

## Alternate 481

Chapter 481 The Super square in the desert

He glanced at Zhao Dabao, who was still in a coma. After confirming that there were no problems with his vital signs, Zhen Tang turned around and went to the conference room next door with director Tang.

Before the tunnel was completed, Zhao Dabao could not die. Otherwise, all his efforts would be in vain.

If he wanted to find the next player who successfully transmigrated to the world of loucheng, he didn't know how long he would have to wait.

Sitting at the conference table, Tang Zhen looked at the people in front of him and slowly explained his plan.

It's beyond my expectations that the first soul transmitter would appear so quickly, so we must complete the coordinates of the original world and the construction of the soul transfer array as soon as possible.

Speaking up to this point, Tang Zhen paused and looked at director Tang beside him.

Director Tang, who was deep in thought, immediately said, "Don't worry, Mr. Tang. We'll fully cooperate with you no matter what you want to do!"

Tang Zhen gently nodded toward the other party when he heard this. It could be considered as him expressing his gratitude.

Since the other party had already expressed his position, Tang Zhen no longer hesitated and told him everything he was prepared to do.

"The first thing we need to do is to build a city Tower in our original world. Because of the unique properties of the City Tower, it can strengthen the connection between the two worlds.

The towers built here and the Holy Dragon City in the tower world were like two fixed towers, and the soul transmission channel was the steel cable that connected the two.

The soul that's being transmitted will follow this steel cable to reach the destination!"

Tang Zhen took out a bottle of water from his storage space. He ignored everyone's surprised eyes as he raised his head and took a sip.

In the world of loucheng, every time a loucheng is built, it will attract countless monsters to attack the city. The scene is extremely tragic!

While Tang Zhen was speaking, he extended his finger and gently tapped on the top of the conference table. Immediately after, a holographic recording that made everyone feel as if they were in a real world appeared in front of everyone's eyes.

Everyone exclaimed in unison. At this moment, no one was paying attention to where this realistic image came from, but were deeply attracted by the scene of the monsters attacking the city.

It was bloody, cruel, and yet it made one's blood boil!

To them, the video that was playing in front of them was even more satisfying and exciting than a Super Science fiction blockbuster!

The three-minute video recording made everyone present feel like they had not had enough of it.

After the video finished playing, Tang Zhen's voice once again sounded while everyone was still reminiscing.

I believe everyone has seen the scene of the monsters attacking the city. What I'm worried about now is whether the tower in the original world will be successful, and will there be monsters attacking the city after the success? "

although a monster attack of this scale is not worth mentioning to me, this is the world of towers, not the original world.

Therefore, when loucheng is being built, you still need to be prepared for any unexpected situation!"

Director Tang and the others nodded heavily.

Tang Zhen continued, " other than building towers, I will also build a super square in the desert nearby. It will be used to draw and build the soul transfer array. This can be done later.

Director Tang immediately asked, " may I ask how big the square is and what requirements you have for the construction materials? as long as you state them, our Infrastructure Engineering team will be ready at any time.

Tang Zhen had long heard of the Asian Alliance's engineering team. He had also seen it once. The construction scene was indeed spectacular.

They were professional, efficient, and shockingly fast!

However, Tang Zhen did not need to go through such trouble.

He activated the all-purpose electronic kit and pulled up a holographic map. Zhen Tang pointed at an area on the map and asked director Tang, I'm going to build the square here. I wonder if there are any secret buildings below? "

The people in the meeting room gathered around and shook their heads after some observation, indicating that this was just an ordinary desert.

Tang Zhen nodded when he heard this. He immediately invited everyone to head to the location that he had chosen.

Riding the special underground transportation, they climbed all the way up and came to the surface again.

The area chosen by Tang Zhen wasn't very far from the base. The group took less than ten minutes to arrive at their destination.

Everyone was puzzled in their hearts as they looked at the desolate desert in front of them. They did not know why Tang Zhen had brought them here.

Could it be that he wanted to take a look at the environment before the construction?

Tang Zhen did not care about everyone's doubtful eyes. Instead, he closed his eyes slightly and switched to the map view.

After selecting the area in front of him, Tang Zhen launched the [ map transformation plug-in ]!

“BOOM!”

Just as everyone was secretly puzzled and did not know what Tang Zhen was going to do with his eyes closed, the desert under their feet began to shake violently.

“Is this an earthquake?”

Everyone was suspicious. After all, in the special terrain of the desert, the probability of an earthquake was very small. Even if one lived in the desert for a lifetime, they might not even hear of it once.

But if it wasn't an earthquake, then what was the violent shaking under his feet?

Looking at Tang Zhen, who was standing in front of them with his eyes closed, and recalling the mysterious ability that he had displayed, everyone was immediately shocked in their hearts.

Could it be that the violent quaking of the desert was related to the young man in front of him?

Everyone looked at each other and saw the same question in their companions' eyes.

At this moment, in the desert in front of them, a Super Stone platform made of hard rocks suddenly broke through the sea of sand and appeared in front of everyone with an earth-shattering aura!

“Oh my God!”

“What is this?”

ghost deity's power! This is the true ghost deity's power!

Shocked and admiring voices continuously sounded. Those people standing behind Tang Zhen had already completely fallen into a petrified state.

No one knew how many square meters of Super Rock Square appeared out of thin air. Anyone who saw this incomparably spectacular scene with their own eyes would definitely not be able to maintain their calm.

Under everyone's stunned gazes, one minute passed quickly. A desert city completely made of hard rocks appeared in front of everyone!

In order to block the wind and sand, Tang Zhen had deliberately raised the height of the Super square to ten meters. He had also built a tall wall around it, encircling the square.

He could ask director Tang to plant trees around the area to stabilize the desert so that it wouldn't be filled with sand all day long.

Tang Zhen smiled and said as he looked at the still dull faces of everyone, the square has been completed. Why don't you all enter and take a look? ”

“Alright!”

“Please go first!”

Everyone hurriedly replied after they recovered from their shock. The gazes they used to look at Tang Zhen had become complicated and indescribable. There was a faint trace of respect and worship in them!

When the Super square was built, Tang Zhen had reserved a passage to enter. Not only was there a huge flight of stairs, but there was also a gentle slope for cars to drive on.

The superior military vehicle roared and climbed up the hard ramp, directly entering the Super square.

A huge stone City was laid bare before everyone’s eyes. It was majestic and desolate.

Looking down from above, they could only see a few military vehicles that were as small as ants. The shock on everyone’s faces did not disappear.

Chapter 482 The first tower in the original world \_1

After circling the Super square, the military off-road vehicle stopped in the middle of the square.

Everyone jumped out of the car with a shocked expression and quickly gathered together. They stared at Tang Zhen, who was standing in the middle.

At this moment, everyone’s hearts were still surging with excitement.

The young man in front of him could no longer be considered an ordinary person. Using the term “ God ” to describe him was not an exaggeration.

Going up to the heavens and down to the earth, with a raise of his hand, he could change the sea into mulberry fields. Wasn’t this a method that only gods had?

Tang Zhen was unconcerned about everyone’s worshipping eyes. His face was indifferent.

Only he knew that there were countless existences stronger than him in the tower world. Even though he had become a king class cultivator, he was still no match for the demon-eye Tyrannosaurus.

Tang Zhen raised his hand and released a holographic image. It was the Super square under his feet. He extended his hand and pointed at two of the areas.

“I’m going to build a city Tower here, and the soul teleportation formation will be built in the center of the square, which will require a lot of equipment.

I’ll be in charge of the construction of loucheng, and I’ll have to trouble director Tang and the rest of you to inscribe and embed the soul transfer array.”

Tang Zhen turned his head and looked at the people around him after he finished speaking.

“Rest assured, Mr. Tang. We’ll definitely use the highest construction standards and the fastest speed to complete this work!”

Director Tang said loudly, and everyone else nodded in agreement.

When they saw Tang Zhen displaying such a shocking method, they were shocked, and at the same time, an attitude of not being willing to admit defeat was born within them.

Although they didn't have the mighty power to change the world, they still had something to be proud of. In their hearts, their lofty aspirations to conquer the heavens had never been diminished.

This was a valuable spiritual inheritance. When it was gathered together, its power could not be underestimated!

After the discussion, everyone took a military vehicle and quickly returned to the base in the desert.

At the same time, one order after another was issued, and rows of military vehicles rushed into the desert. Tens of thousands of talents from all fields were also transferred here.

The strength of an Alliance was completely displayed at this moment!

In less than two days, a bustling city appeared in the desert. They surrounded the Super square that appeared out of thin air and began construction work day and night.

According to the blueprint provided by Tang Zhen, the construction staff used high-tech equipment to quickly carve out countless runes in extremely precise proportions at the center of the Super square. Then, they filled it up with special materials.

During the construction process, the technical personnel didn't relax for a moment, causing the quality of the project to far exceed Tang Zhen's expectations.

