

Alternate 41

Chapter 41: -The Public Enemy of the zombie monsters

After breaking through the obstruction of a few scattered corpse monsters at the edge of the area, Tang Zhen madly ran all the way without stopping. Only when he was three kilometers away from the wild building did he stop while panting.

Tang Zhen coughed out a few mouthfuls of blood. He wiped the corner of his mouth, but his mind was filled with questions.

Previously, when he checked the memories of the spirit brain corpse King, he found that as long as it was a visitor from another world who entered this world, a brain bead would be produced in the head, and sooner or later, they would lose their mind and become a monster that wandered around this world.

Then, would his own brain also grow brain beads? would he also become a monster?

This question caused Tang Zhen's heart to turn cold. He was faintly worried.

Even a powerful existence like The Spiritual Brain corpse King couldn't avoid this result. He was just an ordinary nobody before he transmigrated, could he really escape from this heavenly law?

Even though Tang Zhen had yet to sense anything strange with his body up until now, who knew how this process was carried out?

It seemed that he would have to find time to do a physical examination. He hoped that he would be safe and sound.

After he stopped thinking about this, Tang Zhen thought about the spirit brain corpse King's plan.

The spiritual-brain corpse King was powerful and must have countless resources. If it insisted on coming to this world, no one would be able to stop it.

First, he had stolen the corpse monster Lord's chest, and now he had destroyed the blood pool used to cultivate the corpse King's clone. The hatred between him and the spirit brain corpse King could be said to be endless.

Tang Zhen knew that this matter wouldn't end so easily just from the words that the spirit brain corpse King had said before he rushed out of the building. The two sides would meet sooner or later.

If that really happened, how would he deal with it?

Tang Zhen thought as he walked. There were a myriad of thoughts in his heart.

What he didn't know was that he had already killed the corpse King's clone by mistake, and the spirit-brain corpse King had even issued the corpse King oath to kill!

But even if he knew, it didn't matter. Anyway, it was already like this, how bad could it be?

Even if the spirit brain corpse King didn't look for trouble with Tang Zhen, he still had the intention to kill it and its subordinates!

Tang Zhen slowly walked along a small path in the wilderness. He was thinking about how to deal with the invasion plan of these corpse monsters. However, he did not expect an intense shout to be transmitted from the front.

He carefully went forward to take a look, only to see a team of thirty to forty people besieging the three corpse monster Centurions.

Although there were quite a few people on the other side, it could be seen from their attire that they were two distinct teams.

One of the groups of wild cultivators in tattered armor was clearly the most common Wanderer exploration team in the wilderness. They were split into three groups and attacked the corpse monster Centurion from the outer perimeter.

The group that was fighting the corpse monster Centurion head-on was a group of youths wearing the same equipment. Their combat techniques were skillful, and their cooperation was also very tacit. They had always occupied the upper hand in the battle with the corpse monster Centurion.

Through the equipment of these people, Tang Zhen recognized that they were cultivators from Black Rock City.

Tang Zhen's eyes focused. Had Black Rock City finally made a move?

After all, these zombie monsters were different from ordinary wandering monsters. They were considered invaders from other planes. Once they grew stronger, the status of Black Rock City would be in jeopardy.

If he was not careful, Black Rock City would become history.

Therefore, killing these invaders before they had a chance to develop was the best choice for Black Rock City.

The corpse monster Centurion was dressed in black heavy armor and brandished a huge weapon that was two to three meters long. In addition to his strong body, his combat power was very strong.

There were already many human corpses lying around the battlefield, and the corpse monster Centurion was still killing like a tiger. Even though their bodies were covered in wounds and the arrows on their bodies were like porcupines, they showed no signs of weakening.

Fighting with such a perverted monster was a form of torture in itself!

Tang Zhen felt bored after watching for a while. He activated the quantum stealth light screen and prepared to quietly go around the edge of the battlefield.

However, just as he was halfway around the battlefield, a corpse monster Centurion that was closest to him suddenly stopped fighting, and turned to look in his direction.

Tang Zhen, who had turned on the quantum invisibility light screen, also saw this scene. He looked at the corpse monster Centurion in a daze and thought, 'is this guy targeting me?'

This thought had just surfaced in Tang Zhen's mind when he saw that the corpse monster Centurion had actually given up on fighting. It let out a furious roar and pounced straight at his position.

"F * ck your grandma!"

Tang Zhen's tone was a little flustered and exasperated. You don't care about the many enemies in front of you, but you just had to come for your father. Did I dig up your ancestral grave?

I turned on my invisibility, but I could still find him.

The even worse scene was yet to come. As the first corpse monster Centurion left the battle and rushed towards Tang Zhen, the remaining two corpse monster Centurions seemed to have also discovered Tang Zhen and actually pounced over at the same time.

Tang Zhen did not hesitate to turn his head and run. At the same time, he was wailing in his heart. Could it be that my taunting ability has already broken through the horizon? I'm actually shouting for a beating in a strange manner!

After rushing out of the wild building, Tang Zhen discovered that these corpse monsters that originally couldn't see him actually seemed to have an anti-stealth ability. Not only could they accurately lock onto his position, but they also had a stance of not giving up until one of them died.

No matter how stupid Tang Zhen was, he could guess that he had been tricked by the spirit brain corpse King.

'You can't kill me yourself, but you got a bunch of little pawns to disgust me. But you can't even beat these little pawns, so you can only run as far as you can.'

Just you wait, this isn't over!

Tang Zhen cursed and swore in his heart as he ran in the direction of Black Rock City.

The group of Wanderers and Black Rock City cultivators who had previously besieged the three-headed monster Centurion were confused by the scene in front of them.

What's wrong with these monsters? they actually turned around and ran away after fighting for a while. This had never happened before!

&Nbsp; it must be known that these monsters were all one-track minded. Once they started fighting, it would be either one of them dying. Even if they wanted to escape, it should be the humans.

As monsters, you actually fled at the last minute. How can you face the elders of Jiang Dong in the future?

However, from the looks of these monsters 'rage, they didn't seem to be running away. Instead, they seemed to be chasing after their mortal enemies. Moreover, they were moving in a strange direction.

Holy shit, it's Black Rock City!

Immediately, the cultivators of Black Rock City felt their hair stand on end. Each and every one of them started to run as fast as the wind and began to chase after the three corpse monster Centurions with all their might.

The eyes of the cultivators from Black Rock City who were following closely behind turned red. They could not allow these monsters to get close to Black Rock City. That was their home!

Whether it was the Wanderers or the residents of the city, the meaning of their home was extremely sacred, and it was worth them risking their lives to protect it.

When the Wanderers saw the Black Rock City cultivators chasing after the corpse monster Centurion with all their might, they did not want to be outdone. They fought to be the first to catch up.

He had to take advantage of this rare opportunity to get along well with the cultivators of Black Rock City. If one of the cultivators found him pleasing to the eye and rewarded him with a precious recommendation from the residents of the tower City, he would not have to worry about food and clothing for the rest of his life!

There was more than one Wanderer with this thought in mind, so they ran as fast as they could. Their speed was not inferior to the cultivators of the same level in Black Rock City, who were much more powerful than them.

As a result, many Wanderers saw such a scene along the way.

The three corpse monster Centurions ran forward like crazy, their huge feet stomping on the ground, producing a muffled sound that was like the beating of drums. They ran while waving their weapons, as if they were mortal enemies.

Behind the monster was a group of cultivators from Black Rock City and a group of Wanderers and wild cultivators who were out of breath.

However, no one could see that in front of these monsters and Wanderers, there was a visitor from another world who had run so far that he was about to vomit blood!

Chapter 42: Black Rock City_1

When he first started to escape, Tang Zhen actually wanted to activate the teleportation to escape.

Because he had only run for a short time, his legs were already numb and sore. At the same time, his chest felt tight and his breathing became rapid.

However, when he inadvertently turned his head to observe, he found that in addition to the corpse monster Centurion who was in hot pursuit, there were also dozens of people following closely behind. In the process of the pursuit, not a single person was left behind.

At the same time that he admired the perseverance of these people, Tang Zhen also suddenly realized that he might have relied too much on those applications and had neglected the increase of his own strength.

It was just three corpse monster Centurions, and they had already put him in such a difficult situation. If the spirit brain corpse King were to personally chase after him, what would he have to resist?

Tang Zhen felt a little guilty when he thought of this.

In terms of cultivation, he definitely couldn't compare to The Spiritual Brain corpse King. After all, the other party was a dignified corpse King, and any of his subordinates would probably have the cultivation of a Lord-tier!

If he was not a match for them, he could still activate the teleportation to escape.

However, there was a certain risk in activating the teleportation. If The Spiritual Brain corpse King had the ability to crack or limit the teleportation, then he would really be dumbfounded.

Didn't he see that when the corpse King's soul descended, the infrasonic wave was forcefully shut off? From this, it could be seen that the other party had power and means that he couldn't resist.

