

Alternate 31

[Chapter 31](#)

Sword Armor!

When a person encountered an unexpected surprise, it was very easy for them to have an abnormal emotional state.

Imagine if a wanderer from the alternate world who had been running around all day to fill his stomach was suddenly informed that he had obtained the special-level resident qualifications of a powerful building.

That surprise would definitely make this wanderer go crazy.

Tang Zhen was already so excited that he was about to go crazy. He had risked his life in Building World to get a small number of low-level brains.

But now, there were at least hundreds of level-three and above brain beads really placed in the box in front of him!

Hundreds of brain beads above level three. It was extremely difficult to get so many of them.

For Tang Zhen, this meant nearly a million gold coins. He could finally roar, "I'm finally free from poverty!"

No wonder his cell phone kept vibrating and he couldn't stop it. It was actually because of this!

Compared to Tang Zhen, this cell phone seemed to have a greater desire for the beads.

Holding a handful of beads in his hand, Tang Zhen smiled until he was about to suffocate. After calming down, he immediately counted the number of beads excitedly.

He was smiling the whole time. During this period, his expression would change every time he counted a bead.

After counting the beads, Tang Zhen placed it on the table and looked at the large pile of beads in front of him with a slightly stunned expression.

Among this pile of brain beads, there were 450 level-three brain beads, 50 level-four brain beads, and 10 level-five brain beads. In other words, they were worth a total of 1.9 million gold coins!

This was an extremely shocking number for Tang Zhen. It was a number that he didn't even dare to dream of in the past!

Now, it was time for him to absorb everything!

Tang Zhen roared in his heart. Then, he saw these brain beads slowly disappear in front of his eyes. Then, his personal information displayed a seven-digit balance.

Tang Zhen looked at the series of numbers and felt like he was looking at a mountain of gold.

However, at this moment, a caption suddenly popped up in front of him.

[The gold coin balance exceeds one million. The system has automatically entered the first upgrade. The time is 72 hours. Please wait quietly.]

Before Tang Zhen could recover, the words in front of him had already disappeared. The projection that he had gradually gotten used to disappeared, as if it had never existed.

Tang Zhen was a little unaccustomed to his normal vision.

Tang Zhen took out his cell phone and took a look. As expected, the cell phone had been switched off.

The troubled Tang Zhen put down his cell phone. At this moment, he felt a sense of loss. After all, this was the thing that changed his life.

Now that it was going to level up, Tang Zhen's heart was filled with anticipation. He wondered what it would be like after it leveled up.

Would there be more magical applications in the application store that was already very powerful?

After hiding his cell phone, Tang Zhen turned his gaze to the table. There was a bead on it that he had placed alone.

This bead looked extraordinary. Compared to the other beads, there was an additional faint halo around it, making it look extraordinary.

And it was indeed not simple.

This was a level-six brain bead that only lord-level monsters could have. It was worth at least a million gold coins!

Thinking about the horror of lord-level monsters, one could tell how valuable this bead was. It was definitely priceless!

At the same time, the lord-level brain bead was also one of the necessary items required to establish a high-level building. From now on, as long as Tang Zhen obtained another cornerstone, he could establish his own building in the alternate world!

He had searched high and low for it, only to end up finding it so easily.

As he gently played with the lord-level brain bead, one could imagine the emotions in Tang Zhen's heart.

After carefully putting away this bead that concerned his dream plan, Tang Zhen turned his gaze to the other items in the box.

Tang Zhen first picked up the short sword at the top and examined it carefully.

The total length of this short sword was about 45 centimeters. It had a purple sheath and a hilt of the same color. Its appearance was simple.

With a gentle pull, the short sword was unsheathed. Tang Zhen heard a soft sound being emitted, and then a purple-black sword body appeared in his eyes.

Light flickered on the purple sword. It was actually a strange translucent crystal with strange runes engraved all over it. This short sword was like a pool of water rippling, looking a little agile.

Just by looking at it, one could tell that it was extraordinary.

With a light slash at the wooden chair beside him, Tang Zhen was shocked to see that the heavy wooden chair was actually sliced in half by the sword.

In fact, he didn't use much strength, but the short sword itself seemed to have a power that turned the chair as soft as tofu.

Or perhaps it could emit an invisible sharp aura, and it was because of this aura that the chair was easily cut open!

No matter the specific reason, he had picked up a treasure.

With such a divine weapon, wouldn't it be easy and fun to slash the zombie monster like rubber?

After playing with the short sword for a while, Tang Zhen, who was still not satisfied, turned his gaze and stared at the black robe.

In fact, this dress was not a robe, but a costume similar to a combination of leather armor and a cloak. It felt extremely comfortable, light and smooth, as if one was touching soft skin.

Tang Zhen held it in his hand and looked at it carefully. He discovered that there seemed to be countless patterns hidden in the black soft cloth. They seemed to be runes, or some strange combination of patterns. In short, they looked mysterious.

Holding this robe in his hand, Tang Zhen vaguely felt that there was a mysterious power flowing in this cloth.

After thinking about it, Tang Zhen took out the sharp purple short sword and slashed the corner of the black robe.

He didn't expect that the sharp short sword that cut wood like tofu actually failed to cut through the fabric of the black robe.

At the same time, the sharp-eyed Tang Zhen also noticed that when the short sword streaked across his clothes, the pattern in the black fabric seemed to flicker.

There seemed to be a faint membrane of light blocking the sharp blade of the short sword.

He tried to stab the black robe with the short sword again, but it was still unscathed.

Tang Zhen was really shocked this time. This black robe's defense was so strong!

After carefully putting away the black robe, Tang Zhen checked the black leather armor inside and guessed if it also had terrifying defense.

It was unknown what kind of beast skin the black leather armor was made of, but it was also extremely comfortable to the touch. There were even patterns engraved on the surface, and its appearance was unique and beautiful.

On the two elbows of the leather armor were four black metal wrist guards that were buckled together.

Tang Zhen, who was filled with anticipation, was disappointed this time, because in front of the purple short sword, the black armor was actually extremely weak. He easily sliced off a small piece of it.

Tang Zhen was a little disappointed, but looking at the cool design of this leather armor, it must be expensive. He could wear it and show off.

At the thought of this, Tang Zhen put on the leather armor. It fitted him pretty well, making him look very powerful and domineering.

Tang Zhen got in front of the mirror and made a few poses. He accidentally touched a bump on the metal wrist guard. It was the eye of a monster.

“Swoosh!”

After a sharp sound, Tang Zhen saw a black light fly out of the wrist guard, instantly shooting a small hole in the mirror in front of him.

A black hole also appeared on the wall behind the mirror. When he bent down to take a look, he actually penetrated the wall!

Tang Zhen was shocked by this sudden situation. He looked at the small hole in the wall in a daze and then looked down at the wrist guard on the leather armor.

Only then did he completely realize that none of the items in this box were simple!

[Chapter 32](#)

Black Rock City Sending Troops!

After realizing this, Tang Zhen’s attitude towards these items immediately changed and he became serious.

He began to study this leather armor carefully. His hard work paid off. After about three hours, he finally understood the strangeness of this leather armor.

It had to be said that the black leather armor was a treasure not inferior to the purple short sword!

Its own defense was very ordinary, only slightly better than ordinary leather armor. The magical thing was its two wrist guards.

There was a mechanism on the wrist guard on his left arm. As long as he pressed hard on the mechanism, a black steel bullet would be shot out. This steel bullet was the length of an index finger, and its penetration power was extremely shocking.

There were five steel awls hidden in the wrist guard. After retrieving them, it could be pressed in and used again.

He could actually hide five life-threatening steel awls in such a thin wrist guard. Tang Zhen wanted to see what mechanism was so domineering and exquisite. Unfortunately, the wrist guard was built seamlessly, and he couldn’t dismantle it at all.

The other wrist guard could shoot out a hidden sword. It was also very sharp. Although it couldn't compare to the purple short sword, it still contained the element of surprise.

In all fairness, the weapon hidden in this wrist guard was indeed very lethal, and it also had the advantage of concealment. However, for Tang Zhen, who had a storage space, it was actually not too important.

As long as Tang Zhen was willing, he could take out anything from his storage space at any time. It was far more convenient and secretive than the weapon in the wrist guard.

The only thing that made him happy was that if the two wrist guards touched each other, they would produce a magical rising power.

This power gave him a magical feeling that made him feel as if he was as light as a swallow. It was as if he had lost two-thirds of his weight.

It turned out that Tang Zhen wasn't hallucinating. After activating this power, he almost broke the roof after jumping gently.

This room was more than three meters tall but Tang Zhen's head still hit it. After careful consideration, Tang Zhen leaped gently and actually raised nearly two meters high.

If he erupted with his second-level extreme strength again, Tang Zhen would probably be able to easily jump to the balcony on the third floor!

Unfortunately, this fleeting feeling could only last for a minute. If he wanted to use it again, he would have to wait at least three hours.

Although there was a time limit to using this power, it was still a rare treasure.

The current Tang Zhen far exceeded ordinary people in both strength and speed. Now that he could jump higher and further on this foundation, he was naturally very happy with it.

In that case, this leather armor and cloak would be his battle suit in the alternate world. Only then would these items be used to the fullest.