In this way, the stability and efficiency of the soul transfer array would be greatly improved.

Tang Zhen could not help but sigh in his heart after checking it once.

Everything was afraid of comparison. The professional level of these construction workers was simply far beyond the indigenous people in the world of loucheng!

Although they were only ordinary people, they also had the ability to change the world!

After these professionals entered the world of loucheng, it would not take long for Holy Dragon City to undergo earth-shaking changes.

In addition to these construction workers, a large number of combat personnel and corresponding weapons were also transferred here.

The area within 100 kilometers of the desert was marked as a military restricted area, and no unrelated people were allowed to enter.

In addition to the security of the Super square, these combat personnel would also be responsible for clearing out any "monsters" that might appear when the building was built.

To prevent them from destroying the city!

While Tang Zhen and the others were busy with the construction of the soul transfer array, a large-scale selection of personnel was rapidly carried out in the sub-Alliance.

The people selected this time were all elites from all walks of life. After going through various tests and signing confidentiality agreements, they were continuously transferred to the desert hinterlands to begin the initial training.

During the training, they would be informed of information about the world of loucheng, and then undergo targeted training according to their respective specialties.

After the selected ones successfully entered the world of loucheng, Tang Zhen would bring all the relevant equipment and instruments.

The commotion caused by the Asian Alliance had already alerted the other superpowers in the original world, with the American Alliance being the most concerned.

As one of Tang Zhen's partners, the American Alliance had been paying attention to Tang Zhen's movements and was the first to know about the news of the desert city.

At this moment, dozens of spy satellites in the sky were constantly observing this place. A group of travel-worn American Special personnel had also arrived in the desert.

At this time, the American Alliance and the Asian Alliance were also partners. Neither of them had the initiative in the joint development of the world of loucheng, so they could only cooperate tacitly.

There was a large population in the original world, so it was impossible to build only one soul transfer array. In the future, there would be one in the United States 'ruling area, so the staff of the United States took this opportunity to learn.

Time passed by slowly, and a week had gone by. The soul transfer array was finally complete.

After Tang Zhen returned from the world of loucheng, he began to prepare for the construction of the loucheng in his original world.

In the past few days, Tang Zhen had gone around the Wildlands and challenged many wild buildings. At the same time, he had also obtained more than a dozen building cornerstones. Unfortunately, none of them were of the highest quality.

In fact, this situation was very normal. After all, a Supreme-grade cornerstone was not big white tea, which could be obtained at any time.

If one wanted to obtain a Supreme-grade foundation stone from the wild building, they would need extremely high luck. It would not be an exaggeration to say that the ratio was one in a thousand.

Didn't you see that when Tang Zhen built the tower, he only used an ordinary cornerstone?

Therefore, in the world of loucheng, the best way to obtain a Supreme-grade cornerstone was to snatch the cornerstones that had been washed out by the waves and had clear attributes.

The preciousness of a Supreme-grade cornerstone could be seen from this.

When the time was right, Tang Zhen would choose a Supreme-grade foundation stone and upgrade it to a certain level to replace the current main tower.

With the continuous development of Holy Dragon City, the mediocre cornerstone attributes of the main city Tower could no longer meet Tang Zhen's needs.

After careful calculation, the number of Supreme-grade foundation stones in Tang Zhen's hands was a total of five. They were absolutely priceless. Moreover, there was a price but no supply!

In addition to these five Supreme-grade cornerstones, the mother tree tower and the mage defense tower that had already been built were also built with Supreme-grade cornerstone.

Other things aside, with these seven Supreme-grade foundation stones alone, it would be unreasonable if Holy Dragon City was not powerful!

The cornerstone in Tang Zhen's hand was the one he had chosen after carefully selecting from the ordinary cornerstones.

Today was the day of the construction of the City Tower. Unrelated personnel had been evacuated hundreds of miles away to avoid any accidents during the construction.

3,000 fully armed soldiers, as well as a large number of aircraft and armored vehicles, had also been deployed. They surrounded the Super square. If a monster really appeared, they would immediately attack!

In the sky and on the ground, countless pairs of eyes were staring at this place, waiting for the moment the City Tower was built.

Tang Zhen stood silently in the Super square. Behind him were several hundred elite soldiers in full armor.

He raised his hand and released the altar. After placing the foundation stone on it, Tang Zhen casually threw in another level five brain Pearl.

As the brain Pearl was absorbed, the memory image from the tower's foundation stone was slowly transmitted into Tang Zhen's mind.

It was a completely unfamiliar world with countless strange creatures living around the building. They passed by and stayed temporarily, or died of old age and illness.

To Lou Cheng, they were just passersby!

After the memory image was transmitted, Tang Zhen had already finished constructing the exterior of the City Tower. He then chose to build it.

An incomparably magnificent dark golden building suddenly appeared before everyone's eyes, causing countless people to exclaim in surprise.

The city looked like an ancient building in the Asian Alliance. It was fifty meters tall and made of an unknown metal. It was magnificent.

Under the sunlight, the City Tower that stood in the desert seemed to be shining and full of mystery.

By the time the city in front of them had officially taken shape and stood in front of everyone, the first city in the original world had also been officially completed!

Just as everyone was marveling at the magical aspect of this building, Tang Zhen had already switched to the map view and released his mental energy limitlessly.

After the buildings were completed, the next stage would be the monster siege. He wondered if there were similar monsters in the original world.

Chapter 483 The monster siege in the original world \_1

The vast and monotonous desert gave people the impression that it was desolate and uninhabited. After traveling for dozens of miles, there were almost no signs of life in sight.

The yellow sand rolled and devoured countless living beings. This was a forbidden zone for life!

However, after the construction of the City Tower, the lifeless desert began to stir up inexplicably.

A huge sand dune dozens of kilometers away from Lou Cheng suddenly began to shake. It was as if there was a huge creature below that was about to break through the yellow sand and rush out.

Shua shua shua!

A sound like the beating of a drum suddenly came from below the sand dune. It was deep and strange.

The sound lasted for more than ten seconds before the huge sand dune suddenly shook and exploded.

Countless black dots mixed in the yellow sand and fell to the ground one after another. Soon, the entire sand dune was covered.

At this moment, a huge black hole had appeared in the middle of the sand dune. Wisps of black smoke were drifting out of the cave.

Looking closely, countless black beetles the size of eggs were forming a Black "River" that was more than ten meters wide. They were rushing toward Lou Cheng.

The way these black beetles gathered and crawled together was like an orderly Army, without the slightest bit of chaos.

Even though the number was uncountable, not a single beetle ran around, which made people click their tongues in wonder.

As they crawled, they constantly made rustling sounds, as if countless people were shaking sand hammers at the same time, making people's skin go numb.

Under the sunlight, these black beetles reflected a strange light, and they were extremely eye-catching in the yellow sand.

He passed by the skeleton of an animal. The Black Beetle covered it, and a series of "ka Cha ka Cha" sounds came at the same time.

After the beetle disappeared, the remains were nowhere to be found.

At the same time as these black beetles appeared, hundreds of bulging marks suddenly appeared on a huge sand dune in another direction. They were about a meter wide and several meters long.

This was clearly a mark that would only appear when a huge creature was drilling under the yellow sand.

These unknown lifeforms were moving rapidly under the yellow sand, rushing towards the city!

From the occasional part of their body that was revealed, one could confirm that they were a strange creature similar to insects with extremely tough skin.

Further away from the building, a dried arm with a piece of cloth hanging on it suddenly stretched out from the dry yellow sand. Then, a dried corpse covered in purple plant root tumors crawled out of the sand.

Then the second, and the third, Wuwu.

More and more mummies with the same purple plant root tumors climbed out of the sand dunes, and the place where they climbed out faintly revealed a huge building buried in the desert.

Within a 100-kilometer radius, the strange creatures could be seen everywhere. They seemed to have gone crazy and were running in the direction of the building.

Among the waves of monsters, there were monsters from ancient legends and mysterious creatures that had never appeared before the eyes of the world.

The combatants who had been observing their surroundings were all stunned by the terrifying scene. They could not imagine that there would be so many strange creatures in the desert.

Many Warriors were so excited that their hands were trembling. This legendary experience was enough for them to remember for the rest of their lives. After all, this scene was too shocking!

However, even though they were shocked, when these monsters appeared, they did not hesitate to execute the attack order!

In the vast sea of sand, gunshots immediately rang out!

Three assault helicopters hovered in the air, skillfully locking onto the hundreds of sand Dragons on the ground. Large-caliber artillery bullets continuously shot into the soft yellow sand.

“Owwuuu!”

After a series of deep roars, the monster hidden in the yellow sand finally revealed its true appearance due to the pain.

It was a giant worm that looked like a giant python with dark purple tough skin. It was currently swaying its huge body and growling in the sea of sand.

The appearance of the giant insect was extremely ugly. Its huge mouth was surrounded by disgusting tentacles, and fine teeth covered the entire mouth of the strange insect.

