

Alternate 351

Chapter 351: The interdimensional passage in bloodsand city _1

Blood Sand City was famous for its blood-red Desert.

The area of the Crimson Desert was not very large, with a radius of less than 100 kilometers. Compared to the vast wilderness, it was not worth mentioning.

Moreover, not a single blade of grass grew in this desert, and the temperature was far higher than that of other areas. One would feel rolling heat waves upon entering.

However, this blood sand contained a precious mineral called Blood Crystal. It was a material for forging low level mo weapons.

If the blood Crystal was crushed into powder and mixed into the molten iron used to forge weapons according to the proportion, a translucent iron ingot could be obtained.

Weapons forged with such iron ingots might not be magic weapons, but their edges would still be unusually sharp.

The skin that was injured by such a weapon would heal very slowly.

Blood Sand city's famous bloody killing war blade was made from this iron ingot and was very famous among the cultivators in the wilderness within a thousand miles.

The production of this kind of Blood Crystal was extremely low and had always been controlled by blood Sand City. It was extremely rare to see it in the outside world.

At this moment, Wanderers and wild cultivators were constantly shuttling back and forth on the road in front of bloodsand city, making it very lively.

As one of the few Grade 5 towers within a 500-kilometer radius, coupled with the opening of the interdimensional passage, it naturally attracted a large number of cultivators and Wanderers.

Tang Zhen led a Mount and mixed in with the human Flow as he arrived in front of the city wall that blood Sand City had built.

Rather than calling it a city wall, it was better to call it a protective wall for the Wanderer market.

Bloodsand city was built on the edge of the Crimson Desert, and the Wanderer market was right outside, which was considered a barrier for bloodsand city.

If monsters attacked, the first to be attacked would be the Wanderer market.

If he wanted to get to bloodsand city, he had to pass through the Wanderer market.

If one wanted to enter the Wanderer market, they would have to pay the price of a brain bead.

hurry up and hand over your brain. Can't you see that there's a line behind you? "

When it was Tang Zhen's turn, the action of digging out the head was a little slow. That wild cultivator collecting the fees did not even raise his head as he roared with an impatient expression.

However, when he saw Tang Zhen clearly, he immediately swallowed the vulgarities that he was about to curse out.

Even though Tang Zhen had deliberately suppressed his Overlord cultivation, this low-level cultivator still felt like he was standing in front of a giant beast.

A trace of aura that caused one's heart to palpitate was being emitted from Tang Zhen's body.

Tang Zhen coldly swept his eyes over this wild cultivator. There was not a trace of emotion on his face.

The wild cultivator felt his scalp tingle. A trace of cold sweat seeped out of his back, instantly drenching his clothes.

Tang Zhen threw the brain to the low-level cultivator and pulled the bone plate from his hand. He then led his war beast and slowly walked into the Wanderer market.

After seeing Tang Zhen leave, the low-level cultivator let out a long sigh of relief. His face still had a lingering fear.

Another Wanderer walked over. This wild cultivator took a deep breath and continued to put on a stern face as he loudly berated the shabbily-dressed Wanderers.

After Tang Zhen led the Mount and walked for a while, he stopped in front of a small shop.

Sitting on a simple chair, Tang Zhen ordered ten skewers of barbecued meat and a pot of wild fruit juice.

Tang Zhen's appetite was greatly stimulated as he chewed the meat skewers with a strange texture and the sweet and sour wild fruit juice.

After ordering another ten skewers of barbecued meat, Tang Zhen asked the young man who was busy with his work, "Brother, I want to enter the interdimensional passage in bloodsand city. Can you give me some guidance?"

When the young man who was currently turning the roasted meat heard this, he turned his head and said to Tang Zhen with a smile, "You've asked the right person. You should know that among the cultivators I've received, eight out of ten of them came for the interdimensional passage to bloodsand city."

The little brother barbecued meat passed the barbecued meat to Tang Zhen and picked up a bunch of meat skewers to continue smoking.

"Although there are many monsters in the wilderness, most of them are low level monsters. Although there are high level monsters, they are too scattered.

If one wanted to hunt for high-level monsters in the wilderness, they had to look everywhere, and most of the time would be wasted on the road.

That's why it's said that after a cultivator reaches rank 4, if they want to earn more brain beads, the most ideal place to go is to go to another plane."

The barbecue guy spoke with fervor and assurance. It was obvious that he often talked about this topic with others.

“Ever since bloodsand city opened this interplanar passage, it immediately attracted many cultivators.

In the beginning, there were many low-level cultivators who came to join in the fun. Most of them had the intention of taking advantage of the situation and hoping to make a fortune from the dead, or get some precious ores and medicinal herbs, and then become rich overnight!

However, after they entered, none of them could come out.

Later on, these low level cultivators gave up and all of them stayed in the wilderness. The remaining cultivators were all higher level cultivators.”

He handed the skewers to another table’s customer. Seeing that he was also very interested, the barbecue guy became even more interested in talking.

“If you want to enter the passage, you must pay ten thousand brain beads in exchange for a temporary Resident Identity Card. This is also the passage token to enter the other plane.

With this token, one could enter other planes.

When he wanted to leave, he had to return to the entrance and use the token to return.

If you lose the token, you won’t be able to return, so you must take good care of it!”

“After returning from the other plane, if you want to enter again, you’ll have to pay another ten thousand brain beads!”

“Bloodsand city has set up a shop to provide services for cultivators who enter the other dimension. Whether it’s weapons, equipment, or food supplies, we have everything we need!”

After Tang Zhen ate and drank his fill, he also had a preliminary understanding of the interdimensional passage in blood Sand City.

After paying for the meal, Tang Zhen put his Mount in the care of others and slowly walked towards blood Sand City.

It was a wonderful feeling to stroll around the enemy’s Tower area.

The area of a fifth-class city had already reached a rather terrifying level. The Black Rock City that had once made Tang Zhen gasp in admiration was only a third of the size of blood Sand City.

Furthermore, the architectural style of bloodsand city was extremely peculiar. It looked like a huge pyramid!

Compared to the Holy Dragon City, which was filled with the chirping of birds and the fragrance of flowers, there was nothing else in front of bloodsand city other than a Plaza.

The pitch-black city buildings, coupled with the desolate blood-colored desert behind, gave off an extremely oppressive feeling.

At the bottom of blood Sand City, there was an entrance for people to enter and exit. Twenty cultivators of blood Sand City stood guard in front of the entrance.

After seeing Tang Zhen, these blood Sand City cultivators blocked his path.

Looking at the level four cultivators in front of him, Tang Zhen could not help but admit that the average level of cultivators in blood Sand City was indeed higher than that of Holy Dragon City.

After explaining his purpose for coming, a cultivator from blood Sand City led Tang Zhen to a Hall inside the tower.

The hall was surrounded by counters with all sorts of weapons and equipment, as well as medicine and food. Everything was well prepared.

The five cultivators were purchasing medicines, as if they were making the final preparations before departure.

The hall was also guarded by dozens of blood Sand City cultivators. After Tang Zhen paid ten thousand brain beads, he received a passage token.

Immediately after, a cultivator asked Tang Zhen if he needed to buy weapons and supplies.

Tang Zhen walked around the counter. He was not very interested in those ordinary weapons and equipment.

He stood in front of the medicine counter for a while. After buying some Ivy ointment, Tang Zhen followed the cultivators of blood Sand City and headed to the interdimensional passage.

The interdimensional passage to bloodsand city was placed in an independent room, and there were cultivators guarding the door.

After entering the room, Tang Zhen saw the appearance of the interdimensional passage with a glance.

The so-called inter-plane passage looked like a giant ball of light that was constantly collapsing and shrinking, emitting a heart-palpating aura.

Tang Zhen walked to the front of the tunnel. He raised the command token in his hand and extended his arm into it.

Tang Zhen inhaled a deep breath of air as he sensed the pulling force that was transmitted from his arm. He then took a step forward and entered!

Chapter 352: a big one

(Here, I wish all my readers a Happy New Year, and money rolling in!)

Tang Zhen felt as though he had entered an incomparably long passageway. It seemed to be extremely far away, yet it would arrive in the blink of an eye.

This contradictory feeling almost made people vomit blood.

Fortunately, this uncomfortable feeling flashed past. When his vision recovered, Tang Zhen discovered that he was standing on the top of a tall earth mountain.

Behind him was the constantly changing interdimensional passage.

As far as the eye could see, there were incomparably huge ruins and wreckage. From time to time, the figures of monsters would flash.

These monsters were huge and had a fierce aura. They looked extremely violent.

They seemed to be the Masters of this world, and the endless ruins were their home.

Tang Zhen retracted his gaze and started to size up his surroundings.

More than twenty cultivators of blood Sand City were fully armed and guarding the passage.

More than a dozen cultivators, who reeked of blood, were sitting cross-legged in groups of three to five. Most of them were covered in blood.

When they saw Tang Zhen appear, these cultivators who were resting with their eyes closed glanced at him.