There were also a few rolls of leather paper in the box. They were filled with words and patterns that Tang Zhen didn't know. Tang Zhen studied them for a while but didn't have any clues, so he put them aside.

When he picked up the glass bottle that had the thickness of a thumb, Tang Zhen felt his wrist sink. It turned out that the weight of this glass bottle was extremely shocking.

Tang Zhen shook it with his hand. It was estimated to be nearly two or three kilograms.

It was such a small thing, but it was so heavy. There must be a mystery inside.

Tang Zhen looked at the black liquid in the glass bottle with a thoughtful expression.

Tang Zhen couldn't tell what was left, so he stopped looking at them carefully one by one and collected them together. When he encountered people who knew their stuff in the future, he would ask them to help appraise them.

After doing all of this, Tang Zhen sat quietly at home and waited for the system to restart.

However, before that, he still locked the door outside the courtyard tightly before jumping over the wall and getting back into the house. This way, he could create the illusion that he wasn't at home.

He didn't want to be stopped by the police who came to check the water meter while he was waiting at home.

Building World, in the wanderer town.

Qian Long walked in from outside the cave. After looking at Big Bear playing with the little girl, he said to Murong Ziyang, "It's been a few days, but there's still no news of Brother Tang. There won't be any problems, right?"

Murong Ziyang shook her head and smiled. "There shouldn't be a problem. Didn't he ask us to wait here? Then we'll wait quietly."

Qian Long nodded and sat down with a smile. "Brother Tang is a very capable person to be able to get so many good things. To be honest, after meeting Brother Tang, I've felt like I've come across a tycoon and am eating well every day!"

Murong Ziyang smiled when she heard that and nodded in agreement. "Yes, his aura is very special. He's not like other wanderers at all."

"Tell me, who exactly is Brother Tang?"

"I don't know. I'm actually even more curious than you!"

Just as the two of them were chatting, a commotion suddenly came from outside. Qian Long frowned and quickly rushed out of the cave to take a look.

About half an hour later, Qian Long ran in with a cold expression and said to Murong Ziyang, "The situation is a little bad. I heard that a black wild building appeared not far from here, and there are many powerful guardian monsters."

However, for some reason, thousands of monsters suddenly ran out of the protective range of the wild building. Along the way, they captured monsters and wanderers everywhere. Now, these wild monsters are rushing in the direction of the wanderer town."

According to experience, Qian Long could tell that the monsters this time were very aggressive. If this situation continued, the wanderer town probably wouldn't be able to hold on.

Once the monsters broke through, they would definitely not let the people here go. That way, Murong Ziyang and the others would be in danger!

In Qian Long's opinion, Murong Ziyang was Brother Tang's woman. Since Brother Tang wasn't here, he had the responsibility to protect his brother's woman's safety. Therefore, Qian Long suggested to Murong Ziyang that they move immediately.

But in the vast wilderness, where could they hide?

Everyone was a little worried for a moment as they kept thinking of countermeasures.

However, everyone's worry didn't last long, because soon, news came, and it was good news!

In order to deal with the sudden monster riot, Black Rock City sent an elite cultivator team into the wilderness to eliminate the monsters. They definitely couldn't allow them to do whatever they wanted in the range controlled by Black Rock City.

At the same time, Black Rock City issued a bounty. As long as one killed a zombie monster of the corresponding level, they could exchange for the corresponding reward as long as they brought the monster's specific organs to claim it.

The rewards given by Black Rock City were very rich. After killing a level-two monster, the bead on its head would belong to the person who killed it. Moreover, this person could also receive a reward equivalent to a level-two bead at the mission distribution point of Black Rock City. It was equivalent to receiving double the gains.

When the zombie monsters were cleaned up to a certain extent, Black Rock City would send high-level cultivators to clean up that wild building and completely deal with the disaster.

As soon as this news was out, the originally panicked wanderers immediately calmed down after hearing the announcement from Black Rock City.

Although they didn't know why the usually high and mighty Black Rock City was so abnormal this time and actually took the initiative to send troops to clean up the monsters, this was a good thing no matter what.

Not only that, the wanderers also planned to form teams to hunt zombie monsters. After all, it was already very good to have double the income!

The wanderers were overjoyed. The crisis seemed to have disappeared because of the order from Black Rock City. From this, it could be seen how famous Black Rock City is in this region!

[Chapter 33](#)

Advanced Technology in the App Store!

After all, Black Rock City was a powerful faction. It would naturally do what it said.

Early the next morning, the gate of Black Rock City opened wide, and cultivator teams appeared in front of the wanderers.

This was the first time the wanderers had seen the armed forces of Black Rock City mobilize on a large scale, so they naturally came to watch.

The members of the Black Rock City's cultivator team were wearing black standard leather armor and using unified swords and weapons. They advanced in an orderly manner and were grouped into teams, looking very imposing.

Their auras rose. Occasionally, when their gazes landed on the surrounding wanderers, they were all filled with disgust and disdain.

As residents of Black Rock City, they naturally had the right to despise these wanderers.

This time, Black Rock City sent out a hundred teams made up of 500 cultivators. Each team consisted of 5 members and they were all above level two.

Coupled with the cooperation of the wanderer exploration team, the moment they came into contact with the monsters, they quickly and effectively stopped the monster's rampage and controlled it within a certain range of the wild building.

However, during this period, at least a thousand wanderers had been abducted by the zombie monsters. It was unknown if they were dead or alive.

As soon as they fought, it could be seen that the battle was going to be difficult.

The next evening, another piece of news came. The Black Rock City team and the wanderer exploration team seemed to have encountered trouble. A large number of zombie monsters suddenly surged out of that wild building. Among them were many tall and powerful monsters, and even cavalry riding monsters!

The monsters whose strength had increased greatly, counterattacked, causing the caught off guard Black Rock City cultivators and wanderer exploration teams to suffer considerable casualties.

As soon as this matter spread, some people realized that this wild building was probably not simple, because those zombie monsters seemed to be different from ordinary monsters.

On the morning of the third day, it was said that Black Rock City had sent an elder to supervise the battle. This elder's cultivation had reached the peak of level five. He was only one step away from becoming level six and mastering the mysterious power.

During the battle with the monster, that elder had once killed his way into the wild building. However, soon after, he vomited blood and ran out.

According to the onlookers, this elder who spat out blood had a very frightened expression. He rushed back to Black Rock City without a word. Two hours later, several messengers from Black Rock City rode their horses and sped away. The direction they chose was actually the direction of the other buildings within a hundred miles!

Black Rock City's action immediately triggered the guesses of the various factions nearby.

Those who could have a faction in this wilderness were all people with strong martial strength and outstanding intelligence. Black Rock City's abnormal behavior made them smell a trace of danger.

But before that, they still had to wait and see.

In the original world, in Tang Zhen's house.

After cooping up at home for three days, Tang Zhen finally relaxed completely. At this moment, he was lying on the bed and playing with his iphone in boredom.

The sudden feeling of having nothing to do made Tang Zhen very uncomfortable, so he tried his best to find something to do as soon as possible. He had just placed an order on the Internet and bought a few heavy crossbows.

After counting the number of days that had passed, Tang Zhen felt that the cell phone upgrade should be over soon.

He was still looking forward to what new functions would appear on the upgraded cell phone.

The cell phone that seemed to be inconspicuous had already become his powerful tool.

The waiting process seemed to be extremely slow. After several hours, Tang Zhen's cell phone suddenly vibrated slightly. Then, the cell phone's screen quickly lit up.

The cell phone was activated very quickly. In just three seconds, Tang Zhen saw a new interface and a set of words.

Tang Zhen only took a look at the introduction before cursing!

"What the hell!"

[The cell phone system has been upgraded. Its performance has improved greatly. It can run ten applications at the same time. The application store has been upgraded and many new applications have been added. This upgrade cost a million gold coins. It has been automatically deducted!]

More than half of the million gold coins that he had risked his life to get were actually directly deducted. He was simply baffled.

Did they ask him for permission? How can they just make the decision for him?

Tang Zhen wanted to cry but had no tears. He could only swallow this depressed feeling with tears in his eyes. At the same time, he comforted himself that there were still more than 900,000 left. It was still not a small amount!

[The application store has been upgraded. Please check it yourself!]

Heh, of course. He knew that it had been leveled up even without being told.

Tang Zhen complained with a depressed expression. He opened the application store and took a closer look. Then, his eyes lit up!

The upgraded application store became much more refreshing. The categories of applications were now super technology, entertainment life, war support, and fantasy secret skills.

Projection, Quantum Invisibility Screen, and other applications that had been downloaded previously were categorized as technology. At the same time, there were several technological applications that were strongly recommended.

[Electromagnetic Pulse Bomb, destruction radius one kilometer, download price 10,000 gold coins]

[Holographic Projection Clone, can at most create five projection clones. It's super realistic. The download price is 20,000 gold coins.]

[Transformation Plug-in, can help your cell phone change its appearance into items such as watches and collars, making it convenient to carry and hide. The download price is 1,000 gold coins.]

[Monster Detection Comprehensive Plug-in, a combination of infrared night vision, x-ray vision, smell, sound waves, high-speed camera capture, and dozens of other super awesome functions. Promotional download price of 200,000 gold coins.]

[Super Electric Shock, can release a million volts of high-voltage electric current from afar. Effective distance of three meters, download price 100,000 gold coins]

[All-purpose Driving Assist Device, with it, you can even pilot a spaceship. The download price is 50,000 gold coins.]

