

Alternate 561

Chapter 561 The Queen of glittergold!

There were a total of eight brains in Tang Zhen's hand. Among them, there were six for Xiao Li and the other transmigrators, one for Yun Xi and one for the Queen of the flashing gold race.

Tang Zhen made some small changes to the runic magic circle when he arrived at the soul transfer array in the back Valley. After that, he placed the eight brain beads on it in order.

Tang Zhen had personally designed and supervised the construction of this Soul transmission array. He was well aware of the functions of every part, so it was quite easy to modify it.

He activated the soul transfer array, and the soul stored in the brain Pearl was immediately sucked into the runic magic circle. The brain Pearl on the magic circle, which was specially used to receive and store souls, shone brightly!

The design was simple and clear. The staff in charge of the soul teleportation array only needed to glance at it to know if the soul of a transmigrator who had died in an accident had been teleported back.

After confirming that everything was normal, Tang Zhen controlled the soul transfer array and sent these souls into the host bodies that had been placed in advance.

The entire process was uneventful and looked extremely simple, but it was also because he had made perfect preparations in advance.

If there was even the slightest mistake during the boarding process, then the souls of Xiao Li and the others might be destroyed!

Tang Zhen's expression was very calm as he turned his head to look at the pool at the side. The others were unable to tell what he was thinking in his heart.

It didn't take long before a "Hua Hua" sound came from the pool, and then six young men covered in water climbed out of the pool.

They looked around in confusion, as if they were still wondering why they were here.

What are you looking at? you were already dead when you entered the building. It was the city Lord who saved you!

A young man standing not far from Tang Zhen coldly snorted. His tone carried a trace of reprimand and might, giving people the feeling of being an old man.

He was one of the main people in charge of the Asian Alliance, and was considered the immediate superior of Li and the others. He was already close to retirement age.

When the great transmigration plan was launched, he took the initiative to apply to come to the world of Loucheng. Now that he was full of energy, he had plans to display his ambitions in this world of Loucheng.

After being scolded by their officer, Xiao Li and the others immediately became well-behaved. Apparently, they also vaguely remembered something, and their faces turned pale.

As the six of them listened to their superior's reprimand, they occasionally peeked at Tang Zhen by the side from the corner of their eyes. When they saw that he did not reveal any intention of punishing them, they also secretly heaved a sigh of relief in their hearts.

Compared to the anger of their commander, the few of them were actually more concerned about Tang Zhen's attitude.

you're unorganized and undisciplined. You're using your work for personal gain. Watch how I'll deal with you later!

Seeing that Tang Zhen did not have the intention to pursue the matter, the old man did not say anything more. He coldly snorted and had Xiao Li and the others change their clothes before returning to their respective residences to rest.

The six of them had used up a lot of their soul power in the mirror world. They would probably be dispirited for a long time. They needed to rest and recover.

According to the person in charge of the Asian Alliance, he originally planned to send the six of them back to their original world to recuperate, but it was directly rejected by Tang Zhen.

The original world was different from the world of loucheng. There were very few items that could nourish the soul, and the price was also extremely high. It was far less cost-effective to recover in the world of loucheng.

Moreover, they were the first batch of transmigrators who had 'died and resurrected' and had a certain research value. It was even more impossible for Tang Zhen to let them leave.

In any case, Xiao Li and the others could be considered to have escaped with their lives. After this calamity, it was not only the six of them, but many other transmigrators who were eager to make a move had become much more obedient.

Only then did they suddenly realize that the reason why they had been safe and sound after transmigrating was because they had always been under the protection of the Holy Dragon City. Otherwise, who knew how many batches of people would have died already!

Although to the Holy Dragon city's residents, as long as their soul did not die, there was a possibility of rebirth, but if they encountered this kind of special situation where they were trapped in the reincarnation mirror and could not escape in time, then they would really lose their lives!

Little li and the rest left dejectedly while Tang Zhen's gaze remained on the other two pools.

When the staff member saw this, he also looked over curiously. However, he was muttering in his heart, why did these two souls stay for such a long time?

Only Tang Zhen sat as steady as a mountain. He stared unblinkingly at the pool while a trace of a smile gradually surfaced on the corner of his mouth.

There was the sound of water again, and a woman slowly stood up from the pool. Her eyes looked around in a daze, and in the blink of an eye, they regained their lively colors.

With a gentle wave of her hand, a coat flew into the air and landed on her palm.

After covering her exquisite and graceful body, the woman walked out of the pool with her long legs and bowed to Tang zhenshen.

thank you for your kindness, Sir. I will never forget it. If there's anything you need, I will do my best!

Yun Xi, who had been given a new life, spoke earnestly, and her pretty face was filled with gratitude.

you're welcome. Take a seat and rest. We'll talk later.

Yun Xi nodded slightly and sat on a chair at the side. She looked around curiously.

Although Yun Xi did not have her original two-star feudal lord cultivation after her rebirth, her soul power was still there. Therefore, it was not difficult for her to control her mental power to take things from a distance.

Coupled with her current body with excellent aptitude, as long as she worked hard to cultivate, it would not take long for her to have enough cultivation to protect herself, and it would only be a matter of time before she became a Lord-tier cultivator.

This was also one of the reasons why Tang Zhen had always wanted to increase his spiritual strength. It was so that he would be able to possess a combat strength that was not weaker than his enemy even when his body and soul were separated.

After a while, there was another sound from the pool, and then a tall and exquisite woman slowly stood up.

She stood up and sized up her surroundings. Her gaze swept over the people in the surroundings before finally stopping on Tang Zhen's body.

Her bright eyes flickered with tears and anger, but in the end, it all turned into indifference and she sighed softly.

She moved her long legs and walked out of the pool. She allowed the water droplets to roll down her exquisite body. However, she did not care. She only looked at Tang Zhen in a daze.

A staff member delivered a piece of clothing. The woman received it and nodded in thanks. She put on the clothes and stood in front of Tang Zhen.

I know you're conflicted, but you don't have to thank me. After all, you and I were enemies.

Tang Zhen looked at the woman beside him. Water droplets were continuously dripping from her long hair. Her pale and weak appearance caused one to be unable to help but feel pity for her.

The lady was silent for a moment when she heard this. However, she still bowed to Tang Zhen.

no matter what, I still have to thank you. After all, you helped me leave the sanctuary!

This woman was the Queen of the flashing gold race who was killed by Tang Zhen. She was the monster from the flashing gold race sanctuary who tried to scheme against Tang Zhen but was killed by him instead.

She was the same as Yunxi. After becoming a monster in the wild, she retained the memories of her previous life.

Now that she had left the monster's body and her soul was reattached to the mother tree's body, the Queen of the flashing gold race could be considered reborn.

Tang Zhen waved his hand and said with a soft smile, "I've said that you don't need to thank me. After all, I've promised you back then. It's not in line with my principles if I don't do it. There's no need to mention anything else."

Now that you've regained your freedom, whether you want to stay in Holy Dragon City or go to the wilderness to start anew, I will not stop you."

As he said this, Tang Zhen looked at the Queen of the flashing gold race with a trace of sincerity in his eyes.

"I know you're not willing to accept this and that you've always wanted to revitalize the flashing gold clan.

It's just that this tower world is far more dangerous than you think. A weak woman like you can't survive on your own, so it's best for you to stay in Holy Dragon City before you grow your wings.

Let's work together. This is something that will benefit both of us. You have to consider it carefully."

At this point, Tang Zhen took out a box of brain beads and placed it in front of the Queen of the flashing gold race.

"These are the brains of your clansmen. Their souls are stored inside, so they still retain a trace of their consciousness, but they can't compare to you!

I can give you the brain, but if you want to resurrect them, you must pay a sufficient price. I, Tang Zhen, have never liked to make a losing deal!"

After saying this, Tang Zhen got up and left the back Valley, leaving the Queen of the flashing gold race in a daze.

Chapter 562 Rapid expansion and employment system (1)

After returning to his city Lord's Hall, Tang Zhen picked up the battle report on the table.

As expected, the situation at the front line was very gratifying.

Ever since the declaration of war against the magic Tower, the Holy Dragon City Army was like a hot knife through butter, breaking through five cities in a short period of time!

Even so, the Holy Dragon City still had no intention of stopping and continued to expand the results of the battle.

At present, nearly one-fifth of the Wildlands was temporarily controlled by the Holy Dragon City. The lands that were once controlled by the foreign races were now only left with ruins.

After occupying these areas, the next thing to do was to clear out the monsters and bandits, carry out a series of construction, and take full control of these areas.

Although the Holy Dragon City had conquered these buildings with powerful force, there were still many cultivators who were unwilling to admit defeat. They kept running around in the wilderness, looking for an opportunity to take revenge on the Holy Dragon City.