The cannon bullets that were fired just now had cleanly broken the bodies of more than a dozen insect monsters. They dragged their broken bodies and kept writhing, their stinky body fluids flying everywhere.

The seemingly brutal monsters were still unable to withstand those terrifying weapons and were easily killed!

“Pfft!”

A few huge Sand Balls were spat out from the strange insect’s mouth, flying straight towards the assault helicopters in the sky.

One of the sand Balls happened to hit the military helicopter. The attacking helicopter suddenly trembled and almost fell from the sky.

&Nbsp; after realizing that these insect monsters had a strong attack power, the pilot of the assault Helicopter immediately increased the altitude. He constantly adjusted the angle and chased after the strange insect, bombarding it.

Within a few minutes, several more assault helicopters joined in the pursuit, and a dense rain of bullets fell into the desert.

It was only a matter of time before the powerful firepower and skillful cooperation killed these giant strange insects.

In another direction, dozens of strange-looking all-terrain vehicles were speeding through the desert, constantly killing the terrifying mummies that ran out of the desert Ruins!

These mummies with leather armor were actually just a carrier. The thing that controlled their movements was actually the purple root tumour plant on their bodies.

This was an extremely strange plant. It lived on corpses and could control the corpses to find the nutrients they needed for their growth.

The mummies did not react when the bullets hit them, but when they hit the purple root tumors, the mummies would shake violently and flow out with a foul liquid.

The mummies that felt their lives were in danger pounced on the all-terrain vehicles in an attempt to attack the soldiers on the vehicles.

The machine gunners on the all-terrain vehicle had serious expressions and were not afraid in the face of danger. They calmly controlled the weapons in their hands and continuously shot out scorching bullets, tearing the mummies into pieces.

In the rolling yellow sand, there were broken limbs wriggling everywhere, forming a bloody and strange road.

In the other direction, the black beetles that had formed a River were also suffering a fatal blow.

The two helicopters caught up to the black beetles and threw a dozen incendiary bombs at them, burning countless black beetles to ashes!

The black beetles that had been United were cut into several pieces. The black beetles that were not affected by the burning agent quickly dodged the terrifyingly high temperature flame and continued to pounce toward the Lou Cheng.

The damage of the incendiary rounds was greatly reduced against the scattered black beetles. However, in order to ensure that they did not get close to the building, the shooters on the plane continued to fire at them.

No one dared to underestimate the power of these black beetles. Just by looking at their terrifying mouthparts, one could imagine how miserable it would be if one was bitten. If they carried poison, it would be even more disastrous.

Everyone knew that if the infantry on the ground encountered these bugs, it would be a disaster.

Faced with the tide-like fearlessness of the black beetles, the surrounded infantrymen were basically doomed.

The more they killed, the less danger their comrades in charge of guarding the tower would be in.

In the desert, gunshots and monster howls could be heard everywhere. They even used tanks to attack when they were dealing with a few huge monsters!

None of the participants had expected that there would be so many strange and powerful creatures hidden in the silent desert!

Within a radius of a hundred miles, there were figures fighting fiercely everywhere. In the loucheng area, which was at the heart of the storm, there were endless gunshots and countless strange creatures coming over like a tide!

Chapter 484 The "difficult" battle to defend the city

The area where loucheng square was located was now filled with gunshots. On every wall, there were soldiers firing continuously.

In addition to the standard firearms, these soldiers were also equipped with special equipment such as grapeshot guns, grenade machine guns, and flamethrowers.

It was also because of these weapons that the monsters attacking the city were effectively suppressed!

The monsters outside the square came from afar. When they arrived, they gathered into a terrifying wave and attacked the high wall.

Their target was naturally the newly built city within the high walls!

Looking up, these monsters and venomous insects were of different styles and abilities, but whether it was lizards, spiders, or colorful snakes, they were all poisonous without exception!

Once bitten by these things, death was almost certain, and there was no time to rescue on the spot.

Fortunately, this point had been taken into consideration before the building was built. Insect-proof facilities were built around the wall, blocking a large number of clumsy monsters and poisonous insects.

The monsters and poisonous insects that could successfully cross several obstacles would be attacked from the sky and the ground!

The ground around the high wall had been overturned countless times by the bullets and the shock waves of the explosion. The ground was mixed with minced meat and blood, mixed with yellow sand, and had already become a stinky mud.

Even though the attacks were so concentrated, it was still difficult to stop those crazy monsters, because they were not afraid of death, because they had no intelligence.

Even though the corpses were stacked up layer by layer, and the stinky blood had already soaked the yellow sand, it still could not stop the monsters' attack.

The monsters and venomous insects let out shrill cries as they pounced on the high wall, launching attacks again and again.

If it wasn't for the high walls of the square, which effectively blocked these monsters and poisonous insects, perhaps the city would have been completely conquered by them!

In fact, the number of monsters and venomous insects in front of them was only one-third of the total number of monsters attacking the city. The remaining two-thirds were all held back by the other Warriors in the desert, and more than half of them had already been eliminated.

If these monsters and venomous insects gathered together, they would be able to break through the high wall and attack the main body of the building.

Fortunately, there was Tang Zhen here. This kind of thing would definitely not happen!

Compared to Tang Zhen's confidence, those soldiers who were in charge of blocking the monsters and poisonous insects were currently under an enormous mental pressure.

These soldiers had never seen such a strange scene before. If it wasn't for their mission and the constant encouragement from their comrades, some of them would have already had a mental breakdown.

Compared to these strange monsters and venomous insects, the cruel and cunning enemies that he had encountered on a daily basis were not as scary!

Tang Zhen looked at the soldiers' nervous and hesitant expressions and couldn't help but gently shake his head.

Compared to the soldiers of Loucheng who had seen countless cruel scenes, these well-trained soldiers were still lacking a little bit of training in life-and-death battles with monsters.

In fact, such a battle was not as terrible as they had imagined. The key was that they had never experienced it before, so they lacked the corresponding experience. Otherwise, they would not be so flustered, which led to constant danger.

Fortunately, these soldiers weren't fighting alone. Other than his comrades who were also attacking the monsters, Tang Zhen would also take action from time to time and clear some strange and powerful monsters.

It was said to be strange and powerful, but that was only in comparison to his original world.

According to the strength of the tower world, the strongest of these monsters were only ordinary monsters of level two or three.

Any warrior from Holy Dragon City could be easily dealt with!

If Tang Zhen was willing, he only needed one minute to crush all these monsters into powder!

However, he didn't do that. Instead, he let these Warriors attack. While training their minds, he also made the onlookers realize the cruel nature of the world of Loucheng.

On the surrounding walls, the battle was still ongoing, and the hot bullet shells had already filled the ground.

At this moment, a giant scorpion that was more than two meters long suddenly shot out of the yellow sand and jumped onto the wall like lightning.

A soldier who was reloading was caught off guard and was sent flying by the giant scorpion. He fell on the square behind him.

"Bang!"

The warrior fell to the ground, blood spurting out of his mouth and nose. He then struggled to get up.

A huge black shadow descended from the sky and landed directly beside the warrior. It was the giant scorpion that had jumped over the wall.

After discovering the warrior lying on the ground, the giant scorpion immediately crawled over and waved its huge stinger, ruthlessly stabbing it into the warrior's abdomen.

Once this huge stinger pierced through the soldier, he would die without a doubt!

"Whoosh!"

The huge scorpion tail whizzed over with a foul smell, and it was only an inch away from the warrior's abdomen.

Just when everyone thought that the warrior was dead for sure, the giant scorpion suddenly trembled and froze on the spot. Then, it fell to the ground.

A stone the size of a coin had completely pierced through the giant scorpion from head to tail. The huge kinetic energy had also stirred its internal organs into a paste!

&Nbsp; the fallen warrior was stunned and at a loss for what to do. Suddenly, a calm voice rang in his ear.

"Don't worry, it's already dead!"

The warrior looked toward the source of the voice and saw a young man in a black battle suit looking at him with a smile.

"I know. Xie Wanwan, thank you!"

The warrior knew that this young man was not a simple person, but he did not know how he had managed to kill this terrifying giant poisonous Scorpion.

Just as the warrior was secretly guessing, he heard Tang Zhen softly sigh, it's enough to reach this level. Those guys who are watching the show must have understood the cruelty of the world of loucheng.

since that's the case, this boring battle should be over!

His voice had just sounded when he saw Tang Zhen slowly rise from his original spot. After reaching a height of tens of meters, he suddenly shouted out in front of everyone's shocked gazes!

An invisible air current suddenly spread out in all directions with his body as the center.

“Bang Bang Bang!”

The sound of a ripe watermelon being smashed rang out in the surroundings like hail.

The monsters that were attacking the tower exploded instantly, and blood mist spread everywhere.

After the blood mist dissipated, the surrounding desert had been completely dyed bright red. It was a shocking sight.

The yellow sand had long since disappeared, and what replaced it was countless fine pieces of flesh and blood, which completely covered the surface of the desert evenly.