...

Tang Zhen took a quick look at these apps. It had to be said that many of the apps inside had already tempted him. In the end, he gritted his teeth and bought the cell phone Transformation Plug-in and Monster Detection Plug-in. The gold coins were immediately reduced by 201,000.

However, Tang Zhen's heart didn't especially ache as these two things were worth it.

There were also many entertainment options, but Tang Zhen didn't plan to invest the precious gold coins in it, so he only took a few hurried looks at the introduction.

The war option had also updated many extremely powerful applications. In the past, Tang Zhen was poor and could only look at it for fun. Now, it was different. He had money, so he naturally had to spend it well.

[Magnesium Explosion, simulating the strong light produced by the burning of two substances. It can instantly blind the opponent. You have to pay attention to protecting yourself when using it. The download price is 3,000 gold coins.]

[All Purpose Data Battle Interface, includes comprehensive information needed in battle. At the same time, it is compatible with other applications and plug-ins. It can display the user's various physical indexes, weapon index, attack damage index, enemy data, and so on. The download price is 200,000 gold coins.]

[Adjustable Neural Organ Infrasonic Generator. There are two modes to choose, corresponding to different targets. When used, it can protect the user. The download price is 100,000 gold coins.]

[Miniature Death Ray, efficient, light, and astonishing lethality. It can carry out super long-range attacks. The download price is 100,000 gold coins.]

[Super telescope, can distinguish external objects 100 kilometers away. The image quality is clear. Includes mouth type resolution and laser eavesdropping plugin. Audio is also obtainable. Download price 5,000 gold coins.]

[Radio Wave Interceptor, can automatically search for and intercept radio waves in the air. Automatic decryption, automatic lock. Download price 1,000 gold coins.]

...

Tang Zhen looked at the advanced technology-like applications in the war category and drooled.

After considering it for a long time, Tang Zhen chose the All Purpose Data Battle Interface, Adjustable Neural Organ Infrasonic Generator, Magnesium Explosion, and a small application called the All-purpose Electronic Tool Bag. It contained wireless cracking passwords, wireless storage data, 100 large storage spaces, and many other functions.

Tang Zhen spent more than 200,000 gold coins on war applications.

In this way, Tang Zhen only had about 500,000 gold coins left!

Tang Zhen cast his gaze at the application of the fantasy secret skills category, which included application options for storage space.

[Chapter 34](#)

Pretending to Be a Ghost to Scare People!

There were many seemingly scary applications of fantasy secret skills.

[Spirit Body Searching Machine, can scan the spirit bodies in the range of settings and indicate the strength of the spirit body's energy and the type of spirit body it belongs to. Costs 20,000 gold coins.]

[Mysterious Text Cracker, can automatically crack any text that belongs to the mysterious energy system and analyze the meaning, translating it into words that the user can recognize.]

[Treasure Map Index, contains picture text information of 880,000 natural treasures, including the possible location, environment, effects, usage, and storage method. The download price is 50,000 gold coins.]

[Common Magic Arrays Introduction, introduce general knowledge of magic arrays, the principle and construction of simple arrays, entry-level knowledge, download price 100,000 gold coins.]

[Elemental Shield Generator, can mobilize spatial free elemental energy to form different types of shields. The defense strength can be adjusted according to the output range. The download price is 450,000 gold coins.]

Tang Zhen closed his eyes in pain. He wanted to download every app here!

After thinking for a while, Tang Zhen finally spent 500,000 yuan to upgrade the miniature storage space to a level-one storage space.

[Level-one storage space, storage space is five cubic meters. The internal space shape can be adjusted. Download price: 500,000 gold coins]

After upgrading the storage space, Tang Zhen's 950,000 gold coins were basically all spent!

Tang Zhen was very open-minded about this. After all, he had once suffered the pain of lack of money, so he had a rational attitude of both love and hate for money.

He could just earn more of it after spending it all.

He had obtained many good things from the Zombie Lord. In addition, he had downloaded many advanced technology applications from the application store. Tang Zhen's current battle power could be said to be off the charts!

However, when he thought about how he would have to face that terrifying Zombie Lord directly after teleporting back and bearing its anger, Tang Zhen's lofty aspirations that had just risen withered.

No, he had to think of a way!

But when he thought of the terrifying strength of the lord-level monster, Tang Zhen rubbed his head with a headache.

Just as Tang Zhen was feeling worried, his super hearing made him suddenly hear someone standing at his door, talking softly.

Listening carefully, the content of the conversation was actually about him.

"Is it here?"

"That's right, Boss. This is his house."

"Well, the door is locked. He might not be here, or he might be hiding inside. Little Wu, jump in with Little Wang to take a look."

"No way, Captain Sun. This wall is filled with glass wedges. How are we supposed to jump over it!?"

"Cut the crap. It'll be fine after you put this cushion on it. Hurry up and work..."

Analyzing the content of the other party's conversation, Tang Zhen couldn't help but sneer. It looked like the other party had already come looking for him.

He didn't provoke anyone, but others came to provoke him. In the end, he was the one who was unlucky. If he had encountered such a thing in the past, Tang Zhen would definitely charge forward in anger and demand an explanation.

However, the current Tang Zhen was different from before. He couldn't be bothered with such things.

After walking out gently and closing the door, Tang Zhen activated the Quantum Invisibility Screen. He quietly found a place by the wall and stood there, staring at the wall like he was watching a show.

Soon, on the red brick wall, a short-haired young man popped his head out. After glancing at the situation in the courtyard, he climbed up the wall and prepared to jump down.

Tang Zhen suddenly felt like being playful. He estimated where the other party would land and quickly picked up a bucket full of accumulated rainwater and moved it there.

"Aiyo, what the hell!"

The young man in the air watched helplessly as the bucket suddenly appeared and he sat on it.

"What's wrong?"

As the young man screamed, two more men immediately rushed up from the wall. They glanced at the situation in the courtyard nervously. One of them was actually holding a pistol.

However, when they saw the situation in the courtyard clearly, the older man couldn't help but curse. "I say, why can't you do anything right? How did you manage to fall into a bucket just by jumping over a wall? Moreover, you're screaming like you're a pig being slaughtered. I thought you had been stabbed!"

The other young man couldn't help but laugh. He pointed at the young man who was covering his butt in the courtyard and was drenched all over. He laughed and said, "Haha, that's what you get for jerking off all day. Now you have poor eyesight! In such a big empty space, you actually managed to fall onto a bucket. You're so blind!"

The young man holding his butt had a bitter expression. He thought to himself that when he jumped down just now, he didn't see the bucket at all, alright? But suddenly, this bucket appeared. What the hell!

The older Captain Sun was also a little speechless as he looked at the two new brats. He coughed lightly and pointed at the door. "Alright, Little Wu, hurry up and enter the room to take a look. Little Wang, you go in too."

The young man called Little Wang agreed. He climbed up the wall with a smile and jumped down.

However, before Little Wang could land, Captain Sun and Little Wu heard a tearing sound.

The three of them were stunned at the same time. Then, they saw Little Wu, who was covering his butt, turn around and look at the confused Little Wang in a daze. Then, he laughed out loud and pointed at Little Wang. "Haha... You... were laughing at me, but look at you now... I, your... flower-patterned boxers are... all exposed!"

"Hahaha..."

In the end, Little Wu almost rolled on the ground laughing.

Captain Sun was speechless.

Little Wang, who felt a chill down his spine, couldn't help but look down. His face immediately turned red.

His pants had already been completely torn open, and the little underwear revealed looked extremely enchanting.

"Damn, this is so humiliating..."

Little Wang wailed in his heart. Damn it, how did this happen? He was just jumping off a low wall, why did he end up tearing open his pants?

He quickly tightened his pants and looked at Captain Sun and Little Wu, who was already laughing.

As the culprit behind the tear in Little Wang's pants, Tang Zhen also had a hard time holding in his laughter.

Captain Sun was a little helpless. He could only jump in himself.

“Look at the two of you. What else can you do? Train well when you go back. With such a big commotion, even the dead will be woken up. If the suspect has a weapon and tries to resist, you’ll suffer.”

As Captain Sun lectured, he reached out to open the door. Just as his finger touched the door, the door suddenly bounced towards his face like lightning.

Captain Sun was shocked. With the agility trained by his many years in the police world, he barely dodged the door and reflexively pulled out his pistol.

“Whoever’s inside, listen, I’m...”

Before Captain Sun could finish speaking, he felt his butt being kicked fiercely and he plunged into the room.

“Who... Who kicked me?”

In the blink of an eye, Captain Sun, who had already seen the situation in the room, walked out of the room aggressively and roared at Little Wang and Little Wu.

“No... It wasn’t me!”

“It wasn’t me either.”

Little Wang and Little Wu hurriedly said. They didn’t want Captain Sun’s anger to descend on them.

Although Captain Sun was usually quite easy to talk to, the elders in the team knew that this master was like an active volcano. When he erupted, it was simply world-shaking!

However, as they explained, their eyes were filled with confusion.

Because they had clearly seen it just now. Before Captain Sun, who had taken out his gun, could finish speaking, he seemed to have been kicked from behind and fell on his face.