The members of the patrol team who stayed behind to guard the rear fought with these rebels almost every day. Fighter jets were frequently dispatched to cooperate with the ground combatants to attack.

After the Holy Dragon city's merciless suppression, the rebels saw that victory was hopeless and could only escape from the Wildlands, waiting for the opportunity to make a comeback.

Now, there were cars leaving the Holy Dragon City every day, bringing large amounts of materials and personnel to take over and manage these lands.

As a result, the Holy Dragon city's manpower began to be stretched thin again, and they had no choice but to hire a large number of Wanderers. However, the effect of doing so could only be said to be half the result with twice the effort.

The number of Wanderers was not endless. At present, the Wanderers employed by the Holy Dragon City were close to 100000, and they had almost captured all the Wanderers within a radius of 1000 miles.

It would be extremely difficult to find enough Wanderers.

There was also another problem that couldn't be ignored. The loucheng natives were good at fighting, but they couldn't help at all in some work.

Therefore, the best solution was to bring in a large number of transmigrators from the original world and let them be responsible for certain key positions.

After realizing that this situation was imminent, Tang Zhen also returned to his original world and began to discuss a solution with his business partners.

A day later, the meeting was held.

In a military base in his original world, Tang Zhen and the representatives of his partners were sitting together. Everyone first took a look at the latest battle situation before turning their eyes to Tang Zhen.

As the secrets of the world of loucheng were gradually revealed, some heavyweight forces in the original world also joined in. Some of them represented countries, some represented financial groups, and all of them had a pivotal influence in the original world.

It was impossible to get rid of them for such a good thing with immeasurable benefits. If they were to cause trouble, the entire original world would be in complete chaos.

Therefore, it was only a matter of time before they joined!

Tang Zhen's eyes swept over everyone present. He stood up and pointed to the electronic map behind him.

“I believe everyone is clear that our initial goal is to control the entire Wildlands and make this place our base camp to control the loucheng world!

With the advantage of our weapons, our current expansion speed is very fast. At present, this area is already under our preliminary control.

Even if I didn't mention this, I believe you've already received the news.

however, the problem also comes with it. We are starting to have a clear lack of manpower. We have effectively solved this problem by recruiting the local Aboriginals.

Therefore, there was only one solution, and that was to teleport the workers from the original world on a large scale to alleviate the current situation.

This matter must be carried out, and we've been notified in advance. I just wonder how your preparations are?”

Tang Zhen swept his eyes over everyone who had different expressions after speaking up to this point. He waited for them to express their opinions.

A middle-aged man in a suit spoke first, “So far, we've produced one million soul travel pods. According to the usage of both worlds, it can help 500000 people pass through their souls!

At present, these soul transmigrators have been sent to various parts of the world, and the recruitment of relevant personnel has also begun, but it is still in a semi-confidential state.”

Tang Zhen nodded. If there were 500000 transmigrators heading to the loucheng world, the problem of the initial shortage of manpower could be easily solved.

Another man with white hair nodded to everyone. He looked at Tang Zhen and said, “These transmigrators are employed. Every day, they go to the loucheng world to work through the soul transmigration cabin, and after the work, they will be sent back to their original world.

In the future, most of the workers in the Lou city world would use this employment system, and it would continue until the mass migration began.

Other than these workers, we also plan to send 100000 people into the tower world within a year. They will become permanent residents and will not return.”

After the others heard this, they asked a few other questions, the most important of which was the progress of the physical transmission experiment.

This was a problem that everyone was extremely concerned about. This was because up until now, all the transportation of resources had to be handled by Tang Zhen. This not only limited Tang Zhen's movements, but also made his partners feel insecure.

The foundation of the cooperation between the two sides was that Tang Zhen could transport resources between the two worlds. If Tang Zhen no longer cared about this matter or cut off the connection between the two worlds, then the cooperation between the two sides would be in vain.

Fortunately, Tang Zhen wouldn't do that. He had even acquiesced to them protecting his younger sister with all their might. In reality, they were just hostages.

This wasn't because he was afraid of anything, but because there was no need for them to fall out. He also didn't want to abandon this super logistics base in his original world.

The person in charge of the research on the transmission of physical objects immediately told the progress of the experiment to everyone present. According to his estimation, it would take at least two years to achieve obvious results.

Everyone nodded. They could afford to wait.

During this period of time, they could only continue to rely on Tang Zhen to transport a huge amount of resources back and forth. After all, no one else could help them with this.

After the meeting, Tang Zhen took out the storage equipment made by Lingxu Zi. Due to the sufficient materials, the storage equipment had enough space to store a small mountain!

He activated the storage equipment and placed a large number of items he brought back from the Loucheng world. Tang Zhen then took a large number of soul travel capsules.

When he returned to the world of the towers, these soul travel pods would be deployed to the newly built towers in the wilderness and provided for the hired travelers.

Building a city in the Wildlands was something that should be done sooner or later. Tang Zhen was also very supportive of this.

According to the plan, there would be a total of five towers to be built in the first phase, and the upper limit of the upgrade was three levels.

The reason for this was that the pressure of the monsters attacking the level 3 building was not great, and the living space in the building was sufficient, and it could also avoid wasting brain matter.

When these buildings were built, the entire Wildlands would be connected as one, and it would only be a matter of time before it prospered.

Moreover, with these buildings as a buffer, the Holy Dragon City could develop and build in peace. The monsters and bandits could be completely dealt with by these buildings.

With the passage of time, these monsters might even be completely extinct in the Wildlands!

This way, the Holy Dragon City would be able to focus on upgrading their City Towers, and strive to become a top-tier city like Heaven Battling City as soon as possible!

Chapter 563 ! mysterious company, special job

In a certain city in the United States, the light rain had just stopped.

After Steve had his breakfast, he drove off in his pickup truck. He had applied for a job a few days ago, and today was the official day of work.

In fact, Steve was not the only one hired by the company. A few of his good friends from the shooting club would also work there.

This company was a world-famous company. It was said that the benefits of a newly established company were good. If the applicants were excellent in shooting or had military experience, they would be recruited first.

The members of Steve's shooting club had just graduated, and they were just trying their luck. They did not expect to be hired, which surprised them a little.

To be able to work in such a large company was something to be proud of.

As for what they did, the company didn't tell them directly, but said that it would be arranged after they officially started work.

Although Steve and the others felt that something was wrong, they didn't take it to heart. They secretly guessed that this might be a special rule of the company.

The company was not far from his home. It didn't take long for Steve to arrive at his destination and head to his work area.

In front of a large steel factory, thousands of people were waiting in line to enter. Many of them were looking around with curiosity and doubt in their eyes.

Steve found a lot of soldiers in the factory. They were patrolling around with loaded guns, and there were also soldiers guarding the entrance of the factory.

After seeing this scene, Steve was quite puzzled. It seemed that the company was not as simple as it looked.

After waiting for about ten minutes, the gate of the factory was opened at the same time, and everyone lined up to enter.

After Steve entered the factory, he found that there were thousands of electronic devices in the room that looked like gaming capsules, all of which were powered.

what's going on? are they hiring us to play games? "

Steve thought to himself and looked around. He was even more confused.

It turned out that on the stairs around the factory, dozens of soldiers were coldly staring at Steve and the others, making the atmosphere a little tense.

"Damn it, can anyone tell me what's going on?"

A young man seemed to be unable to stand the atmosphere here and couldn't help but roar.

No one could give him an explanation. They were also at a loss. As their eyes kept moving, they also tried to find an answer.

At this moment, a man's voice that was amplified by the loudspeaker suddenly sounded above everyone's heads.

“I believe everyone must be very confused right now. I’ll give you an explanation immediately.

You might not believe it, but it’s a fact that we’ve already built a base in a distant foreign world!”

As soon as he said that, everyone was shocked and they kept talking in low voices.

Steve’s brows were even more tightly furrowed. He recalled the rumors he had read on the internet and had a vague guess in his heart.

“The other world you’re talking about, is it the world of loucheng?”

Someone shouted. Apparently, he had seen the hot topic on the internet and made such a guess.

Steve and the others perked up their ears, waiting for the other party’s answer.

After a few seconds of silence, the other party replied in a certain tone, “That’s right, it’s the world of loucheng!”

“BOOM!”

There was another wave of heated discussions, as if it was a noisy market. Many people were excited, and those who didn’t know the truth were all asking in a low voice where the world of loucheng was.

Steve was just as excited. He was a fanatical game fan, and after seeing the rumors on the internet, he had once fantasized about the existence of the world of loucheng.

In that world, he would wear armor and fight monsters, search for treasures in the wilderness, and build his own city.

Although there were certain claims that the world of loucheng definitely existed on social media and some forums, Steve still refused to believe it and thought that it was just some people’s imagination.

