

## Alternate 581

Chapter 581 The emissaries of heaven battling city

Huseny was very lucky. It was his first attempt to communicate with the mother tree, and he had inexplicably obtained this special energy connection!

Before this, countless people had tried to connect to it, but they could not even connect to the mother tree's normal energy, let alone the special energy that represented death and slaughter!

This time, there were a total of 100 people who had comprehended it, and there were many people whose perception was stronger than his. However, in the end, he was the only one who had obtained the connection to this special energy.

It could only be said that the tsundere mother tree was willful once again, randomly choosing one person out of a hundred people, and huseny was the lucky one.

From now on, huseny would officially become a cultivator of the mother tree, taking on the killing task of protecting the mother tree. He might not be able to leave the land covered by the mother tree's consciousness for the rest of his life.

This kind of mother tree cultivator was different from ordinary mother tree cultivators because he was the medium used by the mother tree to release the special energy in his body. This energy was powerful and violent, so huseny's combat power was several times stronger than cultivators of the same level!

If his body could withstand the impact of this energy, huseni could even fight a Lord cultivator several levels above him. However, his body would be completely destroyed, and he would have to replace it with a new one!

He didn't need to cultivate to possess powerful strength, but the price he had to pay was "death" every time he fought someone of a higher realm. He didn't know if he was lucky or unlucky!

Tang Zhen shook his head and laughed softly after seeing this scene. He turned around and returned to his City Hall.

Yesterday, an emissary from heaven battling city had asked to see Tang Zhen. At that time, Tang Zhen was in his original world, so he didn't see this emissary. Today, he just happened to meet this emissary.

Tang Zhen was also very curious about the messenger from heaven battling city who had suddenly requested to see him. He wondered why they had come here.

Shortly after returning to the city Lord's Hall, the emissary from heaven battling city walked in and bowed to Tang Zhen.

"Heaven battling city's Zhou Taikang pays his respects to the Holy Dragon city's city Lord!"

This Zhou Taikang's face was as red as a date and his body was abnormally large. Together with his mo weapon armor, he appeared abnormally mighty.

He was a two star horde leader, and his aura was calm. His words were neither humble nor overbearing, and he had the demeanor of a great general.

Tang Zhen gently nodded and invited Zhou Taikang to sit on the sofa on the side. He said in a clear voice, "I don't have much contact with heaven battling city, but I wonder what business Your Excellency has with this Tang?"

Hearing this, Zhou Taikang didn't hesitate and directly said, "This one's trip to Holy Dragon City this time is firstly to establish an alliance with Holy Dragon City, so that we can help each other develop together. This will be very beneficial to both sides.

secondly, I hope to purchase a batch of firearms from Holy Dragon City. My heaven battling city will also use items obtained from the Otherworld to exchange for them. At the same time, I will also provide you with an item exchange list!

Third, I heard that city Lord is knowledgeable and has amazing strength, as well as profound knowledge in runic magic circles. Therefore, I've sent a message on behalf of my heaven battling city's elders, inviting city Lord to explore a special tower!"

After Zhou Taikang finished this sentence, he sent a scroll-like object to Tang Zhen. After unfolding it, he stretched out his hand and gently touched it.

A three-dimensional image immediately appeared in front of Tang Zhen's eyes. It was filled with all kinds of items and materials, and the price of the exchange was clearly indicated.

Tang Zhen took a look and sighed in his heart. As expected, the foundation of these top-notch towers was extremely deep. Just by looking at the scroll that displayed the images and the various items on the list, it was clear how rich the gains these top-notch towers had obtained from the battlefield in the foreign world were.

In comparison, Holy Dragon city's Foundation was still lacking.

After carefully looking at it, Tang Zhen turned to look at Zhou Taikang and made a decision in his heart.

"I want 10000 copies of items numbered 19,27,81, and 103. I wonder if you can take them out?"

Zhou Taikang recalled the items Tang Zhen had chosen and nodded, we have all the items you want, and the quantity meets the requirements. However, we need the same number of firearms, and the number of bullets must be a hundred times more!

Tang Zhen shook his head and said to Zhou Taikang, "You're asking for too much. Moreover, I can't possibly trade the firearms that Holy Dragon City is using now to you.

If you really want it, I can give you the single-shot rifles in the Holy Dragon city's inventory, according to the amount you asked for!"

Frowning, Zhou Taikang thought for a while before nodding happily, if that's the case, if Holy Dragon City can guarantee a continuous supply of bullets, then we'll trade according to the amount that the city Lord has stated.

Tang Zhen nodded, indicating that there was no problem. Soon after, he curiously asked, "Although these rifles are quite useful, they are dispensable to your heaven battling city. Can Your Excellency tell us who will be using them?"

Hearing this, Zhou Taikang didn't hesitate and straightforwardly replied, "There's no need to hide this matter from the city Lord. Since you want to know, I will naturally tell you the truth.

The cultivators of heaven battling city really don't need this batch of rifles, but they will be transported to the other world for the use of the soldiers in the affiliated loucheng of heaven battling city.

That Otherworld has been occupied by heaven battling city for nearly a hundred years, but we've never been able to obtain the world's origin, so it's been temporarily used as a material base to supplement the daily needs of the tower.

However, the Aborigines there are particularly difficult to deal with. They formed large and small rebel armies to attack our heaven battling city's stronghold, causing a lot of casualties to the soldiers in the city.

In order to strengthen the defenses of that world, we intend to strengthen the defenses of the soldiers in the city. The firearms used in Holy Dragon City are easy to operate and have good lethality, so we have the intention to buy them."

After Zhou Taikang explained, he raised his head and looked at Tang Zhen. He knew that Tang Zhen would definitely have more questions.

Tang Zhen nodded. Seeing Zhou Taikang's expression of waiting for his question, he smiled and said, "Sir, why don't you say what you can to avoid this Tang's questions?"

Zhou Taikang also smiled and said to Tang Zhen, "City Lord, you must be very curious as to why the elders of heaven battling city invited you to explore the city."

Tang Zhen nodded. He was indeed very puzzled.

Because according to the information he had obtained, the cultivation of this elder of heaven battling city wasn't weak, and he should be a King grade cultivator. With this kind of ability, there was really no place that could stop him.

For him to personally invite them, either they had ulterior motives, or this loucheng was really not simple!

"This City Tower has actually been discovered long ago. After some analysis, it was discovered that this City Tower is actually a special national-level city!

However, for some unknown reason, an abnormal situation had occurred in this national-level city. Now, it had completely lost control and was wandering around the continent all day long, witnessed by countless cultivators.

However, almost all the cultivators who tried to get close to the city were killed by it. Therefore, if the cultivators who were not strong enough tried to get close to the city, they would be courting death!

Because national-level buildings could enter the other world to plunder independently, they must have accumulated countless rare treasures, and even the existence of the world's origin, which was completely worth the risk to explore!

Right now, that tower is located in a certain area of the continent, and our heaven battling city's elders have already obtained its specific location, so we've invited city Lord to go with us!"

After Zhou Taikang explained, he waited for Tang Zhen's reply.

Tang Zhen frowned and thought for a moment, then suddenly raised his head and looked at Zhou Taikang, you said that the City Tower is moving around. Could it be that the City Tower can move? what kind of city is it? "

Zhou Taikang smiled and said word by word, that national-level building is actually a super giant!

Chapter 582 Heaven battling city's elder

"This national-level city has a rare appearance. It's a super giant with three heads and six arms. Its body is as tall as a mountain, and its skin is invulnerable.

Ever since this city went out of control, it had been wandering around the continent. Wherever it passed by, people would be plunged into misery and suffering. It was said that dozens of cities had been destroyed.

There were nearly 100000 cultivators who besieged this City Tower and tried to destroy it, but they all managed to escape in the end. Countless cultivators who participated in the battle were either killed or injured!"

After listening to Zhou Taikang's introduction, Tang Zhen's heart slightly shook.

He was no longer a newbie. He knew that there were many special loucheng in the world of loucheng, and the biological-type loucheng was one of them. However, he had never seen a biological-type loucheng so far!

He had seen two plant-type wild buildings, one of which was the current mother tree building, and the other was the man-eating wild flower building. The building foundation was still in his pocket.

Therefore, when he learned from Zhou Taikang about this biological city, especially a national-level city, he immediately had the idea to go and see it.

With Tang Zhen's current strength, ordinary King level cultivators weren't his opponent at all. Therefore, he wasn't afraid that the elder of heaven battling city would scheme against him.

If the other party really had evil intentions, at worst, they could just fight it out or teleport away, and when there was an opportunity in the future, they could go to heaven battling city and detonate a nuclear bomb to take revenge!

Of course, the possibility of the other party plotting against him was very low. He must have really taken a fancy to his strength and wanted to invite him to explore with him.

As Zhou Taikang said, there must be countless treasures in the National towers. Since he was a bit tight on finances recently, Tang Zhen didn't mind upgrading all the level 5 towers to Level 6 if he could take advantage of this opportunity to make a fortune!

Anyway, after Lou Cheng reached Level 6, he would no longer need brains for future advancements. In that case, he might as well play big!

Thinking of this, Tang Zhen directly nodded and agreed. Zhou Taikang immediately gave him a stone card and told Tang Zhen that it was a teleportation card.

As long as one used this transfer card on the cornerstone platform, one could choose a place to transfer. At the same time, Zhou Taikang also told Tang Zhen the transfer location.