Captain Sun was furious. He pointed at the two of them and cursed, “There are only the three of us in this courtyard. It’s not you, nor is it you. Could it be a freaking ghost!”

“Do you think it’s possible for a ghost to appear in broad daylight?!”

Captain Sun had an angry expression. This was too ridiculous. He had to teach these two guys a lesson later, or else they would turn the world upside down!

“You two... Uh...”

Before Captain Sun could finish speaking this time, he saw Little Wang and Little Wu looking at the shadow in the corner in horror. Their faces were pale.

Captain Sun turned around in confusion and his scalp immediately exploded.

In the shadow of the corner filled with moss and junk, there was a person wearing a strange black robe but without a head jumping on the spot.

That person seemed to be unaffected by gravity. With a light tap of his toes, he jumped nearly two meters straight up. Then, he slowly landed and jumped up again.

“A ghost!”

The three men shouted at the same time. The headless figure seemed to be shocked and disappeared without a trace before it landed.

“Damn, this place is simply haunted!”

This time, it was Captain Sun who spoke. He took a big stride forward and jumped onto the wall with extremely agile movements. Then, he jumped out without hesitation.

Little Wang and Little Wu were so scared that their hands and feet went limp. They didn't care if their buttocks hurt or not or if their pants were torn open. They cried for a long time before crawling out in a sorry state.

Then, there was a hurried car roar that quickly disappeared.

In the corner, Tang Zhen removed the Quantum Invisibility Screen. He was wearing the leather armor cloak and walked out with a sly smile.

[Chapter 35](#)

Border City (1)

After scaring the three people who came uninvited, Tang Zhen finally vented the anger in his heart.

Every debt had its debtor. Speaking of which, the three of them were a little wronged. They came here to do normal work, but Tang Zhen didn't care about this.

Moreover, he was also wronged. It was not like anyone cared about that.

He believed that for a long time, the three of them would have nightmares when they slept at night.

On the other hand, if the guy who provoked him still refused to let him go after being sent to the hospital, Tang Zhen didn't mind teaching him a lesson.

For the current Tang Zhen, it was simply too easy to do something that required violence to solve.

Just as he sent away the three frightened men, Tang Zhen's cell phone suddenly rang. It was his new cell phone that he had just bought.

As for the original mutated cell phone, after activating the transformation plug-in, it had already become the necklace on his neck and was carefully protected.

He glanced at the caller ID. It was Xu Feng.

“Hello, Tang Zhen, the matter is settled. Bring the money. Let's meet at the high-speed toll station in the afternoon.”

After the call was picked up, Xu Feng only said a few words before hanging up.

After lunch, Tang Zhen saw that it was about time, so he took a taxi to the meeting place the two of them had agreed on.

When the two of them met at the highway toll station outside the city, Xu Feng had long parked his Land Rover beside the highway and was blowing smoke rings into the sky in boredom.

After seeing Tang Zhen come over, Xu Feng rolled his eyes angrily and said sarcastically, "You're really something. You have to provide for your sister's school fees and repay the debt for that damn father. Why? Can't you take it anymore? Are you trying to take a shortcut to earn money like other people?"

"Firearms and explosives are dangerous things! Let me remind you, if you want to run away, do it now. It's best if you don't touch something like this!"

Tang Zhen was a little touched. With Xu Feng's usual personality, it was obvious that Xu Feng treated him as a brother for constantly reminding him.

At the thought of this, Tang Zhen no longer played dumb. He patted his chest and promised Xu Feng, "Don't worry, I definitely won't use these things to do anything illegal. Do you trust me now?"

Xu Feng spat. "Like hell I do!"

Tang Zhen took out a cigarette from his pocket and lit it. After taking a puff, he looked at Xu Feng and said slowly, "What I've been busy with recently is quite dangerous. As for what I'm doing, I won't say, so don't ask."

"Perhaps I really won't be able to come back one day. When that happens, just pretend that I've never existed in this world."

"I've always treated you as a brother in my heart. If I'm really gone, I'll leave my sister in your care. If she suffers, I won't let you off even if I freaking become a ghost!"

Tang Zhen's expression was very serious. After all, this sister was his only concern.

However, this time, Xu Feng didn't say anything. He just nodded with a serious expression. Then, he took a deep look at Tang Zhen and started the car.

After Tang Zhen sat in it, Xu Feng drove the car and passed the toll station and got on the highway. Along the way, Xu Feng stepped on the accelerator and pushed it all the way down. After passing car after car, he was getting closer and closer to his destination.

The car drove north and gradually approached the border river of the Federation. Soon, it drove into the downtown area of the small town located on the border.

There were very few cars on the riverside road here. From time to time, foreigners could be seen driving past on ships from afar. There were even girls from the Icefield Alliance with proud figures lying naked on the beach to sunbathe.

Tang Zhen had been here twice, so he was not unfamiliar with the environment here. He was also very satisfied with the delicacies here.

After driving for a few hours, the two of them were already hungry. They simply drove to a local restaurant with a good reputation.

The renovation of the restaurant wasn't luxurious, but business was booming.

The two of them entered the store and first asked for a private room. Tang Zhen entered the bathroom and happily washed his face. When he came out, Xu Feng had already ordered a few special dishes from the restaurant.

Tang Zhen took a look at the menu. It was nothing more than mushrooms, wild vegetables, and river fish stew. It was refreshing and practical to eat.

The two of them were already hungry. They asked for two bowls of rice and wolfed it down. The rice was soft and springy, and it tasted extremely good.

After having eaten some food, they each got a bottle of local beer and finished it in one go.

At this moment, the waiters had already served the dishes one after another. The two of them chatted as they ate. Soon, they had already finished two cups of beer.

Rubbing his bulging stomach, Tang Zhen got up and went to the toilet.

When he returned, he saw four to five tall and strong men sitting near the table. All of them had scars and tattoos on their faces, and they looked murderous. However, at this moment, they were all friendly and frequently toasted Xu Feng.

Seeing Tang Zhen enter the private room, everyone turned their attention to him. Xu Feng even smiled and waved his hand to introduce, "This is Tang Zhen, my good friend."

As he spoke, he pointed at the few burly men wantonly. "These few are brothers who live nearby. In the future, if you come here to do something, just look for them!"

The few of them immediately replied with humility. Even though they were pointed at by Xu Feng, they still smiled and took the initiative to shake hands with Tang Zhen.

After a few words of praise, everyone became familiar with each other and kept clinking glasses.

However, Tang Zhen also noticed something. These few people were clearly not kind people that were not easy to talk to. However, now, they were clearly deliberately pleasing Xu Feng.

After seeing this situation, Tang Zhen couldn't help but be curious about Xu Feng's current identity. Although the two of them could be considered brothers and Tang Zhen also knew that Xu Feng's power on both sides of the law wasn't small, he wasn't too sure about the specific extent.

Since Xu Feng was unwilling to mention it, he naturally wouldn't keep asking.

Tang Zhen's alcohol tolerance was originally not bad. After absorbing the bead and mutating his body, his physique suddenly increased a lot, and his alcohol tolerance also increased greatly. At this moment, he had already finished 20 bottles of beer, but his expression still didn't change, making everyone praise in unison.

Although there were also people who could hold their liquor well and could also finish the same amount of beer, it was very difficult for one to become this tolerant to alcohol in a short period of time. From this, one could tell the level of their alcohol tolerance.

The people of the north had rough personalities, and it was best to get closer to them by drinking together. At this moment, seeing that Tang Zhen was so magnanimous and had an extraordinary relationship with Xu Feng, they all thought highly of him in their hearts.

These guys were all famous and powerful locals in the vicinity. Their ambitions were extraordinary, and ordinary people weren't able to impress them.

After drinking another round, the night had already passed by. It was already nine the next morning when Tang Zhen woke up.

After stretching his numb arm, Tang Zhen washed up and pulled Xu Feng out of bed. This guy drank as much as him last night and was still lying on the bed playing dead.

After Xu Feng came out of the hotel's guest room cursing, the two of them went out to get a simple bite.

Xu Feng made a call during this period. Then, the two of them rode Xu Feng's car out of the city and headed straight for the deep forest along a gravel road.

[Chapter 36](#)

Returning to Building World!

Located at the border, the natural environment of Zhenyuan City was relatively good. 80% of the area under its jurisdiction was filled with primitive mountain forests.

The trees here were mostly coniferous forests and white birches. From afar, they looked connected and spectacular.

It was said that there was a huge fire in the forest one year. The people who lived in the deep mountains were surrounded. There was no place to hide from the fire, because there were burning tall trees everywhere.

In the end, only by crawling into the culvert by the roadside could they escape.

Traffic was inconvenient in most places in the mountains. The deeper the mountains, the fewer people there were. Some places needed satellite phones to maintain communication with the outside world.

Especially in winter, if they didn't use shovels and bulldozers to clear the snow, the roads buried under the snow often couldn't be opened until April or May in spring.

The road that the two of them walked on was relatively flat. Often, heavy cars that carried logs and rocks would pass by.

As the saying went, one relied on the mountains for food and the rivers for water. In the early years of Zhenyuan City, the fishing and forestry industries were developed, producing carp and high-quality wood. They had once contributed a lot to the construction of the country.

In the later stages, when resources were exhausted and the fishing industry withered and the logging of trees was controlled, the locals had to adapt. They showed their abilities and used the surrounding mountains and rivers to farm, travel, and process wild vegetables. Because of this, many people became rich tycoons.