However, it turned out that he was wrong. The world of loucheng really did exist, and humans had even begun to explore it long ago!

After the voices of the crowd lowered a little, the man’s voice sounded again from the loudspeaker and told Steve and the others the reason for hiring them.

The Lou Cheng world did not have enough members!

They were hired to participate in the construction and security work of the loucheng world!

Using the soul teleportation cabin to head to the other world, one could go to work and leave work as per normal every day, with generous pay and benefits!

Hearing this, Steve was extremely excited and couldn’t wait to enter the soul portal cabin.

alright, everyone. Please turn off your phones and enter the soul teleportation cabin. We’ll start the teleportation immediately!

Most of them turned off their phones as requested, but some of them were worried that there would be problems with the teleportation and requested to resign.

The military didn't stop these people. Instead, they told them not to talk nonsense, or they would be held accountable.

In fact, when Steve and the others were hired, the existence of the world of loucheng was officially disclosed. The reason why those who withdrew were warned was just to let the world know about it later.

At the very least, the government would not take the initiative to admit this matter and would remain silent for a long time.

After these people left, Steve and the others lay down in the soul teleportation cabin as instructed and lost consciousness without realizing it.

After an unknown period of time, Steve felt a sharp pain between his eyebrows. He slowly opened his eyes and found himself still lying in the soul portal cabin.

However, outside the transparent cabin door, it was not the factory he was in, but a huge tent.

guys, you've arrived. Come and see the New World!

A Man in Black armor stood at the door and shouted at Steve and the others who were lying in the soul portal cabin.

Steve quickly opened the cabin door and stood up.

It was only at this moment that he realized that he had actually changed his body. His entire body was filled with strong muscles.

"Haha, that's great!"

At this time, the transmigrators next to him also got up one after another. After discovering the changes in their bodies, they all waved their arms excitedly.

"Let's go out and see if we've really reached the world of loucheng!"

Someone shouted, then walked out first, and Steve quickly followed.

As soon as he left the tent, he saw an extremely high sky. A few strange-looking big birds flew across the sky, followed by several fighter planes flying over his head!

The place they were at was a flat grassland. There were transmigrators in tank tops and shorts everywhere, soldiers in armor, and alien workers that appeared from time to time.

Steve felt that his eyes were not enough to see everything. Everything felt fresh to him. At this point, he was convinced that he had indeed come to the world of loucheng!

Steve felt as if his blood was dancing, because this place was simply too great!

A transmigrator wearing battle armor stood on a high platform and loudly directed Steve and the others to line up to receive their equipment. When they arrived at the open space, they saw with their own eyes that the Holy Dragon City cultivators tore a card, and then countless clothes, shoes, and hats appeared in front of them.

“Oh my God, this is a miracle!”

“Am I seeing things? is that guy a magician?” he asked.

I love this place, because this is a world full of miracles!

Steve and the others were full of excitement as they received their uniforms one by one. After putting them on, they were assigned jobs according to their strengths.

Because of his excellent shooting skills, Steve and his companions were assigned to the guards, each of them receiving a set of black armor and an automatic rifle.

This kind of armor was different from battle armor. It was a kind of light protective equipment with a total weight of less than 15 pounds, which could effectively resist the penetration of heavy arrows.

For the security personnel in the control area, this level of defense armor was more than enough.

Steve and his companions, who had changed into armor, were gathered together. Under the leadership of a Holy Dragon City soldier, they began their patrol and security mission!

Chapter 564 Ambush, strange meatball

With brand new rifles in hand, Steve and the others got into two pickup trucks and began his first patrol in the world of loucheng.

The Holy Dragon City warrior in charge of leading the team was silent, his eyes constantly looking at the corners of the wilderness that could hide danger. The killing intent he inadvertently emitted made Steve and the others panic.

This was the first time they had come into contact with such a tangible killing intent, and they felt as if their scalps were about to explode!

There was a veteran from the American Alliance in the patrol team. He had been in the world of loucheng for more than two months and was explaining to Steve and the others what they needed to pay attention to.

It was reasonable to say that Steve and the others should be on duty after receiving training, but because of the lack of manpower, this step was omitted and they were allowed to take on the duty directly.

“Listen up, guys, this is the world of loucheng, not the original world. Those monsters and alien enemies will kill us without hesitation!

So, when we encounter enemies who attack us, I hope you can fire without hesitation, otherwise, you will be the ones who lose your lives!”

After glancing at Steve and the others, the veteran gave each of them a piece of paper, which was full of rows of data.

This was general knowledge information specially provided for transmigrators. It indicated the average combat power and speed of cultivators of different levels. This way, Steve and the others could better understand the enemy during battle and master the advance of shooting.

Looking at the data on the paper, Steve and the others were amazed, because the physical fitness of these cultivators was so strong that they could be considered superhumans!

“Don’t worry, although they are very strong, as long as their cultivation is not at the Lord tier, they are no match for firearms!

Also, the body you’re currently residing in is also very strong, not much weaker than a Rank 2 cultivator!”

After saying this, the veteran turned his head and kept observing the surroundings.

Steve and the others also looked around. Every flower and plant here surprised them. They pointed at it from time to time, their faces full of excitement.

As the car passed by a pile of ruins, the machine gunner on the pickup truck pulled the trigger, snapping the weeds in the distance.

be prepared. The enemy might appear!

As the veteran spoke, he had already extended his gun out of the window and started shooting at the black shadows moving in the grass.

Seeing this, Steve and the others also jumped out of the stopped cars and used the cars as cover, while getting ready for battle.

“Whoosh, whoosh, Whoosh!”

A wave of arrows shot over at high speed. Most of them missed, but a few of them went into the car and pierced through the metal sheet.

“Bang Bang Bang!”

A few grenades were fired from the truck behind, and more than a dozen hidden foreign cultivators immediately appeared. They shuttled through the wild grass at high speed, but they were shot down one by one.

“What are you doing there? shoot!”

The veteran roared, turned his head, and quickly aimed, killing another foreign cultivator who rushed up.

Compared to the slow-witted Steve and the other rookies, the veteran knew how powerful these foreign cultivators were. Once they got close, 90% of the transmigrators would not be their match.

Therefore, when the Holy Dragon City was in battle, they were used to using planes and cannons to open up a path. They would first blow up the enemy until they were frightened, and then attack from close range.

At this time, the enemy’s fighting spirit was basically scattered, and they could not even withstand a single blow!

The reason why there were Holy Dragon City Warriors and traverser veterans in Steve's patrol team was that they had more combat experience.

On the battlefield, experience was sometimes more important than physical fitness. A single mistake could cost one's life, and the advantage of veterans was that they could always avoid such fatal mistakes.

In a flash, with the dense barrage of bullets, the ambushing foreign cultivators had been killed and their corpses were strewn all over the ground. The remaining few people saw that the situation was not good and threw a few meatball-like objects at them. Then, they jumped onto their horses and began to flee.

When the meatball was thrown over, the Holy Dragon City warrior's pupils shrank, and he immediately roared and dodged.

However, who would have thought that a transmigrator next to Steve would raise his gun and aim at one of the meatballs. He fired a burst of bullets.

With a crisp "bang", the meatball exploded, and black smoke immediately spread.

The black smoke was condensed and did not disperse. It kept dancing in the air like a group of mosquitoes in summer looking for a target to suck blood from.

The transmigrator who fired the shot couldn't Dodge in time and was immediately shrouded by the black smoke. As he shouted, he inhaled a large amount of black smoke through his mouth and nose.

Steve and the others had already dodged, and the black smoke could not touch them. It all surrounded the transmigrator and wrapped him up like a black bear, wriggling and shrinking.

A blood-curdling screech was heard as the transmigrator ran around in the black smoke as if he had gone mad.

"He's finished, kill him!"

The Holy Dragon City soldier shook his head and looked at the transmigrator struggling in the black smoke, his eyes cold and sharp.

The traverser veteran sighed, raised his rifle, and pulled the trigger, directly knocking him to the ground.

The traveler finally stopped screaming. The black smoke that had not yet entered his body hovered for a while and quickly melted under the sunlight, disappearing without a trace.

As the black smoke dissipated, everyone could see the transmigrator who had been shot dead. They all gasped in unison.

It turned out that there was not a single trace of blood on his body. On the contrary, countless tendrils-like things had been squeezed out of his pores, wriggling and waving in the air.

At this time, the transmigrator's corpse was like a moldy human-shaped pastry, which made people tremble with fear.

The seasoned transmigrator seemed to have seen a similar scene before. He returned to the vehicle and took a barrel of special fuel found in the loucheng world and poured it on the body of the transmigrator.

This body had already been destroyed and could not be recovered!