It was an area a hundred thousand miles away from Holy Dragon City. The great elder of heaven battling city had already left and was waiting for Tang Zhen's arrival.

After ordering his assistant to accompany Zhou Taikang to complete the transaction, Tang Zhen gathered the Holy Dragon city's high-level officials and told them about his decision to go on a long journey.

While he was away, the teleportation and training of the new residents went on as usual. At the same time, they continued to prepare for the upgrade to the level 6 building.

After Tang Zhen returned, the Holy Dragon City would immediately be upgraded to a level 6 City Tower and open the overseas battlefield!

After arranging all the work, Tang Zhen headed to the room where the foundation stone platform was located and spent points to inquire about the use of this stone card.

It turned out that this kind of teleportation stone tablet was a special item. It would only be sold on the foundation stone platform after it was upgraded to a level 9 tower. The price of each stone varied, and the cheapest one would cost one million brain beads!

After using this kind of transportation stone plate, one could be transported to the location of the transportation formation at the corresponding price. It was very fast and convenient, but the price was a bit shocking!

However, if one wanted to use this stone card, one's cultivation had to be at least at the level of a three star Lord. Otherwise, they wouldn't be able to withstand the pressure of the teleportation. It was very likely that they would become a pile of rotten meat after the teleportation ended!

Tang Zhen played with the stone card for a while, then returned to his residence to inform Murong Zi Yan and Xiao die.

The two ladies were currently chatting in the bedroom. When they saw that Tang Zhen was going to go on a long journey, they were naturally a little worried in their hearts and could not help but ask a few more questions.

Some time ago, when they were teleported to the original world, Tang Zhen accompanied the two of them to have a good trip. It could be considered as compensation to the two of them.

At this moment, when he saw that the clothes of the two ladies were half-covered and the spring scenery was alluring, Tang Zhen laughed softly and waved his hand to close the door.

Two hours later, Tang Zhen tidied up his clothes and went to the spiritual race's Legacy Hall where Lingxu Zi was. He took back more than a dozen storage rings.

The price of such storage equipment was extremely high on the continent, and there were very few of them. Ordinary people had never even heard of it, let alone buy it!

Tang Zhen thought that the elder of Heaven Battling City would definitely not invite him alone for this exploration of the giant tower. Instead, he would invite at least three people.

To be able to casually give away a teleportation stone plate worth millions of brain beads, the elder of Heaven Battling City must be someone who didn't lack money. The other cultivators were also not lacking in money. Therefore, Tang Zhen was prepared to sell these storage rings to them.

At Tang Zhen's level of cultivation, the Brain Pearl was almost an external object. If it wasn't for the sake of running his own tower, Tang Zhen would rarely care about these things.

According to Tang Zhen's estimation, if he could sell all these storage rings, he wouldn't need to worry about the number of Brain Pearls Lou Cheng needed to advance!

Furthermore, Tang Zhen also had another purpose for this trip. He wanted to come into contact with the cultivators of the same rank in the world of Loucheng and see how they cultivated and what their social circles were like!

After everything was prepared, Tang Zhen wore the femme battle suit on the inside and a set of high level demon soldier armor on the outside. He directly came to the front of the foundation stone platform.

Taking out the stone card that Zhou Taikang gave him, Tang Zhen input a trace of energy to start it. Then the rolling subtitles on the cornerstone platform disappeared, and rows of names of places appeared.

After Tang Zhen took a careful look, he discovered that the names of the places displayed here were all the teleportation formation locations that matched the price of this stone tablet.

As for the location of the other teleportation arrays, they would not appear on the platform.

After choosing the name of the place mentioned by Zhou Taikang, a white light covered Tang Zhen, and then his body disappeared in an instant.

After what seemed like an instant or a few minutes, when the white light that covered Tang Zhen disappeared, he discovered that he was already on top of a mountain peak that was about 10000 feet tall.

This mountain peak was extremely precipitous. Ordinary cultivators would not be able to climb up at all, so it was difficult to know the existence of this teleportation array.

The cold wind blew on the mountain peak, but there was a kind of tree that grew close to the ground. It had purple leaves and yellow flowers, and there was a kind of crystal-clear fruit growing on it. It looked very beautiful.

There was an extremely ancient teleportation array under his feet. At this moment, the light was gradually dissipating. Tang Zhen immediately lowered his head to take a look when he saw this. His eyes were filled with vigor.

This was the first time he had seen a real teleportation formation, so he naturally had to take a closer look. It would be best if he could analyze the principles behind it and then replicate it.

He quietly activated the application and took countless photos of the teleportation array from various angles. Only then did Tang Zhen turn around and look at a cave not far away.

Four cultivators with different appearances were sitting in the cave, tasting the fruits picked from the tree. They would look at Tang Zhen from time to time.

He teleported and appeared at the entrance of the cave. Before Tang Zhen could ask anything, a long-bearded old man among the four people smiled and said, "Are you the city Lord of the Holy Dragon City, Tang Zhen? I am situ Yuanzhi of the heaven battling city!"

Tang Zhen sized situ Yuanzhi up. So, he was the elder of heaven battling city who had given him the stone tablet. He had a Sage-like appearance.

Moreover, situ Yuanzhi was wearing a plain-colored long robe with cloud patterns embroidered on it. He was wearing a cloud crown and looked very similar to the ancient people in his original world.

Combined with the information obtained from various channels, Tang Zhen was sure that before heaven battling city was built, there must have been wild buildings similar to the ancient style of the original world. This also led to the current heaven battling city being very similar to the feudal regime of the original world.

After countless years, this style was still preserved, and his speech and behavior looked ancient.

"Greetings, elder situ. I'm late, so please don't take offense!"

After the two of them exchanged a few polite words, situ Yuanzhi introduced the other three to Tang Zhen.

The three of them looked slightly different from humans, so they must be foreign cultivators.

The first cultivator was called Red Shield. He had a crystal horn between his eyebrows. He was tall and had wide shoulders. He looked like an inverted triangle.

When situ Yuanzhi was introducing it, the red Shield nodded with an indifferent expression.

The second cultivator was called luha. He was fat and round, with arched eyebrows, arched eyes, and a round and red Nose. He looked quite comical.

He happily greeted Tang Zhen before continuing to chew on the delicious and juicy fruit.

The third cultivator was dressed in a black robe and wore a mask. Although the robe covered the position of his footsteps, Tang Zhen could still discover that this person was walking with his tentacles.

This cultivator was called 'Hui', and his voice was extremely strange, as if his vocal cords were underdeveloped.

Including Tang Zhen, all five of them were King level cultivators. However, four of them had just entered the king level. The cultivator named Red Shield was a two-star King level cultivator!

Chapter 583 Situ Yuanzhi's request \_1

Perhaps, it was because his cultivation was higher than Tang Zhen and the others, but the red Shield appeared a little arrogant. However, his tone was still rather polite. After all, Tang Zhen was also a King level cultivator!

After cultivators reached the king level, they could be considered to have broken away from the ordinary life level and entered a higher life form. They all had some powerful means, so they usually avoided fighting.

However, once they made a move, they would definitely fight to the death!

The five of them were partners for the time being. They would help each other in the exploration of the giant tower. It was for this reason that the red Shield's attitude was acceptable.

They were all outstanding cultivators who had grown up step by step from low-level cultivators, so they naturally knew the importance of tacit understanding in joint operations. It would be too unworthy if the operation was affected by some small matter.

After introducing each other, the group did not stay any longer. They prepared to go straight in the direction where the giant tower had once appeared.

Tang Zhen had originally planned to fly, but before he could move, the fat cultivator called Lu ha took out a folded towel from behind him and casually threw it over.

After the towel was thrown a dozen meters away, it immediately unfolded in the air as if there was a pair of invisible hands controlling it.

Under Tang Zhen's gaze, it transformed into a three meter wide and five meter long blanket that was directly suspended in the air.

It turned out that this blanket full of strange patterns was actually a flying tool!

Seeing Tang Zhen's unblinking eyes staring at the blanket, Lu ha smiled and said, I'm sure you think this flying magic carpet is pretty good too, city Lord Tang. I spent half a year in the Otherworld before I found it in a tomb!

Tang Zhen's brows furrowed when he heard this. He did not expect that this thing was actually dug out from a dead person's grave. Now, Lu ha was carrying it with him all the time. It was somewhat repulsive.

However, Tang Zhen's face was relieved after thinking about it. After all, Lou Cheng's cultivators were not afraid of life and death. There was no taboo for them to make money from the dead.

At luha's invitation, everyone jumped onto the flying carpet. Then, luha chanted a strange incantation, and the flying carpet immediately sped forward.

The feeling of sitting on the magic carpet was very strange. It was like sitting on a soft sofa, as if you could fall from the sky at any time. But in fact, even if you deliberately leaned out, the flying magic carpet would automatically adjust itself to ensure that you wouldn't fall.

Tang Zhen felt as though he was sliding on snow. The invisible air was like endless snow!

This was indeed a good item. Unfortunately, Lu ha only had this one. Otherwise, Tang Zhen would have really planned to exchange it for something else.

It was boring to travel in the air. Other than the cold wind, there were only white clouds. From time to time, flying monsters would try to chase after the flying carpet.

However, after sensing the aura of Tang Zhen and the others, those flying monsters were immediately scared witless. They quickly turned around in mid-air and ran as far away as they could.

Tang Zhen and the rest did not remain idle. Instead, they continued to observe the ground in an attempt to find traces of the giant tower!