The strange noise instantly disappeared, and the continuous shooting and explosions also slowly stopped.

When the soldiers on the surrounding walls saw this scene, they all heaved a sigh of relief and turned to look at the god-like man floating in the air.

To be able to take care of the monsters attacking the city so easily, these terrifying monsters must not be worth mentioning in his eyes.

The soldiers had guessed correctly. A siege battle of this scale was indeed like child's play to the current Tang Zhen!

Chapter 485 Connecting to the world of loucheng (1!

After another half an hour, the sounds of gunfire in the desert finally died down.

In fact, when Tang Zhen killed the monsters and poisonous insects around the building in one move, the monster siege battle that happened in the original world had already ended.

When the monsters attacked the city, they did not have to kill until there was only one monster left. As long as they could do two things, they would have successfully defended the city.

The first was to kill more than one-third of the monsters. This way, the monsters would break free from the control and collapse on their own.

The second was to last long enough to fight the monster. Either way, it would be considered a victory!

Although the siege battle had ended and the monsters had started to flee, the Warriors in charge of stopping them had no intention of stopping.

According to the orders from above, these dangerous and strange creatures must be exterminated!

With the existence of such a thing, no one would be at ease, so they naturally had to take the opportunity to eliminate it.

It was another round of merciless attacks. How could those monsters and poisonous insects be a match for these terrifying weapons? they were killed in an instant.

The remaining time was just to chase after those fish that escaped the net.

The battle was over, but neither the participants nor the observers hiding in the safe zone were relaxed.

These shocking monsters had a huge impact on them, and it also made them feel a little confused.

There were actually so many mysterious creatures hidden in this seemingly desolate desert. Could there be similar creatures lurking around their daily lives?

At the thought of this, everyone's hearts beat wildly, and they couldn't help but feel a strong sense of danger.

It was normal to have such thoughts, but the truth was that they were overthinking it.

If not for Lou Cheng's appearance, these strange creatures would not have appeared in the eyes of ordinary people so easily. Even after hundreds or thousands of years, they would still be safe.

Everyone in the world knew that bacteria and microorganisms were everywhere, and they were always in contact with them in daily life, but no one could remember them all day long and delude themselves to avoid them.

No matter what you think, it's there, and it has existed for a longer time than you!

It was the same for these strange monsters and poisonous insects. They lived in the same world as humans, but they did not offend each other, so they had never been known to the world.

However, if a hothead accidentally entered their territory, they could only blame their bad luck.

Strictly speaking, these monsters and venomous insects were also victims. If Lou Cheng hadn't appeared, their peaceful lives wouldn't have been disturbed, and they wouldn't have suffered such a disaster!

No matter what, everything was over. There were still many things to do.

Now that the tower was officially established, it had formed a faint connection with the world of the tower. Later, he only needed to place the unconscious Zhao Dabao in the soul transfer array, and he could use the faint connection between his soul and body to lock onto the coordinates of the world of the tower.

After Tang Zhen entered the newly built tower and walked around, he was rather surprised to discover that the cornerstone trading platform here actually had no reaction!

Perhaps any tower built outside the tower world couldn't use the cornerstone trading platform?

Tang Zhen did not get too entangled with this matter. Instead, he gently sighed in relief.

He originally had another plan, which was to find a way to destroy the cornerstone platform in the tower even if it was operating normally.

It would be extremely disadvantageous for Tang Zhen if this kind of thing fell into the hands of others. He had no choice but to be on guard.

From the beginning to the end, he was the only special existence that could freely travel between the two worlds. No one or thing could replace him.

The cornerstone platform was a key item to break this balance. If it could be used normally, both the Asian Alliance and the American Alliance could use it to its maximum value and exchange it for countless Otherworld items.

In this case, Tang Zhen's importance would definitely be greatly reduced.

The so-called cooperation was nothing more than making use of each other and obtaining benefits together. Tang Zhen held the key to the cooperation. This was why he was able to obtain the full support of his partners.

Tang Zhen casually kept the foundation stone platform into his storage space and slowly walked out of the tower.

The clean-up work was coming to an end. The corpses of the monsters and poisonous insects had all been collected. Whether they were buried or used for research had nothing to do with Tang Zhen.

At this moment, the area around the teleportation array was already filled with specially modified vehicles. Countless instruments and equipment were also properly placed.

In the center of the teleportation array, five pieces of special large equipment had been installed.

These items, which looked like hibernation chambers, were also part of the teleportation array. They were equivalent to game helmets with infinitely increased transmission power.

The person who needed to carry out the soul transfer only needed to lie in it to directly send their soul to the Holy Dragon City in the tower world!

At that moment, the unconscious Zhao Dabao was lying quietly in one of the metal containers. The equipment beside him was also working continuously, recording all sorts of data.

Other than the researchers, there was also a group of serious-looking officials who were discussing something in low voices.

After seeing Tang Zhen walk over, those people immediately stopped their conversation and all looked at him without blinking.

Director Tang walked up to Zhen Tang and said with a smile, "You've worked hard, Mr. Tang. If you didn't act in time just now, I'm afraid many soldiers would have been sacrificed."

“Director Tang, what are you talking about? I just did it casually.”

Tang Zhen shook his head. After exchanging a few polite words, he turned around and walked to the center of the soul transfer array.

Under everyone’s gaze, Tang Zhen took a deep breath and began to chant an incantation with a strange tone.

His voice was sometimes high and sometimes low, and his tone was also fluctuating. When it fell into everyone’s ears, it was filled with a strange and mysterious feeling.

After chanting for about a minute, Tang Zhen suddenly let out a loud shout. At the same time, his mental energy spread out, stirring up ripples in the air.

The silent soul teleportation circle was completely activated at this moment. The brain beads embedded in the runic magic circle all bloomed with bright light.

In the middle of these glowing brain beads, one with a resplendent ring of light around it was extremely eye-catching.

The experienced cultivators of loucheng only needed a glance to confirm that this was a genuine level-eight brain bead, which was absolutely priceless!

Unlike the other brains that continued to glow, the brain in the center of this unique runic magic circle was flashing continuously at varying frequencies.

Tang Zhen’s eyes landed on the head. Although his expression was calm, his eyes were extremely focused.

When those people at the side saw Tang Zhen staring fixedly at the flickering brain Pearl, their gazes also landed on it in unison. The originally noisy environment also gradually became quiet.

Some of them even held their breaths and slowed down, afraid of ruining the peaceful atmosphere.

Not far from Tang Zhen, a few medical personnel were staring intently at Zhao Dabao. They were afraid that something abnormal would happen to him during this period of time. After all, he was the key to this operation.

Not only were the medical staff paying attention to him, but even Tang Zhen had also split a trace of mental power to pay attention to Zhao Dabao’s physical condition.

Once this fellow showed any abnormal reaction, Tang Zhen would definitely use a special method to instantly overdraw his life force and ensure that he would complete the positioning.

As for this ordinary-looking body, it was no big deal to throw it away. After all, Tang Zhen had already compensated him with a perfect body. This fellow was extremely happy!

Time slowly passed in this slightly oppressive atmosphere. After about five minutes, the constantly flashing brain finally had new changes.

The frequency of its flashing became slower and slower, and the light it emitted became brighter and brighter. Finally, everyone saw a dazzling white light burst out, and the entire soul teleportation array began to emit an irritating buzzing sound.

When the light dissipated, the strange sound disappeared as well. The brain Pearl on the soul transfer array also became dim.

The surrounding onlookers did not know what was going on. Only Tang Zhen faintly smiled as a trace of joy flashed across his eyes.

the coordinates of the world of loucheng have been successfully locked!

Chapter 486 The difficult problem of cultivating I body

“You succeeded?”

When Tang Zhen’s words left his mouth, the surrounding people were initially stunned for a few seconds. Soon after, they immediately erupted into excited roars.

The cheers reverberated in the Super square, and the excitement infected everyone present!

Even director Tang, who was a steady man, couldn’t suppress his joy. He kept waving his fists to vent the excitement in his heart.

They couldn’t help but be excited because this matter was of great significance and would definitely be recorded in history!

The staff members who participated in this top-secret operation all knew more or less about the world of loucheng. They were full of curiosity and anticipation about this mysterious foreign world.

In the vast universe, there was actually such a magical world. How could people not be fascinated?

As the pioneers of human exploration of the other world, they all felt an indescribable sense of accomplishment to be able to participate in this matter!

Moreover, some of them would be the first batch of transmigrators to work in the world of loucheng.

For a long time in the future, they would be in charge of the Holy Dragon city’s soul teleportation array’s maintenance.

After waiting for so long, this moment had finally arrived. How could they not be excited?

At this moment, the medical staff had already come forward and carried the unconscious Zhao Dabao out of the teleportation pod. Then, they sent him to the nearby hospital to maintain his life.

He was currently in a vegetative state. When his soul returned to his body, he would still be able to wake up normally.