After lighting a match and lighting up the cigarette, the veteran threw the match on top of the corpse, instantly setting off a raging fire.

As the flames burned, the tentacles began to shake violently, letting out a mouse-like cry, and then exploded.

After another minute or so, the corpse suddenly swelled up and exploded with a bang!

Dozens of fist-sized meatballs burst out of the corpses, steaming. They were obviously cooked.

Turning to look at the dumbfounded Steve and the others, the veteran said, " "This meatball is a special type of parasitic monster. It usually lives in the host's body, but once it's broken, it will find nearby creatures to live in.

However, this thing was Afraid of Sunlight and fire, so it could only last less than a minute under the sun and high temperature.

Therefore, if you see this kind of meatball again, immediately avoid it or light a fire to drive it away!"

At this point, the transmigrator veteran turned around and got into the car. Steve and the others looked at each other and followed.

Looking at Steve and the others 'silence, the veteran smiled and said, " are you guys sad because you lost a partner? there's no need to be sad. That guy is definitely not dead. He might just wet his pants in fear. Hahaha!

When Steve and the others heard that, they were relieved and laughed.

Nothing unexpected happened after that. Steve even killed a level one monster with his own hands.

Soon, it was time to get off work. Steve and the others returned to the soul teleportation cabin and slowly closed their eyes.

Chapter 565 Confirmation of the news, shocking the world

When Steve regained consciousness, he found that he had returned to his original world.

Steve opened his eyes and looked at the familiar factory outside the soul portal cabin. He sighed softly, feeling as if it had been a lifetime.

Walking out of the soul teleportation cabin, Steve glanced at the transmigrators around him and found that most of them looked excited. Only a few of them had shimmering eyes, and no one knew what they were thinking.

What they had seen and heard in the world of loucheng had clearly shocked them greatly, and they had yet to recover from their shock.

this is an invasion, a massacre. We humans can't do this. We should live in peace with all the other races!

Suddenly, a short-haired man shouted. He seemed very agitated as he tried to persuade the people around him.

“We definitely can’t help the evildoers. This is unfair to those foreign races. Do you know that the human army and the Holy Dragon City are all butchers, executioners, and we are becoming their tools for invasion and slaughter!

I will never do this kind of thing again, because it makes me feel disgusted. Anyone with a conscience will agree with my approach!”

The man became more and more agitated as he spoke, his entire face turning purple. He waved his arms and shouted at the approaching soldiers, “Get lost, stay away from me, you bunch of damn butchers!”

It seemed that a few people were really convinced by this man. They loudly scolded the soldiers who caught them, and their emotions were also very agitated.

Steve looked at the performance of those guys in silence, but he didn’t think so.

Everyone was an independent existence and had their own thoughts. This was the right to think that they were born with, and there was no right or wrong.

However, this man didn’t realize that the living resources he enjoyed were overdrawing the welfare of his descendants. This also caused the resources of his original world to become more and more exhausted.

As time went on, even if there were no natural or man-made disasters, humans would be on the verge of extinction due to the depletion of resources.

The discovery of the world of Loucheng had perfectly solved this problem and given mankind the opportunity to develop again. This was definitely something that was worth celebrating.

If a race wanted to survive in an unfamiliar and dangerous environment, they had to kill and fight. If they wanted to develop and grow, they had to be prepared for corpses to pile up like mountains.

This was the truth that was concluded through countless blood and tears in the course of history, and it could not be reversed!

It was simply a joke to talk about peace with a group of hungry wolves who were used to eating human flesh. This was because it was destined to not have a good result and would only attract more hungry wolves!

Taking advantage of his own advantages to occupy enough living areas in the world of Loucheng was the right way.

As for the blood and tears of this generation, after hundreds of years, how many non-humankind juniors living in the human-controlled area would take it seriously?

In a short period of time, Steve had thought of a lot of things, until someone called his name, and he came back to his senses.

“Steve, are you willing to continue your job?”

Behind the table, the man in a suit looked at Steve with a very serious expression.

“Of course, I’m very willing to do so!”

Steve nodded. He didn’t want to miss out on such a cool thing, and he had a faint guess that this job would be very popular in the future. He definitely couldn’t let go of this opportunity.

The man in the suit nodded and pushed a contract in front of Steve.

sign it and you will become an official employee of the company. Then, you will receive your personal item!

Steve took the contract, read it carefully, and signed his name. Then he received a work permit and an item that looked like a watch.

this is the multi-function watch that the company distributed to its employees. The instruction manual is in the box. You can study it slowly.

After collecting his items, Steve turned and walked out of the warehouse. Just as he was about to leave, he saw another warehouse not far away. There were also thousands of people lining up to enter it.

“These people might be our next colleagues, and they’re also heading to the world of loucheng!”

Steve thought to himself, and his footsteps became more cheerful.

When there were many people doing something, you would take it for granted that it was normal, and it would not be particularly difficult to join in because you were not alone.

Along the way, Steve found more soldiers, and they had even set up an isolation and alert area in front of the factory.

After getting into his car, Steve couldn’t wait to take out his phone and share his experience with his friends.

He believed that they would be so shocked that their jaws would drop, and then they would die of envy!

As for keeping it a secret, please, if this matter really had to be kept a secret, they wouldn’t have been allowed to come and go as they pleased. This was obviously just a scare!

Steve even suspected that the company had done this on purpose to spread the information about the world of loucheng through them.

Thinking back to the information on the internet some time ago, Steve realized that it might not be long before everyone knew about the existence of the world of loucheng!

He skillfully turned on his phone and opened the social media app. Before Steve could post what he had seen and heard, he was attracted by the messages that almost flooded the screen.

the world of loucheng isn’t a legend. Humans have already entered it!

is it right to conquer and kill? should humans treat beings from other worlds like this? ”

I’m an employee of a company. The following is my personal experience. It’s absolutely true.

the total number of humans in the world of loucheng is close to a million. The second home is just around the corner!

All he could see was such information. The original world had been completely blown up by the term "world of loucheng. people expressed their opinions on social media. Some were excited, some were suspicious, and some were boycotting it!

The term 'world of loucheng' had already become completely popular!

However, when people discussed these topics, they had evidence. They relied on the information they learned through games, movies, and the Internet.

It wasn't until then that people realized that the world of loucheng wasn't far away from them. They didn't feel particularly repulsed when they knew of its existence, but instead felt a faint sense of intimacy.

A well-known person on a social media platform claimed that humans had discovered the world of loucheng for a long time and had decided to let ordinary people know about this.

However, in order to not let this news appear too suddenly, they used methods such as games and movies to let people understand and accept the existence of the world of loucheng. Now, it seemed to be very effective!

At the very least, when the existence of the world of loucheng was confirmed by countless people, no one panicked. This was the best proof!

There was also news that the newly emerging virtual reality games and various technological medical products were all thanks to the discovery from the loucheng world. Its existence had completely changed the human world!

People did not doubt this statement, because some people had already mentioned that the speed of technological progress in recent times was a little abnormal. It was not an exaggeration to say that it was a leap in development.

They insisted that humans had acquired alien technology, but now it seemed that they had obtained a high-tech legacy from the loucheng world!

In short, the rapid advancement of technology in the original world was completely dependent on these alien technologies.

The opposition agreed that this theory made some sense, but they could not ignore the technological accumulation of the original world. Otherwise, even if they had obtained these high-tech items, they would not be able to crack and copy them easily!

As the incident continued to heat up, more and more news about the world of loucheng spread. People then realized that the original world had so much connection with the world of loucheng!

Everyone thought that this was the arrangement of the major forces in the original world, but they did not know that the instigator of this matter was actually the Holy Dragon city's city Lord, Tang Zhen!

Just as this matter was getting more and more popular, there was suddenly news that the second movie that was shot in the loucheng world was about to be released, and the main actors of the movie would come to the original world to meet the fans in person!

The original world, which had been paying attention to the situation in the loucheng world for a long time, was completely in an uproar at this moment!

Chapter 566-spreading rumors, prepare for! counterattack

The world of loucheng, Holy Dragon City.

Yue lang, Qian Long, and a group of people stood in the city Lord's Hall with excited faces. They would occasionally whisper a few words.

city Lord, when are we going to the original world? I can't wait to go!

At this moment, Yue lang was wearing a long white dress and looked like a devastatingly beautiful fairy. This was already the third time she had asked this question, and her face was filled with joy and excitement.

Ever since he heard that Tang Zhen wanted them to make a trip to the original world to cooperate with the promotion of the great time-travel plan, Yue lang had been in a state of extreme excitement almost the entire day.

From the words of those transmigrators, yuelang had long heard that there was an incomparably huge shopping mall in her original world, and there were all kinds of beautiful clothes, as well as countless crazy fans for her!