Heaven battling city's elder, situ Yuanzhi, was sitting beside Tang Zhen. After the flying carpet had covered a few hundred kilometers, he suddenly turned his head and said to Tang Zhen, "I heard that city Lord Tang Zhen came from a continent-level City Tower. I wonder if it's true?"

Tang Zhen's heart moved when he heard this. He asked, that's just nonsense. I was born in a poor family, how could I be a resident of a continent-level city!

After hearing Tang Zhen's words, situ Yuanzhi shook his head slightly. After a moment of silence, he said to Tang Zhen, whether city Lord Tang is a resident of a continent-level city or not, there's no need to talk about it anymore. However, this old man would like to make a deal with city Lord Tang. I wonder if you're willing to do so?"

"What deal? tell me."

Tang Zhen looked at situ Yuanzhi and spoke in a calm tone.

"As far as I know, the Holy Dragon City is about to be upgraded to a level six City Tower. At that time, the overseas battlefield will be opened.

My heaven battling city's auxiliary city has been operating overseas for many years, and it has become my base overseas. If your loucheng opens the overseas battlefield, we can provide you with help and let your loucheng quickly accumulate battle merits!

With our help, within a hundred years, Holy Dragon City will definitely be able to upgrade to a grade 8 city!"

After situ Yuanzhi finished speaking, he looked at Tang Zhen without blinking and waited for his question.

There's no such thing as a free lunch in this world. So, what price do I have to pay?"

Tang Zhen's face did not have much of a happy expression. He merely looked at situ Yuanzhi with an indifferent expression.

The old man had invited him to explore the giant tower because of his strength, but his main target was probably the non-existent continent-level tower behind him!

Seeing Tang Zhen's question, situ Yuanzhi said, "I hope that city Lord tang can discuss with the people behind you to assist heaven battling city in completing the mission of upgrading the city to the national level.

If you succeed in this mission, my heaven battling city will also present a generous gift to city Lord Tang!"

Tang Zhen fell silent when he heard this. He really couldn't agree to situ Yuanzhi's request because he didn't have a continent-level city behind him. Naturally, he couldn't provide any help.

However, the generous gift from the other party's mouth made Tang Zhen quite moved, because since he saw the exchange materials Zhou Taikang showed him, in addition to being shocked and envious, Tang Zhen also had the idea of finding a way to get more.

Heaven battling city didn't lack money, so the only way to make them willingly hand over these materials to Tang Zhen seemed to be to help them complete the promotion mission of the national level building.

When he thought of this, Tang Zhen pretended to be deep in thought and said to situ Yuanzhi, "Why don't you tell me about your promotion mission first, elder situ? then we can talk about other things!"

When situ Yuanzhi heard this, his eyes lit up and he immediately spoke.

It turned out that heaven battling city had been promoted to a level 9 building for nearly a thousand years, and it had been working hard to upgrade to a national level, but it had never taken the last step.

According to the requirements of the cornerstone platform, heaven battling city had to pay enough world origin to be qualified to be promoted to a national-level building.

However, the world's source energy was quite special. It represented a world's life force and fate, and it could be split into countless parts or gathered together.

Once the world's origin was plundered, it also meant that its vitality was gone, and the world would gradually become a wasteland.

Moreover, this world origin had another characteristic. It was not an object, but existed in the body of some creatures in this world. It was impossible to discover by looking at the appearance.

Moreover, after the indigenous creatures were hosted by the world's origin, there would not be many changes, and even the host himself did not know.

However, because the world's origin represented the world's fate, the host's luck was probably better than that of ordinary people.

Although the world's origin existed in the form of energy, it could only be discovered when Lou Cheng killed its host. This was why Lou Cheng always wanted to destroy the world after invading it.

In order to find the world's origin, they had no choice but to do this!

As a result, the invaded world was bound to be destroyed. Firstly, the cultivators of Lou Cheng had to kill in order to find the world's origin. Secondly, after the origin was plundered, the life force would no longer be there, so destruction was inevitable.

Heaven battling city's misfortune was precisely because of this. The world that they had invaded when they accepted the advancement quest had its world's natural source scattered. This had caused heaven battling city to constantly wage war against the invading world over and over again in the past 1000 years.

However, the area of that world was very large, and the strength of the indigenous people was also very strong. They had long United to fight against the invasion of heaven battling city.

Although heaven battling city was a ninth-grade city, compared to the original world, it was only a Super City, so heaven battling city naturally couldn't easily destroy this world.

The two sides had been fighting for thousands of years, which had caused heaven battling city to sink into the quagmire of war, and it had never been able to gather enough world origin!

On the contrary, because of heaven battling city's invasion, that foreign world had become more and more powerful, and now it was even beginning to gain the upper hand in resisting heaven battling city!

If this mission failed, heaven battling city would have to start all over again if it wanted to upgrade to a national level. This was because if the mission failed, the world origin that had been submitted would automatically be cleared!

In order to conquer this world, heaven battling city had invested countless human and material resources, so how could it easily give up!

On the one hand, it was stuck at the gate of promotion, and on the other hand, it had to fight with the enemy foreign races, which made heaven battling city's situation very bleak.

Therefore, after knowing that Tang Zhen might come from a continent-level city, heaven battling city saw a glimmer of hope. They hoped to get the help of the continent-level city and gather enough world origin as soon as possible!

Chapter 584 I can solve this problem

After listening to situ Yuanzhi's explanation, Tang Zhen finally understood heaven battling city's current situation.

There was no doubt that heaven battling city was currently in a very dangerous period. It could be said that the internal and external troubles had not been resolved yet, and if they were not careful, the destruction of a top-notch Tower City would only be an instant.

The top-notch towers of the foreign races around heaven battling city had always been eyeing heaven battling city covetously because of their interests. They must have known what had happened to heaven battling city when it invaded the other world, so they had joined forces to constantly harass heaven battling city.

As a result, while heaven battling city was stuck in the quagmire of promotion missions, it also had to spend a lot of energy to deal with the hostile Wars of the foreign races.

In such a dangerous situation, heaven battling city would definitely look for any opportunity to solve their predicament. When they learned that Tang Zhen came from a continent-level city, it was reasonable to find him.

To cure the root of the problem, heaven battling city had placed their hopes on the continent-level City Tower behind Tang Zhen, hoping that they would help them complete the advancement quest and help heaven battling city get rid of the immediate crisis.

The so-called generous gift after the completion of the mission was definitely full of sincerity and would not be discounted at all.

After he thought of this, a thought suddenly appeared in Tang Zhen's mind. He asked situ Yuanzhi, "what kind of world are you connected to? what kind of combat methods do you use?"

When situ Yuanzhi heard this, he seemed to have thought of something. The joy in his eyes became even more intense as he said to Tang Zhen, "It's a world that's similar to this one. There are a total of four continents and 28 big cities, and they cultivate a martial technique called the source of war.

This type of martial technique is similar to the divine arts and skills that we cultivators cultivate. The main way of fighting is through close combat. In addition, we occasionally use some special weapons, but the effect is not obvious.

The strength of this world's top-tier experts is inferior to the cultivators of my heaven battling city, but the population is more than a hundred times that of my heaven battling city.

Every time we attack the city, countless cultivators of my heaven battling city are killed or injured. Although the enemy's casualties are higher, their population is also larger, and it often takes less than a decade to recover!

However, it's not that easy to cultivate the cultivators of heaven battling city. In addition, there are a few foreign races nearby who harbor malicious intentions and covet heaven battling city's land, so when we wage war in the foreign world, we're gradually unable to do as we wish.

To tell you the truth, city Lord Tang, my heaven battling city has changed from its original offensive to defensive mode in this foreign world, and the future prospects are worrying!"

This situ Yuanzhi seemed to be certain that Tang Zhen would help. Hence, he did not hold back when he spoke and told everything truthfully, appearing to be extremely honest.

Tang Zhen lowered his head and pondered for a moment. Then, he raised his head and said to situ Yuanzhi, "To tell you the truth, I do sympathize with heaven battling city's situation, but I'm afraid it'll be difficult to ask for help from a continent-level city."

When situ Yuanzhi heard this, his eyes dimmed and he let out a long sigh. He seemed to have aged a lot in an instant.

Tang Zhen smiled slightly when he saw this. This was because hope was only precious when one was in despair.

In such a situation, even if he asked for more, the other party would happily agree.

don't worry, elder situ. I can't help you contact the continent-level city because of some special restrictions, but it doesn't mean I can't help you!

When situ Yuanzhi heard this, his eyes immediately lit up and he looked at Tang Zhen with bright eyes.

"Is city Lord Tang's words true?"

Tang Zhen's words just now made him even more convinced that Tang Zhen came from a continent-level city. However, there was a certain restriction that prevented him from borrowing the power of the continent-level city.

However, he himself had the means of a continent-level city, which could help heaven battling city solve the immediate crisis!

The fire of hope was reignited in situ Yuanzhi's heart at this moment, and he quietly waited for Tang Zhen to tell him the solution to the problem.

When Tang Zhen saw the desire in situ Yuanzhi's eyes, he only smiled slightly. However, he did not directly say the solution to the problem. Instead, he told situ Yuanzhi that this matter could only be completed if he personally went to the other world.

Situ Yuanzhi was burning with anxiety, but there was nothing he could do. He had lived for hundreds of years, so he naturally knew that there were some things that couldn't be rushed.