Tang Zhen tried his best to suppress his Overlord cultivation to avoid unnecessary trouble. However, the aura that he unintentionally emitted still made these cultivators, who were at the highest level, feel fear.

In their eyes, Tang Zhen was a peak rank 5 cultivator who was about to become a Lord. They didn't dare to offend him.

"My Lord, do you need a map?"

A rank 3 cultivator from blood Sand City walked over, saluted Tang Zhen, and asked.

"Map? what map?"

Tang Zhen looked at the cultivator in front of him and casually asked.

naturally, it's a map with a radius of a thousand miles. On it are the locations of various dangerous places. If you get close to that area, you can try to avoid it as much as possible to avoid unnecessary danger!

This cultivator had never seen Tang Zhen before. Therefore, he determined that this was the first time Tang Zhen had entered this foreign plane. Therefore, he patiently explained.

"One map for a thousand brain beads, we can avoid danger in advance, it's definitely worth it!"

After the cultivator from blood Sand City finished speaking, he told Tang Zhen the price of the map.

Tang Zhen nodded after hearing this. He took out a level four brain Pearl from his pocket and threw it to the blood Sand City cultivator.

After the cultivator took the brain, he hurriedly took out a map made of monster skin from his pocket and handed it to Tang Zhen.

This bloodsand city really knew how to do business. They opened up the passage, sold supplies and equipment, and now they even sold maps.

Just a single interdimensional passage could bring in a large amount of brain Pearl income for bloodsand city. This business was really good!

In comparison, the Holy Dragon city's commercial district's initial investment was too much!

Tang Zhen's heart itched as he watched. He was also pondering whether he should upgrade the main tower to Level 5.

In that case, a plane passage would also appear in Holy Dragon City. Not only would he be able to enter the other planes to hunt monsters at any time, but he would also be able to steal business from bloodsand city!

However, if he wanted to upgrade Lou Cheng to level five, he would have to sacrifice 100 million brain pearls, which was equivalent to 1000 level six brain pearls!

This was a rather terrifying number. Who knew when he would be able to gather all of them?

Tang Zhen unfolded the map and sized it up a few times. After which, he folded it and kept it properly. After which, he did not hesitate to rush toward the ruins in the distance.

The rest of the cultivators glanced at Tang Zhen's back and no longer paid attention to him.

Every day, there would be people coming and going, and there would be people who would stay here forever.

This had nothing to do with strength, it was more about luck!

A cultivator's entire life was spent in blood and killing, so they were already used to life and death.

The wind blew, and yellow sand filled the air, blocking everyone's vision.

After Tang Zhen ran for a distance, his body flashed and entered a pile of ruins. He tried to activate the teleportation.

In the blink of an eye, he had disappeared without a trace.

A minute later, Tang Zhen's figure appeared once again with a trace of surprise on his face.

I didn't expect to be able to teleport here. If that's the case, I can play even crazier!

A trace of ferocity surfaced on Tang Zhen's face. His eyes glowed as he looked at the ruins in the distance.

A crazy plan began to brew in his mind.

Tang Zhen put away the items that hindered his movement and began to continuously walk through the ruins with a speed as fast as lightning.

Looking at the direction he was heading in, it was the danger zone that was clearly marked on the map!

Along the way, he had crossed paths with several terrifying Lord-tier monsters. However, Tang Zhen did not provoke them. Instead, he quietly sneaked over.

During this period of time, Tang Zhen also encountered quite a number of cultivators and their remains. However, he still ignored them.

He only had one goal now, and that was to head to the gathering place of the monsters, and then make a big deal!

After running for nearly a day, Tang Zhen finally approached the closest danger zone to him.

Through the map's point of view, Tang Zhen slightly frowned as he looked down at the huge ruins in front of him and the monsters that were constantly wandering in the ruins.

Tang Zhen shook his head secretly after checking the style of the building ruins.

He was sure that in this alien plane, there had once been a civilized race that was not inferior to the original world, but it had been destroyed for unknown reasons.

What was the cause of the destruction of a powerful civilization? was it related to the interdimensional passage and these monsters that were wreaking havoc?

Tang Zhen didn't have the time to think about it. He still had many things to do.

After finding a secret location, Tang Zhen returned to his original world.

After contacting Ivanov, Tang Zhen asked him a question.

"Can you get nuclear bombs, the more the better?"

Ivanov was shocked. Although he had made his name by selling arms, he had never come into contact with such a sensitive weapon as a nuclear bomb.

However, in the original world, there was almost nothing that money couldn't buy.

Even things like nuclear bombs could be obtained by paying enough money.

Ivanov had his own secret channels. Since Tang Zhen needed it, he could just ask.

After making a few phone calls, Tang Zhen got the information he wanted.

There were indeed nuclear bombs, but there were only two. The number was far from what Tang Zhen had requested.

These two nuclear bombs were ordered by Tang Zhen. At the same time, a large number of high-explosive explosives were also ordered by Tang Zhen.

After the matter was settled, Ivanov immediately began to prepare.

This was an extremely sensitive deal, and Ivanov had to deal with it carefully and personally preside over the entire process.

Tang Zhen quietly sat on the sofa. His finger was repeatedly tapping on his thigh as he pondered where he should go to obtain sufficient nuclear bombs.

He was going to make a big move this time, and a powerful weapon was indispensable.

Since he couldn't buy it, he would just move it directly!

He activated the [universal electronic tool] and began to search. A large amount of data was filtered and filtered, and the information left in the end was basically extremely accurate.

A map popped up with many red dots marked on it. These places were very likely to store nuclear bombs!

Tang Zhen stared at the red dots on the map. After being silent for a moment, he placed his attention on one of the red dots.

this is the most likely location to store the warhead. It seems that I have to make a trip personally!

When Tang Zhen thought of this, he directly stood up and left the manor.

Chapter 353: a big firework

The weather was getting colder, the yellow leaves were falling, the bare trees were shivering in the wind, and there were few pedestrians on the empty streets.

Tang Zhen strolled along the street like a leisurely traveler.

The foreign buildings on both sides of the street didn't attract his attention. In his mind, he had been planning how to sneak into the target location.

The place they were going to sneak into this time around had a very high security level. However, it was unable to stop Tang Zhen from entering.

He first figured out the specific terrain of the target location and the surrounding buildings before he hacked into the network system again.

After figuring out the specific defense arrangement, Tang Zhen began to act.

Tang Zhen, who had activated the [quantum invisibility light curtain], quietly entered the target location. After that, he avoided the patrolling guards and sneaked into the underground facility.

As though he was wandering in his own backyard, Tang Zhen easily cracked the security equipment and saw the target of this trip.

There were more than a thousand nuclear bombs stored in this secret base, and Tang Zhen took away fifty of them in one go!

The disappearance of such a large number of nuclear bombs would definitely cause a huge uproar once it was discovered, causing the original world to fall into complete panic.

If people knew where these nuclear bombs were going and knew that they were going to explode in the other world, they would not have any fear.

All that was left was perhaps endless curiosity.

It was a pity that Tang Zhen's actions were extremely secretive. Apart from suspecting him, there was no direct evidence to be found.

After getting what he wanted, Tang Zhen left the place and returned to the ice Bear Alliance.

He also had to modify these nuclear bombs to ensure that they could be detonated remotely and at a fixed time.

After returning to the ice Bear Alliance, Tang Zhen found a huge warehouse and began to work.

With his evolved ability to analyze and learn, as well as the help of the [universal electronic kit], Tang Zhen could easily complete the modification work.

After spending nearly two days, Tang Zhen had completed the modification of all these terrifying weapons.

After a short rest, Tang Zhen once again activated the teleportation.

Tang Zhen walked out from a hidden corner. He looked at the dangerous area in front of him and charged in.

For some unknown reason, these danger zones were home to a large number of monsters. Many of these areas were even Lord-ranked.

If cultivators below the realm of a Lord were to accidentally enter this place, they would basically die!

What Tang Zhen wanted to do now was to throw the killing weapon in his storage space into this place.

In the beginning, Tang Zhen could still avoid the monster's detection.

However, as he ventured deeper, more and more monsters appeared. Among them, a few were Lord-tier monsters.

The mental strength of these monsters was very strong. Even though Tang Zhen had activated the [quantum invisibility light curtain], he was still discovered by them.

The monsters began to hunt down the cultivators who had barged into the area mercilessly!

Tang Zhen completely ignored the monsters behind him. He continued to run and buried his head as he charged deeper into the region.

A monster the size of a small mountain appeared from the ruins. From its aura, one could tell that it was a 2-star horde leader!

Tang Zhen simply did not have the confidence to win when facing such a monster. Therefore, he chose to Dodge without the slightest hesitation.

This Level Seven monster didn't seem to have any intention of letting Tang Zhen go. Instead, it quickly pounced toward him. The ground trembled as it ran.

Behind it, there was a group of Lord-tier monsters and even lower-tier monsters!