What's more, the other party had only descended with a wisp of his soul. If this soul had been a little stronger, the situation would have become extremely terrible, and it would be uncertain if he could escape unscathed.

In a situation where he could not count on any of these, the only thing that could help him was his own strength.

Strength came from tough training and cultivation. This was an eternal truth!

Tang Zhen believed that he should be able to defeat the Rogue cultivators among the cultivators of the same level. This was because his physique was better than ordinary Wanderers.

However, he wasn't confident when he fought Lou Cheng. After all, he had seen the battle scenes of cultivator Lou Cheng several times before. After comparison, he found that cultivator Lou Cheng's combat power was not just a little higher than his.

They were all at the same level, so why was the other party's strength so high? wasn't it all due to bitter cultivation?

Even if the cultivation conditions of the cultivators in Loucheng were much higher than that of the Wanderers and wild cultivators, Tang Zhen was not any worse than them. In fact, he had far surpassed them.

Since that was the case, why should he be worse than them?

It seemed that he had been relying too much on external objects all this time and had neglected the improvement of his own strength!

Tang Zhen's eyes hardened when he thought of this. Since this was the case, he would start working hard today and see if he could break through his limits!

He wouldn't put himself in danger. He would only try his best to stimulate his maximum power.

Once things got out of hand, he would also activate the teleportation to leave.

Hence, Tang Zhen gritted his teeth and persevered. Even though he was exhausted during the running process, he still felt that he had not reached his limit. Hence, he gritted his teeth and persevered.

Tang Zhen did not know how long he had been running for as he persevered like this time and time again. When he felt that his consciousness was a little dazed, he felt a wave of strength being stimulated from the depths of his body.

Even if this strength was as thin as a thread, it still caused Tang Zhen to feel joy in his heart. He knew that this was the extreme potential strength that he was pursuing.

This power was the root cause of the disparity in strength between cultivators of the same level. Lou Cheng could stimulate this power through inheritance and support.

As for wild cultivators, due to the lack of inheritances and resources, only a very small number of people could activate this power!

Due to the awakening and stimulation of this extreme strength, Tang Zhen felt that his entire body was filled with strength. Just as he was about to continue to run madly, he suddenly discovered that an incomparably huge building had appeared in front of him.

Looking carefully, it was the Overlord of the nearby wilderness, the Black Rock Castle.

At that moment, a group of cultivators had already rushed out of Black Rock City's Gate. They were riding on warhorses and were charging towards him.

It was likely that the cultivators guarding the city had discovered the corpse monster Centurion behind him.

As they were responsible for the safety of Black Rock City, these cultivators naturally would not allow the corpse monster Centurion to come close to this place. Otherwise, it would be a dereliction of their duty.

At the same time when these cultivators appeared, Tang Zhen also discovered that there was a strange movement inside the tower.

On a window fifty meters above the ground in the Black Rock tower, Tang Zhen saw a few human figures flashing. They seemed to be operating some sort of machine.

A moment later, a few black dots shot out from the window, and their target was the corpse monster Centurion that was chasing after him.

"Pfft!"

After a few muffled sounds like leather being hit, the three corpse monster Centurions howled towards the sky, but they were pierced through by a few black giant arrows!

The huge black arrow was stuck in the corpse monster Centurion's body, which was a few meters tall. The scene was extremely eye-piercing.

The destructive power of these black arrows was extremely strong. Even if the corpse monster Centurion's body was extremely strong, he could not withstand such a powerful weapon.

Taking advantage of the delay caused by the corpse monster Centurion's injuries, the pursuers and reinforcements swarmed forward at the same time, surrounding the corpse monster Centurion in a frenzied attack.

Many ants could kill an elephant, and a fierce tiger feared a pack of wolves!

In just a few minutes, the heavily injured three corpse monster Centurions were cut down and fell to the ground. After struggling for a while, they were completely killed.

Tang Zhen, who was invisibly sitting by the side, watched all of this. His heart became even more eager to possess his own strength.

He didn't need to run his own errands. When fighting, he would listen to his orders, and his subordinates would rush up. Just thinking about it felt satisfying.

No, he had to go back and tell Qian Long that there was danger everywhere. He had to recruit as many soldiers as possible.

If he could get a group of powerful subordinates, then even if the spiritual-brain corpse King came, he would have a helper. Would his chances of winning increase a little?

The more Tang Zhen thought about it, the more excited he became. He impatiently wanted to run back to Wanderer town to discuss this with the thousand Dragons, but he didn't expect that his legs were already extremely numb. He fell to the ground the moment he got up.

Tang Zhen could only reply with a bitter smile. Although he had successfully stimulated his strength to its limit this time around, the damage to his body was not small. It was likely that he would need to properly recuperate.

Since he was temporarily unable to move, Tang Zhen took out a pair of binoculars from his storage space and began to carefully observe the situation in Black Rock City.

From the outside, Black Rock City looked similar to the ordinary residential buildings in his original world. However, it was more ancient and heavy, as indestructible as a Black Rock. Perhaps this was the origin of the name Black Rock City.

Unlike the residential buildings, most of the windows outside the building had been sealed off or transformed into a shooting platform. At the top of the tower, there were several strangely-shaped giant ballistae.

The ordinary citizens of Black Rock City lived in the large inner courtyard of the tower. For many of the residents of the city, the city was the world they lived in. Some of them had never stepped out of the gate of the city in their entire lives.

This was the world of loucheng. The inside and outside of the city were two completely different worlds!

Chapter 43: Seeing and hearing in Black Rock City (1)

The movement caused by the corpse monster Centurion earlier was not small. At this moment, there were many human figures flashing by the windows of Black Rock City, as if they were observing the movement below.

The cultivators from Black Rock City loaded the corpses of the three corpse monster Centurions onto the horse carriages and prepared to pull them into Black Rock City. The Wanderers and wild cultivators who had been chasing after them along the way were chased away. This was because Wanderers were strictly prohibited from approaching within a one-kilometer radius of Black Rock City. Otherwise, they would be killed without mercy!

This time, they were being lenient on them for helping to kill the corpse monster Centurion. Otherwise, the cultivators guarding Black Rock City would have attacked them long ago.

The Wanderers and wild cultivators left resentfully. Tang Zhen endured the pain in his legs and quietly followed behind these cultivators. He walked step by step through the main gate of Black Rock City.

Under the protection of the quantum stealth light curtain, no cultivator in Black Rock City discovered Tang Zhen, who was not a resident of Lou city.

The huge metal gate of Black Rock City was driven by a lever and a gear. Usually, it would only open a small door that could only accommodate two people. This time, because they were using a carriage, the huge metal door was only raised by a third.

After Tang Zhen passed through the large metal door, a wave of “ka ka” sounds of huge gears grinding together could be heard. The metal door slowly descended, isolating the wilderness outside.

In the inner space of the tower, Tang Zhen was standing in a spacious passage that was several meters high.

On both sides of the passage, there was a huge metal Brazier every ten meters. A white oil was piled up in it. After it was lit, it was not only extremely bright but also emitted a faint fragrance.

On the walls of the tunnel were murals. The contents of the murals seemed to be the founding process of Black Rock City and its former glory.

According to the contents of the murals, the first founder of Black Rock City came from a very distant place. He was a noble child in a giant city.

He had yearned for an adventurer’s life in the wilderness since he was young, and he also hoped to become the city Lord of a Tower City and make his family more prosperous!

So, on the second day after the coming-of-age ceremony, he led his guards and began to travel in the wilderness.

During this period, they had encountered countless dangers and entered countless magical areas. With courage and luck, this noble child finally gathered all the materials needed to build a city and built Black Rock City far away from home.

Then, there were also scenes of monsters attacking the city, leveling up the city, and fighting with other cities. There were dozens of them.

After Tang Zhen finished looking at these murals, he pondered for a moment before he began to move towards the inner part of Black Rock City.

After walking through a passage that was nearly a hundred meters long, a large door appeared in front of Tang Zhen. At the same time, the bustling voices of people were transmitted over. It was a huge open-air square.

Many residents of the city were strolling leisurely in the square. They were dressed neatly and cleanly, and there was no trace of the panic and confusion of Wanderers on their faces. Instead, they looked relaxed and calm.

Tang Zhen walked into a hidden corner. After turning off the quantum stealth light beam, he imitated the form of the Lou city's residents and easily mixed into the crowd in the square.

The square covered a large area. It was located in the center of Black Rock City and was about 30000 square meters in size. It was surrounded by tall buildings.

Most of the time, the square was covered in shadows, but the sun was right above the square. The sun was warm and comfortable, so it was no wonder that so many residents of the building came out for a walk.

In the middle of the square stood a huge emerald green statue. From its appearance, it should be the founder of Black Rock City, the noble son from a distant city.

Tang Zhen looked at the statue from afar and discovered that the surface of the statue seemed to have a faint flowing light flashing. It seemed to be carved from some kind of crystal clear Jade.