At most one or two years, heaven battling city could still afford to wait.

Regardless of whether Tang Zhen was able to help solve the crisis, at least he had a way to solve the problem. This also reduced the worries in situ Yuanzhi's heart.

The two of them agreed that after Holy Dragon City was upgraded to a class 6 city, Tang Zhen would personally head to heaven battling city. Once the problem was solved, the promised reward would be much higher, and it would definitely satisfy Tang Zhen!

While the two of them were talking, the flying carpet had advanced for another few hundred kilometers. At this time, Tang Zhen's expression changed and he suddenly raised his hand and pointed in a direction.

where's the giant tower? let's catch up with it!

As soon as Tang Zhen finished speaking, the four of them, including situ Yuanzhi, were stunned. They looked up and did not see any signs of a giant tower in that direction. Why was Tang Zhen so sure?

Tang Zhen frowned slightly upon seeing this. He naturally could not tell the four of them that this was the giant tower that he had discovered through the map. Moreover, it was several hundred kilometers away!

This ability was too heaven-defying, and Tang Zhen would never tell situ Yuanzhi and the others. After all, this was not an ability that a King level cultivator could possess!

Seeing the four of them looking at him, Tang Zhen casually made up a story, this is a tracking skill that can only be exchanged for in a continent-level building. It's normal that you don't know about it!

The continent-level building was illusory, and only a few people had seen it over the years, so it should be a good excuse to put this ability on it.

The three foreign cultivators had long heard that Tang Zhen might have come from a continent-level city, which was the reason why they were polite to him. Now that they heard that this was a skill that could only be exchanged for in a continent-level city, they were immediately envious and jealous.

With that, they were sure that Tang Zhen came from the continent level city. Out of their trust in the continent level city, they didn't hesitate and controlled the flying carpet to fly away.

Sure enough, it did not take long for everyone to see a huge figure appear in their field of vision. It was now standing quietly in a Valley.

The four cultivators looked at Tang Zhen at the same time. Their eyes were filled with an indescribable expression. No one knew what they were thinking about.

Tang Zhen ignored the complicated gazes of the four people. At this moment, he was also gradually able to clearly see the appearance of the giant tower. He could not help but inhale a breath of cold air!

This giant tower was clearly a super war machine!

Just as the information he had received earlier said, the giant tower was indeed extremely tall. Even if it was standing in the valley, more than half of its body was still exposed.

Its body was pitch-black in color and looked like refined iron. Its muscles were tight and it had three heads and six arms. Its two thick legs were firmly planted on the ground!

The giant's six thick arms were all holding weapons. There were swords, knives, flying stones, and a few items with unknown uses. They were clearly powerful items.

The three heads of the giant tower were all like Yakshas and evil ghosts. There were three rows of bone spikes on the top of their heads, from short to long. Their green eyes were flashing with an ominous light, but they were also blank.

What caused Tang Zhen to feel curious was that this giant was wearing an incomparably huge and heavy armor. There were quite a number of holes and corridors on it. It was just like a door that allowed people to enter and exit freely.

From afar, it looked like a city floating in mid-air. It was divided into countless levels, which was really wonderful!

It seemed that the residents of the giant city usually lived in this heavy armor. When they wanted to move, they would drive the giant to move!

After seeing this, Tang Zhen felt that this trip was not in vain. Lu ha, on the other hand, drove the magic carpet and landed on the top of the valley.

At this moment, Tang Zhen and the others discovered that there were thousands of cultivators gathered in the valley. They were obviously here for the giant tower!

Chapter 585 The special giant tower

At this moment, on the mountain where Tang Zhen and the others were, there were a few Lord Grade cultivators who were looking up with shock on their faces.

Seeing the flying magic carpet slowly descending from the sky, the eyes of those cultivators slightly narrowed. They began to quietly size up Tang Zhen's group of five, guessing their strength.

In such an environment where people were fighting for benefits, any cultivator could turn into a hungry wolf at any time, so the best way was to intimidate them so that they would not dare to act rashly.

"Bang!"

The red Shield was the first to teleport down from the flying carpet. After scanning the surrounding environment, she went straight to where the cultivators were.

"All of you, get to the side and stand there. This place is mine!"

The red Shield spoke indifferently, and there was a trace of unquestionable authority in her tone.

When the few Lord-tier cultivators heard this, they quickly dodged to the side. Their faces were filled with respect, not daring to show any dissatisfaction.

They had seen the red Shield teleport and knew that it was an ability that only King level cultivators had. Therefore, they were very respectful to the red Shield.

The terrifying strength of a King-level cultivator was not something these Lord-level cultivators could fight against. Now, they could only listen to his orders and stand aside.

Otherwise, if they angered a King level cultivator, they would immediately lose their lives!

Tang Zhen and the other three slowly walked over from the side. They didn't even look at the few Lord Grade cultivators as they stood on the empty ground at the top of the valley.

When the few Lord-grade cultivators saw that the four of them were on the same level as Red Shield, they immediately guessed that the four of them were also King-grade cultivators. While they were shocked, they also secretly complained!

One king level cultivator was already enough, but now there were five of them. How could they survive?

They had been searching for this giant city for a long time. During this time, many Lord-level cultivators had joined in, but this was the first time they had seen a King-level cultivator.

Of course, there was a possibility that King level cultivators had secretly come to explore, but ordinary cultivators were not qualified to come into contact with them and understand them.

This mountaintop was a good location, and the surrounding scenery could be seen at a glance!

Looking up from here, one could clearly see the giant standing still. At this time, it had a blank face, and its six eyes were not focused at all, looking extremely unfocused.

If it was not because it was still standing like a mountain and was moving from time to time, Tang Zhen would have mistaken it for a corpse!

"You guys, come over here and tell me what's going on!"

The red Shield waved at the few Lord-tier cultivators who didn't dare to leave. Immediately after, they felt as if they were bound by a pair of invisible hands and involuntarily flew in front of Tang Zhen and the others.

In front of a King-level cultivator, these Lord-level cultivators didn't dare to resist at all.

Tang Zhen didn't even frown. This Red Shield's mental energy was very powerful. It wasn't much weaker than his.

After listening to the explanation of the Lord-tier cultivator, everyone finally understood the general situation.

It turned out that the giant was about to fall into a deep sleep, which was why it was not moving. As for why its eyes were open, it was because it had not completely fallen asleep!

In addition to sleeping, the giant would also go crazy from time to time and destroy any buildings it saw along the way.

However, it was said that this giant would occasionally wake up. At that time, his eyes would reveal the light of wisdom. He would look at the cultivators who were coveting the treasure in the loucheng, seemingly full of monstrous hatred and bloodthirsty light!

At this moment, if one looked closely at the foot of the giant, they would see the ruins of a city. Countless corpses were lying on the ground, and they all died in extremely miserable ways!

It was clear that before the giant fell into a deep sleep, it had gone crazy again and completely destroyed the city that was built in the valley.

Now that they had figured out the cause and effect of the matter, the next thing they had to do was to enter the giant tower to search for treasures.

However, according to the cultivators, if they wanted to explore the giant's Tower, it was best to wait until all six eyes of the giant were closed. Only then would it be safe to enter.

However, in the process of exploration, he had to be constantly on guard against the awakening of the giant. He had to evacuate immediately before it awakened, or the consequences would be unimaginable!

Because once the giant woke up and felt that someone had entered the city, it would immediately go crazy and slap the armor on its body, shaking all the cultivators who could not escape in time to death!

If they tried to force their way in, the giant would hunt down those who dared to get close. So far, thousands of cultivators had lost their lives!

Although Tang Zhen and the others were extremely powerful, it was impossible for them to take unnecessary risks. Therefore, they unanimously decided to wait until the giant's six eyes were completely closed before entering the giant's Tower together!

Tang Zhen quietly stood on the rock and constantly sized up the giant city. He always felt that this city was not as simple as it looked on the surface.

The few Lord-tier cultivators had already said that this giant usually had three forms: sleeping, going crazy and destroying, and the occasional flash of intelligence in its eyes.

Putting all these together, it meant that this special building also had a consciousness, but because of some unknown changes, the consciousness of this building changed, which was why it was acting so abnormally.

Tang Zhen seemed to be somewhat familiar with this situation. He remembered that he had once seen an introduction in an unknown ancient book. It was said that it was extremely difficult to form a biological wild building. It would not be an exaggeration to say that it was one in ten thousand!

Wild plant buildings were rare, and wild biological buildings were even rarer!

Moreover, this creature was a wild building monster in itself. It usually hid among the monsters and could not be distinguished by the naked eye.

The only difference between these wild creatures and monsters was that these wild creatures had extremely strong combat power and vitality. This was because it was not supplied with energy by the brain, but by the wild building's Foundation!

The entire building's energy was supplied to him, so the difficulty of dealing with him was self-evident!

If one was lucky enough to get such a wild building cornerstone, it would be equivalent to getting a Super Fighter. As the level of the building continued to increase, the size of this creature would become larger and larger, and there was even a chance to awaken its innate ability!

However, there was a drawback to this kind of creature. It must not be allowed to awaken its previous life's memories or be controlled by others. Otherwise, it would be the day of disaster!

Therefore, if one didn't have enough strength, one shouldn't build such a biological city, in case one Played with Fire and got burned!

At this time, the state of the giant's Tower seemed to be the state mentioned in the book, which was that the tower's consciousness had begun to bite back. The residents of the national-level tower were probably dead.