The local rich people all owned a few houses in the local area as well as the southern coastal province. Every year, they flew around like migratory birds.

Although the scenery on both sides of the road was not bad, looking at it for a long time still made one feel tired. Tang Zhen and Xu Feng chatted casually to kill time. Finally, they arrived at their destination after a bumpy journey.

This was a place with lush vegetation, revealing a primitive appearance.

After jumping out of the car, Tang Zhen took a deep breath at the waterfall on the cliff in front of him. He turned around and praised Xu Feng, "You're really something. You actually found such a paradise. If it weren't for the fact that I couldn't bear to leave the colorful world outside, I would really want to come here to live in seclusion and retire."

Xu Feng looked like he had seen a ghost. "Living in seclusion doesn't seem to be a life that a commoner like you can tolerate, right? I'm afraid that in less than a month, you'll cry and shout that you want to leave, right?"

Tang Zhen smiled in embarrassment and didn't refute. He knew his own character very well. He definitely wouldn't abandon the world and live in seclusion.

Xu Feng was very familiar with the environment here. According to him, he had come here to fight bears before. One of the bears was even bigger than a big water buffalo. It didn't stop breathing after being shot more than ten times. In the end, it was still stabbed to death with a wild boar spear.

The two of them walked along the gravel path covered in weeds. They kept taking turns the entire way and finally stopped in front of a wooden house built with logs.

It was said that the wooden house in front of Tang Zhen didn't have a single nail, but it looked rather sturdy. After looking at it for a while, Tang Zhen couldn't help but click his tongue in wonder.

At this moment, the door of the wooden house was pushed open, and a young man with very high cheekbones walked out.

This person smiled when he saw Xu Feng. Then, he waved and let the two of them enter the room to talk.

"Hello, Young Master Feng. Long time no see!"

The young man spoke rather stiffly, clearly not used to communicating in Mandarin.

The decorations in the room were very simple. Most of the furniture was made of wood. A brick bed was placed by the window. On the brick bed were a few small items made of birch bark. It had a very primitive and natural charm.

At this moment, there was no one else in the room other than the three of them. Xu Feng went straight to the point.

“Alright, stop dawdling. Hurry up and take out the things. We’re rushing back before dark!”

The young man didn’t hesitate when he heard that. He turned around and took out a long cloth bag from a cattail mat. After unfolding it, the things inside fell out.

Tang Zhen focused and saw that it was a semi-automatic rifle and a shotgun.

Tang Zhen went forward to take a look happily. He was surprised to discover that the five or six rifles were well maintained. There were no obvious injuries on the surface, and the gun oil had not dried up. Even the rifling was very clear.

There was a silver-gray bayonet that was flipped upside down at the muzzle. It was the famous weapon of the Chinese Army—the three-edged bayonet.

This bayonet had already been sharpened by the blade. The three blood grooves and the tip flickered with a dangerous light, making it obvious that one would definitely die after being stabbed by it.

For such an old gun that had been out of the factory for 50 years, it was very rare for it to be so well maintained.

It seemed that the owner of this gun was also a person who loved and understood guns. Tang Zhen was very satisfied with this.

The shotgun should be Russian. Tang Zhen couldn’t recognize the model.

In the paper box beside the gun were 7.62-caliber rifle bullets and some loose bullets. There were roughly more than 300 rounds. Coupled with the pistol he already had, he should be able to use it for a while.

Tang Zhen was naturally very satisfied with this rifle, so he simply nodded and said, “These guns are not bad. I want them. Where’s the explosives?”

The young man glanced at Xu Feng when he heard that, and his expression seemed to be a little hesitant. Seeing this, Tang Zhen directly opened his backpack and took out some money.

When the young man saw the money, he turned around and took out a plastic bag from a nearby hole. After opening it, various detonator fuses were revealed, as well as a tube of TNT wrapped in a yellow oil paper tube.

Tang Zhen roughly counted. There were more than 40 tubes.

“I got these detonators and TNT from the gold company in the past. The gun and explosives are a total of 50,000 yuan.”

The young man pushed the plastic bag over. Tang Zhen didn’t hesitate and directly took out five stacks of money and handed it over. The transaction was completed after the young man checked that there were no mistakes.

Since their goal had been achieved, Tang Zhen and Xu Feng didn't stay any longer. They directly drove away.

As they had brought contraband with them when they returned, the two of them simply didn't stay in Zhenyuan City anymore and directly drove all the way home.

After entering the city, Tang Zhen and Xu Feng separated halfway. Xu Feng continued to complete his hunt, while Tang Zhen hurriedly returned home and put everything he needed into the storage space.

With these things, Tang Zhen had a plan for how to escape the room in the wild building.

After returning home, Tang Zhen packed up a little and combined the TNT he had bought.

The young man from before had already given Tang Zhen guidance, so it didn't take long for him to make a simple bomb.

After thinking about it, Tang Zhen felt a little worried, so he made a few more and placed them in the storage space.

After putting on the leather cloak and opening the Quantum Invisibility Screen, Tang Zhen took a few deep breaths and resolutely activated the teleportation!

Before his vision recovered, Tang Zhen felt a strange smell floating in the air. When he carefully distinguished it, it was a thick bloody aura that just would not dissipate.

The last time he escaped, there was no such smell, so Tang Zhen's vigilance increased again.

"Roar!"

Before Tang Zhen could adapt to the dark light here, he heard the roar of a zombie monster. At the same time, he felt as if a monster was pouncing at him.

Magnesium Explosion!

Tang Zhen's reaction was extremely fast. He instantly activated the app he recently downloaded.

In an instant, extremely dazzling light erupted from where Tang Zhen was, illuminating the area of the room.

At this moment, Tang Zhen's other application, the All Purpose Data Battle Interface, came into play. The strong light in front of him was quickly filtered out, allowing him to see the scene in front of him clearly.

It was precisely because he saw the scene in front of him clearly that Tang Zhen couldn't help but curse.

"Damn, am I using cannons to kill mosquitoes?"

At this moment, at the exit of the room, ten huge zombie monsters were densely packed. Every one of them had strength above level four!

[Zombie Centurion, level-four monster. It has extraordinary strength and is violent and bloodthirsty. It can use simple martial arts. Its weakness is the back of its head.]

Although they were a little panicked by the explosive light, unfortunately, these Zombie Centurions didn't completely rely on their vision to locate their prey, but on their perception of aura.

Ordinary zombie monsters couldn't sense Tang Zhen's aura, but these Zombie Centurions could.

This was also why as soon as Tang Zhen appeared, these monsters quickly locked onto him and were about to swarm over.

What Tang Zhen didn't know was this was partly because he had stolen that box. Moreover, many things had happened in the past few days, causing the Zombie Lord to strengthen the safety defense measures of the wild building.

The ten Zombie Centurions could resist hundreds of ordinary wanderers without being at a disadvantage. In addition to the heavy defense outside, the Zombie Lord was confident that no one could break in.

Out of caution, it also set up a warning measure in the room where Tang Zhen had disappeared.

The Corpse Demon Lord specially instructed its subordinates to immediately kill anyone who triggered the alarm he had set in this room!

The Zombie Centurion who rushed into the room with various weapons in hand seemed to be ready to turn him into meat paste in the next second. Seeing this, how could Tang Zhen dare to stay?

Without hesitation, he waved at the monsters and threw the bomb in his hand. Then, he teleported away again.

[Chapter 37](#)

Blood Pool and Zombie King Clone!

It had only been a few seconds since Tang Zhen's aura appeared and disappeared. With the abnormal teleportation ability and magical applications of his cell phone, he had the capital to act wantonly in the alternate world.

The group of Zombie Centurions didn't see Tang Zhen himself. They only sensed an unfamiliar aura that didn't belong to the zombie monsters and prepared to clean it up as usual.

Unexpectedly, after a strong light, the unfamiliar aura disappeared, leaving behind a smoking thing.

A Zombie Centurion pinched this thing curiously, brought it in front of its eyes, and sniffed it.

After smelling it, it seemed to think that the smoke coming out of the fuse smelled very good, so it sniffed hard again.

When the Zombie Centurions beside him saw this, they immediately approached curiously. Then, these Zombie Centurions started staring at this smoking little thing intently.

For the Zombie Centurions who were several meters tall, this thing that was not even the size of their palms was indeed a "little thing"!

The fuse was very short. At this moment, it had already burned to the end. Then, there was a loud bang!

A violent airflow and huge sound wave erupted from the inside of this “little thing”, blowing these huge Zombie Centurions away.

Perhaps it was because these Zombie Centurions were too strong, but Tang Zhen’s bomb actually didn’t even kill a Zombie Centurion. Instead, the Zombie Centurions were only crippled.

The sudden explosion immediately caused the interior of the wild building to be in chaos. The roars of the zombie monsters rose and fell.

Even the zombie monsters outside heard the roar, but without the permission of the Zombie Lord, these low-level zombie monsters didn’t dare to enter the wild building at all.

Just as these Zombie Centurions were in chaos, Tang Zhen appeared in the room again.

Sensing the power of the explosion, but knowing that he had yet to kill them, Tang Zhen couldn’t help but sigh. The bodies of these Zombie Centurions were really strong.