Tang Zhen had been in the tower world for so long, but this was the first time he had seen something similar to Jade. He couldn't help but feel a trace of curiosity.

Tang Zhen, who had a carefree expression, slowly walked to the front of the statue and carefully observed it.

The material used for this statue was completely dark green and looked tender and attractive. It was very similar to the Jade that Tang Zhen had seen in a jewelry store. Moreover, it was the top grade!

Tang Zhen didn't know much about pearls and jades. He wasn't sure if this was jadeite or not. After all, there were many types of jadeite that had similar colors. He couldn't even tell jadeite and nephrite apart.

However, none of these could stop Tang Zhen's plan to take action!

That's right. Tang Zhen had taken a fancy to this beautiful jade and was prepared to secretly take a piece off and bring it back to be appraised.

After looking around and seeing that no one was paying attention to him, Tang Zhen took out the purple electric short sword from the storage space with lightning speed and applied force on the damaged base of the statue.

With strength that far exceeded that of an ordinary person, coupled with the incomparably sharp purple lightning short sword, a bowl-sized jade stone was directly cut off. It was then quickly kept by Tang Zhen into his storage space.

After he was done with this, Tang Zhen left the statue in the middle of the square as if nothing had happened and began to stroll around.

Tang Zhen discovered that there were shops next to each other on the edge of the square.

These shops operated many items. There were clothes, food, medicinal herbs, and grocery stores. Tang Zhen chose a weapons store and slowly walked in.

The weapon shop was about a few hundred square meters in size and was divided into three floors. The first floor was the hall where one could browse and choose at will, while the second floor required a waist token of a cultivator from Black Rock City to enter. As for the shops on the third floor, only the shop's distinguished guests could enter.

Compared to the weapons in the Wanderer town's weapon store, the weapons in the BlackRock city's weapon store were clearly of a higher grade. Just from their appearance, they looked much better.

The skilled craftsmen of Black Rock City had not only improved the quality of these cold weapons, but they had also spent a lot of effort on the decoration.

For example, the longsword in front of Tang Zhen used techniques such as hollow and embedding. Gemstones and the bones and teeth of some monsters were decorated on the scabbard, making the shape of the longsword extremely beautiful.

The sword's body was folded, forged, and washed with acid, so that the patterns on the sword's body were revealed and looked beautiful. Tang Zhen knew that there was a type of Damascus knife in the original world, and the pattern on its surface was very similar to it.

Such an exquisitely crafted sword was naturally expensive. It actually cost thirty level three brain beads, which was equivalent to three thousand level one brain beads.

If the ordinary weapons on the first floor were already so expensive, then the weapons on the second and third floor would probably be even more expensive.

Tang Zhen glanced at the entrance to the second floor. He really wanted to activate the quantum stealth light screen to check it out. However, the two cultivators guarding the second floor made him dispel this thought.

This was because Tang Zhen could sense rank 4 energy fluctuations from the two of them.

He was currently in Black Rock City and could be considered to be in a Dragon's pool and a Tiger's Den. Tang Zhen did not want to attract unnecessary trouble.

Tang Zhen stood up and left the weapon shop after sweeping his gaze around once. After which, he walked into a medicinal ingredient shop at the side.

Chapter 44: The source of food for the citizens of Black Rock City

Tang Zhen had just entered the medicinal herb store when he smelled an extremely special smell.

He had smelled this smell a few years ago in a temple with a lot of incense.

It was said that this fragrance originated from a precious spice, which was rare in production. Sometimes, a piece of top-quality spice could even be exchanged for a villa!

Taking a deep breath, Tang Zhen carefully savored the taste. The fragrance of this spice was indeed not bad.

Following the smell, Tang Zhen turned his head and saw a small and exquisite bone incense burner placed on an ancient stone table. The smell was being emitted from this incense burner.

Seeing Tang Zhen's gaze land on the incense burner, a delicate and pretty young lady wearing a light green leather jacket walked over. She smiled and said to Tang Zhen, this is a spice that our shop just imported from the city of Xiangdu. It's sweet and pure, and can refresh one's mind. If you use it for a long time, it'll be very helpful for your cultivation!

Compared to the Wanderers outside, the girl's face didn't show any signs of suffering, and her clothes were clean and proper.

Tang Zhen glanced at the young lady before gently nodding his head. He opened his mouth and inquired about the price.

Perhaps it was because of the high production rate in the other world, the price of this spice was not very expensive. Tang Zhen did not hesitate and took out the brain Pearl to buy a pack.

After keeping the spice, Tang Zhen looked at the other products in the medicinal herb store.

After looking around, Tang Zhen realized that there were many types of medicinal herbs here, but he didn't recognize any of them. This made his original plan of buying a few hundred-year-old ginseng and selling it for a high price fall through.

At the same time, Tang Zhen also discovered that many of the medicinal herbs in the medicinal herb store were collected from the monsters.

Bone marrow, gallbladder, blood powder, the raw materials of these herbs were all from the monsters in the wilderness.

There were even some bottles with monster organs soaked in them. The girl introduced it as a tonic wine with nourishing effects.

On the counter that was embedded with a glass-like transparent object, there were all kinds of finished medicines. After Tang Zhen inquired about the effects, he casually bought a few bottles and prepared to take them back to do experiments.

After walking out of the medicinal herb store, Tang Zhen was thinking of finding an opportunity to sneak into the inner part of the building. However, he accidentally discovered that there were dozens of people driving a group of carriages as they headed towards the entrance of an underground parking lot.

Tang Zhen's heart stirred. After he found a hidden position and activated the quantum stealth light curtain, he walked over unhurriedly.

This underground entrance was very spacious. There were a few Black Rock City cultivators standing guard at the entrance. Tang Zhen tried his best to be as gentle as possible as he walked over silently.

After Tang Zhen went in, one of the Black Rock City cultivators who was in charge of guarding the entrance looked at the underground tunnel with a puzzled expression. He seemed to have heard a slight strange sound coming from the tunnel.

After confirming that there was nothing unusual in the passage, the cultivator turned his head and no longer paid any attention.

Tang Zhen followed the underground tunnel and walked for nearly a hundred meters before he discovered that he was in a huge underground space. From the size of it, it seemed to be similar to the square on the ground.

Perhaps this underground space was built under the square.

He carefully observed the surrounding walls of this underground space and found that they were extremely solid. As expected of a city built by the power of heaven and earth.

The underground space was man-made and divided into countless small areas. They were piled up with stones and filled with soil.

The surface of the soil was doused with a layer of sticky liquid that emitted a faint odor. Tang Zhen took a look and discovered that every small area was the same.

Tang Zhen was quite curious when he saw this. He secretly guessed what was beneath the soil.

He took out a shovel from the space, walked to a dark corner, and used the shovel to dig.

After digging for only two days, he felt the shovel hit something.

Forcefully pushing the shovel upwards, Tang Zhen saw a white spherical object the size of a human head being dug out.

Tang Zhen carefully moved forward to observe it, only to discover that this thing was actually an extra-large 'potato'!

Even Tang Zhen couldn't tell whether this thing was a potato or not. However, looking at its appearance, it did look like a potato.

However, Tang Zhen had never heard of such a large potato.

Tang Zhen dug a few more times and discovered that the ground was actually densely covered with these things.

Tang Zhen guessed that this thing was the main food for the Lou city's residents. Looking at the size of the basement and the size of the potatoes, God knows how many tons of potatoes would be produced in one harvest!

If these potatoes could be harvested continuously, the residents of Lou city would not have to worry about food sources.

Tang Zhen used to wonder what the residents of loucheng ate every day if they didn't cultivate the land and sow grain.

Now, he finally knew that he had to eat these giant potatoes!

He dug out two potatoes and put them in his storage space. He wanted to take them back and try to plant them. If he succeeded, he could definitely fill the stomachs of many people.

However, Tang Zhen guessed that the success rate of this matter was very small. If these potatoes were so easy to cultivate, how could there be so many starving Wanderers in the wilderness?

At this moment, there was no one in the entire underground space. It was impossible for those people and the carriage to disappear for no reason. Therefore, Tang Zhen guessed that there was another space in this place.

After carefully searching for a while, Tang Zhen indeed discovered that another passageway had appeared in a certain dark corner.

could it be that there's another level of space under this underground square? "

Tang Zhen thought as he walked into the passage.

A few minutes later, another underground space with the same area appeared in front of him. Like the square above, there were also huge potatoes here.

However, in this space, there were still a few residents who were pouring the sticky fertilizer on the soil, but the carriage was still nowhere to be seen.

After Tang Zhen observed for a while, he indeed discovered another entrance that extended underground.

Tang Zhen did not hesitate to step in. He wanted to see how many levels of underground space there were in Black Rock City.

After walking out of the passage this time, Tang Zhen did not see the spectacular scene of potato planting. Instead, he saw patches of "mushrooms"!

