guild

Early the next morning, the members of the foreign trade caravans started to get busy again.

They walked out of the cave that the Holy Dragon City had rented and started a new round of purchases.

At the same time, many members of the foreign race's caravans went to the management office of the commercial district.

They wanted to rent a few temporary stalls to sell the goods they had brought.

Unlike the goods sold in Holy Dragon City, most of their goods were raw materials, as well as many rare items that could not be found in the Wildlands.

Even Tang Zhen took the time to go around and bought a lot of strange things.

The temporary stalls rented to these foreign merchants were located in a wide field in the commercial district, and all of them were tall white Rock buildings.

While these foreign merchants were selling their goods, the Holy Dragon city's buyers would also appear in this area to pick out the materials that the Holy Dragon City needed.

At the same time, on the board in the commercial district, there was a list of large amounts of materials to purchase. Most of them were ores for forging mo weapons.

Foreign merchants who were interested in dealing with the Holy Dragon City could go directly to the office in the commercial district and discuss the price with the staff in charge.

In order to increase the enthusiasm of these foreign tribe merchants, the Holy Dragon City had specially taken out a batch of application cards to be sold to the foreign tribe merchants who cooperated with the Holy Dragon City.

This reward had an immediate effect. The foreign merchants who were still waiting and watching immediately swarmed to the office in the commercial district.

They all patted their chests and promised that they would deliver the ores and materials needed by Holy Dragon City within the stipulated time.

It didn't take long for the staff of the commercial district to have dozens of contracts in their hands.

When the ores and materials were delivered, dwarf hearthhammer would be able to go all out!

Ever since he came to Holy Dragon City, dwarf hearthhammer had sighed more than once that his luck was really good.

If he had not come to Holy Dragon City by chance, he would not have come into contact with so many forging materials and all kinds of novel items.

Tang Zhen had brought all kinds of information from his original world, which greatly widened hearthhammer's horizons. His forging skills also increased by the day.

Moreover, the Holy Dragon City had a beautiful environment, superior welfare, and an adequate supply of fine wine.

For the dwarves who loved wine as much as their lives, this place was simply heaven!

However, ever since Tang Zhen had entrusted hearthhammer to design a new type of armor for the Holy Dragon city's soldiers, hearthhammer's alcohol addiction had weakened a lot. At the same time, he had put more energy into his work.

Ever since hearthhammer's first work, which was the commercial district Guard's Black armor, was introduced and received a lot of good reviews, it was as if hearthhammer had found his lifelong goal.

His greatest wish now was to design a standard armor that could shake the continent and make his name known to all cultivators.

The materials for forging magic weapons were on the list provided by hammer dwarf, and the Holy Dragon city's commercial district was in charge of purchasing them.

At this time, in the commercial district, other than the office, the Holy Dragon City mercenary Union Hall at the end of the street was also packed with cultivators in all sorts of clothes.

Some of these people were guards of the trade caravan, some were wandering cultivators, and some were even exploration teams from the wilderness!

In the Flyers that Holy Dragon City had sent out, not only did they mention the wide variety of goods in the business district, but they also mentioned the Holy Dragon city's mercenary Association.

According to the introduction in the flyer, the Holy Dragon City mercenary Association could provide all kinds of missions for a long time, and every mission had generous rewards.

As long as they registered at the mercenary Association, they could receive missions according to their rank and earn mission points.

These mission points could be exchanged for Holy Dragon city's special currency to buy all kinds of weapons and equipment, as well as food and daily necessities.

If one's points reached a certain level, they could even use the points in their hands to exchange for the qualifications to become a reserve resident of Holy Dragon City!

This was a very attractive condition, and it was also the main reason why most of the wild cultivators came.

Within a radius of over a hundred li, who didn't know Holy Dragon city's strength and superiority? to be able to become a resident here was something that many people dreamed of.

When a mercenary group's rank reached a certain level, they could also buy many special goods, including the old bolt rifles that Tang Zhen had piled up in the warehouse.

The Holy Dragon city's firearms were treated as divine weapons to kill monsters and were sought after by countless cultivators!

At this time, in the hall of the mercenary Union, these valiant cultivators were surrounding a notice board, constantly searching for a mission that suited them.

"This mission to investigate the surrounding looters is not bad, we'll take it!"

collecting edible fish. This mission is interesting!

providing information on an unexplored building's location is actually a reward of 10000 Yuan Divine Dragon Dollars!

With the staff member's explanation, the cultivators understood all the contents of the mission and at the same time, they chose the mission that was suitable for them.

The cultivators immediately went to the counter not far away and began to line up to register as a mercenary group.

Intimidated by the fully-armed Holy Dragon City cultivators, these rebellious cultivators were very well-behaved, and no one dared to cause trouble here.

Not to mention the fine weapons in their hands, just the fact that these Holy Dragon City cultivators were all at level three cultivation was enough to intimidate these wild cultivators who were basically at level two cultivation!