The bomb he had just thrown used a total of 200 grams of explosives. The ten-meter range was enough to kill all creatures, but it still couldn’t take the lives of these Zombie Centurions.

Could it be that after the monster entered level four, they would become extremely difficult to deal with?

It was better to avoid trouble. It was better to leave this place as soon as possible!

With the cover of the Quantum Invisibility Screen, Tang Zhen quickly activated the Light Body Technique on his leather wrist guard and rushed out of the room almost without touching the ground.

The moment he rushed out, Tang Zhen had the urge to cry. It was really not easy!

The hall in front of him was in a mess. Broken items were everywhere.

The injured Zombie Centurions rolled around on the ground. Those who weren’t injured weren’t much better.

The shock wave from the explosion made them dizzy. They were dizzy and probably wouldn’t recover for a long time. They didn’t notice Tang Zhen’s appearance at all.

If Tang Zhen overestimated himself and took the opportunity to launch a sneak attack, he might very well encounter the desperate counterattack of the Zombie Centurions.

Compared to the powerful physical body of the Zombie Centurion, his weak body might not even be able to withstand a heavy blow from the Zombie Centurions.

In that case, it was better not to take the risk.

Tang Zhen thought about it and was about to quickly escape.

However, when his gaze swept to the huge statue not far away and saw the scene below the statue, his heart couldn’t help but tremble. He had just taken a step forward when he stopped.

In Tang Zhen’s memories, there should have been a black altar there, but now that he looked again, the black altar was no longer visible.

The black altar didn't disappear. Instead, it was drowned by a huge blood pool built with dense corpses.

When Tang Zhen saw this scene, he immediately understood.

No wonder the smell of blood here was so strong. Looking at the area of the blood pool, who knew how much blood was needed to fill it?

In the corpse wall surrounding the black altar, the broken corpses of monsters were strangely glued together by a red substance, as if their flesh and blood had grown into one.

Tang Zhen roughly estimated that such a huge blood pool needed at least thousands of monster corpses.

Tang Zhen was happy to see monsters killing monsters.

However, when Tang Zhen saw the heads of the wanderers floating in the blood pool, an unknown anger surged into the sky.

"Damn it, these damn beasts!"

Tang Zhen gritted his teeth, his eyes filled with a terrifying cold light.

He really couldn't tolerate humans being killed so unscrupulously, even if this was an alternate world. It didn't matter even if these wanderers were completely unrelated to him!

It was difficult for him to see injustice like this!

Tang Zhen didn't know what the use of the blood pool built by the zombie monster was, but it didn't stop him from wanting to destroy this damn thing.

Once this thought appeared, Tang Zhen couldn't extinguish it anymore. With a thought, another bomb appeared in his hand.

He would destroy everything with a bomb and make the zombie monsters work for nothing.

But just as Tang Zhen was about to throw the bomb, he was surprised to discover that something seemed to be placed on the black altar in the blood pool. It was floating in the pool of blood.

"What the hell is this? It's actually soaking in the blood pool?"

Tang Zhen was puzzled. Before the lightness skill disappeared, he immediately rushed to the edge of the blood pool.

The dark hall couldn't affect his vision. With a scan of the data battle interface, he saw the item on the black altar clearly.

However, this item was a little unimaginable.

It was the corpse of a young wanderer. His figure was perfect, his muscles were filled with explosive power, and his face was extremely handsome.

Now, his body was placed in the center of the altar, completely naked and soaked in blood.

The contrast between blood and flesh was so obvious!

However, what made Tang Zhen feel strange was that eight blood-red blood vessels were deeply stabbed in the young man's head and heart. It looked very disgusting.

These blood vessels slowly squirmed like intestinal walls, connecting to the eight statues around the black altar.

On the eight black statues, there seemed to be something like weeds growing on them. After passing through countless heads, they plunged deep into the blood pool.

These root-like things also slowly squirmed, as if they were absorbing something from the blood and heads.

The young man's body was covered in strange runes. As the blood-red pipe continuously inputted the shimmering substance into his body, the strange runes flickered and flickered with a dark red luster.

Tang Zhen stared intently at the young man's corpse. He had a faint feeling that this should be a very evil ritual carried out by the zombie monsters.

At this moment, a caption suddenly appeared in front of him. The monster detector had activated.

[Zombie King Clone (Immature Body) The clone of one of the eight Zombie Kings of the Zombie Race from an unknown small world, a level-four monster. Through the cultivation of the blood pool ritual, after maturing, it can be a temporary body used to host the Zombie King after the Zombie King's soul descends. Its physical body is strong and perfect, and it is invulnerable to physical attacks. The flaw of the immature body is that it is vulnerable to soul attacks.]

Tang Zhen saw the introduction on the screen and was immediately shocked.

It turned out that these zombie monsters weren't wild monsters, but from an unknown small world. Just like him, they could be considered transmigrators!

Especially the corpse in front of him. It was actually a clone cultivated for the Zombie King in that unknown small world to prepare for the future when its soul descended into this world!

Apart from killing and destruction, these zombie monsters couldn't do anything good. Perhaps they would turn everyone into zombie monsters.

If that was the case, how could Tang Zhen survive in this world?

"Damn it, you're snatching business from me. You're tired of living!"

A cold light flashed in Tang Zhen's eyes, and killing intent immediately rose in his heart.

In that case, he definitely couldn't let the other party succeed.

[Chapter 38](#)

Soul Descent!

The Zombie King clone was very powerful. It was only a level-four immature body, but it already had an abnormal defense that was invulnerable to physical attacks. Once it was cultivated, wouldn't the Zombie King's soul be even more abnormal if it entered the body!

No, he had to destroy it completely before it became mature!

However, Tang Zhen was at a loss as to how to destroy the Zombie King clone.

The monster detector had already explained that this Zombie King clone was invulnerable. Even if he took out that incomparably sharp purple short sword, he might not be able to hurt it at all.

Even a level-four zombie monster centurion couldn't die in a violent close-range explosion, let alone a Zombie King clone!

The monster detector had already indicated that if he wanted to hurt this monster, he had to use a soul attack, but he didn't have any soul attack methods.

If he needed to use a Soul attack, did it mean that the Zombie King clone that had yet to host the Zombie King's soul already had its own soul?

Tang Zhen frowned and pondered for a moment. Then, his expression lit up as he quickly opened an app on his cell phone.

There were two modes to the Adjustable Neural Organ Infrasonic Generator. The two modes were meant for different targets and had a different Hertz for each mode.

Looking at the introduction in the app, Tang Zhen narrowed his eyes.

He had specially checked the principle of the infrasonic wave previously. The vibration frequency of some frequency infrasonic waves were similar or even the same as the vibration frequency of human organs. It was very easy for these sound waves to resonate with human organs.

This kind of resonance from the outside world was very harmful to the human body. It could cause an extremely serious burden on the human body, causing organs to deform, shift, and even break. It could even kill the other party.

The advanced technology in the application store was naturally not simple. Its lethality far exceeded ordinary infrasonic weapons. Its efficiency and death rate were extremely high!

This was like a caged tiger. If this thing was used in the original world, it would undoubtedly cause a terrifying disaster.

This thing was useful for humans, but he didn't know if it was also effective against this Zombie King clone?

Tang Zhen hesitated for a moment, but his eyes narrowed in the next moment.

Forget it, he would give it a try first!

First, he locked onto the target and set it to the automatic capture and analysis mode to determine the frequency that could affect the Zombie King clone. Then, it continued to attack in a fixed direction.

Just as Tang Zhen activated the infrasonic wave generator, a sound wave that couldn't be heard by human ears attacked the corpse in the blood pool.

Fortunately, this advanced technology could customize its attacks and protect the user. Otherwise, Tang Zhen might have been hit without anyone knowing.

Seeing that the infrasonic weapon was operating, although Tang Zhen couldn't hear it, he silently stared at the Zombie King clone in the blood pool, wanting to see something to happen.

Unfortunately, after waiting for half a minute, nothing happened.

Tang Zhen sighed in disappointment. It looked like even infrasonic weapons were helpless against the invulnerable Zombie King clone.

But even if he couldn't destroy the clone, he still wanted to blow up this blood pool!

Even if he only ended up delaying the cultivation period of the Zombie King clone, it would still be a blow to the zombie race.

Just as this thought appeared in Tang Zhen's heart, he suddenly discovered that the Zombie King clone in the blood pool actually squirmed slightly.

Then, a trace of blood flowed out of the corners of the Zombie King clone's mouth. Thick blood lines appeared on the surface of its perfect body. Even the private parts of its lower body were bleeding.

"Haha, it worked!"

Tang Zhen was delighted when he saw this and prepared to continue attacking.

However, at this moment, Tang Zhen felt a faint oppressive aura in the air, making it difficult for him to breathe.

His hair stood on end, as if there was an extremely ferocious pair of eyes looking at him through the endless void. The gaze in those eyes seemed to want to cut him into pieces.

This feeling made Tang Zhen extremely uncomfortable. He struggled hard before breaking free from this nightmare-like feeling.

At this moment, he vaguely discovered through the map's perspective that a blood-colored thread seemed to have stretched out of the void and pierced into the forehead of the Zombie King clone.

Before he could take a closer look, the Zombie King clone lying in the center of the black altar had already instantly opened its eyes, revealing a pair of blood-red eyes.