Alright, Tang Zhen already didn't know how to describe the scene he saw. However, these things in front of him were over two meters tall, over 50 centimeters in diameter, and had a parasol-like cap. They indeed looked exactly like mushrooms!

These giant mushrooms were in clusters next to each other, and there were even smaller mushrooms growing below them. Other than a three-meter-wide road, there were giant mushrooms everywhere.

In the middle of these mushrooms, the residents of Lou city were cutting them up and cutting them into small pieces, putting them into big baskets.

It seemed that this mushroom was also one of the foods of the residents of loucheng. It could adjust the monotonous taste of the potatoes, or have a pot of potato mushroom soup. It should taste good!

Tang Zhen actually felt a little hungry as he thought about it.

After shaking his head and throwing this thought out of his mind, Tang Zhen similarly dug out a piece of mushroom meat and placed it into his storage space.

After passing through the huge Mushroom Forest, another underground passage appeared.

Tang Zhen no longer felt surprised. Instead, he once again took a step forward.

Compared to the previous few floors, Tang Zhen smelled a fishy stench the moment he entered the passageway of this floor. It was very similar to the smell of the fertilizer that was poured on the mushrooms and large potatoes.

At the same time, the sound of a conversation and the sound of horse hooves stomping on the ground was transmitted over. It was the group of horse carriages that Tang Zhen had been chasing all this while.

Tang Zhen, who had walked out of the tunnel, focused his attention and observed. Very quickly, he was somewhat surprised to discover that there were also quite a number of pond-like isolation areas built in the underground square of this floor.

In these isolated pools, there were giant white flesh worms that were two meters long.

They were soaked in the liquid used to fertilize the potatoes, and they were eating the food that the residents of Loucheng scooped out of the buckets in the carriages.

Tang Zhen made a rough estimate. The number of meat worms that were being raised in this underground Plaza was at least several thousand!

Were these chubby white worms the main source of meat for the residents of Loucheng?

Chapter 45: The high-tech kitchen in the world of Loucheng

When Tang Zhen saw these white flesh worms, he immediately thought of the larvae of a type of fly. Tang Zhen couldn't help but feel nauseated when he recalled the scene of the wriggling larvae.

However, as far as he knew, the larvae were actually very nutritious. There was a dish called "meat tendrils" that used the larvae of these flies as the main ingredient. It was said that it left a fragrance in the mouth when eaten.

Just as Tang Zhen's thoughts were wandering, a few strong men wearing leather armbands jumped into the pool. The few of them worked together and slowly wriggled a big white Worm into a big iron basket with a handle.

After the bug was carried out, the few of them carried it to a stone platform. Someone then brought over clean water and poured it on the bug to wash it.

Then, a fierce-looking man stabbed the meat Worm's Head with a sharp knife. After that, he went around to the ring at the end of the meat worm and pulled it back with force.

A complete set of the worm's internal organs had been pulled out. After the burly man threw it into the basin, someone came forward to take the basin away and clean the internal organs.

The worm that had its internal organs extracted twitched slightly before it died.

The burly man's knife moved swiftly and quickly cut the meat worm into tofu-sized cubes. Each piece of worm meat was white and tender, and it trembled non-stop as if it were frozen.

After dissecting one meat worm, the second one was quickly sent over. The burly man repeated the previous action and only stopped after he had dealt with ten meat worms.

Some people were cleaning the empty breeding ponds.

First, the stinky liquid was carried away in buckets. After washing it with water, someone put in fist-sized meat worms.

After these little flesh worms were put in, they began to gobble up the food in big mouthfuls. They only stopped eating after their bodies were full.

The meat worms were fed with the leftovers and some disgusting things that the residents of Lou city had thrown away.

When the flesh worms stopped eating and resting, they would excrete a foul-smelling liquid, which was the best fertilizer for the giant potatoes and mushrooms.

Tang Zhen could not help but sigh when he saw this scene. Perhaps, such a strange food cycle only existed within the tower.

After witnessing the entire process, it was unknown what the residents of the building city were thinking. In any case, Tang Zhen would definitely not touch this food.

After loading the carnivorous worms' carnivorous meat into the carts, the residents drove the carriages away from the place. Tang Zhen had also lost interest in continuing to investigate. He quietly followed behind the carriage and slowly walked toward the ground.

When they passed by the mushroom forest and potato field, the Coachmen also carried many baskets of potato mushrooms and pulled them out together.

When the carriage reached the ground, people unloaded these things and began to trade in the shops by the square.

If the residents of the tower wanted to obtain this food, they would have to use a type of currency issued by Black Rock City to purchase it. At this moment, they were lining up in a long line. They were making a transaction where they paid the money and delivered the goods at the same time. They were buying the insect meat that Tang Zhen found difficult to swallow.

In addition to the food from the underground space, there were some edible monster jerky, fish, and bird meat, as well as a grain similar to grass seeds.

Among the food, Tang Zhen also saw some wild vegetables and fruits. They were washed and tied up to be sold.

Tang Zhen did not know how many residents there were in Black Rock City. However, there were definitely more than 10000 people. The food in front of him was simply not enough for a day's worth of needs for these residents.

Tang Zhen guessed that they had other sources of food. It was just that he had yet to come into contact with them.

Tang Zhen raised his head and glanced at an even higher place in Black Rock City. His eyes slightly narrowed as he carefully passed through the crowd in the Plaza and began to search for the entrance to the upper floor.

In fact, the entrance to the upper floor was very easy to find. It was just that Tang Zhengang still hadn't noticed it.

The entrance closest to him was in the middle of two shops. There were two Black Rock City cultivators with swords guarding the entrance. However, in Tang Zhen's opinion, the two of them were just putting on an act.

Tang Zhen, who had activated the quantum stealth light screen, gently sneaked in.

The interior of Black Rock City was extremely large. It was impossible for Tang Zhen to wander around aimlessly. Therefore, he had his eyes on a tall girl with a ponytail who was carrying a vegetable basket. He carefully followed behind her.

The girl was about 17 or 18 years old. She wore a set of coarse clothes and her movements were agile and strong. She had a level 1 cultivation.

She hummed along the way, and her slender legs quickly climbed up the stairs. In the blink of an eye, she arrived at the 11th floor.

After reaching this floor, there was an extremely long circular corridor. On both sides of the corridor, there were doors of houses next to each other. There were dozens of doors on one side of the passage, which meant that there were more than a hundred rooms on this floor.

From time to time, the residents would greet this young lady, and she would respond to them one by one with a brilliant smile.

Tang Zhen dodged a few children who were running around crazily in the corridor. After the young lady opened her door, he quietly entered her house.

This was an extremely plain room, about ten square meters in area. There was nothing out of the ordinary, and there was not much furniture on the floor, only two wooden beds.

However, there was a set of swords and leather armor hanging on the wall that made Tang Zhen take a few more glances. This was because he could feel a battle Aura from the repaired leather armor and sword.

However, the young lady's next action gave him a feeling of having his eyes opened.

The girl came to a stone platform that was one meter square by the wall. She reached out and pressed on a bump on the wall. A stream of water flowed out from the tap-like thing, but the water flow was very slow.

The girl placed the food she bought into a basin, washed it with water, and then poured the dirty water into the sewer entrance on the stone platform.

Next, the girl cut up the food and put it to the side, then took out a pot.

She pressed a red bump on the wall, and a square stone slab on the cooking table quickly turned red, and a heat wave slowly spread out.

After he placed the pot on top of it, water vapor quickly emerged from the metal pot, and at the same time, the fragrance of food wafted through the air.

Then, he saw the girl scrape a white stone on the stone table a few times with her knife and pour the powder that hung down into the pot.

The food that was originally thin and slimy immediately became thick and sticky after the White powder was poured into it!

The girl hummed a song as she cooked, but she didn't know that in the corner of her house, an invisible person was watching with his mouth agape!

f * ck, is this still the loucheng world? the kitchen equipment of the loucheng residents is comparable to the black technology in the application store!

Tang Zhen could not help but click his tongue in wonder. His face had an expression of having gained new knowledge.

Before he entered the city, he had many speculations about the things inside the city. His ideas were also wild and imaginative, but now that he looked at it again, he realized that he had been too naive.

After the girl finished preparing the food, she took out a notebook-sized portrait from under the bed and looked at it silently.

From Tang Zhen's angle, he was able to see the contents of the painting.

It was a family portrait. A couple and two children, a boy and a girl, were sitting in the square. The statue of the founder of Black Rock City was used as the background, and the whole family was smiling happily.

The girl looked at the portrait, but tears suddenly overflowed from her eyes. She then covered her nose, her thin shoulders trembling slightly, and she began to sob silently.

Chapter 46: The siblings with a story! 1!

The girl was crying very sadly, but she tried her best to suppress her sobs, as if she didn't want others to hear.