The Overlord-level cultivators had said that the giant was sometimes crazy, sometimes awake, and sometimes in a state of sleep, just like now.

According to Tang Zhen's guess, the reason why the giant was in such a state was definitely not because its consciousness had awakened. Instead, some kind of existence had invaded the building's instinctive consciousness and was fighting with the building's instinctive consciousness for control of the giant's body.

The giant seemed to be in a state of deep sleep. It might be because Lou Cheng's consciousness and the intruder had given up control of the body at the same time, causing the giant to be dazed and stand in place.

Judging from how the giant destroyed the towers along the way when it went crazy, the invader's strength seemed to be much stronger than the tower's consciousness. When the giant went crazy, it

proved that the invader had the upper hand, so he kept destroying the towers that blocked the giant's way.

The consciousness invader seemed to hate the cultivators in the towers very much, which was why he was so crazy as to try to destroy all the towers.

When the giant's eyes revealed the light of wisdom and looked at everyone cruelly, it proved that the consciousness invader had completely occupied the giant's body.

However, for some unknown reason, the time that the intruder occupied the giant's body was extremely short, usually in a flash. However, from the look in its eyes when it completely occupied the giant's body, one could see how much hatred the intruder had for the cultivators in the building!

If the intruder completely occupied the giant's body, a shocking slaughter would immediately occur!

Chapter 586 Estrangement and attack \_1

While Tang Zhen was observing the giant tower with rapt attention, Situ Yuanzhi and the rest had gathered together and were discussing their next move after entering the tower.

Different from Tang Zhen, the loucheng that the four of them were in was in the stage of upgrading to a national level. Therefore, they had also carried out a detailed understanding and analysis of the information of the national level loucheng.

The buildings in the world all had their own characteristics, and the national-level buildings were very obvious in this aspect. Almost every national-level building had its own characteristics!

However, in some aspects, all the buildings in the country were the same, and these were the things that everyone could make use of.

According to their understanding of the National loucheng, anyone who was not a resident of the loucheng would be blocked by a force when they entered the National loucheng.

This was the defensive light curtain that would only appear after the building was upgraded to a national level. It could greatly improve the security of the building and prevent outsiders from sneaking in.

If they tried to force their way in, they would trigger the defense system of the city. The power of the defense system was so terrifying that even a King level cultivator would find it hard to resist.

However, the situation of the giant tower was different at this time, so the power of the defensive light curtain was much weaker. If one looked carefully, there might even be loopholes.

As long as he could tear these holes, he would be able to enter certain areas and not be attacked by the defensive light curtain!

Ever since the giant's Tower appeared, it had attracted the pursuit of countless cultivators. Among them, some cultivators had found some loopholes in the giant's Tower.

After their risky experiments, they actually managed to enter some areas of the city Tower and obtained some rewards that made people envious.

These items from the National towers could be sold for a very high price outside, which made the cultivators risk their lives to follow the giant tower.

It could be said that along the way, the giant had not only destroyed countless towers but also killed countless cultivators who wanted to enter the towers, leaving countless corpses behind.

There were even some unlucky ones who were directly devoured by the giant, becoming its food. Not even their bones were left!

Even so, it still couldn't stop these cultivators. They couldn't give up the treasures in the National towers and items to improve their strength.

The topic that situ Yuanzhi and the others were discussing was which region they should explore.

Every city was divided into different social classes. The district where the ordinary residents lived could not be compared to the district where the rich and powerful lived.

If Tang Zhen and the others were to enter the loucheng, they would naturally not enter the area where ordinary residents lived. Not only had those places been patronized, but the value of the goods would definitely not be as good as the area where the dignitaries of loucheng lived.

If they could find Lou Cheng's treasure room, it would be an even greater fortune!

However, the defensive light curtains in these places were even more powerful. It was also bound to be even more difficult to enter. At this time, the runic magic circle knowledge that Tang Zhen had learned would be of great use!

However, from the faint disdain in the eyes of Red Shield and the other two, it seemed that they didn't trust Tang Zhen's standard too much. Along the way, they had deliberately distanced themselves from him, as if they didn't welcome Tang Zhen.

Tang Zhen had long since noticed this point. Hence, he sat by the side alone. He did not have the mood to face the cold.

Regardless of whether red Shield and the other two would accept him or not, it would not affect Tang Zhen's exploration. In fact, without these guys, Tang Zhen would be able to obtain more benefits.

Now that the crack had appeared, Tang Zhen was even more pessimistic about this cooperation. He began to think about how to part ways with this group of people without taking the initiative to speak!

At this time, the valley was extremely quiet. The cultivators were all looking at the giant tower in silence. Because of the existence of these high-level cultivators, even wild beasts and mosquitoes had fled far away, making the valley frighteningly quiet.

The rest of the time was spent waiting quietly. No one dared to take the risk to step forward, lest they Awaken the Giant that was about to fall into a deep sleep.

Even if someone was unafraid of death and wanted to get close, they would be intercepted by the cultivators who were eyeing them covetously. They were extremely ruthless and even directly killed the cultivators who affected the overall situation!

Tang Zhen's group of five watched on coldly from the side. After the other cultivators found out about the cultivation of the five of them, they also stayed far away, afraid of provoking Tang Zhen's group.

For a moment, the valley became quieter and quieter. If one didn't look carefully, they wouldn't believe that there were thousands of high-level cultivators hidden here!

Unknowingly, the sun was setting, and the giant's eyes were half-closed, as if it would fall into a deep sleep in less than a day.

At this moment, a group of black dots flew over from the direction of the setting sun and slowly approached the valley where Tang Zhen and the others were.

Tang Zhen took a glance and discovered that this was a group of eagle-headed monsters. Their wings were over twenty meters wide and they looked extremely fierce.

A group of cultivators in different clothes were sitting on top of these monsters. They were all looking at the giant tower with excitement and greed in their eyes.

When his gaze fell on the cultivators in the valley, a cold glint flashed in the eyes of these cultivators and they snorted in disdain.

There were two one-star King tiers sitting on the leading flying monster, and they were currently scanning the valley with their indifferent eyes.

"All of you get lost, this place is mine!"

A brawny man in demon soldier armor saw the position of Tang Zhen and the others. He shouted in the air and controlled the monster to pounce over.

If an ordinary cultivator were to be pounced on by this monster, they would definitely suffer from broken bones!

At this moment, Tang Zhen's group of five did not reveal their cultivation, causing the brawny man and the others to mistakenly think that they were ordinary cultivators. This was why they were using their strength to bully others. Their faces were filled with arrogance!

The other three people on the monster laughed out loud. Their faces were filled with ridicule as they waited to see Tang Zhen's group cover their heads and flee like rats.

"You're looking for death!"

Tang Zhen, who was thinking about how to enter the giant tower, was suddenly interrupted by this roar. He immediately frowned and a thought flashed through his mind. He casually waved his hand and sent out a blade-like palm.

As the palm-blade struck out, a sharp wave of air suddenly appeared, like an invisible sharp blade, and went straight for the monster in the air!

The moment Tang Zhen made his move, the aura of a King level cultivator was revealed without a doubt. The eyes of the brawny man on the monster narrowed, and his face revealed a look of horror. He jumped down from the sky without hesitation.

It was also at this moment that the invisible blade hit its target and cut into the flying monster's body without any hindrance.

The flying monster that had pounced toward Tang Zhen cried out in pain. Its entire body was directly cut into two. Fresh blood spurted out while its internal organs and broken corpse also scattered on the ground.

The other three foreign cultivators on the monster couldn't Dodge in time and were also cut in half at the waist by the blast. Their faces were full of disbelief as their bodies fell from the sky.

"The Holy Dragon City Master is really good!"

Red Shield's eyes immediately focused when she saw this. A trace of fear appeared in her eyes when she looked at Tang Zhen.

He struck out a palm in the air and directly killed a level Seven monster and three two-star horde leaders. Tang Zhen's strength made him feel a little shocked.

Most importantly, he had never seen such a powerful skill before. Could it be a skill that could only be exchanged for a continent-level building?

The red Shield, who had originally looked down on Tang Zhen because she was a two-star King tier, had also become cautious at this moment. Her eyes were fixed on Tang Zhen.

However, there was a faint sneer at the corner of his mouth, as if this matter had nothing to do with him.

Chapter 587 Confrontation and disbandment (1)

After this incident, Red Shield decided to stand by and watch.

This matter could be big or small, and the attitude of the four King level cultivators was very important.

Tang Zhen had killed the other party's cultivator, so the two one-star King tiers would definitely not let this matter rest. Red Shield wanted to see how Tang Zhen would resolve this matter.

He decided not to get involved and glanced at situ Yuanzhi and the other two. Seeing that Lu ha and Hui looked as if it was none of their business, only situ Yuanzhi smiled bitterly.

The red Shield coldly laughed in its heart upon seeing this. It turned its head and continued to look at Tang Zhen with an expression as though it was watching a show.

Although blood and corpses were raining down from the sky, the five of them were King level cultivators. How could they be stained by the filth? they used their spiritual power to disperse the filth to the side.

After the strong man who had luckily escaped saw this scene, he was so frightened that his legs were trembling. His expression was distorted when he looked at Tang Zhen as he roared, "You dare to kill me, Lou Cheng?"

"You're too noisy!"

Tang Zhen coldly snorted and clenched his hands in the air again. The brawny man's head instantly exploded like a rotten watermelon before he could even finish his sentence. The headless corpse softly fell to the ground and twitched a few times.