Seeing that the monster was about to catch up to him, Tang Zhen waved his hand and threw out the modified nuclear bomb. At the same time, he activated the teleportation function.

After Tang Zhen disappeared, the monsters rushed up. The level-seven monster in the lead was trying to bite the nuclear bomb.

At this moment, a terrifying aura suddenly erupted!

A few hundred thousand tons of nuclear bombs instantly exploded, completely enveloping the surrounding area.

The ferocious-looking Level-7 monster instantly vaporized, and its huge body disappeared without a trace, leaving behind only a crystal-clear brain that had been taken away by the shock wave.

The monsters that followed behind were also unable to escape the fate of death. They were all burned into dust at the same time!

A huge mushroom cloud rose into the sky, and the explosion resounded through the sky. The earth trembled continuously.

To the monsters in this area, this was a devastating disaster.

Many cultivators witnessed this scene and were so shocked that they didn't know what to do.

Some cultivators began to run to the site of the explosion, hoping to obtain unexpected gains in the area of the mutation.

Tang Zhen, who was the culprit, was currently sitting on a sofa and feeling the changes in his body.

After getting rid of these monsters, Tang Zhen had advanced to Level 7 as expected, which was a two star horde leader!

A powerful force kept surging in his body, making him have the urge to roar at the sky.

After waiting for half a day, Tang Zhen wore the modified radiation protection suit that weighed more than 100 kilograms and started the transmission again.

At the center of the explosion, the radiation level was frighteningly high. Other than the shocking crater, the remaining building ruins had once again suffered a destructive blow.

In some places, it was smooth like glass.

Tang Zhen moved his body, which was wrapped in the protective suit, and began to search for the brain that might be left behind.

In fact, the Fumi combat suit that Tang Zhen was wearing had an extremely strong radiation protection function. However, he still got himself a set of radiation protection suit out of safety considerations.

After the violent explosion, there was no longer anything of value in the central area, so there was no need to stay here.

Tang Zhen advanced even further. He attempted to use his mental energy to sense and determine the location of the brain.

As a two star horde leader, Tang Zhen's mental energy could cover an even wider area. Therefore, he was able to quickly sense the aura of a brain bead.

Tang Zhen's heart was filled with joy. Such a clear reaction meant that this brain Pearl's level was not low.

He swiftly approached the location where the aura was emitted. Not long after, Tang Zhen discovered the target that was hidden by the rock fragments in the dust.

This was a brain that was shining with a brilliant light. The nuclear explosion did not destroy it, and it was intoxicating to look at.

A level Seven brain Pearl was equivalent to a million!

For Wanderers and ordinary cultivators, this was a fortune that could make them go crazy.

However, to a city Lord who wanted to advance to an intermediate city, these brain pearls were not even a fraction of the sacrifice!

After storing the brain into the storage space, Tang Zhen continued to search.

After setting off such a huge firework, Tang Zhen had to recover his capital no matter what.

After all, the price of a nuclear bomb was extremely high, and there was a price but no market!

Tang Zhen continued to circle around the explosion area. After spending a few hours, he finally found more than fifty brain beads.

Some of the brains were harvested by him after he killed the dying monsters.

Among these brains, other than one level-seven and fifteen level-six brains, the rest were all level-five and level-four brains, which were not of much help to Tang Zhen.

He had increased his level by one and obtained close to three million brain beads. This was Tang Zhen's harvest this time.

Such a fast speed of making money made Tang Zhen extremely excited, and it also strengthened his determination to continue lighting fireworks.

As for what would happen to the plane where the fireworks were set off, Tang Zhen simply didn't have the mood to care.

Other than the ruins and monsters, there were only the cultivators who could leave at any time.

Since it was an abandoned garbage dump, it didn't matter if the destruction was more thorough!

Tang Zhen put away the protective suit and sized up the cultivator who passed by in the distance. He then turned around and ran into the distance.

This other world was filled with danger. Tang Zhen didn't have the obligation to educate these greedy people and tell them what radiation was.

Perhaps cultivators with extremely strong physiques could ignore the damage of this radiation?

Chapter 354: there's a way to make money, money is rolling in!

In the ruins of a collapsed high-rise building, Tang Zhen was indifferently chewing on dry food while constantly observing the low-lying ruins.

This was a dangerous area marked on the map, where a level Seven monster was active.

It was a hundred-meter monster that looked like a mutated centipede. It was currently in the ruins, very quiet.

Around the centipede, there were a few Lord-tier monsters. They seemed to be the underlings of this level-seven monster!

Perhaps every area marked with danger had a level Seven monster, and that was their territory.

If things were really like this, it wouldn't take long for Tang Zhen to advance again!

However, Tang Zhen had also heard from others that the highest level of monsters in the alien plane connected to the level 5 building was Level 7.

Who knew what the mastermind behind this was thinking? was it to maintain some kind of balance?

After finishing the dry rations in his hand, Tang Zhen stretched his body and jumped down.

"Bang!"

Tang Zhen's feet stomped on the ground, and the rock under his feet was shattered into pieces.

Tang Zhen turned around and looked at the building that was tens of meters tall behind him. He patted the dust on his pants and quickly ran toward the danger zone.

However, he had only run a short distance when a dozen foreign cultivators appeared from the ruins of the building and blocked Tang Zhen's path.

The hiding place of these foreign cultivators was very secretive. Even Tang Zhen did not discover the traces of this group of people.

Their actions were clearly a robbery!

Without any nonsense, these foreign race cultivators waved the weapons in their hands and rushed forward, blocking all of Tang Zhen's escape routes.

Judging from the expressions and movements of these foreign cultivators, they seemed to be very familiar with this kind of thing. Only God knew how many vengeful souls they had in their hands.

However, they had chosen the wrong target this time. They had no idea that the human cultivators before them had the ability to crush them into powder.

Tang Zhen's footsteps didn't seem to have any pause as he charged towards the blade of a foreign cultivator.

Under the shocked eyes of the foreign cultivator, Tang Zhen easily dodged his saber and then punched.

The cultivator's vision blurred and his head exploded.

The other foreign cultivators were bewildered as they looked at the headless body that slowly fell to the ground.

Tang Zhen looked at the bloodstains on his body in disgust. He took out a battle blade from his storage space and sneered at the foreign race cultivators.

A faintly discernible aura began to spread out from his body.

The alien cultivators' expressions changed drastically when they felt the oppressive aura.

"This Tao Wu is a Lord-tier cultivator?"

no, the aura of a Lord-tier cultivator can't be this terrifying!

"Damn it, let's run!"

Although there were Lord-level cultivators in the level 5 city, they were either the city Lord or the elders who lived behind the scenes. They were all intimidating military forces in the city.

These Overlord cultivators were rare and precious, and he definitely could not risk his life.

In this dangerous world full of unknown, no one could guarantee that they would not die here unless they were extremely lucky.

This was also the reason why the foreign cultivators were so shocked when they found out that Tang Zhen was a Lord Grade cultivator.

When they realized this, the first thought that came to their minds was to escape immediately.

Even though there were more than ten of them, they didn't have much chance of winning against a Lord-tier cultivator. Therefore, their best option was to escape!

However, they did not have any possibility of escaping in front of Tang Zhen.

Just as these foreign tribe cultivators turned around, Tang Zhen was like a Phantom as he entangled himself with one of the foreign tribe cultivators.

Then, the second non-human cultivator, the third, and the fourth, Tao Wu, came.

He could easily take the lives of these foreign cultivators with a simple swing of his saber.

By the time Tang Zhen stopped, his side was already filled with corpses.

After shaking off the blood on the saber, Tang Zhen began to search the corpses of the foreign cultivators.

Unfortunately, this group of people were poor. Tang Zhen only found more than five hundred thousand brain beads from their bodies.

For ordinary cultivators, 500000 brain beads was a lot.

After keeping the brain Pearl, Tang Zhen continued to dash toward the danger zone. However, compared to the carefulness he had shown the last time, he was much more relaxed this time around.

The Horde of monsters would put his life in danger, but avoiding the pursuit of these monsters had become extremely easy.

With the big fireworks that saved time and effort, Tang Zhen's goal could be achieved a little earlier!

Ten minutes later, another huge mushroom cloud rose into the sky and razed the area to the ground.

Not long after, Tang Zhen's figure once again appeared at the site of the explosion. He was still wearing the thick protective suit.

After searching along the ruins, Tang Zhen took out the map and glanced at it before heading to the next location.

Only this time, his mode of transportation had been changed to a helicopter.

Tang Zhen didn't want to waste time on the road. He was already impatient to gather the required brain beads.

In the next few days, there were continuous earth-shattering explosions. Radiation clouds were gathering in the sky at an extremely fast speed.

More and more brains appeared in Tang Zhen's pocket as he got closer and closer to his goal.

However, the continuous super explosions had already attracted the attention of the cultivators.