Tang Zhen quietly sighed in his heart when he saw the tear-stained appearance of the girl. He guessed that the family of this girl might have already met with misfortune. Otherwise, she would not display such a painful expression of missing someone when she saw the object.

“Dong Dong Dong!”

There was a sudden knock on the door. The girl seemed to be frightened and her body trembled slightly. She hurriedly stretched out her sleeve to wipe away the remaining tears at the corner of her eyes, and then carefully hid the painting under the bed.

He stood up and opened the door. A fourteen to fifteen-year-old youth in black clothes appeared outside.

“Sister, I’m back!”

The young man in Black had a bright smile on his face. His light yellow long hair and fair skin made him look very handsome. There was an ordinary long sword tied to the youth’s back. Perhaps it was because he had used it often, but the hilt was worn out.

you’re back, Rui. Dinner’s ready. Hurry up and eat!

The young girl smiled and stepped aside, allowing the young man to enter.

After a simple wash of his hands, the young man removed the long sword from his back and placed it at the foot of the bed. Then, he sat in front of the stone table where he was cooking.

The young girl filled a large bowl with Mushroom and Potato Soup and placed it in front of the young man. She then filled a small bowl for herself.

The black-clothed youth named Xiao Rui stirred his food with a spoon and looked at the young girl’s slightly red eyes. He hesitated for a moment before saying, “sister, you’re crying. Your eyes are red and swollen. Are you missing your parents again?”

The girl didn’t seem to want to show her weakness and helplessness in front of her brother. She quickly shook her head and denied, “Nothing happened. I just didn’t sleep well last night.”

The young man seemed to be struggling. After a moment of silence, he said in a low voice, “Sister, you don’t have to work so hard to earn brain beads. I’ll be able to advance to a Rank 2 cultivator soon, and then I’ll be able to get more subsidies. I can also team up with my classmates to hunt monsters in the wilderness.”

Before the young man could finish his sentence, his sister’s expression changed and she reprimanded him with a hint of anger, “You don’t need to worry about the family’s expenses. You just need to cultivate. I’m warning you, you’re not allowed to take even half a step out of this building before you reach Level 3. Otherwise, don’t blame me for not acknowledging you as my brother!”

The girl, who had always had a soft and weak expression, was very excited at this moment. Her pretty little face had also become a little red because of the fluctuation of her emotions.

The young man seemed to be afraid that his sister would be angry, but his expression was somewhat unwilling. He muttered to himself, “If it wasn’t for that bastard’s plot, mom and dad wouldn’t have

died, and we would still be living happily in the upper class of loucheng. Sister, you don't have to work so hard, Yingluo."

"Shut up!"

The young girl's face revealed a trace of fear. She hurriedly stopped the young man's words, and then carefully walked to the door.

After listening carefully for a while and making sure that no one was eavesdropping, he walked to the young man with an angry face and said in a low voice, "Huhu Yingluo, how many times have I said this? don't meddle in the affairs of father and mother. Also, you absolutely can't say these words again. Why are you so disobedient? are you trying to anger your sister to death?"

As the young girl spoke, her large eyes were filled with a trace of mist.

The young man with a sullen face quickly admitted his mistake, but his expression seemed to be filled with unwillingness!

The girl sighed and sat on the bed. She said to the boy, "Xiao Rui, I know that you feel wronged, but things are not as simple as you think. Mom and dad are already gone, so no one will stand up for us. In fact, they know what happened better than anyone else, but what can they do?"

That man is Lou Cheng's elder. We can't beat him now. If we swallow our anger, we might be able to continue living in Black Rock City. You can also continue to cultivate. However, if we shed all pretenses of cordiality, not only will we be driven out of the tower, but that person will also not let us go.

Promise her sister that before she reached level three, she would not take a single step out of loucheng and would have to swallow her anger. I know that person's grandson is in the same class as you, and he has been leading his lackeys to bully you, but I beg you, please don't be impulsive!"

The young girl's words were sincere, and when she said these words, her thin body seemed very helpless.

Xiao Rui clenched his fists tightly as he listened to his sister's words. The humiliation and unwillingness flashed past his eyes, but they all turned into a long sigh.

"Alright, I'll agree to it!"

The young girl's tears turned into a smile when she heard this, and a bright and beautiful smile appeared on her face.

He slowly walked in front of the young man and served him a spoonful of food. He smiled and said, "I heard that the blood Viper's meat has the effect of helping to improve cultivation. After a while, when I get my salary, I'll buy you one to make soup."

The young man shook his head, then nodded, and lowered his head to eat his food in silence.

What followed was a long period of silence. During this period, even if the girl started a topic, the young man would only respond simply and not make any more movements.

The young girl sighed slightly when she saw this. A trace of heartache flashed in her eyes, but she did not say anything else.

Tang Zhen, who was invisible at the side, witnessed the entire process. During this period of time, his expression changed a few times. Finally, he sized up the young man named Xiao Rui with interest.

From this young man, he could see a deep sense of unwillingness and humiliation. This kind of extreme emotion could not only create a person, but also destroy a person.

If he could make good use of this mentality, he might be able to get some benefits for himself.

Of course, the premise was that the other party had to be willing to cooperate with him. Otherwise, it would be easy to go for wool and come home shorn.

Tang Zhen analyzed the mentality of this young man. He wanted to become strong and take revenge for his parents. He didn't want his sister to work hard for him.

It would be very difficult to achieve these goals, at least for the siblings in front of them!

The embarrassment of life and the spying of the enemy put them in a quagmire of struggle. Wanting to stand out and take revenge was only a distant dream.

When they faced this goal, they would probably feel a deep sense of powerlessness.

At this moment, as long as Tang Zhen appeared in front of them, regardless of the role he played, as long as he could give them an obvious hope, there would be a possibility of cooperation between them.

However, when Tang Zhen was choosing his partner, he had once hesitated between siblings. In the end, he still chose his younger brother.

This young man called Xiao Rui was ambitious and angry. He was also very smart. In the face of benefits, this kind of person would neither refuse nor submit obediently. Instead, he would weigh the gains and losses.

However, this kind of person would never give up the dazzling benefits, because they knew the value of this opportunity. It was likely to be a once-in-a-lifetime opportunity!

If you go the right way, if you step out, you'll be rich and prosperous. If you hesitate, you'll miss it, and you'll be ordinary and poor!

She wasn't like her sister, who had concerns and concerns in her heart and would rather suffer for herself than implicate her family.

However, it was precisely this kind of thinking that caused her to directly reject Tang Zhen's cooperation. Instead, she chose to live in peace and continue to persist in her dream. No matter how long it took or how bitter it was, it was fine as long as there was hope!

Therefore, when the young man left with his sword, Tang Zhen quietly followed.

Chapter 47: Cooperation reached _1

He slowly followed behind the young man, walking down one corridor after another, up one step after another, and the two gradually left the place where the crowd was dense.

The direction the young man was heading in was a quiet passage that almost no one had passed through. Even the fluorescent stones on the wall used for illumination had been damaged.

Tang Zhen did not know what part of Black Rock City this was. However, it was very obvious that this place was suitable for some secret matters.

For example, discussing the cooperation between the two of them.

Tang Zhen's eyes narrowed slightly as he looked at the young man who was still slowly walking forward. He steadily stopped his footsteps.

Then, with a half-smile on his face, he saw that the young man in Black named Xiao Rui had also slowly stopped in his tracks.

"Why aren't you following me?"

The young man turned his head around and faced Tang Zhen's position as his cold and indifferent voice softly sounded.

At the same time, his hand was already on the hilt of his sword. Although he only had a level one cultivation, the young man's hand was very steady and strong.

Tang Zhen believed that after this sword was pulled out, it would definitely be as fast as lightning and full of strength.

From the looks of it, this young man was very talented in the cultivation of the martial path. However, Tang Zhen was more interested in how this young man had discovered him and when had he discovered him?

Tang Zhen didn't remove the quantum stealth light curtain. Instead, he asked with an interested tone, "Not bad, you can actually detect my existence! As far as I know, only a horde leader can find me. You're only a rank 1 cultivator, how did you do it?"

The young man's tone was cold as he replied in a disdainful tone, "Why should I tell you?"

"Why? this is a problem. Let me think about it."

Tang Zhen's words paused for a moment before continuing, because I can help you realize your dream. What do you think of that answer? "

The teenager's eyes moved and he continued to say in a mocking tone, "hehe, my dream. I've said that I want to be the governor of Black Rock City. Can you help me with that? "

that depends on what price you can pay. However, I guess your dream is not as simple as becoming the governor of Black Rock City, right? "

The young man shook his head gently and slowly loosened his grip on the sword hilt. He stared at Tang Zhen's position for a long time before he faintly opened his mouth and said, "When did you enter my house, and what's your purpose?"

Tang Zhen became even more interested when he heard this. It seemed like the young man had already discovered him when he had just returned home.