The cultivators who saw this scene from a distance all swallowed their saliva and warned themselves not to provoke this terrifying guy.

At this moment, an angry voice was heard, "Your Excellency has such a bad temper that you killed four of our Lord-grade cultivators. Do you think we are easy to bully?

If you don't give me an explanation today, then don't even think about leaving!"

Tang Zhen looked in the direction of the voice and saw a group of people walking towards him. It was the group of foreign race cultivators who were riding on flying monsters earlier.

At this moment, they were glaring at Tang Zhen with killing intent. Most of the cultivators had already drawn their swords, and the two one-star King tiers were the ones leading them.

The two of them coldly looked at Tang Zhen. A cold glint would occasionally flash across their eyes.

Although Tang Zhen's group of five were all king class cultivators, these two foreign race Kings didn't show much fear. They clearly had something to rely on!

"It's just a dog that bites people randomly. I've killed it, so what can you do? if you keep talking nonsense, I'll kill you too!"

Tang Zhen's eyes slightly narrowed as he looked at the two King level cultivators in front of him. His expression was calm, but his tone did not have a trace of concession.

As for the Lord Grade cultivators behind the two of them, they were directly ignored by Tang Zhen. He didn't care about them at all.

"What big words. I'd like to see how you're going to kill me!"

The king level cultivator in demonic armor snorted and was about to fight Tang Zhen when he was stopped by the king level cultivator in long leather clothing.

When situ Yuanzhi, who was behind Tang Zhen, saw this, he immediately walked forward and stood beside Tang Zhen. His eyes were cold.

Tang Zhen nodded upon seeing this. Regardless of the other party's motive, Tang Zhen would owe him a favor for stepping forward at this moment!

As for Red Shield and the other two, they were expressionless as they silently stood at their original positions. It seemed that they had no intention of helping. This caused a cold glint to flash in Tang Zhen's eyes. However, he felt a slight relief in his heart.

It was two against two, and the two kings didn't have much of a chance of winning. This made the two of them hesitate.

The cultivator in leather glanced at Tang Zhen and then at Red Shield and the other two. He coldly snorted, "It's useless no matter how big your tone is. You must have the strength to keep up, otherwise you will only lose your life for nothing!"

Now that the giant is about to go into a deep sleep, we should focus on exploration. However, you have to give me a satisfactory explanation for killing my Lou Cheng cultivators!"

After saying this, the two King level cultivators snorted and went to rest.

From the looks of the other party, it seemed that they did not intend to give up just like that. In the following period of time, they would definitely think of ways to find Tang Zhen and take revenge!

you should be glad that you didn't do anything. Otherwise, you would be dead bodies by now!

Tang Zhen sneered when he heard this. He was already prepared to attack. Once the battle started, he was confident that he would be able to kill the king level cultivator in an instant.

As for the king class cultivator in the long leather coat, Tang Zhen estimated that he could kill him in a short time!

In fact, the reason why Tang Zhen had instantly killed the four foreign cultivators earlier, other than the fact that they had offended him, was because he wanted to use this matter to see the reactions of situ Yuanzhi and the other three.

The other side also had a King level cultivator, and they had the geographical advantage. He wondered if the four of them would stand on his side.

The result made him a little disappointed, but at the same time, he had achieved his goal. This was because other than situ Yuanzhi, who had stood up because of his interest, the other three people had cold expressions on their faces as if Tang Zhen's matter had nothing to do with them.

Under such circumstances, it was simply a dream to think that Tang Zhen would help them break the runic magic circle!

Tang Zhen didn't even look at the red Shield and the other two. He returned to the rock and sat down cross-legged, continuing to observe the giant tower through the map view.

Situ Yuanzhi sighed softly. He glanced at the three people from the red Shield and sat beside Tang Zhen.

Before the exploration had even begun, a crack had appeared between the five of them. It was obvious that it was impossible for them to continue cooperating.

There was no need to explain this matter, but everyone knew in their hearts that the previous cooperation had ended.

Tang Zhen was of great importance to heaven battling city, and he was related to the advancement quest, so he absolutely couldn't be neglected.

Moreover, he still needed the help of his runic magic circle knowledge to enter the higher area of the giant tower. Therefore, situ Yuanzhi hesitated for a moment and finally decided to stand with Tang Zhen.

When Red Shield and the other two saw this, they looked indifferent, as if they were also disdainful of situ Yuanzhi's choice.

In their eyes, although this Holy Dragon City Master was a King level cultivator, they were not familiar with each other and did not know what their true strength was.

Even if he really came from a continent-class city and had special abilities, he was unable to make the three of them sincerely accept Tang Zhen's participation. Previously, it was only because of situ Yuanzhi's face that he did not dare to say it.

The few of them had worked together for a long time and trusted each other. Now that Tang Zhen had suddenly joined them and wanted to share the profits, they were unable to accept it.

It was too dangerous to explore a national-level city. They didn't want to work with an unfamiliar person, which would undoubtedly increase the risk. Who knew if the other party would stab them in the back or take all the benefits for themselves?

If they were in danger, would the Holy Dragon City Master risk his life to save them?

It was also because of these considerations that they chose to stand by and watch after Tang Zhen provoked the two King level cultivators. They let Tang Zhen take the initiative to terminate the cooperation.

King level cultivators had extraordinary status. After what had just happened, even if he wanted to cooperate with them, he would not be able to lower his face.

Therefore, the moment the three of them made their choice, Tang Zhen had no choice.

Before the red Shield did this, Tang Zhen had already seen through the thoughts of the three of them. This was why he had made this move, causing the five of them to be directly divided into two groups.

In fact, according to Tang Zhen's thoughts, it would be best to act alone. However, situ Yuanzhi was more familiar with national-level cities than him. With him around, he could save a lot of time in exploration.

For a moment, the five of them were silent. Time slowly passed, and soon, the night had passed.

Just as the morning sun burst out and its light shone on the earth, the giant in the valley closed his eyes completely. His terrifying aura suddenly weakened a lot!

"City Lord Tang, now is the time!"

let's go! situ Yuanzhi shouted and rose into the air. He stepped on a glowing object and turned into a stream of light, heading straight for the giant tower.

Chapter 588 Casually breaking the array (1)

As situ Yuanzhi flew out rapidly, Red Shield and the other two also used their own techniques and pounced toward the giant tower.

At the same time, the entire Valley was filled with figures flying rapidly. They were like countless ants, jumping out in a black mass, each one fighting to be the first.

Some of the faster cultivators had already begun to climb up the giant's legs. Their movements were unusually Swift.

The giant tower was huge. From a distance, the cultivators looked like a group of ants climbing up the huge tree trunk, while the flying cultivators were like dancing mosquitoes!

The two King-class cultivators who were confronting Tang Zhen earlier looked at him coldly. They jumped onto the flying monster and started to move with their subordinates.

Tang Zhen slowly got up from the rock and looked at the cultivators around the giant tower with an expressionless face. The wings on his back spread and he flew out like lightning.

Many cultivators felt a gust of wind above their heads. When they looked up in horror, they saw a black shadow passing by. While they were secretly surprised and envious, Tang Zhen had already approached the giant city.

Tang Zhen's body was suspended in the air. He was less than half a meter away from the middle of the street where the huge armor was located. However, he was blocked by a force, not allowing him to take another step closer.

This was the defensive power of the tower itself. Even though the giant had fallen into a deep sleep, the defensive power was still functioning normally.

Just as Tang Zhen was observing the street, some cultivators had already started to frantically attack the bottommost Street, causing waves of energy fluctuations.

This was a loophole that they had discovered earlier. As long as they attacked it for a short period of time, they would be able to completely tear it open. Some people had already successfully entered some time ago and obtained a large number of items.

The number of cultivators on this Street was the highest. About 90% of them were concentrated in this area. They used all kinds of methods to hover in the air, and for a time, the scene of various attacks kept flashing in their eyes.

There were also cultivators attacking on the streets further up, but the number was much less.

The higher the floor of the giant tower, the stronger the defense. In addition, once it was invaded, the Giants would wake up at any time, so very few people attacked the streets with too many floors.

Tang Zhen had already counted before. There was a total of 90 floors on the streets of the giant's Tower. It was divided into three areas, upper, middle and lower. The place where he was at was the lowest floor of the central area!

Among all the cultivators who had participated in the attack, he was the only one who remained in this area, so he was extremely eye-catching!

Many of the cultivators focused their eyes and continued to attack after seeing this.

"You're overestimating yourself!"

The two foreign King-class cultivators who were confronting Tang Zhen earlier snorted coldly when they saw Tang Zhen's figure. They continued to attack the protective light curtain that appeared and disappeared from time to time.

Red Shield and the other two, who were also at the bottom floor, raised their heads. After seeing that Tang Zhen seemed to be deep in thought, a mocking smile appeared on their faces. They secretly rejoiced that they did not cooperate with Tang Zhen. It turned out that this fellow was just a good-for-nothing who looked good but was actually useless.

Everyone was attacking with all their might, trying to enter the tower before the giant woke up, but this guy was wasting time in the central area. It was really inexplicable!

This fellow was probably aiming too high, thinking that he could enter the central region, but in the end, he discovered that he couldn't do anything to the defensive light curtain of the central region.

At this moment, from the three people's point of view, Tang Zhen was forcefully holding up his face and was unwilling to come down. He was really foolish beyond compare!