She was really looking forward to going to the original world!

On the other hand, Qian Long, Xiao Rui, and the others were acting very reserved. However, from the way they couldn't shut their mouths and their eyebrows twitching from time to time, it was clear that they were also extremely excited!

Murong Zi Yan, Xiao die, and Li Sha were sitting quietly at the side. They looked very quiet, but if one were to listen carefully, one would find that they were also discussing the topic of shopping.

Aside from thousand Dragon's group, four other foreign species that had participated in the movie's filming would also head to the original world. They were even more excited than thousand Dragon's group about this opportunity.

To be able to receive such an honor among Holy Dragon city's close to 100000 foreign tribes made them feel like they were being valued. They also yearned to return to their original world.

Through the Holy Dragon city's transmigrators, the existence of the original world was no longer a secret. Almost every Holy Dragon City resident and foreign race member yearned to see the original world one day.

In their eyes, the original world that could produce all kinds of goods and weapons was definitely an extremely powerful continent-level city!

That's right, in the eyes of the loucheng natives, the original world was a continent-level loucheng that only existed in legends!

If it wasn't a continent-level city, how could it have so many talents, so many magical things, and even have a population of several billion?

As for things like Earth and planets, they wouldn't understand even if you told them. They would only understand things according to their common sense!

After a while, the transmigrators stopped explaining and simply said that they came from a continent-level city.

At first, some residents of the Holy Dragon City had a respectful attitude towards transmigrators, but when they heard that the transmigrators came from a continent-level city, they immediately became enthusiastic and no longer felt distant!

Since the transmigrators came from the legendary continent-level city, they must be more noble than him. The Lord of the city who was respected by the transmigrators must have a prominent status in the continent-level city!

Therefore, Tang Zhen's origin had spread. Countless people suddenly realized that the mysterious force behind the Holy Dragon City Master was actually a continent-level city!

In this way, all the previous doubts were solved.

Why was Tang Zhen able to obtain so many strange goods and terrifying weapons despite having such a high cultivation and such a strange ability?

Why was the Holy Dragon City able to rise so quickly and stand tall in the Wildlands? why were so many foreign cultivators fighting for the foundation of the Cold Moon Tower, but only the Holy Dragon City was able to benefit in the end?

In addition, there were rumors that Holy Dragon City had a mysterious master guarding it, and the Super City wall that appeared overnight. If all these things were supported by a continent-level city, then everything would be reasonable.

For the natives of the world of loucheng, the continent-level loucheng was almost like a myth. It was said that every warrior of the loucheng had the cultivation base of a peak Lord, and the cultivators of the loucheng were all above the king level!

Except for the record of the appearance of a continent-level building thousands of years ago, the continent-level building only existed in the legends of the natives of the building city.

Since Tang Zhen came from a continent-level City Tower, there was a reasonable explanation for his actions.

What Tang Zhen didn't know was that after the rumor that he came from a continent-level city spread, the spies of the major forces lurking in the Holy Dragon City quickly passed this information back to their respective camps.

The elf Royal Court, heaven battling city, the Kobold imperial family, the dwarven clan, and countless other major forces that Tang Zhen had yet to come into contact with.

Their common characteristic was that they were all about to be promoted to a national level, or in the stage of preparation for the promotion.

The sudden appearance of a continent-level noble was extremely important to them, so they had to take it seriously.

Promoting to a national level building sounded easy, but it was extremely difficult to do. If he could get in touch with the national level buildings through Tang Zhen and get their help, then the road of promotion would be much easier.

Even if they had to pay a certain price for this matter, they were willing to do so!

Therefore, after those forces learned of this news, their reactions were different. However, 90% of the forces sent their important figures to try to contact Tang Zhen.

Tang Zhen still didn't know about this matter. He just didn't know whether to laugh or cry at this rumor. He was a transmigrator from his original world. How did he become a resident of a continent-level city?

A planet like Earth, which orbited in the universe, had nothing to do with Lou Cheng!

In fact, Tang Zhen had always been suspicious that the world of Lou Cheng and the original world were not in the same universe at all. They might not even be in the same space-time. As for why there were wild buildings related to the original world, this was something that Tang Zhen had never been able to understand.

In addition to the nightclub building that indeed belonged to the original world, Tang Zhen had also explored a building alone and found items similar to the original world.

However, some details, even the strangeness in the written records, showed that the wild building was not simple. It actually came from a parallel world similar to the original world!

Tang Zhen had never told anyone about this matter and had only been secretly researching it.

The Holy Dragon city's residents were sure that the city Lord came from a continent-level city and were proud of it. This also made the qualifications of the Holy Dragon city's residents even more popular. Countless people were racking their brains to join the Holy Dragon City.

To be able to become a resident of a sub-city of a continent-level city was an honor that was definitely worth fighting for!

Tang Zhen didn't deny it, nor did he admit it. Other people could say what they wanted to say. He just treated it as if he was pulling a Tiger's skin!

After recalling his thoughts, Tang Zhen began to tell Qian Long, Yue Lang, and the others about the things they needed to pay attention to after arriving in the original world. At the same time, he promised to help them transport the items they had purchased for free!

In addition to the main actors of the movie, Tang Zhen would also bring Murong Zi Yan and Xiao die along this time. He would let them have a tour of the original world and let his sister meet her sister-in-law.

Just like the transmigrators from their original world, Qian Long and the others also needed to undergo soul teleportation to arrive in their original world. Tang Zhen had already used the [super creature shaping machine] to create the bodies that they could use, and they could be teleported at any time.

The soul transmission array seemed to be operated by the residents and transmigrators of Holy Dragon City, but Tang Zhen could remotely control its core. Therefore, without Tang Zhen's permission, no native of Lou city could use the soul transmission array to return to their original world.

Even the soul transfer cabin needed the soul transfer array to transfer the soul. Otherwise, it was impossible to transfer the soul to the world of loucheng with just a small transfer cabin.

The soul teleportation pod didn't have that much energy, and it didn't have specific coordinates. At best, it could only be considered a transmitter.

It was like a mobile phone that was inserted with a SIM card. If Tang Zhen didn't open a service for it, then it naturally couldn't dial a call. The same logic applied to the soul transmission cabin!

After recording everyone's soul fluctuations, everyone lay down in the soul teleportation cabin and fell into a deep sleep.

After Tang Zhen explained a few things to his assistant, he was also sent back to his original world!

Chapter 567 Landing in the original world _1

In the desert tower of the Asian Alliance, it was early in the morning.

Cars sped down the road and stopped near rows of huge warehouses.

Most of the materials needed for the loucheng world would be transported here and then taken away by Tang Zhen.

When they encountered special items, the league would send elite personnel to escort them.

If someone who didn't know the truth saw the items in the suitcase of these Secret Service agents, they would definitely feel incredulous, because there were only a few cards in the suitcase!

Only those in the know would know that both the card and the item within it were priceless!

After the supplies were unloaded, these trucks would also transport some specially sealed items. Each truck would also have someone to escort them. The whole process was meticulous!

Ever since Tang Zhen had built the soul transmission array here, the desert under his feet had immediately become lively. Not only had the roads been rebuilt, but they had also carried out large-scale greenery, turning the desert into an oasis with the chirping of birds and the fragrance of flowers.

At this time, a huge warehouse had been built in the giant square, and hundreds of soldiers with loaded guns were guarding it.

Other than these soldiers, there was also a group of people waiting there, staring at the rows of soul teleportation cabins in the warehouse.

They had been informed earlier that a group of real guests from another world would come to the original world today, so they had come early to wait.

“Brother, when do you think they’ll arrive?”

“It’s almost time, he should be here soon!”

Most of the people waiting in the line were military personnel, but there were also a few young men and women mixed in. They were all dressed in casual clothes, and from their clothes, they were obviously not soldiers.

The fact that these young men and women could come here at such an important moment clearly showed that they had extraordinary identities.

The two people who had just spoken were actually brother and sister. They were both fanatical world fans of loucheng and had long yearned to go to the World of loucheng to see it.

However, the siblings’ parents firmly opposed it and refused to let them go no matter what. This made the siblings depressed.

In fact, ever since the news of the existence of the world of loucheng was confirmed, there were countless people who were obsessed with the world of loucheng in the original world. Their biggest wish was to go to the World of loucheng and take a look.

It was a pity that so far, there were very few people who could realize this dream.

Ever since the news that Yue lang and the others were coming to the original world some time ago, countless people had cheered for them. They had tried their best to get tickets just to satisfy their curiosity or to see their idols with their own eyes.

After the two siblings learned of this news, they pestered their father and got this opportunity.

Just as the two of them were thinking about how to take a photo with Yue lang and the others, they saw a figure flash in front of them, and then a man with an oppressive aura suddenly appeared in front of them.