Of course, this was only his guess. If the young man had really discovered him at that time, then the conversation between him and his sister would not have been so simple.

Or it could be said that the conversation between the siblings was actually deliberately said for Tang Zhen to hear.

Tang Zhen didn't believe that this young man had such a terrifying thought process. Therefore, he guessed that he had given himself away when he followed the young man out.

This guy was probably trying to trick him. What an interesting little guy!

Tang Zhen looked at the young man in silence, waiting for him to say the answer. Moreover, Tang Zhen was certain that the young man would definitely say it.

This was actually a method, using some secrets to exchange for mutual trust. This way, after knowing each other's secrets, they would no longer be completely hostile to each other, and there would be a basis for cooperation.

As expected, after seeing Tang Zhen fall silent, the young man's eyes trembled as he took the initiative to speak, "I've been able to sense some invisible elements in the air since I was young. They are usually arranged together in a very regular pattern, but once disturbed, they will instantly become a mess.

When I left the room, I realized that something was wrong with my back. There was a chaotic elemental energy following me. However, I can't see anything unusual with my naked eye, so I'm sure that there's a guy who can make himself invisible and is following me from far behind."

After the young man said these words in an indifferent tone, he looked at Tang Zhen, tell me, tell me your purpose. What's the reason for you to set your eyes on an unknown nobody like me? "

The young man's eyes were stubborn and calm, but it could not hide the slight trembling of his arms in his sleeves.

After all, he was only a teenager. It was inevitable that he would be a little scared when he encountered such a thing that was beyond his common sense. For this young man to be able to do this much was already very good.

A person with such a temperament definitely had the potential to become a formidable character.

After knowing the reason why he was discovered, Tang Zhen did not intend to beat around the bush with the young man and directly said, "I want to work with you, be it cultivation resources, weapons, or even martial arts manuals, as long as you need it, I can provide it to you."

The young man's eyes moved. He lowered his head and was silent for a moment. Only then did he raise his head and look at Tang Zhen. There was a trace of determination in his eyes.

There's no such thing as a free lunch in this world. Since you want to cooperate and give me these things, what price do I have to pay? "

Very good, you are indeed a young man who understands the situation. I like it!

Tang Zhen smiled and said, "I need all the information about Black Rock City. Whether it's public or secret, I want it all." And as long as you can provide valuable secret information, I can even pay you extra!"

"What do you mean by valuable information? be more specific!"

"For example, the location of the treasure vault, the information of the building foundation, the information of the cultivators in Black Rock City, and so on. I need all of this information."

The black-clothed youth was shocked when he heard this. He looked at Tang Zhen with a cold and shocked expression, as if he was looking at an ambitious conspirator who wanted to overturn the city.

At this moment, the young man's heart began to hesitate.

Tang Zhen's words were like a demonic voice as they softly sounded in his ear, "Think about your dead parents, think about your sister who works hard for you all day, think about the enemy who killed your father and lived a life of luxury, and think about the classmate who bullied you and his Lackey, Yingluo."

"Shut up, don't say anymore!"

The young man's eyes were crimson red. His wild beast-like eyes had condensed into needles as he stared intently at Tang Zhen.

Tang Zhen did not bother about the young man who was about to explode. He merely continued to ask, "So, what do you think? Let me remind you, my patience is limited!"

There was silence and more silence. Finally, the young man said, "I'll work with you, but you have to show me your sincerity first, right?"

"Very good, then tell me, Yingluo, what do you want?"

Tang Zhen was just like a devil that could lure one into the abyss. In the end, the young man obediently offered his soul.

"Brain beads, I want at least a thousand brain beads!"

The young man's words caused Tang Zhen's heart to Twitch. Damn it, could it be that this bastard could see through my storage space? how did he know that I only had a thousand brain beads left?

These brain beads were specially left behind by Tang Zhen in order to guard against unexpected needs. He didn't expect that they would come in handy at this time!

There was naturally no room for hesitation at this moment. He had to let the young man see his rich and overbearing side. Therefore, Tang Zhen did not hesitate to wave his hand. Immediately after, a leather bag appeared in the young man's hand out of thin air.

Feeling the heavy feeling of the leather bag in his hand and personally witnessing the process of the leather bag appearing out of thin air, the young man's pupils shrank to the size of a needle tip. He had already regarded Tang Zhen as a super expert with terrifying strength.

At this moment, the young man even felt some regret. He should not have agreed to cooperate with Tang Zhen. However, when he thought of the various humiliations and unwillingness he had experienced in the past, the young man's originally wavering thoughts became firm again.

He opened the bag and took a look. It was indeed a genuine Level-1 brainball. To the young man at this moment, this was a huge sum of money!

"I'll come back to you in a month's time. At that time, you'll have to give me all the information you've collected. If you complete the mission well, the reward I can give you will definitely be beyond your imagination!"

After saying this, Tang Zhen directly activated the teleportation.

After instantly being unable to sense Tang Zhen's existence, the young man was once again shocked. After a moment of silence, the young man gritted his teeth and turned around to leave.

Ten minutes later, Tang Zhen once again appeared on the same spot. However, an inexplicable smile was lifted on the corner of his mouth.

Chapter 48: The panlos stairhead_1

The cooperation with the young man was actually Tang Zhen's spontaneous idea. However, after interacting with the young man, Tang Zhen was filled with anticipation as to what kind of surprise the young man would bring him.

This young man was not simple. He was unknown now only because his wings had not yet grown. Once he could grasp power, he would definitely become a figure.

As for how high he could stand and how far he could go in the future, it was not something that Tang Zhen needed to be concerned about.

To Tang Zhen, there were far too many secrets about Lou Cheng. This was his first time coming into contact with it, but he had already experienced many visual impacts.

However, Tang Zhen also knew that this was merely the surface. He believed that the higher-ups in power would definitely be keeping even more secrets.

Since he wanted to build a city of his own, the more information he collected about this, the more beneficial it would be for him.

Only by being careful and not doing anything unprepared would one be able to live longer!

After pondering for a moment, Tang Zhen turned his head and left.

It had been a few days since he left Wanderer town, and he wondered how Murong Zi Yan, Qian Long, and the others were doing. Tang Zhen knew that without his permission, they would not leave the small town and would wait for his return.

Tang Zhen thought as he walked. However, after walking for more than ten minutes, he discovered that he seemed to be lost!

This dark corridor seemed to be very long. He had walked for so long, but he had not reached the end at all.

According to Tang Zhen's visual estimation of the outer wall area of the Black Rock City, he was certain that there was definitely not such a long corridor inside. However, the corridor in front of him was really under his feet.

After musing for a moment on the spot, Tang Zhen once again took a step forward. However, this time around, he did not pay attention to the ground below his feet. He made a mark and paid attention to the details inside the corridor.

Half an hour later, Tang Zhen stopped his footsteps. A mocking smile appeared on his face.

I really didn't expect that I would be tricked by that little guy and unknowingly led into such an interesting place!

Tang Zhen secretly sighed. However, he did not feel much anger in his heart. He only mocked himself. He did not even know that he had been tricked by the young man when he acted pretentiously in front of him.

In the past half an hour, Tang Zhen had been continuously walking forward. However, he did not show any signs of walking out of the corridor. It was as if this was an endless corridor that had no exit.

From Tang Zhen's point of view, this corridor was filled with strangeness. If he continued walking without an exit, he was afraid that it would drive a person with a weak heart crazy.

If an ordinary person were to enter this place by mistake, he would definitely not be able to leave this place until the day he died.

However, Tang Zhen was different. Not only did he possess heaven-defying black technology, but he also had knowledge that far exceeded the natives of Lou Cheng.

After the natives of the other world entered this corridor, they might not know what to do and might not know the strange principle behind it. However, Tang Zhen had a faint guess.

This corridor should be a panlos staircase, or perhaps it could be called the hanging soul stairs.

Black Rock City was square in shape with a huge square in the middle. There were several floors of underground space below the building for planting and rearing crops.

Ordinary floors had four staircases that were connected to each other, and they were connected from top to bottom to ensure that there was no obstruction.

And this kind of architectural environment provided the best geographical conditions for the construction of the panlos stairs.

Perhaps the panlos staircase was not built by Black Rock City, but appeared together with the tower after it was built.

Murong Ziyang had also heard of Tang Zhen before. After every Tower City was built, a strange place would appear. Strange things would often happen in that place. Therefore, such places were regarded

as forbidden places by the residents of Loucheng. Even the ruler of Loucheng forbade the residents from approaching those places.

The basic principle of the Panlos staircase was that there were four staircases in total, and the four corners were connected. However, each staircase went up, so it could be extended indefinitely.

Walking up these stairs was equivalent to stepping into an endless loop, never finding the way out.

In order to break this cycle, one had to jump out of this frame, or rather, destroy the walls on both sides of the staircase that guided people forward. Only then could one jump out of the Panlos staircase.