However, this method was not cost-effective. It was not a big deal if there were only a few cases, but if it was to take care of thousands of bodies of transmigrators, it would inevitably consume a lot of manpower and material resources.

Moreover, if the body was not used for a long time, all kinds of physical functions would seriously degenerate and shrink, and it would take a long time to recover.

At this moment, he had to make a choice. Was there a need to preserve the body left behind by the transmigrator?

The workers who had gone to the world of the tower might not stay there forever and could return at any time. What would they do if their bodies disappeared?

In the later stages, the original world would have a large number of immigrants, and the number would definitely be in the thousands. At that time, how would they deal with the countless bodies left behind?

In fact, they had already considered this situation. After Tang Zhen and the others discussed it, they also formulated the corresponding countermeasures.

The bodies of the staff members had to be properly preserved so that they could travel between the two worlds at any time.

Other than these military personnel, they would also recruit a large number of people from various industries. They would sign a contract and willingly give up their bodies to stay in the world of loucheng for a long time.

In the years to come, they would not leave the world of loucheng unless they had special reasons.

After the information of the world of the loucheng was officially announced, the officials would also open immigration applications, allowing applicants who voluntarily gave up their bodies to go to the World of the loucheng.

These humans from the original world would be the main source of residents for Holy Dragon City in the future!

Other than that, the original world's residents who were unwilling to leave their original world but yearned for the tower world would all be used.

When all the basic facilities in the world of loucheng were completed and the number of bodies cultivated was enough, a large number of places would be given out in the original world, allowing the humans of the original world to connect to the world of loucheng through special equipment and enter the spare bodies.

These people were similar to game players. They could rent a temporary body for a small fee and participate in the exploration and war of the dungeon World.

The gains during this period would naturally belong to them. If they wanted to exchange them for cash in the original world, it would not be a problem.

The world of loucheng would become a new gold-making place for the residents of the original world!

In addition, they could also participate in the work of the Holy Dragon City and earn a certain amount of money, becoming similar to mercenaries.

The advantage of these temporary residents was that they did not have to worry about the threat of death at all. Once their bodies in the world of towers died, their souls would be instantly absorbed by the soul teleportation array and sent back to their original bodies.

There was no need to compensate for the first damaged body, but if one wanted to continue to enter the world of the tower, they would have to pay a fee for the repair of the body according to the degree of damage.

The most important thing here was how to ensure that there was sufficient supply to the body. If this problem could not be solved, everything would be empty talk!

Apart from this, Tang Zhen would also leave hidden restrictions in these bodies to guard against those who had ulterior motives.

Tang Zhen had already prepared the required bodies for the initial stage. Currently, the Holy Dragon City had accumulated more than ten thousand of those bodies that were cultivated using the fruit of the mother tree!

After these fruits were picked, there was no need to worry about the problem of decay. Therefore, every time a batch ripened, they would be picked and stored in the cave.

These were all perfect bodies and were considered the mother tree's children. They had a special connection with the mother tree.

He believed that the mother tree cultivators would be more common in this group than the Holy Dragon city's indigenous people!

It was also for this reason that the mother tree would cooperate with Tang Zhen's cultivation work. This was also her own consideration.

The mother tree's combat power was negligible, and only a sufficient number of mother tree cultivators could ensure her safety.

Otherwise, the mother tree would not have let Tang Zhen succeed so easily just based on the energy consumption when cultivating the body!

At present, these perfect bodies were barely enough, but as more and more residents of the original world entered the world of loucheng, the problem of not having enough bodies would inevitably become the biggest constraint.

Fortunately, the Asian and American alliances had begun to work together to overcome this problem in order to cultivate bodies in batches.

After the research was successful, the equipment would be mass-produced and installed in both worlds at the same time.

Tang Zhen was also thinking about this problem. At present, he already had several backup plans.

His first thought was to use the ice Imp alien race's method of creation in the Cold Moon Tower. This was an extremely perfect body, and it was born with extremely powerful strength.

However, this kind of body also had a natural disadvantage, and that was that it could only survive in low temperature environments. Once the temperature exceeded this temperature, the combat power would be greatly reduced, and it might even directly die!

Therefore, it was not suitable to mass-produce the ice Imps before this problem was solved. However, they could learn from the manufacturing method.

The second method was very simple, which was to seek help from the application store.

This magical application store had never disappointed him. Tang Zhen had already found a suitable application.

In fact, Tang Zhen had long noticed a problem. That was, with the continuous upgrading of the phone, the magical applications in the application store were almost all-encompassing.

Tang Zhen knew the abilities of these applications better than anyone else. It was also for this reason that he was extremely curious about the origin of the application store.

It was a pity that Tang Zhen's strength and knowledge were still too low. The secrets of this heaven-defying ability of the application store were not something that the current Tang Zhen could explore!

For example, the application that Tang Zhen needed now had extremely magical functions. It even had the ability to create things!

super biological printer. Able to absorb and decompose the remains of living creatures. Based on the scan data that was previously entered, it can either print and construct any soulless half-mechanical biological body individually or in batches. Download cost: 100 million brain beads!

[ note: you can purchase the raw materials for printing. The higher the strength and talent of the half-mechanical creature's body, the longer the printing time, the higher the fee! ]

This was definitely the most suitable application for Tang Zhen at the moment. Even if the download price was extremely high, it was definitely worth it!

Although this application was very much to Tang Zhen's liking, if he wanted to download it, he had to get rid of the download restrictions.

This was also one of the few things that made Tang Zhen feel depressed. As the App Store continued to upgrade, more magical applications continued to appear, but the corresponding restrictions also followed.

For example, Tang Zhen had already lost the privileges and protection of a newbie and had officially stepped into an unknown journey.

If you want something good, sure, we have everything here, but you have to complete the mission first!

Chapter 487 The teleportation test begins \_1

Although the mobile application was good, it was not an easy task to download and install.

Tang Zhen didn't lack brain beads. Even if it was an astronomical figure of 100 million brain beads, he could take it out without any effort.

This time, Tang Zhen was definitely the biggest winner in the Cold Moon disaster. The value of all his gains added up would definitely be enough to scare the people who knew about it!

Even Tang Zhen himself was shocked by the results.

Therefore, the current Tang Zhen was already a true nouveau riche. He didn't lack money!

However, the brain was not enough. He still needed something that he had never heard of before in order to download the application.

“Energy heart!”

It was this damn thing that limited Tang Zhen's application download, causing him to have a large pile of brain matter but was unable to spend it.

This feeling of being depressed and having nowhere to vent, just how F \* cked up was this!

Therefore, in order to find this damn energy heart, Tang Zhen didn't need to test mobile applications at all, because it was a waste of time.

Putting this matter aside for the time being, what Tang Zhen needed to do now was to immediately conduct the soul transfer experiment!

In fact, the moment Tang Zhen announced the success of the experiment, the five volunteers who volunteered to participate in the first Soul transmission experiment had already taken a helicopter to the place.

In just over ten minutes, the five volunteers had arrived at their destination, where the soul transmission array was located.

Tang Zhen took a look. There were five volunteers, three men and two women. All of them were young people in their twenties, and their faces were solemn.

Director Tang introduced them to Zhen Tang. They were all active-duty soldiers of the Asian Alliance. They had a good style and were full of dedication.

Tang Zhen had always admired such soldiers who carried firm beliefs.

Tang Zhen clearly knew in his heart that this Soul transmission process was very safe and would not cause any fatal harm to the transmigrators.

However, it was always better to be safe than sorry. If there was any mistake in the middle of the experiment, the volunteers participating in the experiment might lose their lives.

To be able to step forward in such a situation, one must have a certain amount of courage. This alone was worthy of admiration.

After the volunteers arrived at the experiment site, the soul transfer experiment immediately began.

The five volunteers lay down in the transmission cabin according to the staff's arrangement and slowly closed their eyes.

“Activate the teleportation!”

As he gave the order, the soul transfer array suddenly bloomed with a brilliant and colorful light.

A huge runic magic circle made up of seven-colored light appeared out of thin air a hundred meters above everyone's head, constantly condensing and spinning.

This was not as large as the giant translucent runic magic circle, and was comparable to the Super square under everyone's feet!

The level-eight brain located in the center of the soul teleportation array on the ground flickered quickly. Then, a strong light shot into the sky and hit the center of the runic magic array.

The runic magic circle formed by the light shook violently, and a deep black hole immediately appeared in the center. It sucked in the strong light and then slowly rotated.

As long as the soul teleportation circle was not shut down, the giant runic magic circle that was floating in the sky and the deep black hole would not disappear.

The process of activating the soul transfer array was very troublesome, so once it was activated, it could not be closed easily.

In other words, for a long time to come, this huge rune would shroud the sky above the Super square and gradually become known to the world.

To Tang Zhen, these were trivial matters. Naturally, the military of the Asian Alliance would take care of the aftermath. He didn't need to worry at all.