The five towers that controlled the interdimensional battlefield had already sent cultivators to investigate, wanting to find out the specific cause of the explosion.

The land in this alien plane was about four million square kilometers, and the five towers each controlled hundreds of thousands of square kilometers of land. The continuous explosions made them feel uneasy.

In order to upgrade to a level 6 building, he would need a large number of brain beads, and this space was the best way to obtain them.

They sent cultivators to kill monsters in this world, and cultivators were constantly killed by monsters.

After the cultivators died, there would be young cultivators who would grow up. As long as this world existed, they could enter it year after year.

After so many years, some of the buildings had already accumulated enough brain pearls to upgrade to Level 6, but they had no intention of upgrading their buildings.

This was because once they completed their promotion, the other four towers that shared the same alternate plane would replace the monsters that were attacking the city and teleport over to attack the city.

This was an extremely dangerous gamble, and if he failed, he would be doomed eternally.

No one would advance easily without absolute confidence.

Thus, using the alternate dimension to earn brain beads became the most important thing for these Level 5 towers.

This was the treasure bowl of the five towers, and they absolutely couldn't afford to lose it!

Just as these cultivators began to investigate, Tang Zhen once again arrived at a "dangerous place" with a level Seven monster!

After carefully scanning the target area, Tang Zhen quickly rushed in.

"This time, I'll earn another three million!"

Chapter 355: The "treasure" under the ruins

A hundred miles away from Tang Zhen's location, a group of foreign cultivators were hurrying on their way.

They were covered in dust, and their faces were filled with fatigue.

They had used up a lot of their physical strength after days of constant traveling. Fortunately, they were all level four or five cultivators, so they were probably exhausted.

"When I catch that bastard saboteur, I'll definitely pull out his tendons and bones!"

In the middle of the group, a non-human cultivator took out a map and glanced at it. His face was filled with ferocity.

Two days ago, these foreign cultivators had accidentally discovered that the continuous explosions were actually caused by humans.

This discovery made them both shocked and angry.

They were shocked because the explosion caused by this cultivator was so terrifying that it was almost enough to destroy the world!

He was angry because after what he did, even the inter-plane passage began to become unstable. If this continued, even the inter-plane passage might be destroyed.

Once the inter-plane passage was closed, not only would the five towers lose the best source of obtaining the brain pearls, they would also be forced to upgrade their towers!

The reason for this was because of the strange laws of this world.

The appearance of the interdimensional passage not only brought benefits to the level 5 building, but it was also a super bomb that started its countdown.

After Lou Cheng was promoted to rank 5, the interdimensional passage would appear, and it would exist for a century.

After a hundred years, each level five building would have accumulated enough brain pearls to be sacrificed, and they could upgrade the level of the building.

At this time, even if you didn't want to advance, under the invisible laws, you had to advance.

The order of advancement was random, and no one knew if they would be the first unlucky one to advance.

When the unlucky one was chosen to advance to level six, he would have to accept the attacks of the other four towers.

They would either lose the battle and destroy the city, splitting up all their assets, or successfully defend the city and take over the assets of the other four towers.

However, the first tower to advance would most likely fail. After all, it was facing four powerful Level 5 towers.

The remaining four towers continued to fight until the true winner appeared!

This was an extremely cruel and bloody process, just like raising venomous insects.

However, if the alternate plane were to be destroyed and the passageway was closed in advance, these towers would be in deep trouble!

Every level 5 City Tower was built at a different time, and the time when the interdimensional passage opened was also different.

Therefore, even if the inter-plane passage of one's own tower was closed, the other towers might still be open.

The gap could be a few years or even a dozen years. For these Level 5 towers, this was a good buffer period for them to fully prepare for the battle.

If the inter-plane passages were closed at the same time, they would immediately start fighting, which was something the nobles of the five towers did not want to see.

Therefore, Tang Zhen, who had caused such a terrifying explosion, must be executed immediately!

The city Lords of the five towers had already reached a consensus through the cornerstone platform. They had to kill this destroyer at all costs.

Countless cultivator battle teams were sent into this world just to kill Tang Zhen.

1

By now, the interdimensional passages of the five towers had been surrounded by a large number of cultivators. All the cultivators who left had to go through a strict inspection to prevent destroyers from snatching them away.

In order to deal with him, the five towers had sent out almost all of their elites, and there were more than ten thousand fully armed cultivators!

When this cultivator battle team discovered Tang Zhen's traces, they had already released a communication signal. It wouldn't be long before the cultivator battle teams from the nearby five cities gathered here.

Tang Zhen was unaware of all this. At this moment, he was heading deeper into the danger zone and was prepared to light a firework.

Before this, Tang Zhen had always been doing this.

However, just as he was passing by the ruins of a building, a strange feeling attracted Tang Zhen's attention, causing him to stop his footsteps.

It was as if there was something hidden under the broken building.

Tang Zhen, who originally planned to leave after setting off a firework, immediately rushed to the ruins. After rummaging through it, he directly entered a pitch-black entrance.

A huge piece of building debris blocked Tang Zhen's path, but it was kicked away by Tang Zhen.

Dust flew everywhere, and a strange smell kept coming from the entrance to the underground.

Tang Zhen stretched out his hand and pressed on the neck of the Femi combat suit. Immediately after, the combat suit extended upwards and covered Tang Zhen's mouth and nose.

The originally pungent smell was filtered out without a trace.

After walking forward for a distance, a large door appeared in front of Tang Zhen.

This door had been sealed for a long time and looked extremely sturdy. However, it was still unable to stop Tang Zhen's footsteps.

After breaking the metal door open with brute force, he was surprised to see a group of half-mechanical creatures.

As the [monster detector] did not give any hints, Tang Zhen concluded that these half-mechanical creatures were not monsters.

They might have been combat weapons created by the natives of this world, but they were preserved for some reason.

The half-mechanical creature's appearance was similar to a monkey's. It was about 1.2 meters tall. At this moment, it was holding a weapon that looked like a gun as it rapidly pounced toward Tang Zhen.

Continuous flames shot out from those weapons and struck the ground and walls around Tang Zhen.

These bullets seemed to be extremely corrosive. After hitting the target, they kept making "

Tang Zhen easily dodged these bullets and rushed to the front of these semi-mechanical weapons. He easily broke their necks.

After storing the corpses and weapons into his storage space, Tang Zhen continued on his way.

After another ten kilometers, they reached the end of the tunnel, and there was nothing inside.

Tang Zhen would not believe that there was no hidden area in such a deep underground passage.

When he thought of this, Tang Zhen immediately activated his application to scan the area. He quickly discovered a special area on the wall.

He took out the purple electric short sword and gently cut the wall. A piece of rock fell to the ground, and a smooth crystal was revealed.

Tang Zhen observed it for a moment before extending his finger to gently touch the surface of the crystal.

The originally dull crystal began to glow slightly. Soon after, a series of strange words and patterns appeared before Tang Zhen's eyes.

If the cultivators in the world of loucheng were to face this scene, they would probably be at a loss.

You need to enter the password for verification. If you get it wrong three times, it will shut down immediately.

Tang Zhen didn't know what other defensive methods they would have.

He activated the [universal electronic kit] and began to crack the code.

These magical applications had never disappointed Tang Zhen.

A few minutes later, the crystal screen in front of Tang Zhen began to operate automatically. The dazzling 3d words were rearranged and a 50-digit password was entered.

After the password was cracked, the crystal screen flashed for a moment and then dimmed again.

However, the wall in front of Tang Zhen slowly opened, revealing a huge entrance.

After he slowly walked in, Tang Zhen discovered that he had actually entered an doomsday seed bank!

Chapter 356: Island base, trapped in heavy siege

The so-called " seeds " here were not simply the seeds of plants. They represented hope and contained the technology and civilization inheritance of this race!

In an empty field, Tang Zhen saw semi-mechanical creatures that were in a queue. They were soaked in a kind of sticky liquid.

They were all battle machines that did not know fatigue, but they were currently in a closed state and needed to be activated before they could fight.

Other than that, there were also a large number of weapons, food, and a hexagonal crystal that stored all the technology of this race.

Just like the flashing gold tribe, the natives of the wasteland world were also prepared to rise again.

However, looking at the degree of destruction of the wreckage outside, Tang Zhen concluded that this place had been occupied by monsters for at least a hundred years. The indigenous people were probably dead.

Even if there were some survivors, they still couldn't change the current situation.

After such a long time of knowledge loss, even if they found this place, they could not enter the warehouse.

Since this was the case, Tang Zhen would kindly accept all of them.

There were countless materials stored in such a large warehouse. Tang Zhen had to find a proper place to store them.

These items would be transported to the original world by Tang Zhen, and then the useful materials would be selected and transported to Holy Dragon City.

After Tang Zhen looked through the entire warehouse, he teleported back to his original world.

In Ivanov's Manor, the ice Bear Alliance.

Tang Zhen looked at the document in his hand and nodded in satisfaction.