Tang Zhen recalled the scene when he and the young man entered this corridor, but he discovered that he was unable to find any clues.

Although the Panlos staircase was strange, a mere passageway was not enough to trap Tang Zhen. According to his previous methods, he had at least two ways to escape from this place.

However, from the current situation, both methods had their drawbacks.

The teleportation could take him away immediately, but when he came back, he would still be in the same place, so this method was not feasible.

The short-distance teleportation on the map could also help him teleport to any place within a hundred meters. However, from the current scene on the map, only the passage was shown, and the rest of the place was dark.

He believed that this was definitely Lou Cheng's strange ability, which blocked or messed up the map. Otherwise, the powerful map would not only show the image of the corridor.

Tang Zhen didn't dare to teleport rashly. If the pitch-black place was high in the sky, Tang Zhen, who couldn't teleport continuously, would definitely fall from the sky and be smashed into meat paste.

Therefore, this method could also be undesirable.

However, in addition to these two simple and violent methods, Tang Zhen actually still had other means.

First of all, he could choose to blast open an exit in the corridor.

However, if he were to do so, he would easily attract the attention of the Black Rock City. If he were to meet an extremely powerful expert from the Black Rock City who could see through his quantum stealth light curtain, Tang Zhen would be in a dangerous situation.

Or, he could use the data combat interface to scan and detect the corridor.

The reason why the data battle interface was so expensive wasn't because it only had simple functions such as monitoring the user's body data and the weapon's condition. Instead, it had more than 20 powerful branch options. It was just that Tang Zhen had never used them.

If an elite soldier were to possess such a powerful ability, they would instantly become a super soldier, capable of causing any enemy to tremble in fear.

What Tang Zhen wanted to use now was an option on the data battle interface.

The real-time mapping and imaging function of the terrain integrated radar, laser, ultrasonic, and other functions into one. It can map the geographical environment within a kilometer in an extremely short time and build a four-dimensional holographic image.

After he activated this option, lines of data immediately refreshed at the edge of Tang Zhen's eyes like a waterfall. At the same time, a clear three-dimensional image formed by countless fine dots and lines gradually appeared in front of his eyes.

A minute later, the detection ended, and the four-dimensional holographic 3D image appeared in front of his eyes.

With just a glance, Tang Zhen was sure that this was indeed a panlos staircase!

Tang Zhen carefully looked at the image once. After he confirmed his position, he slowly walked to the wall of a corridor not far away and stood still.

There was a solid wall in front of him. When he threw a stone at it, there was an echo. When he touched it with his hand, it felt real, no different from the other walls of the corridor.

However, Tang Zhen was certain that the real exit of the panlos staircase was here!

The results of the survey on the data battle interface were never wrong. In the entire tunnel, there was only a very fine gap on this wall, which happened to be a door.

Tang Zhen walked toward the wall with large strides. Even if he was about to touch the wall, he did not have the slightest intention of stopping.

However, just as his nose was about to hit the wall, a magical thing happened. The image of the hard wall was still there, but Tang Zhen felt that he had passed through an empty door.

In the blink of an eye, Tang Zhen realized that he had already left the panlos staircase and walked to the corridor outside.

He turned around and saw that the door where the soul ladder was hidden didn't look any different from the other places. Even the solid walls of the corridor had disappeared without a trace.

"This is indeed an interesting place!"

Tang Zhen smiled. He stood up and walked out of black Rock City.

Chapter 49: The lively Wanderer town (1)

After leaving Black Rock City, Tang Zhen headed to Wanderer town.

On the way back to the Wanderer town, Tang Zhen personally witnessed seven scenes of cultivators fighting against corpse monsters. Black Rock City was the main force while the Wanderers were the support. From this, it seemed that Black Rock City had made up their mind.

Both parties were ambitious. Black Rock City was the old Overlord of this area. The undead's goal was to conquer the entire world of towers, and Black Rock City was the first obstacle on their way to conquest.

In the end, there would only be one ruler left in this area, so both sides would spare no effort to kill each other.

Although the war caused the people to suffer, it also contained huge business opportunities. Could he do something in this area?

When Tang Zhen arrived at the Wanderer town, he noticed that the number of Wanderers entering and leaving the town had suddenly increased by several times. Occasionally, there were even one or two residents of Black Rock City mixed in.

The entrance to Wanderer town was in a mess. Fights would break out from time to time, but the two sides were still restrained, and no one died.

Tang Zhen asked around and found out that the residents of Black Rock City had just arrived here two days ago. They were mainly in charge of issuing missions to kill corpse monsters, counting the monster Certificates brought back by the Wanderers, and giving out the corresponding rewards.

This place was near the entrance of the Wanderer town, and it was very lively.

From time to time, Wanderers, wild cultivators, and members of the exploration team would come over to hand in their missions. Then, they would choose the rewards they needed, be it food, or accumulate them to exchange for weapons and armor.

Some Wanderers with severely damaged weapons and armors would enter the town to repair them or change into new equipment.

Compared to ordinary Wanderers, these Wanderers had more than enough funds to cultivate in the wild. At the very least, they wouldn't run out of food on a regular basis.

Of course, these brains were exchanged with their lives. They might die in the wilderness one day. If they were lucky, they would have an intact corpse, and if they were unlucky, they would become food for monsters.

Tang Zhen stopped and watched for a moment before walking in the direction of the cave.

From a distance, everything outside the cave looked normal.

The little girl Murong Ziyue was squatting at the entrance of the cave, looking at the bugs on the ground. Beside her was a huge bear. The two of them pointed at the ground and laughed happily.

"Little girls, what are you all looking at?"

Tang Zhen laughed and called out.

"Brother Tang Zhen, you're back!"

After the little girl saw Tang Zhen, she immediately stood up and ran over with her arms and legs dancing. She was immediately hugged by Tang Zhen.

The big Bear foolishly looked at Tang Zhen. It seemed as if it also wanted to run over. However, it did not move. Instead, it had an expression of anticipation.

Tang Zhen looked at the drooling Big Bear. He then looked at the little girl who was also looking at him with her large, watery eyes. How could he not guess their thoughts?

He reached behind him, and when he took it out, he was already holding a handful of exquisite candy.

The colorful candy was very dazzling under the sun, as if it was emitting a holy light. The little girl and Big Bear immediately cheered when they saw this, and then took the candy to the side to carefully taste it.

Murong Zi Yan and Qian Long also heard the noise and walked out of the cave together. After seeing Tang Zhen, the two of them revealed an expression as if they were relieved of a heavy burden.

Tang Zhen took a look and discovered that da Xiong and Qian Long's injuries were recovering quite well.

For a Wanderer, getting injured was a common occurrence. The two of them had good recovery abilities, and with Murong Ziyang's Ivy ointment, their recovery speed was even faster.

"How is it? are you feeling better?"

Tang Zhen patted Qian Long's chest and asked in a concerned tone.

"There's no problem. This small injury is nothing to me.

I've already secretly inquired about it. That guy is the leader of a small exploration team and is very powerful, so if we want to take revenge on him, it's best to do it in secret."

Qian Long smiled as he spoke to Tang Zhen.

"Mm, don't worry, I know what to do! Let's not talk about this for now."

Tang Zhen already had a plan on how to deal with the bearded man. Qian Long didn't say anything more when he saw Tang Zhen avoiding the topic.

Murong Zi Yan had been looking at Tang Zhen with a concerned look the whole time. When she saw Tang Zhen's eyes turn to her, she revealed a little girl's posture with a somewhat shy expression on her face.

This time, Tang Zhen had bought quite a lot of things for the four of them. After greeting them, he took the bag that he was carrying as a cover into the cave and poured out the things for the four of them.

The four of them were used to living a hard life, so how could they have seen so much food and clothes?

The few of them had excited expressions on their faces. Qian Long and Murong Zi Yan were still fine, but the little girl had already gone crazy with joy. She was holding a big bag of candy and jumping around on the ground.

Big Bear was envious as he watched. He squatted there and drooled. Tang Zhen smiled when he saw this. He also took out a bag and handed it to Big Bear.

The big guy immediately roared excitedly. His voice was extremely penetrating, causing pain in his eardrums. Tang Zhen was so angry that he kicked his butt.

Murong Ziyang looked at the clothes and small items that Tang Zhen had given her and couldn't help but secretly smile. Her face was filled with joy and sweetness.

“Brother Tang, where did you get these things?”

Qian Long couldn't help but ask.

Tang Zhen's body was filled with a sense of mystery, and this feeling only grew stronger as time passed. Even Qian Long, who knew his limits, couldn't help but ask out of curiosity,

“It's not the time to tell you now, is it?” Tang Zhen smiled. As long as you follow me, there's no mistake!”

Qian Long didn't mind Tang Zhen's perfunctory reply. He only lightly nodded his head before fiddling with the wolf-eye flashlight and military dagger that Tang Zhen had given him. His face was filled with joy.