After the registration was completed, these newly established rookie mercenary groups would quickly leave and head to their respective mission locations.

There were also some relatively wealthy mercenary groups that were not in a hurry to leave. Instead, they went to the weapon store next to the mercenary Association to purchase those fine weapons.

The armor and weapons that Holy Dragon City had discarded were now displayed here and sold at clear prices.

Although these were outdated, their quality was undeniable. They were much better than the equipment that the mercenaries were wearing.

It didn't take long for them to sell nearly 100 ordinary weapons and equipment, which were equipped by the mercenaries.

Tang Zhen changed his appearance. After walking around the mercenary Association once, he returned to his room.

In the next few days, everything in Holy Dragon City was normal.

More and more caravans and Wanderers poured into Holy Dragon city's business district, bringing with them a large number of brains.

During this period, there were people who caused trouble in the commercial district, thieves were all quickly subdued by the guards and received quite severe punishment.

After witnessing the Holy Dragon city's Swift and decisive means, there were very few people in the commercial district who dared to cause trouble. At the same time, they had gradually become used to the various rules of the commercial district.

After Tang Zhen saw that everything was on the right track, he teleported back to his original world.

This time, Tang Zhen planned to head to the ice Bear Alliance and send a batch of brain pearls to Ivanov to replace the brain pearls on the rebirth altar that had already lost their effectiveness.

In addition, Tang Zhen also planned to purchase a batch of machinery and equipment from the ice Bear Alliance to develop the processing and manufacturing industry of the Holy Dragon City.

He also needed to purchase a batch of supplies to deal with the Cold Moon disaster.

The most important thing was that Tang Zhen planned to set up an array in the ice Bear Alliance to speed up the detection of the world coordinates of Lou Cheng.

After disguising his appearance, Tang Zhen used the [electronic kit] to hack into the Wei island's aviation system and left a ticket for himself.

After taking a car to the airport, Tang Zhen successfully boarded the plane to the ice Bear alliance with the help of the application.

The plane flew steadily in the stratosphere. Tang Zhen stared at the clouds outside the window without blinking. He was fantasizing in his heart that one day, he would be able to fly in the sky with his body.

Tang Zhen took out a book made of monster skin from his spatial ring and began to read it carefully.

After an unknown amount of time, when Tang Zhen regained his senses, the plane had already landed at the ice Bear Alliance's airport.

Tang Zhen walked down from the plane. He inhaled a deep breath of air as he felt the rustling cold wind blowing in his face.

Ice Bear Alliance, I, Tang Zhen, am back!

?

Chapter 300: Super soldier of the ice Bear Alliance

Tang Zhen was wearing a black trench coat and a pair of black military boots as he slowly walked out of the airport.

Because he had the cultivation of a Lord, he would unconsciously reveal a terrifying aura.

This also caused the passers-by who passed by him to subconsciously avoid him.

After taking out his mobile phone and calling Ivanov, Tang Zhen stood by the roadside and waited patiently.

Since he had nothing to do, Tang Zhen looked around with a cigarette in his mouth.

Inadvertently, two pretty girls from the ice Bear Alliance passed by.

The two of them were extremely tall and had hot bodies. They both had long platinum hair.

Judging from their mannerisms, they seemed to be working as models.

Tang Zhen looked at the back of the two and could not help but think of Natasha, that beautiful girl with a devilish figure.

Although the two of them had only had one in-depth contact, they had left an extremely deep impression on Tang Zhen.

A row of luxury cars sped over and slowly stopped by the side of the road.

The passersby all looked over, including the two girls from the ice Bear Alliance.

The doors quickly opened, and more than 20 strong Men in Black suits from the ice Bear Alliance jumped out.

One of the young men with an extraordinary bearing quickly walked to Tang Zhen after he got off the car and respectfully bowed.

welcome back to the ice Bear Alliance, dear Oracle!

After the handsome and cold-looking Ivanov finished speaking, he invited Tang Zhen to board the car.

Tang Zhen looked at Ivanov with a smile that was not a smile. This fellow seemed to have become younger and younger ever since he had changed his body.

Sitting in the back seat of the car, Ivanov began to talk to Tang Zhen and told him about his recent achievements.

When the car passed by the two Ice Bear Alliance girls, Tang Zhen took a few more glances, but was noticed by Ivanov at the side.

This guy had a smile on his face as he continued to chat with Tang Zhen. At the same time, he took out his phone and fiddled with it.

Tang Zhen didn't care about Ivanov's actions. He only listened to his report and nodded secretly.

Ivanov's development was quite good, and he now controlled a large force. He was extremely glorious.

However, recently, the forces under Ivanov's control had encountered some trouble.

A force of equal strength had repeatedly provoked them, and the two sides had clashed several times in the open and in the dark. Ivanov was unfortunately at a disadvantage!

Fortunately, Ivanov was not fighting alone. There were now four gatekeepers in Tang Zhen's hands, and they were all helping each other.