The island in the middle of the ocean was now in Tang Zhen's possession, and he could head over to receive it at any time.

The main value of the island was the source of drinking water on it. Otherwise, Tang Zhen would have directly built an Island in the International waters.

Now that the island had become a private territory, there was the best place to store the transported goods.

After a little preparation, Tang Zhen and Ivanov immediately took a plane and headed to the island.

Tang Zhen finally saw the island in the middle of the ocean after turning around all the way.

From the sky, the area of the island was not large. However, this did not have any effect on Tang Zhen.

As long as Tang Zhen was willing, he could instantly expand the area of this Island by ten times or even a hundred times!

The plane slowly landed at the airport. Tang Zhen looked at the island once through the map's perspective and directly headed to the foot of a mountain.

Ivanov and the Super soldiers, who were following closely behind, saw this and quickly followed.

After reaching the foot of the mountain, Tang Zhen stopped and activated the [terrain transformation plug-in]!

The people standing behind Tang Zhen were originally puzzled and could not figure out what Tang Zhen wanted to do. However, in the blink of an eye, they were so shocked that their mouths were wide open.

The mountain peak in front of them was rising at an unbelievable speed, reaching a height of thousands of meters in the blink of an eye!

In addition, the area of the island was also rapidly increasing, just like a piece of bread being spread out with a rolling pin.

In the middle of the island, a vast flat land quickly appeared.

Ivanov and the others looked at the scene in front of them in a daze, and it took them a long time to come back to their senses.

“Oh God, what did I just see?”

is this Tao Wu the power of a God? ”

“Your Excellency, did you make this?”

Ivanov carefully walked in front of Tang Zhen and asked with an incomparably respectful expression.

Tang Zhen nodded and walked toward the cave that had just appeared on the mountain.

The crowd hurriedly followed him in, their faces filled with respect and adoration.

The interior of the cave was extremely large, larger than Ivanov and the others had imagined. There was even more vast space in the deeper parts.

After walking around, Tang Zhen gave Ivanov and the others a few instructions and then began the transportation work.

Such a huge change in the terrain could not be hidden from those who were observant. However, Tang Zhen did not intend to hide it from the start.

From the moment he bought this Island, Tang Zhen would begin to face the entire original world and slowly show the world of loucheng to the humans of the original world.

A large number of resources were continuously transported over by Tang Zhen and piled on the ground of the cave. The number of resources was increasing.

Ivanov and the others looked at the items that were filled with the style of the other world and were even more excited, their eyes full of excitement.

Being able to follow a boss like Tang Zhen, who possessed a mystical ability, and participate in a great undertaking that could change the history of mankind, this made them feel incomparably honored.

There was no need for Tang Zhen to say anything more. They immediately began the plan for the island’s transformation and construction.

The training base, the laboratory, and a series of other projects had also officially begun.

As for the island’s defense work, Ivanov and the others did not have to worry about it at all.

Other than modifying a batch of super soldiers, Tang Zhen would also activate a batch of half-mechanical biological weapons that he had just obtained to participate in the defense work of the island.

If necessary, he would even release a large number of monsters in the nearby sea and sky to protect the safety of the island.

If he could create super soldiers, he could also create Super Monsters. However, these monsters had many disadvantages, and he could not control them as he wished.

The transformed monsters were extremely fragile and could not be compared to the real monsters in the world of towers. Their vitality was also far from that of the real monsters.

Tang Zhen had done nearly a hundred experiments in Lou Cheng's laboratory, but he still couldn't find an effective solution. This was also the reason why he had never put the modified monsters into use.

.....

After spending a lot of time, Tang Zhen finally finished moving all the materials.

Tang Zhen patted off the dust on his body as he looked at the huge empty space. He turned around and walked toward the ground.

What he didn't know was that at this time, at the edge of the danger zone, there were already more than 2000 cultivators from the five cities who had gathered and surrounded this place.

However, they did not take the risk to enter the danger zone. After all, there were terrifying Level 7 monsters and a large number of Level 6 Lord-tier monsters.

If they rashly barged in, they would definitely suffer great losses.

These cultivators weren't like Tang Zhen, who had endless special abilities and could enter and exit dangerous areas like fish in water.

Since the destroyer had entered this area, they only needed to wait with peace of mind. If he was killed by the monster, it would be something to be glad about.

However, the possibility of this was very low, because the dangerous areas that the saboteurs had been to would eventually turn into ruins, while he himself was safe and sound.

Therefore, the cultivators of the five cities believed that the destroyers would definitely come out from inside.

However, in order to prevent themselves from being affected by the terrifying explosion, they all tried to stay as far away from the dangerous area as possible and then carefully hid.

As long as the saboteur walked out of the danger zone, they would surround him and launch a fatal blow!

If Tang Zhen were to know about the plan of these cultivators, he would definitely scoff in contempt. This was because the safety zone that they thought was safe was still within the killing range of a nuclear bomb.

Even if they had strong physiques and couldn't be killed directly, there would be endless trouble in the future.

These cultivators were not aware of the horror of nuclear radiation, so they were all injured without knowing it!

Tang Zhen was not clear about what kind of consequences it would cause.

However, as long as he could cause trouble and trouble for the enemy, Tang Zhen was very willing to do it.

There was one more thing that Tang Zhen was also unclear about.

One of the reasons why Bloodsand City had not taken any action to retaliate immediately after suffering losses was because they were afraid of the Holy Dragon City's weapons.

The main reason was that most of the cultivators in Blood Sand City were in another plane, participating in the battle for a secret location.

The cultivators in charge of Blood Sand City's defense couldn't be easily mobilized, which was the main reason why they hadn't taken action yet.

For a low-level city that dared to challenge their ruling position, Blood Sand City would not hesitate to destroy it and then plunder its wealth.

Although they were afraid of Holy Dragon City's weapons, Bloodsand City also had similar things, which were also their hidden trump cards.

Bloodsand City had once found a batch of weapons that could fire corrosive bullets in some ruins.

Because the number of bullets was limited and could not be produced, there was no large number of equipment, and they were stored in Bloodsand City.

However, in order to capture the saboteurs, the cultivators of Blood Sand City had equipped themselves with such weapons.

The cultivators from the other four cities also brought weapons they had discovered in this world to deal with this destructive person.

However, just as these cultivators were suppressing their anger and wanted to tear Tang Zhen's corpse into ten thousand pieces, another earth-shattering sound was heard!

Chapter 357: mutated cultivator, encircle! pursue! and intercept

When the loud sound came, the defenseless cultivators were immediately hit.

The scorching heat and dazzling light enveloped them completely, making them feel as if they had fallen into hell in an instant.

The armor and hair on his body were set ablaze by the high temperature, and his exposed skin was severely injured.

The cultivators who were looking straight at the dangerous area were completely plunged into darkness the moment the light appeared.

They roared and scratched their eyes, but large pieces of flesh fell off their faces and hands, making them look extremely ferocious.

The power of this firework released by Tang Zhen far exceeded the imagination of these cultivators!

A huge shockwave spread from the ground, flattening the surrounding building debris and burying some hidden cultivators.

This process was extremely short, but it also seemed extremely long. When the world finally returned to peace, the surroundings became deathly silent.

No one noticed that the sky seemed to shake for a moment, and then an indescribable power spread out.

The unknown force completely enveloped the area of the explosion and then silently changed the cultivators who were enveloped by the shock wave.

After another half an hour, the force suddenly disappeared, but the area covered by the explosion changed dramatically.

In the suffocating dust, countless ghostly shadows were wandering around, constantly letting out frightening wails.

They were the cultivators from the five cities who had survived the explosion. After the unknown force descended, they all fell into a coma.

However, they had already changed beyond recognition!

The cultivators' naked bodies were covered with large chunks of skin, and their eyes were blinded.

The physical pain almost drove them crazy, causing them to constantly roar and run around.

Although they were not in human form, they were still conscious, but they had forgotten who they were.

They didn't know why, but the center of the explosion had a Fatal Attraction to them, making them unable to stop.

The wandering cultivators turned around and began to walk toward the center of the explosion at an increasingly fast speed.

Having lost their vision, they did not see that as they went deeper into the center of the explosion, the wounds on their bodies were constantly healing, and a layer of hard black shell was growing on their bodies.

The closer they got to the central area, the thicker the shells on their bodies became, and they became almost invulnerable.

Their eyes, blinded by the strong light, turned into a pool of blood and melted away. But then a pair of blood-red eyes appeared from their eye sockets.

A cold glint flickered in those red eyes, and they were filled with the desire to kill.

Their auras grew stronger and stronger, from level four to level five, and from level five to Lord.

There were also a few cultivators whose cultivation levels had soared and directly advanced to two star horde leader!

However, they were afraid.

It should be “they”!

This was because there was a brain that was constantly growing in the heads of these cultivators.

They had turned from cultivators into real monsters!

It was unknown if it was a coincidence or not, but the number of cultivators that had turned into monsters was the same as the number of high-level monsters that Tang Zhen had killed in the past few days!