After distributing the things they had brought, Murong Zi Yan went to prepare some food. Tang Zhen and Qian Long walked out of the cave and found a rock to sit down on. They began to discuss the things that had happened in the past few days.

Tang zhenjing listened to what had happened in the past few days and nodded gently while pondering in her heart.

According to thousand Dragon, the zombie horde this time was indeed different from the monsters in the past. Not only were they large in number, but they were also strong in combat and possessed simple intelligence. They were definitely not comparable to the monsters in the wilderness that only knew how to kill.

The cultivators that Black Rock City had sent out had suffered heavy casualties, and the Wanderers had suffered even more. However, after paying a huge price, the number of zombie monsters did not decrease. On the contrary, it seemed to have increased.

The stench of blood on the battlefield attracted more and more monsters from the wilderness.

A few days ago, some Wanderers had even seen a level five Black-winged Blue Dragon in the distance.

It was said that the Black-winged Blue Dragon was more than 20 meters long and usually lived in the dangerous wilderness. This time, it was attracted by the bloody smell.

There was news that Black Rock City had already requested for reinforcements from the other cities, but it was still unclear if they would receive any reinforcements.

On the other hand, Wanderers from other places had been gathering over the past few days, with the intention of taking advantage of this opportunity to make a fortune from the war.

The equipment of Wanderers who died in battle, the brains of monsters, the rewards for missions, and the trade of resources were all good opportunities for Wanderers to make a fortune.

There were even a few mobile merchant teams that were heading towards Black Rock City, bringing with them a large amount of war supplies that were urgently needed.

Tang Zhen's eyes immediately lit up when he heard this. These Wanderers from other places might be able to bring him a large amount of cash, gold, silver, and jewelry.

Even if he didn't have these things, he could still start a department store wholesale and earn a large number of brain pearls from the hands of these Wanderers.

Chapter 50: Corpse King's possession, death bird

Tang Zhen didn't tell Qian Long that he had a Lord Grade brain Pearl. It wasn't that he didn't trust Qian Long, but the time wasn't right yet.

He only told the thousand Dragons to pay more attention to information about the Foundation stones. At the same time, he also wanted to take advantage of the gathering of Wanderers and wild cultivators in Black Rock City to recruit more reliable people.

With the appearance of these undead, Tang Zhen's desire to build a tower City became stronger and stronger.

Perhaps the appearance of the corpse monster this time was a great opportunity for him.

Oh, didn't I say that I would give you a slingshot last time? look, this is it!

As Tang Zhen spoke, he took out a slingshot from his pocket and handed it over.

He had bought it from a store when he was shopping and had spent a hundred Yuan. The slingshot of today was very delicate. It was said that some thread cutting technique was used, and it looked quite beautiful.

Qian Long took it over and fiddled with it before asking, "This thing is pretty, but how should I use it?"

Tang Zhen took out a bunch of steel balls from his backpack. He placed one of the steel balls into the leather pocket of his slingshot, aimed, and shot.

"It's simple to operate like this, right?"

Qian Long took the slingshot and started fiddling with it. After a while, he said, this thing is really not bad. Its power is also not bad. It is useless against large prey, but it is completely enough to hit birds!

At this point, Qian Long seemed to have recalled something. He turned to Tang Zhen and asked, by the way, is it difficult to make this thing? I see that it's so exquisitely made, and it's also made of metal. It must be very expensive? "

"It's not difficult to make this thing. Why are you asking this?" Tang Zhen shook his head.

the Black Rock City's acquisition point has been buying pheasants and various birds for a long time to make dried meat. Some Wanderers also rely on catching pheasants and various birds for a living, but the efficiency is very low.

With this thing, we can increase the efficiency of the capture. After all, many Wanderers can't afford bows and arrows!"

Tang Zhen's eyes lit up when he heard this. He asked, " what's the price for buying pheasants in Black Rock City? "

Thousand Dragon stated the price. It wasn't too high, far from the profit of selling weapons and other goods.

When Tang Zhen heard this, he temporarily put out his plan of reselling the White-striped chicken and raw meat. He would think about it in the future because there were meat worms in Black Rock City. It did not seem like there was a lack of meat.

The two of them chatted for another hour or so before Murong Zi Yan came over to invite them to dinner.

Just as Tang Zhen, Qian Long, and the others were discussing how to profit from this chaos, an earth-shaking roar came from the depths of the sinister and bloody corpse clan's wild building!

A corpse monster Lord in black armor slowly walked out of a hidden secret room. In the secret room behind it, there was a black stone covered with runes, floating steadily in the air above a stone platform.

This black floating Runestone was the wild building's cornerstone that Tang Zhen had dreamed of!

The corpse monster Lord walked to a chair and slowly sat down.

The aura on its body seemed to have changed. It was no longer as murderous as before, but now had a trace of King's aura, which made people feel a faint sense of fear.

The corpse Lord was silent for a while, then it raised its hands and looked at it, sighing.

he's only at the early stage of Level Seven. The suppression of the laws of this world is indeed powerful. However, the more it's so, the more it proves that there's a huge secret hidden in this world. And one day, I'll get it!

The corpse monster Lord muttered to itself, and a moment later, its eyes revealed a look of hatred.

"If it wasn't for that damn ant, the clone I cultivated wouldn't have been destroyed, and my strength wouldn't have been limited to the 7th rank. Why would I use this trash's weak body?"

The corpse monster Lord roared, but from the meaning of its words, it was obvious that the spirit brain corpse King had taken over this body!

The Spiritual Brain corpse King roared and then regained its calm, but a thoughtful look appeared in its eyes.

Although that damned ant was detestable, his teleportation ability was pretty good, to the point that even the Great Spirit brain corpse King was extremely interested.

He wished that he could capture Tang Zhen right now and turn him into a corpse slave to study.

However, the current situation didn't allow it to act rashly. After all, it had consumed a lot of energy during this descent, and even its soul had been injured. If there were any accidents, it, the dignified corpse King, might be left here forever.

Thinking up to this point, the spirit brain corpse King's hatred for Tang Zhen deepened a bit, and its fists clenched until they made cracking sounds.

Hiding behind the scenes and fighting steadily was the conquest plan set by The Spiritual Brain corpse King.

This time, not only did the spirit brain corpse King's soul leave its body to descend, but it also brought the corpse race's origin stone. This was a mystical item that was similar to the building's foundation stone, yet far beyond it.

There were only three origin stones of the corpse race, and he had brought the biggest one!

It was said that this origin stone had the ability to create creatures on this plane and was the foundation of the corpse race's existence. As long as it existed, the corpse race would not be completely exterminated.

When this origin stone of the undead clan was brought to the world of towers, the spirit-brain corpse King had the ability to summon undead creatures from the undead clan. However, the creatures that it summoned were all walking corpses without souls.

However, the spirit-brain corpse King didn't care about this at all. The corpse race only existed for killing, as long as they could understand his orders.

After thinking for a few hours, the spirit brain corpse King got up and walked into the secret room. At the same time, it opened its palm and revealed a crystal clear crystal that seemed to contain the traces of life.

This beautiful crystal was the origin stone of the corpse race.

The Spiritual Brain corpse King slowly brought the origin stone close to the building's foundation stone. Then, the two magical stones slowly merged together and turned into a gray Runestone.

The spirit-brain corpse King closed its eyes and tried to use its soul to communicate with the runestone that had just been fused with it. Soon, a smile appeared at the corner of its mouth.

At the same time, the thousands of brains piled around the stone platform disappeared in an instant.

The outside world had suddenly changed!

In the sky above the corpse clan's wild building, the originally clear sky suddenly became covered with dark clouds. Countless black mist spiraled and gathered, forming a huge ring of clouds that was dozens of meters wide.

Bolts of lightning appeared near the cloud, making deafening rumbles.

Then, it was as if a huge invisible force had torn the sky apart. A deep and dark passage appeared in the sky, which seemed to be connected to a terrifying world.

"Kakaka!"

A shrill cry rang out from the tunnel, and in the blink of an eye, a massive dark cloud surged out of it.

It was only when the giant dark cloud got closer that they realized that it was actually countless black evil birds that were about 20 centimeters long!

This black bird had vicious eyes, a pair of sharp claws that were always oozing blood, and a curved beak like an eagle. However, it contained a terrifying poison. Once bitten, one would be infected with this poison.

This was a strange poison that could make people lose their ability to move and slowly stiffen to death. Corpses that died because of this poison were the only food for these death birds.

In the world of the undead race, this kind of death bird went extinct due to the change in environment, but at this time, it was summoned by the spiritual-brain corpse King with the help of the origin stone.

The death bird had not only inherited its terrifying abilities, but it had also evolved.

Once infected with their poison, a human would die within a day, and the corpse would become a monster that only knew how to eat flesh and blood, which was the lowest level of the zombie race!

And these death birds were only the first step in the spirit brain corpse King's plan!