Tang Zhen, who was observing the blood-colored thread, directly met the gaze of those blood-colored eyes!

"Boom!"

Tang Zhen felt his mind go blank as he stood rooted to the ground.

What a terrifying pair of eyes. Tang Zhen only took a look and felt that he had fallen into endless fear.

At the same time, a scene from his cell phone suddenly appeared in front of him.

It was a world completely formed by the Zombie Race. Everything there was withered, not a blade of grass grew, and the aura of death and corruption was everywhere.

In this abandoned world, countless zombies lived.

Members of the Zombie Race were once creatures of this world, but because they angered the legendary god, the vitality of the entire planet was destroyed, but their corpses never decayed.

Later on, for some reason, these immortal corpses developed intelligence and had the ability to cultivate and advance. They called themselves the Zombie Race.

In the endless years, these zombies fought and killed each other. In the end, eight great Zombie Kings were born, each ruling their own area.

The zombie monsters that entered the Building World were subordinates of the Spirit Brain Zombie King. In fact, the Spirit Brain Zombie King had mastered the method to enter this world from a secret text found in some ancient ruins it accidentally discovered.

Because of the mysterious power of this world, any guest from another world who entered this world would form a brain bead in their mind, lose their original consciousness, and become a monster member of this world.

This power was extremely powerful, and even the Spirit Brain Zombie King couldn't resist it. As long as its main body entered this world, no matter how strong it was, it would inevitably become a monster in the end!

The Spirit Brain Zombie King had found the only way to bypass this, which was to use the body of the natives of this world to nurture a clone. Then, its soul could descend and board. Then, it would command the army to plunder the resources of this world and turn all the creatures in Building World into zombie slaves!

The Spirit Brain Zombie King used countless resources and great power to send these zombie monsters into this world. He also managed to retain the consciousness of the Zombie Lord for a short period of time.

This way, the Zombie Lord and its subordinates would be the advance team and start to build the altar. Then, they would nurture the Zombie King clone and prepare to welcome the descent of the Zombie King's soul!

In the box that Tang Zhen stole last time, there was a drop of the Zombie King's blood essence that could be used to nurture the Zombie King clone.

After the box was stolen by Tang Zhen, the Zombie Lord without the Zombie King's blood essence could only use its own blood essence to replace the Zombie King's blood essence. However, the Zombie King clone cultivated was far inferior to the clone cultivated by the Zombie King's blood essence!

Just as Tang Zhen saw this, he felt a pain in his head. Then, the continuous images disappeared!

"Hmph!"

A familiar snort sounded in Tang Zhen's ears, but it made his chest involuntarily tighten and he spat out a mouthful of blood.

The infrasound generator suddenly closed forcefully, and his body involuntarily fell into the blood pool.

"I can't believe that there actually exists a creature who can hurt my clone and even read my memories. What a shocking dirty creature!"

A cold and ruthless voice came from the mouth of the Zombie King clone. Its blood-red eyes also looked at Tang Zhen intently, their eyes containing a trace of surprise and complete contempt as if it was looking at an ant.

After saying this, the Zombie King clone no longer looked at Tang Zhen. It closed its eyes and stopped moving.

However, the tentacles of the eight statues in the blood pool squirmed silently towards Tang Zhen at the same time.

For a moment, heads rolled in the blood pool, as if countless heads surged towards Tang Zhen. The expression of every head was incomparably painful and ferocious.

Looking at the head slowly surging towards him, Tang Zhen, who had fallen into the blood pool, panicked. He used his arm to prop himself up from the bottom of the blood pool.

But just as his palm touched the ground of the blood pool, he felt that the bottom of the blood pool was a little strange. It seemed to be covered in smooth pebble-like objects.

At the same time, the cell phone hanging around his neck vibrated gently again.

This scene was so familiar. At this moment, how could Tang Zhen not guess what was at the bottom of the blood pool!

"If you dare to hurt me, I'll make you pay the price!"

Tang Zhen, who was lying in the blood pool, had a face full of dirty blood. He roared at the cell phone in his heart, "Absorb, absorb it all!"

"Boom!"

After receiving the order, the cell phone couldn't wait to start absorbing. The speed was astonishing.

As the cell phone absorbed crazily, the beads at the bottom of the blood pool were actually instantly emptied.

The eight black statues that had originally stretched their tentacles towards Tang Zhen actually let out a strange cry in unison. All the tentacles on their bodies flew out of the blood pool, and countless heads fluttered as they pounced fiercely at Tang Zhen.

At the same time, the black altar also emitted an explosion!

[Chapter 39](#)

The Zombie King Clone That Was "Killed" by an Ant!

“Lowly ant, you’re courting death!”

The angry voice of the Zombie King clone sounded again. This time, its body slowly floated in the air and suddenly stood up.

Its blood-colored long hair instantly became extremely long. A portion of its long hair covered its lower body, and the rest of its hair slowly danced and squirmed around its body like a living thing.

The Zombie King clone looked at Tang Zhen fiercely. It was obvious that Tang Zhen’s actions had completely angered it!

“You keep calling an ant... Shut up! I’m not an ant!”

Tang Zhen opened his mouth and cursed. At the same time, he glared back without showing any weakness. There was not a trace of fear in his eyes.

Tang Zhen still had his life-saving ability. Although using it in front of the Spirit Brain Zombie King, who knew spatial teleportation ability, might lead to unimaginable consequences, Tang Zhen couldn’t care less. It was really a life-and-death moment, he couldn’t care too much.

However, apart from using his teleportation ability, he seemed to have other choices. For example...

In the cell phone, there was an app store filled with advanced technology!

Tang Zhen was clearly in a life-and-death crisis, but many thoughts flashed through his mind like lightning. However, his slightly absent-minded expression made the Zombie King clone misunderstand. In fact, the other party took it as silent contempt.

The Spirit Brain Zombie King led its subordinates to fight in all directions and kill countless powerful opponents. In the end, it became one of the eight great Zombie Kings. When had a low ant ever revealed such an expression in front of it?

Even if it had done it before, the final outcome was that the other party’s body and soul were destroyed by it.

As a dignified Zombie King, it couldn’t tolerate any disrespect!

At this moment, ferocious flames shot out of the eyes of the Zombie King clone. Strands of hair fluttered automatically without wind, and it pounced over with the tentacles of the black statues, wanting to immediately suck Tang Zhen dry and kill him.

However, Tang Zhen didn’t give it this chance at all. Just before these attacks descended, he raised his middle finger at the Zombie King clone and his body flashed strangely.

In front of the Spirit Brain Zombie King, Tang Zhen himself actually disappeared strangely!

When Tang Zhen appeared again, his body was actually a hundred meters away. As he turned around, he cursed at the Spirit Brain Zombie King.

“Go to hell, you shameless exhibitionist!”

After Tang Zhen cursed, something with clear smoke was thrown over from afar. Then, it fell into the blood pool with a splash.

When the Zombie King clone floating in the blood pool saw this scene, its eyes were filled with surprise. This lowly little ant in front of it actually mastered the teleportation skill that it could barely use!

Even if the Zombie King's main body used this secret skill, a trace of energy wave would appear before it was activated. However, before this little ant teleported, there was no abnormality at all. Moreover, the other party was so weak.

The Spirit Brain Zombie King immediately became interested in Tang Zhen. It wanted to capture him and dissect him for research before turning him into a zombie slave and locking him in the laboratory.

Relying on the strength of its clone, the Spirit Brain Zombie King completely ignored the little thing thrown by Tang Zhen and stared fixedly at Tang Zhen.

However, because of its contempt, Tang Zhen's bomb easily fell into the blood pool.

"Boom!"

After a loud bang, the blood pool was blown into pieces. A pool of dirty blood was scattered everywhere by the shock wave of the explosion. Even the black altar was severely damaged.

Among the eight black statues, three had been completely destroyed. The other five were also covered in cracks, and purple-black liquid was constantly seeping out.

"Ah, I'm going to kill you!"

As soon as the blood pool was blown up, the Zombie King clone immediately felt weak, and this feeling was getting stronger and stronger.

In the distant unknown world, the gloomy-faced Spirit Brain Zombie King was about to go crazy. It had already forgotten how many years it had been since it was this angry!

The current Zombie King clone had yet to mature. It could only carry an extremely weak trace of its soul and any attack it suffered would still leave irreparable damage.

However, it had no choice but to come because it felt that a strange power was constantly destroying its clone.

If he didn't take action to solve it, it probably wouldn't be long before the organs and meridians of this clone turned into a pile of meat.

Previously, when the Zombie Lord lost its blood essence, its plan had already been obstructed. If it weren't for the fact that it still needed to rely on the Zombie Lord to carry out its plan, the Spirit Brain Zombie King might have immediately killed its stupid subordinate.

The blood essence of the Zombie Race was extremely precious. It often required countless years to condense a single drop.

Aside from being cultivated with the blood essence of the Zombie Lord, the Zombie King clone was now also injured. If it didn't stop the other party, it would probably have to wait for countless years before the cultivation of the next clone could be completed.

Therefore, the Spirit Brain Zombie King's soul had no choice but to descend forcefully, preparing to kill this ant that dared to destroy its clone.

But looking at the terrible scene now, this guy he regarded as an ant had not only damaged his clone, but also destroyed the black altar used to nurture his clone.