There seemed to be an invisible force that made up for the loss of this abnormal monster.

“Awoo!”

All the monsters let out a long roar and ran in all directions, disappearing into the endless ruins in the blink of an eye.

After a period of time, Tang Zhen suddenly appeared from the smoke and dust and began to search for the scattered brains.

From the beginning to the end, he did not see the cultivators from the five cities who were hiding, and he did not know what happened to them.

Just like the previous few times, after Tang Zhen searched around the explosion site, he was prepared to head to the next location.

However, Tang Zhen still discovered some abnormalities in the process of searching.

Although the explosion had buried too many traces, Tang Zhen still found many scattered weapons. This was something he had not encountered in other areas.

“Could it be that someone wanted to Rob me, but ended up being destroyed by the big fireworks?”

Tang Zhen scratched his head with a face full of doubt.

“Something’s wrong, something’s really wrong!”

Looking at the number of weapons, there must be a lot of people. How could there be no traces left in the killing range of such an explosion?”

Tang Zhen frowned slightly. There was definitely something fishy going on when things were abnormal. Something that he did not know about must have happened.

Moreover, during the process of searching, Tang Zhen had found large pieces of flesh more than once. They definitely didn’t come from dead monsters, but cultivators!

Tang Zhen’s heart was filled with doubt as he left the area and continued to head to the next target location.

Tang Zhen maneuvered the assault Helicopter into the sky. He had just flown a short distance when he noticed the abnormality on the ground.

Hundreds of foreign cultivators appeared in his path and pointed at the helicopter.

Other than the cultivators on the ground, a large number of cultivators appeared in the sky. They looked like Yakshas, and their huge wings flapped continuously as they rushed towards Tang Zhen.

The alien cultivators at the front had already begun throwing javelins at the assault helicopters.

Tang Zhen immediately realized that something was amiss. He unhesitatingly activated the cannon and began to shoot at the group of cultivators in the sky.

The whistling bullets streaked across the sky and collided with the cultivators, immediately causing a large cloud of blood mist to explode.

A dozen foreign cultivators couldn't Dodge in time and were torn into pieces by the bullets. Their bodies fell from the sky.

Seeing this, the remaining cultivators scattered in all directions to avoid being hit by the bullets.

Compared to these winged level four and five alien cultivators, the mobility of the assault helicopters was much lower.

After Tang Zhen realized this, he immediately maneuvered the armed helicopter and landed in the ruins in the distance.

He didn't want his plane to be damaged, so he had to put it away as soon as possible.

When the cultivators saw Tang Zhen run straight to the ruins, they quickly chased after him.

The cultivators running on the ground looked up at the sky from time to time. After receiving the guidance of the cultivators in the sky, they also swarmed toward the ruins.

Tang Zhen stopped the plane on an empty piece of land and directly kept it into his storage space. After which, he quickly entered the ruins.

The alien cultivators who were flying in the sky were shocked. Their eyes almost popped out of their sockets when they saw this.

To be able to make such a large plane disappear without a trace, the destroyer being chased must have a storage equipment that was enough to make people jealous!

They didn't expect to receive such a huge surprise just by hunting down a destructer. This caused the foreign cultivators in the sky to become greedy.

As long as they could get their hands on this storage equipment, they would be able to obtain unimaginable wealth.

They did not think that Tang Zhen possessed the storage ability of a Holy master. This was because from the beginning to the end, they had thought that Tang Zhen was a very high level martial cultivator.

As for the Holy Dragon city's storage application card, they had never heard of it due to the distance.

These flying cultivators kept circling the area where Tang Zhen had disappeared, trying to find his traces.

However, the area of the ruins was too large, and it was extremely easy to hide people.

After searching for half a day, these foreign race cultivators still did not see Tang Zhen's shadow. This made them extremely anxious.

At this moment, the cultivators who had been searching the ground rushed over and surrounded the ruins.

The battle would start at the first touch!

Chapter 358: Advancing to rank 8, counterattacking the old nest

These cultivators were scattered in the ruins and looked after each other. The flying cultivators monitored the sky to ensure that the saboteurs would not escape.

With swords and guns in their hands, they constantly searched for possible hiding spots of the saboteurs, their bodies full of killing intent.

In the shadow of a certain ruin, Tang Zhen silently sized up those cultivators without a trace of expression on his face.

As long as he wanted to leave, no one could stop him.

After all, his current cultivation base was already enough to make everyone feel terrified.

These days, the continuous detonation of nuclear bombs had killed more than ten second rank horde leader monsters.

This also meant that Tang Zhen's current level had already reached level 8, which was enough for the cultivators of the five cities to look up to!

A grade 8 cultivator was also known as a three star horde leader!

This level of cultivation was enough to look down on an area.

Even the veteran experts in the five towers might not have such a high cultivation. It was too difficult for cultivators to reach this height!

However, Tang Zhen merely used a nuclear bomb to easily reach such a height.

If he didn't have the magical mobile phone application, who knew how long it would take for Tang Zhen to reach this level!

However, the highest level of the monsters in this world was Level Seven. Therefore, after reaching level eight, Tang Zhen could no longer advance. His only goal was to obtain the brain Pearl.

However, from the current situation, his desire to save energy had attracted the attention of Lou Cheng, who controlled the other planes, and had sent a large number of cultivators to hunt him down.

A trace of a cold smile appeared on the corner of Tang Zhen's mouth after he had clearly thought about the cause and effect of the matter.

If these damned guys didn't provoke him, he wouldn't need to pay them any attention. He would leave after he gathered the required brain beads.

But now that they actually dared to play this trick on him, then don't blame me for being impolite.

Thinking about how the five towers had been hunting in this world for many years, they must have accumulated a large number of brain beads. Tang Zhen decided to "borrow" them.

As for the return date ...

However, before that, Tang Zhen still needed to obtain some information from the cultivators of the five cities, as well as the tokens on their bodies to enter and exit the passageway!

After thinking up to this point, Tang Zhen's figure flickered and disappeared without a trace from the shadows.

A non-human cultivator stared at the ruins in front of him. Just as he was about to go in and take a look, he felt his vision blur and he fainted.

Before he could fall to the ground, a figure flashed by and the cultivator disappeared without a trace in the blink of an eye.

Ten minutes later, another cultivator disappeared into the shadows of the ruins.

It didn't take long for a cultivator who was tired from flying to rest on the ruins to be pulled into the ruins.

Hundreds of cultivators were scattered in the huge ruins. No one realized that people were constantly disappearing.

It wasn't until a cultivator accidentally entered a house and found a pile of corpses on the ground that they became alert.

To their horror, they discovered that the saboteur had killed more than twenty cultivators in front of their eyes.

What shocked them the most was that among the 20-odd cultivators who were killed, five of them were Lord-tier cultivators!

These five Lords were the leaders of the cultivators from the five cities.

In order to capture the destroyers, the five cities sent a total of 15 Lord-tier cultivators, three from each city.

With these 15 Lords leading the team, everyone thought that the saboteurs would not be able to escape.

These cultivators had been cultivating in seclusion in the tower. If it wasn't for the pursuit of the destroyers, they wouldn't have entered this dangerous world.

Unfortunately, the destroyers were not caught, and one-third of the Lord cultivators were killed. This made the cultivators of the five cities who knew about this shiver in fear.

To be able to kill five Lord-level cultivators without a sound, it was clear that the saboteur's strength was extremely shocking, or he had some powerful means that no one knew!

If such a cultivator wanted to ambush them, wouldn't it be easy?

After realizing this, the cultivators from the five cities who had spread out to search immediately gathered together and were on full alert, afraid that they would be attacked by the destroyers.

The cultivators of the five cities, who were originally aggressive and wanted to kill the destroyers, were now afraid of being killed by others.

However, their worries were somewhat unnecessary. This was because the current Tang Zhen was already over a hundred miles away.

Tang Zhen had obtained the information he wanted from the five Lords.

It turned out that the five towers had mobilized a large force to hunt him down because they were afraid that he would destroy this world too much and cause the inter-plane passage to close.

Tang Zhen also clearly understood the consequences of the interdimensional passage closing.

Tang Zhen naturally had to make good use of this after understanding the connection between them.

Out of the five towers surrounding Tang Zhen, four of them were from the foreign races. This was enough to prove the superiority of the foreign races on the continent.

However, as long as it was a foreign clan's city, it would be Tang Zhen's potential enemy and also a stumbling block for the Holy Dragon city's rise.

The only human city was Blood Sand City, which was bound to have a battle with Holy Dragon City. It was either you die or I die.

To Tang Zhen, the five towers all had a reason to be destroyed.

Since this was the case, Tang Zhen was prepared to make use of this opportunity to directly destroy them!

Tang Zhen thought in his heart as he rapidly ran. The speed of a three star horde leader was displayed to the extreme, and he was like a Phantom.

The direction he was heading in was the location of a foreign-Race City, which was about a hundred miles away.