The thing that Tang Zhen was most concerned about now was whether these five volunteers had successfully completed their transmigration and entered the bodies in the Lou Cheng world.

Under everyone's gazes, Tang Zhen's figure suddenly disappeared and was transported back to the tower world.

Loucheng world, Holy Dragon city's back Valley.

At this time, all unrelated people had been cleared out of the square in the back Valley. Nearly a hundred fully armed Holy Dragon City cultivators had formed a circle, completely surrounding the huge soul receiving rune array.

Not far away, Zhao Dabao, Yue lang, and the others stood quietly to the side. They looked at the runic magic circle in front of them with different expressions.

Tang Zhen's figure appeared out of thin air. Everyone was stunned for a moment before they hurriedly bowed and greeted him.

Tang Zhen gently waved his hand and indicated that everyone could dispense with the formalities. After which, he swiftly walked toward the middle of the square.

In the center of this giant magic circle, there were hundreds of rectangular pools of the same size. In ten of these pools, there was a perfect body cultivated by the mother tree.

They were soaked in a green liquid extracted from the fruit of the mother tree. Because of the magical effect of the liquid, these bodies were not damaged even after being soaked for months.

Tang Zhen stood with his hands behind his back. He raised his head and looked at the enormous symbol that was continuously rotating in the sky. He began to wait meticulously.

Time passed slowly, and after about five minutes, a sudden change occurred!

The huge rune that was suspended in the air suddenly lit up, and then a white light fell down heavily, disappearing in the center of the runic magic circle!

A trace of a smile gradually surfaced on Tang Zhen's originally silent face. Soon after, he could not help but burst out laughing.

He laughed very happily, very presumptuously, and there was a faint feeling of relief contained in it.

Amidst Tang Zhen's happy laughter, the pool on the opposite side slightly trembled. Soon after, five naked men and women slowly stood up from the pool.

No matter which angle one looked at it from, these five bodies were perfect and flawless, like a piece of art. People who saw them could only sigh in admiration, but it was difficult to have any thoughts of blasphemy.

To the proud mother tree, she would never allow any ordinary-looking people to appear in the bodies she cultivated. Therefore, all of them were handsome men and beautiful women!

There was also a flaw, and that was that the appearance was the same, and it would not change because of the soul that hosted it. After looking at it for a long time, it was inevitable that one would develop aesthetic fatigue.

In the future, he might be able to solve this problem. He might even be able to make a small profit by changing his appearance!

Of course, these were not the key points. The most important point was that the soul teleportation experiment had truly succeeded.

At this moment, the five volunteers had a blank look in their eyes. They kept looking at their surroundings, but they quickly returned to normal.

They looked at each other. Their faces were filled with excitement as they looked at Tang Zhen who was standing in front of them.

"Greetings to the city Lord!"

The five of them saluted at the same time, their movements standard and neat.

This was also one of the requirements of the training, which was not to reveal their origin easily before the time was right to avoid unnecessary trouble.

Although the Aborigines in the world of Loucheng were very tolerant, they would more or less be wary of a group of visitors from another world who suddenly appeared around them.

Tang Zhen didn't want to see such a thing happen. Therefore, after some discussion, he decided to let the transmigrators address themselves as the residents of the tower. Everyone had to address Tang Zhen as Lord city Lord.

Tang Zhen swept his gaze over the naked volunteers. He casually waved his hand and five long robes streaked across the air before landing in their hands.

After receiving the long robes, the five of them put them on and walked in front of Tang Zhen.

Tang Zhen smiled as he looked at the five volunteers standing in front of him. He softly said, welcome to the world of loucheng. As pioneers, your names will be recorded in the history books!

The five of them chuckled upon hearing this, their faces revealing a trace of uncontrollable excitement.

After gently nodding his head and expressing his respect, Tang Zhen continued, from now on, all of you will have to wear these devices at all times to record all the data of your body!

While he was speaking, Tang Zhen casually threw out five items that looked like bracelets and a video recording device that he wore on his head.

These instruments would record all the changes in their bodies and Tang Zhen would then send them to the original world for analysis to determine if they were in a normal state before and after transmigrating.

This data was very important and concerned the safety of countless transmigrators in the future, so he could not be careless.

At the same time, Tang Zhen would also monitor them the entire time. Compared to those sophisticated instruments, Tang Zhen trusted his own spiritual energy senses more.

In the face of this kind of spiritual force probing, even if there was a problem with the souls of the five volunteers, Tang Zhen would be able to discover it at the first possible moment and adopt the corresponding solution.

The five volunteers followed Tang Zhen's instructions and put on all the equipment. Tang Zhen then led them out of the square.

The warm sunlight shone on the five of them, making their mood particularly bright.

Perhaps from this day on, the humans of the original world would officially start the prelude to conquering the loucheng world.

Chapter 488 Zhao Dabao wants to stand out!

As a transmigrator, Zhao Dabao was actually very aggrieved.

After this period of observation and experiments, he found that he was actually very ordinary. He did not have any transmigration benefits that he was proud of.

The only thing that comforted him was that this perfect body where the soul resided was the best in both appearance and cultivation aptitude.

However, in the Holy Dragon City, where Level 4s were as common as dogs and Level 5s were everywhere, he did not even have a level 1 cultivation.

No matter how good his aptitude was, who knew when he would be able to cultivate to level four or five? what should he do before that?

The more he thought about it, the more miserable he felt. He had really embarrassed the vast number of transmigrators.

The depressed Zhao Dabao began to stroll around the Holy Dragon City to ease his gloomy mood.

In two days, this guy had walked around the Holy Dragon City, both inside and outside.

Because of his body's talent, Zhao Dabao could easily understand the language of the building world and communicate normally.

During this period of time, he was amazed by the new scenery in the world of loucheng and the various alien races.

However, once the novelty wore off, Zhao Dabao began to think about life and how he could make a name for himself in this world!

In his original world, Zhao Dabao was just an ordinary person. He lived a simple life every day, dull and boring.

After rolling around in the mortal world and society, Zhao Dabao was used to his ordinary life.

However, when an ordinary person encountered an extraordinary event, their ordinary heart would immediately start to want to change their ordinary life!

Damn, it felt like a tongue twister.

To sum it up, Zhao Dabao came to the world of loucheng by accident. This magical experience that was like a rebirth made him extremely excited. At the same time, he secretly told himself that he definitely could not live the life he had before.

He wanted to work hard and start a new life in the world of loucheng, creating his own career!

A man can not stand without ambition. Many people were mediocre not because they lacked ability, but because they did not know what they wanted to do and did not have a clear goal.

In the blink of an eye, many years had passed, and in the end, he had achieved nothing.

Thinking back, if he had set a few goals during this period and worked hard towards them, he might have really achieved them!

What followed was a life that became more and more perfect.

Without dreams, what was the difference between him and a salted fish?

Zhao Dabao had once been a salted fish, but now he had a dream. He had become a salted fish with a dream!

He wanted to enter the waves of life and try to turn over a new leaf, or even leap over a Dragon's Gate.

Thus, this salted fish with dreams began to wander around the Holy Dragon City, trying to find an opportunity to make a comeback.

Tang Zhen did not have too many restrictions on this fellow who was wandering around. After all, this fellow would not be able to return to his original world for a long time.

Letting him roam around freely was also a form of compensation for Zhao Dabao.

It was just that the dream was full, but the reality was very bony. When he reached out and touched it, he realized that there was only a thin layer of dead skin outside the skeleton that supported the dream.

With a poke, a big hole appeared on the dead skin called dream, and the heroic spirit was gone.

Zhao Dabao was in such a situation, or perhaps even worse.

In fact, this was normal. After all, this guy had just arrived. How could he find the starting point of his glorious life so quickly?

Because of Tang Zhen, the methods used to make money in the original world had no market in Holy Dragon City. This was because these were all things that Tang Zhen had left behind.

They were born from the same root, so why were they in a hurry to torture each other?

Zhao Dabao, who was filled with resentment, depressed, and bored, decided to find a quiet place to sit down and reflect on his ordinary and failed life.

After walking around, Zhao Dabao unknowingly arrived at a building on the mountain peak. In the end, he sat down in a small ravine.

This place was very good, desolate and secluded. If she cried here, no one would be able to see Yingying.

It was said that a man's tears did not fall easily, but Zhao Dabao was an ordinary person after all. His heart was far from that tough.

After experiencing the excitement of his soul transmigrating and feeling that he was all alone, he couldn't help but burst into tears and began to cry.

He recalled the experience of being beaten up for wetting his bed when he was young, the sadness of being rejected after confessing to his first love, and the embarrassment of being ignored at a class reunion.

For some reason, Zhao Dabao's mind was filled with painful memories. He suddenly realized that he had failed miserably, which made him cry even harder.

The seven-foot tall man was crying and rolling on the ground. Anyone who heard it would be sad, and those who saw it would shed tears.