Just last evening, there were already helpers from Wei nation and kimchi nation who flew to the ice Bear Alliance to help Ivanov complete some secret work.

Tang Zhen came to the ice Bear Alliance this time and had many things to deal with. He would definitely stay for a few more days.

Since Ivanov was in trouble, he might as well help him deal with it.

The two of them chatted with each other, and it didn't take long before they drove into a heavily guarded Manor.

Tang Zhen got out of the car and saw Pargo and his sister standing together, waiting for him.

"Welcome, Lord Oracle!"

Natasha was wearing a windbreaker. She was tall and proud, but her face was still cold, which fit her identity as a Saint.

After nodding to the two of them, Tang Zhen entered a luxuriously decorated Hall under Ivanov's lead.

Tang Zhen took a sip of coffee as he sat on the soft sofa. After which, he took out a pile of information from his storage space.

"This is the technical information I got from the Wei Island. It's related to a special alloy. Find an expert to study it as soon as possible and see if it can be mass-produced!"

After saying this, Tang Zhen thought for a moment, took out a list, and handed it to Ivanov.

"Purchase according to this list. Some of the mechanical equipment and industrial materials must be of good quality!"

"If it's possible, this business will be given to Xufeng, and we'll buy it from him!"

Ivanov nodded. These were all small matters, and he could leave them to his subordinates to complete.

"Apart from that, I'm also planning to attend the American weapons and equipment Exhibition next month. You'll be in charge of making the arrangements.

"If you have any problems with funding, just let me know!"

Other than a huge amount of gold and gemstones, Tang Zhen also had the [universal electronic kit].

Through the internet, he could get a large amount of money without anyone knowing.

Ivanov nodded. This matter was not difficult for him.

After arranging the most important matters of this trip, Tang Zhen looked at Ivanov and slowly said, now, tell me everything about your opponent. If it's not too troublesome, I can help you solve it.

Ivanov was overjoyed and immediately told Tang Zhen the enemy's information without missing a single detail.

It turned out that the organization that was going against Ivanov this time had a very strong force in the original world, and the ice Bear Alliance was only a part of it.

Because of Ivanov's strong rise, the organization was suppressed like crazy.

Ivanov did not have any advantage over such an old force, which was why he had always been at a disadvantage.

After listening to Ivanov's story, Tang Zhen muttered to himself for a moment before ordering Ivanov to find ten men with excellent physical fitness.

Under Tang Zhen's continuous effort, the soul transmission experiment had already made quite a bit of progress.

The information on the training of the heavenly God Warriors obtained from the Wei Island also gave Tang Zhen a lot of inspiration. He then summed up a set of methods to quickly train super soldiers.

Tang Zhen planned to use this opportunity to test the results of the experiment.

Not long after, ten strong men from the ice Bear Alliance walked into the hall and stood in a line in front of Tang Zhen.

Tang Zhen sized up these ten strong men and nodded his head in satisfaction.

"There's an important plan that requires your participation.

I've mastered a method that can allow you to possess power beyond ordinary people, but the price is that you'll only have three to five years of life left.

I can give each of you a million American dollars as compensation for the damage you've suffered. At the same time, I'll give you a chance to be Reborn!

After the transformation, even if you don't have any bones left, you can be instantly reborn in a new body!

I've said everything I need to say. Now, tell me your choice.

If anyone doesn't want to participate in this plan, you can directly withdraw. I won't force you!"

After Tang Zhen finished speaking, he looked at the ten men with an expressionless face and waited for their reply.

Ivanov stood to the side, also waiting for his men's answer.

The ten people on the other side looked at each other, but no one chose to back out.

All of Ivanov's men had more or less heard about the rebirth altar.

Now that Tang Zhen had given them a guarantee that they could be reborn and a high compensation, they no longer had any concerns.

For the ice Bear Alliance, which was affected by the financial crisis, one million American dollars was definitely a huge sum of money.

The ten of them had no reason to refuse with just these bills!

He ordered Ivanov to find a quiet room and found a doctor to anesthetize all ten people before Tang Zhen started to work.

When he was studying the training data of the deity Warriors, he discovered that through continuous strengthening of the physical body, these deity Warriors would have far more physical strength and speed than ordinary people.

As for his spiritual strength, it did not increase significantly.

Tang Zhen's method was to bury the brain Pearl into the body of these soldiers. Then, he would use a special method to stimulate the energy of the brain Pearl. This way, it would be rapidly absorbed by the physical body and obtain strength that far exceeded that of an ordinary person.

However, the human body was too fragile and could not withstand such a terrifying power for a long time. Therefore, it would not take more than five years for the body to completely collapse!

The advantage of this method was that it didn't hurt the soul, and it didn't affect the rebirth at all.

Walking to the side of a bald brawny man from the ice Bear Alliance, Zhen Tang took out a scalpel and slowly cut open the other party's skull.