At this moment, a cultivator broke through the protective light curtain on the lowest Street. Then, the cultivators swarmed in and began to search quickly.

A ray of light flew over from the distance. It was situ Yuanzhi who saw Tang Zhen staring at the central Street in a daze and hurriedly came over to remind him.

"City Lord Tang, the central region's defense is extremely strong. We can't break through it in a short time, so the best choice is to go to the bottom region to find a hole. Let's not waste time here."

When he said this, situ Yuanzhi laughed bitterly in his heart and could not help but feel a little disappointed.

Perhaps this legendary Holy Dragon City Lord from a continent-level city wasn't as powerful as he had imagined, and he had been desperate, which was why he had such great hope.

Who would have thought that the greater the hope, the greater the disappointment!

Tang Zhen turned his head when he heard this. He looked at the bitter-looking situ Yuanzhi and revealed a baffled expression.

"Elder situ, what are you talking about? where did you go? I've been waiting for you to go in!"

Situ Yuanzhi was stunned when he heard this. He looked at Tang Zhen in a daze and frowned slightly.

Hearing the meaning of Tang Zhen's words, could it be that he was able to enter the central region?

It was also at this moment that Tang Zhen's hands continuously waved, drawing out a series of mysterious symbols in the air. After which, they ferociously charged towards the defensive light curtain of the tower.

The protective light curtain that was originally invisible flashed slightly. Then, under situ Yuanzhi's gaze, a crack that could only allow one person to enter and exit suddenly appeared!

"This Pixiu, this Pixiu, Oh my God!"

Even situ Yuanzhi, who had always been calm, was stunned by the scene created by Tang Zhen's wave. His face was full of disbelief.

"Don't just stand there, hurry up and go in!"

Tang Zhen shouted in a low voice as his entire body instantly entered the crack.

A look of ecstasy appeared on situ Yuanzhi's face. He turned to look at the red Shield and the other two before entering the cave.

At this moment, the cultivators below saw this scene and were all shocked.

they've actually entered the central region!

Countless cultivators cried out in shock and disbelief. At the same time, countless figures rushed toward the central region, trying to take the opportunity to enter the tower.

Red Shield and the other two also stopped their attacks and charged toward the crack with dark expressions.

Unfortunately, when they reached the central region, they found that the crack had closed by itself. It was only less than a finger's width away, and then it quickly disappeared.

Red Shield and the other two looked at each other and cursed, "damn it! Then, his expression became even more complicated.

Situ Yuanzhi had previously told them that this Holy Dragon City Lord was proficient in runic magic circles. However, they did not have a clear idea of how proficient he was.

However, the three of them had never dreamed that this so-called "proficiency" would be able to break the defensive light curtain of the central region in the blink of an eye!

This kind of method shouldn't be called proficient, but abnormal. Was old man situ deliberately hiding something?

If they had known that Tang Zhen had this ability, the three of them wouldn't have argued with him. They wouldn't have hesitated to help him when he was facing the two King level cultivators!

However, it was useless to say all this now!

They could only watch as situ Yuanzhi dashed into a shop on the street like a bolt of lightning and plundered it with an ecstatic expression. However, their hearts were in so much pain that they were bleeding!

If it wasn't for what had happened earlier, the three of them would probably have already entered the central region and earned a lot of money!

no, we came here together. We have to get a share of the benefits!

Red Shield snorted and looked at Lu ha and Hui. "After they come out, I will speak to old man situ and we will continue to cooperate. I believe that the Holy Dragon City Master will give us some face!"

Red Shield recalled the confrontation between Tang Zhen and the two King-level foreign cultivators. She then said in an uncertain tone, "At most, we'll give him some compensation and make him feel better!

That luha, I see that he really likes your flying carpet. Why don't you part with it?

Old grey and I will also take some things, we won't let you bleed alone, what do you think?"

The chubby luha was taken aback when he heard that. He frowned and pondered for a moment before nodding reluctantly.

Chapter 589! the strange King inside the tower

In the central area of the giant Tower City, Tang Zhen and situ Yuanzhi split into two groups and began to search.

As far as the eye could see, the streets of the city of Giants were very wide, enough for two cars to go side by side.

The street in front of him looked like a suspended Plank Road. On one side were houses and a deep Street, which looked very deep. On the other side was a bottomless abyss, where one could directly see the scenery outside.

Tang Zhen swept his eyes over the layout of the houses by the side of the street. After identifying the residences and shops, he headed straight for a luxuriously decorated shop not far away.

The shop's front was wide, but it was tightly closed at this time. There was some dust on the ground at the door, as if no one had visited for a long time.

Tang Zhen took a glance before he casually waved his hand. An invisible air wave appeared and directly smashed toward the door of the shop.

In the blink of an eye, the door of the shop made a muffled sound like a bronze bell being hit, and it was directly knocked out.

Earlier, Tang Zhen had observed the building material of this building and discovered that it was a special material that was not made of iron, wood, or stone. It possessed an extremely strong toughness and could play an extremely good buffer role when it was under attack.

Tang Zhen's attack earlier might have seemed casual, but the strength contained within it was extremely terrifying. It could even easily tear apart a steel door.

However, although the door in front of him had been sent flying, other than its body being bent, there were no cracks, which showed its toughness.

The most amazing thing was that after being attacked, the door actually began to slowly return to its original shape!

Obviously, this material not only had strong tenacity, but it also had the characteristic of memory, which was a rare and valuable point.

If they could analyze its composition, it could be used to make armor materials, greatly improving the defense of Holy Dragon city's war chariots!

When Tang Zhen thought up to this point, he casually placed the two doors into his storage space. After which, he began to size up the shop.

Glancing at the goods displayed on the shelves, Tang Zhen confirmed that this was a shop that specialized in selling potions. At the same time, it also brought some rare herbs.

It was indeed worthy of being a national-level building. The grade of the goods was really not low. Tang Zhen found many potions that were regarded as treasures in the outside world were displayed as ordinary goods here.

Tang Zhen didn't have the time to look at it carefully. He waved his sleeve and kept these potions into his storage ring one after another.

The huge shop was emptied by him in just a few minutes, unlike other cultivators who had to carry large and small bags!

After clearing this shop, Tang Zhen turned around and jumped out. He seized the time and continued to run to the next shop.

Very quickly, Tang Zhen discovered a weapon store, a luxury item store, and a store that sold general goods.

Every time he entered these shops, Tang Zhen would sweep them clean without saying a word. His efficiency in exploring was amazing.

However, a trace of doubt gradually appeared in Tang Zhen's heart as he continued to explore. This was because this place was really too quiet. He could not even see the slightest sign of biological activity.

It was a national-level city with at least hundreds of thousands of residents. How could it be so quiet?

This giant city had a total of 90 floors, and each floor was in the shape of a ring, surrounding the entire giant's body. Each floor could accommodate at least 10000 people!

However, now that the countless residents had disappeared without a trace, there must be some strange things that he didn't know about.

Moreover, Tang Zhen seemed to have sensed a trace of faintly discernible mental energy spreading to every corner of the giant tower. It was as if the entire tower was under the surveillance of this mental energy.

Tang Zhen felt suspicious in his heart. His gaze inadvertently swept across the depths of a Street. However, he suddenly discovered an enormous black figure that was looking at him with dark and cold eyes.

His eyes were unusually cold and his killing intent was unconcealed. This caused Tang Zhen's heart to be slightly startled. He did not hesitate to pull out the soul destroying battle blade.

It was also at this moment that the huge black figure ferociously charged towards Tang Zhen. The weapon in his hand was filled with a sharp killing intent, as though he wanted to kill Tang Zhen with a single slash!

Moreover, when this black shadow attacked, it did not have any evasive or defensive moves at all. It seemed as if it was willing to die together with Tang Zhen in order to completely kill him. It was truly an indomitable battle tactic.

Tang Zhen's heart was slightly shocked. At this critical moment, he did not hesitate to activate the [ dark world stealth ] and his entire body disappeared without a trace.

The black shadow did not panic even though his blade had missed. Instead, he slashed behind him with great force!

A battle blade that appeared out of thin air suddenly retracted. Tang Zhen's body was in the dark World. His eyes were bewildered as he looked at the black Shadow's true appearance. His expression changed slightly.

It turned out that this black Shadow's appearance was extremely similar to that of the giant. It also had the face of a Yaksha, and there were bone spikes on its head, making it look extremely ferocious.

The only difference was that this black shadow did not have three heads and six arms. Instead, it had two heads and four arms, and it grew with its back facing him.

This way, the sneak attack from behind would be completely useless. Not only could the other party see the attack from behind, but his cultivation level was also the same as his—they were both one-star King tiers!

Seeing that the four-armed King was constantly looking around with two pairs of green eyes, Tang Zhen, who was in the dark World, sneered and suddenly rushed towards the other party.

After passing through the four-armed King's body, Tang Zhen's entire body suddenly exited The Dark World.

An enormous pressure assaulted him. Tang Zhen felt as though he was wrapped in the inner tire of a car as a thick bloody smell came from the tip of his nose.

He had actually appeared inside the four-armed monster's body. However, because the monster's body was too strong, he was unable to cause the four-armed giant to explode!

Since that was the case, he might as well completely crush his internal organs!

The purple lightning short sword suddenly appeared in Tang Zhen's hand as he thought up to this point. He randomly hacked at the surrounding organs!