The Spirit Brain Zombie King went crazy. If it had known earlier, it would have killed this guy without hesitation!

However, it seemed to be too late. The Spirit Brain Zombie King had already sensed that this clone's repulsive force was getting stronger and stronger, and the mysterious power of this world was also driving his soul out of this world.

Looking at Tang Zhen, who was about to rush out of the building, with an indignant expression, the Spirit Brain Zombie King raised its arm and pointed at his back from afar. Then, a blood-colored light dot flew into his body.

"After being infected by the aura of this Zombie King's Oath of Death, you will be hunted down by all the Zombie Race. Damn ant, I definitely won't let you off. Sooner or later, I'll turn you into my zombie slave!"

The Spirit Brain Zombie King roared indignantly. Then, its Zombie King clone's eyes bulged out. A few strange sounds came from its throat, and it actually fell to the ground with seven apertures bleeding.

Before long, the Zombie King clone slowly squirmed and collapsed, finally turning into a pile of meat.

Tang Zhen didn't know that the Spirit Brain Zombie King, one of the eight Zombie Kings of the Zombie Race, had actually been crippled by him!

He also didn't know that at the last moment before the Spirit Brain Zombie King's soul left, it threw a Zombie King Oath that was tainted with the aura of a Zombie King on him!

This was the hunting signal agreed by the eight Zombie Kings of the Zombie Race. Once it was released, the Zombie Race would all pursue the target ruthlessly.

Perhaps the indignant Spirit Brain Zombie King would still come up with other methods to continue its plan to conquer the Building World, but those things were temporarily unrelated to Tang Zhen, who was busy fleeing.

Tang Zhen, who had just escaped from the wild building, was almost surrounded by all the zombie monsters outside the building!

Tang Zhen was extremely depressed. How did these zombie monsters discover him? He had clearly activated the Quantum Invisibility Screen!

The last time he sneaked into the wild building, these zombie monsters had yet to discover him.

But now, he seemed to have become the sworn enemy of all the zombie monsters. They all widened their red eyes and pounced at him desperately.

They seemed to want to swallow him alive!

Although these zombie monsters couldn't see him, they could lock onto his position. Saber Shield Ghost Soldiers raised their weapons and tried to smash his face while zombie archers raised their tattered battle bow and shot randomly!

Tang Zhen's current appearance was as miserable as it could be.

Tang Zhen took out the purple short sword he named "Purple Lightning" and counterattacked as he dodged. If not for the defense of his black cloak, he would have been covered in injuries.

[Chapter 40](#)

Escape from the Zombie Army!

The sharpness of Purple Lightning was indeed extraordinary. The zombie monster's flexible and strong body was actually unable to block Purple Lightning's cutting. The sword easily pierced into the zombie monster's body.

With a sharp weapon in hand, Tang Zhen, who was at level two, had already killed four Saber Shield Ghost Soldiers. Compared to the last time when he relied on schemes to deal with those Saber Shield Ghost Soldiers, Tang Zhen was really fighting in close combat this time.

The shocking battle between life and death made Tang Zhen's blood boil.

There were no less than hundreds of zombie monsters densely surrounding him. The four Saber Shield Ghost Soldiers that Tang Zhen killed were nothing at all. Often, just as he killed a zombie monster, the next one would rush up impatiently.

"Damn, what sin have I committed?"

Tang Zhen's mouth tasted like blood.

In just a few minutes of being surrounded, he had already suffered countless heavy blows. Almost every attack could crush a strong adult man to death.

After all, these monsters had powerful strength that far exceeded ordinary humans.

It was all thanks to the protection of the black cloak that he didn't become meat paste, but this didn't mean that Tang Zhen was fine.

It was because the black cloak had an extremely good defense against cutting and piercing damage, but it seemed to be a little powerless against heavy attacks. The strength could still be felt faintly through the black cloak. Although it was much weaker, Tang Zhen was still shocked until he almost vomited blood.

"I have to think of a way to escape as soon as possible. Otherwise, once I'm exhausted, I can only choose to teleport. But teleporting among the zombie monsters is clearly not a good idea."

Tang Zhen quickly dodged the zombies' attacks while thinking of a way to escape.

The reason why Tang Zhen could teleport in front of the Zombie King clone and return nearly a hundred meters away from the Zombie King clone was because he had downloaded and activated a plug-in worth 500,000 gold coins just as he was about to be attacked.

[Beginner-level map Instant Transmission Plug-in. Allows user to teleport anywhere in the map. It can be used once every hour. The download price is 500,000 gold coins.]

The more than 500,000 gold coins he had just obtained in the blood pool were instantly consumed.

After destroying the zombie monster's blood pool and obtaining another life-saving skill, Tang Zhen felt that it was worth it.

Unfortunately, the map teleportation had just been used up, and the cooldown time had yet to arrive, so there was no hope at all. Tang Zhen could only find another way.

He had stuffed many life-saving items into the storage space previously to prevent any accidents.

He took out bombs from the space one after another and ignited them as he dodged. Then, he threw them randomly at the places with more densely-packed zombie monsters.

At the same time that he threw the bomb, he also activated the infrasonic wave attack and started an indiscriminate attack.

Explosions sounded one after another among the zombie monsters. Countless zombie monsters were blown into the sky and then fell heavily.

Almost everywhere Tang Zhen walked in, there was an empty space cleared by the bomb.

The grass was filled with the limbs and minced meat of the zombie monsters. Some level-two zombie monsters were also killed by bombs. However, no matter how many level-two monsters he killed now, it couldn't help him level up.

Only by killing level-three monsters would it be helpful for his level advancement.

Some level-three zombie monsters were also affected by the shock wave of the explosion, but none of them died. Their powerful bodies greatly weakened the lethality of the bomb.

On the other hand, the infrasound attack used by Tang Zhen had already revealed a trace of effect.

The zombie monsters that had been attacking Tang Zhen crazily previously had already become slow. They swayed left and right as they walked before they began to vomit and pee, causing extremely smelly black liquid to appear everywhere.

Some of the zombie monsters had even fallen to the ground. It was impossible to tell if they were dead or alive!

Tang Zhen also noticed this scene. Seeing a gap in the encirclement of the zombie monsters, how could he miss this opportunity? He immediately waved Purple Lightning crazily and forcefully opened a bloody path.

Just as Tang Zhen thought that he was about to escape, a monster-like war horse blocked his path. This war horse was tall and strong, its entire body filled with muscles. At the same time, it was covered in heavy horse armor.

Its blood-red beast eyes revealed the bloodthirsty killing intent that only cruel beasts had.

A knight in heavy armor was sitting on a horse. In his hand was an extremely wide three-meter-long iron spear that was suffused with a blood-colored cold light.

[Zombie Warhorse, level-three monster. It has a violent nature and astonishing endurance. It relies on biting and trampling attacks. Its weakness is that it's afraid of strong light explosions.]

[Zombie Heavy cavalry, level-four monster. Wearing heavy armor, its defense is extremely strong and its strength is incomparably great. It can use simple battle skills, and its flaw is insufficient flexibility. After leaving its mount, its battle power is greatly reduced, and it can barely move.]

Just as this information flashed in front of Tang Zhen's eyes, the cavalry had already shot at him with a heavy and shocking aura.

If he was hit by its spear, his head would probably immediately be separated from his body.

In the face of the attack of a level-four monster, how could Tang Zhen dare to let his guard down at all? At this moment, it was too late to dodge, but he took out a heavy shield from his storage space at lightning speed and faced the cavalry's steel spear.

The shield Tang Zhen took out was a little unique.

It was more like a huge metal defense wall than a shield. It was two meters tall and 1.5 meters wide. There was an observation hole in the middle. Tang Zhen had specially bought high-quality steel to weld it.

This defensive shield weighed 230 pounds. The bottom was even welded with a support frame. It was stable and firm, completely able to withstand the violent impact of small vehicles like motorcycles.

A huge shield stood in front of Tang Zhen, actually completely covering his body.

If not for the powerful help of the storage space, Tang Zhen wouldn't have been able to use such an overweight defensive weapon at all.

In an instant, the heavy-armored cavalry's attack arrived.

"Clang!"

With a loud bang, the heavy metal shield trembled, and a dent was left on the surface.

The power of this zombie heavy cavalry was actually so powerful!

Tang Zhen felt as if his arm was about to break. The vibration almost made him vomit blood, but he also dodged the fatal blow of the other party's spear.

He retracted the shield at an incomparably fast speed. At the same time, Tang Zhen activated the Magnesium Explosion.

An extremely dazzling light flashed, and the cavalry horse immediately neighed. It struggled uneasily and raised its two front hooves high.

Seeing that he couldn't miss this opportunity, Tang Zhen charged forward and arrived below the horse's abdomen. The Purple Lightning in his hand slashed at the horse's back leg twice.

The zombie war horse neighed again. The incomparably sharp purple lightning short sword easily cut off the war horse's hind legs, causing it to fall to the ground unsteadily.

"Roar!"

The zombie monster heavy rider that landed on the ground roared and stabbed at Tang Zhen.

However, Tang Zhen was already prepared. He released his shield to block again, but it was pierced through by the zombie heavy cavalry!

At the same time that he was shocked by the powerful strength of the zombie monster heavy cavalry, Tang Zhen ran for his life into the weeds without hesitation.