After crying his heart out, Zhao Dabao started to smash things to vent his anger. He smashed everything he touched.

It was just that the top of the wild buildings on the mountain peaks that had been bombarded by bombs could be said to be bare. Other than all kinds of wreckage, there were stones everywhere.

He grabbed a rock and threw it at another big rock to vent his anger.

“Crack!”

After a crisp sound, the stone that Zhao Dabao had casually thrown out shattered into pieces, scattering everywhere.

At that moment, a lustrous light suddenly appeared in Zhao Dabao’s field of vision.

When Zhao Dabao, whose face was covered in snot and tears, saw the light, he was stunned on the spot. A look of surprise flashed in his eyes.

Zhao Dabao walked over to the broken rocks and picked up one of them. He discovered that there was a fine jade hidden within the ugly rock!

Different from the original world, in the world of loucheng, the value of gemstones and Jade was extremely low. No one would care about these colorful stones.

However, this suet-like seven-colored jade was different. It was produced in the mountains and wild buildings, and belonged to another unknown world.

The powerful Jade talismans in the wild house in the mountain peak that could instantly kill Lord-tier monsters were made from this kind of Jade.

In addition to making Jade talismans, this kind of jade stone also had a special function. When worn, it could effectively help cultivators recover their energy and speed up their cultivation progress.

The purer the Jade was, the more obvious the effect would be!

When cultivators accidentally discovered the function of this Jade, the price of the Jade products and fragments from the wild buildings in the mountains immediately rose. Once they were sold, countless people would fight to buy them.

Everyone knew that the rarer something was, the more expensive it would be. Therefore, this kind of Jade with magical functions immediately became in high demand!

Unfortunately, there was a limited amount of this Jade. Many people wanted to get one and wear it on their bodies, but they were quite depressed to find that even if they had money, they might not be able to buy one.

Many people went to the ruins of the wild buildings in the mountains to find this kind of Jade fragments, trying to take the opportunity to make a fortune. However, this kind of Jade was not easy to find, and basically everyone returned in disappointment.

The reason for this was that the Jade stone had a special function, which was to block the perception of a cultivator’s spiritual power.

Even if the Jade was buried under your feet, you wouldn’t be able to find it with your spiritual power unless you dug it out with your own hands.

Zhao Dabao had inadvertently heard these rumors when he followed yuelang to the commercial district. He had also seen the Jade with his own eyes.

The unique aura left a deep impression on Zhao Dabao. It was as if his entire soul was immersed in warm water, and he felt extremely comfortable.

The stone in front of him was exuding the same aura, but because of the inferior material, it was not particularly obvious.

Zhao Dabao stood there in a daze, staring at the stone in his hand. In the silence, his eyes began to shine brighter and brighter.

His body began to tremble slightly, because a plan to make a fortune had vaguely appeared in his mind.

This kind of Jade was very valuable in itself. If he used a special method to sell it, he would definitely gain more benefits.

Zhao Dabao was very confident in this because there were similar examples in his original world. They earned a lot of money and supported countless people in the industry.

If this plan could succeed, then his life would immediately become exciting.

Chapter 489 The development of the interdimensional passageway \_1

Zhao Dabao held the broken stone in his hand and thought for a long time. Then, he decided to take action.

Regardless of whether he succeeded or not, he had to try it out!

After carefully observing the stone in his hand for a long time, Zhao Dabao began to rummage around for similar stones. It didn't take long for him to collect a large pile.

Squatting down, Zhao Dabao smashed the rocks one by one and carefully observed the situation.

After the final statistics, he found that the probability of Jade appearing in these stones was not very high, and the quality of the Jade was also uneven. There had never been a piece of top-grade Jade that was used to make Jade talismans.

Even so, Zhao Dabao wasn't dejected at all. In fact, he was extremely happy.

Although the quality of these jades was not good, and their effects were not as obvious as Supreme-grade Jade, there would still be people fighting to buy them.

If it was all that kind of top-grade Jade, he'd better give up as soon as possible and do what he needed to do, because he wouldn't have a chance to make such a money-making deal.

On the contrary, this kind of mixed raw jade was more suitable for him to manage and plan.

After he had an idea, Zhao Dabao immediately dug a hole and buried the crushed stones, then quickly returned to the Holy Dragon City.

He needed to find Tang Zhen and discuss a business deal with him.

Although he had just arrived in the world of loucheng, Zhao Dabao had already figured out one thing. That was, the Holy Dragon City had absolute control over every blade of grass and tree within hundreds of kilometers.

This was the standard of the world of loucheng. The strong were respected. If one's fist was strong enough, then even if one treated the entire continent as his backyard, no one would dare to jump out and oppose him.

The Holy Dragon city's fist was very hard right now, and not many buildings around them dared to go against it!

What Zhao Dabao wanted to do would definitely involve great benefits. Without the permission of the Holy Dragon City, Zhao Dabao would not have a good ending!

However, Zhao Dabao wasn't sure if this would succeed. He didn't know if the Holy Dragon City Lord, who seemed very kind, would agree to his request.

After all, what he was doing now was to fight for profit with him. The mountain and the wild building that produced Jade could be considered the Holy Dragon city's territory.

However, this matter could not be delayed. At this time, there were many Holy Dragon City residents and Wanderers gathering all kinds of resources on the wild buildings on the mountain. They might discover the secret of these stones at any time.

If he was discovered by others, then the wealth would have nothing to do with Zhao Dabao. Therefore, the opportunity was already in front of him. Whether he could grab it or not was up to Zhao Dabao.

Zhao Dabao entered the inner city with an excited and nervous mood. After reporting, he saw Tang Zhen, who had just walked out of the underground city.

.....

At the entrance of the Holy Dragon city's underground city, groups of cultivators and residents could be seen from time to time, constantly entering and leaving.

A few days ago, when Tang Zhen was preparing to take some time to explore the remaining two interdimensional passages, he discovered something that made him feel quite surprised.

The interdimensional passage, which had originally been unhindered for him, was now impossible to pass through!

As long as Tang Zhen tried to step into it, the tunnel would produce an extremely terrifying repulsive force that would push him out of the tunnel.

After trying more than a dozen times, the result was the same, even if they changed the channel.

Tang Zhen had a feeling that this interdimensional passage seemed to be able to detect one's cultivation. This was why it refused to let him enter, preventing him from destroying the balance of the ruined world.

2-star Lord-tier monsters were the rulers of the ruins world. They ruled over countless monsters and were extremely powerful.

However, to the current Tang Zhen, he was an ant that he could casually kill in an instant.

It was also because of this reason that Tang Zhen would be rejected outside the door!

Tang Zhen was helpless in this matter. He could only send ten Overlord-grade cultivators who had signed a soul contract to enter the remaining two interdimensional passages to carry out exploration and investigation.

When the idle fatty heard about this, he also followed in with great interest.

A three-star horde leader Holy master and ten horde leader level cultivators were more than enough to protect themselves, even if they couldn't sweep the ruins world.

Once the exploration of the remaining two interdimensional passages was completed, the Holy Dragon city's cultivators would be able to March straight in and let those foreign cultivators experience the Holy Dragon city's power!

Tang Zhen placed great importance on these five interdimensional passages. Therefore, he organized a large number of manpower to explore them. In terms of weapons and equipment, he would satisfy all requests.

Because of their excellent equipment and strong security, the Holy Dragon city's exploration team was completely able to protect themselves in these junkyard worlds. They even went to the territories of other foreign races from time to time and talked about life ideals with the foreign cultivators.

In the beginning, these foreign cultivators were extremely arrogant and even took the initiative to attack the Holy Dragon city's team.

It was a pity that the Holy Dragon city's cultivator troop was completely different from the human cultivators they had seen before. They were well-equipped and sharp. The moment they came into contact with the foreign cultivators, they groaned in pain.

In the days that followed, the unforgiving Holy Dragon City cultivators displayed their overbearing side. Once they encountered foreign cultivators, they would definitely fight without a second word!

After dozens of battles, the foreign cultivators who suffered heavy casualties finally wilted. They had no choice but to temporarily group up and resist the Holy Dragon City cultivators who crossed the border to explore from time to time.

While they were on high alert, these foreign cultivators also discovered the unusual phenomenon in Holy Dragon City. They were not particularly keen on hunting monsters, but were extremely interested in the junk hidden in the ruins.

Seeing this, the foreign cultivators heaved a sigh of relief. Since the Holy Dragon City was not snatching the monsters, they had nothing to worry about.

These scraps were scattered all over the place. Those human cultivators had a Special Hobby, so he would just let them pick them up. This way, they would be able to live in peace.

After finding a reasonable excuse to give in, the foreign cultivators no longer provoked the cultivators of the Holy Dragon City. Once they saw them, they would stay far away.

There was only one reason why these foreign cultivators were so reasonable. They were too scared of the Holy Dragon City!

When the two sides fought, they used machine guns and grenades. Before they even touched each other, more than half of them were killed or injured.