The alien plane connected five towers that were separated by the ends of the earth together, allowing Tang Zhen to reach one tower in a short time.

After leaving this place, Tang Zhen would need to run for at least half a month to reach the target location in the tower world!

During this period of time, he encountered foreign cultivators who were searching for his location in the sky. Tang Zhen temporarily stopped and waited for these cultivators to leave before continuing on.

Unknowingly, Tang Zhen had already approached the foreign plane's passageway in this foreign race City.

He chose a location in the ruins and placed a time bomb.

After suppressing his aura with great effort and ensuring that it would not leak out in the slightest, Tang Zhen quietly approached the interdimensional passage.

At the same time, he began to count down in his heart.

"Three, two, one!"

Tang Zhen's eyes glinted when he saw the last number. He directly headed toward the tunnel.

At the same time, a loud noise suddenly erupted from the ruins not far away!

The cultivators guarding the passage were immediately attracted by the explosion, and some of them went straight to the site of the explosion.

No one noticed that a figure suddenly appeared and directly rushed into the passage.

In a Hall somewhere in the jiaoya tower, the inter-plane passage was flashing slightly. It was a sign that someone had passed through.

A figure rushed out of the interdimensional passage. It looked very abnormal, which immediately attracted the attention of the cultivators guarding the place.

However, before he could open his mouth to warn them, he felt a chill in his heart and his life force was instantly drained away.

The moment this cultivator fell, he saw his other companions fall one after another in the hall. Then, the figure of a human cultivator appeared.

The human cultivator looked at him coldly and ran out of the hall.

"There's actually a human cultivator here. The jiaoya Tower City is going to be in chaos."

The moment this thought appeared in the horned Fang race cultivator's mind, he fell into eternal darkness.

Tang Zhen sensed the aura of the brain Pearl as he rapidly advanced in the huge tower. His movements were extremely secretive.

Although his cultivation had already reached level eight, Tang Zhen was not sure if there were any experts of the same level in this foreign clan's city. Therefore, he had to act cautiously.

He also had to be wary of those cultivators who were of a lower level than him.

Tang Zhen was extremely clear about the logic of many ants biting an elephant to death. He definitely did not dare to be careless.

He was a fast-cultivating cultivator. Compared to other cultivators of the same level who had experienced countless battles, his combat power and experience were far inferior.

Moreover, they had explored the alternate dimension for decades. God knows if they had obtained a weapon that could pose a threat to Tang Zhen. If they were to fail in an easy task, they would be in deep trouble!

The most important point was that Tang Zhen didn't want to reveal too much of his strength. He didn't want the other towers to know his true cultivation.

Only by pretending to be a pig to eat the Tiger would he be able to obtain the greatest benefits. If those Tigers knew that he was a tyrannosaur, they would definitely run as far away as possible and would not dare to easily provoke Tang Zhen!

If it really came to that time, even if Tang Zhen wanted to start a war with the surrounding buildings, he would not be able to find an excuse to be bullied by others!

Tang Zhen suddenly stopped in front of a metal door while his thoughts were spinning. A smile surfaced on the corner of his mouth.

Lou Cheng's treasure room was found!

Chapter 359: crazy treasure snatching, unrivaled

The tower of the horned Fang race was extremely large. From the outside, it looked like a giant statue of a foreign race, full of ferocity.

It stood tall in the wilderness, majestic and mysterious.

If an outsider were to enter the interior of this City Tower, they would definitely scurry around like a headless fly without any guidance.

However, Tang Zhen had the assistance of the map and his mental energy was extremely strong. Therefore, he was able to easily find the exact location of Lou Cheng's treasure room.

The target had been found, and the next step was naturally to Rob!

As for the four horned-tooth cultivators standing guard in front of the treasure room, Tang Zhen directly ignored them.

Because they would be dead in a while.

As he slowly walked toward the treasure room, the four cultivators looked over in the direction of the sound. As expected, they immediately blocked Tang Zhen's path.

These four cultivators were all rank 5. Two of them even had demon weapons on them. They were looking at Tang Zhen with vigilant eyes.

As Tang Zhen was wearing a cloak that covered his face, they could not see his true appearance.

However, Tang Zhen made them feel an extremely dangerous aura. This caused the four cultivators to involuntarily become nervous as they subconsciously unsheathed their blades.

"The tower is an important place, no one is allowed to approach it!"

The cultivator in the lead shouted sternly as his eyes stared unwaveringly at Tang Zhen.

Tang Zhen stared at the other party and did not give any response.

Seeing Tang Zhen's indifferent appearance, the four cultivators immediately became nervous and assumed an attacking posture.

"Who are you?"

Tang Zhen slightly raised his head and revealed a cold smile on the corner of his mouth.

"The person who will send you on your way!"

As soon as he finished speaking, his body rushed forward.

The four cultivators were shocked and hurriedly brandished their swords and sabers. However, their sabers fell to the ground with a "clang" sound halfway.

Tang Zhen calmly passed by, while the four horned teeth cultivators all fell to the ground.

The four horned-fanged cultivators, who seemed to have no external injuries, had their brains completely turned into mush.

Tang Zhen didn't even look at the four cultivators on the ground. He came to the iron gate and waved his hand.

Purple flames suddenly appeared, melting the hard iron door into molten iron. The huge iron lock fell to the ground with a clang.

Tang Zhen kicked the metal door flying and stepped in. He was immediately dazzled by the treasures that were piled up like a mountain.

"Hahaha, it's the right decision to come this time!"

Tang Zhen laughed out loud. He unceremoniously kept all the medicinal herbs, brains, ores, demonic weapons, and equipment into his storage space.

If the storage space couldn't fit it, he would use the storage application card, and the one with the largest space.

The storage application cards that Holy Dragon City sold to the public were of the two lowest grades, with a capacity of one cubic meter and ten cubic meters.

As for the storage card used internally, it could be big or small.

Tang Zhen's speed was extremely fast, and the large treasure room was emptied in the blink of an eye.

This horned tooth race had accumulated treasures from an unknown young man, and now, they had all gone to Tang Zhen.

If the city Lord of the jiaoya Tower City saw this, he would probably cry like crazy.

Chasing Tang Zhen to the ends of the earth and not stopping until he died was a proper matter!

After the mission was completed, Tang Zhen immediately ran toward the interdimensional passage.

He had emptied the treasure room of the jiaoya tower. If he was discovered, the entire jiaoya tower would hunt him down. Tang Zhen did not want to be caught in that situation.

Tang Zhen originally planned to throw a nuclear bomb, but he quickly suppressed this thought.

The strange situation in the foreign plane caused a trace of vigilance to rise in Tang Zhen's heart.

Therefore, Tang Zhen would never use a nuclear bomb in the loucheng world before he figured out what had happened!

you bunch of foreign races are lucky. Otherwise, I'll exterminate your entire race with a single firework!

Tang Zhen's mind turned like lightning. Not long after, he rushed to the hall where the interdimensional passage was located.

There were a few corpses on the ground, exactly the same as when he left.

Perhaps it was because the interdimensional passage was sealed off and no one was allowed to enter. That was why no one noticed anything unusual even after the guards had been killed for a long time.

In this way, Tang Zhen was given an advantage.

Tang Zhen threw down a bomb with a smile and leaped into the interdimensional passage.

Just as Tang Zhen's figure disappeared, a loud explosion was heard. The hall where the interdimensional passage was located was directly blown up, burying the passage.

In another dimension, in front of the passage to the horned Fang tribe.

A figure rushed out of the vortex-shaped passage and then left without stopping.

The horned teeth cultivators in charge of the guards were stunned for a moment. They shouted and chased after the figure that was running further and further away.

Unfortunately, the other party's speed was too terrifying. Even if they used all their strength, they still couldn't even touch the other party's shadow.

damn it! Hurry up and teleport back to loucheng to see what's happening.

One of the horned Fang cultivators 'leaders shouted, and another cultivator took out a token and teleported over.

In the blink of an eye, the cultivator ran back with a long face.

oh no, our teleportation Hall has collapsed. When I teleported there, I was almost squeezed to death.

While the entire jiaoya Tower City was in chaos, Tang Zhen was already a hundred miles away.

"Haha, I've earned big this time!"

The number of brain beads that Tang Zhen had to work hard to make up was not even one-tenth of the total number of treasure in the jiaoya building. From this, one could see how rich the jiaoya building was.

This was only the number of brains, and the value of the other treasures had not yet been calculated.

The gains from the jiaoya Tower City alone were enough to upgrade Holy Dragon City to Level 5!

The more Tang Zhen thought about it, the more excited he became. His eyes also began to turn bloodshot.

damn it! It's faster to Rob the treasure rooms in these towers. If that's the case, none of the other four towers can escape!

Tang Zhen let out a long hiss when he thought of this and his running speed increased a little.

He had to be fast and act before the other buildings could react. Otherwise, once the other party became alert, the difficulty would increase!