“Ya!”

The girl was shocked at first, but when she saw the man’s face, her eyes lit up.

“Brother, look, it’s the Holy Dragon City Master!”

When the man who was fiddling with his phone heard this, he immediately raised his head and saw Tang Zhen’s figure.

cool, too cool! That must be the legendary teleportation!

The man looked at Tang Zhen's back, his eyes filled with admiration and envy. He was full of admiration for this powerful person who had terrifying abilities and had built the Holy Dragon City alone in another world. He regarded him as an idol.

"Little sister, do you think we'll be rejected if we take a picture with him?"

The man asked the girl in a low voice. From his expression, it was obvious that he was not very confident.

there shouldn't be a problem. I heard that Mr. Tang Zhen is very easy-going and never puts on airs!

The girl who came from a military family was clearly very bold. After she finished speaking, she actually directly crossed the crowd and walked in front of Tang Zhen.

"Hello, Mr. Tang. Can I take a picture with you?"

After hearing this, Zhen Tang, who was talking to director Tang, turned his head and nodded with a smile.

Speaking of which, this was the first time someone had asked him to take a picture with them. Even if the others had this intention, they did not dare to open their mouths due to Tang Zhen's might.

Tang Zhen, who was lamenting that he finally had the treatment of a celebrity, naturally chuckled and stood side by side with the girl.

"Dad, hurry up and help me take a few photos!"

As the girl spoke, she handed the phone to director Tang, who was smiling bitterly at the side. Then, she excitedly held onto Tang Zhen's arm.

"So it's your daughter, like father like daughter!"

Tang Zhen said to director Tang with a smile, but the other party shook his head and glared at the girl. The girl pouted and made a face.

After taking two photos, the man beside them came over and asked. He then found out that the two siblings were twins!

After taking the photos, Zhen Tang smiled at director Tang and said, "He has both a son and a daughter, and they're both so outstanding. Director Tang is really blessed!"

"Don't mention it. These two little Rascals are so troublesome. I get angry whenever I see them!"

Although director Tang said that, he had a look of Love on his face that only his parents would have.

At this moment, the runic magic circle in the sky suddenly flickered continuously. The occurrence of this situation proved that a soul had been transmitted over.

A minute later, the operating Soul transmission cabin was pushed open one after another. Then, many familiar figures appeared before Tang Zhen.

"Haha, we've finally arrived at the city Lord's hometown!"

Qian Long said to Xiao Rui with a smile. However, he immediately sniffed, as if he had smelled something strange.

It wasn't just Qian Long, even Yue lang, Murong Zi Yan and the others who got up after him also smelled the strange smell in the air. It was far from being as fresh as the air in the loucheng world.

Those who had never been to the world of loucheng had no idea how dirty the air in their original world had become. No wonder many time-travelers wanted to stay in the world of loucheng permanently after they arrived.

Director Tang and the others, who had been waiting for a long time, immediately went up to them and shook hands with Qian Long and the others.

Tang Zhen casually introduced them from the side. Director Tang and the others already had information on Qian Long and the others, so they naturally had a long spiritual relationship with them.

The higher-ups of the Holy Dragon City now had some understanding of the original world's culture, so it was not difficult to talk. They had a good time chatting.

The four demonic humans didn't say anything. They just chuckled, not knowing that countless people were secretly looking at them.

These four foreign people all had their own characteristics. In other words, they didn't look like humans at all, which was quite a visual impact.

While Qian Long and the others were talking to director Tang, director Tang's twin children walked up to yuelang, Murong Ziyang, and the others, happily asking to take a photo with them.

The half-mechanical bodies that Murong Zi Yan and the others were residing in were all perfectly replicated after Tang Zhen scanned them. They were exactly the same as the original body!

Therefore, the two siblings and several other young people recognized Yue lang and Li Sha at a glance, and all of them surrounded them in excitement.

They were fans of yuelang and the others, so they naturally wouldn't miss the opportunity to take photos with these movie stars from another world.

Murong Zi Yan and Xiao die had always been by Zhen Tang's side, so he had also introduced them to director Tang and the others.

After talking for a while, director Tang invited everyone to the airport not far away, then they took a plane to a Super City in the Asian Alliance!

Chapter 568 The daily life of! visitor from another world _1

The plane was flying at an altitude of ten thousand meters. Qian Long and the others sat on the soft seats in the cabin, chatting from time to time.

Qian Long and Xiao Rui were no strangers to the original world. The two of them had read many books and videos about the original world, and they had also worked with many transmigrators.

However, when they really came here, they still felt that their eyes were not enough. Everything they saw was fresh, and they didn't look like the usual cultivator commanders of the Holy Dragon City.

It was the same for the others. They often turned their heads to look at the scenery outside the plane in a daze, or from time to time, they would look through the schedule sent by the staff, or listen to their explanations.

Although the staff members appeared very professional, the curiosity in their eyes could not be hidden. After all, they were real visitors from another world. It was not an exaggeration to say that they were aliens.

The beauty of Murong Zi Yan, Xiao die, and the others made people feel inferior. The strange appearance of the four demonic humans made people gasp in shock. And the Qi flowing out of Qian Long and the others made people not dare to look at them directly.

These men were all experts who had climbed out of mountains of corpses and seas of blood. Their killing intent had already been deeply integrated into their souls. Even if they had changed bodies, it could not be hidden.

However, there were a few girls who looked at Qian Long and Xiao Rui with blushing faces, making the two of them secretly feel proud.

The journey was silent. A few hours later, the plane landed at a military airport outside the city. When the group got off the plane, they saw a group of people waiting to welcome them.

Xu Feng and Tang Zhen's younger sister were also among them. When they saw Tang Zhen and the others getting off the plane, they immediately greeted them with a smile.

After exchanging a few simple words, Tang Yajie came to Murong Ziyang and Xiao die and sweetly called out, "sister-in-law!"

When Murong Ziyang and Xiao die heard this, they immediately revealed a happy smile. They had seen Tang Ya Jie's photo in Tang Zhen's room and knew how much Tang Zhen loved his sister.

Even though it was the first time they had met, they had a good impression of Tang Yajie.

After hearing that the gemstones in the original world were very precious, Murong Ziyang and Murong Liuying immediately rummaged through the warehouse in the Holy Dragon City and prepared a big gift for Tang Yajie.

Now that they had met Tang Yajie, they naturally had to give her a gift. Murong Ziyang opened her small bag and took out an exquisite purple box.

As the exquisite box was taken out, the people around them immediately smelled a strange fragrance that lingered around their noses for a long time.

This fragrance was extremely pleasant. Just taking a light breath of it would make one's spirit shake and all the fatigue in one's body disappear. It was as if one's soul had lightened by a few taels!

Even if he didn't say it, everyone knew that the box must be priceless. They just didn't know what was inside.

Some people were also preparing to ask director Tang about the origin of the strange fragrance. If possible, they would get a share of it.

It was a pity that these people were destined to return in disappointment. After all, this purple box that gave off a strange fragrance was quite valuable even in the tower world.

It was made from the core of a special kind of tree, which required thousands of years to mature. Moreover, it was rare and only grew in the dangerous lands of the fierce Valley!

The use of the tree core was similar to that of a soul crystal. Both could clearly increase a Holy master's mental strength and were equally valuable.

And the box in Murong Ziyang's hands was made from an extremely rare ten thousand year old core. Its value was needless to say!

sister, this is a gift from your sister-in-law Xiao die and I. Let's see if you like it!

While Murong Ziyang was talking, she had already handed the box to Tang Yajie, signaling her to open it.

"Thank you, sister-in-law. I won't stand on ceremony then!"

After Tang Yajie said this, she opened the box gently, and a bright light burst out.

It turned out that there were dozens of flawless seven-colored gemstones in the box. Anyone who saw them would know that they were not ordinary items. Each of them could be said to be priceless.

According to the prices in the original world, the value of this gift was enough to make countless people's jaws drop!

Of course, this small box of gemstones was only one of the gifts for Tang Yajie. It was not convenient to take out the rest now.

"Thank you, sister-in-law, I love it!"

Tang Yajie took a deep breath of the strange fragrance, then put the box away carefully. She knew very well that the box that Murong Ziyang had given her was extremely precious.

After leaving the airport and getting into the car, the group once again headed to the rest area in the city.

It was only now that Qian Long and the others could truly see the bustling scene of their original world, and they were deeply shocked.

They looked at the endless traffic on the road and the rows of buildings, feeling that their eyes were not enough.

Although the current Holy Dragon City had been built quite well, in terms of scale, it could not be compared to the supercities of the original world.

The only thing that made Qian Long and the others uncomfortable was that the air quality in their original world was simply too poor. Being in such a place even made them feel short of breath.