When they finally managed to get close and began to fight in close combat, the foreign cultivators were depressed again.

Whether it was the level of their equipment or their fighting skills, the Holy Dragon City far surpassed them!

If he couldn't beat the other party in all aspects, then what was the point of fighting? did it feel good to get killed?

It was under such circumstances that Holy Dragon City became increasingly powerful in the ruins of the other plane. Large amounts of brain matter resources began to be sent back to Holy Dragon City in an endless stream.

Compared to the monsters in these worlds that could provide brain pearls, what Tang Zhen valued more were the resources and information left in these ruins.

Tang Zhen had too many doubts and curiosity about the world of loucheng and the ruins that were connected through the interdimensional passage.

Due to the fact that he had started from scratch, there was a lack of information in Holy Dragon City, which had no knowledge inheritance. These things were closely related to him, so Tang Zhen had no choice but to pay attention to this matter.

No matter which civilization it was, as long as it could develop and grow, it must have unique and reasonable advantages. Otherwise, it would not be able to withstand the erosion of the long river of time.

Even if these civilizations were eventually destroyed by powerful enemies, this was still the law of survival of the fittest, and there was no reason for it.

It was also the nutrients provided by the weak that made the strong stronger!

It was the same for Holy Dragon City. Behind its prosperity today was a bloody road paved with corpses and blood. It was like this in the past, and it would be the same in the future.

Chapter 490 completed exploration and presenting treasure to Zhao Dabao

When Zhao Dabao came over, Tang Zhen was sitting at the entrance of the underground city. He was drinking tea and chatting with fatty, who had just returned.

The blue sky, the green grass, and the pleasant fragrance of the flowers were a pleasant thing to do while drinking tea and chatting in such an environment.

At this moment, Fatty's face was covered in dust. The leather armor on his body that was made from the leather of a mutated Lord-tier monster was also full of signs of damage. It had actually gone through an intense battle.

"This feels good!"

Fatty didn't drink tea, but instead, he held a large cup of iced wine and drank it in one gulp.

Nodding his head in satisfaction, the Fatty's face was beaming with joy as he started to brag about his experience to Tang Zhen.

"City Lord, you don't know how powerful the monster's lair I went to was. There were monsters with turtle shells everywhere, and even machine guns couldn't penetrate them!

The Lord ranked monster inside was even more powerful. It was over twenty meters tall, and its entire body was covered in bone claws and hard shells. Despite taking more than a dozen rockets, it was completely fine.

I fought with it for half an hour and finally found an opportunity to attack its vital parts. I broke its shell and then used divine spells to kill it. "

Fatty described the battle scene as extremely fierce, and his Valiance was highlighted.

However, the 10 Lord-tier cultivators sitting on the side had strange expressions on their faces. Everyone could see that they wanted to laugh but didn't dare to.

Tang Zhen looked at fatty with a smile that was not a smile. However, his eyes contained a trace of a strange expression.

Don't look at how fatty had bragged about his actions, the real situation was not like that.

Previously, when this guy was exploring the ruins world, he accidentally saw a type of armored monster. It was similar to the big crab from the original world that Tang Zhen had treated him to some time ago.

The fat man was a foodie to begin with, but after seeing this extra-large " crab, " he suddenly had the thought that " this thing must be delicious " and was ready to grab it and roast it.

Who would've thought that this armored monster would escape so quickly? fatty blocked left and right, but he just couldn't catch this thing. This made fatty extremely angry.

In the end, while the man and the monster were chasing and running, they actually went straight into the nest of the armored monster.

When he finally caught the monster that looked " delicious ", he found himself standing on the head of a Lord monster that was hiding underground.

An inexplicable battle began in a muddle-headed manner.

The result of the battle went without saying. Fatty, who was in an explosive state, won the battle. He set fire to a nest of " crabs " and roasted them, filling the ruins with a burnt smell.

As for the taste of the 'crab', it was better not to mention it.

Anyway, fatty immediately spat it out after taking a bite. Then, he turned around and left with a depressed expression.

As for the exploration of the interdimensional passage this time, it had officially ended. One was a desert world, and the other was a jungle swamp world. The natural environment was relatively harsh.

Fortunately, these were not a big problem for cultivators with strong physiques. The only thing they needed to be wary of were the various monsters inside.

After watching the video brought back by fatty and the others, Tang Zhen also had a certain understanding of these two ruins worlds and set the danger level to medium.

With the Holy Dragon city's current strength, it was completely possible to immediately send a team of cultivators to explore and carry out the work of collecting resources and information.

However, the Holy Dragon city's current manpower was really insufficient. Even if they managed to get more than ten thousand Wanderers during the Cold Moon disaster, they were still short on manpower.

Whether it was maintaining the business district, building the city, or clearing the wild buildings on the mountain, they all needed a large number of people. There were almost no idle people in the Holy Dragon City now.

Now that there were two more planes 'passages that could be explored, there must be a lot of resources waiting to be excavated, but the Holy Dragon City really could not spare any manpower.

Tang Zhen would not easily mobilize the cultivators in loucheng in the other three interdimensional passages because they had already adapted to the environment of their respective ruins and were like fish in water.

If they were to rashly change to a new and harsh environment, not only would their combat power be greatly reduced, but they could even lose their lives.

Tang Zhen would naturally not allow such unnecessary loss of personnel to happen.

hold on for a while more. Holy Dragon City won't have to worry about manpower anymore!

When Tang Zhen thought of this, he turned his head to look at Zhao Dabao, who was quietly standing at the side, and indicated for him to step forward.

A faint smile surfaced on the corner of Tang Zhen's mouth when he saw Zhao Dabao's cautious actions and slightly uneasy expression.

This fellow suddenly requested to see him. Clearly, he had something to ask of him. Tang Zhen was very certain of this guess.

No matter what he wanted to ask of him, Tang Zhen would agree as long as it was not too excessive.

Not to mention his own credit, just based on the fact that this guy was destined to become a resident of his tower, Tang Zhen would give him face.

Tang Zhen would never be stingy toward his own people.

After thinking of this, Tang Zhen opened his mouth and said, "How have you been these past few days? do you have something to ask of me?"

Zhao Dabao was startled when he heard this. He was originally thinking about how to say it, but he didn't expect that Tang Zhen had already seen through his thoughts and directly asked.

Zhao Dabao's heart felt warm. He no longer hesitated and spoke his mind.

"The city Lord is indeed powerful. You saw through my purpose with one look, so I'll be direct.

When I was in the wild house on the mountain peak, I accidentally found this thing. Please take a look."

As he spoke, Zhao Dabao took out a broken piece of Jade from his pocket and handed it to the Holy Dragon City cultivator beside him.

After that cultivator carefully examined it, he turned around and handed it to Tang Zhen.

Tang Zhen casually took it and sized it up. A strange expression flashed in his eyes before he smiled and looked at Zhao Dabao, "I've already seen the item. Tell me why you're here."

Tang Zhen was naturally extremely familiar with this kind of Jade in his hands. He still had nearly a thousand Jade talismans made from this kind of Jade.

Due to the rarity of the raw materials of this jade talisman, Tang Zhen usually used it for experiments and never used it as a combat weapon.

This was because once it was used up, it would be difficult to find more materials to replenish it.

As for the nourishing effects of this jade talisman, Tang Zhen also knew it in detail. If all the cultivators in the Holy Dragon City were to wear one, it would definitely be of great benefit to their cultivation.

Unfortunately, there were too many monks and too little gruel. The number of Jade tokens in the wild buildings on the mountain peak was limited. It was impossible for Tang Zhen to take them out as welfare distribution.

As for the Jades in the commercial district, they were all harvested by the foreign cultivators. Because of their good effects and low quantity, they were sold at a high price.

Tang Zhen didn't care too much about this matter. However, he didn't expect Zhao Dabao to suddenly take out the original stone of this Jade. After pondering for a while, he could guess that Zhao Dabao must have found the location of this Jade.

Moreover, he had already said that this kind of raw stone came from the wild buildings on the mountain.

He had discovered an obviously profitable business, but he had taken the initiative to look for him. It was obvious that he had already thought about the stakes involved, which was why he had made such a move.

A wise man submits to circumstances. Since this Zhao Dabao was so understanding, Tang Zhen would not treat him badly.

Looking at the silent Tang Zhen, Zhao Dabao encouraged himself and continued to talk about his plan.

"The quality of these jade stones varies, and the output is not very high. If we cut and search for them, it will definitely increase the cost, and we will not be able to create the maximum value.

So, I plan to imitate the stone gambling model in my original world and open a shop in the commercial area to sell these raw stones that contain Jade.

This way, it will create huge profits and attract more merchants to the commercial district!”

After Zhao Dabao finished speaking, he looked at Tang Zhen with a face full of apprehension. He was afraid that Tang Zhen would reject his proposal.

The success or failure of this matter would all depend on a single sentence from Tang Zhen.