It was also at this moment that the four-armed King suddenly felt a sense of danger coming from within his body.

However, before he could react, he felt as if his body was about to explode. His internal organs felt like they were being cut by knives, causing him to be in so much pain that he wished he was dead.

There seemed to be a warm current in his abdomen, which rushed into his mouth and then spurting out. It was dirty blood with broken internal organs!

"Uh, hehe."

The four-armed King was rather vicious. After sensing the abnormality within his body, he knew that he was definitely going to die. Without any hesitation, he turned the four blades around and stabbed them towards his body!

With a “plop,” the four blades entered his body at the same time and then reappeared from the other side.

Unfortunately, in that instant, the four-armed King felt his body become empty. Clearly, the enemy had already escaped.

The four-armed King laughed bitterly and knelt on the ground with a “plop.” He looked at Tang Zhen, who had suddenly appeared in front of him. A trace of strangeness appeared on his face as he slowly fell to the ground and breathed his last!

At the same time, Tang Zhen’s progress bar, which hadn’t moved for a long time since he had become a King level cultivator, suddenly jumped forward by one square.

Tang Zhen suddenly frowned after discovering this situation. This was because he had never discovered that this four-armed King was a monster from the beginning!

However, the level up progress could not be faked. The four-armed King in front of him was indeed a monster. However, due to special reasons, he had not discovered it at all!

After realizing that the giant tower might be a monster’s lair, Tang Zhen immediately became more careful. At the same time, he was also pondering why this monster was no different from the cultivators in the tower.

It was also at this moment that a memory surfaced in Tang Zhen’s heart, causing his breathing to become slightly sluggish. A trace of comprehension flashed in his eyes!

#### Chapter 590 The giant awakens (1)

Tang Zhen suddenly thought of the spirit brain corpse King and the tower he had built with a special method.

In that strange tower, The Spiritual Brain Zombie King had used a special method to cultivate a group of residents who looked exactly like the natives of the tower.

Although these residents were still monsters in essence, they could avoid the rules of the tower world and would not grow brains in their minds. Even if they did not have any cultivation, their intelligence would not be affected at all.

Or rather, they were a new race that could help the spirit brain corpse King control the territory of the loucheng world more effectively!

Unfortunately, just as the spirit brain corpse King’s plan was about to succeed, it was destroyed by Tang Zhen. The clone of the spirit brain corpse King was destroyed, and the plan to conquer it was also destroyed, which made him hate Tang Zhen to the bone.

Before the spirit brain corpse King’s soul was killed, it had once vowed to kill Tang Zhen. Unfortunately, because of the barrier between the two worlds, it could not hurt Tang Zhen at all.

However, if the spirit brain corpse King knew about Tang Zhen's current cultivation, it would be worried all day long, afraid that Tang Zhen would seek revenge.

Because the current Tang Zhen could definitely kill the once incomparably powerful spirit brain corpse King like crushing an ant!

Tang Zhen had now completely lost interest in the enemy, the spirit brain corpse King. If there was a chance, it would be good to kill it. If there was no chance, Tang Zhen would not hold a grudge against it.

After carefully thinking about it, he had benefited a lot from him, especially that incomplete world's origin. Because Tang Zhen didn't know what it was, he had always left it in the corner.

It wasn't until later on when his cultivation continued to rise and he knew more secret knowledge that Tang Zhen finally knew how precious the world's origin was!

In addition, when helping heaven battling city complete the tower upgrade mission, this world's origin would play a crucial role!

These thoughts flashed through Tang Zhen's heart like lightning. He continued to search a couple of shops and swept all the goods within them!

At the same time, Tang Zhen also activated the [ high-grade treasure detector ], which he had not used for a long time. Waves of detection fluctuations spread out continuously along the street.

In the blink of an eye, all kinds of light dots appeared on the screen in front of Tang Zhen, indicating the locations of the treasures of different levels.

Tang Zhen's figure continuously shuttled through the streets according to the information displayed on the map. He would occasionally break through the doors and specially pick out high grade treasures.

As for those low grade treasures, unless he took them along the way, Tang Zhen would definitely not waste his time.

The reason he was in such a hurry was that he had suddenly felt an abnormal situation. It was as if the strange spiritual power that had spread throughout the entire building had suddenly trembled slightly.

At the same time that mental energy trembled, Tang Zhen seemed to have sensed that a consciousness was about to awaken!

There was no doubt that the strange spiritual power that was monitoring the entire tower was released by the sleeping giant.

It was precisely this unforeseen event that caused Tang Zhen's speed to suddenly double. He was like a bolt of lightning as he dashed through the streets. He did not even look at what he had obtained when he collected the items.

Unconsciously, Tang Zhen saw situ Yuanzhi who was not far away. At this moment, he was holding onto a strange creature and was also continuously exploring.

Tang Zhen sized up the creature and discovered that its appearance was similar to a frog. However, it had tens of pairs of centipede-like legs. At this moment, its stomach was so full that it was round. It had simply become a super meatball!

Even so, situ Yuanzhi still patted the monster's head from time to time and threw a bunch of items into its big mouth.

Tang Zhen could not help but sigh when he saw this. As expected, there were countless strange things and rumors in the tower world. This was the first time he had seen such a storage method!

He had thought that situ Yuanzhi would pack a lot of things, but the truth was far from what he had imagined.

At this moment, situ Yuanzhi also saw Tang Zhen. When he saw that Tang Zhen's hands were empty, he was slightly stunned.

One could tell from his expression that he was extremely curious in his heart as to why Tang Zhen did not have an item in his hand.

At this moment, the place where the two of them were standing was shockingly a shop that sold books. Tang Zhen's eyes brightened when he saw this. He was just about to step forward when his expression suddenly changed.

"Not good, the giant is awake!"

As soon as Tang Zhen's voice fell, the giant tower under his feet began to shake as if there was an earthquake.

The expressions of the two of them changed drastically. Tang Zhen waved both of his hands without the slightest hesitation and sent a series of symbols onto the defensive light curtain.

It was as if the frost on the window had been melted by hot air. A hole for one person to enter and exit immediately appeared on the defensive light curtain that was already starting to appear from time to time.

"Quickly run!"

After Tang Zhen roared out this sentence, situ Yuanzhi grabbed the meatball monster's head and rushed towards the entrance of the cave.

The hole in the defensive light curtain was only big enough for one person to enter and exit, but the meatball beast in situ Yuanzhi's hand was the size of several people. She really did not know how it would get out of the hole.

Just as Tang Zhen was feeling curious, situ Yuanzhi had already rushed out of the hole. He stepped on a flying object and floated in mid-air as he ruthlessly pulled the meatball beast out.

Under Tang Zhen's dumbstruck gaze, the round meatball was actually like a dough as it was directly pulled into the shape of a noodle by situ Yuanzhi, and it passed through the defensive light curtain easily.

However, the meatball beast in situ Yuanzhi's hand had already become a huge worm that was ten meters long!

"City Lord Tang, you should come out as well!"

After situ Yuanzhi ran out, he glanced at the sky above his head, and his expression suddenly changed as he shouted at Tang Zhen.

Tang Zhen nodded slightly. However, he took two steps back and violently waved his hand at the shop.

In the next moment, the books in the shop converged into a River that continuously flowed towards Tang Zhen. However, the instant it came into contact with his right hand, it disappeared without a trace!

"A storage equipment!"

Situ Yuanzhi exclaimed and looked at the ring on Tang Zhen's finger. His eyes were filled with envy and jealousy.

In just a few short seconds, all the books in the shop were swept clean by Tang Zhen. Then, he jumped out of the hole.

Spreading their wings, Tang Zhen and situ Yuanzhi flew rapidly into the distance. The sky and land beneath their feet were filled with foreign cultivators who were fleeing like ants.

In the city behind them, there were some cultivators who were madly attacking the defensive light curtain. Their faces were filled with despair.

With the awakening of the giant, the strength of the defensive light curtain had suddenly more than doubled, and it was no longer as easy to tear as before.

Everyone knew that once the giant woke up, all the cultivators trapped in the city would disappear without a trace!

He didn't need to guess to know that these cultivators would not be able to escape death!

Just as the cultivators were running for their lives, a violent gust of wind came, and the sky seemed to be covered by dark clouds.

The cultivators who were running for their lives were all covered by the shadow, which made them run faster.

Tang Zhen observed through the map view and discovered that the shadow was actually a Mace in the giant's hand. It was wrapped with a power that could destroy everything as it rapidly smashed toward the area they were at.

The three-headed and six-armed giant growled. One of its heads was staring at the fleeing cultivators, but its eyes were unusually cold, as if it was looking at a group of ants.

A death aura instantly lingered in Tang Zhen's heart, causing his body to tremble slightly.

"Run up, as fast as you can!"

Tang Zhen roared after estimating the attack trajectory of the mace. His entire body instantly turned into lightning and appeared several thousand meters away in the blink of an eye.

Situ Yuanzhi, who was dragging the big bug, had a ferocious expression on his face. At this critical moment, he, who was willing to risk his life for money, suddenly slapped the monster's jaw, causing it to be agitated and shrink back into its original ball shape.

Immediately after, situ Yuanzhi raised his leg in the air and kicked the ball away. Then, he turned into a shooting star and flew in the direction where the ball had disappeared.

It was also at this moment that the mace, which could destroy mountains, swept past the place where the two of them had just been and fell among the fleeing cultivators in the blink of an eye.