After about two hours, they arrived at the hotel where they were resting. When they got off the car, they also attracted countless people to watch.

The entire Street was almost filled with people. When they saw Yue lang and the others appear, a huge sound wave instantly burst out, and the sound really shook the nine Heavens!

These people had specially rushed over after receiving the news. They were shouting the names of yuelang, Xiao Rui, and the others, and constantly taking out their mobile phones to take pictures. If it wasn't for the people maintaining order, they would have rushed forward excitedly.

Tang Zhen had told them about this long ago. Therefore, Qian Long and the others weren't surprised. However, to them, it was definitely something that made them happy to have so many people spectating them.

Although everyone who came to the original world this time were all cultivators and their physical fitness was extraordinary, they should not be tired and unable to adapt to the new body like ordinary transmigrators. However, Tang Zhen still let them rest for a while.

If you really didn't want to rest, you could also walk around the hotel with the staff, but you were not allowed to go out at will.

Tang Zhen ordered his men to call Xu Feng over. The two of them had not met for a long time and naturally had many things to say.

On the other hand, after Qian Long and Xiao Rui returned to their rooms, they immediately changed their clothes and began to stroll around the hotel with the security guards.

The four guards accompanying them were all elites that had been temporarily selected, and they could be said to have experienced hundreds of battles. However, even so, when they were beside thousand Dragon and little Rui, they still felt suffocated.

Compared to ordinary people, these guards' senses were much keener. Naturally, they could sense the terrifying strength of the two men. It was definitely not as simple as just being powerful.

In their eyes, the strength of a Lord-tier cultivator was not much different from that of a Superman.

If the two of them were to attack, the four of them would probably not even last a few seconds before they were all knocked to the ground.

They looked at each other and exchanged glances, then nodded.

Originally, their mission was to prevent the two from getting hurt. But now, it seems that they have to be on guard against the two humanoid beasts from hurting others!

After strolling around the hotel, the two also played with some things. They were fresh, but they didn't feel excited enough.

For a cultivator who dealt with killing all day long, these things for fun were too mild.

After walking around, the two felt a little bored, so they chatted with the four guards and asked about the fun things in the original world.

The four security guards couldn't wait for the two of them to stay in the hotel, so they naturally started playing dumb, making Qian Long and the other man extremely depressed.

If they were in the world of loucheng and their subordinates dared to treat them like this, the two of them would have already kicked them in the butt.

After attending a banquet that night, everyone went back to their rooms to rest after it was midnight.

The next morning, they took a special car to a certain location to meet with some of the big shots and media in the Asian Alliance.

On the other hand, the various media outlets in their original world were all filled with news about thousand Dragons. Therefore, when Tang Zhen and the others arrived at their destination, the streets were almost filled with people waiting to watch!

Amidst the screams of countless people, Tang Zhen and the others entered a building and began another round of social interaction!

Chapter 569 The resident recruitment plan (1)

After Tang Zhen and the others entered the magnificent building, another group of men and women surrounded them. They constantly sized up yuelang and the others, enthusiastically shaking hands and taking photos.

Qian Long and Xiao Rui's expressions were a little numb. It was obvious that the two of them didn't like this kind of situation, so apart from the reporters' questions, they rarely spoke.

However, this was also in line with the temperament of the two people, making people keep a respectful distance from them, but at the same time, it would also make people feel awe!

Tang Zhen changed his appearance a little and pretended to be a staff member. He quietly stood in the corner and looked at the radiant yuelang and Lisa standing together. A group of reporters whose eyes were about to fall out kept taking photos of them.

Currently, Tang Zhen's status was special. It was not suitable for him to appear in such an occasion. Hence, he only needed to watch by the side.

After two hours of activity ended, everyone returned to their resting place. Each and every one of them shouted out that they were tired. Qian Long had a bitter expression as he asked Tang Zhen if he could skip the next activity.

their questions are too strange. I can't stand it!

After the novelty wore off, all that was left for him was boredom. When the reporters interviewed him, the questions they asked made him feel like he was sitting on pins and needles.

Tang Zhen could tell that Qian Long and little Rui were a little restless, so he warned the two of them to behave themselves. Otherwise, he would not let them off easily!

This time, he came to the original world to seek stability. Tang Zhen didn't want to have any unexpected twists and turns.

The two of them immediately lowered their heads when they heard this. The crooked ideas that had been brewing in their hearts were completely extinguished at this moment.

Although Tang Zhen was usually kind, it didn't mean that he didn't have principles. Once he got angry, not many people would be able to endure his anger.

Tang Zhen also knew that they didn't like this kind of activity. Fortunately, they had already done what they needed to do. In the next two days, they would be able to move around freely under the accompaniment of the guards. They wouldn't even be restricted from shopping and playing.

After hearing this, everyone's faces showed joy. It was obvious that they were tired of the various activities in the past two days and were all looking forward to seeing the streets.

After Qian Long and Murong Ziyang left the hotel to go shopping, Tang Zhen went to the conference room of the hotel and saw Ivanov and the others who had rushed over from the Ice Bear Alliance.

Upon seeing Tang Zhen enter the wilderness, everyone stood up and bowed. Their faces were filled with respect.

The dozen or so people in this room were all part of Tang Zhen's team in the original world. Now, with Tang Zhen's help, they had all become important figures.

The reason why they were all gathered here was to prepare for the Holy Dragon City's expansion into the overseas battlefield.

With the Holy Dragon City's current development speed, the lack of residents would become greater and greater in the future. Therefore, Tang Zhen had to replenish enough residents as soon as possible to prevent the situation of "nine out of ten rooms being empty"

Of course, the "nine out of ten empty rooms" here did not mean that a large number of residents had fled due to casualties. It was true that only one out of ten houses was occupied!

The Holy Dragon City did not lack a floating population. What it lacked was real residents!

Those top-tier towers that had been developed for countless years would control large areas of land and have many auxiliary cities. After a long period of reproduction, they had no lack of residents.

It could be said that in the areas controlled by the top towers, the ratio of residents to Wanderers was very different. Countless people fought for a spot to become a resident of the tower but could not get it.

Therefore, their city buildings were always full. A situation like the Holy Dragon City would never happen. There were many buildings, but all the residents added together did not even fill two of them!

This was not a good sign, because once the Holy Dragon City opened up an overseas battlefield, the Holy Dragon City's manpower would inevitably be stretched thin again.

The transmigrators from the military could be borrowed, but Tang Zhen didn't want to use them because they were partners and not his residents.

Tang Zhen's goal was different from his partners. He wanted a top-notch City Tower that could float in the sky and form its own country. His partners wanted a piece of fertile land and were not very interested in the city Tower.

Therefore, conquering the continent and expanding their territory had become their ultimate goal.

A place like the overseas battlefield was strange and dangerous. It was definitely not suitable for development and reproduction, so his partners had no interest in that place.

In this way, even if they helped Tang Zhen to open up overseas lands and help the Holy Dragon City upgrade their City Towers, they might not be willing to do so. Moreover, Tang Zhen had to return this favor.

Especially since they were at a critical moment in developing land, time was precious and personnel were effective. They were even less interested in participating in this matter that had no benefits.

Since they were working partners, they had to respect each other. If others were unwilling, there was no need for Tang Zhen to force them.

Since this was the case, Tang Zhen might as well settle it himself!

With the abundant resources of the original world, as long as Tang Zhen had enough manpower, it would not be difficult for the Holy Dragon City to open up an overseas battlefield!

As a result, Tang Zhen would have to consider personally recruiting the residents of the original world. For this matter, the business partners would not stop him. On the contrary, they were happy for Tang Zhen to do it.

Because this way, they would be able to concentrate their own forces and speed up the speed of their conquest!

There was no end to mankind's ambitions. In fact, it could be seen from the performance of their current partners that they were eager to conquer the entire continent.

However, this was simply unrealistic. Not to mention that no one had figured out how large the area of the continent was so far, just the known major forces alone were not existences that could be easily defeated by partners.

Not to mention that in the unknown region far away, there were countless unknown races and terrifying towers that aimed to destroy other worlds!

After these partners suffered losses, they would guard their current land and develop according to the rules of the world of loucheng. After a few hundred years, they might have the possibility of dominating the continent.

Even so, the resources and land obtained in the early stages were enough for the original world to enjoy endless use!

The original world was indeed very powerful, but the world of loucheng was even more powerful. This was an undoubted matter. Too much greed would lead to a backlash, and it would definitely not be worth it!

He believed that one day, his partners would realize this!

Tang Zhen's initial goal was to turn his original world into a super logistics base. This was why he allowed the forces of his original world to participate.