After realizing this point, Tang Zhen continued to rush forward without stopping and finally approached the vicinity of the second foreign tribe city.

This time, Tang Zhen used the same old trick again. While the attention of the foreign race cultivators was attracted by the time bomb, he rushed into the passage like lightning.

However, after charging into the tower this time, the masked Tang Zhen ran into a group of foreign cultivators and the two sides directly collided.

After a few seconds of shock, a great battle broke out!

Tang Zhen brandished a battle blade. Under the encirclement of a group of cultivators, blood splattered everywhere as wails continuously sounded out.

Every attack would take a life.

Even if those foreign cultivators were to join forces, they still wouldn't be a match for Tang Zhen. In less than a minute, he had finished off all of them.

However, this was their base camp after all. Even if most of the cultivators were chasing after Tang Zhen in the other dimension, there were still many cultivators left behind to guard their base.

The moment the two sides started fighting, it was equivalent to opening a hornet's nest!

A huge battle was inevitable!

Chapter 360: The No. 1 expert of the alien race _1

The entire Scarlet Qilin tower was filled with the sound of an alarm. It was shrill and ear-piercing!

When the cultivators who stayed behind heard the alarm, they all put down their work and rushed towards Tang Zhen's position with their swords without hesitation.

Tang Zhen felt his scalp turning numb as he looked at the densely packed cultivators that were rushing over.

However, since he had already killed his way here, he had to bring back some spoils of war no matter what. Otherwise, wouldn't he have made a wasted trip?

After thinking up to this point, Tang Zhen started to randomly throw bombs in all directions, causing intense explosions to continuously ring out.

The entire loucheng city fell into chaos. Dust flew everywhere, cultivators wailed, and all kinds of curses were heard.

Tang Zhen killed as he charged, heading toward the location of the treasure room that he sensed.

Two Lord ranked cultivators suddenly appeared. They blocked Tang Zhen's path and charged forward with demonic weapons in their hands.

so what if he's a Lord cultivator? I'll kill him all the same!

Tang Zhen's eyes turned red as he charged towards the two Overlord cultivators and killed one of them with a swing of his blade.

Seeing Tang Zhen's power, the other Lord cultivator was so scared that he quickly retreated.

To be able to kill a Lord cultivator so easily, the other party's strength was unfathomable!

Unfortunately, Tang Zhen did not give him the chance to escape. He lifted his leg and gently kicked the demon saber on the ground. The saber was like lightning as it shot towards the back of the other party.

"Pfft!"

The extremely sharp demon saber pierced through the Lord's heart and nailed him to the wall.

"Hahaha, who else is there?"

Tang Zhen turned around and roared. His state was like that of a mad demon, and it actually frightened the pursuers behind him to the point that they repeatedly retreated.

At this moment, more than ten grenade-like objects were thrown over.

Tang Zhen waved his arms and a wave of air pushed these objects back, causing them to land on the heads of the pursuers.

"BOOM!"

A violent explosion rang out, and the grenade-like object splattered out countless liquid.

This sticky liquid was extremely domineering, burning the walls with a sizzling sound, and green smoke lingered.

The non-humankind cultivators who were splashed by the liquid were in bad luck. Their armors and clothes were all burned through by the liquid, and countless bloody holes were left on their skin and flesh.

Wails of pain and misery rang out everywhere!

Tang Zhen was secretly speechless after seeing this. He did not expect that this kind of strong acid bomb was actually so abnormal.

This kind of bomb was a weapon obtained by the Chi Lin clan's cultivators in an alien plane. Tang Zhen had also obtained many of them, but he had never had the opportunity to use them.

Seeing that the scene had fallen into chaos, how could Tang Zhen miss such a good opportunity? he casually took out a large bomb and threw it towards the corridor.

After a loud noise, the tunnel collapsed, blocking the pursuers behind.

Tang Zhen turned his head and took a glance before continuing to kill his way forward.

Along the way, Tang Zhen finally killed his way to the vicinity of the treasure room. He finally saw the foreign cultivator with the highest cultivation so far!

This was a rather old man. He didn't look very impressive, but from his aura, one could determine that he was a two star horde leader!

this must be the strongest expert in the Scarlet Qilin Tower City. Good, good, I can handle it!

Tang Zhen glanced at the old man and the three Lord cultivators behind him before walking over in large strides.

"This friend, I wonder if my Chi Lin clan has offended you in any way, could you please explain?"

The old man was unable to see through Tang Zhen's cultivation. However, he could faintly sense that Tang Zhen was stronger than him!

Although the fury in his heart was boundless, this old man still did not dare to rashly act. He only hoped to be able to force Tang Zhen to back off.

If he were to fight with Tang Zhen, it would be fine if he won. However, if he lost, Lou Cheng would be in a difficult situation.

As a level Seven cultivator, he was like the stabilizing force of the city, intimidating other forces who had ill intentions.

This old man had scruples in his heart and did not dare to rashly make a move. However, Tang Zhen did not feel any pressure.

He only had one goal in coming here, and that was to empty out all the treasures of the Chi Lin clan!

you have indeed offended me. As punishment, I want you to compensate me with all the brains in Lou Cheng!

Tang Zhen's words caused the old man's expression to change drastically. A trace of ruthlessness appeared on his face.

what an arrogant tone! How dare you think about my Lou Cheng's treasure room? I just don't know if you have the ability to do so!

As soon as the old man's voice fell, the three Lord cultivators behind him immediately activated their cultivation skills and pounced toward Tang Zhen.

"Good!"

A layer of deep blue ice Armor suddenly appeared on the surface of Tang Zhen's body. A sharp ice blade that was 2.5 meters long appeared in his hand.

Tang Zhen's ice blade fiercely swung out as he faced the attacks of the three Overlord cultivators.

The four of them, including the old man, had a drastic change in expression when they felt the sharp aura that was coming at them.

"This is a three star horde leader of bi 'an!"

After realizing this, the four of them felt extremely bitter!

How could they stop a rank-8 cultivator from robbing them?

Do you still have any shame?

As soon as this thought flashed through his mind, a sharp ice blade had already attacked him.

The non-human cultivator at the front was cut in half by the ice blade. The ice blade didn't stop and continued to hit the other two cultivators.

"Crack!"

The ice blades shattered, but a terrifying wound was cut open on the two men's bodies, and blood kept flowing out.

The two cultivators retreated in horror. At the same time, they quickly controlled their muscles to seal the wounds so that their organs would not flow out.

As soon as the two sides exchanged blows, one died and two were seriously injured!

The old man's expression changed drastically. He immediately became extremely cautious after realizing that Tang Zhen's cultivation was higher than his.

Seeing that his three cultivators had been defeated, the old man had no choice but to charge forward no matter how cautious he was.

The speed of a rank 7 cultivator was far beyond that of an ordinary lord. The old man arrived in front of Tang Zhen in an instant.

"Swish!"

Two one-foot-long demonic Battle Blades appeared in the old man's hands as he attacked Tang Zhen's vital points.

Tang Zhen was on guard. After avoiding the old man's fierce attack, he took out the purple lightning short sword and slashed it over.

The old man subconsciously raised his demon weapon to block while the other demon weapon stabbed straight at Tang Zhen's chest.

"Crack!"

The old man heard a soft sound and felt the power to block suddenly disappear. He turned his head reflexively and was scared out of his wits.

The demonic saber that had accompanied him for dozens of years had already been neatly cut into two. The purple lightning short sword in Tang Zhen's hand did not stop as it headed straight for the old man's throat.

The blade of the short sword was less than an inch away from the old man's skin.

A weapon that could easily cut through a Demon Blade could definitely cut through the old man's neck!

In the face of a life and death crisis, the old man shouted and his body actually retreated a foot out of thin air, avoiding this fierce attack.

However, Tang Zhen's following kick had directly landed on the old man's chest.

"Ka BA!"

A crisp sound came from the old man's chest, and his clothes turned into powder and fell to the ground, revealing the fiery red armor on his chest.

This guy was really afraid of death. Under his clothes, he was wearing a set of mo chest armor!

Although he had relied on the demon Armor to absorb most of the force, Tang Zhen's kick still caused the old man's internal organs to shift, causing him to spit out a mouthful of blood.

The old man took a deep breath, suppressed his turbulent blood and Qi, and activated his cultivator skills to pounce again.

His cultivation technique was very strange. Ten one-foot-long black light beams shot out from his fingertips, carrying a cold aura and wisps of mist.

Tang Zhen was not willing to show weakness when he saw this. A purple flame that was over a meter long shot out from his hand.

The temperature of the purple flame was extremely high. The moment it appeared, the surrounding air seemed to be ignited, and the heat wave was pressing.

The corpse of the cultivator that Tang Zhen had killed emitted a sizzling sound as it was being roasted by the flames.

Such an overbearing flame shocked the remaining three.

The old man and the two heavily injured cultivators looked at each other with a trace of determination in their eyes.

"Kill!"