Under their operation and maintenance, the main energy of the original world would be focused on the Lou Cheng world. The corresponding materials would also be produced on a large scale. This way, Tang Zhen's goal would be realized.

I'll guide you to produce the materials I need, and then get a portion of what I need from them. I only need to pay a very small price.

Now that the plan had already succeeded by more than half, the original world had also been completely tied to the war chariot by Tang Zhen!

Therefore, after the Holy Dragon City was upgraded to a building-level city, Tang Zhen would start to focus on upgrading the level of the city and would temporarily put aside the matter of expanding the territory.

When the Holy Dragon City was promoted to the top level, wherever the floating city went, resources would be available. Where would not be his land?

After chatting with Ivanov and the others for a while, Tang Zhen put forward his plan to recruit at least 500000 permanent residents.

This plan was very large, so it required the cooperation of many people to implement. Tang Zhen didn't want to rely on the strength of his partners, so Ivanov and the others were naturally the best helpers.

In order to make these residents willing to go to the World of loucheng, Tang Zhen gave an extremely generous compensation. If it was calculated according to the number of people, the compensation amount alone would reach tens of billions!

This sum of money was not a problem for Tang Zhen and his subordinates. They could easily raise it.

With the stimulation of this huge reward, he believed that many people would choose to go to the World of loucheng. After all, many people would not be able to earn this money even if they saved their entire lives without eating or drinking.

In terms of the choice of residents, the higher the quality, the better. Furthermore, the ratio of men to women had to be balanced to ensure that the reproduction of the next generation would not be affected.

Also, the recruitment this time would cover the entire original world. Try to let different races from the original world join Holy Dragon City. Anyway, they had all transmigrated with their souls, so their appearances would not be different.

This would prevent too many residents of the same race from affecting the management negatively.

After Tang Zhen stated his request, Xu Feng, Ivanov, and the others also expressed their opinions and gradually perfected the plan.

This meeting lasted for a few hours. Then, Tang Zhen invited them to taste the food of the loucheng world and gave each of them a special product of the loucheng world as a benefit for his subordinates.

After everyone returned, the recruitment plan was officially launched on a global scale. Those who volunteered to go to the World of loucheng would receive a huge amount of compensation after passing the review and then receive a period of intensive training.

After they passed the training, they would be sent to the world of loucheng in batches and become official residents of the Holy Dragon City!

Chapter 570 Big recruitment in the original world

The blazing sun in the sky was like fire, scorching the living beings on the dry land.

Huseny got up from the old mud brick bed and looked at the sky outside through the window that had a few pieces of broken glass hanging on it.

It had not rained for a long time, and the ground was extremely dry. The well nearby was already dry. Even if one grabbed the soil at the bottom of the well, one could not feel the existence of a trace of water.

If this continued, he was afraid that someone would really die!

From a young age, huseny had become used to death. From as long as he could remember, he and the people around him had always been struggling to survive. Many of his acquaintances and childhood playmates had died one after another in the process of growing up.

In a place like this, death might have already become a form of release.

Although life was full of hardships, the days had to go on. As long as he didn't die, Huseini would have to struggle to support his family.

He had a wife and three children. The little ones were like him, running around in old clothes, while he and his wife were worried about filling their stomachs.

Fortunately, most of the people in the village were like this. In contrast, Huseni felt that life was not so hard.

Everything was afraid of comparison. In this kind of environment that was cut off from prosperity and impetuosity, people could not see hope and would not have so many selfish thoughts. Their minds were also much purer.

The only thought in the hearts of the men around him, like huseny, was to live a better life and not continue fighting.

Putting on the crumpled clothes, huseny walked out of the house. The piercing sunlight made him squint his eyes. He subconsciously lowered his head and glanced at the mud wall not far away from him.

A few hunchbacked men in tattered clothes were gathered together, discussing something in low voices.

When they saw Huseini, they gave a simple greeting and started chatting together.

Recently, a new mine had been built not far away, specializing in mining the colored stones that the people of the Asian Alliance liked. Husani and the men were going to ask if they were still hiring miners.

Although the mining work was dangerous and hard, and the special smell of cutting stones could almost choke people to death, it could still provide huseny and the others with a salary that could fill their stomachs.

Huseny and the others were not afraid of the hardships because they had always made money by working hard. They were forced by life and had no choice.

The only thing they were worried about was that the mine did not recruit people, so they would have no money to live, and their family and children would starve.

Two more thin young men came over. Everyone was here, and Huseni and the others were ready to walk to the mine.

Just as they reached the village entrance, a few cars suddenly drove into the village. When the cars stopped, a few men with rifles jumped out.

Other than these men, there were also a few men and women from the Asian Alliance. They glanced at huserne and the others, then walked over.

Huseny looked at these people coldly, his eyes sweeping over the rifles in the hands of the guards. There was a faint reluctance in his eyes, as well as a trace of pain, which was soon replaced by numbness.

Hello, we're employees of the Holy Dragon Corporation. We're here to recruit workers. May I know where the village elder is? "

A man in casual clothes from the Asian Alliance asked. His gaze swept past everyone's hands with a faint smile on his face.

The interpreter said to huseny and the others. After getting the answer, he told the young man.

by the way, where are you guys going? do you want a good job? "

After the young man learned the elder's address, he didn't leave immediately. Instead, he asked huseny and the others.

Huseny and the others, who were looking for jobs, were stunned. They looked at each other, and then he asked, "What kind of job? how much can you pay?"

the salary is very high, so high that it's beyond your imagination. However, you'll have to go to a very far place and can't go home for a long time!

I'll go," the young man said indifferently, then looked at huseny and the others without blinking.

"Can you tell me what kind of job it is and how much you're paid? if you don't tell me clearly, none of the young men in our village will go with you!

Of course, if you give us enough money, we'll do anything you want!"

The old man next to huseny suddenly said. He sized up the young man, a hint of understanding on his wrinkled face.

Perhaps he had already seen through the intentions of the young man and the others, which was why he had said such a thing.

a one-time payment of 150000 dollars, but you have to sign a contract. Also, the place of work is not here, but the loucheng world!

The young man gave the answer, then looked at the old man and added, " we don't just want young people. If someone has carried a gun for their entire life like you, we will also recruit them!

The old man frowned and looked at the young man. is this money from selling my life? that's quite a lot. Also, where is the world of towers? "

The young man shook his head. it's not money for risking your life. It's just an advance payment. As for where the world of loucheng is, you can ask around. Many people know that place now.

If you've made up your mind, go to the town ahead for an interview. Once you pass, you'll be given a sum of money on the spot!"

After saying that, the youth didn't look for the village elder anymore. Instead, he jumped on the car and headed straight for the next village.

Husani and the others watched the carriages disappear into the dust, then turned to the old man, as if they wanted to hear his opinion.

The old man had been fighting wars his entire life, and to be able to survive in a hail of bullets, he was definitely an old fox that had turned into a demon.

Seeing that everyone was looking at him, the old man sighed, " "Since this person has taken a fancy to our ability to fight, I believe that in that world of towers, it is inevitable that we will continue to fight.

However, it was worth it to give 150000 Yuan in one go. At the very least, it could let the family live a good life and not go hungry.

I'm just going to take a look. As for what you think, I don't care."

After saying this, the old man turned around and went home. He was not going to go to the mine to ask about work.

He didn't expect his old life to be worth so much money. Since that was the case, why was he still hesitating when he was about to die?

Huseny and the others looked at each other. No one said anything, but everyone had an eager look on their faces.

150,000 U.S. Dollars was an astronomical figure for the people of husani's country!

When he returned home, his wife was picking up wild vegetables on the ground. She had mixed them with a kind of rough grain, which was today's food.

After seeing huseny's figure, a hint of disappointment flashed through his wife's eyes. Then, she lowered her head and continued to work in silence.

Her husband had just left the house not long ago, and now he was back home. Obviously, there was no hope for his work.

At the thought that the children would continue to starve in the coming days, the wife's eyes became hazy, and tears silently flowed down her rough cheeks.

Huseny and the other children ran past the door, their tattered clothes covered in dust. Barefooted, they sprawled at the door and glanced at the food made by their wives, swallowing their saliva.

Children got hungry easily, and they were not full to begin with, so even when they saw the crudely made food, they still drooled.

Huseny looked at the scene in front of him in silence, feeling his chest tighten. He took a few deep breaths and then squatted down beside his wife.

The wife looked up at huseny in shock, because she felt that her husband's behavior today was a little strange.

"The Holy Dragon Corporation is looking to recruit people. They'll pay 150000 United States Dollars once they're hired, but they're going to work far away and won't be back for a long time.

I want to try. If I'm accepted, the children won't have to go hungry."

After saying this, husenet turned around and walked out of the house. Under the scorching sun, he headed straight for the small town more than ten kilometers away.
